FINANCIAL AND OPERATING HIGHLIGHTS

Revenue (\$ in millions)

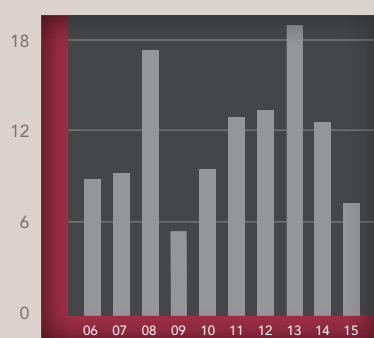

Lower commodity prices, reduced farm income, and fluctuations in foreign exchange rates led to declines in irrigation equipment revenues, while infrastructure experienced significant growth.

Operating Margin (percentage)

Operating margins in fiscal 2015 declined due to cost deleverage on lower sales and the effects of an international bad debt charge.

Return on Net Assets (RONA) (percentage)

Fiscal 2015 return on net assets decreased primarily due to lower operating revenues and associated profits.

TO OUR SHAREHOLDERS

In fiscal 2015 the U.S. irrigation market was negatively impacted by lower commodity prices and farm incomes as we entered the second year of a downturn in the cyclical agriculture industry. Our international irrigation markets were also affected by commodity price reductions as well as increased competition and unfavorable currency exchange rates. Our infrastructure business partially offset these negatives, delivering outstanding results with significant increases in revenue and profitability primarily due to increased road safety product sales, market share gains and Road Zipper® system sales and leases.

The Lindsay Corporation management team has substantial experience operating through the up and down cycles of the industry. As we have done in past downturns, our team has identified and implemented opportunities for greater efficiency, productivity and lower costs and expenses. At the same time, we have continued to strategically manage the business, investing in the Company's future by advancing our competitive position and improving our capabilities as a technology leader and total solutions provider. As we have done throughout our history, Lindsay has remained profitable and maintained a strong balance sheet, delivering value to our shareholders and positioning the company for growth once the cycle turns positive.

Richard W. Parod, President and Chief Executive Officer

FINANCIAL OVERVIEW

FINANCIAL OVERVIEW

For the fiscal year ended August 31, 2015, Company revenues were \$560.2 million, a 9 percent decrease from \$617.9 million in fiscal 2014.

Irrigation equipment revenues of \$451.2 million represented a 16 percent decline from the previous year. U.S. irrigation revenues decreased 17 percent to \$273.7 million. Approximately half of the decline in sales was due to changes in weather patterns as fiscal 2014 had an unusually high level of sales resulting from significant storms which damaged irrigation systems, while weather patterns had a nominal effect on sales in fiscal 2015. International irrigation revenues decreased 15 percent to \$177.5 million. International markets overall remained fairly active with more than half of the year-over-year decline due to changing currency rates and the translation effects of converting foreign sales to U.S. dollars for financial reporting purposes.

Infrastructure revenues reached \$109.0 million, a 40 percent increase over fiscal 2014. Significant increases were due to the completion of the Golden Gate Bridge moveable barrier project and 36 percent growth in sales of road safety products.

For fiscal 2015, Company operating income was \$50.7 million, a 35 percent decrease from \$78.4 million the prior year. Net earnings were \$26.3 million, or \$2.22 per diluted share, compared with \$51.5 million, or \$4.00 per diluted share in the prior year. During fiscal 2015, the Company recorded a \$5.0 million

bad debt reserve on accounts receivable and a \$2.9 million reserve against deferred income tax assets related to our business unit in China. These items, plus the effects of foreign exchange rates, acquisition and integration expenses, and environmental accruals, reduced earnings by \$0.96 per diluted share.

Our balance sheet remains strong. In addition to generating \$48.7 million in cash from operations in the year, we invested \$69.5 million in acquisitions, repurchased shares totaling \$96.9 million, and enhanced our capital structure by adding long-term debt of \$115.0 million at a remarkably low interest rate of 3.82%. At August 31, 2015, cash and cash equivalents were \$139.1 million compared to \$171.8 million at August 31, 2014.

ACQUISITIONS

An integral part of Lindsay's long-term growth strategy is the opportune acquisition of companies synergistic to our core that can enhance our solutions selling and

extend our vertical integration. In fiscal 2015 the Company made two such acquisitions.

Elecsys is an electronics manufacturer specializing in machine-to-machine (M2M) technology interfaces and custom electronic systems that will enhance our capability in automation engineering and advanced technologies for managing water-use efficiency. With a broad product set, Elecsys has also deployed FieldNET®-type remote monitoring and control technologies to customers in new vertical channels such as the energy sector. Additionally, we plan to leverage synergies with our railroad businesses, where there may be opportunities to cross-sell our infrastructure railroad products.

In the fourth quarter we acquired SPF, a water engineering company with specialized expertise in irrigation system engineering, waste water system design, well monitoring, water rights, and other applications that can be particularly beneficial as we pursue larger projects.

In fiscal 2015, Lindsay acquired Elecsys, an electronics manufacturer, and the water engineering company SPF.

Providing the most comprehensive options to remotely control entire irrigation systems – from pivots and laterals to pumps and sensors – FieldNET® by Lindsay is the industry's leading intuitive wireless management system.

IRRIGATION SEGMENT REVIEW

Lindsay Corporation is one of the world's leading providers of irrigation and water management systems. Our products and systems help growers around the world conserve precious water, increase crop production, and reduce costs such as fuel and labor.

OUR PRODUCTS

- Center pivot & lateral move irrigation systems
- Hose reel travelers
- Integrated water-pumping stations
- Irrigation controls
- Chemical injection systems
- Water filtration systems
- Remote monitoring & control systems

International irrigation sales continue to see tremendous potential for long-term growth.

The irrigation segment provided 81 percent of Lindsay's revenue in fiscal 2015 compared to 87 percent the prior year. Irrigation equipment sales in the U.S. accounted for approximately 61 percent of segment revenue, with international sales comprising approximately 39 percent. Operating margin for the total irrigation segment was 11.3 percent compared to 17.0 percent last year, with the decrease primarily due to incremental bad debt expense and cost deleverage on lower sales.

The domestic irrigation equipment market decline has had a large impact on our factory in Lindsay, Nebraska, requiring across-the-board spending reductions and process improvements. Our manufacturing team responded effectively and timely in reducing headcount and adjusting discretionary and fixed spending to mitigate the deleverage effects of lower volume. Because of their efforts, along with the efforts of our sales management team, irrigation equipment gross margins have compressed by only 2 percentage points since the peak of the cycle two years ago. Given the price competition and cost deleverage from lower sales, they've done a superb job in helping to maintain our gross margins and protect profits.

IRRIGATION MARKET CONDITIONS

For the U.S. irrigation market in fiscal 2015, lower agricultural commodity prices and reduced farm income affected farmer sentiment regarding capital goods purchases. The USDA projected 2015 net

farm income to be \$58.3 billion, a decline of 36 percent from the prior year and nearly 53 percent from the record high set in 2013. That would make 2015 net farm income the lowest since 2006. Reflecting farmer sentiment toward capital purchases, the highest proportion of our U.S. irrigation equipment revenue for the year came from replacement sales (39 percent), while 31 percent came from dry land conversion and 29 percent from irrigation method conversion. Pricing became more competitive early in the year but has become more rational as the year progressed.

International irrigation sales were also impacted by lower global commodity prices in fiscal 2015, but we continue to see tremendous potential for long-term growth in the international markets. A sizable portion of our international irrigation equipment sales tend to be driven by large projects, making the revenue stream somewhat lumpy and varying significantly by region. During the year, we began operating our state-of-the-art plant in Turkey that increases manufacturing capacity, enhances vertical integration, and improves response times and service levels to Europe, the Middle East, North Africa, Russia, Ukraine and The Commonwealth of Independent States. While Russia and Ukraine continue to present near-term challenges, including the most recent clash with Turkey, long-term growth potential remains promising. In the Middle East, we continue to see significant demand for large projects.

As previously mentioned, currency valuation reduced our revenue in many international markets, but was most pronounced in Brazil. Excluding the effects of foreign currency, sales declined in the Middle East, Europe, Latin America and China, while sales increased in Brazil, Australia and Africa.

SHORT-TERM AGRICULTURE INDUSTRY CYCLES

The cyclical peaks and troughs in the agriculture market represent the ongoing interplay of supply and demand. We currently believe we are at or near the bottom of the cycle, yet the duration of the cycle is uncertain. With crop prices at lower levels, growers reduce planting of certain crops while consumers of grains – such as livestock feeders and biofuel producers – increase their use. Ultimately crop prices begin to rise again and growers switch production back to higher profit commodities and increase equipment purchases to increase productivity and lower costs. While we are confident the cycle will turn upward at some point, it is difficult to predict when we will see that improvement.

DIFFERENTIATED BY INTEGRATED SOLUTIONS

Rather than simply wait for improved conditions that will increase demand for all irrigation equipment, we leverage market-leading technology into a competitive advantage. Where competitors tend to focus only on pivot-centric mechanized irrigation equipment, Lindsay leads the industry in customer-

IRRIGATION SEGMENT REVIEW

(CONT.)

Lindsay's irrigation products are sold through more than 140 dealers in international markets and over 200 dealers in the U.S.

valued technological solutions that differentiate us from competitors in the marketplace.

Lindsay offers an unmatched breadth of products and technological capabilities that enable us to offer complete irrigation solutions including field layout and hydraulic system design; capabilities to monitor irrigation systems, weather and field conditions; and design and installation of in-field broadband communication infrastructure.

We have found that growers who have used the "Lindsay solution" to increase irrigation efficiency, improve crop productivity, and reduce costs such as fuel and labor become dedicated, loyal customers. The sophistication and integration of our systems are attractive to larger farms, corporate growers, and medium-sized growers alike, with elements used by growers of all sizes. These attributes provide measurable benefits to growers during any stage of industry cycles.

During fiscal 2015 we continued to develop technology-driven products that provide exceptional value and unique benefits to growers while enhancing our competitive position as a market leader. We introduced Pivot Control, a simpler,

lower cost electronic control for irrigation systems of all brands, as well as drip-controller technology that enables the industry-leading FieldNET's wireless irrigation management to operate drip- and micro-irrigation systems along with mechanized irrigation systems. In addition, our acquisition of Elecsys improves our design and manufacturing for M2M solutions in the field, while the acquisition of SPF adds to our engineering capabilities to provide water-efficient solutions in agricultural, industrial and municipal settings.

IRRIGATION SEGMENT OUTLOOK

The extent and duration of the current cyclical downturn is difficult to predict, but for fiscal 2016 we anticipate another year similar to 2015. USDA projections beyond the next 12 months are very preliminary, but show stable farm incomes along with increases in prices for corn and soybeans after 2016.

Globally, we expect continued lower commodity prices, the stronger U.S. dollar and market volatility to result in another challenging year for fiscal 2016. However, we continue to see international agricultural development continuing during this cyclical trough, fueled by large private and institutional investors. As we have seen in previous trough periods, there is a global recognition of the importance of irrigation in stabilizing yields and agricultural production, and in enhancing

of biofuels will all continue to be issues of global importance.

In particular, population growth remains the fundamental driver for the global agricultural market. The United Nations projects that the world's population will grow from 7.3 billion in 2015 to approximately 9.7 billion by 2050. To adequately feed that increased population, the U.N. Food and Agriculture Organization (FAO) projects that food production will have to increase

mechanized irrigation still has very low market penetration, creating excellent long-term opportunities.

Lindsay's irrigation business is engaged in meeting a basic human need. By continuing to expand our capabilities, our efficiency, our global footprint and our capacity in the international markets, we will remain at the forefront of this essential industry.

farmland values. We are uniquely positioned to capitalize on the vast opportunities the international market offers.

We believe the Company's proven management team and competitively advantaged products will continue to provide a reliable source of revenue during the down cycle while positioning the Company for enhanced market leadership as agricultural market conditions improve.

For the long term, the macro drivers of demand for our products will remain positive. Global population growth and the need for food, the conservation and efficient use of water, protection of the environment and the adoption

by 70 percent. With fixed quantities of land and water, the only way this can be accomplished is to achieve higher crop yields and more efficient use of water.

Worldwide, only 20 percent of cultivated land is irrigated, yet irrigated land produces 40 percent of the world's food supply. By far, the world's most common irrigation method is flood or gravity irrigation that consumes twice as much water as an efficient mechanical system. Converting to an efficient pivot irrigation system or retrofitting a high pressure system to low pressure can conserve precious water, boost agricultural production, and reduce energy used in pump systems. Outside of North America,

The production of liquid biofuels like sugar cane are used in high volumes.

INFRASTRUCTURE SEGMENT REVIEW

Lindsay's infrastructure segment is an international group of companies producing a wide range of products that aid in roadway maintenance and transportation safety.

OUR PRODUCTS

- Moveable road barriers
- Barrier transfer machines
- Energy-absorbing crash cushions
- Specialty barriers for work areas/construction zones
- Road marking materials
- Railroad signaling structures

Our Road Safety Tour truck brings training and learning opportunities to customers.

The infrastructure segment provided 19 percent of Lindsay's revenue in fiscal 2015 compared to 13 percent in fiscal 2014. Operating income was \$20.0 million compared to \$3.5 million the prior year, driven by significantly higher sales volume. Operating margins increased to 18.4 percent in fiscal 2015 from 4.5 percent in fiscal 2014 due to sales mix changes including increased sales of road safety products and Road Zipper products and leases.

In fiscal 2015, our infrastructure business achieved impressive results across the board. As revenue and profitability increased substantially, we also lowered our manufacturing costs, managed SG&A expenses and increased the number of states where our road safety products are approved.

A banner accomplishment was the completion of the Road Zipper System on the Golden Gate Bridge. This high-visibility project, which was documented by *The New York*

Times, the Associated Press, ABC News, Gizmodo and numerous trade publications, realized \$12.7 million in revenue and raised the visibility of this important solution for maximizing traffic load with the existing road infrastructure.

INFRASTRUCTURE SEGMENT OUTLOOK

Our infrastructure segment's tremendous rate of growth in fiscal 2015 was the result of several factors, some of which are not likely to be sustained to the same degree in the coming year. While our Road Zipper pipeline of potential projects remains robust, there were no imminent, large projects in our backlog at the end of fiscal 2015. Our road safety products opportunistically grew market share and expanded our customer base during the year. We believe we have the opportunity to improve market share and penetration in each of these product lines but are somewhat subject to government funding and the

The only industry app of its kind provides guidance for quick and accurate end terminal installation.

Lindsay Transportation Solutions partnered with the Golden Gate Bridge, Highway & Transportation District to engineer this streamlined version of the Road Zipper machine, which was custom-made in Rio Vista, California and Lindsay, Nebraska to fit the Golden Gate Bridge's narrow lanes.

INFRASTRUCTURE SEGMENT REVIEW

(CONT.)

Lindsay's roadway infrastructure products are sold through U.S. and international dealers, while railroad products are sold directly to major railroad companies in the U.S.

The Tilttable Wayside Signal Mast is a new concept for railroad wayside signal masts that eliminates the need for platforms and ladders. It safely brings the signals parallel to the ground for normal maintenance in any weather.

approval of a long-term highway bill. We will continue to develop our market presence and to drive revenue and profitability, capitalize on our efficient cost structure, and create a more consistent revenue stream.

During fiscal 2016, we will increase our investment in product development and testing to assure that our road safety products meet new standards that are being enacted at the federal and state levels. We remain committed to bringing innovative, value-added products to the market that enhance road safety and provide effective transportation congestion mitigation solutions.

Over the long-term, demand for Lindsay's infrastructure products is driven by population growth and increasing essential transportation needs. In today's world, more than half of the total infrastructure investment is being made in emerging nations that have a rapidly growing number

of vehicles and under-developed roadway infrastructure. On a global basis, there is continuing emphasis on reducing traffic mortality rates through investment in highway safety products. Lindsay's infrastructure segment is working with agencies throughout the world to make their roadways safer with the use of lane barriers, energy-absorbing crash cushions and clear markings.

In more developed nations, there will be ongoing needs for infrastructure expansion and renovation. In addition, traffic congestion is much more than a mere inconvenience. The direct and indirect costs of roadway congestion drain approximately \$160 billion from the U.S. economy annually, in the form of 6.9 billion hours lost in traffic and 3.1 billion gallons of fuel wasted (Source: Texas Transportation Institute – 2015 Urban Mobility Report). Traffic and congestion also have a strong negative impact on the

environment. In many situations, Lindsay's Road Zipper system will be the most cost-effective traffic mitigation solution available.

As the world's population grows and mobility increases, Lindsay's infrastructure solutions will demonstrate increasing value in terms of financial savings, environmental benefits and improved quality of life.

For managed lanes, Lindsay Transportation Solutions' innovative moveable barrier reduces travel time and congestion, increases motorist safety, and helps meet air quality standards.

Photo top left: TAU Tube provides low-cost, interchangeable technology.

Photo top right: X-Tension features excellent impact performance and easy installation.

Photo tbottom: The Road Zipper System creates dynamic, real-time lane configuration and increases safety for work crews and motorists.

CAPITAL ALLOCATION PLAN

In January 2014, as the agriculture industry was entering the expected downturn, the Company formulated a comprehensive capital allocation plan that would enable decisive short-term action, assure long-term growth, and return cash to shareholders as appropriate.

Under the capital allocation plan, the targeted cash balance is \$60 million to \$75 million, including international accounts, to support cyclical and seasonal fluctuations in working capital and projected capital expenditures.

The Company's cash balance at August 31, 2015 totaled \$139.1 million, with \$23.5 million held outside of the U.S. The Company's execution against that plan in fiscal 2015 included:

- Capital expenditures of \$15.2 million.
- A 4 percent increase in the quarterly cash dividend effected on August 31, 2015.
- In January 2015, the acquisition of Elecsys Corporation for \$67.2 million and, in July 2015 SPF Water Engineering LLC was acquired for \$2.4 million.

- Share repurchases in the year of \$96.9 million for 1.2 million shares.
- Obtained an additional \$100 million of repurchase authorization in July 2015

In addition to the items specifically noted in the capital allocation plan, in 2015 the Company took advantage of historically low interest rates to adjust its overall capital structures and issued \$115.0 million in debt due in 2030 at an annual interest rate of 3.82%. This additional capital provides flexibility to further invest in growth and provide returns to shareholders.

LONG-TERM GOALS AND PERFORMANCE

Lindsay's goals of providing solid financial performance have not changed.

GOAL	FY15	FY14	5-Year Average
Generate revenue growth of 10 to 15 percent annually	-12%	-11%	10%
Realize operating margins of 9 to 14 percent	9%	13%	12%
Produce a return on net assets of 9 to 15 percent	7%	13%	13%

These figures exclude acquired companies in the year of acquisition.

OPERATIONS IN TURKEY

As part of the 2015 capital allocation plan, the new plant in Turkey expands manufacturing internationally.

Although the agriculture industry in general slowed as expected during the down cycle, Lindsay's team again demonstrated a deep understanding of the dynamic market forces, showing the ability to manage for short-term performance while positioning the Company advantageously for the upturn that is sure to come.

Thanks to the tireless efforts of the entire Lindsay team, the Company has a proven history of profitable performance even during severe industry downturns. Our balance sheet is strong, our long-term global business drivers are indisputably positive, and we have strategically developed a product line that offers distinct competitive advantages.

For being part of our hard-earned success, I offer my sincere thanks and appreciation to our employees, channel partners, suppliers, customers, shareholders, and our Board of Directors.

Sincerely,

Richard W. Parod
President and Chief Executive Officer

ITEM 1 – Business

INTRODUCTION

Lindsay Corporation, along with its subsidiaries (collectively called “Lindsay” or the “Company”), is a global leader in providing a variety of proprietary water management and road infrastructure products and services. The Company has been involved in the manufacture and distribution of agricultural irrigation equipment since 1955 and has grown from a regional company to an international water efficiency solutions and highway infrastructure firm with worldwide sales and distribution. Lindsay, a Delaware corporation, maintains its corporate offices in Omaha, Nebraska. The Company has operations which are categorized into two major reporting segments. Industry segment financial information and geographic area financial information about Lindsay is included in Note Q to the consolidated financial statements.

Irrigation Segment – The Company’s irrigation segment includes the manufacture and marketing of center pivot, lateral move, and hose reel irrigation systems which are used principally in the agricultural industry to increase or stabilize crop production while conserving water, energy and labor. The irrigation segment also manufactures and markets repair and replacement parts for its irrigation systems and controls. In addition, the irrigation segment also designs and manufactures water pumping stations and controls for the agriculture, golf, landscape and municipal markets and filtration solutions for groundwater, agriculture, industrial and heat transfer markets. The Company continues to strengthen irrigation product offerings through innovative technology such as GPS positioning and guidance, variable rate irrigation, wireless irrigation management, machine-to-machine (M2M) communication technology solutions and smartphone applications. The Company’s primary domestic irrigation manufacturing facilities are located in Lindsay, Nebraska; Hartland, Wisconsin; Olathe, Kansas and Fresno, California. Internationally, the Company has production operations in Brazil, France, China, Turkey and South Africa as well as distribution and sales operations in the Netherlands, Australia and New Zealand. The Company also exports equipment from the U.S. to other international markets.

Infrastructure Segment – The Company’s infrastructure segment includes the manufacture and marketing of moveable barriers, specialty barriers, crash cushions and end terminals, road marking and road safety equipment, large diameter steel tubing, and railroad signals and structures. The infrastructure segment also provides outsourced manufacturing and production services. The principal infrastructure manufacturing facilities are located in Rio Vista, California; Milan, Italy and Omaha, Nebraska.

PRODUCTS BY SEGMENT

IRRIGATION SEGMENT

Products - The Company manufactures and markets its center pivot, lateral move irrigation systems, and irrigation controls in the U.S. and internationally under its *Zimmatic*® brand. The Company also manufactures and markets hose reel travelers under the *Perrot*™ and *Greenfield*® brands in Europe and South Africa. The Company also produces or markets chemical injection systems, variable rate irrigation systems, flow meters, weather stations, soil moisture sensors and remote monitoring and control systems which it sells under its *GrowSmart*® brand. In addition to whole systems, the Company manufactures and markets repair and replacement parts for its irrigation systems and controls. The Company also designs and manufactures water pumping stations and controls for the agriculture, golf, landscape and municipal markets under its *Watertronics*® brand and filtration solutions for groundwater, agriculture, industrial and heat transfer markets, worldwide, under its *LAKOS*® brand. Furthermore, the Company designs and manufactures innovative M2M communication technology solutions, data acquisition and management systems and custom electronic equipment for critical applications under its *Elecsys*™ brand.

The Company’s irrigation systems are primarily of the standard sized center pivot type, with a small portion of its products consisting of the lateral move type. Both are automatic move systems consisting of sprinklers

mounted on a water carrying pipeline which is supported approximately 11 feet off the ground by a truss system suspended between moving towers.

A typical center pivot in the U.S. is approximately 1,300 feet long and is designed to circle within a quarter-section of land, which comprises 160 acres, wherein it irrigates approximately 125 to 130 acres. A center pivot or lateral move system can also be custom designed and can irrigate from 25 to 600+ acres.

A center pivot system represents a significant investment to a farmer. In a dry land conversion to center pivot irrigation, approximately one-half of the investment is for the pivot itself, and the remainder is attributable to installation of additional equipment such as wells, pumps, underground water pipes, electrical supply and a concrete pad upon which the pivot is anchored. The Company's center pivot and lateral move irrigation systems can be enhanced with a family of integrated proprietary products such as water pumping stations, GPS monitoring and other automated controls.

The Company also manufactures and distributes hose reel travelers. Hose reel travelers are typically deployed in smaller or irregular fields and usually are easy to operate, easy to move from field to field, and a lower investment than a typical standard center pivot.

The Company also markets proprietary remote monitoring and automation technology for pivot and drip irrigation systems that is sold on a subscription basis under the *FieldNET*[®] product name. *FieldNET*[®] technology allows growers to remotely monitor and operate irrigation equipment, saving time and reducing water and energy consumption. The technology uses cellular or radio frequency communication systems to remotely acquire data relating to various conditions in an irrigated field, including operational status of the irrigation system, position of the irrigation system, water flow rates, weather and soil conditions and similar data. The system can remotely control the irrigation system, including changing position, varying water flow rates, and controlling pump station and diesel generator operation. Data management and control is achieved using applications running on either a personal computer-based internet browser or various mobile devices connected to the internet.

Other Types of Irrigation – Center pivot and lateral move irrigation systems compete with three other types of irrigation: flood, drip, and other mechanical devices such as hose reel travelers and solid set sprinklers. The bulk of the worldwide irrigation is accomplished by the traditional method of flood irrigation. Flood irrigation is accomplished by either flooding an entire field, or by providing a water source (ditches or a pipe) along the side of a field, which is planed and slopes slightly away from the water source. The water is released to the crop rows through gates in the ditch or pipe, or through siphon tubes arching over the ditch wall into some of the crop rows. It runs down through the crop row until it reaches the far end of the row, at which time the water source is moved and another set of rows are flooded. Disadvantages or limitations of flood irrigation include that it cannot be used to irrigate uneven, hilly, or rolling terrain, it can be wasteful or inefficient and coverage can become inconsistently applied. In “drip” or “low flow” irrigation, perforated plastic pipe or tape is installed on the ground or buried underground at the root level. Several other types of mechanical devices, such as hose reel travelers, irrigate the remaining irrigated acres.

Center pivot, lateral move, and hose reel traveler irrigation offers significant advantages when compared with other types of irrigation. It requires less labor and monitoring; can be used on sandy ground, which, due to poor water retention ability, must have water applied frequently; can be used on uneven ground, thereby allowing previously unsuitable land to be brought into production; can also be used for the application of fertilizers, insecticides, herbicides, or other chemicals (termed “fertigation” or “chemigation”); and conserves water and chemicals through precise control of the amount and timing of the application.

Markets - Water is an essential and critical requirement for crop production, and the extent, regularity, and frequency of water application can be a critical factor in crop quality and yield. The fundamental factors which govern the demand for center pivot and lateral move systems are essentially the same in both the U.S. and international markets. Demand for center pivot and lateral move systems is determined by whether the value of the increased crop production and cost savings attributable to center pivot or lateral move irrigation exceeds any

increased costs associated with purchasing, installing, and operating the equipment. Thus, the decision to purchase a center pivot or lateral move system, in part, reflects the profitability of agricultural production, which is determined primarily by the prices of agricultural commodities and other farming inputs.

The current demand for center pivot systems has three sources: conversion to center pivot systems from less water efficient, more labor intensive types of irrigation; replacement of older center pivot systems, which are beyond their useful lives or are technologically obsolete; and conversion of dry land farming to irrigated farming. Demand for center pivots and lateral move irrigation equipment also depends upon the need for the particular operational characteristics and advantages of such systems in relation to alternative types of irrigation, primarily flood. More efficient use of the basic natural resources of land, water, and energy helps drive demand for center pivot and lateral move irrigation equipment. Increasing global population not only increases demand for agricultural output, but also places additional and competing demands on land, water, and energy. The Company expects demand for center pivots and lateral move systems to continue to increase relative to other irrigation methods because center pivot and lateral move systems are preferred where the soil is sandy, the terrain is not flat, the land area to be irrigated is sizeable; there is a shortage of reliable labor; water supply is restricted and conservation is preferred or critical; and/or fertigation or chemigation will be utilized.

United States Market – In the United States, the Company sells its branded irrigation systems, including *Zimmatic*[®], to over 200 independent dealer locations, who resell to their customer, the farmer. Dealers assess their customer's requirements, design the most efficient solution, assemble and erect the system in the field, and provide additional system components, primarily relating to water supply (wells, pumps, pipes) and electrical supply (on-site generation or hook-up to power lines). Lindsay dealers generally are established local agribusinesses, many of which also deal in related products, such as well drilling and water pump equipment, farm implements, grain handling and storage systems, and farm structures.

International Market – The Company sells center pivot and lateral move irrigation systems throughout the world. International sales accounted for approximately 39 percent of the Company's total irrigation segment revenues in both fiscal 2015 and 2014. The Company sells direct to consumers as well as through an international dealer network and has production and sales operations in Brazil, France, China, Turkey and South Africa as well as distribution and sales operations in the Netherlands, Australia and New Zealand serving the key South American, European, Chinese, African, Russian/Ukrainian, Middle East, Australian, and New Zealand markets. The Company also exports irrigation equipment from the U.S. to international markets.

The Company's international markets differ with respect to the need for irrigation, the ability to pay, demand, customer type, government support of agriculture, marketing and sales methods, equipment requirements, and the difficulty of on-site erection. The Company's industry position is such that it believes that it will likely be considered as a potential supplier for most major international agricultural development projects utilizing center pivot or lateral move irrigation systems.

Competition – Four primary manufacturers control a substantial majority of the U.S. center pivot irrigation system industry. The international irrigation market includes participation and competition by the leading U.S. manufacturers as well as various regional manufacturers. The Company competes in certain product lines with several manufacturers, some of whom may have greater financial resources than the Company. The Company competes by continuously improving its products through ongoing research and development activities. The Company continues to strengthen irrigation product offerings through innovative technology such as GPS positioning and guidance, variable rate irrigation, wireless irrigation management, and smartphone applications as well as through the acquisition of products and services that allow the Company to provide a more comprehensive solution to growers' needs. The Company's engineering and research expenses related to irrigation totaled approximately \$9.6 million, \$7.8 million, and \$8.1 million for fiscal years 2015, 2014, and 2013, respectively. Competition also occurs in areas of price and seasonal programs, product quality, durability, controls, product characteristics, retention and reputation of local dealers, customer service, and, at certain times of the year, the availability of systems and their delivery time. On balance, the Company believes it competes favorably with respect to these factors.

INFRASTRUCTURE SEGMENT

Products – Quickchange® Moveable Barrier™ The Company's Quickchange® Moveable Barrier™ system, commonly known as the Road Zipper System™, is composed of three parts: 1) T-shaped concrete barriers that are connected to form a continuous wall, 2) a Barrier Transfer Machine™ (“BTM™”) capable of moving the barrier laterally across the pavement, and 3) the variable length barriers necessary for accommodating curves. A barrier element is approximately 32 inches high, 12-24 inches wide, 3 feet long and weighs 1,500 pounds. The barrier elements are interconnected by very heavy duty steel hinges to form a continuous barrier. The BTM™ employs an inverted S-shaped conveyor mechanism that lifts the barrier, moving it laterally before setting it back on the roadway surface.

In permanent applications, the Road Zipper System™ increases capacity and reduces congestion by varying the number of traffic lanes to match the traffic demand, and promotes safety by maintaining the physical separation of opposing lanes of traffic. Roadways with fixed medians have a set number of lanes in each direction and cannot adjust to traffic demands that may change over the course of a day, or to capacity reductions caused by traffic incidents or road repair and maintenance. Applications include high volume highways where expansion may not be feasible due to lack of additional right-of-way, environmental concerns, or insufficient funding. The Road Zipper System™ is particularly useful in busy commuter corridors and at choke points such as bridges and tunnels. Road Zipper Systems™ can also be deployed at roadway or roadside construction sites to accelerate construction, improve traffic flow and safeguard work crews and motorists by positively separating the work area and traffic. Examples of types of work completed with the help of a Road Zipper System™ include highway reconstruction, paving and resurfacing, road widening, median and shoulder construction, and repairs to tunnels and bridges.

The Company offers a variety of equipment lease options for Road Zipper Systems™ and BTM™ equipment used in construction applications. The leases extend for periods of one month or more for equipment already existing in the Company's lease fleet. Longer lease periods may be required for specialty equipment that must be built for specific projects. These systems have been in use since 1987. Typical sales for a highway safety or road improvement project range from \$2.0 - \$20.0 million, making them significant capital investments.

Crash Cushions and End Terminals – The Company offers a complete line of redirective and non-redirective crash cushions which are used to enhance highway safety at locations such as toll booths, freeway off-ramps, medians and roadside barrier ends, bridge supports, utility poles and other fixed roadway hazards. The Company's primary crash cushion products cover a full range of lengths, widths, speed capacities and application accessories and include the following brand names: TAU®, Universal TAU-II®, TAU-II-R™, TAU-B_NR™, ABSORB 350® and Walt™. In addition to these products the Company also offers guardrail end terminal products such as the X-Tension® and X-Lite® systems. The crash cushions and end terminal products compete with other vendors in the world market. These systems are generally sold through a distribution channel that is domiciled in particular geographic areas.

Specialty Barriers – The Company also offers specialty barrier products such as the SAB™, ArmorGuard™, PaveGuard™ and DR46™ portable barrier and/or barrier gate systems. These products offer portability and flexibility in setting up and modifying barriers in work areas and provide quick opening, high containment gates for use in median or roadside barriers. The gates are generally used to create openings in barrier walls of various types for both construction and incident management purposes. The DR46™ is an energy absorbing barrier to shield motorcyclists from impacting guardrail posts which is an area of focus by departments of transportation and government regulators for reducing the amount and severity of injuries.

Road Marking and Road Safety Equipment – The Company also offers preformed tape and a line of road safety accessory products. The preformed tape is used primarily in temporary applications such as markings for work zones, street crossings, and road center lines or boundaries. The road safety equipment consists of mostly plastic and rubber products used for delineation, slowing traffic, and signaling. The Company also manages an ISO 17025 certified testing laboratory that performs full-scale impact testing of highway safety products in

accordance with the National Cooperative Highway Research Program (“NCHRP”) Report 350, the Manual for Assessing Safety Hardware (“MASH”), and the European Norms (“EN1317 Norms”) for these types of products. The NCHRP Report 350 and MASH guidelines are procedures required by the U.S. Department of Transportation Federal Highway Administration (“FHWA”) for the safety performance evaluation of highway features. The EN1317 Norms are being used to qualify roadway safety products for the European markets.

Other Products – The Company’s Diversified Manufacturing, Rail and Tubing business unit manufactures and markets railroad signals and structures and large diameter steel tubing, and provides outsourced manufacturing and production services for other companies. The Company continues to develop new relationships for infrastructure manufacturing in industries outside of agriculture and irrigation. The Company’s customer base includes certain large industrial companies and railroads. Each customer benefits from the Company’s design and engineering capabilities as well as the Company’s ability to provide a wide spectrum of manufacturing services, including welding, machining, painting, forming, galvanizing and assembling hydraulic, electrical, and mechanical components.

Markets – The Company’s primary infrastructure market includes moveable concrete barriers, delineation systems, crash cushions and similar protective equipment. The U.S. roadway infrastructure market includes projects such as new roadway construction, bridges, tunnels, maintenance and resurfacing, the purchase of rights-of-way for roadway expansion and development of technologies for relief of roadway congestion. Much of the U.S. highway infrastructure market is driven by government (state and federal) spending programs. For example, the U.S. government funds highway and road improvements through the Federal Highway Trust Fund Program. This program provides funding to improve the nation’s roadway system. Matching funding from the various states may be required as a condition of federal funding. In the long term, the Company believes that the federal program provides a solid platform for growth in the U.S. market, as it is generally acknowledged that additional funding will be required for infrastructure development and maintenance in the future.

The global market for the Company’s infrastructure products continues to be driven by population growth and the need for improved road safety. International sales accounted for approximately 30 percent and 41 percent of the Company’s total infrastructure segment revenues in fiscal 2015 and 2014, respectively. The international market is presently very different from country to country. The standardization in performance requirements and acceptance criteria for highway safety devices adopted by the European Committee for Standardization is expected to lead to greater uniformity and a larger installation program. Prevention programs put in place in various countries to lower highway traffic fatalities may also lead to greater demand. The Company has recently started distributing infrastructure products in South America, the Middle East and Asia. The Company expects to continue expanding in international markets as populations grow and markets become more established.

Competition – The Company competes in certain product lines with several manufacturers, some of whom may have greater financial resources than the Company. The Company competes by continuously improving its products through ongoing research and development activities. The Company’s engineering and research expenses related to infrastructure products totaled approximately \$3.3 million for each of the fiscal years ended 2015, 2014 and 2013. The Company competes with certain products and companies in its crash cushion business, but has limited competition in its moveable barrier line, as there is not another moveable barrier product today comparable to the Road Zipper System™. However, the Company’s barrier product does compete with traditional “safety shaped” concrete barriers and other safety barriers.

Distribution methods and channels – The Company has dedicated production and sales operations in the United States and Italy. Sales efforts consist of both direct sales and sales programs managed by its network of distributors and third-party representatives. The sales teams have responsibility for new business development and assisting distributors and dealers in soliciting large projects and new customers. The distributor and dealer networks have exclusive territories and are responsible for developing sales and providing service, including product maintenance, repair and installation. The typical dealer sells an array of safety supplies, road signs, crash cushions, delineation equipment and other highway products. Customers include Departments of Transportation, municipal transportation road agencies, roadway contractors, subcontractors, distributors and dealers. Due to the

project nature of the roadway construction and congestion management markets, the Company's customer base changes from year-to-year. Due to the limited life of projects, it is rare that a single customer will account for a significant amount of revenues in consecutive years. The customer base also varies depending on the type of product sold. The Company's moveable barrier products are typically sold to transportation agencies or the contractors or suppliers serving those agencies. In contrast, distributors account for a majority of crash cushion sales since those products have lower price points and tend to have shorter lead times.

GENERAL

Certain information generally applicable to both of the Company's reportable segments is set forth below.

The following table describes the Company's total revenues for the past three fiscal years. United States export revenue is included in International based on the region of destination.

\$ in millions	For the years ended August 31,					
	2015		2014		2013	
	Revenues	% of Total Revenues	Revenues	% of Total Revenues	Revenues	% of Total Revenues
United States	\$ 350.3	63	\$ 377.7	61	\$ 428.9	62
International	\$ 209.9	37	\$ 240.2	39	\$ 261.9	38
Total Revenues	\$ 560.2	100	\$ 617.9	100	\$ 690.8	100

SEASONALITY

Irrigation equipment sales are seasonal by nature. Farmers generally order systems to be delivered and installed before the growing season. Shipments to customers located in Northern Hemisphere countries usually peak during the Company's second and third fiscal quarters for the spring planting period. Sales of infrastructure products are traditionally higher during prime road construction seasons and lower in the winter. The primary construction season for Northern Hemisphere countries is from March until late September which corresponds to the Company's third and fourth fiscal quarters.

CUSTOMERS

The Company is not dependent for a material part of either segment's business upon a single customer or upon a limited number of customers. The loss of any one customer would not have a material adverse effect on the Company's financial condition, results of operations or cash flow.

ORDER BACKLOG

As of August 31, 2015, the Company had an order backlog of \$48.0 million compared with \$79.6 million at August 31, 2014. The order backlog at August 31, 2014 included a \$12.7 million Road Zipper System™ order from the Golden Gate Bridge Highway & Transportation District that was recognized as revenue in fiscal 2015. The current period includes \$9.5 million of backlog from Elecsys Corporation. The Company's backlog can fluctuate from period to period due to the seasonality, cyclicity, timing and execution of contracts. Backlog typically represents long-term projects as well as short lead-time orders, therefore it is generally not a good indication of the next quarter's revenues.

RAW MATERIALS AND COMPONENTS

Raw materials used by the Company include coil steel, angle steel, plate steel, zinc, tires, gearboxes, concrete, rebar, fasteners, and electrical and hydraulic components (motors, switches, cable, valves, hose and stators). The Company has, on occasion, faced shortages of certain such materials. The Company believes it currently has ready access from assorted domestic and foreign suppliers to adequate supplies of raw materials and components.

CAPITAL EXPENDITURES

Capital expenditures for fiscal 2015, 2014, and 2013 were \$15.2 million, \$17.7 million and \$11.1 million, respectively. Capital expenditures for fiscal 2016 are estimated to be approximately \$15.0 million to \$20.0

million, largely focused on manufacturing capacity expansion and productivity improvements. The Company's management does maintain flexibility to modify the amount and timing of some of the planned expenditures in response to economic conditions.

PATENTS, TRADEMARKS, AND LICENSES

Lindsay's *Zimmatic*[®], *Greenfield*[®], *GrowSmart*[®], *Perrot*[™], *Road Zipper System*[™], *Quickchange*[®] *Moveable Barrier*[™], *ABSORB 350*[®], *FieldNET*[®], *TAU*[®], *Universal TAU-II*[®], *TAU-II-R*[™], *TAU-B_NR*[™], *X-Tension*[®], *X-Lite*[®] *CableGuard*[™], *TESI*[™], *SAB*[™], *ArmourGuard*[™], *PaveGuard*[™], *DR46*[™], *U-MAD*[™], *Watertronics*[®], *LAKOS*[®] and other trademarks are registered or applied for in the major markets in which the Company sells its products. In addition, the Company owns multiple patents dealing with cellular communication techniques, cathodic protection measurement methods and data compression and transmission. Lindsay follows a policy of applying for patents on all significant patentable inventions in markets deemed appropriate. Although the Company believes it is important to follow a patent protection policy, Lindsay's business is not dependent, to any material extent, on any single patent or group of patents.

EMPLOYEES

The number of persons employed by the Company and its wholly-owned subsidiaries at fiscal year ends 2015, 2014, and 2013 were 1,324, 1,202 and 1,262, respectively. None of the Company's U.S. employees are represented by a union. Certain of the Company's non-U.S. employees are unionized due to local governmental regulations.

ENVIRONMENTAL AND HEALTH AND SAFETY MATTERS

Like other manufacturing concerns, the Company is subject to numerous laws and regulations that govern environmental and occupational health and safety matters. The Company believes that its operations are substantially in compliance with all such applicable laws and regulations and that it holds all necessary permits in each jurisdiction in which its facilities are located. Environmental and health and safety regulations are subject to change and interpretation. In some cases, compliance with applicable regulations or standards may require the Company to make additional capital and operational expenditures. The Company, however, is not currently aware of any material expenditures required to comply with such regulations, other than information related to the environmental remediation activities described in Note N, Commitments and Contingencies, to the Company's consolidated financial statements. The Company accrues for the anticipated cost of investigation and remediation when the obligation is probable and can be reasonably estimated. Any revisions to these estimates could be material to the operating results of any fiscal quarter or fiscal year, however the Company does not expect such additional expenses would have a material adverse effect on its liquidity or financial condition.

FINANCIAL INFORMATION ABOUT FOREIGN AND U.S. OPERATIONS

The Company's primary production facilities are located in the United States. The Company has smaller production and sales operations in Brazil, France, Italy, China, Turkey and South Africa as well as distribution and sales operations in the Netherlands, Australia and New Zealand. Where the Company exports products from the United States to international markets, the Company generally ships against prepayment, an irrevocable letter of credit confirmed by a U.S. bank or another secured means of payment or with credit insurance from a third party. For sales within both U.S. and foreign jurisdictions, prepayments or other forms of security may be required before credit is granted, however most local sales are made based on payment terms after a full credit review has been performed. Most of the Company's financial transactions are in U.S. dollars, although some export sales and sales from the Company's foreign subsidiaries are conducted in other currencies. Approximately 20 percent and 23 percent of total consolidated Company sales were conducted in currencies other than the U.S. dollar in fiscal 2015 and 2014. To reduce the uncertainty of foreign currency exchange rate movements on these sales and purchase commitments conducted in local currencies, the Company monitors its risk of foreign currency fluctuations and, at times, may enter into forward exchange or option contracts for transactions denominated in a currency other than U.S. dollars.

In addition to the transactional foreign currency exposures mentioned above, the Company also has translation exposure resulting from translating the financial statements of its international subsidiaries into U.S. dollars. In

order to reduce this translation exposure, the Company, at times, utilizes foreign currency forward contracts to hedge its net investment exposure in its foreign operations. For information on the Company's foreign currency risks, see Item 7A of Part II of this report.

INFORMATION AVAILABLE ON THE LINDSAY WEBSITE

The Company makes available free of charge on its website homepage, under the tab "Investor Relations – SEC Filings", its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the SEC. The Company's internet address is <http://www.lindsay.com>; however, information posted on its website is not part of this Annual Report on Form 10-K. The following documents are also posted on the Company's website homepage, under the tabs "Investor Relations – Governance – Committees" and "Investor Relations – Governance – Ethics":

Audit Committee Charter
Compensation Committee Charter
Corporate Governance and Nominating Committee Charter
Code of Business Conduct and Ethics
Corporate Governance Principles
Code of Ethical Conduct
Employee Complaint Procedures for Accounting and Auditing Matters
Special Toll-Free Hotline Number and E-mail Address for Making Confidential or Anonymous Complaints

These documents are also available in print to any stockholder upon request, by sending a letter addressed to the Secretary of the Company.

ITEM 1A - Risk Factors

The following are certain of the more significant risks that may affect the Company's business, financial condition and results of operations.

The Company's irrigation revenues are highly dependent on the agricultural industry and weather conditions.
The Company's irrigation revenues are cyclical and highly dependent upon the need for irrigated agricultural crop production which, in turn, depends upon many factors, including total worldwide crop production, the profitability of agricultural crop production, agricultural commodity prices, net farm income, availability of financing for farmers, governmental policies regarding the agricultural sector, water and energy conservation policies, the regularity of rainfall and regional climate change. As farm income decreases, farmers may postpone capital expenditures or seek less expensive irrigation alternatives.

Weather conditions, particularly leading up to the planting and early growing season, can significantly affect the purchasing decisions of consumers of irrigation equipment. Natural calamities such as regional floods, hurricanes or other storms, and droughts can have significant effects on seasonal irrigation demand. Drought conditions, which generally impact irrigation equipment demand positively over the long term, can adversely affect demand if water sources become unavailable or if governments impose water restriction policies to reduce overall water availability.

Volatility in global markets with respect to currency exchange rates, commodity prices including market prices for grain and oil, and potential changes in interest rates can adversely affect the Company's worldwide sales, operating margins and the competitiveness of the Company's products.

The Company conducts operations in a variety of locations around the world, which means that market fluctuations in currencies, commodities and interest rates can affect demand for the Company's products and the

cost of production. These factors all impact end customers' purchase decisions and are therefore interconnected, making it difficult to predict how any single factor might impact customers' decisions to purchase the Company's products.

Foreign Currency Exchange Rates. For the fiscal year ended August 31, 2015, approximately 37 percent of the Company's consolidated revenues were generated from international sales and United States export revenue to international regions. Most of the Company's international sales involve some level of export from the U.S., either of components or completed products. The strengthening of the U.S. dollar and/or the weakening of local currencies can increase the cost of the Company's products in those foreign markets. The impact of these changes can make these products less competitive relative to local producing competitors and, in extreme cases, can result in the Company's products not being cost-effective for customers. As a result, the Company's international sales and profit margins could decline.

Grain Pricing. Changes in grain prices can impact the return on investment of the Company's products. Grain prices are influenced by both global and local markets. The primary benefit of many of the Company's irrigation products is to increase grain yields and the resulting revenue for farmers. As grain prices decline, the breakeven point of incremental production is more difficult to achieve, reducing or eliminating the profit and return on investment from the purchase of the Company's products. As a result, changes in grain prices can significantly impact the Company's sales levels in the U.S. and international markets.

Manufacturing Input Costs. Certain of the Company's input costs, such as the cost of steel, zinc, and other raw materials, may increase rapidly from time to time. Due to price competition in the market for irrigation equipment and certain infrastructure products, the Company may not be able to recoup increases in these costs through price increases for its products, which would result in reduced profitability. Whether increased operating costs can be passed through to the customer depends on a number of factors, including farm income and the price of competing products. The cost of raw materials can be volatile and is dependent on a number of factors, including availability, demand, and freight costs.

Oil Pricing. The decline in oil prices could impact the Company's irrigation markets, either by negatively affecting the biofuels market or by reducing government revenues of oil producing countries that purchase or subsidize the purchase of irrigation equipment. Biofuels production is a significant source of grain demand in the U.S. and certain international markets. While ethanol production levels are currently mandated within the U.S., potential mandate changes or price declines for ethanol producing companies could reduce the demand for grains. In addition, a number of ethanol producers in the U.S. are cooperatives partially owned by farmers. Reduced profit of ethanol production could reduce income for farmers which could, in turn, reduce the demand for irrigation equipment.

Interest Rates. Interest rates globally have been at historically low levels. In some international markets we have begun to see these rates rise and it is expected that global rates will continue to increase, potentially very quickly in the U.S., as the economy improves. An increase in interest rates will make it more difficult for end customers to cost-effectively fund the purchase of new equipment, which could reduce the Company's sales.

The Company's infrastructure revenues are highly dependent on government funding of transportation projects and subject to compliance with government regulations. The demand for the Company's infrastructure products depends to a large degree on the amount of government spending authorized to improve road and highway systems. For example, the U.S. government funds highway and road improvements through the Federal Highway Trust Fund Program and matching funding from states may be required as a condition of federal funding. Currently funding is provided primarily through a series of temporary highway funding bills that have been passed over the previous several years. Until and unless a long-term U.S. highway bill is passed, uncertainties and limitations on growth could impact the infrastructure business. If highway funding is reduced or delayed, it may reduce demand for the Company's infrastructure products.

In addition, the Company's road safety products are required to meet certain standards as outlined by the various governments worldwide. The Federal Highway Administration ("FHWA") has recently indicated the intention to

mandate the Manual for Assessing Safety Hardware (“MASH”) standards subject to approval by states for use in each respective jurisdiction. In addition, state Departments of Transportation (“DOT”) have the ability to require compliance with MASH standards prior to the FHWA mandating such practices. MASH was previously optional and most road safety products in the market have not been approved under this standard. The Company will likely incur R&D and testing expense to comply with these standards. In addition, the adoption of the new standards could impact the Company’s competitive position in the market which could have a significant impact on the sales and profitability from its road safety product line. The timeline for adoption of the MASH standard has not been determined.

The Company’s profitability may be negatively affected by the disruption or termination of the supply of parts, materials, and components from third-party suppliers. The Company uses a limited number of suppliers for certain parts, materials, and components in the manufacturing process. Disruptions or delays in supply or significant price increases from these suppliers could adversely affect the Company’s operations and profitability. Such disruptions, terminations or cost increases could result in cost inefficiencies, delayed sales or reduced sales.

The Company’s international equipment sales are highly dependent on foreign market conditions and are subject to additional risk and restrictions. For the fiscal year ended August 31, 2015, approximately 37 percent of the Company’s consolidated revenues were generated from international sales and United States export revenue to international regions. International revenues are primarily generated from Australia, New Zealand, Canada, Central and Western Europe, Mexico, the Middle East, Africa, China, Russia/Ukraine, and Central and South America. In addition to risks relating to general economic and political stability in these countries, the Company’s international sales are affected by international trade barriers, including governmental policies on tariffs, taxes, import or export licensing requirements, trade sanctions, and foreign currency exchange rates. In addition, the collectability of receivables can be difficult to estimate, particularly in areas of political instability or with governments with which the Company has limited experience or where there is a lack of transparency as to the current credit condition. The Company does business in a number of countries that are particularly susceptible to disruption from changing social economic conditions as well as terrorism, political hostilities, sanctions, war and similar incidents.

Compliance with applicable environmental and health and safety regulations or standards may require additional capital and operational expenditures. Like other manufacturing concerns, the Company is subject to numerous laws and regulations which govern environmental and occupational health and safety matters. The Company believes that its operations are substantially in compliance with all such applicable laws and regulations and that it holds all necessary permits in each jurisdiction in which its facilities are located. Environmental and health and safety regulations are subject to change and interpretation. Compliance with applicable regulations or standards may require the Company to make additional capital and operational expenditures.

The Company’s Lindsay, Nebraska site was added to the list of priority superfund sites of the U.S. Environmental Protection Agency (the “EPA”) in 1989. The Company and its environmental consultants have developed a remedial alternative work plan, under which the Company continues to work with the EPA to define and implement steps to better contain and remediate the remaining contamination. Although the Company has accrued all reasonably estimable costs associated with remediation of the site, it is expected that additional testing and environmental monitoring and remediation could be required in the future as part of the Company’s ongoing discussions with the EPA regarding the development and implementation of the remedial action plans. In addition, the current investigation has not yet been completed and does not include all potentially affected areas on the site. Due to the current stage of discussions with the EPA and the uncertainty of the remediation actions that may be required with respect to these affected areas, the Company believes that meaningful estimates of costs or range of costs cannot currently be made and accordingly have not been accrued. The Company’s ongoing remediation activities at its Lindsay, Nebraska facility are described in Note N, Commitments and Contingencies, to the Company’s consolidated financial statements.

The Company's consolidated financial results are reported in U.S. dollars while certain assets and other reported items are denominated in the currencies of other countries, creating currency translation risk. The reporting currency for the Company's consolidated financial statements is the U.S. dollar. Certain of the Company's assets, liabilities, expenses and revenues are denominated in other countries' currencies. Those assets, liabilities, expenses and revenues are translated into U.S. dollars at the applicable exchange rates to prepare the Company's consolidated financial statements. Therefore, increases or decreases in exchange rates between the U.S. dollar and those other currencies affect the value of those items as reflected in the Company's consolidated financial statements. Substantial fluctuations in the value of the U.S. dollar compared to those other currencies could have a significant impact on the Company's results.

Expansion of the Company's business may result in unanticipated adverse consequences. The Company routinely considers possible expansions of the business, both domestically and in foreign locations. Acquisitions, partnerships, joint ventures or other similar major investments require significant managerial resources, which may be diverted from the Company's other business activities. The risks of any expansion of the business through investments, acquisitions, partnerships or joint ventures are increased due to the significant capital and other resources that the Company may have to commit to any such expansion, which may not be recoverable if the expansion initiative to which they were devoted is not fully implemented or is ultimately unsuccessful. As a result of these risks and other factors, including general economic risk, the Company may not be able to realize projected returns from any recent or future acquisitions, partnerships, joint ventures or other investments.

Security breaches and other disruptions to the Company's information technology infrastructure could interfere with its operations and could compromise the Company's and its customers' and suppliers' information, exposing the Company to liability that could cause its business and reputation to suffer. In the ordinary course of business, the Company relies upon information technology networks and systems to process, transmit and store electronic information, and to manage or support a variety of business functions, including supply chain, manufacturing, distribution, invoicing and collection of payments. The Company uses information technology systems to record, process and summarize financial information and results of operations for internal reporting purposes and to comply with regulatory financial reporting, legal and tax requirements. Additionally, the Company collects and stores sensitive data, including intellectual property, proprietary business information and the proprietary business information of customers and suppliers, as well as personally identifiable information of customers and employees, in data centers and on information technology networks. The secure operation of these networks and the processing and maintenance of this information is critical to the Company's business operations and strategy. Despite security measures and business continuity plans, the Company's information technology networks and infrastructure may be vulnerable to damage, disruptions or shutdowns due to attacks by hackers or breaches due to employee error or malfeasance or other disruptions during the process of upgrading or replacing computer software or hardware, power outages, computer viruses, telecommunication or utility failures or natural disasters or other catastrophic events. The occurrence of any of these events could compromise the Company's networks, and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability or regulatory penalties under laws protecting the privacy of personal information, disrupt operations, and damage the Company's reputation, which could adversely affect the Company's business.

ITEM 1B – Unresolved Staff Comments

None.

ITEM 2 - Properties

The Company's facilities are well maintained, in good operating condition and are suitable for present purposes. These facilities, together with both short-term and long-term planned capital expenditures, are expected to meet the Company's manufacturing needs in the foreseeable future. The Company does not anticipate any difficulty in retaining occupancy of any leased facilities, either by renewing leases prior to expiration or by replacing them with equivalent leased facilities. The following are the Company's significant properties.

Segment	Geographic Location (s)	Own/ Lease	Lease Expiration	Square Feet	Property Description
Corporate	Omaha, Nebraska	Lease	2019	30,000	Corporate headquarters
Irrigation	Lindsay, Nebraska	Own	N/A	300,000	Principal U.S. manufacturing plant consists of eight separate buildings located on 122 acres
Irrigation	Corlu, Turkey	Lease	2024	280,000	Manufacturing plant for irrigation products
Irrigation	Fresno, California	Own	N/A	94,000	Manufacturing plant for filtration products
Infrastructure	Omaha, Nebraska	Own	N/A	83,000	Manufacturing plant for infrastructure products
Irrigation	Hartland, Wisconsin	Own	N/A	73,000	Manufacturing plant for water pumping stations and controls
Irrigation	La Chapelle, France	Own	N/A	72,000	Manufacturing plant for irrigation products
Irrigation	Bellville, South Africa	Lease	2019	71,000	Manufacturing plant for irrigation products
Irrigation	Mogi Mirim, Sao Paulo, Brazil	Own	N/A	67,000	Manufacturing plant for irrigation products
Irrigation	Olathe, Kansas	Own	N/A	60,000	Manufacturing plant for machine to machine products
Irrigation	Tianjin, China and Beijing, China	Lease	2017	58,000	Manufacturing plant for irrigation products
Infrastructure	Milan, Italy	Own	N/A	45,000	Manufacturing plant for infrastructure products
Infrastructure	Rio Vista, California	Own	N/A	30,000	Manufacturing plant for infrastructure products

ITEM 3 - Legal Proceedings

In the ordinary course of its business operations, the Company is involved, from time to time, in commercial litigation, employment disputes, administrative proceedings, business disputes and other legal proceedings. No such current proceedings, individually or in the aggregate, are expected to have a material effect on the business or financial condition of the Company. Note N, Commitments and Contingencies, sets forth information about capital and other operating expenditures relating to environmental remediation activities at the Company's Lindsay, Nebraska facility.

ITEM 4 - Mine Safety Disclosures

Not applicable

PART II

ITEM 5 - Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Holders

Lindsay Common Stock trades on the New York Stock Exchange, Inc. (NYSE) under the ticker symbol LNN. As of October 13, 2015, there were approximately 162 stockholders of record.

Price Range of Common Stock

The following table sets forth for the periods indicated the range of the high and low stock prices and dividends paid per share:

	Fiscal 2015 Stock Price			Fiscal 2014 Stock Price		
	High	Low	Dividends	High	Low	Dividends
First Quarter	\$ 89.50	\$ 73.01	\$ 0.270	\$ 90.00	\$ 71.13	\$ 0.130
Second Quarter	\$ 90.30	\$ 80.02	\$ 0.270	\$ 92.93	\$ 75.76	\$ 0.260
Third Quarter	\$ 89.33	\$ 74.20	\$ 0.270	\$ 91.60	\$ 77.50	\$ 0.260
Fourth Quarter	\$ 91.93	\$ 72.25	\$ 0.280	\$ 89.82	\$ 76.02	\$ 0.270
Year	\$ 91.93	\$ 72.25	\$ 1.090	\$ 92.93	\$ 71.13	\$ 0.920

Purchases of Equity Securities by the Issuer and Affiliated Purchases

The table below sets forth information with respect to purchases of the Company's common stock made by or on behalf of the Company during the three months ended August 31, 2015:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs ⁽¹⁾ (\$ in thousands)
June 1, 2015 to June 30, 2015	88,596	\$ 81.51	88,596	\$ 23,256
July 1, 2015 to July 31, 2015	82,284	\$ 85.54	82,284	\$ 116,216
August 1, 2015 to August 31, 2015	49,397	\$ 84.21	49,397	\$ 112,057
Total	220,277	\$ 83.62	220,277	\$ 112,057

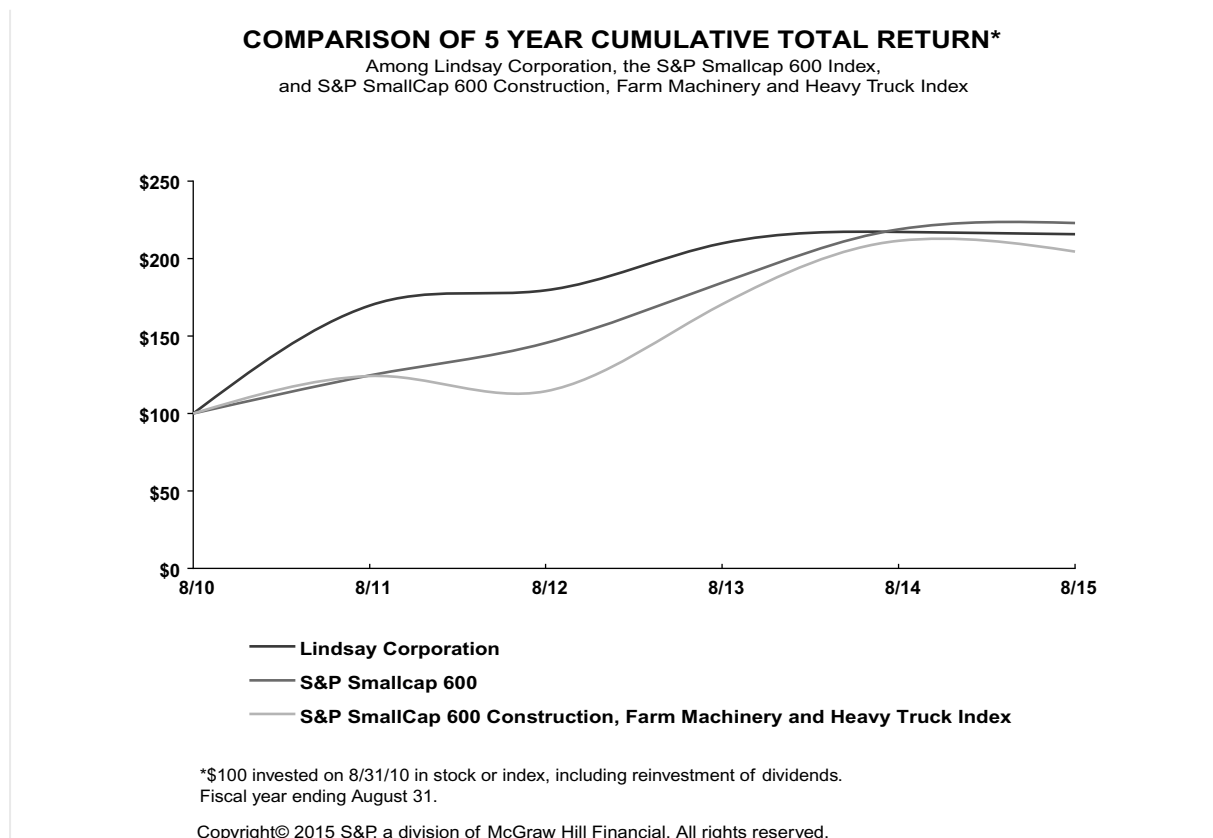

⁽¹⁾ On January 3, 2014, the Company announced that its Board of Directors authorized a share repurchase program of up to \$150.0 million of common stock, effective as of January 2, 2014, through January 2, 2016. On July 22, 2015, the Company announced that its Board of Directors increased its outstanding share repurchase authorization by \$100.0 million. Under the program, shares may be repurchased in privately negotiated and/or open market transactions as well as under formalized trading plans in accordance with the guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended.

Dividends

The Company paid a total of \$12.8 million and \$11.7 million in dividends during fiscal 2015 and fiscal 2014, respectively. The Company currently expects that cash dividends comparable to those paid historically will continue to be paid in the future, although there can be no assurance as to future dividends as they depend on future earnings, capital requirements and financial condition.

Company Stock Performance

The following graph compares the cumulative 5-year total return attained by stockholders on the Company's Common Stock relative to the cumulative total returns of the S&P Small Cap 600 Index and the S&P Small Cap 600 Construction, Farm Machinery and Heavy Truck index for the five-year period ended August 31, 2015. An investment of \$100 (with the reinvestment of all dividends) is assumed to have been made in the Company's Common Stock and in each of the indexes on August 31, 2010 and the graph shows its relative performance through August 31, 2015.

	8/10	8/11	8/12	8/13	8/14	8/15
Lindsay Corporation	100.00	169.63	179.33	209.82	217.06	215.53
S&P Smallcap 600	100.00	124.44	145.47	184.30	218.76	222.70
S&P SmallCap 600 Construction, Farm Machinery and Heavy Truck Index	100.00	124.13	114.48	170.50	211.34	204.51

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

⁽¹⁾ Fiscal 2015 includes operating results of Elecsys Corporation acquired in the second quarter of fiscal 2015 and SPF Water Engineering, LLC acquired in the fourth quarter of fiscal 2015

⁽²⁾ Fiscal 2014 includes operating results of Claude Laval Corporation acquired in fourth quarter of fiscal 2013.

⁽³⁾ Fiscal 2012 includes the operating results of IRZ Consulting, LLC acquired in the fourth quarter of fiscal 2011.

⁽⁴⁾ Defined as net earnings divided by beginning of period total assets.

ITEM 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Concerning Forward-Looking Statements - This Annual Report on Form 10-K, including Management's Discussion and Analysis of Financial Condition and Results of Operations, contains not only historical information, but also forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Statements that are not historical are forward-looking and reflect expectations for future Company performance. In addition, forward-looking statements may be made orally or in press releases, conferences, reports, on the Company's worldwide web site, or otherwise, in the future by or on behalf of the Company. When used by or on behalf of the Company, the words "expect," "anticipate," "estimate," "believe," "intend" and similar expressions generally identify forward-looking statements. For these statements throughout the Annual Report on Form 10-K, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. The entire sections entitled "Financial Overview and Outlook" and "Risk Factors" should be considered forward-looking statements.

Forward-looking statements involve a number of risks and uncertainties, including but not limited to those discussed in the "Risk Factors" section contained in Item 1A. Readers should not place undue reliance on any forward-looking statement and should recognize that the statements are predictions of future results which may not occur as anticipated. Actual results could differ materially from those anticipated in the forward-looking statements and from historical results, due to the risks and uncertainties described herein, as well as others not now anticipated. The risks and uncertainties described herein are not exclusive and further information concerning the Company and its businesses, including factors that potentially could materially affect the Company's financial results, may emerge from time to time. Except as required by law, the Company assumes no obligation to update forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements.

Company Overview

The Company manufactures and markets center pivot, lateral move, and hose reel irrigation systems. The Company also produces and markets irrigation controls, chemical injection systems and remote monitoring and control systems. These products are used by farmers to increase or stabilize crop production while conserving water, energy, and labor. Through its acquisitions, the Company has been able to enhance its capabilities in providing innovative, turn-key solutions to customers through the integration of its proprietary pump stations, controls and designs. The Company sells its irrigation products primarily to a world-wide independent dealer network, who resell to their customers, the farmers. The Company's primary production facilities are located in the United States. The Company has smaller production and sales operations in Brazil, France, China, Turkey and South Africa as well as distribution and sales operations in the Netherlands, Australia and New Zealand. The Company also manufactures and markets, through distributors and direct sales to customers, various infrastructure products, including moveable barriers for traffic lane management, crash cushions, preformed reflective pavement tapes and other road safety devices, through its production facilities in the United States and Italy and has produced road safety products in irrigation manufacturing facilities in China and Brazil. In addition, the Company's infrastructure segment produces large diameter steel tubing and railroad signals and structures, and provides outsourced manufacturing and production services for other companies.

For the business overall, the global, long-term drivers of water conservation, population growth, increasing importance of biofuels, and the need for safer, more efficient transportation solutions remain positive. Key factors which impact demand for the Company's irrigation products include agricultural commodity prices, net farm income, worldwide agricultural crop production, the profitability of agricultural crop production, availability of financing, governmental policies regarding the agricultural sector, water and energy conservation policies, the regularity of rainfall, regional climate change, and foreign currency exchange rates. A key factor which impacts demand for the Company's infrastructure products is the amount of spending authorized by governments to improve road and highway systems. Much of the U.S. highway infrastructure market is driven by government spending programs. For example, the U.S. government funds highway and road improvements through the Federal Highway Trust Fund Program. This program provides funding to improve the nation's roadway system. In July 2015, the U.S. government enacted an \$8 billion temporary highway-funding bill to fund highway and bridge projects, the latest in a series of short term funding bills over the last several years. Matching funding from the various states may be required as a condition of federal funding.

The Company continues to have an ongoing, structured, acquisition process that it expects to generate additional growth opportunities throughout the world in irrigation/water solutions. Lindsay is committed to achieving earnings growth by global market expansion, improvements in margins, and strategic acquisitions. Since 2001, the Company has utilized acquisitions and greenfield efforts to expand its product lines and add to its operations in Europe, South America, South Africa, the Netherlands, Australia, New Zealand, China and Turkey. The addition of those operations has allowed the Company to strengthen its market position in those regions.

New Accounting Standards Issued But Not Yet Adopted

See Note B, New Accounting Pronouncements, to the Company's consolidated financial statements for information regarding recently issued accounting pronouncements.

Critical Accounting Policies and Estimates

In preparing the consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP"), management must make a variety of decisions which impact the reported amounts and the related disclosures. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. In reaching such decisions, management applies judgment based on its understanding and analysis of the relevant facts and circumstances. Certain of the Company's accounting policies are critical, as these policies are most important to the presentation of the Company's consolidated results of operations and financial condition. They require the greatest use of judgments and estimates by management based on the Company's historical experience and management's knowledge and understanding of current facts and circumstances. Management periodically re-evaluates and adjusts the

estimates that are used as circumstances change. Following are the accounting policies management considers critical to the Company's consolidated results of operations and financial condition:

Revenue Recognition

The Company's revenue recognition accounting policy is critical because it can significantly impact the Company's consolidated results of operations and financial condition. The Company's basic criteria necessary for revenue recognition are: 1) evidence of a sales arrangement exists, 2) delivery of goods has occurred, 3) the sales price to the buyer is fixed or determinable, and 4) collectability is reasonably assured. The Company recognizes revenue when these criteria have been met and when title and risk of loss transfers to the customer. The Company generally has no post-delivery obligations to its independent dealers other than standard warranties. Revenues and gross profits on intercompany sales are eliminated in consolidation. Revenues from the sale of the Company's products are recognized based on the delivery terms in the sales contract. If an arrangement involves multiple deliverables, revenues from the arrangement are allocated to the separate units of accounting based on their relative selling price.

The Company offers a subscription-based service for wireless management and recognizes subscription revenue on a straight-line basis over the contract term. The Company leases certain infrastructure property held for lease to customers such as moveable concrete barriers and Road Zipper Systems™. Revenues for the lease of infrastructure property held for lease are recognized on a straight-line basis over the lease term.

The costs related to revenues are recognized in the same period in which the specific revenues are recorded. Shipping and handling fees billed to customers are reported in revenue. Shipping and handling costs incurred by the Company are included in cost of sales. Customer rebates, cash discounts and other sales incentives are recorded as a reduction of revenues at the time of the original sale. Estimates used in the recognition of operating revenues and cost of operating revenues include, but are not limited to, estimates for product warranties, product rebates, cash discounts and fair value of separate units of accounting on multiple deliverables.

Inventories

The Company's accounting policy on inventories is critical because the valuation and costing of inventory is essential to the presentation of the Company's consolidated results of operations and financial condition. Inventories are stated at the lower of cost or market. Cost is determined by the last-in, first-out (LIFO) method for the Company's Lindsay, Nebraska inventory and three warehouses in Idaho, Georgia and Texas. Cost is determined by the first-in, first-out (FIFO) method for inventory at operating locations in Nebraska, California, Wisconsin, China, Turkey and Australia. Cost is determined by the weighted average cost method for inventory at the Company's other operating locations in Kansas, Washington, Brazil, France, Italy and South Africa. At all locations, the Company reserves for obsolete, slow moving, and excess inventory by estimating the net realizable value based on the potential future use of such inventory.

Environmental Remediation Liabilities

The Company's accounting policy on environmental remediation is critical because it requires significant judgments and estimates by management, involves changing regulations and approaches to remediation plans, and any revisions could be material to the operating results of any fiscal quarter or fiscal year. The Company is subject to an array of environmental laws and regulations relating to the protection of the environment. In particular, the Company committed to remediate environmental contamination of the groundwater at and land adjacent to its Lindsay, Nebraska facility (the "site") with the EPA. The Company and its environmental consultants have developed a remedial alternative work plan, under which the Company continues to work with the EPA to define and implement steps to better contain and remediate the remaining contamination.

Environmental remediation liabilities include costs directly associated with site investigation and clean up, such as materials, external contractor costs and incremental internal costs directly related to the remedy. Estimates used to record environmental remediation liabilities are based on the Company's best estimate of probable future costs based on site-specific facts and circumstances. Estimates of the cost for the likely remedy are developed

using internal resources or by third-party environmental engineers or other service providers. The Company records the undiscounted environmental remediation liabilities that represent the points in the range of estimates that are most probable or the minimum amount when no amount within the range is a better estimate than any other amount.

In fiscal 2013, the Company and the EPA conducted a periodic five-year review of the status of the remediation of the contamination of the site. The Company intends to complete additional investigation of the soil and groundwater on the site during the first half of calendar 2016. Based on this investigation, the Company will then assess revisions to its remediation plan and expects to meet with the EPA toward the end of calendar 2016 to determine how to proceed. While any revisions could be material to the operating results of any fiscal quarter or fiscal year, the Company does not expect such additional expenses would have a material adverse effect on its liquidity or financial condition.

The Company accrues the anticipated cost of environmental remediation when the obligation is probable and can be reasonably estimated. Although the Company has accrued all reasonably estimable costs associated with remediation of the site, additional testing and environmental monitoring and remediation could be required in the future as part of the Company's ongoing discussions with the EPA regarding the development and implementation of the remedial action plans. In addition, the current investigation has not yet been completed and does not include all potentially affected areas on the site. Due to the current stage of discussions with the EPA and the uncertainty of the remediation actions that may be required with respect to these potentially affected areas, the Company believes that meaningful estimates of costs or range of costs cannot currently be made and accordingly have not been accrued.

Trade Receivables and Allowances

Trade receivables are reported on the balance sheet net of any doubtful accounts. Losses are recognized when it is probable that an asset has been impaired and the amount of the loss can be reasonably estimated. In estimating probable losses, the Company reviews specific accounts that are significant and past due, in bankruptcy or otherwise identified at risk for potential credit loss. Collectability of these specific accounts are assessed based on facts and circumstances of that customer, and an allowance for credit losses is established based on the probability of default. In assessing the likelihood of collection of receivable, the Company considers, for example, the Company's history of collections, the current status of discussions and repayment plans, collateral received, and other evidence and information regarding collection or default risk that is available in the market place. The allowance for credit losses attributable to the remaining accounts is established using probabilities of default and an estimate of associated losses based upon the aging of receivable balances, collection experience, economic condition and credit risk quality. In evaluating the allowance expense as a percentage of sales, if the prior three year average rate were to double, the result on the fiscal 2015 consolidated statement of operations would be additional expense of approximately \$2.8 million.

As the Company's international business has grown, the exposure to potential losses in international markets has also increased. These exposures can be difficult to estimate, particularly in areas of political instability or with governments with which the Company has limited experience or where there is a lack of transparency as to the current credit condition of governmental units. As of August 31, 2015 the Company had \$6.9 million in delinquent accounts receivable related to our business unit in China, and \$2.7 million of accounts receivable and \$2.0 million in performance bonds related to its contract in Iraq. The Company's allowance for all doubtful accounts related to both current and long-term receivables increased to \$9.7 million at August 31, 2015 from \$4.8 million at August 31, 2014. The Company's evaluation of the adequacy of the allowance for credit losses is based on facts and circumstances available to the Company at the date the consolidated financial statements are issued and considers any significant changes in circumstances occurring through the date that the financial statements are issued.

Valuation of Goodwill and Identifiable Intangible Assets

The Company's accounting policy on valuation of goodwill and identifiable intangible assets is critical because it requires significant judgments and estimates by management and can significantly affect the Company's consolidated results of operations and financial condition. Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination. Acquired intangible assets are recognized separately from goodwill. Goodwill and intangible assets with indefinite useful lives are tested for impairment at least annually at August 31 and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable. Assessment of the potential impairment of goodwill and identifiable intangible assets is an integral part of the Company's normal ongoing review of operations. Testing for potential impairment of these assets is significantly dependent on numerous assumptions and reflects management's best estimates at a particular point in time. The dynamic economic environments in which the Company's businesses operate and key economic and business assumptions related to projected selling prices, market growth, inflation rates and operating expense ratios, can significantly affect the outcome of impairment tests. Estimates based on these assumptions may differ significantly from actual results. Changes in factors and assumptions used in assessing potential impairments can have a significant impact on the existence and magnitude of impairments, as well as the time in which such impairments are recognized.

In testing goodwill for impairment, the Company has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (more than 50 percent) that the estimated fair value of a reporting unit is less than its carrying amount. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators include deterioration in general economic conditions, adverse changes in the markets in which an entity operates, increases in input costs that have negative effects on earnings and cash flows, or a trend of negative or declining cash flows over multiple periods, among others. If the Company elects to perform a qualitative assessment and determines that an impairment is more likely than not, the Company is then required to perform a quantitative impairment test, otherwise no further analysis is required. The Company also may elect not to perform the qualitative assessment and, instead, proceed directly to the quantitative impairment test. In fiscal 2015, in conjunction with the Company's annual review for impairment, the Company performed a qualitative analysis of goodwill for each of the Company's reporting units, which are the same as its operating segments, and did not identify any potential impairment.

In assessing other intangible assets not subject to amortization for impairment, the Company has the option to perform a qualitative assessment to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of such an intangible asset is less than its carrying amount. If the Company determines that it is not more likely than not that the fair value of such an intangible asset is less than its carrying amount, then the Company is not required to perform any additional tests for assessing intangible assets for impairment. However, if the Company concludes otherwise or elects not to perform the qualitative assessment, the Company is then required to perform a quantitative impairment test that involves a comparison of the estimated fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. In fiscal 2015, the Company performed a qualitative analysis of other intangible assets not subject to amortization and concluded there were no indicators of impairment.

Financial Overview and Outlook

Net earnings for fiscal 2015 were \$26.3 million or \$2.22 per diluted share compared with \$51.5 million or \$4.00 per diluted share in the prior year. The decrease in earnings was primarily attributable to lower revenues, which declined 9 percent to \$560.2 million from \$617.9 million. Other factors contributing to the current year decrease in net earnings included a \$5.0 million bad debt reserve on an international receivable, a \$2.9 million reserve against foreign income tax assets, \$1.8 million of acquisition and integration costs and \$1.5 million of environmental expenses. The primary driver of lower revenue was the irrigation segment, where sales decreased 16 percent to \$451.2 million. Infrastructure revenues increased 40 percent to \$109.0 million, partially offsetting the decline in irrigation revenue. Gross margins increased by 0.2 percentage points and operating expenses

increased by \$13.0 million, primarily due to the acquisition of Elecsys Corporation and additional bad debt expense. Operating margin for fiscal 2015 declined to 9.0 percent as compared to 12.7 percent for fiscal 2014 as a result of the items noted above as well as cost deleveraging from lower sales.

The Company's irrigation revenues are highly dependent upon the need for irrigated agricultural crop production, which, in turn, depends upon many factors, including the following primary drivers:

- ***Agricultural commodity prices*** - As of August 2015, corn prices have increased approximately 20 percent and soybean prices have decreased approximately 5 percent from August 2014. Although there has been an increase in corn prices from the previous year, both corn and soybean prices remain approximately 50 percent below peak levels reached in 2012.
- ***Net farm income*** - As of August 2015, the U.S. Department of Agriculture (USDA) estimated U.S. 2015 net farm income to be \$58.3 billion, down 36 percent from USDA's estimate of U.S. 2014 net farm income of \$91.1 billion. The U.S. 2015 net farm income forecast would be the lowest since 2006.
- ***Weather conditions*** – Optimal growing conditions for 2015 have led to projections of record harvests and contributed to sustaining lower crop prices. During the third and fourth quarters of fiscal 2014, storms across the Midwest created additional demand for replacement units, which was significantly decreased in fiscal 2015.
- ***Governmental policies*** - A number of government laws and regulations can impact the Company's business, including:
 - The Agricultural Act of 2014 provides certainty to growers by adopting a five-year farm bill. This law continues many of its existing programs, including funding for the Environmental Quality Incentives Program (EQIP), which provides financial assistance to farmers to implement conservation practices and is frequently used to assist in the purchase of center pivot irrigation systems.
 - In December 2014, certain tax incentives such as the Section 179 income tax deduction and bonus depreciation that encourage equipment purchases were retroactively reinstated for the 2014 calendar year. These incentives subsequently expired for calendar year 2015. Due to the timing of the reinstatement and subsequent expiration, these incentives did not benefit fiscal 2015 Company sales.
 - The U.S. government has imposed trade sanctions that that have and will continue to impact irrigation equipment sales to Russia and the Ukraine.
 - The ethanol mandate that increases corn demand continues to be debated with the EPA. In May, 2015, the EPA issued proposed blending standard and biofuel levels for 2015, 2016 and 2017 requirements. The proposed requirements, while decreased from the original mandate, still provide for continued growth in demand for the current and future calendar years. The EPA has agreed in principle to finalize at least the 2015 levels by the end of November, 2015.
 - Many international markets are affected by government policies such as subsidies and other agriculturally related incentives. While these policies can have a significant impact on an individual market, they typically do not have a material impact on consolidated results.
- ***Currency*** – The U.S. dollar has strengthened against most currencies including the Brazilian Real, the Euro, the South African Rand and the Australian dollar in comparison to the prior fiscal year.

U.S. irrigation revenues have contracted due to lower commodity prices and lower farm income, the reduction in the Central Plains drought conditions, the lack of significant demand driven by storm damage and the reduction in accelerated tax benefits. International markets remain active, but with some projects delayed due to lower commodity prices, the weakening of international currency and various regional conflicts. The current political environment in Russia, the Ukraine and Iraq may have a negative effect on international irrigation equipment

revenues. The factors outlined throughout this section do not indicate a significant change in macro demand for irrigation segment revenues in fiscal 2016, although these factors could change before the Company reaches its primary selling season in calendar 2016.

The infrastructure business has improved its profit profile and generated growth in an environment of constrained government spending. In July 2015, the U.S. government enacted an \$8 billion temporary highway-funding bill to fund highway and bridge projects, the latest in a series of short term funding bills over the last several years. Until and unless a long-term U.S. highway bill is passed, uncertainties and limitations on infrastructure growth will continue. In addition, FHWA has proposed a mandated change to highway safety product certification requirements. The change would require additional R&D spending and could have an impact on the competitive positioning of the Company's products. In spite of government spending uncertainty, opportunities exist for market share gains in each of the infrastructure product lines. Demand for the Company's transportation safety products continues to be driven by population growth and the need for improved road safety. These factors are unlikely to result in a significant change in demand in fiscal 2016.

As of August 31, 2015, the Company had an order backlog of \$48.0 million compared with \$79.6 million at August 31, 2014. The order backlog at August 31, 2014 included a \$12.7 million Road Zipper System™ order from the Golden Gate Bridge Highway & Transportation District that was recognized as revenue in fiscal 2015. The current period backlog included \$9.5 million of backlog from Elecsys Corporation. The Company's backlog can fluctuate from period to period due to the seasonality, cyclical nature, timing and execution of contracts. Backlog typically represents long-term projects as well as short lead-time orders and therefore, is generally not a good indication of the next quarter's revenues.

The global drivers for the Company's markets of population growth, expanded food production and efficient water use and infrastructure expansion support the Company's long-term growth goals. The most significant opportunities for growth over the next several years are in international markets, where irrigation use is significantly less developed and demand is driven primarily by food security, water scarcity and population growth.

Results of Operations

The following "Fiscal 2015 Compared to Fiscal 2014" and the "Fiscal 2014 Compared to Fiscal 2013" sections present an analysis of the Company's consolidated operating results displayed in the Consolidated Statements of Operations and should be read together with the information in Note Q, Industry Segment Information, to the consolidated financial statements.

Fiscal 2015 Compared to Fiscal 2014

The following table provides highlights for fiscal 2015 compared with fiscal 2014:

\$ in thousands	For the Years Ended August 31,		Percent Increase (Decrease)
	2015	2014	
Consolidated			
Operating revenues	\$ 560,181	\$ 617,933	(9%)
Cost of operating revenues	\$ 403,860	\$ 446,938	(10%)
Gross profit	\$ 156,321	\$ 170,995	(9%)
Gross margin	27.9%	27.7%	
Operating expenses ⁽¹⁾	\$ 105,626	\$ 92,637	14%
Operating income	\$ 50,695	\$ 78,358	(35%)
Operating margin	9.0%	12.7%	
Other (expense) income, net	\$ (3,944)	\$ 297	(1428%)
Income tax expense	\$ 20,442	\$ 27,143	(25%)
Effective income tax rate	43.7%	34.5%	
Net earnings	\$ 26,309	\$ 51,512	(49%)
Irrigation Equipment Segment (See Note Q)			
Operating revenues	\$ 451,205	\$ 539,943	(16%)
Operating income ⁽²⁾	\$ 50,765	\$ 91,697	(45%)
Operating margin ⁽²⁾	11.3%	17.0%	
Infrastructure Products Segment (See Note Q)			
Operating revenues	\$ 108,976	\$ 77,990	40%
Operating income ⁽²⁾	\$ 20,049	\$ 3,511	471%
Operating margin ⁽²⁾	18.4%	4.5%	

(1) Includes \$20.1 million and \$16.9 million of unallocated general and administrative expenses for fiscal 2015 and fiscal 2014, respectively.

(2) Excludes unallocated corporate general and administrative expenses.

Revenues

Operating revenues in fiscal 2015 decreased by 9 percent to \$560.2 million compared with \$617.9 million in fiscal 2014. The decrease is attributable to an \$88.7 million decrease in irrigation revenues offset in part by a \$31.0 million increase in infrastructure revenues. The irrigation segment provided 81 percent of Company revenue in fiscal 2015 as compared to 87 percent of the same prior year period.

U.S. irrigation revenues in fiscal 2015 of \$273.7 million, which include \$17.7 million from the newly acquired Elecsys Corporation, decreased \$57.8 million or 17 percent from \$331.5 million in fiscal 2014. The decrease in U.S. irrigation revenues is primarily due to a decline in the number of irrigation systems sold as compared to the prior year. Sustained low agricultural commodity prices, lower net farm income in 2015 and a lack of incremental storm damage compared to 2014 contributed to lower demand for U.S. irrigation equipment.

International irrigation revenues in fiscal 2015 of \$177.5 million decreased \$30.9 million or 15 percent from \$208.4 million in fiscal 2014. Foreign currency translation compared to the prior year reduced international irrigation revenues by \$18.0 million for the fiscal year ended August 31, 2015. Excluding the impact of foreign currency, revenues decreased most notably in the Middle East, Europe, Latin America and China, partially offset by increases in Brazil, Australia and Africa.

Infrastructure products segment revenues in fiscal 2015 of \$109.0 million increased by \$31.0 million or 40 percent from \$78.0 million in fiscal 2014. The increase in sales is primarily due to increases in Road Zipper System™ and road safety products.

Gross Margin

Gross profit was \$156.3 million for fiscal 2015, a decrease of \$14.7 million compared to fiscal 2014. The decrease in gross profit was primarily due to the decline in sales partially offset by an increase in gross margin to 27.9 percent for fiscal 2015 from 27.7 percent for fiscal 2014. Gross margin in irrigation declined by slightly more than 1 percentage point due primarily to pricing pressure and cost deleverage on lower volumes. Infrastructure gross margin increased by approximately 8 percentage points due to a mix shift to higher margin products and cost leverage on higher sales.

Operating Expenses

The Company's operating expenses of \$105.6 million for fiscal 2015 increased \$13.0 million compared to fiscal 2014 operating expenses of \$92.6 million. The current year includes \$6.4 million of Elecsys Corporation operating expenses, \$5.0 million of bad debt expense, \$2.0 million in incremental health benefit costs, \$1.8 million of acquisition and integration expenses and a \$1.5 million increase in estimated environmental expenses, partially offset by reductions in discretionary spending and personnel related expenses of \$2.9 million. Operating expenses were 18.9 percent of sales for fiscal 2015 compared to 15.0 percent of sales for fiscal 2014. Operating margin was 9.0 percent for fiscal 2015 as compared to 12.7 percent for fiscal 2014. The Company's operating income decreased to \$50.7 million in fiscal 2015 compared to \$78.4 million during the prior fiscal year.

Income Taxes

The Company recorded income tax expense of \$20.4 million and \$27.1 million for fiscal 2015 and fiscal 2014, respectively. The effective income tax rate increased to 43.7 percent in fiscal 2015 compared to 34.5 percent in fiscal 2014. The increase in the annual effective income tax rate primarily relates to a \$2.9 million deferred income tax asset valuation allowance as well as the earnings mix among jurisdictions.

Net Earnings

Net earnings for fiscal 2015 were \$26.3 million or \$2.22 per diluted share compared to \$51.5 million, or \$4.00 per diluted share for the prior fiscal year.

Fiscal 2014 Compared to Fiscal 2013

The following table provides highlights for fiscal 2014 compared with fiscal 2013:

\$ in thousands	For the Years Ended August 31,		Percent Increase (Decrease)
	2014	2013	
Consolidated			
Operating revenues	\$ 617,933	\$ 690,848	(11%)
Cost of operating revenues	\$ 446,938	\$ 496,014	(10%)
Gross profit	\$ 170,995	\$ 194,834	(12%)
Gross margin	27.7%	28.2%	
Operating expenses ⁽¹⁾	\$ 92,637	\$ 87,773	6%
Operating income	\$ 78,358	\$ 107,061	(27%)
Operating margin	12.7%	15.5%	
Other income, net	\$ 297	\$ 246	21%
Income tax expense	\$ 27,143	\$ 36,737	(26%)
Effective income tax rate	34.5%	34.2%	
Net earnings	\$ 51,512	\$ 70,570	(27%)
Irrigation Equipment Segment (See Note Q)			
Operating revenues	\$ 539,943	\$ 625,996	(14%)
Operating income ⁽²⁾	\$ 91,697	\$ 125,395	(27%)
Operating margin ⁽²⁾	17.0%	20.0%	
Infrastructure Products Segment (See Note Q)			
Operating revenues	\$ 77,990	\$ 64,852	20%
Operating income (loss) ⁽²⁾	\$ 3,511	\$ (811)	533%
Operating margin ⁽²⁾	4.5%	(1.3%)	

(1) Includes \$16.9 million and \$17.5 million of unallocated general and administrative expenses for fiscal 2014 and fiscal 2013, respectively.

(2) Excludes unallocated corporate general and administrative expenses.

Revenues

Operating revenues in fiscal 2014 decreased by 11 percent to \$617.9 million compared with \$690.8 million in fiscal 2013. The decrease is attributable to an \$86.1 million decrease in irrigation revenues offset in part by a \$13.1 million increase in infrastructure revenues. The irrigation segment provided 87 percent of Company revenue in fiscal 2014 as compared to 91 percent of the same prior year period.

U.S. irrigation revenues in fiscal 2014 of \$331.5 million decreased \$54.2 million or 14 percent from \$385.7 million in fiscal 2013. The decrease in U.S. irrigation revenues is primarily due to a decline in the number of irrigation systems sold as compared to the prior year. Lower agricultural commodity prices contributed to lower demand for U.S. irrigation equipment. An incremental increase in sales resulting from storms in the U.S. irrigation market contributed an estimated \$27.0 million of revenues partially offsetting the market decline. The revenues of \$20.8 million generated from the LAKOS[®] separators and filtration solution business that was acquired in August 2013 partially offset the decrease in sales of irrigation systems as well.

International irrigation revenues in fiscal 2014 of \$208.4 million decreased \$31.9 million or 13 percent from \$240.3 million in fiscal 2013. The decrease in international irrigation revenues is primarily due to a decline in the number of irrigation systems sold as compared to the prior year. Operating revenues decreased most significantly in the Middle East due to the near completion of the Iraq contract in fiscal 2013. Revenues from the Iraq contract during fiscal 2014 were \$2.4 million compared to \$33.4 million during fiscal 2013. In other international markets, revenue declined in Russia/Ukraine, Canada and China partially offset by increases in Australia and water filtration system export sales of \$7.2 million from the LAKOS[®] business.

Infrastructure products segment revenues in fiscal 2014 of \$78.0 million increased by \$13.1 million or 20 percent from \$64.9 million in fiscal 2013. The increase in sales is primarily due to increases in road safety products and railroad signals and structures.

Gross Margin

Gross profit was \$171.0 million for fiscal 2014, a decrease of \$23.8 million compared to fiscal 2013. The decrease in gross profit was primarily due to the decline in sales and a decrease in gross margin to 27.7 percent for fiscal 2014 from 28.2 percent for fiscal 2013. Gross margins in irrigation declined by less than one percentage point due primarily to fixed cost deleverage on lower sales volume. Infrastructure gross margins improved by approximately two percentage points primarily due to a combination of mix shift to higher margin products and fixed cost leverage on higher sales volume.

Operating Expenses

The Company's operating expenses of \$92.6 million for fiscal 2014 increased \$4.9 million compared to fiscal 2013 operating expenses of \$87.8 million. Excluding the acquired LAKOS® business, operating expenses decreased \$3.6 million primarily due to a reduction of \$1.7 million in personnel related expenses including incentive compensation, \$1.0 million decrease in research and development expenses and \$0.9 million in lower advertising expenses. Operating expenses were 15.0 percent of sales for fiscal 2014 compared to 12.7 percent of sales for fiscal 2013

Operating margin was 12.7 percent for fiscal 2014 as compared to 15.5 percent for fiscal 2013. The Company's operating income decreased to \$78.4 million in fiscal 2014 compared to \$107.1 million during the prior fiscal year primarily due to a decrease in revenues.

Income Taxes

The Company recorded income tax expense of \$27.1 million and \$36.7 million for fiscal 2014 and fiscal 2013, respectively. The effective income tax rate increased to 34.5 percent in fiscal 2014 compared to 34.2 percent in fiscal 2013. The increase in the annual effective income tax rate primarily relates to the earnings mix among jurisdictions.

Net Earnings

Net earnings for fiscal 2014 were \$51.5 million or \$4.00 per diluted share compared to \$70.6 million, or \$5.47 per diluted share for the prior fiscal year.

Liquidity and Capital Resources

The Company's cash and cash equivalents totaled \$139.1 million at August 31, 2015 compared with \$171.8 million at August 31, 2014. The Company requires cash for financing its receivables and inventories, paying operating expenses and capital expenditures, and for dividends and share repurchases. The Company meets its liquidity needs and finances its capital expenditures from its available cash and funds provided by operations along with borrowings under the credit arrangements that are described below. The Company believes its current cash resources, projected operating cash flow, and remaining capacity under its continuing bank lines of credit are sufficient to cover all of its expected working capital needs, planned capital expenditures and dividends. The Company's Capital Allocation Plan outlined below could require the Company to incur additional debt depending on the size and timing of share repurchases and potential acquisitions.

The Company's total cash and cash equivalents held by foreign subsidiaries was approximately \$23.5 million and \$33.1 million as of August 31, 2015 and 2014, respectively. The Company considers earnings of foreign subsidiaries to be permanently reinvested, and would need to accrue and pay taxes if these funds were repatriated. The Company does not intend to repatriate the funds, and does not expect these funds to have a significant impact on the Company's overall liquidity.

Net working capital was \$227.1 million at August 31, 2015, as compared with \$257.7 million at August 31, 2014. Cash flows provided by operations totaled \$48.7 million during the year ended August 31, 2015 compared to \$91.8 million provided by operations during the same prior year period. Cash provided by operations decreased by \$43.1 million compared to the prior year period primarily as a result of a \$25.2 million decrease in net earnings and normal fluctuations in the changes between accounts receivable, other current liabilities and current taxes payable.

Cash flows used in investing activities totaled \$79.6 million during the year ended August 31, 2015 compared to \$18.5 million during the same prior year period. Net cash used in investing activities was higher in fiscal 2015 primarily due to the \$67.2 million acquisition of Elecsys Corporation that occurred in the second quarter of fiscal 2015. Capital spending of \$15.2 million in fiscal 2015 decreased compared to the prior year capital spending of \$17.7 million.

Cash flows provided by financing activities totaled \$3.9 million during the year ended August 31, 2015 compared to cash flows used of \$53.6 million during the same prior year period. The \$57.5 million increase in cash provided by financing activities was primarily due to \$115.0 million proceeds from the issuance of long-term debt, partially offset by an increase in share repurchases of \$55.8 million.

Capital Allocation Plan

The Company's capital allocation plan is to continue investing in revenue and earnings growth, combined with a defined process for enhancing returns to stockholders. Under the Company's announced capital allocation plan in January 2014, the priorities for uses of cash include:

- Investment in organic growth including capital expenditures and expansion of international markets,
- Dividends to stockholders, along with expectations to increase dividends on an annual basis,
- Synergistic water related acquisitions that provide attractive returns to stockholders, and
- Opportunistic share repurchases taking into account cyclical and seasonal fluctuations.

Capital Expenditures and Expansion of International Markets

In fiscal 2016, the Company expects capital expenditures of approximately \$15.0 million to \$20.0 million, largely focused on manufacturing capacity expansion and productivity improvements. The Company's management does maintain flexibility to modify the amount and timing of some of the planned expenditures in response to economic conditions.

Dividends

In fiscal 2015, the Company paid cash dividends of \$1.09 per common share or \$12.8 million to stockholders as compared to \$0.92 per common share or \$11.7 million in fiscal 2014.

Share Repurchases

On January 3, 2014, the Company announced that its Board of Directors authorized a share repurchase program of up to \$150.0 million of common stock, effective as of January 2, 2014, through January 2, 2016. On July 22, 2015, the Company announced that its Board of Directors increased its outstanding share repurchase authorization by \$100.0 million. Under the program, shares may be repurchased in privately negotiated and/or open market transactions as well as under formalized trading plans in accordance with the guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. During the twelve months ended August 31, 2015, the Company repurchased 1,198,089 shares for an aggregate purchase price of \$96.9 million. During the twelve months ended August 31, 2014, the Company repurchased 497,899 shares of common stock for an aggregate purchase price of \$41.0 million. The remaining amount available under the repurchase program was \$112.1 million as of August 31, 2015.

Senior Notes

On February 19, 2015, the Company issued \$115.0 million in aggregate principal amount of its Senior Notes, Series A, entirely due and payable on February 19, 2030 (the "Senior Notes"). Borrowings under the Senior

Notes are unsecured and have equal priority with borrowings under the Company's other senior unsecured indebtedness. Interest is payable semi-annually at an annual rate of 3.82 percent.

Amended Credit Agreement

On February 18, 2015, the Company entered into a \$50 million unsecured Amended and Restated Revolving Credit Agreement (the "Amended Credit Agreement"), with Wells Fargo Bank, National Association (the "Bank"). The Amended Credit Agreement amends and restates the Revolving Credit Agreement, dated January 24, 2008, and last amended on January 22, 2014. The Company intends to use borrowings under the Amended Credit Agreement for working capital purposes and to fund acquisitions. At August 31, 2015 and 2014, the Company had no outstanding borrowings under the Amended Credit Agreement or the Revolving Credit Facility, respectively. The amount of borrowings available at any time under the Amended Credit Agreement is reduced by the amount of standby letters of credit then outstanding. At August 31, 2015, the Company had the ability to borrow up to \$44.4 million under this facility, after consideration of outstanding standby letters of credit of \$5.6 million. Borrowings under the Amended Credit Agreement bear interest at a variable rate equal to LIBOR plus 90 basis points (1.10 percent at August 31, 2015), subject to adjustment as set forth in the Amended Credit Agreement. Interest is paid on a monthly to quarterly basis depending on loan type. The Company also pays an annual commitment fee of 0.25 percent on the unused portion of the Amended Credit Agreement. Borrowings under the Amended Credit Agreement will be unsecured and have equal priority with borrowings under the Company's other senior unsecured indebtedness. Unpaid principal and interest is due by February 18, 2018.

Each of the agreements above contains certain covenants relating primarily to the Company's financial condition. These financial covenants include a funded debt to EBITDA leverage ratio and an interest coverage ratio. Upon the occurrence of any event of default of these covenants, including a change in control of the Company, all amounts outstanding thereunder may be declared to be immediately due and payable. At August 31, 2015 and 2014, the Company was in compliance with all financial loan covenants contained in its credit agreements in place as of each of those dates.

Elecsys Series 2006A Bonds

The Company's wholly-owned subsidiary, Elecsys Corporation, has outstanding \$2.4 million in principal amount of industrial revenue bonds that were issued in 2006 (the "Series 2006A Bonds"). Principal and interest on the Series 2006A Bonds are payable monthly through maturity on September 1, 2026. The interest rate is adjustable based on the yield of the 5-year United States Treasury Notes, plus 0.45 percent (1.99 percent as of August 31, 2015). The obligations under the Series 2006A Bonds are secured by a first priority security interest in certain real estate.

Inflation

The Company is subject to the effects of changing prices. During fiscal 2015, the Company realized pricing volatility for purchases of certain commodities, in particular steel and zinc products, used in the production of its products. While the cost outlook for commodities used in the production of the Company's products is not certain, management believes it can manage these inflationary pressures by introducing appropriate sales price adjustments and by actively pursuing internal cost reduction efforts, while further refining the Company's inventory and raw materials risk management system. However, competitive market pressures may affect the Company's ability to pass price adjustments along to its customers.

Contractual Obligations, Commercial Commitments and Off-Balance Sheet Arrangements

In the normal course of business, the Company enters into contracts and commitments which obligate the Company to make future payments. The Company uses off-balance sheet arrangements, such as leases accounted for as operating leases, standby letters of credit and performance bonds, where sound business principles warrant their use. The table below sets forth the Company's significant future obligations by time period.

\$ in thousands					
Contractual Obligations ⁽¹⁾	Total	Less than 1 Year	2-3 Years	4-5 Years	More than 5 Years
Operating lease obligations	\$ 17,675	\$ 3,683	\$ 5,523	\$ 3,471	\$ 4,998
Pension benefit obligations	7,126	557	1,082	1,036	4,451
Long-term debt	117,366	193	398	414	116,361
Interest	64,002	4,437	8,862	8,846	41,857
Total	<u>\$ 206,169</u>	<u>\$ 8,870</u>	<u>\$ 15,865</u>	<u>\$ 13,767</u>	<u>\$ 167,667</u>

⁽¹⁾ Total liabilities for unrecognized tax benefits as of August 31, 2015 were \$3.8 million and are excluded from the table above. Unrecognized tax benefits are classified on the Company's consolidated balance sheets within other current liabilities (\$2.5 million) and within other noncurrent liabilities (\$1.3 million).

In fiscal 2013, the Company entered into a \$39 million contract with the government of Iraq for the delivery and installation of irrigation equipment, of which \$35.8 million has been fulfilled. The Company has suspended installation services indefinitely until the political environment improves in Iraq. The Company has a \$2.0 million performance bond securing its obligations under the contract. No amounts have been accrued for potential losses in the consolidated financial statements as of August 31, 2015 as the Company continues to evaluate its exposure to claims for uncompleted services.

The Company does not have any additional off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

ITEM 7A – Quantitative and Qualitative Disclosures about Market Risk

The Company uses certain financial derivatives to mitigate its exposure to volatility in interest rates and foreign currency exchange rates. The Company uses these derivative instruments to hedge exposures in the ordinary course of business and does not invest in derivative instruments for speculative purposes. The credit risk under these interest rate and foreign currency agreements is not considered to be significant. The Company attempts to manage market and credit risks associated with its derivative instruments by establishing and monitoring limits as to the types and degree of risk that may be undertaken, and by entering into transactions with counterparties that have investment grade credit ratings. As of August 31, 2015, the Company's derivative counterparty had investment grade credit ratings.

The Company has manufacturing operations in the United States, Brazil, France, Italy, South Africa, Turkey and China. The Company has sold products throughout the world and purchases certain of its components from third-party international suppliers. Export sales made from the United States are principally U.S. dollar denominated. At times, export sales may be denominated in a currency other than the U.S. dollar. A majority of the Company's revenue generated from operations outside the United States is denominated in local currency. Accordingly, these sales are not typically subject to significant foreign currency transaction risk. The Company's most significant transactional foreign currency exposures are the Euro, the Brazilian real, the South African rand and the Chinese renminbi in relation to the U.S. dollar. Fluctuations in the value of foreign currencies create exposures, which can adversely affect the Company's results of operations. Based on the consolidated statement of operations for the year ended August 31, 2015, the Company estimates the potential decrease in operating income from a 10 percent adverse change in the underlying exchange rates, in U.S. dollar terms, would be approximately \$1.0 million.

In order to reduce exposures related to changes in foreign currency exchange rates, the Company, at times, may enter into forward exchange or option contracts for transactions denominated in a currency other than the functional currency for certain of its operations. This activity primarily relates to economically hedging against foreign currency risk in purchasing inventory, sales of finished goods, intercompany transactions and future settlement of foreign denominated assets and liabilities. The Company had \$9.5 million of U.S. dollar equivalent cash flow forward exchange contracts and option contracts outstanding as of August 31, 2015.

In order to reduce translation exposure resulting from translating the financial statements of its international subsidiaries into U.S. dollars, the Company, at times, utilizes Euro foreign currency forward contracts to hedge a portion of its Euro net investment exposure in its foreign operations. At August 31, 2015, the Company had outstanding Euro foreign currency forward contracts to sell 29.1 million Euro at fixed prices expected to settle during the first quarter of fiscal 2016. At August 31, 2015, the Company also had an outstanding foreign currency forward contract to sell 43.0 million South African Rand at fixed prices to settle during the first quarter of fiscal 2016. Based on the net investments contracts outstanding at August 31, 2015, the Company estimates the potential decrease in fair value from a 10 percent adverse change in the underlying exchange rates would be approximately \$3.2 million. This decrease in fair value would be reflected as a reduction to other comprehensive income offsetting the translation exposure or adjustment of the international subsidiaries.

ITEM 8 – Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Lindsay Corporation:

We have audited the accompanying consolidated balance sheets of Lindsay Corporation and subsidiaries as of August 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended August 31, 2015. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule Item 15(a)(2) of this Form 10-K. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Lindsay Corporation and subsidiaries as of August 31, 2015 and 2014, and the results of their operations and their cash flows for each of the years in the three-year period ended August 31, 2015, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Lindsay Corporation's internal control over financial reporting as of August 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated October 20, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Lindsay Corporation and Subsidiaries
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A. DESCRIPTION OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

Lindsay Corporation, along with its subsidiaries (collectively called “Lindsay” or the “Company”), is a global leader in providing a variety of proprietary water management and road infrastructure products and services. The Company has been involved in the manufacture and distribution of agricultural irrigation equipment since 1955 and has grown from a regional company to an international water efficiency solutions and highway infrastructure firm with worldwide sales and distribution. Lindsay, a Delaware corporation, maintains its corporate offices in Omaha, Nebraska. The Company has operations which are categorized into two major reporting segments.

Irrigation Segment – The Company’s irrigation segment includes the manufacture and marketing of center pivot, lateral move, and hose reel irrigation systems which are used principally in the agricultural industry to increase or stabilize crop production while conserving water, energy and labor. The irrigation segment also manufactures and markets repair and replacement parts for its irrigation systems and controls. In addition, the irrigation segment also designs and manufactures water pumping stations and controls for the agriculture, golf, landscape and municipal markets and filtration solutions for groundwater, agriculture, industrial and heat transfer markets. The Company continues to strengthen irrigation product offerings through innovative technology such as GPS positioning and guidance, variable rate irrigation, wireless irrigation management, machine-to-machine (M2M) communication technology solutions and smartphone applications. The Company’s domestic irrigation manufacturing facilities are located in Lindsay, Nebraska; Hartland, Wisconsin; Olathe, Kansas and Fresno, California. Internationally, the Company has production operations in Brazil, France, China, Turkey and South Africa as well as distribution and sales operations in the Netherlands, Australia and New Zealand. The Company also exports equipment from the U.S. to other international markets.

Infrastructure Segment – The Company’s infrastructure segment includes the manufacture and marketing of moveable barriers, specialty barriers, crash cushions and end terminals, road marking and road safety equipment, large diameter steel tubing, and railroad signals and structures. The infrastructure segment also provides outsourced manufacturing and production services. The principal infrastructure manufacturing facilities are located in Rio Vista, California; Milan, Italy and Omaha, Nebraska.

Notes to the consolidated financial statements describe various elements of the financial statements and the accounting policies, estimates, and assumptions applied by management. While actual results could differ from those estimated at the time of preparation of the consolidated financial statements, management believes that the accounting policies, assumptions, and estimates applied promote the representational faithfulness, verifiability, neutrality, and transparency of the accounting information included in the consolidated financial statements. The significant accounting policies of the Company are as follows:

(1) Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany balances and transactions are eliminated in consolidation.

(2) Reclassifications

Certain reclassifications have been made to prior financial statements to conform to the current-year presentation.

(3) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(4) Revenue Recognition

The Company's basic criteria necessary for revenue recognition are: 1) evidence of a sales arrangement exists, 2) delivery of goods has occurred, 3) the sales price to the buyer is fixed or determinable, and 4) collectability is reasonably assured. The Company recognizes revenue when these criteria have been met and when title and risk of loss transfers to the customer. The Company generally has no post-delivery obligations to its independent dealers other than standard warranties. Revenues and gross profits on intercompany sales are eliminated in consolidation. Revenues from the sale of the Company's products are recognized based on the delivery terms in the sales contract. If an arrangement involves multiple deliverables, revenues from the arrangement are allocated to the separate units of accounting based on their relative selling price.

The Company offers a subscription-based service for wireless management and recognizes subscription revenue on a straight-line basis over the contract term. The Company leases certain infrastructure property held for lease to customers such as moveable concrete barriers and Road Zipper Systems™. Revenues for the lease of infrastructure property held for lease are recognized on a straight-line basis over the lease term.

The costs related to revenues are recognized in the same period in which the specific revenues are recorded. Shipping and handling fees billed to customers are reported in revenue. Shipping and handling costs incurred by the Company are included in cost of sales. Customer rebates, cash discounts and other sales incentives are recorded as a reduction of revenues at the time of the original sale. Estimates used in the recognition of operating revenues and cost of operating revenues include, but are not limited to, estimates for product warranties, product rebates, cash discounts and fair value of separate units of accounting on multiple deliverables.

(5) Stock Based Compensation

The Company recognizes compensation expense for all share-based payment awards made to employees and directors based on estimated fair values on the date of grant. The Company uses the straight-line amortization method over the vesting period of the awards. The Company has historically issued shares upon exercise of stock options or vesting of restricted stock units or performance stock units from new stock issuances.

The value of the portion of the award that is ultimately expected to vest is recognized as expense in the Company's Consolidated Statement of Operations over the periods during which the employee or director is required to perform a service in exchange for the award.

The Company uses the Black-Scholes option-pricing model ("Black-Scholes model") as its valuation method for stock option awards. Under the Black-Scholes model, the fair value of stock option awards on the date of grant is estimated using an option-pricing model that is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the Company's expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Restricted stock, restricted stock units, performance shares and performance stock units issued under the 2015 Long-Term Incentive Plan will have a grant date fair value equal to the fair market value of the underlying stock on the grant date less present value of expected dividends.

(6) Warranty Costs

The Company's provision for product warranty reflects management's best estimate of probable liability under its product warranties. At the time a sale is recognized, the company records the estimated future warranty costs. The Company generally determines its total future warranty liability by applying historical claims rate experience to the amount of equipment that has been sold and is still within the warranty period. In addition, the Company records provisions for known warranty claims. This provision is periodically adjusted to reflect actual experience.

(7) Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of three months or less.

(8) Receivables and Allowances

Trade receivables are reported on the balance sheet net of any doubtful accounts. Losses are recognized when it is probable that an asset has been impaired and the amount of the loss can be reasonably estimated. In estimating probable losses, the Company reviews specific accounts that are significant and past due, in bankruptcy or otherwise identified as at risk for potential credit loss. Collectability of these specific accounts are assessed based on facts and circumstances of that customer, and an allowance for credit losses is established based on the probability of default. In assessing the likelihood of collection of receivable, the Company considers (for example) the Company's history of collections, the current status of discussions and repayment plans, collateral received, and other evidence and information regarding collection or default risk that is available in the market place. The allowance for credit losses attributable to the remaining accounts is established using probabilities of default and an estimate of associated losses based upon the aging of receivable balances, collection experience, economic condition and credit risk quality.

As the Company's international business has grown, the exposure to potential losses in international markets has also increased. These exposures can be difficult to estimate, particularly in areas of political instability or with governments with which the Company has limited experience or where there is a lack of transparency as to the current credit condition of governmental units. As of August 31, 2015 the Company had \$6.9 million in delinquent accounts receivable related to our business unit in China, and \$2.7 million of accounts receivable and \$2.0 million in performance bonds related to its contract in Iraq. The Company's allowance for all doubtful accounts related to both current and long-term receivables increased to \$9.7 million at August 31, 2015 from \$4.8 million at August 31, 2014. The Company's evaluation of the adequacy of the allowance for credit losses is based on facts and circumstances available to the Company at the date the consolidated financial statements are issued and considers any significant changes in circumstances occurring through the date that the financial statements are issued.

(9) Inventories

Inventories are stated at the lower of cost or market. Cost is determined by the last-in, first-out (LIFO) method for the Company's Lindsay, Nebraska inventory and three warehouses in Idaho, Georgia and Texas. Cost is determined by the first-in, first-out (FIFO) method for inventory at operating locations in Nebraska, California, Wisconsin, China, Turkey and Australia. Cost is determined by the weighted average cost method for inventory at the Company's other operating locations in Kansas, Washington, Brazil, France, Italy and South Africa. At all locations, the Company reserves for obsolete, slow moving, and excess inventory by estimating the net realizable value based on the potential future use of such inventory.

(10) Property, Plant and Equipment

Property, plant, equipment, and capitalized assets held for lease are stated at cost. The Company capitalizes major expenditures and charges to operating expenses the cost of current maintenance and repairs. Provisions for depreciation and amortization have been computed principally on the straight-line method for buildings and equipment. Rates used for depreciation are based principally on the following expected lives: buildings -- 15 to 30 years; equipment -- 3 to 7 years; leased barrier transfer machines — 8 to 10 years; leased barriers — 12 years; other -- 2 to 20 years and leasehold improvements – shorter of the economic life or term of the lease. All of the Company's long-lived asset groups are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the sum of the expected future cash flows is less than the carrying amount of the asset group, an impairment loss is recognized based upon the difference between the fair value of the asset and its carrying value. No impairments were recorded during the fiscal years ended August 31, 2015, 2014, and 2013. The cost and accumulated depreciation relating to assets retired or otherwise disposed of are eliminated from the respective accounts at the time of disposition. The resulting gain or loss is included in operating income in the consolidated statements of operations.

(11) Valuation of Goodwill and Identifiable Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination. Acquired intangible assets are recognized separately from goodwill. Goodwill and intangible assets

with indefinite useful lives are tested for impairment at least annually at August 31 and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable. Assessment of the potential impairment of goodwill and identifiable intangible assets is an integral part of the Company's normal ongoing review of operations. Testing for potential impairment of these assets is significantly dependent on numerous assumptions and reflects management's best estimates at a particular point in time. The dynamic economic environments in which the Company's businesses operate and key economic and business assumptions related to projected selling prices, market growth, inflation rates and operating expense ratios, can significantly affect the outcome of impairment tests. Estimates based on these assumptions may differ significantly from actual results. Changes in factors and assumptions used in assessing potential impairments can have a significant impact on the existence and magnitude of impairments, as well as the time in which such impairments are recognized.

In testing goodwill for impairment, the Company has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (more than 50 percent) that the estimated fair value of a reporting unit is less than its carrying amount. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators include deterioration in general economic conditions, adverse changes in the markets in which an entity operates, increases in input costs that have negative effects on earnings and cash flows, or a trend of negative or declining cash flows over multiple periods, among others. If the Company elects to perform a qualitative assessment and determines that an impairment is more likely than not, the Company is then required to perform a quantitative impairment test, otherwise no further analysis is required. The Company also may elect not to perform the qualitative assessment and, instead, proceed directly to the quantitative impairment test. In fiscal 2015, in conjunction with the Company's annual review for impairment, the Company performed a qualitative analysis of goodwill for each of the Company's reporting units, which are the same as its operating segments, and did not identify any potential impairment.

In assessing other intangible assets not subject to amortization for impairment, the Company has the option to perform a qualitative assessment to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of such an intangible asset is less than its carrying amount. If the Company determines that it is not more likely than not that the fair value of such an intangible asset is less than its carrying amount, then the Company is not required to perform any additional tests for assessing intangible assets for impairment. However, if the Company concludes otherwise or elects not to perform the qualitative assessment, the Company is then required to perform a quantitative impairment test that involves a comparison of the estimated fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. In fiscal 2015, the Company performed a qualitative analysis of other intangible assets not subject to amortization and concluded there were no indicators of impairment.

(12) Income Taxes

Income taxes are accounted for utilizing the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying value of existing assets and liabilities and their respective tax bases. These expected future tax consequences are measured based on currently enacted tax rates. The effect of tax rate changes on deferred tax assets and liabilities is recognized in income during the period that includes the enactment date. In assessing the ability to realize deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax asset will not be realized. The Company's evaluation of the adequacy of any potential allowance is based on facts and circumstances available to the Company at the date the consolidated financial statements are issued and considers any significant changes in circumstances occurring through the date that the financial statements are issued.

(13) Net Earnings per Share

Basic net earnings per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net earnings per share is computed using the weighted-average number of common shares outstanding plus dilutive potential common shares outstanding during the period.

Employee stock options, non-vested shares and similar equity instruments granted by the Company are treated as potential common share equivalents outstanding in computing diluted net earnings per share. The Company's diluted common shares outstanding reported in each period includes the dilutive effect of restricted stock units, in-the-money options, and performance stock units for which threshold performance conditions have been satisfied and is calculated based on the average share price for each fiscal period using the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of excess tax benefits that would be recorded in additional paid-in-capital when exercised are assumed to be used to repurchase shares.

(14) Derivative Instruments and Hedging Activities

The Company uses certain financial derivatives to mitigate its exposure to volatility in interest rates and foreign currency exchange rates. All derivative instruments are recorded on the balance sheet at their respective fair values. The Company uses these derivative instruments only to hedge exposures in the ordinary course of business and does not invest in derivative instruments for speculative purposes. On the date a derivative contract is entered into, the Company may elect to designate the derivative as a fair value hedge, a cash flow hedge, or the hedge of a net investment in a foreign operation.

The Company also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative that is used in the hedging transaction is effective. For those instruments that are designated as a cash flow hedge and meet certain documentary and analytical requirements to qualify for hedge accounting treatment, changes in the fair value for the effective portion are reported in other comprehensive income ("OCI"), net of related income tax effects, and are reclassified to the income statement when the effects of the item being hedged are recognized in the income statement. Changes in fair value of derivative instruments that qualify as hedges of a net investment in foreign operations are recorded as a component of accumulated currency translation adjustment in accumulated other comprehensive income ("AOCI"), net of related income tax effects. Changes in the fair value of undesignated hedges are recognized currently in earnings. All changes in derivative fair values due to ineffectiveness are recognized currently in income.

The Company discontinues hedge accounting prospectively when it is determined that the derivative is no longer effective in offsetting changes in the cash flows of the hedged item, the derivative expires or is sold, terminated, or exercised, or management determines that designation of the derivative as a hedging instrument is no longer appropriate. In situations in which the Company does not elect hedge accounting or hedge accounting is discontinued and the derivative is retained, the Company carries or continues to carry the derivative at its fair value on the balance sheet and recognizes any subsequent changes in its fair value through earnings. The Company manages market and credit risks associated with its derivative instruments by establishing and monitoring limits as to the types and degree of risk that may be undertaken, and by entering into transactions with high-quality counterparties. As of August 31, 2015, the Company's derivative counterparty had investment grade credit ratings.

(15) Fair Value Measurements

The Company's disclosure of the fair value of assets and liabilities is based on a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. Inputs refers broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. The categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

- Level 1 – inputs to valuation techniques are quoted prices in active markets for identical assets or liabilities
- Level 2 – inputs to the valuation techniques are other than quoted prices but are observable for the assets or liabilities, either directly or indirectly
- Level 3 – inputs to the valuation techniques are unobservable for the assets or liabilities

(16) Treasury Stock

When the Company repurchases its outstanding stock, it records the repurchased shares at cost as a reduction to shareholders' equity. The weighted average cost method is utilized for share re-issuances. The difference between the cost and the re-issuance price is charged or credited to a "capital in excess of stated value – treasury stock" account to the extent that there is a sufficient balance to absorb the charge. If the treasury stock is sold for an amount less than its cost and there is not a sufficient balance in the capital in excess of stated value – treasury stock account, the excess is charged to retained earnings.

(17) Contingencies

The Company's accounting for contingencies covers a variety of business activities including contingencies for legal exposures and environmental exposures. The Company accrues these contingencies when its assessments indicate that it is probable that a liability has been incurred and an amount can be reasonably estimated. The Company's estimates are based on currently available facts and its estimates of the ultimate outcome or resolution. Actual results may differ from the Company's estimates resulting in an impact, positive or negative, on earnings.

(18) Environmental Remediation Liabilities

Environmental remediation liabilities include costs directly associated with site investigation and clean up, such as materials, external contractor costs and incremental internal costs directly related to the remedy. The Company accrues the anticipated cost of environmental remediation when the obligation is probable and can be reasonably estimated. Estimates used to record environmental remediation liabilities are based on the Company's best estimate of probable future costs based on site-specific facts and circumstances. Estimates of the cost for the likely remedy are developed using internal resources or by third-party environmental engineers or other service providers. The Company records the undiscounted environmental remediation liabilities that represent the points in the range of estimates that are most probable or the minimum amount when no amount within the range is a better estimate than any other amount.

(19) Translation of Foreign Currency

The Company's portion of the assets and liabilities related to foreign investments are translated into U.S. dollars at the exchange rates in effect at the balance sheet date. Revenue and expenses are translated at the average rates of exchange prevailing during the year. Unrealized gains or losses are reflected within common shareholders' equity as accumulated other comprehensive income or loss.

B. NEW ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*. The standard provides a single model for revenue arising from contracts with customers and supersedes current revenue recognition guidance. The ASU requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of goods or services. The ASU will replace existing revenue recognition guidance in U.S.

GAAP when it becomes effective. In August 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers: Deferral of the Effective Date*. This update deferred the effective date of ASU No. 2014-09 to the first quarter of fiscal year 2019. Early adoption is not permitted. The guidance permits companies to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. The Company is currently evaluating the impact the adoption will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method, nor has it determined the effect of the standard on its ongoing financial reporting.

In September 2015, the FASB issued ASU No. 2015-16, *Business Combinations*. The standard requires an entity to recognize adjustments to provisional amounts resulting from business combinations to be recognized in the period in which they are determined. The standard requires the acquirer to record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, result from the change to provisional amounts, calculated as if the accounting had been completed at the acquisition date. The effective date of ASU No. 2015-16 will be the first quarter of fiscal 2017 with early adoption permitted for financial statements that have not been issued. The guidance requires companies to apply the update prospectively for amounts that occur after the effective date. The Company is currently evaluating the effect this update will have on the consolidated financial statements.

C. ACQUISITIONS

In connection with business acquisitions, the Company records the estimated fair value of the identifiable assets acquired, liabilities assumed, goodwill, and any non-controlling interest in the acquired, all determined as of the date of acquisition. The Company incurred \$1.8 million of acquisition and integration expenses in fiscal 2015, which were included in general and administrative expenses on the consolidated statement of operations.

Elecsys Corporation

On January 22, 2015, the Company completed a merger in which Elecsys Corporation, a provider of machine-to-machine (M2M) technology solutions and custom electronic systems (formerly NASDAQ: ESYS) ("Elecsys"), was merged with a wholly-owned subsidiary of the Company. The Company paid \$17.50 per share of Elecsys common stock outstanding (including cashing out of Elecsys equity compensation awards) for total merger cash consideration of \$67.2 million, net of cash acquired of \$3.4 million.

The Elecsys business capabilities will facilitate the Company's development of efficient solutions for irrigation and other water uses as well as adjacent product lines and technologies. As part of the integration of Elecsys with the Company's irrigation business, the Company closed the Digitec manufacturing facility in Milford, Nebraska and consolidated the electronics manufacturing operations with Elecsys.

The following table summarizes the merger consideration paid for Elecsys and the final allocation of fair value of the assets acquired and liabilities assumed at the acquisition date.

<u>\$ in thousands</u>	<u>Amount</u>
Cash and cash equivalents	\$ 3,401
Receivables	2,006
Inventories	8,467
Other current assets	1,527
Property and equipment	6,457
Intangible assets	24,490
Goodwill	39,986
Other long-term assets	41
Accounts payable and accrued liabilities	(2,862)
Current and long-term debt	(2,478)
Other long-term liabilities	(10,458)
Total cash consideration	70,577
Less cash acquired	(3,401)
Total cash consideration, net of cash acquired	67,176
Add current and long-term debt assumed	2,478
Total purchase price	<u>\$ 69,654</u>

The acquired intangible assets include amortizable intangible assets of \$17.1 million and indefinite-lived intangible assets of \$7.4 million related to tradenames. The amortizable intangible assets have a weighted-average useful life of approximately 11.5 years. The following table summarizes the identifiable intangible assets at fair value.

<u>\$ in thousands</u>	<u>Weighted Average Useful Life in Years</u>	<u>Fair Value of Identifiable Asset</u>
Intangible assets:		
Customer relationships	10.9	\$ 11,820
Tradenames	N/A	7,430
Developed technology (proprietary)	14.7	4,420
Non-compete agreements	4.5	430
Backlog	0.4	390
Total intangible assets	<u>11.5</u>	<u>\$ 24,490</u>

Goodwill related to the acquisition of Elecsys primarily relates to intangible assets that do not qualify for separate recognition, including the experience and knowledge of Elecsys management, its assembled workforce, and its intellectual capital and specialization with M2M communication technology solutions, data acquisition and management systems, and custom electronic equipment. Goodwill recorded in connection with this acquisition is included in the irrigation reporting segment and is non-deductible for income tax purposes. Pro forma information related to this acquisition was not included because the impact on the Company's consolidated financial statements was not considered to be material.

SPF Water Engineering, LLC

On July 20, 2015, the Company completed the acquisition of SPF Water Engineering, LLC ("SPF") based in Boise, Idaho. SPF is a full-service water resource consulting firm offering water supply studies, well design and construction, water and wastewater system design, water rights consulting and more. The Company paid \$2.5 million, which was financed with cash on hand, for total purchase consideration of \$2.4 million net of cash acquired of \$0.1 million. The allocation of purchase price for SPF is considered preliminary, largely with respect to the valuation of certain acquired intangible assets.

The total purchase price for SPF has been allocated to the tangible and intangible assets acquired and liabilities assumed based on fair value assessments. The Company's allocation of purchase price for this acquisition consisted of current assets of \$0.7 million, fixed assets of \$0.1 million, finite-lived intangible assets of \$1.0 million, goodwill of \$0.9 million and current liabilities of \$0.2 million. Goodwill resulting from this acquisition is largely attributable to the existing workforce and historical and projected profitability of the acquired business. The goodwill associated with SPF is included in the goodwill of the Company's irrigation segment. Pro forma information related to this acquisition was not included because the impact on the Company's consolidated financial statements was not considered to be material.

D. NET EARNINGS PER SHARE

The following table shows the computation of basic and diluted net earnings per share for the years ended August 31, 2015, 2014 and 2013:

(\$ and shares in thousands, except per share amounts)	For the years ended August 31,		
	2015	2014	2013
Numerator:			
Net earnings	\$ 26,309	\$ 51,512	\$ 70,570
Denominator:			
Weighted average shares outstanding	11,818	12,832	12,830
Diluted effect of stock equivalents	37	50	71
Weighted average shares outstanding assuming dilution	11,855	12,882	12,901
Basic net earnings per share	\$ 2.23	\$ 4.01	\$ 5.50
Diluted net earnings per share	\$ 2.22	\$ 4.00	\$ 5.47

Certain stock options and restricted stock units were excluded from the computation of diluted net earnings per share because their effect would have been anti-dilutive. Performance stock units are excluded from the calculation of dilutive potential common shares until the threshold performance conditions have been satisfied. The following table shows the securities excluded from the computation of earnings per share because their effect would have been anti-dilutive:

Units and options in thousands	For the years ended August 31,		
	2015	2014	2013
Restricted stock units	3	3	3
Stock options	50	44	29

E. ACCUMULATED OTHER COMPREHENSIVE LOSS

Accumulated other comprehensive loss is included in the accompanying Consolidated Balance Sheets in the shareholders' equity section, and consists of the following components:

\$ in thousands	August 31,	
	2015	2014
Accumulated other comprehensive loss:		
Defined benefit pension plan, net of tax benefit of \$1,540 and \$1,524	\$ (2,523)	\$ (2,497)
Foreign currency translation, net of hedging activities, net of tax expense of \$3,154 and \$1,688	(12,785)	296
Total accumulated other comprehensive loss	\$ (15,308)	\$ (2,201)

The following is a rollforward of the balances in accumulated other comprehensive income (loss), net of tax.

<u>\$ in thousands</u>	Defined benefit pension plan adjustment	Foreign currency translation adjustment	Accumulated other comprehensive loss
Balance at August 31, 2013	\$ (2,287)	(29)	(2,316)
Current-period change	(210)	325	115
Balance at August 31, 2014	(2,497)	296	(2,201)
Current-period change	(26)	(13,081)	(13,107)
Balance at August 31, 2015	(2,523)	\$ (12,785)	(15,308)

F. INCOME TAXES

For financial reporting purposes earnings (losses) before income taxes include the following components:

<u>\$ in thousands</u>	For the years ended August 31,		
	2015	2014	2013
United States	\$ 49,668	\$ 70,066	\$ 99,781
Foreign	(2,917)	8,589	7,526
	<u>\$ 46,751</u>	<u>\$ 78,655</u>	<u>\$ 107,307</u>

Significant components of the income tax provision are as follows:

<u>\$ in thousands</u>	For the years ended August 31,		
	2015	2014	2013
Current:			
Federal	\$ 15,908	\$ 29,015	\$ 33,498
State	1,426	2,176	2,303
Foreign	2,830	4,147	4,173
Total current	<u>20,164</u>	<u>35,338</u>	<u>39,974</u>
Deferred:			
Federal	(406)	(6,936)	(1,554)
State	45	(346)	(178)
Foreign	639	(913)	(1,505)
Total deferred	<u>278</u>	<u>(8,195)</u>	<u>(3,237)</u>
Total income tax provision	<u>\$ 20,442</u>	<u>\$ 27,143</u>	<u>\$ 36,737</u>

Total income tax provision resulted in effective tax rates differing from that of the statutory United States Federal income tax rates. The reasons for these differences are:

\$ in thousands	For the years ended August 31,					
	2015		2014		2013	
	Amount	%	Amount	%	Amount	%
U.S. statutory rate	\$ 16,363	35.0	\$ 27,529	35.0	\$ 37,558	35.0
State and local taxes, net of federal tax benefit	911	1.9	1,067	1.4	1,365	1.3
Foreign tax rate differences	1,311	2.8	(116)	(0.1)	(103)	(0.1)
Domestic production activities deduction	(1,548)	(3.3)	(2,170)	(2.8)	(2,638)	(2.5)
Research and development and fuel tax credits	(71)	(0.1)	(89)	(0.1)	(289)	(0.3)
Deferred tax asset valuation allowance	2,949	6.3	-	-	-	-
Other	527	1.1	922	1.1	844	0.8
Effective rate	<u>\$ 20,442</u>	<u>43.7</u>	<u>\$ 27,143</u>	<u>34.5</u>	<u>\$ 36,737</u>	<u>34.2</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

\$ in thousands	August 31,	
	2015	2014
Deferred tax assets:		
Deferred revenue	\$ 1,411	\$ 2,812
Net operating loss carry forwards	1,703	433
Defined benefit pension plan	2,754	2,780
Share-based compensation	1,814	2,106
State tax credits	87	87
Inventory	1,883	1,396
Warranty	2,672	3,354
Vacation	181	191
Accrued expenses and allowances	12,135	10,955
Other	527	-
Gross deferred tax assets	<u>25,167</u>	<u>24,114</u>
Valuation allowance	(2,949)	-
Net deferred tax assets	<u>\$ 22,218</u>	<u>\$ 24,114</u>
Deferred tax liabilities:		
Intangible assets	(17,514)	(10,247)
Property, plant and equipment	(6,687)	(6,919)
Inventory	(83)	(121)
Other	-	(980)
Total deferred tax liabilities	<u>(24,284)</u>	<u>(18,267)</u>
Net deferred tax (liabilities) assets	<u>\$ (2,066)</u>	<u>\$ 5,847</u>

In assessing the ability to realize deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Because the Company has a recent

history of generating cumulative losses in a certain foreign tax jurisdiction, management did not consider projections of future taxable income as persuasive evidence for the recoverability of deferred tax assets in that jurisdiction. Therefore, the Company recorded a valuation allowance of \$2.9 million as of August 31, 2015.

The Company does not intend to repatriate earnings of its foreign subsidiaries and accordingly, has not provided a U.S. deferred income tax liability on these undistributed earnings that are indefinitely reinvested. The Company would recognize a deferred income tax liability if the Company were to determine that such earnings are no longer indefinitely reinvested. At August 31, 2015, undistributed earnings of the Company's foreign subsidiaries amounted to approximately \$26.8 million. Determination of the estimated amount of unrecognized deferred tax liability on these undistributed earnings is not practicable.

The Company recognizes tax benefits only for tax positions that are more likely than not to be sustained upon examination by tax authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely to be realized upon settlement. Unrecognized tax benefits are tax benefits claimed in the Company's tax returns that do not meet these recognition and measurement standards.

A reconciliation of changes in pre-tax unrecognized tax benefits is as follows:

\$ in thousands	August 31,	
	2015	2014
Unrecognized Tax Benefits at September 1	\$ 3,611	\$ 902
Increases for positions taken in current year	57	50
Increases for positions taken in prior years	547	2,721
Reduction resulting from lapse of applicable statute of limitations	(122)	(62)
Decreases for positions taken in prior years	(257)	-
Unrecognized Tax Benefits at August 31	<u>\$ 3,836</u>	<u>\$ 3,611</u>

The net amount of unrecognized tax benefits at August 31, 2015 and 2014 that, if recognized, would impact the Company's effective tax rate was \$1.5 million and \$1.0 million, respectively. Recognition of these tax benefits would have a favorable impact on the Company's effective tax rate. The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. Total accrued pre-tax liabilities for interest and penalties included in the unrecognized tax benefits liability were \$1.2 million and \$0.9 million for the years ended August 31, 2015 and 2014, respectively.

While it is expected that the amount of unrecognized tax benefits will change in the next twelve months as a result of the expiration of statutes of limitations, the Company does not expect this change to have a significant impact on its results of operations or financial position.

The Company files income tax returns in the United States and in state, local, and foreign jurisdictions. The Company is no longer subject to examination by tax authorities in most jurisdictions for years prior to 2012. Subsequent to the fiscal year-end, the U.S. Internal Revenue Service (IRS) completed its audit for fiscal 2011.

G. INVENTORIES

(\$ in thousands)	August 31,	
	2015	2014
Raw materials and supplies	\$ 29,427	\$ 19,953
Work in process	7,318	9,990
Finished goods and purchased parts	44,269	48,300
Total inventory value before LIFO adjustment	81,014	78,243
Less adjustment to LIFO value	(6,084)	(6,547)
Inventories, net	<u>\$ 74,930</u>	<u>\$ 71,696</u>

H. PROPERTY, PLANT AND EQUIPMENT

\$ in thousands	August, 31	
	2015	2014
Operating property, plant and equipment:		
Land	\$ 4,721	\$ 3,315
Buildings	44,032	38,573
Equipment	100,254	91,254
Other	9,135	14,946
Total operating property, plant and equipment	158,142	148,088
Accumulated depreciation	(88,750)	(83,674)
Total operating property, plant and equipment, net	\$ 69,392	\$ 64,414
Property held for lease:		
Machines	5,769	4,395
Barriers	17,687	17,213
Total property held for lease	\$ 23,456	\$ 21,608
Accumulated depreciation	(14,192)	(13,565)
Total property held for lease, net	\$ 9,264	\$ 8,043
Property, plant and equipment, net	\$ 78,656	\$ 72,457

Depreciation expense was \$11.7 million, \$10.8 million and \$9.8 million for the years ended August 31, 2015, 2014, and 2013, respectively.

I. GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amount of goodwill by reportable segment for the year ended August 31, 2015 and 2014 is as follows:

\$ in thousands	Irrigation	Infrastructure	Total
Balance as of August 31, 2013	\$ 20,667	\$ 16,747	37,414
Finalization of Claude Laval Corp acquisition	(403)	-	(403)
Foreign currency translation	29	(19)	10
Balance as of August 31, 2014	20,293	\$ 16,728	\$ 37,021
Acquisition of Elecsys	39,986	-	39,986
Acquisition of SPF	893	-	893
Foreign currency translation	(267)	(832)	(1,099)
Balance as of August 31, 2015	\$ 60,905	\$ 15,896	\$ 76,801

The components of the Company's identifiable intangible assets at August 31, 2015 and 2014 are included in the table below.

\$ in thousands	August 31,					
	2015			2014		
	Weighted Average Years	Gross Carrying Amount	Accumulated Amortization	Weighted Average Years	Gross Carrying Amount	Accumulated Amortization
Amortizable intangible assets:						
Patents and developed technology	14.3	\$ 33,741	\$ (16,473)	13.0	\$ 30,282	\$ (14,687)
Customer relationships	12.2	19,958	(6,884)	7.4	7,932	(5,304)
Non-compete agreements	10.4	2,343	(1,044)	5.6	1,336	(852)
Other	1.9	1,010	(852)	1.6	517	(366)
Unamortizable intangible assets:						
Tradenames	N/A	20,121	-	N/A	13,122	-
Total	12.1	\$ 77,173	\$ (25,253)	10.0	\$ 53,189	\$ (21,209)

Amortization expense for amortizable intangible assets was \$4.7 million, \$4.0 million and \$2.8 million for 2015, 2014, and 2013, respectively.

Future estimated amortization of intangible assets for the next five years is as follows:

Fiscal Years	\$ in thousands	
2016	\$	4,717
2017		4,447
2018		4,204
2019		3,550
2020		3,140
Thereafter		11,741
	\$	31,799

The Company updated its impairment evaluation of goodwill and intangible assets with indefinite useful lives at August 31, 2015. No impairment losses were indicated as a result of the annual impairment testing for fiscal years 2015, 2014 and 2013.

J. OTHER CURRENT LIABILITIES

\$ in thousands	August 31,	
	2015	2014
Other current liabilities:		
Compensation and benefits	\$ 16,168	\$ 16,622
Warranty	7,271	9,331
Deferred revenues	6,146	8,979
Dealer related liabilities	5,328	7,103
Income tax liabilities	4,034	8,922
Customer deposits	3,161	7,366
Other	13,997	15,620
Total other current liabilities	\$ 56,105	\$ 73,943

K. CREDIT ARRANGEMENTS

Senior Notes

On February 19, 2015, the Company issued \$115.0 million in aggregate principal amount of its Senior Notes, Series A, entirely due and payable on February 19, 2030 (the “Senior Notes”). Borrowings under the Senior Notes are unsecured and have equal priority with borrowings under the Company’s other senior unsecured indebtedness. Interest is payable semi-annually at an annual rate of 3.82 percent.

Amended Credit Agreement

On February 18, 2015, the Company entered into a \$50 million unsecured Amended and Restated Revolving Credit Agreement (the “Amended Credit Agreement”), with Wells Fargo Bank, National Association (the “Bank”). The Amended Credit Agreement amends and restates the Revolving Credit Agreement, dated January 24, 2008, and last amended on January 22, 2014. The Company intends to use borrowings under the Amended Credit Agreement for working capital purposes and to fund acquisitions. At August 31, 2015 and 2014, the Company had no outstanding borrowings under the Amended Credit Agreement or the Revolving Credit Facility, respectively. The amount of borrowings available at any time under the Amended Credit Agreement is reduced by the amount of standby letters of credit then outstanding. At August 31, 2015, the Company had the ability to borrow up to \$44.4 million under this facility, after consideration of outstanding standby letters of credit of \$5.6 million. Borrowings under the Amended Credit Agreement bear interest at a variable rate equal to LIBOR plus 90 basis points (1.10 percent at August 31, 2015), subject to adjustment as set forth in the Amended Credit Agreement. Interest is paid on a monthly to quarterly basis depending on loan type. The Company also pays an annual commitment fee of 0.25 percent on the unused portion of the Amended Credit Agreement. Borrowings under the Amended Credit Agreement will be unsecured and have equal priority with borrowings under the Company’s other senior unsecured indebtedness. Unpaid principal and interest is due by February 18, 2018.

Each of the agreements above contains certain covenants relating primarily to the Company’s financial condition. These financial covenants include a funded debt to EBITDA leverage ratio and an interest coverage ratio. Upon the occurrence of any event of default of these covenants, including a change in control of the Company, all amounts outstanding thereunder may be declared to be immediately due and payable. At August 31, 2015 and 2014, the Company was in compliance with all financial loan covenants contained in its credit agreements in place as of each of those dates.

Elecsys Series 2006A Bonds

The Company’s wholly-owned subsidiary, Elecsys Corporation, has outstanding \$2.4 million in principal amount of industrial revenue bonds that were issued in 2006 (the “Series 2006A Bonds”). Principal and interest on the Series 2006A Bonds are payable monthly through maturity on September 1, 2026. The interest rate is adjustable based on the yield of the 5-year United States Treasury Notes, plus 0.45 percent (1.99 percent as of August 31, 2015). The obligations under the Series 2006A Bonds are secured by a first priority security interest in certain real estate.

Long-term debt consists of the following:

(\$ in thousands)	August 31 2015	August 31 2014
Senior Notes	\$ 115,000	\$ -
Amended Credit Agreement	-	-
Elecsys Series 2006A Bonds	2,366	-
Total debt	117,366	-
Less current portion	(193)	-
Total long-term debt	\$ 117,173	\$ -

Principal payments due on the debt are as follows:

Due within:	\$ in thousands	
1 year	\$	193
2 years		197
3 years		201
4 years		205
5 years		209
Thereafter		116,361
	\$	117,366

L. FINANCIAL DERIVATIVES

\$ in thousands	Fair Values of Derivative Instruments		
	Asset (Liability)	August 31,	August 31,
	Balance Sheet Location	2015	2014
Derivatives designated as hedging instruments:			
Foreign currency forward contracts	Other current assets	\$ 217	\$ 900
Foreign currency forward contracts	Other current liabilities	(352)	(240)
Total derivatives designated as hedging instruments		\$ (135)	\$ 660
Derivatives not designated as hedging instruments:			
Foreign currency forward contracts	Other current assets	495	-
Foreign currency forward contracts	Other current liabilities	(61)	(160)
Total derivatives not designated as hedging instruments		\$ 434	\$ (160)

In addition, accumulated other comprehensive income (“AOCI”) included realized and unrealized after-tax gains of \$5.4 million and \$2.0 million at August 31, 2015 and 2014, respectively, related to derivative contracts designated as hedging instruments.

Net Investment Hedging Relationships

\$ in thousands	Amount of (Loss) Recognized in OCI on Derivatives		
	For the years ended August 31,		
	2015	2014	2013
Foreign currency forward contracts, net of tax expense (benefit) of \$2,083, \$16, and (\$286)	\$ (3,420)	\$ (53)	\$ (357)

During fiscal 2015, 2014 and 2013, the Company settled Euro foreign currency forward contracts resulting in after-tax net (losses) gains of \$3.8 million, (\$0.5 million) and (\$0.6 million), respectively, which were included in OCI as part of a currency translation adjustment. There were no amounts recorded in the consolidated statement of operations related to ineffectiveness of Euro foreign currency forward contracts for the years ended August 31, 2015, 2014 and 2013. Accumulated currency translation adjustment in AOCI at August 31, 2015, 2014 and 2013 reflected realized and unrealized after-tax gains of \$5.4 million, \$2.0 million and \$2.0 million, respectively.

At August 31, 2015 and 2014, the Company had outstanding Euro foreign currency forward contracts to sell 29.1 million Euro and 28.9 million Euro, respectively, at fixed prices to settle during the next fiscal quarter. At August 31, 2015 and 2014, the Company also had an outstanding foreign currency forward contract to sell 43.0 million South African Rand at fixed prices to settle during the next fiscal quarter. The Company’s foreign currency forward contracts qualify as hedges of a net investment in foreign operations.

Derivatives Not Designated as Hedging Instruments

In order to reduce exposures related to changes in foreign currency exchange rates, the Company, at times, may enter into forward exchange or option contracts for transactions denominated in a currency other than the functional currency for certain of the Company's operations. This activity primarily relates to economically hedging against foreign currency risk in purchasing inventory, sales of finished goods, and future settlement of foreign denominated assets and liabilities. The Company may choose whether or not to designate these contracts as hedges. For those contracts not designated, changes in fair value are recognized currently in the income statement. At August 31, 2015 and 2014, the Company had \$9.5 million and \$4.9 million, respectively, of U.S. dollar equivalent of foreign currency forward contracts outstanding.

M. FAIR VALUE MEASUREMENTS

The following table presents the Company's financial assets and liabilities measured at fair value based upon the level within the fair value hierarchy in which the fair value measurements fall, as of August 31, 2015 and 2014, respectively:

\$ in thousands	August 31, 2015			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 139,093	\$ -	\$ -	\$ 139,093
Derivative assets	\$ -	\$ 712	\$ -	\$ 712
Derivative liabilities	\$ -	\$ (413)	\$ -	\$ (413)

\$ in thousands	August 31, 2015			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 171,842	\$ -	\$ -	\$ 171,842
Derivative assets	\$ -	\$ 900	\$ -	\$ 900
Derivative liabilities	\$ -	\$ (400)	\$ -	\$ (400)

The carrying value of long-term debt (including current portion) was \$117.4 million as of August 31, 2015. Based on current market rates, the fair value of this debt was estimated to be \$114.9 million as of August 31, 2015. The Company had no outstanding long-term debt as of August 31, 2014.

N. COMMITMENTS AND CONTINGENCIES

In the ordinary course of its business operations, the Company enters into arrangements that obligate it to make future payments under contracts such as lease agreements. Additionally, the Company is involved, from time to time, in commercial litigation, employment disputes, administrative proceedings, business disputes and other legal proceedings. The Company has established accruals for certain proceedings based on an assessment of probability of loss. The Company believes that any potential loss in excess of the amounts accrued would not have a material effect on the business or its consolidated financial statements. Such proceedings are exclusive of environmental remediation matters which are discussed separately below.

Environmental Remediation

In 1992, the Company entered into a consent decree with the U.S. Environmental Protection Agency (the "EPA") in which the Company committed to remediate environmental contamination of the groundwater that was discovered in 1982 through 1990 at and adjacent to its Lindsay, Nebraska facility (the "site"). The site was added to the EPA's list of priority superfund sites in 1989. Between 1993 and 1995, remediation plans for the site were approved by the EPA and fully implemented by the Company. Since 1998, the primary remaining contamination at the site has been the presence of volatile organic compounds in the soil and groundwater. To date, the remediation process has consisted primarily of drilling wells into the aquifer and pumping water to the surface to allow these contaminants to be removed by aeration.

In fiscal 2012, the Company undertook an investigation to assess further potential site remediation and containment actions. In connection with the receipt of preliminary results of this investigation and other evaluations, the Company estimated that it would incur \$7.2 million in remediation of source area contamination and operating costs and accrued that undiscounted amount. The EPA has not approved the Company's remediation plan.

In addition to the source area noted above, the Company has determined that volatile organic compounds also exist under one of the manufacturing buildings on the site. Due to the location, the Company has not yet determined the extent of these compounds or the extent to which they are contributing to groundwater contamination. Based on the current stage of discussions with the EPA and the uncertainty of the remediation actions that may be required with respect to this affected area, if any, the Company believes that meaningful estimates of costs or range of costs cannot currently be made and accordingly have not been accrued.

In fiscal 2013, the Company and the EPA conducted a periodic five-year review of the status of the remediation of the contamination of the site. During a meeting with the EPA in December 2014, the EPA requested that the Company prepare a feasibility study related to the site, which resulted in a revision to the Company's remediation timeline. In November 2014, the Company accrued \$1.5 million of incremental operating costs to reflect its updated timeline of when an approved remediation plan could begin. The Company now intends to perform its investigation of the soil and groundwater on the site during the first half of calendar 2016. In connection with the development of the feasibility study, the Company will assess revisions to its remediation plan and expects to meet with the EPA toward the end of calendar 2016 to determine how to proceed.

The Company accrues the anticipated cost of investigation and remediation when the obligation is probable and can be reasonably estimated. Although the Company has accrued all reasonably estimable costs associated with the site, it anticipates there could be revisions to the current remediation plan as well as additional testing and environmental monitoring as part of the Company's ongoing discussions with the EPA regarding the development and implementation of the remedial action plans. While any revisions could be material to the operating results of any fiscal quarter or fiscal year, the Company does not expect such additional expenses would have a material adverse effect on its liquidity or financial condition.

The following table summarizes the undiscounted environmental remediation liability classifications included in the balance sheet as of August 31, 2015 and 2014:

Environmental Remediation Liabilities		
\$ in thousands	August 31,	August 31,
Balance Sheet Location	2015	2014
Other current liabilities	\$ 1,431	\$ 1,370
Other noncurrent liabilities	6,100	5,025
Total environmental remediation liabilities	<u>\$ 7,531</u>	<u>\$ 6,395</u>

Leases

The Company leases land, buildings, machinery, equipment, and computer equipment under various non-cancelable operating lease agreements. At August 31, 2015, future minimum lease payments under non-cancelable operating leases were as follows:

Fiscal Years	\$ in thousands
2016	3,683
2017	2,989
2018	2,534
2019	2,101
2020	1,370
Thereafter	4,998
	<u>\$ 17,675</u>

Lease expense was \$4.5 million, \$4.0 million and \$3.9 million for the years ended August 31, 2015, 2014, and 2013, respectively.

O. RETIREMENT PLANS

The Company has defined contribution profit-sharing plans covering substantially all of its full-time U.S. employees. Participants may voluntarily contribute a percentage of compensation, but not in excess of the maximum allowed under the Internal Revenue Code. The plans provide for a matching contribution by the Company. The Company's total contributions charged to expense under the plans were \$1.2 million, \$1.2 million and \$1.0 million for the years ended August 31, 2015, 2014 and 2013, respectively.

A supplementary non-qualified, non-funded retirement plan for six former executives is also maintained. Plan benefits are based on the executive's average total compensation during the three highest compensation years of employment. This unfunded supplemental retirement plan is not subject to the minimum funding requirements of ERISA. The Company has purchased life insurance policies on certain former executives named in this supplemental retirement plan to provide funding for this liability.

As of August 31, 2015 and 2014, the funded status of the supplemental retirement plan was recorded in the consolidated balance sheets. The Company utilizes an August 31 measurement date for plan obligations related to the supplemental retirement plan. As this is an unfunded retirement plan, the funded status is equal to the benefit obligation.

The funded status of the plan and the net amount recognized in the accompanying balance sheets as of August 31 is as follows:

<u>\$ in thousands</u>	<u>August 31,</u>	
	<u>2015</u>	<u>2014</u>
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 7,157	\$ 6,881
Interest cost	275	314
Actuarial loss	251	519
Benefits paid	(557)	(557)
Benefit obligation at end of year	<u>\$ 7,126</u>	<u>\$ 7,157</u>

Amounts recognized in the statement of financial position consist of:

<u>\$ in thousands</u>	<u>August 31,</u>	
	<u>2015</u>	<u>2014</u>
Other current liabilities	\$ 557	\$ 557
Pension benefit liabilities	6,569	6,600
Net amount recognized	<u>\$ 7,126</u>	<u>\$ 7,157</u>

The before-tax amounts recognized in accumulated other comprehensive loss consists of:

<u>\$ in thousands</u>	<u>August 31,</u>	
	<u>2015</u>	<u>2014</u>
Net actuarial loss	\$ (4,063)	\$ (4,021)

For the years ended August 31, 2015 and 2014, the Company assumed a discount rate of 4.10 percent and 4.00 percent, respectively, for the determination of the liability. The assumptions used to determine benefit obligations and costs are selected based on current and expected market conditions. The discount rate is based on a hypothetical portfolio of long-term corporate bonds with cash flows approximating the timing of expected benefit payments.

For the years ended August 31, 2015, 2014 and 2013, the Company assumed a discount rate of 4.00 percent, 4.75 percent and 3.75 percent, respectively, for the determination of the net periodic benefit cost. The components of the net periodic benefit cost for the supplemental retirement plan are as follows:

<u>\$ in thousands</u>	<u>For the years ended August 31,</u>		
	<u>2015</u>	<u>2014</u>	<u>2013</u>
Interest cost	\$ 275	\$ 314	\$ 266
Net amortization and deferral	209	181	212
Total	<u>\$ 484</u>	<u>\$ 495</u>	<u>\$ 478</u>

The estimated actuarial loss for the supplemental retirement plan that will be amortized, on a pre-tax basis, from accumulated other comprehensive loss into net periodic benefit cost during fiscal 2016 will be \$0.2 million.

The Company's future annual contributions to the supplemental retirement plan will be equal to expected net benefit payments since the plan is unfunded. The following net benefit payments are expected to be paid:

<u>Fiscal Years</u>	<u>\$ in thousands</u>
2016	\$ 557
2017	546
2018	536
2019	523
2020	513
Thereafter	4,451
	<u>\$ 7,126</u>

P. WARRANTIES

Product Warranties

The Company generally warrants its products against certain manufacturing and other defects. These product warranties are provided for specific periods and/or usage of the product. The accrued product warranty costs are for a combination of specifically identified items and other incurred, but not identified, items based primarily on historical experience of actual warranty claims. This reserve is classified within other current liabilities.

The following tables provide the changes in the Company's product warranties:

<u>\$ in thousands</u>	<u>For the years ended August 31,</u>	
	<u>2015</u>	<u>2014</u>
Warranties:		
Product warranty accrual balance, beginning of period	\$ 9,331	\$ 6,695
Liabilities accrued for warranties during the period	4,223	7,533
Warranty claims paid during the period	(4,856)	(3,792)
Changes in estimates	(1,427)	(1,105)
Product warranty accrual balance, end of period	<u>\$ 7,271</u>	<u>\$ 9,331</u>

Warranty costs were \$2.8 million, \$6.4 million, and \$6.9 million for the fiscal years ended August 31, 2015, 2014 and 2013, respectively.

Q. INDUSTRY SEGMENT INFORMATION

The Company manages its business activities in two reportable segments: Irrigation and Infrastructure. The accounting policies of the two reportable segments are the same as those described in Note A, Description of Business and Significant Accounting Policies. The Company evaluates the performance of its reportable segments based on segment sales, gross profit, and operating income, with operating income for segment purposes excluding unallocated corporate general and administrative expenses, interest income, interest expense, other income and expenses, and income taxes. Operating income for segment purposes does include general and administrative expenses, selling expenses, engineering and research expenses and other overhead charges directly attributable to the segment. There are no inter-segment sales.

Irrigation

This reporting segment includes the manufacture and marketing of center pivot, lateral move, and hose reel irrigation systems as well as various water pumping stations, controls, filtration solutions and M2M technology. The irrigation reporting segment consists of five operating segments that have similar economic characteristics and meet the aggregation criteria, including similar products, production processes, type or class of customer and methods for distribution.

Infrastructure

This reporting segment includes the manufacture and marketing of moveable barriers, specialty barriers, crash cushions and end terminals, and road marking and road safety equipment; the manufacturing and selling of large diameter steel tubing and railroad signals and structures; and providing outsourced manufacturing and production services. The infrastructure reporting segment consists of one operating segment.

The Company has no single major customer representing 10 percent or more of its total revenues during fiscal 2015, 2014, or 2013.

Summarized financial information concerning the Company's reportable segments is shown in the following tables:

<u>\$ in thousands</u>	<u>2015</u>	<u>2014</u>	<u>2013</u>
Operating revenues:			
Irrigation	\$ 451,205	\$ 539,943	\$ 625,996

R. SHARE BASED COMPENSATION

Share Based Compensation Program

Share based compensation is designed to reward employees for their long-term contributions to the Company and provide incentives for them to remain with the Company. The number and frequency of share grants are based on competitive practices, operating results of the Company, and individual performance. As of August 31, 2015, the Company's share-based compensation plan was the 2015 Long-Term Incentive Plan (the "2015 Plan"). The 2015 Plan was approved by the shareholders of the Company, and became effective on January 26, 2015, and replaced the Company's 2010 Long Term Incentive Plan. At August 31, 2015 the Company had share based awards outstanding under its 2001 and 2010 Long-Term Incentive Plans.

The 2015 Plan provides for awards of stock options, restricted shares, restricted stock units, stock appreciation rights, performance shares and performance stock units to employees and non-employee directors of the Company. The maximum number of shares as to which stock awards may be granted under the 2015 Plan is 626,968 shares, exclusive of any forfeitures from the 2010 Long Term Incentive Plan. At August 31, 2015, 639,715 shares of common stock (including forfeitures from prior plans) remained available for issuance under the 2015 Plan. All stock awards will be counted against the 2015 Plan in a 1 to 1 ratio. If options, restricted stock units or performance stock units awarded under the 2010 Plan terminate without being fully vested or exercised, those shares will be available again for grant under the 2015 Plan. The 2015 Plan also limits the total awards that may be made to any individual.

Share Based Compensation Information

The following table summarizes share-based compensation expense for the fiscal years ended August 31, 2015, 2014 and 2013:

\$ in thousands	For the years ended August 31,		
	2015	2014	2013
Share-based compensation expense included in cost of operating revenues	\$ 161	\$ 205	\$ 214
Research and development	121	135	233
Sales and marketing	523	570	547
General and administrative	2,527	3,297	3,579
Share-based compensation expense included in operating expenses	3,171	4,002	4,359
Total share-based compensation expense	3,332	4,207	4,573
Tax benefit	(1,263)	(1,594)	(1,733)
Share-based compensation expense, net of tax	\$ 2,069	\$ 2,613	\$ 2,840

As of August 31, 2015, there was \$4.1 million pre-tax of total unrecognized compensation cost related to nonvested share-based compensation arrangements which is expected to be recognized over a weighted-average period of 1.7 years.

Stock Options – Stock option awards have an exercise price equal to the closing price on the date of grant, expire no later than ten years from the date of grant and vest over a four-year period at 25 percent per year. The fair value of stock option awards is estimated using the Black-Scholes option pricing model. The table below shows the annual weighted-average assumptions used for valuation purposes.

<i>Weighted-Average Assumptions</i>	Grant Year	
	Fiscal 2015	Fiscal 2014
Risk-free interest rate	2.0%	1.9%
Dividend yield	1.3%	0.7%
Expected life (years)	7	7
Volatility	53.6%	55.2%
Weighted-average grant-date fair value of options granted	\$ 40.66	\$ 40.40

The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant; the dividend yield is calculated as the ratio of dividends paid per share of common stock to the stock price on the date of grant; the expected life is based on historical and expected exercise behavior; and volatility is based on the historical volatility of the Company's stock price over the expected life of the option.

The following table summarizes information about stock options outstanding as of and for the years ended August 31, 2015, 2014 and 2013:

	Number of stock options	Average Exercise Price	Average Remaining Contractual Term (years)	Aggregate Intrinsic Value ('000s)
Stock options outstanding at August 31, 2013	79,138	\$ 53.06	6.4	\$ 1,817
Granted	25,394	\$ 76.39		
Exercised	(15,590)	\$ 29.21		\$ 853
Forfeitures	(2,319)	\$ 67.55		
Stock options outstanding at August 31, 2014	86,623	\$ 63.80	7.3	\$ 1,211
Granted	25,332	\$ 83.53		
Exercised	(9,859)	\$ 39.99		\$ 425
Forfeitures	(5,720)	\$ 76.91		
Stock options outstanding at August 31, 2015	96,376	\$ 70.65	7.3	\$ 710
Exercisable at August 31, 2013	31,927	\$ 32.70	3.0	\$ 1,383
Exercisable at August 31, 2014	30,130	\$ 49.55	5.3	\$ 851
Exercisable at August 31, 2015	39,449	\$ 61.47	6.1	\$ 583

There were 19,178, 13,793 and 8,330 outstanding stock options that vested during the fiscal years ended August 31, 2015, 2014 and 2013, respectively. Additional information regarding stock option exercises is summarized in the table below.

\$ in thousands	For the years ended August 31,		
	2015	2014	2013
Intrinsic value of stock options exercised	\$ 425	\$ 853	\$ 4,960
Cash received from stock option exercises	\$ 394	\$ 455	\$ 2,036
Tax benefit realized from stock option exercises	\$ 158	\$ 317	\$ 1,817
Aggregate grant-date fair value of stock options vested	\$ 36.71	\$ 34.89	\$ 31.04

Restricted stock units – The restricted stock units have a grant date fair value equal to the fair market value of the underlying stock on the grant date less present value of expected dividends. The restricted stock units granted to employees vest over a three-year period at approximately 33 percent per year. The restricted stock units granted to non-employee directors generally vest over a nine-month period.

The following table summarizes information about restricted stock units as of and for the years ended August 31, 2015, 2014 and 2013:

	Number of restricted stock units	Weighted- Average Grant- Date Fair Value
Restricted stock units outstanding at August 31, 2013	57,431	\$ 68.06
Granted	35,450	76.46
Vested	(31,204)	67.49
Forfeited	(2,524)	70.07
Restricted stock units outstanding at August 31, 2014	59,153	\$ 73.04
Granted	34,291	80.94
Vested	(32,349)	72.28
Forfeited	(4,123)	77.55
Restricted stock units outstanding at August 31, 2015	56,972	\$ 78.54

Restricted stock units are generally settled with the issuance of shares with the exception of certain restricted stock units awarded to internationally-based employees that are settled in cash. At August 31, 2015, 2014 and 2013, outstanding restricted stock units included 5,504, 5,289 and 4,496 units, respectively, that will be settled in cash. The fair value of restricted stock units that vested during the period was \$2.3 and \$2.1 million for each of the years ended August 31, 2015 and 2014, respectively.

Performance stock units – The performance stock units have a grant date fair value equal to the fair market value of the underlying stock on the grant date less present value of expected dividends. The performance stock units granted to employees cliff vest after a three-year period and a specified number of shares of common stock will be awarded under the terms of the performance stock units, if performance measures relating to revenue growth and a return on net assets are achieved.

The table below summarizes the status of the Company's performance stock units as of and for the year ended August 31, 2015, 2014 and 2013:

	Number of performance stock units	Weighted- Average Grant- Date Fair Value
Performance stock units outstanding at August 31, 2013	52,799	\$ 60.41
Granted	13,434	74.84
Vested	(23,454)	55.45
Forfeited	(2,027)	64.57
Performance stock units outstanding at August 31, 2014	40,752	\$ 67.81
Granted	12,328	80.33
Vested	(15,786)	57.09
Forfeited	(3,438)	76.44
Performance stock units outstanding at August 31, 2015	33,856	\$ 76.50

In connection with the performance stock units, the performance goals are based upon revenue growth and a return on net assets during the performance period. The awards actually earned will range from zero to two hundred percent of the targeted number of performance stock units and will be paid in shares of common stock. Shares earned will be distributed upon vesting on the first day of November following the end of the three-year performance period. The Company is accruing compensation expense based on the estimated number of shares

expected to be issued utilizing the most current information available to the Company at the date of the financial statements. If defined performance goals are not met, no compensation cost will be recognized and any previously recognized compensation expense will be reversed. In fiscal 2015 and fiscal 2014, performance stock units that vested represented 27,473 and 46,908, respectively, of actual shares of common stock issued. The fair value of performance stock units that vested during the period was \$1.6 million and \$2.6 million for the year ended August 31, 2015 and 2014, respectively.

S. SHARE REPURCHASES

On January 3, 2014, the Company announced that its Board of Directors authorized a share repurchase program of up to \$150.0 million of common stock, effective as of January 2, 2014, through January 2, 2016. On July 22, 2015, the Company announced that its Board of Directors increased its outstanding share repurchase authorization by \$100.0 million. Under the program, shares may be repurchased in privately negotiated and/or open market transactions as well as under formalized trading plans in accordance with the guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. During the twelve months ended August 31, 2015, the Company repurchased 1,198,089 shares for an aggregate purchase price of \$96.9 million. During the twelve months ended August 31, 2014, the Company repurchased 497,899 shares of common stock for an aggregate purchase price of \$41.0 million. The remaining amount available under the repurchase program was \$112.1 million as of August 31, 2015.

T. QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

<u>\$ in thousands, except per share amounts</u>	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter^(a)</u>
Year ended August 31, 2015				
Operating revenues	\$ 134,845	\$ 141,089	\$ 160,707	\$ 123,540
Cost of operating revenues	\$ 97,931	\$ 101,533	\$ 114,321	\$ 90,075
Earnings before income taxes	\$ 11,661	\$ 14,138	\$ 20,423	\$ 529
Net earnings	\$ 7,568	\$ 8,995	\$ 12,927	\$ (3,181)
Diluted net earnings per share	\$ 0.62	\$ 0.75	\$ 1.10	\$ (0.28)
Year ended August 31, 2014				
Operating revenues	\$ 147,671	\$ 152,804	\$ 169,936	\$ 147,522
Cost of operating revenues	\$ 107,520	\$ 110,132	\$ 121,687	\$ 107,599
Earnings before income taxes	\$ 15,817	\$ 20,789	\$ 25,500	\$ 16,549
Net earnings	\$ 10,234	\$ 13,450	\$ 16,499	\$ 11,329
Diluted net earnings per share	\$ 0.79	\$ 1.04	\$ 1.28	\$ 0.89

(a) The fourth quarter 2015 results were impacted by a bad debt reserve of \$5.0 million on accounts receivable and a reserve of \$2.9 million against foreign income tax assets.

ITEM 9 – Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

ITEM 9A – Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) and internal control over financial reporting, as defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in enabling the Company to record, process, summarize and report information required to be included in the Company's periodic SEC filings within the required time period.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements.

The Company acquired Elecsys Corporation during 2015, and management excluded from its assessment of the effectiveness of the internal control over financial reporting as of August 31, 2015. Elecsys Corporation's internal control over financial reporting is associated with total assets of \$99.8 million and total revenues of \$18.7 million included in the consolidated financial statements of Lindsay Corporation and subsidiaries as of and for the year ended August 31, 2015.

Management has assessed the effectiveness of the Company's internal control over financial reporting as of August 31, 2015, based on the criteria for effective internal control described in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, management concluded that the Company's internal control over financial reporting was effective as of August 31, 2015.

The Audit Committee has engaged KPMG LLP, the independent registered public accounting firm that audited the consolidated financial statements included in this Annual Report on Form 10-K, to attest to and report on management's evaluation of the Company's internal control over financial reporting. The report of KPMG LLP is included herein.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Lindsay Corporation:

We have audited Lindsay Corporation's internal control over financial reporting as of August 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Lindsay Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Lindsay Corporation maintained, in all material respects, effective internal control over financial reporting as of August 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Lindsay Corporation acquired Elecsys Corporation during 2015, and management excluded from its assessment of the effectiveness of the internal control over financial reporting as of August 31, 2015, Elecsys Corporation's internal control over financial reporting is associated with total assets of \$99.8 million and total revenues of \$18.7 million included in the consolidated financial statements of Lindsay Corporation and subsidiaries as of and for the year ended August 31, 2015. Our audit of internal control over financial reporting also excluded an evaluation of the internal control over financial reporting of Elecsys Corporation.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Lindsay Corporation and subsidiaries as of August 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended August 31, 2015, and our report dated October 20, 2015 expressed an unqualified opinion on those consolidated financial statements.

/s/ KPMG LLP

Omaha, Nebraska
October 20, 2015

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal controls over financial reporting that occurred during the year ended August 31, 2015, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B – Other Information

None.

PART III

ITEM 10 – *Directors, Executive Officers and Corporate Governance*

The Company will file with the Securities and Exchange Commission a definitive Proxy Statement for its 2016 Annual Meeting of Stockholders (the “Proxy Statement”) not later than 120 days after the close of its fiscal year ended August 31, 2015. Information about the Board of Directors required by Items 401 and 407 of Regulation S-K is incorporated by reference to the discussion responsive thereto under the captions “Board of Directors and Committees” and “Corporate Governance” in the Proxy Statement.

The executive officers and significant employees of the Company, their ages, positions and business experience are set forth below. All executive officers of the Company are appointed by the Board of Directors annually and have employment agreements. There are no family relationships between any director or executive officer. There are no arrangements or understandings between any executive officer and any other person pursuant to which they were selected as an officer.

	<u>Age</u>	<u>Position</u>
Richard W. Parod	62	President and Chief Executive Officer
Eric R. Arneson*	41	Vice President, General Counsel and Secretary
David B. Downing	60	President – Agricultural Irrigation Division
C. Mike Harris*	49	President – Industrial Water Solutions Business
James C. Raabe	55	Vice President and Chief Financial Officer
Mark A. Roth*	40	Vice President – Corporate Development and Treasurer
Reuben P. Srinivasan*	52	Vice President – Human Resources
Lori L. Zarkowski*	40	Chief Accounting Officer

* The employee is not an executive officer of the Registrant.

Mr. Richard W. Parod is President and Chief Executive Officer (“CEO”) of the Company, and has held such positions since April 2000. Prior to that time and since 1997, Mr. Parod was Vice President and General Manager of the Irrigation Division of The Toro Company. Mr. Parod was employed by James Hardie Irrigation from 1993 through 1997, becoming President in 1994. Mr. Parod has been a Director since April 2000, when he began his employment with the Company.

Mr. Eric R. Arneson is Vice President, General Counsel and Secretary of the Company and has held such positions since April 2008, when he joined the Company. Prior to that time and since January 1999, Mr. Arneson practiced law with the law firm of Kutak Rock LLP, and was most recently a partner of the firm.

Mr. David B. Downing is President – Agricultural Irrigation Division of the Company and has held such position since October 2013. Between March 2008 and October 2013, Mr. Downing served as President – International operations of the Company. Between March 2009 and June 2011, Mr. Downing served as both Chief Financial Officer and President – International Operations of the Company. Previously he was Senior Vice President-Finance, Chief Financial Officer, Treasurer and Secretary of the Company and held such positions from August 2004, when he joined the Company, to March 2008. Prior to August 2004, Mr. Downing served as the President of FPM L.L.C., a heat-treating company based in Elk Grove Village, Illinois, after joining that company in January 2001 as Vice President and Chief Financial Officer. Previously, Mr. Downing served as Vice President and Controller for Thermo-King, which manufactured transport refrigeration equipment.

Mr. C. Mike Harris is President – Industrial Water Solutions Business of the Company and has held such position since November 2013. Prior to joining Lindsay and since February 2013, he served as Vice President of Sales and Field Operation at Johnson Controls, Inc., a global diversified technology and industrial company. From May 2010 to February 2013, Mr. Harris served as Vice President and Managing Director of Asia Pacific at Johnson

Controls, Inc. From February 2005 to April 2010, Mr. Harris served as Vice President and General Manager of Energy Services for Johnson Controls, Inc. Prior to 2005 and since 2002, Mr. Harris served in several Vice President positions' at Johnson Controls, Inc. Prior to joining Johnson Controls, Inc., Mr. Harris held various leadership positions in the energy services, commodity trading and utility industries.

Mr. James C. Raabe is Vice President and Chief Financial Officer of the Company, and has held such positions since June 2011. Prior to joining Lindsay and since April 1999, he served as Senior Vice President and Chief Financial Officer of Select Comfort Corporation. From September 1997 to April 1999, Mr. Raabe served as the Controller for Select Comfort Corporation. From May 1992 to September 1997, he served as Vice President – Finance of ValueRx, Inc., a pharmacy benefit management provider. Mr. Raabe held various positions with KPMG LLP from August 1982 to May 1992.

Mr. Mark A. Roth is Vice President – Corporate Development and Treasurer of the Company. Mr. Roth joined Lindsay in 2004, as Director of Corporate Development and was promoted to Vice President – Corporate Development in March 2007, adding Treasurer to his role in April 2008. From March 2001 through 2004 when he joined the Company, Mr. Roth was an Associate with McCarthy Group, Inc., a Midwest-based investment bank and private equity fund. From January 1998 through February 2001, Mr. Roth was a Senior Credit Analyst at US Bancorp.

Mr. Reuben P. Srinivasan is Vice President – Human Resources and joined the Company in January 2013. Mr. Srinivasan was formerly Director (Global), Human Resources at Trimble Navigation Limited, a provider of advanced location-based solutions based in Sunnyvale, California, from 2006 to 2013. Prior to that time and since 1997, Mr. Srinivasan held positions of increasing responsibility with Volkswagen Group of America, the last six years of which were as Manager of Human Resources with the Audi brand.

Ms. Lori L. Zarkowski is Chief Accounting Officer of the Company, and has held such position since August 2011. Ms. Zarkowski joined Lindsay in June 2007 as Corporate Reporting Manager and was promoted to Corporate Controller in April 2008. Prior to joining the Company and since 1997, Ms. Zarkowski was most recently an Audit Senior Manager with Deloitte & Touche LLP.

Section 16(a) Beneficial Ownership Reporting Compliance - Item 405 of Regulation S-K calls for disclosure of any known late filing or failure by an insider to file a report required by Section 16 of the Securities Exchange Act. The information required by Item 405 is incorporated by reference to the discussion responsive thereto under the caption “Section 16(a) Beneficial Ownership Reporting Compliance” in the Proxy Statement.

Code of Ethics – Item 406 of Regulation S-K calls for disclosure of whether the Company has adopted a code of ethics applicable to the principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. The Company has adopted a code of ethics applicable to the Company’s principal executive officer and senior financial officers known as the Code of Ethical Conduct (Principal Executive Officer and Senior Financial Officers). The Code of Ethical Conduct (Principal Executive Officer and Senior Financial Officers) is available on the Company’s website. In the event that the Company amends or waives any of the provisions of the Code of Ethical Conduct applicable to the principal executive officer and senior financial officers, the Company intends to disclose the same on the Company’s website at www.lindsay.com. No waivers were provided for the fiscal year ended August 31, 2015.

ITEM 11 - Executive Compensation

The information required by this Item is incorporated by reference to the discussion responsive thereto under the captions “Executive Compensation”, “Compensation Discussion and Analysis”, “Pension Benefits”, “Nonqualified Deferred Compensation”, “Report of the Compensation Committee on Executive Compensation”, “Compensation of Directors” and “Compensation Committee Interlocks and Insider Participation” in the Proxy Statement.

ITEM 12 - Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item relating to security ownership of certain beneficial owners and management is incorporated by reference to the discussion responsive thereto under the caption “Voting Securities and Beneficial Ownership Thereof by Principal Stockholders, Directors and Officers” in the Proxy Statement.

Equity Compensation Plan Information - The following equity compensation plan information summarizes plans and securities approved by security holders as of August 31, 2015 (there were no equity compensation plans not approved by security holders as of August 31, 2015):

<u>Plan category</u>	(a)	(b)	(c)
	Number of securities to be issued upon exercise of outstanding options, warrants, and rights	Weighted-average exercise price of outstanding options, warrants, and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders ^{(1) (2)}	181,700	\$ 70.65	639,715
Total	181,700	\$ 70.65	639,715

⁽¹⁾ Plans approved by stockholders include the Company’s 2001, 2010 and 2015 Long-Term Incentive Plans. While certain share based awards remain outstanding under the Company’s 2001 and 2010 Long-Term Incentive Plans, no future equity compensation awards may be granted under such plans.

⁽²⁾ Column (a) includes (i) 33,856 shares that could be issued under performance stock units (“PSU”) outstanding at August 31, 2015, and (ii) 51,864 shares that could be issued under restricted stock units (“RSU”) outstanding at August 31, 2015. The PSUs are earned and Common Stock issued if certain predetermined performance criteria are met. Actual shares issued may be equal to, less than or greater than (but not more than 200 percent of) the number of outstanding PSUs included in column (a), depending on actual performance. The RSUs vest and are payable in Common Stock after the expiration of the time periods set forth in the related agreements. Column (b) does not take these PSU and RSU awards into account because they do not have an exercise price.

ITEM 13 - Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated by reference to the discussion responsive thereto under the captions “Corporate Governance” and “Corporate Governance – *Related Party Transactions*” in the Proxy Statement.

ITEM 14 – Principal Accounting Fees and Services

The information required by this Item is incorporated by reference to the discussion responsive thereto under the caption “Ratification of Appointment of Independent Registered Public Accounting Firm” in the Proxy Statement.

PART IV

ITEM 15 – Exhibits, Financial Statement Schedules

a(1) Financial Statements

The following financial statements of Lindsay Corporation and Subsidiaries are included in Part II Item 8.

	<u>Page</u>

Annual Meeting

All shareholders are invited to attend our annual meeting, which will be held on January 25, 2016, at 8:30 a.m. at our corporate office located at 2222 North 111th Street, Omaha, Nebraska. We look forward to meeting shareholders and answering questions at the meeting. Any shareholder who will be unable to attend is encouraged to send questions and comments in writing to Eric Arneson, Secretary, at Lindsay's corporate office.

Quarterly Calendar

The Company operates on a fiscal year ending August 31. Fiscal 2016 quarter-end dates are November 30, 2015, February 29, 2016, May 31, 2016 and August 31, 2016. Quarterly earnings are announced approximately four weeks after the end of each quarter and audited results are announced approximately six weeks after year end. Quarterly earnings releases are posted to Lindsay's Web site at www.lindsay.com.

Web Sitewww.lindsay.com**Concerning Forward-Looking Statements**

This Annual Report and Form 10-K, including the President's letter, Management's Discussion and Analysis, and other sections, contains forward-looking statements that are subject to risks and uncertainties and which reflect management's current beliefs and estimates of future economic circumstances, industry conditions, company performance and financial results. You can find a discussion of many of these risks and uncertainties in the annual, quarterly, and current reports we file with the Securities and Exchange Commission. Forward-looking statements include the information concerning possible or assumed future results of operations of the Company and those statements preceded by, followed by, or including the words "anticipate," "estimate," "believe," "intend," "expectation," "outlook," "could," "may," "should," "will," "future," "position," or similar expressions. For these statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. You should understand that the following important factors, in addition to those discussed elsewhere in the document, could affect the future results of the Company and could cause those results to differ materially from those expressed in our forward-looking statements: availability of and price of raw materials, product pricing, competitive environment and related domestic and international market conditions, operating efficiencies and actions of domestic and foreign governments. Any changes in such factors could result in significantly different results. The Company undertakes no obligation to update any forward-looking information contained in this Annual Report.

Lean, Clean and Green. Lindsay Corporation is committed to developing environmental awareness and implementing sustainable practices to reduce the use of and protect energy, water, and all other resources.
