

Toward a Better Tomorrow

RELIANCE STEEL & ALUMINUM CO. 2016 ANNUAL REPORT

**Committed to
the people we
call family**

Applying stringent acquisition criteria ensures that our Family of Companies grows strategically, sustainably, and profitably. Since our IPO in 1994, Reliance has completed 62 acquisitions. Today, we are one company comprised of over 70 distinct brands. Both the individual and combined strengths of our Family of Companies make Reliance the industry leader.

Our success is built on safeguarding our most important assets – our employees – and, in turn, our employees' ability to successfully execute our corporate strategy. This was demonstrated in 2016, when we reduced recordable safety incidents by over 25% compared to 2015 and simultaneously achieved record gross profit margins.

Over the past six years, Reliance has strategically invested over \$1 billion in capital expenditures – including \$154.9 million in 2016.

Our investments in cutting-edge plasma and laser technologies have enabled us to perform higher levels of value-added processing with shorter lead times: wins for us and for our customers. In 2016, we performed value-added processing on approximately 47% of our orders.

Reliance possesses the technological skills to satisfy today's business requirements. We stand poised to meet the increase in orders as the various end markets we service continue to rebound.

**Invested in
value-added
technology**

Focused on
increasing
stockholder value

Even in challenging times, Reliance continues to deliver quality products and services – and does so profitably – thanks to the expertise of our management and solid execution by our workforce. Our operational agility helps us navigate volatile metals pricing, changing market conditions, and fluctuations at any point along our supply chain. The results: a strong corporate balance sheet and consistent returns to our stockholders.

We remain focused on our balanced capital allocation strategy: growth through acquisitions and organic investments, while also providing meaningful stockholder returns. This includes quarterly cash dividends, which Reliance has paid for 57 consecutive years. In 2016, we increased our dividend – for the 24th time since our IPO – 5.9% to \$0.45 per share.

Fellow Stockholders

Operationally, 2016 was a terrific year for Reliance. Our focus on maximizing gross profit margin resulted in our first-ever annual gross profit margin above 30%. In 2015 we concentrated on right-sizing our overall inventory position, which resulted in record cash flow from operations of \$1 billion. In both 2015 and 2016, we increased our focus on properly pricing our products and services to reflect the value we provide to our customers. These actions contributed to our higher gross profit margin and strong cash flow that allowed us to continue executing our growth strategy while also providing meaningful stockholder returns.

Our growth strategy focuses on increasing our value-added processing capabilities as well as our offerings of specialty products, both of which support higher gross profit margins. We have made significant investments in value-added processing equipment over the past six years, spending \$1 billion on capital expenditures, most of which were growth related. In 2016 we acquired three companies, each of which provides high levels of value-added processing or specialty products.

In 2016, our total sales were \$8.6 billion, down 7.9% from our 2015 total sales of \$9.4 billion, primarily due to lower metal prices, especially for carbon steel products. Trade

actions in the United States reduced import levels, creating an environment in which the domestic mills were able to increase metal prices for certain products. However, the overall pricing environment was volatile throughout the year, causing our average selling price to decrease 6.8% in 2016 compared to 2015. Our focus on gross profit margin, however, allowed us to realize a 600 basis point improvement in our FIFO gross profit margin, from 25.1% in the fourth quarter of 2014 to a peak of 31.1% in the second quarter of 2016. Our higher gross profit margin in 2016 resulted in \$328 million more gross profit dollars despite a \$737 million decline in sales. The increased gross profit dollars, along with effective expense control and working capital management, allowed Reliance to deliver earnings per share of \$4.16, consistent with 2015 despite reduced volume and pricing.

Customer demand remained generally healthy in 2016, outside of the energy and heavy industry end markets. Our same-store tons sold declined by only 2.7%, once again outperforming the 6.2% industry average decline reported by the Metals Service Center Institute (MSCI). While overall demand for metal products was not as strong as we expected when we entered 2016, customer sentiment has improved and we anticipate improving demand levels as we move through 2017.

James D. Hoffman, Executive Vice President and Chief Operating Officer | Karla R. Lewis, Senior Executive Vice President and Chief Financial Officer
Gregg J. Mollins, President and Chief Executive Officer

We believe our decentralized operating structure helps us increase our market share by allowing us to focus on fulfilling small order sizes for the bulk of our customers who purchase product in smaller quantities on a much more frequent basis. Our 2016 average order size was only \$1,560, and we delivered approximately 40% of our orders within 24 hours or less, a competitive advantage of which we are very proud. Our investments in value-added processing equipment have also contributed to our increased market share, as we believe we are able to provide a higher quality product to our customers than many of our competitors. In 2016, we performed value-added processing services on 47% of our orders, compared to our historical rate of 40%. Further, we believe an efficient inventory position benefits our gross profit margin by allowing us to focus on higher margin business.

We also believe our exposure to a broad array of products and end markets helps mitigate declines in any one market. Demand for automotive remains healthy at current production rates. We began processing aluminum for the auto industry in 2015, mainly through our toll-processing operations in the U.S. and Mexico, and since then have expanded our processing volume and capital investments in this area, due to the increased usage of aluminum in automotive. We expect that our investments in both facilities and equipment will drive further increases in aluminum volume processed in 2017 versus our record levels attained in 2016. In the aerospace market, overall

demand also remains solid. 2017 marks the beginning of our involvement with the five-year, \$350 million Joint Strike Fighter program, further strengthening our already strong position in the aerospace and defense markets.

We have also performed well servicing the non-residential construction market as it continues its gradual recovery, and we are encouraged by early signs of recovery in the energy market. As the downturn in oil prices and drilling activity began toward the end of 2014, Reliance proactively addressed declines in this market through facility closures and asset write-downs on certain of our businesses. We believe we are now well positioned to participate in any recovery.

Maintaining a solid overall liquidity position remains a continual focus for us, providing the flexibility and resources to continue growing our business both organically and through acquisition opportunities. We will also continue to prioritize returning value to our stockholders through increased dividend payments and opportunistic share repurchases. In 2016, we continued our balanced capital allocation strategy, using our strong cash flow from operations to fund \$348.7 million in acquisitions, \$154.9 million of capital expenditures, and \$120.4 million in dividends. We have paid regular quarterly dividends for 57 consecutive years and have increased the dividend 24 times since our IPO in 1994, including our most recent increase of 5.9% to \$0.45 per share, in the first quarter of 2017.

The Reliance Family of Companies welcomed three new businesses in 2016, bringing our total acquisition count to 62 quality companies since our 1994 IPO. Each of these companies fits our overall strategy for growth in specialty and high-margin products and services, and was accretive to our earnings. The acquisition of Tubular Steel expands our presence in specialty products and strengthens our foothold in the energy end-market. Although current activity levels are lower than normal, we are confident in the long-term strength of the energy market and Tubular Steel's ability to benefit during the recovery. Best Manufacturing increases our high-margin, value-added processing capabilities; and Alaska Steel marks our first entry into the Alaskan market, broadening our reach and servicing diverse industries, including infrastructure and energy.

We are continuously evaluating well-run companies that fit our strategy for profitable growth and meet our stringent acquisition criteria. At the same time, we remain focused on organic investment – primarily in state-of-the-art, value-added processing equipment – that will continue to enhance our earnings.

On behalf of Reliance, we would like to express how extremely proud we are of the strong operational performance and commitment shown by our more than 14,000 employees. In particular, the strict pricing discipline and diligent expense and inventory management

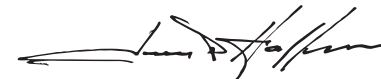

practices implemented by our managers in the field have enabled Reliance to thrive through all types of environments. We are also very pleased with Reliance's safety performance in 2016, in which our companies achieved a year-over-year reduction in our incident rate of more than 25%. We would like to thank all of our employees for working hard, and for doing so safely. We would also like to thank our loyal customers, suppliers, and stockholders for their continued support and commitment to Reliance. In the coming year, we anticipate a renewed enthusiasm for infrastructure and equipment spending, as well as improvement in the energy market. As we look "toward a better tomorrow," we believe Reliance is very well positioned to capitalize on these opportunities.

Reliance stockholders' equity	4,148.8	3,914.1	4,099.0	3,874.6	3,558.4

(1) Gross profit, calculated as net sales less cost of sales, is a non-GAAP financial measure as it excludes depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform “first-stage” processing, which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our cost of sales. Therefore, our cost of sales is substantially comprised of the cost of the material we sell. We use gross profit as shown above as a measure of operating performance. Gross profit is an important operating and financial measure, as fluctuations in our gross profit can have a significant impact on our earnings. Gross profit, as presented, is not necessarily comparable with similarly titled measures for other companies.

(2) Long-term debt includes the long-term portion of capital lease obligations.

- (1) Operating income represents net sales less cost of sales, warehouse, delivery, selling, general and administrative expense, and depreciation and amortization expense. Certain reclassifications were made to 2007 and prior years to include amortization expense in the calculation of Operating income. In 2016, 2015, 2014, 2013 and 2012, the calculation of Operating income includes various non-recurring charges and credits, including impairment charges in 2016, 2015, 2013 and 2012.
- (2) The adoption of accounting rule changes in 2009 affected the presentation of noncontrolling interests. Prior year pretax income and margin amounts have been retrospectively adjusted to conform to the current presentation.
- (3) Long-term debt includes the long-term portion of capital lease obligations. The adoption of accounting rule changes in 2015 affected the presentation of debt issuance costs. Prior year Total assets and Long-term debt amounts have been retrospectively adjusted to conform to the current presentation.
- (4) Book value per share is calculated as Reliance stockholders' equity divided by number of common shares outstanding as of December 31 of each year.
- (5) Return on Reliance stockholders' equity is based on the beginning of year equity amount, except for 2015, which is adjusted for \$355.5 million of share repurchases, and 2006 which is adjusted for a 2006 acquisition using \$360.5 million of common stock as consideration.
- (6) Net debt-to-total capital ratio is calculated as total debt (net of cash) divided by Reliance stockholders' equity plus total debt (net of cash). The adoption of accounting rule changes in 2015 affected the calculation of net-debt-to-total capital ratio.
- (7) Gross profit, calculated as net sales less cost of sales, and gross profit margin, calculated as gross profit divided by net sales, are non-GAAP financial measures as they exclude depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our cost of sales. Therefore, our cost of sales is substantially comprised of the cost of the material we sell. We use gross profit margin as shown as a measure of operating performance. Gross profit margin is an important operating and financial measure, as fluctuations in our gross profit margin can have a significant impact on our earnings. Gross profit margin, as presented, is not necessarily comparable with similarly titled measures for other companies.

STOCKHOLDERS OF RECORD AND DIVIDEND POLICY

As of January 31, 2017, there were approximately 205 record holders of our common stock. We have paid quarterly cash dividends on our common stock for 57 years. In February 2017, our Board of Directors increased the regular quarterly cash dividend amount 5.9% to \$0.45 per share. Our Board of Directors has increased the quarterly dividend rate on a periodic basis with the most recent being our 24th increase since our IPO in 1994.
