

TDS Telecom has advocated for and is leveraging funding from the Federal Communications Commission's (FCC) Alternative Connect America Cost Model (A-CAM) to enhance and improve the speeds delivered on our rural broadband networks.

We are also working with state legislators and regulators to obtain funding to deploy broadband in areas where it is otherwise not financially viable. TDS Telecom is a recipient of nearly \$35 million in state grants from 2013-2021 to provide and support enhanced broadband services to over 23,400 service addresses in five states.

Under A-CAM, TDS is working to enhance and improve speeds delivered to about 160,000 service addresses by 2028.

UScellular® is focused on addressing gaps in STEM (Science, Technology, Engineering, and Mathematics) education. We are connecting tomorrow's innovators with the resources they need today to help shape their future opportunities. Through partnerships with nonprofit organizations, original research, and associate volunteerism, we're addressing the digital divide and providing critical resources in local communities.

We are building better communities in three ways:

K-12 STEM Education

We know that STEM education and technology go hand-in-hand. That's why we invest our time, talent, and resources in helping ensure K-12 youth have equitable opportunities to pursue successful careers in STEM. For more than a decade, partnerships with organizations like Boys & Girls Club of America have provided students with resources, access, mentorship, and hands-on STEM education to ensure they have the important tools to reach their full potential.

After School Access Project

After School Access Project is a program that provides free mobile hotspots and service to nonprofits that support youth after the school day has ended and provides safe internet access for homework and education. Our goal is to close the connectivity gap for youth living within our markets, so homework can truly be done at home. To bridge the digital divide in 2022, we're pledging up to \$13 million in hotspots and service to help up to 50,000 youth connect to reliable internet in our markets.

Supporting associate passions and volunteerism

Our associates love to give back. It is part of who we are and how we are Building Better Communities. We recognize their commitment and the impact they are making, which is why we offer a variety of programs like personal donation matching, Cause Cards rewards and Dollars For Doers to support the causes they care passionately about in local communities.

Dear Shareholders,

The TDS Family of Companies made progress on our long-term strategic goals in 2021, as we worked to meet the needs of our shareholders, our people, and our communities. Supporting associate safety and well-being has remained a top priority throughout the pandemic as our businesses continue to provide critical communication and data services that customers and communities depend on.

To position the company for long-term sustainability and growth, we are actively investing in our networks, services, and workforce to bring high-quality wireless and broadband technology to our customers.

UScellular

In 2021, UScellular grew total service revenues, including core postpaid revenues, and generated positive momentum in the growth areas of our business—business and government, prepaid, and fixed wireless. Frontline associates persevered through a very challenging environment due to the ongoing pandemic and the associated requirements and restrictions. We made significant investments in our network to ensure we are providing high-quality connections in all our markets, especially those underserved by other carriers. We launched our "America's Locally Grown Wireless" branding campaign, which is gaining traction and will continue to evolve.

In 2022, UScellular is focused on executing our mission of connecting our customers to the people and things that matter most to them. We will leverage our regionalization strategy to further enable a community-focused go-to-market approach and drive a deeper understanding of our customers. We will also continue to invest in business and government, with an emphasis on new distribution opportunities and ramping up sales efforts. In addition, we will aggressively pursue infrastructure, state, and local funding as part of our desire to bring better connectivity to underserved customers.

We are committed to increasing operational efficiency in 2022. Maintaining expense discipline through operational efficiency is crucial in achieving better returns on capital. We will continue our multi-year program to realize efficiencies in capital expenditures and operating costs.

UScellular's multi-year network modernization program is on track as we offer 5G in portions of substantially all of our markets and will further expand our 5G footprint in 2022. Test trials using millimeter wave spectrum for fixed wireless access are continuing to validate network performance and customer experience. Our work deploying 5G millimeter wave technology positions us as an industry leader in delivering affordable high-speed connectivity to rural America while presenting exciting new business opportunities for UScellular.

TDS Telecom

In 2021, TDS Telecom continued its transformation into a premier broadband provider, making significant progress in upgrading speeds and deploying fiber technology in both incumbent and expansion markets. TDS Telecom surpassed \$1 billion in revenue and exceeded a half million total broadband connections in the year. In addition, TDS Telecom launched 2Gig broadband speeds in select markets and announced a goal of reaching approximately 1.2 million fiber service addresses by 2026.

In 2022, TDS Telecom will focus on executing our strategies as we continue to grow broadband market share in communities we serve and generate revenue growth. We will continue seeking out opportunities to improve customer experience and complement our robust product offerings, which include high-speed broadband, best-in-class Wi-Fi, and enhanced TDS TV+ video services.

OneNeck IT Solutions

OneNeck IT Solutions improved its performance in 2021. Providing high quality services and a strong focus on customer experience helped drive high customer satisfaction. Continued growth in strategic services such as Microsoft, ReliaCloud and Security services, combined with cost efficiencies drove improvements in operating margin. OneNeck is leveraging these accomplishments in 2022 to drive strong business results and widen its customer base.

Environmental, Social and Governance (ESG)

We published TDS' very first ESG report in 2021. From our founding more than 50 years ago, TDS believes that being a good corporate citizen is fundamental to our long-term success. This means truly caring about our customers and associates, while striving to enhance the lives of people in our communities, as well as serving as a good steward of the environment and enacting governance practices that align with our corporate values.

Creating long-term shareholder value

At TDS, we seek to maintain a financially sound foundation for the enterprise so that each of our businesses can take advantage of growth opportunities to enhance their competitive positions and long-term returns. We continue to return value to our shareholders, primarily through our cash dividends, which have increased every year for the past 48 years.

Thank you

We are profoundly grateful to the associates of the TDS Family of Businesses for their resilience, dedication, and innovation in providing outstanding experiences for our customers.

Thank you to our shareholders and our debt holders for your continuing support of our long-term growth strategies.

Very truly yours,

LeRoy T. Carlson, Jr.

President and Chief Executive Officer

Walter C. D. Carlson Chairman of the Board

Telephone and Data Systems, Inc. Management's Discussion and Analysis of Financial Condition and Results of Operations

Executive Overview

The following Management's Discussion and Analysis (MD&A) should be read in conjunction with the audited consolidated financial statements and notes of Telephone and Data Systems, Inc. (TDS) for the year ended December 31, 2021, and with the description of TDS' business included herein. Certain numbers included herein are rounded to millions for ease of presentation; however, certain calculated amounts and percentages are determined using the unrounded numbers.

This report contains statements that are not based on historical facts, including the words "believes," "anticipates," "estimates," "expects," "plans," "intends," "projects" and similar expressions. These statements constitute and represent "forward looking statements" as this term is defined in the Private Securities Litigation Reform Act of 1995. Such forward looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be significantly different from any future results, events or developments expressed or implied by such forward looking statements. See Private Securities Litigation Reform Act of 1995 Safe Harbor Cautionary Statement for additional information.

TDS uses certain "non-GAAP financial measures" and each such measure is identified in the MD&A. A discussion of the reason TDS determines these metrics to be useful and reconciliations of these measures to their most directly comparable measures determined in accordance with accounting principles generally accepted in the United States of America (GAAP) are included in the Supplemental Information Relating to Non-GAAP Financial Measures section within the MD&A of this Form 10-K Report.

The following MD&A omits discussion of 2020 compared to 2019. Refer to Management's Discussion and Analysis of Financial Condition and Results of Operations in TDS' Annual Report on Form 10-K for the year ended December 31, 2020, filed with the SEC on February 18, 2021, for that discussion.

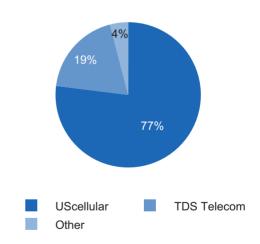

General

TDS is a diversified telecommunications company that provides high-quality communications services to approximately 6 million connections nationwide. TDS provides wireless services through its 82%-owned subsidiary, United States Cellular Corporation (UScellular). TDS also provides broadband, video and voice services through its wholly-owned subsidiaries, TDS Telecommunications LLC and TDS Broadband LLC (collectively, TDS Telecom). TDS operates entirely in the United States.

During the first quarter of 2021, TDS modified its reporting segment structure to combine its Wireline and Cable segments into a single reportable segment for TDS Telecom. TDS Telecom believes this presentation better articulates its progress and performance against its strategy, which includes a focus on overall broadband growth and future fiber deployment across its markets. This change also reflects TDS Telecom's progress in aligning its organizational, operational and support structures to leverage one cost base to better support its customers across all of its markets. Prior periods have been updated to conform to this revised presentation. See Note 19 — Business Segment Information in the Notes to Consolidated Financial Statements for additional information about TDS' segments.

The coronavirus (COVID-19) pandemic did not have a material impact on TDS' financial results in 2021. The impact of COVID-19 on TDS' future financial results is uncertain, but is not projected to have a material impact. However, there are many factors, including the severity and duration of the pandemic, as well as other direct and indirect impacts, that could negatively impact TDS.

2021 Operating Revenues by Segment

TDS Mission and Strategy

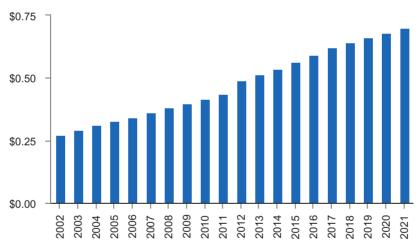

TDS' mission is to provide outstanding communications services to its customers and meet the needs of its shareholders, its people, and its communities. In pursuing this mission, TDS seeks to grow its businesses, create opportunities for its associates, support the communities it serves, and build value over the long term for its shareholders. Across all of its businesses, TDS is focused on providing exceptional customer experiences through best-in-class services and products and superior customer service. Since its founding, TDS has been committed to bringing high-quality communications services to rural and underserved communities. TDS continues to make progress on developing and enhancing its ESG program, including the publication of the first TDS ESG Report in 2021.

TDS' long-term strategy calls for the majority of its operating capital to be reinvested in its businesses to strengthen their competitive positions and financial performance, while also returning value to TDS shareholders primarily through the payment of a regular quarterly cash dividend.

In 2021, TDS continued to focus on investing in the networks that are the backbone of its commitment to provide outstanding communications services to its customers. TDS believes these investments strengthen its competitive position and improve operating performance. TDS expects to continue to execute on its strategies to build strong, competitive businesses providing high-quality, data-focused services and products.

During 2021, TDS paid regular quarterly cash dividends to common and preferred shareholders of \$80 million and \$39 million, respectively. TDS increased the dividend per Common Share paid to its investors by 3% in 2021 which marks the 47^{th} consecutive year of dividend increases and in February 2022, TDS increased its quarterly dividend per Common Share from \$0.175 to \$0.180. During 2021, TDS repurchased 402,989 Common Shares for \$8 million at an average cost per share of \$19.04. As of December 31, 2021, the maximum dollar value of TDS Common Shares that may yet be purchased under TDS' program was \$177 million. There is no assurance that TDS will continue to increase the dividend rate or pay dividends and no assurance that TDS will make any significant amount of share repurchases in the future.

Annual Dividends Per TDS Common Share

Terms Used by TDS

The following is a list of definitions of certain industry terms that are used throughout this document:

- 4G LTE fourth generation Long-Term Evolution, which is a wireless technology that enables more network capacity for more
 data per user as well as faster access to data compared to third generation (3G) technology.
- **5G** fifth generation wireless technology that helps address customers' growing demand for data services and creates opportunities for new services requiring high speed and reliability as well as low latency.
- Account represents an individual or business financially responsible for one or multiple associated connections. An account
 may include a variety of types of connections such as handsets and connected devices.
- Alternative Connect America Cost Model (A-CAM) a USF support mechanism for certain carriers, which provides revenue support through 2028. This support comes with an obligation to build defined broadband speeds to a certain number of locations.
- Auctions 105, 107 and 110 Auction 105 was an FCC auction of 3.5 GHz wireless spectrum licenses that started in July 2020 and concluded in September 2020. Auction 107 was an FCC auction of 3.7-3.98 GHz wireless spectrum licenses that started in December 2020 and concluded in February 2021. Auction 110 was an FCC auction of 3.45-3.55 GHz wireless spectrum licenses that started in October 2021 and concluded in January 2022.
- **Broadband Connections** refers to the individual customers provided high-speed internet access through various transmission technologies, including fiber, DSL, dedicated internet circuit technologies or cable modem service.
- Broadband Penetration metric which is calculated by dividing total broadband connections by total service addresses.
- Churn Rate represents the percentage of the connections that disconnect service each month. These rates represent the
 average monthly churn rate for each respective period.
- Connected Devices non-handset devices that connect directly to the UScellular network. Connected devices include
 products such as tablets, wearables, modems, and hotspots.
- Coronavirus Aid, Relief, and Economic Security (CARES) Act economic relief package signed into law on March 27, 2020 to address the public health and economic impacts of COVID-19, including a variety of tax provisions.
- DOCSIS Data Over Cable Service Interface Specification is an international telecommunications standard that permits the
 addition of high-bandwidth data transfer to an existing cable TV (CATV) system. DOCSIS 3.1 is a system specification that
 increases data transmission rates.
- **EBITDA** refers to earnings before interest, taxes, depreciation, amortization and accretion and is used in the non-GAAP metric Adjusted EBITDA throughout this document. See Supplemental Information Relating to Non-GAAP Financial Measures within this MD&A for additional information.
- Eligible Telecommunications Carrier (ETC) designation by states for providing specified services in "high cost" areas which enables participation in universal service support mechanisms.
- Expansion Markets markets utilizing fiber networks in areas where TDS does not serve as the incumbent service provider.
- Free Cash Flow non-GAAP metric defined as Cash flows from operating activities less Cash paid for additions to property, plant and equipment. See Supplemental Information Relating to Non-GAAP Financial Measures within this MD&A for additional information.
- Gross Additions represents the total number of new connections added during the period, without regard to connections
 that were terminated during that period.
- Incumbent Markets markets where TDS is positioned as the traditional local telephone or cable company.
- IPTV internet protocol television.
- Net Additions (Losses) represents the total number of new connections added during the period, net of connections that
 were terminated during that period.
- OIBDA refers to operating income before depreciation, amortization and accretion and is used in the non-GAAP metric
 Adjusted OIBDA throughout this document. See Supplemental Information Relating to Non-GAAP Financial Measures within
 this MD&A for additional information.
- Postpaid Average Revenue per Account (Postpaid ARPA) metric which is calculated by dividing total postpaid service
 revenues by the average number of postpaid accounts and by the number of months in the period.
- Postpaid Average Revenue per User (Postpaid ARPU) metric which is calculated by dividing total postpaid service
 revenues by the average number of postpaid connections and by the number of months in the period.
- Residential Revenue per Connection metric which is calculated by dividing total residential revenue by the average number of residential connections and by the number of months in the period.
- Retail Connections the sum of UScellular postpaid connections and UScellular prepaid connections.
- Service Addresses number of single residence homes, multi-dwelling units, and business locations that are capable of being connected to the TDS network, based on best available information.
- Universal Service Fund (USF) a system of telecommunications collected fees and support payments managed by the FCC intended to promote universal access to telecommunications services in the United States.
- UScellular Connections individual lines of service associated with each device activated by a customer. Connections
 include all types of devices that connect directly to the UScellular network.
- Video Connections represents the individual customers provided video services.
- **Voice Connections** refers to the individual circuits connecting a customer to TDS' central office facilities that provide voice services or the billable number of lines into a building for voice services.
- VoLTE Voice over Long-Term Evolution is a technology specification that defines the standards and procedures for delivering voice communications and related services over 4G LTE networks.

N/M - Percentage change not meaningful

Refer to individual segment discussions in this MD&A for additional details on operating revenues and expenses at the segment level.

Consists of corporate and other operations and intercompany eliminations.

² Refer to Supplemental Information Relating to Non-GAAP Financial Measures within this MD&A for a reconciliation of this measure.

³ Refer to Liquidity and Capital Resources within this MD&A for additional information on Capital expenditures.

Equity in earnings of unconsolidated entities

Equity in earnings of unconsolidated entities represents TDS' share of net income from entities in which it has a noncontrolling interest and that are accounted for using the equity method. TDS' investment in the Los Angeles SMSA Limited Partnership (LA Partnership) contributed pre-tax income of \$82 million for both 2021 and 2020. See Note 8 — Investments in Unconsolidated Entities in the Notes to Consolidated Financial Statements for additional information.

Interest expense

Interest expense increased in 2021, primarily as a result of (i) the issuance of \$500 million of 6.25% UScellular Senior Notes in August 2020 and \$500 million of 5.50% UScellular Senior Notes in both December 2020 and May 2021 and (ii) the write off of \$57 million of unamortized debt issuance costs related to Senior Notes that were redeemed in 2021. These increases were partially offset by a reduction in interest expense due to the redemptions of Senior Notes with higher interest rates. See Note 12 — Debt in the Notes to Consolidated Financial Statements for additional information.

Income tax expense

The effective tax rate on Income before income taxes was 15.1% for 2021, compared to 6.4% in 2020. The higher effective tax rate in 2021 as compared to 2020 is due primarily to the income tax benefits of the CARES Act included in the 2020 tax rate, which do not recur as benefits in the 2021 tax rate. The 2021 tax rate includes a state tax benefit due primarily to the reductions of tax accruals from expirations of state statute of limitations for prior tax years.

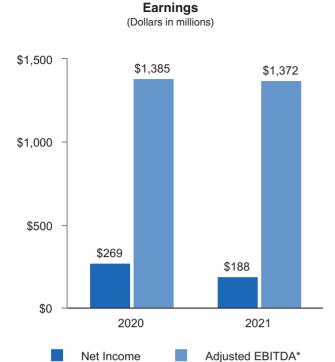

In early 2022, TDS received an income tax refund of \$125 million related to the 2020 net operating loss carryback enabled by the CARES Act.

See Note 5 — Income Taxes in the Notes to Consolidated Financial Statements for additional information.

Net income attributable to noncontrolling interests, net of tax

Year Ended December 31,	2021	2020
(Dollars in millions)		
UScellular noncontrolling public shareholders'	\$ 28	\$ 40
Noncontrolling shareholders' or partners'	4	3
Net income attributable to noncontrolling interests, net of tax	\$ 32	\$ 43

Net income attributable to noncontrolling interests, net of tax includes the noncontrolling public shareholders' share of UScellular's net income, the noncontrolling shareholders' or partners' share of certain UScellular subsidiaries' net income and other TDS noncontrolling interests.

Net income decreased in 2021 due primarily to higher operating, interest, and income tax expenses, partially offset by higher operating revenues. Adjusted EBITDA decreased in 2021 due primarily to higher operating expenses, partially offset by higher operating revenues.

^{*}Represents a non-GAAP financial measure. Refer to Supplemental Information Relating to Non-GAAP Financial Measures within this MD&A for a reconciliation of this measure.

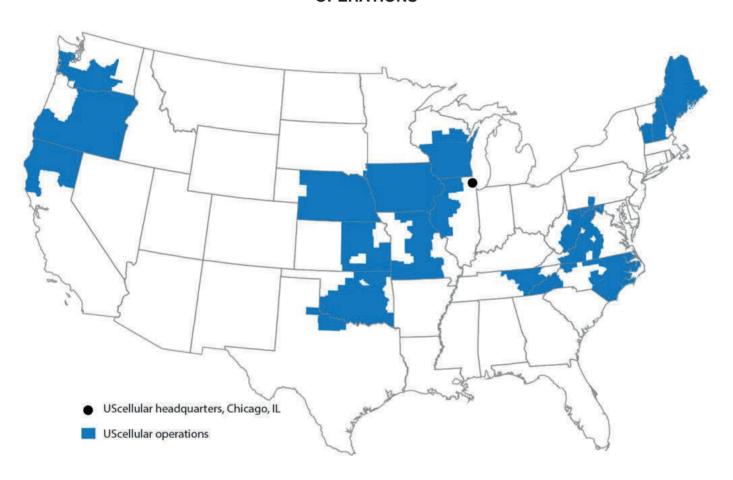

UScellular OPERATIONS

Business Overview

UScellular owns, operates, and invests in wireless markets throughout the United States. UScellular is an 82%-owned subsidiary of TDS. UScellular's strategy is to attract and retain wireless customers through a value proposition comprised of a high-quality network, outstanding customer service and competitive devices, plans, and pricing - all provided with a community focus.

OPERATIONS

- Serves customers with 5.0 million connections including 4.4 million postpaid, 0.5 million prepaid and 0.1 million reseller and other connections
- Operates in 21 states
- Employs approximately 4,800 associates
- 4,301 owned towers
- 6,898 cell sites in service

UScellular Mission and Strategy

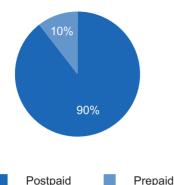

UScellular's mission is to provide exceptional wireless communication services which enhance consumers' lives, increase the competitiveness of local businesses, and improve the efficiency of government operations in the markets UScellular serves.

UScellular's strategy is to attract and retain customers through a value proposition comprising a high-quality network, outstanding customer service and competitive devices, plans and pricing - all provided with a community focus. Strategic efforts include:

- UScellular offers economical and competitively priced service plans and devices to its customers and is focused on increasing
 revenues from sales of related products such as device protection plans and from new services such as fixed wireless home
 internet. In addition, UScellular is focused on increasing revenues from prepaid plans and expanding its solutions available to
 business and government customers.
- UScellular continues to devote efforts to enhance its network capabilities, including by deploying 5G technology. 5G technology helps address customers' growing demand for data services and creates opportunities for new services requiring high speed and reliability as well as low latency. UScellular's 5G deployment is initially focused on mobility services using its low band spectrum. UScellular has acquired high-band and mid-band spectrum, deployed high-band spectrum on a limited basis, and will further deploy high-band and mid-band in the future to further enable the delivery of 5G services. UScellular has launched commercial 5G services in portions of substantially all of UScellular's markets and will continue to launch in additional areas in the coming years.
- UScellular assesses its existing wireless interests on an ongoing basis with a goal of improving the competitiveness of its
 operations and maximizing its long-term return on capital. As part of this strategy, UScellular actively seeks attractive
 opportunities to acquire wireless spectrum, including pursuant to FCC auctions.

Operational Overview — UScellular

Retail Connections Composition As of December 31, 2021

switching activity, partially offset by an increase in postpaid handset churn.

As of December 31,	2021	2020
Retail Connections – End of Period		
Postpaid	4,380,000	4,412,000
Prepaid	513,000	499,000
Total	4,893,000	4,911,000

Year Ended December 31,	2021	2020	2021 vs. 2020
Postpaid Activity and Churn			
Gross Additions			
Handsets	434,000	397,000	9 %
Connected Devices	159,000	203,000	(22)%
Total Gross Additions	593,000	600,000	(1)%
Net Additions (Losses)			
Handsets	(11,000)	(13,000)	15 %
Connected Devices	(21,000)	39,000	N/M
Total Net Additions (Losses)	(32,000)	26,000	N/M
Churn			
Handsets	0.96 %	0.89 %	
Connected Devices	2.72 %	2.58 %	
Total Churn	1.18 %	1.09 %	
N/M - Percentage change not meaningful			

Total postpaid handset net losses decreased in 2021 due primarily to an increase in gross additions as a result of higher consumer

Total postpaid connected device net additions decreased in 2021 due primarily to lower demand for internet related products as a result of a reduction in COVID-related funding vehicles, many of which are connected to government subsidies.

Macroeconomic factors, including the continuing impacts of the ongoing COVID-19 pandemic, have caused some supply chain disruption and delays, including constraints on certain devices. These supply constraints are due primarily to component availability, resulting in extended lead times and additional uncertainty, which may negatively impact UScellular in future periods.

Postpaid Revenue

Year Ended December 31,	2021		2020	2021 vs. 2020
Average Revenue Per User (ARPU)	\$ 48.0	3 \$	47.01	2%
Average Revenue Per Account (ARPA)	\$ 125.9	2 \$	122.93	2%

Postpaid ARPU and Postpaid ARPA increased in 2021, due primarily to (i) favorable plan and product offering mix, (ii) an increase in regulatory recovery revenues and (iii) an increase in device protection plan revenues. These increases were partially offset by an increase in promotional discounts.

2021 Postpaid ARPU and ARPA amounts exclude \$9 million of postpaid revenue related to an out-of-period error recorded in the third quarter. See Note 2 — Revenue Recognition in the Notes to Consolidated Financial Statements for additional information.

N/M - Percentage change not meaningful

Refer to Supplemental Information Relating to Non-GAAP Financial Measures within this MD&A for a reconciliation of this measure.

² Refer to Liquidity and Capital Resources within this MD&A for additional information on Capital expenditures.

Operating Revenues

(Dollars in millions)

Service revenues consist of:

- Retail Service Charges for voice, data and value added services and recovery of regulatory costs
- Inbound Roaming Charges to other wireless carriers whose customers use UScellular's wireless systems when roaming
- Other Service Amounts received from the Federal USF, tower rental revenues, and miscellaneous other service revenues

Equipment revenues consist of:

 Sales of wireless devices and related accessories to new and existing customers, agents, and third-party distributors

Key components of changes in the statement of operations line items were as follows:

Total operating revenues

Retail service revenues increased in 2021, primarily as a result of an increase in Postpaid ARPU as previously discussed in the Operational Overview section as well as an increase in the average number of postpaid subscribers.

Inbound roaming revenues decreased in 2021, primarily driven by lower data revenues resulting from lower usage and lower rates. UScellular expects inbound roaming revenues to continue to decline during 2022 relative to prior year levels.

Other service revenues increased in 2021, resulting from increases in tower rental revenues and miscellaneous other service revenues.

Equipment sales revenues increased in 2021, due primarily to an increase in the volume of new smartphone and accessory sales, partially offset by higher promotional activity.

In recent periods, wireless service providers have increased promotional aggressiveness to attract new customers and retain existing customers. Operating revenues and Operating income may be negatively impacted in future periods by the competitive need to continue to offer significant promotional discounts to new and existing customers.

System operations expenses

System operations expenses increased in 2021, due primarily to higher circuit costs and an increase in cell site rent expense, partially offset by a decrease in roaming expense driven by lower rates.

Cost of equipment sold

Cost of equipment sold increased in 2021, due primarily to an increase in the volume of new smartphone and accessory sales.

Selling, general and administrative expenses

Selling, general and administrative expenses decreased in 2021, due primarily to decreases in (i) bad debts expense driven by fewer non-pay customers as a result of better credit mix and improved customer payment behavior and (ii) advertising expense due to reduced media spend.

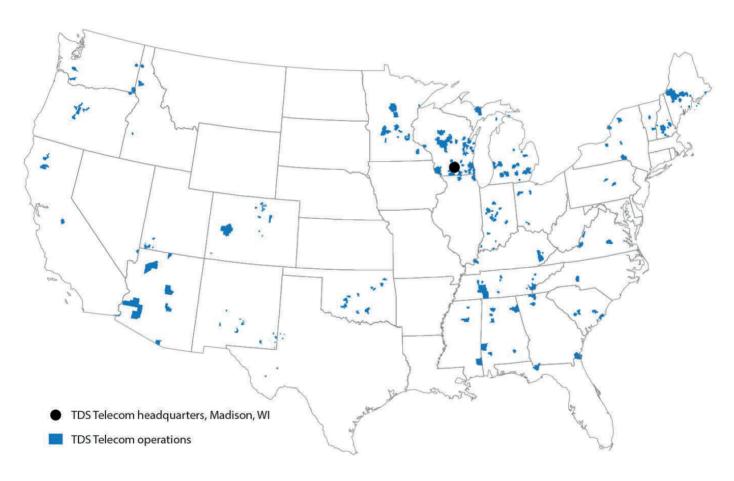

TDS TELECOM OPERATIONS

Business Overview

TDS Telecom owns, operates and invests in communications services in a mix of rural and suburban communities throughout the United States. TDS Telecom is a wholly-owned subsidiary of TDS and provides a wide range of broadband, video and voice communications services to residential, commercial and wholesale customers. TDS Telecom's strategy is to be the preferred broadband provider in the markets it serves. TDS Telecom invests in high-quality networks, services and products, with the constant focus on delivering a best-in-class customer experience.

OPERATIONS

- Serves 1.2 million connections in 32 states.
- Employs approximately 3,000 associates.

TDS Telecom Mission and Strategy

TDS Telecom's mission is to provide outstanding communications services to delight its customers, to champion economic development by investing in infrastructure, and to grow rapidly.

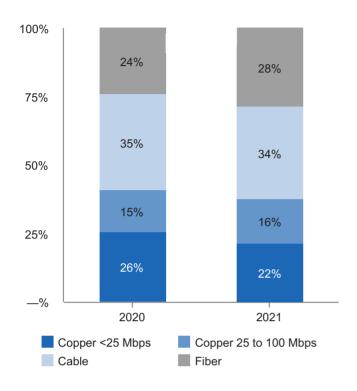

TDS Telecom's strategic efforts include:

- TDS Telecom strives to be the preferred broadband provider in its markets with the ability to provide value-added bundling with video and voice service options. TDS Telecom focuses on driving growth by investing in fiber deployment in its expansion markets and its incumbent markets that have historically utilized copper and coaxial cable technologies.
- TDS Telecom may also seek to grow its operations through the acquisition of businesses that support and complement its existing markets or by creating entirely new clusters of markets in attractive locations. Fiber builds in strategically selected locations allow TDS Telecom to target attractive, growing markets to increase its total footprint.

Operational Overview — TDS Telecom

Total Service Address Mix

As of December 31,

TDS Telecom grew its service addresses 7% from 1.3 million to 1.4 million through network expansion and now offers 1Gig service to 58% of its total footprint.

TDS Telecom serves 43% of its wireline service addresses with fiber-to-the-home as of December 31, 2021, compared to 36% a year ago.

As of December 31,	2021	2020	2021 vs. 2020
Residential connections			
Broadband			
Wireline, Incumbent	250,200	242,500	3 %
Wireline, Expansion	36,900	20,400	81 %
Cable	203,200	196,400	3 %
Total Broadband	490,300	459,300	7 %
Video	141,500	144,400	(2)%
Voice	303,700	310,800	(2)%
Total Residential Connections	935,600	914,400	2 %
Commercial connections	264,300	286,700	(8)%
Total connections	1,199,900	1,201,100	-

Numbers may not foot due to rounding.

Total connections are flat despite strong broadband connection growth due to offsetting decreases in legacy voice, video, and competitive local exchange carrier (CLEC) connections.

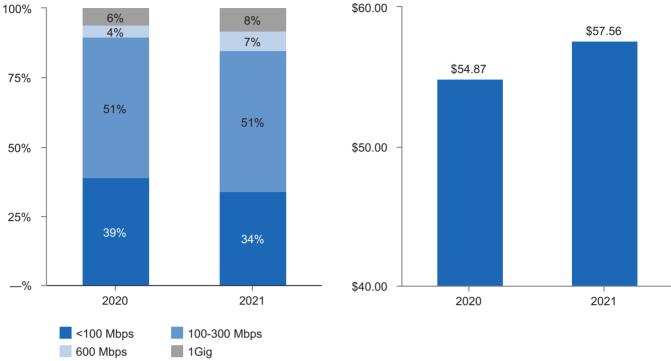

A majority of TDS Telecom's residential customers take advantage of bundling options as 62% of customers subscribe to more than one service.

Residential Broadband Connections by Speed

For the year ended December 31,

Residential broadband customers continue to choose higher speeds with 66% taking speeds of 100 Mbps or greater and 8% choosing 1Gig.

Total residential revenue per connection increased 5% for 2021, due to a higher concentration of broadband connections as well as an increase in broadband speeds and price increases.

Financial Overview — TDS Telecom

Year Ended December 31,	2021	2	2020	2021 vs. 2020
(Dollars in millions)

Operating Revenues

(Dollars in millions)

Residential revenues consist of:

- Broadband services, including security and support services
- Video services, including IPTV, traditional cable programming and satellite offerings
- Voice services

Commercial revenues consist of:

- High-speed and dedicated business internet services
- Video services
- Voice services

Wholesale revenues consist of:

- Network access services primarily to interexchange and wireless carriers for carrying data and voice traffic on TDS Telecom's networks
- Federal and state USF support, including A-CAM

Key components of changes in the statement of operations items were as follows:

Total operating revenues

Residential revenues increased for 2021 due primarily to growth in broadband connections, price increases and federal universal service charges, partially offset by a decline in voice and video connections.

Commercial revenues decreased for 2021 due primarily to declining connections in CLEC markets, partially offset by an increase in broadband connections.

Wholesale revenues decreased for 2021 due primarily to decreased access revenues and regulatory support.

Cost of services

Cost of services increased for 2021 due primarily to higher employee expenses to support current and future growth, increased video programming costs, plant and maintenance costs, partially offset by a decrease in building expenses and the cost of providing legacy services.

Selling, general and administrative

Selling, general and administrative expenses increased for 2021 due primarily to higher employee expenses to support current and future growth, project costs associated with a new customer management system, charges for federal universal service support, call center and advertising expenses in TDS Telecom's expansion markets.

Depreciation, amortization and accretion

Depreciation, amortization and accretion decreased for 2021 due primarily to certain assets becoming fully depreciated, partially offset by higher depreciation due to increased capital expenditures on new fiber assets throughout 2020 and 2021 and increased software amortization.

Liquidity and Capital Resources

Sources of Liquidity

TDS and its subsidiaries operate capital-intensive businesses. In the past, TDS' existing cash and investment balances, funds available under its revolving credit and receivables securitization agreements, funds from other financing sources, including term loans, other long-term debt, preferred share offerings, and cash flows from operating and certain investing and financing activities, including sales of assets or businesses, provided sufficient liquidity and financial flexibility for TDS to meet its normal day-to-day operating needs and debt service requirements, to finance the build-out and enhancement of markets and to fund acquisitions. There is no assurance that this will be the case in the future. See Market Risk for additional information regarding maturities of long-term debt.

TDS has incurred negative free cash flow at times in the past and this could occur in the future. However, TDS believes that existing cash and investment balances, funds available under its revolving credit, term loan and receivables securitization agreements, expected future tax refunds and expected cash flows from operating and investing activities will provide sufficient liquidity for TDS to meet its normal day-to-day operating needs and debt service requirements for the foreseeable future. TDS will continue to monitor the rapidly changing business and market conditions and plans to take appropriate actions, as necessary, to meet its liquidity needs.

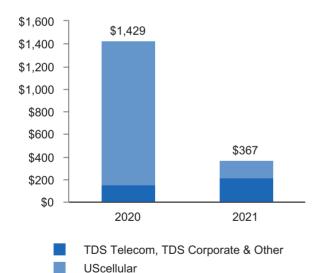

TDS may require substantial additional capital for, among other uses, funding day-to-day operating needs including working capital, acquisitions of providers of telecommunications services, wireless spectrum license acquisitions, capital expenditures, agreements to purchase goods or services, leases, debt service requirements, the repurchase of shares, the payment of dividends, or making additional investments, including new technologies and fiber builds. It may be necessary from time to time to increase the size of the existing revolving credit agreements, to put in place new credit agreements, or to obtain other forms of financing in order to fund potential expenditures.

Cash and Cash Equivalents

Cash and cash equivalents include cash and money market investments. The primary objective of TDS' Cash and cash equivalents investment activities is to preserve principal. TDS does not have direct access to UScellular cash.

Cash and Cash Equivalents

(Dollars in millions)

The majority of TDS' Cash and cash equivalents are held in bank deposit accounts and in money market funds that purchase only debt issued by the U.S. Treasury or U.S. government agencies. Refer to the Consolidated Cash Flow Analysis for additional information related to changes in Cash and cash equivalents.

In addition to Cash and cash equivalents, TDS and UScellular had undrawn borrowing capacity from existing debt facilities of \$699 million and \$950 million, respectively, at December 31, 2021. Additional financing activity subsequent to December 31, 2021 reduced the undrawn borrowing capacity for TDS and UScellular to \$549 million and \$615 million, respectively, at February 17, 2022. See the Financing section below for further details.

Financing

Revolving Credit Agreements

In July 2021, TDS entered into an amended and restated \$400 million unsecured revolving credit agreement with certain lenders and other parties and UScellular entered into an amended and restated \$300 million unsecured revolving credit agreement with certain lenders and other parties. Amounts under the amended and restated revolving credit agreements may be borrowed, repaid and reborrowed from time to time until maturity in July 2026. As of December 31, 2021, there were no outstanding borrowings under the revolving credit agreements, except for letters of credit, and TDS' and UScellular's unused borrowing capacity was \$399 million and \$300 million, respectively. In January 2022, UScellular borrowed \$75 million under its revolving credit agreement and in February 2022, repaid the entire borrowing.

Term Loan Agreements

In July 2021, TDS and UScellular amended and restated their term loan agreements to allow for additional borrowing capacity of \$300 million and \$200 million, respectively, to allow for total borrowing capacity of \$500 million for each of TDS and UScellular. The additional borrowing capacity may be drawn in one or more advances by the one-year anniversary of the date of the agreement; amounts not drawn by that time will cease to be available. The maturity date for the existing borrowings is in July 2028 and for any additional borrowings is in July 2031. As of December 31, 2021, TDS' and UScellular's outstanding borrowings under the term loan agreements were \$200 million and \$299 million, respectively, and TDS' and UScellular's unused borrowing capacity was \$300 million and \$200 million, respectively. In January 2022, TDS borrowed \$150 million and UScellular borrowed \$100 million under the term loan agreements.

In December 2021, UScellular entered into an additional \$300 million term loan agreement. The agreement may be drawn in one or more advances by the three-month anniversary of the date of the agreement; amounts not drawn by that time will cease to be available. The maturity date for the agreement is in July 2026. As of December 31, 2021, there were no outstanding borrowings under the term loan agreement and the unused borrowing capacity was \$300 million. In February 2022, UScellular borrowed \$225 million under the term loan agreement.

Export Credit Financing Agreement

In December 2021, UScellular entered into a \$150 million term loan credit facility with Export Development Canada to finance (or refinance) equipment imported from Canada, including equipment purchased prior to entering the term loan credit facility agreement. The agreement may be drawn in one or more advances by the three-month anniversary of the date of the agreement; amounts not drawn by that time will cease to be available. The maturity date of the agreement is the five-year anniversary of the first borrowing, which is in January 2027. As of December 31, 2021, there were no outstanding borrowings under the credit facility and the unused borrowing capacity was \$150 million. In January 2022, UScellular borrowed \$150 million under the agreement.

Receivables Securitization Agreement

UScellular, through its subsidiaries, has a receivables securitization agreement to permit securitized borrowings using its equipment installment plan receivables. In June 2021, UScellular increased the borrowing capacity under the receivables securitization agreement to \$450 million. Amounts under the receivables securitization agreement may be borrowed, repaid and reborrowed from time to time until December 2022. Unless the agreement is amended to extend the maturity date, repayments based on receivable collections commence in January 2023. As of December 31, 2021, UScellular has borrowed the full amount available under the agreement of \$450 million.

Repurchase Agreement

In January 2022, UScellular, through a subsidiary (the repo subsidiary), entered into a repurchase agreement to borrow up to \$200 million, subject to the availability of eligible equipment installment plan receivables and the agreement of the lender. The transaction is accounted for as a one-month secured borrowing. The expiration date of the repurchase agreement is in January 2023. In February 2022, the repo subsidiary borrowed \$60 million under the repurchase agreement.

Financial Covenants

The TDS and UScellular revolving credit agreements, senior term loan agreements and the UScellular receivables securitization and export credit financing agreements require TDS or UScellular, as applicable, to comply with certain affirmative and negative covenants, which include certain financial covenants. In particular, under these agreements, TDS and UScellular are required to maintain the Consolidated Interest Coverage Ratio at a level not lower than 3.00 to 1.00 as of the end of any fiscal quarter. TDS and UScellular also were required to maintain the Consolidated Leverage Ratio at a level not to exceed 3.75 to 1.00 as of the end of any fiscal quarter. TDS and UScellular believe they were in compliance as of December 31, 2021 with all such financial covenants.

Other Long-Term Financing

In August 2020, UScellular issued \$500 million of 6.25% Senior Notes due in 2069 and in December 2020, UScellular issued \$500 million of 5.5% Senior Notes due in March 2070. The proceeds from both issuances were for general corporate purposes, including but not limited to, the purchase of additional wireless spectrum licenses acquired in Auction 107, funding of capital expenditures, including in connection with 5G buildout projects and retirement of existing debt.

In March 2021, TDS issued 16,800 shares of 6.625% Series UU Cumulative Redeemable Perpetual Preferred Stock (Preferred Shares) for \$25,000 per Preferred Share, for total gross proceeds of \$420 million. The Preferred Shares were issued to a depositary to facilitate the issuance of 16,800,000 depositary shares, each representing 1/1,000th of a Preferred Share. TDS received net cash proceeds of \$406 million after payment of issuance costs of \$14 million. The proceeds were for general corporate purposes, including but not limited to, the funding of capital expenditures associated with TDS Telecom's fiber program and retirement of existing debt. See Note 17 — Shareholders' Equity in the Notes to Consolidated Financial Statements for additional information related to TDS' Preferred Shares.

In May 2021, TDS redeemed its outstanding \$225 million of 6.875% Senior Notes due 2059 and \$300 million of 7.0% Senior Notes due 2060, and UScellular redeemed its outstanding \$275 million of 7.25% Senior Notes due 2063. At time of redemption, \$26 million of interest expense was recorded related to unamortized debt issuance costs for these notes. The notes were redeemed at a price of 100% of the principal amount, including accrued and unpaid interest to the redemption date.

In May 2021, UScellular issued \$500 million of 5.5% Senior Notes due in June 2070. The proceeds from the issuance were used for general corporate purposes, including but not limited to, the repayment of other debt, the purchase of additional spectrum and the funding of capital expenditures, including in connection with 5G buildout projects.

In June 2021, UScellular redeemed its outstanding \$300 million of 7.25% Senior Notes due 2064. At time of redemption, \$10 million of interest expense was recorded related to unamortized debt issuance costs for these notes. The notes were redeemed at a price of 100% of the principal amount, including accrued and unpaid interest to the redemption date.

In August 2021, TDS issued 27,600 shares of 6.000% Series VV Preferred Shares for \$25,000 per Preferred Share, for total gross proceeds of \$690 million. The Preferred Shares were issued to a depositary to facilitate the issuance of 27,600,000 depositary shares, each representing 1/1,000th of a Preferred Share. TDS received net cash proceeds of \$668 million after payment of issuance costs of \$22 million. The proceeds were for general corporate purposes, including but not limited to, the funding of capital expenditures associated with TDS Telecom's fiber program and retirement of existing debt. See Note 17 — Shareholders' Equity in the Notes to Consolidated Financial Statements for additional information related to TDS' Preferred Shares.

In September 2021, TDS redeemed its outstanding \$116 million of 6.625% Senior Notes due 2045 and UScellular redeemed its outstanding \$342 million of 6.95% Senior Notes due 2060. At time of redemption, \$14 million of interest expense was recorded related to unamortized debt issuance costs related to the notes. The notes were redeemed at a price of 100% of the principal amount, including accrued and unpaid interest to the redemption date.

In October 2021, TDS redeemed its outstanding \$195 million of 5.875% Senior Notes due 2061. At time of redemption, \$7 million of interest expense was recorded related to unamortized debt issuance costs related to the notes. The notes were redeemed at a price of 100% of the principal amount, including accrued and unpaid interest to the redemption date.

TDS and UScellular each have an effective shelf registration statement on Form S-3 to issue senior or subordinated debt securities, preferred shares and depositary shares. The proceeds from any such issuances may be used for general corporate purposes, including the possible reduction of other short-term or long-term debt; spectrum purchases; capital expenditures; acquisition, construction and development programs; working capital; additional investments in subsidiaries; or the repurchase of shares. The TDS shelf registration permits TDS to issue at any time and from time to time senior or subordinated debt securities, preferred shares and depositary shares in one or more offerings in an indeterminate amount. The UScellular shelf registration statement permits UScellular to issue at any time and from time to time senior or subordinated debt securities, preferred shares and depositary shares in one or more offerings, up to the amount registered, which is currently \$1 billion. The ability of TDS or UScellular to complete an offering pursuant to such shelf registration statements is subject to market conditions and other factors at the time.

TDS believes that it and/or its subsidiaries were in compliance as of December 31, 2021, with all covenants and other requirements set forth in the TDS and UScellular long-term debt indentures. TDS and UScellular have not failed to make nor do they expect to fail to make any scheduled payment of principal or interest under such indentures.

Refer to Market Risk — Long-Term Debt for additional information regarding required principal payments and the weighted average interest rates related to TDS' Long-term debt.

TDS and UScellular, at their discretion, may from time to time seek to retire or purchase their outstanding debt through cash purchases and/or exchanges for other securities, in open market purchases, privately negotiated transactions, tender offers, exchange offers or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, liquidity requirements, contractual restrictions and other factors. The amounts involved may be material.

See Note 12 — Debt in the Notes to Consolidated Financial Statements for additional information regarding the revolving credit agreements, senior term loan agreements, UScellular's receivables securitization and export credit financing agreements, UScellular's Senior Notes and other long-term financing.

Credit Ratings

In certain circumstances, TDS' and UScellular's interest cost on their various agreements may be subject to increase if their current credit ratings from nationally recognized credit rating agencies are lowered, and may be subject to decrease if the ratings are raised. The agreements do not cease to be available nor do the maturity dates accelerate solely as a result of a downgrade in TDS' or UScellular's credit rating. However, downgrades in TDS' or UScellular's credit rating could adversely affect their ability to renew the agreements or obtain access to other credit agreements in the future.

TDS and UScellular are rated as sub-investment grade issuers. The TDS and UScellular issuer credit ratings as of December 31, 2021, and the dates such ratings were re-affirmed were as follows:

Rating Agency	Rating	Outlook
Moody's (re-affirmed August 2021)	Ba1	stable outlook
Standard & Poor's (re-affirmed October 2021)	BB	stable outlook
Fitch Ratings (re-affirmed February 2021)	BB+	stable outlook

Capital Requirements

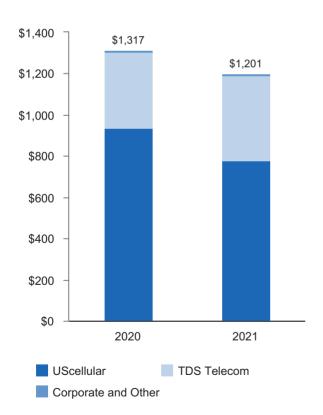

The discussion below is intended to highlight some of the significant cash outlays expected during 2022 and beyond and to highlight the spending incurred in current and prior years for these items. This discussion does not include cash required to fund normal operations, and is not a comprehensive list of capital requirements. Significant cash requirements that are not routine or in the normal course of business could arise from time to time.

Capital Expenditures

TDS makes substantial investments to acquire, construct and upgrade telecommunications networks and facilities to remain competitive and as a basis for creating long-term value for shareholders. In recent years, rapid changes in technology and new opportunities (such as 5G and VoLTE technology for UScellular and fiber for TDS Telecom) have required substantial investments in potentially revenue-enhancing and cost-saving upgrades to TDS' networks to remain competitive; this is expected to continue in 2022 and future years with the continued deployment of 5G technology for UScellular, and the continued deployment of fiber for TDS Telecom.

Capital expenditures (i.e., additions to property, plant and equipment and system development expenditures; excludes wireless spectrum license additions), which include the effects of accruals and capitalized interest, in 2021 and 2020 were as follows:

Capital Expenditures (Dollars in millions)

UScellular's capital expenditures in 2021 were \$780 million compared to \$940 million in 2020. In 2021, UScellular's capital expenditures were used for the following purposes:

- Continue network modernization and 5G deployment:
- Enhance and maintain UScellular's network coverage, including providing additional speed and capacity to accommodate increased data usage by current customers; and
- Invest in information technology to support existing and new services and products.

Capital expenditures for 2022 are expected to be between \$700 million and \$800 million. These expenditures are expected to be used for similar purposes as those listed above.

TDS Telecom's capital expenditures in 2021 were \$411 million compared to \$368 million in 2020. In 2021, these capital expenditures were used for the following purposes:

- Continue to expand fiber deployment in incumbent and expansion markets;
- Maintain and enhance existing infrastructure including build-out requirements to meet state broadband and A-CAM programs;
- Upgrade broadband capacity and speeds; and
- Support success-based spending for broadband and video growth.

Capital expenditures for 2022 are expected to be between \$500 million and \$550 million. These expenditures are expected to be used for similar purposes as those listed above.

Macroeconomic factors, including the continuing impacts of the ongoing COVID-19 pandemic, have caused some supply chain disruption and delays for both UScellular and TDS Telecom. These factors may impact the acquisition of certain products and materials and contribute to internal and external labor shortages.

TDS intends to finance its capital expenditures for 2022 using primarily Cash flows from operating activities, existing cash balances and, as required, additional debt financing from its revolving credit, term loan and receivables securitization agreements and/or other forms of financing.

Acquisitions, Divestitures and Exchanges

TDS may be engaged from time to time in negotiations (subject to all applicable regulations) relating to the acquisition, divestiture or exchange of companies, properties, wireless spectrum licenses (including pursuant to FCC auctions) and other possible businesses. In general, TDS may not disclose such transactions until there is a definitive agreement.

In January and February 2022, UScellular paid \$560 million for wireless spectrum licenses won in Auction 110. This amount was paid using the funds available under UScellular's various financing agreements as described above.

Other Obligations

TDS will require capital for future spending on existing contractual obligations, including long-term debt obligations; dividend obligations; lease commitments; commitments for device purchases, network facilities and transport services; agreements for software licensing; long-term marketing programs; commitments for wireless spectrum licenses acquired through FCC auctions; and other agreements to purchase goods or services.

Variable Interest Entities

TDS consolidates certain "variable interest entities" as defined under GAAP. See Note 15 — Variable Interest Entities in the Notes to Consolidated Financial Statements for additional information related to these variable interest entities. TDS may elect to make additional capital contributions and/or advances to these variable interest entities in future periods in order to fund their operations.

Common Share Repurchase Programs

During 2021, TDS repurchased 402,989 Common Shares for \$8 million at an average cost per share of \$19.04. As of December 31, 2021, the maximum dollar value of TDS Common Shares that may yet be purchased under TDS' program was \$177 million.

During 2021, UScellular repurchased 989,988 Common Shares for \$31 million at an average cost per share of \$31.37. At December 31, 2021, the total cumulative amount of UScellular Common Shares authorized to be repurchased is 3,517,000.

Depending on its future financial performance, construction, development and acquisition programs, and available sources of financing, TDS and UScellular may not have sufficient liquidity or capital resources to make share repurchases. Therefore, there is no assurance that TDS and UScellular will make any share repurchases in the future.

For additional information related to the current TDS and UScellular repurchase authorizations, see Note 17 — Shareholders' Equity in the Notes to Consolidated Financial Statements.

Dividends

TDS paid quarterly dividends per outstanding Common Share of \$0.175 in 2021 and \$0.170 in 2020. TDS increased the dividend per share to \$0.180 in the first quarter of 2022. TDS has no current plans to change its policy of paying dividends.

TDS paid quarterly dividends per outstanding Series UU depositary share (each representing 1/1,000th of a Preferred Share) of \$0.552 in June 2021, \$0.414 in September 2021 and \$0.414 in December 2021.

TDS paid quarterly dividends per outstanding Series VV depositary share (each representing 1/1,000th of a Preferred Share) of \$0.183 in September 2021 and \$0.375 in December 2021.

Consolidated Cash Flow Analysis

TDS operates a capital-intensive business. TDS makes substantial investments to acquire wireless spectrum licenses and properties and to construct and upgrade communications networks and facilities as a basis for creating long-term value for shareholders. In recent years, rapid changes in technology and new opportunities have required substantial investments in potentially revenue-enhancing and cost-saving upgrades to TDS' networks. Cash flows may fluctuate from quarter to quarter and year to year due to seasonality, timing and other factors. The following discussion summarizes TDS' cash flow activities in 2021 and 2020.

2021 Commentary

TDS' Cash, cash equivalents and restricted cash decreased \$1,038 million. Net cash provided by operating activities was \$1,103 million due to net income of \$188 million adjusted for non-cash items of \$959 million and distributions received from unconsolidated entities of \$180 million, including \$76 million in distributions from the LA Partnership. This was partially offset by changes in working capital items which decreased net cash by \$224 million. The working capital changes were primarily influenced by an increase in customer and agent receivables, a decrease to accrued taxes and the timing of vendor payments.

Cash flows used for investing activities were \$2,462 million. Cash paid for additions to property, plant and equipment totaled \$1,131 million. Cash payments for wireless spectrum licenses, including advance payments, were \$1,322 million.

Cash flows provided by financing activities were \$321 million, reflecting the issuance of \$1,110 million of TDS Preferred Shares, the issuance of \$500 million of 5.5% UScellular Senior Notes, \$625 million borrowed under the UScellular receivables securitization agreement, \$217 million borrowed under the UScellular term loan, \$125 million borrowed under the TDS revolving credit agreement, and \$76 million borrowed under the TDS term loan. These were partially offset by the redemption of \$836 million of TDS Senior Notes, \$917 million of UScellular Senior Notes, a \$200 million repayment on the receivables securitization agreement, a \$125 million repayment on the TDS revolving credit agreement, the payment of dividends totaling \$119 million, the payment of debt and equity issuance costs of \$62 million, and the repurchase of TDS and UScellular Common Shares.

2020 Commentary

TDS' Cash, cash equivalents and restricted cash increased \$978 million. Net cash provided by operating activities was \$1,532 million due primarily to net income of \$269 million adjusted for non-cash items of \$1,071 million and distributions received from unconsolidated entities of \$189 million, including \$89 million in distributions from the LA Partnership.

Cash flows used for investing activities were \$1,511 million. Cash paid for additions to property, plant and equipment totaled \$1,338 million. Cash payments for wireless spectrum licenses, including advance payments, were \$201 million.

Cash flows provided by financing activities were \$957 million, reflecting the issuance of \$500 million of 5.50% UScellular Senior Notes, \$500 million of 6.25% UScellular Senior Notes, \$125 million borrowed under the UScellular receivables securitization agreement, and \$125 million borrowed under the TDS term loan. These were partially offset by a \$100 million repayment on the UScellular receivables securitization agreement, the payment of dividends totaling \$78 million, the payment of debt issuance costs of \$41 million, and the repurchase of TDS and UScellular Common Shares.

Consolidated Balance Sheet Analysis

The following discussion addresses certain captions in the consolidated balance sheet and changes therein. This discussion is intended to highlight the significant changes and is not intended to fully reconcile the changes. Changes in financial condition during 2021 were as follows:

Licenses

Licenses increased \$1,459 million due primarily to wireless spectrum licenses acquired through Auction 107. See Note 7 — Intangible Assets in the Notes to Consolidated Financial Statements for additional information.

Customer deposits and deferred revenues

Customer deposits and deferred revenues increased \$43 million due primarily to an increase in contract liabilities resulting from higher promotional activity in the current year.

Other deferred liabilities and credits

Other deferred liabilities and credits increased \$218 million due primarily to relocation and acceleration fees related to wireless spectrum licenses acquired through Auction 107 and an increase in asset retirement obligations.

Long-term debt, net

The following table presents the components of the \$496 million decrease in Long-term debt, net:

		rm debt, net
(Dollars in millions)		
Balance at December 31, 2020	\$	3,424
Borrowings under Revolving Credit Agreements		125
Borrowings under Term Loan Agreements		293
Borrowings under Receivables Securitization Agreement		625
Issuance of Senior Notes, net of debt issuance costs		484
Repayments under Revolving Credit Agreements		(125)
Repayments under Receivables Securitization Agreement		(200)
Redemptions under Term Loan Agreements		(2)
Redemptions of Senior Notes		(1,753)

Preferred Shares

Preferred Shares increased \$1,074 million due to the issuance of \$1,110 million of TDS Preferred Shares, net of issuance costs.

Application of Critical Accounting Policies and Estimates

TDS prepares its consolidated financial statements in accordance with GAAP. TDS' significant accounting policies are discussed in detail in Note 1 — Summary of Significant Accounting Policies, Note 2 — Revenue Recognition and Note 10 — Leases in the Notes to Consolidated Financial Statements.

Management believes the application of the following critical accounting policies and the estimates required by such application reflect its most significant judgments and estimates used in the preparation of TDS' consolidated financial statements.

Intangible Asset Impairment

Licenses and Goodwill represent a significant component of TDS' consolidated assets. These assets are considered to be indefinite-lived assets and, therefore, are not amortized but rather are tested at least annually for impairment. TDS performs annual impairment testing of Licenses and Goodwill as of November 1 of each year, or more frequently if triggering events occur. Significant negative events, such as changes in any of the assumptions described below or decreases in forecasted cash flows, could result in an impairment in future periods. Licenses are tested for impairment at the level of reporting referred to as a unit of accounting. Goodwill is tested for impairment at the level of reporting referred to as a reporting unit.

See Note 7 — Intangible Assets in the Notes to Consolidated Financial Statements for information related to Licenses and Goodwill activity in 2021 and 2020.

Wireless Spectrum Licenses - UScellular

For purposes of its impairment testing, UScellular separates its FCC wireless spectrum licenses into eight units of accounting, which consist of one unit of accounting for developed operating market wireless spectrum licenses (built wireless spectrum licenses) and seven geographic non-operating market wireless spectrum licenses (unbuilt wireless spectrum licenses).

A qualitative assessment of the license values was completed as of November 1, 2021 and November 1, 2020. The qualitative assessment considered several factors, including analyst estimates of wireless spectrum license values which contemplated recent spectrum auction results, recent UScellular and other market participant transactions and other industry and market factors. Based on these assessments, UScellular concluded that it was more likely than not that the fair value of the wireless spectrum licenses in each unit of accounting exceeded their respective carrying values. Therefore, no quantitative impairment evaluation was completed.

Goodwill - TDS Telecom

TDS Telecom has recorded Goodwill as a result of past business acquisitions. For purposes of the 2021 Goodwill impairment test, TDS Telecom had one reporting unit as a result of the reporting segment structure combination that occurred in the first quarter of 2021, and for the 2020 test, TDS Telecom had two reporting units: Wireline and Cable.

A qualitative assessment of the reporting unit was completed as of November 1, 2021. The qualitative assessment, which analyzed company, industry and economic trends, concluded that it was more likely than not that the fair value of this reporting unit exceeded its carrying value, and accordingly, no quantitative impairment evaluation was completed and no Goodwill impairment was recorded.

Income Taxes

The amounts of income tax assets and liabilities, the related income tax provision and the amount of unrecognized tax benefits are critical accounting estimates because such amounts are significant to TDS' financial condition and results of operations.

The preparation of the consolidated financial statements requires TDS to calculate a provision for income taxes. This process involves estimating the actual current income tax liability together with assessing temporary differences resulting from the different treatment of items for tax purposes. These temporary differences result in deferred income tax assets and liabilities which are included on a net basis in TDS' Consolidated Balance Sheet. TDS must then assess the likelihood that deferred income tax assets will be realized based on future taxable income and, to the extent management believes that realization is not likely, establish a valuation allowance. Management's judgment is required in determining the provision for income taxes, deferred income tax assets and liabilities and any valuation allowance that is established for deferred income tax assets.

TDS recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on management's judgment as to the possible outcome that has a greater than 50% cumulative likelihood of being realized upon ultimate resolution.

See Note 5 — Income Taxes in the Notes to Consolidated Financial Statements for additional information.

Regulatory Matters

5G Fund

On October 27, 2020, the FCC adopted rules creating the 5G Fund for Rural America, which will distribute up to \$9 billion over ten years to bring 5G wireless broadband connectivity to rural America. The 5G Fund will be implemented through a two-phase competitive process, using multi-round auctions to award support. The winning bidders will be required to meet certain minimum speed requirements and interim and final deployment milestones. The order provides that the 5G Fund be in lieu of the previously proposed fund (the Phase II Connect America Mobility Fund) for the development of 4G LTE. The order also provides that over time a growing percentage of the legacy support a carrier receives must be used for 5G deployment.

UScellular cannot predict at this time when the 5G fund auction will occur, when the phase down period for its existing legacy support from the Federal USF will commence, or whether the 5G fund auction will provide opportunities to UScellular to offset any loss in existing support.

Spectrum Auctions

On March 2, 2020, the FCC released a Public Notice establishing procedures for an auction offering wireless spectrum licenses in the 3.5 GHz band (Auction 105). On September 2, 2020, the FCC announced by way of public notice that UScellular was the provisional winning bidder for 243 wireless spectrum licenses for a purchase price of \$14 million, of which up to \$5 million relates to licenses which are subject to the FCC's spectrum aggregation and ownership attribution rules for Auction 105. None of the wireless spectrum licenses have been granted yet by the FCC.

On August 7, 2020, the FCC released a Public Notice establishing procedures for an auction offering wireless spectrum licenses in the 3.7-3.98 GHz bands (Auction 107). On February 24, 2021, the FCC announced by way of public notice that UScellular was the provisional winning bidder for 254 wireless spectrum licenses for \$1,283 million. UScellular paid \$30 million of this amount in 2020 and the remainder in March 2021. The wireless spectrum licenses from Auction 107 were granted by the FCC in July 2021. Additionally, UScellular expects to be obligated to pay approximately \$181 million in total from 2021 through 2024 related to relocation costs and accelerated relocation incentive payments. Such additional costs were accrued and capitalized at the time the licenses were granted. In October 2021, UScellular paid \$36 million related to the additional costs. The spectrum must be cleared by incumbent providers before UScellular can access it. UScellular does not expect to have access to this spectrum until late 2023. Combined with prior mid-band purchases in Auction 105, UScellular will have mid-band spectrum in nearly all of its operating footprint, covering approximately 95% of subscribers.

On June 9, 2021, the FCC released a Public Notice establishing procedures for an auction offering wireless spectrum licenses in the 3.45-3.55 GHz band (Auction 110). On January 14, 2022, the FCC announced by way of public notice that UScellular was the provisional winning bidder for 380 wireless spectrum licenses for \$580 million. UScellular paid \$20 million of this amount in 2021 and the remainder in January and February 2022. The wireless spectrum licenses from Auction 110 are expected to be granted by the FCC in 2022.

Private Securities Litigation Reform Act of 1995 Safe Harbor Cautionary Statement

This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Annual Report contain statements that are not based on historical facts and represent forward-looking statements, as this term is defined in the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, that address activities, events or developments that TDS intends, expects, projects, believes, estimates, plans or anticipates will or may occur in the future are forwardlooking statements. The words "believes," "anticipates," "estimates," "expects," "plans," "intends," "projects" and similar expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be significantly different from any future results, events or developments expressed or implied by such forward-looking statements. Such risks, uncertainties and other factors include, but are not limited to, those set forth below. See "Risk Factors" in TDS' Annual Report on Form 10-K for the year ended December 31, 2021, for a further discussion of these risks. Each of the following risks could have a material adverse effect on TDS' business, financial condition or results of operations. However, such factors are not necessarily all of the important factors that could cause actual results, performance or achievements to differ materially from those expressed in, or implied by, the forward-looking statements contained in this document. Other unknown or unpredictable factors also could have material adverse effects on future results, performance or achievements. TDS undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. Readers should evaluate any statements in light of these important factors.

Operational Risk Factors

- Intense competition involving products, services, pricing, promotions and network speed and technologies could adversely
 affect TDS' revenues or increase its costs to compete.
- Changes in roaming practices or other factors could cause TDS' roaming revenues to decline from current levels, roaming
 expenses to increase from current levels and/or impact TDS' ability to service its customers in geographic areas where TDS
 does not have its own network, which could have an adverse effect on TDS' business, financial condition or results of
 operations.
- A failure by TDS to obtain access to adequate radio spectrum to meet current or anticipated future needs and/or to
 accurately predict future needs for radio spectrum could have an adverse effect on TDS' business, financial condition or
 results of operations.
- An inability to attract people of outstanding talent throughout all levels of the organization, to develop their potential through
 education and assignments, and to retain them by keeping them engaged, challenged and properly rewarded could have an
 adverse effect on TDS' business, financial condition or results of operations.
- TDS' smaller scale relative to larger competitors that may have greater financial and other resources than TDS could cause TDS to be unable to compete successfully, which could adversely affect its business, financial condition or results of operations.
- Changes in various business factors, including changes in demand, consumer preferences and perceptions, price competition, churn from customer switching activity and other factors, could have an adverse effect on TDS' business, financial condition or results of operations.
- Advances or changes in technology could render certain technologies used by TDS obsolete, could put TDS at a competitive disadvantage, could reduce TDS' revenues or could increase its costs of doing business.
- Complexities associated with deploying new technologies present substantial risk and TDS' investments in unproven technologies may not produce the benefits that TDS expects.
- Costs, integration problems or other factors associated with acquisitions, divestitures or exchanges of properties or wireless spectrum licenses and/or expansion of TDS' businesses could have an adverse effect on TDS' business, financial condition or results of operations.
- A failure by TDS to complete significant network construction and systems implementation activities as part of its plans to improve the quality, coverage, capabilities and capacity of its network, support and other systems and infrastructure could have an adverse effect on its operations.
- Difficulties involving third parties with which TDS does business, including changes in TDS' relationships with or financial or
 operational difficulties, including supply chain disruptions, of key suppliers or independent agents and third party national
 retailers who market TDS' services, could adversely affect TDS' business, financial condition or results of operations.
- A failure by TDS to maintain flexible and capable telecommunication networks or information technologies, or a material disruption thereof, could have an adverse effect on TDS' business, financial condition or results of operations.

Financial Risk Factors

- Uncertainty in TDS' future cash flow and liquidity or the inability to access capital, deterioration in the capital markets, changes in interest rates, other changes in TDS' performance or market conditions, changes in TDS' credit ratings or other factors could limit or restrict the availability of financing on terms and prices acceptable to TDS, which could require TDS to reduce its construction, development or acquisition programs, reduce the amount of wireless spectrum licenses acquired, and/or reduce or cease share repurchases and/or the payment of dividends.
- TDS has a significant amount of indebtedness which could adversely affect its financial performance and in turn adversely affect its ability to make payments on its indebtedness, comply with terms of debt covenants and incur additional debt.
- TDS' assets and revenue are concentrated primarily in the U.S. telecommunications industry. Consequently, its operating results may fluctuate based on factors related primarily to conditions in this industry.
- TDS has significant investments in entities that it does not control. Losses in the value of such investments could have an adverse effect on TDS' financial condition or results of operations.

Regulatory, Legal and Governance Risk Factors

- Failure by TDS to timely or fully comply with any existing applicable legislative and/or regulatory requirements or changes thereto could adversely affect TDS' business, financial condition or results of operations.
- TDS receives significant regulatory support, and is also subject to numerous surcharges and fees from federal, state and
 local governments the applicability and the amount of the support and fees are subject to great uncertainty, including the
 ability to pass through certain fees to customers, and this uncertainty could have an adverse effect on TDS' business,
 financial condition or results of operations.
- Settlements, judgments, restraints on its current or future manner of doing business and/or legal costs resulting from pending and future litigation could have an adverse effect on TDS' business, financial condition or results of operations.
- The possible development of adverse precedent in litigation or conclusions in professional studies to the effect that radio frequency emissions from wireless devices and/or cell sites cause harmful health consequences, including cancer or tumors, or may interfere with various electronic medical devices or frequencies used by other industries, could have an adverse effect on TDS' wireless business, financial condition or results of operations.
- Claims of infringement of intellectual property and proprietary rights of others, primarily involving patent infringement claims, could prevent TDS from using necessary technology to provide products or services or subject TDS to expensive intellectual property litigation or monetary penalties, which could have an adverse effect on TDS' business, financial condition or results of operations.
- Certain matters, such as control by the TDS Voting Trust and provisions in the TDS Restated Certificate of Incorporation, may serve to discourage or make more difficult a change in control of TDS or have other consequences.

General Risk Factors

- TDS has experienced, and in the future expects to experience, cyber-attacks or other breaches of network or information technology security of varying degrees on a regular basis, which could have an adverse effect on TDS' business, financial condition or results of operations.
- Disruption in credit or other financial markets, a deterioration of U.S. or global economic conditions or other events could, among other things, impede TDS' access to or increase the cost of financing its operating and investment activities and/or result in reduced revenues and lower operating income and cash flows, which would have an adverse effect on TDS' business, financial condition or results of operations.
- The impact of public health emergencies, such as the COVID-19 pandemic, on TDS' business is uncertain, but depending on duration and severity could have a material adverse effect on TDS' business, financial condition or results of operations.

Market Risk

Long-Term Debt

As of December 31, 2021, the majority of TDS' long-term debt was in the form of fixed-rate notes with remaining maturities ranging up to 49 years. TDS also holds variable-rate debt. Fluctuations in market interest rates can lead to fluctuations in the fair value of fixed-rate notes and interest paid on variable-rate debt.

The following table presents the scheduled principal payments on long-term debt, lease obligations and the related weighted average interest rates by maturity dates at December 31, 2021:

	Pr	Principal Payments Due by Period				
	Long-Term Debt Obligations ¹		Weighted-Avg. Interest Rates on Long-Term Debt Obligations ²			
(Dollars in millions)						
2022	\$	6	2.4 %			
2023		6	2.4 %			
2024		5	2.4 %			
2025		5	2.4 %			
2026		5	2.4 %			
Thereafter		2,523	5.3 %			
Total ³	\$	2,550	5.2 %			

- The total long-term debt obligation differs from Long-term debt in the Consolidated Balance Sheet due to unamortized debt issuance costs on all non-revolving debt instruments and unamortized discounts related to the UScellular's 6.7% Senior Notes. See Note 12 Debt in the Notes to Consolidated Financial Statements for additional information.
- Represents the weighted average stated interest rates at December 31, 2021, for debt maturing in the respective periods.
- Excludes \$450 million of outstanding borrowings under the receivables securitization agreement. If the maturity date of the facility is not extended, principal repayments begin in January 2023. Principal repayments are not scheduled but are instead based on actual receivable collections. UScellular intends to extend the maturity date of the facility.

Fair Value of Long-Term Debt

At December 31, 2021 and 2020, the estimated fair value of long-term debt obligations, excluding lease obligations, the current portion of such long-term debt and debt financing costs, was \$3,197 million and \$3,746 million, respectively, and the book value was \$2,979 million and \$3,518 million, respectively. See Note 3 — Fair Value Measurements in the Notes to Consolidated Financial Statements for additional information.

Other Market Risk Sensitive Instruments

The substantial majority of TDS' other market risk sensitive instruments (as defined in Item 305 of SEC Regulation S-K) are short-term, including Cash and cash equivalents. Accordingly, TDS believes that a significant change in interest rates would not have a material effect on such other market risk sensitive instruments.

Supplemental Information Relating to Non-GAAP Financial Measures

TDS sometimes uses information derived from consolidated financial information but not presented in its financial statements prepared in accordance with GAAP to evaluate the performance of its business. Certain of these measures are considered "non-GAAP financial measures" under U.S. Securities and Exchange Commission Rules. Specifically, TDS has referred to the following measures in this Form 10-K Report:

- EBITDA
- Adjusted EBITDA
- Adjusted OIBDA
- Free cash flow

Following are explanations of each of these measures:

EBITDA, Adjusted EBITDA and Adjusted OIBDA

EBITDA, Adjusted EBITDA and Adjusted OIBDA are defined as net income adjusted for the items set forth in the reconciliation below. EBITDA, Adjusted EBITDA and Adjusted OIBDA are not measures of financial performance under GAAP and should not be considered as alternatives to Net income or Cash flows from operating activities, as indicators of cash flows or as measures of liquidity. TDS does not intend to imply that any such items set forth in the reconciliation below are non-recurring, infrequent or unusual; such items may occur in the future.

Adjusted EBITDA is a segment measure reported to the chief operating decision maker for purposes of assessing the segments' performance. See Note 19 — Business Segment Information in the Notes to Consolidated Financial Statements for additional information.

Management uses Adjusted EBITDA and Adjusted OIBDA as measurements of profitability, and therefore, reconciliations to applicable GAAP income measures are deemed appropriate. Management believes Adjusted EBITDA and Adjusted OIBDA are useful measures of TDS' operating results before significant recurring non-cash charges, gains and losses, and other items as presented below as they provide additional relevant and useful information to investors and other users of TDS' financial data in evaluating the effectiveness of its operations and underlying business trends in a manner that is consistent with management's evaluation of business performance. Adjusted EBITDA shows adjusted earnings before interest, taxes, depreciation, amortization and accretion, and gains and losses, while Adjusted OIBDA reduces this measure further to exclude Equity in earnings of unconsolidated entities and Interest and dividend income in order to more effectively show the performance of operating activities excluding investment activities. The following tables reconcile EBITDA, Adjusted EBITDA and Adjusted OIBDA to the corresponding GAAP measures, Net income and Operating income.

TDS - CONSOLIDATED	2021		2020

Telephone and Data Systems, Inc. Notes to Consolidated Financial Statements

Note 1 Summary of Significant Accounting Policies

Nature of Operations

Telephone and Data Systems, Inc. (TDS) is a diversified telecommunications company providing high-quality communications services to customers with 5.0 million wireless connections and 1.2 million wireline and cable connections at December 31, 2021. TDS conducts all of its wireless operations through its 82%-owned subsidiary, United States Cellular Corporation (UScellular). TDS provides broadband, video and voice services through its wholly-owned subsidiaries, TDS Telecommunications LLC and TDS Broadband LLC (collectively, TDS Telecom).

TDS has the following reportable segments: UScellular and TDS Telecom. TDS' non-reportable other business activities are presented as "Corporate, Eliminations and Other", which includes the operations of TDS' wholly-owned hosted and managed services (HMS) subsidiary, which operates under the OneNeck IT Solutions brand, and its wholly-owned subsidiary Suttle-Straus, Inc. (Suttle-Straus). HMS' and Suttle-Straus' financial results were not significant to TDS' operations. All of TDS' segments operate only in the United States. See Note 19 — Business Segment Information for summary financial information on each business segment.

Change in Reportable Segments

During the first quarter of 2021, TDS modified its reporting segment structure to combine its Wireline and Cable segments into a single reportable segment for TDS Telecom. TDS Telecom believes this presentation better articulates its progress and performance against its strategy, which includes a focus on overall broadband growth and future fiber deployment across its markets. This change also reflects TDS Telecom's progress in aligning its organizational, operational and support structures to leverage one cost base to better support its customers across all of its markets. Prior periods have been updated to conform to this revised presentation. See Note 19 — Business Segment Information for additional information on TDS' reportable segments.

Principles of Consolidation

The accounting policies of TDS conform to accounting principles generally accepted in the United States of America (GAAP) as set forth in the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC). Unless otherwise specified, references to accounting provisions and GAAP in these notes refer to the requirements of the FASB ASC. The consolidated financial statements include the accounts of TDS and subsidiaries in which it has a controlling financial interest, including UScellular and TDS Telecom. In addition, the consolidated financial statements include certain entities in which TDS has a variable interest that requires consolidation under GAAP. See Note 15 — Variable Interest Entities for additional information relating to TDS' VIEs. Intercompany accounts and transactions have been eliminated.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect (a) the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and (b) the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates. Significant estimates are involved in accounting for goodwill, indefinite-lived intangible assets and income taxes.

Cash, Cash Equivalents and Restricted Cash

Cash and cash equivalents include cash and highly liquid investments with original maturities of three months or less. Cash and cash equivalents subject to contractual restrictions are classified as restricted cash. Restricted cash primarily consists of balances required under the receivables securitization agreement. See Note 12 — Debt for additional information related to the receivables securitization agreement. The following table provides a reconciliation of Cash and cash equivalents and restricted cash reported in the Consolidated Balance Sheet to the total of the amounts in the Consolidated Statement of Cash Flows.

December 31,	2021	2020
(Dollars in millions)		
Cash and cash equivalents	\$ 367	\$ 1,429
Restricted cash included in Other current assets	 47	 23
Cash, cash equivalents and restricted cash in the statement of cash flows	\$ 414	\$ 1,452

Accounts Receivable and Allowance for Credit Losses

UScellular's accounts receivable consist primarily of amounts owed by customers for wireless services and equipment sales, including sales of certain devices and accessories under installment plans, by agents and third-party distributors for sales of equipment to them and by other wireless carriers whose customers have used UScellular's wireless systems.

TDS Telecom's accounts receivable primarily consist of amounts owed by customers for services and products provided, by state and federal governments for grants and support funds, and by interexchange carriers for long-distance and data traffic, which TDS Telecom carries on its network.

TDS estimates expected credit losses related to accounts receivable balances based on a review of available and relevant information including current economic conditions, projected economic conditions, historical loss experience, account aging, and other factors that could affect collectability. Expected credit losses are determined for each pool of accounts receivable balances that share similar risk characteristics. The allowance for credit losses is the best estimate of the amount of expected credit losses related to existing accounts receivable. TDS does not have any off-balance sheet credit exposure related to its customers.

Inventory

Inventory consists primarily of wireless devices stated at the lower of cost, which approximates cost determined on the first-in first-out basis, or net realizable value. Net realizable value is determined by reference to the stand-alone selling price.

Cloud-Hosted Arrangements

TDS' cloud-hosted arrangements that are service contracts consist primarily of software used to perform administrative functions. Implementation costs related to TDS' cloud-hosted arrangements, which are recorded in Prepaid expenses and Other assets and deferred charges in the Consolidated Balance Sheet, were as follows:

December 31,	2021	2020
(Dollars in millions)		
Implementation costs, gross	\$ 87	\$ 69
Accumulated amortization	(30)	(13)
Implementation costs, net	\$ 57	\$ 56

These costs are amortized over the period of the service contract, which is generally three to five years. Amortization of implementation costs was \$17 million and \$11 million for the years ended December 31, 2021 and 2020, respectively, and was included in Selling, general and administrative expenses.

Licenses

Licenses consist of direct and incremental costs incurred in acquiring Federal Communications Commission (FCC) wireless spectrum licenses that generally provide UScellular with the exclusive right to utilize designated radio spectrum within specific geographic service areas to provide wireless service. Although wireless spectrum licenses are issued for a fixed period of time, generally ten years, or in some cases twelve or fifteen years, the FCC has granted license renewals routinely and at a nominal cost. The wireless spectrum licenses held by UScellular expire at various dates. UScellular believes that it is probable that its future wireless spectrum license renewal applications will be granted. UScellular determined that there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful lives of the wireless spectrum licenses. Therefore, UScellular has determined that wireless spectrum licenses are indefinite-lived intangible assets.

UScellular performs its annual impairment assessment of wireless spectrum licenses as of November 1 of each year or more frequently if there are events or circumstances that cause UScellular to believe it is more likely than not that the carrying value of wireless spectrum licenses exceeds fair value. For purposes of its impairment testing, UScellular separated its FCC wireless spectrum licenses into eight units of accounting. The eight units of accounting consisted of one unit of accounting for developed operating market wireless spectrum licenses (built wireless spectrum licenses) and seven units of accounting for geographic non-operating market wireless spectrum licenses (unbuilt wireless spectrum licenses).

UScellular performed a qualitative impairment assessment to determine whether the wireless spectrum licenses were impaired. In 2021 and 2020, UScellular considered several qualitative factors, including analyst estimates of wireless spectrum license values which contemplated recent spectrum auction results, recent UScellular and other market participant transactions and other industry and market factors. Based on these assessments, UScellular concluded that it was more likely than not that the fair value of the wireless spectrum licenses in each unit of accounting exceeded their respective carrying values. Therefore, no quantitative impairment evaluation was completed. See Note 7 — Intangible Assets for additional details related to wireless spectrum licenses.

Goodwill

TDS has Goodwill as a result of past business acquisitions. TDS performs its annual impairment assessment of Goodwill as of November 1 of each year or more frequently if there are events or circumstances that cause TDS to believe it is more likely than not that the carrying value of individual reporting units exceeds their respective fair values. Goodwill impairment loss will be measured as the amount by which a reporting unit's carrying amount exceeds its fair value. The loss recognized should not exceed the total amount of goodwill allocated to that reporting unit.

For purposes of conducting its Goodwill impairment test, TDS Telecom has one reporting unit. TDS Telecom performed a qualitative impairment assessment in 2021 and a quantitative assessment consisting of a discounted cash flow approach and the guideline public company method in 2020. Based on the annual impairment assessments performed, TDS Telecom did not have an impairment of its Goodwill in 2021 or 2020.

See Note 7 — Intangible Assets for additional details related to Goodwill.

Franchise Rights

TDS Telecom has franchise rights as a result of acquisitions of cable businesses. Franchise rights are intangible assets that provide their holder with the right to operate a business in a certain geographical location as sanctioned by the franchiser, usually a government agency. Franchise rights are generally granted for ten years and may be renewed for additional terms upon approval by the granting authority. TDS anticipates that future renewals of its franchise rights will be granted. TDS reviews franchise rights for impairment whenever events or changes in circumstances indicate that the assets might be impaired. TDS re-evaluates the useful life of franchise rights each year to determine if changes in technology or other business changes would warrant a revision of its remaining useful life. Franchise rights are included in Other intangible assets in the Consolidated Balance Sheet.

See Note 7 — Intangible Assets for additional details related to franchise rights.

Investments in Unconsolidated Entities

For its equity method investments for which financial information is readily available, TDS records its equity in the earnings of the entity in the current period. For its equity method investments for which financial information is not readily available, TDS records its equity in the earnings of the entity on a one quarter lag basis.

Property, Plant and Equipment

Property, plant and equipment is stated at the original cost of construction or purchase including capitalized costs of certain taxes, payroll-related expenses, interest and estimated costs to remove the assets.

Expenditures that enhance the productive capacity of assets in service or extend their useful lives are capitalized and depreciated. Expenditures for maintenance and repairs of assets in service are charged to Cost of services or Selling, general and administrative expense, as applicable. Retirements and disposals of assets are recorded by removing the original cost of the asset (along with the related accumulated depreciation) from plant in service and recording it, together with proceeds, if any, and net removal costs (removal costs less an applicable accrued asset retirement obligation and salvage value realized), as a gain or loss, as appropriate. Certain TDS Telecom segment assets use the group depreciation method. Accordingly, when a group method asset is retired in the ordinary course of business, the original cost of the asset and accumulated depreciation in the same amount are removed, with no gain or loss recognized on the disposition.

TDS capitalizes certain costs of developing new information systems. Software licenses that qualify for capitalization as an asset are accounted for as the acquisition of a fixed asset and the incurrence of a liability to the extent that the license fees are not fully paid at acquisition.

Depreciation and Amortization

Depreciation is provided using the straight-line method over the estimated useful life of the related asset, except for certain TDS Telecom segment assets, which use the group depreciation method. The group depreciation method develops a depreciation rate based on the average useful life of a specific group of assets, rather than each asset individually. TDS depreciates leasehold improvement assets over periods ranging from one year to thirty years; such periods approximate the shorter of the assets' economic lives or the specific lease terms.

Useful lives of specific assets are reviewed throughout the year to determine if changes in technology or other business changes would warrant accelerating the depreciation of those specific assets. There were no material changes to the assigned useful lives of the various categories of property, plant and equipment in 2021, 2020 or 2019. However, in 2021, 2020 and 2019, depreciation for certain specific assets was accelerated due to changes in technology. See Note 9 — Property, Plant and Equipment for additional details related to useful lives.

Impairment of Long-Lived Assets

TDS reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the assets might be impaired. UScellular and TDS Telecom each have one asset group for purposes of assessing property, plant and equipment for impairment based on the integrated nature of its network, assets and operations. The cash flows generated by each of these groups is the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities.

Leases

A lease is generally present in a contract if the lessee controls the use of identified property, plant or equipment for a period of time in exchange for consideration. See Note 10 — Leases for additional details related to leases.

TDS adopted the provisions of ASC 842 on January 1, 2019, using a modified retrospective method. Under this method, TDS elected to apply the new accounting standard only to the most recent period presented, recognizing the cumulative effect of the accounting change as an adjustment to the beginning balance of retained earnings. The cumulative effect of applying the provisions of ASC 842 had no material impact on retained earnings.

Agent Liabilities

UScellular has relationships with agents, which are independent businesses that obtain customers for UScellular. At December 31, 2021 and 2020, UScellular had accrued \$51 million and \$55 million, respectively, in agent related liabilities. These amounts are included in Other current liabilities in the Consolidated Balance Sheet.

Debt Issuance Costs

Debt issuance costs include underwriters' and legal fees and other charges related to issuing and renewing various borrowing instruments and other long—term agreements and are amortized over the respective term of each instrument. Debt issuance costs related to TDS' and UScellular's revolving credit agreements and UScellular's receivables securitization agreement are recorded in Other assets and deferred charges in the Consolidated Balance Sheet. All other debt issuance costs are presented as an offset to the related debt obligation in the Consolidated Balance Sheet.

Asset Retirement Obligations

TDS records asset retirement obligations for the fair value of legal obligations associated with asset retirements and a corresponding increase in the carrying amount of the related long-lived asset in the period in which the obligations are incurred. In periods subsequent to initial measurement, TDS recognizes changes in the liability resulting from the passage of time and updates to the timing or the amount of the original estimates. The liability is accreted to its estimated settlement date value over the period to the estimated settlement date. The change in the carrying amount of the long-lived asset is depreciated over the average remaining life of the related asset. See Note 11 — Asset Retirement Obligations for additional information.

Treasury Shares

Common Shares repurchased by TDS are recorded at cost as treasury shares and result in a reduction of equity. When treasury shares are reissued, TDS determines the cost using the first-in, first-out cost method. The difference between the cost of the treasury shares and reissuance price is included in Capital in excess of par value or Retained earnings.

Revenue Recognition

Revenues from sales of equipment and products are recognized when control has transferred to the customer, agent or third-party distributor. Service revenues are recognized as the related service is provided. See Note 2 — Revenue Recognition for additional information on TDS' policies related to Revenues.

Advertising Costs

TDS expenses advertising costs as incurred. Advertising costs totaled \$203 million, \$213 million and \$227 million in 2021, 2020 and 2019, respectively.

Income Taxes

TDS files a consolidated federal income tax return. Deferred taxes are computed using the liability method, whereby deferred tax assets are recognized for future deductible temporary differences and operating loss carryforwards, and deferred tax liabilities are recognized for future taxable temporary differences. Both deferred tax assets and liabilities are measured using the enacted tax rates in effect when the temporary differences are expected to reverse. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized. TDS evaluates income tax uncertainties, assesses the probability of the ultimate settlement with the applicable taxing authority and records an amount based on that assessment. Deferred taxes are reported as a net non-current asset or liability by jurisdiction. Any corresponding valuation allowance to reduce the amount of deferred tax assets is also recorded as non-current. See Note 5 — Income Taxes for additional information.

Stock-Based Compensation and Other Plans

TDS has established long-term incentive plans, dividend reinvestment plans, and a non-employee director compensation plan. The dividend reinvestment plan of TDS is not considered a compensatory plan and, therefore, recognition of compensation costs for grants made under this plan is not required. All other plans are considered compensatory plans; therefore, recognition of costs for grants made under these plans is required.

TDS recognizes stock compensation expense based upon the fair value of the specific awards granted using established valuation methodologies. The amount of stock compensation cost recognized on either a straight-line basis or graded attribution method is based on the portion of the award that is expected to vest over the requisite service period, which generally represents the vesting period. Stock-based compensation cost recognized has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. See Note 18 — Stock-Based Compensation for additional information.

Note 2 Revenue Recognition

Nature of goods and services

The following is a description of principal activities from which TDS generates its revenues.

The following is a descript	tion of philicipal activities from which 100 generates its revenues.
Services and products	Nature, timing of satisfaction of performance obligations, and significant payment terms
Wireless services	Wireless service includes voice, messaging and data services. Revenue is recognized in Service revenues as wireless service is provided to the customer. Wireless services generally are billed and paid in advance on a monthly basis.
Wireless devices and accessories	UScellular offers a comprehensive range of wireless devices such as handsets, tablets, mobile hotspots, home phones and routers for use by its customers, as well as accessories. UScellular also sells wireless devices to agents and other third-party distributors for resale. UScellular frequently discounts wireless devices sold to new and current customers. UScellular also offers customers the option to purchase certain devices and accessories under installment contracts over a specified time period. For certain equipment installment plans, after a specified period of time, the customer may have the right to upgrade to a new device. Such upgrades require the customer to enter into an equipment installment contract for the new device, and transfer the existing device to UScellular. UScellular recognizes revenue in Equipment and product sales revenues when control of the device or accessory is transferred to the customer, agent or third-party distributor, which is generally upon delivery.
Wireless roaming	UScellular receives roaming revenues when other wireless carriers' customers use UScellular's wireless systems. UScellular recognizes revenue in Service revenues when the roaming service is provided.
Wireless Eligible Telecommunications Carrier (ETC) Revenues	Telecommunications companies may be designated by states, or in some cases by the FCC, as an ETC to receive support payments from the Universal Service Fund if they provide specified services in "high cost" areas. ETC revenues recognized in the reporting period represent the amounts which UScellular is entitled to receive for such period, as determined and approved in connection with UScellular's designation as an ETC in various states.
Wireless tower rents	UScellular receives tower rental revenues when another carrier leases tower space on a UScellular owned tower. UScellular recognizes revenue in Service revenues in the period during which the services are provided.
Wireline and cable services	Wireline and cable services include broadband, video and voice services. Revenue is recognized in Service revenues as service is provided to the customer. Wireline and cable services are generally billed and paid in advance on a monthly basis.
Wholesale revenues	Wholesale revenues include network access services primarily to interexchange and wireless carriers for carrying data and voice traffic on TDS Telecom's network, special access services and state and federal support payments, including A-CAM. Wholesale revenues are recorded as the related service is provided.
IT hardware sales	TDS recognizes equipment revenue when it no longer has any requirements to perform, when title has passed and when the products are accepted by the customer.
Hosted and managed services	HMS Service revenues consist of cloud and hosting solutions, managed services, Enterprise Resource Planning (ERP) application management, colocation services, and IT hardware related maintenance and professional services. Revenues related to these services are recognized as services are provided.

Significant Judgments

As a practical expedient, TDS groups similar contracts or similar performance obligations together into portfolios of contracts or performance obligations if doing so does not result in a significant difference from accounting for the individual contracts discretely. TDS applies this grouping method for the following types of transactions: device activation fees, contract acquisition costs, contract fulfillment costs, and certain customer promotions. Contract portfolios are recognized over the respective expected customer lives or terms of the contracts.

Services are deemed to be highly interrelated when the method and timing of transfer and performance risk are the same. Highly interrelated services that are determined to not be distinct have been grouped into a single performance obligation. Each month of services promised is a performance obligation. The series of monthly service performance obligations promised over the course of the contract are combined into a single performance obligation for purposes of the revenue allocation.

TDS has made judgments regarding transaction price, including but not limited to issues relating to variable consideration, time value of money, returns and non-cash consideration. When determined to be significant in the context of the contract, these items are considered in the valuation of transaction price at contract inception or modification, as appropriate.

Multiple Performance Obligations

UScellular and TDS Telecom sell bundled service and equipment offerings. In these instances, TDS recognizes its revenue based on the relative standalone selling prices for each distinct service or equipment performance obligation, or bundles thereof. TDS estimates the standalone selling price of the device or accessory to be its retail price excluding discounts. TDS estimates the standalone selling price of wireless service to be the price offered to customers on month-to-month contracts.

Incentives

Discounts, incentives, and rebates to agents and end customers that are deemed cash are recognized as a reduction of Operating revenues concurrently with the associated revenue.

From time to time, UScellular may offer certain promotions to incentivize customers to switch to, or to purchase additional services from, UScellular. Under these types of promotions, an eligible customer may receive an incentive in the form of a discount off additional services purchased shown as a credit to the customer's monthly bill. UScellular accounts for the future discounts as material rights at the time of the initial transaction by allocating and deferring revenue based on the relative proportion of the future discounts in comparison to the aggregate initial purchase. The deferred revenue will be recognized as service revenue in future periods.

Amounts Collected from Customers and Remitted to Governmental Authorities

TDS records amounts collected from customers and remitted to governmental authorities on a net basis within a liability account if the amount is assessed upon the customer and TDS merely acts as an agent in collecting the amount on behalf of the imposing governmental authority. If the amount is assessed upon TDS, then amounts collected from customers are recorded in Service revenues and amounts remitted to governmental authorities are recorded in Selling, general and administrative expenses in the Consolidated Statement of Operations. The amounts recorded gross in revenues that are billed to customers and remitted to governmental authorities totaled \$95 million, \$82 million and \$78 million for 2021, 2020 and 2019, respectively.

Disaggregation of Revenue

In the following table, TDS' revenues are disaggregated by type of service, which represents the relevant categorization of revenues for TDS' reportable segments, and timing of recognition. Service revenues are recognized over time and Equipment and product sales are point in time.

Year Ended December 31, 2021	UScellular			TDS Telecom		orporate, minations nd Other	Total

Corporate,

Numbers may not foot due to rounding.

Contract Balances

For contracts that involve multiple element service and equipment offerings, the transaction price is allocated to each performance obligation based on its relative standalone selling price. When payment is collected in advance of delivery of goods or services, a contract liability is recorded. A contract asset is recorded when revenue is recognized in advance of TDS' right to receive consideration. Once there is an unconditional right to receive the consideration, TDS records such amounts as receivables, and then bills the customer under the terms of the respective contract.

TDS recognizes Equipment and product sales revenue when the equipment is delivered to the customer and a corresponding contract asset or liability is recorded for the difference between the amount of revenue recognized and the amount billed to the customer in cases where discounts are offered. The contract asset or liability is reduced over the contract term as service is provided and billed to the customer.

During the third quarter of 2021, UScellular recorded a \$9 million out-of-period error related to the timing of recognition of regulatory fee billings. This adjustment had the impact of increasing Service revenue by \$9 million in 2021. UScellular determined that this adjustment was not material to any of the periods impacted.

Revenue line items in this table will not agree to amounts presented in the Consolidated Statement of Operations as the amounts in this table only include revenue resulting from contracts with customers.

The following table provides balances for contract assets from contracts with customers, which are recorded in Other current assets and Other assets and deferred charges in the Consolidated Balance Sheet, and contract liabilities from contracts with customers, which are recorded in Customer deposits and deferred revenues and Other deferred liabilities and credits in the Consolidated Balance Sheet.

December 31,	2021	2020
(Dollars in millions)		
Contract assets	\$ 10	\$ 13
Contract liabilities	\$ 289	\$ 216

Revenue recognized related to contract liabilities existing at January 1, 2021 was \$172 million for the year ended December 31, 2021.

Transaction price allocated to the remaining performance obligations

The following table includes estimated service revenues expected to be recognized related to performance obligations that are unsatisfied (or partially unsatisfied) at the end of the reporting period. These estimates represent service revenues to be recognized when services are delivered to customers pursuant to service plan contracts and under certain roaming agreements with other carriers. These estimates are based on contracts in place as of December 31, 2021, and may vary from actual results. As practical expedients, revenue related to contracts of less than one year, generally month-to-month contracts, and contracts with a fixed per-unit price and variable quantity, are excluded from these estimates.

	Service	Service Revenues				
(Dollars in millions)						
2022	\$	400				
2023		174				
Thereafter		120				
Total	\$	694				

Contract Cost Assets

TDS expects that commission fees paid as a result of obtaining contracts are recoverable and therefore TDS defers and amortizes these costs. As a practical expedient, costs with an amortization period of one year or less are expensed as incurred. TDS also incurs fulfillment costs, such as installation costs, where there is an expectation that a future benefit will be realized. Deferred commission fees and fulfillment costs are amortized based on the timing of transfer of the goods or services to which the assets relate, typically the contract term. Contract cost asset balances, which are recorded in Other assets and deferred charges in the Consolidated Balance Sheet, were as follows:

December 31,	20	021	2020
(Dollars in millions)			
Costs to obtain contracts			
Sales commissions	\$	139	\$ 139
Fulfillment costs			
Installation costs		10	10
Total contract cost assets	\$	149	\$ 149

Amortization of contract cost assets was \$116 million, \$120 million and \$126 million for the years ended December 31, 2021, 2020 and 2019, respectively, and was included in Selling, general and administrative expenses and Cost of services expenses.

Note 3 Fair Value Measurements

As of December 31, 2021 and 2020, TDS did not have any material financial or nonfinancial assets or liabilities that were required to be recorded at fair value in its Consolidated Balance Sheet in accordance with GAAP.

The provisions of GAAP establish a fair value hierarchy that contains three levels for inputs used in fair value measurements. Level 1 inputs include quoted market prices for identical assets or liabilities in active markets. Level 2 inputs include quoted market prices for similar assets and liabilities in active markets or quoted market prices for identical assets and liabilities in inactive markets. Level 3 inputs are unobservable. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. A financial instrument's level within the fair value hierarchy is not representative of its expected performance or its overall risk profile and, therefore, Level 3 assets are not necessarily higher risk than Level 2 assets or Level 1 assets.

TDS has applied the provisions of fair value accounting for purposes of computing the fair value of financial instruments for disclosure purposes as displayed below.

	Level within the Fair		Decembe	r 31,	2021	December 31, 2020				
	Value Hierarchy	Book Value		Fa	ir Value	Вс	ook Value	Fair Value		
(Dollars in millions)										
Long-term debt										
Retail	2	\$	1,500	\$	1,594	\$	2,753	\$	2,809	
Institutional	2		535		659		535		707	
Other	2		944		944		230		230	

Long-term debt excludes lease obligations, the current portion of Long-term debt and debt financing costs. The fair value of "Retail" Long-term debt was estimated using market prices for UScellular Senior Notes in 2021 and TDS and UScellular Senior Notes in 2020, all of which are traded on the New York Stock Exchange. TDS' "Institutional" debt consists of UScellular's 6.7% Senior Notes which are traded over the counter. TDS' "Other" debt consists of senior term loan credit agreements and receivables securitization agreement. TDS estimated the fair value of its Institutional and Other debt through a discounted cash flow analysis using the interest rates or estimated yield to maturity for each borrowing, which ranged from 1.31% to 4.40% and 1.35% to 3.75% at December 31, 2021 and 2020, respectively.

The fair values of Cash and cash equivalents, restricted cash and Short-term investments approximate their book values due to the short-term nature of these financial instruments.

Note 4 Equipment Installment Plans

UScellular sells devices to customers under equipment installment plans over a specified time period. For certain equipment installment plans, after a specified period of time or amount of payments, the customer may have the right to upgrade to a new device and have the remaining unpaid equipment installment contract balance waived, subject to certain conditions, including trading in the original device in good working condition and signing a new equipment installment contract.

The following table summarizes equipment installment plan receivables.

December 31,	2021		2020
(Dollars in millions)			
Equipment installment plan receivables, gross	\$	1,085	\$ 1,007
Allowance for credit losses		(72)	(78)
Equipment installment plan receivables, net	\$	1,013	\$ 929
Not belone a managed of the Connectified of Delayers Charters			
Net balance presented in the Consolidated Balance Sheet as:			
Accounts receivable — Customers and agents (Current portion)	\$	639	\$ 590
Other assets and deferred charges (Non-current portion)		374	339
Equipment installment plan receivables, net	\$	1,013	\$ 929

UScellular uses various inputs, including internal data, information from credit bureaus and other sources, to evaluate the credit profiles of its customers. From this evaluation, a credit class is assigned to the customer that determines the number of eligible lines, the amount of credit available, and the down payment requirement, if any. These credit classes are grouped into four credit categories: lowest risk, lower risk, slight risk and higher risk. A customer's assigned credit class is reviewed periodically and a change is made, if appropriate. An equipment installment plan billed amount is considered past due if not paid within 30 days.

The balance and aging of the equipment installment plan receivables on a gross basis by credit category were as follows:

December 31, 2021							December 31, 2020											
								Total										Total

2020

Note 5 Income Taxes

December 31,

TDS' current income taxes balances at December 31, 2021 and 2020, were as follows:

(Dollars in millions)				
Federal income taxes receivable		\$	179	\$ 180
Net state income taxes receivable			5	7
Income tax expense (benefit) is summarized as follows:				
Year Ended December 31,	2	021	2020	2019
(Dollars in millions)				
Current				
Federal	\$	2 \$	(175)	\$ 15
State		(21)	4	15
Deferred				
Federal		59	179	36
State		(7)	11	(2)
Total income tax expense (benefit)	\$	33 \$	19	\$ 64

A reconciliation of TDS' income tax expense computed at the statutory rate to the reported income tax expense, and the statutory federal income tax rate to TDS' effective income tax rate is as follows:

Year Ended December 31,		202	21		202	20		9	
	An	ount	Rate	Amount		Rate	Am	ount	Rate
(Dollars in millions)									
Statutory federal income tax expense and rate	\$	47	21.0 %	\$	60	21.0 %	\$	44	21.0 %
State income taxes, net of federal benefit ¹		(23)	(10.3)		11	4.0		12	5.5
Change in federal valuation allowance ²		7	3.1		_	_		7	3.1
Loss carryback benefit of CARES Act ³		_	_		(60)	(21.0)		_	_
Nondeductible compensation		6	2.9		9	3.0		4	1.9
Tax credits		(2)	(8.0)		(2)	(0.6)		(4)	(1.9)
Other differences, net		(2)	(8.0)		1			1	0.7
Total income tax expense (benefit) and rate	\$	33	15.1 %	\$	19	6.4 %	\$	64	30.3 %

State income taxes, net of federal benefit, include changes in unrecognized tax benefits as well as adjustments to state valuation allowances. State taxes in 2021 are a net benefit due primarily to the reduction of tax accruals resulting from expirations of state statute of limitations for prior tax years.

Significant components of TDS' deferred income tax assets and liabilities at December 31, 2021 and 2020, were as follows:

December 31,	:	2021	2020
(Dollars in millions)			
Deferred tax assets			
Net operating loss (NOL) carryforwards	\$	226	\$ 183
Lease liabilities		277	257
Asset retirement obligation		101	81
Other		157	109
Total deferred tax assets		761	630
Less valuation allowance		(149)	(158)
Net deferred tax assets		612	472
Deferred tax liabilities	•		
Property, plant and equipment		751	652
Licenses/intangibles		364	287
Partnership investments		155	144
Lease assets		255	235
Other		6	17
Total deferred tax liabilities		1,531	1,335
Net deferred income tax liability	\$	919	\$ 863
Presented in the Consolidated Balance Sheet as:			
Deferred income tax liability, net	\$	921	\$ 863
Other assets and deferred charges		(2)	_
Net deferred income tax liability	\$	919	\$ 863

At December 31, 2021, TDS and certain subsidiaries had \$3,149 million of state NOL carryforwards (generating a \$165 million deferred tax asset) available to offset future taxable income. The state NOL carryforwards expire between 2022 and 2041. TDS and certain subsidiaries had \$291 million of federal NOL carryforwards (generating a \$61 million deferred tax asset) available to offset future taxable income. The federal NOL carryforwards generally expire between 2022 and 2037, with the exception of federal NOLs generated after 2017, which do not expire. A valuation allowance was established for certain federal and state NOL carryforwards since it is more likely than not that a portion of such carryforwards will expire before they can be utilized.

² Change in federal valuation allowance is due primarily to interest expense carryforwards from partnership investments that may not be realized.

The CARES Act provides a 5-year carryback of net operating losses generated in years 2018-2020. As the statutory federal tax rate applicable to certain years within the carryback period is 35%, carryback to those years provides a tax benefit in excess of the current federal statutory rate of 21%.

A summary of TDS' deferred tax asset valuation allowance is as follows:

	2021	2020	2019
(Dollars in millions)			
Balance at beginning of year	\$ 158	\$ 152	\$ 135
Charged to Income tax expense	(9)	6	17
Balance at end of year	\$ 149	\$ 158	\$ 152

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	20	021	2020	2019
(Dollars in millions)				
Unrecognized tax benefits balance at beginning of year	\$	54 \$	49	\$ 49
Additions for tax positions of current year		8	8	8
Additions for tax positions of prior years		_	3	_
Reductions for tax positions of prior years		(3)	(1)	(7)
Reductions for settlements of tax positions		(2)	_	(1)
Reductions for lapses in statutes of limitations		(20)	(5)	
Unrecognized tax benefits balance at end of year	\$	37 \$	54	\$ 49

Unrecognized tax benefits are included in Accrued taxes and Other deferred liabilities and credits in the Consolidated Balance Sheet. If these benefits were recognized at each respective year end period, they would have reduced income tax expense in 2021, 2020 and 2019 by \$30 million, \$43 million and \$39 million, respectively, net of the federal benefit from state income taxes.

TDS recognizes accrued interest and penalties related to unrecognized tax benefits in Income tax expense (benefit). The amounts charged to income tax expense related to interest and penalties resulted in a benefit of \$10 million in 2021, and expenses of \$2 million and \$3 million in 2020 and 2019, respectively. Net accrued liabilities for interest and penalties were \$13 million and \$23 million at December 31, 2021 and 2020, respectively, and are included in Other deferred liabilities and credits in the Consolidated Balance Sheet.

TDS and its subsidiaries file federal and state income tax returns. With limited exceptions, TDS is no longer subject to federal and state income tax audits for the years prior to 2018.

Note 6 Earnings Per Share

Basic earnings per share attributable to TDS common shareholders is computed by dividing Net income attributable to TDS common shareholders by the weighted average number of Common Shares outstanding during the period. Diluted earnings per share attributable to TDS common shareholders is computed by dividing Net income attributable to TDS common shareholders by the weighted average number of Common Shares outstanding during the period adjusted to include the effects of potentially dilutive securities. Potentially dilutive securities primarily include incremental shares issuable upon the exercise of outstanding stock options and the vesting of performance and restricted stock units.

The amounts used in computing basic and diluted earnings per share attributable to TDS common shareholders were as follows:

Year Ended December 31,	2021	2020		2019
(Dollars and shares in millions, except per share amounts)				
Net income attributable to TDS common shareholders used in basic earnings per share	\$ 117	\$ 226	\$	121
Adjustments to compute diluted earnings:				
Noncontrolling interest adjustment	(1) (3)	(1)
Net income attributable to TDS common shareholders used in diluted earnings per share	\$ 116	\$ 223	\$	120
Weighted average number of shares used in basic earnings per share:				
Common Shares	108	107		107
Series A Common Shares	7	7		7
Total	115	114		114
Effects of dilutive securities	1	1		2
Weighted average number of shares used in diluted earnings per share	116	115		116
Basic earnings per share attributable to TDS common shareholders	\$ 1.03	\$ 1.97	\$	1.06
Diluted earnings per share attributable to TDS common shareholders	\$ 1.00	\$ 1.93	\$	1.03

Certain Common Shares issuable upon the exercise of stock options or vesting of performance and restricted stock units were not included in weighted average diluted shares outstanding for the calculation of Diluted earnings per share attributable to TDS common shareholders because their effects were antidilutive. The number of such Common Shares excluded was 4 million shares, 5 million shares and 2 million shares for 2021, 2020 and 2019, respectively.

Note 7 Intangible Assets

Licenses

TDS reviews attractive opportunities to acquire additional wireless spectrum, including pursuant to FCC auctions. TDS also may seek to divest outright or exchange wireless spectrum that is not strategic to its long-term success. Prior to 2009, TDS accounted for UScellular's share repurchases as step acquisitions, allocating a portion of the share repurchase value to TDS' Licenses. Consequently, UScellular's Licenses on a stand-alone basis do not equal the TDS consolidated Licenses related to UScellular. Activity related to TDS' Licenses is presented below.

	US	cellular	TDS Telecom		Total
(Dollars in millions)					
Balance at December 31, 2019	\$	2,475	\$ 5	\$	2,480

Transferred to Assets held for sale		(18)	_		(18)
Capitalized interest		13	_		13
Balance at December 31, 2021	\$	4,092	\$ 5	\$	4,097

Auction 103

In March 2020, the FCC announced by way of public notice that UScellular was the provisional winning bidder for 237 wireless spectrum licenses in the 37, 39 and 47 GHz bands (Auction 103) for \$146 million. UScellular paid \$5 million of this amount in 2019 and the remainder in 2020. In June 2020, the wireless spectrum licenses from Auction 103 were granted by the FCC.

Auction 107

In February 2021, the FCC announced by way of public notice that UScellular was the provisional winning bidder for 254 wireless spectrum licenses in the 3.7-3.98 GHz bands (Auction 107) for \$1,283 million. UScellular paid \$30 million of this amount in 2020 and the remainder in March 2021. The wireless spectrum licenses from Auction 107 were granted by the FCC in July 2021. Additionally, UScellular expects to be obligated to pay approximately \$181 million in total from 2021 through 2024 related to relocation costs and accelerated relocation incentive payments. Such additional costs were accrued and capitalized at the time the licenses were granted. In October 2021, UScellular paid \$36 million related to the additional costs. The spectrum must be cleared by incumbent providers before UScellular can access it. UScellular does not expect to have access to this spectrum until late 2023.

Auction 110

In January 2022, the FCC announced by way of public notice that UScellular was the provisional winning bidder for 380 wireless spectrum licenses in the 3.45-3.55 GHz band (Auction 110) for \$580 million. UScellular paid \$20 million of this amount in 2021 and the remainder in January and February 2022. The advance payment is included in Other assets and deferred charges in the December 31, 2021 Consolidated Balance Sheet. The wireless spectrum licenses from Auction 110 are expected to be granted by the FCC in 2022.

Goodwill

The Goodwill balance of TDS Telecom was \$547 million at both December 31, 2021 and 2020. Accumulated impairment losses in prior periods were \$29 million for TDS Telecom.

Other intangible assets

Activity related to TDS' Other intangible assets is presented below.

	December 31, 2021				December 31, 2020							
	Gross	Amount		ımulated ortization	Ne	t Amount	Accumulated Gross Amount Amortization			Net Amount		
(Dollars in millions)												
Franchise rights	\$	255	\$	(68)	\$	187	\$	255	\$	(51)	\$	204
Customer lists and Trade name		27		(23)		4		29		(20)		9
Other		6				6		_		_		_
Total	\$	288	\$	(91)	\$	197	\$	284	\$	(71)	\$	213

Amortization expense for intangible assets was \$21 million, \$26 million and \$24 million for the years ended December 31, 2021, 2020 and 2019, respectively. Based on the current balance of finite-lived intangible assets, the estimated amortization expense is \$20 million, \$20 million, \$17 million, \$17 million and \$17 million for the years 2022 through 2026, respectively.

Note 8 Investments in Unconsolidated Entities

Investments in unconsolidated entities consist of amounts invested in entities in which TDS holds a noncontrolling interest. TDS' Investments in unconsolidated entities are accounted for using either the equity method or measurement alternative method as shown in the table below. The carrying value of measurement alternative method investments represents cost minus any impairments plus or minus any observable price changes.

December 31,	2021		2020
(Dollars in millions)			
Equity method investments:			
Capital contributions, loans, advances and adjustments	\$ 1	5 \$	115
Cumulative share of income	2,4	0	2,278
Cumulative share of distributions	(2,1	8)	(1,937)
Total equity method investments	4:	7	456
Measurement alternative method investments	:	22	21
Total investments in unconsolidated entities	\$ 4	'9 \$	477

The following tables, which are based on unaudited information provided in part by third parties, summarize the combined assets, liabilities and equity, and results of operations of TDS' equity method investments:

December 31,		2021	2020
(Dollars in millions)			
Assets			
Current		\$ 1,257	\$ 1,232
Noncurrent		6,189	5,908
Total assets		\$ 7,446	\$ 7,140
Liabilities and Equity			
Current liabilities		\$ 710	\$ 646
Noncurrent liabilities		1,260	1,124
Partners' capital and shareholders' equity		5,476	5,370
Total liabilities and equity		\$ 7,446	\$ 7,140
Year Ended December 31,	2021	2020	2019
(Dollars in millions)			
Results of Operations			
Revenues	\$ 7,127	\$ 6,702	\$ 6,929
Operating expenses	 5,152	4,753	5,043
Operating income	1,975	1,949	1,886
Other income (expense), net	 14	13	(24)
Net income	\$ 1,989	\$ 1,962	\$ 1,862

Note 9 Property, Plant and Equipment

TDS' Property, plant and equipment in service and under construction, and related accumulated depreciation and amortization, as of December 31, 2021 and 2020, were as follows:

December 31,	Useful Lives (Years)	2021		2020
(Dollars in millions)				
Land	N/A	\$	62	\$ 56
Buildings	5-40		541	533
Leasehold and land improvements	1-30		1,476	1,404
Cable and wire	15-40		2,403	2,195
Network and switching equipment	3-10		2,671	2,634
Cell site equipment	7-25		4,150	4,017
Office furniture and equipment	3-10		346	394
Other operating assets and equipment	1-12		176	189
System development	1-7		1,864	1,709
Work in process	N/A		576	528
Total property, plant and equipment, gross			14,265	13,659
Accumulated depreciation and amortization			(9,904)	(9,687)
Total property, plant and equipment, net		\$	4,361	\$ 3,972

Depreciation and amortization expense totaled \$851 million, \$862 million and \$890 million in 2021, 2020 and 2019, respectively. In 2021, 2020 and 2019, (Gain) loss on asset disposals, net included charges of \$26 million, \$27 million and \$12 million, respectively, related to disposals of assets, trade-ins of older assets for replacement assets and other retirements of assets from service in the normal course of business.

Note 10 Leases

Lessee Agreements

A lease is generally present in a contract if the lessee controls the use of identified property, plant or equipment for a period of time in exchange for consideration. Nearly all of TDS' leases are classified as operating leases, although it does have a small number of finance leases. TDS' most significant leases are for land and tower spaces, network facilities, retail spaces, and offices.

TDS has agreements with both lease and nonlease components, which are accounted for separately. As part of the present value calculation for the lease liabilities, TDS uses an incremental borrowing rate as the rates implicit in the leases are not readily determinable. The incremental borrowing rates used for lease accounting are based on TDS' unsecured rates, adjusted to approximate the rates at which TDS would be required to borrow on a collateralized basis over a term similar to the recognized lease term. TDS applies the incremental borrowing rates to lease components using a portfolio approach based upon the length of the lease term and the reporting entity in which the lease resides. The cost of nonlease components in TDS' lease portfolio (e.g., utilities and common area maintenance) are not typically predetermined at lease commencement and are expensed as incurred at their relative standalone price.

Variable lease expense occurs when, subsequent to the lease commencement, lease payments are made that were not originally included in the lease liability calculation. TDS' variable lease payments are primarily a result of leases with escalations that are tied to an index. The incremental changes due to the index changes are recorded as variable lease expense and are not included in the right-of-use assets or lease liabilities.

The identified lease term determines the periods to which expense is allocated and also has a significant impact on the right-of-use asset and lease liability calculations. Many of TDS' leases include renewal and early termination options. At lease commencement, the lease terms include options to extend the lease when TDS is reasonably certain that it will exercise the options. The lease terms do not include early termination options unless TDS is reasonably certain to exercise the options. Certain asset classes have similar lease characteristics; therefore, TDS has applied the portfolio approach for lease term recognition for its tower space, retail, and certain ground lease asset classes.

The following table shows the components of lease cost included in the Consolidated Statement of Operations:

Year Ended December 31,		2021		2020		2019	
(Dollars in millions)							
Operating lease cost	\$	198	\$	18	4 :	\$	177
Variable lease cost		10		1	1		8
Total	\$	208	\$	19	5 5	\$	185
The following table shows supplemental cash flow informat Year Ended December 31,	ion related	I to lease activition	es:	2020		2019	
(Dollars in millions)					===		
Cash paid for amounts included in the measurement of lease liabilities:							
Operating cash flows from operating leases	\$	204	\$	18	8 9	\$	172
Right-of-use assets obtained in exchange for lease obligations:							
Operating leases	\$	188	\$	15	7 9	\$	132

The table below shows a weighted-average analysis for lease terms and discount rates for operating leases:

December 31,	2021	2020
Weighted Average Remaining Lease Term	12 years	12 years
Weighted Average Discount Rate	3.8 %	4.1 %

The maturities of lease liabilities are as follows:

	Operating Leases			
(Dollars in millions)				
2022	\$	178		
2023		178		
2024		156		
2025		129		
2026		96		
Thereafter		713		
Total lease payments ¹	\$	1,450		
Less: Imputed interest		349		
Present value of lease liabilities	\$	1,101		

Lease payments exclude \$34 million of legally binding lease payments for leases signed but not yet commenced.

Lessor Agreements

TDS' most significant lessor leases are for tower space and colocation space. All of TDS' lessor leases are classified as operating leases. A lease is generally present in a contract if the lessee controls the use of identified property, plant, or equipment for a period of time in exchange for consideration. TDS' lessor agreements with lease and nonlease components are generally accounted for separately; however, certain service agreements with insignificant lease components are accounted for as nonlease transactions.

The identified lease term determines the periods to which revenue is allocated over the term of the lease. Many of TDS' leases include renewal and early termination options. At lease commencement, lease terms include options to extend the lease when TDS is reasonably certain that lessees will exercise the options. Lease terms would not include periods after the date of a termination option that lessees are reasonably certain to exercise.

Variable lease income occurs when, subsequent to the lease commencement, lease payments are received that were not originally included in the lease receivable calculation. TDS' variable lease income is primarily a result of leases with escalations that are tied to an index. The incremental increases due to the index changes are recorded as variable lease income.

The following table shows the components of lease income which are included in Service revenues in the Consolidated Statement of Operations:

Year Ended December 31,	20	021	2020	2019	
(Dollars in millions)				_	
Operating lease income ¹	\$	109 \$	105	\$	100

During the third quarter of 2019, TDS recorded an out-of-period adjustment attributable to 2009 through the second quarter of 2019 due to errors in the timing of recognition of revenue for certain tower leases. This out-of-period adjustment had the impact of increasing operating lease income by \$5 million for the year ended December 31, 2019. TDS determined that this adjustment was not material to any of the periods impacted.

The maturities of expected lease payments to be received are as follows:

	Operati	ng Leases
(Dollars in millions)		
2022	\$	87
2023		84
2024		58
2025		37
2026		19
Thereafter		30
Total future lease maturities	\$	315

Note 11 Asset Retirement Obligations

UScellular is subject to asset retirement obligations associated with its leased cell sites, switching office sites, retail store sites and office locations. Asset retirement obligations generally include obligations to restore leased land, towers, retail store and office premises to their pre-lease conditions.

TDS Telecom owns poles, cable and wire and certain buildings and also leases office space and property used for housing central office switching equipment and fiber cable. These assets and leases often have removal or remediation requirements associated with them. For example, TDS Telecom's poles, cable and wire are often located on property that is not owned by TDS Telecom and may be subject to the provisions of easements, permits, or leasing arrangements. Pursuant to the terms of the permits, easements, or leasing arrangements, TDS Telecom is often required to remove these assets and return the property to its original condition at a future date.

Asset retirement obligations are included in Other deferred liabilities and credits in the Consolidated Balance Sheet.

In 2021 and 2020, UScellular and TDS Telecom performed a review of the assumptions and estimated future costs related to asset retirement obligations. The results of the reviews and other changes in asset retirement obligations during 2021 and 2020, were as follows:

	2021		2020
(Dollars in millions)			
Balance at beginning of year	\$	377	\$ 342
Additional liabilities accrued		28	5
Revisions in estimated cash outflows		42	11
Disposition of assets		(1)	(1)
Accretion expense		23	20
Balance at end of year	\$	469	\$ 377

Note 12 Debt

Revolving Credit Agreements

At December 31, 2021, TDS and UScellular had revolving credit agreements available for general corporate purposes. Amounts under the revolving credit agreements may be borrowed, repaid and reborrowed from time to time until maturity in July 2026.

The following table summarizes the revolving credit agreements as of December 31, 2021:

		UScellular			
(Dollars in millions)					
Maximum borrowing capacity	\$	400	\$	300	
Letters of credit outstanding	\$	1	\$	_	
Amount borrowed	\$	_	\$	_	
Amount available for use	\$	399	\$	300	

Borrowings under the TDS revolving credit agreement bear interest at a rate of London Inter-bank Offered Rate (LIBOR) plus 1.50%. Borrowings under the UScellular revolving credit agreement bear interest at a rate of Secured Overnight Financing Rate (SOFR) plus 1.60%. TDS and UScellular may select a borrowing period of either one, two, three or six months (or other period of twelve months or less if requested by TDS or UScellular and approved by the lenders). TDS' and UScellular's credit spread and commitment fees on their revolving credit agreements may be subject to increase if their current credit ratings from nationally recognized credit rating agencies are lowered, and may be subject to decrease if the ratings are raised.

In connection with UScellular's revolving credit agreement, TDS and UScellular entered into a subordination agreement together with the administrative agent for the lenders under UScellular's revolving credit agreement. Pursuant to this subordination agreement, (a) any consolidated funded indebtedness from UScellular to TDS will be unsecured and (b) any (i) consolidated funded indebtedness from UScellular to TDS (other than "refinancing indebtedness" as defined in the subordination agreement) in excess of \$105 million and (ii) refinancing indebtedness in excess of \$250 million will be subordinated and made junior in right of payment to the prior payment in full of obligations to the lenders under UScellular's revolving credit agreement. As of December 31, 2021, UScellular had no outstanding consolidated funded indebtedness or refinancing indebtedness that was subordinated to the revolving credit agreement pursuant to the subordination agreement.

The continued availability of the revolving credit agreements requires TDS and UScellular to comply with certain negative and affirmative covenants, maintain certain financial ratios and make representations regarding certain matters at the time of each borrowing.

The revolving credit agreements include the following financial covenants:

- Consolidated Interest Coverage Ratio may not be less than 3.00 to 1.00 as of the end of any fiscal quarter.
- Consolidated Leverage Ratio may not be greater than 3.75 to 1.00 as of the end of any fiscal quarter.

Certain TDS and UScellular wholly-owned subsidiaries have jointly and severally unconditionally guaranteed the payment and performance of the obligations of TDS and UScellular under the revolving credit agreements. Other subsidiaries that meet certain criteria will be required to provide a similar guaranty in the future. TDS and UScellular believe that they were in compliance with all of the financial and other covenants and requirements set forth in their revolving credit agreements as of December 31, 2021.

In January 2022, UScellular borrowed \$75 million under its revolving credit agreement and in February 2022, repaid the entire borrowing.

Term Loan Agreements

At December 31, 2021, TDS and UScellular had senior term loan credit agreements available for general corporate purposes.

The following table summarizes the term loan credit agreements as of December 31, 2021:

	DS	U	Scellular
(Dollars in millions)			
Maximum borrowing capacity	\$ 500	\$	800
Amount borrowed and outstanding	\$ 200	\$	299
Amount borrowed and repaid	\$ _	\$	1
Amount available for use	\$ 300	\$	500

In July 2021, TDS amended and restated its term loan agreement to allow for an additional \$300 million of borrowing capacity. Principal reductions on the existing borrowings are due and payable in quarterly installments of \$0.5 million beginning in December 2021. Amounts borrowed under the existing term loan agreement will bear interest at a rate of LIBOR plus 2.00% and are due and payable in July 2028. Borrowings under the additional \$300 million borrowing capacity may be drawn in one or more advances by the one-year anniversary of the date of the agreement which is July 30, 2022; amounts not drawn by that time will cease to be available. Borrowings bear interest at a rate of LIBOR plus 2.50% and are due and payable in July 2031. Principal reductions on any new borrowings will be due and payable in quarterly installments beginning in December 2022 at a rate of 0.25% of the initial outstanding principal balance through September 2026 and at a rate of 0.625% of the initial outstanding principal balance from December 2026 through the maturity date. In January 2022, TDS borrowed \$150 million under the term loan agreement.

In July 2021, UScellular amended and restated its term loan agreement to allow for an additional \$200 million of borrowing capacity. Principal reductions on the existing borrowings are due and payable in quarterly installments of \$0.75 million beginning in December 2021. Amounts borrowed under the existing term loan agreement will bear interest at a rate of SOFR plus 2.10% and are due and payable in July 2028. Borrowings under the additional \$200 million borrowing capacity may be drawn in one or more advances by the one-year anniversary of the date of the agreement which is July 30, 2022; amounts not drawn by that time will cease to be available. Borrowings bear interest at a rate of SOFR plus 2.60% and are due and payable in July 2031. Principal reductions on any new borrowings will be due and payable in quarterly installments beginning in December 2022 at a rate of 0.25% of the initial outstanding principal balance through September 2026 and at a rate of 0.625% of the initial outstanding principal balance from December 2026 through the maturity date. In January 2022, UScellular borrowed \$100 million under the term loan agreement.

In December 2021, UScellular entered into an additional \$300 million term loan agreement. The agreement may be drawn in one or more advances by the three-month anniversary of the date of the agreement which is March 9, 2022; amounts not drawn by that time will cease to be available. Borrowings bear interest at a rate of SOFR plus 1.60% and are due and payable in July 2026. Principal reductions on any borrowings will be due and payable in quarterly installments beginning in March 2023 at a rate of 0.625% of the initial outstanding principal balance through December 2023; at a rate of 1.25% of the initial outstanding principal balance from March 2024 through December 2025; and at a rate of 2.50% of the initial outstanding principal balance from March 2026 through the maturity date. In February 2022, UScellular borrowed \$225 million under the term loan agreement.

In connection with UScellular's term loan credit agreements, TDS and UScellular entered into subordination agreements together with the administrative agent for the lenders under UScellular's term loan credit agreements, which is substantially the same as the subordination agreement for UScellular as described above under the "Revolving Credit Agreements." As of December 31, 2021, UScellular had no outstanding consolidated funded indebtedness or refinancing indebtedness that was subordinated to the term loan agreements pursuant to these subordination agreements.

The senior term loan credit agreements contain financial covenants and subsidiary guarantees that are consistent with the revolving credit agreements described above. TDS and UScellular believe that they were in compliance with all of the financial and other covenants and requirements set forth in their term loan credit agreements as of December 31, 2021.

Export Credit Financing Agreement

In December 2021, UScellular entered into a \$150 million term loan credit facility with Export Development Canada to finance (or refinance) equipment imported from Canada, including equipment purchased prior to entering the term loan credit facility agreement. The agreement may be drawn in one or more advances by the three-month anniversary of the date of the agreement which is March 17, 2022; amounts not drawn by that time will cease to be available. Borrowings bear interest at a rate of SOFR plus 1.60% and are due and payable on the five-year anniversary of the first borrowing, which is in January 2027. As of December 31, 2021, there were no outstanding borrowings under the credit facility and the unused borrowing capacity was \$150 million. In January 2022, UScellular borrowed \$150 million under the agreement.

In connection with UScellular export credit financing agreement, TDS and UScellular entered into a subordination agreement together with the administrative agent for the lenders under UScellular's export credit financing agreement, which is substantially the same as the subordination agreement for UScellular as described above under the "Revolving Credit Agreements." As of December 31, 2021, UScellular had no outstanding consolidated funded indebtedness or refinancing indebtedness that was subordinated to the export credit financing agreement pursuant to this subordination agreement.

The export credit financing agreement contains financial covenants and subsidiary guarantees that are consistent with the revolving credit agreements described above. TDS believes that UScellular was in compliance with all of the financial and other covenants and requirements set forth in their export credit financing agreement as of December 31, 2021.

Receivables Securitization Agreement

At December 31, 2021, UScellular, through its subsidiaries, had a receivables securitization agreement for securitized borrowings using its equipment installment receivables for general corporate purposes. In June 2021, UScellular increased the borrowing capacity under the receivables securitization agreement to \$450 million. Amounts under the receivables securitization agreement may be borrowed, repaid and reborrowed from time to time until maturity in December 2022. Unless the agreement is amended to extend the maturity date, repayments based on receivable collections commence in January 2023. UScellular intends to extend the maturity date of the facility. The outstanding borrowings bear interest at floating rates. As of December 31, 2021, UScellular has borrowed the full amount available under the agreement of \$450 million. As of December 31, 2021, the USCC Master Note Trust held \$638 million of assets available to be pledged as collateral for the receivables securitization agreement.

In connection with entering into the receivables securitization agreement in 2017, UScellular formed a wholly-owned subsidiary, USCC Master Note Trust (Trust), which qualifies as a bankruptcy remote entity. Under the terms of the agreement, UScellular, through its subsidiaries, transfers eligible equipment installment receivables to the Trust. The Trust then utilizes the transferred assets as collateral for notes payables issued to third party financial institutions. Since UScellular retains effective control of the transferred assets in the Trust, any activity associated with this receivables securitization agreement will be treated as a secured borrowing. Therefore, TDS will continue to report equipment installment receivables and any related balances on the Consolidated Balance Sheet. Cash received from borrowings under the receivables securitization agreement will be reported as Debt. Refer to Note 15 — Variable Interest Entities for additional information.

UScellular entered into a performance guaranty whereby UScellular guarantees the performance of certain wholly-owned subsidiaries of UScellular under the receivables securitization agreement.

The continued availability of the receivables securitization agreement requires UScellular to comply with certain negative and affirmative covenants, maintain certain financial ratios and provide representations on certain matters at the time of each borrowing. The covenants include the same financial covenants for UScellular as described above under the "Revolving Credit Agreements." TDS believes that UScellular was in compliance as of December 31, 2021, with all of the financial covenants and requirements set forth in its receivables securitization agreement.

Repurchase Agreement

In January 2022, UScellular, through a subsidiary (the repo subsidiary), entered into a repurchase agreement to borrow up to \$200 million, subject to the availability of eligible equipment installment plan receivables and the agreement of the lender. The transaction form involves the sale of receivables by the repo subsidiary and the commitment to repurchase at the end of the applicable repurchase term, which may extend up to one month. The transaction is accounted for as a one-month secured borrowing. The outstanding borrowings bear interest at a rate of SOFR plus 1.25%. Although the lender holds a security interest in the receivables, the repo subsidiary retains effective control of the receivables, and therefore, any activity associated with the repurchase agreement will be treated as a secured borrowing. UScellular will continue to report equipment installment plan receivables and any related balances on the Consolidated Balance Sheet. The expiration date of the repurchase agreement is in January 2023. As of January 31, 2022, UScellular held \$455 million of assets available for inclusion in the repurchase facility; these assets are distinct from the assets held by the USCC Master Note Trust for UScellular's receivables securitization agreement. In February 2022, the repo subsidiary borrowed \$60 million under the repurchase agreement.

UScellular entered into a performance guaranty whereby UScellular guarantees the performance of the repo subsidiary under the repurchase agreement.

Other Long-Term Debt

Long-term debt as of December 31, 2021 and 2020, was as follows:

					D	ece	ember 31, 20	21		December 31, 2020			20

In May 2021, UScellular issued \$500 million of 5.5% Senior Notes due in June 2070, and received cash proceeds of \$484 million after payment of debt issuance costs of \$16 million. These funds will be used for general corporate purposes. Interest on these notes is payable quarterly beginning in September 2021. UScellular may redeem these notes, in whole or in part, at any time after June 2026 at a redemption price equal to 100% of the principal amount redeemed plus accrued and unpaid interest.

TDS and UScellular redeemed outstanding Senior Notes in 2021. At time of redemption, \$57 million of interest expense was recorded related to unamortized debt issuance costs for the notes. The notes were redeemed at a price of 100% of the principal amount, including accrued and unpaid interest to the redemption date.

UScellular may redeem its 6.25% Senior Notes, 5.5% March 2070 Senior Notes and 5.5% June 2070 Senior Notes, in whole or in part at any time after the respective call date, at a redemption price equal to 100% of the principal amount redeemed plus accrued and unpaid interest. UScellular may redeem the 6.7% Senior Notes, in whole or in part, at any time prior to maturity at a redemption price equal to the greater of (a) 100% of the principal amount of such notes, plus accrued and unpaid interest, or (b) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the redemption date on a semi-annual basis at the Treasury Rate plus 30 basis points.

Interest on the Senior Notes outstanding at December 31, 2021, is payable quarterly, with the exception of UScellular's 6.7% Senior Notes for which interest is payable semi-annually.

The annual requirements for principal payments on long-term debt are approximately \$6 million, \$5 million, \$5 million, \$5 million and \$5 million for the years 2022 through 2026, respectively. These amounts do not include payments on the \$450 million of outstanding borrowings under the receivables securitization agreement. If the maturity date of the facility is not extended, principal repayments begin in January 2023. Principal repayments are not scheduled but are instead based on actual receivable collections. UScellular intends to extend the maturity date of the facility.

The covenants associated with TDS and its subsidiaries' long-term debt obligations, among other things, restrict TDS' ability, subject to certain exclusions, to incur additional liens, enter into sale and leaseback transactions, and sell, consolidate or merge assets.

UScellular's long-term debt notes do not contain any provisions resulting in acceleration of the maturities of outstanding debt in the event of a change in UScellular's credit rating.

Note 13 Employee Benefit Plans

Defined Contribution Plans

TDS sponsors a qualified noncontributory defined contribution pension plan. The plan provides benefits for certain employees of TDS Corporate, TDS Telecom and UScellular. Under this plan, pension costs are calculated separately for each participant and are funded annually. Total pension costs were \$16 million, \$16 million and \$17 million in 2021, 2020 and 2019, respectively. In addition, TDS sponsors a defined contribution retirement savings plan (401(k) plan). Total costs incurred from TDS' contributions to the 401(k) plan were \$27 million, \$27 million and \$25 million in 2021, 2020 and 2019, respectively.

TDS also sponsors an unfunded nonqualified deferred supplemental executive retirement plan for certain employees to offset the reduction of benefits caused by the limitation on annual employee compensation under the tax laws.

Other Post-Retirement Benefits

TDS sponsors a defined benefit post-retirement plan that provides medical benefits to retirees and that covers certain employees of TDS Corporate and TDS Telecom, which is not significant to TDS' financial position or operating results. The plan is contributory, with retiree contributions adjusted annually. TDS recognizes the funded status of the plan as a component of Other assets and deferred charges in the Consolidated Balance Sheet as of December 31, 2021 and 2020. Changes in the funded status are included in Accumulated other comprehensive income (loss) in the Consolidated Balance Sheet before affecting such amounts for income taxes to the extent that such changes are not recognized in earnings as a component of net periodic benefit cost.

The post-retirement benefit fund invests mainly in mutual funds that hold U.S. equities, international equities, and debt securities. The post-retirement benefit fund does not hold any debt or equity securities issued by TDS, UScellular or any related parties. The fair value of the plan assets of the post-retirement benefit fund was \$77 million and \$69 million as of December 31, 2021 and 2020, respectively. The total plan benefit obligations were \$54 million and \$57 million as of December 31, 2021 and 2020, respectively. Therefore, the total funded status was an asset of \$23 million and \$12 million as of December 31, 2021 and 2020, respectively.

TDS is not required to set aside current funds for its future retiree health insurance benefits. The decision to contribute to the plan assets is based upon several factors, including the funded status of the plan, market conditions, alternative investment opportunities, tax benefits and other circumstances. In accordance with applicable income tax regulations, annual contributions to fund the costs of future retiree medical benefits may not exceed certain thresholds. TDS has not determined whether it will make a contribution to the plan in 2022.

Note 14 Commitments and Contingencies

Indemnifications

TDS enters into agreements in the normal course of business that provide for indemnification of counterparties. The terms of the indemnifications vary by agreement. The events or circumstances that would require TDS to perform under these indemnities are transaction specific; however, these agreements may require TDS to indemnify the counterparty for costs and losses incurred from litigation or claims arising from the underlying transaction. TDS is unable to estimate the maximum potential liability for these types of indemnifications as the amounts are dependent on the outcome of future events, the nature and likelihood of which cannot be determined at this time. Historically, TDS has not made any significant indemnification payments under such agreements.

Legal Proceedings

TDS is involved or may be involved from time to time in legal proceedings before the FCC, other regulatory authorities, and/or various state and federal courts. If TDS believes that a loss arising from such legal proceedings is probable and can be reasonably estimated, an amount is accrued in the financial statements for the estimated loss. If only a range of loss can be determined, the best estimate within that range is accrued; if none of the estimates within that range is better than another, the low end of the range is accrued. The assessment of the expected outcomes of legal proceedings is a highly subjective process that requires judgments about future events. The legal proceedings are reviewed at least quarterly to determine the adequacy of accruals and related financial statement disclosures. The ultimate outcomes of legal proceedings could differ materially from amounts accrued in the financial statements.

TDS had no accrual with respect to legal proceedings and unasserted claims as of December 31, 2021. TDS accrued less than \$1 million with respect to legal proceedings and unasserted claims as of December 31, 2020. TDS is unable to estimate any contingent loss in excess of the amounts accrued.

In April 2018, the United States Department of Justice (DOJ) notified TDS that it was conducting inquiries of UScellular and TDS under the federal False Claims Act relating to UScellular's participation in wireless spectrum license auctions 58, 66, 73 and 97 conducted by the FCC. UScellular is/was a limited partner in several limited partnerships which qualified for the 25% bid credit in each auction. The investigation arose from civil actions under the Federal False Claims Act brought by private parties in the U.S. District Court for the Western District of Oklahoma. In November and December 2019, following the DOJ's investigation, the DOJ informed TDS and UScellular that it would not intervene in the above-referenced actions. Subsequently, the private party plaintiffs filed amended complaints in both actions in the U.S. District Court for the Western District of Oklahoma and are continuing the action on their own. In July 2020, these actions were transferred to the U.S. District Court for the District of Columbia. TDS and UScellular believe that UScellular's arrangements with the limited partnerships and the limited partnerships' participation in the FCC auctions complied with applicable law and FCC rules. At this time, TDS cannot predict the outcome of any proceeding.

Note 15 Variable Interest Entities

Consolidated VIEs

TDS consolidates VIEs in which it has a controlling financial interest as defined by GAAP and is therefore deemed the primary beneficiary. TDS reviews the criteria for a controlling financial interest at the time it enters into agreements and subsequently when events warranting reconsideration occur. These VIEs have risks similar to those described in the "Risk Factors" in TDS' Form 10-K for the year ended December 31, 2021.

UScellular formed USCC EIP LLC (Seller/Sub-Servicer), USCC Receivables Funding LLC (Transferor) and the Trust, collectively the special purpose entities (SPEs), to facilitate a securitized borrowing using its equipment installment plan receivables. Under a Receivables Sale Agreement, UScellular wholly-owned, majority-owned and unconsolidated entities, collectively referred to as "affiliated entities", transfer device equipment installment plan contracts to the Seller/Sub-Servicer. The Seller/Sub-Servicer aggregates device equipment installment plan contracts, and performs servicing, collection and all other administrative activities related to accounting for the equipment installment plan contracts. The Seller/Sub-Servicer sells the eligible equipment installment plan receivables to the Transferor, a bankruptcy remote entity, which subsequently sells the receivables to the Trust. The Trust, which is bankruptcy remote and isolated from the creditors of UScellular, will be responsible for issuing asset-backed variable funding notes (Notes), which are collateralized by the equipment installment plan receivables owned by the Trust. Given that UScellular has the power to direct the activities of these SPEs, and that these SPEs lack sufficient equity to finance their activities, UScellular is deemed to have a controlling financial interest in the SPEs and, therefore, consolidates them. All transactions with third parties (e.g., issuance of the asset-backed variable funding notes) will be accounted for as a secured borrowing due to the pledging of equipment installment plan contracts as collateral, significant continuing involvement in the transferred assets, subordinated interests of the cash flows, and continued evidence of control of the receivables. Refer to Note 12 — Debt, Receivables Securitization Agreement for additional details regarding the securitization agreement for which these entities were established.

The following VIEs were formed to participate in FCC auctions of wireless spectrum licenses and to fund, establish, and provide wireless service with respect to any FCC wireless spectrum licenses won in the auctions:

- Advantage Spectrum, L.P. (Advantage Spectrum) and Sunshine Spectrum, Inc., the general partner of Advantage Spectrum; and
- King Street Wireless, L.P. (King Street Wireless) and King Street Wireless, Inc., the general partner of King Street Wireless.

These particular VIEs are collectively referred to as designated entities. The power to direct the activities that most significantly impact the economic performance of these VIEs is shared. Specifically, the general partner of these VIEs has the exclusive right to manage, operate and control the limited partnerships and make all decisions to carry on the business of the partnerships. The general partner of each partnership needs the consent of the limited partner, an indirect TDS subsidiary, to sell or lease certain wireless spectrum licenses, to make certain large expenditures, admit other partners or liquidate the limited partnerships. Although the power to direct the activities of these VIEs is shared, TDS has the most significant level of exposure to the variability associated with the economic performance of the VIEs, indicating that TDS is the primary beneficiary of the VIEs. Therefore, in accordance with GAAP, these VIEs are consolidated.

TDS also consolidates other VIEs that are limited partnerships that provide wireless service. A limited partnership is a variable interest entity unless the limited partners hold substantive participating rights or kick-out rights over the general partner. For certain limited partnerships, UScellular is the general partner and manages the operations. In these partnerships, the limited partners do not have substantive kick-out or participating rights and, further, such limited partners do not have the authority to remove the general partner. Therefore, these limited partnerships also are recognized as VIEs and are consolidated under the variable interest model.

The following table presents the classification and balances of the consolidated VIEs' assets and liabilities in TDS' Consolidated Balance Sheet.

December 31,	2021	2020
(Dollars in millions)		
Assets		
Cash and cash equivalents	\$ 22	\$ 18
Short-term investments	_	3
Accounts receivable	692	638
Inventory, net	2	3
Other current assets	44	21
Licenses	637	637
Property, plant and equipment, net	108	99
Operating lease right-of-use assets	42	37
Other assets and deferred charges	382	347
Total assets	\$ 1,929	\$ 1,803
Liabilities		
Current liabilities	\$ 28	\$ 26
Long-term operating lease liabilities	37	34
Other deferred liabilities and credits	23	19
Total liabilities ¹	\$ 88	\$ 79

¹ Total liabilities does not include amounts borrowed under the receivables securitization agreement. See Note 12 – Debt for additional information.

Unconsolidated VIEs

TDS manages the operations of and holds a variable interest in certain other limited partnerships, but is not the primary beneficiary of these entities and, therefore, does not consolidate them under the variable interest model.

TDS' total investment in these unconsolidated entities was \$4 million and \$5 million at December 31, 2021 and 2020, respectively, and is included in Investments in unconsolidated entities in TDS' Consolidated Balance Sheet. The maximum exposure from unconsolidated VIEs is limited to the investment held by TDS in those entities.

Other Related Matters

TDS made contributions, loans or advances to its VIEs totaling \$36 million, \$111 million and \$255 million during 2021, 2020 and 2019, respectively; of which \$83 million in 2020 and \$214 million in 2019 are related to USCC EIP LLC as discussed above. TDS may agree to make additional capital contributions and/or advances to these or other VIEs and/or to their general partners to provide additional funding for operations or the development of wireless spectrum licenses granted in various auctions. TDS may finance such amounts with a combination of cash on hand, borrowings under its revolving credit or receivables securitization agreements and/or other long-term debt. There is no assurance that TDS will be able to obtain additional financing on commercially reasonable terms or at all to provide such financial support.

The limited partnership agreement of Advantage Spectrum also provides the general partner with a put option whereby the general partner may require the limited partner, a subsidiary of UScellular, to purchase its interest in the limited partnership. The general partner's put option related to its interest in Advantage Spectrum was not exercised during the first exercise period and will be exercisable again in the third quarter of 2022. The greater of the carrying value of the general partner's investment or the value of the put option, net of any borrowings due to TDS, is recorded as Noncontrolling interests with redemption features in TDS' Consolidated Balance Sheet. Also in accordance with GAAP, minority share of income or changes in the redemption value of the put option, net of interest accrued on the loans, are recorded as a component of Net income attributable to noncontrolling interests, net of tax, in TDS' Consolidated Statement of Operations.

Note 16 Noncontrolling Interests

The following schedule discloses the effects of Net income attributable to TDS shareholders and changes in TDS' ownership interest in UScellular on TDS' equity:

Year Ended December 31,	2021	2020	2019
(Dollars in millions)			
Net income attributable to TDS shareholders	\$ 156	\$ 226	\$ 121
Transfers (to) from noncontrolling interests			
Change in TDS' Capital in excess of par value from UScellular's issuance of UScellular shares	(49)	(38)	(23)
Change in TDS' Capital in excess of par value from UScellular's repurchases of UScellular shares	17	14	6
Purchase of ownership in subsidiaries from noncontrolling interests	_	(9)	_
Net transfers (to) from noncontrolling interests	(32)	(33)	(17)
Net income attributable to TDS shareholders after transfers (to) from noncontrolling interests	\$ 124	\$ 193	\$ 104

Mandatorily Redeemable Noncontrolling Interests in Finite-Lived Subsidiaries

TDS' consolidated financial statements include certain noncontrolling interests that meet the GAAP definition of mandatorily redeemable financial instruments. These mandatorily redeemable noncontrolling interests represent interests held by third parties in consolidated partnerships, where the terms of the underlying partnership agreement provide for a defined termination date at which time the assets of the subsidiary are to be sold, the liabilities are to be extinguished and the remaining net proceeds are to be distributed to the noncontrolling interest holders and TDS in accordance with the respective partnership agreements. The termination dates of these mandatorily redeemable noncontrolling interests range from 2085 to 2092.

The estimated aggregate amount that would be due and payable to settle all of these noncontrolling interests, assuming an orderly liquidation of the finite-lived consolidated partnerships on December 31, 2021, net of estimated liquidation costs, is \$21 million. This amount excludes redemption amounts recorded in Noncontrolling interests with redemption features in the Consolidated Balance Sheet. The estimate of settlement value was based on certain factors and assumptions which are subjective in nature. Changes in those factors and assumptions could result in a materially larger or smaller settlement amount. The corresponding carrying value of the mandatorily redeemable noncontrolling interests in finite-lived consolidated partnerships at December 31, 2021, was \$6 million, and is included in Noncontrolling interests in the Consolidated Balance Sheet. The excess of the aggregate settlement value over the aggregate carrying value of these mandatorily redeemable noncontrolling interests is due primarily to the unrecognized appreciation of the noncontrolling interest holders' share of the underlying net assets in the consolidated partnerships. Neither the noncontrolling interest holders' share, nor TDS' share, of the appreciation of the underlying net assets of these subsidiaries is reflected in the consolidated financial statements.

Note 17 Shareholders' Equity

Common Stock

Series A Common Shares are convertible on a share-for-share basis into Common Shares. In matters other than the election of directors, each Series A Common Share is entitled to ten votes per share, compared to one vote for each Common Share. The Series A Common Shares are entitled to elect eight directors, and the Common Shares elect four. TDS has reserved 7,331,000 Common Shares at December 31, 2021, for possible issuance upon conversion of Series A Common Shares.

On August 2, 2013, the Board of Directors of TDS authorized a \$250 million stock repurchase program for the purchase of TDS Common Shares from time to time pursuant to open market purchases, block transactions, private purchases or otherwise, depending on market conditions. This authorization does not have an expiration date. As of December 31, 2021, the maximum dollar value of TDS Common Shares that may yet be purchased under TDS' program was \$177 million.

In November 2009, UScellular announced by Form 8-K that the Board of Directors of UScellular authorized the repurchase of up to 1,300,000 Common Shares on an annual basis beginning in 2009 and continuing each year thereafter, on a cumulative basis. In December 2016, the UScellular Board amended this authorization to provide that, beginning on January 1, 2017, the authorized repurchase amount with respect to a particular year will be any amount from zero to 1,300,000 Common Shares, as determined by the Pricing Committee of the Board of Directors, and that if the Pricing Committee did not specify an amount for any year, such amount would be zero for such year. The Pricing Committee has not specified any increase in the authorization since that time. The Pricing Committee also was authorized to decrease the cumulative amount of the authorization at any time, but has not taken any action to do so at this time. As of December 31, 2021, the total cumulative amount of Common Shares authorized to be purchased is 3,517,000. The authorization provides that share repurchases will be made pursuant to open market purchases, block purchases, private purchases, or otherwise, depending on market prices and other conditions. This authorization does not have an expiration date.

Preferred Stock

In March 2021, TDS issued 16,800 shares of TDS' 6.625% Series UU Cumulative Redeemable Perpetual Preferred Stock (Preferred Shares) for \$25,000 per Preferred Share, for total gross proceeds of \$420 million. The Preferred Shares were issued to a depositary to facilitate the issuance of 16,800,000 depositary shares (Depositary Shares), each representing 1/1,000th of a Preferred Share. TDS received net cash proceeds of \$406 million after payment of issuance costs of \$14 million. The proceeds were for general corporate purposes, including but not limited to, the funding of capital expenditures associated with TDS Telecom's fiber program and retirement of existing debt.

In August 2021, TDS issued 27,600 shares of TDS' 6.000% Series VV Preferred Shares for \$25,000 per Preferred Share, for total gross proceeds of \$690 million. The Preferred Shares were issued to a depositary to facilitate the issuance of 27,600,000 Depositary Shares, each representing 1/1,000th of a Preferred Share. TDS received net cash proceeds of \$668 million after payment of issuance costs of \$22 million. The proceeds were for general corporate purposes, including but not limited to, the funding of capital expenditures associated with TDS Telecom's fiber program and retirement of existing debt.

Each holder of Depositary Shares is entitled to a proportional fractional interest in all rights and preferences of the Preferred Shares, including dividend, voting, redemption and liquidation rights. The Preferred Shares have no maturity or mandatory redemption date and are not redeemable at the option of the holders.

Dividends on the Preferred Shares, when declared, are payable quarterly at a rate equal to 6.625% per year for the Series UU Preferred Shares and 6.000% for the Series VV Preferred Shares. As of December 31, 2021, there were no dividends in arrears. The Preferred Shares rank senior to TDS' Common Shares and junior to all of TDS' existing and future indebtedness outstanding under TDS' credit facilities and unsecured senior notes. The Series VV Preferred Shares rank on parity with the Series UU Preferred Shares. Upon voluntary or involuntary liquidation, holders of Preferred Shares are entitled to a liquidating distribution of \$25,000 per Preferred Share after satisfaction of liabilities and obligations to creditors. The Preferred Shares have voting rights only if certain limited conditions are met.

TDS may, at its option, redeem the Series UU Preferred Shares (a) in whole or in part, on or after March 31, 2026 at a redemption price of \$25,000 per Preferred Share, or (b) in whole but not in part, any time prior to March 31, 2026, within 120 days after a credit rating downgrade as specified in the offering prospectus, at a redemption price of \$25,500 per Preferred Share, or (c) in whole or in part, within 120 days of the occurrence of a change in control as specified in the offering prospectus, at a redemption price of \$25,000 per Preferred Share, plus, in each case, all accumulated and unpaid dividends (whether or not declared) up to the redemption date.

TDS may, at its option, redeem the Series VV Preferred Shares (a) in whole or in part, on or after September 30, 2026 at a redemption price of \$25,000 per Preferred Share, or (b) in whole but not in part, any time prior to September 30, 2026, within 120 days after a credit rating downgrade as specified in the offering prospectus, at a redemption price of \$25,500 per Preferred Share, or (c) in whole or in part, within 120 days of the occurrence of a change in control as specified in the offering prospectus, at a redemption price of \$25,000 per Preferred Share, plus, in each case, all accumulated and unpaid dividends (whether or not declared) up to the redemption date.

The Preferred Shares are convertible, at the option of the holder, to shares of TDS Common Shares upon a change of control as specified in the offering prospectus. The conversion right is the lesser of (a) Common Shares equal to \$25,000 per Preferred Share plus any accumulated and unpaid dividends, divided by the TDS Common Stock price, or (b) 2,773.200 Common Shares for each Series UU Preferred Share and 2,584.000 Common Shares for each Series VV Preferred Share, which represents one-half the conversion rate at the time of closing. In both cases, certain other adjustments and provisions may impact the conversion.

Tax-Deferred Savings Plan

At December 31, 2021,TDS has reserved 90,000 Common Shares for issuance under the TDS Tax-Deferred Savings Plan, a qualified profit-sharing plan pursuant to Sections 401(a) and 401(k) of the Internal Revenue Code. Participating employees have the option of investing their contributions and TDS' contributions in a TDS Common Share fund, a UScellular Common Share fund or certain unaffiliated funds.

Note 18 Stock-Based Compensation

TDS Consolidated

The following table summarizes stock-based compensation expense recognized during 2021, 2020 and 2019:

Year Ended December 31,	2021	2020	2019
(Dollars in millions)			
Stock option awards	\$ 2	\$ 3	\$ 3
Restricted stock unit awards	29	30	33
Performance share unit awards	16	17	21
Deferred compensation bonus and matching stock unit awards	_	1	_
Awards under Non-Employee Director compensation plan	2	2	2
Total stock-based compensation, before income taxes	 49	53	59
Income tax benefit	(12)	(13)	(15)
Total stock-based compensation expense, net of income taxes	\$ 37	\$ 40	\$ 44

At December 31, 2021, unrecognized compensation cost for all stock-based compensation awards was \$60 million and is expected to be recognized over a weighted average period of 2.1 years.

The following table provides a summary of the classification of stock-based compensation expense included in the Consolidated Statement of Operations for the years ended:

December 31,	2021	2020	2019	
(Dollars in millions)				
Selling, general and administrative expense	\$ 44	\$ 48	\$	54
Cost of services expense	5	5		5
Total stock-based compensation expense	\$ 49	\$ 53	\$	59

TDS' tax benefits realized from the exercise of stock options and the vesting of other awards totaled \$15 million in 2021.

TDS (Excluding UScellular)

The information in this section relates to stock-based compensation plans using the equity instruments of TDS. Participants in these plans are employees of TDS Corporate and TDS Telecom and Non-employee Directors of TDS. Information related to plans using the equity instruments of UScellular are shown in the UScellular section following the TDS section.

Under the TDS Long-Term Incentive Plans, TDS may grant fixed and performance-based incentive and non-qualified stock options, restricted stock, restricted stock units, and deferred compensation stock unit awards to key employees.

TDS had reserved 16,350,000 Common Shares at December 31, 2021, for equity awards granted and to be granted under the TDS Long-Term Incentive Plans in effect. At December 31, 2021, the only types of awards outstanding are fixed non-qualified stock option awards, restricted stock unit awards, performance share awards and deferred compensation stock unit awards.

TDS has also established a Non-Employee Directors' compensation plan under which it has reserved 132,000 TDS Common Shares at December 31, 2021, for issuance as compensation to members of the Board of Directors who are not employees of TDS.

TDS uses treasury stock to satisfy requirements for shares issued pursuant to its various stock-based compensation plans.

Long-Term Incentive Plan - Stock Options

Stock options granted to key employees are exercisable over a specified period not in excess of ten years. Stock options generally vest over periods up to three years from the date of grant. Stock options outstanding at December 31, 2021, expire between 2022 and 2031. However, vested stock options typically expire 30 days after the effective date of an employee's termination of employment for reasons other than retirement. Employees who leave at the age of retirement have 90 days (or one year if they satisfy certain requirements) within which to exercise their vested stock options. The exercise price of options equals the market value of TDS common stock on the date of grant.

TDS estimated the fair value of stock options granted in 2021, 2020 and 2019 using the Black-Scholes valuation model and the assumptions shown in the table below:

	2021	2020	2019
Expected life	6.3 years	6.2 years	6.2 years
Expected annual volatility rate	36.6 %	35.0 %	29.0 %
Dividend yield	2.8 %	3.6 %	2.1 %
Risk-free interest rate	1.1 %	0.5 %	2.4 %

Pre-vesting forfeitures and expected life are estimated based on historical experience related to similar awards, giving considerations to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior. TDS believes that its historical experience provides the best estimates of future pre-vesting forfeitures and future expected life. The expected volatility assumption is based on historical volatility of TDS' common stock over a period commensurate with the expected life. The dividend yield assumption is equal to the dividends declared in the most recent year as a percentage of the share price on the date of grant. The risk-free interest rate assumption is determined using the U.S. Treasury Yield Curve Rate with a term length that approximates the expected life of the stock options.

Walada a

Weighted

A summary of TDS stock options (total and portion exercisable) and changes during 2021 is presented in the tables and narrative below.

Common Share Options	Number of Options	Veighted Average rcise Prices	Aggregate Intrinsic Val (in millions	ue	Average Remaining Contractual Life (in years)
Outstanding at December 31, 2020	4,286,000	\$ 25.94			
Granted	289,000	\$ 25.36			
Exercised	(23,000)	\$ 21.54			
Forfeited	(6,000)	\$ 23.75			
Expired	(458,000)	\$ 29.73			
Outstanding at December 31, 2021	4,088,000	\$ 25.50	\$	_	4.2
(3,264,000 exercisable)		\$ 25.91	\$	_	3.1

The weighted average grant date fair value per share of the TDS stock options granted in 2021, 2020 and 2019 was \$6.86, \$4.24 and \$7.70, respectively. The aggregate intrinsic value of TDS stock options exercised in 2021 and 2019 was less than \$1 million and \$7 million, respectively. There were no TDS stock options exercised in 2020. The aggregate intrinsic value at December 31, 2021, presented in the table above represents the total pre-tax intrinsic value (the difference between TDS' closing stock prices and the exercise price, multiplied by the number of in-the-money options) that would have been received by option holders had all options been exercised on December 31, 2021.

Long-Term Incentive Plans - Restricted Stock Units

TDS also grants restricted stock unit awards to key employees. Each outstanding restricted stock unit is convertible into one Common Share Award. The restricted stock unit awards currently outstanding were granted in 2019, 2020 and 2021 and will vest in 2022, 2023 and 2024, respectively.

TDS estimates the fair value of restricted stock units by reducing the grant-date price of TDS' shares by the present value of the dividends expected to be paid on the underlying shares during the requisite service period, discounted at the appropriate risk-free interest rate, since employees are not entitled to dividends declared on the underlying shares while the restricted stock is unvested. The fair value is then recognized as compensation cost on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period.

A summary of TDS nonvested restricted stock units and changes during 2021 is presented in the table below:

Common Restricted Stock Units	Number	Average Grant Date Fair Value		
Nonvested at December 31, 2020	1,496,000	\$	22.26	
Granted	580,000	\$	23.34	
Vested	(451,000)	\$	23.69	
Forfeited	(33,000)	\$	22.08	
Nonvested at December 31, 2021	1,592,000	\$	22.25	

The total fair values as of the respective vesting dates of restricted stock units vested during 2021, 2020 and 2019 were \$11 million, \$7 million and \$11 million, respectively. The weighted average grant date fair value per share of the restricted stock units granted in 2021, 2020 and 2019 was \$23.34, \$17.19 and \$28.81, respectively.

Long-Term Incentive Plans - Performance Share Units

Beginning in 2016, TDS granted performance share units to certain TDS executive officers, and beginning in 2019, to certain key TDS Corporate and TDS Telecom employees. Each recipient may be entitled to shares of TDS common stock equal to 0% to 200% of a communicated target award depending on the achievement of predetermined performance-based and market-based operating targets over three years. Performance-based operating targets for the TDS awards include Total Revenue and Return on Capital. Market-based operating targets are measured against TDS' total shareholder return relative to a defined peer group. Performance-based operating targets for the TDS Telecom employees' awards include Total Revenue, Return on Capital and Adjusted EBITDA. Performance shares accumulate dividend equivalents, which are forfeitable if the performance metrics are not achieved. If the predetermined performance-based and market-based operating targets are met, the units granted in 2019, 2020 and 2021 will vest in 2022, 2023 and 2024, respectively.

TDS estimates fair value of performance-based operating targets using TDS' closing stock price on the date of grant. An estimate of the number of performance units expected to vest based upon achieving the performance-based operating targets is made and the fair value is expensed on a straight-line basis over the requisite service period. Each reporting period these estimates are reviewed and stock compensation expense is adjusted accordingly to reflect the new estimates of total units expected to vest. If any part of the performance share units do not vest as a result of the established performance-based operating targets not being achieved, the related stock compensation expense is reversed.

TDS estimates the market-based operating target's fair value using an internally developed valuation model. This estimated fair value approximated TDS' closing stock price at the date of grant for market-based share units granted in 2021, 2020 and 2019. This market-based operating target value determined at the date of grant is expensed on a straight-line basis over the requisite service period and the stock compensation expense is not adjusted during the performance period for the subsequent changes in the value of the market-based unit awards and will not be reversed even if the market-based operating target is not achieved.

A summary of TDS nonvested performance share units and changes during 2021 is presented in the table below:

Common Performance Share Units	Number	Weig Average Date Fa	e Grant
Nonvested at December 31, 2020	924,000	\$	23.18
Granted	303,000	\$	25.36
Vested	(152,000)	\$	25.70
Change in units based on approved performance factors	38,000	\$	25.70
Forfeited	(61,000)	\$	24.36
Accumulated dividend equivalents	33,000	\$	23.29
Nonvested at December 31, 2021	1,085,000	\$	23.46

The total fair value of performance share units that vested during 2021, 2020 and 2019 was \$3 million, \$2 million and \$4 million, respectively. The weighted average grant date fair value per share of the performance share units granted in 2021, 2020 and 2019 was \$25.36, \$19.15 and \$30.72, respectively.

Long-Term Incentive Plans - Deferred Compensation Stock Units

Certain TDS employees may elect to defer receipt of all or a portion of their annual bonuses and to receive a company matching contribution on the amount deferred. All bonus compensation that is deferred by employees electing to participate is immediately vested and is deemed to be invested in TDS Common Share units. The amount of TDS' matching contribution depends on the portion of the annual bonus that is deferred. Participants receive a 25% stock unit match for amounts deferred up to 50% of their total annual bonus and a 33% match for amounts that exceed 50% of their total annual bonus; such matching contributions also are deemed to be invested in TDS Common Share units and vest over three years.

Compensation of Non-Employee Directors

TDS issued 50,000, 43,000 and 28,000 Common Shares under its Non-Employee Director plan in 2021, 2020 and 2019, respectively.

Dividend Reinvestment Plans

TDS had reserved 2,329,000 Common Shares at December 31, 2021, for issuance under Automatic Dividend Reinvestment and Stock Purchase Plans and 78,000 Series A Common Shares for issuance under the Series A Common Share Automatic Dividend Reinvestment Plan. These plans enabled holders of TDS' Common Shares to reinvest cash dividends in Common Shares and holders of Series A Common Shares to reinvest cash dividends in Series A Common Shares. The purchase price of the shares is 95% of the market value, based on the average of the daily high and low sales prices for TDS' Common Shares on the New York Stock Exchange for the ten trading days preceding the date on which the purchase is made. These plans are considered non-compensatory plans; therefore, no compensation expense is recognized for stock issued under these plans.

UScellular

The information in this section relates to stock-based compensation plans using the equity instruments of UScellular. Participants in these plans are employees of UScellular and Non-employee Directors of UScellular. Information related to plans using the equity instruments of TDS are shown in the previous section.

UScellular has established the following stock-based compensation plans: Long-Term Incentive Plans and a Non-Employee Director compensation plan.

Under the UScellular Long-Term Incentive Plans, UScellular may grant fixed and performance-based incentive and non-qualified stock options, restricted stock, restricted stock units, and deferred compensation stock unit awards to key employees. At December 31, 2021, the only types of awards outstanding are fixed non-qualified stock option awards, restricted stock unit awards, performance share awards and deferred compensation stock unit awards.

Under the Non-Employee Director compensation plan, UScellular may grant Common Shares to members of the Board of Directors who are not employees of UScellular or TDS.

At December 31, 2021, UScellular had reserved 11,370,000 Common Shares for equity awards granted and to be granted under the Long-Term Incentive Plans and 84,000 Common Shares for issuance under the Non-Employee Director compensation plan.

UScellular uses treasury stock to satisfy requirements for Common Shares issued pursuant to its various stock-based compensation plans.

Long-Term Incentive Plans - Stock Options

UScellular's last stock option grant occurred in 2016.

Stock options outstanding, and the related weighted average exercise price, at December 31, 2021 and 2020 were 378,000 units at \$42.18 and 418,000 units at \$42.23, respectively. All stock options are exercisable and expire between 2022 and 2026.

The aggregate intrinsic value of UScellular stock options exercised in 2021 and 2019 was less than \$1 million and \$3 million, respectively. No stock options were exercised in 2020.

Long-Term Incentive Plans - Restricted Stock Units

Restricted stock unit awards granted to key employees generally vest after three years. The restricted stock unit awards currently outstanding were granted in 2019, 2020 and 2021 and will vest in 2022, 2023 and 2024, respectively.

UScellular estimates the fair value of restricted stock units based on the closing market price of UScellular shares on the date of grant. The fair value is then recognized as compensation cost on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period.

A summary of UScellular nonvested restricted stock units and changes during 2021 is presented in the table below:

Common Restricted Stock Units	Number	Average Grant Date Fair Value			
Nonvested at December 31, 2020	1,660,000	\$	36.43		
Granted	672,000	\$	36.68		
Vested	(609,000)	\$	39.10		
Forfeited	(122,000)	\$	35.77		
Nonvested at December 31, 2021	1,601,000	\$	35.57		

The total fair value of restricted stock units that vested during 2021, 2020 and 2019 was \$22 million, \$20 million and \$25 million, respectively. The weighted average grant date fair value per share of the restricted stock units granted in 2021, 2020 and 2019 was \$36.68, \$29.18 and \$46.81, respectively.

Beginning in 2017, UScellular granted performance share units to key employees. The performance share units generally vest after three years. Beginning with the 2021 grants, each recipient may be entitled to shares of UScellular common stock equal to 0% to 200% of a communicated target award depending on the achievement of a predetermined performance based operating target over the performance period, which is generally a three-year period beginning on January 1 in the year of grant to December 31 of the third year. The performance-based operating target for the 2021 grants is Return on Capital.

Prior to the 2021 grants, each recipient was entitled to shares of UScellular common stock equal to 50% to 200% of a communicated target award depending on the achievement of predetermined performance-based operating targets over the performance period, which was generally a one-year period beginning on January 1 in the year of grant to December 31 in the year of grant. The remaining time through the end of the vesting period is considered the "time-based period". Performance-based operating targets for grants made in 2020 included Consolidated Total Service Revenues, Consolidated Operating Cash Flow, Consolidated Capital Expenditures and Postpaid Handset Voluntary Defections; and for grants made prior to 2020 included Simple Free Cash Flow, Consolidated Total Operating Revenues and Postpaid Handset Voluntary Defections. Grants made prior to 2021 are subject to vesting during the time-based period and their performance share unit award agreements provide that in no event shall the awards be less than 50% of the target opportunity as of their grant dates. The performance share units currently outstanding were granted in 2019, 2020 and 2021 and will vest in 2022, 2023 and 2024, respectively.

Additionally, UScellular granted performance share units during 2020 to a newly appointed President and Chief Executive Officer. The recipient may be entitled to shares of UScellular common stock equal to 100% of the communicated target award depending on the achievement of predetermined performance-based operating targets over the performance period, which is any two calendar-year period commencing no earlier than January 1, 2021 and ending no later than December 31, 2026. Performance-based operating targets include Average Total Revenue Growth and Average Annual Return on Capital. If one, or both, of the performance targets are not satisfied, the award will be forfeited.

UScellular estimates the fair value of performance share units using UScellular's closing stock price on the date of grant. An estimate of the number of performance share units expected to vest based upon achieving the performance-based operating targets is made and the aggregate fair value is expensed on a straight-line basis over the requisite service period. Each reporting period, during the performance period, the estimate of the number of performance share units expected to vest is reviewed and stock compensation expense is adjusted as appropriate to reflect the revised estimate of the aggregate fair value of the performance share units expected to vest.

A summary of UScellular's nonvested performance share units and changes during 2021 is presented in the table below:

Common Performance Share Units	Number	Average Date Fai	Grant
Nonvested at December 31, 2020	1,305,000	\$	36.60
Granted	394,000	\$	37.67
Vested	(601,000)	\$	39.50
Change in units based on approved performance factors	42,000	\$	28.94
Forfeited	(91,000)	\$	35.13
Nonvested at December 31, 2021	1,049,000	\$	35.17

Waiahtad

The total fair value of performance share units that vested during 2021, 2020 and 2019 was \$22 million, \$11 million and less than \$1 million, respectively. The weighted average grant date fair value per share of the performance share units granted in 2021, 2020 and 2019 was \$37.67, \$29.71 and \$46.43, respectively.

Long-Term Incentive Plans - Deferred Compensation Stock Units

Certain UScellular employees may elect to defer receipt of all or a portion of their annual bonuses and to receive a company matching contribution on the amount deferred. All bonus compensation that is deferred by employees electing to participate is immediately vested and is deemed to be invested in UScellular Common Share stock units. Beginning with the 2021 performance year, the amount of UScellular's matching contribution is a 33% match for the amount of their total annual bonus that is deferred into the program. Prior to the 2021 performance year, the amount of UScellular's matching contribution was a 25% match for amounts deferred up to 50% of their total annual bonus and a 33% match for amounts that exceeded 50% of their total annual bonus. Matching contributions are also deemed to be invested in UScellular Common Share stock units and vest over three years.

Compensation of Non-Employee Directors

UScellular issued 20,000, 19,000 and 13,000 Common Shares in 2021, 2020 and 2019, respectively, under its Non-Employee Director compensation plan.

Note 19 Business Segment Information

UScellular and TDS Telecom are billed for services they receive from TDS, consisting primarily of information processing, accounting, finance, and general management services. Such billings are based on expenses specifically identified to UScellular and TDS Telecom and on allocations of common expenses. Management believes the method used to allocate common expenses is reasonable and that all expenses and costs applicable to UScellular and TDS Telecom are reflected in the accompanying business segment information on a basis that is representative of what they would have been if UScellular and TDS Telecom operated on a stand-alone basis. During the first quarter of 2021, TDS modified its reporting segment structure to combine its Wireline and Cable segments into a single reportable segment for TDS Telecom. TDS Telecom believes this presentation better articulates its progress and performance against its strategy, which includes a focus on overall broadband growth and future fiber deployment across its markets. This change also reflects TDS Telecom's progress in aligning its organizational, operational and support structures to leverage one cost base to better support its customers across all of its markets. Prior periods have been updated to conform to this revised presentation.

Financial data for TDS' reportable segments for 2021, 2020 and 2019, is as follows. See Note 1 — Summary of Significant Accounting Policies for additional information.

Interest paid	\$	177	\$ 160	\$ 162
Income taxes paid, net of (refunds received)		6	(23)	44

Adjusted earnings before interest, taxes, depreciation, amortization and accretion (Adjusted EBITDA) is a segment measure reported to the chief operating decision maker for purposes of assessing the segments' performance. Adjusted EBITDA is defined as net income, adjusted for the items set forth in the reconciliation above. TDS believes Adjusted EBITDA is a useful measure of TDS' operating results before significant recurring non-cash charges, gains and losses, and other items as presented above as they provide additional relevant and useful information to investors and other users of TDS' financial data in evaluating the effectiveness of its operations and underlying business trends in a manner that is consistent with management's evaluation of business performance.

Following are supplemental cash flow disclosures regarding transactions related to stock-based compensation awards. In certain situations, TDS and UScellular withhold shares that are issuable upon the exercise of stock options or the vesting of restricted shares to cover, and with a value equivalent to, the exercise price and/or the amount of taxes required to be withheld from the stock award holder at the time of the exercise or vesting. TDS and UScellular then pay the amount of the required tax withholdings to the taxing authorities in cash.

Note 21 Certain Relationships and Related Transactions

The following persons are partners of Sidley Austin LLP, the principal law firm of TDS and its subsidiaries: Walter C.D. Carlson, a trustee and beneficiary of a voting trust that controls TDS, the non-executive Chairman of the Board and member of the Board of Directors of TDS and a director of UScellular, a subsidiary of TDS; and John P. Kelsh, the General Counsel and/or an Assistant Secretary of TDS and UScellular and certain other subsidiaries of TDS. Walter C.D. Carlson does not provide legal services to TDS or its subsidiaries. TDS, UScellular and their subsidiaries incurred legal costs from Sidley Austin LLP of \$10 million, \$11 million and \$10 million in 2021, 2020 and 2019, respectively.

The Audit Committee of the Board of Directors of TDS is responsible for the review and evaluation of all related-party transactions as such term is defined by the rules of the New York Stock Exchange.

Reports of Management

Management's Responsibility for Financial Statements

Management of Telephone and Data Systems, Inc. has the responsibility for preparing the accompanying consolidated financial statements and for their integrity and objectivity. The statements were prepared in accordance with accounting principles generally accepted in the United States of America and, in management's opinion, were fairly presented. The financial statements included amounts that were based on management's best estimates and judgments. Management also prepared the other information in the annual report and is responsible for its accuracy and consistency with the financial statements.

PricewaterhouseCoopers LLP (PCAOB ID 238), an independent registered public accounting firm, has audited these consolidated financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States) and has expressed herein its unqualified opinion on these financial statements.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. TDS' internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (GAAP). TDS' internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and, where required, the board of directors of the issuer; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the issuer's assets that could have a material effect on the interim or annual consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of TDS' management, including its principal executive officer and principal financial officer, TDS conducted an evaluation of the effectiveness of its internal control over financial reporting as of December 31, 2021, based on the criteria established in the 2013 version of *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management has concluded that TDS maintained effective internal control over financial reporting as of December 31, 2021, based on criteria established in the 2013 version of *Internal Control — Integrated Framework* issued by the COSO.

The effectiveness of TDS' internal control over financial reporting as of December 31, 2021, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in the firm's report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Telephone and Data Systems, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheet of Telephone and Data Systems, Inc. and its subsidiaries ("the Company") as of December 31, 2021 and 2020, and the related consolidated statements of operations, of comprehensive income, of changes in equity, and of cash flows for each of the three years in the period ended December 31, 2021, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2021 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for leases in 2019.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Intangible Asset Impairment Assessment – Wireless Spectrum Licenses (UScellular Licenses)

As described in Notes 1 and 7 to the consolidated financial statements, the Company's consolidated licenses balance was \$4,097 million as of December 31, 2021, of which \$4,092 million relates to the UScellular Licenses. Management performs its annual impairment assessment of licenses as of November 1 of each year or more frequently if there are events or circumstances that cause management to believe it is more likely than not that the carrying value of licenses exceeds fair value. A qualitative impairment assessment was performed as of November 1, 2021, to determine whether the wireless spectrum licenses were impaired. As disclosed by management, the qualitative assessment considered several qualitative factors, including analyst estimates of wireless spectrum license values which contemplated recent spectrum auction results, recent UScellular and other market participant transactions and other industry and market factors. Based on this assessment, management concluded that it was not more likely than not that the carrying value of the wireless spectrum licenses in each unit of accounting exceeded their respective fair values. Therefore, no quantitative impairment evaluation was completed.

The principal considerations for our determination that performing procedures relating to the intangible asset impairment assessment for the UScellular Licenses is a critical audit matter are (i) the significant judgment by management when performing the qualitative impairment assessment; and (ii) a high degree of auditor judgment and subjectivity in performing procedures and evaluating management's qualitative impairment assessment.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's annual intangible asset impairment assessment, including management's review of qualitative factors affecting the UScellular Licenses. These procedures also included, among others, evaluating management's qualitative assessment by (i) obtaining analyst estimates of wireless spectrum license values; and (ii) considering recent UScellular and other market participant transactions and external market and industry data.

/s/ PricewaterhouseCoopers LLP Chicago, Illinois February 17, 2022

We have served as the Company's auditor since 2002.

Telephone and Data Systems, Inc. Shareholder Information

Common Stock Information

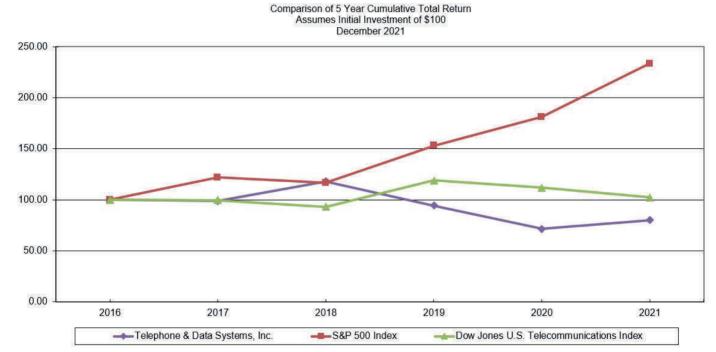

TDS' Common Shares are listed on the New York Stock Exchange under the symbol "TDS." As of January 31, 2022, the last trading day of the month, TDS Common Shares were held by 1,607 record owners, and the Series A Common Shares were held by 64 record owners.

Stock Performance Graph

The following chart provides a comparison of TDS' cumulative total return to shareholders (stock price appreciation plus dividends) during the previous five years to the returns of the Standard & Poor's 500 Composite Stock Price Index and the Dow Jones U.S. Telecommunications Index.

Note: Cumulative total return assumes reinvestment of dividends.

	2016	2017	2018	2019	2020	2021
Telephone and Data Systems Common Shares (NYSE: TDS) \$	100	\$ 98.62	\$ 117.93	\$ 94.36	\$ 71.43	\$ 80.06
S&P 500 Index	100	121.83	116.49	153.17	181.35	233.41
Dow Jones U.S. Telecommunications Index	100	99.72	93.02	118.95	111.91	102.21

The comparison above assumes \$100.00 invested at the close of trading on the last trading day preceding the first day of 2016, in TDS Common Shares, S&P 500 Index and the Dow Jones U.S. Telecommunications Index.

Dividend Reinvestment Plan

TDS' dividend reinvestment plans provide its common shareholders with a convenient and economical way to participate in the future growth of TDS. Holders of record of ten (10) or more Common Shares may purchase Common Shares with their reinvested dividends at a five percent discount from market price. Common Shares may also be purchased on a monthly basis through optional cash payments by participants in this plan. The initial ten (10) shares cannot be purchased directly from TDS. An authorization card and prospectus will be mailed automatically by the transfer agent to all registered record holders with ten (10) or more shares. Once enrolled in the plan, there are no brokerage commissions or service charges for purchases made under the plan.

Investor relations

TDS' annual report, SEC filings and news releases are available to investors, securities analysts and other members of the investment community. These reports are provided, without charge, upon request to our Investor Relations department at the address below. Investors may also access these and other reports through the Investor Relations portion of the TDS website (www.tdsinc.com).
