KENNEDY WILSON

Kennedy Wilson is a leading real estate investment company with $28 billion of assets under management in high-growth markets across the United States, the UK and Ireland. We focus primarily on rental housing, with over 60,000 multifamily and student housing units owned by the company or financed through our growing credit platform.

Drawing on decades of experience, our relationship-oriented team excels at identifying opportunities and building value through market cycles, with more than $60 billion in total transactions closed across the property spectrum since going public in 2009. Kennedy Wilson owns, operates and builds real estate within our high-quality, core real estate portfolio and through our investment management platform, where we target opportunistic investments alongside our partners.

See page 67 for certain definitions and reconciliations of non-GAAP measures to the most directly comparable GAAP measures. Information shown as of December 31, 2024, except where indicated.

William J. McMorrow
Chairman and
Chief Executive Officer

Dear Fellow Shareholders,

It has been five years since March 2020, when the global pandemic began and profoundly disrupted so many aspects of daily life. During this unprecedented crisis, not only was there a widespread shift to remote work, but governments worldwide implemented expansive monetary policies, which ultimately led to the highest inflation rate in four decades and the highest interest rates in 22 years. Against this uncertain backdrop, our talented team at Kennedy Wilson proved their resilience and collaborated to tackle each challenge, further strengthening our global business. These circumstances narrowed our focus to our core businesses and proved our fundamental strengths of identifying and acting on opportunities through volatility.

2024 was another strong year of executing on all of our key strategic initiatives, including growing the investment management business, increasing baseline EBITDA, expanding strategic partnerships, simplifying our business through recycling capital from non-core sales into strategic growth initiatives and managing our balance sheet. Growing the investment management business is a key long-term priority where we made significant progress in 2024. We achieved record levels of fee-bearing capital totaling $8.8 billion and increased our investment management fees to a record $100 million in 2024, which represented 60% growth year-over-year.

As a result, Kennedy Wilson's real estate assets under management hit a record $28 billion in 2024, up from $25 billion in 2023. We deployed $4 billion of capital into new investments, 90% of which was allocated to new loan originations under our real estate credit business for the construction of market-rate multifamily and student housing projects across the U.S., and our new single-family homes for rent initiative in the UK. During 2024, we also nearly tripled our adjusted EBITDA year-over-year for a total of $540 million, compared to $190 million in 2023. We did all of this while strengthening our balance sheet by reducing our unsecured debt by $266 million with early paydowns.

We believe the strongest opportunities for sustained growth and value creation across our global portfolio lie in our core equity businesses – rental housing and industrial investments – and the continued expansion of our credit platform. Consistent with this view, 73% of our real estate assets under management are comprised of rental housing, credit extended to the construction of rental housing, and industrial investments, compared to 64% in 2023.

Our Core Businesses

Today, we are exceptionally well positioned, with 66% of our stabilized portfolio located in the U.S. and 32% in the UK and Ireland. Our portfolio strategy is centered around investing in top-tier locations within our three core sectors: rental housing, real estate credit (primarily construction loans to high-quality institutional sponsors to build rental housing and student housing assets), and industrial.

Rental Housing

We are focused on rental housing equity investments in markets with strong education systems and universities, growing employment opportunities, a talented labor pool and great lifestyle benefits. Today, we currently have an equity ownership interest in 40,000 units (including those under contract) and are financing 30,000 units of new construction market-rate multifamily and student housing, with approximately two thirds of our estimated annual NOI generated from such sources.

Renter fundamentals are continuing to strengthen as there is a chronic shortage of affordable housing in the U.S., UK and Ireland. Our asset management team continues to drive strong occupancy rates across our multifamily portfolio, which ended the year at 95% occupancy. At the 100% level on our 40,000 units, total revenue is approximately $800 million. Given our 55% ownership of this portfolio, our share of NOI is approximately $300 million.

In the U.S., the Mountain West is currently our largest apartment region. Our properties in this region are benefiting from revenue growth as well as a reduction in operating expenses driven by declining real estate taxes, lower property insurance costs and better management of payroll at the property level. In the Pacific Northwest, particularly in our suburban Seattle market, we are seeing improvement in our revenue across our apartment portfolio as employees return to the geographies where their companies are headquartered. We expect that employment and economic growth driven by tech companies allocating resources to artificial intelligence as well as return-to-office mandates in the Pacific Northwest and across Northern California will continue to support high levels of occupancy and rent growth.

Kennedy Wilson and Vintage Housing's U.S. affordable and senior housing strategy also continues its growth. Our investment in this strategy began through the creation of a partnership with Vintage Housing in 2015 and the acquisition of interest in a 5,500-unit portfolio, which has since grown to approximately 13,000 units through new construction by the very talented Vintage Housing team. Our peak capital investment was $80 million, and we have received $241 million of cash distributions. In 2024, we achieved 6% growth in NOI year-over-year, and are focused on identifying additional opportunities to scale our affordable housing footprint to meet the extraordinary demand for senior and affordable housing we are seeing in our Western U.S. markets.

In Ireland, we own 3,500 highly amenitized apartment units primarily in Dublin, where there is a significant structural undersupply of housing combined with continued employment growth and an extremely strong economy. Ireland is one of the few countries in the world generating a positive budget surplus and currently has one of the lowest 10-year bond rates in the developed world.

In 2024, we were able to leverage our expertise in rental housing development in Ireland to launch a new UK single-family rental platform alongside Canada Pension Plan Investment Board (CPP Investments), one of the world's largest global investors with approximately $425 billion in assets under management. The joint venture with CPP Investments is initially targeting $1.3 billion in single-family rental properties. We are off to a strong start in this new platform, with total purchases to date amounting to $400 million and near-term opportunities to continue scaling this business. We expect that our targeted $1.3 billion in capital deployment will result in the venture initially owning up to approximately 4,000 single-family homes over the next 18 to 24 months.

> Kennedy Wilson's affordable housing strategy continues to be a source of strength in our multifamily portfolio, with 6% growth in NOI for the year.

$1.6B in Student Housing Loans

Today, we are among the largest student housing construction lenders in the country, with a portfolio that has grown to $1.6 billion in student housing loans.

Credit Platform

Our credit platform saw significant growth in 2024, as we originated $3.5 billion of new construction loans and solidified Kennedy Wilson as a major player in the U.S. construction lending business focused on multifamily projects and student housing. Since acquiring a loan portfolio from a regional bank in mid-2023, we have closed approximately $5 billion in new loans. The sponsors of these projects are some of the premier real estate companies in the U.S.

As a refresher, in mid-2023, we acquired a high-quality, $4.1 billion construction loan portfolio at a meaningful discount from a U.S. regional bank in an off-market transaction. In addition to acquiring this high-quality portfolio, the team of 40 professionals who originated these loans joined Kennedy Wilson to significantly enhance our credit platform and expand our reach into new markets across the country. The thought process was to acquire the business with high-quality assets and an exceptional team, and then take advantage of the void in the market as regional banks and many commercial banks pulled back on lending. Our strategy proved spot on. Twenty-two of the original 65 loans acquired in 2023 were paid off in full in 2024, including the discount, and we expect the remainder of these loans to be paid off at par over the next two years.

The team's growth has carried over into 2025 with $1.3 billion in new originations already completed and another $1 billion in closing. In total, our loan commitments are nearly $11 billion today, including those in closing and our bridge lending portfolio, up 65% from 2023, and we are now among the largest student housing construction lenders in the country, with a student housing portfolio that has grown to $1.6 billion. We are currently originating loans at 50-65% loan to cost, with an average loan size of approximately $100 million. The total loan portfolio currently has $5 billion in outstandings as our borrowers are generally required to put their equity into the project before we fund the first dollar of our loans.

In total, commitments are nearly $11 billion today, including loans in closing, up 65% from 2023, with $5 billion of loans outstanding.

As many banks and other non-bank lenders continue to sit on the sidelines, we remain confident in our ability to continue generating high-quality, low-risk credit opportunities.

In April 2025, we expanded our credit platform through a newly announced partnership with Tokyu Land US Corporation, one of Japan's largest real estate developers, to launch a new preferred equity and mezzanine real estate investment platform. Kennedy Wilson will invest 10% of the capital in this new venture with a target investment size of over $200 million. Our focus will be originating new preferred equity and mezzanine investments with high-quality sponsors of multifamily and industrial properties located throughout the United States. The platform builds on our success in the construction lending business and expands our capabilities across all parts of the capital structure.

Industrial Business

Our global logistics portfolio, concentrated in the UK and Ireland, now totals 12.4 million square feet across 117 properties with a total AUM of $2.2 billion. The platform is benefiting from long-term growth in e-commerce and the need to have industrial properties located in close proximity to population centers.

A common characteristic of our industrial asset acquisitions is the short-term duration of the in-place leases that provide an opportunity to enter into new leases at higher market rates. We are continuing to see strong leasing demand with our team closing 60 lease transactions in 2024. Our team is currently signing leases at 36% higher rents versus expiring leases, and market rents are still well above our in-place rents.

$15M Estimated Annual NOI

2024 marked the completion of the development of Anacapa Canyon. Today, the community is 96% occupied, with the market-rate multifamily portion of the project generating $15 million in estimated annual NOI, making it one of the highest income-generating properties in Kennedy Wilson's global portfolio.

Development Completions

Our global development group continues to deliver top quality, energy efficient projects. In 2024, we completed the stabilization of several assets that we recently built resulting in the addition of a total of $29 million to our estimated annual NOI. We expect further estimated annual NOI increases at project stabilization from the company's lease-up and development portfolio, with minimal capital requirements from Kennedy Wilson. These projects bring us close to the finish line on a 10-year development pipeline totaling $5 billion focused largely on new housing that required significant amounts of equity capital from Kennedy Wilson. We have essentially completed that pipeline, with only one remaining project currently under construction.

2024 marked the completion of the development of Anacapa Canyon, a 589-unit master planned community on the western edge of the Santa Monica Mountains in Camarillo, California, designed to provide a range of market rate and senior affordable housing options. The project is a continuation of a unique public-private partnership that the multifamily team launched with California State University Channel Islands in 2016 through the acquisition of the adjacent 386-unit University Glen community. Anacapa Canyon, which covers approximately 30 acres adjacent to University Glen, includes 310 market-rate apartments, 109 for-sale homes and townhomes, and 170 senior affordable apartments that were developed by Vintage Housing using the same construction company as Kennedy Wilson to build the market rate units. The single-family lots were sold to Comstock Homes with a continuing Kennedy Wilson profit sharing participation as Comstock builds and sells the single-family homes. This portion of the Anacapa Canyon project is almost entirely constructed and sold out, with the final closings expected to occur in the fourth quarter of 2025.

Today, the combined University Glen community is 96% occupied, with the market-rate multifamily portion of the project generating $15 million in estimated annual NOI, making it one of the highest income-generating properties in Kennedy Wilson's global portfolio.

In Dublin, our six-acre mixed use development Coopers Cross is a combination of 471 apartment units and 400,000 square feet of first-class, highly amenitized office space. The apartment portion is fully stabilized and 100% leased. In 2024, we welcomed Wells Fargo as our first client with their new lease of 26,000 square feet in the office portion of the development. We expect that the office portion will be fully leased over the next 24 months as there continues to be strong demand for Class-A office occupancy in Dublin.

2024 also marked the completion of the second and third phases of construction at 38° North in Santa Rosa, California, bringing the total unit count to 322 units that generate approximately $7 million of NOI. In Dublin, our final ground-up construction project, Cornerstone, includes 232 units and 27,000 square feet of ground-floor retail and is expected to stabilize in the second quarter of 2025.

Balance Sheet and Asset Recycling

A key focus of the company is to continue strengthening our balance sheet by the sale of non-core assets, with the proceeds used to reduce unsecured debt and property-level debt. In 2024, we generated approximately $571 million in cash from asset sales and loan repayments, which in turn generated $160 million in consolidated gains on assets. This enabled us to repay a total of $266 million of unsecured debt, including repaying $214 million of KWE bonds and $52 million on our revolving credit facility. Our plan for 2025 is to reduce our unsecured debt by a further $400 million through the continued sale of non-core assets.

Of note, we anticipated that high inflation was not transitory and, in fact, would produce much higher interest rates. In 2021, we began in earnest buying interest rate caps, extending term on our financings and fixing interest rates on property-level debt. These programs have continued each year and through 2024, as we successfully renewed our $550 million corporate unsecured line of credit with an expanded banking syndicate. Also, in 2024, we refinanced $1.3 billion of property-level debt with negligible increases in interest costs. Our share of total debt is currently 97% fixed or hedged, with a weighted average maturity of 4.9 years and a weighted average effective interest rate of 4.6%. The effective rate includes the benefit from our interest rate hedging strategy, which produced a cash benefit of $41 million in 2024.

We recently completed a $510 million property-level financing secured by 1,689 units across five multifamily properties in Dublin and Cork that form part of our 50/50 Irish joint venture with AXA IM Alts. This was the largest property-level financing in Kennedy Wilson's history and represents about 40% of the total secured debt maturities for Kennedy Wilson in 2025. Thirty-five banks offered to participate in all or part of this financing, which enabled us to agree to very competitive terms on a five-year floating rate loan at 4.2% (3 month Euribor + 1.95%). The terms of the loan and the strong interest we received highlight the high levels of liquidity in the European debt market, the quality of our Irish multifamily portfolio and the embedded equity value of the assets.

Sandford Lodge
Dublin, Ireland

Representing the largest property-level refinancing in Kennedy Wilson's history, we recently secured a $510 million, five-year facility secured by five stabilized multifamily assets located primarily in Dublin that form part of our 50/50 Irish multifamily joint venture with AXA formed in 2018.

Issaquah, Washington

Strategic Partnerships and Fundraising

Reflecting our focus on capital raising, we saw meaningful growth in our investment management platform last year with the addition of several new institutional partners from the U.S., Asia, Canada and Europe. We also successfully closed fundraising on our seventh discretionary commingled fund, securing $400 million in discretionary capital for U.S. investments from a top-tier group of limited partners, including capital from major companies based in Asia.

As a result, our fee-bearing capital reached a record $8.8 billion, and our investment management fees grew by 60% year-over-year to approximately $100 million in 2024.

In 2024, our fee-bearing capital reached a record $8.8 billion, and our investment management fees grew by 60% year-over-year to approximately $100 million.

We are honored to partner with many prestigious global institutional investors including AXA, CPP Investments, Security Benefit, sovereign wealth funds and many others. Our biggest partner over the last 15 years has been Fairfax Financial, led by Prem Watsa, Wade Burton, Peter Clarke and their outstanding team. Fairfax is one of the leading property casualty insurance companies in the world with assets of approximately $100 billion and 22,000 employees. We have invested approximately $18 billion in various strategies over the last 15 years and generated an internal rate of return of 22% on our realized investments. Alongside this investment platform, Fairfax continues to be our largest shareholder, and we are extremely grateful to Prem, Wade, Peter and the entire Fairfax management team for their trust and support of Kennedy Wilson.

Looking ahead, we will remain focused on capital raising across North America, Asia, Europe and the Middle East. We believe that these capital raising and capital deployment initiatives will result in our ability to grow our investment management fees by approximately 15% to 20% per annum over the next several years.

Looking Forward

In 2025, we expect that uncertainty and volatility will continue to dominate global markets. However, it has been our experience over 35 years that out of chaos comes off-market opportunities sourced through our global proprietary network of relationships, where we have earned the reputation of being an extremely reliable counterparty in large transactions. We witnessed this through the expansion of our credit business in 2023 caused by the U.S. regional banking crisis, our growth in the U.S. and Europe coming off the heels of the Great Recession, and the creation of our business in Japan in 1995. During these periods of uncertainty, we were able to secure and execute on major growth opportunities.

We have top-tier global capital partners and an extremely talented and seasoned Kennedy Wilson team, which is very focused on our key initiatives, including growing shareholder value, asset sales and debt reductions, while at the same time looking for new opportunities to deploy capital into assets that will produce an above-average risk adjusted rate of return.

I want to express my immense gratitude to our shareholders, partners, capital providers and clients for their continued contributions to our success as well as our dedicated Board of Directors for their counsel. I also want to give huge thanks to our Executive Management Team – Matt Windisch, Mike Pegler, Justin Enbody, In Ku Lee, Regina Finnegan and Kurt Zech – as well as the global Kennedy Wilson team for their hard work and dedication, and for sharing a culture of humility, transparent communication and collaboration. I am highly confident that these attributes will enable Kennedy Wilson to grow and prosper in the coming years.

With much gratitude and respect,

William J. McMorrow
Chairman and Chief Executive Officer

With over three decades of experience navigating various interest rate environments and market volatility, we have the creativity to identify opportunities, the flexibility to deploy capital across the entire real estate stack and the greatest possible global team in place to execute on our growth initiatives.

Business

Company Overview

We are a real estate investment company as well as an investment manager with over $28.0 billion of Real Estate Assets Under Management ("AUM") in high growth markets across the United States, the United Kingdom and Ireland. With an objective of generating strong long-term risk-adjusted returns for our shareholders and partners and drawing on over three decades of experience in identifying opportunities and building value through various market cycles, we primarily focus on (i) investing in the rental housing sector (both market rate and affordable units) and industrial properties; and (ii) originating, managing and servicing real estate loans (primarily senior construction loans secured by high quality multifamily and student housing properties that are being developed by institutional sponsors throughout the United States). We have recently focused on growing our investment management and co-investment platform whereby we invest a minority position (with the potential for carried interest) and earn our pro-rata share of income as well as asset management fees in our role as asset manager. During the year ended December 31, 2024, our investment management platform generated a total of $98.9 million of asset management fees representing a growth of 60% over the same period in 2023.

For the year ended December 31, 2024, our 246 employees managed our $28.0 billion of AUM, which includes a total of 62,270 multifamily units in which we hold an ownership interest in (38,285 multifamily units and 901 single family units) or finance (23,084 units). Over the past several years, in line with our focus on the growth of our investments in housing and the continued execution of our capital recycling plan and our recent non-core asset disposition plan, our global investment portfolio has significantly evolved to be weighted heavily in equity and debt investments in the rental housing sector, specifically multifamily, both market rate and affordable, and student housing. The table below details key metrics and information of our global investment portfolio (in total and in each of our segments):

	Total	Consolidated	Co-Investments	Ownership[1]
AUM (billions)	$ 28.0	$ 13.6	$ 14.4	35%
		Rental Housing		
Multifamily units–market rate units[2]	25,590	9,258	16,332	57%
Multifamily units–affordable units[2]	12,695	—	12,695	45%

		Real Estate Credit *(primarily secured by Rental Housing Assets)*		
Real estate debt investments–100% (billions)	4.9	$ —	$ 4.9	5%
		Industrial and Other Real Estate Investments		
Industrial square feet (millions)[2]	12.4	—	12.4	18%
US Office square feet (millions)[2]	5.8	1.4	4.4	34%
Europe Office square feet (millions)[2]	4.6	2.5	2.1	58%
Retail square feet (millions)[2]	2.1	1.1	1.0	48%
Hotels[2]	1	—	1	50%

[1] Weighted-average ownership percentages.
[2] Includes amounts for properties that are stabilized, under development and unstabilized.

As of December 31, 2024, our global team, managed $28.0 billion of AUM (as noted above) of which $27.0 billion is operating properties and real estate loans (excluding development properties) which produced total revenue of $2.0 billion ($739.9 million at KW's share) compared to $22.8 billion of operating properties as of December 31, 2023 with total revenue of $1.8 billion ($736.0 million at KW's share). In addition, as of December 31, 2024, we held interests in 118 real estate loans in our global debt platform, 81% of which have floating interest rates, with an average interest rate of 8.0% per annum, and an unpaid principal balance of $4.9 billion ($256.1 million at KW's share) compared to

Business (continued)

101 real estate loans, 85% of which had floating interest rates, with an average interest rates of 9.4% per annum, and an unpaid principal balance of $4.9 billion ($263.0 million at KW's share) during the same period in 2023. During the year ended December 31, 2024, the Company also completed a total of $797.6 million of gross acquisitions and $3.5 billion of loan investments (KW's ownership interest of 13.3% and 2.5%, respectively) and $1.2 billion of gross dispositions and $1.0 billion of loan repayments (KW's ownership interest of 61.8% and 4.9%, respectively).

Investment Approach

The following is our investment approach:

- Identify markets with an attractive investment landscape and the potential for growth
- Establish operating platforms in our target markets
- Develop local intelligence and create and maintain long-lasting relationships, primarily with financial institutions and the brokerage community
- Leverage relationships and local knowledge to drive proprietary investment opportunities with a focus on off-market transactions that we expect will result in above average cash flows and returns over the long term
- Acquire high quality assets, primarily through our investment management platform with strategic partners and funds that we manage
- Reposition assets to enhance cash flows post-acquisition
- Explore development opportunities or acquire development assets that fit within our overall investment strategy
- Continuously evaluate and selectively harvest asset and entity value through strategic realizations using both the public and private markets

In order to help the user of the financial statements understand our company, we have included certain five-year selected financial data. The table below highlights some of the Company's key metrics over the past five years:

Non-Taxable Return of Capital	—%	100.00%	62.19%	100.00%	72.86%
Total	100.00%	100.00%	100.00%	100.00%	100.00%

Business Segments

Our operations are defined by two primary business segments: our consolidated investment portfolio (the "Consolidated Portfolio") and our co-investment portfolio (the "Co-Investment Portfolio"). In addition to our two primary business segments, we have among other things, corporate overhead and unsecured corporate debt and preferred stock that is not allocated to either of our segments.

Consolidated Portfolio

Our Consolidated Portfolio consists of the investments in real estate and real estate-related assets that we have made and consolidate on our balance sheet, primarily multifamily communities. We typically wholly-own these assets, which have longer hold periods and accretive asset management opportunities.

The non-GAAP table below represents a summarized balance sheet of our Consolidated Portfolio, which is held at historical depreciated cost as of December 31, 2024 and 2023. This table does not include amounts such as corporate cash and the KWI Notes.

($ in millions)	December 31, 2024	December 31, 2023
Cash and cash equivalents[1]	$ 117.4	$ 184.2
Real estate and acquired in place lease values	4,290.4	4,837.3
Accounts receivable and other assets, net	99.7	146.1
Total Assets	**$ 4,507.5**	**$ 5,167.6**
Accounts payable, accrued expenses and other liabilities	118.7	154.3
Mortgage debt	2,597.2	2,840.9
KWE unsecured bonds	309.8	522.8
Total Liabilities	**3,025.7**	**3,518.0**
Equity	**$ 1,481.8**	**$ 1,649.6**

[1] Excludes $100.1 million and $129.5 million as of December 31, 2024 and 2023, respectively, of corporate non-property level cash.

Business (continued)

Co-Investment Portfolio

In addition to investing our shareholder's capital, we invest capital on behalf of our partners in real estate and real estate-related assets, primarily construction loans, through our Co-Investment Portfolio. We invest alongside our partners and typically have a 5% to 50% ownership interest in the assets in our Co-Investment Portfolio and through our ownership positions, we have the potential to earn carried interest as further discussed below. As of December 31, 2024, we have a weighted average ownership of 40% in our Co-Investment Portfolio. We also earn fees for managing our fee-bearing capital (total third-party committed or invested capital that we manage in our joint ventures and commingled funds), including, without limitation, asset management fees, construction management fees, acquisition and disposition fees and origination fees.

The non-GAAP table below represents the carrying value of our Co-Investment Portfolio balance sheet which is primarily at fair value (approximately 92% and 93%, respectively), at our share of the underlying investments as of December 31, 2024 and 2023. The Co-Investment Portfolio consists of our unconsolidated investments as well as our loan purchases and originations.

($ in millions)	December 31, 2024	December 31, 2023
Cash and cash equivalents	$ 137.5	$ 94.8
Real estate and acquired in place lease values	4,564.9	4,619.7
Loan purchases and originations	243.2	259.3
Accounts receivable and other assets, net	236.9	227.3
Total Assets	**$ 5,182.5**	**$ 5,201.1**
Accounts payable, accrued expenses and other liabilities	151.5	125.0
Mortgage debt	2,757.5	2,759.8
Total Liabilities	**2,909.0**	**2,884.8**
Equity	**$ 2,273.5**	**$ 2,316.3**

As of December 31, 2024, our fee-bearing capital was $8.8 billion and we recognized $98.9 million in base investment management fees and had $27.6 million in net accrued carried interests receivable (allocated amounts to us on co-investments we managed based on the cumulative performance of the underlying investment), which included a non-cash write down of $64.3 million of carried interests during the year ended December 31, 2024.

Co-Investment Portfolio Investment Platforms

We have a number of platforms through which we invest in alongside our partners and manage in our Co-Investment Portfolio. For each specific investment opportunity, we evaluate various investment parameters, primarily the asset type, risk return profiles and other parameters against the defined investment parameters of the applicable platforms.

Separate accounts/Joint ventures:

We have several high-quality institutional equity partners that we invest alongside with and for whom we act as the general partner and receive investment management fees. Our separate account platforms have defined investment parameters such as asset types, leverage and return profiles and expected hold periods. As of December 31, 2024, our weighted average ownership interest in the various joint ventures that we manage was 44%.

Commingled funds:

We currently have four closed-end funds that we manage and through which we receive investment management fees and potentially carried interests. We focus on sourcing investors in the U.S., Europe, Japan and Middle East and target investments in the U.S. and Europe with respect to our commingled funds. Each of our funds have, among other things, defined investment guidelines, investment hold periods and target returns. Currently our U.S.-based funds focus on value-add properties in the U.S. that have an expected hold period of 5 to 7 years. Our European fund focuses on value-add commercial properties in the United Kingdom, Ireland and Spain that also have expected hold periods of 5 to 7 years. As of December 31, 2024, our weighted average ownership interest in the commingled funds that we manage was 14%.

Vintage Housing Holdings ("VHH"):

Through our VHH partnership, we acquire and develop income and age restricted properties. See a detailed discussion of this business in the Multifamily section below.

Investment Product Types

The following are the product types we invest in both through our Consolidated Portfolio and Co-Investment Portfolio segments.

Rental Housing

We pursue multifamily acquisition opportunities where we can unlock value through a myriad of strategies, including institutional management, asset rehabilitation, repositioning and recapitalization. We focus primarily on apartments in supply-constrained, infill markets.

As of December 31, 2024, our global rental housing portfolio consisted of 38,285 units and 901 single family housing units.

	Total	Consolidated	Co-Investments
Multifamily units—market rate units[1]	25,590	9,258	16,332
Multifamily units—affordable rate units[1]	12,695	—	12,695
Single family housing units	901	—	901

[1] Includes 2,390 units that are under development or undergoing lease up.

Our largest Western United States multifamily regions are the Mountain West region (which includes our investments in Idaho, Utah, Nevada, Arizona and New Mexico) and the Pacific Northwest (primarily the state of Washington). The remainder of the Western United States portfolio is located in Northern and Southern California. In Europe, we focus on Ireland, particularly Dublin city center and its immediately surrounding suburbs.

Our asset management strategy entails installing strong property management teams to drive leasing activity and upkeep of the properties. We also seek to add amenities designed to promote health and wellness, celebrate local and cultural events and enhance the lives of residents living in our communities. We also incorporate spaces for rest and socialization across our global multifamily portfolio, including clubhouses, fitness centers, business suites, outdoor play areas, pools and dog parks.

Business (continued)

In addition to traditional multifamily units, during the fourth quarter 2024 we launched a new UK single-family rental housing joint-venture with the Canada Pension Plan Investment Board ("CPPIB"), targeting £1 billion in real estate. Under this arrangement, CPPIB will own 90% of the ownership interests, initially committing £500 million in equity and we will own 10% of the ownership interests initially committing £56 million in equity. This joint venture will look to acquire single-family rental properties throughout the UK, targeting areas with strong and growing local economies. As of December 31, 2024 this joint venture has acquired ownership interest in nine sites which consists of 901 single family rental units.

Multifamily—Affordable Housing

Through our VHH platform we focus on affordable units based on income and in some cases age restrictions. With homes reserved for residents that make 50% to 60% of the area's median income, VHH provides an affordable long-term solution for qualifying working families and active senior citizens, coupled with modern amenities that are a hallmark of our traditional multifamily portfolio. Fundamental to VHH's success is a shared commitment to delivering quality affordable homes and building communities that enrich residents' lives, including providing programs such as social support groups, after-school programs, transportation assistance, computer training, and wellness classes.

As of December 31, 2024, we hold an approximate 50% interest in VHH which acts as the general partner ("GP interest") (developer/asset manager) of 60 affordable housing projects totaling 12,695 units (48 investments held with a tax credit limited partner ("tax credit LP") and 12 investments held fee simple which does not have any outside tax credit LPs). The VHH portfolio includes 12,695 units (10,825 operating units and 1,870 units that are under development or lease up), as of December 31, 2024. When we acquired our interest in VHH in 2015, the portfolio consisted of a total of 5,485 units. All of the VHH platform's units are included in our multifamily unit count discussed throughout this report.

With respect to the assets that are held with tax credit LPs, VHH generally sells 99.9% of the legal ownership interest in the applicable asset to the tax credit LPs, in exchange for cash that is used to build and/or rehabilitate the property. Although legal ownership interests in these assets are sold to the tax credit LPs, VHH continues to receive a majority of the cash flow generated from these assets through deferred developer fees and other fee arrangements and profit splits agreed to between VHH and the tax credit LPs (a commonly used structure by peer companies with similar businesses). This structure results in VHH maintaining on average 75% of the economic ownership interests in the assets across the portfolio.

Our VHH platform also has a development component where we find suitable sites and develop properties from the ground up and then lease up the property upon the completion of construction. VHH is paid developer fees for its work as development manager and receive a conversion fee when the property is placed into operation.

Further, on properties where tax credits are sold, VHH typically utilizes tax-exempt bond financing to help finance its partnership investments. Typical financing includes a bridge to permanent financing solution, where a floating rate option is utilized during the construction and lease-up period and a permanent loan with a fixed rate locked at the time of closing becomes effective upon conversion/stabilization. The typical term for these loan facilities is 17 years.

During the year ended December 31, 2024, we received $27.4 million of proceeds from VHH, including $10.3 million from recurring monthly distributions, $6.8 million from paid developer fees at conversion and $10.3 million from sales and refinancings.

We acquired our ownership interest in VHH in 2015 for approximately $80.0 million. As of December 31, 2024, we have contributed an additional $186.2 million into VHH and have received $380.9 million in cash distributions. VHH is an unconsolidated investment that we account for using the fair value option which had a carrying value of $333.9 million as of December 31, 2024. Since we acquired our ownership interests in VHH, we have recorded $356.4 million worth of fair value gains on our investment in VHH, including $36.4 million during the year ended December 31, 2024.

The fair value of the real estate investments held through VHH is determined through a discounted cash flow analysis on a partnership-by-partnership basis. This methodology assumes ordinary distributions during the ownership period and the future sale of the underlying properties after the tax credit period has expired. Our methodology of estimating the fair value of such real estate investments assumes certain market inputs, including average capitalization rates at sale between 6.25%–7.20% and discount rates ranging from 8.25%–9.20%.

- With respect to investments held by VHH with tax credit LPs, the discounted cash flow analysis also factors in the distinct economic splits between VHH and its tax credit LPs. We also record an estimated fair value of the our GP interests with respect to VHH ownership structures with tax credit LPs by taking the fair value of the underlying real estate utilizing the method described above and then factoring in (i) cashflow after debt service and then, (ii) discounting the net cashflow utilizing a levered discount rate that ranges between 16.0% to 19.5% (the "levered discount rates").
- With respect to investments held by VHH fee simple (without tax credit LPs), we also fair value the underlying secured loans on each of the properties, as described further below under "Fair Value Investments".

In addition to completed projects, VHH holds certain investments that they are currently being developed as described above. With respect to such investments VHH is paid developer fees for its work as development manager. Prior to the completion of the development, we estimate the fair value of these investments by applying the levered discount rate described above to the cashflow associated with the paid developer fees. Once complete, the property will be held by VHH with tax credit LPs and we will calculate and record the fair value of such investments utilizing the discounted cash flow methodology described in the previous paragraph.

Real Estate Debt Credit

We have a global credit platform that, as of December 31, 2024, had a total capacity of $12 billion with $9 billion invested or committed to future fundings. Our global credit platform, which includes institutional partners across insurance and sovereign wealth funds, invests across the entire real estate credit capital structure in the United States, United Kingdom and Europe and primarily targets loans secured by high-quality real estate located in such jurisdictions. In addition to interest income (which includes origination, exit and extension fees), in our role as asset manager, we earn customary fees for managing the platform. Currently, our global credit investment platform investments have been made without the use of any leverage and are invested through our Co-Investment Portfolio.

Business (continued)

In the United States, we primarily focus on originating real estate construction loans that consist of variable rate senior loans secured by high-quality, institutional commercial real estate, primarily multifamily and student housing properties, located across the U.S. capitalized by experienced, well-capitalized real estate owners and operators (the "Construction Loan Portfolio"). Our construction loan originations typically finance 50% to 65% of the cost to construct the underlying properties, with loan fundings typically occurring after sponsor capital has been invested. The terms are generally three years with short-term, performance-based extension options. Interest typically accrues into principal balance during the construction period, with principal and interest being paid at maturity. In addition to our Construction Loan Portfolio, we have originated and purchased bridge loans that consist of predominantly variable rate loans, with terms that are generally three-years with one or two 12-month extension options (the "Bridge Loan Portfolio"). Our bridge loans are secured by multifamily, office, retail, industrial and hotel assets in the Western United States or United Kingdom. We also invest in certain mezzanine loans that are fixed rate and tend to have maturities of 5 to 10 years and are secured by multifamily or office properties in the Western United States.

As of December 31, 2024, we held interests in 118 loans in our global debt platform, 81% of which have floating interest rates with an average interest rate of 8.0% per annum and an unpaid principal balance ("UPB") of $4.9 billion (of which our share was a UPB of $256.1 million). Some of our loans contain additional funding commitments that will increase our loan balances if they are utilized. As of December 31, 2024, our loans had unfulfilled capital commitments totaling $4.1 billion (our share of which was $123.4 million).

We have stopped and may stop accruing for interest income if certain loans become non-performing and account for loans on a cash basis. In the event of a borrower defaulting on its obligations under any loan agreement, we will explore all of our remedies including, without limitation, pursuing a foreclosure action or deed in lieu of foreclosure to take control of the underlying collateral securing the loans, although there is no guarantee or assurance that we will be able to do so successfully. As of the year ended December 31, 2024, we successfully completed a deed in lieu of foreclosure for one multifamily asset in the Western United States that is now an asset in our Co-Investment Portfolio (our share of which is 5% or $3.5 million of equity). As of December 31, 2024, we had three loans (in our bridge loan portfolio) out of the 118 loans in our global debt platform with a $12.7 million carrying value at our share and net of any loan reserves that are not paying interest current on a contractual basis. Per the terms of the applicable loan agreements, however, we have implemented a full cash sweep of any cash flow that is generated from the collateral and are working on exercising our available remedies, which may include taking control of the underlying collateral. We are no longer accruing interest under these loans and accounting for them on a cash basis going forward.

Commercial

Our industrial portfolio consists of approximately 12.4 million rentable square feet of distribution centers located primarily in the United Kingdom, Ireland and the Mountain West and Northern California regions of the United States. All of the assets in our industrial portfolio are in our Co-Investment Portfolio and we have a weighted average ownership interest of 18% in such assets.

Our office portfolio consists of approximately 10.5 million rentable square feet of office properties located primarily in the United Kingdom, Ireland and the Western United States. Of the 10.5 million rentable square feet in our office portfolio, approximately 4.1 million rentable square feet (2.5 million rentable square feet of which is from assets located in the United Kingdom and Ireland) is in our Consolidated Portfolio and the remaining 6.4 million rentable square feet is in our Co-Investment Portfolio (which we have a weighted ownership interest of 38%). Office assets in our Consolidated Portfolio are typically large high-quality properties with high replacement costs. Office assets in our Co-Investment Portfolio range from suburban office buildings to office buildings located in central business districts of major cities. Some of our offices consist of flex space for medical lab work or light industrial use and many of our offices focus on tenants in the tech sector.

Our retail portfolio consists of approximately 2.1 million square feet of primarily suburban shopping centers located in the United Kingdom as well as Dublin and Western United States.

Residential, Hotel and Other

In certain cases, we may pursue for-sale housing acquisition opportunities, including land for entitlements, finished lots, urban infill housing sites and partially finished and finished housing projects. On certain income-producing acquisitions, there are adjacent land parcels for which we may pursue entitlement activities or, in some cases, development or redevelopment opportunities.

As of December 31, 2024, we held 19 investments primarily comprised of 1,069 acres of land located in Hawaii and the Western United States and are primarily invested through our Co-Investment Portfolio. These investments are in various stages of completion, ranging from securing the proper entitlements on land positions to sales of units/lots. As of December 31, 2024, these investments had a Gross Asset Value of $261.3 million, and includes our investment in Kohanaiki a private club and residential community located in Kona, Hawaii. We have $99.6 million equity value in Kohanaiki which represents a 55% ownership interest. In addition to our ownership interest, we manage the Kohanaiki asset and develop residential lots and homes for sale.

We also hold ownership interests in the five-star, Rosewood flagged Kona Village Resort that consists of 150 rooms in Kona, Hawaii and which sits in our Co-Investment Portfolio. After we fully redeveloped the project over seven years, we fully opened the Kona Village Resort in July 2023. We currently expect the property to stabilize in 2026. We have $249.7 million equity value which represents an ownership interest of 50% in the Kona Village Resort.

We have a minority ownership interest in Zonda, a technology based real estate business that offers residential construction data providing insights and solutions for leaders in the home building industry. We account for our ownership interest at fair value and it is included within our unconsolidated investments.

This group also includes our investment in liquid non-real estate investments which include investment funds that hold marketable securities and private equity investments.

Development and redevelopment

We have development, redevelopment and entitlement projects that are underway or in the planning stages. Unlike the residential projects that are held for sale and described in the *Residential and Other* section below, these initiatives may ultimately result in income-producing assets. As of December 31, 2024, we are actively developing 288 multifamily units. If these projects are brought to completion, the Company's estimated share of the total capitalization of these projects would be approximately $46.0 million (approximately 48% of which has already been funded), which we expect would be funded through our existing equity, third-party equity, project sales, tax credit financing and secured debt financing. This represents total capital over the life of the projects and is not a representation of peak

Business (continued)

capital and does not take into account any distributions over the course of the investment. We and our equity partners are under no obligation to complete these projects and may dispose of any such assets after adding value through the entitlement process. Please also see the section titled "*Liquidity and Capital Resources—Development and redevelopment*" in Management's Discussion and Analysis of Financial Condition and Results of Operations included in this report for additional detail on these investments.

Fair Value Accounting

The Company accounts for a number of unconsolidated investments under fair value accounting. The accuracy of estimating fair value cannot be determined with precision and cannot be substantiated by comparison to quoted prices in active markets and may not be realized in a current sale or immediate settlement of the asset or liability. In recent years, there has also been a lack of liquidity in the capital markets as well as limited transactions which has had impact on the inputs associated with fair values. Additionally, there are inherent uncertainties in any fair value measurement technique, and changes in the underlying assumptions used, including market-derived estimated capitalization rates, discount rates, liquidity risks, and estimates of future cash flows could significantly affect the fair value measurement amounts. All valuations of real estate involve subjective judgments.

Ongoing macroeconomic conditions, such as, but not limited to, elevated levels of inflation and interest rates, banks' ability and willingness to lend, adverse developments affecting financial institutions and other geopolitical issues, including large-scale conflicts and warfare, and government responses to the same, continue to adversely impact the global economy and create volatility in the financial markets. Any prolonged downturn in the financial markets or a recession or continued volatility in the financial markets, either globally or locally in the United States or in other countries in which we conduct business, could impact the fair value of investments held by the Company. As a result of the rapid development, fluidity and uncertainty surrounding these situations, the Company expects that information with respect to fair value measurement may change, potentially significantly, going forward and may not be indicative of the actual impact on our business, operations, cash flows and financial condition for the year ended December 31, 2024 and future periods.

As of December 31, 2024, $1.9 billion, or 92%, of our investments in unconsolidated investments (27% of total assets) were held at estimated fair value. As of December 31, 2024, there were cumulative fair value gains of $315.4 million which comprises 17% of the $1.9 billion carrying value of fair value unconsolidated investments that are currently held. Our investment in VHH is our largest unconsolidated investment held at estimated fair value and was held at $333.9 million and $285.9 million as of December 31, 2024 and 2023, respectively. Fair value changes consist of changes in the underlying value of properties and associated mortgage debt as well as foreign currency fluctuations (net of any hedges) for non-dollar denominated investments. During the year ended December 31, 2024, we recognized $6.3 million and $49.7 million, respectively, of net fair value losses and write downs of carried interests on Co-Investment portfolio investments. During the year ended December 31, 2023, we recognized $229.3 million and $64.3 million, respectively, of net fair value losses and write downs of carried interests on Co-Investment portfolio investments.

In determining estimated fair market values, the Company utilizes two approaches to value real estate, a discounted cash flow analysis and direct capitalization approach.

Discounted cash flow models estimate future cash flows from a buyer's perspective (including terminal values) and compute a present value using a market discount rate. The holding period in the analysis is typically ten years. This is consistent with how market participants often estimate values in connection with buying real estate but these holding periods can be shorter depending on the life of the structure an investment is held within. The cash flows include a projection of the net sales proceeds at the end of the holding period, computed using a market reversionary capitalization rate.

Under the direct capitalization approach, the Company applies a market derived estimated capitalization rate to current and future income streams with appropriate adjustments for tenant vacancies or rent-free periods. These estimated capitalization rates and future income streams are derived from comparable property and leasing transactions and are considered to be key inputs in the valuation.

Other factors that we take into account under both approaches may include transaction structuring efficiencies, tenancy details, planning, building and environmental factors that might affect the property.

The Company also utilizes valuations from independent real estate appraisal firms on some of its investments ("appraised valuations"), with certain investment structures periodically (typically annually) requiring appraised valuations. All appraised valuations are reviewed and approved by the Company.

The Company has an investment in a Zonda, a technology based real estate business that offers residential construction data that is accounted for at fair value which is valued at the Company's share of the business using a multiple on trailing twelve months EBITDA.

The methodology to determine the value of the Company's investment in VHH is described above under "Multifamily-Affordable Housing."

The table below describes the range of inputs used as of December 31, 2024 for real estate assets:

		Estimated Rates Used For	
		Capitalization Rates	Discount Rates
Multifamily—Affordable	Income approach—discounted cash flow	6.30%—7.20%	8.30%—9.20%
Multifamily—Affordable GP interest	Income approach—discounted cash flow	N/A	16.00%—19.50%
Multifamily—Market Rate	Income approach—direct capitalization	4.60%—6.50%	N/A
Office	Income approach—discounted cash flow	5.20%—7.50%	7.30%—9.30%
	Income approach—direct capitalization	5.30%—10.30%	N/A
Industrial	Income approach—discounted cash flow	5.00%—6.30%	6.30%—7.80%
	Income approach—direct capitalization	4.00%—8.90%	N/A
Hotel	Income approach—discounted cash flow	6.00%	8.30%

In valuing indebtedness, the Company considers significant inputs to be the term of the debt, value of collateral, market loan-to-value ratios, market interest rates and spreads, and credit quality of investment entities. The credit spreads used by the Company to value floating rate indebtedness range from 2.00% to 3.60%, while the market rates used to value fixed rate indebtedness range from 4.10% to 9.30%.

There is no active secondary market for our development projects and no readily available market value given the uncertainty of the amount and timing of future cash flows. Accordingly, our determination of fair value of our development projects requires judgment and extensive use of estimates. Therefore, we typically use investment cost as the estimated fair value until future cash flows become more

predictable. Additionally, the fair value of our development projects may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize. If we were required to liquidate an investment in a forced or liquidation sale, we could realize significantly less than the value at which we have recorded it. In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized or incurred on these investments to be different than the unrealized gains or losses reflected in the currently assigned valuations.

Value Creation

Our differentiated and unique approach to investing is the cornerstone of how we create value for our shareholders. Our investment philosophy is based on three core fundamentals:

- Leverage our global footprint and complementary investment and investment management businesses to identify attractive investment markets across the world.
- Selectively invest in opportunities across many real estate product types with a goal of maximizing cash flow and risk-adjusted return on capital.
- Actively manage assets and finance our assets in a manner designed to generate stable, predictable and growing cash flows for shareholders and clients.

Kennedy Wilson is able to create value for its shareholders in the following ways:

- We are able to identify and acquire attractive real estate assets across many markets, in part due to the significant proprietary deal flow driven from an established global network of industry relationships, particularly with financial institutions. This can create value by allowing us to maintain and develop a large pipeline of attractive opportunities.
- Our operating expertise allows us to focus on opportunistic investments where we believe we can increase the value of assets and cash flows and include transactions with distressed real estate owners or lenders seeking liquidity, or purchases of under-managed or under-leased assets, and repositioning opportunities.
- We have been able to create place-making areas in our investment locations where we are able to make multiple investments in a particular city either through direct investments or development initiatives that further drives interest in the area.
- Many times, these investments are acquired at a discount to replacement cost or recent comparative sales, thereby offering opportunities to achieve above average total returns. In many cases, this may lead to significant additional returns, such as carried interests (where we have partners), based on the performance of the assets.
- Our long-lasting and deep relationships with financial institutions allow us to refinance loans (generally after we implement our value-add initiatives) to reduce interest rates and/or increase borrowings due to property appreciation and thereby obtain cash flow to use for new investments.
- We have been able to attract third party capital due to our ability to generate above-market returns for our partners, diversity of geographic markets and investment product types as well as our flexibility in structuring deals through funds, separate accounts and equity partner arrangements.
- We understand that real estate is cyclical. Our management team employs a multi-cyclical approach that has resulted in our AUM being globally diversified across many sectors of real estate while maintaining a healthy liquidity position and adequate access to capital.

Competitive Strengths

We have a unique platform from which to execute our investment and investment management strategy. The combination of an investment and investment management platform provides several competitive strengths when compared to other real estate buyers and asset managers operating stand-alone or investment-focused firms and may allow us to generate superior risk-adjusted returns. Our investment strategy focuses on investments that offer significant appreciation potential through intensive asset management, leasing, repositioning, redevelopment and the opportunistic use of capital. We differentiate ourselves from other firms in the industry with our full service, investment-oriented structure.

Our competitive strengths include:

- *Transaction experience:* Our senior management team has an average of over 23 years of real estate experience and has been working and investing together on average for almost 19 years. Members of the senior management team have collectively acquired, developed and managed in excess of $30 billion of real estate investments in the United States, the United Kingdom, Ireland, Spain, Italy and Japan throughout various economic cycles, both at our Company and throughout their careers.
- *Extensive relationship and sourcing network:* We leverage our relationships in order to source attractive on and off-market deals. In addition, the senior management team and our acquisition team have transacted deals in nearly every major metropolitan market on the West Coast of the United States, as well as in the United Kingdom, Ireland, Spain, Italy and Japan. Their local presence and reputation in these markets have enabled them to cultivate key relationships with major holders of property inventory, in particularly financial institutions, throughout the real estate community.
- *Structuring expertise and speed of execution:* Prior acquisitions completed by us have taken a variety of forms, including direct property investments, joint ventures, exchanges involving stock or operating partnership units, participating loans and investments in performing and non-performing mortgages at various capital stack positions with the objective of long-term ownership. We believe we have developed a reputation of being able to quickly execute, as well as originate and creatively structure acquisitions, dispositions and financing transactions.
- *Strategic partnerships:* Through our relationships and transaction experience we have been able to establish various strategic partnerships with a variety of different companies and institutions in which we are highly collaborative and aligned with our partners in the deals. Coupled with our ability to structure acquisitions in a variety of ways that fit the needs of our strategic partners, we have been able to access various forms of capital due to our experience and versatility.
- *Vertically integrated platform for operational enhancement:* We have 246 employees in 14 offices throughout the United States, the United Kingdom and Ireland. We have a hands-on approach to real estate investing and possess the local expertise in property and asset management, leasing, construction management, development and investment sales, which we believe enable us to invest successfully in selected submarkets.
- *Calculated risk taking:* We underwrite our investments based upon a thorough examination of property economics and a critical understanding of market dynamics and risk management strategies. We conduct an in-depth sensitivity analysis on each of our acquisitions. This analysis applies various economic scenarios that include changes to rental rates, absorption periods, operating expenses, interest rates, exit values and holding periods. We use this analysis to develop our disciplined acquisition strategies.

- *Management's alignment with shareholders:* As of December 31, 2024, our directors and executive officers and their respective affiliates owned an aggregate of approximately 13% of the outstanding shares of our common stock. Due to our management team's ownership interest in the Company its interests are in alignment with common shareholders of the Company and gives us an owner's mentality on the investments we own and manage.

The real estate business is cyclical. Real estate cycles are generally impacted by many factors, including availability of equity and debt capital, borrowing cost, rent levels, and asset values. Our strategy has resulted in a strong track record of creating both asset and entity value for the benefit of our shareholders and partners over these various real estate cycles.

Industry Overview

Key Investment Markets

Western United States

In 2024, the Federal Reserve (the "Fed") began to shift its interest rate policy and reducing interest rates for the first time in four years. Beginning in September 2024, the Fed reduced its target federal funds rate by 1%, ending the year with a range of 4.25% to 4.50%. These adjustments aimed to balance economic growth with inflation control. The U.S. economy demonstrated resilience, with real gross domestic product ("GDP") increasing at an annual rate of 2.8% in the third quarter, driven by robust consumer spending, which rose by 3.7%. The reduction in rates helped support an improvement in liquidity and a recovery in commercial real estate transaction volumes.

The U.S. multifamily sector demonstrated resiliency in 2024. The combination of high mortgage rates and a high cost of living continued to make homeownership difficult, creating sustained fundamental demand for rental housing. Despite record deliveries, occupancy has remained healthy as the United States is still facing a significant housing shortage of approximately 3.9 million units. The delivery of newly developed rental housing is expected to slow significantly in the coming years as a result of lower construction starts, which is expected to continue to sustain healthy demand for multifamily assets.

The Industrial sector experienced a recalibration after a period of rapid expansion. Following three years of exceptional rental growth and absorption, the sector faced an inflection point in 2024. Market rents declined slightly due to lower-than-expected absorption amid significant deliveries. While corrections were market wide, coastal markets felt the brunt of the impact due to significantly higher deliveries in recent years. Despite short term adjustments, the long-term outlook for industrial remains favorable driven by sustained e-commerce activity, supply chain optimization efforts and onshoring.

The lending environment in 2024 remained slow from banks and Federal Deposit Insurance Corporation ("FDIC") insured institutions. The total volume of outstanding acquisition, development, and construction loans made by FDIC-insured institutions fell for the third consecutive quarter during the third quarter of 2024 to a volume of $490.7 billion, down from $495.8 billion in the second quarter. The decline reflects tighter lending conditions. Residential construction and land development loans from such traditional banking institutions fell to $90.8 billion, an 8.4% year-over-year drop.

The Office sector faced ongoing challenges as hybrid work models continued. There continued to be a divide between high-quality, well located assets and lower quality, older assets. However, the office market is expected to shift into 2025, as the lack of new supply, greater corporate confidence, and the potential for increasing office usage is expected to drive demand for higher quality office assets (similar to the office assets within the Company's office portfolio).

Hawaii

Hawaii's real estate market remains consistent in 2024 driven by tourism. Hawaii saw similar levels of visitors as compared to 2023 with more than 8.7 million visitors in the first 11 months of 2024, a 0.2% decrease year over year. However, during that same period, total visitor spending was $2.9 billion a 6.1% increase over 2023. The median sale price of single family homes increased 8% year over year to $975,000, reaffirming Hawaii's enduring appeal despite economic headwinds.

Ireland

Ireland's economy is estimated to have had nominal GDP growth of 1.4% in 2024, and the Organization for Economic Co-operation and Development is forecasting Ireland to have progressively higher GDP growth over the next two years reach 5.4% by year-end 2026. Real estate investment volumes were 30% higher year over year comparing 2024 with 2024 with €2.4 billion of investment during 2024.

Dublin office take-up was more than 2.26 million square feet in 2024 with prime headline city center rents remained unchanged at €62.50 per square foot but are expected to increase to €65.00 per square foot over 2025. The multifamily investment market still remains quiet, however, the rental market remains strong with a significant structural undersupply of rental accommodation and continued growing employment and wage inflation.

United Kingdom

In the United Kingdom, total investment volumes of £53.6 billion during 2024 represents a 20% increase year over year in comparison to 2023. Top sectors for trades were industrial, retail and office. Office take up increased in Central London with a total of 9.6 million sq ft for 2024 but still remains 3% below the 10 year average. Total industrial take up in 2024 ended up 6% to 48.7 million square feet. Manufacturers continue to drive the improvement in demand which has settled at pre-pandemic levels, and forward commitments by retailers and data center operators also helped drive demand.

Environmental, Social and Governance (ESG)

Kennedy Wilson's approach to ESG aligns with its business strategy to maximize the inherent value of our assets and by striving to deliver long-term value across our portfolio and to our key stakeholders. We aim to integrate ESG factors into key business processes, underpinned by a measure, manage, and monitor approach framed by four pillars most relevant to our business: Optimizing Resources, Creating Great Places, Building Communities and Operating Responsibly.

The ESG Committee of the Board of Directors (the "committee") oversees the Company's ESG program, including opportunities and risk management strategies. The committee's main areas of focus include:

- Overseeing and reviewing the Company's ESG strategies, initiatives, and policies, including the Company's ESG-related reporting and disclosures.
- In conjunction with the Compensation Committee, overseeing and reviewing the Company's culture and human capital management strategy, initiatives, and policies

- In conjunction with the Audit Committee, overseeing risk management and oversight programs and performance-related material to ESG matters affecting Kennedy Wilson.
- Compliance with all federal, state and local ESG-related mandates, including those related to climate risk and building performance.

The committee is also responsible for overseeing Kennedy Wilson's management-level Global ESG Committee. That Global ESG Committee, manages the Company's ESG responsibilities and commitments and is responsible for formulating and implementing procedures and priorities to deliver the Company's ESG strategy.

The Global ESG Committee focuses on the following: monitoring compliance with existing and future material ESG-related laws and regulations applicable to the Company and its investments that would have a material impact on business operations; setting appropriate global ESG priorities with the aim to align across target markets; monitoring delivery progress; and supporting ESG communication to investors and other stakeholders.

Human Capital Management

Company Overview and Values

We operate as a teamwork-oriented, and nimble organization. We promote an entrepreneurial culture, and at our core, we are powered by a team of focused, high-performance people who thrive on excellence in the workplace and a shared desire to make an impact. We strive to maintain a corporate culture, that allows for better representation of different viewpoints, perspective and can bring fresh ideas to all levels of the Company. Within Kennedy Wilson's total workforce comprises 246 employees.

Training and Development

Kennedy Wilson would not exist without our most important asset: our people. We strive to maintain a culture that fosters collaboration and innovation, and we take great pride in building and maintaining a driven, results-oriented workforce. Our talent development program includes access to formal and informal mentorships, tuition reimbursement, where we are supporting employees who are seeking advanced certificates in areas of specialty that pertain to their role at Kennedy Wilson, and "Lunch and Learn" sessions. These alongside our regular global senior management calls continue to develop our managers to become more effective leaders. A dynamic internship and internal transfer program also helps promote personal development and improves leadership skills across all departments.

Through our annual summer internship program, we continue to build a diverse pipeline of talented individuals in the real estate industry with the intention to introduce our business to those who may not have considered a career in real estate. Through our own efforts, and through partnerships with organizations, our aim continues to be training and developing the next group of leaders.

Competition

We compete with a range of global, national and local real estate firms, individual investors and other corporations, both private and public. In our real estate credit debt business we compete with banks and life insurance companies. Our investment business competes with real estate investment partnerships, real estate investments trusts, private equity firms and other investment companies and regional investors and developers. We believe that our relationships with the sellers and our ability to close an investment transaction in a short time period at competitive pricing provides us a competitive advantage.

Foreign Currency

Approximately 34% of our investment account is invested through our foreign platforms in their local currencies. Investment level debt is generally incurred in local currencies and we consider our equity investment as the appropriate exposure to evaluate for balance sheet hedging purposes. We typically do not hedge foreign exchange rates for future operations or cash flows of operations, which may have a significant impact on the results of our operations. In order to manage the effect of fluctuations in foreign exchange rates, we generally hedge our book equity exposure to foreign currencies through currency forward contracts and options.

We wholly-own Kennedy Wilson Europe Real Estate Limited ("KWE"), which is domiciled in the United Kingdom and has GBP as its functional currency. KWE has investments in assets that have functional currencies of GBP and euros. Kennedy-Wilson Holdings, Inc. does not have a direct interest in the euro-denominated investments but has indirect ownership through its interest in KWE. We cannot directly hedge the foreign currency movements in these euro-denominated assets but we do hedge foreign currency movements in euro assets at the KWE level through GBP/EUR hedging instruments. We then are able to hedge the USD/GBP foreign currency exposure through our direct interest in KWE.

Within KWE we have historically utilized two types of contracts to hedge our GBP/EUR exposure: foreign forward and option currency contracts and the KWE Euro Medium Term Notes ("KWE Notes"). The KWE Notes were issued in euros and held by KWE but we have elected to treat the foreign currency movements as a net investment hedge on our euro-denominated investments in KWE. The foreign currency movements on these hedge items above are recorded to unrealized foreign currency derivative contract gains/losses within other comprehensive income for GBP/EUR movements. However, when we translate our investment in KWE from USD/GBP, the foreign currency movements on these items go through unrealized foreign currency translation gains/losses within other comprehensive income.

Please refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation for a discussion regarding foreign currency and currency derivative instruments.

Transaction-Based Results

A significant portion of our cash flow is tied to transaction activity which can affect an investor's ability to compare our financial condition and results of operations on a quarter-by-quarter or year-over-year basis or to easily evaluate the breadth of our operation. Historically, this variability has caused our revenue, net income and cash flows to be tied to transaction activity, which is not necessarily concentrated in any one quarter.

Employees

As of December 31, 2024, we have 246 employees in 14 offices throughout the United States, the United Kingdom and Ireland. We believe that we have been able to attract and maintain high quality employees. There are no employees subject to collective bargaining agreements. In addition, we believe we have a strong relationship with our employees.

Available Information

Information about us is available on our website (http://www.kennedywilson.com) (this website address is not intended to function as a hyperlink, and the information contained in, or accessible from, our website is not intended to be a part of this filing). We make available on our website, free of charge, copies of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements on Schedule 14A and amendments to those reports and other statements filed or furnished pursuant to Section 13(a), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after filing or submitting such material electronically or otherwise furnishing it to the SEC. In addition, we have previously filed registration statements and other documents with the SEC. Any document we file is available at the SEC's internet address at http://www.sec.gov (this website address is not intended to function as a hyperlink, and the information contained in, or accessible from, the SEC's website is not intended to be a part of this filing).

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the financial statements and related notes and the other financial information appearing elsewhere in this report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. See the section titled "Forward-Looking Statements" for more information. Actual results could differ materially from those anticipated in the forward-looking statements as a result of many factors, including those discussed in the section titled "Risk Factors" and elsewhere in this report.

Unless specifically noted otherwise, as used throughout this Management's Discussion and Analysis section, "we," "our," "us," "the Company" or "Kennedy Wilson" refers to Kennedy-Wilson Holdings, Inc. and its wholly-owned subsidiaries. "Equity partners" refers to the subsidiaries that we consolidate in our financial statements under U.S. GAAP (other than wholly-owned subsidiaries) and third-party equity providers. Please refer to "Non-GAAP Measures and Certain Definitions" for definitions of certain terms used throughout this report.

Overview

We are a real estate investment company as well as investment manager with over $28.0 billion of AUM in high growth markets across the United States, the United Kingdom and Ireland. With an objective of generating strong long-term risk-adjusted returns for our shareholders and partners and drawing on over three decades of experience in identifying opportunities and building value through various market cycles, we primarily focus on (i) investing in the rental housing sector (both market rate and affordable units) and industrial properties; and (ii) originating, managing and servicing real estate loans (primarily senior construction loans secured by high quality multifamily and student housing properties that are being developed by institutional sponsors throughout the United States). We also have investments in office assets and other investments which include hotel and retail properties.

2024 Highlights

During the year ended December 31, 2024, we achieved the following:

- Originated $3.5 billion of new senior construction loans through our debt investment platform
- Generated total investment management fees of $98.9 million, an increase of 59.8% from the year ended December 31, 2023
- Continued to see strength in our stabilized multifamily portfolio which saw same-store occupancy grow by 0.8% to 94.6%, same-property revenue growth of 3.5%, and same-property NOI growth of 3.6%
- Generated $1.7 billion of cash from asset sales and loan repayments (our share of which was $520 million) and redeployed capital to pay down indebtedness and to consummate new investment opportunities
- Grew Fee-Bearing Capital by 5% to a record $8.8 billion
- Repaid €175 million of KWE Notes and $45 million net pay down on the Company's credit facility

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

For the year ended December 31, 2024, we had net loss attributable to Kennedy-Wilson Holdings, Inc. common shareholders of $76.5 million as compared to a net loss of $341.8 million for the same period in 2023. For the year ended December 31, 2024 we had Adjusted EBITDA of $539.7 million as compared to $189.8 million for the same period in 2023. These results include $213 million and $473 million of non-cash expenses for the years ended December 31, 2024 and 2023, respectively, which primarily consist of depreciation and amortization and changes in fair values. For the year ended December 31, 2024, as described above, we recognized higher investment management fees and interest income primarily driven from our debt investment platform. These increases were offset by lower levels of NOI from hotel operations as we sold the Shelbourne hotel during the first quarter of 2024.

In our Co-Investment portfolio, we had $29.9 million of realized operating results, $32.6 million realized gain on sale of an unconsolidated investment that was not accounted for at fair value and recorded non-cash unrealized fair value and carried interests declines of $56.0 million during the year ended December 31, 2024 as compared to $40.8 million of realized operating results and $293.6 million of non-cash unrealized fair value and carried interest declines during the same period in 2023. During the year ended December 31, 2024, we had non-cash unrealized fair value losses and carried interests write downs primarily relating to (i) lower fair values with respect to office properties in the Western United States, Ireland and United Kingdom due to lower market assumptions of vacancy and rental growth with respect to the same; and (ii) the reversal of previously accrued interests with respect to the assets described in (i) above that are located in the Western United States. Such fair value losses were offset by a $30.4 million fair value increase on our minority investment in Zonda which closed a merger transaction during the first quarter of 2024. This transaction led to cost synergy opportunities and increase in earnings in that business. Operating results in our Co-Investments Portfolio declined due to losses at recently completed development projects as we work towards stabilizing operations and occupancy. The properties were not in service in the year ended December 31, 2023 and any costs associated with the properties were capitalized as they were still under development during such period.

Results of Operations

The following tables summarize our results of operations by segment for the years ended December 31, 2024 and 2023 and is intended to be helpful in understanding the year over year explanations following the tables.

Our results of operations for 2023 and 2022 can be found under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, which is incorporated by reference herein to our Annual Report on Form 10-K for the fiscal year ended December 31, 2023, filed with the SEC on February 22, 2024, and is available on the SEC's website at www.sec.gov and our Investor Relations website at www.ir.kennedywilson.com (this website address is not intended to function as a hyperlink, and the information contained in, or accessible from, our website is not intended to be part of this filing).

Kennedy Wilson Consolidated Financial Results: Year Ended December 31, 2024 Compared to the Year Ended December 31, 2023

Financial Highlights

GAAP net loss to common shareholders was $76.5 million and $341.8 million for the year ended December 31, 2024 and 2023, respectively.

Adjusted EBITDA was $539.7 million for the year ended December 31, 2024, a 189% increase from $189.8 million for 2023. Adjusted segment EBITDA was $554.0 million for the year ended December 31, 2024 and $218.6 million for 2023. The increase in GAAP net income to common shareholders and Adjusted EBITDA is primarily due to (i) higher levels of investment management fees (60% increase) from our real estate debt business as compared to the prior year; and (ii) higher levels of non-cash unrealized fair

value gains and lower levels of write downs on carried interests on our investments in our Co-Investment Portfolio as compared to the prior year. Please see "Co-Investment Portfolio Segment" below for a discussion of the fair value movements during the current and prior periods.

Operational Highlights

Same property highlights for the year ended December 31, 2024 include:

- For our 17,279 same property market rate multifamily units for the year ended December 31, 2024 as compared to the prior period:
  - occupancy increased 95% from 94%
  - net operating income (net effective) increased 3%
  - total revenues increased 3%
- For our 9,157 same property affordable rate multifamily units for the year ended December 31, 2024 as compared to the prior period:
  - occupancy increased 0.4% to 95%
  - net operating income (net effective) increased 6%
  - total revenues increased 6%
- For our 3.5 million square feet of same property office real estate for the year ended December 31, 2024 as compared to the prior period:
  - occupancy remained flat at 94%
  - net operating income (net effective) increased 2%
  - total revenues increased 2%
- Investment Transactions for the year ended December 31, 2024 include:
  - Consolidated Portfolio:
    - Recognized $160.1 million of gain on sale of real estate, net which generated $367 million in cash to us. The major sales included: (i) the Company's sale of the Shelbourne hotel which resulted in a gain of $99.1 million; (ii) the sale of a wholly-owned multifamily asset in Western United States which resulted in a gain of $56.1 million; (iii) the sale of a building in an office campus which had a gain of $21.6 million; (iv) the deconsolidation of a previously wholly-owned multifamily property as a result of our sale of 90% of the ownership interest to a new partner which resulted in a gain of $8.1 million; and (v) the remainder of gain on sale of real estate, net was a realized loss relating to the sale of non-core retail in the United Kingdom and Spain. The gain on sale of real estate, net includes an impairment loss of $22.1 million relating to non-core office and retail buildings in the United Kingdom, Spain and Italy that were marketed for sale during such period.
  - Co-Investment Portfolio
    - Completed $797.6 million in gross real estate acquisitions in which the Company had a 13.3% ownership interest and dispositions of $613.3 million in which the Company had a 23.8% ownership interest.
    - Originated $3.5 billion in new construction loans, completed $1.1 billion in additional fundings on existing loans, and realized $1.0 billion in repayments, the Company's share of which were $86.6 million, $43.4 million and $50.1 million respectively.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Foreign Exchange—Results of Operations

A significant portion of our investments are in foreign currencies. We typically do not hedge future operations or cash flows so changes in foreign currency rates will have an impact on our results of operations. We have included the table below to illustrate the impact these fluctuations have had on our revenues, net income and Adjusted EBITDA by applying the relevant exchange rates for the prior period. Please refer to the section titled "*Currency Risk—Foreign Currencies*" in Item 7 for a discussion of risks relating to foreign currency and our hedging strategy and the "*Other Comprehensive Income*" section below for a discussion of the balance sheet impact of foreign currency movements on our results of operations.

Year Ended December 31, 2024	Consolidated		Co-Investment		Total	
Revenues	$ 0.3	—%	$ (0.2)	—%	$ 0.1	—%
Net Income	1.4	2%	1.0	1%	2.4	3%
Adjusted EBITDA	1.7	—%	0.4	—%	2.1	—%

Year Ended December 31, 2023	Consolidated		Co-Investment		Total	
Revenues	$ 5.9	1%	$ 0.1	—%	$ 6.0	1%
Net Income	(5.2)	(2)%	—	—%	(5.2)	(2)%
Adjusted EBITDA	(1.3)	(1)%	0.6	1%	(0.7)	—%

Consolidated Portfolio Segment

Rental income was $390.6 million for the year ended December 31, 2024 as compared to $415.3 million for the same period in 2023. The $24.7 million decrease is primarily due to (i) the sale of a building in a wholly-owned office campus in Western United States in the first quarter of 2024 as well as a major tenant vacating from other buildings in the same office campus in the fourth quarter of 2023; (ii) the sale of a retail property in Ireland in the third quarter of 2023 and a retail property in Spain in third quarter of 2024.

Hotel income was $9.3 million for the year ended December 31, 2024 as compared to $57.1 million for 2023. The $47.8 million decrease is due to the sale of the Shelbourne hotel in the first quarter of 2024.

Gain on sale of real estate, net was $160.1 million for the year ended December 31, 2024 as compared to $127.6 million in the prior period. The gains recognized during the year ended December 31, 2024 are primarily due to (i) the Company's sale of the Shelbourne hotel which resulted in a gain of $99.1 million; (ii) the sale of a wholly-owned multifamily asset in Western United States for a gain of $56.1 million; (iii) the sale of a building in a wholly-owned office campus which resulted in a gain of $21.6 million; (iv) the deconsolidation of a previously wholly-owned multifamily property as a result of our sale of 90% of the ownership interest to a new partner which resulted in a gain of $8.1 million; and (v) the remainder of gain on sale of real estate, net relates to the sale of non-core retail in the United Kingdom and Spain which had a realized loss in addition to impairment discussed below. These sales generate total cash proceeds of $367.0 million during the year ended December 31, 2024. The gain on sale of real estate, net includes an impairment loss of $22.1 million relating to non-core office and retail buildings in the United Kingdom, Spain and Italy that were marketed for sale during such period. The gains recognized during the year ended December 31, 2023 are primarily due to (i) the Company's sale of 49% of its equity interest in two previously wholly-owned market-rate multifamily properties into an existing joint venture platform managed by the Company and retained a noncontrolling 51% interest in such properties, which resulted in a gain on sale of real estate of $79.5 million; (ii) the sale of a property in the Western United States to our VHH platform, pursuant to which the Company retained an interest in the asset through its ownership interest in VHH, which resulted in a gain of $15.1 million; (iii) the sale of a consolidated multifamily property owned with a noncontrolling interest partner which resulted in a gain of $37.6 million ($20.1 million of which was at the Company's share) and (iv) the remainder of gain on sale of real estate relates to the sale of non-core retail and residential properties in the Western United States, United Kingdom, Ireland, and Spain. These sales generated total cash proceeds of $267.8 million during the year ended December 31, 2023. These gains are net of $28.6 million of impairments relating to retail assets in the United Kingdom, Ireland and the Western United States that have been identified for sale.

Rental expenses decreased to $150.0 million for the year ended December 31, 2024 as compared to $152.6 million for the year ended December 31, 2023. The decrease is due to sales of properties as discussed above which were offset by inflationary increases on items like payroll, utilities and insurance.

Hotel expenses decreased to $7.6 million for the year ended December 31, 2024 as compared to $37.9 million for the year ended December 31, 2023 due to the sale of the Shelbourne hotel in the first quarter of 2024.

Compensation and related expenses decreased to $39.4 million for the year ended December 31, 2024 as compared to $42.7 million for the year ended December 31, 2023 due to a lower allocation of corporate expenses to the Consolidated segment in the current period due to the growth of the Co-Investments segment.

General and administrative expenses decreased to $14.9 million for year the ended December 31, 2024 as compared to $15.5 million for the year ended December 31, 2023. While general and administrative expenses were slightly higher overall for the Company during the year ended December 31, 2024 as compared to the prior periods, there was a lower allocation of corporate expenses to the Consolidated segment in the current period due to the growth of the Co-Investments segment.

Other income was $1.0 million for the year ended December 31, 2024 as compared to $2.3 million for the year ended December 31, 2023. The difference period-over-period was primarily attributed to: (i) mark to market fair value losses of $14.0 million on the Company's undesignated interest rate caps and swap contracts for the year ended December 31, 2024 as compared to $18.3 million in the prior period; (ii) $18.5 million of cash proceeds received during the year ended December 31, 2024 on interest rate caps and swaps and $16.7 million in the prior period which offset the mark to market fair value losses discussed above; and (iii) $4.8 million of foreign exchange losses during the year ended December 31, 2024 as compared to a loss of $0.3 million in the prior period. In addition, during the year ended December 31, 2024 we had $4.4 million in interest income as compared to $1.3 million in the prior period, as a result of our higher cash balance in Europe from the sale of the Shelbourne hotel. In the current period we had $3.1 million in expenses due to severance and acquisition related costs primarily in Europe with minimal activity in the prior year.

Net income attributable to noncontrolling interests was $0.7 million for the year ended December 31, 2024 as compared to $22.4 million for the year ended December 31, 2023. The decrease is due to allocation of gains from the sale of real estate, net on a consolidated multifamily property and a non-core retail asset both in the Western United States during the prior period.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

The following items are not in Adjusted Segment EBITDA above for Consolidated portfolio but are in net loss attributable to Kennedy-Wilson Holdings, Inc. common shareholders:

Depreciation and amortization decreased to $148.3 million for year ended December 31, 2024 the as compared to $157.8 million for the year ended December 31, 2023 as a result of the Company being a net seller of assets over the last year.

Interest expense was $160.5 million for the year ended December 31, 2024 as compared to $162.0 million for the year ended December 31, 2023. The decrease is primarily due to decreases in consolidated mortgage balance over 2024 due to asset sales over the current and prior periods which was offset by higher interest rates on mortgages in the current period.

Co-Investment Portfolio Segment

Investment Management

We receive fees, including asset management fees, construction management fees, and/or acquisition and disposition fees, for managing assets in our Co-Investment Portfolio on behalf of our partners. During the year ended December 31, 2024, fees recorded through revenues were $98.9 million as compared to $61.9 million for the same period in 2023. The increase in recorded fees for the year ended December 31, 2024 as compared to the same period in 2023 was due to origination fees on loan originations in the construction loan portfolio and higher base management fees for the year ended December 31, 2024 as a result of having more AUM in our Co-Investment Portfolio mainly due to the growth of our global debt platform and Western United Sates multifamily separate accounts.

Co-Investment Operations—Loans

Loan income from loan investments increased to $31.2 million for the year ended December 31, 2024 as compared to $26.1 million for the same period in 2023. These amounts represent interest income on our share of loan investments within our global debt platform. The increase is primarily due to the growth of the global debt platform and rising interest rates as the majority of our loans in our global debt platform are floating rate loans.

We recognized $11.0 million of reserves against our loan portfolio in other loss during the year ended December 31, 2024 as compared to $7.0 million in the prior period. The reserves on our loan portfolio relate to our bridge loan portfolio as market conditions indicate that there could be potential credit losses due to the current interest rate environment and general market conditions.

Co-Investment Operations—Real Estate

In addition to our management of investments in the Co-Investment Portfolio, we generally have ownership interests in the properties. The table below represents a breakout of the amounts within income from unconsolidated investments which represents our share of underlying property investments in the Co-Investment Portfolio assets and any associated carried interests for the year ended December 31, 2024 and 2023:

	Year Ended December 31,	
	2024	2023
Revenue		
Rental	$ 289.9	$ 256.3
Hotel	31.7	11.1
Sale of real estate	46.7	19.5
Total revenue	368.3	286.9
Fair value/other adjustments	(9.8)	(233.7)
Gain on sale of real estate, net	32.6	—
Carried interests	(49.7)	(64.3)
Expenses		
Rental	94.8	82.8
Hotel	36.3	16.3
Cost of real estate sold	43.1	13.6
Depreciation and amortization	3.9	3.2
Total expenses	178.1	115.9
Interest expense	(131.0)	(99.0)
Other loss	(25.4)	(26.6)
Provision for income taxes	(0.4)	(0.2)
Income (loss) from unconsolidated investments	$ 6.5	$ (252.8)

The increase in income from unconsolidated investments is primarily due to the following:

Operating performance

During the year ended December 31, 2024, the Company recognized an increase in rental and hotel revenue of $54.2 million as compared to the same period in 2023, primarily as a result of the recapitalization of certain previously consolidated multifamily properties that are now a part of our co-investment portfolio and the opening of the Kona Village Resort in July 2023. This increase in rental and hotel revenue was offset by: (i) costs associated with the ongoing stabilization of the Kona Village Resort and development properties in Europe that are in the process of leasing up, as these projects were under development in prior period and all costs were capitalized during construction (ii) higher interest expense due to changes in the contractual interest rates of our indebtedness and higher debt balances due to the increase in assets in Co-Investment portfolio; and (iii) lower income from sales of residential units at our Kohanaiki development in Hawaii as compared to the prior period.

We had a gain on sale of real estate, net of $32.6 million during the year ended December 31, 2024 due to the sale of the majority of our interest in a multifamily property in Western United States that was not accounted for under fair value and we did not have comparable activity in the prior period.

Fair Value

During the year ended December 31, 2024, the Company recorded fair value decreases with respect to: (i) lower fair values with respect to office properties in the Western United States, Ireland and United Kingdom due to lower market assumptions of vacancy and rental growth with respect to the same; and (ii) non-cash fair value losses on mortgage debt and hedges associated with interest rates as previous non-cash fair value gains unwind as loans and hedges move closer to maturity dates. These fair value

decreases were offset by (i) fair value increases with respect to our minority ownership interest in Zonda, a technology based real estate residential housing advisory business, as a result of its recent completion of a merger transaction; (ii) fair value increases associated with our investment in VHH due to increases in NOI at the underlying properties and lower cost of capital associated with the business as interest rates have moved down; and (iii) fair value increase on a recently completed multifamily development in the Western United States as operations ramp up.

During the year ended December 31, 2024, we recorded a $49.7 million decrease in the accrual for carried interests in our commingled funds primarily related to the fair value decreases that the Company recorded with respect to office assets in a United States commingled fund and on certain separate account platforms that hold multifamily assets in the Western United States.

During the year ended December 31, 2023, valuations continued to pull back primarily as a result of continued expansion of estimated capitalization rates and significant reductions in transaction volumes and liquidity due to, increased borrowing rates as the Federal Reserve continued its interest rate hikes and increased the federal funds rate by 100 basis points during 2023. As such, during the year ended December 31, 2023 the Company recorded fair value decreases with respect to: (i) certain office properties in the Western United States, Ireland and United Kingdom primarily due to expansion in estimated capitalization rates, primarily as a result of increased interest rates, which also led to us recording a decrease of the accrued carried interests with respect to funds that held these investments as discussed below; (ii) certain market rate multifamily properties in the Western United States and Ireland primarily due to expansion in estimated capitalization rates; (iii) the write off of a $5 million investment in a social impact real estate fund manager; and (iv) a decrease in the fair value of a building that we hold a 10% ownership interest in due to a national co-working office tenant no longer paying rent at such property. These fair value decreases were offset by (i) a fair value increase of $51.5 million with respect to our investment in VHH (our affordable rate multifamily platform) due to gains on the conversion of the status of one of VHH's largest properties from development to operating, gains associated with the conversion of the loan secured by such property from a floating rate construction loan to a long-term fixed rate mortgage (the rate of which was set in 2019), the resyndication of properties and (ii) fair value increases recognized by the Company on fixed rate mortgages due to increases in market interest rates.

During the year ended December 31, 2023, we recorded a $64.3 million decrease in the accrual (non-cash) for carried interests primarily related to the fair value decreases noted above. VHH does not have a carried interests arrangement associated with the investment, and therefore, such increases in non-cash fair value noted above did not contribute to the caried interests results.

Please also see "*Part I. Item 1. "Fair Value Investments*"" for additional details.

Segment Expenses

Expenses increased to $59.3 million for the year ended December 31, 2024 as compared to $43.3 million for the same period in 2023. The increase compared to the prior period was primarily due to higher allocation of corporate expenses due to the growth of our real estate debt business.

Non-Segment Items

Compensation and related, corporate for the year ended December 31, 2024 were $46.3 million as compared to $57.7 million for the year ended December 31, 2023. The decrease in expenses is primarily due to lower share-based compensation due to lower share price on recent grants and

additional expense in the prior period in connection with the retirement of the Company's former President (the "former executive") from the Company. Pursuant to the terms of the former executive's separation and consulting agreement with the Company (the "Agreement"), the former executive's outstanding restricted share units, held as of her separation date, will continue to vest in future periods in accordance with the terms of the applicable restricted stock unit grants agreements. However, the arrangement per the Agreement is considered a modification of her awards and the Company has revalued her share awards over the remaining periods, which resulted in a one-time $5.5 million of additional expense year ended December 31, 2023.

Non-Segment interest expense on our corporate unsecured debt was $100.6 million for the year ended December 31, 2024 as compared to $97.2 million for the same period in 2023. For the year ended December 31, 2024 we had lower capitalized interest in the current period as our development pipeline has neared completion.

Other income (loss) increased to income of $14.2 million for the year ended December 31, 2024 as compared to other loss of $0.3 million for the same period in 2023. The Company recorded realized foreign exchange gains of $6.5 million for the year ended December 31, 2024 as compared to realized losses of $3.3 million in the prior period primarily due to decreases in the euro exchange rate on portion of its line of credit that was drawn in euros. We recorded $5.9 million in expenses associated with future compensation and consulting fees in connection with the former executive's Agreement, as discussed above during the prior period with no comparable activity in the current period. During the year ended December 31, 2024, we recorded $5.5 million of mark to market fair value gains on interest rate caps and swaps that the Company bought to hedge its variable rate interest rate exposure as compared to $4.3 million in year ended December 31, 2023. We received $7.6 million and $7.4 million in cash on interest rate caps and swaps during the year ended December 31, 2024 and 2023, respectively. For the year ended December 31, 2024 we received $2.5 million of interest income on bank deposits due to rising interest rates as compared to $4.3 million in the prior period.

Provision for income taxes was $10.2 million for the year ended December 31, 2024 as compared to a benefit from taxes of $55.3 million for the year ended December 31, 2023. The increase in income tax expense was primarily attributable to a $313.2 million increase in worldwide pre-tax book income in 2024 as compared to 2023, primarily as a result of the prior period having significant non-cash fair value decreases during the year. Our effective tax rate for the year ended December 31, 2024 was (43.6)% as compared to an effective tax rate of 16.4% in 2023. Significant items impacting the tax provision include: tax charges associated with non-deductible executive compensation under Code Section 162(m), changes in our estimated state effective tax rate and KWE recognizing higher tax gain on sales of real estate, which is offset by a partial release of the valuation allowance against the deferred tax asset associated with our excess tax basis in the KWE investment. During the year ended December 31, 2024, our net deferred tax asset (and associated valuation allowance) related to our excess tax basis in the legacy UK real estate assets increased due to book depreciation taken on UK real estate buildings, which is not subjected to depreciation for UK tax purposes. In addition, the deferred tax asset (and associated valuation allowance) related to our investment in KWE increased due to higher taxable income compared to book income.

Preferred dividends were $43.5 million for the year ended December 31, 2024 as compared to $38.0 million for the year ended December 31, 2023. The increase was due to the issuance of $200 million of our Series C cumulative perpetual preferred stock to affiliates of Fairfax Financial Holdings Limited (collectively, "Fairfax") during June 2023.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Comprehensive Income

The two major components that drive the change in other comprehensive income are the changes in foreign currency rates and the gains or loss of any associated foreign currency hedges. Please refer to the section titled "*Currency Risk—Foreign Currencies*" in Item 7 for a discussion of our risks relating to foreign currency and our hedging strategy. Below is a table that details the activity for the years ended December 31, 2024 and 2023.

	Year Ended December 31,	
(Dollars in millions)	2024	2023
Net loss attributable to Kennedy-Wilson Holdings, Inc. common shareholders	$ (76.5)	$ (341.8)
Unrealized foreign currency translation (loss) gain, net of noncontrolling interests and tax	(36.1)	31.3
Amounts reclassified out of accumulated other comprehensive loss during the period	5.1	—
Unrealized foreign currency derivative contract gain (loss), net of noncontrolling interests and tax	29.5	(5.5)
Comprehensive loss attributable to Kennedy-Wilson Holdings, Inc. common shareholders	**$ (78.0)**	**$ (316.0)**

The main currencies that the Company has exposure to are the euro and pound sterling. The table below represents the change in rates over the years ended December 31, 2024 and 2023 as compared to the U.S. Dollar:

	Year Ended December 31,	
	2024	2023
Euro	(6.2)%	3.1%
GBP	(1.7)%	5.2%

Comprehensive loss, net of taxes and noncontrolling interests, for the year ended December 31, 2024 and 2023 was a loss of $78.0 million and $316.0 million, respectively. The Company experienced net unrealized loss on foreign currency through other comprehensive income for the period due to the EUR and GBP weakening against the U.S. Dollar. Unrealized hedge gains were driven by hedges that the Company has on its GBP-denominated investments.

Liquidity and Capital Resources

Our liquidity and capital resources requirements include acquisitions of real estate and real estate related assets, funding development projects, loan draws (particularly on our construction loan business), capital expenditures for consolidated real estate and unconsolidated investments, working capital needs, interest and principal payments on our debt and dividends to our common and preferred shareholders. We finance these activities with internally generated funds through general operations including rental income, interest income, asset management fees, asset sales, borrowings under our revolving line of credit, sales of equity (common and preferred) and debt securities and cash out refinancings to the extent they are available and fit within our overall portfolio leverage strategy. Our investments in real estate are typically financed with equity from our balance sheet, third party equity and mortgage loans secured by such real estate. These mortgage loans are generally non-recourse in that, in the event of default, recourse will be limited to the mortgaged property serving as collateral, subject to limited customary exceptions. In some cases, we guarantee a portion of the loan related to a consolidated property or an unconsolidated investment, usually until some condition, such as completion of construction or leasing or certain net operating income criteria, has been met. We do not expect these guarantees to materially affect liquidity or capital resources. Please refer to the section titled "Off Balance Sheet Arrangements" for further information.

Our short-term liquidity requirements primarily consist of operating expenses and other expenditures associated with our properties and loan investments, dividend payments to our common and preferred shareholders, interest on our unsecured corporate debt, development, redevelopment and capital expenditures and, potentially, share repurchases and acquisitions. We currently expect to meet our short-term liquidity requirements through our existing cash and cash equivalents plus capital generated from our investments, and sales of real estate as well as availability on our current revolving lines of credit. Our need to raise funds from time to time to meet our capital requirements will depend on many factors, including the success and pace of the implementation of our strategy for strategic and accretive growth where appropriate. Additionally, we may opportunistically seek to raise capital (equity or debt) when we believe market conditions are favorable and when consistent with our growth and financing strategies. We may also seek third party financing to the extent that we engage in additional strategic investments, including in order to raise capital necessary to execute potential development or redevelopment strategies or acquire real estate, note portfolios, or other real estate related companies or real estate related securities. Similarly, we may from time to time seek to refinance our existing indebtedness opportunistically in order to reduce our overall cost of debt capital or optimize the maturity schedule of our outstanding indebtedness, or for other strategic reasons. We have an at-the-market ("ATM Program") pursuant to which we may issue and sell shares of the Company's common stock having an aggregate gross sales price of up to $200.0 million in amounts and at times as the Company determines from time to time. As of December 31, 2024, the Company has $169.9 million available under the ATM Program. The Company did not issue any shares under the ATM program in 2024. During the year ended December 31, 2023, the Company issued 1.7 million shares at a weighted average price of $18.07 per share for net proceeds of $29.8 million under our ATM Program. The Company has no obligation to sell any of such shares under its ATM Program. Actual sales will depend on a variety of factors to be determined by the Company from time to time, including, among others, market conditions, the trading price of its common stock, the Company's determination of the appropriate sources of funding for the Company, and potential uses of funding available.

As of December 31, 2024, we and our consolidated subsidiaries had approximately $217.5 million ($62.6 million of which is in foreign currencies of GBP or EUR) of consolidated cash (as shown on our consolidated balance sheet), our share of cash held at unconsolidated Co-Investment Portfolio assets was $137.5 million and we had $451.7 million of availability under lines of credit. As of December 31, 2024, we have $94.5 million of restricted cash, which is included in cash and cash equivalents, that primarily relates to lender reserves associated with consolidated mortgages that we hold on properties and reserves held on loans in the Construction Loan Portfolio (as defined herein) on behalf of the borrowers under such loans. These reserves typically relate to interest, taxes, insurance and future capital expenditures at the properties as well as reserves held on our loan investments.

Additionally, we are subject to withholding taxes to the extent we repatriate cash from certain of our foreign subsidiaries. Under the KWE Notes covenants, we have to maintain certain interest coverage and leverage ratios to remain in compliance (see "Indebtedness and Related Covenants" for more detail on KWE Notes). Due to these covenants, we evaluate the tax and covenant implications before we distribute cash, which could impact the availability of funds at the corporate level.

As discussed throughout this report, ongoing macroeconomic conditions, such as, but not limited to, elevated levels of inflation and interest rates, banks' ability and willingness to lend, adverse developments affecting financial institutions and other geopolitical issues, including large-scale conflicts

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

and warfare, and government responses to the same, continue to adversely impact the global economy and create volatility in our business results and operations, including our ability to access the capital markets at desired terms or at all. In addition to such market conditions, Moody's Investors Service, Inc. ("Moody's") and Standard & Poor's Ratings Services ("S&P"), a division of The McGraw-Hill Companies, Inc., rate our outstanding debt. These ratings are based on a variety of factors, including our current leverage and transactional activity. In December 2024, S&P downgraded us to 'B+' from 'BB-', the KWE Notes to 'BB-' from 'BB' and the KWI Notes to 'B' from 'B+'. These ratings and downgrades thereof may impact our ability to access the debt market in the future at desired terms or at all. S&P also lowered their issue-level rating on Kennedy Wilson's preferred stock to "CCC+". On June 5, 2023 Moody's downgraded the Company's rating from "B1" to "B2" with a stable outlook. Please also see "*Part I. Item 1A. Risk Factors*".

Development and Redevelopment

Kennedy Wilson has market rate development, redevelopment and entitlement projects that are underway or are in the planning stages. These initiatives, if completed, will result in market-rate income producing assets. As of December 31, 2024, we have 288 multifamily units we are actively developing. If these projects were brought to completion, the estimated share of the Company's total cost would be approximately $46.0 million, which we expect would be funded through our existing equity, third-party equity, project sales and secured debt financing. As of December 31, 2024, we have incurred $44.0 million of costs to date and expect to spend an additional $23.0 million to develop to completion or complete the entitlement process on these projects. Of the $23.0 million of remaining costs to complete, we currently expect it to be funded through secured mortgage financing. This represents total capital over the life of the projects and is not a representation of peak equity and does not take into account any distributions over the course of the investment. When development projects are completed, they typically move into our unstabilized category as they undergo lease up post-completion.

In addition to the market rate development and redevelopment projects described above, we have 1,870 affordable and/or age-restricted multifamily units within our VHH platform that we are currently developing or in the process of stabilizing. We expect to have no cash equity basis in these projects at completion due to the use of property level debt and proceeds from the sale of tax credits. If these projects are brought to completion, we expect to receive $23.2 million in cash from paid developer fees and proceeds from the sale of tax credits.

The figures described in the two preceding paragraphs and in the table below are budgeted costs and are subject to change. There is no certainty that the Company will develop or redevelop any or all of these potential projects and the Company and its equity partners are under no obligation to complete these projects and may dispose of any such assets after adding value through the entitlement process. These are budgeted figures and are subject to change (increase or decrease) due to a number of factors (some of which are beyond our control), including, that these projects are being developed under construction management contracts with the general contractors and therefore we and our equity partners could be called upon to contribute additional capital in the event that actual costs exceed budgeted costs. The scope of these projects may also change. The estimated costs and amounts of cash to complete projects reflected in the table below represent management's current expectations and the total costs incurred to date include the land costs of these projects.

The table below describes the market rate development or redevelopment projects that the Company is undergoing or considering, and excludes the affordable and/or age-restricted multifamily units that it is developing in its VHH platform and its residential investments ($ in millions).

				If Completed			Current	
Location	Type	Investment	Status	Est. Completion Date[1]	MF Units	KW Est. Total Cost[3]	KW Costs Incurred[3]	KW Est. Costs to Complete[2]
Mountain West	Multifamily	Cloudveil	Under Construction	2025	288	46	22	23
Pacific Northwest	Multifamily	Bend	In Planning	TBD	TBD	TBD	22	TBD
	Total				**288**	**$ 46**	**$ 44**	**$ 23**

[1] The actual completion date for projects is subject to several factors, many of which are not within our control. Accordingly, the projects identified may not be completed when expected, or at all.
[2] Figures shown in this column are an estimate of our remaining costs to develop to completion or to complete the entitlement process, as applicable, as of December 31, 2024. Total remaining costs may be financed with third-party cash contributions, proceeds from projected sales, and/or debt financing. These figures are budgeted costs and are subject to change. There is no guarantee that we will be able to secure the project-level debt financing that is assumed in the figures above. If we are unable to secure such financing, the amount of capital we will have to invest to complete the projects above may significantly increase. Our cost to complete differs from our share total capitalization as the latter includes costs that have already been incurred to date while the former relates to future estimated costs.
[3] Includes land costs.

Unstabilized and Value Add Capital Expenditure Programs

We currently have seven assets that comprise 1.4 million commercial square feet, 150 hotel rooms and 232 multifamily units that are currently unstabilized and are undergoing various stages of lease-up, value-add or development. In order to stabilize these assets we project our share of costs to complete to be $20.7 million. The cost to complete this work and the time frame described is subject to many uncertainties that are beyond our control, and the actual costs may be significantly higher than the estimates shown below.

The table below describes assets that are currently unstabilized ($ in millions):

Property	Location	Type	KW Ownership %	# of Assets	Commercial Sq. Ft.	Hotel Rooms/ MF Units	Leased %	KW Est. Costs[1]
Kona Village	Hawaii	Hotel	50%	1	—	150	N/A	$ —
Coopers Cross	Ireland[2]	Office	50%	1	395,000	—	—	3.0
The Cornerstone	Ireland[2]	Multifamily	50%	1	27,000	232	50	0.8
The Heights	United Kingdom[2]	Office	51%	1	356,000	—	65	—
Stockley Park	United Kingdom[2]	Office	100%	1	54,000	—	—	—
H4 and H7 at Hamilton Landing[3]	Northern California	Office	100%	1	118,000	—	34	5.8
90 East	Pacific Northwest	Office	100%	1	410,000	—	—	11.1
	Total Lease-Up			**7**	**1,360,000**	**382**	**24%**	**$ 20.7**

[1] Figures shown in this column are an estimate of KW's remaining costs to develop to completion or to complete the entitlement process, as applicable, as of December 31, 2024. Total remaining costs may be financed with third-party cash contributions, proceeds from projected sales, and/or debt financing. These figures are budgeted costs and are subject to change. There is no guarantee that the Company will be able to secure the project-level debt financing that is assumed in the figures above. If the Company is unable to secure such financing, the amount of capital that the Company will have to invest to complete the projects above may significantly increase.
[2] Estimated foreign exchange rates are €1.00 = $1.03 and £1.00 = $1.25, related to NOI.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

In addition to our development, redevelopment and stabilization initiatives, we regularly implement a value-add approach to our consolidated and unconsolidated investments, which includes rehabbing properties and adding or updating property amenities. The capital required to implement these value-add initiatives is typically funded with capital calls, refinancing or supplemental financings at the property level. We are not required to make these investments, but they are a key driver in our ability to increase net operating income at our properties post-acquisition.

Other Items

On November 3, 2020, the Company's board of directors authorized an expansion of its existing $250 million share repurchase plan to $500 million. Repurchases under the program may be made in the open market, in privately negotiated transactions, through the net settlement of the Company's restricted stock grants or otherwise, with the amount and timing of repurchases dependent on market conditions and subject to the Company's discretion. The program does not obligate the Company to repurchase any specific number of shares and, subject to compliance with applicable laws, may be suspended or terminated at any time without prior notice. As of December 31, 2024, we had $109.7 million remaining under the plan for stock repurchases. Please see the section titled "*Purchases of Equity Securities by the Company*" in Part II of this annual report on Form 10-K for additional information.

The Company maintains a deferred compensation program for certain employees of the Company (the "Deferred Compensation Program"). The named executive officers of the Company are not participants of the Deferred Compensation Program. The compensation committee of the Company's board of directors approves an amount annually to be allocated to certain employees of the Company in the United States and in Europe. The amount allocated to each employee vests ratably over a three-year vesting period, subject to continued employment with the Company. Prior to 2022, half of the allocated amount was tied specifically to the performance and value of the Company's common stock at the time of each vesting ("Bonus Units"). Beginning in 2022, the entire amount allocated to each employee consisted of Bonus Units. Under the Deferred Compensation Program, at the time of each vesting, the employees receive an amount equal to either the dividend yield of the Company's common stock or the actual amount of dividends paid on the Company common stock (in the case of Bonus Units) during the immediately preceding year on the amount that is subject to such vesting. During the years ended December 31, 2024, 2023 and 2022 the Company recognized $6.4 million, $8.2 million and $9.2 million, respectively, under the Deferred Cash Bonus Program.

As discussed throughout this report, the Company also maintains a carried interests sharing program for certain employees of the Company (the "Carried Interests Sharing Program"). The compensation committee of the Company's board of directors recently approved, reserved and authorized increasing the pool available for the Company employees from thirty-five percent to fifty percent issue of any carried interests earned by certain commingled funds and separate account investments to be allocated to certain employees of the Company. Sixty percent of the award to each employee vests ratably over four years and the remaining forty percent vest upon the consummation of a liquidity event of the investment whereby the Company actually receives cash carried interests from its partner. The full carried interests earned by the Company will be recorded to income from unconsolidated investments and the amount allocated to employees is recorded as carried interests compensation. Not all of the Company's co-investment structures are included in the Carried Interests Sharing Program either because a structure does not incorporate carried interests that the Company is eligible to receive and/or a structure was an existing structure prior to the Board's approval of the Carried Interests Sharing

Program. As of December 31, 2024, (i) of the 75 investments in the Company's co-investment portfolio, 11 of such investments are a part of the Carried Interests Sharing Program; (ii) the Company's total accrued carried interests in its financial statements is $27.6 million, of which $7.1 million was accrued as carried interests compensation expense as part of the Carried Interests Program. During the years ended December 31, 2024, 2023 and 2022, the Company recognized a reversal of $16.6 million, $15.1 million and $4.3 million respectively of previously recognized expenses, related to this program.

The Company also maintains a global employee co-investment program (the "Co-Investment Program"). The named executive officers are not participants of the Co-Investment Program. Under the Co-Investment Program, certain employees are provided the opportunity to invest alongside the Company in its investments (in all future investments and certain recently acquired transactions). The amount of funds that the employees, as a group, can invest in the Company's investments is capped at 1.5% of the Company's equity. Generally (with certain exceptions), participants in the Co-Investment Program will make commitments to the program on an annual basis and invest in every investment made by the Company (investments that such employee has an active role in acquiring and managing) in the applicable year.

Cash Flows

The following table summarizes the cash provided by or used in our operating, investing and financing activities for the years ended December 31, 2024 and 2023:

	Year ended December 31,	
(Dollars in millions)	2024	2023
Net cash provided by operating activities	$ 55.1	$ 48.9
Net cash provided by (used in) investing activities	414.2	(11.7)
Net cash (used in) provided by financing activities	(565.5)	(164.8)

Operating

Our cash flows from operating activities are primarily dependent upon operations from consolidated properties, the operating distributions and fees from our Co-Investment Platform, general and administrative costs, compensation and interest expense payments. For the years ended December 31, 2024 and 2023, cash flows provided by operations were $55.1 million and $48.9 million, respectively.

The increase in cash provided by operations was primarily due to fees and interest income earned on our real estate credit business earned during the year ended December 31, 2024.

Investing

Our cash flows from investing activities are generally comprised of cash used to fund property acquisitions, investments in unconsolidated investments, capital expenditures, purchases of loans secured by real estate, as well as cash received from property sales and return of capital from our co-investments.

Year Ended December 31, 2024

Net cash used in investing activities totaled $414.2 million for the year ended December 31, 2024. During the year ended December 31, 2024, we received $589.5 million primarily from the sale of Shelbourne Hotel, a building at the 90 East office complex in Issaquah, Washington, and two multifamily properties in Western United States and non-core commercial assets in the United Kingdom and Spain. We received $86.6 million in investing distributions from our co-investments primarily from the sale of a multifamily property in the Western United States, excess proceeds from refinancing mortgage loans

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

on unconsolidated investments, conversion of VHH assets and redemption of a hedge fund investment. Loan draws and our share of new loans issued as part of our global debt platform were $40.1 million. We received $49.8 million of proceeds from repayments on loans previously issued. We spent $131.6 million on capital expenditures on consolidated assets primarily relating to development properties as well as value add additions to our operating properties. We also contributed $125.0 million to unconsolidated investments that were primarily used to fund our share of new acquisitions made within our new commingled fund in the United States, capital calls on European developments, capital calls on the Kona Village hotel while we are working towards stabilization and a merger relating to our investment in Zonda.

Year Ended December 31, 2023

Net cash used in investing activities totaled $11.7 million for the year ended December 31, 2023. During the year ended December 31, 2023, we received $383.9 million primarily from sale of equity interests in three Western United States multifamily properties into existing co-investment platforms which triggered deconsolidation and the recognition of capital gains, the sale of a multifamily property in Western United States to a third party, the sale of non-core retail assets in the United Kingdom, Ireland, Spain and Western United States and a residential investment in the Western United States. We received $92.4 million in investing distributions from our co-investments primarily from the sale of assets within our comingled funds and financing distributions from multifamily properties in Ireland. Our share of new loans issued acquired as part of our global debt platform were $150.2 million (including $106.4 million relating to the Construction Loan Portfolio acquisition), and we received $48.9 million of proceeds from repayments on loans previously issued. We spent $217.2 million on capital expenditures on consolidated assets, as well as continued investments in our development properties and value add on our operating properties. We also contributed $167.4 million to unconsolidated investments that were primarily used to fund our share of construction for the completion of Kona Village as well as European development projects and new acquisitions made within our European Industrial JV platform and commingled funds. We spent $2.1 million in premiums on new derivative contracts entered into during the year ended December 31, 2023.

Financing

Our net cash related to financing activities is generally impacted by capital-raising activities net of dividends and distributions paid to common and preferred shareholders and noncontrolling interests as well as financing activities for consolidated real estate investments.

Year Ended December 31, 2024

Net cash used in financing activities totaled $565.5 million for the year ended December 31, 2024. We drew $170.0 million on our revolving line of credit and repaid $215.2 million on our revolving line of credit during the year ended December 31, 2024. Kennedy Wilson received proceeds of $360.7 million from mortgage loans to finance and refinance consolidated property acquisitions. These proceeds were offset by the repayment of $521.1 million of mortgage debt, the $181.1 million repayment of KWE Notes, and $13.9 million of loan issuance costs primarily relating to the extension of our revolving line of credit. Additionally, we paid common dividends of $100.2 million and preferred dividends of $43.5 million, and we repurchased $15.0 million of our common stock under our share repurchase plan.

Year Ended December 31, 2023

Net cash used in financing activities totaled $164.8 million for the year ended December 31, 2023. During the year ended December 31, 2023, the Company received proceeds of $197.4 million from the issuance of its Series C perpetual preferred stock and warrants to Fairfax. We drew $50.0 million on our revolving line of credit and repaid $185.0 million on our revolving line of credit during the year ended December 31, 2023. Kennedy Wilson received proceeds of $408.9 million from mortgage loans to finance and refinance consolidated property acquisitions. These proceeds were offset by the repayment of $446.4 million of mortgage debt. Additionally, we paid common dividends of $136.0 million and preferred dividends of $35.5 million, and we repurchased $20.9 million of our common stock under our share repurchase plan.

Contractual Obligations and Commercial Commitments

At December 31, 2024, Kennedy Wilson's consolidated contractual cash obligations, including debt, lines of credit, operating leases and ground leases included the following:

	Payments due by period[9]				
(Dollars in millions)	Total	Less than 1 year	1–3 years	4–5 years	After 5 years
Contractual obligations					
Borrowings:[1][4]					
Mortgage debt[2]	$ 2,613.1	$ 100.4	$ 1,230.1	$ 507.7	$ 774.9
Senior notes[3]	1,800.0	—	—	1,200.0	600.0
Credit facility	98.3	—	98.3	—	—
KWE unsecured bonds[5]	310.5	310.5		—	—
Total borrowings[4]	4,821.9	410.9	1,328.4	1,707.7	1,374.9
Operating leases	9.9	0.7	2.0	2.3	4.9
Ground leases[8]	28.7	0.1	0.4	0.4	27.8
Total contractual cash obligations[6][7]	**$ 4,860.5**	**$ 411.7**	**$ 1,330.8**	**$ 1,710.4**	**$ 1,407.6**

[1] See Notes 8-10 of our Notes to Consolidated Financial Statements. Figures do not include scheduled interest payments. Assuming each debt obligation is held until maturity, we estimate that we will make the following interest payments: Less than 1 year - $136.7 million; 1-3 years - $277.5 million; 4-5 years - $91.1 million; After 5 years - $36.3 million. The interest payments on variable rate debt have been calculated at the interest rate in effect as of December 31, 2024.
[2] Excludes $1.4 million net unamortized debt discount on mortgage debt.
[3] Excludes $2.7 million unamortized debt premium on senior notes.
[4] Excludes $37.8 million of unamortized loan fees.
[5] Excludes $0.5 million net unamortized discount on KWE unsecured bonds.
[6] Kennedy Wilson's share of contractual obligations, (excluding amounts that are attributable to noncontrolling interests), including debt, lines of credit, operating leases and ground leases, consisted of the following: Less than 1 year - $411.7 million; 1-3 years - $1,329.8 million; 4-5 years - $1,678.1 million; After 5 years - $1,368.9 million.
[7] Table above excludes $284.7 million unfulfilled capital commitments to our unconsolidated investments and $123.4 million on loan investments.
[8] Ground leases on consolidated assets. Amounts are undiscounted and have leases that expire as far out as 2258.
[9] Principal debt payments include the effect of extension options.

Indebtedness and Related Covenants

The following describes certain indebtedness and related covenants.

KWI Notes

On February 11, 2021, Kennedy-Wilson, Inc., issued $500.0 million aggregate principal amount of 2029 Notes and $500.0 million aggregate principal amount of 2031 Notes (together with the 2029 Notes, the "initial notes"). On March 15, 2021, Kennedy-Wilson, Inc. issued an additional $100 million aggregate

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

principal of the 2029 Notes and an additional $100 million of the 2031 Notes. These additional notes were issued as "additional notes" under the indentures pursuant to which Kennedy Wilson previously issued 2029 Notes and the 2031 Notes. On August 23, 2021, Kennedy-Wilson, Inc. issued $600.0 million aggregate principal amount of 2030 Notes (together with the 2029 Notes, the 2031 Notes and the additional notes, the "notes"). The notes are senior, unsecured obligations of Kennedy Wilson and are guaranteed by Kennedy-Wilson Holdings, Inc. and certain subsidiaries of Kennedy Wilson.

The notes accrue interest at a rate of 4.750% (in the case of the 2029 Notes), 4.750% (in the case of the 2030 Notes) and 5.000% (in the case of the 2031 Notes) per annum, payable semi-annually in arrears on March 1 and September 1 of each year, beginning on September 1, 2021 for the 2029 Notes and 2031 Notes and March 1, 2022 for the 2030 Notes. The notes will mature on March 1, 2029 (in the case of the 2029 Notes), February 1, 2030 (in case of 2030 Notes) and March 1, 2031 (in the case of the 2031 Notes), in each case unless earlier repurchased or redeemed. At any time prior to March 1, 2024 (in the case of the 2029 Notes), September 1, 2024 (in the case of the 2030 Notes) or March 1, 2026 (in the case of the 2031 notes), Kennedy Wilson had the right to (with the respect to the 2029 Notes and 20230 Notes) and may redeem the 2031 Notes, in whole or in part, at a redemption price equal to 100% of their principal amount, plus an applicable "make-whole" premium and accrued and unpaid interest, if any, to the redemption date. At any time and from time to time on or after March 1, 2024 (in the case of the 2029 Notes), September 1, 2024 (in the case of the 2030 Notes) or March 1, 2026 (in the case of the 2031 Notes), Kennedy Wilson may redeem the notes of the applicable series, in whole or in part, at specified redemption prices set forth in the indenture governing the notes of the applicable series, plus accrued and unpaid interest, if any, to the redemption date. In addition, prior to March 1, 2024 (for 2029 Notes and 2031 Notes) and September 1, 2024 (for 2030 Notes), Kennedy Wilson may redeem up to 40% of the notes of either series from the proceeds of certain equity offerings. No sinking fund will be provided for the notes. Upon the occurrence of certain change of control or termination of trading events, holders of the notes may require Kennedy Wilson to repurchase their notes for cash equal to 101% of the principal amount of the notes to be repurchased, plus accrued and unpaid interest, if any, to, but excluding, the applicable repurchase date. The total amount of the 2029 Notes, 2030 Notes and 2031 Notes included in the Company's consolidated balance sheets was $1.8 billion at December 31, 2024.

KWE Notes

As of December 31, 2024, KWE has notes outstanding ("KWE Notes") of $310.0 million (based on December 31, 2024 rates), have an annual fixed coupon of 3.25% and mature in 2025. During the year ended December 31, 2024, the Company redeemed a total of $181.1 million in aggregate nominal amount of the outstanding KWE Notes. The KWE Notes are subject to the restrictive covenants discussed below.

Borrowings Under Line of Credit

On September 12, 2024, the Company, through a wholly-owned subsidiary, extended its existing revolving line of credit and increased the capacity to $550 million ("Third A&R Facility"). The Third A&R Facility has a maturity date of September 12, 2027. Subject to certain conditions precedent and at Kennedy-Wilson, Inc.'s (the "Borrower") option, the maturity date of the Third A&R Facility may be extended by a year.

The Company has $98.3 million outstanding on the A&R Facility as of December 31, 2024 with $451.7 million available to be drawn under the revolving credit facility.

Debt Covenants

The Third A&R Facility and the indentures governing the notes contain numerous restrictive covenants that, among other things, limit the Company and certain of its subsidiaries' ability to incur additional indebtedness, pay dividends or make distributions to stockholders, repurchase capital stock or debt, make investments, sell assets or subsidiary stock, create or permit liens, engage in transactions with affiliates, enter into sale/leaseback transactions, issue subsidiary equity and enter into consolidations or mergers.

The Third Amended and Restated Credit Agreement, dated as of September 12, 2024 (the "Credit Agreement") also contains financial covenants, which require the Company to maintain (i) a maximum consolidated leverage ratio (as defined in the Credit Agreement) of not greater than 65%, measured as of the last day of each fiscal quarter; (ii) a minimum fixed charge coverage ratio (as defined in the Credit Agreement) of not less than 1.60 to 1.00, measured as of the last day of each fiscal quarter for the period of four full fiscal quarters then ended; (iii) a minimum consolidated tangible net worth equal to or greater than the sum of $1,844,222,000 plus an amount equal to fifty percent (50%) of net equity proceeds received by the Company after the date of the most recent financial statements that are available as of September 12, 2024, measured as of the last day of each fiscal quarter; (iv) a maximum recourse leverage ratio (as defined in the Credit Agreement) of not greater than an amount equal to consolidated tangible net worth as of the measurement date multiplied by 1.5, measured as of the last day of each fiscal quarter; (v) a maximum secured recourse leverage ratio (as defined in the Credit Agreement) of not greater than an amount equal to 3.5% of consolidated total asset value (as defined in the Credit Agreement) and $313,054,000, measured as of the last day of each fiscal quarter; (vi) a maximum adjusted secured leverage ratio (as defined in the Credit Agreement) of not greater than 55%, measured as of the last day of each fiscal quarter; and (vii) liquidity (as defined in the Credit Agreement) of at least $75.0 million. As of December 31, 2024, the Company was in compliance with the foregoing financial covenants. The obligations of the Borrower pursuant to the Credit Agreement are guaranteed by the Company and certain wholly-owned subsidiaries of the Company.

The indentures governing the notes limit Kennedy-Wilson, Inc.'s ability to incur additional indebtedness if, on the date of such incurrence and after giving effect to the new indebtedness, Kennedy-Wilson, Inc.'s maximum balance sheet leverage ratio (as defined in the indenture) is greater than 1.50 to 1.00. This ratio is measured at the time of incurrence of additional indebtedness.

The KWE Notes require KWE to maintain (i) consolidated net indebtedness (as defined in the trust deed for the notes) of no more than 60% of the total asset value; (ii) consolidated secured indebtedness (less cash and cash equivalents) of no more than 50% of total asset value; (iii) an interest coverage ratio of at least 1.5 to 1.0, and (iv) unencumbered assets of no less than 125% of the unsecured indebtedness (less cash & cash equivalents). The covenants associated with KWE Notes are not an obligation of KWH and these amounts are presented as a component of our investment debt as it is an unsecured obligation relating to an underlying investment of ours. As of December 31, 2024, the Company was in compliance with these covenants.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

In addition, loan agreements that govern the Company's property-level non-recourse financings that are secured by its properties may contain operational and financial covenants, including but not limited to, debt yield related covenants and debt service coverage ratio covenants and, with respect to mortgages secured by certain properties in Europe, loan-to-value ratio covenants. Property-level non-recourse financings with such loan-to-value covenants require that the underlying properties are valued on a periodic basis (at least annually). As of December 31, 2024, the Company was in compliance with all property-level mortgages and was current on all payments (principal and interest) with respect to the same. The failure by the Company to comply with such covenants and/or secure waivers from lenders could result in defaults under these instruments. In addition, if the Company defaults under a mortgage loan and/or such loan is accelerated by the lender, it may automatically be in default under any of its property and corporate unsecured loans that contain cross-default and/or cross-acceleration provisions. Please also see Part I. Item 1A *Risk Factors*.

Off-Balance Sheet Arrangements

Guarantees

We have provided guarantees associated with loans secured by consolidated assets. At December 31, 2024, the maximum potential amount of future payments (undiscounted) we could be required to make under the guarantees was approximately $119.4 million at December 31, 2024. The guarantees expire through 2031 and our performance under the guarantees would be required to the extent there is a shortfall in liquidation between the principal amount of the loan and the net sale proceeds of the applicable properties. If we were to become obligated to perform on these guarantees, it could have an adverse effect on our financial condition.

Most of our real estate properties within our equity partnerships are encumbered by traditional non-recourse debt obligations. In connection with most of these loans, however, we entered into certain "non-recourse carve out" guarantees, which provide for the loans to become partially or fully recourse against us if certain triggering events occur. Although these events are different for each guarantee, some of the common events include:

- the special purpose property-owning subsidiary's filing a voluntary petition for bankruptcy;
- the special purpose property-owning subsidiary's failure to maintain its status as a special purpose entity; and
- subject to certain conditions, the special purpose property-owning subsidiary's failure to obtain lender's written consent prior to any subordinate financing or other voluntary lien encumbering the associated property.

In the event that any of these triggering events occur and the loans become partially or fully recourse against us, our business, financial condition, results of operations and common stock price could be materially adversely affected.

In addition, other items that are customarily recourse to a non-recourse carve out guarantor include, but are not limited to, the payment of real property taxes, liens which are senior to the mortgage loan and outstanding security deposits.

Capital Commitments

As of December 31, 2024, we have unfulfilled capital commitments totaling $284.7 million to our unconsolidated investments and $123.4 million to our loan portfolio. In addition to the unfunded capital commitments on its joint venture investments, has $1.2 million of equity commitments relating to unconsolidated development projects and $43.4 million at its share related to future ground lease payments that run through 2085 on Kona Village. As we identify investment opportunities in the future, we may be called upon to contribute additional capital to unconsolidated investments in satisfaction of our capital commitment obligations.

Impact of Inflation and Changing Prices

As discussed throughout this report, high inflation impacted the global economy during the year ended December 31, 2024 and continues to impact the global economy. Our exposure to market risk from changing prices consists primarily of fluctuations in rental rates of commercial and multifamily properties, market interest rates on investment mortgages and debt obligations and real estate property values. Rental rate increases are dependent upon market conditions and the competitive environments in the respective locations of the properties. To the extent that we engage in development activities, we may have exposure to changing prices in materials or cost of labor. The revenues of the investment management operations with respect to rental properties are highly dependent upon the aggregate rents of the properties managed, which are affected by rental rates and building occupancy rates. Employee compensation is the principal cost element of investment management.

We may be able to recoup all or a significant portion of any impact that we may suffer from rising costs through rental increases. To the extent that the rate of increase in expenses is greater than the rate of increase in rental rates, changing price will have an adverse impact on the Company. See also Inflation may adversely affect our financial condition and results of operations in Item 1A. Risk Factors for more detailed discussion on the impact of inflation on the Company.

Qualitative and Quantitative Disclosures about Market Risk

Our primary market risk exposure relates to changes in interest rates in connection with our short-term borrowings and fluctuations in foreign currency exchange rates in connection with our foreign operations.

Interest Rate Risk

We have established an interest rate management policy, which attempts to minimize our overall cost of debt while taking into consideration the earnings implications associated with the volatility of short-term interest rates. As part of this policy, we have elected to maintain a combination of variable and fixed rate debt. As of December 31, 2024, 82% of our consolidated debt is fixed rate, 17% is floating rate with interest caps. As such, fluctuations in interest rates may impact our floating rate debt (and floating rate debt with interest caps to a lesser extent) and cause our consolidated interest expense and income from unconsolidated investments to fluctuate. Typically, these fluctuations do not give rise to a significant long-term interest rate risk because they generally have short maturities.

We hold variable rate debt on some of our consolidated and unconsolidated properties that is subject to interest rate fluctuations. These variable rates generally are based on the lender's base rate, prime rate, EURIBOR, GBP LIBOR, SOFR, SONIA plus an applicable borrowing margin. Additionally, in order to mitigate some of the risk associated with increasing interest rates, we have purchased interest rate caps

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

that limit the amount that interest expense can increase with rate increases. However, some of our debt is uncapped and the mortgages that do have interest caps are subject to increased interest expense until rates hit the level of caps that have been purchased. If there was a 100-basis point increase or decrease, we would have a $3.3 million increase in interest expense or $8.0 million decrease in interest expense savings during 2025 on our current share of indebtedness. The weighted average strike price on caps and maturity of Kennedy Wilson's variable rate mortgages are 3.17% and approximately 1.2 years, respectively, as of December 31, 2024.

The table below represents contractual balances of our financial instruments at the expected maturity dates as well as the fair value as of December 31, 2024. The weighted average interest rate for the various assets and liabilities presented are actual as of December 31, 2024. We closely monitor the fluctuation in interest rates, and if rates were to increase significantly, we believe that we would be able to either hedge the change in the interest rate or refinance the loans with fixed interest rate debt. All instruments included in this analysis are non-trading.

	Principal Maturing in:							Fair Value

Currency Risk—Foreign Currencies

A significant portion of our business is located outside the United States. As such, we have foreign currency fluctuation risk with respect to those investments and business units. In certain instances, we utilize foreign currency hedging derivatives to mitigate the impact of this risk on our equity.

The financial statements of Kennedy Wilson's subsidiaries located outside the United States are measured using the local currency, as this is their functional currency. The assets and liabilities of these subsidiaries are translated at the rates of exchange at the balance sheet date and income and expenses are translated at the average monthly rate. The foreign currencies include the euro and the British pound sterling. Cumulative translation adjustments, to the extent not included in cumulative net income, are included in the consolidated statement of equity as a component of accumulated other comprehensive income. Currency translation gains and losses and currency derivative gains and losses will remain in other comprehensive income unless and until the Company substantially liquidates underlying investments.

Approximately 34% of our investment account is invested through our foreign platforms in their local currencies. Investment level debt is generally incurred in local currencies and therefore we consider our equity investment as the appropriate exposure to evaluate for hedging purposes. Additionally, the costs to operate these businesses, such as compensation, overhead and interest expense are incurred in local currencies. We typically do not hedge future operations or cash flows of operations denominated in foreign currencies, which may have a significant impact on the results of our operations for both the Consolidated and Co-Invest segments. In order to manage the effect of these fluctuations, we generally hedge our book equity exposure to foreign currencies through currency forward contracts and options. As of December 31, 2024, we have hedged 95% of the gross asset carrying value of our euro-denominated investments and 83% of the gross asset carrying value of our GBP-denominated investments.

Our investment management businesses typically do not require much capital, so foreign currency translation and derivative activity primarily relates to the investments segment as that has greater balance sheet exposure to foreign currency fluctuations.

If there was a 5% increase or decrease in foreign exchange rates on the currencies we invest to the U.S. Dollar our net asset value would increase by $20.5 million or decrease by $22.4 million. If rates moved 10%, we would have an increase of $39.5 million and a decrease of $44.7 million.

Financial Measures and Descriptions.

Rental—Rental income is comprised of rental revenue earned by our consolidated real estate investments.

Hotel—Hotel income is comprised of hotel revenue earned by our consolidated hotels.

Investment Management Fees—Investment management fees are primarily comprised of base asset management fees and acquisition fees generated by our investment management division. Fees earned from consolidated investments are eliminated in consolidation with the amount relating to our equity partners being recognized through income attributable to noncontrolling interests.

Loans—Interest income earned on consolidated loans.

Income from unconsolidated investments—principal co-investments—Income from unconsolidated investments—principal co-investments consists of the Company's share of income or loss earned on investments in which the Company can exercise significant influence but does not have control. Income from unconsolidated investments includes income or loss from ordinary course operations of the underlying investment, gains or losses on sale and fair value gains and losses.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Income from unconsolidated investments—carried interests—Carried interests relate to allocations to the general partner, special limited partner or asset manager of Kennedy Wilson's co-investments it manages based on the cumulative performance of the fund and are subject to preferred return thresholds of the limited partners.

Gain on sale of real estate, net—Gain on sale of real estate, net relates to the amount received over the carrying value of assets sold. Impairments on consolidated real estate assets are also recorded to this line to the extent that do not require separate presentation.

Rental—Rental expenses consist of the expenses of our consolidated real estate investments, including items such as property taxes, insurance, maintenance and repairs, utilities, supplies, salaries and management fees.

Hotel—Hotel expenses consist of expenses of our consolidated hotel investments, including items such as property taxes, insurance, maintenance and repairs, utilities, supplies, salaries and management fees.

Compensation and related—Employee compensation, comprising of salary, bonus, employer payroll taxes and benefits paid on behalf of employees.

Carried interests compensation—Compensation associated with up to thirty-five percent (35%) of any carried interests earned by certain commingled funds and separate account investments to be allocated to certain non-NEO employees of the Company.

General and administrative—General and administrative expenses represent administrative costs necessary to run Kennedy Wilson's businesses and include items such as occupancy and equipment expenses, professional fees, public company costs, travel and related expenses, and communications and information services.

Depreciation and amortization—Depreciation and amortization is comprised of depreciation expense which is recognized ratably over the useful life of an asset and amortization expense which primarily consist of the amortization of assets allocated to the value of in-place leases upon acquisition of a consolidated real estate asset.

Interest expense—Interest expense represents interest costs associated with our senior notes payable, revolving credit facility, mortgages on our consolidated real estate, and unsecured debt held by KWE.

Other income (loss)—Other income (loss) includes the realized foreign currency exchange income or loss relating to the settlement of foreign transactions during the year which arise due to changes in currency exchange rates, realized gains or losses related to undesignated derivative instruments, interest income on bank deposits, commission expenses on property services and transaction related expenses related to unsuccessful deals.

Income taxes—The Company's services business operates globally as corporate entities subject to federal, state, and local income taxes and the investment business operates through various partnership structures to acquire wholly-owned or jointly-owned investments in multifamily, commercial, residential and development properties. The Company's distributive share of income from its partnership investments will be subject to federal, state, and local taxes and the related tax provision attributable to the Company's share of the income tax is reflected in the consolidated financial statements.

Accumulated other comprehensive income (loss)—Accumulated other comprehensive income (loss) represents the Company›s share of foreign currency movement on translating Kennedy Wilson's foreign subsidiaries from their functional currency into the Company›s reporting currency. These amounts are offset by Kennedy Wilson's effective portion of currency related hedge instruments that have been designated.

Non-GAAP Measures and Certain Definitions

"KWH," "KW," "Kennedy Wilson," the "Company," "we," "our," or "us" refers to Kennedy-Wilson Holdings, Inc. and its wholly-owned subsidiaries. The consolidated financial statements of the Company include the results of the Company's consolidated subsidiaries.

"KWE" refers to Kennedy Wilson Europe Real Estate Limited.

"Adjusted EBITDA" represents net (loss) income before interest expense, loss (gain) on early extinguishment of debt, our share of interest expense included in unconsolidated investments, depreciation and amortization, our share of depreciation and amortization included in unconsolidated investments, preferred dividends, provision for (benefit from) income taxes, our share of taxes included in unconsolidated investments, share-based compensation expense for the Company, and EBITDA attributable to noncontrolling interests. Please also see the reconciliation to GAAP in the Company's supplemental financial information included in this release and also available at www.kennedywilson.com. Our management uses Adjusted EBITDA to analyze our business because it adjusts net income for items we believe do not accurately reflect the nature of our business going forward or that relate to non-cash compensation expense or noncontrolling interests. Such items may vary for different companies for reasons unrelated to overall operating performance. Additionally, we believe Adjusted EBITDA is useful to investors to assist them in getting a more accurate picture of our results from operations. However, Adjusted EBITDA is not a recognized measurement under GAAP and when analyzing our operating performance, readers should use Adjusted EBITDA in addition to, and not as an alternative for, net income as determined in accordance with GAAP. Because not all companies use identical calculations, our presentation of Adjusted EBITDA may not be comparable to similarly titled measures of other companies. Furthermore, Adjusted EBITDA is not intended to be a measure of free cash flow for management's discretionary use, as it does not remove all non-cash items or consider certain cash requirements such as tax and debt service payments. The amount shown for Adjusted EBITDA also differs from the amount calculated under similarly titled definitions in our debt instruments, which are further adjusted to reflect certain other cash and non-cash charges and are used to determine compliance with financial covenants and our ability to engage in certain activities, such as incurring additional debt and making certain restricted payments.

"Adjusted Net Income (Loss)" represents net income (loss) before depreciation and amortization, Kennedy Wilson's share of depreciation and amortization included in unconsolidated investments, share-based compensation, and excluding net income attributable to noncontrolling interests, before depreciation and amortization.

"Carried interests" relates to allocations to the Company of Kennedy Wilson's co-investments it invests in and manages based on the cumulative performance of the fund or investment vehicle, as applicable, and are subject to preferred return thresholds of the limited partners.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

"Carried interests compensation"—the compensation committee of the Company's board of directors approved and reserved between twenty percent (20%) and thirty-five percent (35%) of any carried interests earned by certain commingled funds and separate account investments to be allocated to certain non-NEO employees of the Company.

"Cap rate" represents the net operating income of an investment for the year preceding its acquisition or disposition, as applicable, divided by the purchase or sale price, as applicable. Capitalization ("Cap") rates discussed in this report only include data from income-producing properties. The Company calculates cap rates based on information that is supplied to it during the acquisition diligence process. This information is not audited or reviewed by independent accountants and may be presented in a manner that is different from similar information included in the Company's financial statements prepared in accordance with GAAP. In addition, cap rates represent historical performance and are not a guarantee of future net operating income ("NOI"). Properties for which a cap rate is discussed may not continue to perform at that cap rate.

"Co-Investment Portfolio NOI" refers to the Company's share of NOI that is generated from the properties in which the Company has an ownership interest and that are held in the Company's Co-Investment Portfolio business segment. Please also see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Certain Non-GAAP Measures and Reconciliations" for a reconciliation of Co-Investment Portfolio NOI to net income as reported under GAAP.

"Consolidated Portfolio NOI" refers to the NOI that is generated from the properties that the Company has an ownership interest in and are held in the Company's Consolidated Portfolio business segment. Please also see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Certain Non-GAAP Measures and Reconciliations" for a reconciliation of Consolidated Portfolio NOI to net income as reported under GAAP.

"Equity partners" refers to non-wholly-owned subsidiaries that we consolidate in our financial statements under U.S. GAAP and third-party equity providers.

"Fee Bearing Capital" represents total third-party committed or invested capital that we manage in our joint ventures, commingled funds, and debt platform that entitle us to earn fees, including without limitation, asset management fees, construction management fees, acquisition and disposition fees and/or carried interest, if applicable.

"Gross Asset Value" refers to the gross carrying value of assets, before debt, depreciation and amortization, and net of noncontrolling interests.

"Net operating income" or "NOI" is a non-GAAP measure representing the income produced by a property calculated by deducting certain property expenses from property revenues. The Company's management uses net operating income to assess and compare the performance of its properties and to estimate their fair value. Net operating income does not include the effects of depreciation or amortization or gains or losses from the sale of properties because the effects of those items do not necessarily represent the actual change in the value of the Company's properties resulting from its

value-add initiatives or changing market conditions. Management believes that net operating income reflects the core revenues and costs of operating its properties and is better suited to evaluate trends in occupancy and lease rates. Please also see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Certain Non-GAAP Measures and Reconciliations" for a reconciliation of Net Operating Income to net income as reported under GAAP and a reconciliation of Net Operating Income (Net Effective) (with respect to same property) to net income as reported under GAAP.

"Noncontrolling interests" represents the portion of equity ownership in a consolidated subsidiary not attributable to Kennedy Wilson.

"Principal co-investments" consists of the Company's share of income or loss earned on investments in which the Company can exercise significant influence but does not have control. Income from unconsolidated investments includes income from ordinary course operations of the underlying investment, gains on sale, fair value gains and losses.

"Real Estate Assets under Management" ("AUM") generally refers to the properties and other assets with respect to which the Company provides (or participates in) oversight, investment management services and other advice, and which generally consist of real estate properties or loans, and investments in joint ventures. AUM is principally intended to reflect the extent of the Company's presence in the real estate market, not the basis for determining management fees. AUM consists of the total estimated fair value of the real estate properties, total loan commitments made through out debt investment platform, inclusive of both currently outstanding loan amounts and contractual future fundings, and other real estate-related assets either owned by third parties, wholly-owned by the Company or held by joint ventures and other entities in which its sponsored funds or investment vehicles and client accounts have invested. The estimated value of development properties is included at estimated completion cost. The accuracy of estimating fair value for investments cannot be determined with precision and cannot be substantiated by comparison to quoted prices in active markets and may not be realized in a current sale or immediate settlement of the asset or liability (particularly given the ongoing macroeconomic conditions such as, but not limited to recent adverse developments affecting regional banks and other financial institutions, and ongoing military conflicts around the world and uncertainty with respect to fluctuating interest rates continue to fuel recessionary fears and create volatility in Kennedy Wilson's business results and operations). Recently, there has also been a lack of liquidity in the capital markets as well as limited transactions which has had an impact on the inputs associated with fair values. Additionally, there are inherent uncertainties in any fair value measurement technique, and changes in the underlying assumptions used, including capitalization rates, discount rates, liquidity risks, and estimates of future cash flows could significantly affect the fair value measurement amounts. All valuations of real estate involve subjective judgments.

"Same property" refers to stabilized consolidated and unconsolidated properties in which Kennedy Wilson has an ownership interest during the entire span of both periods being compared. This analysis excludes properties that during the comparable periods (i) were acquired, (ii) were sold, (iii) are either

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

under development or undergoing lease up or major repositioning as part of the Company's asset management strategy, (iv) were investments in which the Company holds a minority ownership position, and (v) certain non-recurring income and expenses. The analysis only includes Office, Multifamily and Hotel properties, where applicable. To derive an appropriate measure of operating performance across the comparable periods, the Company removes the effects of foreign currency exchange rate movements by using the reported period-end exchange rate to translate from local currency into the U.S. dollar, for both periods. Amounts are calculated using Kennedy Wilson's ownership share in the Company's consolidated and unconsolidated properties. Management evaluates the performance of the operating properties the Company owns and manages using a "same property" analysis because the population of properties in this analysis is consistent from period to period, which allows management and investors to analyze (i) the Company's ongoing business operations and (ii) the revenues and expenses directly associated with owning and operating the Company's properties and the impact to operations from trends in occupancy rates, rental rates and operating costs. Same property metrics are widely recognized measures in the real estate industry, however, other publicly-traded real estate companies may not calculate and report same property results in the same manner as the Company. Please also see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Certain Non-GAAP Measures and Reconciliations" for a reconciliation of "same property" results to the most comparable measure reported under GAAP.

We use certain non-GAAP measures to analyze our business, including Adjusted EBITDA and Adjusted Net Income. We use these metrics for evaluating the success of our company and believe that they enhance the understanding of our operating results. A reconciliation of net income to Adjusted EBITDA and Adjusted Net Income is presented below:

	Years Ended December 31,				
(Dollars in millions)	2024	2023	2022	2021	2020
Net (loss) income	$ (33.7)	$ (281.4)	$ 101.9	$ 336.4	$ 107.8

Net Operating Income	**$ 234.2**	**$ 190.5**	**$ 274.3**	**$ 168.3**	**$ 294.2**	**$ 157.6**

[1] The Company's joint ventures in its Co-Investment business segment predominantly acquire and hold and may ultimately dispose of operating properties which are presented by the Company as net gain or loss on disposition under ASC Topic 606, *Revenue from Contracts with Customers* ("Topic 606") because the disposition is not considered an "output of the entity's ordinary activities." Certain joint ventures in the same business segment, however, dispose of non-operating properties (such as land and condominiums) from time-to-time, and such sales are an "output of the entity's ordinary activities" under Topic 606. Accordingly the sale of such real estate is presented by the Company on a gross basis (sale of real estate and cost of real estate sold), and, therefore, the portion of the same that is not attributable to the Company's ownership share is excluded from Co-Investment NOI.

Multifamily Affordable Portfolio—Same Property	66.8	62.9
Same Property	**$ 476.6**	**$ 462.0**

[*] This is a Non-GAAP financial measure. Please see our "Common Definitions" for a further explanation and discussion.
[1] Represents rental revenue and hotel revenue attributable to non-controlling interests.
[2] Represents the Company's share of unconsolidated investment rental revenues, as applicable, which are within the applicable same property population.
[3] Represents properties excluded from the same property population that were purchased or sold during the applicable period.
[4] Represents properties excluded from the same property population that were not stabilized during the applicable period, or retail or industrial properties.
[5] Represents other properties excluded from the same property population that were not classified as a commercial or multifamily property within the Company's portfolio. Also includes immaterial adjustments for foreign exchange rates, changes in ownership percentages, and certain non-recurring income and expenses.
[6] Excludes above/below market rents from the same property population, as they are representative of non-cash purchase price accounting income.

[*] This is a Non-GAAP financial measure. Please see our "Common Definitions" for a further explanation and discussion.
[1] Represents rental revenue and operating expenses and hotel revenue and operating expenses attributable to non-controlling interests.
[2] Represents the Company's share of unconsolidated investment rental revenues and net operating income, as applicable, which are within the applicable same property population.
[3] Represents properties excluded from the same property population that were purchased or sold during the applicable period.
[4] Represents properties excluded from the same property population that were not stabilized during the applicable period, or retail or industrial properties.
[5] Represents other properties excluded from the same property population that were not classified as a commercial or multifamily property within the Company's portfolio. Also includes immaterial adjustments for foreign exchange rates, changes in ownership percentages, and certain non-recurring income and expenses.
[6] Excludes above/below market rents from the same property population, as they are representative of non-cash purchase price accounting income.

Critical Accounting Policies

A critical accounting policy is one that involves an estimate or assumption that is subjective and requires judgment on the part of management about the effect of a matter that is inherently uncertain and is material to an entity's financial condition and results of operations. Estimates are prepared using management's best judgment, after considering past and current economic conditions and expectations for the future. Changes in estimates could affect our financial position and specific items in our results of operations that are used by stockholders, potential investors, industry analysts and lenders in their evaluation of our performance. Of the significant accounting policies discussed in Note 2 to the Consolidated Financial Statements, those presented below have been identified by us as meeting the criteria to be considered critical accounting policies. Refer to Note 2 for more information on these critical accounting policies.

Fair Value Investments

Kennedy Wilson records its investments in certain commingled funds it manages and sponsors (the "Funds") that are investment companies under the Accounting Standards Codification ("ASC") Topic 946, *Financial Services - Investment Companies*, based upon the net assets that would be allocated to its interests in the Funds assuming the Funds were to liquidate their investments at fair value as of the reporting date. Thus, the Funds reflect their investments at fair value, with unrealized gains and losses resulting from changes in fair value reflected in their earnings. Kennedy Wilson has retained the specialized accounting for the Funds as discussed in ASC Topic 323, *Investments—Equity Method and Joint Ventures* in recording its equity in joint venture income from the Funds.

Additionally, Kennedy Wilson elected the fair value option for 72 investments in unconsolidated investment entities. Due to the nature of these investments, Kennedy Wilson elected to record these investments at fair value in order to report the value in the underlying investments in the results of our current operations.

The use of different assumptions to fair value these investments could have material impact on the consolidated statements of income.

See Item 1. Business "Fair Value Investments" for detail on fair value methods and range of inputs that are used as part of valuations.

Carried Interests

Carried interests are allocated to the general partner, special limited partner or asset manager of Kennedy Wilson's real estate funds and fair value option unconsolidated investments based on the cumulative performance of the fund or underlying investments and are subject to preferred return thresholds of the limited partners and participants. At the end of each reporting period, Kennedy Wilson calculates the carried interests that would be due as if the fair value of the underlying investments were realized as of such date, irrespective of whether such amounts have been realized. As the fair value of underlying investments varies between reporting periods, it is necessary to make adjustments to amounts recorded as carried interests to reflect either (a) positive performance resulting in an increase in the carried interests to the general partner or asset manager or (b) negative performance that would cause the amount due to Kennedy Wilson to be less than the amount previously recognized, resulting in a negative adjustment to carried interests to the general partner or asset manager. To the extent that a fund or investment has a carried interests sharing program, a portion of carried interests will be recorded to carried interests compensation.

The Company has concluded that carried interests to the Company from equity method investments, based on cumulative performance to-date, represent carried interests. Consequently, in following the guidance set forth in ASC Topic 606, *Revenue from Contracts with Customers* and Topic 323, *Investments—Equity Method and Joint Ventures*, these allocations are included as a component of the total income from unconsolidated investments in the accompanying consolidated statements of income."

Real Estate Acquisitions

The purchase price of acquired properties is recorded to land, buildings and building improvements and intangible lease value (value of above-market and below-market leases, acquired in-place lease values, and tenant relationships, if any). The ownership of the other interest holders in consolidated subsidiaries is reflected as noncontrolling interests. Real estate is recorded based on cumulative costs incurred and allocated based on relative fair value.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

The valuations of real estate are based on management estimates of the real estate assets using income and market approaches. The indebtedness securing the real estate is valued, in part, based on third party valuations and management estimates also using an income approach.

The use of different assumptions to value the acquired properties and intangible assets and assumed liabilities could affect the future revenues and expenses we recognize over the estimated remaining useful life or lease term.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors
Kennedy-Wilson Holdings, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Kennedy-Wilson Holdings, Inc. and subsidiaries (the Company) as of December 31, 2024 and 2023, the related consolidated statements of operations, comprehensive (loss) income, equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes and financial statement schedules III and IV (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 28, 2025 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Report of Independent Registered Public Accounting Firm (continued)

Evaluation of the fair value of certain unconsolidated investments and commingled funds
As discussed in Notes 2 and 5 to the consolidated financial statements, the Company elected to record certain unconsolidated investments using the fair value option to more accurately reflect the timing of the value created in the underlying investments and report those changes in current operations. Additionally, the Company records its investments in its managed commingled funds (the Funds) based upon the net assets that would be allocated to its interests in the Funds, assuming the Funds were to liquidate their investments at fair value as of the reporting date. As of December 31, 2024, these investments had a fair value of $1,884.4 million.

We identified the evaluation of the fair value of certain unconsolidated investments and commingled funds as a critical audit matter. A high degree of subjectivity was required in applying and evaluating results from procedures over the respective discounted cash flow models used to calculate the fair value of the underlying real estate investments. Specifically, the respective cash flow models were sensitive to changes in certain key assumptions, including discount, terminal capitalization, and overall capitalization rates, which have a significant effect on the determination of fair value of these investments.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's fair value process for unconsolidated investments and commingled funds, including controls related to the development of the overall capitalization rate, discount rate and terminal capitalization rate assumptions. For a selection of the Company's investments, we involved valuation professionals with specialized skills and knowledge who assisted in comparing the discount rate and terminal capitalization rate used by the Company to independently developed ranges using market information obtained from third-party real estate publications or to rates observed in similar investments in the current period.

To the Shareholders and Board of Directors
Kennedy-Wilson Holdings, Inc.:

Opinion on Internal Control Over Financial Reporting
We have audited Kennedy-Wilson Holdings, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2024 and 2023, the related consolidated statements of operations, comprehensive (loss) income, equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes and financial statement schedules III and IV (collectively, the consolidated financial statements), and our report dated February 28, 2025 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion
The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting
A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide

Report of Independent Registered Public Accounting Firm (continued)

reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Kennedy-Wilson Holdings, Inc.
Consolidated Statements of Cash Flows (continued)

Supplemental cash flow information:

(Dollars in millions)	Year ended December 31, 2024	2023	2022
Cash paid for:			
Interest[1][2]	$ 256.1	$ 252.0	$ 214.4
Income taxes	9.2	21.8	19.9
Cash received from consolidated and unconsolidated asset sales and loan repayments, net	600.9	376.1	369.8
Cash received on interest rate hedges	26.0	24.0	0.9

[1] $1.1 million, $1.4 million, and $4.0 million attributable to non-controlling interests for the years ended December 31, 2024, 2023, and 2022, respectively.
[2] Net of $4.5 million, $5.0 million, and $3.3 million of capitalized interest for the years ended December 31, 2024, 2023 and 2022, respectively.

As of December 31, 2024, 2023, and 2022, we have $94.5 million, $69.6 million, and $21.4 million, respectively, of restricted cash, which is included in cash and cash equivalents, that primarily relates to lender reserves associated with consolidated mortgages that we hold on properties and reserves held on loans in the newly acquired Construction Loan Portfolio (as defined herein) on behalf of the borrowers under such loans. These reserves typically relate to interest, tax, insurance and future capital expenditures at the properties and on our loan investments.

Supplemental disclosure of non-cash investing and financing activities:

During the year ended December 31, 2024, the Company also sold a previously consolidated multifamily property into its Vintage Housing Holdings ("VHH") platform, with the Company retaining an interest in the property through its investment in VHH. The transaction was treated as a non-cash activity with the remaining share of real estate, mortgage loan and other balance sheet items being removed from the consolidated balance sheet with an increase of $16.5 million to unconsolidated investments.

During the year ended December 31, 2023, the Company sold a 49% equity interest in two previously wholly-owned market-rate multifamily properties into an existing joint venture platform managed by the Company (see gain on sale of real estate in Note 3 for further description of the transaction) and retained a noncontrolling 51% interest in such properties, which was treated as a non-cash activity with the remaining share of real estate, mortgage loan and other balance sheet items being removed from the consolidated balance sheet with an increase of $33.4 million to unconsolidated investments.

During the year ended December 31, 2023, the Company also sold a previously wholly-owned multifamily property into its VHH platform, with the Company retaining an interest in the property through its investment in VHH. The transaction was treated as a non-cash activity with the remaining share of real estate, mortgage loan and other balance sheet items being removed from the consolidated balance sheet with an increase of $16.8 million to unconsolidated investments.

During the year ended December 31, 2022, the noncontrolling 51% interest that the Company retained as part of the sale of a 49% ownership interest in a multifamily asset in the Western United States (see gain on sale of real estate in Note 3 for further description of the transaction) was treated as a non-cash activity with the remaining share of real estate, mortgage loan and other balance sheet items being removed from the consolidated balance sheet resulting in an increase of $31.9 million to unconsolidated investments.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022

NOTE 1—ORGANIZATION

Kennedy-Wilson Holdings, Inc. ("KWH," NYSE: KW), a Delaware corporation and its wholly owned and consolidated subsidiaries (collectively the "Company" or "Kennedy Wilson"), is a real estate investment company that invests in high growth markets across the United States ("U.S."), the United Kingdom ("UK") and Ireland. With an objective of generating strong long-term risk-adjusted returns for its shareholders and partners and drawing on over three decades of experience in identifying opportunities and building value through various market cycles, in its markets, the Company focuses on (i) investing in the rental housing sector (both market rate and affordable units) and industrial properties; and (ii) originating, managing and servicing real estate loans (primarily senior construction loans secured by high quality multifamily and student housing properties that are being developed by institutional sponsors throughout the United States). The Company's operations are defined by two business segments; its Consolidated Portfolio and Co-Investment Portfolio. Investment activities in the Consolidated Portfolio primarily involve ownership of multifamily assets. The Co-Investment Portfolio consists of (i) the co-investments in real estate and real estate-related assets, including loans secured by real estate, that the Company has made through its commingled funds and joint ventures that it manages; (ii) fees (including, without limitation, asset management fees, construction management fees, and/or acquisition and disposition fees); and (iii) carried interests.

NOTE 2—BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION—The consolidated financial statements include the accounts of Kennedy Wilson and voting interest entities which it controls. All intercompany balances and transactions have been eliminated in consolidation. In addition, Kennedy Wilson evaluates its relationships with other entities to identify whether they are variable interest entities ("VIE") as defined by Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Subtopic 810, *Consolidation*, and to assess whether it is the primary beneficiary of such entities. In determining whether Kennedy Wilson is the primary beneficiary of a VIE, qualitative and quantitative factors are considered, including, but not limited to: the amount and characteristics of Kennedy Wilson's investment; the obligation or likelihood for Kennedy Wilson to provide financial support; Kennedy Wilson's ability to control or significantly influence key decisions for the VIE; and the similarity with and significance to the business activities of Kennedy Wilson.

The Company determines the appropriate accounting method with respect to all investments that are not VIEs based on the control-based framework (controlled entities are consolidated) provided by the consolidation guidance in ASC Subtopic 810. The Company accounts for joint ventures where it is deemed that the Company does not have control through the equity method of accounting while joint ventures that the Company controls are consolidated in Kennedy Wilson's financial statements.

USE OF ESTIMATES—The preparation of the accompanying consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosure about contingent assets and liabilities, and reported amounts of revenues and expenses. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Management

adjusts such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates will be reflected in the financial statements in future periods.

REVENUE RECOGNITION—Revenue consists of rental and hotel income, management fees, leasing and commission fees, loan interest income and sales of real estate. ASC Topic 606, *Revenue from Contracts with Customers*, is a five-step model to recognize revenue from customer contracts. The model identifies the contract, any separate performance obligations in the contract, determines the transaction price, allocates the transaction price and recognizes revenue when the performance obligations are satisfied. Management has concluded that, with the exception of carried interests, the nature of the Company's revenue streams is such that the requirements are generally satisfied at the time that the fee becomes receivable.

Rental revenue from operating leases is generally recognized on a straight-line basis over the terms of the leases in accordance with ASC Topic 842, *Leases*.

Hotel income is earned when rooms are occupied or goods and services have been delivered or rendered.

Management fees are primarily comprised of investment management fees. Investment management fees are earned from limited partners of funds, co-investments, or separate accounts and are generally based on a fixed percentage of committed capital or net asset value. The Company provides investment management on investments it also has an ownership interest in. Fees earned on consolidated properties are eliminated in consolidation and fees on unconsolidated investments are eliminated for the portion that relate to the Company's ownership interest.

Investment management fees include acquisition, arrangement and disposition fees. Acquisition, arrangement and disposition fees are earned for identifying and closing investments on behalf of investors and are based on a fixed percentage of the acquisition or disposition price, as applicable. Acquisition and disposition fees are recognized upon the successful completion of an acquisition or disposition after all required services have been performed.

Loan income from investments in performing loans which Kennedy Wilson originates or acquires are recognized at the stated interest rate plus any amortization of premiums/discounts or fees earned on the loans. Loan income from investments in loans acquired at a discount are recognized using the effective interest method. When a loan or loans are acquired with deteriorated credit quality primarily for the rewards of collateral ownership, such loans are accounted for as loans until Kennedy Wilson is in possession of the collateral. However, accrual of income is not recorded during the conversion period under ASC Subtopic 310-30-25, *Receivables—Loans and Debt Securities Acquired with Deteriorated Credit Quality*. Income is recognized to the extent that cash is received from the loan. The Company has evaluated its loan portfolio under ASC Subtopic 326, *Financial Instruments—Credit Losses*. for current expected credit losses ("CECL") reserves. CECL reserves reflect the Company's current estimate of potential credit losses related to loans included in the Company's consolidated balance sheets. Changes to the CECL reserve are recognized through the Company's consolidated statements of operations. While ASC Subtopic 326 does not require any particular method for determining the CECL reserve, it does specify the reserve should be based on relevant information about past events, including historical loss experience, current portfolio and market conditions.

Sales of real estate are recognized when title to the real property passes to the buyer and there is no continuing involvement in the real property. Under ASC Subtopic 610-20, *Other Income—Gains and Losses from the Derecognition of Nonfinancial Assets*, the Company recognizes the entire gain attributed to contributions of real estate properties to unconsolidated entities.

Property services fees are earned from the Company's auction sales and marketing business and are recorded in Other section of revenues. In the case of auction and real estate sales commissions, the revenue is generally recognized when escrow closes. In accordance with the guidelines established for Reporting Revenue Gross as a Principal versus Net as an Agent in ASC Topic 606, Kennedy Wilson records commission revenues and expenses on a gross basis. Of the criteria listed in ASC Topic 606, Kennedy Wilson is the primary obligor in the transaction, does not have inventory risk, performs all or part of the service and has wide latitude in establishing the price of services rendered and discretion in selection of agents and determination of service specifications.

REAL ESTATE ACQUISITIONS—The purchase price of acquired properties is recorded to land, buildings and building improvements and intangible lease value (value of above-market and below-market leases, acquired in-place lease values, and tenant relationships, if any). The ownership of the other interest holders in consolidated subsidiaries is reflected as noncontrolling interests ("NCI"). Real estate is recorded based on cumulative costs incurred and allocated based on relative fair value. Acquisition fees and expenses associated with the acquisition of properties determined to be business combinations are expensed as incurred. Acquisition fees and expenses associated with transactions determined to be asset acquisitions are capitalized as part of the real estate acquired.

The valuations of real estate are based on management estimates of the real estate assets using income and market approaches. The indebtedness securing the real estate is valued, in part, based on third party valuations and management estimates also using an income approach.

The Company is involved in all stages of real estate ownership, including development. Once a project is in development, consistent with ASC Topic, 360 *Property Plant, and Equipment*, costs including interest and real estate taxes and associated costs directly related to the project under development, are capitalized. During the predevelopment period of a probable project and the period in which a project is under construction, the Company capitalizes all direct and indirect costs associated with planning, developing, and constructing the project. Once a project is constructed and deemed substantially complete and ready for occupancy, carrying costs, such as real estate taxes, interest and associated costs, are expensed as incurred.

UNCONSOLIDATED INVESTMENTS—Kennedy Wilson has a number of joint venture interests that were formed to acquire, manage, and/or sell real estate. Investments in unconsolidated investments are accounted for under the equity method of accounting as Kennedy Wilson can exercise significant influence, but does not have the ability to control the unconsolidated investment. An investment in an unconsolidated investment is recorded at its initial investment and is increased or decreased by Kennedy Wilson's share of income or loss, plus additional contributions and less distributions. A decline in the value of an unconsolidated investment that is other than temporary is recognized when evidence indicates that such a decline has occurred in accordance with ASC Topic 323, *Investments—Equity Method and Joint Ventures*.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

The Company records its investments in certain commingled funds it manages and sponsors (the "Funds") that are investment companies under the ASC Topic 946, Financial Services—Investment Companies, based upon the net assets that would be allocated to its interests in the Funds assuming the Funds were to liquidate their investments at fair value as of the reporting date. Thus, the Funds reflect the Company's investments at fair value, with unrealized gains and losses resulting from changes in fair value reflected in their earnings.

In addition, the Company elected the fair value option for 72 investments in unconsolidated investment entities ("FV Option" investments). These co-investments are structured as limited liability companies and limited partnerships with one partner and function under a collaborative decision-making structure. The Company owns a weighted average ownership of approximately 40% of the equity investment in such co-investment investments. The Company elected to record these co-investments at fair value in order to report the change in value in the underlying investments in the results of its current operations consistent with its investments in certain commingled funds, as described above.

The Company has adopted an ownership model for carried interests representing allocations to the Company from equity method investments, based on cumulative performance to-date. Consequently, in accordance with the guidance set forth in ASC Topic 606 and ASC Topic 323, these allocations are included as a component of the total income from unconsolidated investments in the accompanying consolidated statements of operations as "carried interests". Carried interests are allocated to the Company under the Funds and such co-investment investments based on the cumulative performance of the venture and are subject to preferred return thresholds of the partners. In the case of the Funds, these carried interests represent an allocation relating to the performance of investment management services, whereas they represent returns for the performance of the underlying investments in the co-investment investments structures subject to collaborative decision-making.

At the end of each reporting period, the Company calculates the carried interest that would be due as if the fair value of the underlying investments were realized as of such date, irrespective of whether such amounts have been realized. As the fair value of underlying investments varies between reporting periods, it is necessary to make adjustments to amounts recorded as carried interests to reflect either (a) positive performance resulting in an increase in the carried interests to the general partner or asset manager or (b) negative performance that would cause the amount due to Kennedy Wilson to be less than the amount previously recognized as income from unconsolidated investments, resulting in a negative adjustment to carried interests to the general partner or asset manager. As of December 31, 2024 and 2023, the Company has $27.6 million and $77.3 million, respectively, of accrued carried interests recorded to unconsolidated investments that are subject to future adjustments based on the underlying performance of investments. During the year ended December 31, 2024 and 2023, the Company did not collect any carried interests. During the year ended December 31, 2022, the Company collected $6.8 million of carried interests. The amount of the Company's non-cash carried interest accruals recorded from its Funds and its FV Option investments for the years ended December 31, 2024, 2023 and 2022 are as follows:

	Years Ended December 31,		
(Dollars in millions)	2024	2023	2022
Funds	$ (38.8)	$ (39.5)	$ (18.4)
Co-investments	(10.9)	(24.8)	(2.7)
Total	**$ (49.7)**	**$ (64.3)**	**$ (21.1)**

Carried interests compensation is recognized in the same period that the related carried interests are recognized and can be reversed during periods when there is a reversal of carried interests that were previously recognized. As of December 31, 2024 and 2023, the Company has $7.1 million and $22.8 million, respectively, of accrued carried interests compensation recorded to accrued expenses and other liabilities that are subject to future adjustments based on the underlying performance of investments. During the year ended December 31, 2024 and 2023, the Company did not pay out any carried interests compensation. During the year ended December 31, 2022, the Company paid $1.2 million to employees for carried interests that were realized during the period.

FAIR VALUE MEASUREMENTS—Kennedy Wilson accounts for fair value measurements of financial assets and financial liabilities and for fair value measurements of non-financial items that are recognized or disclosed at fair value in the financial statements on a recurring basis under the provisions of ASC Topic 820, *Fair Value Measurement*. ASC Topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When estimating fair value in the absence of an orderly transaction between market participants, valuations of real estate are based on management estimates of the real estate assets using income and market approaches. The indebtedness securing the real estate and the investments in debt securities are valued, in part, based on third party valuations and management estimates also using an income approach. The use of different market assumptions or estimation methodologies may have a material impact on the estimated fair value amounts.

FAIR VALUE OF FINANCIAL INSTRUMENTS—The estimated fair value of financial instruments is determined using available market information and appropriate valuation methodologies. Considerable judgment, is necessary, however, to interpret market data and develop the related estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that could be realized upon disposition of the financial instruments. The use of different market assumptions or estimation methodologies may have a material impact on the estimated fair value amounts.

DISTRIBUTIONS FROM UNCONSOLIDATED INVESTMENTS—The Company utilizes the nature of distributions approach and distributions are reported under operating cash flow unless the facts and circumstances of a specific distribution clearly indicate that it is a return of capital (e.g., a liquidating dividend or distribution of the proceeds from unconsolidated investments' sale of assets), in which case it is reported as an investing activity. This enables Kennedy Wilson to look to the nature and source of the distribution received and classify it appropriately between operating and investing activities on the statement of cash flows based upon the source.

FOREIGN CURRENCIES—The financial statements of Kennedy Wilson's subsidiaries located outside the United States are measured using the local currency as this is their functional currency. The assets and liabilities of these subsidiaries are translated at the rates of exchange at the balance sheet date, and income and expenses are translated at the average monthly rate. The foreign currencies include the euro and the British pound sterling. Cumulative translation adjustments, to the extent not included in cumulative net income, are included in the consolidated statement of equity as a component of accumulated other comprehensive income.

Investment level debt is generally incurred in local currencies. Fluctuations in foreign exchanges rates may have a significant impact on the results of the Company's operations. In order to manage the effect of these fluctuations, the Company enters into hedging transactions, in the form of currency derivative

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

contracts, that are designed to reduce its book equity exposure to foreign currencies. KWE has also entered into currency derivative contracts to manage its exposure to euro to British pound currency fluctuations. See Note 5 for a complete discussion on currency derivative contracts.

DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES—Kennedy Wilson has derivatives to reduce its exposure to foreign currencies. All derivative instruments are recognized as either assets or liabilities in the balance sheet at their respective fair values. For derivatives designated in hedging relationships, changes in fair value of cash flow hedges or net investment hedges are recognized in accumulated other comprehensive income, to the extent the derivative is effective at offsetting the changes in the item being hedged until the hedged item affects earnings.

Fluctuations in foreign exchanges rates may have a significant impact on the Company's results of operations. In order to manage the potential exposure from adverse changes in foreign exchange rates arising from the Company's net investments in foreign operations, the Company may enter into currency derivative contracts to hedge all or portions of the net investments in the Company's non-U.S. dollar denominated foreign operations.

GOODWILL—Goodwill results from the difference between the purchase price and the fair value of net assets acquired based upon the purchase method of accounting for business combinations. In accordance with ASC Subtopic 350-20, *Accounting for Intangibles—Goodwill and Other*, goodwill is reviewed for impairment on an annual basis. The Company performs its annual review of impairment at year end and when a triggering event occurs between annual year end reviews. As a result of the evaluation performed as described above, Kennedy Wilson has determined that there was no impairment of goodwill during the years ended December 31, 2024, 2023 and 2022.

CASH AND CASH EQUIVALENTS—Cash and cash equivalents consist of cash and all highly liquid investments purchased with maturities of three months or less. Cash and cash equivalents are invested in institutions insured by government agencies. Certain accounts contain balances in excess of the insured limits. Kennedy Wilson's operations and financial position are affected by fluctuations in currency exchange rates between the euro and British pound sterling against the U.S. Dollar. As of December 31, 2024, 2023, and 2022 we have $94.5 million, $69.6 million, and $21.4 million, respectively, of restricted cash, which is included in cash and cash equivalents on the accompanying consolidated balance sheets, that primarily relates to lender reserves associated with consolidated mortgages that we hold on properties and reserves held on loans in the Company's real estate credit business on behalf of the borrowers under such loans. These reserves typically relate to interest, tax, insurance and future capital expenditures at the properties and on our loan investments.

LONG-LIVED ASSETS—Kennedy Wilson reviews its long-lived assets (excluding goodwill) whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable in accordance with ASC Subtopic 360-10, *Property, Plant and Equipment*. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized in gain on sale of real estate, net in the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of are presented separately in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of the assets to be disposed of are classified as held for sale and would be presented separately in the appropriate asset and liability sections of the consolidated balance sheets.

ACCOUNTS RECEIVABLE—Accounts receivable are recorded at the contractual amount as determined by the underlying agreements and do not bear interest. The Company recognizes revenue to the extent that amounts are probable that substantially all rental income will be collected.

CONCENTRATION OF CREDIT RISK—Financial instruments that subject Kennedy Wilson to credit risk consist primarily of accounts and notes receivable, cash equivalents and derivative instruments. Credit risk is generally diversified due to the large number of entities composing Kennedy Wilson's customer base and their geographic dispersion throughout the United States, the United Kingdom, Ireland and to a lesser extent Spain and Italy. Kennedy Wilson performs ongoing credit evaluations of its customers and debtors.

EARNINGS PER SHARE—Basic earnings per share is computed based upon the weighted average number of shares of common stock outstanding during the periods presented. Diluted earnings per share is computed based upon the weighted average number of shares of common stock and potentially dilutive securities outstanding during the periods presented. The dilutive impact of potentially dilutive securities includes convertible securities, and unvested stock which were outstanding during the period. Unvested stock are calculated by the "treasury stock" method and the convertible securities under the "if converted" method.

COMPREHENSIVE INCOME (LOSS)—Comprehensive income (loss) consists of net income (loss) and other comprehensive income (loss). In the accompanying consolidated balance sheets, accumulated other comprehensive income consists of foreign currency translation adjustments and unrealized gains (losses) on derivative instruments.

REPURCHASE OF EQUITY INSTRUMENTS—Upon the decision to retire repurchased equity instruments, Kennedy Wilson records the retirement as a reduction to additional paid in capital for the amount that shares were initially issued at with the excess paid recorded to retained earnings.

SHARE-BASED PAYMENT ARRANGEMENTS—Kennedy Wilson accounts for its share-based payment arrangements under the provisions of ASC Subtopic 718-10, *Compensation—Stock Compensation*. Compensation cost for employee service received in exchange for an award of equity instruments is based on the grant-date fair value of the share-based award that is ultimately settled in equity of Kennedy Wilson. The cost of employee services is recognized over the period during which an employee provides service in exchange for the share-based payment award. Share-based payment arrangements with only services conditions that vest ratably over the requisite service period are recognized on the straight-line basis and performance awards that vest ratably are recognized on a tranche by tranche basis over the performance period.

INCOME TAXES—Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. In accordance with accounting for uncertainty in ASC Subtopic 740-10, *Income Taxes*, Kennedy Wilson recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

Kennedy Wilson records interest related to unrecognized tax benefits in interest expense and penalties in general and administrative expenses on the consolidated statements of operations.

NONCONTROLLING INTERESTS—Noncontrolling interests are reported within equity as a separate component of Kennedy Wilson's equity in accordance with ASC Subtopic 810-10. Revenues, expenses, gains, losses, net income or loss, and other comprehensive income are reported in the consolidated statements of operations at the consolidated amounts and net income and comprehensive income attributable to noncontrolling interests are separately stated.

RECENT ACCOUNTING PRONOUNCEMENTS

On November 27, 2023, the Financial Accounting Standards Board ("FASB") issued ASU 2023-07, *Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures*. This update enhances reportable segment disclosures by requiring a public entity to: (i) disclose, on an annual and interim basis, significant segment expenses that are regularly provided to the chief operating decision maker ("CODM") and included within each reported measure of segment profit or loss, (ii) disclose, on an annual and interim basis, an amount of other segment items by reportable segment and a description of its composition, (iii) provide all annual disclosures about a reportable segment's profit or loss and assets currently required by Topic 280 in interim periods and (iv) disclose the title and position of the CODM and an explanation of how the CODM uses the reported measure of segment profit or loss in assessing segment performance and deciding how to allocate resources. This ASU also clarifies that, in addition to the measure that is most consistent with the measurement principles under GAAP, a public entity is not precluded from reporting additional measures of a segment's profit or loss that are used by the CODM in assessing segment performance and deciding how to allocate resources. This guidance is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. The Company adopted ASU 2023-07 in the fourth quarter of 2024 and have updated its segment disclosures to comply with the updated requirements.

In December 2023, the FASB issued ASU 2023-09, *Improvements to Income Tax Disclosures*. This ASU requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as information on income taxes paid and will be effective for annual periods beginning after December 15, 2024. The new requirements should be applied on a prospective basis with an option to apply them retrospectively. Early adoption is permitted. The Company is evaluating the impact that ASU 2023-09 will have on its consolidated financial statements and related disclosures.

In November 2024, the FASB issued ASU 2024-03, *Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses*. This ASU requires public business entities to disclose additional information about specific expense categories in the notes to financial statements at interim and annual reporting periods. This guidance is effective for fiscal years beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027 with early adoption permitted. These requirements should be applied on a prospective basis with an option to apply them retrospectively. The Company is evaluating the impact that ASU 2024-03 will have on our consolidated financial statement disclosures.

The FASB did not issue any other ASUs during the year ended December 31, 2024 that the Company expects to be applicable and have a material impact on the Company's financial statements.

RECLASSIFICATIONS—Certain balances included in prior year's financial statements have been reclassified to conform to the current year's presentation.

NOTE 3—REAL ESTATE AND ACQUIRED IN PLACE LEASE VALUE

The following table summarizes the Company's investment in consolidated real estate properties at December 31, 2024 and 2023:

	December 31,	
(Dollars in millions)	2024	2023
Land	$ 979.6	$ 1,328.3
Buildings	3,548.7	3,679.1
Building improvements	466.9	511.3
Acquired in-place lease values	244.3	276.4
	5,239.5	5,795.1
Less accumulated depreciation and amortization	(949.1)	(957.8)
Real estate and acquired in place lease values, net of accumulated depreciation and amortization	**$ 4,290.4**	**$ 4,837.3**

Real property, including land, buildings, and building improvements, are included in real estate and are generally stated at cost. Buildings and building improvements are depreciated on the straight-line method over their estimated lives not to exceed 40 years. Acquired in-place lease values are recorded at their estimated fair value and amortized over their respective weighted-average lease term which was 7.2 years at December 31, 2024.

Depreciation and amortization expense on buildings, building improvements and acquired in-place lease values for the years ended December 31, 2024, 2023 and 2022 was $141.4 million, $148.9 million and $162.7 million, respectively.

Consolidated Acquisitions

The purchase of property is recorded to land, buildings, building improvements, and intangible lease value (including the value of above-market and below-market leases, acquired in-place lease values, and tenant relationships, if any) based on their respective estimated relative fair values. The purchase price generally approximates the fair value of the properties as acquisitions are transacted with third-party willing sellers after arms-length negotiations.

During the years ended December 31, 2024 and 2023, Kennedy Wilson did not acquire any consolidated properties. The Company initially acquired the first asset in its United Kingdom single family rental unit platform while its partner was completing due diligence. This asset was subsequently sold into this new platform during the year ended December 31, 2024 and is accounted for as an unconsolidated investment.

Gains on Sale of Real Estate, Net

During the year ended December 31, 2024, Kennedy Wilson recognized gains on sale of real estate, net of $160.1 million. These gains were primarily due to (i) the Company's sale of the Shelbourne Hotel, which resulted in a gain of $99.1 million; (ii) the sale of a wholly-owned multifamily asset in Western United States for a gain of $56.1 million; (iii) the sale of a building in an office campus, which resulted in a gain of $21.6 million; (iv) the deconsolidation of a previously wholly-owned multifamily property as a result of our sale of 90% of the ownership interest to a new partner which resulted in a gain of $8.1 million; and (v) the remainder of gain on sale of real estate, net relates to the sale of non-core retail assets in the United Kingdom and Spain which resulted in loss on sale in addition to impairments referenced below.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

During the year ended December 31, 2023, Kennedy Wilson recognized gains on sale of real estate, net of $127.6 million. These gains were primarily due to (i) the Company's sale of 49% of its equity interest in two previously wholly-owned market-rate multifamily properties into an existing joint venture platform managed by the Company and which the Company retained a noncontrolling 51% interest in such properties, which resulted in a gain on sale of real estate of $79.5 million; (ii) the sale of a Western United States property to VHH, pursuant to which the Company retains an interest in the asset through its ownership interest in VHH, which resulted in a gain of $15.1 million; (iii) the sale of a consolidated multifamily property owned with a noncontrolling interest partner which resulted in a gain of $37.6 million ($20.1 million of which was at the Company's share) and (iv) the remainder of gain on sale of real estate relates to the sale of non-core retail and residential properties in the Western United States, United Kingdom, Ireland, and Spain.

During the year ended December 31, 2022, due to the sale and deconsolidation of multifamily asset in the Western United States, the Company recognized a $56.7 million gain on sale of real estate, net and generated $30.2 million of cash proceeds for the Company. The gain is due to the sale of the 49% interest to the Company's partner and the recording of the Company's retained 51% interest in unconsolidated investments at the fair value established by the transaction.

Included in the net gains for the year ended December 31, 2024, 2023 and 2022 are impairment losses of $22.1 million, $28.6 million and $13.3 million, respectively, primarily relating to European non-core retail and office assets.

Leases

The Company leases its operating properties to customers under agreements that are classified as operating leases. The total minimum lease payments provided for under the leases are recognized on a straight-line basis over the lease term. The majority of the Company's rental expenses, including common area maintenance, real estate taxes and insurance, are recovered from the Company's tenants. The Company records amounts reimbursed by customers in the period that the applicable expenses are incurred, which is generally ratably throughout the term of the lease. The reimbursements are recognized in rental income in the consolidated statements of operations as the Company is the primary obligor with respect to purchasing and selecting goods and services from third-party vendors and bearing the associated credit risk.

The following table summarizes the minimum lease payments due from the Company's tenants on leases with lease periods greater than one year at December 31, 2024:

(Dollars in millions)	Minimum Rental Revenues[1]
2025	$ 118.6
2026	103.7
2027	90.7
2028	75.8
2029	59.5
Thereafter	124.8
Total	$ 573.1

[1] These amounts do not reflect future rental revenues from the renewal or replacement of existing leases, rental increases that are not fixed and exclude reimbursements of rental expenses.

NOTE 4—UNCONSOLIDATED INVESTMENTS

Kennedy Wilson has a number of joint venture interests including commingled funds and separate accounts, generally ranging from 5% to 50%, that were formed to acquire, manage, develop, service and/or sell real estate. Kennedy Wilson has significant influence over these entities, but not control. Accordingly, these investments are accounted for under the equity method.

Joint Venture and Fund Holdings

The following table details Kennedy Wilson's investments in joint ventures by investment type and geographic location as of December 31, 2024:

(Dollars in millions)	Multifamily	Commercial	Hotel	Funds	Residential and Other	Total
Western U.S.	$ 856.0	$ 74.1	$ 249.7	$ 63.4	$ 183.3	$ 1,426.5
Ireland	279.2	125.1	—	4.9	—	409.2
United Kingdom	7.7	154.2	—	28.4	16.4	206.7
Total	**$ 1,142.9**	**$ 353.4**	**$ 249.7**	**$ 96.7**	**$ 199.7**	**$ 2,042.4**

The following table details the Kennedy Wilson's investments in joint ventures by investment type and geographic location as of December 31, 2023:

(Dollars in millions)	Multifamily	Commercial	Hotel	Funds	Residential and Other	Total
Western U.S.	$ 820.9	$ 71.6	$ 253.0	$ 96.2	$ 156.2	$ 1,397.9
Ireland	313.8	158.7	—	5.4	—	477.9
United Kingdom	—	139.8	—	31.5	22.0	193.3
Total	**$ 1,134.7**	**$ 370.1**	**$ 253.0**	**$ 133.1**	**$ 178.2**	**$ 2,069.1**

During the year ended December 31, 2024, the change in unconsolidated investments primarily relates to $125.0 million of cash contributions to unconsolidated investments, $147.4 million of distributions from unconsolidated investments, $16.5 million associated with the deconsolidations, $6.4 million of gains from unconsolidated investments (net of $6.3 million of fair value losses), and a $29.9 million decrease related to other items, which primarily related to foreign exchange movements.

As of December 31, 2024 and December 31, 2023, $1,884.4 million and $1,927.0 million, respectively, of unconsolidated investments were accounted for at fair value. See Note 5 for more detail.

Contributions to Joint Ventures

During the year ended December 31, 2024, Kennedy Wilson contributed $125.0 million to joint ventures, primarily to capital calls with respect to the new European investments in industrial and single family housing, and fund new acquisitions in the Company's new United States based commingled fund and multifamily properties in Western United States with separate account partners.

Distributions from Joint Ventures

The following table details cash distributions by investment type and geographic location for the year ended December 31, 2024:

	Multifamily		Commercial		Funds		Residential and Other		Total	
(Dollars in millions)	Operating	Investing	Operating	Investing	Operating	Investing	Operating	Investing	Operating	Investing
Western U.S.	$ 34.7	$ 74.4	$ 9.2	$ 1.7	$ 1.3	$ 2.8	$ 0.2	$ 4.5	$ 45.4	$ 83.4
Ireland	9.8	—	4.3	2.1	—	—	—	—	14.1	2.1
United Kingdom	—	—	0.1	0.2	—	—	1.2	0.9	1.3	1.1
Total	**$ 44.5**	**$ 74.4**	**$ 13.6**	**$ 4.0**	**$ 1.3**	**$ 2.8**	**$ 1.4**	**$ 5.4**	**$ 60.8**	**$ 86.6**

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

Investing distributions resulted primarily from sale of a multifamily property in Western United States, conversions of VHH properties from development to operating, the redemption of an interest in a hedge fund investment and excess proceeds from the refinancing of mortgage loans on properties. Operating distributions resulted from operating cash flow generated by the joint venture investments that have been distributed to the Company.

Income from Unconsolidated Investments

The following table presents income from unconsolidated investments recognized by Kennedy Wilson during the years ended December 31, 2024, 2023 and 2022:

	Year Ended December 31,		
(Dollars in millions)	2024	2023	2022
Income from unconsolidated investments—operating performance	$ 29.9	$ 40.8	$ 80.2
Income from unconsolidated investments—realized gains from cost basis investments	32.6	—	4.7
(Loss) income from unconsolidated investments—unrealized and realized fair value (losses) gains	(6.3)	(229.3)	114.6
Principal co-investments	56.2	(188.5)	199.5
Loss from unconsolidated investments—carried interests Funds	(38.8)	(39.5)	(18.4)
Loss from unconsolidated investments—carried interests co-investments	(10.9)	(24.8)	(2.7)
Income (loss) from unconsolidated investments	**$ 6.5**	**$ (252.8)**	**$ 178.4**

Operating performance

During the year ended December 31, 2024, the Company recognized an increase in rental and hotel revenue compared to the same period in 2023, primarily as a result of the recapitalization of certain previously consolidated multifamily properties that are now a part of our Co-Investment Portfolio and the opening of the Kona Village Resort in July 2023. This increase in rental and hotel revenue was offset by: (i) costs associated with the ongoing stabilization of the Kona Village Resort and development properties in Europe that are in the process of leasing up, as these projects were under development in prior period and all costs were capitalized during construction (ii) higher interest expense due to changes in the contractual interest rates of our indebtedness and higher debt balances due to the increase in assets in Co-Investment Portfolio; and (iii) lower income from sales of residential units at our Kohanaiki development in Hawaii as compared to the prior period.

Realized Gains

During the year ended December 31, 2024, the Company sold the majority of its interest in an unconsolidated investment that was not accounted for under the fair value method of accounting and recognized a gain of $32.6 million.

Fair Value

During the year ended December 31, 2024, the Company recorded fair value decreases with respect to: (i) lower fair values with respect to office properties in the Western United States, Ireland and United Kingdom due to market assumptions of higher vacancy rates and lower rental growth with respect to the same; and (ii) non-cash fair value losses on mortgage debt and interest rate hedges as previous non-cash fair value gains unwind due to loans and hedges moving closer to maturity dates. These fair value decreases were offset by (i) fair value increases with respect to our minority ownership interest in Zonda, a technology based real estate residential housing advisory business, as a result of its recent completion of a merger transaction; (ii) fair value increases associated with our investment in VHH due to increases in NOI at the underlying properties and lower cost of capital associated with the business as interest rates have moved down; and (iii) fair value increase on a recently completed multifamily development in the Western United States as operations ramp up.

During the year ended December 31, 2024, we recorded a $38.8 million decrease in the accrual for carried interests in our Funds, primarily related to the fair value decreases that the Company recorded with respect to certain office assets within the Company's United States commingled fund. There was also a $10.9 million decrease in carried interests on certain separate account platforms that hold multifamily assets in the Western United States.

During the year ended December 31, 2023, valuations pulled back primarily as a result of continued expansion of estimated capitalization rates and significant reductions in transaction volumes and liquidity due to, increased borrowing rates as the Federal Reserve continued its interest rate hikes and increased the federal funds rate by 100 basis points during 2023. As such, during the year ended December 31, 2023 the Company recorded fair value decreases with respect to: (i) certain office properties in the Western United States, Ireland and United Kingdom primarily due to expansion in estimated capitalization rates, primarily as a result of increased interest rates, which also led to us recording a decrease of the accrued carried interests with respect to funds that held these investments as discussed below; (ii) certain market rate multifamily properties in the Western United States and Ireland primarily due to expansion in estimated capitalization rates; (iii) the write off of a $5 million investment in a social impact real estate fund manager; and (iv) a decrease in the fair value of a building that we hold a 10% ownership interest in due to a national co-working office tenant no longer paying rent at such property. These fair value decreases were offset by (i) a fair value increase of $51.5 million with respect to our investment in VHH (our affordable rate multifamily platform) due to gains on the conversion of the status of one of VHH's largest properties from development to operating, gains associated with the conversion of the loan secured by such property from a floating rate construction loan to a long-term fixed rate mortgage (the rate of which was set in 2019), the resyndication of properties and (ii) fair value increases recognized by the Company on fixed rate mortgages due to increases in market interest rates.

During the year ended December 31, 2023, the Company recorded a $39.5 million decrease in the accrual for carried interests relating to commingled funds that hold office assets and a $24.8 million reduction on carried interests associated with market rate multifamily separate account platforms in the Western United States and Ireland.

Vintage Housing Holdings

As of December 31, 2024 and 2023, the carrying value of the Company's investment in VHH was $333.9 million and $285.9 million, respectively. The total equity income recognized from the Company's investment in VHH was $47.1 million, $63.0 million and $119.8 million for the years ended December 31, 2024, 2023 and 2022, respectively. Distributions in the current period primarily relate to operating distributions and distributions associated with the conversion of development properties to operating properties.

During the year ended December 31, 2024, the Company received $27.4 million of proceeds from VHH, including $10.3 million from recurring monthly distributions, $6.8 million from paid developer fees at conversion from development properties to operating properties and $10.3 million from sales and refinancings.

Capital Commitments

As of December 31, 2024, Kennedy Wilson had unfulfilled capital commitments totaling $284.7 million to ten of its unconsolidated joint ventures, including $61.1 million relating to four closed-end funds managed by Kennedy Wilson, under the respective operating agreements.

Summarized Financial Data

VHH

The income from VHH was a significant component of the Company's operations for the year ended December 31, 2024 and 2022. Information for year ended December 31, 2023 is show for comparative purposes.

Summarized financial information is provided below:

	VHH	
	December 31,	
(Dollars in millions)	2024	2023
Cash and cash equivalents	$ 148.5	$ 44.0
Accounts receivable	28.3	3.7
Real estate	2,141.3	2,054.9
Other	38.7	0.3
Total assets	**$ 2,356.8**	**$ 2,102.9**
Liabilities		
Accounts payable and accrued expenses	$ 120.1	$ 21.1

NOTE 5—FAIR VALUE MEASUREMENTS AND THE FAIR VALUE OPTION

The following table presents fair value measurements (including items that are required to be measured at fair value and items for which the fair value option has been elected) as of December 31, 2024:

(Dollars in millions)	Level 1	Level 2	Level 3	Total
Unconsolidated investments	$ —	$ —	$ 1,884.4	$ 1,884.4
Net currency derivative contracts	—	(1.2)	—	(1.2)
Total	**$ —**	**$ (1.2)**	**$ 1,884.4**	**$ 1,883.2**

The following table presents fair value measurements (including items that are required to be measured at fair value and items for which the fair value option has been elected) as of December 31, 2023:

(Dollars in millions)	Level 1	Level 2	Level 3	Total
Unconsolidated investments	$ —	$ —	$ 1,927.0	$ 1,927.0
Net currency derivative contracts	—	(23.7)	—	(23.7)
Total	**$ —**	**$ (23.7)**	**$ 1,927.0**	**$ 1,903.3**

Unconsolidated Investments

Kennedy Wilson elected to use the FV Option for 72 unconsolidated investments to more accurately reflect the timing of the value created in the underlying investments and report those changes in current operations. Kennedy Wilson's investment balance in the FV Option investments was $1,787.7 million and $1,793.9 million at December 31, 2024 and 2023, respectively, which are included in unconsolidated investments in the accompanying balance sheets.

Additionally, Kennedy Wilson records its investments in its managed commingled funds (the "Funds") based upon the net assets that would be allocated to its interests in the Funds, assuming the Funds were to liquidate their investments at fair value as of the reporting date. The Company's investment balance in the Funds was $96.7 million and $133.1 million at December 31, 2024 and 2023, respectively, which is included in unconsolidated investments in the accompanying consolidated balance sheets.

In estimating fair value of real estate held by the Funds and the 72 FV Option investments, the Company considers significant unobservable inputs to be the capitalization and discount rates.

The following table summarizes the Company's investments in unconsolidated investments held at fair value by type:

(Dollars in millions)	December 31, 2024	December 31, 2023
FV Option	$ 1,787.7	$ 1,793.9
Funds	96.7	133.1
Total	**$ 1,884.4**	**$ 1,927.0**

The following table presents changes in Level 3 investments, investments in investment companies and investments in joint ventures that elected the fair value option, for the years ended December 31:

(Dollars in millions)	2024	2023	2022
Beginning balance	$ 1,927.0	$ 2,093.7	$ 1,794.8
Unrealized and realized gains, including carried interests	142.2	111.5	274.4
Unrealized and realized losses	(178.1)	(377.4)	(114.1)
Contributions	105.3	168.8	348.1
Distributions	(97.2)	(143.9)	(188.9)
Foreign exchange	(29.8)	25.0	(55.8)
Other	15.0	49.3	35.2
Ending balance	**$ 1,884.4**	**$ 1,927.0**	**$ 2,093.7**

The Other balance for the year ended December 31, 2024 relates to the non-cash transfer of one consolidated multifamily property into VHH. The Other balance for the year ended December 31, 2023 primarily consists of non-cash contributions relating to two recapitalized multifamily investments into a separate account platform and one multifamily property into VHH. The Other balance for the year ended December 31, 2022 includes $31.9 million related to the sale of a 49% ownership interest in multifamily asset located in the Western United States. As the increase in unconsolidated investments

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

was due to a non-cash movement the amounts are reflected in Other above. See notes to cash flow statement and Note 3 for further discussion regarding the sale.

The change in unrealized gains and losses on Level 3 investments during 2024 and 2023 for investments still held as of December 31, 2024 and 2023 were losses of $16.7 million and losses of $178.2 million, respectively. The change in unrealized and realized gains and losses are included in principal co-investments within income from unconsolidated investments on the accompanying consolidated statements of income.

Unobservable Inputs for Real Estate

The Company accounts for a number of unconsolidated investments under fair value, the accuracy of estimating fair value cannot be determined with precision and cannot be substantiated by comparison to quoted prices in active markets and may not be realized in a current sale or immediate settlement of the asset or liability. Recently, there has also been a lack of liquidity in the capital markets as well as limited transactions which has had impact on the inputs associated with fair values. Additionally, there are inherent uncertainties in any fair value measurement technique, and changes in the underlying assumptions used, including market-derived estimated capitalization rates, discount rates, liquidity risks, and estimates of future cash flows could significantly affect the fair value measurement amounts. All valuations of real estate involve subjective judgments.

Ongoing macroeconomic conditions, such as, but not limited to, elevated levels of inflation and interest rates, banks' ability and willingness to lend, recent adverse developments affecting regional banks and other financial institutions and the ongoing military conflicts around the world, continue to fuel recessionary fears and create volatility in our business results and operations. Any prolonged downturn in the financial markets or a recession, either globally or locally in the United States or in other countries in which we conduct business, could impact the fair value of investments held by the Company. As a result of the rapid development, fluidity and uncertainty surrounding these situations, the Company expects that information with respect to fair value measurement may change, potentially significantly, going forward and may not be indicative of the actual impact on our business, operations, cash flows and financial condition for the year ended December 31, 2024 and future periods.

In determining estimated fair market values, the Company utilizes two approaches to value real estate, a discounted cash flow analysis and direct capitalization approach.

Discounted cash flow models estimate future cash flows from a buyer's perspective (including terminal values) and compute a present value using a market discount rate. The holding period in the analysis is typically ten years. This is consistent with how market participants often estimate values in connection with buying real estate but these holding periods can be shorter depending on the life of the structure an investment is held within. The cash flows include a projection of the net sales proceeds at the end of the holding period, computed using a market reversionary capitalization rate. For our investment in VHH the Company fair values its general partner ("GP") interests net cashflows utilizing a levered discount rate.

Under the direct capitalization approach, the Company applies a market derived estimated capitalization rate to current and future income streams with appropriate adjustments for tenant vacancies or rent-free periods. These estimated capitalization rates and future income streams are derived from comparable property and leasing transactions and are considered to be key inputs in the valuation.

Other factors that the Company takes into account under both approaches may include transaction structuring efficiencies, tenancy details, planning, building and environmental factors that might affect the property.

The Company also utilizes valuations from independent real estate appraisal firms on some of its investments ("appraised valuations"), with certain investment structures requiring appraised valuations periodically (typically annually). All appraised valuations are reviewed and approved by the Company.

The Company has an investment in a Zonda, a technology based real estate business that offers residential construction data that is accounted for at fair value which is valued at the Company's share of the business using a multiple on trailing twelve months EBITDA.

The table below describes the range of inputs used as of December 31, 2024 for real estate assets:

		Estimated Rates Used For	
		Capitalization Rates	**Discount Rates**
Multifamily—Affordable	Income approach—discounted cash flow	6.30% — 7.20%	8.30% — 9.20%
Multifamily—Affordable GP interest	Income approach—discounted cash flow	N/A	16.00% — 19.50%
Multifamily—Market Rate	Income approach—direct capitalization	4.60% — 6.50%	N/A
Office	Income approach—discounted cash flow	5.20% — 7.50%	7.30% — 9.30%
	Income approach—direct capitalization	5.30% — 10.30%	N/A

	Income approach—direct capitalization	4.00% — 8.90%	N/A
Hotel	Income approach—discounted cash flow	6.00%	8.30%

In valuing indebtedness, Kennedy Wilson considers significant inputs to be the term of the debt, value of collateral, market loan-to-value ratios, market interest rates and spreads, and credit quality of investment entities. The credit spreads used by Kennedy Wilson to value floating rate indebtedness range from 2.00% to 3.60%, while the market rates used to value fixed rate indebtedness range from 4.10% to 9.30%.

There is no active secondary market for the Company's development projects and no readily available market value given the uncertainty of the amount and timing of future cash flows. Accordingly, determination of fair value of its development projects requires judgment and extensive use of estimates. Therefore, the Company typically uses investment cost as the estimated fair value until future cash flows become more predictable. Additionally, the fair value of its development projects may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that the Company may ultimately realize. If the Company were required to liquidate an investment in a forced or liquidation sale, it could realize significantly less than the value at which the Company has recorded it. In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the unrealized gains or losses reflected in the currently assigned valuations.

Currency Derivative Contracts

Kennedy Wilson uses foreign currency derivative contracts such as forward contracts and options to manage its foreign currency risk exposure against a portion of certain non-U.S. dollar denominated currency net investments. Foreign currency options are valued using a variant of the Black-Scholes model tailored for currency derivatives and the foreign currency forward contracts are valued based on

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

the difference between the contract rate and the forward rate at maturity of the underlying currency applied to the notional value in the underlying currency discounted at a market rate for similar risks. Although the Company has determined that the majority of the inputs used to value its currency derivative contracts fall within Level 2 of the fair value hierarchy, the counterparty risk adjustments associated with the currency derivative contracts utilize Level 3 inputs. However, as of December 31, 2024 and 2023, Kennedy Wilson assessed the significance of the impact of the counterparty valuation adjustments on the overall valuation of its derivative positions and determined that the counterparty valuation adjustments are not significant to the overall valuation of its derivative. As a result, the Company has determined that our derivative valuation in its entirety be classified in Level 2 of the fair value hierarchy.

Changes in fair value are recorded in other comprehensive income (loss) in the accompanying consolidated statements of comprehensive income as the portion of the currency forward and option contracts used to hedge currency exposure of its certain consolidated subsidiaries qualifies as a net investment hedge under ASC Topic 815, *Derivatives and Hedging*. Changes in fair value on hedges associated with investments that are held at fair value are recorded through principal co-investments within income from unconsolidated investments. The Company has elected to amortize the spot to forward difference ("forward points") to interest expense over the contractual life of the hedges. On hedges associated with fair value investments the forward point amortization to interest expense is recorded as a component of principal co-investments.

The fair value of the currency derivative contracts held as of December 31, 2024 and 2023 are reported in other assets for hedge assets and included in accrued expenses and other liabilities for hedge liabilities on the accompanying balance sheet. See Note 15 for a complete discussion on other comprehensive income including currency forward and option contracts and foreign currency translations.

The table below details the currency forward contracts and currency option contracts Kennedy Wilson had as of December 31, 2024:

(Dollars in millions)			December 31, 2024			Year Ended December 31, 2024		
Currency Hedged	Underlying Currency	Notional	Hedge Asset	Hedge Liability	Change in Unrealized Gains (Losses)	Recognized Gains	Interest Expense	Cash Received (Paid)
Outstanding								
EUR	USD	€ 155.0	$ —	$ 4.4	$ 0.4	$ 8.7	$ 1.4	$ —
EUR[1]	GBP	€ 40.0	—	0.6	(0.2)	—	—	—
EUR[1][2]	GBP	€ 300.0	—	—	24.4	—	—	—
GBP	USD	£ 375.0	4.9	1.1	3.7	0.6	0.5	—
Total Outstanding			4.9	6.1	28.3	9.3	1.9	—
Settled								
EUR	USD		—	—	—	2.7	2.1	4.0
GBP	USD		—	—	2.5	0.7	1.0	(2.4)
Total Settled			—	—	2.5	3.4	3.1	1.6
Total			$ 4.9	$ 6.1	$ 30.8[3]	$ 12.7	$ 5.0	$ 1.6

[1] Hedge is held by KWE on its wholly-owned subsidiaries.
[2] Relates to KWE's Euro Medium Term Note. See discussion in Note 10.
[3] Excludes deferred tax expense of $1.4 million.

The gains and losses recognized through other comprehensive income (loss) will remain in accumulated other comprehensive income (loss) until the underlying investments they were hedging are substantially liquidated by Kennedy Wilson. During the year ended December 31, 2024, the Company reclassified a loss of $8.8 million from other comprehensive loss to gain on sale of real estate relating to the sale of the Shelbourne hotel and $2.1 million gain on an interest rate swap due to the repayment of the underlying mortgage.

The currency derivative contracts discussed above are offset by foreign currency translation of the Company's foreign net assets. For the year ended December 31, 2024, Kennedy Wilson had a gross foreign currency translation losses on its net assets of $37.1 million. As of December 31, 2024, the Company has hedged 95% of the net asset carrying value of its euro denominated investments and 83% of the net asset carrying value of its GBP denominated investments. See Note 15 for a complete discussion on other comprehensive income including currency derivative contracts and foreign currency translations.

Interest Rate Derivatives

The Company has interest rate swaps and caps to hedge its exposure to rising interest rates. Changes in the value of interest rate swaps and caps that are undesignated are recorded to other income and had fair value gains of $10.0 million and $5.9 million for the years ended December 31, 2024 and 2023, respectively. Some of the Company's unconsolidated investments have interest rate caps, which resulted in a gain of $0.4 million and a loss of $5.2 million recorded in principal co-investments for the years ended December 31, 2024 and 2023, respectively.

The carrying amounts of cash and cash equivalents, accounts receivable including related party receivables, accounts payable, accrued expenses and other liabilities approximate fair value due to their short-term maturities. The carrying value of loans (excluding related party loans as they are presumed not to be an arm's length transaction) approximates fair value as the terms are similar to loans with similar characteristics available in the market.

Debt liabilities are accounted for at face value plus net unamortized debt premiums. Debt assumed in an asset acquisition, or business combination, is recorded at fair value on the date of acquisition. The aggregate fair value as of December 31, 2024 and 2023 for mortgages, KW unsecured debt, and KWE unsecured bonds were estimated to be approximately $4.5 billion and $5.0 billion, respectively, based on a comparison of the yield that would be required in a current transaction, taking into consideration the risk of the underlying collateral and the Company's credit risk to the current yield of a similar security, compared to their aggregate carrying value of $4.8 billion and $5.6 billion as of December 31, 2024 and 2023, respectively. The inputs used to value mortgages, KW unsecured debt, and KWE unsecured bonds are based on observable inputs for similar assets and quoted prices in markets that are not active and are therefore determined to be level 2 inputs.

NOTE 6—LOANS

The global debt platform consists of two groups: the Company's construction lending portfolio, which was established with the acquisition of the Construction Loan Portfolio from Pacific Western Bank in the second quarter of 2023 (as detailed below) and the Company's bridge loan portfolio.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

During the year ended December 31, 2023, the Company and affiliates of Fairfax Financial Holdings Limited (collectively, "Fairfax"), its equity partner, acquired a $4.1 billion construction loan portfolio from Pacific Western Bank (the "Construction Loan Portfolio"). The Company's investment in the Construction Loan Portfolio was 5% of the purchase price and the future funding obligations. The $4.1 billion represented the gross commitment amount for the Construction Loan Portfolio, which has been reduced to $3.7 billion as of December 31, 2023, due to loan repayments. The Construction Loan Portfolio has a current outstanding balance of $2.4 billion (Kennedy Wilson share of $118.9 million), not including the 4.5% discount on gross commitment amounts from the time of purchase. As of December 31, 2024, the Company had unfulfilled capital commitments totaling $123.4 million to our loan portfolio.

The Company had loan purchases and originations of $231.1 million and $247.2 million at December 31, 2024 and December 31, 2023, respectively. During the year ended December 31, 2024 and December 31, 2023, the Company had loan income of $31.2 million and $26.1 million, respectively. During the year ended December 31, 2024 and 2023, the Company recorded a $11.2 million and $7.0 million of credit loss reserve through other (loss) income. See Note 2 for more detail on CECL reserves.

NOTE 7—OTHER ASSETS

Other assets consist of the following:

	December 31,	
(Dollars in millions)	2024	2023
Straight line rent receivable	$ 40.5	$ 45.8
Interest rate caps and swaps	12.9	29.0
Goodwill	23.9	23.9
Hedge assets	4.9	13.3
Prepaid expenses	14.0	13.1
Deferred taxes, net	7.0	10.0
Leasing commissions, net of accumulated amortization of $13.5 and $13.4 at December 31, 2024 and 2023, respectively	7.9	9.0
Right of use asset, net	10.1	8.9
Furniture and equipment net of accumulated depreciation of $21.7 and $30.8 at December 31, 2024 and 2023, respectively	5.3	7.0
Above-market leases, net of accumulated amortization of $38.5 and $42.4 at December 31, 2024 and 2023, respectively	1.4	2.5
Other	13.1	25.0
Other Assets	**$ 141.0**	**$ 187.5**

Depreciation and amortization expense related to the above depreciable assets were $6.9 million, $8.8 million, and $10.2 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Right of use asset, net

The Company, as a lessee, has three office leases and two ground leases, which qualify as operating leases, with remaining lease terms of two to 235 years. The payments associated with office space leases have been discounted using the Company's incremental borrowing rate which is based on collateralized interest rates in the market and risk profile of the associated lease. For ground leases the rate implicit in the lease was used to determine the right of use asset.

The following table summarizes the fixed, future minimum rental payments, excluding variable costs, which are discounted to calculate the right of use asset and related lease liability for its operating leases in which we are the lessee:

(Dollars in millions)	Minimum Rental Payments
2025	$ 1.0
2026	1.3
2027	1.3
2028	1.3
2029	1.3
Thereafter	29.1
Total undiscounted rental payments	35.3
Less imputed interest	(26.7)
Right of use asset	**$ 8.6**

Rental expense was $1.1 million, $0.7 million, and $0.6 million for the years ended December 31, 2024, 2023 and 2022, respectively, and is included in general and administrative expense on the accompanying consolidated statements of operations.

NOTE 8—MORTGAGE DEBT

The following table details mortgage debt secured by Kennedy Wilson's consolidated properties as of December 31, 2024 and 2023:

(Dollars in millions)		*Carrying amount of mortgage debt as of December 31,*[1]	
Mortgage Debt by Product Type	Region	2024	2023
Multifamily[1]	Western U.S.	$ 1,664.9	$ 1,711.0
Commercial[1]	United Kingdom	434.3	509.9
Commercial	Western U.S.	209.4	258.2
Commercial[1]	Ireland	303.1	337.8
Commercial	Spain	—	37.7
Mortgage debt (excluding loan fees)[1]		2,611.7	2,854.6
Unamortized loan fees		(14.5)	(13.7)
Total Mortgage Debt		**$ 2,597.2**	**$ 2,840.9**

[1] The mortgage debt payable balances include unamortized debt discount. Debt discount represent the difference between the fair value of debt and the principal value of debt assumed in various acquisitions and are amortized into interest expense over the remaining term of the related debt in a manner that approximates the effective interest method. The net unamortized loan discount as of December 31, 2024 and 2023 was $1.4 million and $1.0 million, respectively.

The mortgage debt had a weighted average interest rate of 4.84% and 5.10% per annum as of December 31, 2024 and 2023, respectively. As of December 31, 2024, 70% of Kennedy Wilson's property level debt was fixed rate, 27% was floating rate with interest caps and 2% was floating rate without interest caps, compared to 65% fixed rate, 35% floating rate with interest caps and 0% floating rate without interest caps, as of December 31, 2023.

Mortgage Debt Transactions and Maturities

During the year ended December 31, 2024, six existing mortgages were refinanced and one loan was deconsolidated.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

The aggregate maturities of mortgage loans including amortization and effects of any extension options as of December 31, 2024 are as follows:

(Dollars in millions)	Aggregate Maturities
2025[1]	$ 141.3
2026	515.0
2027	341.3
2028	332.9
2029	304.5
Thereafter	978.1
	2,613.1
Unamortized debt discount	(1.4)
Unamortized loan fees	(14.5)
Total Mortgage Debt	**$ 2,597.2**

[1] The Company expects to repay the amounts maturing in the next twelve months with new mortgage loans, cash generated from operations, existing cash balances, proceeds from dispositions of real estate investments, or as necessary, with borrowings on the Company's Third A&R Facility.

As of December 31, 2024, the Company was in compliance with all property-level mortgages and was current on all payments (principal and interest) with respect to the same.

NOTE 9—KW UNSECURED DEBT

The following table details KW unsecured debt as of December 31, 2024 and 2023:

	December 31,	
(Dollars in millions)	2024	2023
Credit Facility	$ 98.3	$ 150.4
Senior Notes[1]	1,802.7	1,803.1
KW Unsecured Debt	1,901.0	1,953.5
Unamortized loan fees	(23.1)	(19.2)
Total KW Unsecured Debt	**$ 1,877.9**	**$ 1,934.3**

[1] The senior notes balances include unamortized debt premiums. Debt premiums represent the difference between the fair value of debt and the principal value of debt assumed in various acquisitions and are amortized into interest expense over the remaining term of the related debt in a manner that approximates the effective interest method. The unamortized debt premium as of December 31, 2024 and December 31, 2023 was $2.7 million and $3.1 million, respectively.

Borrowings Under Credit Facilities

On September 12, 2024, the Kennedy-Wilson, Inc., a wholly-owned subsidiary of the Company (the "Borrower"), the Company and certain of the Company's subsidiaries entered into that certain Third Amended and Restated Credit Agreement (the "Credit Agreement", and the $550 million revolving line of credit thereunder, the "Third A&R Facility") with Bank of America, N.A., as administrative agent, and the lenders and letter of credit issuers party thereto. Loans under the Third A&R Facility bear interest at a rate equal to Daily Secured Overnight Financing Rate ("SOFR") or Term SOFR plus an applicable rate between 1.75% and 2.75%, depending on the consolidated leverage ratio as of the applicable measurement date. The Third A&R Facility has a maturity date of September 12, 2027 and has two six-month extension options.

The Third A&R Facility has certain covenants as set forth in the Credit Agreement that, among other things, limit the Company and certain of its subsidiaries' ability to incur additional indebtedness, pay dividends or make distributions to stockholders, repurchase capital stock or debt, make investments,

sell assets or subsidiary stock, create or permit liens, engage in transactions with affiliates, enter into sale/leaseback transactions, issue subsidiary equity and enter into consolidations or mergers. The Credit Agreement require the Company to maintain (i) a maximum consolidated leverage ratio (as defined in the Credit Agreement) of not greater than 65%, measured as of the last day of each fiscal quarter, (ii) a minimum fixed charge coverage ratio (as defined in the Credit Agreement) of not less than 1.60 to 1.00, measured as of the last day of each fiscal quarter for the period of four full fiscal quarters then ended, (iii) a minimum consolidated tangible net worth equal to or greater than the sum of $1,844,222,000 plus an amount equal to fifty percent (50%) of net equity proceeds received by the Company after the date of the most recent financial statements that are available as of September 12, 2024, measured as of the last day of each fiscal quarter, (iv) a maximum recourse leverage ratio (as defined in the Credit Agreement) of not greater than an amount equal to consolidated tangible net worth as of the measurement date multiplied by 1.5, measured as of the last day of each fiscal quarter, (v) a maximum secured recourse leverage ratio (as defined in the Credit Agreement) of not greater than an amount equal to 3.5% of consolidated total asset value (as defined in the Credit Agreement) and $313,054,000, (vi) a maximum adjusted secured leverage ratio (as defined in the Credit Agreement) of not greater than 55%, measured as of the last day of each fiscal quarter, and (vii) liquidity (as defined in the Credit Agreement) of at least $75.0 million.

As of December 31, 2024, the Company was in compliance with all financial covenant calculations. The obligations of the Borrower pursuant to the Credit Agreement are guaranteed by the Company and certain wholly-owned subsidiaries of the Company.

As of December 31, 2024, the Company had $98.3 million outstanding on the Third A&R Facility with $451.7 million available to be drawn.

The average outstanding borrowings under credit facilities was $186.8 million during the year ended December 31, 2024.

Senior Notes

On February 11, 2021, Kennedy-Wilson, Inc., as issuer, issued $500.0 million aggregate principal amount of 4.750% senior notes due 2029 (the "2029 notes") and $500.0 million aggregate principal amount of 5.000% senior notes due 2031 (the "2031 notes" and, together with the 2029 notes, the "initial notes"). On March 15, 2021, Kennedy-Wilson, Inc. issued an additional $100 million aggregate principal of the 2029 notes and an additional $100 million of the 2031 notes. These additional notes were issued as "additional notes" under the indentures pursuant to which Kennedy Wilson previously issued 2029 notes and the 2031 notes. On August 23, 2021, Kennedy-Wilson, Inc. issued $600.0 million aggregate principal amount of 4.750% senior notes due 2030 (the "2030 notes" and, together with the 2029 notes and the 2031 notes, the "notes"). The notes are senior, unsecured obligations of Kennedy Wilson and are guaranteed by Kennedy-Wilson Holdings, Inc. and certain subsidiaries of Kennedy Wilson.

The notes accrue interest at a rate of 4.750% (in the case of the 2029 notes), 4.750% (in the case of the 2030 notes) and 5.000% (in the case of the 2031 notes) per annum, payable semi-annually in arrears on March 1 and September 1 of each year, beginning on September 1, 2021 for the 2029 notes and 2031 notes and March 1, 2022 for the 2030 notes. The notes will mature on March 1, 2029 (in the case of the 2029 notes), February 1, 2030 (in case of 2030 notes) and March 1, 2031 (in the case of the 2031 notes), in each case unless earlier repurchased or redeemed. At any time prior to March 1, 2024 (in the

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

case of the 2029 notes), September 1, 2024 (in the case of the 2030 notes) or March 1, 2026 (in the case of the 2031 notes), Kennedy Wilson had the right to (with respect to the 2029 Notes and 2030 Notes) and may redeem the 2031 Notes, in whole or in part, at a redemption price equal to 100% of their principal amount, plus an applicable "make-whole" premium and accrued and unpaid interest, if any, to the redemption date. At any time and from time to time on or after March 1, 2024 (in the case of the 2029 notes), September 1, 2024 (in the case of the 2030 notes) or March 1, 2026 (in the case of the 2031 notes), Kennedy Wilson may redeem the notes of the applicable series, in whole or in part, at specified redemption prices set forth in the indenture governing the notes of the applicable series, plus accrued and unpaid interest, if any, to the redemption date. In addition, prior to March 1, 2024 (for 2029 notes and 2031 notes) and September 1, 2024 (for 2030 notes), Kennedy Wilson may redeem up to 40% of the notes of either series from the proceeds of certain equity offerings. No sinking fund will be provided for the notes. Upon the occurrence of certain change of control or termination of trading events, holders of the notes may require Kennedy Wilson to repurchase their notes for cash equal to 101% of the principal amount of the notes to be repurchased, plus accrued and unpaid interest, if any, to, but excluding, the applicable repurchase date.

The indentures governing the notes contain various restrictive covenants, including, among others, limitations on the Company's ability and the ability of certain of the Company's subsidiaries to incur or guarantee additional indebtedness, make restricted payments, pay dividends or make any other distributions from restricted subsidiaries, redeem or repurchase capital stock, sell assets or subsidiary stocks, engage in transactions with affiliates, create or permit liens, enter into sale/leaseback transactions, and enter into consolidations or mergers. The indentures governing the notes limit the ability of Kennedy Wilson and its restricted subsidiaries to incur additional indebtedness if, on the date of such incurrence and after giving effect to the new indebtedness, the maximum balance sheet leverage ratio (as defined in the indenture) is greater than 1.50 to 1.00, subject to certain exceptions. As of December 31, 2024, the maximum balance sheet leverage ratio was 1.28 to 1.00. See Note 18 for the guarantor and non-guarantor financial statements.

As of December 31, 2024, the Company was in compliance with all financial covenants.

NOTE 10—KWE UNSECURED BONDS

The following table details the KWE unsecured bonds as of December 31, 2024 and 2023:

	December 31,	
(Dollars in millions)	2024	2023
KWE Euro Medium Term Note Programme[1]	$ 310.0	$ 523.3
Unamortized loan fees	(0.2)	(0.5)
Total KWE Unsecured Bonds	**$ 309.8**	**$ 522.8**

[1] The KWE unsecured bonds balances include unamortized debt discounts. Debt discounts represent the difference between the fair value of debt at issuance and the principal value of debt and are amortized into interest expense over the remaining term of the related debt in a manner that approximates the effective interest method. The net unamortized loan discount as of December 31, 2024 and 2023 was $0.5 million and $1.0 million, respectively.

KWE issued senior unsecured notes for an aggregate principal amount of (€550 million) (the "KWE Notes"). The KWE Notes were issued at a discount with an annual fixed coupon of 3.25%, and mature in November 2025. KWE invested proceeds from the KWE Notes to fund equity investments in euro denominated assets and has designated the KWE Notes as a net investment hedge under ASC Topic 815. Subsequent fluctuations in foreign currency rates that impact the carrying value of the KWE Notes are recorded to accumulated other comprehensive income. During the year ended December 31, 2024, Kennedy Wilson recognized a gain of $24.4 million in accumulated other comprehensive income due to the weakening of the euro against the GBP during the period. On December 18, 2024, KWE completed a redemption of €175 million in aggregate nominal amount of its KWE Notes at a price of 100.4% of the principal amount redeemed plus accrued interest. During the year ended December 31, 2022, KWE launched a cash tender offer for up to €150.0 million in aggregate nominal amount of the KWE Notes and accepted all of the €75.0 million (approximately $80.3 million, based on December 31, 2022 rates) in aggregate nominal amount of KWE Notes validly tendered pursuant to the tender offer for a purchase price equal to 82% of the nominal amount of the KWE Notes, which resulted in a gain on extinguishment of debt of $13.9 million. The Company intends to repay the KWE Notes through a combination of cash on hand, proceeds from asset sales and its unsecured credit facility.

The trust deed that governs the bonds contain various restrictive covenants for KWE, including, among others, limitations on KWE's and its material subsidiaries' ability to provide certain negative pledges. The trust deed limits the ability of KWE and its subsidiaries to incur additional indebtedness if, on the date of such incurrence and after giving effect to the incurrence of the new indebtedness, (1) KWE's consolidated net indebtedness (as defined in the trust deed) would exceed 60% of KWE's total assets (as calculated pursuant to the terms of the trust deed); and (2) KWE's consolidated secured indebtedness (as defined in the trust deed) would exceed 50% of KWE's total assets (as calculated pursuant to the terms of the trust deed). The trust deed also requires KWE, as of each reporting date, to maintain an interest coverage ratio (as defined in the trust deed) of at least 1.50 to 1.00 and have unencumbered assets of no less than 125% of its unsecured indebtedness (as defined in the trust deed).

As of December 31, 2024, KWE was in compliance with these financial covenants.

NOTE 11—RELATED PARTY TRANSACTIONS

Related party revenue is fees and other income received from investments in which the Company has an ownership interest, excluding amounts eliminated in consolidation discussed below. Kennedy Wilson earned related party fees of $49.3 million, $61.9 million and $45.2 million for the periods ended December 31, 2024, 2023 and 2022, respectively.

The Company provides investment and property management and other property related services on properties in which it also has an ownership interest. Fees earned on consolidated properties are eliminated in consolidation and fees on unconsolidated investments are eliminated for the portion that relate to the Company's ownership interest. During the years ended December 31, 2024, 2023 and 2022 fees of $0.9 million, $0.3 million and $0.4 million, respectively, were eliminated in consolidation.

NOTE 12—INCOME TAXES

The table below represents a geographical breakdown of book (loss) income before the provision for (benefit from) income taxes:

	Year ended December 31,		
(Dollars in millions)	2024	2023	2022
Domestic	$ (40.3)	$ (238.8)	$ 88.5
Foreign	16.8	(97.9)	49.6
Total	**$ (23.5)**	**$ (336.7)**	**$ 138.1**

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

The U.S. and foreign components of provision for income taxes consisted of the following components. However, it is not reflective of the cash tax results of the Company.

(Dollars in millions)	Year ended December 31, 2024	2023	2022
Federal			
Current	$ —	$ —	$ —
Deferred	(11.8)	(66.0)	3.6
	(11.8)	(66.0)	3.6
State			
Current	5.6	0.7	0.3
Deferred	(1.1)	0.8	11.3
	4.5	1.5	11.6
Foreign

Capitalized interest	—	0.1
Total deferred tax liabilities	294.2	307.9
Deferred tax liability, net	**$ (217.7)**	**$ (224.2)**

During the year ended December 31, 2019, the United Kingdom enacted a Finance Act, which introduced a new capital gain tax for non-UK resident investors who dispose of UK real estate. The new capital gain tax law became effective on April 6, 2019. Beginning on this date, non-UK resident investors are subject to UK tax on gains arising from the direct and indirect dispositions of UK real estate held for investment purposes. Transitional provisions allowed for rebasing of UK real estate values to fair market value as of April 5, 2019 ("UK Basis Step-Up"). Accordingly, only gains arising from property value increases after April 5, 2019 are subject to tax. The step-up led to a higher tax basis relative to the carrying value of the UK real estate, thus resulting in a UK deferred tax asset of $107.0 million. The realizability of this deferred tax asset is dependent on future disposition of real estate at a fair market value in excess of appraised value as of April 5, 2019. Given uncertainties surrounding Brexit and its potential impact on future real estate values, the Company concluded that the U.K. deferred tax asset did not meet the more likely than not threshold of being realizable. Therefore, a full valuation allowance was recorded against the UK deferred tax asset. As the economic environment in the UK real estate market is still uncertain and highly depended on numerous general economic factors, including but not limited to rising interest rates, foreign currency fluctuations, inflation, etc, the Company has maintained a full valuation allowance against its UK Basis Step-Up deferred tax asset. During fiscal year 2024, the valuation allowance on the UK Basis Step-Up increased to $167.0 million, primarily due to current year depreciation expense.

During March 2018, Kennedy Wilson elected to treat KWE as a partnership for U.S. tax purposes retroactive to December 29, 2017. Due to unrealized foreign exchange losses not yet deductible for tax purposes and the consideration paid to acquire the non-controlling interests in KWE exceeding the book carrying value of the non-controlling interests in KWE, the Company's tax basis in KWE exceeded its book carrying value at December 29, 2017, and every period thereafter. Prior to the election to treat KWE as a partnership, KWE was taxed as a controlled foreign corporation. As a controlled foreign corporation, the Company was precluded from recognizing a deferred tax asset for its tax basis in excess of book carrying value for its investment in KWE as the excess tax basis from the investment was not expected to reverse in the foreseeable future. However, as a result of the conversion of KWE to a partnership for U.S. tax purposes, the Company was required to record a deferred tax asset for its investment in KWE. As of December 31, 2018, the Company recorded a $98.3 million deferred tax asset related to its excess tax basis over book carrying value for its investment in KWE. As a significant portion of the excess tax basis would only reverse upon a strengthening of foreign currencies or upon a disposition of KWE, the Company determined that a valuation allowance of $98.3 million was required for the tax basis that was in excess of the Company's carrying value for its investment in KWE as it did not meet the more likely than not recognition threshold. During the years ended December 31, 2023, the Company's excess tax basis over book basis in KWE decreased due to unrealized foreign currency gains that has no tax basis. During the year ended December 31, 2024, the Company's excess tax basis over book basis in KWE increased, primarily due to higher tax gains on sales of real estate. As of December 31, 2024, Kennedy Wilson's excess tax basis in KWE and the related valuation allowance were $89.1 million and $76.6 million, respectively.

As of December 31, 2024, Kennedy Wilson had California and other state net operating losses of $99.6 million and $10.1 million, respectively. California net operating losses begin to expire in 2034. As of December 31, 2024, Kennedy Wilson had $156.5 million of foreign net operating loss carryforwards, which have no expiration date. The Company has foreign tax credit carryforwards of $87.6 million, of which $6.3 million begin to expire in 2027.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

The Company's valuation allowance on deferred tax assets decreased by $5.8 million in 2024 and increased by $17.4 million in 2023. The decrease in the valuation allowance during 2024 primarily relates to a partial release of the valuation allowance against the deferred tax asset associated with our excess tax basis in KWE investment relating to assets intended for sale in the foreseeable future. The increase in the 2023 valuation allowance principally relates to additional valuation allowance recorded on the Company's UK Basis Step-Up deferred tax asset as a result of depreciation.

In June 2021, the Company received a notification of a general tax inquiry being conducted by the Spanish tax authorities for several of its Spanish entities for tax years 2016 and 2017. As a result of the Spanish tax inquiry, management has reassessed the Company's prior Spanish tax filing positions and the need to accrue additional taxes. Based on this reassessment, the Company believes that no additional Spanish tax accruals are required.

Kennedy Wilson's federal and state income tax returns remain open to examination for the years 2021 through 2023 and 2020 through 2023, respectively. However, due to the existence of prior year loss carryovers, the IRS may examine any tax years for which the carryovers are used to offset future taxable income. Our foreign subsidiaries' tax returns remain open to examination for the years 2020 through 2023. The Spanish loss carryovers may be subject to tax examination for a period of 10 years from the period in which such losses were generated.

NOTE 13—COMMITMENTS AND CONTINGENCIES

CAPITAL COMMITMENTS—As of December 31, 2024 and 2023, the Company has unfunded capital commitments of $284.7 million and $187.7 million to its joint ventures under the respective operating agreements. It also has commitments of $123.4 million and $87.7 million as of December 31, 2024 and 2023 to its global loan platform. The Company may be called upon to contribute additional capital to joint ventures in satisfaction of the Company's capital commitment obligations.

LITIGATION—Kennedy Wilson is currently a defendant in certain routine litigation arising in the ordinary course of business. It is the opinion of management and legal counsel that the outcome of these actions will not have a material effect on the financial statements taken as a whole.

NOTE 14—STOCK COMPENSATION AND OTHER RELATED PLANS

The Company maintains a shareholder-approved equity participation plan (the "Second Amended and Restated Plan") under which shares of common stock are reserved for issuance pursuant to grants of restricted stock and other awards to officers, employees, non-employee directors and consultants. The Second Amended and Restated Plan also allows for share recycling on net settled restricted stock awards, restricted stock unit awards, performance unit awards and performance share awards. Certain senior employees of the Company ("Senior Employees") participate in the Second Amended and Restated Plan. During the years ended December 31, 2024, 2023 and 2022, the compensation committee of the board of directors approved the total grant of 4.8 million shares of performance-based restricted stock units, 3.4 million shares of performance-based restricted stock units and 2.8 million shares of performance-based restricted stock units of Company common stock, respectively, subject to vesting based on the Company's total shareholder return (the "TSR restricted awards"), performance-based restricted shares of Company common stock or performance-based restricted stock units covering Company common stock subject to vesting based on the Company's return on equity (the "ROE awards") (for the years ended December 31, 2023 and 2022), performance-based restricted stock units of Company common stock subject to vesting based on the Company's return on invested assets (the "ROIA awards") (for the year ended December 31, 2024) and time-based restricted shares of Company common stock or time-based restricted stock units covering Company common stock (the "time-based awards") (collectively, the "awards"), under the Second Amended and Restated Plan. Up to 100% of the TSR awards will be eligible to vest based on the Company's total shareholder return relative to the MSCI World Real Estate GICS Level 1 Index (or replacement thereof) during a three-year performance period (subject to continued employment through the vesting date), with the actual number of shares subject to such TSR awards that vest and cease to be subject to restrictions with respect to the performance period determined by multiplying (i) the total number of shares subject to the TSR award by (ii) the applicable vesting percentage (which is determined based on the level of the Company's relative total shareholder return attained during the performance period). Up to one-third of the ROE awards and/or ROIA awards (as applicable) will be eligible to vest with respect to each Company fiscal year of the performance period (each, a "performance year") to the extent that the Company satisfies the return on equity goals for such performance year (subject to continued employment through the vesting date). One-third of the time-based awards will vest on each of the first three anniversaries of the grant date, subject to continued employment through the vesting date. Stock-based compensation expense is based on the fair values on the date of grant for the ROE and ROIA awards and time-based awards. Certain ROE and ROIA awards and time-based awards were granted with a three-year sale restriction period upon vesting. Due to the lack of marketability of these shares with the three-year sale restriction period upon vesting, a 12.5% discount was applied to the grant price of these shares when computing stock compensation expense. The fair value of the TSR awards are estimated using a Monte Carlo simulation. As of December 31, 2024, there was $27.5 million of unrecognized compensation cost for the Second Amended and Restated Plan related to unvested shares which will vest over the next three years.

Upon vesting, the restricted stock granted to employees discussed directly above is net share-settled to cover the withholding tax. Shares that vested during the years ended December 31, 2024, 2023 and 2022 were net-share settled such that the Company withheld shares with values equivalent to the employees' minimum statutory obligations for the applicable income and other employment taxes, and remitted the cash to the appropriate taxing authorities. The total shares withheld during the years ended December 31, 2024, 2023 and 2022 were 131,116 shares, 781,303 shares, and 834,911 shares respectively, and were valued based on the Company's closing stock price on the respective vesting dates. During the years ended December 31, 2024, 2023 and 2022, total payments for the employees' tax obligations to the taxing authorities were $1.6 million, $13.4 million, and $18.6 million respectively. These figures are reflected as a financing activity on the accompanying consolidated statements of cash flows.

During the years ended December 31, 2024, 2023 and 2022, Kennedy Wilson recognized $23.6 million, $34.5 million, and $29.0 million, respectively, of compensation expense related to the vesting of restricted common stock and is included in compensation and related expense in the accompanying consolidated statements of income.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

The following table sets forth activity under the Amended and Restated Plan, the First Amended and Restated Plan, and the Second Amended and Restated Plan for the Company's fiscal years ending December 31, 2024, 2023 and 2022:

	Shares
Nonvested at December 31, 2022	1,700,558
Granted	961,045
Vested	(781,303)
Forfeited	(267,031)
Nonvested at December 31, 2023	1,613,269
Granted	412,148
Vested	(131,116)
Forfeited	—
Nonvested at December 31, 2024	1,894,301

Non-NEO Deferred Compensation Program and Carried Interests Sharing Program

The Company maintains a deferred compensation program for certain employees of the Company (the "Deferred Compensation Program"). The named executive officers of the Company are not participants of the Deferred Compensation Program. The compensation committee of the Company's board of directors approves an amount annually to be allocated to certain employees of the Company in the United States and in Europe. The amount allocated to each employee vests ratably over a three-year vesting period, subject to continued employment with the Company. Prior to 2022, half of the allocated amount was tied specifically to the performance and value of the Company's common stock at the time of each vesting ("Bonus Units"). Beginning in 2022, the entire amount allocated to each employee consisted of Bonus Units. Under the Deferred Compensation Program, at the time of each vesting, the employees receive an amount equal to either the dividend yield of the Company's common stock or the actual amount of dividends paid on the Company common stock (in the case of Bonus Units) during the immediately preceding year on the amount that is subject to such vesting. During the years ended December 31, 2024, 2023 and 2022 the Company recognized compensation expense of $6.4 million, $8.2 million and $9.2 million, respectively, under the Deferred Compensation Program.

The Company also maintains a carried interests sharing program for certain employees of the Company (the "Carried Interests Sharing Program"). On January 29, 2025, compensation committee of the Company's board of directors recently approved, reserved and authorized increasing the pool available for the Company employees from thirty-five percent to fifty percent (50%) issue of any carried interests earned by certain commingled funds and separate account investments to be allocated to certain employees of the Company (including the Company's executive officers). Sixty percent of the award to each employee vests ratably over four years and the remaining forty percent vests upon the consummation of a liquidity event of the investment whereby the Company actually receives cash carried interests from its partner. The full carried interests earned by the Company will be recorded to income from unconsolidated investments and the amount allocated to employees is recorded as carried interests expense. During the years ended December 31, 2024, 2023 and 2022 the Company recognized reversals of $16.6 million, $15.1 million and $4.3 million, respectively, of carried interests compensation to employees.

NOTE 15—EQUITY

Preferred Stock

On June 16, 2023, the Company announced the issuance of its $200 million perpetual preferred stock to Fairfax. Under the terms of the agreement, Fairfax purchased $200 million in cumulative perpetual preferred stock carrying a 6.00% annual dividend rate and 7-year warrants for approximately 12.3 million common shares with an initial exercise price of $16.21 per share.

On March 8, 2022, the Company announced the issuance of its $300 million cumulative perpetual preferred stock, in addition to approximately 13 million of its warrants to affiliates of Fairfax. Under the terms of the agreements, Fairfax purchased $300 million in cumulative perpetual preferred stock carrying a 4.75% annual dividend rate and approximately 13 million 7-year warrants, which are initially convertible to the same number of common shares with and an initial exercise price of $23.00 per share.

Both perpetual preferred stock issuances are treated as permanent equity.

At-the-Market Equity Offering Program

In May 2022, the Company established an at-the-market equity offering program (the "ATM Program") pursuant to which it may issue and sell shares of the Company's common stock having an aggregate gross sales price of up to $200.0 million in amounts as the Company may determine from time to time. During the year ended December 31, 2023, the Company issued 1,690,743 shares for $29.8 million, net of issuance costs, under its ATM Program. During 2024 and 2022 there were no shares issued through the ATM Program.

The Company has no obligation to sell any of such shares under its ATM Program. Actual sales will depend on a variety of factors to be determined by the Company from time to time, including, among others, market conditions, the trading price of its common stock, the Company's determination of the appropriate sources of funding for the Company, and potential uses of funding available.

Common Stock Repurchase Program

On March 20, 2018, the Company announced that its board of directors authorized a $250.0 million stock repurchase program. Repurchases under the program may be made in the open market, in privately negotiated transactions, through the net settlement of the Company's restricted stock grants or otherwise, with the amount and timing of repurchases dependent on market conditions and subject to the Company's discretion. On November 4, 2020, the Company's board of directors authorized an expansion of its existing $250 million share repurchase plan to $500 million.

During the year ended December 31, 2024, Kennedy Wilson repurchased and retired 1,565,775 shares for $13.3 million. During the year ended December 31, 2023, Kennedy Wilson repurchased and retired 666,701 shares for $7.5 million under the previous stock repurchase program.

Generally, upon vesting, the restricted stock units granted to employees is net share-settled such that the Company will withhold shares with value equivalent to the employees' minimum statutory obligation for the applicable income and other employment taxes, and remit the cash to the appropriate taxing authorities. See Note 14 for more detail.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

Dividend Distributions

Kennedy Wilson declared and paid the following cash dividends on its common stock:

	Year Ended December 31, 2024		Year Ended December 31, 2023	
(Dollars in millions)	Declared	Paid	Declared	Paid
Preferred Stock	$ 43.5	$ 43.5	$ 38.0	$ 35.5
Common Stock[1]	82.6	100.2	133.6	136.0

[1] The difference between declared and paid is the amount accrued on the consolidated balance sheets.

Taxability of Dividends

Earnings and profits, which determine the taxability of distributions to stockholders, may differ from income reported for financial reporting purposes due to the differences for federal income tax purposes in the treatment of revenue recognition, compensation expense, derivative investments and the basis of depreciable assets and estimated useful lives used to compute depreciation.

The Company's dividends related to its common stock will be classified for U.S. federal income tax purposes as follows:

Record Date	Payment Date	Distributions Per Share	Ordinary Dividends	Return of Capital
12/29/2023	1/4/2024	$ 0.2400	$ 0.2400	$ —
3/27/2024	4/4/2024	0.2400	0.2400	—
6/28/2024	7/5/2024	0.1200	0.1200	—
9/30/2024	10/3/2024	0.1200	0.1200	—
	Totals	**$ 0.7200**	**$ 0.7200**	**$ —**

Accumulated Other Comprehensive Income (Loss)

The following table summarizes the changes in each component of accumulated other comprehensive loss ("AOCI"), net of taxes:

(Dollars in millions)	Foreign Currency Translation	Foreign Currency Derivative Contracts	Interest Rate Swaps	Total Accumulated Other Comprehensive Loss[1]
Balance at December 31, 2023	$ (125.7)	$ 76.5	$ 3.2	$ (46.0)
Unrealized (losses) gains, arising during the period	(37.1)	30.9	—	(6.2)
Taxes on unrealized losses (gains), arising during the period	0.6	(1.4)	—	(0.8)
Amounts reclassified out of AOCI during the period, gross	9.5	(0.8)	(2.1)	6.6
Amounts reclassified out of AOCI during the period, taxes	(4.2)	0.6	0.5	(3.1)
Noncontrolling interest	0.3	—	—	0.3
Balance at December 31, 2024	**$ (156.6)**	**$ 105.8**	**$ 1.6**	**$ (49.2)**

[1] Excludes $358.4 million of inception to date accumulated other comprehensive losses associated with noncontrolling interest holders of KWE that the Company was required to record as part of the KWE Transaction in October 2017.

The local currencies for the Company's interests in foreign operations include the euro and the British pound sterling. The related amounts on our balance sheets are translated into U.S. dollars at the exchange rates at the respective financial statement date, while amounts on our statements of income are translated at the average exchange rates during the respective period. Unrealized gains on foreign currency translation is a result of the strengthening of the euro and British pound sterling against the U.S. dollar during the year ended December 31, 2024.

In order to manage currency fluctuations, Kennedy Wilson entered into currency derivative contracts to manage its exposure to currency fluctuations between its functional currency (U.S. dollar) and the functional currency (Euro and GBP) of certain of its wholly-owned and consolidated subsidiaries. See Note 5 for a more detailed discussion of Kennedy Wilson's currency derivative contracts.

NOTE 16—EARNINGS PER SHARE

Basic earnings per share is computed by dividing net income (loss) attributable to Kennedy-Wilson Holdings, Inc. common stockholders by the weighted average number of common shares outstanding. Diluted earnings per share is computed after adjusting the numerator and denominator of the basic earnings per share computation for the effects of all potentially dilutive common shares. The dilutive effect of non-vested stock issued under share-based compensation plans is computed using the treasury stock method. The dilutive effect of the cumulative preferred stock is computed using the if-converted method.

The following is a summary of the elements used in calculating basic and diluted income per share for the years ended December 31, 2024, 2023 and 2022:

(Dollars in millions, except share amounts and per share data)	Year ended December 31, 2024	2023	2022
Net (loss) income attributable to Kennedy-Wilson Holdings, Inc. common shareholders	$ (76.5)	$ (341.8)	$ 64.8
Weighted-average shares outstanding for basic	137,778,812	138,930,517	136,900,875
(Loss) income per share—basic	$ (0.56)	$ (2.46)	$ 0.47
Weighted average shares outstanding for diluted	137,778,812	138,930,517	138,567,534
(Loss) income per share—diluted	$ (0.56)	$ (2.46)	$ 0.47

There was a total of 40,726,571, 42,977,012 and 26,958,511 during the years ended December 31, 2024, 2023 and 2022, respectively, potentially dilutive securities were not included in the diluted weighted average shares as they were anti-dilutive. Potentially anti-dilutive securities include preferred stock and unvested restricted stock grants.

NOTE 17—SEGMENT INFORMATION

Segments

The Company's operations are defined by two business segments: its Consolidated investment portfolio (the "Consolidated Portfolio") and its Co-Investment Portfolio:

- Consolidated Portfolio consists of the investments that the Company has made in real estate and real estate-related assets and consolidates on its balance sheet. The Company typically wholly-owns the assets in its Consolidated Portfolio.
- Co-Investment Portfolio consists of the co-investments that the Company has made in real estate and real estate-related assets, including loans secured by real estate, through the commingled funds and joint ventures that it manages. The Company typically owns a 5% to 50% ownership interest in the assets in its Co-Investment Portfolio. It also includes the fees (including, without limitation, asset management fees, construction management fees, and/or acquisition and disposition fees) that the Company earns on its fee bearing capital as well as the potential for carried interests.

Kennedy-Wilson Holdings, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

In addition to the Company's two primary business segments the Company's has among other things, corporate overhead and unsecured corporate debt and preferred stock that is not allocated to either of its segments.

The chief operating decision makers who have been identified for the purposes of the reportable segments listed above are the Chief Executive Officer, President and Chief Financial Officer collectively the ("CODM"). They are regularly provided operating results of the Company's reportable segments. These operating results include key operating metrics which inform the CODM's decisions regarding allocation of resources and assessment of the Company's overall operational performance. The key operating metric that the CODM utilize to evaluate the segments is earnings before interest, taxes, depreciation and amortization, which is further adjusted to add back non-cash share based compensation ("Adjusted EBITDA"). The Company has included a reconciliation of Adjusted EBITDA to net income attributable to Kennedy-Wilson Holdings, Inc. common shareholders in the tables below.

No single third-party client accounted for 10% or more of the Company's revenue during any period presented in these financial statements.

Consolidated Portfolio

Consolidated Portfolio is a permanent capital vehicle focused on maximizing property cash flow. These assets are primarily wholly-owned and tend to have longer hold periods and the Company targets investments with accretive asset management opportunities. The Company typically focuses on multifamily and office assets in the Western United States and office assets in the United Kingdom and Ireland within this segment.

Co-Investment Portfolio

Co-Investment Portfolio consists of the co-investments in real estate and real estate-related assets, including loans secured by real estate, that the Company has made through the commingled funds and joint ventures that it manages. The Company utilizes different platforms in the Co-Investment Portfolio segment depending on the asset and risk return profiles.

In addition, the Company manages real estate assets and loans for the Company's equity partner. In the Company's capacity as manager it earns fees (including, without limitation, asset management fees, construction management fees, and/or acquisition and disposition fees) and carried interests.

The following tables summarize the income and expense activity by segment for the years ended December 31, 2024, 2023 and 2022 and total assets as of December 31, 2024 and 2023.

	Year Ended December 31, 2024		
(Dollars in millions)	Consolidated	Co-Investments	Total

Notes to Consolidated Financial Statements
December 31, 2024, 2023 and 2022 (continued)

The table below reconciles segment revenue to total revenue for the years ended December 31, 2024, 2023 and 2022:

	Year Ended December 31,		
(Dollars in millions)	2024	2023	2022
Segment revenue	$ 530.0	$ 560.4	$ 538.3
Other revenue	1.4	2.2	1.7
Total consolidated revenue	**$ 531.4**	**$ 562.6**	**$ 540.0**

	December 31,	
(Dollars in millions)	2024	2023
Assets		
Consolidated	$ 4,591.6	$ 5,196.3
Co-investment	2,273.5	2,316.3
Corporate	96.0	199.5
Total assets	**$ 6,961.1**	**$ 7,712.1**

	December 31,		
(Dollars in millions)	2024	2023	2022
Expenditures for long lived assets			
Investments	$ (148.2)	$ (217.2)	$ (569.1)

Geographic Information

The revenue shown in the table below is allocated based upon the region in which services are performed.

	Year Ended December 31,		
(Dollars in millions)	2024	2023	2022
United States	$ 368.0	$ 334.1	$ 317.5
Europe	163.4	228.5	222.5
Total revenue	**$ 531.4**	**$ 562.6**	**$ 540.0**

NOTE 18—GUARANTOR AND NON-GUARANTOR FINANCIAL STATEMENTS

The following consolidating financial information and condensed consolidating financial information includes:

(1) Condensed consolidating balance sheets as of December 31, 2024 and 2023, respectively; consolidating statements of income for the years ended December 31, 2024, 2023 and 2022, respectively; of (a) Kennedy-Wilson Holdings, Inc. on an unconsolidated basis as the parent (and guarantor), (b) Kennedy-Wilson, Inc., as the subsidiary issuer, (c) the guarantor subsidiaries, (d) the non-guarantor subsidiaries and (e) Kennedy-Wilson Holdings, Inc. on a consolidated basis; and

(2) Elimination entries necessary to consolidate Kennedy-Wilson Holdings, Inc., as the parent guarantor, with Kennedy-Wilson, Inc. and its guarantor and non-guarantor subsidiaries

Kennedy Wilson owns 100% of all of the guarantor subsidiaries, and, as a result, in accordance with Rule 3-10(d) of Regulation S-X promulgated by the SEC, no separate financial statements are required for these subsidiaries as of December 31, 2024 or 2023 and for the years ended December 31, 2024, 2023 or 2022.

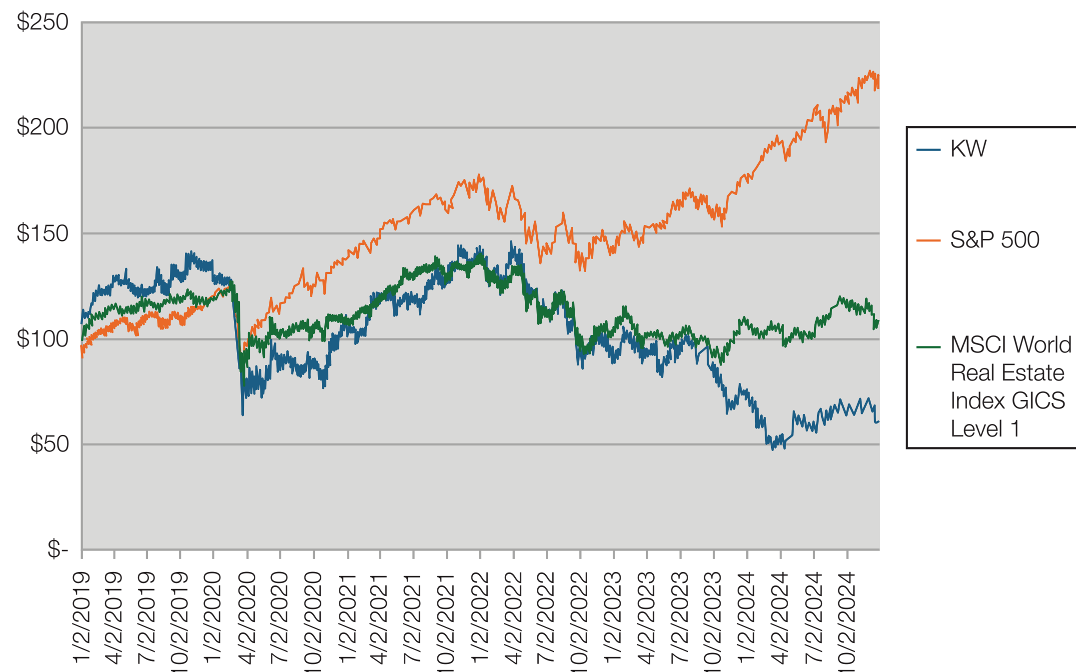
NOTE 19—SUBSEQUENT EVENTS

Subsequent to December 31, 2024, the Company has drawn an additional $95.0 million on its revolving line of credit. The Company has $356.0 million still available to draw on its revolving line of credit.

Performance Graph

The graph below compares the cumulative total return of our common stock from December 31, 2019 through December 31, 2024, with the comparable cumulative return of companies comprising the S&P 500 Index and the MSCI World Real Estate GICS Level 1 Index. The graph plots the growth in value of an initial investment of $100 in each of our common stock, the S&P 500 Index, and the MSCI World Real Estate GICS Level 1 Index for the five-year period ended December 31, 2024, and assumes reinvestment of all dividends, if any, paid on the securities. The stock price performance shown on the graph is not necessarily indicative of future price performance.



Kennedy Wilson uses the MSCI World Real Estate GICS Level 1 Index, which includes international real estate companies as a comparable benchmark. The information under this caption, "Performance Graph," is deemed not to be incorporated by reference into any filings under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, except to the extent that such filing specifically states otherwise.

Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Stock Price Information

Our common stock trades on the NYSE under the symbol "KW."

Holders

As of February 20, 2025, we had approximately 65 holders of record of our common stock.

We declared and paid quarterly dividends of $0.12 for the last three quarters of 2024 and $0.24 per share for the first quarter of 2024 and each quarter of 2023.

Recent Sales of Unregistered Securities

None.

Equity Compensation Plan Information

See Item 12—"Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters."

Purchases of Equity Securities by the Company

Months	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan[1]	Maximum Amount that May Yet be Purchased Under the Plan[1]
October 1–October 31, 2024	—	$ —	26,528,959	$ 109,739,985
November 1–November 30, 2024	—	—	26,528,959	109,739,985
December 1–December 31, 2024	2,105	10.66	26,531,064	109,717,542
Total	**2,105**	**$ —**	**26,531,064**	**$ 109,717,542**

[1] On March 20, 2018, we announced that our board of directors authorized us to repurchase up to $250 million of our common shares, from time to time, subject to market conditions. On November 4, 2020, we announced that our board of directors authorized us to repurchase an additional $250 million of our common shares, from time to time, subject to market conditions.

During the year ended December 31, 2024, the Company repurchased and retired a total of 1.6 million shares of its common stock at a weighted average price of $8.50. During the year ended December 31, 2023, the Company repurchased and retired a total of 0.7 million shares of its common stock at a weighted average price of $11.15.

In addition to the repurchases of the Company's common stock made above, the Company also withheld shares with respect to the vesting of restricted stock that the Company made to its employees. Shares that vested during the year ended December 31, 2024 and 2023 were net-share settled such that the Company withheld shares with value equivalent to the employees' minimum statutory obligation for the applicable income and other employment taxes and remitted the cash to the appropriate taxing authorities. During the year ended December 31, 2024 and 2023, total payments for the employees' tax obligations to the taxing authorities were $1.6 million (131,116 shares withheld) and $13.4 million (781,303 shares withheld), respectively.

Real Estate Assets Under Management (AUM)

AUM generally refers to the properties and other assets with respect to which we provide (or participate in) oversight, investment management services and other advice, and which generally consist of real estate properties or loans, and investments in joint ventures. Our AUM is principally intended to reflect the extent of our presence in the real estate market, not the basis for determining

Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities (continued)

our management fees. Our AUM consists of the total estimated fair value of the real estate properties and other real estate related assets either owned by third parties, wholly-owned by us or held by joint ventures and other entities in which our sponsored funds or investment vehicles and client accounts have invested. Committed (but unfunded) capital from investors in our sponsored funds is not included in our AUM. The estimated value of development properties is included at estimated completion cost.

The table below details the changes in the Company's AUM for the twelve months ended December 31, 2024:

(in millions)	December 31, 2023	Increases	Decreases	December 31, 2024
AUM	$ 24,542.9	$ 6,400.7	$ 2,990.7	$ 27,952.9

AUM increased 14% to approximately $28.0 billion as of December 31, 2024. The increase is due to the inclusion of future loan commitments, asset acquisitions in our comingled funds and loan fundings in our debt platform. These increases were offset by consolidated asset sales and fair value losses in our Co-Investment portfolio.

Please also see "Fair Value Investments" in Item 1. Business for a discussion of our fair value investments and accounting methodology and any limitations with respect to the same.

Foreign currency and currency derivative instruments

Please refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation for a discussion regarding foreign currency and currency derivative instruments.

FORWARD-LOOKING STATEMENTS

Statements made by us in this report and in other reports and statements released by us that are not historical facts constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These forward-looking statements are necessarily estimates reflecting the judgment of our senior management based on our current estimates, expectations, forecasts and projections and include comments that express our current opinions about trends and factors that may impact future results. Disclosures that use words such as "believe," "may," "anticipate," "estimate," "intend," "could," "plan," "expect," "project" or the negative of these, as well as similar expressions, are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance, rely on a number of assumptions concerning future events, many of which are outside of our control, and involve known and unknown risks and uncertainties that could cause our actual results, performance or achievement, or industry results, to differ materially from any future results, performance or achievements, expressed or implied by such forward-looking statements. Although we believe that our plans, intentions, expectations, strategies and prospects as reflected in or suggested by those forward-looking statements are reasonable, we do not guarantee that the transactions and events described will happen as described (or that they will happen at all). In addition, this report contains information and statistics regarding, among other things, the industry, markets, submarkets and sectors in which we operate. We obtained this information and these statistics from various third-party sources and our own internal estimates. We believe that these sources and estimates are reliable but have not independently verified them and cannot guarantee their accuracy or completeness.

Any such forward-looking statements, whether made in this report or elsewhere, should be considered in the context of the various disclosures made by us about our businesses including, without limitation, the risk factors discussed in Part I, Item IA of this Report. Except as required under the federal securities laws and the rules and regulations of the U.S. Securities and Exchange Commission (the "SEC"), we do not have any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events, changes in assumptions, or otherwise. Please refer to "Non-GAAP Measures and Certain Definitions" in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for definitions of certain terms used throughout this report.
