

Report to Shareholders

2008

Universal Forest Products[®]

Dear Shareholders:

It's not always easy to "manage forward"; to look at your business today and make decisions based on where you think you're going to be six, nine or 12 months down the road. You have to embark on strategies that might not make sense for the moment, but that you believe will positively affect your performance in the months and years ahead. Fortunately, that's what we did in 2008: We did our best to forecast our challenges and opportunities, and to manage to those forecasts. We made tough decisions to consolidate operations, to do more and more with less, to redirect resources and energy to new opportunities, and to focus on adjusting appropriately to the tough realities of this new economy.

It paid off. We ended the year with a \$4.3 million profit, and don't know of another company in our industry that can make that claim. We generated \$116 million in cash and used it to reduce our debt to \$101 million by the end of the year. We maintained a strong balance sheet and positioned our company well for 2009 and beyond.

This is a source of great pride for us and for the people of Universal, who fought hard and well to do what we call "picking up quarters"—saving money wherever we can. They helped identify and pursue new opportunities; they tightened their belts; they focused on eliminating waste and on finding new and better ways to do the things we do; and they kept a positive attitude even when we scaled back operations, consolidated facilities, and sometimes bid farewell to loved and valued co-workers.

On Jan. 1, 2009, our executive leadership team was enhanced by the addition of Pat Webster as President and Chief Operating Officer. Pat joined Universal 24 years ago and progressed through many positions over the years. He was most recently President of our Western Division, before being appointed COO. As Bill Currie prepares to step down from full-time employment in July 2009 (he will remain Chairman of the Board), the Company is in good hands with Pat, CEO Mike Glenn and the rest of Mike's leadership team, which continues to push for success in these toughest of times.

These times have been humbling for a company that knew nothing but growth and success for 53 years. They also have allowed us to show our true colors. Anyone can make money in good times; making money in times like these illustrates the strengths of our business model, our strategies and our people. Let's take a look at our 2008 results and our outlook:

In 2008, **Do-It-Yourself/retail (DIY)** sales were \$911 million, an 8% decrease from 2007. Historically low consumer confidence levels kept people from opening their pocketbooks even | for the smallest purchases, hurting retailers large and small alike. While growth in this market is dependent on economic recovery. Universal has reasons for optimism:

- We picked up market share with big box and independent retailers in new markets that will drive healthy new sales.
- We continue to add products to our portfolio (our expanding lines of wood and wood-composite decking, balusters, decorative post caps and other products can be seen at http://www.ufpi.com/product/decking.htm) and embarked on a lawn and garden initiative that allows us to offer more new products, such as trellises and planter boxes.
- Our operating efficiencies continue to improve and remain among the best in the business.
- We remain at the cutting edge of wood-treating technology, treating our lumber with the only wood preservative in the world recognized as an Environmentally Preferred Product.

Our **industrial** sales for the year were \$605 million, an increase of more than 2% over 2007. Despite an overall decline in U.S. manufacturing activity, we gained market share and grew sales in industrial. Given the ongoing success and opportunity in this market, it represents a growing importance in our future:

- We intend to grow our capacity and offerings in the packaging arena, focusing not just on the unusual and difficult products, but leveraging our competitive advantages and skills to meet the everyday packaging needs of industries from coast to coast.
- This industry remains highly fragmented, providing many opportunities for growth.
- Our concrete forming initiative, launched in 2007, is quickly growing and mirrors the
 overall industrial market in many positive ways: It is highly fragmented, customers are
 seeking a large national supplier that can meet needs in multiple locations, and it
 requires many of the same skills, capital and knowledge we employ in our other markets.
- New road construction and infrastructure will likely rely heavily on concrete construction.

In 2008, our **site-built construction** sales were \$455 million, down 23% from 2007, largely due to a 41% decline in single-family housing starts. Additionally, multifamily housing and light commercial construction, which were more promising areas in 2007 and early 2008, began to soften as tighter credit conditions restricted activity.

 We believe housing will remain weak in 2009 and the pace of recovery will be modest, when it begins.

A Letter to our Shareholders - iii -

Manufactured housing sales in 2008 were \$304 million, a decrease of 23% from 2007, due to an overall decline in industry production. Universal maintains a commanding market share and will continue to track with the industry.

While we believe 2009 will see further declines in shipments, we believe sales of HUD-code homes eventually will grow as credit conditions become more favorable and consumers look for affordable housing alternatives.

The same holds true for the modular housing industry, which is being hurt by the oversupply of single-family housing and tight credit conditions. As each of those issues resolves, we believe the modular housing market, which provides builders with components manufactured in a controlled environment, will begin to grow.

"THESE are the times that try men's souls" wrote Thomas Paine on a cold winter day in 1776 while troops were fighting in unimaginable conditions for America's freedom. While they're fitting words to describe 2008 (and, likely, 2009), they're followed by prose that's less famous but perhaps an even more appropriate portrayal of our experience: "... the harder the conflict, the more glorious the triumph. What we obtain too cheap, we esteem too lightly. ... "

In these challenging times, the success we're seeing from our efforts and hard-fought battles is particularly sweet because it was so difficult in the making. But we're careful not to rest on our laurels or to forget how important it is to remain conservative in our approach to business and steadfast in our integrity. There are difficult times ahead and there's a lot of hard work to do-and we're doing it: We're focused on maintaining our solid foundation; creating stability for customers, communities, employees and others who depend on us; and generating solid, sustainable growth, for our stakeholders today and for those who will be with us in the years and decades to come.

Sincerely,

William G. Currie

William 6. Curil

Executive Chairman

Michael B. Glenn Chief Executive Officer

UNIVERSAL FOREST PRODUCTS, INC. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We advise you to read the issues discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations in conjunction with our Consolidated Financial Statements and the Notes to the Consolidated Financial Statements included in this Annual Report for the year ended December 27, 2008. We also encourage you to read our Annual Report on Form 10-K, filed with the United States Securities and Exchange Commission. That report includes "Risk Factors" that you should consider in connection with any decision to buy or sell our securities. We are pleased to present this overview of 2008.

OVERVIEW

Our results for 2008 were impacted by the following:

- We experienced sales decreases in our site-built construction, manufactured housing, and DIY/retail markets, while we
 continued to grow sales to the industrial market. We believe we have gained additional share in each of the markets we
 serve except manufactured housing. We have been able to maintain our significant market share of manufactured housing
 business.
- Our overall unit sales decreased 9% in 2008 compared to 2007, as sales out of existing facilities and operations we closed decreased by 12% and we experienced a 3% increase in unit sales as a result of acquisitions and new operations.
- Lumber prices were 11% lower in 2008 compared to 2007, reducing our overall selling prices (see "Impact of the Lumber Market on Our Operating Results" below) and sales dollars. In addition, competition for business was a challenge in 2008 as each of our markets we serve contracted and thus impacted our selling prices and margins.
- Single-family housing starts decreased approximately 41% in 2008 compared to 2007 as a result of an excess supply of homes, tighter credit conditions, and an increase in foreclosures. In addition, tight credit conditions in the second half of 2008 resulted in a decline in multi-family and light commercial construction activity.
- Consumer spending for large repair/remodel projects decreased as many homeowners have lost equity in devalued homes and had less disposable income as a result of higher costs for necessities such as food, fuel and utilities. The Consumer Confidence Index has fallen from 87.3 at the beginning of the year to 38 at the end of December.
- Shipments of HUD code manufactured homes were down 14% in 2008 and industry sales of modular homes have also continued to decline due, in part, to an excess supply of site-built homes and tight credit conditions.
- The industrial market is declining due to the general weakening of the U.S. economy. We gained additional share and increased sales to this market due, in part, to acquisitions, adding new customers, and adding new concrete forming business.

UNIVERSAL FOREST PRODUCTS, INC. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

- Our gross profits decreased approximately 18% compared to the same period of 2007 due to 1) a combination of lower unit sales out of existing facilities and fixed manufacturing costs; 2) intense pricing pressure, particularly in the site-built construction market; and 3) higher transportation costs in the second and third quarters of 2008 primarily due to an increase in diesel fuel prices and a decline in the number of available carriers.
- We recorded a \$7.2 million expense for asset impairments and other exit costs associated with facilities and equipment we decided to idle. We believe these actions will improve our cost structure, profitability and cash flow.
- Since the beginning of this difficult economic cycle, we have focused on cash flow and working capital management. We are pleased to have reduced our debt by approximately \$105 million and our sale of receivables program by approximately \$27 million.

We expect the current challenging conditions to prevail throughout 2009; however, our strong financial position, solid business model, diverse business opportunities and ability to adjust appropriately to our opportunities position us better than most to endure challenging times. We believe that current economic conditions and uncertainties limit our ability to provide meaningful guidance for ranges of likely financial performance; therefore, we will not provide sales or net earnings targets for the foreseeable future.

HISTORICAL LUMBER PRICES

The following table presents the Random Lengths framing lumber composite price for the years ended December 27, 2008, December 29, 2007, and December 30, 2006.

| | Random Lengths Composite | | | | | | | |
|--------------------------|--------------------------|----|---------|----|---------|--|--|--|
| | Average \$/MBF | | | | | | | |
| | 2008 | | 2007 | | 006 | | | |
| January | \$ 249 | \$ | 292 | \$ | 382 | | | |
| February | 244 | | 289 | | 377 | | | |
| March | 240 | | 280 | | 368 | | | |
| April | 255 | | 286 | | 369 | | | |

| Annual percentage change | | (3.7%) | | (13.4%) | | (10.6%) | | | |

IMPACT OF THE LUMBER MARKET ON OUR OPERATING PROFITS

We experience significant fluctuations in the cost of commodity lumber products from primary producers ("Lumber Market"). We generally price our products to pass lumber costs through to our customers so that our profitability is based on the value-added manufacturing, distribution, engineering, and other services we provide. As a result, our sales levels (and working capital requirements) are impacted by the lumber costs of our products. Lumber costs are a significant percentage of our cost of goods sold.

Our gross margins are impacted by both (1) the relative <u>level</u> of the Lumber Market (i.e. whether prices are higher or lower from comparative periods), and (2) the <u>trend</u> in the market price of lumber (i.e. whether the price of lumber is increasing or decreasing within a period or from period to period). Moreover, as explained below, our products are priced differently. Some of our products have fixed selling prices, while the selling prices of other products are indexed to the reported Lumber Market with a fixed dollar adder to cover conversion costs and profits. Consequently, the <u>level</u> and <u>trend</u> of the Lumber Market impact our products differently.

Below is a general description of the primary ways in which our products are priced.

• Products with fixed selling prices. These products include value-added products such as decking and fencing sold to DIY/retail customers, as well as trusses, wall panels and other components sold to the site-built construction market, and most industrial packaging products. Prices for these products are generally fixed at the time of the sales quotation for a specified period of time or are based upon a specific quantity. In order to maintain margins and reduce any exposure to adverse trends in the price of component lumber products, we attempt to lock in costs for these sales commitments with our suppliers. Also, the time period and quantity limitations generally allow us to re-price our products for changes in lumber costs from our suppliers.

• Products with selling prices indexed to the reported Lumber Market with a fixed dollar "adder" to cover conversion costs and profits. These products primarily include treated lumber, remanufactured lumber, and trusses sold to the manufactured housing industry. For these products, we estimate the customers' needs and carry anticipated levels of inventory. Because lumber costs are incurred in advance of final sale prices, subsequent increases or decreases in the market price of lumber impact our gross margins. For these products, our margins are exposed to changes in the trend of lumber prices.

Changes in the <u>trend</u> of lumber prices have their greatest impact on the following products:

- Products with significant inventory levels with low turnover rates, whose selling prices are indexed to the Lumber Market. In other words, the longer the period of time these products remain in inventory, the greater the exposure to changes in the price of lumber. This would include treated lumber, which comprises approximately 17% of our total sales. This exposure is less significant with remanufactured lumber, trusses sold to the manufactured housing market, and other similar products, due to the higher rate of inventory turnover. We attempt to mitigate the risk associated with treated lumber through vendor consignment inventory programs. (Please refer to the "Risk Factors" section of our annual report on form 10-K, filed with the United States Securities and Exchange Commission.)
- Products with fixed selling prices sold under long-term supply arrangements, particularly those involving multi-family construction projects. We attempt to mitigate this risk through our purchasing practices by locking in costs.

In addition to the impact of the Lumber Market <u>trends</u> on gross margins, changes in the <u>level</u> of the market cause fluctuations in gross margins when comparing operating results from period to period. This is explained in the following example, which assumes the price of lumber has increased from period one to period two, with no changes in the <u>trend</u> within each period.

| | Period 1 | | riod 2 |
|-----------------|-----------|----|--------|
| Lumber cost | \$ 300 | \$ | 400 |
| Conversion cost | 50 | | 50 |
| = Product cost | 350 | | 450 |
| Adder | 50 | | 50 |
| = Sell price | \$ 400 | \$ | 500 |
| Gross margin | 12.5% | | 10.0% |

As is apparent from the preceding example, the <u>level</u> of lumber prices does not impact our overall profits but does impact our margins. Gross margins are negatively impacted during periods of high lumber prices; conversely, we experience margin improvement when lumber prices are relatively low.

BUSINESS COMBINATIONS AND ASSET PURCHASES

See Notes to Consolidated Financial Statements, Note B, "Business Combinations."

RESULTS OF OPERATIONS

The following table presents, for the periods indicated, the components of our Consolidated Statements of Earnings as a percentage of net sales.

| | Years Ended | | | | | | |
|---|----------------------|----------------------|-------------------|--|--|--|--|
| | December 27, 2008 | December 29, 2007 | December 30, 2006 | | | | |
| Net sales | 100.0% | 100.0% | 100.0% | | | | |
| Cost of goods sold | 88.6 | 87.7 | 85.7 | | | | |
| Gross profit | 11.4 | 12.3 | 14.3 | | | | |
| Selling, general, and administrative expenses | 10.2 | 9.8 | 9.7 | | | | |
| Net loss on disposition of assets and other impairment and exit charges | 0.3 | 0.4 | | | | | |
| Earnings from operations | 0.9 | 2.1 | 4.6 | | | | |

| Earnings before minority interest | 0.3 | 0.9 | 2.7 | | | | |
| Minority interest | (0.1) | (0.1) | (0.1) | | | | |
| Net earnings | 0.2% | 0.8% | 2.6% | | | | |

GROSS SALES

We market, manufacture and engineer wood and wood-alternative products for the do-it-yourself/retail ("D-I-Y/retail") market, structural lumber products for the manufactured housing market, engineered wood components for the site-built construction market, and specialty wood packaging for various markets. We also provide framing services for the site-built construction market and various forms for concrete construction. Our strategic long-term sales objectives include:

- Diversifying our end market sales mix by increasing sales of specialty wood packing to industrial users, penetrating the
 concrete forms market, and increasing our sales of engineered wood components for custom home, multi-family and light
 commercial construction.
- Expanding geographically in our core businesses.
- Increasing sales of "value-added" products and framing services. Value-added product sales primarily consist of fencing, decking, lattice, and other specialty products sold to the DIY/retail market, specialty wood packaging, engineered wood components, and "wood alternative" products. Engineered wood components include roof trusses, wall panels, and floor systems. Wood alternative products consist primarily of composite wood and plastics. Although we consider the treatment of dimensional lumber with certain chemical preservatives a value-added process, treated lumber is not presently included in the value-added sales totals.
- Maximizing unit sales growth while achieving return on investment goals.

The following table presents, for the periods indicated, our gross sales (in thousands) and percentage change in gross sales by market classification.

The following table presents estimates, for the periods indicated, of our percentage change in gross sales which were attributable to changes in overall selling prices versus changes in units shipped.

| | | % Change | | | | | |
|------------------|----------|-------------------|----------|--|--|--|--|
| | in Sales | in Selling Prices | in Units | | | | |
| 2008 versus 2007 | -11% | -2% | -9% | | | | |
| 2007 versus 2006 | -5% | -5% | 0% | | | | |
| 2006 versus 2005 | -1% | -4% | +3% | | | | |

Gross sales in 2008 decreased 11% compared to 2007. We estimate that our unit sales decreased by 9% and overall selling prices decreased by 2% comparing the two periods. We estimate our unit sales increased 3% as a result of acquisitions and new facilities, while unit sales from existing and closed facilities decreased 12%. Our overall selling prices fluctuate as a result of the Lumber Market (see "Historical Lumber Prices") and were negatively impacted by pricing pressure primarily in the site-built construction market.

Gross sales in 2007 decreased 5% compared to 2006. We estimate that our unit sales remained flat while overall selling prices decreased by 5% comparing the two periods. We estimate our unit sales increased 9% as a result of acquisitions and new facilities, while unit sales from existing and closed facilities decreased 9%.

Changes in our sales by market are discussed below.

DIY/Retail:

Gross sales to the DIY/retail market decreased 8% in 2008 compared to 2007, as a result of an estimated 7% decrease in overall unit sales combined with an estimated 1% decrease in overall selling prices. We estimate that our unit sales increased 2% as a result of acquisitions, while unit sales from existing and closed facilities decreased 9%. Unit sales declined due to the impact of the housing market on our retail customers whose business is closely correlated with single-family housing starts and a decline in consumer spending as evidenced by a decline in same store sales of our "big box" customers.

Gross sales to the DIY/retail market increased 3% in 2007 compared to 2006, as a result of a 7% increase in unit sales offset by a 4% decrease in selling prices due to a soft Lumber Market. We estimate that our unit sales increased as a result of our acquisitions of GeoMatrix and Aljoma and the significant market share gains we realized with "big box" retail customers. Our sales to these customers increased 12% (8% due to acquisitions and 4% due to existing facilities) while our sales to other retailers whose business is more closely correlated with housing starts was off 17% (a 10% increase due to acquisitions offset by a 27% decrease due to existing facilities). Our increase in sales to "big box" customers was less than expected, which we believe was caused by a decline in consumer spending on large home improvement projects.

Site-Built Construction:

Gross sales to the site-built construction market decreased 23% in 2008 compared to 2007, due to an estimated 14% decrease in unit sales out of existing facilities and an estimated 9% decrease in average selling prices primarily due to intense pricing pressure and a soft Lumber Market. National single-family housing starts were off a reported 40.5% for 2008 compared to 2007. In the first half of 2008, we were able to mitigate some of the decrease in the single-family market by pursuing multi-family and light commercial business and increasing our turn-key framing activities. However, these markets have recently been impacted by tight credit conditions as well as other economic factors.

Gross sales to the site-built construction market decreased 28% in 2007 compared to 2006, due to a 14% decrease in unit sales out of existing facilities, a 4% decline due to our decision to exit the Las Vegas framing market, and a 10% decrease in selling prices due to a soft Lumber Market and competitive pricing pressure, particularly in our third and fourth quarters. Single-family housing starts have fallen approximately 29% in 2007 compared to 2006 as a result of an excess supply of homes, tighter credit conditions, and an increase in foreclosures associated with sub-prime lending practices. These decreases were offset by market share gains we have realized in the multi-family and light commercial market and a 1% increase in unit sales due to our acquisitions of Dura-Bilt and Perfection.

Industrial:

Gross sales to the industrial market increased 2% in 2008 compared to 2007, due to an estimated 3% increase in unit sales and an estimated 1% decrease in selling prices. Acquisitions and our continued focus on adding new customers, including concrete forming, helped us mitigate the effect of a decline in sales to certain customers that supply the housing market or have been impacted by the weakening U.S. economy.

Gross sales to the industrial market increased 8% in 2007 compared to 2006, due to an 8% increase in units shipped offset by a slight decrease in selling prices. Our acquisitions of United and Aljoma and our continued focus on adding new customers, including concrete forming, helped us mitigate the effect of a decline in sales to certain customers that supply the housing market.

Manufactured Housing:

Gross sales to the manufactured housing market decreased 23% in 2008 compared to 2007, due to an estimated 21% decrease in unit sales and an estimated 2% decrease in selling prices due to the Lumber Market. Our decline in unit sales from existing facilities was the result of an overall decline in industry production. The industry most recently reported a 14% decrease in HUD code production in 2008, while modular production was off a reported 28%.

Gross sales to the manufactured housing market increased 3% in 2007 compared to 2006, due to a 9% increase in unit sales offset by a 6% decrease in selling prices primarily due to a soft Lumber Market. We estimate that our unit sales increased 21% as a result of acquiring Banks, while unit sales from existing and closed facilities decreased 12% due to the continued decline in industry production.

Value-Added and Commodity-Based Sales:

The following table presents, for the periods indicated, our percentage of value-added and commodity-based sales to total sales.

| | Value-Added | Commodity-Based |
|------|-------------|-----------------|
| 2008 | 60.4% | 39.6% |
| 2007 | 60.5% | 39.5% |
| 2006 | 62.7% | 37.3% |

Value-added sales decreased 11% in 2008 compared to 2007, primarily due to decreased sales of trusses, engineered wood products, wall panels, and manufactured brite and other lumber, offset partially by increases in sales of industrial packaging and related components. Commodity-based sales decreased 11% in 2008 compared to 2007, primarily due to decreased sales of non-manufactured brite and other lumber and non-manufactured treated lumber. See Notes to Consolidated Financial Statements, Note P, "Segment Reporting."

Value-added sales decreased 9% in 2007 compared to 2006, primarily due to decreased sales of trusses, turn-key framing packages, and wall panels, offset partially by increased sales of fencing and lattice sold to the DIY/retail market. Commodity-based sales remained flat in 2007 compared to 2006 in spite of difficult market conditions primarily due to our acquisitions of Aljoma and Banks.

COST OF GOODS SOLD AND GROSS PROFIT

Our gross profit percentage decreased to 11.4% in 2008 from 12.3% in 2007 and gross profit dollars decreased 17.7% in 2008 compared to 2007. The decline in profitability was primarily due to a combination of:

- Price pressure in all of our markets but particularly in our site-built construction market.
- A significant increase in fuel and other transportation costs in the second and third quarter of 2008.
- Missed buying opportunities as a result of stocking lower levels of lumber inventory.
- Cost inefficiencies as a result of lower volumes combined with fixed manufacturing costs.

Our gross profit percentage decreased to 12.3% in 2007 from 14.3% in 2006 and gross profit dollars decreased 19% in 2007 compared to 2006. The decline in profitability was primarily due to a combination of:

- Increased pricing pressure on sales to the site-built construction market due to the overall decline in market demand and excess capacity of suppliers.
- Cost inefficiencies as a result of the impact of decreased unit sales out of existing facilities and fixed manufacturing costs.
- Sales incentives offered to customers to gain market share.
- A change in sales mix whereby historically higher margin engineered wood components sold to site-built construction customers comprised a lower percentage of our sales.

SELLING, GENERAL, AND ADMINISTRATIVE EXPENSES

Selling, general and administrative ("SG&A") expenses decreased by approximately \$18.8 million, or 7.6%, in 2008, while we reported a 9% decrease in unit sales. Existing facilities decreased SG&A expenses by approximately \$2.6 million, operations we closed decreased expenses approximately \$20.9 million, and business acquisitions added \$4.7 million in expenses. The decrease in SG&A expenses in our existing facilities was primarily due to a decline in wages and related benefits due to a reduction in headcount and a reduction in bonus and other performance related compensation. These decreases were partially offset by an increase in bad debt expense. We believe our cost reduction efforts will continue to drive down our costs and will have a more significant impact in future reporting periods.

SG&A expenses decreased by approximately \$10.4 million, or 4%, in 2007. Existing facilities and operations we closed had the effect of decreasing our SG&A expenses approximately \$17.4 million, while business acquisitions added \$7.0 million to our costs. The cost decrease in our existing facilities was primarily due to a decline in accrued bonus expense, which is tied to operating profits and return on investment.

NET LOSS ON DISPOSITION OF ASSETS AND OTHER IMPAIRMENT AND EXIT CHARGES

We incurred \$7.2 million and \$8.2 million of asset impairments and other costs associated with idled facilities and downsizing efforts in 2008 and 2007, respectively. We believe these actions will improve our cost structure, profitability and cash flow. See Notes to Consolidated Financial Statements, Note C, "Assets Held for Sale and Net Loss on Disposition of Assets and Other Impairment and Exit Charges."

INTEREST, NET

Net interest costs were lower in 2008 compared to 2007 due to lower debt balances combined with a decrease in short-term interest rates.

Net interest costs were higher in 2007 compared to 2006 primarily due to an increase in borrowings on the revolving credit facility as a result of acquisitions.

INCOME TAXES

Effective tax rates differ from statutory federal income tax rates, primarily due to provisions for state and local income taxes and permanent tax differences. Our effective tax rate decreased to 23.6% in 2008 compared to 39.9% in 2007. This year's rate was favorably impacted by certain state income tax credits we expect to receive and the impact of other permanent tax differences on substantially lower pretax income. See Notes to Consolidated Financial Statements, Note L, "Income Taxes".

Our effective tax rate increased to 39.9% in 2007 compared to 34.6% in 2006 primarily due to the impairment charge we recorded for property, plant and equipment for our Canadian subsidiary, for which we recorded no related tax benefit.

OFF-BALANCE SHEET TRANSACTIONS AND CONTRACTUAL OBLIGATIONS

We have no significant off-balance sheet transactions other than operating leases. The following table summarizes our contractual obligations as of December 27, 2008 (in thousands).

| | Payments Due by Period | | | | | | | | | |
|--------------------------------------|------------------------|----------|----|--------|----|--------|----|--------|----|---------|
| | Le | ess than | | 1 – 3 | | 3 – 5 | | After | | |
| Contractual Obligation | 1 | l Year | | Years | | Years | 5 | Years | | Total |
| Long-term debt and capital lease | | | | | | | | | | |
| obligations | \$ | 15,490 | \$ | 557 | \$ | 70,527 | \$ | 14,600 | \$ | 101,174 |
| Estimated interest on long-term debt | | 3,836 | | 5,917 | | 3,110 | | 1,664 | | 14,527 |
| Operating leases | | 13,976 | | 17,931 | | 4,799 | | 2,294 | | 39,000 |
| Capital project purchase obligations | | 890 | | | | | | | | 890 |
| Total | \$ | 34,192 | \$ | 24,405 | \$ | 78,436 | \$ | 18,558 | \$ | 155,591 |

As of December 27, 2008, we also had \$32.2 million in outstanding letters of credit issued during the normal course of business, as required by some vendor contracts.

LIQUIDITY AND CAPITAL RESOURCES

The table below presents, for the periods indicated, a summary of our cash flow statement (in thousands):

| | December 27, 2008 | December 29, 2007 | | Dec | December 30, 2006 | |
|--|----------------------|-------------------|----------|-----|----------------------|--|
| Cash from operating activities | 88,551 | \$ | 87,078 | \$ | 152,322 | |
| Cash from investing activities | (11,367) | | (91,971) | | (111,705) | |
| Cash from financing activities | (107,452) | | (2,610) | | (35,724) | |
| Net change in cash and cash equivalents | (30,268) | | (7,503) | | 4,893 | |
| Cash and cash equivalents, beginning of year | 43,605 | | 51,108 | | 46,215 | |
| Cash and cash equivalents, end of year | \$ 13,337 | \$ | 43,605 | \$ | 51,108 | |

In general, we financed our growth in the past through a combination of operating cash flows, our revolving credit facility, industrial development bonds (when circumstances permit), and issuances of long-term notes payable at times when interest rates are favorable. We have not issued equity to finance our growth except in the case of a large acquisition. We manage our capital structure by attempting to maintain a targeted ratio of debt to equity and debt to earnings before interest, taxes, depreciation and amortization. We believe this is one of many important factors to maintaining a strong credit profile, which in turn helps ensure timely access to capital when needed. We are currently below our internal targets and plan to manage our capital structure conservatively in light of current economic conditions.

Seasonality has a significant impact on our working capital from March to August which historically resulted in negative or modest cash flows from operations in our first and second quarters. Conversely, we experience a substantial decrease in working capital from September to February which results in significant cash flow from operations in our third and fourth quarters.

Due to the seasonality of our business and the effects of the Lumber Market, we believe our cash cycle (days sales outstanding plus days supply of inventory less days payables outstanding) is a good indicator of our working capital management. Our cash cycle (excluding the impact of our sale of receivables program) increased to 46 days in 2008 from 45 days in 2007 due to a one day increase in our days of sales outstanding as a one day decrease in our days supply of inventory was offset by a one day decrease in our days of payables outstanding. The increase in our days of sales outstanding was primarily due to slower payments with certain site-built and industrial customers.

Cash from operating activities was approximately \$89 million in 2008. Our net earnings of \$4.3 million included \$48.3 million of non-cash expenses and a \$35.9 million decrease in working capital. Working capital decreased primarily due to a decline in sales which caused a reduction in our inventory and receivables, offset by the effect of terminating of our sales of receivables program at the end of September 2008. Terminating this program resulted in an operating cash outflow of \$27 million in 2008. Our sales of receivables program was terminated on September 26, 2008, due to the downgrade of the credit rating of certain customers whose receivables were part of this program. This downgrade triggered a re-pricing of the program under the terms of the agreement which made this program a less favorable source of liquidity.

We made the decision to limit our investing activities in 2008 and make debt repayment our first priority for use of our operating cash flows. As a result, cash used for investing activities decreased by approximately \$81 million. Our proceeds from the sale of property, plant and equipment was approximately \$30 million consisting primarily of vacant land we owned as a result of our acquisition of Aljoma in 2007 and certain plants we previously closed for which we had no future use. (See Notes to Consolidated Financial Statements, Note C, "Assets Held for Sale and Net Loss on Disposition of Assets and Other Impairment and Exit Charges".) Amounts spent for business acquisitions totaled approximately \$23 million. (See Notes to Consolidated Financial Statements, Note B, "Business Combinations".) Finally, we curtailed our capital expenditures and spent approximately \$19 million in 2008.

On December 27, 2008, we had approximately \$30 million outstanding on our \$300 million revolving credit facility. The revolving credit facility supports letters of credit totaling approximately \$29.7 million on December 27, 2008. Financial covenants on the unsecured revolving credit facility and unsecured notes include a minimum net worth requirement, minimum interest and fixed charge coverage tests, and a maximum leverage ratio. The agreements also restrict the amount of additional indebtedness we may incur and the amount of assets which may be sold. We were within all of our lending requirements on December 27, 2008. If our profitability declines in the future it may adversely impact our ability to meet certain of these loan covenants without further action on our part. Management will evaluate what, if any, action or actions may be available to resolve any future non-compliance. A possible consequence of non-compliance may include an adjustment to increase our interest rates to reflect current market conditions.

ENVIRONMENTAL CONSIDERATIONS AND REGULATIONS

See Notes to Consolidated Financial Statements, Note N, "Commitments, Contingencies, and Guarantees".

CRITICAL ACCOUNTING POLICIES

In preparing our consolidated financial statements, we follow accounting principles generally accepted in the United States. These principles require us to make certain estimates and apply judgments that affect our financial position and results of operations. We continually review our accounting policies and financial information disclosures. Following is a summary of our more significant accounting policies that require the use of estimates and judgments in preparing the financial statements.

ACCOUNTS RECEIVABLE ALLOWANCES

We record provisions against gross revenues for estimated returns and cash discounts in the period when the related revenue is recorded. These estimates are based on factors that include, but are not limited to, historical discounts taken, analysis of credit memorandum activity, and customer demand. We also evaluate the allowance for uncollectible accounts receivable and discounts based on historical collection experience and specific identification of other potential problems, including the economic climate. Actual collections can differ, requiring adjustments to the allowances.

SELF-INSURANCE RESERVES

We are primarily self-insured for certain employee health benefits, and have self-funded retentions for general liability, automobile liability, property and workers' compensation. We are fully self-insured for environmental liabilities. The general liability, automobile liability, property, workers' compensation, and certain environmental liabilities are managed through a wholly-owned insurance captive; the related assets and liabilities of which are included in the consolidated financial statements as of December 27, 2008. Our accounting policies with respect to the reserves are as follows:

- General liability, automobile, workers' compensation reserves are accrued based on third party actuarial valuations of the expected future liabilities.
- Health benefits are self-insured by us up to our pre-determined stop loss limits. These reserves, including incurred but not reported claims, are based on internal computations. These computations consider our historical claims experience, independent statistics, and trends.
- The environmental reserve is based on known remediation activities at certain wood preservation facilities and the potential for undetected environmental matters at other sites. The reserve for known activities is based on expected future costs and is computed by in-house experts responsible for managing our monitoring and remediation activities. (See "Environmental Considerations and Regulations.")

REVENUE RECOGNITION

Earnings on construction contracts are reflected in operations using either percentage-of-completion accounting, which includes the cost to cost and units of delivery methods, or completed contract accounting, depending on the nature of the business at individual operations. Under percentage-of-completion using the cost to cost method, revenues and related earnings on construction contracts are measured by the relationships of actual costs incurred related to the total estimated costs. Under percentage-of-completion using the units of delivery method, revenues and related earnings on construction contracts are measured by the relationships of actual units produced related to the total number of units. Revisions in earnings estimates on the construction contracts are recorded in the accounting period in which the basis for such revisions becomes known. Projected losses on individual contracts are charged to operations in their entirety when such losses become apparent. Under the completed contract method, revenues and related earnings are recorded when the contracted work is complete and losses are charged to operations in their entirety when such losses become apparent.

LONG-LIVED ASSETS AND GOODWILL

We evaluate long-lived assets for indicators of impairment when events or circumstances indicate that this risk may be present. Our judgments regarding the existence of impairment are based on market conditions, operational performance and estimated future cash flows. If the carrying value of a long-lived asset is considered impaired, an impairment charge is recorded to adjust the asset to its fair value. Changes in forecasted operations and changes in discounted rates can materially affect these estimates. In addition, we test goodwill for impairment by utilizing the discounted cash flow method.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Notes to Consolidated Financial Statements, Note A, "Summary of Significant Accounting Policies".

FORWARD OUTLOOK

The following section contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The forward-looking statements are based on the beliefs and assumptions of management, together with information available to us when the statements were made. Future results could differ materially from those included in such forward-looking statements as a result of, among other things, the factors set forth in the "Risk Factors" section of our Annual Report on Form 10-K, filed with the United States Securities and Exchange Commission and certain economic and business factors which may be beyond our control. Investors are cautioned that all forward-looking statements involve risks and uncertainties.

"GO 2010"

Since we announced our Growth & Opportunity 2010 Goals in our annual report on form 10-K for the period ended December 30, 2006, industry and general economic conditions have significantly deteriorated. For example, the Lumber Market has declined from an average of \$388/mbf in 2005 to an average of \$252/mbf in 2008; a 35% decline from when we first announced our goals, which has adversely impacted our sales. We are currently reviewing these long-term goals and expect to modify them when market conditions stabilize so new targets can be set using more current data and assumptions.

DIY/RETAIL MARKET

Harvard's Joint Center for Housing Studies projects home improvement spending to decline at an annual rate of 12.1% by the third quarter of 2009. A decline is forecasted due to a decrease in consumer spending, a continued decline in housing market activity, and tight credit conditions in 2009. The Consumer Confidence Index fell to 38 in December, down from 87.3 at the beginning of the year.

In 2009, we believe we will increase our market share with certain "big box" home improvement and other retailers, but will continue to be impacted by the soft market conditions discussed above. On a long-term basis, it is our goal to achieve sales growth by:

- Increasing our market share of value-added wood products and preservative-treated products as a result of our national presence, service capabilities that meet stringent customer requirements, diversified product offering, and purchasing leverage.
- Increasing our sales of wood alternative products such as composite wood decking, which continues to take market share from preservative-treated products. Although we expect this trend to continue to some extent, we believe wood products will continue to maintain a dominant market share for the foreseeable future as a result of its cost advantages over wood alternative products.
- Increasing our market penetration of products distributed by our newly formed Consumer Products Division, including decorative balusters, accessories, and post caps, plastic lattice and other proprietary plastic products which have greatly enhanced our deck and fencing product lines.
- Developing new value-added products and services for this market through our Consumer Products Division.
- Adding new products or new markets through strategic business acquisitions.

SITE-BUILT CONSTRUCTION MARKET

The *Mortgage Bankers Association of America* forecasts a 32% decline in single-family housing starts to an estimated 0.4 million starts in 2009 as the industry continues to recover from excess inventory levels of single-family homes, tighter credit conditions, and an increase in foreclosures associated with sub-prime lending practices.

In 2009, we believe the decline in single-family housing starts will continue to adversely impact our sales and gross margins. Our strategy during this downturn is to down-size our operations to current demand and increase our share with custom home builders and multi-family and light commercial construction markets.

On a long-term basis, we anticipate growth in our sales to the site-built construction market as market conditions improve and as a result of market share gains as weaker competitors exit the market.

MANUFACTURED HOUSING MARKET

The *National Association of Home Builders* forecasts a 16.6% decline in manufactured home shipments in 2009. It is our goal to maintain our current market share of trusses produced for the HUD code market, which increased as a result of our acquisition of Banks in November 2006. On a long-term basis we believe the HUD code market will regain a greater share of the single-family market as credit conditions normalize and as consumers seek more affordable housing alternatives.

Sales of modular homes are expected to be impacted by the current oversupply of single-family housing and tight credit conditions. It is our goal to maintain our market share of trusses produced for the modular market as a result of our strong relationships with modular builders, design services and proprietary products. On a long-term basis, we anticipate modular housing will gain additional share of the single-family market as a result of more developers adopting the controlled building environment of modular construction as a method of cost control.

INDUSTRIAL MARKET

One of our key strategic objectives is to increase our sales of wood packaging products to industrial users. We believe the vast amount of hardwood and softwood lumber consumed for industrial applications, combined with the highly fragmented nature of this market provides us with significant market share growth opportunities as a result of our competitive cost advantages in manufacturing, purchasing, and material utilization. To take advantage of these opportunities, we plan to continue to obtain market share through an internal growth strategy utilizing our current manufacturing capabilities and dedicated industrial sales force. However, we recognize that any market share gains we may realize in 2009 may be offset by a decline in demand due to the rapidly deteriorating economy. On a long-term basis, we also plan to evaluate strategic acquisition opportunities and continue to gain market share with concrete forming customers.

GROSS PROFIT

We believe the following factors may impact our gross profits and margins in 2009:

- Our ability to maintain sales and gross margins on products sold to our largest customers. We believe our level of service, geographic diversity, and quality of products provides an added value to our customers. If our customers are unwilling to pay for these advantages, our sales and gross margins may be reduced.
- In the first half of 2009 we expect to continue to experience a decline in demand in each of our markets, which in turn will impact our sales prices, capacity utilization, and profitability.
- Fluctuations in the relative level of the Lumber Market and the trend in the market price of lumber. (See "Impact of the Lumber Market on our Operating Results.")
- Fuel and transportation cost trends.
- Our ability to continue to achieve planned cost reductions through plant consolidations and our Continuous Improvement
 initiative. In January 2009, we temporarily closed facilities in Bunn, NC and Ooltewah, TN to better align manufacturing
 capacity with the current business environment. In February 2009, we also temporarily closed a facility in White Pigeon,
 MI.
- We have a long-term goal of continuing to increase our ratio of value-added sales to total sales, which in turn should increase gross margins. Our acquisition and internal sales growth strategies will help us continue to make progress toward this objective. However, achievement of this goal is dependent, in part, upon certain factors that are beyond our control.
- Organizational changes made to our lumber purchasing function to continue to enhance our buying advantage over competitors.

SELLING, GENERAL, AND ADMINISTRATIVE EXPENSES

In the third quarter of 2008, as a result of deteriorating market conditions, we took actions to close plants to better align our manufacturing capacity with the current business environment and reduce our headcount and certain overhead costs. We realized most of these cost reductions in the fourth quarter of 2008 and we expect that these actions will favorably impact our SG&A expenses in 2009. The decreases mentioned above are expected to be slightly offset by a stock grant made on February 1, 2009. We estimate that we will recognize total expense of approximately \$1.6 million over the next five years for this grant. In addition, economic and credit conditions may significantly impact our bad debt expense. We continue to monitor our customer's credit profiles carefully and make changes in our terms where necessary in response to this heightened risk.

On a long-term basis, we expect that our SG&A expenses will primarily be impacted by:

- Our growth in sales to the industrial market and, when industry conditions improve, the site-built construction market. Our sales to these markets require a higher ratio of SG&A costs due, in part, to product design requirements.
- Our incentive compensation program discussed above.
- Our growth and success in achieving Continuous Improvement objectives.

LIQUIDITY AND CAPITAL RESOURCES

Our cash cycle will continue to be impacted in the future based on our mix of sales by market. Sales to the site-built construction and industrial markets require a greater investment in working capital (inventory and accounts receivable) than our sales to the DIY/retail and manufactured housing markets.

Management expects to spend up to \$10 million on capital expenditures in 2009 and incur depreciation of approximately \$35 million and amortization of intangible assets of approximately \$10 million. On December 27, 2008, we had outstanding purchase commitments on capital projects of approximately \$0.9 million.

We have no present intention to change our dividend policy, which is currently \$0.06 per share paid semi-annually.

Our Board of Directors has approved a share repurchase program under which we have authorization to buy back approximately 1.2 million shares as of December 27, 2008. In the past, we have repurchased shares in order to offset the effect of issuances resulting from our employee benefit plans and at times when our stock price falls to a pre-determined level.

The Series 2002-A Senior Notes totaling \$15.0 million are due December 18, 2009, which we currently intend to pay-off through cash flows generated from operations. We are also obligated to pay additional amounts due on long-term debt totaling approximately \$0.5 million in 2009.

We currently have assets held for sale totaling \$8.3 million at December 27, 2008 that we intend to sell during 2009. On February 6, 2009, we sold real estate located in Woodburn, Oregon. The net sales price was approximately \$5.2 million resulting in a gain of approximately \$2.4 million.

Management's Annual Report on Internal Control Over Financial Reporting

The management of Universal Forest Products, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to us and the Board of Directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

We assessed the effectiveness of our internal control over financial reporting as of December 27, 2008. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control* — *Integrated Framework*. Based on our assessment, management has concluded that as of December 27, 2008, our internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

The effectiveness of the Company's internal control over financial reporting has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report, which follows our report.

Universal Forest Products, Inc.

February 20, 2009

Report of Independent Registered Public Accounting Firm On Internal Control over Financial Reporting

The Board of Directors and Shareholders of Universal Forest Products, Inc.

We have audited Universal Forest Products, Inc. and subsidiaries' internal control over financial reporting as of December 27, 2008, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Universal Forest Products, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Universal Forest Products, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 27, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Universal Forest Products, Inc. and subsidiaries as of December 27, 2008 and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years the period ended December 27, 2008 and our report dated February 20, 2009 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Grand Rapids, Michigan February 20, 2009

Report of Independent Registered Public Accounting Firm On Financial Statements

The Board of Directors and Shareholders of Universal Forest Products, Inc.

We have audited the accompanying consolidated balance sheets of Universal Forest Products, Inc. and subsidiaries as of December 27, 2008 and December 29, 2007, and the related consolidated statements of earnings, shareholders' equity, and cash flows for each of the three years in the period ended December 27, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Universal Forest Products, Inc. and subsidiaries at December 27, 2008 and December 29, 2007, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 27, 2008, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Universal Forest Products, Inc. and subsidiaries' internal control over financial reporting as of December 27, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 20, 2009 expressed an unqualified opinion thereon.

A. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

OPERATIONS

We market, manufacture and engineer wood and wood-alternative products for the do-it-yourself/retail ("D-I-Y/retail") market, structural lumber products for the manufactured housing market, engineered wood components for the site-built construction market, and specialty wood packaging for various markets. We also provide framing services for the site-built construction market and various forms for concrete construction. Our principal products include preservative-treated wood, remanufactured lumber, lattice, fence panels, deck components, specialty packaging, engineered trusses, wall panels, and other building products.

PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include our accounts and those of our wholly-owned and majority-owned subsidiaries and partnerships. In addition, we consolidate 50% owned entities over which we exercise control. Intercompany transactions and balances have been eliminated.

MINORITY INTEREST IN SUBSIDIARIES

Minority interest in results of operations of consolidated subsidiaries represents the minority shareholders' share of the income or loss of various consolidated subsidiaries. The minority interest reflects the original investment by these minority shareholders combined with their proportional share of the earnings or losses of these subsidiaries, net of distributions paid.

FISCAL YEAR

Our fiscal year is a 52 or 53 week period, ending on the last Saturday of December. Unless otherwise stated, references to 2008, 2007, and 2006 relate to the fiscal years ended December 27, 2008, December 29, 2007, and December 30, 2006, respectively. Fiscal years 2008, 2007 and 2006 were comprised of 52 weeks.

FAIR VALUE DISCLOSURES OF FINANCIAL INSTRUMENTS

The estimated fair values of financial instruments have been determined in accordance with Statement of Financial Accounting Standards ("SFAS") No. 107, *Disclosures about Fair Value of Financial Instruments*. Significant differences in fair market values and recorded values are disclosed in Note E. The estimated fair value amounts have been determined using available market information and appropriate valuation methodologies. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that we could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The fair value estimates presented herein are based on pertinent information available to management as of December 27, 2008. Although we are not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and current estimates of fair value may differ significantly from the amounts presented herein.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash and highly-liquid investments purchased with an original maturity of three months or less. Cash equivalents totaled approximately \$0.1 million and \$33.8 million as of December 27, 2008 and December 29, 2007, respectively.

As a result of our cash management system, checks issued but not presented to our bank for payment create negative cash balances. These negative balances are included in accounts payable and accrued liabilities and totaled \$18.2 million and \$21.3 million as of December 27, 2008 and December 29, 2007, respectively.

ACCOUNTS RECEIVABLE

We perform periodic credit evaluations of our customers and generally do not require collateral. Accounts receivable are due under a range of terms we offer to our customers. Discounts are offered, in most instances, as an incentive for early payment.

ACCOUNTS RECEIVABLE ALLOWANCES

We base our allowances related to receivables on historical credit and collections experience, and the specific identification of other potential problems, including the general economic climate. Actual collections can differ, requiring adjustments to the allowances. Individual accounts receivable balances are evaluated on a monthly basis, and those balances considered uncollectible are charged to the allowance. Collections of amounts previously written off are recorded as an increase to the allowance.

The following table presents the activity in our accounts receivable allowances (in thousands):

| V Forded December 27, 2000. | ginning alance | Ch C | dditions narged to osts and xpenses | De | ductions* | _Coll | ections | nding alance |
|--|-------------------|---------|-------------------------------------|----|-----------|-------|---------|-----------------|
| Year Ended December 27, 2008: | | | | | | | | |
| Allowance for possible losses on accounts receivable | \$ 2,403 | \$ | 24,734 | \$ | (25,453) | \$ | 756 | \$ 2,440 |
| Year Ended December 29, 2007: | | | | | | | | |
| Allowance for possible losses on accounts receivable | \$ 3,576 | \$ | 23,686 | \$ | (25,374) | \$ | 515 | \$ 2,403 |
| Year Ended December 30, 2006: | | | | | | | | |
| Allowance for possible losses on accounts receivable | \$ 3,396 | \$ | 23,787 | \$ | (23,975) | \$ | 368 | \$ 3,576 |

^{*} Includes accounts charged off, discounts given to customers and actual customer returns and allowances.

We record estimated sales returns, discounts, and other applicable adjustments as a reduction of net sales in the same period revenue is recognized.

INVENTORIES

Inventories are stated at the lower of cost or market. The cost of inventories includes raw materials, direct labor, and manufacturing overhead. Cost is determined on a weighted average basis. Raw materials consist primarily of unfinished wood products expected to be manufactured or treated prior to sale, while finished goods represent various manufactured and treated wood products ready for sale.

PROPERTY, PLANT, AND EQUIPMENT

Property, plant, and equipment are stated at cost. Expenditures for renewals and betterments are capitalized, and maintenance and repairs are expensed as incurred. Amortization of assets held under capital leases is included in depreciation and amortized over the shorter of the estimated useful life of the asset or the lease term. Depreciation is computed principally by the straight-line method over the estimated useful lives of the assets as follows:

| Land improvements | 5 to 15 years |
|---|------------------|
| Buildings and improvements | 15 to 31.5 years |
| Machinery, equipment and office furniture | 3 to 10 years |

FOREIGN CURRENCY TRANSLATION

Our foreign operations use the local currency as their functional currency. Accordingly, assets and liabilities are translated at exchange rates as of the balance sheet date and revenues and expenses are translated using weighted average rates, with translation adjustments included as a separate component of shareholders' equity.

SELF-INSURANCE RESERVES

We are primarily self-insured for certain employee health benefits, and have self-funded retentions for general liability, automobile liability, property and workers' compensation. We are fully self-insured for environmental liabilities. The general liability, automobile liability, property, workers' compensation, and certain environmental liabilities are managed through a wholly-owned insurance captive; the related assets and liabilities of which are included in the consolidated financial statements as of December 27, 2008 and December 29, 2007. Our policy is to accrue amounts equal to actuarially determined or internally computed liabilities. The actuarial and internal valuations are based on historical information along with certain assumptions about future events. Changes in assumptions for such matters as legal actions, medical cost trends, and changes in claims experience could cause these estimates to change in the future.

INCOME TAXES

Deferred income tax assets and liabilities are computed for differences between the financial statement and tax basis of assets and liabilities that will result in taxable or deductible amounts in the future. Such deferred income tax asset and liability computations are based on enacted tax laws and rates. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

REVENUE RECOGNITION

Revenue is recognized at the time the product is shipped to the customer. Generally, title passes at the time of shipment. In certain circumstances, the customer takes title when the shipment arrives at the destination. However, our shipping process is typically completed the same day.

Earnings on construction contracts are reflected in operations using either percentage-of-completion accounting, which includes the cost to cost and units of delivery methods, or completed contract accounting, depending on the nature of the business at individual operations. Under percentage-of-completion using the cost to cost method, revenues and related earnings on construction contracts are measured by the relationships of actual costs incurred related to the total estimated costs. Under percentage-of-completion using the units of delivery method, revenues and related earnings on construction contracts are measured by the relationships of actual units produced related to the total number of units. Revisions in earnings estimates on the construction contracts are recorded in the accounting period in which the basis for such revisions becomes known. Projected losses on individual contracts are charged to operations in their entirety when such losses become apparent. Under the completed contract method, revenues and related earnings are recorded when the contracted work is complete and losses are charged to operations in their entirety when such losses become apparent.

The following table presents the balances of percentage-of-completion accounts on December 27, 2008 and December 29, 2007 which are included in other current assets and other accrued liabilities, respectively (in thousands):

| | 2008 | 2007 |
|---|-------------|--------------|
| Cost and Earnings in Excess of Billings | \$ 7,934 | \$ 10,927 |
| Billings in Excess of Cost and Earnings | 5,882 | 8,568 |

SHIPPING AND HANDLING OF PRODUCT

Shipping and handling costs that are charged to and reimbursed by the customer are recognized as revenue. Costs incurred related to the shipment and handling of products are classified in cost of goods sold.

LONG-LIVED ASSETS

In accordance with SFAS No. 144, Accounting for the Impairment and Disposal of Long-Lived Assets ("SFAS No. 144"), we evaluate the recoverability of our long-lived assets by determining whether unamortized balances could be recovered through undiscounted future operating cash flows over the remaining lives of the assets. If the sum of the expected future cash flows was less than the carrying value of the assets, an impairment loss would be recognized for the excess of the carrying value over the fair value.

EARNINGS PER SHARE

Basic earnings per share ("EPS") is calculated based on the weighted average number of common shares outstanding during the periods presented. Diluted EPS is calculated based on the weighted average number of common and common equivalent shares outstanding during the periods presented, giving effect to stock options granted (see Note J) utilizing the "treasury stock" method.

A reconciliation of the changes in the numerator and the denominator from the calculation of basic EPS to the calculation of diluted EPS follows (in thousands, except per share data):

| | | 2008 | 2008 | | | | 2007 | 2006 | | | | | | |
|---|-------------------|-------------------------|------|-----------------------|----|---------------------|-------------------------|------|-----------------------|----|---------------------|-------------------------|----|-----------------------|
| | ncome merator) | Shares (Denominator) | | Per Share mount | | Income umerator) | Shares (Denominator) | 5 | Per Share mount | | income umerator) | Shares (Denominator) | | Per Share mount |
| Net Earnings | \$ 4,343 | | | | \$ | 21,045 | | | | \$ | 70,125 | | | |
| EPS — Basic Income available to | | | | | | | | | | | | | | |
| common stockholders | 4,343 | 19,074 | \$ | 0.23 | | 21,045 | 19,056 | \$ | 1.10 | | 70,125 | 18,820 | \$ | 3.73 |
| Effect of Dilutive Securities | | | | | | | | - | | | | | | |
| Options | | 151 | | | | | 306 | | | | | 550 | | |
| EPS — Diluted Income available to common stockholders | | | | | | | | | | | | | | |
| and assumed options exercised | \$ 4,343 | 19,225 | \$ | 0.23 | \$ | 21,045 | 19,362 | \$ | 1.09 | \$ | 70,125 | 19,370 | \$ | 3.62 |

Options to purchase 230,000 shares of common stock at exercise prices ranging from \$22.88 to \$36.01 were outstanding as of December 27, 2008, but were not included in the computation of diluted EPS because the options' exercise prices were greater than the average market price of the common stock during the period and, therefore, would be antidilutive.

Options to purchase 30,000 shares of common stock at exercise prices ranging from \$31.11 to \$36.01 were outstanding as of December 29, 2007, but were not included in the computation of diluted EPS because the options' exercise prices were greater than the average market price of the common stock during the period and, therefore, would be antidilutive.

No outstanding options were excluded from the computation of diluted EPS as of December 30, 2006.

USE OF ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. We believe our estimates to be reasonable; however, actual results could differ from these estimates.

RECLASSIFICATIONS

Certain prior year information has been reclassified to conform to the current year presentation.

RECENTLY ISSUED ACCOUNTING STANDARDS

Effective at the beginning of the fiscal year ending December 27, 2008, we adopted SFAS No. 157, *Fair Value Measurements* ("SFAS No. 157"). This new standard establishes a framework for measuring the fair value of assets and liabilities. This framework is intended to provide increased consistency in how fair value determinations are made under various existing accounting standards which permit, or in some cases require, estimates of fair market value. SFAS No. 157 also expands financial statement disclosure requirements about a company's use of fair value measurements, including the effect of such measures on earnings. We have only adopted the provisions of SFAS No. 157 for financial assets and liabilities for fiscal year ending December 27, 2008 and will adopt the provision for non-financial assets and liabilities for fiscal year beginning December 28, 2008. The adoption has not had a material impact on our consolidated financial statements. We are evaluating the impact of adopting the provisions of SFAS 157 for non-financial assets and liabilities and do not expect them to have a material impact on our consolidated financial statements. SFAS No. 157 requires fair value measurements be classified and disclosed in one of three designated categories.

The following table summarizes the valuation of our financial instruments as of December 27, 2008. These instruments are classified as Level 1 which are financial instruments with unadjusted, quoted prices listed on active market exchanges.

| (in millions) | Γotal | Activ | ed Prices in ve Markets Level 1) |
|------------------------------------|------------|-------|--|
| Assets: | | | |
| Cash and cash equivalents | \$ 13.3 | \$ | 13.3 |
| Trading marketable securities | 3.0 | | 3.0 |
| | \$ 16.3 | \$ | 16.3 |
| Liabilities: | | | |
| Deferred compensation arrangements | \$ 3.0 | \$ | 3.0 |
| | \$ 3.0 | \$ | 3.0 |
| | \$ 3.0 | \$ | 3.0 |

Effective at the beginning of the fiscal year ending December 27, 2008, we adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS No. 159"). SFAS No. 159 allows companies to choose to measure certain financial instruments and certain other items at fair value. The statement requires that unrealized gains and losses are reported in earnings for items measured using the fair value option and establishes presentation and disclosure requirements. We have elected not to apply the fair value option to any of our financial instruments except for those expressly required by U.S. GAAP.

In December 2007, the Financial Accounting Standards Board ("FASB") issued SFAS No. 141(R), *Business Combinations* ("SFAS 141(R)"), which replaces FAS 141. SFAS 141(R) establishes principles and requirements for how an acquirer in a business combination recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any controlling interest; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for us for business combinations closed on or after December 28, 2008.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements — an amendment of ARB No. 51* ("SFAS 160"). SFAS 160 establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. Specifically, this statement requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the noncontrolling interest will be included in consolidated net income on the face of the income statement. SFAS 160 clarifies that changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest. In addition, this statement requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. Such gain or loss will be measured using the fair value of the noncontrolling equity investment on the deconsolidation date. SFAS 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. SFAS 160 is effective for us for the fiscal year beginning December 28, 2008. We are currently evaluating the impact SFAS No. 160 may have on our consolidated financial statements.

B. BUSINESS COMBINATIONS

We completed the following business combinations in 2008, 2007 and 2006, which were accounted for using the purchase method (in millions).

| | | | | | N | Net | | | | | |
|--|-------------------|------------------------|-------|-------------------------|----|------------|------------------|---|--|--|--|

| Classic Truss Company, Inc. ("Classic") | January 9, 2006 | \$2.0 (asset purchase) | \$ 0.4 | \$ | 1.6 | Eastern Division | Manufactures and distributes engineered wood components for site-built construction. The company is located in Fort Pierce, FL. 2005 sales were \$6.0 million. | | |
| | | | | | | | Purchased 100% voting interest | | |

The purchase price allocations for D-Stake and IWI are preliminary and will be revised as final estimates of intangible asset values are made. The amounts assigned to major intangible classes for business combinations mentioned above are as follows (in millions):

| | Non-compete agreements | Customer Relationships | Patents | Goodwill – Total | Goodwill – Tax Deductible |
|-------------|------------------------|---------------------------|---------|---------------------|---------------------------------|
| D-Stake | \$2.6 | | | \$2.5 | \$2.5 |
| Shawnlee | 0.3 | \$0.4 | | 0.3 | 0.3 |
| | 0.3 | 0.4 | | 0.2 | 0.2 |
| | 0.1 | 0.2 | | 0.1 | 0.1 |
| IWI | 5.4 | | | 5.2 | 0.0 |
| Deck Images | | 0.6 | | | |
| Perfection | 0.3 | 0.5 | | | |
| Aljoma | 0.4 | | | | |
| Banks | 4.3 | 4.1 | | 16.0 | 16.0 |
| GeoMatrix | 0.3 | 2.0 | \$3.0 | 3.8 | 3.8 |
| United | 1.4 | 1.3 | | | |
| Dura-Bilt | 0.9 | 3.1 | | 2.6 | 2.6 |
| Classic | 0.4 | | | | |

The business combinations mentioned above were not significant to our operating results individually or in aggregate, and thus pro forma results are not presented.

C. ASSETS HELD FOR SALE AND NET LOSS ON DISPOSITION OF ASSETS AND OTHER IMPAIRMENT AND EXIT CHARGES

Included in "Assets held for sale" on our Consolidated Balance Sheets is certain property, plant and equipment totaling \$8.3 million on December 27, 2008 and \$33.6 million on December 29, 2007. The assets held for sale consist of certain vacant land and several facilities we closed to better align manufacturing capacity with the current business environment. The fair values were determined based on appraisals or recent offers to acquire the assets. These and other idle assets were evaluated based on the requirements of SFAS No. 144, which resulted in an impairment and other exit charges totaling approximately \$7.2 million and \$8.2 million included in "Net loss on disposition of assets and other impairment and exit charges" for the years ending December 27, 2008 and December 29, 2007, respectively. These amounts include the following, separated by reporting segment (in millions):

| | December 2 | 7, 2008 | December 2 | 9, 2007 |
|-------------------|-------------|---------|-------------|---------|
| | Eastern and | | Eastern and | |
| | Western | All | Western | All |
| | Divisions | Other | Divisions | Other |
| Severances | \$1.1 | \$0.3 | \$1.3 | \$0.1 |
| Fixed assets | 2.3 | 0.8 | 5.8 | 1.0 |
| Notes receivable | 1.6 | | | |
| Lease termination | 0.5 | | | |
| Other intangibles | 0.6 | | | |

The changes in assets held for sale in 2008 are as follows (in millions):

| Description | Book alue | Date of Sale | et Sales Price |
|---|--------------|------------------|-------------------|
| Assets held for sale as of December 29, 2007 | \$ 33.6 | | |
| Additions | 8.6 | | |
| Transfers to held for use | (4.2) | | |
| Sale of vacant land acquired as part of acquisition of Aljoma | (24.5) | January 24, 2008 | \$ 24.2 |
| Sale of certain real estate in Thorndale, Ontario | (2.7) | March 18, 2008 | 2.7 |
| Sale of certain real estate in Fishersville, Virginia | (1.5) | July 23, 2008 | 1.9 |
| Sale of certain real estate in Hohenwald, Tennessee | (1.0) | August 11, 2008 | 1.0 |
| Assets held for sale as of December 27, 2008 | \$ 8.3 | | |

We have transferred certain assets back to held for use because we do not believe we will sell these assets within a year due to deteriorating economic conditions.

D. GOODWILL AND OTHER INTANGIBLE ASSETS

We account for goodwill and other intangible assets in accordance with the provisions of SFAS No. 142 *Goodwill and Other Intangible Assets*. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually or when a triggering event occurs. We tested for impairment in the fourth quarter by utilizing the discounted cash flow method and allocating goodwill based on operating segments, which resulted in no impairment.

The following amounts were included in other intangible assets, net as of December 27, 2008 and December 29, 2007 (in thousands):

| | 2008 | | | | | 2007 | | | |
|------------------------|--------|--------|--------------|----------|--------|--------|--------------|-----------|--|
| | | | Accumulated | | | | Aco | cumulated | |
| | Assets | | Amortization | | Assets | | Amortization | | |
| Non-compete agreements | \$ | 26,899 | \$ | (13,481) | \$ | 20,871 | \$ | (10,764) | |
| Licensing agreements | | | | | | 4,050 | | (871) | |
| Customer relationships | | 17,734 | | (10,326) | | 13,814 | | (5,601) | |
| Patents | | 2,980 | | (1,055) | | 2,980 | | (630) | |
| Total | \$ | 47,613 | \$ | (24,862) | \$ | 41,715 | \$ | (17,866) | |

Amortization is computed principally by the straight-line method over the estimated useful lives of the intangible assets as follows:

| Non-compete agreements | 5 to 10 years |
|------------------------|---------------|
| Licensing agreements | 3 to 5 years |
| Customer relationship | 5 years |

Amortization expense of intangibles totaled \$9.8 million, \$8.0 million and \$5.8 million in 2008, 2007, and 2006, respectively. The estimated amortization expense for intangibles for each of the five succeeding fiscal years is as follows (in thousands):

| 2009 | \$ 8,166 |
|------------|--------------|
| 2010 | 6,778 |
| 2011 | 4,753 |
| 2012 | 2,106 |
| 2013 | 553 |
| Thereafter | 395 |
| Total | \$ 22,751 |

The changes in the net carrying amount of goodwill and indefinite-lived intangible assets for the years ended December 27, 2008 and December 29, 2007, are as follows (in thousands):

| | | | efinite- .ived |
|----------------------------------|---------------|----|-------------------|
| | | _ | angible |
| | Goodwill | A | Assets |
| Balance as of December 29, 2006 | \$ 152,837 | \$ | 2,340 |
| Acquisitions | 1,860 | | |
| Final purchase price allocations | (7,797) | | |
| Translation adjustment | 1,032 | | |
| Balance as of December 29, 2007 | \$ 147,932 | \$ | 2,340 |
| Final purchase price allocations | 1,226 | | |
| Acquisitions | 8,013 | | |
| Translation adjustment | (248) | | |
| Balance as of December 27, 2008 | \$ 156,923 | \$ | 2,340 |

E. <u>DEBT</u>

We have a five-year, \$300 million unsecured revolving credit facility, which includes amounts reserved for letters of credit. Cash borrowings are charged interest based upon an index equal to the Eurodollar rate (in the case of borrowings in US Dollars) or the bankers' acceptance rate quoted (in the case of borrowings in Canadian Dollars), plus a margin (ranging from 27 to 90 basis points, based upon our financial performance). We are also charged an annual facility fee on the entire amount of the lending commitment (ranging from 8 to 25 basis points, based upon our performance), and a usage premium (ranging from 5 to 12.5 basis points, based upon our performance) at times when borrowings in US Dollars exceed \$140 million. The average borrowing rate on this facility was 3.6% and 5.5% in 2008 and 2007, respectively. The amount outstanding on the revolving credit facility is included in the long-term debt summary below. The revolving credit facility supports letters of credit totaling approximately \$29.7 million on December 27, 2008.

Outstanding letters of credit extended on our behalf aggregated \$32.2 million on December 27, 2008, which includes approximately \$14.8 million related to industrial development revenue bonds. Outstanding letters of credit extended on our behalf aggregated \$33.7 million on December 29, 2007, which includes approximately \$16.1 million related to industrial development revenue bonds. Letters of credit have terms ranging from one to three years, and include an automatic renewal clause. The letters of credit are charged an annual interest rate ranging from 27 to 90 basis points under the \$300 million facility, based upon our financial performance.

Long-term debt and capital lease obligations are summarized as follows on December 27, 2008 and December 29, 2007 (amounts in thousands):

| | 2 | 2008 | 2007 |
|---|----|---------|---------------|
| Series 1998-A Senior Notes Tranche B, due on December 21, 2008, interest payable semi-annually at 6.98% | | | \$ 59,500 |
| Series 1998-A Senior Notes Tranche C, due on December 21, 2008, interest payable semi-annually at 6.98% | | | 19,000 |
| Series 2002-A Senior Notes Tranche A, due on December 18, 2009, interest payable semi-annually at 5.63% | \$ | 15,000 | 15,000 |
| Series 2002-A Senior Notes Tranche B, due on December 18, 2012, interest payable semi-annually at 6.16% | | 40,000 | 40,000 |
| Revolving credit facility totaling \$300 million due on February 12, 2012, interest due monthly at a floating rate (0.96% on December 27, 2008) | | 30,257 | 54,614 |
| Series 1998 Industrial Development Revenue Bonds, due on December 1, 2018, interest payable monthly at a floating rate | | | 1,300 |
| Series 1999 Industrial Development Revenue Bonds, due on August 1, 2029, interest payable monthly at a floating rate (1.08% on December 27, 2008) | | 3,300 | 3,300 |
| Series 2000 Industrial Development Revenue Bonds, due on October 1, 2020, interest payable monthly at a floating rate (1.27% on December 27, 2008) | | 2,700 | 2,700 |
| Series 2000 Industrial Development Revenue Bonds, due on November 1, 2020, interest payable monthly at a floating rate (1.27% on December 27, 2008) | | 2,400 | 2,400 |
| Series 2001 Industrial Development Revenue Bonds, due on November 1, 2021, interest payable monthly at a floating rate (1.27% on December 27, 2008) | | 2,500 | 2,500 |
| Series 2002 Industrial Development Revenue Bonds, due on December 1, 2022, interest payable monthly at a floating rate (1.16% on December 27, 2008) | | 3,700 | 3,700 |
| Capital lease obligations, interest imputed at 6.72% | | 279 | 857 |
| Other | | 1,038 | 1,200 |
| | | 101,174 | 206,071 |
| Less current portion | | 15,490 | 945 |
| Long-term portion | \$ | 85,684 | \$ 205,126 |

Financial covenants on the unsecured revolving credit facility and unsecured notes include a minimum net worth requirement, minimum interest coverage tests, and a maximum leverage ratio. The agreements also restrict the amount of additional indebtedness we may incur and the amount of assets which may be sold. We were within all of our lending requirements on December 27, 2008.

On December 27, 2008, the principal maturities of long-term debt and capital lease obligations are as follows (in thousands):

| 2009 | \$ | 15,490 |
|------------|---------|---------|
| 2010 | | 303 |
| 2011 | | 254 |
| 2012 | | 70,527 |
| 2013 | | |
| Thereafter | <u></u> | 14,600 |
| | \$ | 101,174 |

On December 27, 2008, the estimated fair value of our long-term debt, including the current portion, was \$101.7 million, which was \$0.5 million greater than the carrying value. The estimated fair value is based on rates anticipated to be available to us for debt with similar terms and maturities.

F. LEASES

Leased property included in the balance sheet on December 27, 2008 and December 29, 2007 is as follows (in thousands):

| | 2008 | 2007 | | |
|-------------------------------|-------------|------|---------|--|
| Machinery and equipment | \$ 2,589 | \$ | 2,498 | |
| Less accumulated amortization | (2,001) | | (1,091) | |
| | \$ 588 | \$ | 1,407 | |

We lease certain real estate under operating and capital lease agreements with original terms ranging from one to ten years. We are required to pay real estate taxes and other occupancy costs under these leases. Certain leases carry renewal options of five to fifteen years. We also lease motor vehicles, equipment, and aircrafts under operating lease agreements for periods of one to ten years. Future minimum payments under non-cancelable leases on December 27, 2008 are as follows (in thousands):

| | Capital | | Operating | | | |
|---|---------|------|-----------|--------|-------|--------|
| | Leas | es | Leases | | Total | |
| 2009 | \$ | 223 | \$ | 13,976 | \$ | 14,199 |
| 2010 | | 75 | | 11,153 | | 11,228 |
| 2011 | | | | 6,778 | | 6,778 |
| 2012 | | | | 3,315 | | 3,315 |
| 2013 | | | | 1,484 | | 1,484 |
| Thereafter | | | | 2,294 | | 2,294 |
| Total minimum lease payments | \$ | 298 | \$ | 39,000 | \$ | 39,298 |
| Less imputed interest | | (19) | | | | |
| Present value of minimum lease payments | \$ | 279 | | | | |

Rent expense was approximately \$19.9 million, \$24.0 million, and \$25.8 million in 2008, 2007, and 2006, respectively.

G. DEFERRED COMPENSATION

We have a program whereby certain executives irrevocably elected to defer receipt of certain compensation in 1985 through 1988. Deferred compensation payments to these executives will commence upon their retirement. We purchased life insurance on such executives, payable to us in amounts which, if assumptions made as to mortality experience, policy dividends, and other factors are realized, will accumulate cash values adequate to reimburse us for all payments for insurance and deferred compensation obligations. In the event cash values are not sufficient to fund such obligations, the program allows us to reduce benefit payments to such amounts as may be funded by accumulated cash values. The deferred compensation liabilities and related cash surrender value of life insurance policies are included in "Other Liabilities" and "Other Assets," respectively.

We also maintain a non-qualified deferred compensation plan (the "Plan") for the benefit of senior management employees who may elect to defer a portion of their annual bonus payments and salaries. The Plan provides investment options similar to our 401(k) plan, including our stock. The investment in our stock is funded by the issuance of shares to a Rabbi trust, and may only be distributed in kind. Assets held by the Plan totaled approximately \$3.0 million and \$4.7 million on December 27, 2008 and December 29, 2007, respectively, and are included in "Other Assets." Related liabilities totaled \$8.9 million and \$10.5 million on December 27, 2008 and December 29, 2007, respectively, and are included in "Other Liabilities" and "Shareholders' Equity." Assets of the Plan are recorded at fair market value. The related liabilities are recorded at fair market value, with the exception of obligations associated with investments in our stock which are recorded at the market value on the date of deferral.

H. SALE OF ACCOUNTS RECEIVABLE

On March 8, 2006, we entered into an accounts receivable sale arrangement with a bank that was terminated on September 26, 2008. Under the terms of this arrangement:

- We sold specific receivables to the bank at an agreed-upon price at terms ranging from one month to one year.
- We serviced the receivables sold and outstanding on behalf of the bank at a rate of 0.50% per annum.
- We received an incentive servicing fee, which we accounted for as a retained interest in the receivables sold. Our retained interest was determined based on the fair market value of anticipated collections in excess of the Agreed Base Value of the receivables sold. Appropriate valuation allowances were recorded against the retained interest.
- The maximum amount of receivables, net of retained interest, which were sold and outstanding at any point in time under this arrangement was \$50 million.

No receivables were sold and outstanding on December 27, 2008. On December 29, 2007 \$29.0 million of receivables were sold and outstanding, and we recorded \$2.2 million of retained interest in other current assets. A summary of the transactions we completed in 2008, 2007, and 2006 is presented below (in thousands).

| | 2008 | | 2008 2007 | | 2007 | | 2006 |
|----------------------------------|------|---------|-----------|---------|------|---------|------|
| Accounts receivable sold | \$ | 369,242 | \$ | 624,448 | \$ | 460,859 | |
| Retained interest in receivables | | (2,432) | | (1,982) | | (6,649) | |
| Expense from sale | | (869) | | (2,629) | | (1,847) | |
| Servicing fee received | | 119 | | 212 | | 150 | |
| Net cash received from sale | \$ | 366,060 | \$ | 620,049 | \$ | 452,513 | |

I. COMMON STOCK

On June 1, 1993, our shareholders approved the Incentive Stock Option Plan (the "Plan") for our officers. Options for the purchase of all 1,200,000 shares of our common stock authorized under the Plan have been granted. The Plan provides that the options are exercisable only if the officer is employed by us at the time of exercise and holds at least seventy-five percent of the individuals' shares held on April 1, 1993. The Plan also requires the option shares to be held for periods of six months to three years. The remaining options were exercisable within thirty days of the anniversary of the Plan in 2008. There are no options outstanding under the Plan.

In January 1994, the Employee Stock Gift Program was approved by the Board of Directors which allows us to gift shares of stock to eligible employees based on length of service. We gifted shares of stock under this Plan in 2008, 2007, and 2006, and recognized the market value of the shares at the date of issuance as an expense totaling approximately \$45,000, \$68,000, and \$55,000, respectively.

In April 2002, our shareholders approved the 2002 Employee Stock Purchase Plan ("2002 Stock Purchase Plan") to succeed the Employee Stock Purchase Plan originally approved in 1994. In April 2008, our shareholders authorized additional shares to be allocated to the 2002 Stock Purchase Plan. The plan allows eligible employees to purchase shares of our stock at a share price equal to 85% of fair market value on the purchase date. In 2008, 2007, and 2006, shares were issued under this Plan for amounts totaling approximately \$582,000, \$617,000, and \$811,000, respectively. The weighted average discounted fair value of these shares was \$25.92, \$30.75, and \$48.36, respectively. Upon adoption of FASB Statement No. 123(R), *Share-Based Payment*, ("SFAS 123(R)"), we have expensed the fair value associated with these awards, which approximates the discount.

In April 1994, our shareholders approved the Directors' Retainer Stock Plan ("Stock Retainer Plan"). In April 2007, our shareholders authorized additional shares to be distributed pursuant to this plan. The Stock Retainer Plan allows eligible members of the Board of Directors to defer their retainer fees and receive shares of our stock at the time of their retirement, disability or death. The number of shares to be received is equal to the amount of the retainer fee deferred multiplied by 110% divided by the fair market value of a share of our stock at the time of deferral, is increased for dividends declared and may only be distributed in kind. Shareholders' equity includes approximately \$1.4 million and \$1.1 million on December 27, 2008 and December 29, 2007, respectively, for obligations incurred under this Plan. There were no distributions in 2008 or 2007.

In January 1997, we instituted a Directors' Stock Grant Program. In lieu of a cash increase in the amount of Directors' fees, each outside Director receives 100 shares of stock for each board meeting attended up to a maximum of 400 shares per year. In 2008, 2007, and 2006, we issued shares and recognized the market value of the shares on the date of issuance as an expense totaling approximately \$58,000, \$106,000, and \$142,000, respectively.

On April 28, 1999, our shareholders approved the Long Term Stock Incentive Plan (the "1999 Plan"). The 1999 Plan reserved 1,000,000 additional shares, plus a balance of unissued shares from prior plans of 406,029 shares, plus an annual increase of no more than 200,000 shares per year which may be added on the date of the annual meeting of shareholders. The 1999 Plan provides for the granting of stock options, reload options, stock appreciation rights, restricted stock, performance shares and other stock-based awards. The term of the 1999 Plan is ten years. We intend to request shareholder approval to restate this plan for an additional ten year period. No options were granted under the 1999 Plan in 2008 or 2007.

The following stock grants have been made under the 1999 Plan:

• On April 17, 2002, a Conditional Share Grant was made which will grant our Executive Chairman 10,000 shares of common stock immediately upon the satisfaction of the terms and conditions set forth in the grant. Shareholders' equity includes approximately \$159,000 and \$135,000 on December 27, 2008 and December 29, 2007 respectively, for this grant.

- On February 3, 2006, Performance Share Grants were made which will grant certain employees a total of approximately 37,000 shares of common stock on February 3, 2009. Shareholders' equity includes approximately \$2.1 million on December 27, 2008 and December 29, 2007 for this grant.
- On January 16, 2007, Conditional Share Grants were made which will grant certain employees 500 shares each of common stock immediately upon vesting in 2017, subject to conditions set forth in the grant. Shareholders' equity includes approximately \$32,000 and \$16,000 on December 27, 2008 and December 29, 2007, respectively, for this grant.
- On February 23, 2007, shares were issued into a Deferred Stock Bonus Plan for certain employees. These shares are distributable upon retirement, subject to conditions set forth in the plan. Shareholders' equity includes approximately \$1.9 million on December 27, 2008 and December 29, 2007.
- On January 16, 2008, Conditional Share Grants were made which will grant certain employees 500 shares each of common stock immediately upon vesting in 2018, subject to conditions set forth in the grant. Shareholders' equity includes approximately \$10,000 on December 27, 2008.
- On February 8, 2008, Conditional Share Grants were made which will grant certain employees approximately 118,000 shares of common stock on February 8, 2011, subject to conditions set forth in the grant. Shareholders' equity includes approximately \$0.7 million on December 27, 2008.

As of December 27, 2008, a total of approximately 1.9 million shares are reserved for issuance under the plans mentioned above.

On November 14, 2001, the Board of Directors approved a share repurchase program (which succeeded a previous program) allowing us to repurchase up to 2,500,000 shares of our common stock. We repurchased 19,857 and 255,266 shares under this program in 2008 and 2007, respectively. As of December 27, 2008, cumulative total authorized shares available for repurchase is approximately 1.2 million shares.

Common stock activity for 2008, 2007 and 2006 was as follows:

| | Note | 2008 | 2007 | 2006 |
|---|------|------------|------------|------------|
| Shares issued under plan: | | | | |
| Employee Stock Purchase | I | 22,474 | 20,079 | 16,763 |
| Stock option | J | 152,054 | 200,266 | 332,881 |

| Stock grant plans | | 3,706 | 3,961 | 3,467 |
| Deferred compensation | G | 15,288 | 69,777 | 101,278 |
| Stock notes receivable | | 7,374 | 10,132 | 3,222 |
| Shares received for exercise of stock options | | (19,857) | (15,866) | (1,367) |
| Stock repurchase | I | | (239,400) | |
| | | 181,039 | 48,949 | 456,244 |
| Beginning common stock outstanding | | 18,907,841 | 18,858,892 | 18,402,648 |
| Ending common stock outstanding | | 19,088,880 | 18,907,841 | 18,858,892 |

J. STOCK-BASED COMPENSATION

We account for share-based compensation using the fair value recognition provisions of FASB Statement No. 123(R), *Share-Based Payment*, ("SFAS 123(R)"), which we have adopted using the modified-prospective-transition method effective January 1, 2006. As discussed in Note I, Common Stock, we provide compensation benefits to employees and non-employee directors under several share-based payment arrangements including various employee stock plans, the 2002 Employee Stock Purchase Plan, the Directors' Retainer Stock Plan, the Directors' Stock Grant Program and the Employee Stock Gift Program.

Stock Option Plans

To date, other than certain, relatively nominal conditional share grants, performance share awards and deferred share awards that are permitted under the plan, we have only issued options under the 1999 plan. Vesting requirements for awards under this plan will vary by individual grant and, as to outstanding awards, and are subject to time-based vesting. The contractual life of all of the options granted under this plan is no greater than 15 years.

The fair value of each option award is estimated as of the date of grant using the Black-Scholes option pricing model. Expected volatility assumptions used were based on historical volatility of our stock. We utilize historical data to estimate option exercise and employee termination behavior within the valuation model; separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The risk-free rate for the expected term of the option award was based on the U.S. Treasury yield curve in effect at the time of the grant. No new option awards were granted in 2008, 2007 or 2006 and therefore no specific valuation assumptions are presented.

The following summary presents information regarding outstanding options as of December 27, 2008 and changes during the period then ended with regard to options under all stock option plans:

| | | | | Weighted | |
|---|-----------|------|------------|-------------|--------------|
| | | W | eighted | Average | |
| | Stock | A. | verage | Remaining | Aggregate |
| | Under | Exer | cise Price | Contractual | Intrinsic |
| | Option | Pe | r Share | Term | Value |
| Outstanding at December 31, 2005 | 1,384,879 | \$ | 19.08 | | |
| Exercised | (332,881) | \$ | 15.56 | | |
| Forfeited or expired | (15,714) | \$ | 20.87 | | |
| Outstanding at December 30, 2006 | 1,036,284 | \$ | 20.18 | | |
| Exercised | (200,266) | \$ | 16.21 | | |
| Forfeited or expired | (39,541) | \$ | 23.65 | | |
| Outstanding at December 29, 2007 | 796,477 | \$ | 20.92 | | |
| Exercised | (152,054) | \$ | 17.21 | | |
| Forfeited or expired | (44,376) | \$ | 16.69 | | |
| Outstanding at December 27, 2008 | 600,047 | \$ | 22.16 | 3.62 | \$ 2,686,949 |
| Vested or expected to vest at December 27, 2008 | 321,500 | \$ | 23.45 | 4.25 | \$ 1,171,355 |
| Exercisable at December 27, 2008 | 278,547 | \$ | 20.68 | 2.89 | \$ 1,515,594 |

The total intrinsic value of options exercised during 2008, 2007 and 2006 was \$2.4 million \$6.5 million and \$16.9 million, respectively.

Employee Stock Purchase Plan

In 2008, 2007 and 2006, we issued shares under this plan totaling 22,474, 20,079, and 16,763 respectively. In 2008, 2007 and 2006, the weighted average fair values per share of employee stock purchase rights pursuant to this plan were \$4.57, \$5.42 and \$8.26, respectively. The fair value of the stock purchase rights approximated the difference between the stock price and the employee purchase price.

Directors' Retainer Stock Plan

We recognized the fair market value of the shares issued under this plan, calculated using the number of shares issued and the stock price on the issuance date, as expense and recorded the related obligation in shareholders' equity. In 2008, 2007 and 2006, we recognized approximately \$268,000, \$281,000 and \$259,000, respectively, in expense for shares issued under this program.

Directors' Stock Grant Program

In 2008, 2007 and 2006, we recognized the fair market value of the shares issued under this plan, calculated using the number of shares issued and the stock price on the issuance date, as an expense totaling approximately \$58,000, \$106,000 and \$142,000, respectively.

Conditional Share Grant Agreements

In 2008, 2007 and 2006, we recognized the fair value of the awards estimated as of the date of grant. We recognized approximately \$50,000, \$39,000 and \$112,000, respectively, in expense for shares issuable under this program.

All Share-Based Payment Arrangements

The total share-based compensation cost and the related total income tax benefit that has been recognized in results of operations was approximately \$820,000 and \$255,000, respectively in 2008. The total share-based compensation cost and the related total income tax benefit that has been recognized in results of operations was approximately \$892,000 and \$299,000, respectively in 2007. The total share-based compensation cost and the related total income tax benefit that has been recognized in results of operations was approximately \$1.4 million and \$481,000, respectively in 2006.

In 2008, 2007 and 2006, cash received from option exercises and share issuances under the Stock Purchase Plan was \$3.0 million, \$3.5 million and \$5.9 million, respectively. The actual tax benefit realized in 2008, 2007 and 2006 for the tax deductions from option exercises totaled \$0.9 million, \$1.9 million and \$4.4 million, respectively.

K. RETIREMENT PLANS

We have a profit sharing and 401(k) plan for the benefit of substantially all of our employees, excluding the employees of certain non-wholly-owned subsidiaries. Amounts contributed to the plan are made at the discretion of the Board of Directors. We matched 50% of employee contributions in 2008, 2007, and 2006, on a discretionary basis, totaling \$3.5 million, \$4.1 million, and \$3.9 million, respectively. The basis for matching contributions may not exceed the lesser of 6% of the employee's annual compensation or the IRS limitation.

L. INCOME TAXES

Income tax provisions for the years ended December 27, 2008, December 29, 2007, and December 30, 3006 are summarized as follows (in thousands):

| | 2008 | | 2007 | 2006 |
|--------------------|-------------|----|---------|--------------|
| Currently Payable: | | | | |
| Federal | \$ 5,566 | \$ | 13,725 | \$ 32,288 |
| State and local | 915 | | 2,714 | 4,947 |
| Foreign | 3,169 | | 2,824 | 2,649 |
| | 9,650 | | 19,263 | 39,884 |
| Net Deferred: | | | | |
| Federal | (5,768) | | (3,734) | (2,454) |
| State and local | (1,951) | | 134 | (220) |
| Foreign | (245) | | (267) | 1,550 |
| | (7,964) | | (3,867) | (1,124) |
| | \$ 1,686 | \$ | 15,396 | \$ 38,760 |
| | | | | |

The components of earnings before income taxes consist of the following:

| | 2008 | | 2007 | 2006 | |
|---------|-------------|----|--------|------|---------|
| U.S. | \$ (702) | \$ | 37,641 | \$ | 105,662 |
| Foreign | 7,848 | | 968 | | 6,473 |
| Total | \$ 7,146 | \$ | 38,609 | \$ | 112,135 |

The effective income tax rates are different from the statutory federal income tax rates for the following reasons:

| | 2008 | 2007 | 2006 |
|---|--------|-------|-------|
| Statutory federal income tax rate | 35.0% | 35.0% | 35.0% |
| State and local taxes (net of federal benefits) | (1.3) | 4.5 | 2.5 |
| Effect of minority owned interest in earnings of partnerships | (2.2) | (1.0) | (0.6) |
| Manufacturing deduction | (4.0) | (1.9) | (0.8) |
| Research & development tax credits | (14.0) | (3.2) | (4.1) |
| Change in valuation allowance | 1.1 | 5.5 | 1.0 |
| Amortization of goodwill | 5.7 | | |
| Other, net | 3.3 | 1.0 | 1.6 |
| Effective income tax rate | 23.6% | 39.9% | 34.6% |

For the year ended December 27, 2008 and December 29, 2007, the effective tax rate was favorably impacted by the federal research & development ("R&D") tax credits for 2008 and 2007, respectively. During 2006, we completed a project to identify eligible expenditures for purposes of claiming R&D tax credits for 2001 — 2006, all of which was recognized in 2006 and for which amended tax returns for 2001 — 2005 have been filed.

Temporary differences which give rise to deferred tax assets and (liabilities) on December 27, 2008 and December 29, 2007 are as follows (in thousands):

| | 2008 | 2007 | | |
|---------------------------------------|----------------|------|----------|--|
| Employee benefits | \$ 7,044 | \$ | 7,711 | |
| Foreign subsidiary net operating loss | 2,454 | | 2,967 | |
| Accrued expenses | 4,748 | | 4,565 | |
| Other, net | 3,511 | | 3,455 | |
| Gross deferred tax assets | 17,757 | | 18,698 | |
| Valuation allowance | (2,838) | | (3,430) | |
| Deferred tax assets | 14,919 | | 15,268 | |
| | | | | |
| Depreciation | (16,495) | | (23,745) | |
| Intangibles | (6,876) | | (6,910) | |
| Inventory | (30) | | (1,004) | |
| Other, net | (158) | | (110) | |
| Deferred tax liabilities | \$ (23,559) | \$ | (31,769) | |
| Net deferred tax liability | \$ (8,640) | \$ | (16,501) | |

The valuation allowance consists of a net operating loss carryforward we have for a wholly-owned subsidiary, Universal Forest Products of Canada, Inc. We do not anticipate realizing a future benefit from this loss carryforward, therefore, we established an allowance for the entire amount of the future benefit. This carryforward will expire at the end of 2027.

M. ACCOUNTING FOR UNCERTAINTY IN INCOME TAXES

In July 2006, the FASB issued FASB Interpretation No. 48 ("FIN 48") "Accounting for Uncertainty in Income Taxes." FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, and disclosure requirements. FIN 48 is effective for fiscal years beginning after December 15, 2006. Accordingly, we adopted FIN 48 beginning December 31, 2006. The adoption of FIN 48 did not have a significant impact on our financial position or results of operations.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

| | 2 | 2008 | 2007 | | |
|---|----|--------|------|-------|--|
| Gross unrecognized tax benefits beginning of year | \$ | 8,705 | \$ | 6,428 | |
| Increase in tax positions for prior years | | 1,347 | | 877 | |
| Increase in tax positions for current year | | 1,486 | | 1,615 | |
| Lapse in statute of limitations | | (504) | | (215) | |
| Gross unrecognized tax benefits end of year | \$ | 11,034 | \$ | 8,705 | |

The total amount of net unrecognized tax benefits that, if recognized, would affect the effective tax rate was \$11.0 million and \$8.7 million at December 27, 2008 and December 29, 2007, respectively. We recognized interest and penalties for unrecognized tax benefits in our provision for income taxes. The liability for unrecognized tax benefits included accrued interest and penalties of \$0.4 million and \$0.3 million at December 27, 2008 and December 29, 2007, respectively.

We file income tax returns in the United States and in various state, local and foreign jurisdictions. For the majority of tax jurisdictions, we are no longer subject to income tax examinations for years before 2004. A number of state and local examinations as well as an examination by the Internal Revenue Service are currently ongoing. It is possible that these examinations may be resolved within the next twelve months. Due to the potential for resolution of federal, state and foreign examinations, and the expiration of various statutes of limitation, it is reasonably possible that our gross unrecognized tax benefits may change within the next twelve months by a range of \$0.2 million to \$8.6 million.

N. COMMITMENTS, CONTINGENCIES, AND GUARANTEES

We are self-insured for environmental impairment liability, including certain liabilities which are insured through a wholly owned subsidiary, UFP Insurance Ltd., a licensed captive insurance company. We own and operate a number of facilities throughout the United States that chemically treat lumber products. In connection with the ownership and operation of these and other real properties, and the disposal or treatment of hazardous or toxic substances, we may, under various federal, state, and local environmental laws, ordinances, and regulations, be potentially liable for removal and remediation costs, as well as other potential costs, damages, and expenses. Environmental reserves, calculated with no discount rate, have been established to cover remediation activities at our affiliates' wood preservation facilities in Stockertown, PA; Elizabeth City, NC; Auburndale, FL; Gordon, PA; Janesville, WI; Medley, FL; and Ponce, PR. In addition, a reserve was established for our affiliate's facility in Thornton, CA to remove certain lead containing materials which existed on the property at the time of purchase.

On a consolidated basis, we have reserved approximately \$4.4 million on December 27, 2008 and December 29, 2007, representing the estimated costs to complete future remediation efforts. These amounts have not been reduced by an insurance receivable.

The manufacturers of CCA preservative voluntarily discontinued the registration of CCA for certain residential applications as of December 31, 2003. Our wood preservation facilities have been converted to alternate preservatives, either ACQ, borates or ProWood® Micro.

In November 2003, the EPA published its report on the risks associated with the use of CCA in children's playsets. While the study observed that the range of potential exposure to CCA increased by the continuous use of playsets, the EPA concluded that the risks were not sufficient to require removal or replacement of any CCA treated structures. The results of the EPA study are consistent with a prior Consumer Products Safety Commission (CPSC) study which reached a similar conclusion. The EPA did refer a question on the use of sealants to a scientific advisory panel. The panel issued a report which provides guidance to the EPA on the use of various sealants but does not mandate their use. In its final report issued on April 30, 2008, the EPA does not require removal or replacement of CCA-treated structures, including decks and playground equipment, and is not recommending that surrounding soils be removed or replaced.

From time to time, various special interest environmental groups have petitioned certain states requesting restrictions on the use or disposal of CCA treated products. The wood preservation industry trade groups are working with the individual states and their regulatory agencies to provide an accurate, factual background which demonstrates that the present method of uses and disposal is scientifically supported.

We have not accrued for any potential loss related to the contingencies above. However, potential liabilities of this nature are not conducive to precise estimates and are subject to change.

In addition, on December 27, 2008, we were parties either as plaintiff or a defendant to a number of lawsuits and claims arising through the normal course of our business. In the opinion of management, our consolidated financial statements will not be materially affected by the outcome of these contingencies and claims.

On December 27, 2008, we had outstanding purchase commitments on capital projects of approximately \$0.9 million.

We provide a variety of warranties for products we manufacture. Historically, warranty claims have not been material.

In certain cases we supply building materials and labor to site-built construction projects or we jointly bid on contracts with framing companies for such projects. In some instances we are required to post payment and performance bonds to insure the owner that the products and installation services are completed in accordance with our contractual obligations. We have agreed to indemnify the surety for claims made against the bonds. As of December 27, 2008, we had approximately \$20.6 million in outstanding payment and performance bonds, which expire during the next two years. In addition, approximately \$26.9 million in payment and performance bonds are outstanding for completed projects which are still under warranty.

We have entered into operating leases for certain assets that include a guarantee of a portion of the residual value of the leased assets. If, at the expiration of the initial lease term, we do not exercise our option to purchase the leased assets and these assets are sold by the lessor for a price below a predetermined amount, we will reimburse the lessor for a certain portion of the shortfall. These operating leases will expire periodically over the next five years. The estimated maximum aggregate exposure of these guarantees is approximately \$2.0 million.

Under our former sale of accounts receivable agreement, we guaranteed that a subsidiary, as accounts servicer, would remit collections on receivables sold to the purchaser of the accounts receivable. (See Note H, "Sale of Accounts Receivable.")

In lieu of cash deposits, we provide irrevocable letters of credit in favor of our insurers to guarantee our performance under certain insurance contracts. We currently have irrevocable letters of credit outstanding totaling approximately \$17.4 million for these types of insurance arrangements. We have reserves recorded on our balance sheet, in accrued liabilities, that reflect our expected future liabilities under these insurance arrangements.

We are required to provide irrevocable letters of credit in favor of the bond trustees for all of the industrial development revenue bonds that we have issued. These letters of credit guarantee principal and interest payments to the bondholders. We currently have irrevocable letters of credit outstanding totaling approximately \$14.8 million related to our outstanding industrial development revenue bonds. These letters of credit have varying terms but may be renewed at the option of the issuing banks.

Certain wholly owned domestic subsidiaries have guaranteed the indebtedness of Universal Forest Products, Inc. in certain debt agreements, including the Series 1998-A Senior Notes, Series 2002-A Senior Notes and our revolving credit facility. The maximum exposure of these guarantees is limited to the indebtedness outstanding under these debt arrangements and this exposure will expire concurrent with the expiration of the debt agreements.

Many of our wood treating operations utilize "Subpart W" drip pads, defined as hazardous waste management units by the EPA. The rules regulating drip pads require that the pad be "closed" at the point that it is no longer intended to be used for wood treating operations or to manage hazardous waste. Closure involves identification and disposal of contamination which requires removal from the wood treating operations. The ultimate cost of closure is dependent upon a number of factors including, but not limited to, identification and removal of contamination, cleanup standards that vary from state to state, and the time period over which the cleanup would be completed. Based on our present knowledge of existing circumstances, it is considered probable that these costs will approximate \$0.4 million. As a result, this amount is recorded in other long-term liabilities on December 27, 2008.

We did not enter into any new guarantee arrangements during 2008 which would require us to recognize a liability on our balance sheet.

O. CONSULTING & NON-COMPETE AGREEMENTS

On December 17, 2007 we entered into a consulting and non-compete agreement with our former CEO which provides for monthly payments for a term of three years that will begin upon retirement from Universal Forest Products, Inc. The present value of the vested portion of the non-compete payments totaling approximately \$1.4 million and \$0.3 million at December 27, 2008 and December 29, 2007, respectively, is accrued in other liabilities.

On December 31, 2007 the former President of Universal Forest Products Western Division, Inc. retired as an employee of Universal Forest Products, Inc., and we entered into an agreement with him which provides for monthly payments for a term of three years. The present value of these payments totaling approximately \$1.0 million has been recorded in other liabilities.

P. SEGMENT REPORTING

SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information ("SFAS 131") defines operating segments as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Under the definition of a segment, our Eastern, Western and Consumer Products Divisions may be considered an operating segment of our business. Under SFAS 131, segments may be aggregated if the segments have similar economic characteristics and if the nature of the products, distribution methods, customers and regulatory environments are similar. Based on this criteria, we have aggregated our Eastern and Western divisions into one reporting segment. Our Consumer Products Division, which was formed in 2006, is included in the "All Other" column in the table below. Our divisions operate manufacturing and treating facilities throughout North America.

| | 2008 | | | 2007 | | | 2006 | | |
|------------------------|-------------|-----------|-----------|-------------|-----------|-------------|-------------|----------|-------------|
| | Eastern | | | Eastern | | | Eastern | | |
| | and | | | and | | | and | | |
| | Western | All | | Western | All | | Western | All | |
| | Divisions | Other | Total | Divisions | Other | Total | Divisions | Other | Total |
| Net sales to outside | | | | | | | | | |
| customers | \$2,130,437 | \$101,957 | 2,232,394 | \$2,405,830 | \$107,348 | \$2,513,178 | \$2,605,087 | \$59,485 | \$2,664,572 |
| Intersegment net sales | 0 | 26,765 | 26,765 | 0 | 24,126 | 24,126 | 0 | 17,974 | 17,974 |
| Interest expense | 12,037 | 51 | 12,088 | 17,018 | 15 | 17,033 | 14,040 | 13 | 14,053 |
| Amortization expense | 6,983 | 2,814 | 9,797 | 5,331 | 2,703 | 8,034 | 3,071 | 2,680 | 5,751 |
| Depreciation expense | 34,656 | 2,914 | 37,570 | 36,347 | 3,200 | 39,547 | 31,081 | 2,690 | 33,771 |
| Segment operating | | | | | | | | | |
| profit | 21,310 | (2,905) | 18,405 | 48,399 | 5,093 | 53,492 | 118,942 | 4,803 | 123,745 |
| Segment assets | 746,335 | 69,684 | 816,019 | 864,546 | 92,454 | 957,000 | 831,160 | 82,281 | 913,441 |
| Capital expenditures | 18,409 | 535 | 18,944 | 37,571 | 1,789 | 39,360 | 40,908 | 2,596 | 43,504 |

In 2008, 2007, and 2006, 27%, 26%, and 22% of net sales, respectively, were to a single customer.

Information regarding principal geographic areas was as follows (in thousands):

| | 2008 | | 2007 | | 2006 | |
|---------------|-------------|------------|-------------|------------|-------------|------------|
| | Long-Lived | | | Long-Lived | | Long-Lived |
| | Net Sales | Assets | Net Sales | Assets | Net Sales | Assets |
| United States | \$2,170,933 | \$ 418,603 | \$2,442,676 | \$ 427,547 | \$2,590,951 | \$ 408,310 |
| Foreign | 61,461 | 16,508 | 70,502 | 28,928 | 73,621 | 29,996 |
| Total | \$2,232,394 | \$ 435,111 | \$2,513,178 | \$ 456,475 | \$2,664,572 | \$ 438,306 |

Sales generated in Canada and Mexico are primarily to customers in the United States of America.

The following table presents, for the periods indicated, our percentage of value-added and commodity-based sales to total sales.

| | Value-Added | Commodity-Based |
|------|-------------|-----------------|
| 2008 | 60.4% | 39.6% |
| 2007 | 60.5% | 39.5% |
| 2006 | 62.7% | 37.3% |

Value-added product sales consist of fencing, decking, lattice, and other specialty products sold to the DIY/retail market, specialty wood packaging, engineered wood components, and "wood alternative" products. Engineered wood components include roof trusses, wall panels, and floor systems. Wood alternative products consist primarily of composite wood and plastics. Although we consider the treatment of dimensional lumber with certain chemical preservatives a value-added process, treated lumber is not presently included in the value-added sales totals. Commodity-based product sales consist primarily of remanufactured lumber and preservative treated lumber.

The following table presents, for the periods indicated, our gross sales (in thousands) by major product classification.

| | Years Ended | | | | |
|--|---------------------------------------|--------------|----------------------------|--|--|
| | · · · · · · · · · · · · · · · · · · · | | December 30, | | |

| Sales allowances | (41,797) | (48,307) | (42,463) | | |
| Total Net Sales | \$ 2,232,394 | \$ 2,513,178 | \$ 2,664,572 | | |

Q. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The following table sets forth selected financial information for all of the quarters, each consisting of 13 weeks) during the years ended December 27, 2008 and December 29, 2007 (in thousands, except per share data):

| | First | | Second | | Third | | Fourth | |
|---------------------------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|
| | 2008 | 2007 | 2008 | 2007 | 2008 | 2007 | 2008 | 2007 |
| Net sales | \$489,512 | \$549,038 | \$708,485 | \$773,105 | \$610,744 | \$678,398 | \$423,653 | \$512,637 |
| Gross profit | 54,820 | 73,520 | 84,878 | 101,705 | 64,650 | 82,165 | 49,853 | 51,639 |
| Net earnings (loss) | (4,576) | 3,886 | 11,663 | 16,800 | (1,951) | 11,339 | (793) | (10,980) |
| Basic earnings (loss) per | | | | | | | | |
| share | (0.24) | 0.20 | 0.61 | 0.88 | (0.10) | 0.59 | (0.04) | (0.58) |
| Diluted earnings (loss) | | | | | | | | |
| per share | (0.24) | 0.20 | 0.61 | 0.86 | (0.10) | 0.59 | (0.04) | (0.58) |

R. SUBSEQUENT EVENTS

In January 2009, we temporarily closed facilities in Bunn, NC and Ooltewah, TN to better align manufacturing capacity with the current business environment. In February 2009, we also temporarily closed a facility in White Pigeon, MI.

On February 1, 2009, a stock grant was made for eligible salaried employees which will grant shares of common stock immediately upon the satisfaction of certain terms and conditions. We estimate that we will recognize total expense of approximately \$1.6 million over the next five years for this grant.

On February 6, 2009, we sold real estate located in Woodburn, Oregon. The net sales price was approximately \$5.2 million resulting in a gain of approximately \$2.4 million.

PRICE RANGE OF COMMON STOCK AND DIVIDENDS

Our common stock trades on The Nasdaq Stock Market ("NASDAQ") under the symbol UFPI. The following table sets forth the range of high and low sales prices as reported by NASDAQ.

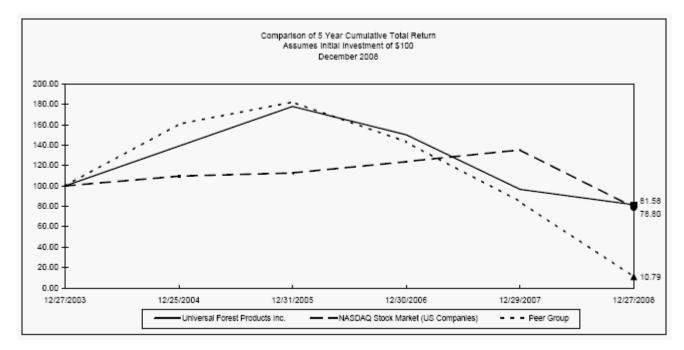

| Fiscal 2008 | High | Low | Fiscal 2007 | High | Low |
|----------------|-------|-------|----------------|-------|-------|
| Fourth Quarter | 34.91 | 14.61 | Fourth Quarter | 37.10 | 27.93 |
| Third Quarter | 37.37 | 23.35 | Third Quarter | 44.90 | 29.51 |
| Second Quarter | 35.80 | 29.20 | Second Quarter | 52.70 | 41.94 |
| First Quarter | 37.35 | 26.26 | First Quarter | 54.61 | 44.90 |

There were approximately 1,175 shareholders of record as of January 31, 2009.

In 2008, we paid dividends on our common stock of \$.060 per share in June and December. In 2007, we paid dividends on our common stock of \$.055 per share in June and \$.060 per share in December. We intend to continue with our current semi-annual dividend policy for the foreseeable future.

STOCK PERFORMANCE GRAPH

The following graph depicts the cumulative total return on the our common stock compared to the cumulative total return on the indices for The Nasdaq Stock Market (all U.S. companies) and an industry peer group we selected. The graph assumes an investment of \$100 on December 27, 2003, and reinvestment of dividends in all cases.

The companies included in our self-determined industry peer group are as follows:

BlueLinx Holdings, Inc. Builders First Source Building Materials Holding Co. Champion Enterprises, Inc. Louisiana Pacific Corp.

The returns of each company included in the self-determined peer group are weighted according to each respective company's stock market capitalization at the beginning of each period presented in the graph above. In determining the members of our peer group, we considered companies who selected UFPI as a member of their peer group, and looked for similarly sized companies or companies that are a good fit with the markets we serve.
