2014 ANNUAL REPORT

RELIANCE
STEEL & ALUMINUM
CO

IN 2014, REVENUE REACHED \$10.45 BILLION,
THE HIGHEST IN OUR 75 YEAR HISTORY.

WE'RE NORTH AMERICA'S BIGGEST,
GETTING BIGGER – AND ALWAYS GETTING
BETTER BY ADDING VALUE, WHILE
RETAINING OUR CORE VALUES.

IN 2014, CASH DIVIDENDS TOTALED \$109 MILLION.

\$50 MILLION OF SHARES WERE REPURCHASED.

CAPITAL EXPENDITURES FUNDING REACHED \$190 MILLION.

\$208 MILLION WAS SPENT TO COMPLETE THREE ACQUISITIONS.

FELLOW SHAREHOLDERS

2014 was a year characterized by strong operational execution in challenging industry conditions. Reliance achieved record full-year sales of \$10.45 billion in 2014, up 13.3% from last year and surpassing the \$10 billion milestone for the first time in our history – a terrific way to mark our 75th anniversary year. Operating income increased 34% on a FIFO basis compared to 2013, reflecting the strong performance by our managers in the field, while our net income of \$371.5 million was up 15.5% year-over-year.

Although overall pricing was generally stronger in 2014, steel pricing in particular was impacted by historically high levels of imports, supported, in part, by a strengthening U.S. dollar. This, combined with significant decreases in the prices of scrap and other steelmaking raw materials towards the end of 2014, resulted in declining steel prices that have continued into 2015. Despite significant competitive pressures in the marketplace, we maintained a full year gross profit margin of 25.1%, within our historical range, and an operating profit margin of 5.9%. These margins reflect the skill and resourcefulness of our on-the-ground leaders and their ability to focus on aspects of the business within their control. We appreciate their continued service and dedication.

Reliance significantly outpaced the industry for the full year with a 6.1% increase in same store tons sold, compared to the MSCI average increase of 4.2%. We believe that our performance reflects two important business pillars: our staunch commitment to developing partnerships that result in outstanding customer service at all operational levels; and our continued investments in organic growth, which increase Reliance's market share.

From an end-market perspective, automotive – serviced mainly through our toll processing operations in the U.S. and Mexico – was very strong in 2014, and we believe this trend will continue. Aerospace is benefitting from growing build rates in the commercial airline segment and we expect demand to likewise improve in 2015. Heavy industries, such as rail car, truck trailer, ship building, barge and tank manufacturing, wind and transmission

towers, as well as bridge fabrication, are also performing well. Although agricultural and construction equipment have fallen from their 2013 peak, we are still quite busy servicing this segment of the economy. Non-residential construction continues on its path of steady recovery, although current demand is still well below peak levels. We believe this important end market will continue to grow throughout 2015. Unfortunately, the energy industry began to decline in the latter part of 2014 due to the severe drop in oil prices. As a result, our businesses serving the energy industry have begun reducing expenses and inventories. Nevertheless we expect to be well-positioned to engage in growth when energy market conditions improve.

We completed three acquisitions in 2014, increasing our post-IPO acquisition total to 59. The largest addition to the Reliance family of companies during the year was United Kingdom-based All Metal Services (AMS). With annual net sales approaching \$300 million, AMS provides comprehensive materials management solutions to leading aerospace and defense OEMs and their subcontractors on a global basis, supporting customers in more than 40 countries worldwide. This acquisition significantly expanded our presence in the global aerospace distribution market. We rounded-out our 2014 M&A activity with the acquisitions of Northern Illinois Steel Supply Co., a value-added niche distributor and fabricator of steel and non-ferrous metal products located in Channahon, Illinois, along with Fox Metals and Alloys, Inc., a Houston, Texas-based service center specializing in alloy, carbon, and stainless steel bar and plate products, and primarily supporting the oil, gas, and petrochemical industries. Going forward, accretive acquisitions will remain an important element of our growth strategy. We expect to continue to be a consolidator in our highly fragmented industry by making strategic acquisitions of well-managed metals service centers and processors with product and end-market exposures that support our diversification strategy.

Reliance boasts a healthy balance sheet and has great confidence in our operational execution, which underpin our ongoing efforts and ability to invest in business growth while returning value to you, our shareholders, through dividends and share repurchases. We invested \$190 million in capital expenditures in 2014, the majority of which supported organic growth initiatives. In October, our Board of Directors approved an extension of our share repurchase program through the end of 2017 and during the fourth quarter of 2014, we repurchased nearly 760,000 shares for approximately \$50 million. Given our strong liquidity, we believe opportunistic share repurchases are an appropriate use of the Company's capital resources. In addition, Reliance paid cash dividends totaling \$1.40

per share in 2014, an increase of 11.1% over 2013, and in February 2015, the Board of Directors increased the quarterly dividend to \$0.40, an increase of 14.3%. Reliance has paid regular quarterly dividends for 55 consecutive years and we have increased the dividend 22 times since our IPO in 1994. We remain committed to returning value to our shareholders.

2014 was an especially meaningful year as we celebrated dual anniversaries: 75 years since our founding and 20 years as a publicly traded company. In August, our executive leadership team rang the closing bell above the trading floor of the New York Stock Exchange. We also looked outward to our communities. We continued to honor our nation's veterans by supporting Workshops For Warriors, a nonprofit organization that trains veterans for jobs in the manufacturing sector. We also embarked on our first enterprise-wide fundraising campaign to rally support for the American Red Cross, which was a resounding success.

We recently announced an executive leadership succession plan that is both consistent with, and complementary to, Reliance's growth strategy. Our industry-leading results support our belief that we have the best managers in the metals service center industry, and our executive management sets the standard for excellence throughout Reliance. Our succession plan ensures that our executive management team will continue to provide Reliance with experienced and creative leadership that both preserves our culture and embraces progress – all with the purpose of delivering financial results that generate shareholder value.

As we look ahead to 2015 – and beyond – our future is bright. Reliance has a broad range of products, significant customer diversification, a wide geographic footprint, and exposure to high-growth end markets. We would like to thank our dedicated and talented employees, as well as our loyal customers and suppliers, for their continued support. Their combined efforts have enabled us to consistently achieve industry-leading operating results. We move forward very confident in our ability to build upon our track record of success and enhance shareholder value.

Balance Sheet Data (December 31):

| | | | | | |
|-------------------------------|-----------|-----------|-----------|-----------|-----------|
| Working capital | \$2,458.3 | \$2,165.5 | \$1,699.2 | \$1,698.3 | \$1,192.3 |
| Total assets | 7,836.6 | 7,341.0 | 5,857.7 | 5,605.9 | 4,668.9 |
| Long-term debt ⁽³⁾ | 2,223.8 | 2,072.5 | 1,124.0 | 1,320.5 | 857.8 |
| Reliance shareholders' equity | 4,099.0 | 3,874.6 | 3,558.4 | 3,143.9 | 2,823.7 |

(1) Gross profit, calculated as net sales less cost of sales, is a non-GAAP financial measure as it excludes depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing, which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, are not significant and are excluded from our cost of sales. Therefore, our cost of sales is primarily comprised of the cost of the material we sell. We use gross profit as shown above as a measure of operating performance. Gross profit is an important operating and financial measure, as fluctuations in our gross profit can have a significant impact on our earnings. Gross profit, as presented, is not necessarily comparable with similarly titled measures for other companies.

(2) Operating expenses include warehouse, delivery, selling, general and administrative expenses, depreciation and amortization expense. In 2014, 2013, and 2012, operating expenses include various non-recurring charges.

(3) Long-term debt includes the long-term portion of capital lease obligations.

(1) Operating income represents net sales less cost of sales, warehouse, delivery, selling, general and administrative expenses, and depreciation and amortization expense. Certain reclassifications were made to 2007 and prior years to include amortization expense in the calculation of Operating income. In 2012 and 2013, the calculation of Operating income also includes impairment charges.

(2) The adoption of accounting rule changes in 2009 affected the presentation of noncontrolling interests. Prior year pretax income and margin amounts have been retrospectively adjusted to conform to the current presentation.

(3) Amounts have been retrospectively adjusted to reflect the July 2006 2-for-1 stock split. Per share amounts based upon weighted average shares are on a diluted basis.

(4) 2006 includes the issuance of approximately 9 million shares related to an acquisition.

(5) Long-term debt includes the long-term portion of capital lease obligations.

(6) Book value per share is calculated as Reliance shareholders' equity divided by number of common shares outstanding as of December 31 of each year.

| | 2010 | 2009 | 2008 | 2007 | 2006 | 2005 | 2004 |

| | 3.1% | 2.8% | 5.5% | 5.6% | 6.2% | 6.1% | 5.8% |

(7) Return on Reliance shareholders' equity is based on the beginning of year equity amount, except for 2006, which is adjusted for a 2006 acquisition using \$360.5 million of common stock as partial consideration.

(8) Net debt-to-total capital ratio is calculated as total debt (net of cash) divided by Reliance shareholders' equity plus total debt (net of cash).

(9) Gross profit, calculated as net sales less cost of sales, and gross profit margin, calculated as gross profit divided by net sales, are non-GAAP financial measures as they exclude depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our cost of sales. Therefore, our cost of sales is primarily comprised of the cost of the material we sell. We use gross profit margin as shown above as a measure of operating performance. Gross profit margin is an important operating and financial measure, as fluctuations in our gross profit margin can have a significant impact on our earnings. Gross profit margin, as presented, is not necessarily comparable with similarly titled measures for other companies.

LESSONS FROM LEADERSHIP

STRONG LEADERSHIP DRIVES STRONG FINISHES.
MEMBERS OF OUR EXECUTIVE TEAM SHARE PERSPECTIVES
ON BUILDING THE BEST BUSINESS IN THE INDUSTRY.

CONSISTENCY IS KEY

GREGG J. MOLLINS

PRESIDENT & CHIEF OPERATING OFFICER

We sell more than just steel. And I don't just mean our other metals like aluminum, copper, brass, and titanium. At the core of who Reliance is, we offer service and solutions. On the business side of things, that means inventory turn. Gross profit. Sounds like a broken record, but there's no need to reinvent the wheel when it comes to profitability. No doubt, we're a fairly large company – and we're growing. The way I see it, though, we're made up of a lot of small companies, doing our best to serve our customers' exact needs. We know each other's names and care about our employees and their families. That's who we are. And no matter how big we become, this will always be a part of the Reliance way.

SPREADING OUR WINGS

WILLIAM K. SALES, JR.

SENIOR VICE PRESIDENT, OPERATIONS

Reliance entered the aerospace industry in 1997, when we acquired AMI Metals, an industry leader in aerospace aluminum, and Service Steel Aerospace, one of the world's largest aerospace steel distributors. Subsequent acquisitions made by SSA further expanded our aerospace product line to include titanium, maraging, and nickel products. Most recently, on August 1, 2014, All Metal Services joined our family of companies, nearly doubling our European presence. Serving customers in 40 countries, AMS was the world's largest independent raw material service provider to the aerospace and defense industries. Also in 2014, AMI opened new service centers in Figeac, France and Ankara, Turkey. As aerospace grows globally, Reliance is poised to grow alongside it.

ENERGIZED FOR THE FUTURE

JAMES D. HOFFMAN

SENIOR VICE PRESIDENT, OPERATIONS

Many of Reliance's recent acquisitions have been focused on growing our presence in the energy space. We believe that this market, despite its recent downturn, holds excellent and profitable promise in the long term. For one thing, making specialized equipment requires specialized processing on parts, which increases our service offerings and our margins. Moreover, our various subsidiaries – which focus on different aspects of the energy industry – gain new opportunities to work together, providing comprehensive solutions for customers to increase their supply chain efficiency. When we combine our value-added services with value-added solutions, it's a win-win for customers and Reliance alike.
