

A CLEAR VISION

LEADING
INNOVATING
EMPOWERING

OUR VISION

Alignment to our business strategy starts with a clear vision:
To Become the Innovation and Market Leader through Employee Empowerment and Superior Execution.
It is through our key values and behaviors that we will guide our global organization toward long-term success.

Values

Leadership – We inspire others and demonstrate courage to make a difference.

Integrity – We are open, honest and transparent.

Collaboration – We create more together than as individuals.

Accountability – We set high standards and deliver against them.

Respect for others – We foster an inclusive culture that values each other's views.

Behaviors

Build Trust

Unlock Creativity

Customer-first
Innovation

Dollars in millions, except per share amounts.

1. Fiscal 2019 operating income includes costs of \$15.1 million associated with the Foundation for Growth initiative ("FFG costs"), and a \$2.8 million valuation adjustment for indirect tax credits in a foreign jurisdiction. On an adjusted basis, operating income was \$24.0 million and operating margin was 5.4%. Fiscal 2018 operating income includes FFG costs of \$9.7 million. On an adjusted basis, operating income was \$48.7 million and operating margin was 8.9%.

2. Fiscal 2019 net earnings and diluted earnings per share include the after-tax impact of FFG costs and valuation adjustment of \$13.5 million, or \$1.25 per diluted share. On an adjusted basis, net earnings were \$15.6 million, or \$1.45 per diluted share. Fiscal 2018 net earnings and diluted earnings per share include the after-tax impact of FFG costs of \$8.8 million, or \$0.82 per diluted share, and income tax expense attributed to the enactment of the U.S. Tax Cuts and Jobs Act "U.S. Tax Reform" of \$2.5 million, or \$0.23 per diluted share. On an adjusted basis, net earnings were \$31.7 million, or \$2.94 per diluted share.

LEADING

TO OUR SHAREHOLDERS:

In fiscal 2020, the One Lindsay team delivered on our two-year transformative journey through Foundation for Growth (FFG). We committed to achieving 11 percent to 12 percent operating margin, assuming market conditions similar to fiscal 2017. I am proud to report we delivered on our commitment – fiscal operating margin reached 11.4 percent in a year that tested many assumptions caused by prolonged market challenges and the unprecedented global coronavirus pandemic. This represents a 360-basis point increase from fiscal 2017 level of 7.8 percent.

At the onset of the pandemic, we mobilized quickly and implemented our business continuity plan, establishing work-from-home procedures and critical safety measures across our global organization. In terms of business impact, we experienced project delays but no order cancellations. The health and safety of employees remains our highest priority as we navigate the ongoing pandemic.

Overall, fiscal 2020 was a year of execution bolstered by customer-first innovation and an empowered team culture. Notably, we

also achieved our highest gross margin of 32.1% since Lindsay began trading on the NYSE in 1997. We also executed on our innovate and collaborate strategy, driving disruptive technology across our businesses to accelerate growth and outperform the cycle.

Organizational Health Reaches First Quartile Achievement

Another major milestone is our significant transformation in organizational health.

We conducted annual employee surveys to identify and address behavioral opportunities to empower our employees and propel improved performance. Benchmarked against approximately 2,000 companies, I am very proud that we successfully moved from the third quartile in fiscal 2018 to the first quartile in fiscal 2020.

Companies attaining this top quartile are more likely to execute with efficiency and attain higher margins. This is a tremendous accomplishment for our company that instills internal alignment, drives greater creativity and collaboration, and fortifies our resiliency for sustained growth.

Playing Offense to Emerge Stronger Through COVID-19

Lindsay's businesses are classified as Business Essential, and our products and technologies support critical infrastructure sectors in:

Food and Agriculture – Our irrigation business supports the production of food and the conservation of water and energy.

Transportation Systems – Our infrastructure business supports the movement of people and goods, efficiently, safely and securely.

Our global task force continues to adhere to safety first measures and manage any issues that arise to mitigate potential risks to our business. We've maintained resiliency through the crisis.

Safety First – Prioritizing safety with work-from-home policy, safety practices at all locations and restricting non-essential travel.

Business Continuity – Managing operations to minimize customer disruption and ensure continuity of supply.

Financial Flexibility – Strengthening our balance sheet and managing leverage.

Playing Offense – Positioning Lindsay to emerge a stronger company.

INNOVATING

Addressing Megatrends by Accelerating our Innovation Engine

Throughout our history, Lindsay has delivered innovative solutions that meet highly relevant, global megatrends of food security, water scarcity, climate change, traffic congestion and transportation safety. We have pioneered several industry-first technology applications in agriculture telemetry as well as across our infrastructure solutions in response to these market forces. And, we are continuously building our innovation pipeline through a customer-first lens to deliver breakthrough solutions to the market faster.

At the core of our irrigation operations is innovation-driven growth that supports sustainable agriculture. In fiscal 2020, we continued to elevate our industry-leading technology position with a powerful data-intelligence feature, FieldNET™ with WaterTrendSM. A testament to our customer-centric mindset, this new functionality enables growers to make more informed irrigation decisions driven by efficiency and environmental sustainability through critical crop water usage insights over a seven-day outlook.

Driving Market Expansion with IIoT-Based Smart Irrigation

Aligned to our simplify and grow FFG framework, we pivoted to acquisitive growth with the April 2020 acquisition of Net Irrigate, LLC, an agriculture IIoT company that expands the number of acres managed under our FieldNET™ brand of remote irrigation monitoring and control solutions. This further strengthens our market leadership position in the IIoT space by increasing our remote monitoring market share by 5 percent.

Successful Shift-Left Strategy

In infrastructure, our shift-left approach, focused on customer engagement at the planning and design stage, has accelerated adoption of our Road Zipper System®. Our team secured a large contract win with Highways England to supply a movable barrier system for use in Kent, United Kingdom. This demonstrates a key proof point of early engagement in the design planning phase, resulting in a customized and efficient solution to traffic congestion and improved air quality. Additionally, harnessing our customer-first innovation, we responded to a specific need to develop a narrow machine design as an add-on order for our existing customer, NEXCO-East Innovation and Commutations (NI&C), in Japan. We continue to focus our efforts on building a robust sales funnel, global expansion and application of our RZ solution, and accelerating our innovation efforts to continue to deliver differentiated infrastructure solutions. Through these efforts, we achieved the highest revenue, operating income and operating margin results for our Infrastructure business since we acquired Barrier Systems in 2006.

EMPOWERING

Increased Optionality Through Financial Strength

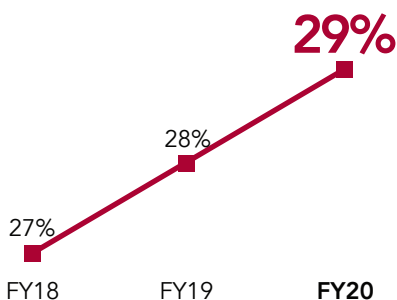

Our balance sheet strength provides increased optionality to fund growth and deliver consistent shareholder return. As part of our capital allocation approach, we set clear priorities to drive organic growth and respond to market opportunities via acquisitions. Equally important is our history of dividends to maximize shareholder returns. In the third quarter, the Board of Directors approved a 3.2 percent increase in our quarterly cash dividend rate.

Fostering a Diverse and Inclusive Workplace

In Fiscal 2018, in connection with our FFG initiative we set three goals specifically related to diversity and inclusion. These goals were to increase women in leadership positions, U.S. based minorities in leadership positions, and internal promotions over external hires. I'm happy to report that we made tremendous progress towards the goals that we set forth. As we look toward elevating our focus around building a culture of diversity and inclusivity, we announced that Kelly Staup, our SVP-Human Resources, will act as our Chief Diversity Officer. Kelly will lead our diversity and inclusion council and our organization as we strive to celebrate our culture of acceptance and respect for others.

DIVERSITY AND INCLUSION GOALS BY END OF FY20

30% WOMEN IN LEADERSHIP POSITIONS
(THREE LEVELS BELOW CEO)

20% US-BASED MINORITIES IN LEADERSHIP POSITIONS
(THREE LEVELS BELOW CEO)

50% INTERNAL PROMOTIONS OVER EXTERNAL HIRES

Leading in the Future

I announced in November my plans to retire at the end of this calendar year. These last three-plus years have been a tremendous experience with an exceptional team. I watched our global workforce embrace and create positive change, support each other through continuous improvement initiatives, and thrive through our transformational journey.

The Company is in good hands with Randy Wood, a seasoned leader who knows the business well. Randy will take over as President and CEO, and join Lindsay's board of directors, beginning January 1, 2021. I'm proud of our progress and our purpose-driven impact. We continue to build momentum through a unique combination of talented individuals working in alignment to provide differentiated capabilities anchored in innovation and sustainable practices. I'm confident Randy will be an excellent CEO who will take us to the next level.

Sincerely,

Timothy Hassinger
President & Chief Executive Officer

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, \$1.00 par value	New York Stock Exchange, Inc. (Symbol LNN)

Indicate by check mark if the registrant is a well-known seasoned issuer, (as defined in Rule 405 of the Securities Act). Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
Emerging growth company	<input type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of Common Stock of the registrant, all of which is voting, held by non-affiliates based on the closing sales price on the New York Stock Exchange, Inc. on February 29, 2020 was \$1,072,966,580.

As of October 20, 2020, 10,834,763 shares of the registrant's Common Stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement pertaining to the Registrant's 2020 annual stockholders' meeting to be held on January 5, 2021 are incorporated by reference into Part III of this Annual Report on Form 10-K.

PART I

ITEM 1 — *Business*

INTRODUCTION

Lindsay Corporation, along with its subsidiaries (collectively called “Lindsay” or the “Company”), is a global leader in providing a variety of proprietary water management and road infrastructure products and services. The Company has been involved in the manufacture and distribution of agricultural irrigation equipment since 1955 and has grown from a regional company to an international water efficiency solutions and highway infrastructure firm with worldwide sales and distribution. Lindsay, a Delaware corporation, maintains its corporate offices in Omaha, Nebraska. The Company has operations which are categorized into two major reporting segments, Irrigation and Infrastructure.

Irrigation Segment – The Company’s irrigation segment includes the manufacture and marketing of center pivot, lateral move, and hose reel irrigation systems which are used principally in the agricultural industry to increase or stabilize crop production while conserving water, energy and labor. The irrigation segment also manufactures and markets repair and replacement parts for its irrigation systems and controls. The Company continues to strengthen irrigation product offerings through innovative technology such as Global Positioning System (“GPS”) positioning and guidance, variable rate irrigation, wireless irrigation management, irrigation scheduling, machine-to-machine (“M2M”) communication technology solutions and smartphone applications. The Company’s primary domestic irrigation manufacturing facilities are located in Lindsay, Nebraska and Olathe, Kansas. Internationally, the Company has production operations in Brazil, France, China, Turkey, and South Africa, as well as distribution and sales operations in the Netherlands, Australia, and New Zealand. The Company also exports equipment from the U.S. to other international markets.

Infrastructure Segment – The Company’s infrastructure segment includes the manufacture and marketing of moveable barriers, specialty barriers, crash cushions and end terminals, road marking and road safety equipment, large diameter steel tubing, and railroad signals and structures. The infrastructure segment also provides outsourced manufacturing and production services. The principal infrastructure manufacturing facilities are located in Rio Vista, California; Milan, Italy; and Lindsay, Nebraska.

PRODUCTS BY SEGMENT

IRRIGATION SEGMENT

Products - The Company manufactures and markets its center pivot, lateral move irrigation systems, and irrigation controls in the U.S. and internationally under its *Zimmatic*[®] brand. The Company also manufactures and markets hose reel travelers under the *Perrot*[™] and *Greenfield*[®] brands. The Company also produces or markets chemical injection systems, variable rate irrigation systems, flow meters, weather stations, soil moisture sensors, and remote monitoring and control systems which it sells under its *GrowSmart*[®] brand. In addition to whole systems, the Company manufactures and markets repair and replacement parts for its irrigation systems and controls. Furthermore, the Company designs and manufactures innovative M2M communication technology solutions, data acquisition and management systems, and custom electronic equipment for critical applications under its *Elecsys*[™] brand.

The Company’s irrigation systems are primarily of the standard center pivot type, with a small portion of its products consisting of the lateral move type. Both are automatic move systems consisting of sprinklers mounted on a water carrying pipeline which is supported approximately 11 feet off the ground by a truss system suspended between moving towers.

A standard center pivot in the U.S. is typically seven spans and approximately 1,300 feet long and is designed to circle within a quarter-section of land, which comprises 160 acres, wherein it irrigates approximately 125 to 130 acres. A center pivot or lateral move system can also be custom designed and can irrigate from 25 to 600+ acres.

A center pivot system represents a significant investment to a farmer. In a dry land conversion to center pivot irrigation, approximately one-half of the investment is for the pivot itself, and the remainder is attributable to installation of additional equipment such as wells, pumps, underground water pipes, electrical supply, and a concrete pad upon which the pivot is anchored. The Company’s center pivot and lateral move irrigation systems can be enhanced with a family of integrated proprietary products such as GPS monitoring and other automated controls.

The Company also manufactures and distributes hose reel travelers. Hose reel travelers are typically deployed in smaller or irregular fields and usually are easy to operate, easy to move from field to field, and a smaller investment than a typical standard center pivot.

The Company also markets proprietary remote monitoring and automation technology that works on any brand of electronic pivot and drip irrigation systems and is sold on a subscription basis under the *FieldNET*[®] product name. *FieldNET*[®] technology enables growers to remotely monitor and operate irrigation equipment, saving time, and reducing water and energy consumption. The technology uses cellular or radio frequency communication systems to remotely acquire data relating to various conditions in an irrigated field, including operational status of the irrigation system, position of the irrigation system, water usage, weather and soil conditions, and similar data. The system can remotely control the irrigation system, altering the speed to vary water application amounts, and controlling pump station and diesel generator operation. Data management and control is achieved using applications running on various personal computer or mobile devices connected to the internet.

The Company also markets patented technology under the *FieldNET Advisor*[™] product name which delivers information that helps farmers decide precisely when, where and how much to irrigate. This technology combines more than 40 years of crop and irrigation science with *FieldNET*'s cloud computing capabilities, remote sensing functionality and machine learning to provide farmers with field-specific and crop-specific irrigation recommendations.

Other Types of Irrigation – Center pivot and lateral move irrigation systems compete with three other types of irrigation: flood, drip, and other mechanical devices such as hose reel travelers and solid set sprinklers. The bulk of worldwide irrigation is accomplished by traditional flood irrigation. Flood irrigation is accomplished by either flooding an entire field, or by providing a water source (ditches or a pipe) along the side of a field, which is planed and slopes slightly away from the water source. The water is released to the crop rows through gates in the ditch or pipe, or through siphon tubes arching over the ditch wall into some of the crop rows. It runs down through the crop row until it reaches the far end of the row, at which time the water source is moved and another set of rows are flooded. Disadvantages or limitations of flood irrigation include that it cannot be used to irrigate uneven, hilly, or rolling terrain, it can be wasteful or inefficient and coverage can become inconsistently applied. In “drip” or “low flow” irrigation, perforated plastic pipe or tape is installed on the ground or buried underground at the root level. Several other types of mechanical devices, such as hose reel travelers, irrigate the remaining irrigated acres.

Center pivot, lateral move, and hose reel traveler irrigation offer significant advantages when compared with other types of irrigation. It requires less labor and monitoring; can be used on sandy ground, which, due to poor water retention ability, must have water applied frequently; can be used on uneven ground, thereby allowing previously unsuitable land to be brought into production; can be used for the application of fertilizers, insecticides, herbicides, or other chemicals (termed “fertigation” or “chemigation”); and conserves water and chemicals through precise control of the amount and timing of the application.

Markets - Water is an essential and critical requirement for crop production, and the extent, regularity, and frequency of water application can be a critical factor in crop quality and yield. The fundamental factors which govern the demand for center pivot and lateral move systems are essentially the same in both the U.S. and international markets. Demand for center pivot and lateral move systems is determined by whether the value of the increased crop production and cost savings attributable to center pivot or lateral move irrigation exceeds any increased costs associated with purchasing, installing, and operating the equipment. Thus, the decision to purchase a center pivot or lateral move system, in part, reflects the profitability of agricultural production, which is determined primarily by the prices of agricultural commodities and the costs of other farming inputs.

The current demand for center pivot systems has three sources: conversion to center pivot systems from less water-efficient, more labor-intensive types of irrigation; replacement of older center pivot systems, which are beyond their useful lives or are technologically obsolete; and conversion of dry land farming to irrigated farming. Demand for center pivots and lateral move irrigation equipment also depends upon the need for the particular operational characteristics and advantages of such systems in relation to alternative types of irrigation, primarily flood. More efficient use of the basic natural resources of land, water, and energy helps drive demand for center pivot and lateral move irrigation equipment. An increasing global population not only increases demand for agricultural output, but also places additional and competing demands on land, water, and energy. The Company expects demand for center pivots and lateral move systems to continue to increase relative to other irrigation methods because center pivot and lateral move systems are preferred where the soil is sandy; the terrain is not flat; the land area to be irrigated is sizeable; there is a shortage of reliable labor; water supply is restricted and conservation is preferred or critical; and/or fertigation or chemigation will be utilized.

United States Market – In the United States, the Company sells its branded irrigation systems, including *Zimmatic*[®], to over 200 independent dealers, who resell to their customer, the farmer. Dealers assess their customers' requirements, design the most efficient solution, assemble and erect the system in the field, and provide additional system components, primarily relating to water supply (wells, pumps, pipes) and electrical supply (on-site generation or hook-up to power lines). Lindsay dealers generally are established local agribusinesses, many of which also deal in related products, such as well drilling and water pump equipment, farm implements, grain handling and storage systems, and farm structures.

International Market – The Company sells center pivot and lateral move irrigation systems throughout the world. International sales accounted for approximately 36 percent and 38 percent of the Company's total irrigation segment revenues in fiscal 2020 and 2019, respectively. The Company sells direct to consumers, as well as through an international dealer network, and has production and sales operations in Brazil, France, China, Turkey, and South Africa, as well as distribution and sales operations in the Netherlands, Australia, and New Zealand serving the key South American, European, Chinese, African, Russian, Ukrainian, Middle East, Australian, and New Zealand markets. The Company also exports irrigation equipment from the U.S. to international markets.

The Company's international markets differ with respect to the need for irrigation, the ability to pay, demand, customer type, government support of agriculture, marketing and sales methods, equipment requirements, and the difficulty of on-site erection. The Company's industry position is such that it believes that it will likely be considered as a potential supplier for most major international agricultural development projects utilizing center pivot or lateral move irrigation systems.

Competition – Four manufacturers control a substantial majority of the U.S. center pivot irrigation system industry. The international irrigation market includes participation and competition by the leading U.S. manufacturers, as well as various regional manufacturers. The Company competes in certain product lines with several manufacturers, some of whom may have greater financial resources than the Company. The Company competes by continuously improving its products through ongoing research and development activities. The Company continues to strengthen irrigation product offerings through innovative technology such as GPS positioning and guidance, variable rate irrigation, wireless irrigation management, and smartphone applications, as well as through the acquisition of products and services that allow the Company to provide a more comprehensive solution to growers' needs. Competition also occurs in areas of price and seasonal programs, product quality, durability, controls, product characteristics, retention and reputation of local dealers, customer service, and, at certain times of the year, the availability of systems and their delivery time. On balance, the Company believes it competes favorably with respect to these factors.

INFRASTRUCTURE SEGMENT

Products – The Company's *Quickchange*[®] *Moveable Barrier*[™] system, commonly known as the *Road Zipper System*[®], is composed of three parts: 1) T-shaped concrete and steel barriers that are connected to form a continuous wall; 2) a *Barrier Transfer Machine*[™] ("*BTM*[™]") capable of moving the barrier laterally across the pavement; and 3) the variable length barriers necessary for accommodating curves. A barrier element is approximately 32 inches high, 12-24 inches wide, 3 feet long, and weighs 1,500 pounds. The barrier elements are interconnected by heavy duty steel hinges to form a continuous barrier. The *BTM*[™] employs an inverted S-shaped conveyor mechanism that lifts the barrier, moving it laterally before setting it back on the roadway surface.

In permanent applications, the *Road Zipper System*[®] increases capacity and reduces congestion by varying the number of directional traffic lanes to match the traffic demand and promotes safety by maintaining the physical separation of opposing lanes of traffic. Roadways with fixed medians have a set number of lanes in each direction and cannot be adjusted to traffic demands that may change over the course of a day, or to capacity reductions caused by traffic incidents or road repair and maintenance. Applications include high-volume highways where expansion may not be feasible due to lack of additional right-of-way, environmental concerns, or insufficient funding. The *Road Zipper System*[®] is particularly useful in busy commuter corridors and at choke points such as bridges and tunnels. *Road Zipper Systems*[®] can also be deployed at roadway or roadside construction sites to accelerate construction, improve traffic flow, and safeguard work crews and motorists by positively separating the work area and traffic. Examples of types of work completed with the help of a *Road Zipper System*[®] include highway reconstruction, paving and resurfacing, road widening, median and shoulder construction, and repairs to tunnels and bridges.

The Company offers a variety of equipment lease options for *Road Zipper Systems*[®] and *BTM*[™] equipment used in construction applications. The leases extend for periods of one month or more for equipment already existing in the Company's lease fleet. Longer lease periods may be required for specialty equipment that must be built for specific projects. Sales for a highway safety or road improvement project range from \$2.0 to \$20.0 million, making them significant capital investments.

Crash Cushions and End Terminals – The Company offers a complete line of redirective and non-redirective crash cushions which are used to enhance highway safety at locations such as toll booths, freeway off-ramps, medians and roadside barrier ends, bridge supports, utility poles, and other fixed roadway hazards. The Company’s primary crash cushion products cover a full range of lengths, widths, speed capacities, and application accessories and include the following brand names: *TAU*[®]; *Universal TAU-II*[®]; *TAU-II-R*[™]; *TAU-B_NR*[™]; *ABSORB 350*[®]; *Walt*[™]; *TAU-M*[™]; *ABSORB-M*[™] and *TAU-TUBE*[™]. In addition to these products the Company also offers guardrail end terminal products such as the *X-Tension*[®]; *MAX-Tension*[®] and *ATT Terminal*[™] systems. The crash cushions and end terminal products compete with other vendors in the world market. These systems are generally sold through a distribution channel that is domiciled in particular geographic areas.

Specialty Barriers – The Company also offers specialty barrier products such as the *SAB*[™], *ArmorGuard*[™], *PaveGuard*[™], and *DR46*[™] portable barrier and/or barrier gate systems. These products offer portability and flexibility in setting up and modifying barriers in work areas and provide quick-opening, high-containment gates for use in median or roadside barriers. The gates are generally used to create openings in barrier walls of various types for both construction and incident management purposes. The *DR46*[™] is an energy-absorbing barrier that can help protect motorcyclists from impacting guardrail posts which is an area of focus by departments of transportation and government regulators for reducing the amount and severity of injuries.

Road Marking and Road Safety Equipment – The Company also offers preformed tape and a line of road safety accessory products. The preformed tape is used primarily in temporary applications such as markings for work zones, street crossings, and road center lines or boundaries. The road safety equipment consists of mostly plastic and rubber products used for delineation, slowing traffic, and signaling. The Company also manages an ISO 17025 certified testing laboratory that performs full-scale impact testing of highway safety products in accordance with the National Cooperative Highway Research Program (“NCHRP”) Report 350, the Manual for Assessing Safety Hardware (“MASH”), and the European Norms (“EN1317 Norms”) for these types of products. The NCHRP Report 350 and MASH guidelines are procedures required by the U.S. Department of Transportation Federal Highway Administration (“FHWA”) for the safety performance evaluation of highway features. The EN1317 Norms are being used to qualify roadway safety products for the European markets.

Other Products – The Company’s Diversified Manufacturing, Rail and Tubing business manufactures and markets railroad signals and structures, and large diameter steel tubing, and provides outsourced manufacturing and production services for other companies. The Company’s customer base includes large industrial companies and railroads. Customers benefit from the Company’s design and engineering capabilities as well as the Company’s ability to provide a wide spectrum of manufacturing services, including welding, machining, painting, forming, galvanizing, and assembling hydraulic, electrical, and mechanical components.

Markets – The Company’s primary infrastructure market includes moveable concrete barriers, delineation systems, crash cushions, and similar protective equipment. The U.S. roadway infrastructure market includes projects such as new roadway construction, bridges, tunnels, maintenance and resurfacing, and development of technologies for relief of roadway congestion. Much of the U.S. highway infrastructure market is driven by government (federal and state) spending programs. For example, the U.S. government funds highway and road improvements through the Federal Highway Trust Fund Program. This program provides funding to improve the nation’s roadway system. Matching funding from the various states may be required as a condition of federal funding. In the long term, the Company believes that the federal program provides a solid platform for growth in the U.S. market, as it is generally acknowledged that additional funding will be required for infrastructure development and maintenance in the future.

The global market for the Company’s infrastructure products continues to be driven by population growth and the need for improved road safety. The international market is very different from country to country. The standardization in performance requirements and acceptance criteria for highway safety devices adopted by the European Committee for Standardization is expected to lead to greater uniformity and a larger installation program. Prevention programs put in place in various countries to lower highway traffic fatalities may also lead to greater demand. The Company distributes infrastructure products in Europe, South America, the Middle East, Australia and Asia. The Company expects to continue expanding in international markets as populations grow and markets become more established.

Competition – The Company competes in certain product lines with several manufacturers, some of whom may have greater financial resources than the Company. The Company competes by continuously improving its products through ongoing research and development activities. The Company competes with certain products and companies in its crash cushion business, but has limited competition in its moveable barrier line, as there is not another

moveable barrier product today comparable to the *Road Zipper System*[®]. However, the Company's barrier product does compete with traditional "safety-shaped" concrete barriers and other safety barriers.

Distribution Methods and Channels – The Company has dedicated production and sales operations in the United States and Italy. Sales efforts consist of both direct sales and sales programs managed by its network of distributors and third-party representatives. The sales teams have responsibility for new business development and assisting distributors and dealers in soliciting large projects and new customers. The distributor and dealer networks have exclusive territories and are responsible for developing sales and providing service, including product maintenance, repair, and installation. The typical dealer sells an array of safety supplies, road signs, crash cushions, delineation equipment, and other highway products. Customers include departments of transportation, municipal transportation road agencies, roadway contractors, subcontractors, distributors, and dealers. Due to the project nature of the roadway construction and congestion management markets, the Company's customer base changes from year to year. Due to the limited life of projects, it is rare that a single customer will account for a significant amount of revenues in consecutive years. The customer base also varies depending on the type of product sold. The Company's moveable barrier products are typically sold to transportation agencies or the contractors or suppliers serving those agencies. In contrast, distributors account for a majority of crash cushion sales since those products have lower price points and tend to have shorter lead times.

GENERAL

Certain information generally applicable to both of the Company's reportable segments is set forth below.

SEASONALITY

Irrigation equipment sales are seasonal by nature. Farmers generally order systems to be delivered and installed before the growing season. Shipments to customers located in Northern Hemisphere countries usually peak during the Company's second and third fiscal quarters for the spring planting period. Sales of infrastructure products are traditionally higher during prime road construction seasons and lower in the winter. The primary construction season for Northern Hemisphere countries generally corresponds with the Company's third and fourth fiscal quarters.

CUSTOMERS

The Company is not dependent upon a single customer or upon a limited number of customers for a material part of either segment's business. The loss of any one customer would not have a material adverse effect on the Company's financial condition, results of operations, or cash flow.

ORDER BACKLOG

As of August 31, 2020, the Company had an order backlog of \$58.7 million compared with \$55.4 million at August 31, 2019. Included in these backlogs are amounts of \$6.3 million and \$10.0 million, respectively, that are not expected to be fulfilled within the subsequent fiscal year. The Company's backlog can fluctuate from period to period due to the seasonality, cyclicity, timing, and execution of contracts. Backlog typically represents long-term projects as well as short lead-time orders; therefore, it is generally not a good indication of the revenues to be realized in succeeding quarters.

RAW MATERIALS AND COMPONENTS

Raw materials used by the Company include coil steel, angle steel, plate steel, zinc, tires, gearboxes, concrete, rebar, fasteners, and electrical and hydraulic components (motors, switches, cable, valves, hose, and stators). The Company has, on occasion, faced shortages of certain such materials. The Company believes it currently has ready access from assorted domestic and foreign suppliers to adequate supplies of raw materials and components.

CAPITAL EXPENDITURES

Capital expenditures for fiscal 2020, 2019, and 2018 were \$21.4 million, \$23.2 million, and \$11.1 million, respectively. Capital expenditures for fiscal 2021 are estimated to be approximately \$15.0 million to \$20.0 million, including equipment replacement, productivity improvements and commercial growth investments. The Company's management does maintain flexibility to modify the amount and timing of some of the planned expenditures in response to economic conditions.

PATENTS, TRADEMARKS, AND LICENSES

Lindsay's *Zimmatic*[®], *Greenfield*[®], *GrowSmart*[®], *Perrot*[™], *Road Zipper*[®], *The Road Zipper System*[®], *Quickchange*[®] *Moveable Barrier*[™], *ABSORB 350*[®], *ABSORB-M*[™], *FieldNET*[®], *FieldNET Advisor*[®], *FieldNET Crop Advisor*[®], *FieldNET Irrigation Advisor*[®], *FieldNET VRI Advisor*[®], *FieldNET Weather Advisor*[®], *Z-TRAX*[®], *TAU*[®], *Universal TAU-II*[®], *TAU-II-R*[™], *TAU-B_NR*[™], *TAU-M*[™], *TAU-TUBE*[™], *MAX-Tension*[®], *X-Tension*[®], *X-Lite*[®], *CableGuard*[™],

TESI™, *SAB™*, *ArmorGuard™*, *PaveGuard™*, *DR46™*, *U-MAD™*, *Sabertooth®*, and other trademarks are registered or applied for in the major markets in which the Company sells its products. In addition, the Company owns multiple patents dealing with cellular communication techniques, cathodic protection measurement methods, and data compression and transmission. Lindsay follows a policy of applying for patents on all significant patentable inventions in markets deemed appropriate. Although the Company believes it is important to follow a patent protection policy, Lindsay's business is not dependent, to any material extent, on any single patent or group of patents.

HUMAN CAPITAL RESOURCES

The number of persons employed by the Company and its wholly-owned subsidiaries at the fiscal years ended 2020, 2019, and 2018 was 1,125, 1,069, and 1,412, respectively. None of the Company's U.S. employees are represented by a union. Certain of the Company's non-U.S. employees are unionized due to local governmental regulations. Maintaining a sufficient number of skilled employees at its various manufacturing sites is a key focus of the Company's human capital efforts, particularly at its manufacturing facility in Lindsay, Nebraska, which is a rural area. The Company does this by offering competitive wages and benefits and training opportunities.

EFFECT OF GOVERNMENTAL REGULATION

The Company is subject to numerous laws and government regulations, including those that govern environmental and occupational health and safety matters. The Company believes that its operations are substantially in compliance with all applicable laws and regulations, and that it holds all necessary permits to operate its business in each jurisdiction in which its facilities are located. Laws and government regulations are subject to change and interpretation. In some cases, compliance with applicable laws and regulations may require the Company to make additional capital and operational expenditures. The Company, however, is not currently aware of any material expenditures required to comply with applicable laws or government regulations, other than the capital expenditures relating to environmental remediation activities at its Lindsay, Nebraska plant that are more fully described in Note 16, Commitments and Contingencies, to the Company's consolidated financial statements. The Company accrues for the anticipated cost associated with compliance with laws and governmental regulations applicable to its business, including investigation and remediation costs at its Lindsay, Nebraska site, when its obligation to incur those costs is probable and can be reasonably estimated. Any revisions to these estimates could be material to the operating results of any fiscal quarter or fiscal year, however the Company does not expect future capital expenses relating to compliance with government regulations, including those for remediation of its Lindsay, Nebraska site, to have a material adverse effect on its earnings, liquidity, financial condition or competitive position.

FINANCIAL INFORMATION ABOUT FOREIGN AND U.S. OPERATIONS

The Company's primary production facilities are located in the United States. The Company has smaller production and sales operations in Brazil, France, Italy, China, Turkey, and South Africa, as well as distribution and sales operations in the Netherlands, Australia, and New Zealand. Where the Company exports products from the United States to international markets, the Company generally ships against prepayment, an irrevocable letter of credit confirmed by a U.S. bank or another secured means of payment, or with credit insurance from a third party. For sales within both U.S. and foreign jurisdictions, prepayments or other forms of security may be required before credit is granted, however most local sales are made based on payment terms after a full credit review has been performed. Most of the Company's financial transactions are in U.S. dollars, although some export sales and sales from the Company's foreign subsidiaries are conducted in other currencies. Approximately 30 and 26 percent, respectively, of total consolidated Company sales were conducted in currencies other than the U.S. dollar in fiscal 2020 and 2019. To reduce the uncertainty of foreign currency exchange rate movements on these sales and purchase commitments conducted in local currencies, the Company monitors its risk of foreign currency fluctuations and, at times, may enter into forward exchange or option contracts for transactions denominated in a currency other than U.S. dollars.

In addition to the transactional foreign currency exposures mentioned above, the Company also has translation exposure resulting from translating the financial statements of its international subsidiaries into U.S. dollars. In order to reduce this translation exposure, the Company, at times, utilizes foreign currency forward contracts to hedge its net investment exposure in its foreign operations. For information on the Company's foreign currency risks, see Item 7A of Part II of this report.

INFORMATION AVAILABLE ON THE LINDSAY WEBSITE

The Company makes available free of charge on its website homepage, under the tab "Investor Relations – SEC Filings", its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after the Company electronically files such

material with, or furnishes it to, the Securities and Exchange Commission. The Company’s internet address is <http://www.lindsay.com>; however, information posted on its website is not part of this Annual Report on Form 10-K. The following documents are also posted on the Company’s website homepage, under the tabs “Investor Relations – Governance – Committees” and “Investor Relations – Governance – Ethics”:

- Audit Committee Charter
- Compensation Committee Charter
- Corporate Governance and Nominating Committee Charter
- Code of Business Conduct and Ethics
- Corporate Governance Principles
- Code of Ethical Conduct
- Employee Complaint Procedures for Accounting and Auditing Matters
- Special Toll-Free Hotline Number and E-mail Address for Making Confidential or Anonymous Complaints

These documents are also available in print to any stockholder upon request, by sending a letter addressed to the Secretary of the Company.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

All executive officers of the Company are appointed by the Board of Directors annually and have employment agreements. There are no family relationships between any director or executive officer. There are no arrangements or understandings between any executive officer and any other person pursuant to which they were selected as an officer. The following table lists the Company’s executive officers and other key employees and each of their ages, and positions as of October 21, 2020.

	Age	Position
Timothy L. Hassinger	58	President and Chief Executive Officer
Eric R. Arneson*	46	Senior Vice President, General Counsel and Secretary
Brian L. Ketcham	59	Senior Vice President and Chief Financial Officer
J. Scott Marion	52	President – Infrastructure
Gustavo E. Oberto	47	President – Irrigation
P. David Salen*	58	Senior Vice President – Global Operations
Kelly M. Staup*	48	Senior Vice President – Human Resources and Chief Diversity Officer
Eric J. Talmadge*	57	Senior Vice President and Chief Information Officer
Randy A. Wood	48	Chief Operating Officer
Lori L. Zarkowski*	45	Chief Accounting Officer

* The employee is not an executive officer of the Registrant.

Mr. Timothy L. Hassinger is the President and Chief Executive Officer of the Company, a position he has held since October 2017. Mr. Hassinger has also been a director of the Company since October 2017 and he is the only executive officer of the Company serving on the Board of Directors. Prior to joining the Company, Mr. Hassinger served as President and Chief Executive Officer of Dow AgroSciences, an Indianapolis-based subsidiary of The Dow Chemical Company, which specializes in agricultural chemicals and biotechnology solutions. During his 33-year career at Dow AgroSciences, Mr. Hassinger held a series of senior leadership positions across a variety of domestic and international business units. Prior to becoming President and Chief Executive Officer of Dow AgroSciences in May 2014, he served as its Global Commercial Leader from February 2013 to April 2014 and as Vice President for its Crop Protection Global Business Unit from August 2009 to April 2014. Previously, he served as Vice President for the Dow AgroSciences business in the Europe, Latin America, and Pacific regions from 2007 to 2009. In 2005, he moved to Shanghai, where he served as Regional Commercial Unit Leader for Greater China. Mr. Hassinger currently serves on the Board of Directors of AGDATA.

Mr. Eric R. Arneson is Senior Vice President, General Counsel and Secretary of the Company and has held such positions since April 2008, when he joined the Company. Prior to that time and since January 1999, Mr. Arneson practiced law with the law firm of Kutak Rock LLP, and was most recently a partner of the firm.

Mr. Brian L. Ketcham is Senior Vice President and Chief Financial Officer of the Company, and has held such positions since April 2016. Prior to joining Lindsay and since 2001, Mr. Ketcham served in various finance roles at Valmont Industries, Inc., a company that provides irrigation and infrastructure equipment, most recently as Vice

President and Group Controller of the Engineered Support Structures segment. Prior to joining Valmont, Mr. Ketcham held various positions with Consolidated Container Company LLC and KPMG LLP.

Mr. J. Scott Marion is President – Infrastructure Division, a position he has held with the Company since May 2016. Between April 2011 and May 2016, Mr. Marion served as Vice President and General Manager – Americas and APAC (Infrastructure) of the Company. From January 2005 to April 2011, Mr. Marion served in several management positions at Pentair. Prior to 2005, Mr. Marion spent 14 years with General Electric in a variety of sales and managerial capacities.

Mr. Gustavo E. Oberto is the President – Irrigation Division, a position he has held since September 2020. Between September 2019 and August 2020, Mr. Oberto served as President – Elecsys International, LLC, which is a subsidiary of the Company. Prior to joining the Company, Mr. Oberto served in various management roles at Conductix-Wampfler Group, an industrial equipment supplier and a division of Delachaux S.A, most recently as Managing Director of Global Sales & Markets. During his 20-year career at Conductix-Wampfler Group, Mr. Oberto held a series of leadership positions in international business development. Prior to joining Conductix-Wampfler Group, Mr. Oberto worked for Travelex Global Payments and also worked as International Liaison to Former Nebraska Governor Ben Nelson where he advised Midwestern companies on how to penetrate the Latin America agriculture market. Mr. Oberto is currently a member of the U.S. Commercial Service District Export Council.

Mr. P. David Salen is Senior Vice President, Global Operations of the Company, a position he has held since November 2019. Prior to joining the Company, Mr. Salen served as Principal Advisor of The Lean Manufacturing Resource following his work as President of The Meadville Forge Group from 2015 to 2017 and President of Titan Wheel Corporation from 2010 to 2014. Prior to joining Titan Wheel Corporation, Mr. Salen worked for UBE Automotive North America and Accuride..

Ms. Kelly M. Staup is Senior Vice President – Human Resources and Chief Diversity Officer, a position she has held with the Company since January 2018. From November 2016 to January 2018, Ms. Staup served as Director – Human Resources of the Company. From June 2011 to November 2016, Ms. Staup served as the Company's Organization Development and Recruiting Manager. Prior to joining the Company, Ms. Staup was an Associate Vice President of SkillStorm from August 2008 to June 2011 and previously served in managerial roles at Ajilon and Digital People.

Mr. Eric J. Talmadge is Senior Vice President and Chief Information Officer of the Company and has served as Chief Information Officer since December 2012, when he joined the Company. Prior to joining the Company, Mr. Talmadge served as Chief Information Officer of Crete Carrier Corporation from 2008 to December 2012. Prior to joining Crete Carrier Corporation, Mr. Talmadge served in a variety of information technology roles with SiTEL, Lozier Corporation, the University of Missouri, and the United States Air Force.

Mr. Randy A. Wood is Chief Operating Officer of the Company and has held such position since September 2020. Between May 2016 and September 2020, Mr. Wood served as President – Irrigation of the Company. Between October 2013 and May 2016, Mr. Wood served as President – International Irrigation of the Company. Between February 2012 and October 2013, Mr. Wood served as Vice President – Americas / ANZ Sales and Marketing. Previously he was Vice President – North America Irrigation Sales of the Company and held such position from March 2008, when he joined the Company. Prior to March 2008, Mr. Wood spent 11 years with Case Corporation / CNH Global including roles as the Senior Director of Marketing, Case IH Tractors, and Senior Director of Sales and Marketing, Parts and Service.

Ms. Lori L. Zarkowski is Chief Accounting Officer of the Company and has held such position since August 2011. Ms. Zarkowski joined the Company in June 2007 as Corporate Reporting Manager and was promoted to Corporate Controller in April 2008. Prior to joining the Company and since 1997, Ms. Zarkowski was most recently an Audit Senior Manager with Deloitte & Touche LLP.

ITEM 1A — Risk Factors

The following are certain of the more significant risks that may affect the Company's business, financial condition and results of operations.

The Company's irrigation revenues are highly dependent on the agricultural industry and weather conditions.

The Company's irrigation revenues are cyclical and highly dependent upon the need for irrigated agricultural crop production which, in turn, depends upon many factors, including total worldwide crop production, the profitability of agricultural crop production, agricultural commodity prices, net farm income, availability of financing for farmers, governmental policies regarding the agricultural sector, water and energy conservation policies, the regularity of rainfall, and regional climate conditions. As farm income decreases, farmers may postpone capital expenditures or seek less expensive irrigation alternatives.

Weather conditions, particularly leading up to the planting and early growing season, can significantly affect the purchasing decisions of consumers of irrigation equipment. Natural calamities such as regional floods, hurricanes or other storms, and droughts can have significant effects on seasonal irrigation demand. Drought conditions, which generally affect irrigation equipment demand positively over the long term, can adversely affect demand if water sources become unavailable or if governments impose water restriction policies to reduce overall water availability.

Changing worldwide demand for food and biofuels could have an effect on the price of agricultural commodities and consequently the demand for irrigation equipment.

Changing worldwide demand for farm outputs to meet the world's growing food and biofuel demands, driven in part by government policies and an expanding global population, are likely to result in fluctuating agricultural commodity prices, which affect demand for irrigation equipment. The primary benefit of many of the Company's irrigation products is to increase grain yields and the resulting revenue for farmers. As grain prices decline, the breakeven point of incremental production is more difficult to achieve, reducing or eliminating the profit and return on investment from the purchase of the Company's products. As a result, changes in grain prices can significantly affect the Company's sales levels.

A decline in oil prices or the overall demand for motor fuels, or changes in government policies regarding biofuels could also negatively affect the biofuels market and/or reduce government revenues of oil-producing countries that purchase or subsidize the purchase of irrigation equipment. Biofuels production is a significant source of grain demand in the U.S. and certain international markets. While ethanol blending levels are currently mandated within the U.S., potential mandate changes or price declines for ethanol could reduce the demand for grains. In addition, a number of ethanol producers in the U.S. are cooperatives partially owned by farmers. Reduced profit of ethanol production could reduce income for farmers which could, in turn, reduce the demand for irrigation equipment.

The Company's international sales are highly dependent on foreign market conditions and subject the Company to additional risk, restrictions, and compliance obligations.

International revenues are primarily generated from Australia, New Zealand, Canada, Europe, Mexico, the Middle East, Africa, China, Russia, Ukraine, and Central and South America. In addition to risks relating to general economic and potential instability in these countries, a number of countries are particularly susceptible to disruption from changing socioeconomic conditions as well as terrorism, sanctions, war, outbreaks, and similar incidents. The collectability of receivables can also be difficult to estimate, particularly in areas of political instability or with governments with which the Company has limited experience or where there is a lack of transparency as to the current credit condition.

The Company's international sales efforts and profit margins are affected by international trade barriers, including governmental policies on tariffs, taxes, import or export licensing requirements and trade sanctions. For example, in 2018, the U.S. and China began to impose partial tariffs on each other's products, and the trade tension between the two countries has escalated in 2019 through 2020. Certain of the components required for the manufacture of the Company's products have been or may be impacted by tariffs. Likewise, other international trade disputes, changes to international trade agreements or policies, or any increased regulation on trade with Canada and Mexico resulting from the replacement of the North American Free Trade Agreement ("NAFTA") with the United States-Mexico-Canada Agreement, could increase our costs, reduce our competitiveness, and have an adverse effect on the Company's business, financial condition and results of operations.

In addition, the Company's international sales efforts must also comply with anti-corruption laws like the U.S. Foreign Corrupt Practices Act. These anti-corruption laws generally prohibit companies and their intermediaries (including, in the Company's case, dealers and sales representatives) from making improper payments or providing anything of value to improperly influence government officials or certain private individuals for the purpose of obtaining or retaining a business advantage. As part of the Company's irrigation and infrastructure sales efforts, the

Company promotes and sells products to governmental entities and state-owned or state-backed business enterprises, the employees and representatives of which may be considered government officials for purposes of the U.S. Foreign Corrupt Practices Act. Further, some of the countries in which the Company does business lack fully developed legal systems and are perceived to have elevated levels of corruption. Although the Company has compliance and training programs in place designed to reduce the likelihood of potential violations of such laws, violations of these laws or other compliance requirements could occur and result in criminal or civil sanctions and have an adverse effect on the Company's reputation, business, financial condition and results of operations.

Epidemics, pandemics, and other outbreaks (including the coronavirus (COVID-19) pandemic) can disrupt the Company's operations and adversely affect its business, results of operations, and cash flows. Epidemics, pandemics, and other outbreaks of an illness, disease, or virus (including COVID-19) have adversely affected, and could adversely affect in the future, workforces, customers, economies, and financial markets globally, potentially leading to economic downturns. The significance of the impact on the Company's operations of an epidemic, pandemic, or other outbreak depends on numerous factors that the Company may not be able to accurately predict or effectively respond to, including, without limitation: the duration and scope of the outbreak; actions taken by governments, businesses, and individuals in response to the outbreak; the effect on economic activity and actions taken in response; the effect on customers and their demand for the Company's products and services; and the Company's ability to manufacture, sell, and service its products, including without limitation as a result of supply chain challenges, facility closures, social distancing, restrictions on travel, fear or anxiety by the populace, and shelter-in-place orders. These and other factors relating to or arising from an epidemic, pandemic, or other outbreak could have a material adverse effect on the Company's business, results of operations, and cash flows, as well as the trading price of the Company's securities. Please also see the discussion on the Company's response to COVID-19 in Item 7 of Part II of this report, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

The Company's international sales and profit margins are subject to currency exchange risk. The Company's international sales involve some level of export from the U.S., either of components or completed products. Policies and geopolitical events affecting exchange rates could adversely affect the international flow of agricultural and other commodities, which can cause a corresponding downturn in the demand for agricultural equipment in many areas of the world. Further, any strengthening of the U.S. dollar or any other currency of a country in which the Company manufactures its products (e.g. the Euro, the Brazilian real, the South African rand, the Turkish lira, and the Chinese renminbi) and/or any weakening of local currencies can increase the cost of the Company's products in its foreign markets. Irrespective of any effect on the overall demand for agricultural equipment, the effect of these changes can make the Company's products less competitive relative to local producing competitors and, in extreme cases, can result in the Company's products not being cost-effective for customers. As a result, the Company's international sales and profit margins could decline.

The Company's profitability may be negatively affected by changes in the availability and price of certain parts, components, and raw materials. The Company requires access to various parts, components, and raw materials at competitive prices in order to manufacture its products. Changes in the availability and price of these parts, components, and raw materials (including steel and zinc), which have changed significantly and rapidly at times and are affected by factors like demand, tariffs, freight costs, and outbreaks, can significantly increase the costs of production. Due to price competition in the market for irrigation equipment and certain infrastructure products, the Company may not be able to recoup increases in these costs through price increases for its products, which would result in reduced profitability. Whether increased operating costs can be passed through to the customer depends on a number of factors, including farm income and the price of competing products. Further, the Company relies on a limited number of suppliers for certain raw materials, parts and components in the manufacturing process. Disruptions or delays in supply or significant price increases from these suppliers could adversely affect the Company's operations and profitability. Such disruptions, terminations or cost increases could result in cost inefficiencies, delayed sales or reduced sales. The aforementioned risks have been, and may continue to be, exacerbated by the impact of COVID-19.

The Company's infrastructure revenues are highly dependent on government funding of transportation projects and subject to compliance with government regulations. The demand for the Company's infrastructure products depends to a large degree on the amount of government spending authorized to improve road and highway systems. For example, the U.S. government funds highway and road improvements through the Federal Highway Trust Fund Program and matching funding from states may be required as a condition of federal funding. If highway funding is reduced or delayed, it may reduce demand for the Company's infrastructure products.

In addition, the Company's infrastructure products are required to meet certain standards as outlined by the various governments worldwide. The Federal Highway Administration ("FHWA") and state departments of transportation have implemented Manual for Assessing Safety Hardware ("MASH") standards which update and supersede National Cooperative Highway Research Program ("NCHRP") Report 350 standards for evaluating new road safety hardware devices. While infrastructure products previously accepted under NCHRP Report 350 criteria are not required to be retested under MASH standards, they generally are no longer eligible for federal reimbursement as the MASH standards have been implemented by FHWA and the states. The Company has incurred, and will continue to incur, research and development and testing expense to develop products to comply with MASH standards. Any reevaluation of the Company's infrastructure products' compliance with applicable standards, the implementation of new standards, and/or any delay in the Company's development of additional infrastructure products that comply with new standards could have a significant adverse effect on the Company's competitive position and on sales and profitability from its infrastructure product line.

Compliance with applicable environmental and health and safety regulations or standards may require additional capital and operational expenditures. The Company is subject to numerous laws and government regulations, including those which govern environmental and occupational health and safety matters. The Company believes that its operations are substantially in compliance with all such applicable laws and regulations and that it holds all necessary permits to operate its business in each jurisdiction in which its facilities are located. Laws and government regulations applicable to the Company are subject to change and interpretation. Compliance with applicable laws and regulations may require the Company to make additional capital and operational expenditures that may have a material adverse effect on its earnings, liquidity, financial condition or competitive position. In particular, the Company may incur costs in connection with the remediation of environmental contamination at its Lindsay, Nebraska site that exceed the amounts that the Company has accrued for this purpose as of the end of fiscal 2020, as more fully described in Note 16, Commitments and Contingencies, to the Company's consolidated financial statements.

The Company is exposed to risks from legal proceedings. From time to time, the Company may be involved in various legal proceedings and other various claims that arise in the ordinary course of its business, which may include commercial, employment, product liability, tort, and other litigation. Current and future litigation, governmental proceedings and investigations, audits, indemnification claims or other claims that the Company faces may result in substantial costs and expenses and significantly divert the attention of its management regardless of the outcome. In addition, these matters could lead to increased costs or interruptions of its normal business operations. Litigation, governmental proceedings and investigations, audits, indemnification claims or other claims involve uncertainties and the eventual outcome of any such matter could adversely affect the Company's business, results of operations or cash flows. For a summary of the Company's infrastructure products litigation, see Note 16, Commitments and Contingencies, to the Company's consolidated financial statements.

The frequency and magnitude of liability claims and the related expenses could lower profitability and increase business risk. The nature of the Company's business subjects the Company to potential liability for claims alleging property damage and personal injury or death arising from the use of or exposure to its products, especially infrastructure products that are installed along roadways. While the Company's liability insurance coverage is consistent with commercial norms in the industries in which the Company operates, an unusually large liability claim or a string of claims could potentially exceed the Company's available insurance coverage. In addition, the availability of, and the Company's ability to collect on, insurance coverage can be subject to factors beyond the Company's control. For example, any accident, incident, or lawsuit involving the Company, its products specifically, or the industries in which the Company operates generally, even if the Company is fully insured, contractually indemnified, or not held to be liable, could significantly affect the cost and availability of insurance to the Company in the future.

If any of the Company's third-party insurers fail, cancel, or refuse coverage, or otherwise are unable to provide the Company with adequate insurance coverage, then the Company's overall risk exposure and operational expenses would increase and the management of the Company's business operations would be disrupted.

Further, as insurance policies expire, increased premiums for renewed or new coverage, if such coverage can be secured, may increase the Company's insurance expense and/or require that the Company increase its self-insured retention or deductibles. The Company maintains primary coverage and excess coverage policies. If the number of claims or the dollar amounts of any such claims rise in any policy year, the Company could suffer additional costs associated with accessing its excess coverage policies. Also, an increase in the loss amounts attributable to such claims could expose the Company to uninsured damages if the Company was unable or elected not to insure against certain claims because of increased premiums or other reasons.

The Company's infrastructure products are installed along roadways in inherently dangerous applications. Accidents involving the Company's infrastructure products could reduce demand for such products and expose the Company to significant damages and reputational harm. The Company is currently defending a number of product liability lawsuits involving the Company's X-Lite® end terminal. In June 2019, the Company was informed by letter that the Department of Justice, Civil Division, and U.S. Attorney's Office for the Northern District of New York, with the assistance of the Department of Transportation, Office of Inspector General, are conducting an investigation of the Company relating to the Company's X-Lite end terminal and potential violations of the federal civil False Claims Act. While the Company's infrastructure products are designed to meet all applicable standards in effect in the markets in which such products are offered, the risk of product liability claims, demands for reimbursement or compensatory payments, and associated adverse publicity is inherent in the development, manufacturing, marketing, and sale of such products, including end terminals and crash cushions that are ultimately installed along roadways. In addition to this inherent risk, a sizable False Claims Act judgment against a competitor (which was reversed on appeal) brought significant attention to the infrastructure products industry and may be a factor leading to additional lawsuits, demands, and investigations being pursued against the Company and others in the industry.

An actual or perceived issue with the Company's infrastructure products can lead to a decline in demand for such products, the removal of such products from qualified products lists used by government customers in their purchasing decisions, the removal and replacement of such products from roadways by government customers and demands for reimbursement or compensatory payments for such actions, adverse publicity, claims or litigation, and/or the diversion of management's attention, which could materially and adversely affect the Company's reputation, business, financial condition, and results of operations. While infrastructure product selection, assembly, installation, operation, repair, and maintenance are the responsibilities of dealers, distributors, customers, and/or state departments of transportation, the Company may nevertheless also be subjected to claims, litigation, or demands for reimbursement or compensatory payments in connection with a third party's alleged failure to satisfactorily discharge such responsibilities, including but not limited to claims associated with personal injuries, property damage, and death. Likewise, improper assembly, installation, operation, repair, or maintenance of the Company's infrastructure products may cause such infrastructure products to fail to meet certain performance standards, which could lead to similar consequences as an actual or perceived issue with the infrastructure products themselves.

Although the Company currently maintains insurance against product-related claims or litigation, the Company could be exposed to significant losses arising from claims involving infrastructure products if the Company's insurance does not cover all associated liabilities or if coverage in the future becomes unobtainable on commercially reasonable terms.

The Company may not fully sustain targeted performance improvements and other benefits realized from the Foundation for Growth initiative. Foundation for Growth is a focused performance improvement initiative by the Company announced in March 2018 that includes setting strategic direction, defining priorities, and improving overall operating performance. The Company's future success is partly dependent upon successfully executing, and realizing performance improvements, revenue gains, cost savings and other benefits from, this initiative.

While the Company has already realized meaningful benefits and achieved operating margin improvements in large part from the initiative, headwinds such as challenging agricultural market conditions, low commodity prices, and trade uncertainty are largely outside of the Company's control and continue to weigh on demand. As a result, it is possible that the Company may not fully sustain the targeted operating margin improvements and other benefits realized from Foundation for Growth in future periods.

Changes in interest rates could reduce demand for the Company's products. Global interest rates have recently been at or near historic lows. Rising interest rates could have a dampening effect on overall economic activity and/or the financial condition of the Company's customers, either or both of which could negatively affect customer demand for the Company's products and customers' ability to repay obligations to the Company. An increase in interest rates could also make it more difficult for customers to cost-effectively fund the purchase of new equipment, which could adversely affect the Company's sales.

The Company's consolidated financial results are reported in U.S. dollars while certain assets and other reported items are denominated in the currencies of other countries, creating currency translation risk. The reporting currency for the Company's consolidated financial statements is the U.S. dollar. Certain of the Company's assets,

liabilities, expenses and revenues are denominated in other countries' currencies. Those assets, liabilities, expenses and revenues are translated into U.S. dollars at the applicable exchange rates to prepare the Company's consolidated financial statements. Therefore, increases or decreases in exchange rates between the U.S. dollar and those other currencies affect the value of those items as reflected in the Company's consolidated financial statements. Substantial fluctuations in the value of the U.S. dollar compared to other currencies could have a significant effect on the Company's results.

Security breaches and other disruptions to the Company's information technology infrastructure could interfere with its operations and could compromise the Company's and its customers' and suppliers' information, exposing the Company to liability that could cause its business and reputation to suffer. In the ordinary course of business, the Company relies upon information technology networks and systems to process, transmit and store electronic information, and to manage or support a variety of business functions, including supply chain, manufacturing, distribution, invoicing and collection of payments. The Company uses information technology systems to record, process and summarize financial information and results of operations for internal reporting purposes and to comply with regulatory financial reporting, legal and tax requirements. Additionally, the Company collects and stores sensitive data, including intellectual property, proprietary business information and the proprietary business information of customers and suppliers, as well as personally identifiable information of customers and employees, in data centers and on information technology networks. The secure operation of these networks and the processing and maintenance of this information is critical to the Company's business operations and strategy. Despite security measures and business continuity plans, the Company's information technology networks and infrastructure may be vulnerable to damage, disruptions or shutdowns due to, among other reasons, attacks by hackers or breaches due to employee error or malfeasance or other disruptions during the process of upgrading or replacing computer software or hardware, power outages, computer viruses, telecommunication or utility failures or natural disasters or other catastrophic events. The occurrence of any of these events could compromise the Company's networks, and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability or regulatory penalties under laws protecting the privacy of personal information, disrupt operations, and damage the Company's reputation, which could adversely affect the Company's business.

ITEM 1B — Unresolved Staff Comments

None.

ITEM 2 — Properties

The Company's facilities are well-maintained, in good operating condition, and suitable for present purposes. These facilities, together with both short-term and long-term planned capital expenditures, are expected to meet the Company's manufacturing needs in the foreseeable future. The Company does not anticipate any difficulty in retaining occupancy of any leased facilities, either by renewing leases prior to expiration or by replacing them with equivalent leased facilities. The following are the Company's significant properties.

Segment	Geographic location(s)	Own/ lease	Lease expiration	Square feet	Property description
Corporate	Omaha, Nebraska	Lease	2034	55,000	Corporate headquarters
Irrigation	Lindsay, Nebraska	Own	N/A	300,000	Principal U.S. manufacturing plant consists of eight separate buildings located on 122 acres
Irrigation	Corlu, Turkey	Lease	2025	283,000	Manufacturing plant for irrigation products
Irrigation	Tianjin, China	Lease	2022	163,000	Manufacturing plant for irrigation products
Irrigation	La Chapelle, France	Own	N/A	72,000	Manufacturing plant for irrigation products
Irrigation	Bellville, South Africa	Lease	2024	71,000	Manufacturing plant for irrigation products
Irrigation	Mogi Mirim, Sao Paulo, Brazil	Own	N/A	67,000	Manufacturing plant for irrigation products
Irrigation	Olathe, Kansas	Own	N/A	60,000	Manufacturing plant for machine-to-machine products
Infrastructure	Milan, Italy	Own	N/A	45,000	Manufacturing plant for infrastructure products
Infrastructure	Rio Vista, California	Own	N/A	30,000	Manufacturing plant for infrastructure products

ITEM 3 — *Legal Proceedings*

In the ordinary course of its business operations, the Company is involved, from time to time, in commercial litigation, product liability litigation, tort litigation, employment disputes, administrative proceedings, business disputes, and other legal proceedings. No such current proceedings, individually or in the aggregate, are expected to have a material effect on the business or financial condition of the Company, other than the specific environmental remediation matters which are disclosed as part of Note 16, Commitments and Contingencies, to the Company's consolidated financial statements. Any revisions to the estimates accrued for environmental remediation could be material to the operating results of any fiscal quarter or fiscal year, however the Company does not expect such additional expenses would have a material adverse effect on its liquidity or financial condition.

For a summary of the Company's infrastructure products litigation, see Note 16, Commitments and Contingencies, to the Company's consolidated financial statements.

ITEM 4 — *Mine Safety Disclosures*

Not applicable.

PART II

ITEM 5 — *Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Holders

Lindsay Common Stock trades on the New York Stock Exchange, Inc. (“NYSE”) under the ticker symbol LNN. As of October 16, 2020, there were approximately 155 stockholders of record.

Purchases of Equity Securities by the Issuer and Affiliated Purchases

The Company’s Board of Directors authorized a share repurchase program of up to \$250.0 million of common stock with no expiration date. Under the program, shares may be repurchased in privately negotiated and/or open market transactions as well as under formalized trading plans in accordance with the guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. There were no shares repurchased during the twelve months ended August 31, 2020, 2019, and 2018. The remaining amount available under the repurchase program was \$63.7 million as of August 31, 2020.

Dividends

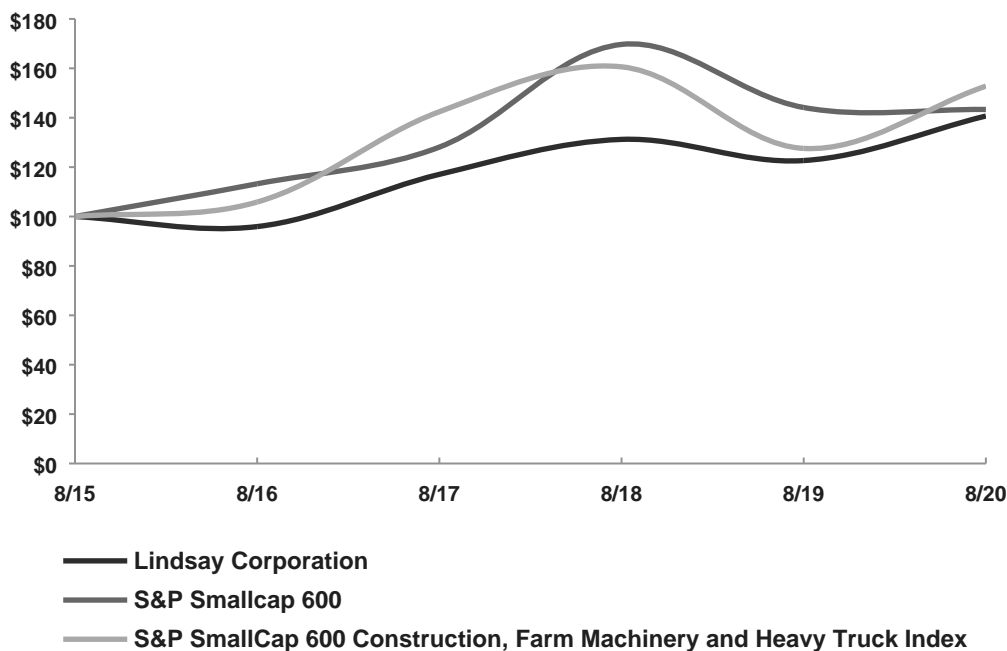

The Company paid a total of \$13.6 million and \$13.4 million in dividends during fiscal 2020 and 2019, respectively. The Company currently expects that cash dividends comparable to those paid historically will continue to be paid in the future, although there can be no assurance as to the payment of future dividends as such payment depends on results of operations, financial condition, business prospects, capital requirements, contractual restrictions, any potential indebtedness the Company may incur, restrictions imposed by applicable law, tax considerations, and other factors that the Board of Directors deems relevant.

Company Stock Performance

The following graph compares the cumulative five-year total return attained by stockholders on the Company's Common Stock relative to the cumulative total returns of the S&P SmallCap 600 Index and the S&P SmallCap 600 Construction, Farm Machinery and Heavy Truck Index for the five-year period ended August 31, 2020. An investment of \$100 (with the reinvestment of all dividends) is assumed to have been made in the Company's Common Stock and in each of the indexes on August 31, 2014 and the graph shows its relative performance through August 31, 2020.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Lindsay Corporation, the S&P Smallcap 600 Index,
and S&P Smallcap 600 Construction, Farm Machinery and Heavy Truck Index

*\$100 invested on 8/31/15 in stock or index, including reinvestment of dividends.
Fiscal year ending August 31.

⁽¹⁾ Fiscal 2019 operating expenses include costs of \$15.1 million (\$11.6 million after-tax, or \$1.07 per diluted share) in connection with the Foundation for Growth initiative and a valuation adjustment of \$2.7 million (\$1.8 million after-tax, or \$0.17 per diluted share) for indirect tax credits in a foreign jurisdiction.

⁽²⁾ Fiscal 2018 operating expenses include costs of \$9.7 million (\$8.8 million after-tax, or \$0.82 per diluted share) in connection with the Foundation for Growth initiative. Net earnings also include tax expense of \$2.5 million (\$0.23 per diluted share) related to the impact of the U.S. Tax Cuts and Jobs Act.

⁽³⁾ Fiscal 2016 operating expenses include an increase in an environmental remediation reserve of \$13.0 million.

⁽⁴⁾ Defined as current and long-term debt plus shareholders' equity.

⁽⁵⁾ Defined as operating income (after tax) divided by the average of beginning and ending invested capital.

⁽⁶⁾ Defined as net earnings divided by beginning-of-period shareholders' equity.

ITEM 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations

Concerning Forward—Looking Statements

This Annual Report on Form 10-K, including Management’s Discussion and Analysis of Financial Condition and Results of Operations, contains not only historical information, but also forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements that are not historical are forward-looking and reflect expectations for future Company performance. In addition, forward-looking statements may be made orally or in press releases, conferences, reports, on the Company’s web site, or otherwise, in the future by or on behalf of the Company. When used by or on behalf of the Company, the words “expect,” “anticipate,” “estimate,” “believe,” “intend,” “will,” “plan,” “predict,” “project,” “outlook,” “could,” “may,” “should,” and similar expressions generally identify forward-looking statements. For these statements throughout the Annual Report on Form 10-K, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. The entire sections entitled “Financial Overview and Outlook” and “Risk Factors” should be considered forward-looking statements.

Forward-looking statements involve a number of risks and uncertainties, including but not limited to those discussed in the “Risk Factors” section contained in Item 1A. Readers should not place undue reliance on any forward-looking statement and should recognize that the statements are predictions of future results or conditions, which may not occur as anticipated. Actual results or conditions could differ materially from those anticipated in the forward-looking statements and from historical results, due to the risks and uncertainties described herein, as well as others not now anticipated. The risks and uncertainties described herein are not exclusive and further information concerning the Company and its businesses, including factors that potentially could materially affect the Company’s financial results, may emerge from time to time. Except as required by law, the Company assumes no obligation to update forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements.

Company Overview

The Company manufactures and markets center pivot, lateral move, and hose reel irrigation systems. The Company also produces and markets irrigation controls, chemical injection systems, remote monitoring and irrigation scheduling systems. These products are used by farmers to increase or stabilize crop production while conserving water, energy, and labor. Through its acquisitions and third-party commercial arrangements, the Company has been able to enhance its capabilities in providing innovative, turn-key solutions to customers through the integration of designs, controls, and pump stations. The Company sells its irrigation products primarily to a world-wide independent dealer network, who resell to their customers, the farmers. The Company’s primary production facilities are located in the United States. The Company has smaller production and sales operations in Brazil, France, China, Turkey, and South Africa, as well as distribution and sales operations in the Netherlands, Australia, and New Zealand. The Company also manufactures and markets, through distributors and direct sales to customers, various infrastructure products, including moveable barriers for traffic lane management, crash cushions, preformed reflective pavement tapes, and other road safety devices, through its production facilities in the United States and Italy, and has produced road safety products in irrigation manufacturing facilities in China and Brazil. In addition, the Company’s infrastructure segment produces large diameter steel tubing, and railroad signals and structures, and provides outsourced manufacturing and production services for other companies.

For the business overall, the global, long-term drivers of population growth, water conservation and environmental sustainability, the need for increased food production, and the need for safer, more efficient transportation solutions remain positive. Key factors which impact demand for the Company’s irrigation products include total worldwide agricultural crop production, the profitability of agricultural crop production, agricultural commodity prices, net farm income, availability of financing for farmers, governmental policies regarding the agricultural sector, water and energy conservation policies, the regularity of rainfall, regional climate conditions, and foreign currency exchange rates. A key factor which impacts demand for the Company’s infrastructure products is the amount of spending authorized by governments to improve road and highway systems. Much of the U.S. highway infrastructure market is driven by government spending programs. For example, the U.S. government funds highway and road improvements through the Federal Highway Trust Fund Program. This program provides funding to improve the nation’s roadway system. In December 2015, the U.S. government enacted a five-year, \$305 billion highway-funding bill (the FAST Act”) to fund highway and bridge projects. The FAST Act expired September 30, 2020 and a one-year extension has been approved by Congress. Matching funding from the various states may be required as a condition of federal funding.

The Company continues to have an ongoing, structured, acquisition process that it expects to generate additional growth opportunities throughout the world and add to its irrigation and infrastructure capabilities. The Company is committed to achieving earnings growth by global market expansion, improvements in margins, and strategic acquisitions.

COVID-19 Impact

In March 2020, the World Health Organization declared coronavirus (COVID-19) a global pandemic. This outbreak, which has continued to spread worldwide, has adversely affected workforces, customers, economies, and financial markets globally, leading to economic uncertainty. Shelter-in-place or stay-at-home orders have been implemented from time to time in many of the jurisdictions in which the Company operates. However, because the Company supports critical industries, the Company's facilities worldwide have generally been considered "business essential" and have remained open throughout the outbreak with limited exceptions. Accordingly, COVID-19 has had a limited impact on the Company's manufacturing operations to date. For the fiscal year ended August 31, 2020, the Company experienced shipment and project delays related to COVID-19 that impacted revenue by approximately \$8.0 million. In addition, the Company incurred additional expenses related to premium pay for factory workers and new procedures to protect the health and well-being of employees. These additional costs have been mostly offset by reductions in other expenses, such as employee travel and entertainment, resulting in a negligible impact on net earnings.

The ultimate impact of COVID-19 on the Company's business, results of operations, or cash flows remains uncertain and depends on numerous evolving factors that the Company may not be able to accurately predict or effectively respond to, including, without limitation: the duration and scope of the outbreak; actions taken by governments, businesses, and individuals in response to the outbreak; the effect on economic activity and actions taken in response; the effect on customers and their demand for the Company's products and services; and the Company's ability to manufacture, sell, and service its products, including without limitation as a result of supply chain challenges, facility closures, social distancing, restrictions on travel, fear or anxiety by the populace, and shelter-in-place orders. As such, the financial impact of COVID-19 on the Company's business, results of operations, or cash flows cannot be reasonably estimated at this time.

New Accounting Standards Issued But Not Yet Adopted

See Note 2, New Accounting Pronouncements, to the Company's consolidated financial statements for information regarding recently issued accounting pronouncements.

Critical Accounting Policies and Estimates

In preparing the consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP"), management must make a variety of decisions which impact the reported amounts and the related disclosures. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. In reaching such decisions, management applies judgment based on its understanding and analysis of the relevant facts and circumstances. Certain of the Company's accounting policies are critical, as these policies are most important to the presentation of the Company's consolidated results of operations and financial condition. They require the greatest use of judgments and estimates by management based on the Company's historical experience and management's knowledge and understanding of current facts and circumstances. Management periodically re-evaluates and adjusts the estimates that are used as circumstances change. Following is the accounting policy management considers critical to the Company's consolidated results of operations and financial condition:

Environmental Remediation Liabilities

The Company's accounting policy on environmental remediation is critical because it requires significant judgments and estimates by management, involves changing regulations and approaches to remediation plans, and any revisions could be material to the operating results of any fiscal quarter or fiscal year. The Company is subject to an array of environmental laws and regulations relating to the protection of the environment. In particular, the Company committed to remediate environmental contamination of the groundwater at, and land adjacent, to its Lindsay, Nebraska facility (the "site") with the EPA. The Company and its environmental consultants have developed a remedial alternative work plan, under which the Company continues to work with the EPA to define and implement steps to better contain and remediate the remaining contamination.

Environmental remediation liabilities include costs directly associated with site investigation and clean up, such as materials, external contractor costs, and incremental internal costs directly related to the remedy. Estimates used to

record environmental remediation liabilities are based on the Company's best estimate of probable future costs based on site-specific facts and circumstances. Estimates of the cost for the likely remedy are developed using internal resources or by third-party environmental engineers or other service providers. The Company records the environmental remediation liabilities that represent the points in the range of estimates that are most probable, or the minimum amount when no amount within the range is a better estimate than any other amount. Portions of the long-term liability that are fixed and reliably determinable are discounted at a risk-free rate.

The Company accrues the anticipated cost of environmental remediation when the obligation is probable and can be reasonably estimated. While the plan has not formally been approved by the EPA, the Company believes the current accrual is a good faith estimate of the long-term cost of remediation at this site; however, the estimate of costs and their timing could change as a result of a number of factors, including (1) EPA input on the proposed remediation plan and any changes which they may subsequently require, (2) refinement of cost estimates and length of time required to complete remediation and post-remediation operations and maintenance, (3) effectiveness of the technology chosen in remediation of the site as well as changes in technology that may be available in the future, and (4) unforeseen circumstances existing at the site. As a result of these factors, the actual amount of costs incurred by the Company in connection with the remediation of contamination of its Lindsay, Nebraska site could exceed the amounts accrued for this expense at this time. While any revisions could be material to the operating results of any fiscal quarter or fiscal year, the Company does not expect such additional expenses would have a material adverse effect on its liquidity or financial condition.

Financial Overview and Outlook

Operating revenues in fiscal 2020 were \$474.7 million, a 7 percent increase compared to \$444.1 million in the prior year. Irrigation segment revenues decreased 2 percent to \$343.5 million and infrastructure segment revenues increased 42 percent to \$131.2 million. Net earnings for fiscal 2020 were \$38.6 million or \$3.56 per diluted share compared with \$2.2 million or \$0.20 per diluted share in the prior year.

Prior year net earnings were reduced by after-tax costs of \$11.6 million, or \$1.07 per diluted share, related to the Company's Foundation for Growth initiative and by after-tax costs of \$1.8 million, or \$0.17 per diluted share, related to a valuation adjustment for indirect tax credits in a foreign jurisdiction.

Foundation for Growth was a focused performance improvement initiative that includes setting strategic direction, defining priorities, and improving overall operating margin performance. Pre-tax costs of \$15.1 million in fiscal 2019 associated with the initiative were comprised of professional consulting fees, net loss on business divestitures, severance costs and plant closing costs. These costs have been substantially recovered through improved operating income in fiscal 2020.

The global drivers for the Company's irrigation segment are population growth and the attendant need for expanded food production and efficient water use. The need for irrigated agricultural crop production, which depends upon many factors, including the following primary drivers:

- ***Agricultural commodity prices*** - During fiscal 2020, agricultural commodity prices declined significantly because of impacts caused by the global coronavirus pandemic. The pandemic resulted in the shutdown of economies globally, a significant increase in unemployment, the disruption of food supply systems and consumption patterns, and the reduction in gasoline consumption and demand for ethanol. Under the U.S.-China Phase 1 trade deal signed January 15, 2020, China has pledged to increase purchases of U.S. agricultural products by \$32 billion over two years, to an average annual total of \$40 billion compared to the 2017 baseline of \$24 billion. Commodity prices have recovered by August 2020 due to lower yield expectations in the U.S. as well as increased exports to China, with corn prices approximately five percent lower and soybean prices approximately seven percent higher compared to August 2019.
- ***Net farm income*** - As of September 2020, the U.S. Department of Agriculture (the "USDA") estimated U.S. 2020 net farm income to be \$102.7 billion, an increase of 22.7 percent from the USDA's final U.S. 2019 net farm income of \$83.7 billion. This increase is projected to come primarily from higher Federal government direct farm program payments through the expansion of the Coronavirus Food Assistance Program ("CFAP"). CFAP was designed to provide direct assistance to farmers affected by price declines and market disruptions caused by the coronavirus pandemic.
- ***Weather conditions*** - Demand for irrigation equipment is often positively affected by storm damage and prolonged periods of drought conditions as producers look for ways to reduce the risk of low crop

production and crop failures. Conversely, demand for irrigation equipment can be negatively affected during periods of more predictable or excessive natural precipitation.

- **Governmental policies** - A number of government laws and regulations can impact the Company's business, including:
 - The Agricultural Improvement Act of 2018 (the "2018 Farm Bill") was signed into law in December 2018 and continued many of the programs that were in previous federal farm bills that are designed to provide a degree of certainty to growers. The programs include funding for the Environmental Quality Incentives Program, which provides financial assistance to farmers to implement conservation practices, and is frequently used to assist in the purchase of center pivot irrigation systems.
 - U.S. Tax Reform enacted in December 2017 increased the benefit of certain tax incentives, such as the Section 179 income tax deduction and Section 168 bonus depreciation, which are intended to encourage equipment purchases by allowing the entire cost of equipment to be treated as an expense in the year of purchase rather than amortized over its useful life.
 - Biofuel production continues to be a major demand driver for irrigated corn, sugar cane and soybeans as these crops are used in high volumes to produce ethanol and biodiesel. On December 19, 2019, the U.S. Environmental Protection Agency finalized Renewable Fuels Standard (RFS) volume requirements for 2020 that slightly increased volumes of conventional biofuels as well as volumes for advanced and cellulosic biofuels. Demand for biofuels has been negatively impacted in 2020 by reduced driving and fuel consumption caused by the coronavirus pandemic.
 - Many international markets are affected by government policies such as subsidies and other agriculturally related incentives. While these policies can have a significant effect on individual markets, they typically do not have a material effect on the consolidated results of the Company.
- **Currency** –The value of the U.S. dollar fluctuates in relation to the value of currencies in a number of countries to which the Company exports products and maintains local operations. The strengthening of the dollar increases the cost in the local currency of the products exported from the U.S. into these countries and, therefore, could negatively affect the Company's international sales and margins. In addition, the U.S. dollar value of sales made in any affected foreign currencies will decline as the value of the dollar rises in relation to these other currencies.

International markets remain active with opportunities for further development and expansion, however regional political and economic factors, currency conditions and other factors can create a challenging environment. Additionally, international results are heavily dependent upon project sales which tend to fluctuate and can be difficult to forecast accurately.

In the infrastructure segment, demand for the Company's transportation safety products continues to be driven by population growth and the need for improved road safety, but is largely dependent on government spending for road construction. In December 2015, the U.S. government enacted a five-year, \$305 billion highway-funding bill (the FAST Act") to fund highway and bridge projects. The FAST Act expired September 30, 2020 and a one-year extension has been approved by Congress. In spite of government spending uncertainty, opportunities exist for market expansion in each of the infrastructure product lines. In addition, the Federal Highway Administration has changed highway safety product certification requirements. The change has required additional research and development spending and could have an impact on the competitive positioning of the Company's highway safety products.

As of August 31, 2020, the Company had an order backlog of \$58.7 million compared with \$55.4 million at August 31, 2019. Included in these backlogs are amounts of \$6.3 million and \$10.0 million, respectively, that are not expected to be fulfilled within the subsequent fiscal year. The Company's backlog can fluctuate from period to period due to the seasonality, cyclicity, timing, and execution of contracts. Backlog typically represents long-term projects as well as short lead-time orders; therefore, it is generally not a good indication of the revenues to be realized in succeeding quarters.

Results of Operations

The following “Fiscal 2020 Compared to Fiscal 2019” section presents an analysis of the Company’s consolidated operating results displayed in the Consolidated Statements of Earnings and should be read together with the information in Note 17, Industry Segment Information, to the consolidated financial statements. A discussion regarding our financial condition and results of operations for fiscal 2019 compared to fiscal 2018 can be found in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 of Part II of our Annual Report on Form 10-K for the fiscal year ended August 31, 2019, filed with the Securities and Exchange Commission (“SEC”) on October 31, 2019, which is available free of charge on the SEC’s website at www.sec.gov and the Company’s website at www.lindsay.com under the tab “Investor Relations – SEC Filings.”

Fiscal 2020 Compared to Fiscal 2019

The following table provides highlights for fiscal 2020 compared with fiscal 2019:

(\$ in thousands)	For the years ended August 31,		Percent increase (decrease)
	2020	2019	
Consolidated			
Operating revenues	\$ 474,692	\$ 444,072	7%
Cost of operating revenues	\$ 322,149	\$ 329,464	-2%
Gross profit	\$ 152,543	\$ 114,608	33%
Gross margin	32.1%	25.8%	
Operating expenses ⁽¹⁾	\$ 98,341	\$ 108,493	-9%

⁽¹⁾ Includes corporate general and administrative expenses of \$29.8 million for fiscal 2020.

⁽²⁾ See Note 19 Industry Segment Information, to the consolidated financial statements, for further details regarding segments.

Revenues

Operating revenues in fiscal 2020 were \$474.7 million, an increase of 7 percent or \$30.6 million, compared to \$444.1 million in fiscal 2019. Irrigation segment revenues decreased \$8.0 million, or 2 percent, and infrastructure revenues increased \$38.6 million, or 42 percent, compared to the prior fiscal year. The increase in infrastructure revenues was due in part to the completion of a large project in the U.K. of approximately \$27.0 million. The irrigation segment provided 72 percent of Company revenue in fiscal 2020 as compared to 79 percent in fiscal 2019.

North America irrigation revenues in fiscal 2020 increased by \$0.3 million, to \$219.0 million from \$218.6 million in fiscal 2019. The impact of higher revenue from engineering project services was partially offset by a decrease of approximately \$3.3 million attributable to a business divestiture completed in the first quarter of fiscal 2019. Irrigation system unit volume and average selling prices in fiscal 2020 were comparable to levels experienced in fiscal 2019.

International irrigation revenues in fiscal 2020 decreased by \$8.3 million, or 6 percent, to \$124.6 million from \$132.9 million in fiscal 2019. Revenues decreased \$8.6 million due to differences in foreign currency translation rates compared to the prior year. Excluding the impact of foreign currency translation, international irrigation revenues increased \$0.3 million, or less than one percent, compared to the prior year. Increased sales in Brazil and certain other markets were offset by a lower level of project activity in developing markets.

Infrastructure segment revenues in fiscal 2020 increased by \$38.6 million, or 42 percent, to \$131.2 million from \$92.6 million in fiscal 2019. The increase resulted primarily from higher Road Zipper System® sales and lease revenues compared to the prior year, including approximately \$27.0 million from a single project in the United Kingdom.

Gross Profit

Gross profit was \$152.5 million for fiscal 2020, an increase of \$37.9 million, or 33 percent, compared to \$114.6 million in fiscal 2019. The increase in gross profit resulted primarily from a more profitable margin mix from higher infrastructure revenues as well as from the results of margin improvement initiatives in both segments. In addition, gross profit for fiscal 2020 included a gain of \$1.2 million on the sale of a building that had been held for sale. Gross margin was 32.1% of sales for fiscal 2020 compared to 25.8% of sales for fiscal 2019.

Operating Expenses

The Company's operating expenses of \$98.3 million for fiscal 2020 decreased \$10.2 million, or 9 percent, compared to fiscal 2019 operating expenses of \$108.5 million. Fiscal 2019 operating expenses included costs of \$15.1 million in connection with the Company's Foundation for Growth initiative and a \$2.7 million valuation adjustment for indirect tax credits in a foreign jurisdiction that did not repeat in fiscal 2020. Excluding the impact of the non-repeating costs, operating expenses increased 2 percent compared to the prior year primarily due to an increase in incentive compensation that was partially offset by reductions in other areas.

Income Taxes

The Company recorded income tax expense of \$10.2 million and income tax benefit of \$65 thousand for fiscal 2020 and fiscal 2019, respectively. The effective tax rate for fiscal 2020 was 20.9 percent and reflected the earnings mix between the U.S. and foreign operations, the utilization of previously reserved net operating loss carryforwards and adjustments related to the accrual for uncertain tax positions. The income tax benefit for fiscal 2019 resulted primarily from the impact of a change in the effective state tax rate on deferred tax assets and other discrete items.

Net Earnings

Net earnings for fiscal 2020 were \$38.6 million, or \$3.56 per diluted share, compared to \$2.2 million, or \$0.20 per diluted share, for fiscal 2019.

Liquidity and Capital Resources

The Company's cash, cash equivalents, and marketable securities totaled \$140.9 million at August 31, 2020 compared with \$127.2 million at August 31, 2019. The increase resulted primarily from current year earnings, partially offset by increases in working capital. The Company requires cash for financing its receivables and inventories, paying operating expenses and capital expenditures, and for dividends and share repurchases. The Company's investments in marketable securities are primarily comprised of United States government securities and investment grade corporate bonds. The Company meets its liquidity needs and finances its capital expenditures from its available cash and funds provided by operations along with borrowings under the credit arrangements that are described below. The Company believes its current cash resources, investments in marketable securities, projected operating cash flow, and remaining capacity under its continuing bank lines of credit are sufficient to cover all of its expected working capital needs, planned capital expenditures and dividends. The Company may require additional borrowings to fund potential acquisitions in the future.

The Company's total cash and cash equivalents held by foreign subsidiaries amounted to \$37.2 million and \$48.1 million as of August 31, 2020 and 2019, respectively. The Company considers earnings of foreign subsidiaries to be indefinitely reinvested, and would need to accrue and pay incremental state, local, and foreign taxes if such earnings were repatriated to the United States. The Company does not intend to repatriate the funds and does not expect these funds to have a significant impact on the Company's overall liquidity.

Net working capital was \$245.5 million at August 31, 2020 as compared with \$231.4 million at August 31, 2019. Cash flows provided by operations totaled \$46.0 million during the year ended August 31, 2020 compared to \$3.8 million provided by operations during the same prior year period. This change was primarily due to higher earnings and non-cash adjustments, partially offset by an increase in working capital.

Cash flows used in investing activities totaled \$38.5 million during the year ended August 31, 2020 compared to cash flows used in investing activities of \$21.2 million during the same prior year period. Capital spending was \$21.4 million in fiscal 2020 compared to \$23.2 million in fiscal 2019. The increase in cash flows used in investing activities resulted primarily from the Company's investments in marketable securities.

Cash flows used in financing activities totaled \$13.4 million during the year ended August 31, 2020 compared to cash flows used in financing activities of \$14.6 million during the same prior year period. The change is primarily the result of higher proceeds from the exercise of stock options. Cash flows used in financing activities consists primarily of dividend payments. Dividends paid in fiscal 2020 increased by \$0.2 million over fiscal 2019.

Capital Allocation Plan

The Company's capital allocation plan is to continue investing in revenue and earnings growth, combined with a defined process for enhancing returns to stockholders. Priorities for the use of cash under the Company's capital allocation plan include:

- Investment in organic growth including capital expenditures,
- Dividends to stockholders, along with expectations to increase dividends over time,
- Synergistic acquisitions that provide attractive returns to stockholders, and
- Opportunistic share repurchases taking into account cyclical and seasonal fluctuations.

Capital Expenditures

In fiscal 2021, the Company expects capital expenditures of approximately \$15.0 million to \$20.0 million, including equipment replacement, productivity improvements and commercial growth investments. The Company's management does maintain flexibility to modify the amount and timing of some of the planned expenditures in response to economic conditions.

Dividends

In fiscal 2020, the Company paid cash dividends of \$1.26 per common share or \$13.6 million to stockholders as compared to \$1.24 per common share or \$13.4 million to stockholders in fiscal 2019.

Share Repurchases

The Company's Board of Directors authorized a share repurchase program of up to \$250.0 million of common stock with no expiration date. Under the program, shares may be repurchased in privately negotiated and/or open market transactions as well as under formalized trading plans in accordance with the guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. There were no shares repurchased during the years ended August 31, 2020, 2019 and 2018. The remaining amount available under the repurchase program was \$63.7 million as of August 31, 2020.

Long-Term Borrowing Facilities

Senior Notes. The Company has outstanding \$115.0 million in aggregate principal amount of Senior Notes, Series A (the "Senior Notes"). The entire principal of the Senior Notes is due and payable on February 19, 2030. Interest on the Senior Notes is payable semi-annually at a fixed annual rate of 3.82 percent. Borrowings under the Senior Notes are unsecured. The Company used the proceeds of the sale of the Senior Notes for general corporate purposes, including acquisitions and dividends.

Revolving Credit Facility. The Company has outstanding a \$50.0 million unsecured Amended and Restated Revolving Credit Facility (the "Revolving Credit Facility") with Wells Fargo Bank, National Association ("Wells Fargo") expiring May 31, 2022. The Company intends to use borrowings under the Revolving Credit Facility for working capital purposes and to fund acquisitions. At August 31, 2020 and August 31, 2019, the Company had no outstanding borrowings under the Revolving Credit Facility. The amount of borrowings available at any time under the Revolving Credit Facility is reduced by the amount of standby letters of credit issued by Wells Fargo then outstanding. At August 31, 2020, the Company had the ability to borrow up to \$50.0 million under the Revolving Credit Facility. Borrowings under the Revolving Credit Facility bear interest at a variable rate equal to LIBOR plus 90 basis points (1.1 percent at August 31, 2020), subject to adjustment as set forth in the loan documents for the Revolving Credit Facility. Interest is paid on a monthly to quarterly basis depending on loan type. The Company currently pays an annual commitment fee of 0.15 percent on the unused portion of the Revolving Credit Facility.

Borrowings under the Revolving Credit Facility have equal priority with borrowings under the Company's Senior Notes. Each of the credit arrangements described above include certain covenants relating primarily to the Company's financial condition. These financial covenants include a funded debt to EBITDA leverage ratio and an interest coverage ratio. In the event that the loan documents for the Revolving Credit Facility were to require the Company to comply with any financial covenant that is not already included or is more restrictive than what is

already included in the arrangement governing the Senior Notes, then such covenant shall be deemed incorporated by reference into the Senior Notes for the benefit of the holders of the Senior Notes. Upon the occurrence of any event of default of these covenants, including a change in control of the Company, all amounts outstanding thereunder may be declared to be immediately due and payable. At August 31, 2020 and August 31, 2019, the Company was in compliance with all financial loan covenants contained in its credit arrangements in place as of each of those dates.

Series 2006A Bonds. Elecsys International, LLC, a wholly owned subsidiary of the Company, has outstanding \$1.6 million in principal amount of industrial revenue bonds that were issued in 2006 (the “Series 2006A Bonds”). Principal and interest on the Series 2006A Bonds are payable monthly through maturity on September 1, 2026. The interest rate is adjustable every five years based on the yield of the 5-year United States Treasury Notes, plus 0.45 percent (1.92 percent as of August 31, 2020). This rate was adjusted on September 1, 2016 in accordance with the terms of the bonds, and the adjusted rate will be in force until September 1, 2021. The obligations under the Series 2006A Bonds are secured by a first priority security interest in certain real estate.

Inflation

The Company is subject to the effects of changing prices. During fiscal 2020, the Company experienced pricing volatility for purchases of certain commodities, in particular steel and zinc products used in the production of its products. While the cost outlook for commodities used in the production of the Company’s products is not certain, management believes it can manage these inflationary pressures by introducing appropriate sales price adjustments and by actively pursuing internal cost reduction efforts, while further refining the Company’s inventory and raw materials risk management system. However, competitive market pressures may affect the Company’s ability to pass price adjustments along to its customers.

Contractual Obligations, Commercial Commitments and Off-Balance Sheet Arrangements

In the normal course of business, the Company enters into contracts and commitments which obligate the Company to make future payments. The Company uses off-balance sheet arrangements, such as leases accounted for as operating leases, standby letters of credit and performance bonds, where sound business principles warrant their use. The table below sets forth the Company’s significant future obligations by time period.

(\$ in thousands)		Less than	2-3	4-5	More than
Contractual obligations ⁽¹⁾	Total	1 year	years	years	5 years
Operating lease obligations	\$ 42,742	\$ 6,065	\$ 10,037	\$ 6,521	\$ 20,119
Pension benefit obligations	6,903	521	1,017	977	4,388
Long-term debt	116,344	195	438	456	115,255
Interest	41,818	4,418	8,823	8,805	19,772
Total	\$ 207,807	\$ 11,199	\$ 20,315	\$ 16,759	\$ 159,534

⁽¹⁾ Total liabilities for unrecognized tax benefits as of August 31, 2020 were \$1.4 million and are excluded from the table above. Unrecognized tax benefits are classified on the Company’s consolidated balance sheets within other noncurrent liabilities.

The Company does not have any additional off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on the Company’s financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

ITEM 7A — Quantitative and Qualitative Disclosures about Market Risk

The Company uses certain financial derivatives to mitigate its exposure to volatility in interest rates and foreign currency exchange rates. The Company uses these derivative instruments to hedge exposures in the ordinary course of business and does not invest in derivative instruments for speculative purposes. The credit risk under these interest rate and foreign currency agreements is not considered to be significant. The Company attempts to manage market and credit risks associated with its derivative instruments by establishing and monitoring limits as to the types and degree of risk that may be undertaken, and by entering into transactions with counterparties that have investment grade credit ratings. As of August 31, 2020, the Company’s derivative counterparty had an investment grade credit rating.

The Company has manufacturing operations in the United States, Brazil, France, Italy, China, Turkey, and South Africa. The Company has sold products throughout the world and purchases certain of its components from third-

party international suppliers. Export sales made from the United States are principally U.S. dollar denominated. At times, export sales may be denominated in a currency other than the U.S. dollar. A majority of the Company's revenue generated from operations outside the United States is denominated in local currency. Accordingly, these sales are not typically subject to significant foreign currency transaction risk. The Company's most significant transactional foreign currency exposures are the Euro, the Brazilian real, the South African rand, the Turkish lira, and the Chinese renminbi in relation to the U.S. dollar. Fluctuations in the value of foreign currencies create exposures, which can adversely affect the Company's results of operations. Based on the consolidated statement of operations for the year ended August 31, 2020, the Company estimates the potential decrease in operating income from a ten percent adverse change in the underlying exchange rates, in U.S. dollar terms, would be approximately \$0.6 million.

In order to reduce exposures related to changes in foreign currency exchange rates, the Company, at times, may enter into forward exchange or option contracts for transactions denominated in a currency other than the functional currency for certain of its operations. This activity primarily relates to economically hedging against foreign currency risk in purchasing inventory, sales of finished goods, intercompany transactions and future settlement of foreign denominated assets and liabilities. The Company had no foreign currency forward contracts outstanding that are designated as hedging instruments as of August 31, 2020.

ITEM 8 — *Financial Statements and Supplementary Data*

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors
Lindsay Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Lindsay Corporation and subsidiaries (the Company) as of August 31, 2020 and 2019, the related consolidated statements of earnings, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended August 31, 2020, and the related notes and financial statement schedule (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of August 31, 2020 and 2019, and the results of its operations and its cash flows for each of the years in the three-year period ended August 31, 2020, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of August 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated October 22, 2020 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of accounting for leases in fiscal year 2020 due to the adoption of ASC Topic 842, *Leases*, and related amendments.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing separate opinions on the critical audit matter or on the accounts or disclosures to which it relates.

Evaluation of the environmental remediation liability

As discussed in Note 16 to the consolidated financial statements, the Company's environmental remediation liability as of August 31, 2020 was \$16.1 million. The environmental remediation liability represents the estimated future remediation costs associated with the Company's plan to reduce the level of contamination at the Lindsay, Nebraska Superfund site. The Company uses a third-party environmental expert to assist in developing the Company's plan to reduce the level of contamination.

We identified the evaluation of the environmental remediation liability as a critical audit matter. Subjective auditor judgment was required to evaluate the assumptions specifically those related to the anticipated remediation activities and the cost of those activities. These assumptions include a range of potential outcomes and a revision to the assumptions could have a material impact on the consolidated financial statements.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's process to estimate future remediation costs. This included controls related to the development of the anticipated remediation activities and the cost of those activities. To assess the accuracy of the liability, we compared the estimated remediation costs for activities comprising the liability to historical costs incurred for similar activities or current estimates of their future costs. We also involved an environmental professional with specialized skills and knowledge, who assisted in (1) assessing the Company's environmental specialist's qualifications, and (2) evaluating the Company's planned remediation activities through comparison of the Company's selected remediation activities to those communicated to the governmental agencies and those commonly observed in conducting remediation.

Lindsay Corporation and Subsidiaries
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Description of Business and Significant Accounting Policies

Lindsay Corporation, along with its subsidiaries (collectively called “Lindsay” or the “Company”), is a global leader in providing a variety of proprietary water management and road infrastructure products and services. The Company has been involved in the manufacture and distribution of agricultural irrigation equipment since 1955 and has grown from a regional company to an international water efficiency solutions and highway infrastructure firm with worldwide sales and distribution. Lindsay, a Delaware corporation, maintains its global headquarters in Omaha, Nebraska. The Company has operations which are categorized into two reporting segments.

Irrigation Segment

The Company’s irrigation segment includes the manufacture and marketing of center pivot, lateral move, and hose reel irrigation systems which are used principally in the agricultural industry to increase or stabilize crop production while conserving water, energy and labor. The irrigation segment also manufactures and markets repair and replacement parts for its irrigation systems and controls. The Company continues to strengthen irrigation product offerings through innovative technology such as Global Positioning System (“GPS”) positioning and guidance, variable rate irrigation, wireless irrigation management, machine-to-machine (“M2M”) communication technology solutions and smartphone applications. The Company’s domestic irrigation manufacturing facilities are located in Lindsay, Nebraska and Olathe, Kansas. Internationally, the Company has production operations in Brazil, France, China, Turkey and South Africa as well as distribution and sales operations in the Netherlands, Australia and New Zealand. The Company also exports equipment from the U.S. to other international markets.

Infrastructure Segment

The Company’s infrastructure segment includes the manufacture and marketing of moveable barriers, specialty barriers, crash cushions and end terminals, road marking and road safety equipment, large diameter steel tubing, and railroad signals and structures. The infrastructure segment also provides outsourced manufacturing and production services. The principal infrastructure manufacturing facilities are located in Rio Vista, California; Milan, Italy; and Lindsay, Nebraska.

Notes to the consolidated financial statements describe various elements of the financial statements and the accounting policies, estimates, and assumptions applied by management. While actual results could differ from those estimated at the time of preparation of the consolidated financial statements, management believes that the accounting policies, assumptions, and estimates applied promote the representational faithfulness, verifiability, neutrality, and transparency of the accounting information included in the consolidated financial statements. The significant accounting policies of the Company are as follows:

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany balances and transactions are eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

The Company adopted ASC 606 – *Revenue from Contracts with Customers* on September 1, 2018 using the modified retrospective transition approach. The core principle of ASC 606 is that revenue should be recognized in a manner that depicts the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled for exchange of those goods or services. Refer to Note 3 for additional information regarding our revenue recognition policy under ASC 606.

Share-Based Compensation

The Company recognizes compensation expense for all share-based payment awards made to employees and directors based on estimated fair values on the date of grant. The Company uses the straight-line amortization method over the vesting period of the awards. The Company has historically issued shares upon exercise of stock options or vesting of restricted stock units or performance stock units.

The value of the portion of the award that is ultimately expected to vest is recognized as expense in the Company's Consolidated Statement of Operations over the periods during which the employee or director is required to perform a service in exchange for the award.

The Company uses the Black-Scholes option-pricing model ("Black-Scholes model") as its valuation method for stock option awards. Under the Black-Scholes model, the fair value of stock option awards on the date of grant is estimated using an option-pricing model that is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the Company's expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Restricted stock, restricted stock units, performance shares and performance stock units issued under the 2015 Long-Term Incentive Plan will have a grant-date fair value equal to the fair market value of the underlying stock on the grant date less present value of expected dividends.

Warranty Costs

The Company's provision for product warranty reflects management's best estimate of probable liability under its product warranties. At the time a sale is recognized, the company records the estimated future warranty costs. The Company generally determines its total future warranty liability by applying historical claims rate experience to the amount of equipment that has been sold and is still within the warranty period. In addition, the Company records provisions for known warranty claims. This provision is periodically adjusted to reflect actual experience.

Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of three months or less.

Marketable Securities

The Company accounts for and classifies its marketable securities in accordance with the accounting guidance related to the accounting and classification of certain investments in marketable securities. The determination on appropriate classification is based primarily on management's ability and intent to sell the debt security.

The Company's investment in marketable securities consists of United States treasury bonds and investment grade corporate bonds. The marketable securities are classified as available-for-sale and are carried at fair value with the change in unrealized gains and losses reported as a separate component on the condensed consolidated statements of comprehensive income until realized. The Company determines fair value using data points that are observable, such as quoted prices and interest rates. The amortized cost of the investments approximates fair value. Investment income is recorded within interest income on the consolidated statements of earnings. As of August 31, 2020, approximately 64% of the Company's marketable securities investments mature within one year and 36% mature within one to two years.

Receivables and Allowances

Trade receivables are reported on the balance sheet net of any doubtful accounts. Losses are recognized when it is probable that an asset has been impaired and the amount of the loss can be reasonably estimated. In estimating probable losses, the Company reviews specific accounts that are significant and past due, in bankruptcy or otherwise identified as at risk for potential credit loss. Collectability of these specific accounts are assessed based on facts and circumstances of that customer, and an allowance for credit losses is established based on the probability of default. In assessing the likelihood of collection of receivable, the Company considers (for example) the Company's history of collections, the current status of discussions and repayment plans, collateral received, and other evidence and information regarding collection or default risk that is available in the market place. The allowance for credit losses attributable to the remaining accounts is established using probabilities of default and an estimate of associated losses based upon the aging of receivable balances, collection experience, economic condition and credit risk quality.

As the Company's international business has grown, the exposure to potential losses in international markets has also increased. These exposures can be difficult to estimate, particularly in areas of political instability or with governments with which the Company has limited experience or where there is a lack of transparency as to the current credit condition of governmental units. The Company's allowance for all doubtful accounts related to outstanding receivables increased to \$2.8 million at August 31, 2020 from \$2.6 million at August 31, 2019. The Company's evaluation of the adequacy of the allowance for credit losses is based on facts and circumstances available to the Company at the date the consolidated financial statements are issued and considers any significant changes in circumstances occurring through the date that the financial statements are issued.

Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined by the last-in, first-out ("LIFO") method, the first-in, first-out ("FIFO") method, or the weighted average cost method for inventory depending on the operations at each specific location. At all locations, the Company reserves for obsolete, slow moving, and excess inventory by estimating the net realizable value based on the potential future use of such inventory.

Property, Plant, and Equipment

Property, plant, equipment, and capitalized assets held for lease are stated at cost. The Company capitalizes major expenditures and charges to operating expenses the cost of current maintenance and repairs. Provisions for depreciation and amortization have been computed principally on the straight-line method for property, plant, and equipment. Rates used for depreciation are based principally on the following expected lives: buildings -- 15 to 40 years; equipment -- 3 to 7 years; computer hardware and software -- 3 to 5 years; leased barrier transfer machines -- 8 to 10 years; leased barriers -- 12 years; other -- 2 to 20 years and leasehold improvements -- shorter of the economic life or term of the lease. The Company's internally developed software is included in computer hardware and software. All of the Company's long-lived asset groups are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the sum of the expected future cash flows is less than the carrying amount of the asset group, an impairment loss is recognized based upon the difference between the fair value of the asset and its carrying value. No impairments were recorded during the fiscal years ended August 31, 2020, 2019, and 2018. The cost and accumulated depreciation relating to assets retired or otherwise disposed of are eliminated from the respective accounts at the time of disposition. The resulting gain or loss is included in operating income in the consolidated statements of earnings.

Valuation of Goodwill and Identifiable Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination. Acquired intangible assets are recognized separately from goodwill. Goodwill and intangible assets with indefinite useful lives are tested for impairment at least annually at August 31 and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable. Assessment of the potential impairment of goodwill and identifiable intangible assets is an integral part of the Company's normal ongoing review of operations. Testing for potential impairment of these assets is significantly dependent on numerous assumptions and reflects management's best estimates at a particular point in time. The dynamic economic environments in which the Company's businesses operate and key economic and business assumptions related to projected selling prices, market growth, inflation rates and operating expense ratios, can significantly affect the outcome of impairment tests. Estimates based on these assumptions may differ significantly from actual results. Changes in factors and assumptions used in assessing potential impairments can have a significant impact on the existence and magnitude of impairments, as well as the time in which such impairments are recognized.

In fiscal 2020, in conjunction with the Company's annual review for impairment, the Company performed a qualitative analysis of goodwill for each of the Company's reporting units, which are the same as its operating segments, and did not identify any potential impairment. The estimated fair value of all reporting units is substantially in excess of its carrying value. Also in fiscal 2020, the Company performed a qualitative analysis of other intangible assets not subject to amortization and concluded there were no indicators of impairment.

Income Taxes

Income taxes are accounted for utilizing the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying value of existing assets and liabilities and their respective tax bases. These expected future tax consequences are measured based on currently enacted tax rates. The effect of tax rate changes on deferred tax assets and liabilities is recognized in income during the period that includes the enactment date. In assessing the ability to realize deferred tax assets, management considers whether it is more likely than not that some portion or

all of the deferred tax asset will not be realized. The Company's evaluation of the adequacy of any potential allowance is based on facts and circumstances available to the Company at the date the consolidated financial statements are issued and considers any significant changes in circumstances occurring through the date that the financial statements are issued.

Net Earnings per Share

Basic net earnings per share is computed using the weighted average number of common shares outstanding during the period. Diluted net earnings per share is computed using the weighted average number of common shares outstanding plus dilutive potential common shares outstanding during the period.

Employee stock options, non-vested shares and similar equity instruments granted by the Company are treated as potential common share equivalents outstanding in computing diluted net earnings per share. The Company's diluted common shares outstanding reported in each period includes the dilutive effect of restricted stock units, in-the-money options, and performance stock units for which threshold performance conditions have been satisfied and is calculated based on the average share price for each fiscal period using the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options, and the amount of compensation cost for future service that the Company has not yet recognized, are assumed to be used to repurchase shares.

Derivative Instruments and Hedging Activities

The Company uses certain financial derivatives to mitigate its exposure to volatility in interest rates and foreign currency exchange rates. All derivative instruments are recorded on the balance sheet at their respective fair values. The Company uses these derivative instruments only to hedge exposures in the ordinary course of business and does not invest in derivative instruments for speculative purposes. On the date a derivative contract is entered into, the Company may elect to designate the derivative as a fair value hedge, a cash flow hedge, or the hedge of a net investment in a foreign operation.

The Company also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative that is used in the hedging transaction is effective. For those instruments that are designated as a cash flow hedge and meet certain documentary and analytical requirements to qualify for hedge accounting treatment, changes in the fair value for the effective portion are reported in other comprehensive income ("OCI"), net of related income tax effects, and are reclassified to the income statement when the effects of the item being hedged are recognized in the income statement. Changes in fair value of derivative instruments that qualify as hedges of a net investment in foreign operations are recorded as a component of accumulated currency translation adjustment in accumulated other comprehensive income ("AOCI"), net of related income tax effects. Changes in the fair value of undesignated hedges are recognized currently in earnings. All changes in derivative fair values due to ineffectiveness are recognized currently in income.

The Company discontinues hedge accounting prospectively when it is determined that the derivative is no longer effective in offsetting changes in the cash flows of the hedged item, the derivative expires or is sold, terminated, or exercised, or management determines that designation of the derivative as a hedging instrument is no longer appropriate. In situations in which the Company does not elect hedge accounting or hedge accounting is discontinued and the derivative is retained, the Company carries or continues to carry the derivative at its fair value on the balance sheet and recognizes any subsequent changes in its fair value through earnings. The Company manages market and credit risks associated with its derivative instruments by establishing and monitoring limits as to the types and degree of risk that may be undertaken, and by entering into transactions with high-quality counterparties. As of August 31, 2020, the Company's derivative counterparty had investment grade credit ratings.

Fair Value Measurements

The Company's disclosure of the fair value of assets and liabilities is based on a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. Inputs refers broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. The categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

- Level 1 – inputs to valuation techniques are quoted prices in active markets for identical assets or liabilities
- Level 2 – inputs to the valuation techniques are other than quoted prices but are observable for the assets or liabilities, either directly or indirectly

- Level 3 – inputs to the valuation techniques are unobservable for the assets or liabilities

Treasury Stock

When the Company repurchases its outstanding stock, it records the repurchased shares at cost as a reduction to shareholders' equity. The weighted average cost method is utilized for share re-issuances. The difference between the cost and the re-issuance price is charged or credited to a "capital in excess of stated value – treasury stock" account to the extent that there is a sufficient balance to absorb the charge. If the treasury stock is sold for an amount less than its cost and there is not a sufficient balance in the capital in excess of stated value – treasury stock account, the excess is charged to retained earnings.

Contingencies

The Company's accounting for contingencies covers a variety of business activities including contingencies for legal exposures and environmental exposures. The Company accrues these contingencies when its assessments indicate that it is probable that a liability has been incurred and an amount can be reasonably estimated. The Company's estimates are based on currently available facts and its estimates of the ultimate outcome or resolution. Actual results may differ from the Company's estimates resulting in an impact, positive or negative, on earnings.

Environmental Remediation Liabilities

Environmental remediation liabilities include costs directly associated with site investigation and clean up, such as materials, external contractor costs and incremental internal costs directly related to the remedy. The Company accrues the anticipated cost of environmental remediation when the obligation is probable and can be reasonably estimated. Estimates used to record environmental remediation liabilities are based on the Company's best estimate of probable future costs based on site-specific facts and circumstances. Estimates of the cost for the likely remedy are developed using internal resources or by third-party environmental engineers or other service providers. The Company records the undiscounted environmental remediation liabilities that represent the points in the range of estimates that are most probable or the minimum amount when no amount within the range is a better estimate than any other amount.

Translation of Foreign Currency

The Company's portion of the assets and liabilities related to foreign investments are translated into U.S. dollars at the exchange rates in effect at the balance sheet date. Revenue and expenses are translated at the average rates of exchange prevailing during the year. Unrealized gains or losses are reflected within common shareholders' equity as accumulated other comprehensive income or loss.

Note 2 – New Accounting Pronouncements

Recent Accounting Guidance Not Yet Adopted

In June 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-13, *Financial Instruments - Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments*. The standard replaces the incurred loss impairment methodology in current U.S. GAAP with a methodology that reflects expected credit losses on instruments within its scope, including trade receivables. This update is intended to provide financial statement users with more decision-useful information about the expected credit losses. The effective date of ASU No. 2016-13 will be the first quarter of the Company's fiscal 2021 with early adoption permitted. The Company does not expect the adoption of this ASU to have a material impact on its consolidated financial statements and related disclosures.

Recent Accounting Guidance Adopted

In February 2016, the FASB issued ASU 2016-02, *Leases*, which requires lessees to recognize a right-of-use asset and a lease liability for most leases and disclose key information about leasing arrangements. The new guidance became effective for the Company in the first quarter of fiscal 2020. The Company implemented Accounting Standards Codification ("ASC") 842 using the modified retrospective transition method and recorded a right of use asset and lease liability of \$26.2 million and \$29.5 million, respectively, upon adoption of the standard on the first day of fiscal 2020.

In August 2017, the FASB issued ASU No. 2017-12, *Targeted Improvements to Accounting for Hedging Activities*, which modifies the financial reporting of hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. ASU No. 2017-12 became effective in the first quarter of the Company's fiscal 2020. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In March 2020, the FASB issued ASU No. 2020-04, *Reference Rate Reform*, which provides optional expedients and exceptions for applying U.S. GAAP to contracts and transactions affected by the discontinuation of the London Interbank Offered Rate (LIBOR) or any other rate expected to be discontinued. While there was no impact to the Company's consolidated financial statements at the time of adoption, the Company will apply the amendments prospectively for applicable contracts and transactions.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which had been codified in ASC Topic 606 *Revenue from Contracts with Customers*. The standard provides a single model for revenue arising from contracts with customers and supersedes previous revenue recognition guidance. The guidance requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of goods or services. The guidance replaces existing revenue recognition guidance in U.S. GAAP and became effective for the Company in its first quarter of fiscal 2019. Under ASC Topic 606 the timing of revenue recognition may differ from previous guidance for contracts with multiple performance obligations as revenue is recognized when control has been transferred for each performance obligation. For custom and contract manufactured products that do not have an alternate use to the Company, revenue is recognized over-time when the customer agreements contain contractual termination clauses and right to payment for work performed to date which is a change from previous guidance.

The Company adopted the new standard using the modified retrospective approach effective the first day of fiscal 2019. As a result of the adoption, the Company increased retained earnings, \$0.5 million, net of tax. This change relates primarily to custom and contract manufacturing arrangements for certain of the Company's irrigation and infrastructure equipment products at various stages of production at August 31, 2018 in addition to contracts with multiple performance obligations for which control of the relevant performance obligation had been satisfied. Results for reporting periods beginning September 1, 2018 are presented in accordance with ASC Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with the previously applied revenue recognition guidance.

Note 3 – Revenue Recognition

The Company determines the appropriate revenue recognition for its contracts by analyzing the type, terms and conditions of each contract or arrangement with a customer. Revenue is recognized when the Company satisfies the performance obligation by transferring control over goods or services to a customer. The amount of revenue recognized is measured as the consideration the Company expects to receive in exchange for those goods or services pursuant to a contract with the customer. The Company does not recognize revenue in cases where collectability is not probable, and defers the recognition until collection is probable or payment is received. Sales taxes, value added taxes, and other taxes collected from its customers concurrent with its revenue activities are excluded from revenue.

The Company elected to use the practical expedient of treating shipping and handling costs associated with outbound freight as a fulfillment obligation instead of a separate performance obligation. Shipping and handling fees billed to the customer are reported as revenue and recorded in the same period as the associated fulfillment costs.

Customer rebates, cash discounts and other sales incentives are recorded as a reduction of revenues in the period in which the sale is recognized. The Company establishes provisions for estimated warranties and does not generally sell extended warranties for its products.

For contracts with a length longer than twelve months, the unsatisfied performance obligations were \$11.3 million and \$7.0 million at August 31, 2020.

Performance Obligations

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is the unit of account. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

For contracts with multiple performance obligations, the Company allocates the transaction price to each performance obligation using the stand-alone selling price of each distinct good or service in the contract. For most performance obligations, the stand-alone selling price is directly observable as these goods or services are also sold separately by the Company. For performance obligations where the stand-alone selling price is not directly observable, the Company uses the expected cost plus a margin approach, under which the expected costs of satisfying a performance obligation are forecasted and then an appropriate margin for that distinct good or service is added.

The Company's performance obligations are satisfied at either a point in time or over time depending on the measure of progress applied toward the complete satisfaction in the transfer of control of the related goods and services to the customer.

Revenue recognized at a point in time is derived from the sale of equipment and related parts. Revenue recognition for equipment and parts is generally at a point in time upon transfer of control of the goods to the customer which generally happens upon shipment of goods to the customer.

Revenue recognized over time is primarily derived from engineering services and remote monitoring subscription services as well as custom and contract manufactured products. For engineering services, transfer of control to the customer is continuous over time. Therefore, revenue is recognized based on the extent of progress towards completion of the performance obligation. Judgment is required when selecting the method to measure progress towards completion. For fixed price agreements, the Company recognizes revenue on an inputs basis, using total costs incurred to date as a percentage of total costs expected to be incurred. For time and material arrangements, the Company utilizes an output method of resources consumed such as the expended hours times the hourly billing rate. For remote monitoring subscription services, customers are generally billed in advance and revenue is recognized ratably over the life of the agreement.

For custom and contract manufactured products, the transfer of control is continuous over the life of the agreement and products do not have an alternate use to the Company. When the customer agreements contain contractual termination clauses and right to payment for work performed to date, the revenue from these agreements is recognized over time as the products are produced.

The Company also leases certain infrastructure property to customers. Revenues from the leasing of infrastructure property are recognized on a straight-line basis over the lease term.

A breakout by segment of revenue recognized over time versus point in time for twelve months ended August 31, 2020 is as follows:

(\$ in thousands)	Year ended August 31, 2020		
	Irrigation	Infrastructure	Total
Point in time	\$ 298,509	\$ 110,871	\$ 409,380
Over time	45,020	8,807	53,827
Revenue from the contracts with customers	343,529	119,678	463,207
Lease revenue	—	11,485	11,485
Total operating revenues	\$ 343,529	\$ 131,163	\$ 474,692

	Year ended August 31, 2019		
	Irrigation	Infrastructure	Total
Point in time	\$ 318,544	\$ 78,768	\$ 397,312
Over time	32,954	6,054	39,008
Revenue from the contracts with customers	351,498	84,822	436,320
Lease revenue	—	7,752	7,752
Total operating revenues	\$ 351,498	\$ 92,574	\$ 444,072

Further disaggregation of revenue is disclosed in the Note 19 – Industry Segment Information.

Contract Balances

Contract assets arise when recorded revenue for a contract exceeds the amounts billed under the terms of such contract. Contract liabilities arise when billed amounts exceed revenue recorded. Amounts are billable to customers upon various measures of performance, including achievement of certain milestones and completion of specified units of completion of the contract.

Contract assets primarily relate to the Company's rights to consideration for work completed but not billed at the reporting date. The contract liabilities primarily relate to the advance consideration received from customers for customer contracts, for which transfer of control of products or performance of service occurs in the future, and therefore revenue is recognized upon completion of the performance obligation. The Company has elected to recognize the incremental costs of obtaining a contract with a term of less than one year as a selling expense when incurred.

At August 31, 2020 and 2019, contract assets amounted to \$0.9 million and \$1.3 million. These amounts are included within other current assets on the consolidated balance sheet.

At August 31, 2020, the contract liability amounted to \$19.6 million and \$18.4 million. Contract liabilities are included within other current liabilities and noncurrent liabilities on the consolidated balance sheet. During the year ended August 31, 2020, the Company recognized \$13.7 million of revenue that was included in the liability as of August 31, 2019. The revenue recognized was due to performance obligations being completed during the year. Amounts included here exclude deferred lease revenues that are also included within other current liabilities.

Note 4 – Acquisitions and Divestitures

Net Irrigate, LLC

On April 8, 2020, the Company completed the acquisition of the membership interests of Net Irrigate, LLC ("Net Irrigate"). Net Irrigate is an agriculture technology company based in Indiana that provides remote monitoring services for irrigation customers. The purchase price of \$4.5 million consisted of (i) \$3.0 million, net of cash acquired, paid in cash at closing and financed from the Company's cash on hand, (ii) \$0.3 million of cash to be paid within one year of closing, and (iii) an earn-out payment, initially valued at \$1.2 million, based on active customers one year subsequent to the closing date. As of August 31, 2020, the earn-out payment is valued at \$1.1 million. The fair value of the earn-out payment was calculated using the weighted average probability for each potential outcome and has a maximum potential payout of \$1.5 million.

The Company's allocation of purchase price consists of goodwill of \$3.2 million and various other assets and liabilities amounting to \$1.3 million.

Divestitures and held-for-sale

The Company completed the divestiture of its Company-owned irrigation dealership during the first quarter of fiscal 2019 and recorded a loss on the sale of \$0.3 million included in general and administrative expense on the consolidated statement of operations for the year ended August 31, 2020. The Company received a note of \$5.6 million as proceeds for this sale. This is included as a noncash investing activity on the consolidated statement of cash flows for fiscal year ended August 31, 2019.

Additionally, during the fourth quarter of fiscal 2018, the Company closed one of its infrastructure manufacturing facilities in North America and consolidated its operations with an irrigation manufacturing facility. In the second quarter of fiscal 2020, the Company sold the building for net proceeds of \$3.9 million, resulting in a gain of \$1.2 million. The gain on the sale is included in cost of goods sold on the consolidated statement of earnings for the year ended August 31, 2020. The building was included within the caption "Assets held-for-sale" for \$2.7 million in the consolidated balance sheet as of August 31, 2019.

Note 5 – Net Earnings Per Share

The following table shows the computation of basic and diluted net earnings per share for fiscal 2020, 2019, and 2018:

(\$ and shares in thousands, except per share amounts)	For the years ended August 31,		
	2020	2019	2018
Numerator:			
Net earnings	\$ 38,629	\$ 2,172	\$ 20,277
Denominator:			
Weighted average shares outstanding	10,823	10,781	10,741
Diluted effect of stock equivalents	38	29	31
Weighted average shares outstanding assuming dilution	<u>10,861</u>	<u>10,810</u>	<u>10,772</u>
Basic net earnings per share	\$ 3.57	\$ 0.20	\$ 1.89
Diluted net earnings per share	\$ 3.56	\$ 0.20	\$ 1.88

Certain stock options and restricted stock units were excluded from the computation of diluted net earnings per share because their effect would have been anti-dilutive. Performance stock units are excluded from the calculation of dilutive potential common shares until the threshold performance conditions have been satisfied. The following table shows the securities excluded from the computation of earnings per share because their effect would have been anti-dilutive:

(Units and options in thousands)	For the years ended August 31,		
	2020	2019	2018
Restricted stock units	6	8	19
Stock options	34	72	65
Performance stock units	—	5	—

Note 6 – Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss is included in the accompanying consolidated balance sheets in the shareholders' equity section, and consists of the following components:

(\$ in thousands)	August 31,	
	2020	2019
Accumulated other comprehensive loss:		
Defined benefit pension plan, net of tax benefit of \$1,015 and \$885	\$ (3,228)	(2,916)
Foreign currency translation, net of hedging activities, net of tax expense of \$2,371 and \$3,202	(17,430)	(16,931)
Unrealized gains on marketable securities, net of tax expense of \$31 and \$0	86	—
Total accumulated other comprehensive loss	<u>\$ (20,572)</u>	<u>\$ (19,847)</u>

The following is a roll-forward of the balances in accumulated other comprehensive loss, net of tax.

(\$ in thousands)	Defined benefit pension plan	Foreign currency translation	Unrealized gains on marketable securities	Accumulated other comprehensive loss
Balance at August 31, 2018	\$ (2,199)	\$ (15,889)	\$ —	\$ (18,088)
Current period change	(717)	(1,042)	—	(1,759)
Balance at August 31, 2019	(2,916)	(16,931)	—	(19,847)
Current period change	(312)	(499)	86	(725)
Balance at August 31, 2020	<u>\$ (3,228)</u>	<u>\$ (17,430)</u>	<u>\$ 86</u>	<u>\$ (20,572)</u>

Note 7 – Income Taxes

For financial reporting purposes earnings (losses) before income taxes include the following components:

(\$ in thousands)	For the years ended August 31,		
	2020	2019	2018
United States	\$ 38,928	\$ (1,949)	\$ 25,116
Foreign	9,915	4,056	8,737
	<u>\$ 48,843</u>	<u>\$ 2,107</u>	<u>\$ 33,853</u>

Significant components of the income tax provision are as follows:

(\$ in thousands)	For the years ended August 31,		
	2020	2019	2018
Current:			
Federal	\$ 4,231	\$ 2,190	\$ 9,313
State	1,421	324	1,047
Foreign	3,178	3,107	3,266
Total current	<u>8,830</u>	<u>5,621</u>	<u>13,626</u>
Deferred:			
Federal	2,630	(3,209)	517
State	121	(624)	(47)
Foreign	(1,367)	(1,853)	(520)
Total deferred	<u>1,384</u>	<u>(5,686)</u>	<u>(50)</u>
Total income tax provision	<u>\$ 10,214</u>	<u>\$ (65)</u>	<u>\$ 13,576</u>

Total income tax provision resulted in effective tax rates differing from that of the statutory United States federal income tax rates. The reasons for these differences are:

(\$ in thousands)	For the years ended August 31,					
	2020		2019		2018	
	Amount	%	Amount	%	Amount	%
U.S. statutory rate	\$ 10,257	21.0	\$ 443	21.0	\$ 8,700	25.7
State and local taxes, net of federal tax benefit	1,079	2.2	(379)	(18.0)	743	2.2
Foreign tax rate differences	(292)	(0.6)	164	7.8	809	2.4
U.S. tax reform	(165)	(0.3)	160	7.6	2,496	7.4
Deferred tax asset valuation allowance	(479)	(1.0)	142	6.7	758	2.2
Domestic production activities deduction	—	—	—	—	(727)	(2.1)
Federal credits	(419)	(0.9)	(338)	(16.0)	(375)	(1.1)
Uncertain tax benefits	165	0.3	(153)	(7.3)	198	0.6
Other	68	0.1	(104)	(4.9)	974	2.9
Effective rate	<u>\$ 10,214</u>	<u>20.9</u>	<u>\$ (65)</u>	<u>(3.1)</u>	<u>\$ 13,576</u>	<u>40.1</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

(\$ in thousands)	August 31,	
	2020	2019
Deferred tax assets:		
Accrued expenses	\$ 10,376	\$ 7,791
Warranty	2,439	2,118
Defined benefit pension plan	1,767	1,705
Inventory	2,362	1,445
Share-based compensation	1,185	1,146
Vacation	780	741
Net operating loss and capital loss carry forwards	3,009	3,648
Deferred revenue	2,282	2,716
Allowance for doubtful accounts	683	687
Other	2,233	2,074
Gross deferred tax assets	27,116	24,071
Valuation allowance	(3,218)	(3,759)
Net deferred tax assets	\$ 23,898	\$ 20,312
Deferred tax liabilities:		
Intangible assets	\$ (6,054)	\$ (6,163)
Property, plant, and equipment	(8,798)	(3,263)
Total deferred tax liabilities	\$ (14,852)	\$ (9,426)
Net deferred tax assets	\$ 9,046	\$ 10,886

In assessing the ability to realize deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Because the Company has a recent history of generating cumulative losses in a certain foreign tax jurisdiction, management did not consider projections of future taxable income as persuasive evidence for the recoverability of deferred tax assets in that jurisdiction. The Company has recorded a valuation allowance of \$1.7 million and \$2.4 million as of August 31, 2020 and 2019 respectively, related to the net operating loss in the certain foreign tax jurisdiction. The Company has also recorded a valuation allowance of \$1.2 million and \$1.4 million as of August 31, 2020 and 2019, respectively, related to capital losses from business divestitures where the Company believes it is more likely than not that the benefit from the capital loss will not be realized. Remaining valuation allowance relates to deferred tax assets in a certain foreign tax jurisdiction not subject to tax due to a free trade zone exemption.

The Company does not intend to, and has not historically, repatriated earnings of its foreign subsidiaries. Thus, the Company has not provided a deferred income tax liability on these undistributed earnings that are indefinitely reinvested. The Company would recognize a deferred income tax liability if the Company were to determine that such earnings were no longer indefinitely reinvested. There are other taxes that may be incurred if the Company would repatriate earnings of its foreign subsidiaries. It is not practicable to estimate the amount of income taxes that would be incurred if the Company would repatriate earnings of its foreign subsidiaries.

The Company recognizes tax benefits only for tax positions that are more likely than not to be sustained upon examination by tax authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely to be realized upon settlement. Unrecognized tax benefits are tax benefits claimed in the Company's tax returns that do not meet these recognition and measurement standards.

A reconciliation of changes in unrecognized tax benefits is as follows:

(\$ in thousands)	August 31,	
	2020	2019
Unrecognized tax benefits at September 1	\$ 2,389	\$ 1,399
Increases for positions taken in current year	52	1,457
Increases for positions taken in prior years	266	78
Decreases for positions taken in prior years	(1,360)	(216)
Reduction resulting from lapse of applicable statute of limitations	(206)	(329)
Decreases for settlements with tax authorities	—	—
Unrecognized tax benefits at August 31	<u>\$ 1,141</u>	<u>\$ 2,389</u>

The net amount of unrecognized tax benefits at both August 31, 2020 and 2019 that, if recognized, would impact the Company's effective tax rate was \$0.8 million and \$0.6 million respectively. Recognition of these tax benefits would have a favorable impact on the Company's effective tax rate. The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. Total accrued liabilities for interest and penalties included in the unrecognized tax benefits liability were \$1.1 million for each of the years ended August 31, 2020 and 2019.

While it is expected that the amount of unrecognized tax benefits will change in the next twelve months as a result of the expiration of statutes of limitations, the Company does not expect this change to have a significant impact on its results of operations or financial position.

The Company files income tax returns in the United States and various state and foreign jurisdictions. The Company is no longer subject to income tax examination by US federal and most state tax authorities for tax years prior to fiscal 2017. Other major jurisdictions where we conduct business generally have statutes of limitations ranging from three to five years.

Note 8 - Inventories

(\$ in thousands)	August 31,	
	2020	2019
Raw materials and supplies	\$ 51,205	\$ 49,047
Work in process	6,464	4,514
Finished goods and purchased parts	51,684	46,812
Total inventory value before LIFO adjustment	109,353	100,373
Less adjustment to LIFO value	(4,561)	(8,086)
Inventories, net	<u>\$ 104,792</u>	<u>\$ 92,287</u>

Note 9 – Property, Plant, and Equipment

(\$ in thousands)	August 31,	
	2020	2019
Operating property, plant, and equipment:		
Land	\$ 2,639	\$ 2,775
Buildings	40,730	41,284
Machinery and equipment	85,185	77,715
Furniture and fixtures	8,089	7,706
Computer hardware and software	20,927	18,956
Construction in progress	10,677	10,953
Total operating property, plant, and equipment	168,247	159,389
Accumulated depreciation	(110,389)	(102,437)
Total operating property, plant, and equipment, net	57,858	56,952
Property held for lease:		
Machines	12,457	8,861
Barriers	27,403	20,445
Total property held for lease	39,860	29,306
Accumulated depreciation	(18,137)	(17,290)
Total property held for lease, net	21,723	12,016
Property, plant, and equipment, net	<u>\$ 79,581</u>	<u>\$ 68,968</u>

Depreciation expense was \$11.6 million, \$11.1 million, and \$12.5 million for fiscal 2020, 2019, and 2018, respectively.

Note 10 – Goodwill and Other Intangible Assets

The carrying amount of goodwill by reportable segment for the year ended August 31, 2020 and August 31, 2019 is as follows:

(\$ in thousands)	Irrigation	Infrastructure	Total
Balance as of August 31, 2018	\$ 48,591	\$ 16,080	\$ 64,671
Foreign currency translation	(24)	(260)	(284)
Balance as of August 31, 2019	48,567	15,820	64,387
Acquisition of Net Irrigate	3,265	—	3,265
Foreign currency translation	(30)	382	352
Balance as of August 31, 2020	<u>\$ 51,802</u>	<u>\$ 16,202</u>	<u>\$ 68,004</u>

The components of the Company's identifiable intangible assets and their weighted average remaining life at August 31, 2020 and 2019 are included in the table below.

(\$ in thousands)	August 31,					
	2020			2019		
	Weighted average years	Gross carrying amount	Accumulated amortization	Weighted average years	Gross carrying amount	Accumulated amortization
Amortizable intangible assets:						
Patents and developed technology	4.3	\$ 27,082	\$ (22,905)	4.0	\$ 26,547	\$ (21,097)
Customer relationships	3.1	17,965	(10,986)	3.6	16,439	(9,779)
Non-compete agreements	—	—	—	0.4	1,132	(1,107)
Unamortizable intangible assets:						
Tradenames	N/A	12,321	—	N/A	12,247	—
Total	3.5	<u>\$ 57,368</u>	<u>\$ (33,891)</u>	3.8	<u>\$ 56,365</u>	<u>\$ (31,983)</u>

Amortization expense for amortizable intangible assets was \$2.5 million, \$2.9 million, and \$4.0 million for fiscal 2020, 2019, and 2018, respectively.

Future estimated amortization of intangible assets for the next five years is as follows:

Fiscal years	\$ in thousands
2021	\$ 2,177
2022	2,006
2023	1,902
2024	1,902
2025	1,653
Thereafter	1,516
	<u>\$ 11,156</u>

The Company updated its impairment evaluation of goodwill and intangible assets with indefinite useful lives at August 31, 2020. No impairment losses were indicated as a result of the annual impairment testing for fiscal 2020, 2019 and 2018.

Note 11 – Other Current Liabilities

(\$ in thousands)	August 31,	
	2020	2019
Other current liabilities:		
Compensation and benefits	\$ 20,945	\$ 13,960
Contract liabilities	17,296	14,763
Warranties	10,765	8,960
Operating lease liabilities	5,123	—
Tax related liabilities	3,726	1,469
Dealer related liabilities	3,664	3,246
Deferred revenue - lease	1,822	2,985
Accrued insurance	1,348	1,482
Accrued environmental liabilities	1,115	1,243
Other	6,842	4,380
Total other current liabilities	<u>\$ 72,646</u>	<u>\$ 52,488</u>

Note 12 – Credit Arrangements

Senior Notes. The Company has outstanding \$115.0 million in aggregate principal amount of Senior Notes, Series A (the “Senior Notes”). The entire principal of the Senior Notes is due and payable on February 19, 2030. Interest on the Senior Notes is payable semi-annually at a fixed annual rate of 3.82 percent and borrowings under the Senior Notes are unsecured. The Company used the proceeds of the sale of the Senior Notes for general corporate purposes, including acquisitions and dividends.

Revolving Credit Facility. The Company has outstanding a \$50.0 million unsecured Amended and Restated Revolving Credit Facility (the “Revolving Credit Facility”) with Wells Fargo Bank, National Association (“Wells Fargo”) expiring May 31, 2022. The Company intends to use borrowings under the Revolving Credit Facility for working capital purposes and to fund acquisitions. At August 31, 2020 and August 31, 2019, the Company had no outstanding borrowings under the Revolving Credit Facility. The amount of borrowings available at any time under the Revolving Credit Facility is reduced by the amount of standby letters of credit issued by Wells Fargo then outstanding. At August 31, 2020, the Company had the ability to borrow up to \$50.0 million under the Revolving Credit Facility. Borrowings under the Revolving Credit Facility bear interest at a variable rate equal to LIBOR plus 90 basis points (1.1 percent at August 31, 2020), subject to adjustment as set forth in the loan documents for the Revolving Credit Facility. Interest is paid on a monthly to quarterly basis depending on loan type. The Company currently pays an annual commitment fee of 0.25 percent on the unused portion of the Revolving Credit Facility.

Borrowings under the Revolving Credit Facility have equal priority with borrowings under the Company’s Senior Notes. Each of the credit arrangements described above include certain covenants relating primarily to the Company’s financial condition. These financial covenants include a funded debt to EBITDA leverage ratio and an interest coverage ratio. In the event that the loan documents for the Revolving Credit Facility were to require the Company to comply with any financial covenant that is not already included or is more restrictive than what is

already included in the arrangement governing the Senior Notes, then such covenant shall be deemed incorporated by reference into the Senior Notes for the benefit of the holders of the Senior Notes. Upon the occurrence of any event of default of these covenants, including a change in control of the Company, all amounts outstanding thereunder may be declared to be immediately due and payable. At August 31, 2020 and August 31, 2019, the Company was in compliance with all financial loan covenants contained in its credit arrangements in place as of each of those dates.

Series 2006A Bonds. Elecsys International, LLC, a wholly owned subsidiary of the Company, has outstanding \$1.3 million in principal amount of industrial revenue bonds that were issued in 2006 (the “Series 2006A Bonds”). Principal and interest on the Series 2006A Bonds are payable monthly through maturity on September 1, 2026. The interest rate is adjustable every five years based on the yield of the 5-year United States Treasury Notes, plus 0.45 percent (1.92 percent as of August 31, 2020). This rate was adjusted on September 1, 2016 in accordance with the terms of the bonds, and the adjusted rate will be in force until September 1, 2021. The obligations under the Series 2006A Bonds are secured by a first priority security interest in certain real estate.

Long-term debt consists of the following:

(\$ in thousands)	August 31,	
	2020	2019
Series A Senior Notes	\$ 115,000	\$ 115,000
Revolving Credit Facility	—	—
Elecsys Series 2006A Bonds	1,344	1,571
Total debt	116,344	116,571
Less current portion	(195)	(209)
Less debt issuance costs	(467)	(516)
Total long-term debt	<u>\$ 115,682</u>	<u>\$ 115,846</u>

Principal payments due on the debt are as follows:

Due within	\$ in thousands
1 year	\$ 195
2 years	217
3 years	221
4 years	226
5 years	230
Thereafter	115,255
	<u>\$ 116,344</u>

Note 13 – Financial Derivatives

Fair values of derivative instruments are as follows:

(\$ in thousands)	Balance sheet location	August 31,	
		2020	2019
Derivatives designated as hedging instruments:			
Foreign currency forward contracts	Other current assets	\$ —	\$ 1,073
Total derivatives designated as hedging instruments		<u>\$ —</u>	<u>\$ 1,073</u>
Derivatives not designated as hedging instruments:			
Foreign currency options contracts	Other current assets	\$ 21	\$ 39
Total derivatives not designated as hedging instruments		<u>\$ 21</u>	<u>\$ 39</u>

Accumulated other comprehensive income included realized and unrealized after-tax gains of \$7.3 million, \$7.0 million, and \$5.0 million at August 31, 2020, 2019, and 2018, respectively, related to derivative contracts designated as hedging instruments.

Net Investment Hedging Relationships

The amount of loss recognized in OCI on derivatives is as follows:

(\$ in thousands)	For the years ended August 31,		
	2020	2019	2018
Foreign currency forward contracts, net of tax expense of \$97, \$564, and \$498	\$ 330	\$ (1,964)	\$ (1,103)

During fiscal 2020, 2019, and 2018, the Company settled foreign currency forward contracts resulting in an after-tax net of \$1.2 million, an after-tax net loss \$0.6 million and \$0.5 million, respectively, which were included in other comprehensive income as part of a currency translation adjustment. There were no amounts recorded in the condensed consolidated statements of operations related to ineffectiveness of foreign currency forward contracts related to net investment hedges for the years ended August 31, 2020, 2019, and 2018.

At August 31, 2020 the Company had no foreign currency forward contracts qualifying as a hedge of a net investment in foreign operations. At August 31, 2019, the Company had outstanding foreign currency forward contracts to sell a notional amount of million Euro at fixed prices to settle during the next fiscal quarter. Additionally, at August 31, 2019, the Company also had an outstanding foreign currency forward contract to sell a notional amount of million South African rand at fixed prices to settle during the next fiscal quarter. The Company's foreign currency forward contracts qualify as hedges of a net investment in foreign operations.

Derivatives Not Designated as Hedging Instruments

The Company generally does not elect hedge accounting treatment for derivative contracts related to future settlements of foreign denominated intercompany receivables and payables. If the Company does not elect hedge accounting treatment for a derivative, the Company carries the derivative at its fair value in the condensed consolidated balance sheets and recognizes any subsequent changes in its fair value during a period through earnings in the condensed consolidated statements of operations. At August 31, 2020, the Company had no foreign currency forward contracts outstanding that are designated as hedging instruments. At August 31, 2019, the Company had notional value of \$1.8 million of U.S. dollar equivalent of foreign currency forward contracts outstanding that are not designated as hedging instruments.

During the third quarter of fiscal 2020, the Company entered into a foreign exchange option contract with a notional amount of 15 million British Pounds to mitigate the risk related to a revenue contract and related costs denominated in British Pounds over an approximate six-month period. The contract is not speculative and was not designated as a hedging instrument. Gains and losses on this contract are recorded within cost of goods sold in the condensed consolidated statement of operations.

Note 14 – Leases

The Company, as lessee, has operating leases primarily for office space, manufacturing facilities, equipment, and vehicles. The Company determines if a contract is or contains a lease at the inception of the contract based on whether the contract conveys the right to control the use of an identified asset over a period of time in exchange for consideration. The Company considers disclosures related to its transactions as a lessor to not be material and has omitted such disclosures.

The Company elected, for all classes of underlying assets, to not separate lease and non-lease components and instead will treat the lease agreement as a single lease component for all asset classes. The Company additionally elected practical expedients to not reassess whether existing contracts are or contain leases, the classification of any existing leases, accounting for initial direct costs for any existing leases, and hindsight in determining the lease term and in assessing impairment of the right-of-use ("ROU") asset.

Short-term operating leases, which have an initial expected term of twelve months or less, are not recorded on the condensed consolidated balance sheet. Such fixed lease payments are recognized within the condensed consolidated statement of earnings on a straight-line basis over the lease term. Any variable payments associated with short-term operating leases are recognized within the condensed consolidated statement of earnings as they are incurred. The Company did not recognize any expense for such leases during the twelve months ended August 31, 2020.

Many of the Company's leases contain renewal or extension options. The Company includes all renewal or extension periods that it is reasonably certain to exercise at lease commencement within the measurement of the ROU asset and lease liability.

The Company's lease portfolio consists of operating leases which are included in operating lease ROU assets and operating lease liabilities in the condensed consolidated balance sheet. Operating lease ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. To calculate the present value of future lease payments, the Company uses an incremental borrowing rate that estimates a collateralized rate based on the expected term of the lease.

Lease cost and other information related to the Company's operating leases are as follows:

(\$ in thousands)	Year Ended August 31, 2020
Operating lease cost (cost resulting from lease payments)	\$ 5,999
Variable lease cost (cost excluded from lease payments)	424
Total lease cost	<u>\$ 6,423</u>
Operating cash outflows from operating leases	\$ 5,767
Weighted average lease term - operating leases	9.1 years
Weighted average discount rate - operating leases	3.2%

Supplemental balance sheet information related to operating leases are as follows:

(\$ in thousands)	Classification	Year Ended August 31, 2020
Operating lease ROU assets	Operating lease right-of-use assets	\$ 27,457
Operating lease short-term liabilities	Other current liabilities	5,123
Operating lease long-term liabilities	Operating lease liabilities	25,862
Total lease liabilities		<u>\$ 30,985</u>

The minimum lease payments under operating leases expiring subsequent to August 31, 2020 are as follows:

Fiscal year ending	\$ in thousands
2021	\$ 5,911
2022	5,734
2023	4,075
2024	3,680
2025	2,735
Thereafter	14,370
Total lease payments	36,505
Less: interest	5,520
Present value of lease liabilities	<u>\$ 30,985</u>

As previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended August 31, 2019 and under the previous lease accounting standard, future minimum lease payments under operating leases with an initial or remaining term in excess of one year at August 31, 2019 would have been as follows:

Fiscal year ending	\$ in thousands
2020	\$ 6,065
2021	5,266
2022	4,771
2023	3,414
2024	3,107
Thereafter	20,119
Total lease payments	<u>\$ 42,742</u>

Note 15 – Fair Value Measurements

The following table presents the Company's financial assets and liabilities measured at fair value, based upon the level within the fair value hierarchy in which the fair value measurements fall, as of August 31, 2020 and 2019, respectively:

(\$ in thousands)	August 31, 2020			Total
	Level 1	Level 2	Level 3	
Cash and cash equivalents	\$ 121,403	\$ —	\$ —	\$ 121,403
Marketable securities:				
Corporate bonds	—	14,426	—	14,426
U.S. treasury securities	—	5,085	—	5,085
Derivative assets	—	21	—	21
Earn-out liability	—	—	(1,112)	(1,112)
(\$ in thousands)	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 160,787	\$ —	\$ —	\$ 160,787
Derivative assets	—	898	—	898
Derivative liabilities	—	(12)	—	(12)

The carrying value of long-term debt (including current portion) was \$116.3 million and \$116.6 million at August 31, 2020 and 2019, respectively. The fair value of this debt was estimated to be \$122.9 million and \$120.8 million as of August 31, 2020 and 2019, based on current market rates as of the respective year-ends.

Note 16 – Commitments and Contingencies

In the ordinary course of its business operations, the Company enters into arrangements that obligate it to make future payments under contracts such as lease agreements. Additionally, the Company is involved, from time to time, in commercial litigation, employment disputes, administrative proceedings, business disputes and other legal proceedings. The Company has established accruals for certain proceedings based on an assessment of probability of loss. The Company believes that any such currently-pending proceedings are either covered by insurance or would not have a material effect on the business or its consolidated financial statements if decided in a manner that is unfavorable to the Company. Such proceedings are exclusive of environmental remediation matters which are discussed separately below.

Infrastructure Products Litigation

The Company is currently defending a number of product liability lawsuits arising out of vehicle collisions with highway barriers incorporating the Company's *X-Lite*® end terminal. Despite the September 2018 reversal of a sizable judgment against a competitor, the Company expects that the significant attention brought to the infrastructure products industry by the original judgment may lead to additional lawsuits being filed against the Company and others in the industry.

The Company, certain of its subsidiaries, and certain third parties which originally designed the X-Lite end terminal have also been named in a lawsuit filed on June 9, 2020 in the Circuit Court of Cole County, Missouri by Missouri Highways and Transportation Commission (“MHTC”). MHTC alleges, among other things, that the X-Lite end terminal was defectively designed and failed to perform as designed, intended, and advertised, leading to MHTC’s removal and replacement of X-Lite end terminals from Missouri’s roadways. MHTC alleges strict liability (defective design and failure to warn), negligence, breach of express warranties, breach of implied warranties (merchantability and fitness for a particular purpose), fraud, and public nuisance. MHTC seeks compensatory damages, interest, attorneys’ fees, and punitive damages.

The Company believes it has meritorious factual and legal defenses to each of the lawsuits discussed above and is prepared to vigorously defend its interests. Based on the information currently available to the Company, the Company does not believe that a loss is probable in any of these lawsuits; therefore, no accrual has been included in the Company’s consolidated financial statements. While it is possible that a loss may be incurred, the Company is unable to estimate a range of potential loss due to the complexity and current status of these lawsuits. However, the Company maintains insurance coverage to mitigate the impact of adverse exposures in these lawsuits and does not expect that these lawsuits will have a material adverse effect on its business or its consolidated financial statements.

In June 2019, the Company was informed by letter that the Department of Justice, Civil Division and U.S. Attorney’s Office for the Northern District of New York, with the assistance of the Department of Transportation, Office of Inspector General, are conducting an investigation of the Company relating to the Company’s X-Lite end terminal and potential violations of the federal civil False Claims Act. Depending on the outcome of this matter, there could be a material adverse effect on the Company’s business or its consolidated financial statements. Given the current posture of the matter, the Company is unable to estimate a range of potential loss, if any, or to express an opinion regarding the ultimate outcome.

Environmental Remediation

In previous years, the Company committed to a plan to remediate environmental contamination of the groundwater at and adjacent to its Lindsay, Nebraska facility (the “site”). The current estimated aggregate accrued cost of \$16.1 million is based on consideration of remediation options which the Company believes could be successful in meeting the long-term regulatory requirements of the site. The Company submitted a revised remedial alternatives evaluation report to the EPA and the Nebraska Department of Environment and Energy (the “NDEE”) in August 2020 to review remediation alternatives and proposed plans for the site. The proposed remediation plan is preliminary and has not been approved by the EPA or the NDEE. Based on guidance from third-party environmental experts and the preliminary discussions with the regulatory agencies, the Company anticipates that a definitive plan will not be agreed upon until the first half of fiscal 2021 or later. An increase to the liability of \$1.0 million was recorded within general and administrative expense on the consolidated statement of earnings for the year ended August 31, 2020. Of the total liability, \$11.0 million was calculated on a discounted basis using a discount rate of 1.2%, which represents a risk-free rate. This discounted portion of the liability amounts to \$12.4 million on an undiscounted basis.

The Company accrues the anticipated cost of investigation and remediation when the obligation is probable and can be reasonably estimated. While the plan has not formally been approved by the EPA, the Company believes the current accrual is a good faith estimate of the long-term cost of remediation at this site; however, the estimate of costs and their timing could change as a result of a number of factors, including (1) EPA input on the proposed remediation plan and any changes which they may subsequently require, (2) refinement of cost estimates and length of time required to complete remediation and post-remediation operations and maintenance, (3) effectiveness of the technology chosen in remediation of the site as well as changes in technology that may be available in the future, and (4) unforeseen circumstances existing at the site. As a result of these factors, the actual amount of costs incurred by the Company in connection with the remediation of contamination of its Lindsay, Nebraska site could exceed the amounts accrued for this expense at this time. While any revisions could be material to the operating results of any fiscal quarter or fiscal year, the Company does not expect such additional expenses would have a material adverse effect on its liquidity or financial condition.

The following table summarizes the environmental remediation liability classifications included in the balance sheet as of August 31, 2020 and 2019:

(\$ in thousands) Balance sheet location	August 31,	
	2020	2019
Other current liabilities	\$ 1,115	\$ 1,243
Other noncurrent liabilities	15,030	14,674
Total environmental remediation liabilities	<u>\$ 16,145</u>	<u>\$ 15,917</u>

Note 17 – Retirement Plans

The Company has defined contribution profit-sharing plans covering substantially all of its full-time U.S. employees. Participants may voluntarily contribute a percentage of compensation, but not in excess of the maximum allowed under the Internal Revenue Code. The plans provide for a matching contribution by the Company. The Company's total contributions charged to expense under the plans were \$1.2 million, \$1.2 million, and \$1.7 million for the years ended August 31, 2020, 2019, and 2018, respectively.

A supplementary non-qualified, non-funded retirement plan for five former executives is also maintained. Plan benefits are based on the executive's average total compensation during the three highest compensation years of employment. This unfunded supplemental retirement plan is not subject to the minimum funding requirements of ERISA. While the plan is unfunded, the Company has purchased life insurance policies on certain former executives named in this supplemental retirement plan to provide funding for this liability. The cash surrender values of these insurance policies are recorded as other noncurrent assets.

As of August 31, 2020 and 2019, the funded status of the supplemental retirement plan was recorded in the consolidated balance sheets. The Company utilizes an August 31 measurement date for plan obligations related to the supplemental retirement plan. As this is an unfunded retirement plan, the funded status is equal to the benefit obligation.

The funded status of the plan and the net amount recognized in the accompanying balance sheets as of August 31 is as follows:

(\$ in thousands)	August 31,	
	2020	2019
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 6,559	\$ 6,404
Interest cost	208	246
Actuarial loss	667	439
Benefits paid	(530)	(530)
Benefit obligation at end of year	<u>\$ 6,904</u>	<u>\$ 6,559</u>

Amounts recognized in the statement of financial position consist of:

(\$ in thousands)	August 31,	
	2020	2019
Other current liabilities	\$ 530	\$ 530
Pension benefit liabilities	6,374	6,029
Net amount recognized	<u>\$ 6,904</u>	<u>\$ 6,559</u>

The before-tax amounts recognized in accumulated other comprehensive loss consists of:

(\$ in thousands)	August 31,	
	2020	2019
Net actuarial loss	\$ (4,242)	\$ (3,801)

For the years ended August 31, 2020 and 2019, the Company assumed a discount rate of 2.2 percent and 3.3 percent, respectively, for the determination of the liability. The assumptions used to determine benefit obligations

and costs are selected based on current and expected market conditions. The discount rate is based on a hypothetical portfolio of long-term corporate bonds with cash flows approximating the timing of expected benefit payments.

For the years ended August 31, 2020, 2019, and 2018, the Company assumed a discount rate of 3.3 percent, 4.0 percent, and 3.7 percent, respectively, for the determination of the net periodic benefit cost. The components of the net periodic benefit cost for the supplemental retirement plan recorded within other income (expense) on the consolidated statement of earnings are as follows:

(\$ in thousands)	For the years ended August 31,		
	2020	2019	2018
Interest cost	\$ 208	\$ 246	\$ 243
Net amortization and deferral	226	199	206
Total	<u>\$ 434</u>	<u>\$ 445</u>	<u>\$ 449</u>

The estimated actuarial loss for the supplemental retirement plan that will be amortized, on a pre-tax basis, from accumulated other comprehensive loss into net periodic benefit cost during fiscal 2021 will be \$0.3 million.

The Company's future annual contributions to the supplemental retirement plan will be equal to expected net benefit payments since the plan is unfunded. The following net benefit payments are expected to be paid:

Fiscal years	\$ in thousands
2021	\$ 521
2022	513
2023	504
2024	494
2025	483
Thereafter	4,389
	<u>\$ 6,904</u>

Note 18 - Warranties

Product Warranties

The Company generally warrants its products against certain manufacturing and other defects. These product warranties are provided for specific periods and/or usage of the product. The accrued product warranty costs are for a combination of specifically identified items and other incurred, but not identified, items based primarily on historical experience of actual warranty claims. This reserve is classified within other current liabilities.

The following tables provide the changes in the Company's product warranties:

(\$ in thousands)	For the years ended August 31,	
	2020	2019
Product warranty accrual balance, beginning of period	\$ 8,960	\$ 7,109
Liabilities accrued for warranties during the period	7,895	7,263
Warranty claims paid during the period	(6,970)	(5,769)
Changes in estimates	880	357
Product warranty accrual balance, end of period	<u>\$ 10,765</u>	<u>\$ 8,960</u>

Warranty costs were \$8.8 million, \$7.6 million, and \$5.4 million for fiscal 2020, 2019, and 2018, respectively.

Note 19 – Industry Segment Information

The Company manages its business activities in two reportable segments: Irrigation and Infrastructure. The accounting policies of the two reportable segments are the same as those described in Note 1, Description of Business and Significant Accounting Policies. The Company evaluates the performance of its reportable segments based on segment sales, gross profit, and operating income, with operating income for segment purposes excluding unallocated corporate general and administrative expenses, interest income, interest expense, other income and expenses, and income taxes. Operating income for segment purposes does include general and administrative

expenses, selling expenses, engineering and research expenses and other overhead charges directly attributable to the segment. There are no inter-segment sales included in the amounts disclosed.

Irrigation

This reporting segment includes the manufacture and marketing of center pivot, lateral move, and hose reel irrigation systems, as well as various innovative technology solutions such as GPS positioning and guidance, variable rate irrigation, wireless irrigation management, M2M communication technology, and smartphone applications. The irrigation reporting segment consists of one operating segment.

Infrastructure

This reporting segment includes the manufacture and marketing of moveable barriers, specialty barriers, crash cushions and end terminals, and road marking and road safety equipment; the manufacturing and selling of large diameter steel tubing and railroad signals and structures; and providing outsourced manufacturing and production services. The infrastructure reporting segment consists of one operating segment.

The Company has no single major customer representing ten percent or more of its total revenues during fiscal 2020, 2019, or 2018.

Summarized financial information concerning the Company's reportable segments is shown in the following tables:

(\$ in thousands)	2020	2019	2018
Operating revenues:			
Irrigation:			
North America	\$ 218,954	\$ 218,627	\$ 294,617

Note 20 – Share-Based Compensation

Share-Based Compensation Program

Share-based compensation is designed to reward employees for their long-term contributions to the Company and provide incentives for them to remain with the Company. The number and frequency of share grants are based on competitive practices, operating results of the Company, and individual performance. As of August 31, 2020, the Company's share-based compensation plan was the 2015 Long-Term Incentive Plan (the "2015 Plan"). The 2015 Plan was approved by the shareholders of the Company, and became effective on January 26, 2015, and replaced the Company's 2010 Long Term Incentive Plan. At August 31, 2020, the Company had share-based awards outstanding under its 2010 and 2015 Long-Term Incentive Plans.

The 2015 Plan provides for awards of stock options, restricted shares, restricted stock units, stock appreciation rights, performance shares and performance stock units to employees and non-employee directors of the Company. The maximum number of shares as to which stock awards may be granted under the 2015 Plan is 626,968 shares, exclusive of any forfeitures from the 2010 Long Term Incentive Plan. At August 31, 2020, 316,093 shares of common stock (including forfeitures from prior plans) remained available for issuance under the 2015 Plan. All stock awards will be counted against the 2015 Plan in a 1 to 1 ratio. If options, restricted stock units or performance stock units awarded under the 2010 Plan terminate without being fully vested or exercised, those shares will be available again for grant under the 2015 Plan. The 2015 Plan also limits the total awards that may be made to any individual.

Share-Based Compensation Information

The following table summarizes share-based compensation expense for fiscal 2020, 2019, and 2018:

(\$ in thousands)	For the years ended August 31,		
	2020	2019	2018
Share-based compensation expense included in cost of operating revenues	\$ 142	\$ 105	\$ 113
Research and development	207	221	150
Sales and marketing	419	250	461
General and administrative	<u>5,079</u>	<u>3,819</u>	<u>3,169</u>
Share-based compensation expense included in operating expenses	<u>5,705</u>	<u>4,290</u>	<u>3,780</u>
Total share-based compensation expense	<u>5,847</u>	<u>4,395</u>	<u>3,893</u>
Tax benefit	<u>(1,374)</u>	<u>(1,033)</u>	<u>(1,090)</u>
Share-based compensation expense, net of tax	<u>\$ 4,473</u>	<u>\$ 3,362</u>	<u>\$ 2,803</u>

As of August 31, 2020, there was \$6.5 million pre-tax of total unrecognized compensation cost related to non-vested share-based compensation arrangements which is expected to be recognized over a weighted average period of 1.8 years.

Stock Options – Stock option awards have an exercise price equal to the closing price on the date of grant, expire no later than ten years from the date of grant and vest evenly over a three or four year period. The fair value of stock option awards is estimated using the Black-Scholes option pricing model. The table below shows the annual weighted average assumptions used for valuation purposes.

	Grant year	
	Fiscal 2020	Fiscal 2019
Risk-free interest rate	1.6%	3.1%
Dividend yield	1.3%	1.4%
Expected life (years)	6	6
Volatility	28.4%	26.3%
Weighted average grant-date fair value of options granted	\$ 24.18	\$ 24.71

The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant; the dividend yield is calculated as the ratio of dividends paid per share of common stock to the stock price on the date of grant; the expected life is based on historical and expected exercise behavior; and volatility is based on the historical volatility of the Company's stock price over the expected life of the option.

The following table summarizes stock option activity for fiscal 2020:

	Number of stock options	Average exercise price	Average remaining contractual term (years)	Aggregate intrinsic value (thousands)
Stock options outstanding at August 31, 2019	112,561	\$ 85.70	7.6	\$ 540
Granted	44,347	94.41		
Exercised	(21,400)	87.47		721
Forfeited/cancelled	(3,364)	72.20		12
Stock options outstanding at August 31, 2020	132,144	\$ 90.56	7.9	\$ 1,242
Stock options exercisable at August 31, 2020	43,229	\$ 86.49	6.9	\$ 581

There were 25,843, 15,496, and 27,811 outstanding stock options that vested during fiscal 2020, 2019, and 2018, respectively. Additional information regarding stock option exercises is summarized in the table below.

(\$ in thousands)	For the years ended August 31,		
	2020	2019	2018
Intrinsic value of stock options exercised	\$ 721	\$ 93	\$ 538
Cash received from stock option exercises	\$ 1,545	\$ 177	\$ 2,788
Tax benefit realized from stock option exercises	\$ 169	\$ 26	\$ 151
Weighted average grant-date fair value of stock options vested	\$ 27.08	\$ 32.66	\$ 31.37

Restricted stock units - The restricted stock units have a grant-date fair value equal to the fair market value of the underlying stock on the grant date less present value of expected dividends. The restricted stock units granted to employees vest over a three year period at approximately 33 percent per year. The restricted stock units granted to non-employee directors generally vest over a nine month period.

The following table summarizes restricted stock unit activity for fiscal 2020:

	Number of restricted stock units	Weighted average grant- date fair value
Restricted stock units outstanding at August 31, 2019	79,342	\$ 87.49
Granted	39,716	91.83
Vested	(40,792)	88.85
Forfeited / Cancelled	(5,543)	87.47
Restricted stock units outstanding at August 31, 2020	<u>72,723</u>	<u>\$ 89.92</u>

Restricted stock units are generally settled with the issuance of shares with the exception of certain restricted stock units awarded to internationally-based employees that are settled in cash. At August 31, 2020, 2019, and 2018, outstanding restricted stock units included 4,938, 4,103, and 6,474 units, respectively, that will be settled in cash. The fair value of restricted stock units that vested during the period was \$3.8 million and \$4.1 million for each of the years ended August 31, 2020 and 2019, respectively. Share issuances are presented net of share repurchases to cover payroll taxes of \$1.1 million, \$1.1 million, and \$0.8 million for each of the years ended August 31, 2020, 2019, and 2018, respectively.

Performance stock units - The performance stock units have a grant-date fair value equal to the fair market value of the underlying stock on the grant date less present value of expected dividends. The performance stock units granted to employees cliff vest after a three year period and a specified number of shares of common stock will be awarded under the terms of the performance stock units, if performance measures relating to revenue growth and a return on net assets are achieved.

The table below summarizes performance stock unit activity for fiscal 2020:

	Number of performance stock units	Weighted average grant- date fair value
Performance stock units outstanding at August 31, 2019	37,429	\$ 85.10
Granted	22,715	102.28
Forfeited / cancelled	(6,216)	80.06
Performance stock units outstanding at August 31, 2020	<u>53,928</u>	<u>\$ 101.29</u>

Performance stock units outstanding as of August 31, 2019 and issued prior to fiscal 2019 include performance goals based upon revenue growth and a return on net assets during the performance period. The awards actually earned will range from zero to two hundred percent of the targeted number of performance stock units and will be paid in shares of common stock. Shares earned will be distributed upon vesting on the first day of November following the end of the three-year performance period. The Company is accruing compensation expense based on the estimated number of shares expected to be issued utilizing the most current information available to the Company at the date of the financial statements. If defined performance goals are not met, no compensation cost will be recognized and any previously recognized compensation expense will be reversed. In fiscal 2020, 2019, and 2018, no performance stock units vested.

Performance stock units outstanding as of August 31, 2020 and issued during fiscal 2020 and 2019 include performance goals based on a return on net assets and total shareholder return (TSR) relative to the Company's peers during the performance period. The awards actually earned will range from zero to two hundred percent of the targeted number of performance stock units and will be paid in shares of common stock. Shares earned will be distributed upon vesting on the first day of November following the end of the three-year performance period. For the return on net assets portion of the award, the Company is accruing compensation expense based on the estimated number of shares expected to be issued utilizing the most current information available to the Company at the date of the financial statements. For the TSR portion of the award, compensation expense is recorded ratably over the three year term of the award based on the estimated grant date fair value.

The fair value of the TSR portion of the awards granted in fiscal 2020 was estimated at the grant date using a Monte Carlo simulation model which included the following assumptions:

Expected term (years)	3
Risk-free interest rate	1.5 %
Volatility	29.5 %
Dividend yield	1.3 %

Note 21 – Share Repurchases

The Company’s Board of Directors authorized a share repurchase program of up to \$250.0 million of common stock with no expiration date. Under the program, shares may be repurchased in privately negotiated and/or open market transactions as well as under formalized trading plans in accordance with the guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. There were no shares repurchased during the twelve months ended August 31, 2020. The remaining amount available under the repurchase program was \$63.7 million as of August 31, 2020.

Note 22 – Quarterly Results of Operations (Unaudited)

(\$ in thousands, except per share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Year ended August 31, 2020				
Operating revenues	\$ 109,393	\$ 113,788	\$ 123,106	\$ 128,405
Cost of operating revenues	\$ 75,319	\$ 80,382	\$ 83,410	\$ 83,038

ITEM 9 — Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

ITEM 9A — Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports that are filed or submitted under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and to ensure the information required to be disclosed is accumulated and communicated to management, including principal executives and financial officers, as appropriate to allow timely decisions regarding required disclosures. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

Remediation of Previously Reported Material Weaknesses in Internal Control over Financial Reporting

As previously disclosed in the Company's Form 10-K for the year ended August 31, 2019, management identified a material weakness related to ineffective internal control over indirect tax credits in a foreign jurisdiction.

Management has completed its implementation of new controls focused on the valuation of the tax credits. During the fourth quarter of fiscal year 2020, the Company completed its testing of the design and implementation of the new controls. As a result, as of August 31, 2020, management concluded that the Company had remediated the previously reported material weakness in internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements.

Management has assessed the effectiveness of the Company's internal control over financial reporting as of August 31, 2020, based on the criteria for effective internal control described in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, management concluded that the Company's internal control over financial reporting was effective as of August 31, 2020.

The Audit Committee has engaged KPMG LLP, the independent registered public accounting firm that audited the consolidated financial statements included in this Annual Report on Form 10-K, to attest to and report on management's evaluation of the Company's internal control over financial reporting. The report of KPMG LLP is included herein.

Changes in Internal Control over Financial Reporting

Other than the remediation of the previously identified material weakness described above, there were no changes in the Company's internal controls over financial reporting that occurred during the quarter ended August 31, 2020 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors
Lindsay Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited Lindsay Corporation and subsidiaries' (the Company) internal control over financial reporting as of August 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of August 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of August 31, 2020 and 2019, the related consolidated statements of earnings, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended August 31, 2020, and the related notes and financial statement schedule (collectively, the consolidated financial statements), and our report dated October 22, 2020 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ KPMG LLP

Omaha, Nebraska
October 22, 2020

ITEM 9B — *Other Information*

None.

PART III

ITEM 10 — *Directors, Executive Officers and Corporate Governance*

The Company will file with the Securities and Exchange Commission a definitive Proxy Statement for its 2020 Annual Meeting of Stockholders (the “Proxy Statement”) not later than 120 days after the close of its fiscal year ended August 31, 2020. Information about the Board of Directors required by this Item 10 is incorporated by reference to the discussion responsive thereto under the captions “Board of Directors and Committees” and “Corporate Governance” in the Proxy Statement.

Please see the information concerning our executive officers contained in Item 1 of Part I herein under the caption “Information About Out Executive Officers” which is included therein accordance with the Instruction to Item 401 of Regulation S-K.

Code of Ethics – The Company has adopted a code of ethics applicable to the Company’s principal executive officer and senior financial officers known as the Code of Ethical Conduct (Principal Executive Officer and Senior Financial Officers). The Code of Ethical Conduct (Principal Executive Officer and Senior Financial Officers) is available on the Company’s website. In the event that the Company amends or waives any of the provisions of the Code of Ethical Conduct applicable to the principal executive officer and senior financial officers, the Company intends to disclose the same on the Company’s website at www.lindsay.com. No waivers were provided for the fiscal year ended August 31, 2020.

ITEM 11 — *Executive Compensation*

The information required by this Item 11 is incorporated by reference to the discussion responsive thereto under the captions “Compensation Discussion and Analysis,” “Compensation Committee Report,” “Pay Ratio Information,” “Executive Compensation,” “Compensation of Directors,” and “Compensation Committee Interlocks and Insider Participation” in the Proxy Statement.

ITEM 12 — *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information required by this Item 12 relating to security ownership of certain beneficial owners and management is incorporated by reference to the discussion responsive thereto under the caption “Voting Securities and Beneficial Ownership Thereof by Principal Stockholders, Directors and Officers” in the Proxy Statement.

Equity Compensation Plan Information - The following equity compensation plan information summarizes plans and securities approved by security holders as of August 31, 2020 (there were no equity compensation plans not approved by security holders as of August 31, 2020):

<u>Plan category</u>	<u>(a)</u>	<u>(b)</u>	<u>(c)</u>
	Number of securities to be issued upon exercise of outstanding options, warrants, and rights	Weighted-average exercise price of outstanding options, warrants, and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders ^{(1) (2)}	253,857	\$ 90.56	316,093
Total	253,857	\$ 90.56	316,093

⁽¹⁾ Plans approved by stockholders include the Company’s 2010 and 2015 Long-Term Incentive Plans. While certain share-based awards remain outstanding under the Company’s 2010 Long-Term Incentive Plan, no future equity compensation awards may be granted under such plan.

⁽²⁾ Column (a) includes (i) 53,928 shares that could be issued under performance stock units (“PSU”) outstanding at August 31, 2020, and (ii) 67,785 shares that could be issued under restricted stock units (“RSU”) outstanding at August 31, 2020. The PSUs are earned and Common Stock issued if certain predetermined performance criteria are met. Actual shares issued may be equal to, less than or greater than (but not more than 200 percent of) the number of outstanding PSUs included in column (a), depending on actual performance. The RSUs vest and are payable in Common Stock after the expiration of the time periods set forth in the related agreements. Column (b) does not take these PSU and RSU awards into account because they do not have an exercise price.

ITEM 13 — *Certain Relationships and Related Transactions, and Director Independence*

The information required by this Item 13 is incorporated by reference to the discussion responsive thereto under the captions “Corporate Governance” and “Related Party Transactions” in the Proxy Statement.

ITEM 14 — *Principal Accounting Fees and Services*

The information required by this Item is incorporated by reference to the discussion responsive thereto under the caption “Proposal 2 Ratification of Appointment of Independent Registered Public Accounting Firm” in the Proxy Statement.

PART IV

Concerning Forward-Looking Statements

This Annual Report and Form 10-K, including the President's letter, Management's Discussion and Analysis of Financial Condition and Results of Operations, contains not only historical information, but also forward-looking statements. Statements that are not historical are forward-looking and reflect expectations for future Company performance. The words "expect," "anticipate," "estimate," "believe," "intend," "will," "plan," "predict," "project," "outlook," "could," "may," "should," and similar expressions generally identify forward-looking statements. For these statements throughout the Annual Report and Form 10-K, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve a number of risks and uncertainties, including but not limited to those discussed in the "Risk Factors" section contained in the Form 10-K. Readers should not place undue reliance on any forward-looking statement and should recognize that the statements are predictions of future results or conditions, which may not occur as anticipated. Actual results or conditions could differ materially from those anticipated in the forward-looking statements and from historical results, due to the risks and uncertainties described herein, as well as others not now anticipated. The risks and uncertainties described herein are not exclusive and further information concerning the Company and its businesses, including factors that potentially could materially affect the Company's financial results, may emerge from time to time. Except as required by law, the Company assumes no obligation to update forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements.
