

Catalent[®]

2020 annual report

Dear Shareholders,

In our fiscal year that ended on June 30, 2020, Catalent delivered record financial results, deploying our capabilities and expertise to generate robust organic growth, while keeping our employees safe and continuing to deliver for our customers and their patients.

Our work has never been more serious and important, for today we have the added responsibility to support customers working on a range of responses to a global pandemic. This urgent need takes Catalent to a whole new level of “essential”—with speed, quality, and patient expectations like none that any of us has experienced in our careers. I couldn’t be prouder to be part of this industry, or of the Catalent team, but we’re also conscious of the enormous responsibilities ahead as a partner on over 50 COVID-19-related potential treatments and vaccines across all four of our business segments, including three Operation Warp Speed vaccine candidates.

I am also pleased to report that S&P Dow Jones Indices has added Catalent to its S&P 500® index effective September 21, 2020. This designation is an affirmation of our strategy and the substantial progress we’ve made in executing it since our IPO in 2014. None of this would have been possible without the passion and dedication of our 14,000 employees, whose commitment to our mission to help people live better, healthier lives has propelled Catalent to where we are today.

FISCAL 2019 IN REVIEW

COVID-19 Response: Meeting the Needs of Employees, Customers, and Patients

From the outset of the current pandemic, we had the north star of our mission to guide us, prioritizing the safety and well-being of our employees with a safe and secure working environment while, at the same time, keeping our facilities open so that the vital medicines and health products we develop and produce would remain available to patients worldwide. Our COVID Response Team, led by Kay Schmidt, our senior vice president of technical operations, mobilized early, implementing comprehensive safety protocols and business continuity plans across our network of fifty sites. Our deep-rooted culture of GMP compliance, safety, and operational and quality excellence gave us an advantage as we swiftly executed these activities. To date, none of our sites has experienced any major disruption, and we continue to work proactively with our customers and suppliers to maximize supply chain continuity.

Catalent was not only very well-positioned to weather this crisis, but, because of the transformative acquisitions we made over the last several years, combined with our strategic internal investments, capabilities, and expertise, we are now a “go-to” partner for COVID-19 response work. Nearly all our dosage forms are engaged with a COVID-19 treatment or vaccine candidate or clinical trial; and we are proud to have built the capability to provide multi-dose vial filling for potentially billions of COVID-19 vaccine doses, if needed.

These important COVID-19 response programs illustrate our broad capabilities, both geographically and technologically, which are available not only for COVID 19 programs, but also for the increasingly wide range of products we manufacture on behalf of customers every year.

Investing in Growth

In fiscal 2020, we continued our transformative investments to shift our technology portfolio to even more innovative and in-demand areas of drug development and manufacturing, as well as investing significantly in capital projects to expand our capacity.

We entered the cell therapy market through our acquisition of Masthercell Global, a leading cell therapy contract developer and manufacturer with locations in Belgium and Texas. We expanded our Maryland-based gene therapy business, including our flagship commercial manufacturing campus, which became the first contract development

and manufacturing site to secure FDA approval to manufacture an approved gene therapy. Finally, we acquired a first-class, biologics fill-finish, solid oral dose, and packaging facility in Italy from Bristol-Myers Squibb to expand our European capabilities.

We also increased our organic growth investments in fiscal 2020 to meet customer and patient needs. An outsized portion of the \$466 million we spent on capital improvements was directed to our biologic drug substance and drug product offerings, including the aforementioned expansions in our gene therapy business and previously announced expansions of our biologics drug substance capacity in Madison, Wisconsin and our biologics drug product capacity in Bloomington, Indiana.

These carefully conceived and timely executed investments led us to deliver robust growth in fiscal 2020, including record double-digit organic net revenue growth, and have positioned our company for superior growth in the future.

Financial Performance

For fiscal 2020, Catalent delivered net revenue and Adjusted EBITDA¹ organic growth rates above the high-end of our long-term targets of 8% and 11%, respectively. Fiscal 2020 net revenue grew 24%, compared to fiscal 2019 at constant exchange rates,² to \$3.1 billion, of which 12% was organic. Adjusted EBITDA was \$750.9 million for fiscal 2020, representing constant-currency, organic growth of 14%, compared to fiscal 2019. Adjusted Net Income per diluted share³ was \$2.11, compared to \$1.81 in fiscal 2019.

We also strengthened our balance sheet in fiscal 2020 through several important financial transactions, including raising more than \$1 billion through two public stock offerings. These strengthening actions significantly reduced our net leverage ratio and weighted average interest rate, while also extending the maturity profile of our debt. We ended the year with more than \$950 million of cash and cash equivalents, compared to \$345 million at the end of fiscal 2019, and reduced our net leverage ratio from 4.4x to 2.8x. These actions provide Catalent with the flexibility to invest for future growth, be it organic or inorganic.

Corporate Responsibility

In lockstep with the growth and evolution of our business is the continuing integration of our corporate responsibility commitments into our operations and culture. In April, we published our first Corporate Responsibility Report, covering fiscal 2019. It highlights our commitment to a range of social and environmental topics related to our business, such as product quality, safety, environmental sustainability, and diversity and inclusion. During these challenging times, I am proud to report that, under our Catalent Cares banner, participation in our Catalent Month of Service program has doubled and the number of matching gift requests has tripled since those programs were launched a few short years ago. We have also significantly expanded our corporate-level giving, helping with COVID-19 response and disasters around the world, as well as patient- and STEM-focused initiatives in our local communities.

In the spring, we were all deeply affected by the senseless deaths of Black U.S. citizens. We stand with those who seek a world without bias or harmful discrimination, and we at Catalent will continue to put our hearts and our actions into making our communities better and more inclusive. In our Corporate Responsibility Report, we shared that ethnically diverse talent represented 33% of our U.S. workforce, and that 44% of global new hires were ethnically diverse. We will continue to train our Talent Acquisition teams on diverse recruitment tactics, including forging partnerships with diverse professional organizations. We also took steps to strengthen our ability to support diverse populations within our ranks by reinvigorating or starting several employee resource groups, including groups focused on veterans, members of the LGBTQ+ community, Latinos, women, young professionals, and employees of African ancestry or of Asian or Pacific Islander ancestry.

I look forward to our second Corporate Responsibility Report, covering fiscal 2020, later this year, which will track our progress against environmental, social, and governance metrics that align with the standards set by the Sustainability Accounting Standards Board for the biotechnology and pharmaceutical sectors.

¹ For an explanation of how we determine Adjusted EBITDA, a non-GAAP measure, and how this financial measure reconciles to our reported results, please see pages 47 and 60-61 of the enclosed Annual Report on Form 10-K for the fiscal year ended June 30, 2020 (our "2020 Form 10-K").

² Comparisons at "constant exchange rates" or in "constant currency" exclude the effects of foreign currency fluctuations against the U.S. dollar during the year. For a discussion of this non-GAAP measure and a reconciliation of constant-currency results to our reported results, please see pages 47 and 48 of our 2020 Form 10-K.

³ For an explanation of how we determine Adjusted Net Income per diluted share, a non-GAAP measure, and how this financial measure reconciles to our reported results, please see pages 47 and 62-63 of our 2020 Form 10-K.

LOOKING AHEAD TO FISCAL 2021

The start of every new fiscal year provides new opportunities to deliver on our mission, while strengthening our position as a company that powers the innovation and growth of the life science industry as a leading development and commercial partner in advanced technologies, first-to-scale innovation, integrated solutions, and new therapeutic modalities.

The total outsourced market in the areas in which we participate is more than \$50 billion and forecasted to grow at more than 8% annually over the next five years. A variety of trends are driving this growth, including increased oral-dose outsourcing as big pharma shifts to large molecules; the shortage of drug substance and drug product capacity; the need for more complex formulations in both large- and small-molecule drugs; and an increase in orphan and fast-track drugs, which are more likely to be outsourced to companies like Catalent with the capabilities and capacity needed to improve patients' lives.

Our portfolio allows us to participate in these large and growing segments, and we will continue to reinvest at a rigorous pace, adding new capacity and investing in new modalities. In fiscal 2021, we will continue to realize the full potential of our enhanced suite of biologics capabilities, while strengthening and accelerating our base businesses. We will also continue to focus on operational execution and quality excellence as key differentiators. In the near term, we are ensuring seamless business continuity and a strong balance sheet to position Catalent in the best possible way to navigate through these challenging times.

Our leadership team continues to execute our strategic plans with urgency. In the first few months of fiscal 2021, we've already announced significant investments, including:

- an additional investment of \$130 million at our flagship commercial gene therapy manufacturing campus in Maryland to build five additional manufacturing suites;
- an investment of \$50 million to install an additional high-speed vial filling line at our Bloomington, Indiana facility;
- the expansion of our Argentinian site in Loma Hermosa, Buenos Aires to handle highly potent and active products for prescription softgel manufacturing;
- a \$30 million investment in our Limoges, France facility to create a European center of excellence for clinical biologics formulation development and drug product fill-finish services; and
- purchase of a 60,000-square-foot facility in the Shiga prefecture of Japan to provide customers with flexible clinical supply solutions.

Finally, we will continue to invest in the key enablers that propel the growth of our business, while also working toward the commitments made in our first Corporate Responsibility Report, including minimizing our waste and water impact and improving the carbon intensity of the energy we purchase and the products we manufacture. These enablers include operational and quality excellence, commercial execution, scientific innovation, information technology, and talent.

Our efforts to overcome the COVID-19 crisis have given us some valuable insights into our business and our resilience, ranging from new and more efficient ways of working to the identification of emerging leaders. We will not let these learnings go to waste. Our pride in the work we are doing has galvanized our employees. Our Patient First culture has strengthened. Our team is literally working around the clock, for all of those counting on us, be it for a potential COVID-19 vaccine or treatment or the more than 70 billion doses of medicine and consumer health products we produce every year.

On behalf of these employees as well as our board of directors, I would like to express our appreciation for your confidence in Catalent.

John R. Chiminski

Corporate Responsibility

OUR VALUES IN ACTION

Our corporate responsibility (CR) strategy aims to maximize Catalent's positive contributions to society, while minimizing risk and negative impact. The guiding lighthouse of our CR plan is our corporate mission to help people live better, healthier lives, which is enabled by our deep belief in our values. We continue to invest in a corporate culture that understands and prioritizes our impact on people in our operations and decision-making.

Our CR strategy stands on three pillars—People, Environment and Communities—and we have instituted a scorecard approach to monitor how each of the business units and sites across the Catalent network contributes to meeting our goals.

PEOPLE

Putting patients first, investing in and showing respect for our people, and promoting a responsible supply chain.

ENVIRONMENT

Reducing greenhouse gas emissions, waste, and water use.

COMMUNITY

Giving back to our communities by investing our time, talents, and resources to serve patients and promote science, technology, engineering, and mathematics (STEM) education and training.

The milestone achievement of this past year was the publication of our first CR report, covering fiscal year 2019. The report brings a new level transparency and ambition to a wide range of environmental, social, and governance (ESG) topics in business areas such as product quality, safety, environmental sustainability, and diversity and inclusion. The CR report also includes a discussion of Catalent's adherence to the Sustainability Accounting Standards Board standard for the Biotechnology and Pharmaceuticals sector.

FY20 CR HIGHLIGHTS

Catalent's response to the COVID-19 pandemic inspired a record level of giving for the company to local nonprofits, especially healthcare centers and foodbanks, through community grants and a special 2-for-1 matching gift program for employees

The annual Catalent Month of Service in November recorded a 50% increase in employee participation and projects, reflecting the ongoing and growing interest of our people to give back to our communities

Our network of global employee resource groups, which are voluntary, employee-run groups that bring people together based on shared characteristics, interests, and life experiences, grew from four in FY19 to seven in FY20

We made significant progress against our carbon reduction target through a combined approach of renewable electricity energy sourcing and implementing approximately 60 site-based energy efficiency projects

We will publish our fiscal 2020 CR report in early 2021, which will highlight the achievements outlined above, as well as provide additional updates on key ESG issues such as water and waste targets and our human rights policy and commitment.

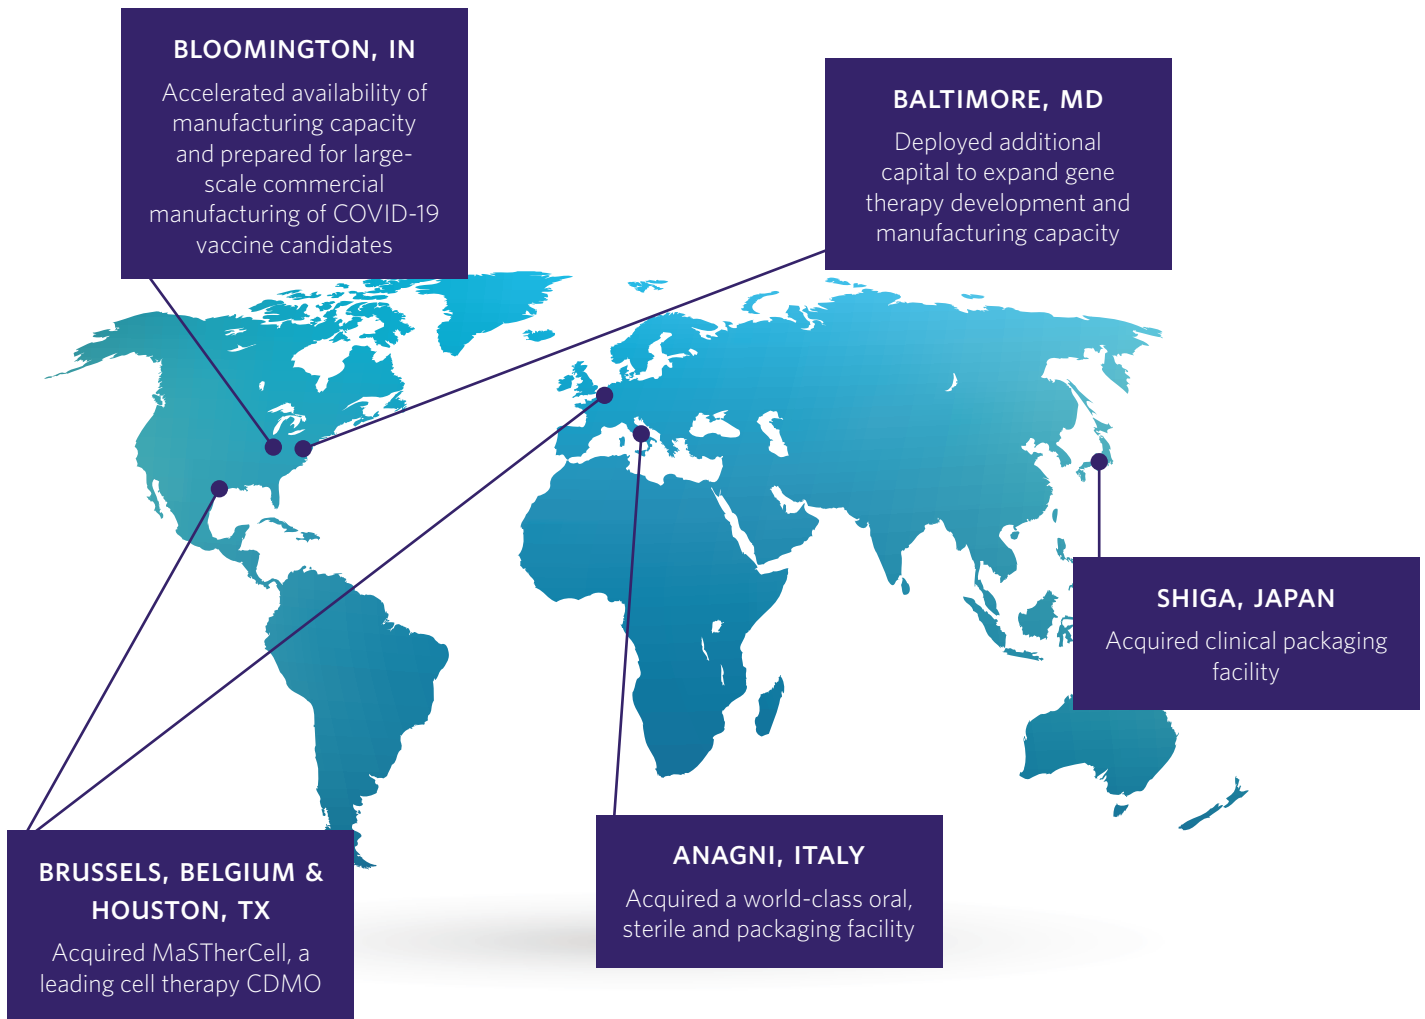

⁵ Please see "Corporate Responsibility" on page 17 of the Annual Report on 10-K for further information.

“ The start of every new fiscal year provides new opportunities to deliver on our mission, while strengthening our position as a company that powers the innovation and growth of the life science industry as a leading development and commercial partner in advanced technologies, first-to-scale innovation, integrated solutions, and new therapeutic modalities. ”

Global Investment in Capabilities & Technologies Driving Long-Term Growth

CONTINUOUS INVESTMENT

We have invested more than \$4 billion over the last 5 fiscal years on new businesses, as well as new property, plants, and equipment in order to grow our business and lay the foundation for further growth.

PART I

Special Note Regarding Forward-Looking Statements

In addition to historical information, this Annual Report on Form 10-K of Catalent, Inc. (“Catalent” or the “Company”) contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), which are subject to the “safe harbor” created by those sections. All statements, other than statements of historical facts, included in this Annual Report on Form 10-K are forward-looking statements. In some cases, you can identify these forward-looking statements by the use of words such as “outlook,” “believes,” “expects,” “potential,” “continues,” “may,” “will,” “should,” “could,” “seeks,” “predicts,” “intends,” “plans,” “estimates,” “anticipates,” “future,” “forward,” “sustain” or the negative version of these words or other comparable words.

These statements are based on assumptions and assessments made by our management in light of their experience and their perception of historical trends, current conditions, expected future developments, and other factors they believe to be appropriate. Any forward-looking statement is subject to various risks and uncertainties. Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these statements.

Some of the factors that may cause actual results, developments, and business decisions to differ materially from those contemplated by such forward-looking statements include, but are not limited to, those described under the section entitled “Risk Factors” in this Annual Report on Form 10-K for the fiscal year ended June 30, 2020 (this “Annual Report”) and the following:

- Our business, financial condition, and results of operations may be adversely affected by global health epidemics, including the novel strain of coronavirus (“COVID-19”) pandemic.
- We participate in a highly competitive market, and increased competition may adversely affect our business.
- The demand for our offerings depends in part on our customers’ research and development and the clinical and market success of their products. Our business, financial condition, and results of operations may be harmed if our customers spend less on, or are less successful in, these activities. In addition, customer spending may be affected by, among other things, the COVID-19 pandemic or recessionary economic conditions caused in whole or in part by the pandemic.
- We are subject to product and other liability risks that could exceed our anticipated costs or adversely affect our results of operations, financial condition, liquidity, and cash flows.
- Failure to comply with existing and future regulatory requirements could adversely affect our results of operations and financial condition or result in claims from customers.
- Failure to provide quality offerings to our customers could have an adverse effect on our business and subject us to regulatory actions or costly litigation.
- The services and offerings we provide are highly exacting and complex, and, if we encounter problems providing the services or support required, our business could suffer.
- Our global operations are subject to economic, political, and regulatory risks, including the risks of changing regulatory standards or changing interpretations of existing standards, that could affect the profitability of our operations or require costly changes to our procedures. In addition, changes to our procedures, or additional procedures, implemented to comply with public health orders or best practice guidelines as a result of the COVID-19 pandemic, may increase our costs or reduce our productivity and thereby affect our business, financial condition, or results of operations.
- The exit of the United Kingdom (the “U.K.”) from the European Union, particularly after the end of the current transitional period, could have future adverse effects on our operations, revenues, and costs, and therefore our profitability.
- If we do not enhance our existing or introduce new technology or service offerings in a timely manner, our offerings may become obsolete over time, customers may not buy our offerings or buy less of them, and our revenue and profitability may decline.
- We and our customers depend on patents, copyrights, trademarks, know-how, trade secrets, and other forms of intellectual property protections, but these protections may not be adequate.
- Our offering or our customers’ products may infringe on the intellectual property rights of third parties.

- Our future results of operations are subject to fluctuations in the costs, availability, and suitability of the components of the products we manufacture, including active pharmaceutical ingredients, excipients, purchased components, and raw materials. In addition, the COVID-19 pandemic may interfere with the operations of certain of our direct or indirect suppliers or with international trade for these supplies, which may either raise our costs or reduce the productivity or slow the timing of our operations.
- Changes in market access or healthcare reimbursement for our customers' products in the United States ("U.S.") or other countries, including possible changes to the U.S. Affordable Care Act, could adversely affect our results of operations and financial condition by affecting demand for our offerings or the financial health of our customers.
- As a global enterprise, fluctuations in the exchange rate of the U.S. dollar, our reporting currency, against other currencies could have a material adverse effect on our financial performance and results of operations.
- Tax legislative or regulatory initiatives, new interpretations or developments concerning existing tax laws, or challenges to our tax positions could adversely affect our results of operations and financial condition.
- Our ability to use our net operating loss carryforwards, foreign tax credit carryforwards, and certain other tax attributes may be limited.
- Changes to the estimated future profitability of the business may require that we establish an additional valuation allowance against all or some portion of our net U.S. deferred tax assets.
- We depend on key personnel whose continued employment and engagement at current levels cannot be assured.
- We use advanced information and communication systems to run our operations, compile and analyze financial and operational data, and communicate among our employees, customers, and counter-parties, and the risks generally associated with information and communications systems could adversely affect our results of operations. We are continuously working to install new, and upgrade existing, systems and provide employee awareness training around phishing, malware, and other cyber security risks to enhance the protections available to us, but such protections may be inadequate to address malicious attacks or inadvertent compromises of data security.
- We engage from time to time in acquisitions and other transactions that may complement or expand our business or divest of non-strategic businesses or assets. We may not be able to complete such transactions, and such transactions, if executed, pose significant risks, including risks relating to our ability to successfully and efficiently integrate acquisitions or execute on dispositions and realize anticipated benefits therefrom. The failure to execute or realize the full benefits from any such transaction could have a negative effect on our operations.
- Cell and gene therapies are relatively new and still-developing modes of treatment, dependent on cutting-edge technologies, and our customers' cell or gene therapies may be perceived as unsafe or may result in unforeseen adverse events. Negative public opinion, continuing research, or increased regulatory scrutiny of cell or gene therapies and their financial cost may damage public perception of the safety, utility, or efficacy of cell or gene therapies and harm our customers' ability to conduct their business or obtain regulatory approvals for their cell or gene therapy products, and thereby have an indirect, adverse effect on our cell or gene therapy offerings.
- We are subject to environmental, health, and safety laws and regulations, which could increase our costs and restrict our operations in the future.
- We are subject to labor and employment laws and regulations, which could increase our costs and restrict our operations in the future.
- Certain of our pension plans are underfunded, and additional cash contributions we may make to increase the funding level will reduce the cash available for our business, such as the payment of our interest expense.
- Our substantial leverage could adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or in our industry, expose us to interest-rate risk to the extent of our variable-rate debt, and prevent us from meeting our obligations under our indebtedness. These risks may be increased in a recessionary environment, particularly as sources of capital may become less available or more expensive.
- Despite our high indebtedness level, we and our subsidiaries are still capable of incurring significant additional debt, which could further exacerbate the risks associated with our substantial indebtedness.
- Our debt agreements contain restrictions that limit our flexibility in operating our business.
- Despite the limitations in our debt agreements, we retain the ability to take certain actions that may interfere with our ability timely to pay our substantial indebtedness.

- We are currently using and may in the future use derivative financial instruments to reduce our exposure to market risks from changes in interest rates on our variable-rate indebtedness or changes in currency exchange rates, and any such instrument may expose us to risks related to counterparty credit worthiness or non-performance of these instruments.

We caution you that the risks, uncertainties, and other factors referenced above may not contain all of the risks, uncertainties, and other factors that are important to you. In addition, we cannot assure you that we will realize the results, benefits, or developments that we expect or anticipate or, even if substantially realized, that they will result in the consequences or affect us or our business in the way expected. There can be no assurance that (i) we have correctly measured or identified all of the factors affecting our business or the extent of these factors' likely impact, (ii) the available information with respect to these factors on which such analysis is based is complete or accurate, (iii) such analysis is correct, or (iv) our strategy, which is based in part on this analysis, will be successful. All forward-looking statements in this report apply only as of the date of this report or as of the date they were made and we undertake no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments, or otherwise, except as required by law.

We file annual, quarterly, and current reports and other information with and furnish additional information to the U.S. Securities and Exchange Commission (the "SEC"). Our filings with the SEC are available to the public on the SEC's website at www.sec.gov. Those filings are also available to the public on, or accessible through, our website (www.catalent.com) for free via the "Investors" section as soon as reasonably practicable after we file such material, or furnish it to, the SEC. We also use our website, corporate Facebook page (<https://www.facebook.com/CatalentPharmaSolutions>), corporate LinkedIn page (<https://www.linkedin.com/company/catalent-pharma-solutions/>) and corporate Twitter account (@catalentpharma) as channels of distribution of information concerning our activities, our offerings, our various businesses, and other related matters. The information we post through these channels may be deemed material. Accordingly, investors should monitor these channels, in addition to following our press releases, SEC filings, and public conference calls and webcasts. The information we file with or furnish to the SEC (other than the information set forth or incorporated in this Annual Report) or contained on or accessible through our website, our social media channels, or any other website that we may maintain is not a part of this Annual Report.

Catalent References and Fiscal Year

Unless the context otherwise requires, in this Annual Report, the terms "Catalent," "the company," "we," "us," and "our" refer to Catalent, Inc. and its subsidiaries. All references to years in this Annual Report, unless otherwise stated, refer to fiscal years beginning July 1 and ending June 30. All references to quarters, unless otherwise stated, refer to fiscal quarters. Fiscal years are referred to by the calendar year in which they end. For example, "fiscal 2020" refers to the fiscal year ended June 30, 2020.

Trademarks and Service Marks

We have U.S. or foreign registration in the following marks, among others: Catalent[®], Clinicopia[®], CosmoPod[®], Easyburst[®], FastChain[®], Follow the Molecule[®], Galacarin[®], GPEx[®], Hot Rod Chemistry[®], Liqui-Gels[®], Manufacturing Miracles[®], MaSTherCell[®], Micron Technologies[®], OmegaZero[®], OneBio[®], OptiDose[®], OptiForm[®], OptiGel[®], OptiGel[®] Bio, OptiMelt[®], OptiShell[®], Paragon Bioservices[®], PEEL-ID[®], Pharmatek[®], RP Scherer[®], Savorgel[®], Scherer[®], SMARTag[®], Softdrop[®], SupplyFlex[®], Vegicaps[®], Zydis[®], and Zydis Ultra[®]. This Annual Report also includes trademarks and trade names owned by other parties, and these trademarks and trade names are the property of their respective owners. We use certain other trademarks and service marks, including FlexDirect[™], FlexDose[™], OneBio SuiteSM, and OptiPact[™] on an unregistered basis in the United States and abroad.

Solely for convenience, the trademarks, service marks, and trade names identified in this Annual Report may appear without the [®], SM, and [™] symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensors to these trademarks, service marks, and trade names.

ITEM 1. BUSINESS

Overview

We are the leading global provider of advanced delivery technologies and development and manufacturing solutions for drugs; protein, cell, and gene therapy biologics; and consumer health products. Our oral, injectable, cell and gene therapy, and respiratory delivery technologies address the full diversity of the pharmaceutical industry, including small molecules; protein, cell, and gene therapy biologics; and consumer health products. Through our extensive capabilities and deep expertise in product development, we can help our customers take products to market faster, including nearly half of new drug products approved by the U.S. Food and Drug Administration (the “FDA”) in the last decade. Our advanced delivery technology platforms, which include those in our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery segments, our proven formulation, manufacturing, and regulatory expertise, and our broad and deep intellectual property enable our customers to develop more products and better treatments for patients and consumers. Across both development and delivery, our commitment to reliably supply our customers’ and their patients’ needs is the foundation for the value we provide; annually, we produce more than 74 billion doses for nearly 7,000 customer products, or approximately 1 in every 20 doses of such products taken each year by patients and consumers around the world. We believe that, through our investments in growth-enabling capacity and capabilities, our ongoing focus on operational and quality excellence, the sales of existing and introduction of new customer products, our innovation activities and patents, and our entry into new markets, we will continue to benefit from attractive and differentiated margins and realize the growth potential from these areas.

We continue to invest in our sales and marketing activities, leading to growth in the number of active development programs for our customers. This has further enhanced our extensive, long-duration relationships and long-term contracts with a broad and diverse range of industry-leading customers. In fiscal 2020, we conducted business with 86 of the top 100 branded drug marketers, 24 of the top 25 generics marketers, 23 of the top 25 biologics marketers, and 22 of the top 25 consumer health marketers globally. Selected key customers include Pfizer, Johnson & Johnson, GlaxoSmithKline, Novartis, Roche, and Teva. We have many long-standing relationships with our customers, particularly in advanced delivery technologies, where we tend to follow a prescription molecule through its lifecycle, from the development and launch of the original brand prescription, to potential generics or an over-the-counter switch. A prescription pharmaceutical product relationship with an innovator will often last many years, in several cases, two decades or more, extending from pre-clinical development through the end of the product’s life cycle. We serve customers who require innovative product development, superior quality, advanced manufacturing, and skilled technical services to support their development and marketed product needs. Our broad and diverse range of technologies closely integrates with our customers’ molecules and other active ingredients to yield final formulations and dose forms, and this generally results in the inclusion of Catalent in our customers’ prescription product regulatory filings. Both of these factors frequently translate to long-duration supply relationships at an individual product level.

We believe our customers value us because our depth of development solutions and advanced delivery technologies, intellectual property, consistent and reliable supply, geographic reach, and substantial expertise enable us to create a broad range of business and product solutions that can be customized to fit their individual needs. Today we employ more than 2,400 scientists and technicians and hold nearly 1,300 patents and patent applications in advanced delivery, drug and biologics formulation, and manufacturing. The aim of our offerings is to allow our customers to bring more products to market faster, and to develop and market differentiated new products that improve patient outcomes. We believe our leading market position and diversity of customers, offerings, regulatory categories, products, and geographies reduce our exposure to potential strategic and product shifts within the industry.

We provide a number of proprietary, differentiated technologies, products, and service offerings to our customers across our advanced delivery technologies and development solutions platforms. The core technologies within our advanced delivery technologies platform include softgel capsules, our Zydis orally dissolving tablets, blow-fill-seal unit-dose liquids, adeno-associated virus (“AAV”) vectors, and a range of other oral, injectable, and respiratory delivery technologies. The technologies and service offerings within our development solutions platform span the drug development process, ranging from our OptiForm Solution Suite for enhancement of bioavailability and other characteristics of early-stage molecules, and Gene Product Expression (“GPEX”), GPEX Boost, and SMARTag platforms for development of biologics and antibody-drug conjugates (“ADCs”), to formulation, analytical services, early-stage clinical development, and clinical trials supply, including our unique FlexDirect direct-to-patient and FastChain demand-led clinical supply solutions. Our offerings serve a critical need in the development and manufacturing of difficult-to-formulate products across a number of product types.

We have advanced our technologies and grown our service offerings over more than 85 years through internal development, strategic alliances, in-licensing, and acquisitions. We initially introduced our softgel capsule technology in the 1930s and have continued to expand our range of new, technologically enhanced offerings. Since fiscal 2013, we have launched OptiShell, OptiMelt, Zydis Nano, Zydis Bio, OptiPact, the OptiForm Solution Suite, and our FlexDirect, SupplyFlex, and FastChain demand-led clinical supply solutions, as well as both clinical- and commercial-scale spray-drying formulation and

delivery services. Our customers use these solutions to advance their products, including the first commercially marketed product using our OptiShell non-gelatin soft capsule technology. We have also augmented our portfolio through acquisitions. In fiscal 2017, we expanded our early development capabilities through the September 2016 acquisition of Pharmatek Laboratories, Inc. (“Pharmatek”), and we expanded our softgel development and manufacturing network through the February 2017 acquisition of Accucaps Industries Limited (“Accucaps”). In fiscal 2018, we acquired Cook Pharmica LLC (now known as Catalent Indiana, LLC (“Catalent Indiana”)) in order to enhance our biologics capabilities. In fiscal 2019, we acquired Juniper Pharmaceuticals, Inc. (“Juniper”), extending to the E.U. our early development capabilities, and Paragon Bioservices, Inc. (now known as Catalent Maryland, Inc. (“Catalent Maryland”)), adding advanced gene therapy development and manufacturing capabilities to our biologics business. In fiscal 2020, we augmented our gene therapy capabilities with the acquisition of certain assets, including two advanced biologics clinical development and manufacturing sites in southern Maryland, from Novavax, Inc. (“Novavax”) in July 2019; in January 2020, we acquired Bristol-Myers Squibb Company’s oral solid, biologics, and sterile product manufacturing and packaging facility in Anagni, Italy (“Anagni”); and, in February 2020, we acquired Masthercell Global Inc. (“MaSTherCell”), which develops and manufactures autologous and allogeneic cell therapies for third parties and provides a variety of related analytical services. In May 2020, we agreed to acquire a clinical packaging facility located in Shiga, Japan from Takeda-Teva Pharmaceuticals, Inc. and completed the acquisition on July 1, 2020. In large part due to our recent acquisitions and their subsequent organic growth, revenue contributions from our biologics business have grown from approximately 10% in fiscal 2014 to 33% in fiscal 2020. We believe our own internal innovation, supplemented by current and future external partnerships and acquisitions, will continue to strengthen and extend our leadership positions in the delivery and development of drugs, biologics, cell and gene therapies, and consumer health products.

The COVID-19 Pandemic

As a global development and manufacturing partner that supplies medicines, clinical trial materials, and consumer health products to millions of patients and consumers, we have been taking decisive action to minimize the impact of the COVID-19 pandemic on our employees, partners, customers, and their patients. We have been declared an essential business by all the national and local governments where we operate, allowing us to sustain full employment for our teams. Our operating facilities have remained open and have continued to deliver to our customers and their patients. Our ongoing capital investments into expanding our capabilities and capacity to serve our customers have been proceeding across our biologics, oral dose form, and inhaled solutions platforms.

We have been awarded work on more than 50 COVID-19-related compounds from over 40 customers, involving each of our business units, across a wide variety of antivirals, vaccines, diagnostics, and treatments for symptoms and effects of COVID-19, including most of the major vaccine programs.

To address the multiple dimensions of the pandemic, two senior, multi-disciplinary teams reporting directly to our Chief Executive Officer have been continuously monitoring the global situation, executing mitigation activities whenever and wherever required, and planning for a phased and structured return to our facilities as circumstances will permit for those employees who have been remote-working since the pandemic began. To help assure the safety of our employees and partners and protect the supply of our products to patients, we have taken extensive actions, in line with guidelines issued by the U.S. Centers for Disease Control and Prevention (CDC), the World Health Organization (WHO), and local authorities where we operate, to re-emphasize good hygiene practices, severely restrict non-employee access to our sites, reorganize our workflows where permitted to maximize social distancing, limit our employees to only business-critical travel (where permitted by local law), facilitate safer alternatives to travel to and from work, and employ remote-working strategies.

History

We trace our history to the founding of the R.P. Scherer Corporation in 1933, which developed the first rotary die machine for the manufacture of soft gelatin capsules, and assumed our current form in April 2007. We regularly review our portfolio of offerings and operations in the context of our strategic growth plan, and, as a result, we have sold eight businesses and consolidated operations at five facilities, integrating them into the remaining facility network. In fiscal 2020, we sold our facility in Braeside, Australia. We have also actively acquired new businesses and facilities. In July 2014, we completed the initial public offering of our common stock, par value \$0.01 (the “Common Stock”), which is listed on the New York Stock Exchange (the “NYSE”) under the symbol “CTLT.”

We are a holding company that indirectly owns Catalent Pharma Solutions, Inc. (“Operating Company”), which owns, directly or indirectly, all of our operating subsidiaries.

Our Competitive Strengths

Leading Provider of Advanced Delivery Technologies and Development and Manufacturing Solutions

We are the leading global provider of advanced delivery technologies and development and manufacturing solutions for drugs; protein, cell, and gene therapy biologics; and consumer health products. In the last decade, we have earned revenue with respect to nearly half of the drugs based on new molecular entities approved by the FDA, and over the past three years with respect to more than 80% of the top 200 largest-selling compounds globally. With more than 2,400 scientists and technicians worldwide and nearly 1,300 patents and patent applications, our expertise is in providing differentiated technologies and solutions that help our customers bring more products and better treatments to market faster. For example, in the high-value area of new chemical entities (“NCEs”), approximately 90% of NCE softgel approvals by the FDA over the last 25 years have been developed and supplied by us.

Diversified Operating Platform

We are diversified by virtue of our geographic scope, our large customer base, the extensive range of products we produce, our broad service offerings, and our ability to provide solutions at nearly every stage of a product’s lifecycle. In fiscal 2020, we produced nearly 7,000 distinct items across multiple categories; our fiscal 2020 regulatory-based classification of revenues demonstrates this: branded drugs (38%), generic prescription drugs (5%), protein, cell and gene therapy biologics (37%), over-the-counter drugs (11%), and consumer health, veterinary products, medical devices, and diagnostics (9% combined). In fiscal 2020, our top 20 products represented approximately 18% of our total net revenue, with no single customer accounting for greater than 10% of revenue and with no individual product greater than 3%. We serve more than 1,000 customers in approximately 85 countries, with 41% of our fiscal 2020 net revenue coming from outside the United States. This diversity, combined with long product lifecycles and close customer relationships, has contributed to the stability of our business. It has also allowed us to reduce our exposure to potential strategic, customer, and product shifts as well as to payer-driven pricing pressures experienced by our drug and biologic customers.

Longstanding, Extensive Relationships with a Diverse Customer Base

We have longstanding, extensive relationships with leading pharmaceutical and biotechnology customers. In fiscal 2020, we did business with 86 of the top 100 branded drug marketers, 24 of the top 25 generics marketers, 23 of the top 25 biologics marketers, and 22 of the top 25 consumer health marketers globally, as well as with more than 1,000 other customers, including emerging and specialty companies, which are often more reliant on outside partners as a result of their more virtual business models. Regardless of size, our customers seek innovative product development, superior quality, advanced manufacturing, and skilled technical services to support their development and marketed product needs.

We believe our customers value us because our depth of development solutions and advanced delivery technologies, consistent and reliable supply, geographic reach, and substantial expertise enable us to create a broad range of tailored solutions, many of which are unavailable from other individual providers.

Deep, Broad, and Growing Advanced Technology Foundation

Our breadth of proprietary and patented technologies and long track record of innovation substantially differentiate us from other industry participants. Our leading softgel platforms, including Liqui-Gels, OptiShell, and Vegicaps capsules, and our modified release technologies, including the Zydis family and our OptiPact and OptiMelt technologies, provide formulation expertise to solve complex delivery challenges for our customers. We offer advanced technologies for delivery of small molecules and biologics via respiratory, ophthalmic, and injectable routes, including the blow-fill-seal unit dose technology and prefilled syringes. We also provide advanced biologics formulation options, including GPEx and GPEx Boost cell lines, SMARTag ADC technology, and AAV vectors for cell and gene therapies. We have a leadership position within respiratory delivery, including metered dose and dry powder inhalers and nebulized and intra-nasal forms. We have reinforced our leadership position in advanced delivery technologies over the last five years, as we have launched more than a dozen new technology platforms and applications, including the fiscal 2016 launch of our OptiForm Solution Suite, a dose form-agnostic bioavailability enhancement program for early-stage molecules, the launch of development-, clinical-, and commercial-scale spray drying services, and the recent acquisitions of Catalent Indiana, Catalent Maryland, and MaSTherCell, which expanded our biologics business and extended us into cell and gene therapy. Our culture of creativity and innovation is grounded in our advanced delivery technologies, our scientists and engineers, and our patents and proprietary manufacturing processes throughout our global network. Our global product development team drives a focused application of resources to our highest priority opportunities for both new customer product introductions and platform technology development. As of June 30, 2020, we had approximately 1,200 product development programs in active development across our businesses.

Long-Duration Relationships Provide Sustainability

Our broad and diverse range of technologies closely integrates with our customers' molecules to yield final formulations and dose forms, and this generally results in the inclusion of Catalent in our customers' prescription product regulatory filings. Both of these factors translate to long-duration supply relationships at an individual product level, to which we apply our expertise in contracting to produce long-duration commercial supply agreements. These agreements typically have initial terms of three to seven years with regular renewals of one to three years (see "—Contractual Arrangements" for more detail). Approximately two-thirds of our fiscal 2020 advanced delivery technology platform net revenues (comprised of our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery reporting segments) were covered by such long-term contractual arrangements. We believe this base provides us with a sustainable competitive advantage.

Significant Recent Growth Investments

We have made over time, and expect to continue to make, significant investments to strengthen our manufacturing network, which is capable of serving customers and patients worldwide, and today employ 7.1 million square feet of manufacturing, laboratory, and related space across four continents. We have deployed approximately \$1.1 billion in the last five fiscal years in gross capital expenditures, not including more than \$3.0 billion spent in acquiring new facilities and businesses. Growth-related investments in facilities, capacity, and capabilities across our businesses have positioned us for future growth in areas aligned with anticipated future demand. Through our focus on operational, quality, and regulatory excellence, we drive for ongoing and continuous improvements in safety, productivity, and reliable supply to customer expectations, which we believe further differentiate us. Our manufacturing network and capabilities allow us the flexibility to reliably supply the changing needs of our customers while consistently meeting their quality, delivery, and regulatory compliance expectations.

High Standards of Regulatory Compliance and Operational and Quality Excellence

We operate our plants in accordance with current good manufacturing practices ("cGMP") or other applicable requirements, following our own high standards that are consistent with those of many of our large global pharmaceutical and biotechnology customers. We have more than 1,900 employees around the globe focused on quality and regulatory compliance. All of our facilities are registered where required with the FDA or other applicable regulatory agencies, such as the European Medicines Agency (the "EMA"). In some cases, facilities are registered with multiple regulatory agencies. In fiscal 2020, we were subject to 50 regulatory audits, and, over the last five fiscal years, we successfully completed approximately 290 regulatory audits. We also undergo more than 500 customer and internal audits annually. We believe our quality and regulatory track record to be a favorable competitive differentiator.

Strong and Experienced Management Team

Our executive leadership team collectively has nearly 600 years of combined and diverse experience within the pharmaceutical and healthcare industries. With an average of more than 27 years of functional experience, this team possesses deep knowledge and a wide network of industry relationships.

Our Strategy

We are pursuing the following key growth initiatives:

"Follow the Molecule"[®] Providing Solutions to our Customers across all Phases of the Product Lifecycle

We intend to use our advanced delivery technologies and development and manufacturing solutions across the entire lifecycle of our customers' products to drive future growth. Our development solutions span the drug development process, starting with our platforms for early pre-clinical development of small molecules, protein, cell, and gene therapy biologics; ADCs; formulation and analytical services; development and manufacturing of clinical trial supplies; to regulatory consulting. Once a molecule is ready for clinical trials and subsequent commercialization, we provide our customers with a range of advanced delivery technologies and expert manufacturing solutions that allow them to deliver their molecules to the end-users in appropriate dosage forms, and to produce biologics drug substances needed for protein, cell, and gene therapy biologics. The relationship between a molecule and our advanced delivery technologies typically starts with developing and manufacturing the innovator product, then extends throughout the molecule's commercial life, including with additional customers, through potential generic launches or over-the-counter conversion. For prescription products, we are typically the sole or primary outsourced provider and, as a result, are frequently reflected in customers' new drug applications. Our revenues from our advanced delivery technologies are primarily driven by volumes, and, as a result, the loss of an innovator drug's market exclusivity may be mitigated if we supply customers offering generic or biosimilar equivalents.

An example of this can be found in a leading over-the-counter anti-allergy brand, which today uses both our Zydys orally dissolving tablets and our Liqui-Gels softgel technology. We originally began development of the prescription format of this product for our multinational pharmaceutical company partner in 1992 to address specific patient sub-segment needs. After four years of development, we then commercially supplied the prescription product in our Zydys orally dissolving tablets for six years, and we have continued to provide the Zydys form since the switch to over-the-counter status in the United States and other markets in the early 2000s. Subsequently, we proactively brought a softgel product concept for the brand to the customer, which the customer elected to develop and launch as well. By following this molecule, we have built a strong, 28-year-long relationship across multiple formats and markets.

Customer Product Pipeline — Continuing to Grow Through New Projects and Product Launches

We intend to grow by supplementing our existing diverse base of commercialized customer products with new development programs. As of June 30, 2020, our product development teams were working on approximately 1,200 new customer programs. Our base of active development programs has expanded in recent years from growing market demand, as well as from our expanded capabilities and technologies through both internal investment and acquisitions. Although there are many complex factors that affect the development and commercialization of pharmaceutical; protein, cell and gene therapy biologics; and consumer health products, we expect that a portion of these programs will reach full development and market approval in the future and thereby add to our long-duration commercial revenues under long-term contracts and grow our existing product base. In fiscal 2020, we introduced 163 new products for our customers.

Catalent continues to be the global leader in providing analytical, manufacturing, and controls-based product development services to the global pharmaceutical, biotechnology, and consumer health industries, driven by thousands of projects annually. In fiscal 2020, we recognized \$1,016.6 million of revenue related to the development of products on behalf of customers, included in our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery reporting segments, up 56% from the prior year. In addition, substantially all of the revenue associated with the Clinical Supply Services segment relates to our support of customer products in development.

Capabilities & Capacity — Expanding in Biologics and Other Attractive Markets

Recognizing the strategic importance of biologics, we began to build a differentiated biologics cell-line and formulation development platform in 2002. Since then, we have invested over \$3.0 billion in our biologics business, including capital investments, the fiscal 2020 acquisition of MaSTherCell for an aggregate nominal purchase price of \$323.3 million, the fiscal 2019 acquisitions of our gene therapy assets, including Catalent Maryland, for an aggregate nominal purchase price of \$1.2 billion, and the fiscal 2018 acquisition of Catalent Indiana for an aggregate nominal purchase price of \$950.0 million. Today, we are a recognized leader in biologics, including AAV vectors for gene therapies; development for cell therapies; advanced cell-line development; formulation, and fill-finish into pre-filled syringes, vials, and cartridges; specialized manufacturing of biologic drug substance; and bioanalytical analysis. We have partnered with customers from around the world to develop advanced cell expression for nearly 700 cell lines, many using our advanced GPEX and GPEX Boost technologies, and have actively collaborated on developing and scaling up more than 70 cell and gene therapies. We have also invested in a second-generation ADC technology, SMARTag, and we see continued progress in our customers' SMARTag product-development activities.

In addition to our expansion in biologics, we have invested additional capital in several other existing facilities in order to expand in attractive markets, including a significant expansion of our oral solid controlled release production capacity in Winchester, Kentucky, the scaling-up of commercial manufacturing capacity for metered-dose inhalers, and our commencement of a \$34.0 million capital investment to commercialize our next-generation orally dissolving tablet (ODT) technology, Zydys Ultra. We have also added key new capabilities in early development via our fiscal 2019 acquisition of Juniper and our fiscal 2017 acquisition of Pharmatek. We expanded our capacity for oral and injectable products via our fiscal 2020 Anagni acquisition, and for North American consumer health softgels via our fiscal 2017 Accucaps acquisition.

Advanced Delivery Technologies — Capitalize on Our Substantial Platforms

We have broad and diverse technology platforms that are supported by extensive know-how and nearly 1,300 patents and patent applications in approximately 139 families across advanced delivery technologies, drug and biologics formulation, and manufacturing. For example, we have significant softgel fill and formulation know-how, databases of formulated products, and substantial softgel regulatory approval expertise, and, as a result, approximately 90% of NCE softgel approvals by the FDA over the last 25 years have been developed and supplied by us.

In addition to resolving delivery challenges for our customers' products, for more than two decades we have applied our technology platforms and development expertise to proactively develop proof-of-concept products, whether improved versions of existing drugs, new generic formulations, or innovative consumer health products. In the consumer health area, we file

product dossiers with regulators in relevant jurisdictions for self-created products, which help contribute sustainable growth to our consumer health business. We expect to continue to seek proactive development opportunities and other non-traditional relationships to increase demand for and value realized from our technology platforms. These activities have provided us with opportunities to capture an increased share of end-market value through out-licensing, profit-sharing, and other arrangements.

Operational Leverage — Deploy Existing Infrastructure and Operational Discipline to Drive Profitable Growth

Through our existing infrastructure, including our global network of operating locations and programs, we promote operational discipline and drive margin expansion. With our Lean Manufacturing and Lean Six Sigma programs, a global procurement function, and conversion cost productivity metrics in place, we have created a culture of functional excellence and cost accountability. We intend to continue to apply this discipline to leverage further our operational network for profitable growth. Since fiscal 2009, we have expanded gross margin by over 400 basis points and Adjusted EBITDA margin by over 400 basis points. Note that “Adjusted EBITDA” is a financial metric that is not prepared in accordance with the accounting principles generally accepted in the United States (“U.S. GAAP”), and that further explanations of this measure and comparisons to the most directly comparable U.S. GAAP measures are set forth below at “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Non-GAAP Metrics.”

Strategic Acquisitions and Licensing — Build on our Existing Platform

We operate in highly fragmented markets in both our commercial supply and development solutions businesses. Within the market for commercial supply, the ten top players represent approximately 39% of the total market share by revenue. Within the market for development solutions, the five top players represent approximately 10% of the total market share by revenue. Our broad platform, global infrastructure, and diversified customer base provide us with a strong foundation from which to consolidate within these markets, to enter new markets, and to generate operating leverage through acquisitions. Since fiscal 2013, we have executed 13 transactions, investing approximately \$3.1 billion, and have demonstrated an ability to efficiently and effectively integrate these acquisitions.

While we are rigorously focused on driving Catalent’s organic growth, we intend to continue to opportunistically source and execute bolt-on strategic acquisitions within our existing business areas, as well as to undertake transactions that provide us with expansion opportunities within new geographic markets or adjacent market segments. We have a dedicated corporate development team in place to identify these opportunities and have a rigorous and financially disciplined process for evaluating, executing, and integrating such acquisitions.

Our Reporting Segments

In fiscal 2020, we engaged in a business reorganization of our operating segments to better align our internal business unit structure with our “Follow the Molecule” strategy and the increased focus on our biologics-related offerings. Under the revised structure, we changed the components and names of three of our four operating segments (with our fourth segment, Clinical Supply Services, unchanged).

We currently operate in four operating segments, which also constitute our four reporting segments: Softgel and Oral Technologies, Biologics, Oral and Specialty Delivery, and Clinical Supply Services, as further described below.

Softgel and Oral Technologies

Through our Softgel and Oral Technologies segment, we provide formulation, development, and manufacturing services for soft capsules, or “softgels,” as well as large-scale manufacturing of oral solid dose forms for pharmaceutical and consumer health markets, and supporting ancillary services.

Catalent’s softgel technology was first commercialized by our predecessor in the 1930s, and we have continually enhanced the platform since then. We are the market leader in overall softgel development and manufacturing and hold the leading market position in innovator drug softgels. Our principal softgel technologies include traditional softgel capsules, in which the shell is made of animal-derived gelatin, and Vegicaps and OptiShell capsules, in which the shell is made from plant-derived materials. Softgel capsules are used in a broad range of customer products, including prescription drugs, over-the-counter medications, dietary supplements, unit-dose cosmetics, and animal health medicinal preparations. Softgel capsules encapsulate liquid, paste, or oil-based formulations of active compounds in solution or suspension within an outer shell. In the manufacturing process, the capsules are formed, filled, and sealed simultaneously. We typically perform encapsulation for a product within one of our softgel facilities, with active ingredients provided by customers or sourced directly by us. Softgels have historically been used to solve formulation challenges or technical issues for a specific drug, to help improve the clinical performance of compounds, to provide important market differentiation, particularly for over-the-counter medications, and to provide safe handling of hormonal, highly potent, and cytotoxic drugs. We also participate in the softgel vitamin, mineral, and supplement business in selected regions around the world. With the 2001 introduction of our plant-derived softgel shell,

Vegicaps capsules, consumer health customers have been able to extend the softgel dose form to a broader range of active ingredients and serve patient/consumer populations that were previously inaccessible due to religious, dietary, or cultural preferences. In recent years, we have extended this platform to pharmaceutical products via our OptiShell capsule offering. Our Vegicaps and OptiShell capsules are protected by patents in most major global markets. Physician and patient studies we have conducted have demonstrated a preference for softgels versus traditional tablet and hard capsule dose forms in terms of ease of swallowing, real or perceived speed of delivery, ability to remove or eliminate unpleasant odor or taste, and, for physicians, perceived improved patient adherence with dosing regimens.

Our large-scale cGMP manufacturing of oral solid dose forms typically includes late-stage clinical trial supplies, registration batches, and commercial production across a broad range of formats, and may also involve finished dose packaging or advanced processing of intermediates to achieve the desired clinical performance of the prescription or over-the-counter pharmaceutical product. Finished dose forms include traditional and advanced complex oral solid-doses, including coated and uncoated tablets, pellet/bead/powder-filled two-piece hard capsules, granulated powders, and other immediate and modified release forms. Advanced intermediate processing may include coating, extrusion, or spheronization to achieve specific functional outcomes, including site- or time-specific drug release, taste masking, or enhanced bioavailability. We have deep experience at managing complex technical transfers of clinical or commercial programs, whether from Catalent's early development network in the Oral and Specialty Delivery segment, other contract development sites, or from customers directly.

Representative customers of Softgel and Oral Technologies include Pfizer, Novartis, Bayer, GlaxoSmithKline, and Procter & Gamble.

Our Softgel and Oral Technologies segment represents 34%, 41%, and 45% of our aggregate revenue before inter-segment eliminations for fiscal 2020, 2019, and 2018, respectively.

Biologics

Our Biologics segment provides biologic cell-line, cell therapy and viral vector gene therapy development and manufacturing; formulation, development, and manufacturing for parenteral dose forms, including prefilled syringes, vials, and cartridges; and analytical development and testing services for large molecules. The business has extensive expertise in development, scale up, and commercial manufacturing. Representative customers of Biologics include Eli Lilly, Teva, Mylan, Roche, AstraZeneca, Novartis, Sarepta, and Genentech, along with multiple innovative small and mid-tier pharmaceutical and biologics customers.

Our growing biologics offering includes cell-line development based on our advanced and patented GPEX technology and the recently launched GPEX Boost, which are used to develop stable, high-yielding mammalian cell lines for both innovator and biosimilar biologic compounds. GPEX technology can provide rapid cell-line development, high biologics production yields, flexibility, and versatility. Our development and manufacturing facility in Madison, Wisconsin has the capability and capacity to produce cGMP quality biologics drug substance from 250L to 4000L scale using single-use technology to provide maximum efficiency and flexibility. Our fiscal 2018 acquisition of Catalent Indiana added capabilities across biologics development, clinical, and commercial drug substance manufacturing, formulation, finished-dose drug product manufacturing, and packaging. We have continued to expand production capacity in both Madison and Bloomington, Indiana, including a fourth drug substance suite in Madison, and expanded drug product manufacturing and packaging capacity in Bloomington. Our SMARTag next-generation ADC technology, based in Emeryville, California, enables development of ADCs and other protein conjugates with improved efficacy, safety, and manufacturability.

From May 2019 through February 2020, we acquired several cell and gene therapy development and manufacturing assets located in Maryland, Texas, and Belgium, and thereby entered into this fast-growing and innovative space. Our gene therapy platform develops and manufactures products based on transformative technologies, including gene therapies based on AAV and other modalities, next-generation vaccines, oncology immunotherapies (oncolytic viruses and CAR-T cell therapies), therapeutic proteins, and other complex biologics. Our specialized expertise in AAV vectors, the most commonly used delivery system for gene therapy, as well as capabilities in plasmids and lentivirus vectors manufactured using cGMP, positions us to capitalize on strong industry tailwinds in the market for gene therapies. We also provide substantial expertise and expanding capacity for the development and manufacture of autologous and allogeneic cell therapies for customers, as well as a variety of related analytical services.

Our range of injectable manufacturing offerings includes manufacturing drug substance and filling small molecules or biologics into syringes, cartridges, and vials, with flexibility to accommodate other formats within our existing network. Our fill and finish services are increasingly focused on complex pharmaceuticals and biologics. With our range of technologies, we are able to meet a wide range of specifications, timelines, and budgets. We believe that the complexity of the manufacturing process, the importance of experience and know-how, regulatory compliance, and substantial capital requirements provide us with a meaningful competitive advantage in the market.

We also offer bioanalytical development and testing services for large molecules, including cGMP release and stability testing. In fiscal 2019, we launched OneBio Suite, which provides customers the potential to seamlessly integrate drug substance, drug product, and clinical supply management for products in development, and for integrated commercial supply across both drug substance and drug product. We provide the broadest range of technologies and services supporting the development and launch of new biologic entities, biosimilars, and biobetters to bring a product from gene to commercialization, faster.

Our Biologics segment represents 33%, 23% and 18% of our aggregate revenue before inter-segment eliminations for fiscal 2020, 2019, and 2018, respectively.

Oral and Specialty Delivery

Our Oral and Specialty Delivery segment provides advanced formulation development and manufacturing across a range of technologies along with integrated downstream clinical development and commercial supply solutions. The technologies cover a broad range of oral (including our proprietary Zydis orally dissolving tablets and many bioavailability enhancement (BAE) technologies for both immediate and controlled-release tablets and capsules), respiratory and inhaled dose forms, including blow-fill-seal, metered dose inhalers, dry powder inhalers, and nasal applicators. Representative customers of Oral and Specialty Delivery include Johnson & Johnson, Pfizer, Bayer, Perrigo, Roche, and Genentech but also many small and mid-sized companies involved in the clinical development space.

Our oral delivery solutions platform provides comprehensive pre-clinical screening, formulation, analytical development, and cGMP manufacturing at both clinical and commercial scale for both traditional and advanced complex oral solid-dose formats. We have substantial proven experience in developing and scaling up orphan and rare disease oral products, especially those requiring accelerated development timelines, solubility enhancement, specialized handling (*e.g.*, potent or controlled substance materials), complex technology transfer and specialized manufacturing processes. We provide spray drying, hot melt extrusion, micronization, and lipid formulation capabilities, all of which may enhance a drug's bioavailability and clinical performance. We offer comprehensive analytical method development and scientific capabilities, including stability testing and global regulatory filing services to support integrated development programs or standalone fee-for-service work. In recent years, we have expanded our network of clinical development sites focused on earlier phase compounds (*i.e.*, pre-clinical and Phase I) to engage with more customer molecules earlier, with the intent to also support these molecules downstream as they progress towards commercial approval. Demand for our offerings is driven by the need for scientific expertise, the depth and breadth of integrated services offered, as well as the reliability of our supply performance across quality and operational parameters.

We launched our orally dissolving tablet business in 1986 with the introduction of Zydis, a unique proprietary freeze-dried tablet that dissolves in the mouth, without water, in typically less than three seconds. The platform is often used for drugs that benefit from rapid oral dissolution and buccal absorption and for drugs for specialized patient groups, including geriatric or pediatric populations, that have difficulty swallowing (dysphagia). We can adapt the Zydis technology to a wide range of molecules and indications, including prescription treatments for a variety of central nervous system-related conditions such as migraine, Parkinson's disease, and schizophrenia, and also for a range of consumer healthcare products targeting broader indications such as pain or allergy relief. We continue to invest in and develop Zydis orally dissolving tablets in different ways with our customers as we extend the application of the technology to new therapeutic categories, including immunotherapy, vaccines, and biologic molecule delivery.

Our respiratory platform provides integrated molecule screening, formulation development, and commercial manufacturing services for inhaled products delivered via metered dose inhalers, dry powder inhalers, and intra-nasal sprays. Delivery of these inhaled combination device products requires specialized capabilities to account for both the molecule and the device, to ensure accurate repeatable dose delivery.

Our blow-fill-seal platform provides an advanced aseptic processing technology, which uses a continuous process to form, fill with drug or biologic, and seal a plastic container in a sterile environment. Blow-fill-seal units are currently used for a variety of pharmaceuticals in liquid form, such as nebulized respiratory, ophthalmic, and otic products. We offer significant manufacturing capacity and flexibility in dose form design and provide development and scalable solutions for unit-dose delivery of complex formulations, such as suspensions and emulsions, for both small and large molecules.

Our Oral and Specialty Delivery segment represents 22%, 23%, and 20% of our aggregate revenue before inter-segment eliminations for fiscal 2020, 2019, and 2018, respectively.

Clinical Supply Services

Our Clinical Supply Services segment provides manufacturing, packaging, storage, distribution, and inventory management for drugs and biologics in clinical trials. We offer customers flexible solutions for clinical supplies production and provide distribution and inventory management support for both simple and complex clinical trials. This includes over-encapsulation where needed; supplying placebos, comparator drug procurement, and clinical packages and kits for physicians and patients; inventory management; investigator kit ordering and fulfillment; and return supply reconciliation and reporting. We support trials in all regions of the world through our facilities and distribution network. In recent years, we have continued to expand and extend our network, with significant expansions in Kansas City, Missouri and Singapore and new facilities in China and, effective July 2020, in Japan. We are the leading provider of integrated development solutions and one of the leading providers of clinical trial supplies. Representative customers of Clinical Supply Services include Merck KGaA, IQVIA, Eli Lilly, AbbVie, and Incyte Corporation.

Our Clinical Supply Services segment represents 11%, 13%, and 17% of our aggregate revenue before inter-segment eliminations for fiscal 2020, 2019, and 2018, respectively.

Integrated Development and Product Supply Chain Solutions

In addition to our proprietary offerings, we are also differentiated in the market by our ability to bring together our development solutions and advanced delivery technologies to offer innovative development and product supply solutions that can be combined or tailored in many ways to enable our customers to take their drugs, biologics, and consumer health products from laboratory to market. Once a product is on the market, we can provide comprehensive integrated product supply, from the sourcing of the bulk active ingredient to comprehensive manufacturing and packaging, to the testing required for release, and to distribution. The customer- and product-specific solutions we develop are flexible, scalable, and creative, so that they meet the unique needs of both large and emerging companies and are appropriate for products of all sizes. We believe that our development and product supply solutions, such as OptiForm Solution Suite and OneBio Suite, will continue to contribute to our future growth.

Sales and Marketing

Our target customers include large pharmaceutical and biotechnology companies, mid-size, emerging, and specialty pharmaceutical and biotechnology companies, and consumer health companies, along with companies in other selected healthcare market segments such as animal health and medical devices, and companies in adjacent industries, such as cosmetics. We have longstanding, extensive relationships with leading pharmaceutical and biotechnology customers. In fiscal 2020, we did business with 86 of the top 100 branded drug marketers, 24 of the top 25 generics marketers, 23 of the top 25 biologics marketers, and 22 of the top 25 consumer health marketers globally, as well as with more than 1,000 other customers. Faced with access, pricing, and reimbursement pressures as well as other market challenges, large pharmaceutical and biotechnology companies have increasingly sought partners to enhance the clinical competitiveness of their drugs and biologics and improve the productivity of their research and development activities, while reducing their fixed cost base. Many mid-size, emerging, and specialty pharmaceutical and biotechnology companies, while facing the same pricing and market pressures, have chosen not to build a full infrastructure, but rather to partner with other companies through licensing agreements or outsourcing to access the critical skills, technologies, and services required to bring their products to market. Consumer health companies require rapidly developed, innovative dose forms and formulations to keep up with the fast-paced over-the-counter medication, vitamins, and personal care markets. These market segments are all important to our growth, but require distinct solutions, marketing and sales approaches, and market strategy.

We follow a hybrid demand-generation organization model, with strategic account teams offering the full breadth of Catalent's solutions, and technical specialist teams providing the in-depth technical knowledge and practical experience essential for each individual offering. Our sales organization currently consists of more than 160 full-time, experienced sales professionals, supported by inside sales and sales operations. We also have built a dedicated strategic marketing team, providing strategic market and product planning and management for our offerings. As part of our marketing efforts, we participate in major trade shows relevant to our offerings globally and ensure adequate visibility to our offerings and solutions through a comprehensive print and on-line advertising and publicity program. We believe that Catalent is a strong brand with high overall awareness in our established markets and universe of target customers, and that our brand identity is a competitive advantage for us.

Global Accounts

We manage selected accounts globally due to their substantial current business and growth potential. We recorded approximately 17% of our total revenue in fiscal 2020 from these global accounts. Each global account is assigned a lead business development professional with substantial industry experience. These account leaders, along with other members of the sales and executive leadership teams, are responsible for managing and extending the overall account relationship. Account leaders work closely with the rest of the sales organization to ensure alignment around critical priorities for the accounts.

Emerging, Specialty, and Virtual Accounts

Emerging, specialty, and virtual pharmaceutical and biotechnology companies are expected to be critical drivers of industry growth globally. Historically, many of these companies have chosen not to build a full infrastructure, but rather partner with other companies to formulate, develop, analyze, test, and manufacture their products. We expect them to continue to do so in the future, providing a critical source for future integrated solutions demand. We expect to continue to increase our penetration of geographic clusters of emerging companies in North America, Europe, South America, and Asia. We regularly use active pipeline and product screening and customer targeting to identify the optimal candidates for partnering based on product profiles, funding status, and relationships, to ensure that our technical sales specialists and field sales representatives develop custom solutions designed to address the specific needs of these customers.

Seasonality; Fluctuations in Operation Results

Our annual financial reporting periods end on June 30. Our revenue and net earnings are generally higher in the third and fourth quarters of each fiscal year, with our first fiscal quarter typically generating our lowest revenue of any quarter, and our last fiscal quarter typically generating our highest revenue. These fluctuations are primarily the result of the timing of our, and our customers', annual operational maintenance periods at locations in continental Europe and the U.K., the seasonality associated with pharmaceutical and biotechnology budgetary spending decisions, clinical trial and research and development schedules, the timing of new product launches and length of time needed to obtain full market penetration, and, to a lesser extent, the time of the year some of our customers' products are in higher demand.

Contractual Arrangements

We generally enter into a broad range of contractual arrangements with our customers, including agreements with respect to feasibility, development, supply, licenses, and quality. The terms of these contracts vary significantly depending on the offering and customer requirements. Some of our agreements may include a variety of revenue arrangements, such as fee-for-service, minimum volume commitments, royalties, manufacturing preparation services, profit-sharing, and fixed fees. We employ a range of capacity access approaches, from standard to completely dedicated capacity models, based on customer and product needs. We generally secure pricing and other contract mechanisms in our supply agreements to allow for periodic resetting of pricing terms, and, in some cases, these agreements permit us to raise or renegotiate pricing in the event of certain price increases for the raw materials we use to make products. Our typical supply agreements include indemnification from our customers for product liability and intellectual property matters and caps on our contractual liabilities, subject in each case to negotiated exclusions. The terms of our manufacturing supply agreements range from three to seven years with regular renewals of one to three years, although some of our agreements are terminable upon much shorter notice periods, such as 30 or 90 days. For our development solutions offerings, we may enter into master service agreements, which provide for standardized terms and conditions and make it easier and faster for customers with multiple development needs to access our offerings.

Backlog

While we generally have long-term supply agreements that provide for a revenue stream over a period of years, our backlog represents, as of a point in time, future service revenues from work not yet completed. For our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery segments, backlog represents firm orders for manufacturing services and includes minimum volumes, where applicable. For our Clinical Supply Services segment, backlog represents estimated future service revenues from work not yet completed under signed contracts. Using these methods of reporting backlog, as of June 30, 2020, our backlog was \$2,282.3 million compared to \$1,349.8 million as of June 30, 2019, including \$424.7 million and \$366.3 million, respectively, related to our Clinical Supply Services segment. We expect to recognize as revenue approximately 72% of the value of the backlog in existence as of June 30, 2020 by the completion of fiscal 2021.

To the extent projects are delayed, the timing of our revenue could be affected. If a customer cancels an order, we may be reimbursed for the costs we have incurred. For orders that are placed inside a contractual firm period, we generally have a contractual right to payment in the event of cancellation. Fluctuations in our reported backlog levels also result from the timing and order pattern of our customers who often seek to manage their level of inventory on hand. Because of customer ordering patterns, our backlog reported for certain periods may fluctuate and may not be indicative of future results.

Manufacturing Capabilities

We operate manufacturing facilities, development centers, and sales offices throughout the world. As of June 30, 2020, we had 53 facilities (4 geographical locations operate as multiple facilities because they support more than one reporting segment) on four continents with 7.1 million square feet of manufacturing, laboratory, and related space. In addition, in May 2020, we agreed to acquire a clinical packaging facility in Shiga, Japan from Takeda-Teva Pharmaceuticals, Inc.. The acquisition closed in July 2020. Our manufacturing capabilities include the full suite of competencies relevant to support each site's activities, including regulatory, quality assurance, and in-house validation.

We operate our manufacturing facilities and development centers in accordance with cGMP or other applicable requirements. All of these sites are registered where required with the FDA or other applicable regulatory agencies, such as the EMA. In some cases, our sites are registered with multiple regulatory agencies.

We have invested \$860.4 million in our manufacturing and development facilities since fiscal 2018 for improvements and expansions, including \$465.8 million for capital expenditures in fiscal 2020. We believe that our sites and equipment are in good condition, are well maintained, and are able to operate at or above present levels for the foreseeable future, in all material respects.

Our manufacturing operations are focused on employee health and safety, regulatory compliance, operational excellence, continuous improvement, and process standardization across the organization. In fiscal 2020, we achieved approximately 97% on-time shipment delivery versus customer request date across our network as a result of this focus. Our manufacturing operations are structured around an enterprise management philosophy and methodology that utilizes principles and tools common to a number of quality management programs, including Lean Six Sigma and Lean Manufacturing.

Raw Materials

We use a broad and diverse range of raw materials in the design, development, and manufacture of our products. This includes, but is not limited to, key materials such as gelatin, starch, and iota carrageenan for our Softgel and Oral Technologies segment; packaging films for our Clinical Supply Services segment; and glass vials and syringes for injectable fill-finish in our Biologics segment, and resin for our blow-fill-seal business in our Oral and Specialty Delivery segment. The raw materials that we use are sourced externally on a global basis. Globally, our supplier relationships could be interrupted due to natural disasters and international supply disruptions, including those caused by pandemics or geopolitical and other issues. For example, commercially usable gelatin is available from a limited number of sources. In addition, much of the gelatin we use is bovine-derived. Past concerns of contamination from Bovine Spongiform Encephalopathy ("BSE") have narrowed the number of possible sources of particular types of gelatin. If there were a future disruption in the supply of gelatin from any one or more key suppliers, there can be no assurance that we could obtain an alternative supply from our other suppliers. Any future restriction that were to emerge on the use of bovine-derived gelatin from certain geographic sources due to concerns of contamination from BSE could hinder our ability to timely supply our customers with products and the use of alternative non-bovine-derived gelatin for specific customer products could be subject to lengthy formulation, testing and regulatory approval periods.

We work very closely with our suppliers to assure continuity of supply while maintaining excellence in material quality and reliability. We continually evaluate alternate sources of supply, although we do not frequently pursue regulatory qualification of alternative sources for key raw materials due to the strength of our existing supplier relationships, the reliability of our current supplier base, and the time and expense associated with the regulatory process. Although a change in suppliers could require significant effort or investment by us in circumstances where the items supplied are integral to the performance of our products or incorporate specialized material such as gelatin, we do not believe that the loss of any existing supply arrangement would have a material adverse effect on our business. See "Risk Factors—Risks Relating to Our Business and Industry—*Our future results of operations are subject to fluctuations in the costs, availability, and suitability of the components of the products we manufacture, including active pharmaceutical ingredients, excipients, purchased components, and raw materials.*"

Competition

We compete with multiple companies as to each of our offerings and in every region of the globe in which we operate, including with other companies that offer conventional and advanced delivery technologies, clinical trials support, outsourced dose form, biologics or cell and gene therapy manufacturing, or development services to pharmaceutical, biotechnology, and consumer health companies based in North America, South America, Europe, and the Asia-Pacific region. We also compete in some cases with the internal operations of those pharmaceutical, biotechnology, and consumer health customers that also have manufacturing capabilities and choose to source these services internally. Some of our competitors are substantially larger than we are and have access to more substantial resources, which could be deployed to expand their range of offerings or capacity.

Competition is driven by proprietary technologies and know-how (where relevant), capabilities, consistency of operational performance, quality, price, value, responsiveness, and speed. While we do have competitors that compete with us in our individual offerings, and a few competitors that compete across many of our offerings, we do not believe we have competition from any directly comparable company.

Research and Development Costs

Our research activities are primarily directed toward the development of new offerings and manufacturing process improvements. Costs incurred in connection with the development of new offerings and manufacturing process improvements are recorded within selling, general, and administrative expenses. Such research and development costs included in selling, general, and administrative expenses amounted to \$2.6 million, \$3.3 million, and \$6.3 million for fiscal 2020, 2019, and 2018, respectively. Costs incurred in connection with research and development services we provide to customers and services performed in support of the commercial manufacturing process for customers are recorded within cost of sales. Such research and development costs included in cost of sales amounted to \$61.2 million, \$51.2 million, and \$46.2 million for fiscal years ended 2020, 2019, and 2018, respectively.

Employees

As of June 30, 2020, we had more than 13,900 employees in 53 facilities on 4 continents: 22 facilities are in the United States, with certain employees at one facility being represented by a labor organization with their terms and conditions of employment being subject to a collective bargaining agreement. National works councils and/or labor organizations are active at all seventeen of our European facilities consistent with labor environments and laws in European countries. Similar relationships with labor organizations or national works councils exist at our plants in Argentina, Brazil, and Canada. Our management believes that our employee relations are satisfactory.

	North America	Europe	South America	Asia Pacific	Total
Approximate number of employees as of June 30, 2020	7,600	4,900	900	500	13,900

Corporate Responsibility

The guiding lighthouse of our corporate responsibility (CR) commitment is our corporate mission to help people live better, healthier lives, which is enabled by our deep belief in our values. We continue to invest in a corporate culture that understands and prioritizes our impact on people in our operations and decision-making.

Governance

Environmental and social responsibility have always been integral to our core values. We established the Office of Corporate Responsibility in fiscal 2017 and created a formal governance structure through our CR Council, which reports to the Chair and CEO. Composed of members of our senior leadership, the Council oversees the implementation of our CR strategy and commitments across our business.

Business benefits

Beyond being the right thing to do, our focus on CR strengthens our business by reducing risks, meeting customer and investor expectations, and attracting top talent. CR performance is an important contributor to our business success. It informs our risk management process, protects our reputation, and alerts us to regulatory, environmental, and societal threats to our business. Our CR activities also align with many of our customers' CR programs and strengthens our relationships.

Our future success depends on our highly skilled and dedicated global team of employees, who are passionate about improving health outcomes. We compete for top talent in our industry and recognize that our culture and reputation as a responsible company can be a differentiator for attracting job candidates and keeping our existing employees.

Environment, Social, and Governance (ESG) progress in fiscal 2020

Our CR strategy stands on four pillars—Innovation, People, Environment, and Communities—and we have instituted a scorecard approach to monitor how each of the operating segments and sites across our network contributes to meeting our goals.

Significant areas of progress in fiscal 2020, include:

- Publishing our first Corporate Responsibility report, informed by the requirements of the Sustainability Accounting Standards Board (SASB) for Biotechnology and Pharmaceuticals and covering ESG issues including:

- Quality,
- Safety,
- Environmental sustainability,
- Diversity & inclusion, and
- Community investment and philanthropy.
- As part of our on-going commitment to the "CEO Action for Diversity & Inclusion" pledge, growing our employee resource group (ERG) network to seven. ERGs are voluntary, employee-run groups that bring people together based on shared characteristics, interests, or life experiences.
- Employing EDGE Strategy to conduct a formal gender equality workforce assessment for our U.S. operations and expanded our global gender pay analysis.
- After extensive work to establish a verifiable and calculable baseline, formalizing a target to reduce our carbon emissions by 15% over the next five years, and thereby taking action to support global efforts to address climate change.
- Significantly growing employee and nonprofit participation in our suite of "Catalent Cares" community giving and volunteer programs. A few highlights from the most recent fiscal year:
 - Employee participation in Catalent Month of Service grew by 50% and engagement in our matching gift program tripled compared to fiscal 2019.
 - Adjusting to the realities of social distancing required by the COVID-19 pandemic, Catalent "green" teams took our annual Earth Month celebration on-line by organizing digital awareness campaigns; developing do-it-yourself videos with "green" project ideas; and encouraging site-based initiatives, such as seed packet distribution to employees.
 - Catalent and its employees donated approximately \$500,000 to international and local nonprofits serving communities affected by COVID-19, making the 2020 fiscal year the largest philanthropic year for Catalent yet.

Looking ahead

Looking forward, we will expand our CR efforts and improve our performance in critical areas: We will assess how to integrate our respect for human rights more fully into our policies and practices and bolster the auditing of social and environmental standards in our supply chain. We commit to further developing our waste and water reduction strategies and sharing targets in those important environmental areas in our next CR report. We will continue to grow our community partnerships and employee-driven giving and volunteer programs, and will deepen our commitment to serving patients and promoting STEM education, training, and job-placement in our communities.

Further information on our CR program is available at <https://www.catalent.com/cr>, but this website is not part of our public disclosures and is not incorporated by reference into this Annual Report.

Intellectual Property

We rely on a combination of know-how, trade secrets, patents, copyrights, trademarks, and other intellectual property, nondisclosure and other contractual provisions, and technical measures to protect a number of our offerings, services, and intangible assets. These proprietary rights are important to our ongoing operations. Certain of our operations and products are covered by intellectual property licenses from third parties, and in certain instances we license our technology to third parties. We also have a long track record of innovation across our lines of business, and, to further encourage active innovation, we have developed incentive compensation systems linked to patent filings and other recognition and reward programs for scientists and non-scientists alike.

We have applied in the United States and certain other countries for registration of a number of trademarks, service marks, and patents, some of which have been registered and issued, and also hold common law rights in various trademarks and service marks. We hold nearly 1,300 patents and patent applications worldwide relating to advanced drug delivery and biologics formulations and technologies, as well as manufacturing and other areas relevant to our business.

We hold patents and license rights relating to certain aspects of our formulations, nutritional and pharmaceutical dosage forms, mammalian cell engineering, and sterile manufacturing services. We also hold patents relating to certain processes and products. We have a number of pending patent applications in the United States and certain other countries and intend to pursue additional patents as appropriate. We have enforced and will continue to enforce our intellectual property rights in the United

States and worldwide.

We do not consider any particular patent, trademark, license, franchise, or concession to be material to our overall business.

Regulatory Matters

The manufacture, distribution, and marketing of healthcare products and the provision of certain services for development-stage pharmaceutical and biotechnology products are subject to extensive ongoing regulation by the FDA, other U.S. governmental authorities, and regulatory authorities in other countries. Certain of our subsidiaries are required to register for permits or licenses with, and must comply with the operating, cGMP, quality, and security standards of, applicable domestic and foreign healthcare regulators, including the FDA, the U.S. Drug Enforcement Agency (the “DEA”), the U.S. Department of Health and Human Services (the “DHHS”), the equivalent agencies of the European Union (the “E.U.”) and its member states, and various state boards of pharmacy, state health departments, and comparable agencies in other jurisdictions, as well as various accrediting bodies, each depending upon the type of operations and the locations of distribution and sale of the products manufactured or services provided by those subsidiaries.

In addition, certain of our subsidiaries are subject to other healthcare laws, including the U.S. Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, the Controlled Substances Act, and comparable state and foreign laws and regulations in certain of their activities.

We are also subject to various federal, state, local, national, and transnational laws, regulations, and requirements, both in the United States and other countries, relating to safe working conditions, laboratory and distribution practices, and the use, transportation, and disposal of hazardous or potentially hazardous substances. In addition, applicable import and export laws and regulations require us to abide by certain standards relating to the cross-border transit of finished goods, raw materials, and supplies and the handling of information. We are also subject to various other laws and regulations concerning the conduct of our non-U.S. operations, including the U.S. Foreign Corrupt Practices Act, the U.K. Anti-Bribery Act, and other anti-bribery laws and laws pertaining to the accuracy of our internal books and records.

The costs associated with complying with the various applicable federal, state, local, national, and transnational regulations could be significant, and the failure to comply with such legal requirements could have an adverse effect on our results of operations and financial condition. See “Risk Factors—Risks Relating to Our Business and Industry—*Failure to comply with existing and future regulatory requirements could adversely affect our results of operations and financial condition or result in claims from customers,*” for additional discussion of the costs associated with complying with the various regulations.

In fiscal 2020, we were subject to 50 regulatory audits, and, over the last five fiscal years, we successfully completed approximately 290 regulatory audits.

Quality Assurance

We are committed to ensuring and maintaining the highest standard of regulatory compliance while providing high quality products to our customers. To meet these commitments, we have developed and implemented a Catalent-wide quality management system. We have nearly 2,000 employees around the globe focusing on quality and regulatory compliance. Our senior management team is actively involved in setting quality policies, standards, and internal position papers as well as managing internal and external quality performance. Our quality assurance department provides quality leadership and supervises our quality systems programs. An internal audit program monitors compliance with applicable regulations, standards, and internal policies. In addition, our facilities are subject to periodic inspection by the FDA, the DEA, and other equivalent local, state, and foreign regulatory authorities as well as our customers. All FDA, DEA, and other regulatory inspectional observations have been resolved or are on track to be completed at the prescribed timeframe provided in commitments to the applicable agency in all material respects. We believe that our operations are in compliance in all material respects with the regulations under which our facilities are governed.

Environmental Matters

Our operations are subject to a variety of environmental, health, and safety laws and regulations, including those of the U.S. Environmental Protection Agency (the “EPA”) and equivalent state, local, and national regulatory agencies in each of the jurisdictions in which we operate. These laws and regulations govern, among other things, air emissions, wastewater discharges, the use, handling, and disposal of hazardous substances and wastes, soil and groundwater contamination, and employee health and safety. Our manufacturing facilities use, in varying degrees, hazardous substances in their processes. These substances include, among others, chlorinated solvents, and in the past chlorinated solvents were used at one or more of our facilities, including a number we no longer own or operate. As at our current facilities, contamination at such formerly

owned or operated properties can result and has resulted in liability to us, for which we have recorded appropriate reserves as needed. We believe that our operations are in compliance in all material respects with the environment, health, and safety regulations applicable to our facilities.

ITEM 1A. RISK FACTORS

If any of the following risks actually occur, our business, financial condition, operating results, or cash flow could be materially and adversely affected. Additional risks or uncertainties not presently known to us, or that we currently believe are immaterial, may also impair our business operations.

Risks Relating to Our Business and Industry

Our business, financial condition, and results of operations may be adversely affected by global health epidemics, including the COVID-19 pandemic.

In January 2020, the World Health Organization declared the COVID-19 pandemic to be a “Public Health Emergency of International Concern.” COVID-19 has spread across the globe and is affecting worldwide economic activity. Any public health epidemic, including the COVID-19 pandemic, may affect our operations and those of third parties on which we rely, including our customers and suppliers. Our business, financial condition, and results of operations may be affected by: disruptions in our customers’ abilities to fund, develop, or bring to market products as anticipated; delays in or disruptions to the conduct of clinical trials; cancellations of contracts or confirmed orders from our customers; decreased demand for categories of products in certain affected regions; and inability, difficulty, or additional cost or delays in obtaining key raw materials, components, and other supplies from our existing supply chain; among other factors caused by the COVID-19 pandemic. In addition, the COVID-19 pandemic may affect the operations of the FDA and other drug regulatory authorities, which could result in delays of inspections, reviews, and approvals of our customers’ products. Our operations could be disrupted if our employees become ill or are otherwise absent from work as a result of the COVID-19 pandemic. Governmental restrictions, including travel restrictions, quarantines, shelter-in-place orders, business closures, new safety requirements or regulations, or restrictions on the import or export of certain materials, or other operational issues related to the COVID-19 pandemic may have an adverse effect on our business and results of operations. We continue to monitor our operations and governmental recommendations and have made modifications for an indefinite period to our normal operations because of the COVID-19 pandemic, including requiring most non-production related employees to work remotely. Additionally, while the potential economic impact brought by and the duration of the COVID-19 pandemic are difficult to assess or predict, the impact of the COVID-19 pandemic on the global financial markets may reduce our ability to access capital, which could negatively affect our short- and long-term liquidity.

To date, the COVID-19 pandemic has not had a material impact on our business, financial condition, or results of operations. However, the extent to which COVID-19 may affect our future results will depend on future developments that are highly uncertain, including the duration of the pandemic, new information that may emerge concerning the severity of the virus, and the actions governments, the pharmaceutical industry, competitors, suppliers, customers, patients, and others may take to contain or address its direct and indirect effects. The COVID-19 pandemic and associated mitigation measures may also have an adverse impact on healthcare systems, global economic conditions, or economic conditions in one or more regions where we or our customers operate, which could have an adverse effect on our business and financial condition.

In addition, the impact of the COVID-19 pandemic could exacerbate other risks we face, including those described elsewhere in “Risk Factors.”

The demand for our offerings depends in part on our customers’ research and development and the clinical and market success of their products. Our business, financial condition, and results of operations may be harmed if our customers spend less on, or are less successful in, these activities. In addition, customer spending may be affected by, among other things, the COVID-19 pandemic or recessionary economic conditions caused in whole or in part by the pandemic.

Our customers are engaged in research, development, production, and marketing of pharmaceutical, biotechnology, and consumer health products. The amount of customer spending on research, development, production, and marketing, as well as the outcomes of such research, development, and marketing activities, have a large impact on our sales and profitability, particularly the amount our customers choose to spend on our offerings. Our customers determine the amounts that they will spend based upon, among other things, available resources and their need to develop new products, which, in turn, are dependent upon a number of factors, including their competitors’ research, development, and production initiatives, and the anticipated market uptake, clinical, and reimbursement scenarios for specific products and therapeutic areas. In addition, consolidation in the industries in which our customers operate may have an impact on such spending as customers integrate acquired operations, including research and development departments and their budgets. Our customers finance their research and development spending from private and public sources. A reduction in spending by our customers, for these reasons or because of the COVID-19 pandemic or its direct or indirect effects, could have a material adverse effect on our business, financial condition, and results of operations. If our customers are not successful in attaining or retaining product sales due to market conditions, reimbursement issues, or other factors, our results of operations may be materially adversely affected.

We participate in a highly competitive market, and increased competition may adversely affect our business.

We operate in a market that is highly competitive. We compete with multiple companies as to each of our offerings and in every region of the globe in which we operate, including competing with other companies that offer advanced delivery technologies, outsourced dose form or biologics manufacturing, clinical trials support services, or development services to pharmaceutical, biotechnology, and consumer health companies based in North America, South America, Europe, and the Asia-Pacific region. We also compete in some cases with the internal operations of those pharmaceutical, biotechnology, and consumer health customers that also have manufacturing capabilities and choose to source these services internally.

We face substantial competition in each of our markets. Competition is driven by proprietary technologies and know-how, capabilities, consistency of operational performance, quality, price, value, responsiveness, and speed. Some competitors have greater financial, research and development, operational, and marketing resources than we do. Competition may also increase as additional companies enter our markets or use their existing resources to compete directly with ours. Expanded competition from companies in low-cost jurisdictions, such as India and China, may in the future adversely affect our results of operations or limit our growth. Greater financial, research and development, operational, and marketing resources may allow our competitors to respond more quickly with new, alternative, or emerging technologies. Changes in the nature or extent of our customers' requirements may render our offerings obsolete or non-competitive and could adversely affect our results of operations and financial condition.

We are subject to product and other liability risks that could exceed our anticipated costs or adversely affect our results of operations, financial condition, liquidity, and cash flows.

We are subject to potentially significant product liability and other liability risks that are inherent in the design, development, manufacture, and marketing of our offerings. We may be named as a defendant in product liability lawsuits, which may allege that our offerings have resulted or could result in an unsafe condition or injury to consumers. Such lawsuits could be costly to defend and could result in reduced sales, significant liabilities, and diversion of management's time, attention, and resources. Even claims without merit could subject us to adverse publicity and require us to incur significant legal fees.

Furthermore, product liability claims and lawsuits, regardless of their ultimate outcome, could have a material adverse effect on our business operations, financial condition, and reputation and on our ability to attract and retain customers. We have historically sought to manage this risk through the combination of product liability insurance and contractual indemnities and liability limitations in our agreements with customers and vendors. The availability of product liability insurance for companies in the pharmaceutical industry is generally more limited than insurance available to companies in other industries. Insurance carriers providing product liability insurance to those in the pharmaceutical and biotechnology industries generally limit the amount of available policy limits, require larger self-insured retentions, and exclude coverage for certain products and claims. We maintain product liability insurance with annual aggregate limits in excess of \$25.0 million. There can be no assurance that a successful product liability or other claim would be adequately covered by our applicable insurance policies or by any applicable contractual indemnity or liability limitations.

Failure to comply with existing and future regulatory requirements could adversely affect our results of operations and financial condition or result in claims from customers.

The healthcare industry is highly regulated. We, and our customers, are subject to various local, state, federal, national, and transnational laws and regulations, which include the operating, quality, and security standards of the FDA, the DEA, various state boards of pharmacy, state health departments, the DHHS, similar bodies of the E.U. and its member states, and other comparable agencies around the world, and, in the future, any change to such laws and regulations could adversely affect us. Among other rules affecting us, we are subject to laws and regulations concerning cGMP and drug safety. Our subsidiaries may be required to register for permits or licenses, and may be required to comply with the laws and regulations of the FDA, the DEA, the DHHS, ex-U.S. agencies including the EMA, and various boards of pharmacy, health departments, or comparable agencies in various jurisdictions around the world, as well as certain accrediting bodies, depending upon the type of operations and locations of distribution and sale of the products manufactured or services provided by those subsidiaries.

The manufacture, distribution, and marketing of our offerings are subject to extensive ongoing regulation by the FDA, the DEA, the EMA, and other equivalent local, state, federal, national, and transnational regulatory authorities. Failure by us or by our customers to comply with the requirements of these regulatory authorities could result in warning letters, product recalls or seizures, monetary sanctions, injunctions to halt manufacture or distribution, restrictions on our operations, civil or criminal sanctions, or withdrawal of existing or denial of pending approvals, permits, or registrations, including those relating to products or facilities. In addition, any such failure relating to the products or services we provide could expose us to contractual or product liability claims as well as claims from our customers, including claims for reimbursement for lost or damaged active pharmaceutical ingredients, which cost could be significant. Customers may also claim loss of profits due to lost or delayed

sales, although our contracts generally place substantial limits on such claims. There can be no assurance that any such contractual limitation will be applicable, sufficient, or fully enforced in any given situation.

In addition, any new offering or product classified as a pharmaceutical or medical device must undergo lengthy and rigorous clinical testing and other extensive, costly, and time-consuming procedures mandated by the FDA, the EMA, and other equivalent local, state, federal, national, and transnational regulatory authorities in the jurisdictions that regulate our offerings and products. We or our customers may elect to delay or cancel anticipated regulatory submissions for current or proposed new offerings or products for any number of reasons.

Although we believe that we comply in all material respects with applicable laws and regulations, there can be no assurance that a regulatory agency or tribunal would not reach a different conclusion concerning the compliance of our operations with applicable laws and regulations. In addition, there can be no assurance that we will be able to maintain or renew existing permits, licenses, or other regulatory approvals or obtain, without significant delay, future permits, licenses, or other approvals needed for the operation of our businesses. Any noncompliance by us or our customers with applicable law or regulation or the failure to maintain, renew, or obtain necessary permits and licenses could have an adverse effect on our results of operations and financial condition. Furthermore, loss of a permit, license, or other approval in any one portion of our business may have indirect consequences in another portion of our business if regulators or customers adjust their reviews of such other portion as a result or customers cease business with such other portion due to fears that such loss is a sign of broader concerns about our ability to deliver products or services of sufficient quality.

Failure to provide quality offerings to our customers could have an adverse effect on our business and subject us to regulatory actions or costly litigation.

Our results depend on our ability to execute and improve when necessary our quality management strategy and systems, and effectively train and maintain our employee base with respect to quality management. Quality management plays an essential role in determining and meeting customer requirements, preventing defects, and improving our offerings. While we have a network of quality systems throughout our business units and facilities that relate to the design, formulation, development, manufacturing, packaging, sterilization, handling, distribution, and labeling of the products we supply, quality and safety issues may occur with respect to any of our offerings. A quality or safety issue could have an adverse effect on our business, financial condition, and results of operations and may subject us to regulatory actions, including product recalls, product seizures, injunctions to halt manufacture or distribution, or restrictions on our operations; monetary fines; or other civil or criminal sanctions. In addition, such an issue could subject us to costly litigation, including claims from our customers for reimbursement for the cost of lost or damaged active pharmaceutical ingredients or other related losses, the cost of which could be significant.

The services and offerings we provide are highly exacting and complex, and, if we encounter problems providing the services or support required, our business could suffer.

The offerings we provide are highly exacting and complex, particularly in our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery segments, due in part to strict regulatory requirements. From time to time, problems may arise in connection with facility operations or during preparation or provision of an offering, in both cases for a variety of reasons including, but not limited to, equipment malfunction, sterility variances or failures, failure to follow specific protocols and procedures, problems with raw materials, environmental factors, and damage to, or loss of, manufacturing operations due to fire, flood, or similar causes. Such problems could affect production of a particular batch or series of batches, require the destruction of or otherwise result in the loss of product or materials used in the production of product, or could halt facility production altogether. This could, among other things, lead to increased costs, lost revenue, damage to customer relations, reimbursement to customers for lost active pharmaceutical ingredients or other related losses, time and expense spent investigating the cause, lost production time, and, depending on the cause, similar losses with respect to other batches or products. Production problems in our drug and biologic manufacturing operations could be particularly significant because the cost of raw materials is often higher than in our other businesses. If problems are not discovered before the product is released to the market, recall and product liability costs may also be incurred. In addition, such risks may be greater at facilities that are new or going through significant expansion or renovation.

Our global operations are subject to economic, political, and regulatory risks, including the risks of changing regulatory standards or changing interpretations of existing standards that could affect the profitability of our operations or require costly changes to our procedures. In addition, changes to our procedures or additional procedures, implemented to comply with public health orders or best practice guidelines as a result of the COVID-19

pandemic, may increase our costs or reduce our productivity and thereby affect our business, financial condition, or results of operations.

We conduct our operations in various regions of the world, including North America, South America, Europe, and the Asia-Pacific region. Global and regional economic and regulatory developments affect businesses such as ours in many ways. Our operations are subject to the effects of global and regional competition, including potential competition from manufacturers in low-cost jurisdictions such as India and China. Local jurisdiction risks include regulatory risks arising from local laws. Our global operations are also affected by local economic environments, including inflation and recession. Political changes, some of which may be disruptive, and related hostilities can interfere with our supply chain, our customers, and some or all of our activities in a particular location. While some of these risks can be hedged using derivatives or other financial instruments and some are insurable, such mitigating measures may be unavailable, costly, or unsuccessful.

The exit of the U.K. from the European Union, particularly after the end of the current transitional period, could have future adverse effects on our operations revenues, and costs, and therefore our profitability.

In June 2016, the U.K. held a referendum in which a majority of voters approved the U.K.'s exit from the E.U., and the U.K. government withdrew in October 2019. There is no immediate change affecting our business in either the U.K. or the E.U. as a result of this action, but the U.K. government is now engaged in both internal and external discussions with affected parties and considering legislation regarding the changes that will result from the decision to exit. Five of our facilities, employing hundreds of workers, are located in the U.K., and these facilities, as well as others in our network, source goods, manufacture goods, and provide services from or intended for the U.K. These facilities operate within an existing framework of trade and human capital integration with the E.U. and, by extension, the other parts of the world, with which the E.U. has trade and immigration agreements. Furthermore, some of our facilities located in other E.U. member states ship materials to and from or otherwise engage in various business interactions with the U.K., including our U.K. facilities. Due to future changes in the U.K. resulting from its exit, including potentially increased trade barriers, increased tariff rates, or custom duties, or in anticipation of such changes, our suppliers, customers, or employees may change their interactions with us, including changes in imports to or exports from the U.K., changes in the requested utilization of our facilities, both within and without the U.K., and changes in our relationships with our U.K.-based workforce. To the extent that our facilities operate as part of a cross-border supply and distribution chain, their operations may also be negatively affected by a decrease in the cross-border mobility of goods and services. We cannot anticipate the nature of these changes, as they largely depend on factors outside our control, but the changes may result in adverse changes in our future operations, revenues, and costs, and therefore our future profitability.

If we do not enhance our existing or introduce new technology or service offerings in a timely manner, our offerings may become obsolete or uncompetitive over time, customers may not buy our offerings or buy less of them, and our revenue and profitability may decline.

The healthcare industry is characterized by rapid technological change. Demand for our offerings may change in ways we may not anticipate because of evolving industry standards as well as a result of evolving customer needs that are increasingly sophisticated and varied and the introduction by others of new offerings and technologies that provide alternatives to our offerings. Several of our higher margin offerings are based on proprietary technologies. To the extent that such technologies are protected by patents, their related offerings may become subject to competition as the patents expire. Without the timely introduction of enhanced or new offerings and technologies, our offerings may become obsolete or uncompetitive over time, in which case our revenue and operating results would suffer. For example, if we are unable to respond to changes in the nature or extent of the technological or other needs of our pharmaceutical customers through enhancing our offerings, our competition may develop offerings that are more competitive than ours and we could find it more difficult to renew or expand existing agreements or obtain new agreements. Potential innovations intended to facilitate enhanced or new offerings generally will require a substantial investment before we can determine their commercial viability, and we may not have financial resources sufficient to fund all desired innovations.

The success of enhanced or new offerings will depend on several factors, including our ability to:

- properly anticipate and satisfy customer needs, including increasing demand for lower cost products;
- enhance, innovate, develop, and manufacture new offerings in an economical and timely manner;
- differentiate our offerings from competitors' offerings;
- achieve positive clinical outcomes for our customers' new products;
- meet safety requirements and other regulatory requirements of governmental agencies;
- obtain valid and enforceable intellectual property rights; and
- avoid infringing the proprietary rights of third parties.

Even if we succeed in creating enhanced or new offerings from these innovations, they may still fail to result in commercially successful offerings or may not produce revenue in excess of the costs of development, and they may be rendered obsolete by changing customer preferences or the introduction by our competitors of offerings embodying new technologies or features. Finally, innovations may not be accepted quickly in the marketplace because of, among other things, entrenched patterns of clinical practice, the need for regulatory clearance, and uncertainty over market access or government or third-party reimbursement.

We and our customers depend on patents, copyrights, trademarks, know-how, trade secrets, and other forms of intellectual property protections, but these protections may not be adequate.

We rely on a combination of know-how, trade secrets, patents, copyrights, trademarks, and other intellectual property laws, nondisclosure and other contractual provisions, and technical measures to protect many of our offerings and intangible assets. These proprietary rights are important to our ongoing operations. There can be no assurance that these protections will provide uniqueness or meaningful competitive differentiation in our offerings or otherwise be commercially valuable or that we will be successful in obtaining additional intellectual property or enforcing our intellectual property rights against unauthorized users. Our exclusive rights under certain of our offerings are protected by patents, some of which will expire in the near term. When patents covering an offering expire, loss of exclusivity may occur, which may force us to compete with third parties, thereby negatively affecting our revenue and profitability. We do not currently expect any material loss of revenue to occur as a result of the expiration of any patent currently protecting our business.

Our proprietary rights may be invalidated, circumvented, or challenged. We may in the future be subject to proceedings seeking to oppose or limit the scope of our patent applications or issued patents. In addition, in the future, we may need to take legal actions to enforce our intellectual property rights, to protect our trade secrets, or to determine the validity or scope of the proprietary rights of others. Legal proceedings are inherently uncertain, and the outcome of such proceedings may be unfavorable to us.

Any legal action regardless of outcome might result in substantial costs and diversion of resources and management attention. Although we use reasonable efforts to protect our proprietary and confidential information, there can be no assurance that our confidentiality and non-disclosure agreements will not be breached, our trade secrets will not otherwise become known by competitors, or that we will have adequate remedies in the event of unauthorized use or disclosure of proprietary information. Even if the validity and enforceability of our intellectual property is upheld, an adjudicator might construe our intellectual property not to cover the alleged infringement. In addition, intellectual property enforcement may be unavailable or practically ineffective in some countries. There can be no assurance that our competitors will not independently develop technologies that are substantially equivalent or superior to our technology or that third parties will not design around our intellectual property claims to produce competitive offerings. The use of our technology or similar technology by others could reduce or eliminate any competitive advantage we have developed, cause us to lose sales, or otherwise harm our business.

We have applied in the United States and certain other countries for registration of a number of trademarks, service marks, and patents, some of which have been registered or issued, and also claim common law rights in various trademarks and service marks. In the past, third parties have occasionally opposed our applications to register intellectual property, and there can be no assurance that they will not do so in the future. It is possible that in some cases we may be unable to obtain the registrations for trademarks, service marks, and patents for which we have applied, and a failure to obtain trademark and patent registrations in the United States or other countries could limit our ability to protect our trademarks and proprietary technologies and impede our marketing efforts in those jurisdictions.

License agreements with third parties control our rights to use certain patents, software, and information technology systems and proprietary technologies owned by third parties, some of which are important to our business. Termination of these license agreements for any reason could result in the loss of our rights to this intellectual property, causing an adverse change in our operations or the inability to commercialize certain offerings.

In addition, many of our branded pharmaceutical customers rely on patents to protect their products from generic competition. Because incentives exist in some countries, including the United States, for generic pharmaceutical companies to challenge these patents, pharmaceutical and biotechnology companies are under the ongoing threat of challenges to their patents. If the patents on which our customers rely were successfully challenged and, as a result, the affected products become subject to generic competition, the market for our customers' products could be significantly adversely affected, which could have an adverse effect on our results of operations and financial condition. We attempt to mitigate these risks by making our offerings available to generic as well as branded manufacturers and distributors, but there can be no assurance that we will be successful in marketing these offerings.

Our offerings or our customers' products may infringe on the intellectual property rights of third parties.

From time to time, third parties have asserted intellectual property infringement claims against us and our customers, and there can be no assurance that third parties will not assert infringement claims against either us or our customers in the future. While we believe that our offerings do not infringe in any material respect upon proprietary rights of other parties, and that meritorious defenses would exist with respect to any assertion to the contrary, there can be no assurance that we could successfully avoid being found to infringe on the proprietary rights of others. Patent applications in the United States and certain other countries are generally not publicly disclosed until the patent is issued or published, and we and our customers may not be aware of currently filed patent applications that relate to our or their products, offerings, or processes. If patents later issue on these applications, we or they may be found liable for subsequent infringement. There has been substantial litigation in the pharmaceutical and biotechnology industries with respect to the manufacture, use, and sale of products that are the subject of conflicting patent rights.

Any claim that our offerings or processes infringe third-party intellectual property rights (including claims arising through our contractual indemnification of our customers), regardless of the claim's merit or resolution, could be costly and may divert the efforts and attention of our management and technical personnel. We may not prevail against any such claim given the complex technical issues and inherent uncertainties in intellectual property matters. If any such claim results in an adverse outcome, we could, among other things, be required to:

- pay substantial damages (potentially including treble damages in the United States);
- cease the manufacture, use, or sale of the infringing offerings or processes;
- discontinue the use of the infringing technology;
- expend significant resources to develop non-infringing technology;
- license technology from the third party claiming infringement, which license may not be available on commercially reasonable terms or at all; and
- lose the opportunity to license our technology to others or to collect royalty payments based upon successful protection and assertion of our intellectual property against others.

In addition, our customers' products may be subject to claims of intellectual property infringement and such claims could materially affect our business if their products cease to be manufactured or they have to discontinue the use of the infringing technology.

Any of the foregoing could affect our ability to compete or have a material adverse effect on our business, financial condition, and results of operations.

Our future results of operations are subject to fluctuations in the costs, availability, and suitability of the components of the products we manufacture, including active pharmaceutical ingredients, excipients, purchased components, and raw materials. In addition, the COVID-19 pandemic may interfere with the operations of certain of our direct or indirect suppliers or with international trade for these supplies, which may either raise our costs or reduce the productivity or slow the timing of our operations.

We depend on various active pharmaceutical ingredients, components, compounds, raw materials, and energy supplied primarily by others for our offerings. This includes, but is not limited to, gelatin, starch, iota carrageenan, petroleum-based products, packaging films, glass vials and syringes, and resin. Also, our customers frequently provide to us their active pharmaceutical or biologic ingredient for formulation or incorporation in the finished product and may supply other raw materials as well. It is possible that any of our or our customers' supplier relationships could be interrupted due to changing regulatory requirements, import or export restrictions, natural disasters, international supply disruptions, whether caused by pandemics or otherwise, geopolitical issues, operational or quality issues at the suppliers' facilities, and other events, or could be terminated in the future.

For example, gelatin is a critical component in most of the products produced in our Softgel and Oral Technologies segment. Gelatin is available from only a limited number of sources. In addition, much of the gelatin we use is bovine-derived. Past concerns of contamination from bovine spongiform encephalopathy, or BSE, have narrowed the number of possible sources of particular types of gelatin. If there were a future disruption in the supply of gelatin from any one or more key suppliers, we may not be able to obtain an adequate alternative supply from our other suppliers. If future restrictions were to emerge on the use of bovine-derived gelatin due to concerns of contamination from BSE or otherwise, any such restriction could hinder our ability to timely supply our customers with products and the use of alternative non-bovine-derived gelatin could be subject to lengthy formulation, testing, and regulatory approval.

Any sustained interruption in our receipt of adequate supplies could have an adverse effect on us. In addition, while we have processes intended to reduce volatility in component and material pricing, we may not be able to successfully manage price fluctuations, and future price fluctuations or shortages may have an adverse effect on our results of operations.

Changes in market access or healthcare reimbursement for, or public sentiment towards our customers' products in the United States or internationally, or other changes in applicable policies regarding the healthcare industry, including possible changes to the Affordable Care Act (the "ACA") in the United States, could adversely affect our results of operations and financial condition by affecting demand for our offerings.

The healthcare industry has changed significantly over time, and we expect the industry to continue to evolve. Some of these changes, such as ongoing healthcare reform, adverse changes in governmental or private funding of healthcare products and services, legislation or regulations governing patient access to care and privacy, or the delivery, pricing, or reimbursement approval of pharmaceuticals and healthcare services or mandated benefits, may cause healthcare industry participants to change the amount of our offerings that they purchase or the price they are willing to pay for these offerings. In particular, there is significant uncertainty about the likelihood of changes to the ACA and healthcare laws in general in the United States, including future legislation that may affect or put a cap on future pricing of pharmaceutical and biotechnology products. While we are unable to predict the likelihood of changes to the ACA, any substantial revision of this or other healthcare legislation could have a material adverse effect on the demand for our customers' products, which in turn could have a negative impact on our results of operations, financial condition, or business. Changes in the healthcare industry's pricing, selling, inventory, distribution, or supply policies or practices, or in public or government sentiment for the industry as a whole, could also significantly reduce our revenue and results of operations. In particular, volatility in individual product demand may result from changes in public or private payer reimbursement or coverage.

As a global enterprise, fluctuations in the exchange rate of the U.S. dollar, our reporting currency, against other currencies could have a material adverse effect on our financial performance and results of operations.

As a company with significant operations outside of the United States, certain revenues, costs, assets, and liabilities, including our euro-denominated 2.375% Senior Notes due 2028, are denominated in currencies other than the U.S. dollar, which is the currency that we use to report our financial results. As a result, changes in the exchange rates of these or any other applicable currency to the U.S. dollar will affect our revenues, earnings, and cash flows. There has been, and may continue to be, volatility in currency exchange rates affecting the various currencies in which we do business, including as a result of the U.K.'s exit from the E.U. Such volatility and other changes in exchange rates could result in unrealized and realized exchange losses, despite any effort we may undertake to manage or mitigate our exposure to fluctuations in the values of various currencies.

Tax legislative or regulatory initiatives, new interpretations or developments concerning existing tax laws, or challenges to our tax positions could adversely affect our results of operations and financial condition.

We are a large multinational enterprise with operations in the United States and more than a dozen other countries across North and South America, Europe, and the Asia-Pacific region, and we do business with suppliers and customers in many additional countries. As such, we are subject to the tax laws and regulations of the U.S. federal, state, and local governments and of many jurisdictions outside of the U.S. From time to time, various legislative initiatives may be proposed that could adversely affect our tax positions, and existing legislation, such as the 2017 U.S. Tax Cuts and Jobs Act (the "2017 Tax Act"), may be subject to additional regulatory changes or new interpretations. There can be no assurance that our effective tax rate or tax payments will not be adversely affected by these initiatives.

In addition, U.S. federal, state, local, and foreign tax laws and regulations are extremely complex and subject to varying interpretations. We are subject to regular examination of our income tax returns by various tax authorities. Examinations or changes in laws, rules, regulations, or interpretations by taxing authorities could result in adverse impacts to tax years open under statute or to our operating structures currently in place. We regularly assess the likelihood of adverse outcomes resulting from these examinations or changes in laws, rules, regulations, or interpretations to determine the reasonableness of our provision for taxes. It is possible that the outcomes from these examinations or changes in laws, rules, regulations, or interpretations by taxing authorities will have a material adverse effect on our financial condition or results of operations.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

We generated net operating losses ("NOLs") in the past that have been, and continue to be, used to reduce taxable income. Utilization of our NOL carryforwards may be subject to a substantial limitation under Section 382 of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), and comparable provisions of state, local, and foreign tax laws due to changes in ownership of our company that may occur in the future. Under Section 382 of the Internal Revenue Code and comparable provisions of state, local, and foreign tax laws, if a corporation undergoes an "ownership change,"

generally defined as a greater than 50% change by value in its equity ownership over a three-year period, the corporation's ability to carry forward its pre-change NOLs to reduce its post-change income may be limited. In addition, we acquired companies that generated pre-acquisition NOLs for tax purposes that will also be subject to limitation under Section 382 and comparable provisions of state, local, and foreign tax laws. We may experience ownership changes in the future as a result of future changes in our stock ownership. As a result, our ability to use our pre-change NOL carryforwards to reduce U.S. federal, state, local, and foreign taxable income we produce in the future years may be subject to limitations, which could result in increased future tax liability to us.

Changes to the estimated future profitability of the business may require that we establish an additional valuation allowance against all or some portion of our net deferred tax assets.

We have deferred tax assets for NOL carryforwards and other temporary differences. We currently maintain a valuation allowance for a portion of our U.S. net deferred tax assets and certain foreign net deferred tax assets. It is possible we may experience a decline in U.S. taxable income resulting from a decline in profitability of our U.S. operations, an increased level of debt in the U.S., or other factors. In assessing our ability to realize our deferred tax assets, we may conclude that it is more likely than not that some additional portion or all our deferred tax assets will not be realized. As a result, we may be required to record an additional valuation allowance against our deferred tax assets, which could adversely affect our effective income tax rate and therefore our financial results.

We depend on key personnel.

We depend on our executive officers and other key personnel, including our technical personnel, to operate and grow our business and to develop new and enhanced offerings and technologies. The loss of any of these officers or other key personnel or a failure to attract and retain suitably skilled technical personnel could adversely affect our operations.

In addition to our executive officers, we rely on more than 160 senior employees to lead and direct our business. Our senior leadership team ("SLT") is comprised of our subsidiaries' executive officers and other vice presidents and directors who hold critical positions and possess specialized talents and capabilities that give us a competitive advantage in the market. The members of the SLT hold positions such as facility general manager, vice president/general manager of business unit commercial development, vice president of quality and regulatory activities, and vice president-finance.

With respect to our technical talent, we employ more than 2,400 scientists and technicians whose areas of expertise and specialization cover subjects such as advanced delivery, biologics and gene and cell therapy formulation and manufacturing. Many of our sites and laboratories are located in competitive labor markets like those in which our Morrisville, North Carolina; Brussels, Belgium; Woodstock, Illinois; Madison, Wisconsin; Baltimore, Maryland; Emeryville, California; Bloomington, Indiana; Nottingham, U.K.; and Schorndorf, Germany facilities are located. Global and regional competitors and, in some cases, customers and suppliers compete for the same skills and talent as we do.

We use advanced information and communication systems to run our operations, compile and analyze financial and operational data, and communicate among our employees, customers, and counter-parties, and the risks generally associated with information and communications systems could adversely affect our results of operations. We are continuously working to install new, and upgrade existing, systems and provide employee awareness training around phishing, malware, and other cyber security risks to enhance the protections available to us, but such protections may be inadequate to address malicious attacks or inadvertent compromises of data security.

We rely on information systems in our business to obtain, process, analyze, and manage data to:

- facilitate the manufacture and distribution of thousands of inventory items in, to, and from our facilities;
- receive, process, and ship orders on a timely basis;
- manage the accurate billing and collections for more than one thousand customers;
- create, compile, and retain testing and other product-, manufacturing-, or facility-related data necessary for meeting our and our customers' regulatory obligations.
- manage the accurate accounting and payment for thousands of vendors and our employees;
- schedule and operate our global network of development, manufacturing, and packaging facilities;
- document various aspects of our activities, including the agreements we make with suppliers and customers;
- compile financial and other operational data into reports necessary to manage our business and comply with various regulatory or contractual obligations, including obligations under our bank loans and other indebtedness, the federal securities laws, the Internal Revenue Code, and other applicable state, local, and ex-U.S. tax laws; and

- communicate among our more than 13,900 employees spread across dozens of facilities over four continents.

We deploy defenses against cyber-attack and work to secure the integrity of our data systems using techniques, hardware, and software typical of companies of our size and scope. Despite our security measures, however, our information technology and infrastructure may be vulnerable to attacks by increasingly sophisticated intruders or others who try to cause harm to or interfere with our normal use of our systems. They are also susceptible to breach due to employee error, malfeasance, or other disruptions. Our results of operations could be adversely affected if these systems are interrupted or damaged or fail for any extended period.

We engage from time to time in acquisitions and other transactions that may complement or expand our business or in divestments of non-strategic businesses or assets. We may not be able to complete such transactions, and such transactions, if executed, pose significant risks, including risks relating to our ability to successfully and efficiently integrate acquisitions or execute on dispositions and realize anticipated benefits therefrom. The failure to execute or realize the full benefits from any such transaction could have a negative effect on our operations.

Our future success may depend in part on opportunities to buy or otherwise acquire rights to other businesses or technologies, enter into joint ventures or otherwise enter into strategic arrangements with business partners that could complement, enhance, or expand our current business or offerings and services or that might otherwise offer us growth opportunities, or divest assets or an ongoing business. We may face competition from other companies in pursuing acquisitions and similar transactions in the pharmaceutical and biotechnology industry. Our ability to complete transactions may also be limited by applicable antitrust and trade laws and regulations in the U.S. and other jurisdictions in which we or the operations or assets we seek to acquire carry on business. To the extent that we are successful in making acquisitions, we expend substantial amounts of cash, incur debt, or assume loss-making divisions as consideration. We or the purchaser of a divested asset or business may not be able to complete a desired transaction for any number of reasons, including a failure to secure financing.

Any acquisition that we are able to identify and complete may involve a number of risks, including, but not limited to, the diversion of management's attention to integrate the acquired businesses or joint ventures, the possible adverse effects on our operating results during the integration process, the potential loss of customers or employees in connection with the acquisition, delays or reduction in realizing expected synergies, unexpected liabilities, and our potential inability to achieve our intended objectives for the transaction. In addition, we may be unable to maintain uniform standards, controls, procedures, and policies, which may lead to operational inefficiencies.

To the extent that we are not successful in completing desired divestitures, as such may be determined by future strategic plans and business performance, we may have to expend substantial amounts of cash, incur debt, or continue to absorb the costs of loss-making or under-performing divisions. Any divestiture, whether we are able to complete it or not, may involve a number of risks, including diversion of management's attention, a negative impact on our customer relationships, costs associated with maintaining the business of the targeted divestiture during the disposition process, and the costs of closing and disposing of the affected business or transferring remaining portions of the operations of the business to other facilities.

Cell and gene therapies are relatively new and still-developing modes of treatment, dependent on cutting-edge technologies, and our customers' cell or gene therapies may be perceived as unsafe or may result in unforeseen adverse events. Negative public opinion, continuing research, or increased regulatory scrutiny of cell or gene therapies and their financial cost may damage public perception of the safety, utility, or efficacy of these therapies and harm our customers' ability to conduct their business or obtain regulatory approvals for their cell or gene therapy products, and thereby have an indirect, adverse effect on our cell or gene therapy offerings.

Cell and gene therapy remain relatively new means for treating disease and other medical conditions, with only a few cell and gene therapies approved to date in the U.S., the E.U., or elsewhere. Public perception may be influenced by claims that cell or gene therapies are unsafe, and cell or gene therapy may not gain the acceptance of the public or the medical community. In addition, ethical, social, legal, and cost-benefit concerns about cell or gene therapy, genetic testing, and genetic research could result in additional regulations or limitations or even outright prohibitions on certain cell or gene therapies or related products. Various regulatory and legislative bodies have expressed an interest in, or have taken steps towards, further regulation of various biotechnologies, including cell and gene therapies. More restrictive regulations or claims that certain cell or gene therapies are unsafe or pose a hazard could reduce our customers' use of our services. We can provide no assurance whether legislative changes will be enacted, regulations, policies, or guidance changed, or interpretations of existing strictures by agencies or courts changed, or what the impact of such changes, if any, may be.

We are subject to environmental, health, and safety laws and regulations, which could increase our costs and restrict our operations in the future.

Our operations are subject to a variety of environmental, health, and safety laws and regulations, including those of the EPA and the U.S. Occupational Safety & Health Administration and equivalent local, state, national, and transnational regulatory agencies in each of the jurisdictions in which we operate. These laws and regulations govern, among other things, air emissions, wastewater discharges, the use, handling, and disposal of hazardous substances and wastes, soil and groundwater contamination, and employee health and safety. Any failure by us to comply with environmental, health, and safety requirements could result in the limitation or suspension of production or subject us to monetary fines, civil or criminal sanctions, or other future liabilities in excess of our reserves. We are also subject to laws and regulations governing the destruction and disposal of raw materials and non-compliant products, the handling of regulated material included in our offerings, and the disposal of our products or their components at the end of their useful lives. In addition, compliance with environmental, health, and safety requirements could restrict our ability to expand our facilities or require us to acquire costly environmental or safety control equipment, incur other significant expenses, or modify our manufacturing processes. Our manufacturing facilities may use, in varying degrees, hazardous substances in their processes. These substances include, among others, chlorinated solvents, and in the past chlorinated solvents were used at one or more of our facilities, including a number we no longer own or operate. As at our current facilities, contamination at such formerly owned or operated properties can result and has resulted in liability to us. In the event of the discovery of new or previously unknown contamination either at our facilities or at third-party locations, including facilities we formerly owned or operated, the issuance of additional requirements with respect to existing contamination, or the imposition of other cleanup obligations for which we are responsible, we may be required to take additional, unplanned remedial measures for which we have not recorded reserves. We are conducting monitoring and cleanup of contamination at certain facilities currently or formerly owned or operated by us, and such activities may result in unanticipated costs or management distraction.

We are subject to labor and employment laws and regulations, which could increase our costs and restrict our operations in the future.

We employ more than 13,900 individuals worldwide, including approximately 7,600 employees in North America, 4,900 in Europe, 900 in South America, and 500 in the Asia-Pacific region. Certain employees at one of our North American facilities are represented by a labor organization, and national works councils or labor organizations are active at all of our European facilities and certain of our other facilities consistent with local labor environments and laws. Our management believes that our employee relations are satisfactory. However, further organizing activities, collective bargaining, or changes in the regulatory framework for employment may increase our employment-related costs or may result in work stoppages or other labor disruptions. Moreover, as employers are subject to various employment-related claims, such as individual and class actions relating to alleged employment discrimination and wage-hour and labor standards issues, such actions, if brought against us and successful in whole or in part, may affect our ability to compete or have a material adverse effect on our business, financial condition, and results of operations.

Certain of our pension plans are underfunded, and additional cash contributions we may make to increase the funding level will reduce the cash available for our business, such as the payment of our interest expense.

Certain of our current and former employees in the U.S., the U.K., Germany, France, Japan, Belgium, and Switzerland are participants in defined benefit pension plans that we sponsor. As of June 30, 2020, the underfunded amount of our pension plans on a worldwide basis was \$62.9 million, primarily related to our pension plans in the U.K. and Germany. In addition, we have an estimated obligation of \$38.6 million, as of June 30, 2020, related to our withdrawal from a multiemployer pension plan in which we formerly participated. In general, the amount of future contributions to the underfunded plans will depend upon asset returns, applicable actuarial assumptions, prevailing and expected interest rates, and other factors, and, as a result, the amount we may be required to contribute in the future to fund the obligations associated with such plans may vary. Such cash contributions to the plans will reduce the cash available for our business, including the funds available to pursue strategic growth initiatives or the payment of interest expense on our indebtedness.

Risks Relating to Our Indebtedness

Our substantial leverage could adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or in our industry or to deploy capital to grow our business, expose us to interest-rate risk to the extent of our variable-rate debt, or prevent us from meeting our obligations under our indebtedness. These risks may be increased in a recessionary environment, particularly as sources of capital may become less available or more expensive.

As of June 30, 2020, we had \$3,057.3 million (U.S. dollar equivalent) of total indebtedness outstanding, consisting of \$938.1 million of secured indebtedness under our senior secured credit facilities; \$1,875.6 million of senior unsecured

indebtedness, including \$500.0 million aggregate principal amount of Senior Notes due 2027 (the “USD 2027 Notes”), \$450.0 million aggregate principal amount of Senior Notes due 2026 (the “USD 2026 Notes”), €825.0 million aggregate principal amount of Senior Notes due 2028 (the “Euro 2028 Notes” and, together with the USD 2027 Notes and USD 2026 Notes, the “Senior Notes”); \$100 million representing the gross value of the remaining deferred purchase consideration related to the acquisition of Catalent Indiana, and \$142.2 million of finance lease and other obligations. In addition, we had \$543.3 million of unutilized capacity and \$6.7 million of outstanding letters of credit under our \$550.0 million secured revolving credit facility, which is part of our senior secured credit facilities (the “Revolving Credit Facility”).

Our high degree of leverage could have important consequences for us, including:

- increasing our vulnerability to adverse economic, industry, or competitive developments;
- exposing us to the risk of increased interest rates because certain of our borrowings, including borrowings under our senior secured credit facilities, are at variable rates of interest;
- exposing us to the risk of fluctuations in exchange rates because of our Euro Notes;
- making it more difficult for us to satisfy our obligations with respect to our indebtedness, and any failure to comply with the obligations of any of our debt instruments, including restrictive covenants and borrowing conditions, could result in one or more events of default under the agreements governing such indebtedness or, through cross-defaults, in agreements governing other indebtedness;
- restricting us from making strategic acquisitions or capital investments or causing us to make non-strategic divestitures;
- limiting our ability to obtain additional financing for working capital, capital expenditures, product development, debt service requirements, acquisitions, and general corporate or other purposes; and
- limiting our flexibility in planning for, or reacting to, changes in our business or market conditions and placing us at a competitive disadvantage compared to our competitors who are less highly leveraged and who, therefore, may be able to take advantage of opportunities that our leverage prevents us from exploiting.

Our total interest expense, net was \$126.1 million, \$110.9 million, and \$111.4 million for fiscal years 2020, 2019, and 2018, respectively. After taking into consideration our ratio of fixed-to-floating-rate debt, including as a result of our April 2020 interest-rate swap agreement with Bank of America N.A., and assuming that our revolving credit facility is undrawn and LIBOR is above any applicable minimum floor, each change of 100 basis points in interest rates would result in a change of approximately \$0.7 million in annual interest expense on the indebtedness under our senior secured credit facilities.

Despite our high indebtedness level, we and our subsidiaries are still capable of incurring significant additional debt, which could further exacerbate the risks associated with our substantial indebtedness.

We and our subsidiaries may be able to incur substantial additional indebtedness in the future. Although the agreements governing our indebtedness contain restrictions on the incurrence of additional indebtedness, these restrictions are subject to a number of significant qualifications and exceptions, and, under certain circumstances, the amount of indebtedness that we may incur while remaining in compliance with these restrictions could be substantial. In addition, as of June 30, 2020, we had approximately \$543.3 million available to us for borrowing, subject to certain conditions, under our Revolving Credit Facility. If new debt is added to our subsidiaries’ existing debt levels, the risks associated with debt we currently face would increase.

Our debt agreements contain restrictions that limit our flexibility in operating our business.

The agreements governing our outstanding indebtedness contain various covenants that limit our ability to engage in specified types of transactions. These covenants limit the ability of Operating Company and those of its subsidiaries to which these covenants apply (which Operating Company’s Amended and Restated Credit Agreement, dated as of May 20, 2014 (as amended, the “Credit Agreement”) calls “restricted subsidiaries”) to, among other things:

- incur additional indebtedness and issue certain preferred stock;
- pay certain dividends on, repurchase, or make distributions in respect of capital stock or make other restricted payments;
- pay distributions from restricted subsidiaries;
- issue or sell capital stock of restricted subsidiaries;
- guarantee certain indebtedness;

- make certain investments;
- sell or exchange certain assets;
- enter into transactions with affiliates;
- create certain liens; and
- consolidate, merge, or transfer all or substantially all of our assets and the assets of our subsidiaries on a consolidated basis.

A breach of any of these covenants could result in a default under one or more of these agreements, including as a result of cross-default provisions, and, in the case of our Revolving Credit Facility, permit the lenders to cease making loans to us.

Despite the limitations in our debt agreements, we retain the ability to take certain actions that may interfere with our ability to timely pay our substantial indebtedness.

The covenants in the Credit Agreement and in the several indentures governing our Senior Notes (collectively, the "Indentures") contain various exceptions to the limitations they otherwise impose on our ability and the ability of our restricted subsidiaries to take the various actions described in the prior risk factor. For example, if the notes have investment-grade ratings and we are not in default under these agreements, certain of these covenants will not apply, including the covenants restricting certain dividends and other payments, the covenants concerning the incurrence of indebtedness, and the covenants limiting guarantees of indebtedness by our restricted subsidiaries. In addition, the covenants restricting dividends and other distributions by us, purchases or redemption of certain equity securities, and prepayment, redemption, or repurchase of any subordinated indebtedness are subject to various exceptions.

We are currently using and may in the future use derivative financial instruments to reduce our exposure to market risks from changes in interest rates on our variable-rate indebtedness or changes in currency exchange rates, and any such instrument may expose us to risks related to counterparty credit worthiness or non-performance of these instruments.

We may enter into interest-rate swap agreements, currency swap agreements, or other hedging transactions in an attempt to limit our exposure to adverse changes in variable interest rates and currency exchange rates. Such instruments may result in economic losses if, for example, prevailing interest rates decline to a point lower than any applicable fixed-rate commitment. Any such swap will expose us to credit-related risks that, if realized, could adversely affect our results of operations or financial condition.

Risks Relating to Our Series A Preferred Stock.

The issuance of shares of our Series A Preferred Stock reduces the relative voting power of holders of our Common Stock, dilutes the ownership of such holders, and may adversely affect the market price of our Common Stock.

On May 16, 2019, we filed with the Delaware Secretary of State a certificate of designation of preferences, rights, and limitations (as amended, the "Certificate of Designation") with respect to 1,000,000 shares of our preferred stock, par value \$0.01 per share, designating such shares as our Series A Convertible Preferred Stock (the "Series A Preferred Stock"), and, on May 17, 2019, we completed the sale of 650,000 shares of our Series A Preferred Stock to affiliates (the "Preferred Stock Investors") of Leonard Green & Partners, L.P. pursuant to an equity commitment and investment agreement, dated as of April 14, 2019, between us and certain of the Preferred Stock Investors. As of August 25, 2020, these shares represented approximately 8.1% of our outstanding Common Stock, on an as-converted basis. Holders of Series A Preferred Stock are entitled to a cumulative dividend at the rate of 5.0% per annum, subject to adjustment and payable quarterly in arrears. See Note 13 to the consolidated financial statements included elsewhere in this Annual Report (the "Consolidated Financial Statements"). The dividends are to be paid in cash or in-kind through an increase in the stated value of each share of Series A Preferred Stock. Such holders are also entitled to receive, on an as-converted basis, whatever holders of each share of Common Stock may be entitled to receive as a result of any declaration of a dividend on the Common Stock.

Under various circumstances defined in the Certificate of Designation, (a) holders of shares of our Series A Preferred Stock may be entitled to convert such shares to shares of our Common Stock, (b) we may require all holders of such shares to convert such shares to shares of our Common Stock, or (c) we may redeem all such shares for, at our election, cash or shares of our Common Stock. The number of shares of Common Stock to which the shares of our Series A Preferred Stock may convert or be redeemed is based in part on the stated value of a share of Series A Preferred Stock, in accordance with the terms of the Certificate of Designation, so any increase in the stated value may lead to an increase in the number of deemed shares of Common Stock held by the Preferred Stock Investors on an "as-converted" basis.

As holders of our Series A Preferred Stock are entitled to vote, on an as-converted basis, together with holders of our Common Stock, on all matters submitted to a vote of the holders of our Common Stock, the issuance of the Series A Preferred Stock to the Preferred Stock Investors, and any subsequent increase in the stated value of those shares by a payment-in-kind of the dividends payable thereon, effectively reduces the relative voting power of the holders of our Common Stock.

Any conversion of shares of the Series A Preferred Stock to shares of our Common Stock or redemption of shares of Series A Preferred Stock for shares of our Common Stock would dilute the ownership interest of existing holders of our Common Stock, and any sale in the public market of shares of our Common Stock issuable upon conversion or redemption of the Series A Preferred Stock could adversely affect prevailing market prices of our Common Stock. We granted the Preferred Stock Investors customary registration rights in respect of their shares of Series A Preferred Stock and any share of our Common Stock issued upon any conversion or redemption of the Series A Preferred Stock. These registration rights would facilitate the resale of such securities into the public market, and any such resale would increase the number of shares of our Common Stock available for public trading. Sales by the Preferred Stock Investors of a substantial number of shares of our Common Stock in the public market, or the perception that such sales might occur, could have a material adverse effect on the trading price of our Common Stock.

The Preferred Stock Investors may exercise influence over us, including through their ability to designate, and the ability of the holders of Series A Preferred Stock to elect, a member of our board of directors.

As of August 25, 2020, the outstanding shares of our Series A Preferred Stock represented approximately 8.1% of our outstanding Common Stock, on an as-converted basis. In addition, the terms of the Series A Preferred Stock grant the Preferred Stock Investors consent rights with respect to certain actions by us, including:

- amending our organizational documents in a manner that would have an adverse effect on the Series A Preferred Stock;
- issuing securities that are senior to, or equal in priority with, the Series A Preferred Stock; and
- incurrence of indebtedness to the extent such incurrence would cause our Total Leverage Ratio for any applicable Test Period to exceed 6:00:1:00, determined on a Pro-Forma Basis (as such terms are defined in our Credit Agreement).

As a result, the Preferred Stock Investors have the ability to influence the outcome of certain matters affecting our governance and capitalization. The sponsors of the Preferred Stock Investors are in the business of making or advising on investments in companies, including businesses that may directly or indirectly compete with certain portions of our business, and they may have interests that diverge from, or even conflict with, those of our other shareholders. They may also pursue acquisition opportunities that may be complementary to our business, and, as a result, those acquisition opportunities may not be available to us.

In addition, the terms of that certain stockholders' agreement we entered into with the Preferred Stock Investors (the "Stockholders' Agreement") and of the Certificate of Designation grant the Preferred Stock Investors certain rights to designate a director to serve on our board of directors, which director is elected by a separate class vote of the holders of shares of the Series A Preferred Stock. For so long as the Preferred Stock Investors beneficially own shares of Series A Preferred Stock (or shares of our Common Stock issued upon conversion of Series A Preferred Stock) that have an aggregate value of \$250.0 million, the Preferred Stock Investors have the right to designate one director for election to our board of directors. In addition, for so long as the Preferred Stock Investors beneficially own shares of Series A Preferred Stock (or shares of our Common Stock issued upon conversion of Series A Preferred Stock) that have an aggregate value of \$500.0 million, the Preferred Stock Investors have the right to designate one observer to our board of directors.

The director designated by the Preferred Stock Investors is entitled to serve on committees of our board of directors, subject to applicable law and stock exchange rules. Notwithstanding the fact that all directors will be subject to fiduciary duties to us and to applicable law, the interests of the director designated by the Preferred Stock Investors may differ from the interests of our security holders as a whole or of our other directors.

Our Series A Preferred Stock has rights, preferences, and privileges that are not held by, and are preferential to, the rights of holders of our Common Stock, which could adversely affect our liquidity and financial condition, and may result in the interests of the Preferred Stock Investors differing from holders of our Common Stock.

As holders of Series A Preferred Stock, the Preferred Stock Investors have the right under the Certificate of Designation to receive a liquidation preference entitling them to be paid out of our assets available for distribution to stockholders before any payment may be made to holders of any other class or series of capital stock, an amount equal to the greater of (a) the stated value of their preferred shares plus all accrued and unpaid dividends or (b) the amount that such holders would have been

entitled to receive upon our liquidation, dissolution, and winding up if all outstanding shares of Series A Preferred Stock had been converted into shares of our Common Stock immediately prior to such liquidation, dissolution, or winding up.

In addition, regular dividends on the Series A Preferred Stock accrue and are cumulative at the rate of 5.0% per annum, subject to adjustment and payable quarterly in arrears. The dividend on each share of Series A Preferred Stock is to be paid in cash or in-kind through an increase in the stated value of such share.

We are also required to redeem all shares of Series A Preferred Stock upon certain change of control events at a value per share equal to the greater of (a) the sum of (1) the product of (A) the applicable Mandatory Redemption Multiplier (as defined in the Certificate of Designation), multiplied by (B) the stated value of each such share, plus (2) all accrued but unpaid dividends on such share, and (b) the consideration holders would have received if they had converted their shares of Series A Preferred Stock into shares of Common Stock immediately prior to the change of control event.

These dividend and share redemption obligations could adversely affect our liquidity and reduce the amount of cash available for working capital, capital expenditures, growth opportunities, acquisitions, and other general corporate purposes. Our obligations to the holders of Series A Preferred Stock could also limit our ability to obtain additional financing or increase our borrowing costs, which could have an adverse effect on our financial condition. The preferential rights could also result in divergent interests between the Preferred Stock Investors and holders of shares of our Common Stock.

Risks Relating to Ownership of Our Common Stock

Our stock price may change significantly, and a holder of shares of our Common Stock may not be able to resell such shares at or above the price such stockholder paid, or at all, and could lose all or part of such investment as a result.

The trading price of our Common Stock has been and continues to be volatile. For the three years ended June 30, 2020, our Common Stock price as quoted on the NYSE ranged from \$18.92 to \$80.52. The trading price of our Common Stock may be adversely affected by a number of factors, such as those listed above in “Risks Relating to Our Business and Industry” and the following:

- results of operations that vary from the expectations of securities analysts or investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates and investment recommendations by securities analysts or investors;
- declines in the market prices of stocks generally, or those of pharmaceutical or other healthcare companies;
- strategic actions by us or our competitors;
- announcements by us or our competitors of significant contracts, new products, acquisitions, joint marketing relationships, joint ventures, other strategic relationships, or capital commitments;
- changes in general economic or market conditions or trends in our industry or markets;
- changes in business or regulatory conditions or regulatory actions taken with respect to our business or the business of any of our competitors or customers;
- future sales of our Common Stock or other securities;
- investor perceptions of the investment opportunity associated with our Common Stock relative to other investment alternatives;
- the public response to press releases or other public announcements by us or third parties, including our filings with or information furnished to the SEC;
- announcements relating to or developments in litigation;
- guidance, if any, that we provide to the public, any change in this guidance, or any failure to meet this guidance;
- the availability of an active trading market for our Common Stock;
- changes in the accounting principles we use to record our results or our application of these principles to our business; and
- other events or factors, including those resulting from natural disasters, hostilities, acts of terrorism, geopolitical activity, public health crises, including pandemics, or responses to these events.

Broad market and industry fluctuations may adversely affect the market price of our Common Stock, regardless of our actual operating performance. In addition, price volatility may be greater if the public float or trading volume of our Common Stock is low, and the amount of public float on any given day can vary depending on the individual actions of our stockholders.

Following periods of market volatility, stockholders have been known to institute securities class action litigation in order to recover their resulting losses. If we become involved in securities litigation, it could have a substantial cost and divert resources and the attention of senior management from our business regardless of the outcome of such litigation.

Because we have no plan to pay cash dividends on our Common Stock for the foreseeable future, a stockholder may not receive any return on an investment in our Common Stock unless it is sold for a net price greater than was paid for it.

We currently intend to retain future earnings, if any, for future operations, expansion, and debt repayment and have no current plan to pay any cash dividend on our Common Stock for the foreseeable future. Our board of directors has also authorized a stock buyback program that we may use from time to time to purchase shares of our Common Stock. Any future decision to pay a dividend in respect of our Common Stock, and the amount and timing of any such dividend, will be at the sole discretion of our board of directors. Our board of directors may take into account, when deciding whether or how to pay a dividend, such factors as they may deem relevant, including general economic conditions, our financial condition and results of operations, our available cash and current and anticipated cash needs, possible future alternative deployments of our cash, our future capital requirements, and contractual, legal, tax, and regulatory restrictions and implications on the payment of dividends by us to our holders of shares of our Common Stock or by our subsidiaries to us. In addition, our ability to pay dividends is limited by covenants in the agreements governing our outstanding indebtedness and may be limited by covenants of any future indebtedness we or our subsidiaries incur. As a result, a holder of a share of our Common Stock may not receive any return on such investment unless it is sold for a price greater than that which was paid for it, taking into account any applicable commission or other costs of acquisition or sale.

If securities analysts do not publish research or reports about our business or if they downgrade our stock or our sector, our stock price and trading volume could decline.

The trading market for our Common Stock has been affected in part by the research and reports that industry and financial analysts publish about us or our business. We do not control these analysts. Furthermore, if one or more of the analysts who cover us downgrade our stock or our industry, change their views regarding the stock of any of our competitors or other healthcare sector companies, or publish inaccurate or unfavorable research about our business, the market price of our Common Stock could decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, we could lose visibility in the market, which in turn could cause our stock price or trading volume to decline.

Future sales, or the perception of future sales, of our Common Stock, by us or our existing stockholders could cause the market price for our Common Stock to decline.

The sale of shares of our Common Stock in the public market, or the perception that such sales could occur, could harm the prevailing market price of shares of our Common Stock. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

As of August 25, 2020, 13,676,027 shares of our Common Stock (including (a) the 13,218,874 shares of Common Stock into which outstanding shares of Series A Preferred Stock can be converted (the “As-Converted Shares”) and (b) 453,653 shares of restricted stock and performance-based restricted stock issued pursuant to the equity incentive plans we have established for our employees and non-employee directors), representing approximately 7.7% of the sum of our total outstanding shares of Common Stock and the As-Converted Shares, are “restricted securities” within the meaning of the SEC’s Rule 144 under the Securities Act (“Rule 144”) and subject to certain restrictions on resale. Restricted securities may be sold in the public market only if they are registered under the Securities Act or are sold pursuant to an exemption from registration such as Rule 144. A registration statement in respect of the offer and sale of the shares of Series A Preferred Stock and As-Converted Shares by the holders of the Series A Preferred Stock is and remains effective.

In addition, as of August 25, 2020, 2,281,648 shares of our Common Stock may become eligible for sale upon exercise of vested options. A total of 15,600,000 shares of our Common Stock were reserved for issuance under our 2018 Omnibus Incentive Plan, subject to adjustment for retired and post-June 30, 2018 awards under the prior 2014 Omnibus Incentive Plan. As of August 25, 2020, 10,533,923 shares of our Common Stock remain available for future issuance under the 2018 Omnibus Incentive Plan. These shares can be sold in the public market upon issuance, subject to restrictions under the securities laws applicable to resales by affiliates.

The market price of shares of our Common Stock could drop significantly if the holders of these shares sell them or are perceived by the market as intending to sell them. These factors could also make it more difficult for us to raise additional funds through future offerings of shares of our equity securities that we wish to issue. In the future, we may also issue our securities in connection with investments or acquisitions. The number of shares of our Common Stock issued or issuable in connection with an investment or acquisition could constitute a material portion of then-outstanding shares of our Common Stock, subject to limitations on issuance of new shares without stockholder approval imposed by the NYSE or to restrictions set forth in the agreements governing our indebtedness, the Certificate of Designation, and the Stockholders' Agreement. Any issuance of additional securities in connection with investments, acquisitions, or otherwise may result in dilution to the holders of shares of our Common Stock.

Anti-takeover provisions in our organizational documents could delay or prevent a change of control.

Certain provisions of our current certificate of incorporation and bylaws may have an anti-takeover effect and may delay, defer, or prevent a merger, acquisition, tender offer, takeover attempt, or other change of control transaction that may otherwise be in the best interests of our stockholders, including transactions that might otherwise result in the payment of a premium over the market price for the shares held by our stockholders.

These provisions provide for, among other things:

- until the provision completely sunsets at our annual meeting in respect of fiscal 2021, a classified board of directors with staggered three-year terms;
- the ability of our board of directors to issue one or more series of preferred stock;
- advance notice for nominations of directors by stockholders and for stockholders to include matters to be considered at our annual meetings (though our board of directors has implemented shareholder proxy access);
- certain limitations on convening special stockholder meetings;
- the removal of directors serving multi-year terms only for cause; and
- any amendment of certain provisions of our certificate of incorporation only by the affirmative vote of at least 66-2/3% of the shares of Common Stock entitled to vote generally in the election of directors.

Provisions such as those just described, to the extent that they remain in effect, could make it more difficult for a third party to acquire us, even if the third-party's offer may be considered beneficial by many of our stockholders. As a result, our stockholders may be limited in their ability to obtain a premium for their shares.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal executive offices are located at 14 Schoolhouse Road, Somerset, New Jersey. As of June 30, 2020, we had 53 facilities (4 geographical locations operate as multiple facilities because they support more than one reporting segment), comprising manufacturing operations, development centers, and sales offices contained in approximately 7.1 million square feet of manufacturing, laboratory and related space. Our manufacturing capabilities include all required regulatory, quality assurance and in-house validation space. The following table sets forth our facilities containing manufacturing, laboratory, and related space by reporting segment and geographic location as of June 30, 2020:

Geographic Region	Softgel and Oral Technologies	Biologics	Oral and Specialty Delivery	Clinical Supply Services	Total ⁽¹⁾
North America	4	9	7 ⁽²⁾	3	23
South America	3	0	0	0	3
Europe	4	5	5	3	17
Asia-Pacific	2	0	0	4	6
Total	13	14	12	10	49

- (1) Sites that are used by multiple segments are included once for each segment in this table.
- (2) The facility in Somerset, New Jersey also houses our principal executive offices.

Additional information with respect to our property, plant, and equipment and our leases is contained in Notes 16 and 19 to our Consolidated Financial Statements.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we may be involved in legal proceedings arising in the ordinary course of business, including, without limitation, inquiries and claims concerning environmental contamination as well as litigation and allegations in connection with acquisitions, product liability, manufacturing or packaging defects, and claims for reimbursement for the cost of lost or damaged active pharmaceutical ingredients, the cost of any of which could be significant. We intend to vigorously defend ourselves against any such litigation and do not currently believe that the outcome of any such litigation will have a material adverse effect on our financial statements. In addition, the healthcare industry is highly regulated and government agencies continue to scrutinize certain practices affecting government programs and otherwise.

From time to time, we receive subpoenas or requests for information relating to the business practices and activities of customers or suppliers from various governmental agencies or private parties, including from state attorneys general, the U.S. Department of Justice, and private parties engaged in patent infringement, antitrust, tort, and other litigation. We generally respond to such subpoenas and requests in a timely and thorough manner, and responses sometimes require considerable time and effort and can result in considerable costs being incurred. We expect to incur costs in future periods in connection with future requests.

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The principal market for trading of our Common Stock is the NYSE. Our Common Stock trades under the symbol “CTLT.”

As of August 25, 2020, we had 14 holders of record and 4 holders of record of outstanding shares of our Common Stock and Series A Preferred Stock, respectively. This number does not include beneficial owners whose shares were held in street name.

We did not declare or pay any dividend on our Common Stock in fiscal 2020 or fiscal 2019. We have no current plan to pay any dividend on our Common Stock. Any decision to declare and pay dividends in the future will be made at the sole discretion of our board of directors and will depend on, among other things, our results of operations, cash requirements, financial condition, contractual restriction, and other factors that our board of directors may deem relevant. Because we are a holding company and have no direct operations, we will only be able to pay dividends from funds we receive from our subsidiaries. In addition, our ability to pay dividends will be limited by covenants in our existing indebtedness and the Certificate of Designation and may be limited by the agreements governing other indebtedness we or our subsidiaries incur in the future. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Debt and Financing Arrangements—Debt Covenants.”

Recent Sales of Unregistered Equity Securities

We did not sell any unregistered equity securities during the period covered by this Annual Report.

Purchases of Equity Securities

In October 2015, our board of directors authorized a share repurchase program, permitting the use of up to \$100.0 million to repurchase outstanding shares of our Common Stock. On August 27, 2020, our board of directors terminated this share repurchase program. There was no purchase by us, on our behalf, or on behalf of any affiliate of our registered equity securities during the period covered by this Annual Report or at any time since the share repurchase program was authorized by our board of directors in 2015.

Performance Graph

Set forth below is a line graph comparing the cumulative total shareholder return on our Common Stock from June 30, 2015 through June 30, 2020, based on the market price of our Common Stock and assuming reinvestment of dividends, with the cumulative total shareholder return of companies on the S&P Composite 1500 Index and S&P Composite 1500 Healthcare Index. The graph assumes that \$100 was invested in our Common Stock and in each index at the market close on June 30, 2015. The stock price performance of the following graph is not necessarily indicative of future stock performance.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth our selected historical financial and operating data for, or as of the end of, each of the five years ended June 30, 2020. The selected financial data as of June 30, 2020 and 2019, and for the fiscal years ended June 30, 2020, 2019, and 2018, have been derived from our audited Consolidated Financial Statements. The financial data as of June 30, 2018, 2017, and 2016 and for the fiscal years ended June 30, 2017 and 2016 have been derived from our audited consolidated financial statements not included in this Annual Report. This table should be read in conjunction with the Consolidated Financial Statements and the notes thereto.

(Dollars in millions, except per share data)	Fiscal Year Ended June 30,				
	2020	2019	2018	2017	2016
Statement of Operations Data:					
Net revenue	\$ 3,094.3	\$ 2,518.0	\$ 2,463.4	\$ 2,075.4	\$ 1,848.1
Cost of sales	2,111.0	1,712.9	1,710.8	1,420.8	1,260.5
Gross margin	983.3	805.1	752.6	654.6	587.6
Selling, general, and administrative expenses	577.9	512.0	464.8	402.6	358.1
Impairment charges and loss on sale of assets	5.5	5.1	8.7	9.8	2.7
Restructuring and other	5.5	14.1	10.2	8.0	9.0

Effect of foreign currency on cash	\$ (6.7)	\$ (3.5)	\$ (2.4)	\$ 4.9	\$ (6.5)

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with "Item 6. Selected Financial Data" and our Consolidated Financial Statements and related notes, which appear elsewhere in this Annual Report. In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates, and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. You should carefully read "Special Note Regarding Forward-Looking Statements" in this Annual Report. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this Annual Report, particularly in "Item 1A. Risk Factors."

Overview

We are the leading global provider of advanced delivery technologies and development and manufacturing solutions for drugs; protein, cell, and gene therapy biologics, and consumer health products. Our oral, injectable, cell and gene therapy and cell, and respiratory delivery technologies address the full diversity of the pharmaceutical industry, including small molecules; protein, cell, and gene therapy biologics; and consumer health products. Through our extensive capabilities and deep expertise in product development, we can help our customers take products to market faster, including nearly half of new drug products approved by the FDA in the last decade. Our advanced delivery technology platforms, which include those in our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery segments, our proven formulation, manufacturing, and regulatory expertise, and our broad and deep intellectual property enable our customers to develop more products and better treatments for patients and consumers. Across both development and delivery, our commitment to reliably supply our customers' and their patients' needs is the foundation for the value we provide; annually, we produce more than 74 billion doses for nearly 7,000 customer products, or approximately 1 in every 20 doses of such products taken each year by patients and consumers around the world. We believe that through our investments in growth-enabling capacity and capabilities, our ongoing focus on operational and quality excellence, the sales of existing and introduction of new customer products, our innovation activities and patents, and our entry into new markets, we will continue to benefit from attractive and differentiated margins and realize the growth potential from these areas.

In fiscal 2020, we engaged in a business reorganization of our operating segments to better align our internal business unit structure with our "Follow the Molecule" strategy and the increased focus on our biologics-related offerings. Under the revised structure, we changed the components and names of three of our four operating segments (with our fourth segment, Clinical Supply Services, unchanged).

We currently operate in four operating segments, which also constitute our four reporting segments: Softgel and Oral Technologies, Biologics, Oral and Specialty Delivery, and Clinical Supply Services, as further described in "Business—Our Reporting Segments" contained elsewhere in this Annual Report.

The COVID-19 Pandemic

The COVID-19 pandemic has spread across the globe and is affecting economic activity worldwide, including in the countries in which we, our customers, our suppliers, and our other business partners conduct business. Governments in affected regions have implemented, and may continue to implement, measures to protect public health, including quarantines, travel restrictions, business closures, cancellations of public gatherings, and measures that affect the flow of goods between different regions. We have taken and continue to take steps to avoid or reduce infection or contamination and otherwise protect our employees and our business, in line with guidelines issued by the CDC, the WHO, and local authorities where we operate, to re-emphasize good hygiene practices, severely restrict non-employee access to our sites, reorganize our workflows where permitted to maximize social distancing, limit our employees to only business-critical travel (where permitted by local law), facilitate safer alternatives to travel to and from work, and employ remote-working strategies. In addition, to address the multiple dimensions of the pandemic, two senior, multi-disciplinary teams reporting directly to our Chief Executive Officer have been continuously monitoring the global situation, executing mitigation activities whenever and wherever required, and planning for a phased and structured return to our facilities as circumstances will permit for those employees who have been remote-working since the pandemic began.

We have reviewed and will continue to analyze our supply chain to identify any risk, delay, or concern that may have an impact on our ability to deliver our services and products. To date, we have not identified any significant risk, delay, or concern that would have a substantial effect on such delivery. We have adopted various procedures to minimize and manage any future disruption to our ongoing operations. These include procuring expanded safety stocks of raw materials and personal protective equipment across our network, as well as ongoing monitoring of our suppliers' stock levels to assure future deliveries. Our existing procedures, which are consistent with cGMP and other regulatory standards, are intended to assure the integrity of our supply against any contamination. We have added a detailed response plan to manage any impact of the virus on employee

health, site operations, and product supply, including immediate assessment of the health of employees reporting symptoms, comprehensive risk assessment of any impact to quality, additional cleaning protocols, and alternative shift patterns to compensate should fewer employees be available.

The COVID-19 pandemic has not had a material adverse impact on our business, financial condition, or results of operations to date, but, at this point, the extent to which the COVID-19 pandemic may affect our future financial condition or results of operations remains uncertain and will depend on future developments that are highly uncertain, including the duration of the pandemic, new information that may emerge concerning the severity of the virus, and the actions governments, the pharmaceutical industry, competitors, suppliers, customers, patients, and others may take to contain or address its direct and indirect effects. The COVID-19 pandemic and associated mitigation measures may also have an adverse impact on the healthcare systems, global economic conditions, or economic conditions in one or more regions where we or our customers operate, which could have an adverse effect on our business and financial condition. We have observed some increases in customer delays and cancellations, occasional increases in absenteeism of production employees in our facilities in certain affected regions, and disruptions in certain clinical trials supported by our Clinical Supply Services segment, with a small percentage of our customers expecting a reduction in demand and a larger percentage expecting an increase in demand, in each case due to circumstances relating to the COVID-19 pandemic and the responsive measures. We have also seen revenue increases and the potential for further revenue increases related to projects seeking to address the COVID-19 pandemic or its effects. Future financial periods may reflect greater effects of the pandemic on the results of our operations.

See also “Risk Factors — Risks Related to Our Business and Industry — Our business, financial condition, and results of operations may be adversely affected by global health epidemics, including the COVID-19 pandemic” elsewhere in this Annual Report.

Critical Accounting Policies and Recent Accounting Pronouncements

The following disclosure supplements the descriptions of our accounting policies contained in Note 1 to our Consolidated Financial Statements regarding significant areas of judgment. Management made certain estimates and assumptions during the preparation of the Consolidated Financial Statements in accordance with U.S. GAAP. These estimates and assumptions affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities in the Consolidated Financial Statements. These estimates also affect the reported amount of net earnings during the reporting periods. Actual results could differ from those estimates. Because of the size of the financial statement elements to which they relate, some of our accounting policies and estimates have a more significant impact on the Consolidated Financial Statements than others.

Management has discussed the development and selection of these critical accounting policies and estimates with the audit committee of our board of directors. A discussion of some of our more significant accounting policies and estimates follows.

Revenue

We sell products and services directly to our pharmaceutical, biotechnology, and consumer health customers. The majority of our business is conducted through manufacturing and commercial product supply, development services, and clinical supply services. On July 1, 2018, we adopted Accounting Standards Update (“ASU”) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, codified as Accounting Standards Codification (“ASC”) 606, using the modified retrospective method of adoption. Prior period amounts have not been restated and continue to be reported in accordance with our historical accounting policies. For discussion on the impact of adopting ASC 606 on our accounting, refer to Note 1 to our Consolidated Financial Statements.

Our contracts with customers often include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct performance obligations that should be accounted for separately versus together may require judgment. For our manufacturing and commercial product supply revenue, the contract generally includes the terms of the manufacturing services and related product quality assurance procedures to comply with regulatory requirements. Due to the regulated nature of our business, these contract terms are highly interdependent and, therefore, are considered to be a single combined performance obligation. For our development services and clinical supply services revenue, our performance obligations vary per contract and are accounted for as separate performance obligations. If a contract contains a single performance obligation, we allocate the entire transaction price to the single performance obligation. If a contract contains multiple performance obligations, we allocate consideration to each performance obligation using the “relative standalone selling price” as defined under ASC 606. Generally, we utilize observable standalone selling prices in our allocations of consideration. If observable standalone selling prices are not available, we estimate the applicable standalone selling price using an adjusted market assessment approach, representing the amount that we believe the market is willing to pay for the applicable service. Revenue is recognized over time using an appropriate method of measuring progress towards fulfilling our performance obligation for the respective arrangement. Determining the measure of progress that consistently

depicts our satisfaction of performance obligations within each of our revenue streams across similar arrangements requires judgment.

Licensing revenue

We occasionally enter into arrangements with customers that include licensing of functional intellectual property, including drug formulae, or other intangible property (“out-licensing”). We do not have any material license arrangement that contains more than one performance obligation. Our out-licensing generally entitles us to nonrefundable, up-front fees or royalties. Nonrefundable, up-front license fees are recognized as revenue when the licensed property is made available for the customer’s use and benefit, provided there is no unsatisfied performance obligation included in the arrangement. Royalty payments from such arrangements are recognized when subsequent sale or usage of an item subject to the royalty occurs and the performance obligation to which royalty relates is satisfied.

Goodwill and Indefinite-Lived Intangible Assets

We account for purchased goodwill and intangible assets with indefinite lives in accordance with ASC 350, *Intangible and Other Assets*. Under ASC 350, goodwill and intangible assets with indefinite lives are not amortized, but instead are tested for impairment at least annually. We perform an impairment evaluation of goodwill annually during the fourth quarter of our fiscal year or when circumstances otherwise indicate an evaluation should be performed. The evaluation may begin with a qualitative assessment for each reporting unit to determine whether it is more-likely-than-not that the fair value of the reporting unit is less than its carrying value. If the qualitative assessment does not generate a positive response, or if no qualitative assessment is performed, a quantitative assessment, based upon discounted cash flows, is performed and requires management to estimate future cash flows, growth rates, and economic and market conditions. In fiscal 2018 and 2020, we proceeded immediately to the quantitative assessment, but in fiscal 2019 we began with the qualitative assessment. The evaluations performed in fiscal 2018, 2019 and 2020 resulted in no impairment charge.

See Note 4 to the Consolidated Financial Statements.

Series A Preferred Stock Dividend Adjustment Feature

The terms of the Series A Preferred Stock include a dividend adjustment feature to provide the holders with certain protections against a decline in the trading price of our Common Stock. Because this adjustment feature depends in part on the value of external metrics at future dates, over which we have no control, this feature is accounted for separately from the rest of the Series A Preferred Stock as a derivative instrument, which is measured at fair value, as of the valuation date, using a combination of (i) a Monte Carlo simulation and (ii) a binomial lattice model, which incorporates the terms and conditions of the Series A Preferred Stock and is based on changes in the market prices of shares of our Common Stock over successive periods. Key assumptions used in both models include the current market price of one share of the Common Stock and its historical and expected volatility, risk-neutral interest rates, and the remaining term of the adjustment feature. The calculation of the estimated fair value of the derivative liability is highly sensitive to changes in the unobservable inputs, such as the expected volatility and the Company’s specific credit spread. We recognize the derivative as either an asset or liability in the consolidated balance sheets at its fair value and revalue it as of the end of each quarterly reporting period; changes in the fair value are recognized in the consolidated statements of operations.

Income Taxes

In accordance with ASC 740, *Income Taxes*, we account for income taxes using the asset and liability method. The asset and liability method requires recognition of deferred tax assets and liabilities for expected future tax consequences of temporary differences that currently exist between tax bases and the corresponding financial reporting bases of our assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates in the respective jurisdictions in which we operate. Deferred taxes are not provided on the undistributed earnings of subsidiaries outside of the United States when it is expected that these earnings will be permanently reinvested. In fiscal 2018, we recorded a provision for U.S. income taxes and foreign withholding taxes in relation to expected repatriations as a result of the 2017 Tax Act, but we have not made any provision for U.S. income taxes on the remaining undistributed earnings of foreign subsidiaries as those earnings are considered permanently reinvested in the operations of those foreign subsidiaries in fiscal 2020.

The 2017 Tax Act imposed taxes on so-called “global intangible low-taxed income” (“GILTI”) earned by certain foreign subsidiaries of a U.S. company. In accordance with ASC 740, we made an accounting policy election to treat taxes due on future U.S. inclusions in taxable income related to GILTI as a current-period expense when incurred.

We assess the realizability of deferred tax assets by considering all available evidence, both positive and negative, in assessing the need for a valuation allowance for deferred tax assets. We evaluate four possible sources of taxable income when assessing the realization of deferred tax assets:

- carrybacks of existing NOLs (if and to the extent permitted by tax law);
- future reversals of existing taxable temporary differences;
- tax planning strategies; and
- future taxable income exclusive of reversing temporary differences and carryforwards.

We consider the need to maintain a valuation allowance on deferred tax assets based on management's assessment of whether it is more likely than not that we would realize those deferred tax assets as a result of future reversals of existing taxable temporary differences and the ability to generate sufficient taxable income within the carryforward period available under the applicable tax law.

Unrecognized tax benefits are generated when there are differences between tax positions taken in a tax return and amounts recognized in the Consolidated Financial Statements. Tax benefits are recognized in the Consolidated Financial Statements when it is more likely than not that a tax position will be sustained upon examination. To the extent we prevail in matters for which liabilities have been established or are required to pay amounts in excess of our liabilities, our effective income tax rate in a given period could be materially affected. An unfavorable income tax settlement may require the use of cash and result in an increase in our effective income tax rate in the year it is resolved. A favorable income tax settlement would be recognized as a reduction in the effective income tax rate in the year of resolution.

Our accounting for income taxes involves the application of complex tax regulations in the U.S. and in each of the non-U.S. jurisdictions in which we operate, particularly European tax jurisdictions. The determination of income subject to taxation in each tax-paying jurisdiction requires us to review reported book income and the events occurring during the year in each jurisdiction in which we operate. In addition, the application of deferred tax assets and liabilities will have an effect on the tax expense in each jurisdiction. For those entities engaging in transactions with affiliates, we apply transfer-pricing guidelines relevant in many jurisdictions in which we operate and make certain informed and reasonable assumptions and estimates about the relative value of contributions by affiliates when assessing the allocation of income and deductions between consolidated entities in different jurisdictions. The estimates and assumptions used in these allocations can result in uncertainty in the measured tax benefit.

Factors Affecting our Performance

Fluctuations in Operating Results

Our annual financial reporting periods end on June 30. Our revenue and net earnings are generally higher in the third and fourth quarters of each fiscal year, with our first fiscal quarter typically generating our lowest revenue of any quarter, and our last fiscal quarter typically generating our highest revenue. These fluctuations are primarily the result of the timing of our, and our customers', annual operational maintenance periods at locations in continental Europe and the U.K., the seasonality associated with pharmaceutical and biotechnology budgetary spending decisions, clinical trial and research and development schedules, the timing of new product launches and length of time needed to obtain full market penetration, and, to a lesser extent, the time of the year some of our customers' products are in higher demand.

Acquisition and Related Integration Efforts

Our growth and profitability are affected by the acquisitions we complete and the speed at which we integrate those acquisitions into our existing operating platforms. In fiscal 2018, we acquired Catalent Indiana in order to enhance our biologics capabilities, and it has been integrated into our Biologics segment. In fiscal 2019, we completed the acquisitions of Juniper, based in the U.K., in August 2018 and of a gene therapy business, based in the U.S., in May 2019, which have been integrated into our Oral and Specialty Delivery and Biologics segments, respectively. In fiscal 2020, we completed the acquisitions of additional U.S.-based gene therapy assets from Novavax, in July 2019, and MaSTherCell, based in Belgium and the U.S., in February 2020, which have been integrated into our Biologics segment. We also completed the acquisition of the Anagni facility based in Italy, in January 2020, which has been integrated into our Oral and Specialty Delivery and Biologics segments.

Foreign Exchange Rates

Our operating network is global, and, as a result, we have substantial revenues and operating expenses that are denominated in currencies other than the U.S. dollar, the currency in which we report our financial results, and are therefore influenced by changes in currency exchange rates. In fiscal 2020, approximately 41% of our revenue was generated from our operations outside the United States. Significant foreign currencies for our operations include the British pound, European euro, Brazilian real, Argentine peso, Japanese yen, and the Canadian dollar.

Trends Affecting Our Business

Industry

We participate in nearly every sector of the global pharmaceutical and biotechnology industry, which has been estimated to generate more than \$1 trillion in annual revenue, including, but not limited to, the prescription drug and biologic sectors as well as consumer health, which includes the over-the-counter and vitamins and nutritional supplement sectors. Innovative pharmaceuticals continue to play a critical role in the global market, while the share of revenue due to generic drugs and biosimilars is increasing in both developed and developing markets. Sustained developed market demand and rapid growth in emerging economies is driving the consumer health product growth rate to more than double that for pharmaceuticals. Payors, both public and private, have sought to limit the economic impact of pharmaceutical and biologics product demand through greater use of generic and biosimilar drugs, access and spending controls, and health technology assessment techniques, favoring products that deliver truly differentiated outcomes.

New Molecule Development and R&D Sourcing

Continued strengthening in early-stage development pipelines for drugs and biologics, compounded by increasing clinical trial breadth and complexity, support our belief in the attractive growth prospects for development solutions. Large companies are in many cases reconfiguring their R&D resources, increasingly involving the use of strategic partners for important outsourced functions. Additionally, an increasing portion of compounds in development are from companies that do not have a full research and development infrastructure, and thus are more likely to need strategic development solutions partners.

Demographics

Aging population demographics in developed countries, combined with health care reforms in many global markets that are expanding access to treatments to a greater proportion of their populations, will continue to drive increases in demand for pharmaceuticals, biologics, and consumer health products. Increasing economic affluence in developing regions will further increase demand for healthcare treatments, and we are taking active steps to allow us to participate effectively in these growth regions and product categories.

Finally, we believe the market access and payor pressures our customers face, global supply chain complexity, and the increasing demand for improved treatments will continue to escalate the need for product differentiation, improved outcomes, and treatment cost reduction, all of which can often be addressed using our advanced delivery technologies.

Non-GAAP Metrics

As described in this section, management uses various financial metrics, including certain metrics that are not based on concepts defined in U.S. GAAP, to measure and assess the performance of our business, to make critical business decisions, and to assess our compliance with certain financial obligations. We therefore believe that presentation of certain of these non-GAAP metrics in this Annual Report will aid investors in understanding our business.

EBITDA from operations

Management measures operating performance based on consolidated earnings from operations before interest expense, expense/(benefit) for income taxes and depreciation and amortization, adjusted for the income or loss attributable to non-controlling interests (“EBITDA from operations”). EBITDA from operations is not defined under U.S. GAAP, is not a measure of operating income, operating performance, or liquidity presented in accordance with U.S. GAAP, and is subject to important limitations.

We believe that the presentation of EBITDA from operations enhances an investor’s understanding of our financial performance. We believe this measure is a useful financial metric to assess our operating performance across periods and use this measure for business planning purposes. In addition, given the significant investments that we have made in the past in property, plant and equipment, depreciation and amortization expenses represent a meaningful portion of our cost structure. We believe that disclosing EBITDA from operations will provide investors with a useful tool for assessing the comparability between periods of our ability to generate cash from operations sufficient to pay taxes, to service debt, and to undertake capital expenditures without consideration of non-cash depreciation and amortization expense. We present EBITDA from operations in order to provide supplemental information that we consider relevant for the readers of the Consolidated Financial Statements, and such information is not meant to replace or supersede U.S. GAAP measures. Our definition of EBITDA from operations may not be the same as similarly titled measures used by other companies. The most directly comparable measure to EBITDA from operations defined under U.S. GAAP is net earnings/(loss). Included in this Management’s Discussion and Analysis is a reconciliation of net earnings/(loss) to EBITDA from operations.

In addition, we evaluate the performance of our segments based on segment earnings before non-controlling interest, other (income)/expense, impairments, restructuring costs, interest expense, income tax expense/(benefit), and depreciation and amortization (“Segment EBITDA”).

Adjusted EBITDA

Under the Credit Agreement and the Indentures, the ability of Operating Company to engage in certain activities, such as incurring certain additional indebtedness, making certain investments and paying certain dividends, is tied to ratios based on Adjusted EBITDA (which is defined as “Consolidated EBITDA” in the Credit Agreement and “EBITDA” in the Indentures). Adjusted EBITDA is a covenant compliance measure in our Credit Agreement and Indentures, particularly those covenants governing debt incurrence and restricted payments. Adjusted EBITDA is based on the definitions in the Credit Agreement, is not defined under U.S. GAAP, is not a measure of operating income, operating performance or liquidity presented in accordance with U.S. GAAP, and is subject to important limitations. Because not all companies use identical calculations, our presentation of Adjusted EBITDA may not be comparable to other similarly titled measures of other companies.

In addition, we use Adjusted EBITDA as a performance metric that guides management in its operation of and planning for the future of the business and drives certain management compensation programs. Management believes that Adjusted EBITDA provides a useful measure of our operating performance from period to period by excluding certain items that are not representative of our core business, including interest expense and non-cash charges like depreciation and amortization.

The measure under U.S. GAAP most directly comparable to Adjusted EBITDA is net earnings/(loss). In calculating Adjusted EBITDA, we add back certain non-cash, non-recurring and other items that are deducted when calculating EBITDA from operations and net earnings, consistent with the requirements of the Credit Agreement. Adjusted EBITDA, among other things:

- does not include non-cash stock-based employee compensation expense and certain other non-cash charges;
- does not include cash and non-cash restructuring, severance and relocation costs incurred to realize future cost savings and enhance operations;
- adds back any non-controlling interest expense, which represents minority investors’ ownership of non-wholly owned consolidated subsidiaries and is, therefore, not available; and
- includes estimated cost savings that have not yet been fully reflected in our results.

Adjusted Net Income and Adjusted Net Income per share

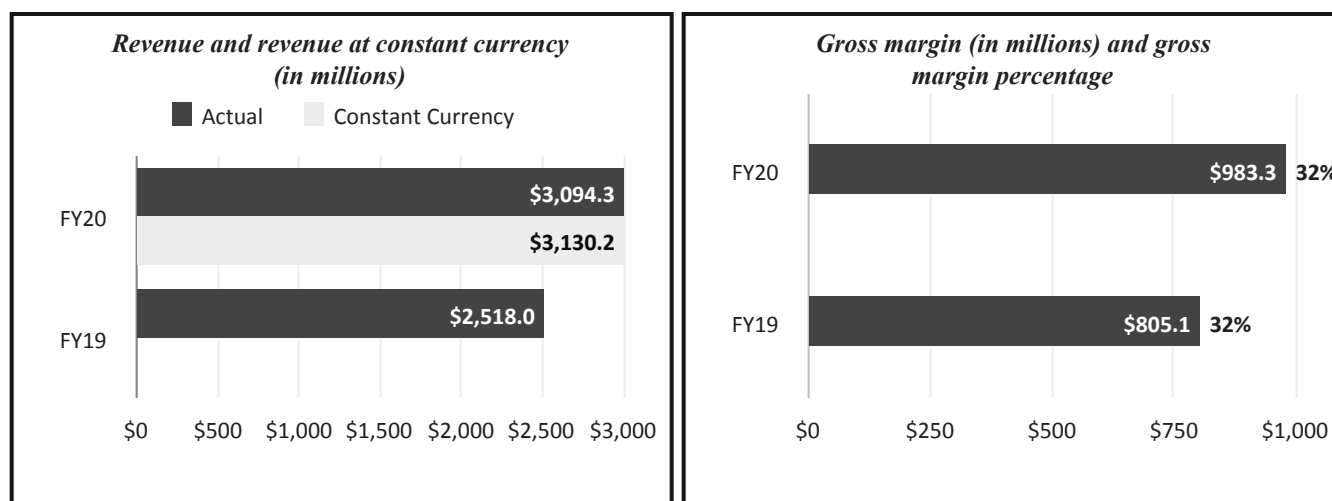

We use Adjusted Net Income and Adjusted Net Income per share (which we sometimes refer to as “Adjusted EPS”) as performance metrics. Adjusted Net Income is not defined under U.S. GAAP, is not a measure of operating income, operating performance, or liquidity presented in accordance with U.S. GAAP, and is subject to important limitations. We believe that providing information concerning Adjusted Net Income and Adjusted Net Income per share enhance an investor’s understanding of our financial performance. We believe that these measures are useful financial metrics to assess our operating performance from period to period by excluding certain items that we believe are not representative of our core business, and we use these measures for business planning and executive compensation purposes. We define Adjusted Net Income as net earnings/(loss) adjusted for (1) earnings or loss from discontinued operations, net of tax, (2) amortization attributable to purchase accounting, and (3) income or loss from non-controlling interest in majority-owned operations. We also make adjustments for other cash and non-cash items (as shown above, in “—Adjusted EBITDA”), partially offset by our estimate of the tax effects as a result of such cash and non-cash items. Our definition of Adjusted Net Income may not be the same as similarly titled measures used by other companies. Adjusted Net Income per share is computed by dividing Adjusted Net Income by the weighted average diluted shares outstanding.

Use of Constant Currency

As exchange rates are an important factor in understanding period-to-period comparisons, we believe the presentation of results on a constant currency basis in addition to reported results helps improve investors’ ability to understand our operating results and evaluate our performance in comparison to prior periods. Constant currency information compares results between periods as if exchange rates had remained constant period-over-period. We use results on a constant currency basis as one measure to evaluate our performance. In this Annual Report, we calculate constant currency by calculating current-year results using prior-year foreign currency exchange rates. We generally refer to such amounts calculated on a constant currency basis as excluding the impact of foreign exchange. These results should be considered in addition to, not as a substitute for, results reported in accordance with U.S. GAAP. Results on a constant currency basis, as we present them, may not be comparable to similarly titled measures used by other companies and are not measures of performance presented in accordance with U.S. GAAP.

Summary Two-Year Key Financial Performance Metrics

The below tables summarize our results in fiscal 2020 and 2019 on several financial metrics we use to measure performance. Refer to the discussions below regarding performance and the use of key financial metrics and “—Non-GAAP Metrics—Use of Constant Currency” concerning the measurement of revenue at “constant currency.”

Fiscal Year Ended June 30, 2020 compared to the Fiscal Year Ended June 30, 2019

Results for the fiscal year ended June 30, 2020 compared to the fiscal year ended June 30, 2019 were as follows:

(Dollars in millions)	Fiscal Year Ended June 30,		FX Impact	Constant Currency Increase/(Decrease)	
	2020	2019		Change \$	Change %
Net revenue	\$ 3,094.3	\$ 2,518.0	\$ (35.9)	\$ 612.2	24 %
Cost of sales	2,111.0	1,712.9	(26.0)	424.1	25 %
Gross margin	983.3	805.1	(9.9)	188.1	23 %
Selling, general, and administrative expenses	577.9	512.0	(3.0)	68.9	13 %
Impairment charges and (gain)/loss on sale of assets	5.5	5.1	0.5	(0.1)	(2)%
Restructuring and other	5.5	14.1	—	(8.6)	(61)%
Operating earnings	394.4	273.9	(7.4)	127.9	47 %
Interest expense, net	126.1	110.9	(0.3)	15.5	14 %
Other expense, net	7.9	2.7	(2.3)	7.5	278 %
Earnings before income taxes	260.4	160.3	(4.8)	104.9	65 %
Income tax expense	39.7	22.9	(1.0)	17.8	78 %
Net earnings	\$ 220.7	\$ 137.4	\$ (3.8)	\$ 87.1	63 %

Net Revenue

Net revenue increased by \$612.2 million, or 24%, excluding the impact of foreign exchange, compared to the twelve months ended June 30, 2019. Net revenue increased 14% as a result of acquisitions, which was partially offset by a 2% decrease in net revenue due to a facility divestiture. We acquired Juniper in August 2018, various gene therapy assets in May and July 2019, the Anagni facility in January 2020, and MaSTherCell in February 2020 and divested a manufacturing site in Australia in October 2019. Net revenue increased 12% without the impact of acquisitions and divestitures on a constant currency basis, primarily related to volume increases across all of our segments.

Gross Margin

Gross margin increased by \$188.1 million, or 23%, in fiscal 2020 compared to fiscal 2019, excluding the impact of foreign exchange, primarily as a result of our acquisitions and increased volumes as discussed above. On a constant-currency basis, gross margin, as a percentage of net revenue, decreased 10 basis points to 31.8% in the fiscal year ended June 30, 2020, compared to 31.9% in the corresponding prior-year period, primarily due to recent acquisitions.

Selling, General, and Administrative Expense

Selling, general, and administrative expense increased by \$68.9 million, or 13%, in fiscal 2020 compared to fiscal 2019, excluding the impact of foreign exchange, primarily driven by acquisition-related expenses during the year, including transaction fees of \$5.9 million related to the acquisitions of our gene therapy business, Anagni and MaSTherCell. Additionally, there were incremental selling, general, and administrative expenses from the acquired companies of \$80.9 million, primarily driven by \$28.0 million of depreciation and amortization expense and \$21.7 million of employee-related costs. Selling, general, and administrative expenses further increased approximately \$11.3 million for non-cash equity-based compensation driven by the achievement of certain performance-based metrics during the fiscal year. This increase was partially offset by a decrease in amortization expense attributable to prior-year amortization of \$13.0 million related to licensing rights within our Oral and Specialty Delivery segment and a \$3.1 million decrease related to the October 2019 divestiture of an Australian facility within our Softgel and Oral Technologies segment.

Impairment Charges and Loss on Sale of Assets

Impairment charges for the fiscal year ended June 30, 2020 and June 30, 2019 were \$5.5 million and \$5.1 million, respectively. Impairment charges in the current year were primarily driven by the sale of the Company's facility in Braeside, Australia. The prior year impairment charges were driven by a software-related intangible asset in our Clinical Supply Services segment that was not implemented and whose value therefore was not fully recoverable.

Restructuring and Other

Restructuring and other charges of \$5.5 million in fiscal 2020 decreased by \$8.6 million compared to the amounts in fiscal 2019 and were driven by employee-related actions. Restructuring expenses varies period-to-period based on site consolidation efforts and other efforts to further streamline the business.

Interest Expense, net

Interest expense, net, of \$126.1 million in fiscal 2020 increased by \$15.5 million, or 14%, compared to fiscal 2019, excluding the impact of foreign exchange, primarily driven by an increase in outstanding indebtedness driven by Operating Company's June 2019 offering of the USD 2027 Notes and its February 2020 offering of the Euro 2028 Notes. The increase was partially offset by savings in both interest paid and in interest rate due to repayment of Operating Company's euro-denominated term loans and euro-denominated 4.75% Senior Notes due 2024 (the "Euro 2024 Notes").

For additional information concerning our debt and financing arrangements, including the changing mix of debt and equity in our capital structure, see "—Liquidity and Capital Resources—Debt and Financing Arrangements" and Note 7 to the Consolidated Financial Statements.

A component of the purchase price for the acquisition of Catalent Indiana in fiscal 2018 consisted of \$200.0 million in deferred purchase consideration payable in four annual \$50.0 million installments on the first four anniversary dates of the acquisition. We made the two first such payments in October 2018 and October 2019, and the present value of the balance is accounted for as debt, with the difference between the nominal value and the present value considered imputed interest expense.

Other Expense, net

Other expense, net of \$7.9 million for fiscal 2020 was primarily driven by financing charges of \$16.3 million. The financing charges included a \$6.3 million write-off of previously capitalized financing charges related to Operating Company's recently repaid euro-denominated term loan under its senior secured credit facilities and the recently redeemed Euro 2024 Notes, and a \$10.0 million premium on early redemption of the Euro 2024 Notes. The loss was partially offset by a foreign currency gain of \$3.0 million and a derivative gain of \$3.2 million related to the change in the fair value of the derivative liability arising from the dividend adjustment mechanism of the Series A Preferred Stock.

Other expense, net for fiscal 2019 of \$2.7 million was primarily driven by financing charges of \$15.8 million related to the offering of the USD 2027 Notes and was partially offset by a gain of \$12.9 million related to the change in the fair value of the derivative liability arising from the dividend adjustment mechanism of the Series A Preferred Stock and \$0.5 million of

unrealized foreign currency gains in the year. See Notes 9 and 13 to the Consolidated Financial Statement for more details on the Series A Preferred Stock dividend adjustment.

Provision/(Benefit) for Income Taxes

Our provision for income taxes for the fiscal year ended June 30, 2020 was \$39.7 million relative to earnings before income taxes of \$260.4 million. Our provision for income taxes for the fiscal year ended June 30, 2019 was \$22.9 million relative to earnings before income taxes of \$160.3 million. The income tax provision for the current period is not comparable to the same period of the prior year primarily due to changes in pretax income over many jurisdictions, as well as the impact of discrete items, including equity compensation. Generally, fluctuations in our effective tax rate are due to changes in the geographic distribution of our pretax income resulting from our business mix and changes in the tax impact of permanent differences, restructuring, other special items, and other discrete tax items, including the reversal portions of federal and foreign valuation allowances, which may have unique tax implications depending on the nature of the item.

Segment Review

The below charts depict the percentage of net revenue from each of our four reporting segments for the previous two years. Refer below for discussions regarding the segments' net revenue and EBITDA performance and to "—Non-GAAP Metrics" for a discussion of our use of Segment EBITDA, a measure that is not defined under U.S. GAAP.

Our results on a segment basis for the fiscal year ended June 30, 2020 compared to the fiscal year ended June 30, 2019 were as follows:

(Dollars in millions)	Fiscal Year Ended June 30,		FX Impact	Constant Currency Increase/(Decrease)	
	2020	2019		Change \$	Change %
Softgel and Oral Technologies					
Net revenue	\$ 1,062.0	\$ 1,039.2	\$ (21.3)	\$ 44.1	4 %
Segment EBITDA	256.5	236.3	(4.5)	24.7	10 %
Biologics					
Net revenue	1,021.6	573.3	(4.8)	453.1	79 %
Segment EBITDA	237.6	146.9	(0.7)	91.4	62 %
Oral and Specialty Delivery					
Net revenue	675.9	597.7	(5.3)	83.5	14 %
Segment EBITDA	200.8	175.1	(2.3)	28.0	16 %
Clinical Supply Services					
Net revenue	345.0	321.4	(4.5)	28.1	9 %
Segment EBITDA	91.2	84.4	(1.9)	8.7	10 %
Inter-segment revenue elimination	(10.2)	(13.6)	—	3.4	25 %
Unallocated Costs⁽¹⁾	(145.9)	(142.9)	2.2	(5.2)	(4)%
Combined totals					
Net revenue	\$ 3,094.3	\$ 2,518.0	\$ (35.9)	\$ 612.2	24 %
EBITDA from operations	\$ 640.2	\$ 499.8	\$ (7.2)	\$ 147.6	30 %

- (1) Unallocated costs include restructuring and special items, equity-based compensation, impairment charges, certain other corporate-directed costs, and other costs that are not allocated to the segments as follows:

(Dollars in millions)	Fiscal Year Ended June 30,	
	2020	2019
Impairment charges and gain/(loss) on sale of assets	\$ (5.5)	\$ (5.1)
Equity compensation	(48.1)	(33.3)
Restructuring and other special items ^(a)	(42.2)	(57.7)
Other (expense), net ^(b)	(7.9)	(2.7)
Non-allocated corporate costs, net	(42.2)	(44.1)
Total unallocated costs	<u>\$ (145.9)</u>	<u>\$ (142.9)</u>

- (a) Restructuring and other special items include fiscal 2020 transaction and integration costs associated with the acquisitions of Catalent Maryland, the Anagni facility, and MaSTherCell.
- (b) Other (expense), net of \$7.9 million for the fiscal year ended June 30, 2020 was primarily driven by financing charges of \$14.1 million related to (i) a \$6.0 million write-off of previously capitalized financing charges related to Operating Company's recently repaid euro-denominated term loan under its senior secured credit facilities and recently redeemed Euro 2024 Notes and (ii) a \$10.0 million premium on early redemption of the Euro 2024 Notes. This was partially offset by (i) a derivative gain of \$3.2 million arising from the dividend adjustment mechanism of the Series A Preferred Stock and (ii) \$3.0 million of foreign currency gains in the year.

Provided below is a reconciliation of net earnings to EBITDA from operations:

(Dollars in millions)	Fiscal Year Ended June 30,	
	2020	2019
Net earnings	\$ 220.7	\$ 137.4
Depreciation and amortization	253.7	228.6
Interest expense, net	126.1	110.9
Income tax expense	39.7	22.9
EBITDA from operations	<u>\$ 640.2</u>	<u>\$ 499.8</u>

Softgel and Oral Technologies segment

Factors Contributing to Year-Over-Year Change	2020 vs. 2019 Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA without divestitures	8 %	13 %
Impact of divestitures	(4) %	(3) %
Constant currency change	4 %	10 %
Foreign exchange fluctuation	(2) %	(2) %
Total % change	2 %	8 %

Net revenue in our Softgel and Oral Technologies segment increased by \$44.1 million, or 4%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. Net revenue increased 8%, compared to the fiscal year ended June 30, 2019, excluding the impact of divestitures. The increase relates to continued strong demand across our portfolio of prescription products within North America, which is partially attributable to recently launched products. Demand for our portfolio of consumer health products continues, predominantly within Europe.

Softgel and Oral Technologies' Segment EBITDA increased by \$24.7 million, or 10%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. Segment EBITDA increased 13%, compared to the fiscal year ended June 30, 2019, excluding the impact of divestitures. The increase primarily relates to the demand increase across our portfolio of higher-margin, prescription products within North America as well as our consumer health business, in line with the revenue growth within Europe.

In October 2019, we divested a manufacturing site in Australia in the Softgel and Oral Technologies segment in order to better streamline our global operations. The site divestiture resulted in a decrease in net revenue of 4% and Segment EBITDA of 3% in the fiscal year ended June 30, 2020 compared to the fiscal year ended June 30, 2019.

Biologics segment

	2020 vs. 2019	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA without acquisitions	27 %	26 %
Impact of acquisitions	52 %	36 %
Constant currency change	79 %	62 %
Foreign exchange fluctuation	(1) %	(1) %
Total % change	78 %	61 %

Net revenue in our Biologics segment increased by \$453.1 million, or 79%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. Excluding the effect of acquisitions, the net revenue increase was driven primarily by strong end-market demand for our U.S. drug product and U.S. drug substance offerings, with the former being delivered through improved capacity utilization. Additional site readiness activities related to COVID-19 vaccination programs across our gene therapy, U.S. drug product, and U.S. drug substance offerings also contributed towards the net revenue increase. Drug substance growth was partially offset by the fiscal 2019 completion of a limited duration customer contract for non-cell line clinical manufacturing services as well as softening demand for our European drug product offering.

Biologics' Segment EBITDA increased by \$91.4 million, or 62%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. Segment EBITDA, excluding the effect of acquisitions, increased 26% from the corresponding prior-year period, primarily due to increased demand for our U.S. drug product offering as well as site readiness activities related to COVID-19 vaccination programs across our gene therapy, U.S. drug product, and U.S. drug substance offerings. Segment EBITDA growth was partially offset by decreased volume for our U.S. drug substance product offering, predominantly due to the fiscal 2019 completion of a limited duration customer contract for non-cell line clinical manufacturing services and softening demand for our European drug product offering.

Beginning in May 2019, we acquired the assets comprising our gene therapy business, in January 2020, we acquired the Anagni facility, part of which operates within the Biologics segment, and, in February 2020, we acquired MaSTherCell. Together these acquisitions increased net revenue and Segment EBITDA on an inorganic basis in our Biologics segment by 52% and 36%, respectively, in the fiscal year ended June 30, 2020 compared to the corresponding prior-year period.

Oral and Specialty Delivery segment

	2020 vs. 2019	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA without acquisitions	7 %	10 %
Impact of acquisitions	7 %	6 %
Constant currency change	14 %	16 %
Foreign exchange fluctuation	(1) %	(1) %
Total % Change	13 %	15 %

Net revenue in our Oral and Specialty Delivery segment increased by \$83.5 million, or 14%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. Excluding the effect of acquisitions, the increase was principally attributable to new product launches within our respiratory and ophthalmic specialty platform. Strong end-market demand for prescription oral commercial products across North America and Europe also contributed towards the net revenue increase. Revenue growth was partially offset by a prior-year favorable impact of a one-time up-front license fee as well as decreased volume in our respiratory and ophthalmic specialty platform, due to strong prior-year demand, related to an anticipated new product introduction.

Oral and Specialty Delivery's Segment EBITDA increased by \$28.0 million, or 16%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. Segment EBITDA without acquisitions increased 10%, primarily due

to new product launches within our respiratory and ophthalmic specialty platform. Strong end-market demand for higher-margin oral commercial products across North America and Europe also contributed towards the Segment EBITDA increase. EBITDA growth was partially offset by a prior-year favorable impact of a one-time up-front license fee and decreased volume in our respiratory and ophthalmic specialty platform due to strong prior-year demand, related to an anticipated new product introduction.

On an inorganic basis, our Juniper and Anagni facility acquisitions together increased net revenue and Segment EBITDA in our Oral and Specialty Delivery segment by 7% and 6%, respectively, in the fiscal year ended June 30, 2020 compared to the corresponding prior-year period.

Clinical Supply Services segment

	2020 vs. 2019	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net Revenue / Segment EBITDA	9 %	10 %
Constant currency change	9 %	10 %
Foreign exchange fluctuation	(2) %	(2) %
Total % Change	7 %	8 %

Net revenue in our Clinical Supply Services segment increased by \$28.1 million, or 9%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. The increase was driven by strong global demand in our storage and distribution and manufacturing and packaging businesses despite a measured slowdown in the distribution volume in the fourth quarter of fiscal 2020 due to the COVID-19 pandemic.

Clinical Supply Services' Segment EBITDA increased by \$8.7 million, or 10%, compared to the fiscal year ended June 30, 2019, excluding the impact of foreign exchange. The increase was driven by strong global demand in our storage and distribution and manufacturing and packaging businesses despite a measured slowdown in the distribution volume in the fourth quarter of fiscal 2020 due to the COVID-19 pandemic.

Fiscal Year Ended June 30, 2019 Compared to the Fiscal Year Ended June 30, 2018

Management's discussion and analysis of our results of operations for our reporting segments for the fiscal year ended June 30, 2019 compared to the fiscal year ended June 30, 2018 is set forth immediately below, and the remainder of management's discussion and analysis of our results of operations comparing these two fiscal years may be found in the section of our Annual Report on Form 10-K for the fiscal year ended June 30, 2019, filed with the SEC on August 28, 2019, entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations—Fiscal Year Ended June 30, 2019 Compared to the Fiscal Year Ended June 30, 2018," which is hereby incorporated by reference to this Annual Report. As discussed in "Business—Our Reporting Segments" contained elsewhere in this Annual Report, we reorganized our reporting segments in fiscal 2020, and the discussion and analysis for our reporting segments set forth below conform to the current presentation of our reporting segments.

Segment Review

The below charts depict the percentage of net revenue from each of our four reporting segments for the previous two years. Refer below for discussions regarding the segments' net revenue and EBITDA performance and to "—Non-GAAP Metrics" for a discussion of our use of Segment EBITDA, a measure that is not defined under U.S. GAAP.

Our results on a segment basis for the fiscal year ended June 30, 2019 compared to the fiscal year ended June 30, 2018 were as follows:

(Dollars in millions)	Fiscal Year Ended June 30,		FX Impact	Constant Currency Increase/(Decrease)	
	2019	2018		Change \$	Change %
Softgel and Oral Technologies					
Net revenue	\$ 1,039.2	\$ 1,114.5	\$ (36.7)	\$ (38.6)	(4)%
Segment EBITDA	236.3	275.1	(7.6)	(31.2)	(11)%
Biologics					
Net revenue	573.3	437.0	(6.4)	142.7	33 %
Segment EBITDA	146.9	111.1	(1.3)	37.1	33 %
Oral and Specialty Delivery					
Net revenue	597.7	503.3	(7.5)	101.9	20 %
Segment EBITDA	175.1	129.9	(3.4)	48.6	37 %
Clinical Supply Services					
Net revenue	321.4	430.4	(6.3)	(102.7)	(24)%
Segment EBITDA	84.4	76.2	(2.7)	10.9	14 %
Inter-segment revenue elimination	(13.6)	(21.8)	(0.1)	8.3	38 %
Unallocated Costs⁽¹⁾	(142.9)	(138.8)	4.3	(8.4)	(6)%
Combined totals					
Net revenue	\$ 2,518.0	\$ 2,463.4	\$ (57.0)	\$ 111.6	5 %
EBITDA from operations	\$ 499.8	\$ 453.5	\$ (10.8)	\$ 57.1	13 %

- (1) Unallocated costs include restructuring and special items, equity-based compensation, impairment charges, certain other corporate-directed costs, and other costs that are not allocated to the segments as follows:

(Dollars in millions)	Fiscal Year Ended June 30,	
	2019	2018
Impairment charges and gain/(loss) on sale of assets	\$ (5.1)	\$ (8.7)
Equity compensation	(33.3)	(27.2)
Restructuring and other special items ^(a)	(57.7)	(54.4)
Other (expense), net ^(b)	(2.7)	(5.5)
Non-allocated corporate costs, net	(44.1)	(43.0)
Total unallocated costs	\$ (142.9)	\$ (138.8)

- (a) Restructuring and other special items include fiscal 2019 transaction and integration costs associated with the acquisition of Catalent Maryland.
- (b) Other (expense), net of \$2.7 million for the fiscal year ended June 30, 2020 was primarily driven by financing charges of \$15.8 million related to the offering of the USD 2027 Notes, partially offset by (i) a gain of \$12.9 million related to the fair value of the derivative liability arising from the dividend adjustment mechanism of the Series A Preferred Stock and (ii) \$0.5 million of unrealized foreign currency gains in the year.

Provided below is a reconciliation of net earnings to EBITDA from operations:

(Dollars in millions)	Fiscal Year Ended June 30,	
	2019	2018
Net earnings	\$ 137.4	\$ 83.6
Depreciation and amortization	228.6	190.1
Interest expense, net	110.9	111.4
Income tax expense	22.9	68.4
EBITDA from operations	\$ 499.8	\$ 453.5

Softgel and Oral Technologies segment

Factors Contributing to Year-Over-Year Change	2019 vs. 2018	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA without divestitures	(3) %	(11) %
Impact of divestitures	(1) %	— %
Constant currency change	(4) %	(11) %
Foreign exchange fluctuation	(3) %	(3) %
Total % change	(7) %	(14) %

Net revenue in our Softgel and Oral Technologies segment decreased by \$38.6 million, or 4%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. Excluding the impact of divestitures, net revenue decreased by 3%, compared to the fiscal year ended June 30, 2018. The decrease in net revenue without divestitures on a constant-currency basis was primarily driven by lower end-market demand for a key product within our U.S.-based commercial oral technologies solutions platform and a decrease of 1%, across our North America and Latin America consumer health business, resulting from a shortage in ibuprofen active pharmaceutical ingredient supply during the first nine months of fiscal 2019, which was resolved in the fourth fiscal quarter. This was partially offset by volume increases across our consumer health business within Europe.

Softgel and Oral Technologies' Segment EBITDA decreased by \$31.2 million, or 11%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. Excluding the reduction of licensing revenue profit of 1%, Segment EBITDA excluding divestitures decreased 10%. The decrease was primarily driven by lower end-market demand for a key product within our U.S.-based commercial oral technologies solutions platform and a decrease in Segment EBITDA of 2%, across our North America and Latin America consumer health business, resulting from a shortage in ibuprofen active pharmaceutical ingredient supply during the first nine months of fiscal 2019, which was resolved in the fourth fiscal quarter. This was partially offset by volume increases across our consumer health business within Europe.

In December 2017, we divested two manufacturing sites in Asia-Pacific in the Softgel and Oral Technologies segment in order to better streamline our global operations. The site divestitures resulted in a decrease to net revenue of 1% with no impact to Segment EBITDA in the fiscal year ended June 30, 2019 compared to the fiscal year ended June 30, 2018.

Biologics segment

Factors Contributing to Year-Over-Year Change	2019 vs. 2018	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA without acquisitions	9 %	1 %
Impact of acquisitions	24 %	32 %
Constant currency change	33 %	33 %
Foreign exchange fluctuation	(2) %	(1) %
Total % change	31 %	32 %

Net revenue in our Biologics segment increased by \$142.7 million, or 33%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. Excluding the impact of acquisitions, the net revenue increase was driven primarily by increased end-market demand for our drug product offerings, offset slightly by decreased volume demand related to our U.S. drug substance product offering due to the fiscal 2019 completion of a limited duration customer contract for non-cell line clinical manufacturing services.

Biologics' Segment EBITDA increased by \$37.1 million, or 33%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. Segment EBITDA, excluding the impact of acquisitions, increased 1% from the corresponding prior-year period, primarily due to strong U.S drug product demand, partially offset by the fiscal 2019 completion of a limited duration customer contract for non-cell line clinical manufacturing services in our U.S. drug substance platform as well as unfavorable product mix in our European specialty drug product platform.

On an inorganic basis, our Catalent Indiana and Catalent Maryland acquisitions together increased net revenue and Segment EBITDA in our Biologics segment by 24% and 32%, respectively, in the fiscal year ended June 30, 2019 compared to the corresponding prior-year period.

Oral and Specialty Delivery segment

	2019 vs. 2018	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA without acquisitions	8 %	17 %
Impact of acquisitions	12 %	20 %
Constant currency change	20 %	37 %
Foreign exchange fluctuation	(1) %	(2) %
Total % Change	19 %	35 %

Net revenue in our Oral and Specialty Delivery segment increased by \$101.9 million, or 20%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. Excluding the impact of acquisitions, the net revenue increase related to the intake of new molecules within our development and analytical services platform, the completion of a commercially ready process for a key product within our U.S.-based oral delivery solutions platform, and a favorable impact from licensing revenue recorded during the third quarter. The favorable impact of licensing revenue in the third quarter was attributable to a single transaction, which consisted of a grant to a third party of the Company's right to participate in an arrangement that resulted in a stream of revenue over time in exchange for a one-time up-front license fee.

Oral and Specialty Delivery's Segment EBITDA increased by \$48.6 million, or 37%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. Segment EBITDA without acquisitions increased 17%, primarily due to an increase in volume related to the intake of new molecules within our development and analytical services platform, the completion of a commercially ready process for a key product within our U.S.-based oral delivery solutions platform, and a favorable impact from licensing revenue recorded during the third quarter. The favorable impact of licensing revenue in the third quarter was attributable to a single transaction, which consisted of a grant to a third party of the Company's right to participate in an arrangement that resulted in a stream of revenue over time in exchange for a one-time up-front license fee.

On an inorganic basis, our Juniper acquisition increased net revenue and Segment EBITDA in our Oral and Specialty Delivery segment by 12% and 20%, respectively, in the fiscal year ended June 30, 2019 compared to the corresponding prior-year period.

Clinical Supply Services segment

	2019 vs. 2018	
	Fiscal Year Ended June 30,	
	Net Revenue	Segment EBITDA
Net revenue / Segment EBITDA impact prior to accounting for effect of ASC 606 adoption	1 %	14 %
Impact of ASC 606 adoption	(25) %	— %
Constant currency change	(24) %	14 %
Foreign exchange fluctuation	(2) %	(3) %
Total % Change	(26) %	11 %

Net revenue in our Clinical Supply Services segment decreased by \$102.7 million, or 24%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. As a result of the adoption of ASC 606, the Company recorded comparator sourcing arrangements on a net basis versus a gross basis, resulting in a decrease to net revenue of 25%, partially offset by an increase in revenue primarily due to higher comparator sourcing volume, as well as growth within our storage and distribution and manufacturing and packaging businesses.

Clinical Supply Services' Segment EBITDA increased by \$10.9 million, or 14%, compared to the fiscal year ended June 30, 2018, excluding the impact of foreign exchange. The increase was primarily due to a favorable shift within the storage and distribution business, increased growth in project management revenue, and improved capacity utilization across the network based on prior strategic investments.

Liquidity and Capital Resources

Sources and use of Cash

Our principal source of liquidity has been cash flow generated from operations and the net proceeds of capital market activities. The principal uses of cash are to fund operating and capital expenditures, business or asset acquisitions, interest payments on debt, the payment of deferred purchase consideration from the Catalent Indiana acquisition, the payment of the quarterly dividend on the Series A Preferred Stock, and any mandatory or discretionary principal payment on our debt. At the current stated value of the Series A Preferred Stock outstanding as of June 30, 2020, the aggregate amount of each regular quarterly dividend, if paid in cash, is \$8.1 million. As of June 30, 2020, Operating Company had available a \$550.0 million revolving credit facility that matures in May 2024, the capacity of which is reduced by the amount of all outstanding letters of credit issued under the senior secured credit facilities and those short-term borrowings referred to as swing-line borrowings. At June 30, 2020, we had \$6.7 million of outstanding letters of credit and no outstanding borrowing under our revolving credit facility.

We believe that our cash on hand, cash from operations, and available borrowings under our revolving credit facility will be adequate to meet our future liquidity needs for at least the next twelve months, including with respect to payment of our quarterly regular dividend on the Series A Preferred Stock, if paid in cash, and the amounts expected to become due with respect to our pending capital projects. We have no significant maturity under any of our bank or note debt until the USD 2026 Notes mature in January 2026. As of June 30, 2020, we have only two remaining payments of \$50.0 million each, due in October 2020 and 2021, on the deferred purchase consideration for the acquisition of Catalent Indiana.

Cash Flows

Fiscal Year Ended June 30, 2020 Compared to the Fiscal Year Ended June 30, 2019

The following table summarizes our consolidated statements of cash flows from operations for the fiscal year ended June 30, 2020 compared with the fiscal year ended June 30, 2019:

(Dollars in millions)	Fiscal Year Ended June 30,		Change \$
	2020	2019	
Net cash provided by/(used in):			
Operating activities	\$ 440.3	\$ 247.7	\$ 192.6
Investing activities	\$ (827.5)	\$ (1,510.4)	\$ 682.9
Financing activities	\$ 1,001.7	\$ 1,201.4	\$ (199.7)

Operating Activities

For the fiscal year ended June 30, 2020, cash provided by operating activities was \$440.3 million, an increase of \$192.6 million compared to \$247.7 million for the comparable prior-year period. Cash flow from operating activities for the fiscal year ended June 30, 2020 increased primarily due to an increase in operating earnings, which increased from \$273.9 million in fiscal 2019 to \$394.4 million in fiscal 2020.

Investing Activities

For the fiscal year ended June 30, 2020, cash used in investing activities was \$827.5 million compared to \$1,510.4 million during fiscal 2019. Fiscal 2019 cash used in investing activities primarily consists of \$1,291.0 million of payments for business acquisitions, net of cash acquired. Of this amount, \$1,163.5 million was paid for the acquisition of Catalent Maryland in the fourth quarter and the remaining \$127.5 million was paid for the acquisition of Juniper in the first quarter. In fiscal 2020, \$379.7 million of cash was paid for the MaSTherCell and Anagni acquisitions, net of cash acquired. Other uses of cash in investing activities included cash used in acquisitions of property, plant, and equipment, which totaled \$465.8 million in fiscal 2020 compared to \$218.1 million in fiscal 2019.

Financing Activities

For the fiscal year ended June 30, 2020, cash provided by financing activities was \$1,001.7 million, which decreased compared to cash provided by financing activities of \$1,201.4 million during the fiscal year ended June 30, 2019. The fiscal 2019 cash provided by financing activities consists of net proceeds of \$1,447.6 million from borrowings, \$646.3 million of net proceeds from the issuance of shares of our Series A Preferred Stock, and \$445.5 million of net proceeds from the issuance of shares of our Common Stock, partially offset by \$1,290.3 million of payments against long-term obligations. The fiscal 2020 balance primarily consists of €825.0 million (\$909.1 million) aggregate principal amount of Operating Company's 2.375%

Senior Notes due 2028 (the “Euro 2028 Notes”). The cash proceeds from the borrowings was partially offset by repayment in full of the outstanding borrowings under Operating Company's euro-denominated term loans under its senior secured credit facilities, which would otherwise have matured in May 2024, and Euro 2024 Notes, which would otherwise have matured in December 2024. The cash from financing activities during the fiscal year ended June 30, 2020 also includes the net proceeds from two equity offerings that we completed in fiscal 2020. In February 2020 and June 2020, we completed public offerings of our Common Stock (the “February 2020 Equity Offering” and the “June 2020 Equity Offering,” respectively). We sold 8.4 million and 7.7 million shares of Common Stock, respectively, at a price of \$58.58 and \$70.72 per share, respectively, net of underwriting discounts and commissions. The net proceeds from the February 2020 Equity Offering of \$494.2 million were used to repay \$100.0 million of borrowings under Operating Company's revolving credit facility and to fund the consideration for the MaSTherCell acquisition due at its closing, with the remainder available for general corporate purposes. The net proceeds from the June 2020 Equity Offering of \$547.5 million were used to repay \$200.0 million of prophylactic borrowings under Operating Company's revolving credit facility, with the remainder available for general corporate purposes.

Fiscal Year Ended June 30, 2019 Compared to the Fiscal Year Ended June 30, 2018

Management's discussion and analysis of our cash flows for the fiscal year ended June 30, 2019 compared to the fiscal year ended June 30, 2018 may be found in the “Management's Discussion and Analysis of Financial Condition and Results of Operations—Cash Flows—Fiscal Year Ended June 30, 2019 Compared to the Fiscal Year Ended June 30, 2018” section of our Annual Report on Form 10-K for the fiscal year ended June 30, 2019, filed with the SEC on August 27, 2019.

Debt and Financing Arrangements

Senior Secured Credit Facilities and Fourth Amendment

In May 2019, Operating Company completed the Fourth Amendment. As part of the Fourth Amendment, Operating Company borrowed \$950.0 million aggregate principal amount through incremental term B loans (“Incremental Dollar Term B-2 Loans”) and replaced the existing revolving credit commitments of \$200.0 million in its senior secured credit facilities with new revolving credit commitments of \$550.0 million (“Incremental Revolving Credit Commitments”). The Incremental Dollar Term B-2 Loans will mature on May 17, 2026. The Incremental Revolving Credit Commitments constitute revolving credit commitments under the Credit Agreement with the same principal terms as the previously existing revolving credit commitments under the Credit Agreement. The Revolving Credit Facility will mature on May 17, 2024. Under the Credit Agreement, the applicable rate for U.S. dollar-denominated term loans, including the Incremental Dollar Term B-2 Loans is LIBOR (formerly known as the London Interbank Offered Rate, subject to a floor of 1.00%) plus 2.25%. The applicable rate for the Incremental Revolving Credit Commitments is initially LIBOR plus 2.25%, and such rate can additionally be reduced to LIBOR plus 2.00% in future periods based on a measure of Operating Company's total leverage ratio.

In April 2020, we entered into an interest-rate swap agreement with Bank of America N.A. as a hedge against the economic effect of a portion of the variable-interest obligation associated with our U.S dollar-denominated term loans under our senior secured credit facilities, so that the interest payable on that portion of the debt became fixed at a certain rate, thereby reducing the impact of future interest-rate changes on future interest expense. As a result of entering into the interest-rate swap agreement, the floating portion of the applicable rate on \$500.0 million of the term loan is now effectively fixed at 1.26% for a total fixed rate of 3.51%.

U.S. dollar-denominated 4.875% Senior Notes due 2026

In October 2017, Operating Company completed a private offering of the USD 2026 Notes. The USD 2026 Notes are fully and unconditionally guaranteed, jointly and severally, by all of the wholly owned U.S. subsidiaries of Operating Company that guarantee its senior secured credit facilities. The USD 2026 Notes were offered in the United States to qualified institutional buyers in reliance on Rule 144A under the Securities Act and outside the United States only to non-U.S. investors pursuant to Regulation S under the Securities Act. The USD 2026 Notes will mature on January 15, 2026 and bear interest at the rate of 4.875% per annum. Interest is payable semi-annually in arrears on January 15 and July 15 of each year, beginning on July 15, 2018.

U.S. dollar-denominated 5.00% Senior Notes due 2027

In June 2019, Operating Company completed a private offering of the USD 2027 Notes. The USD 2027 Notes are fully and unconditionally guaranteed, jointly and severally, by all of the wholly owned U.S. subsidiaries of Operating Company that guarantee its senior secured credit facilities. The USD 2027 Notes were offered in the United States to qualified institutional buyers in reliance on Rule 144A under the Securities Act and outside the United States only to non-U.S. investors pursuant to Regulation S under the Securities Act. The USD 2027 Notes will mature on July 15, 2027 and bear interest at the rate of 5.00% per annum. Interest is payable semi-annually in arrears on January 15 and July 15 of each year, beginning on January 15, 2020.

Euro-denominated 2.375% Senior Notes due 2028

In March 2020, Operating Company completed a private offering of €825.0 million aggregate principal amount of the Euro 2028 Notes. The Euro 2028 Notes are fully and unconditionally guaranteed, jointly and severally, by all of the wholly owned U.S. subsidiaries of Operating Company that guarantee its senior secured credit facilities. The Euro 2028 Notes were offered in the U.S. to qualified institutional buyers in reliance on Rule 144A under the Securities Act and outside the U.S. only to non-U.S. investors pursuant to Regulation S under the Securities Act. The Euro 2028 Notes will mature on March 1, 2028 and bear interest at the rate of 2.375% per annum. Interest is payable semi-annually in arrears on March 1 and September 1 of each year, beginning on September 1, 2020. The proceeds of the Euro 2028 Notes after payment of the offering fees and expenses were used to repay in full the outstanding borrowings under Operating Company's euro-denominated term loans under its senior secured credit agreement, which would otherwise have matured in May 2024, and Euro 2024 Notes, which would otherwise have matured in December 2024, plus any accrued and unpaid interest thereon, with the remainder available for general corporate purposes.

Deferred Purchase Consideration

Of the \$950.0 million aggregate nominal purchase price for the Catalent Indiana acquisition, \$200.0 million was payable in four annual \$50.0 million installments. The Company made installment payments in October 2018 and 2019. The remainder of the deferred purchase consideration is due in October 2020 and 2021 and is recorded at fair value, with the difference between the remaining nominal amount and the fair value balance deemed to be imputed interest.

Debt Covenants

Senior Secured Credit Facilities

The Credit Agreement contains covenants that, among other things, restrict, subject to certain exceptions, Operating Company's (and Operating Company's restricted subsidiaries') ability to incur additional indebtedness or issue certain preferred shares; create liens on assets; engage in mergers and consolidations; sell assets; pay dividends and distributions or repurchase capital stock; repay subordinated indebtedness; engage in certain transactions with affiliates; make investments, loans, or advances; make certain acquisitions; enter into sale and leaseback transactions; amend material agreements governing Operating Company's subordinated indebtedness; and change Operating Company's lines of business.

The Credit Agreement also contains change-of-control provisions and certain customary affirmative covenants and events of default. The Revolving Credit Facility requires compliance with a net leverage covenant when there is a 30% or more draw outstanding at a period end. As of June 30, 2020, Operating Company was in compliance with all material covenants under the Credit Agreement.

Subject to certain exceptions, the Credit Agreement permits Operating Company and its restricted subsidiaries to incur certain additional indebtedness, including secured indebtedness. None of Operating Company's non-U.S. subsidiaries or Puerto Rico subsidiaries is a guarantor of the loans.

Under the Credit Agreement, Operating Company's ability to engage in certain activities such as incurring certain additional indebtedness, making certain investments, and paying certain dividends is tied to ratios based on Adjusted EBITDA (which is defined as "Consolidated EBITDA" in the Credit Agreement). Adjusted EBITDA is based on the definitions in the Credit Agreement, is not defined under U.S. GAAP, and is subject to important limitations. See "—Non-GAAP Metrics" for further details on Adjusted EBITDA.

The Senior Notes

The Indentures contain certain covenants that, among other things, limit the ability of Operating Company and its restricted subsidiaries to incur or guarantee more debt or issue certain preferred shares; pay dividends on, repurchase, or make distributions in respect of their capital stock or make other restricted payments; make certain investments; sell certain assets; create liens; consolidate, merge, sell; or otherwise dispose of all or substantially all of their assets; enter into certain transactions with their affiliates, and designate their subsidiaries as unrestricted subsidiaries. These covenants are subject to a number of exceptions, limitations, and qualifications as set forth in the Indentures. The Indentures also contain customary events of default including, but not limited to, nonpayment, breach of covenants, and payment or acceleration defaults in certain other indebtedness of Operating Company or certain of its subsidiaries. Upon an event of default, either the holders of at least 30% in principal amount of each of the then-outstanding Senior Notes, or the applicable Trustee under the Indentures, may declare the applicable Senior Notes immediately due and payable; or in certain circumstances, the applicable Senior Notes will become automatically immediately due and payable. As of June 30, 2020, Operating Company was in compliance with all material covenants under the Indentures.

Liquidity in Foreign Subsidiaries

As of June 30, 2020, and June 30, 2019, the amounts of cash and cash equivalents held by foreign subsidiaries were \$228.0 million and \$203.9 million, respectively, out of the total consolidated cash and cash equivalents of \$953.2 million and \$345.4 million, respectively. These balances are dispersed across many international locations around the world.

Adjusted EBITDA and Adjusted Net Income per share

The below tables summarize our fiscal 2020 and 2019 results with respect to certain financial metrics we use to measure performance throughout the fiscal year. Refer to “Non-GAAP Metrics” for further details regarding Adjusted EBITDA and Adjusted Net income per share.

A reconciliation between Adjusted EBITDA and net earnings, the most directly comparable measure under U.S. GAAP, which also shows the adjustments from EBITDA from operations, follows:

(In millions)	Fiscal Year Ended	
	June 30, 2020	June 30, 2019
Net earnings	\$ 220.7	\$ 137.4
Interest expense, net	126.1	110.9
Income tax expense ⁽¹⁾	39.7	22.9
Depreciation and amortization	253.7	228.6
EBITDA from operations	640.2	499.8
Equity compensation	48.1	33.3
Impairment charges and loss on sale of assets	5.5	5.1
Financing-related expenses and other	16.3	15.9
Restructuring and other	5.5	14.1
Acquisition, integration, and other special items	36.7	43.6
Foreign exchange loss (included in other, net) ⁽²⁾	1.5	0.5
Other adjustments ⁽³⁾	(2.9)	(12.7)
Adjusted EBITDA	\$ 750.9	\$ 599.6
FX impact (unfavorable)	\$ (10.2)	
Adjusted EBITDA - constant currency	\$ 761.1	

(1) Represents the amount of income tax-related expense recorded within our net earnings/(loss) that may not result in cash payment or receipt.

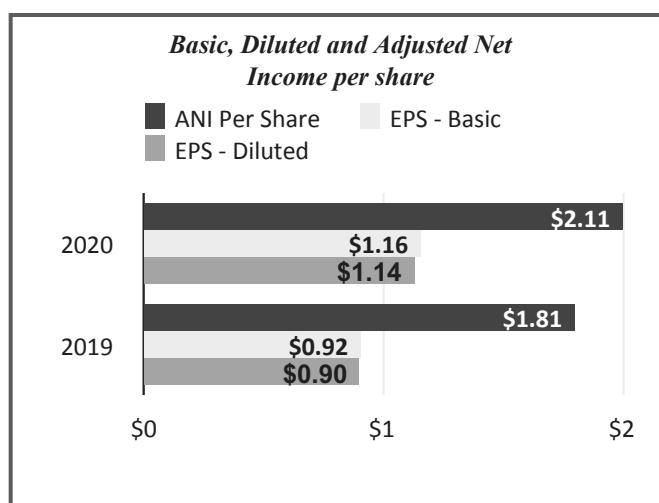

(2) Foreign exchange loss of \$1.5 million for the fiscal year ended June 30, 2020 includes: (a) \$5.2 million of unrealized losses related to foreign trade receivables and payables, (b) \$6.1 million of unrealized gains on the unhedged portion of the euro-denominated debt, and (c) \$4.9 million of unrealized losses on inter-company loans. The foreign exchange adjustment was also affected by the exclusion of realized foreign currency exchange rate

gains from the settlement of inter-company loans of \$2.8 million. Inter-company loans are between our subsidiaries and do not reflect the ongoing results of our trade operations.

Foreign exchange loss of \$0.5 million for the fiscal year ended June 30, 2019 includes: (a) \$5.4 million of unrealized gains related to foreign trade receivables and payables, (b) \$3.4 million of unrealized losses on the unhedged portion of the euro-denominated debt, and (c) \$17.9 million of unrealized losses on inter-company loans. The foreign exchange adjustment was also affected by the exclusion of realized foreign currency exchange rate gains from the settlement of inter-company loans of \$21.5 million. Inter-company loans are between our subsidiaries and do not reflect the ongoing results of our trade operations.

- (3) Represents primarily the gain recorded on the change in the estimated fair value of the derivative liability from issuance through June 30, 2020.

A reconciliation between Adjusted Net Income and net earnings, the most directly comparable measure under U.S. GAAP, follows. The table also provides a calculation of Adjusted Net Income per each basic share and each diluted share.

(In millions, except per share data)	Fiscal Year Ended	
	June 30, 2020	June 30, 2019
Net earnings	\$ 220.7	\$ 137.4
Operating earnings, net of tax	220.7	137.4
Amortization ⁽¹⁾	88.8	88.2
Equity compensation	48.1	33.3
Impairment charges and loss on sale of assets	5.5	5.1
Financing-related expenses	16.3	15.9
Restructuring and other	5.5	14.1
Acquisition, integration, and other special items	36.7	43.6
Foreign exchange loss/(gain) (included in other, net) ⁽²⁾	1.4	0.5
Other adjustments	(2.9)	(12.7)
Estimated tax effect of adjustments ⁽³⁾	(47.3)	(42.5)
Discrete income tax (benefit)/expense items ⁽⁴⁾	(23.0)	(14.5)
Tax law changes provision	—	(3.5)
Adjusted net income (ANI)	\$ 349.8	\$ 264.9
Weighted average shares outstanding	149.8	144.2
Weighted average diluted shares outstanding ⁽⁵⁾	165.4	146.0
ANI per share:		
ANI per basic share	\$ 2.34	\$ 1.84
ANI per diluted share	\$ 2.11	\$ 1.81

(1) Represents the amortization attributable to purchase accounting for previously completed business combinations.

(2) Foreign exchange gain of \$1.5 million for the fiscal year ended June 30, 2020 includes: (a) \$5.2 million of unrealized losses related to foreign trade receivables and payables, (b) \$5.8 million of unrealized gains on the unhedged portion of the euro-denominated debt, and (c) \$4.9 million of unrealized losses on inter-company loans. The foreign exchange adjustment was also affected by the exclusion of realized foreign currency exchange rate gains from the settlement of inter-company loans of \$2.8 million. Inter-company loans are between our subsidiaries and do not reflect the ongoing results of our trade operations.

Foreign exchange loss for the fiscal year ended June 30, 2019 includes: (a) \$5.4 million of unrealized gains related to foreign trade receivables and payables, (b) \$3.4 million of unrealized losses on the unhedged portion of the euro-denominated debt, and (c) \$17.9 million of unrealized losses on inter-company loans. The foreign exchange adjustment was also affected by the exclusion of realized foreign currency exchange rate losses from the settlement of inter-company loans of \$21.5 million. Inter-company loans are between our subsidiaries and do not reflect the ongoing results of our trade operations.

- (3) We computed the tax effect of adjustments to Adjusted Net Income by applying the statutory tax rate in the jurisdictions to the income or expense items that are adjusted in the period presented; if a valuation allowance exists, the rate applied is zero.
- (4) Discrete period income tax expense/(benefit) items are unusual or infrequently occurring items primarily including: changes in judgment related to the realizability of deferred tax assets in future years, changes in measurement of a prior year tax position, deferred tax impact of changes in tax law, and purchase accounting.
- (5) Weighted average diluted shares outstanding for the fiscal year ended June 30, 2020 reflects the effect of approximately 13.1 million "if-converted" shares of Common Stock potentially issuable upon conversion of the Series A Preferred Stock.

Interest Rate Risk Management

A portion of the debt used to finance our operations is exposed to interest-rate fluctuations. We may use various hedging strategies and derivative financial instruments to create an appropriate mix of fixed-and floating-rate assets and liabilities. In April 2020, we entered into an interest-rate swap agreement with Bank of America N.A. as a hedge against the economic effect of a portion of the variable-interest obligation associated with our U.S dollar-denominated term loans under our senior secured credit facilities, so that the interest payable on that portion of the debt became fixed at a certain rate, thereby reducing the impact of future interest-rate changes on future interest expense. The applicable rate for the U.S. dollar-denominated term loan is LIBOR (subject to a floor of 1.00%) plus 2.25%; however, as a result of entering into the interest-rate swap agreement, the floating portion of the applicable rate on \$500.0 million of the term loan is now effectively fixed at 1.26% for a total fixed rate of 3.51%.

Currency Risk Management

We are exposed to fluctuations in the euro-U.S. dollar exchange rate on our investments in our foreign operations in Europe. While we do not actively hedge against changes in foreign currency, we have mitigated the exposure of our investments in our European operations by denominating a portion of our debt in euros. At June 30, 2020, we had \$909.9 million of euro-denominated debt outstanding that qualifies as a hedge of a net investment in foreign operations. Refer to Note 9 to our Consolidated Financial Statements for further discussion of net investment hedge activity in the period.

From time to time, we may use forward currency exchange contracts to manage our exposure to the variability of cash flows primarily related to the foreign exchange rate changes of future foreign currency transaction costs. In addition, we may use foreign currency forward contracts to protect the value of existing foreign currency assets and liabilities. Currently, we do not use foreign currency exchange contracts. We expect to continue to evaluate hedging opportunities for foreign currency in the future.

Contractual Obligations

The following table summarizes our significant contractual obligations as of June 30, 2020:

(Dollars in millions) ⁽¹⁾	Total	Fiscal 2021	Fiscal 2022 - Fiscal 2023	Fiscal 2024 - Fiscal 2025	Thereafter
Long-term debt obligations ⁽²⁾	\$ 2,912.4	\$ 58.3	\$ 68.9	\$ 19.0	\$ 2,766.2
Interest on long-term obligations ⁽³⁾	744.6	114.3	221.5	216.6	192.2
Finance lease obligations ⁽⁴⁾	142.2	13.1	22.7	19.3	87.1
Operating lease obligations ⁽⁵⁾	140.1	18.1	34.3	23.3	64.4
Purchase obligations ⁽⁶⁾	135.5	98.1	27.6	9.7	0.1
Other long-term liabilities ⁽⁷⁾	112.6	9.9	28.6	17.1	57.0
Total	\$ 4,187.4	\$ 311.8	\$ 403.6	\$ 305.0	\$ 3,167.0

- (1) Estimated future payments with respect to our obligations and other liabilities denominated in a currency other than the U.S. dollar were calculated using the currency exchange rates in effect as of June 30, 2020.
- (2) Represents gross maturities of our long-term debt obligations, excluding finance lease obligations as of June 30, 2020.
- (3) Represents estimated interest payments relating to our long-term obligations, including our finance lease obligations. Estimated future interest payments on our variable-rate debt obligations were calculated using the interest rates in effect as of June 30, 2020.
- (4) Represents maturities of our finance lease obligations included within long-term debt as of June 30, 2020.
- (5) Represents minimum rental payments for operating leases having initial or remaining non-cancelable lease terms.
- (6) Purchase obligations include agreements to purchase goods or services that are enforceable and specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum, or variable price provisions; and approximate timing of the transaction. Purchase obligations disclosed above may include estimates of the period in which cash outflows will occur. Purchase orders entered into in the normal course of business and authorizations to purchase that involve no firm commitment from either party are excluded from the above table. In addition, contracts that can be unilaterally canceled with no termination fee or with proper notice are excluded from our total purchase obligations except for the amount of the termination fee or the minimum amount of goods that must be purchased during the requisite notice period.
- (7) Primarily relates to certain long-term employee-related liabilities for operations under programs that we have discontinued.

The table excludes our retirement and other post-employment benefits (“OPEB”) obligations. The timing and amount of payments for these obligations may be affected by a number of factors, including the funded status of the plans. In fiscal 2021, we are not required to make contributions to our plans to satisfy regulatory funding standards. Beyond fiscal 2021, the actual amounts required to be contributed are dependent upon, among other things, interest rates, underlying asset returns, and the impact of legislative or regulatory actions related to pension funding obligations. Payments due under our OPEB plans are not required to be funded in advance but are generally paid as medical costs are incurred by covered retiree populations and principally depend on the future cost of retiree medical benefits under our plans. Refer to Note 11 to the Consolidated Financial Statements for further discussion.

The table also excludes \$24.7 million of funded deferred compensation payments owed as of June 30, 2020 to certain employees participating in our deferred compensation plan. The timing and amount of payments for these obligations depend on participant-directed distributions, withdrawals, and status. As part of the deferred compensation plan, we have a corresponding \$23.4 million of deferred compensation investments as of June 30, 2020, which will be used to fund future obligations to the participants.

Off-Balance Sheet Arrangements

Other than short-term operating leases and outstanding letters of credit as discussed above, we do not have any material off-balance sheet arrangement as of June 30, 2020. See Note 7 to the Consolidated Financial Statements for further detail.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to cash flow and earnings fluctuations as a result of certain market risks. These market risks primarily relate to changes in interest rates associated with our long-term debt obligations and foreign exchange rate changes.

Interest Rate Risk

We have historically used interest-rate swaps to manage the economic effect of variable-rate interest obligations associated with our floating-rate term loans so that the interest payable on the term loans effectively becomes fixed at a certain rate, thereby reducing the impact of future interest-rate changes on our future interest expense.

In April 2020, we entered into an interest-rate swap agreement with Bank of America N.A. as a hedge against the economic effect of a portion of the variable-interest obligation associated with our U.S dollar-denominated term loans under our senior secured credit facilities, so that the interest payable on that portion of the debt becomes fixed at a certain rate, thereby reducing the impact of future interest-rate changes on future interest expense. The applicable rate for the U.S. dollar-denominated term loan is LIBOR (subject to a floor of 1.00%) plus 2.25%; however, as a result of entering into the interest-rate swap agreement, the floating portion of the applicable rate on \$500.0 million of the term loan is now effectively fixed at 1.26%, for a total fixed rate of 3.51%.

Foreign Currency Exchange Risk

By the nature of our global operations, we are exposed to cash flow and earnings fluctuations resulting from foreign exchange-rate variation. These exposures are transactional and translational in nature. Since we manufacture and sell our products throughout the world, our foreign-currency risk is diversified. Principal drivers of this diversified foreign-exchange exposure include the European euro, British pound, Argentinean peso, and Brazilian real. Our transactional exposure arises from the purchase and sale of goods and services in currencies other than the functional currency of our operational units. We also have exposure related to the translation of financial statements of our foreign divisions into U.S. dollars, our functional currency. The financial statements of our operations outside the U.S. are measured using the local currency as the functional currency, except in Argentina, a hyper-inflationary economy, where our results are measured in U.S. dollars. Adjustments to translate the assets and liabilities of these foreign operations in U.S. dollars are accumulated as a component of other comprehensive income/(loss) utilizing period-end exchange rates. Foreign-currency transaction gains and losses calculated by utilizing weighted average exchange rates for the period are included in the statements of operations in other (income)/expense, net. Such foreign currency transaction gains and losses include inter-company loans denominated in non-U.S. dollar currencies.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

INDEX TO FINANCIAL STATEMENTS

Consolidated Financial Statements as of June 30, 2020 and 2019 and for the years ended June 30, 2020, 2019 and 2018

Reports of Independent Registered Public Accounting Firm	67
Consolidated Balance Sheets	70
Consolidated Statements of Operations	71
Consolidated Statements of Comprehensive Income/(Loss)	72
Consolidated Statement of Changes in Shareholders' Equity/(Deficit)	73
Consolidated Statements of Cash Flows	75
Notes to Consolidated Financial Statements	75

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Catalent, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Catalent, Inc. and subsidiaries (the Company) as of June 30, 2020 and 2019, the related consolidated statements of operations, comprehensive income/(loss), changes in shareholders' equity/(deficit) and cash flows for each of the three years in the period ended June 30, 2020, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2) (collectively referred to as the "Consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at June 30, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended June 30, 2020, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of June 30, 2020, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated August 31, 2020 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee of the Company's Board of Directors and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Measurement of uncertain tax positions

Description of the Matter

As discussed in Note 10 to the Consolidated Financial Statements, the Company recorded income tax expense related to US and non-US tax paying jurisdictions totaling \$39.7 million for the year ended June 30, 2020 and a liability for unrecognized tax benefits totaling \$4.4 million at June 30, 2020. The Company's accounting for income taxes involves the application of complex tax regulations in each of the international tax paying jurisdictions in which it operates. The determination of income subject to income tax in each tax paying jurisdiction requires management to apply transfer pricing guidelines for certain intercompany transactions related to certain European countries and make assumptions and estimates about the value of transactions when allocating income and deductions between consolidated entities in different tax paying jurisdictions. The estimates and assumptions used in these allocations can result in uncertainty in the measured tax benefit.

Auditing the completeness and measurement of the liability for recognized tax benefits related to certain intercompany transactions was complex because the assumptions are based on the interpretation of tax laws and legal rulings in multiple tax paying jurisdictions and require significant judgment in determining whether a tax position's technical merits are more-likely-than-not to be sustained and measuring the amount of tax benefit that qualifies for recognition.

How We Addressed the Matter in Our Audit We tested controls over the process to assess the technical merits of tax positions related to certain intercompany transactions, as well as management’s process to measure the benefit of those tax positions, including controls over the completeness and accuracy of the underlying data. For example, we tested controls over management’s review of the evaluation of matters identified by and discussed with various tax authorities.

Our audit procedures with respect to the calculation of the liability for unrecognized tax benefits involved an assessment of the technical merits of the Company’s tax positions performed with the assistance of tax subject matter professionals with knowledge of and experience with the application of international and local income tax laws by the relevant income tax authorities. These procedures also included, among others, evaluating third-party advice obtained by the Company and making inquiries of its external tax advisers. We also evaluated the Company’s significant assumptions and the completeness and accuracy of the data used to determine the amount of tax benefits recognized and tested the accuracy of such calculations.

Fair value of derivative liability

Description of the Matter During May 2019, the Company entered into an equity commitment and investment agreement for the issuance and sale of 650,000 shares of Catalent’s Series A Preferred Stock for an aggregate purchase price of \$650.0 million. As discussed in Note 9 to the Consolidated Financial Statements, the Series A Preferred Stock included a dividend adjustment feature that met the definition of a derivative for accounting purposes. The dividend adjustment feature was bifurcated from the Series A Preferred Stock and recorded separately as a derivative liability and has a \$23.6 million balance as of June 30, 2020.

Auditing the Company’s valuation of this derivative was challenging as the Company uses complex valuation methodologies that incorporate significant assumptions which include the discount rate and forecasted volatility of the Company’s common stock price. The valuation includes assumptions about economic and market conditions with uncertain future outcomes.

How We Addressed the Matter in Our Audit We tested controls over the risks of material misstatement relating to the valuation of the derivative liability. For example, we tested controls over management’s review of the valuation models, the underlying assumptions used in the model and the related accounting conclusions.

To test the valuation of the derivative liability, our audit procedures included, among others, evaluating the methodologies used in the valuation model and testing the significant assumptions. For example, we compared the discount rate that was adjusted for the Company’s credit risk to the interest rates on comparable debt instruments, and we compared the forecasted volatility of the Company’s common stock price to its historical volatility. We also assessed the completeness and accuracy of the underlying data. We involved our internal valuation specialists to assist in our evaluation of the significant assumptions and methodologies used by the Company. We have also evaluated the Company’s financial statement disclosures related to these matters included in Note 9 to the Consolidated Financial Statements.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Catalent, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Catalent, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2020, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Catalent, Inc. (and subsidiaries) (the Company) maintained, in all material respects, effective internal control over financial reporting as of June 30, 2020, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of June 30, 2020 and 2019, the related consolidated statements of operations, comprehensive income/(loss), changes in shareholders' equity/(deficit) and cash flows for each of the three years in the period ended June 30, 2020, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2) and our report dated August 31, 2020 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Catalent, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business

Catalent, Inc. (“Catalent” or the “Company”) directly and wholly owns PTS Intermediate Holdings LLC (“Intermediate Holdings”). Intermediate Holdings directly and wholly owns Catalent Pharma Solutions, Inc. (“Operating Company”). The financial results of Catalent are primarily comprised of the financial results of Operating Company and its subsidiaries on a consolidated basis.

On July 31, 2014, the Company commenced an initial public offering (the “IPO”) of its common stock, par value \$0.01 (the “Common Stock”), in which it sold a total of 48.9 million shares at a price of \$20.50 per share, before underwriting discounts and commissions. The Common Stock began trading on the New York Stock Exchange (the “NYSE”) under the symbol “CTLT” as of the IPO.

The Company is the leading global provider of advanced delivery technologies and development solutions for drugs; protein, cell, and gene therapy biologics; and consumer health products. Its oral, injectable, cell and gene therapy, and respiratory delivery technologies address the full diversity of the pharmaceutical industry, including small molecules; protein, cell, and gene therapy biologics; and consumer health products. Through its extensive capabilities and deep expertise in product development, it helps its customers take products to market faster, including nearly half of new drug products approved by the U.S. Food and Drug Administration (the “FDA”) in the last decade. Its advanced delivery technology platforms, which include those in our Softgel and Oral Technologies, Biologics, and Oral and Specialty Delivery segments, its proven formulation, manufacturing, and regulatory expertise, and its broad and deep intellectual property enable its customers to develop more products and better treatments for patients and consumers. Across both development and delivery, its commitment to reliably supply its customers’ and their patients’ needs is the foundation for the value it provides; annually, it produces approximately 73 billion doses for nearly 7,000 customer products, or approximately 1 in every 20 doses of such products taken each year by patients and consumers around the world. The Company believes that through its investments in growth-enabling capacity and capabilities, its ongoing focus on operational and quality excellence, the sales of existing and introduction of new customer products, its innovation activities and patents, and its entry into new markets, it will continue to benefit from attractive and differentiated margins and realize the growth potential from these areas.

Reporting Segments

In fiscal 2020, the Company engaged in a business reorganization to better align its internal business unit structure with its “Follow the Molecule” strategy and the increased focus on its biologics-related offerings. Under the revised structure, the Company changed the components of three of its four operating segments:

- Softgel and Oral Technologies, which includes formulation, development, and clinical and commercial manufacturing of soft capsules, or “softgels”, as well as large-scale manufacturing of oral solid dose forms, for pharmaceutical and consumer health markets, and supporting ancillary services; and
- Biologics, which encompasses biologic cell-line, cell therapy and viral vector gene therapy development and manufacturing; formulation, development, and manufacturing for parenteral dose forms, including pre-filled syringes, vials, and cartridges; and analytical development and testing services for large molecules; and
- Oral and Specialty Delivery, which includes formulation, development, and small-to-medium scale manufacturing for most types of oral solid dose forms, including Zydis orally dissolving tablets; formulation, development, and manufacture of blow-fill-seal unit doses, metered dose inhalers and nasal products; and analytical development and testing capabilities for small molecules.

Each of these three segments, along with the Company's fourth segment, Clinical Supply Services, which remains unchanged, reports through a separate management team and ultimately reports to the Company's Chief Executive Officer, who is designated as the Chief Operating Decision Maker (“CODM”) for segment reporting purposes. The Company's operating segments are the same as its reporting segments. All prior-period comparative segment information has been restated to reflect the current reportable segments in accordance with Accounting Standards Codification (“ASC”) 280, *Segment Reporting*, promulgated by the Financial Accounting Standards Board (the “FASB”).

Softgel and Oral Technologies

Through its Softgel and Oral Technologies segment, the Company provides formulation, development, and manufacturing services for soft capsules, or “softgels,” as well as large-scale manufacturing of oral solid dose forms for pharmaceutical and

consumer health markets and supporting ancillary services. Catalent's softgel technology was first commercialized by its predecessor in the 1930s, and it has continually enhanced the platform since then. The segment is the market leader in overall softgel development and manufacturing and holds the leading market position in innovator drug softgels. Its principal softgel technologies include traditional softgel capsules, in which the shell is made of animal-derived gelatin, and Vegicaps and OptiShell capsules, in which the shell is made from plant-derived materials. Softgel capsules are used in a broad range of customer products, including prescription drugs, over-the-counter medications, dietary supplements, unit-dose cosmetics, and animal health medicinal preparations. Softgel capsules encapsulate liquid, paste, or oil-based formulations of active compounds in solution or suspension within an outer shell. In the manufacturing process, the capsules are formed, filled, and sealed simultaneously. The segment typically performs encapsulation for a product within one of its softgel facilities, with active ingredients provided by customers or sourced directly by the Company. Softgels have historically been used to solve formulation challenges or technical issues for a specific drug, to help improve the clinical performance of compounds, to provide important market differentiation, particularly for over-the-counter medications, and to provide safe handling of hormonal, highly potent, and cytotoxic drugs. The segment also participates in the softgel vitamin, mineral, and supplement business in selected regions around the world. With the 2001 introduction of the Company's plant-derived softgel shell, Vegicaps capsules, consumer health customers have been able to extend the softgel dose form to a broader range of active ingredients and serve patient/consumer populations that were previously inaccessible due to religious, dietary, or cultural preferences. In recent years, the segment extended this platform to pharmaceutical products via its OptiShell capsule offering. Its Vegicaps and OptiShell capsules are protected by patents in most major global markets. Physician and patient studies it has conducted have demonstrated a preference for softgels versus traditional tablet and hard capsule dose forms in terms of ease of swallowing, real or perceived speed of delivery, ability to remove or eliminate unpleasant odor or taste, and, for physicians, perceived improved patient adherence with dosing regimens.

Its large-scale manufacturing under current good manufacturing practices ("cGMP") of oral solid dose forms typically includes late-stage clinical trial supplies, registration batches, and commercial production across a broad range of formats, and may also involve advanced processing of intermediates to achieve the desired clinical performance of the prescription or over-the-counter pharmaceutical product. Finished dose forms include traditional and advanced complex oral solid-doses, including coated and uncoated tablets, pellet/bead/powder-filled two-piece hard capsules, granulated powders, and other immediate and modified release forms. Advanced intermediate processing may include coating, extrusion, or spheronization to achieve specific functional outcomes, including site or time-specific drug release, taste masking, or enhanced bioavailability. The Company has deep experience at managing complex technical transfers of clinical or commercial programs, whether from Catalent's early development network in the Oral and Specialty Delivery segment, other contract development sites, or from customers directly.

Representative customers of Softgel and Oral Technologies include Pfizer, Novartis, Bayer, GlaxoSmithKline, and Procter & Gamble.

Biologics

The Company's Biologics segment provides biologic cell-line, cell therapy and viral vector gene therapy development and manufacturing; formulation, development, and manufacturing for parenteral dose forms, including prefilled syringes, vials, and cartridges; and analytical development and testing services for large molecules. The segment has extensive expertise in development, scale up and commercial manufacturing. Representative customers of Biologics include Eli Lilly, Teva, Mylan, Roche, AstraZeneca, Novartis, Sarepta, and Genentech, along with multiple innovative small and mid-tier pharmaceutical and biologics customers.

The Company's growing biologics offering includes cell-line development based on its advanced and patented GPEx technology and the recently launched GPEx Boost, which are used to develop stable, high-yielding mammalian cell lines for both innovator and biosimilar biologic compounds. GPEx technology can provide rapid cell-line development, high biologics production yields, flexibility, and versatility. Its development and manufacturing facility in Madison, Wisconsin has the capability and capacity to produce cGMP quality biologics drug substance from 250L to 4000L scale using single-use technology to provide maximum efficiency and flexibility. Its fiscal 2018 acquisition of Cook Pharmica, LLC (now known as Catalent Indiana LLC, "Catalent Indiana") added capabilities across biologics development, clinical, and commercial drug substance manufacturing, formulation, finished-dose drug product manufacturing, and packaging. It has continued to expand production capacity, including a fourth drug substance suite in its Madison, Wisconsin facility and expanded drug product manufacturing and packaging capacity in its Bloomington, Indiana facility. Its SMARTag next-generation antibody-drug conjugate ("ADC") technology enables development of ADCs and other protein conjugates with improved efficacy, safety, and manufacturability.

From May 2019 through July 2019, the Company acquired Catalent Maryland, Inc. (formerly Paragon Bioservices, Inc., "Paragon") and other gene therapy development and manufacturing assets. The segment's gene therapy platform develops and manufactures products based on transformative technologies, including gene therapies based on adeno-associated viruses

("AAV") and other modalities, next-generation vaccines, oncology immunotherapies (oncolytic viruses and CAR-T cell therapies), therapeutic proteins, and other complex biologics. Its specialized expertise in AAV vectors, the most commonly used delivery system for gene therapy, as well as capabilities in plasmids and lentivirus vectors manufactured using cGMP, positions the segment to capitalize on strong industry tailwinds in the market for gene therapies. In February 2020, the Company acquired Masthercell Global Inc. ("MaSTherCell"), which allows the segment to provide substantial expertise and expanding capacity for the development and manufacture of autologous and allogeneic cell therapies for customers, as well as a variety of related analytical services. Additional information with respect to the Company's acquisitions is contained in Note 3, *Business Combinations*.

The segment's range of injectable manufacturing offerings includes manufacturing drug substance and filling small molecules or biologics into syringes, cartridges, and vials, with flexibility to accommodate other formats within the segment's existing network. Its fill and finish services are increasingly focused on complex pharmaceuticals and biologics. With the segment's range of technologies, it is able to meet a wide range of specifications, timelines, and budgets. The Company believes that the complexity of the manufacturing process, the importance of experience and know-how, regulatory compliance, and high start-up capital requirements provide the Biologics segment with a meaningful competitive advantage in the market.

The Biologics segment also offers bioanalytical development and testing services for large molecules, including cGMP release and stability testing. In fiscal 2019, the Company launched OneBio Suite, which provides customers the potential to seamlessly integrate drug substance, drug product, and clinical supply management for products in development, and for integrated commercial supply across both drug substance and drug product. The Biologics segment provides the broadest range of technologies and services supporting the development and launch of new biologic entities, biosimilars, and biobetters to bring a product from gene to commercialization, faster.

Oral and Specialty Delivery

The Company's Oral and Specialty Delivery segment provides advanced formulation development and manufacturing across a range of technologies along with integrated downstream clinical development and commercial supply solutions. The technologies cover a broad range of oral (including our proprietary fast-dissolve Zydis tablets and many bioavailability enhancement (BAE) technologies for both immediate and controlled-release tablets and capsules), respiratory and inhaled dose forms (including blow-fill-seal, metered dose inhalers, dry powder inhalers and nasal applicators). Representative customers of Oral and Specialty Delivery include Johnson & Johnson, Pfizer, Bayer, Perrigo, Roche, and Genentech but also many small and mid-sized companies involved in the clinical development space.

The segment provides comprehensive pre-clinical screening, formulation, analytical development, and cGMP manufacturing at both clinical and commercial scale for both traditional and advanced complex oral solid-dose formats. It has substantial proven experience in developing and scaling up orphan and rare disease oral products, especially those requiring accelerated development timelines, solubility enhancement, specialized handling (*e.g.*, potent or controlled substance materials), complex technology transfer and specialized manufacturing processes. It provides spray drying, hot melt extrusion, micronization, and lipid formulation capabilities, all of which may enhance a drug's bioavailability and clinical performance. It offers comprehensive analytical method development and scientific capabilities, including stability testing, and global regulatory filing services to support integrated development programs or standalone fee-for-service work. In recent years, the segment has expanded its network of clinical development sites focused on earlier phase compounds (*i.e.*, pre-clinical and Phase I) to engage with more customer molecules earlier, with the intent to also support these molecules downstream as they progress towards commercial approval. Demand for its offerings is driven by the need for scientific expertise, the depth and breadth of integrated services offered, as well as the reliability of our supply performance across quality and operational parameters.

The Company launched its orally dissolving tablet business in 1986 with the introduction of Zydis, a unique proprietary freeze-dried tablet that dissolves in the mouth, without water, in typically less than three seconds. The platform is often used for drugs that benefit from rapid oral dissolution and buccal absorption and for drugs for specialized patient groups, including geriatric or pediatric populations, that have difficulty swallowing (dysphagia). The segment can adapt the Zydis technology to a wide range of molecules and indications, including prescription treatments for a variety of central nervous system-related conditions such as migraine, Parkinson's disease, and schizophrenia, and also for a range of consumer healthcare products targeting broader indications such as pain or allergy relief. It continues to invest in and develop Zydis orally dissolving tablets in different ways with its customers as it extends the application of the technology to new therapeutic categories, including immunotherapy, vaccines and biologic molecule delivery.

The segment's respiratory platform provides integrated molecule screening, formulation development, and commercial manufacturing services for inhaled products delivered via metered dose inhalers, dry powder inhalers, and intra-nasal sprays. Delivery of these inhaled combination device products requires specialized capabilities to account for both the molecule and the device, to ensure accurate repeatable dose delivery.

Its blow-fill-seal platform provides an advanced aseptic processing technology, which uses a continuous process to form, fill with drug or biologic, and seal a plastic container in a sterile environment. Blow-fill-seal units are currently used for a variety of pharmaceuticals in liquid form, such as nebulized respiratory, ophthalmic, and otic products. The segment offers significant manufacturing capacity and flexibility in dose form design and provide development and scalable solutions for unit-dose delivery of complex formulations such as suspensions and emulsions, for both small and large molecules.

Clinical Supply Services

The Company's Clinical Supply Services segment provides manufacturing, packaging, storage, distribution, and inventory management for drugs and biologics in clinical trials. It offers customers flexible solutions for clinical supplies production and provide distribution and inventory management support for both simple and complex clinical trials. This includes over-encapsulation where needed; supplying placebos, comparator drug procurement, and clinical packages and kits for physicians and patients; inventory management; investigator kit ordering and fulfillment; and return supply reconciliation and reporting. It supports trials in all regions of the world through our facilities and distribution network. In recent years, it has continued to expand and extend our network, with significant expansions in Kansas City, Missouri and Singapore and new facilities in China and, effective July 2020, in Japan. The segment is the leading provider of integrated development solutions and one of the leading providers of clinical trial supplies. Representative customers of Clinical Supply Services include Merck KGaA, IQVIA, Eli Lilly, AbbVie, and Incyte Corporation.

Basis of Presentation

These financial statements include all of the Company's subsidiaries, including those operating outside the United States ("U.S.") and are prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP"). All significant transactions among the Company's businesses have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates include, but are not limited to, allowance for doubtful accounts, inventory and long-lived asset valuation, goodwill and other intangible asset valuation and impairment, equity-based compensation, income taxes, derivative valuation, and pension plan asset and liability valuation. Actual amounts may differ from these estimated amounts.

Reclassification

Certain prior-period amounts were reclassified to conform to the current period presentation. Contract assets previously presented in trade receivables, net are now presented in prepaid expenses and other, which amounts are further detailed in Note 19, *Supplemental Balance Sheet Information*.

Foreign Currency Translation

The financial statements of the Company's operations outside the U.S. are generally measured using the local currency as the functional currency. Adjustments to translate the assets and liabilities of the foreign operations into U.S. dollars are accumulated as a component of other comprehensive income/(loss) utilizing period-end exchange rates. In June 2018, as a result of the three-year cumulative consumer price index exceeding 100%, Argentina was classified as a highly inflationary economy. Beginning on July 1, 2018, the Company has accounted for its Argentine operations as highly inflationary, but this change has not had a material effect on the consolidated financial statements.

The currency fluctuation related to certain long-term inter-company loans deemed to not be repayable in the foreseeable future have been recorded within the cumulative translation adjustment, a component of other comprehensive income/(loss). In addition, the currency fluctuation associated with the portion of the Company's euro-denominated debt designated as a net investment hedge is included as a component of other comprehensive income/(loss). Foreign currency transaction gains and losses calculated by utilizing weighted average exchange rates for the period are included in the statements of operations in "other (income)/expense, net." Such foreign currency transaction gains and losses include inter-company loans that are repayable in the foreseeable future.

Cash and Cash Equivalents

All liquid investments purchased with original maturities of three months or less are considered to be cash and equivalents. The carrying value of these cash equivalents approximates fair value.

Receivables and Allowance for Doubtful Accounts

Trade receivables are primarily comprised of amounts owed to the Company through its operating activities and are presented net of an allowance for doubtful accounts. The Company monitors past due accounts on an ongoing basis and establishes appropriate reserves to cover probable losses. An account is considered past due on the first day after its due date. The Company makes judgments as to its ability to collect outstanding receivables and provides allowances when it concludes that all or a portion of the receivable will not be collected. The Company determines its allowance by considering a number of factors, including the length of time accounts receivable are past due, the Company's previous loss history, the specific customer's ability to pay its obligation to the Company, and the condition of the general economy and the customer's industry.

Concentrations of Credit Risk and Major Customers

Concentration of credit risk, with respect to accounts receivable, is limited due to the large number of customers and their dispersion across different geographic areas. The customers are primarily concentrated in the pharmaceutical and healthcare industry. The Company normally does not require collateral or any other security to support credit sales. The Company performs ongoing credit evaluations of its customers' financial conditions and maintains reserves for credit losses. Such losses historically have been within the Company's expectations. No single customer exceeded 10% of revenue during the fiscal years ended 2020, 2019, and 2018 or 10% of accounts receivable as of the fiscal years ended 2020 and 2019.

Inventories

Inventory is stated at the lower of cost or net realizable value, using the first-in, first-out ("FIFO") method. The Company provides for cost adjustments for excess, obsolete, or slow-moving inventory based on changes in customer demand, technology developments or other economic factors. Inventory consists of costs associated with raw material, labor, and overhead.

Goodwill

The Company accounts for purchased goodwill and intangible assets with indefinite lives in accordance with ASC 350, *Goodwill, Intangible and Other Assets*. Under ASC 350, goodwill and intangible assets with indefinite lives are not amortized, but instead are tested for impairment at least annually. The Company performs an impairment evaluation of goodwill annually during the fourth quarter of its fiscal year or when circumstances otherwise indicate an evaluation should be performed.

The evaluation may begin with a qualitative assessment for each reporting unit to determine whether it is more-likely-than-not that the fair value of the reporting unit is less than its carrying value. Factors considered in a qualitative assessment include, among other things, macroeconomic conditions, industry and market considerations, financial performance of the respective reporting unit and other relevant entity and reporting-unit specific considerations. If the qualitative assessment does not generate a positive response, or if no qualitative assessment is performed, a quantitative assessment, based upon discounted cash flows, is performed and requires management to estimate future cash flows, growth rates, and macroeconomic, industry, and market conditions. In fiscal 2018 and 2020, the Company proceeded immediately to the quantitative assessment, but in fiscal 2019 the Company began its impairment evaluation with the qualitative assessment.

Based on its quantitative assessments conducted as of April 1, 2020, the Company determined for each reporting unit with goodwill that it was more likely than not that its respective fair value exceeded its carrying value, indicating there was no impairment. For more information regarding goodwill balances at June 30, 2020, see Note 4, *Goodwill*.

Property and Equipment and Other Definite-Lived Intangible Assets

Property and equipment are stated at cost. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets, including leasehold improvements and capital lease assets that are amortized over the shorter of their useful lives or the terms of the respective leases. The Company generally uses the following range of useful lives for its property and equipment categories: buildings and improvements—5 to 50 years; machinery and equipment—3 to 10 years; and furniture and fixtures—3 to 7 years. Depreciation expense was \$164.9 million for the fiscal year ended June 30, 2020, \$140.4 million for the fiscal year ended June 30, 2019, and \$127.5 million for the fiscal year ended June 30, 2018. Depreciation expense includes amortization of assets related to capital leases. The Company charges repairs and maintenance costs to expense as incurred. The amount of capitalized interest for fiscal 2020 was \$11.2 million and was immaterial for fiscal 2019 and 2018.

Intangible assets with finite lives, including customer relationships, patents, and trademarks, are amortized over their useful lives. The Company also capitalizes certain computer software and development costs in other intangibles, net, when incurred in connection with developing or obtaining computer software for internal use. Capitalized software costs are amortized over the estimated useful lives of the software, which generally range from 3 to 5 years. The Company evaluates the

recoverability of its other long-lived assets, including amortizing intangible assets, if circumstances indicate impairment may have occurred pursuant to ASC 360, *Property, Plant and Equipment*. This analysis is performed by comparing the respective carrying values of the assets to the current and expected future cash flows, on an un-discounted basis, to be generated from such assets. If such analysis indicates that the carrying value of these assets is not recoverable, the carrying value of such assets is reduced to fair value through a charge to the consolidated statements of operations. Fair value is determined based on assumptions the Company believes marketplace participants would utilize and comparable marketplace information in similar arm's length transactions. The Company recorded impairment charges related to definite-lived intangible assets and property, plant, and equipment of \$5.5 million, \$5.1 million, and \$8.7 million for the fiscal years ended June 30, 2020, 2019, and 2018, respectively.

Post-Retirement and Pension Plans

The Company sponsors various retirement and pension plans, including defined benefit retirement plans and defined contribution retirement plans. The measurement of the related benefit obligations and the net periodic benefit costs recorded each year are based upon actuarial computations, which require management's judgment as to certain assumptions. These assumptions include the discount rates used in computing the present value of the benefit obligations and the net periodic benefit costs, the expected future rate of salary increases (for pay-related plans) and the expected long-term rate of return on plan assets (for funded plans). The Company uses the corridor approach to amortize actuarial gains and losses.

The Company has elected to utilize an approach to estimate the service and interest components of net periodic benefit cost for benefit plans that discounts the individual expected cash flows using the applicable spot rates derived from the yield curve over the projected cash flow period. The expected long-term rate of return on plan assets is based on the target asset allocation and the average expected rate of growth for the asset classes invested. The average expected rate of growth is derived from a combination of historic returns, current market indicators, and the expected risk premium for each asset class. The Company uses a measurement date of June 30 for all its retirement and postretirement benefit plans.

Derivative Instruments, Hedging Activities, and Fair Value

Derivative Instruments and Hedging Activities

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest-rate, liquidity, and credit risk primarily by managing the amount, sources and duration of its debt funding and the use of derivative financial instruments. Specifically, the Company enters into derivative financial instruments to manage exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company's known or expected cash receipts and its known or expected cash payments principally related to the Company's borrowings. The Company does not net any of its derivative positions under master netting arrangements.

Specifically, the Company is exposed to fluctuations in the euro-U.S. dollar exchange rate on its investments in foreign operations in Europe. While the Company does not actively hedge against changes in foreign currency, it has mitigated the exposure of investments in its European operations through a net-investment hedge by denominating a portion of its debt in euros. In addition, a portion of Operating Company's interest payment obligation on its U.S dollar-denominated term loans is exposed to interest rate variability. The Company has mitigated its exposure to this risk by entering into an interest-rate swap agreement, which qualifies for and is designated as a cash-flow hedge. Also, as discussed in Note 9, *Derivative Instruments and Hedging Activities*, the Company has determined that an aspect of the dividend-rate adjustment feature of the Company's convertible Series A Preferred Stock (as defined below, see Note 13, *Redeemable Preferred Stock—Series A Preferred*) should be accounted for as a derivative liability.

Fair Value

The Company is required to measure certain assets and liabilities at fair value, either upon initial measurement or for subsequent accounting or reporting. The Company uses fair value extensively in the initial measurement of net assets acquired in a business combination and when accounting for and reporting on certain financial instruments. The Company estimates fair value using an exit price approach, which requires, among other things, that it determine the price that would be received to sell an asset or paid to transfer a liability in an orderly market. The determination of an exit price is considered from the perspective of market participants, considering the highest and best use of assets and, for liabilities, assuming the risk of non-performance will be the same before and after the transfer. A single estimate of fair value results from a complex series of judgments about

future events and uncertainties and relies heavily on estimates and assumptions. When estimating fair value, depending on the nature and complexity of the assets or liability, the Company may use one or all of the following approaches:

- Market approach, which is based on market prices and other information from market transactions involving identical or comparable assets or liabilities.
- Cost approach, which is based on the cost to acquire or construct comparable assets less an allowance for functional and/or economic obsolescence.
- Income approach, which is based on the present value of the future stream of net cash flows.

These fair value methodologies depend on the following types of inputs:

- Quoted prices for identical assets or liabilities in active markets (called Level 1 inputs).
- Quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar assets or liabilities in markets that are directly or indirectly observable (called Level 2 inputs).
- Unobservable inputs that reflect estimates and assumptions (called Level 3 inputs).

Certain investments that are measured at fair value using the net asset value (“NAV”) per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy.

Marketable Securities

Marketable securities consist of investments that have a readily determinable fair value based on quoted market price of the investment, which is considered a Level 1 fair value measurement. Under ASC 321, *Investments—Equity Securities*, these investments are classified as available-for-sale and are reported at fair value in other assets on the Company’s consolidated balance sheets. Unrealized holding gains and losses are reported within other expense, net on the Company’s consolidated statements of operations.

Self-Insurance

The Company is partially self-insured for certain employee health benefits and partially self-insured for property losses and casualty claims. The Company accrues for losses based upon experience and actuarial assumptions, including provisions for losses incurred but not reported.

Accumulated Other Comprehensive Income/(Loss)

Accumulated other comprehensive income, which is reported in the accompanying consolidated statements of changes in shareholders’ equity, consists of net earnings, foreign currency translation, and defined benefit pension plan changes.

Research and Development Costs

The Company expenses research and development costs as incurred. Costs incurred in connection with the development of new offerings and manufacturing process improvements are recorded within selling, general, and administrative expenses. Such research and development costs amounted to \$2.6 million, \$3.3 million, and \$6.3 million for the fiscal years ended June 30, 2020, June 30, 2019, and June 30, 2018, respectively. Costs incurred in connection with research and development services the Company provides to customers and services performed in support of the commercial manufacturing process for customers are recorded within cost of sales. Such research and development costs included in cost of sales amounted to \$61.2 million, \$51.2 million, and \$46.2 million for the fiscal years ended June 30, 2020, 2019, and 2018, respectively.

Earnings/(Loss) Per Share

The Company reports net earnings per share in accordance with ASC 260, *Earnings per Share*. The Company computes basic earnings per share for the Common Stock using the two-class method by dividing net income attributable to common stockholders by the weighted average number of common shares outstanding during the period. The Series A Preferred Stock, due to its convertible feature, is participating in nature; accordingly, the outstanding shares of Series A Preferred Stock are included in the two-class method. Diluted earnings per common share measures the performance of the Company over the reporting period while giving effect to all potential common shares that were dilutive and outstanding during the period. The denominator includes the weighted average number of basic shares and the number of additional common

shares that would have been outstanding if the potential common shares that were dilutive had been issued, and is calculated using either the two-class, treasury stock or if-converted method, whichever is more dilutive.

Income Taxes

In accordance with ASC 740, *Income Taxes*, the Company accounts for income taxes using the asset and liability method. The asset and liability method requires recognition of deferred tax assets and liabilities for expected future tax consequences of temporary differences that currently exist between tax bases and financial reporting bases of the Company's assets and liabilities. The Company measures deferred tax assets and liabilities using enacted tax rates in the respective jurisdictions in which it operates. In assessing the ability to realize deferred tax assets, the Company considers whether it is more likely than not that the Company will be able to realize some or all of the deferred tax assets. The calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in each of its tax jurisdictions. The number of years with open tax audits varies by tax jurisdiction. A number of years may lapse before a particular matter is audited and finally resolved. The Company applies ASC 740 to determine the accounting for uncertain tax positions. This standard clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before the Company may recognize the position in its financial statements. The standard also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company has elected not to reclassify the income tax effects stranded in accumulated other comprehensive income to retained earnings.

Equity-Based Compensation

The Company accounts for its equity-based compensation in accordance with ASC 718, *Compensation—Stock Compensation*. Under ASC 718, companies recognize compensation expense using a fair-value-based method for costs related to share-based payments, including stock options and restricted stock units. The expense is measured based on the grant date fair value of the awards, and the expense is recorded over the applicable requisite service period. Forfeitures are recognized as and when they occur. In the absence of an observable market price for a share-based award, the fair value is based upon a valuation methodology that takes into consideration various factors, including the exercise price of the award, the expected term of the award, the current price of the underlying shares, the expected volatility of the underlying share price based on peer companies, the expected dividends on the underlying shares and the risk-free interest rate.

The terms of the Company's equity-based compensation plans permit an employee holding vested stock options or restricted stock units to elect to have the Company withhold a portion of the shares otherwise issuable upon the employee's exercise of the option or grant, a so-called "net settlement transaction," as a means of paying the exercise price, meeting tax withholding requirements, or both.

Recent Financial Accounting Standards

Recently Adopted Accounting Standards

In February 2016, the FASB issued Accounting Standards Update ("ASU") 2016-02, *Leases (Topic 842)*, which supersedes ASC 840, *Leases*. The new guidance requires lessees to recognize most leases on their balance sheets for the rights and obligations created by those leases. The guidance requires enhanced disclosures regarding the amount, timing, and uncertainty of cash flows arising from leases and became effective for public reporting entities in annual reporting periods beginning after December 15, 2018 and interim periods within those fiscal years. The guidance permitted adoption of the new standard using the modified retrospective approach. The Company adopted the guidance on July 1, 2019 and elected the transition method that allows for the application of the standard at the adoption date rather than at the beginning of the earliest comparative period presented in the financial statements. The Company also elected the package of practical expedients; as a result, it did not reassess: (i) whether any expired or existing contract is or contains a lease, (ii) whether any expired or existing lease requires capitalization under the new guidance, and (iii) the initial direct cost for any existing lease. The Company also elected (x) not to reassess lease terms using hindsight and (y) to combine lease and non-lease components within a single lease agreement. Upon adoption, the Company recognized \$49.3 million of lease liabilities and a corresponding amount for right-of-use assets on its consolidated balance sheet. The adoption of the guidance did not have any effect on the Company's consolidated statements of operations or cash flows. Refer to Note 16, *Leases* for further discussion of the Company's lease accounting policy.

New Accounting Standards Not Adopted as of June 30, 2020

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting*, which provides optional guidance to ease the potential burden in accounting for the discontinuation of a reference rate such as LIBOR, formerly known as the London Interbank Offered Rate, because of

reference rate reform. The expedients and exceptions provided by the guidance do not apply to contract modifications made and hedging relationships entered into or evaluated after December 31, 2022. The ASU is effective for all entities as of March 12, 2020 through December 31, 2022. The Company is currently evaluating the impact of adopting this guidance on its consolidated financial statements.

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*, which eliminates certain exceptions related to the incremental approach for intra-period allocation, deferred tax recognition requirement for changes in equity method investments and foreign subsidiaries, and methodology for calculating income taxes in an interim period. The guidance also simplifies certain aspects of the accounting for franchise taxes, the accounting for step-up in the tax basis of goodwill, and accounting for the change in the enacted change in tax laws or rates. The ASU will be effective for fiscal years beginning after December 15, 2020 and interim periods within those fiscal years. The Company is currently evaluating the impact of adopting this guidance on its consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, *Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*, which aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The ASU will be effective for fiscal years beginning after December 15, 2019 and interim periods within those fiscal years and allow for either a retrospective or prospective application. The Company does not expect the adoption of the guidance to have a material impact on its consolidated financial statements.

In August 2018, the FASB issued ASU 2018-14, *Compensation—Retirement Benefits—Defined Benefit Plans—General (Subtopic 715-20): Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plan*, which removes certain disclosures and added additional disclosures around weighted-average interest crediting rates for cash balance plans and explanation for significant gains and losses related to change in the benefit obligation for the period. The ASU will be effective for fiscal years beginning after December 15, 2020 with a retrospective application for all periods presented. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, which introduces a new accounting model known as Credit Expected Credit Losses (“CECL”). CECL requires earlier recognition of credit losses, while also providing additional transparency about credit risk. The CECL model utilizes a lifetime expected credit loss measurement objective for the recognition of credit losses for receivables at the time the financial asset is originated or acquired. The expected credit losses are adjusted each period for changes in expected lifetime credit losses. This model replaces the multiple existing impairment models in current U.S. GAAP, which generally require that a loss be incurred before it is recognized. The new standard will also apply to receivables arising from revenue transactions such as contract assets and accounts receivables. The ASU will be effective for fiscal years beginning after December 15, 2019. The Company completed its evaluation of the guidance and does not expect it to have a material impact on its consolidated financial statements upon adoption.

2. REVENUE RECOGNITION

The Company recognizes revenue in accordance with ASC 606. The Company generally earns its revenue by supplying goods or providing services under contracts with its customers in three primary revenue streams: manufacturing and commercial product supply, development services, and clinical supply services. The Company measures the revenue from customers based on the consideration specified in its contracts, excluding any sales incentive or amount collected on behalf of a third party.

The Company’s customer contracts generally include provisions entitling the Company to a termination penalty when the customer invokes its contractual right to terminate prior to the contract’s nominal end date. The termination penalties in the customer contracts vary but are generally considered substantive for accounting purposes and create enforceable rights and obligations throughout the stated duration of the contract. The Company accounts for a contract cancellation as a contract modification in the period in which the customer invokes the termination provision. The determination of the contract termination penalty is based on the terms stated in the related customer agreement. As of the modification date, the Company updates its estimate of the transaction price using the expected value method, subject to constraints, and recognizes the amount over the remaining performance period.

The Company generally expenses sales commissions as incurred because either the amortization period is one year or less, or the balance with an amortization period greater than one year is not material.

The following tables reflect revenue for the fiscal year ended June 30, 2020 and 2019 by type of activity and reporting segment (in millions):

Fiscal Year Ended June 30, 2020	Softgel & Oral Technologies	Biologics	Oral and Specialty Delivery	Clinical Supply Services	Total
Manufacturing & commercial product supply	\$ 955.4	\$ 332.2	\$ 449.9	\$ —	\$ 1,737.5
Development services	106.6	689.4	226.0	—	1,022.0
Clinical supply services	—	—	—	345.0	345.0
Total	<u>\$ 1,062.0</u>	<u>\$ 1,021.6</u>	<u>\$ 675.9</u>	<u>\$ 345.0</u>	<u>\$ 3,104.5</u>
			Inter-segment revenue elimination		(10.2)
			Combined net revenue		<u>\$ 3,094.3</u>

Fiscal Year Ended June 30, 2019	Softgel & Oral Technologies	Biologics	Oral and Specialty Delivery	Clinical Supply Services	Total
Manufacturing & commercial product supply	\$ 944.6	\$ 242.9	\$ 378.4	\$ —	\$ 1,565.9
Development services	94.6	330.4	219.3	—	644.3
Clinical supply services	—	—	—	321.4	321.4
Total	<u>\$ 1,039.2</u>	<u>\$ 573.3</u>	<u>\$ 597.7</u>	<u>\$ 321.4</u>	<u>\$ 2,531.6</u>
			Inter-segment revenue elimination		(13.6)
			Combined net revenue		<u>\$ 2,518.0</u>

The following table allocates revenue by the location where the goods were made or the service performed:

(Dollars in millions)	Fiscal Year Ended June 30, 2020	Fiscal Year Ended June 30, 2019
United States	\$ 1,822.2	\$ 1,317.3
Europe	976.1	842.1
Other locations	375.8	433.8
Elimination of revenue attributable to multiple locations	(79.8)	(75.2)
Combined net revenue	<u>\$ 3,094.3</u>	<u>\$ 2,518.0</u>

Development Services Revenue

Development services contracts generally take the form of short-term, fee-for-service arrangements. Performance obligations vary, but frequently include biologic cell-line development, performing formulation, analytical stability, or other services related to product development, and providing manufacturing services for products that are under development or otherwise not intended for commercial sale. The transaction prices for these arrangements are fixed and include amounts stated in the contracts for each promised service, and each service is generally considered to be a separate performance obligation. The Company recognizes revenue over time because there is no alternative use to the Company for the asset created and the Company has an enforceable right to payment for performance completed as of that date.

The Company measures progress toward the completion of its performance obligations satisfied over time based on the nature of the services to be performed. For certain types of arrangements related to biologic cell-line development, revenue is recognized over time and measured using an output method based on the completion of tasks and activities that are performed to satisfy a performance obligation. For all other types of arrangements, revenue is recognized over time and measured using an input method based on effort expended. Each of these methods provides an appropriate depiction of the Company's progress toward fulfilling its performance obligations for its respective arrangement. In certain development services arrangements that require a portion of the contract consideration to be received in advance at the commencement of the contract, such advance payment is initially recorded as a contract liability.

The Company allocates consideration to each performance obligation using the "relative standalone selling price" as defined under ASC 606. Generally, the Company utilizes observable standalone selling prices in its allocations of consideration. If observable standalone selling prices are not available, the Company estimates the applicable standalone selling

price using an adjusted market assessment approach, representing the amount that the Company believes the market is willing to pay for the applicable service. Payment is typically due 30 to 90 days following the completion of services provided to the customer, based on the payment terms set forth in the applicable customer agreement.

Manufacturing & Commercial Product Supply Revenue

Manufacturing and commercial product supply revenue consists of revenue earned by manufacturing products supplied to customers under long-term commercial supply arrangements. In these arrangements, the customer typically owns and supplies the active pharmaceutical ingredient, or API, that is used in the manufacturing process. The contract generally includes the terms of the manufacturing services and related product quality assurance procedures to comply with regulatory requirements. Due to the regulated nature of the Company's business, these contract terms are highly interdependent and, therefore, are considered to be a single combined performance obligation. The transaction price is generally stated in the agreement as a fixed price per unit, with no contractual provision for a refund or price concession. Control is transferred to the customer over time, creating a corresponding right to recognize the related revenue, because there is no alternative use to the Company for the asset created and the Company has an enforceable right to payment for performance completed as of that date. Progress is measured based on the units of product that have successfully completed the contractually required product quality assurance process, as the conclusion of that process generally defines the time when the applicable contract and the related regulatory requirements permit the customer to exercise control over the product's disposition. The customer is typically responsible for arranging the shipping and handling of product following quality assurance.

Payment is typically due 30 to 90 days after the goods are shipped as requested by the customer, based on the payment terms set forth in the applicable customer agreement.

Clinical Supply Services Revenue

Clinical supply services contracts generally take the form of fee-for-service arrangements. Performance obligations for clinical supply services revenue typically include a combination of the following services: the manufacturing, packaging, storage, distribution, destruction, and inventory management of customer clinical trials materials. Performance obligations can also include the sourcing of comparator drug products on behalf of customers to be used in clinical trials to compare performance with the drug under clinical investigation. In certain arrangements, the Company recognizes revenue over time when the Company satisfies performance obligations. Satisfaction of the performance obligations is measured using an input method measure of progress based on effort expended by the Company. In other arrangements, revenue is recognized at the point in time when control transfers, which occurs upon either the delivery of the related output of the service to the customer or the completion of quality testing with respect to the product, and the Company has an enforceable right to payment based on the terms of the arrangement. Payment is typically due 30 to 90 days following the completion of services provided to the customer based on the payment terms set forth in the applicable customer agreement.

The Company records revenue for comparator sourcing arrangements on a net basis because it is acting as an agent that does not control the product or service before it is transferred to the customer. Payment for comparator sourcing activity is typically received in advance at the commencement of the contract and is initially recorded as a contract liability.

Licensing Revenue

The Company occasionally enters into arrangements with its customers that include licenses of functional intellectual property, including patents, or other intangible property ("out-licensing"). Revenue from such arrangements are within the scope of ASC 606. The Company does not have any material license arrangement that contains more than one performance obligation. The terms of such out-licensing arrangements include the license of functional intellectual or intangible property (primarily drug formulae) and typically provide for payment by the licensee of one or more of the following: non-refundable, up-front license fees or royalties on net sales of licensed products. The Company recognizes revenue from nonrefundable, up-front license fees when the licensed intellectual property is made available for the customer's use and benefit, which is generally at the inception of the arrangement. Royalty payments from such arrangements are recognized when subsequent sale or usage of an item subject to the royalty occurs and the performance obligation to which royalty relates is satisfied.

Contract Liabilities

Contract liabilities relate to cash consideration that the Company receives in advance of satisfying the related performance obligations. Changes in the contractual liabilities balance during the fiscal year ended June 30, 2020 are as follows:

(Dollars in millions)	
Balance at June 30, 2019	\$ 177.4
Balance at June 30, 2020	\$ 218.4
Revenue recognized in the period from:	
Amounts included in contracts liability at the beginning of the period	\$ 139.0

Contract liabilities activities during the fiscal year ended June 30, 2020 includes \$7.6 million acquired in connection with the purchase of MaSTherCell in the third quarter of fiscal 2020. See Note 3, *Business Combinations*. Contract liabilities that will be recognized within 12 months of June 30, 2020 are accounted for in Other accrued liabilities and those that will be recognized longer than 12 months after June 30, 2020 are accounted for within Other liabilities.

Contract Assets

Contract assets primarily relate to the Company's conditional right to receive consideration for services that have been performed for the customer as of June 30, 2020 relating to its development services but had not yet been invoiced as of June 30, 2020. Contract assets are transferred to trade receivables, net when the Company's right to receive the consideration becomes unconditional. Contract assets totaled \$61.4 million and \$23.3 million as of June 30, 2020 and 2019, respectively. Contract assets are accounted for within Prepaid expenses and other as they are expected to be transferred to trade receivables within 12 months of June 30, 2020.

3. BUSINESS COMBINATIONS

Paragon Acquisition

In May 2019, the Company acquired 100% of the equity interest in Paragon for an aggregate nominal purchase price of \$1,192.1 million.

The Company accounted for the transaction using the acquisition method of accounting for business combinations, in accordance with ASC 805, *Business Combinations*. The total consideration was (in millions):

Cash paid at closing	\$ 1,182.1
Non-cash consideration	10.0
Total consideration	<u>\$ 1,192.1</u>

The operating results of Paragon have been included in the Company's consolidated financial statements for the period following the acquisition date.

Paragon Valuation Assumptions and Purchase Price Allocation

The Company estimated fair values at the acquisition date for the preliminary allocation of consideration to the net tangible and intangible assets acquired and liabilities assumed. During the measurement period that ended in May 2020, the Company obtained updated information to finalize the fair values of the net assets acquired. Amounts subject to finalization included working capital adjustments and income taxes. During the measurement period, the Company did not record any material adjustment to goodwill or any other balance related to this acquisition.

The purchase price allocation to assets acquired and liabilities assumed in the transaction is (in millions):

Property, plant, and equipment	\$	163.2
Identifiable intangible assets		392.3
Other net assets		(68.3)
Deferred revenue		(73.2)
Deferred income taxes		(47.0)
Total identifiable net assets		367.0
Goodwill		825.1
Total assets acquired and liabilities assumed	\$	1,192.1

The carrying value of trade receivables, raw materials inventory, and trade payables, as well as certain other current and non-current assets and liabilities, generally represented the fair value at the date of acquisition.

Property, plant, and equipment was valued using the cost approach, which is based on current replacement and/or reproduction cost of the asset as new, less depreciation attributable to physical, functional, and economic factors. The Company then determined the remaining useful life based on the anticipated life of the asset and Company policy for similar assets.

Customer-relationship intangible assets of \$389.0 million were valued using the multi-period, excess-earnings method, a method that values the intangible asset using the present value of the after-tax cash flows attributable to the intangible asset only. The significant assumptions used in developing the valuation included the estimated annual net cash flows (including application of an appropriate margin to forecasted revenue, selling and marketing costs, return on working capital, contributory asset charges, and other factors), the discount rate that appropriately reflects the risk inherent in each future cash flow stream, and an assessment of the asset's life cycle, as well as other factors. The assumptions used in the financial forecasts were based on historical data, supplemented by current and anticipated growth rates, management plans, and market-comparable information. Fair-value determinations require considerable judgment and are sensitive to changes in underlying assumptions and factors. The customer relationship intangible asset has a weighted average useful life of 13 years.

Goodwill has been allocated to the Biologics segment as shown in Note 4, *Goodwill*. Goodwill is mainly comprised of the growth from an expected increase in capacity utilization, potential new customers, and advanced gene therapy development and manufacturing capabilities. Goodwill is not deductible for tax purposes.

Paragon Pro Forma Results

The following table provides pro forma results for the Company, prepared in accordance with ASC 805, for the fiscal years ended June 30, 2019 and June 30, 2018, as if the Company had acquired Paragon as of July 1, 2017 (in millions):

	For the Year Ended	
	June 30, 2019	June 30, 2018
Revenue	\$ 2,638.8	\$ 2,535.1
Net earnings	116.0	28.0

The pro forma financial information was prepared based on the historical information of Catalent and Paragon. In order to reflect the acquisition on July 1, 2017, the pro forma financial information includes the impact of incremental stock-based compensation expenses attributable to the acquisition, incremental amortization expense to be incurred based on the fair values of the intangible assets acquired, the incremental depreciation expense related to the fair-value adjustments associated with Paragon's property, plant, and equipment, the additional interest expense associated with the issuance of debt to finance the acquisition, the shares issued to finance the acquisition, the acquisition, integration, and financing-related costs incurred, and income tax-related adjustments for the fiscal years ended June 30, 2019 and 2018, respectively. The results do not include any anticipated cost savings or other effects associated with integrating Paragon into the rest of the Company. Pro forma amounts are not necessarily indicative of results had the acquisition occurred on July 1, 2017 or of future results.

Novavax Transaction

In July 2019, the Company acquired from Novavax Inc. ("Novavax") certain property, plant and equipment, rights to two facilities under leases in southern Maryland, certain raw material inventory, and the right to assume the employment of more than 100 Novavax employees located at those facilities in the areas of operations, quality, and product development, among other things. The Company made a cash payment of \$18.3 million in connection with the acquisition. The Company considers the transaction to be a business combination under ASC 805 and accounted for it using the acquisition method of accounting. The Company estimated fair values at the acquisition date for the allocation of consideration to the acquired items.

The aggregate purchase consideration was funded with cash on hand. As a result of the preliminary fair value allocations, the Company recognized property, plant, and equipment of \$15.6 million and \$0.3 million for inventory. The remainder of the fair value, \$2.4 million, was preliminarily allocated to goodwill, primarily the value of the existing organized and trained work force.

During the measurement period that ended in July 2020, the Company continued to obtain information to assist in finalizing the fair values of the net assets acquired, which was not materially different from the preliminary estimates.

Anagni Acquisition

In January 2020, the Company acquired an oral solid, biologics, and sterile product manufacturing and packaging facility in Anagni, Italy from a unit of Bristol-Myers Squibb Company (“BMS”). The Company paid to BMS \$55.3 million in cash as part of the purchase consideration and as consideration for the provision of certain services to facilitate the transition from BMS to Company ownership. At the closing of this acquisition, BMS also entered into a five-year agreement for continuing supply by the Company of certain products formerly produced by BMS at the Anagni facility. Due to the variety of activities performed at Anagni, the results of the Anagni facility are allocated between the Oral and Specialty Delivery and Biologics segments.

The total cash consideration was preliminarily allocated between the facility purchase and the transitional services arrangement, with \$52.2 million assigned to the purchase consideration and the balance to transitional services. The Company funded the entire amount with cash on hand and has preliminarily allocated the purchase price among the acquired assets, recognizing property, plant, and equipment of \$34.2 million, inventory of \$6.5 million, and prepaid expenses and other of \$12.2 million. The remainder of the value was preliminarily allocated to deferred tax assets and certain employee-related liabilities assumed in the acquisition.

During the measurement period ending no later than one year after the acquisition date, the Company will continue to obtain information to assist in finalizing the fair values of the net assets acquired, which may differ materially from these preliminary estimates. The amount subject to finalization principally includes income taxes. If any measurement period adjustment is material, the Company will record such adjustment, including any related impact on net income, in the reporting period in which the adjustment is determined. The Company expects to finalize its allocation over the next several months, but, in any event, within one year from the closing.

MaSTherCell Acquisition

In February 2020, the Company acquired 100% of the equity interest in MaSTherCell for an aggregate purchase price of \$323.3 million, subject to adjustment, which was funded with the net proceeds of the Company’s February 2020 offering (the “February 2020 Equity Offering”) of its common stock, par value \$0.01 (“Common Stock”). See Note 12, *Equity and Accumulated Other Comprehensive Income/(Loss)*. The Company accounted for the MaSTherCell acquisition using the acquisition method in accordance with ASC 805. The operating results of MaSTherCell have been included in the Company’s consolidated financial statements for the period following the acquisition date. Transaction costs incurred as a result of the acquisition of \$3.1 million are included in selling, general, and administrative expenses.

MaSTherCell Valuation Assumptions and Preliminary Purchase Price Allocation

The Company has preliminarily estimated fair values at the date of acquisition for the preliminary allocation of consideration to the net tangible and intangible assets acquired and liabilities assumed as part of the MaSTherCell acquisition.

The preliminary purchase price allocation to assets acquired and liabilities assumed in the transaction is (in millions):

Property, plant, and equipment	\$	25.5
Identifiable intangible assets		51.0
Other net assets		2.0
Deferred income tax liabilities		(7.7)
Total identifiable net assets	\$	70.8
Goodwill		252.5
Total assets acquired and liabilities assumed	\$	323.3

The carrying values of trade receivables, raw materials inventory, and trade payables, as well as certain other current and non-current assets and liabilities generally represented their fair values at the date of acquisition.

Property, plant, and equipment was valued using the cost approach, which is based on the current replacement or reproduction cost of the asset as new, less depreciation attributable to physical, functional, and economic factors. The Company then determined the remaining useful life based on the anticipated life of the asset and Company policy for similar assets.

Customer-relationship intangible assets of \$46.3 million were valued using the multi-period, excess-earnings method, a method that values the intangible assets using the present value of the after-tax cash flows attributable to the intangible assets only. The assumptions used in developing the valuation included the estimated annual net cash flows (including application of an appropriate margin to forecasted revenue, selling and marketing costs, return on working capital, contributory asset charges, and other factors), the discount rate that appropriately reflects the risk inherent in each future cash flow stream, and an assessment of the assets' life cycles, as well as other factors. The assumptions used in the financial forecasts were based on historical data, supplemented by current and anticipated growth rates, management plans, and market-comparable information. Preliminary assumptions may change and may result in adjustments to the final valuation. The customer relationship intangible assets have a weighted average useful life of 13 years. Goodwill is mainly comprised of the growth from an expected increase in capacity utilization, potential new customers, and advanced cell therapy development and manufacturing capabilities. The goodwill arising from the MaSTherCell acquisition has been assigned to the Biologics segment. Goodwill is not deductible for tax purposes.

During the measurement period ending no later than one year after the acquisition date, the Company will continue to obtain information to assist in finalizing the fair values of the net assets acquired, which may differ materially from these preliminary estimates. The amounts subject to finalization include working capital and income taxes. If any measurement period adjustment is material, the Company will record such adjustment, including any related impact on net income, in the reporting period in which the adjustment is determined. The Company expects to finalize its allocation over the next several months, but, in any event, within one year from the closing.

4. GOODWILL

The following table summarizes the changes from June 30, 2018, to June 30, 2019 and then to June 30, 2020 in the carrying amount of goodwill in total and by reporting segment:

(Dollars in millions)	Softgel & Oral Technologies	Biologics	Oral and Specialty Delivery	Clinical Supply Services	Total
Balance at June 30, 2018	\$ 415.2	\$ 505.7	\$ 319.9	\$ 156.4	\$ 1,397.2
Additions	—	815.3	25.3	—	840.6
Foreign currency translation adjustments	(6.0)	(1.0)	(4.9)	(5.0)	(16.9)
Balance at June 30, 2019	409.2	1,320.0	340.3	151.4	2,220.9
Additions	—	263.6	—	—	263.6
Reallocation	108.1	(124.3)	16.2	—	—
Other	(1.6)	3.0	1.6	—	3.0
Foreign currency translation adjustments	(10.2)	(0.1)	(3.4)	(3.2)	(16.9)
Balance at June 30, 2020	<u>\$ 505.5</u>	<u>\$ 1,462.2</u>	<u>\$ 354.7</u>	<u>\$ 148.2</u>	<u>\$ 2,470.6</u>

Goodwill increase in fiscal 2020 within the Biologics segment primarily relates to the MaSTherCell acquisition. The reallocation of goodwill in fiscal 2020 relates to adjustments to the Company's reporting segments, as a result of which certain assets moved from the Biologics reporting segment to the Oral and Specialty Delivery reporting segment, and other assets moved from the Oral and Specialty Delivery reporting segment to the Softgel and Oral Technologies reporting segment. The Company recorded no impairment charge to goodwill in fiscal 2018, 2019, or 2020. See Note 1, *Basis of Presentation and Summary of Significant Accounting Policies* and Note 3, *Business Combinations*.

5. DEFINITE-LIVED LONG-LIVED ASSETS

The Company's definite-lived long-lived assets include property, plant, and equipment as well as certain categories of intangible assets with definite lives. Refer to Note 19, *Supplemental Balance Sheet Information* for details related to property, plant, and equipment.

The details of other intangible assets subject to amortization as of June 30, 2020 and June 30, 2019 are as follows (in millions):

June 30, 2020	Weighted Average Life	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Amortized intangibles:				
Core technology	19 years	\$ 134.5	\$ (83.0)	\$ 51.5
Customer relationships	14 years	1,021.3	(248.0)	773.3
Product relationships	11 years	270.4	(217.5)	52.9
Other	5 years	15.5	(4.5)	11.0
Total intangible assets		<u>\$ 1,441.7</u>	<u>\$ (553.0)</u>	<u>\$ 888.7</u>

June 30, 2019	Weighted Average Life	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Amortized intangibles:				
Core technology	18 years	\$ 168.2	\$ (105.6)	\$ 62.6
Customer relationships	14 years	981.1	(182.5)	798.6
Product relationships	11 years	275.5	(213.9)	61.6
Other	4 years	9.3	(1.3)	8.0
Total intangible assets		<u>\$ 1,434.1</u>	<u>\$ (503.3)</u>	<u>\$ 930.8</u>

Amortization expense was \$88.8 million, \$88.2 million, and \$62.6 million for the fiscal years ended June 30, 2020, 2019, and 2018, respectively. Future amortization expense for the next five fiscal years is estimated to be:

(Dollars in millions)	2021	2022	2023	2024	2025
Amortization expense	\$ 91.0	\$ 90.1	\$ 89.5	\$ 88.9	\$ 87.9

The Company impaired definite-lived intangible assets of \$0.0 million, \$0.0 million and \$0.6 million in the fiscal years ended June 30, 2020, 2019 and 2018, respectively. During the fiscal year ended June 30, 2019, the Company recorded \$12.3 million of accelerated amortization related to an intangible property licensing right.

6. RESTRUCTURING AND OTHER COSTS

Restructuring Costs

The Company has implemented plans to restructure certain operations, both domestically and internationally. The restructuring plans focused on various aspects of operations, including closing and consolidating certain manufacturing operations, rationalizing headcount and aligning operations in a strategic and more cost-efficient structure. In addition, the Company may incur restructuring charges in the future in cases where a material change in the scope of operation with its business occurs. Employee-related costs consist primarily of severance costs and also include outplacement services provided to employees who have been involuntarily terminated. Facility exit and other costs consist of accelerated depreciation, equipment relocation costs and costs associated with planned changes to the Company's facilities to streamline its operations.

Other Costs/(Income)

Other costs include settlement charges for claim amounts that the Company deemed to be both probable and reasonably estimable, but where the Company is not currently in a position to record under U.S. GAAP any insurance recovery with respect to such costs. The claims relate to a former temporary suspension of operations at a softgel manufacturing facility.

The following table summarizes the costs recorded within restructuring and other costs:

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Restructuring costs:			
Employee-related reorganization	\$ 5.5	\$ 14.1	\$ 11.9
Facility exit and other costs	—	—	0.4
Total restructuring costs	\$ 5.5	\$ 14.1	\$ 12.3
Other - Temporary suspension customer claims (recoveries)	\$ —	\$ —	\$ (2.1)
Total restructuring and other costs	\$ 5.5	\$ 14.1	\$ 10.2

7. LONG-TERM OBLIGATIONS AND SHORT-TERM BORROWINGS

Long-term obligations and short-term borrowings consist of the following at June 30, 2020 and June 30, 2019:

(Dollars in millions)	Maturity as of June 30, 2020	June 30, 2020	June 30, 2019
Senior secured credit facilities			
Term loan facility incremental dollar term B-2	May 2026	\$ 928.5	\$ 936.2
Term loan facility euro-denominated	May 2024	—	346.8
Revolving credit facility	May 2024	—	—
Euro-denominated 4.75% Senior Notes due 2024	December 2024	—	428.3
U.S. dollar-denominated 4.875% Senior Notes due 2026	January 2026	445.4	444.6
U.S. dollar-denominated 5.00% Senior Notes due 2027	July 2027	493.1	492.1
Euro-denominated 2.375% Senior Notes due 2028	March 2028	909.9	—
Deferred purchase consideration	October 2021	97.5	143.9
Finance lease obligations	2020 to 2044	142.2	167.3
Other obligations	2020 to 2024	1.4	0.1
Total		3,018.0	2,959.3
Less: current portion of long-term obligations and other short-term borrowings		72.9	76.5
Long-term obligations, less current portion		\$ 2,945.1	\$ 2,882.8

Senior Secured Credit Facilities and Fourth Amendment

In May 2019, Operating Company completed a fourth amendment (the “Fourth Amendment”) to its Amended and Restated Credit Agreement, dated as of May 20, 2014 (as amended through the Fourth Amendment, the “Credit Agreement”). As part of the Fourth Amendment, Operating Company borrowed \$950 million aggregate principal amount of incremental term B loans (the “Incremental Dollar Term B-2 Loans”) and replaced the existing revolving credit commitments of \$200 million with new revolving credit commitments of \$550 million (the “Incremental Revolving Credit Commitments”). The Incremental Dollar Term B-2 Loans constitute a new class of U.S. dollar-denominated term loans under the Credit Agreement with the same principal terms as the then-existing U.S. dollar-denominated term loans. The Incremental Dollar Term B-2 Loans will mature on May 17, 2026. The Incremental Revolving Credit Commitments constitute revolving credit commitments under the Credit Agreement with the same principal terms as the previously existing revolving credit commitments under the Credit Agreement. The Incremental Revolving Credit Commitments will mature on May 17, 2024. Under the Credit Agreement, the applicable rate for U.S. dollar-denominated term loans, including the Incremental Dollar Term B-2 Loans, is LIBOR (subject to a floor of 1.00%) plus 2.25%. In April 2020, Operating Company entered into an interest-rate swap agreement that effectively fixed the rate on \$500 million of the Incremental Dollar Term B-2 Loans at 3.51%. See Note 9, *Derivative Instruments and Hedging Activities*. The applicable rate for revolving loans, including the Incremental Revolving Credit Commitments, is initially LIBOR plus 2.25%, and such rate can be reduced to LIBOR plus 2.00% in future periods based on a measure of Operating Company's total leverage ratio.

In January 2020 and March 2020, Operating Company borrowed \$100.0 million and \$200.0 million, respectively, under its revolving credit facility, which were repaid as of June 30, 2020 from a portion of the proceeds of the February 2020 Equity Offering and June 2020 public offering of its Common Stock (the "June 2020 Equity Offering"), respectively. The borrowing in March 2020 was done prophylactically in response to unsettled market conditions resulting from the COVID-19 pandemic to increase liquidity for general corporate purposes, while proceeds from the borrowing in January 2020 were used to pay the cash acquisition cost of certain land and buildings previously leased by the Company's gene therapy business. The Company incurred interest of \$1.7 million during fiscal 2020 from the borrowings under Operating Company's revolving credit facility.

The availability of capacity under the Incremental Revolving Credit Commitments is reduced by the aggregate value of all outstanding letters of credit under the Credit Agreement. As of June 30, 2020, the Company had \$543.3 million of unutilized capacity under the Incremental Revolving Credit Commitments due to \$6.7 million of outstanding letters of credit.

U.S. dollar-denominated 4.875% Senior Notes due 2026

In October 2017, Operating Company completed a private offering of \$450.0 million aggregate principal amount of 4.875% Senior Notes due 2026 (the "USD 2026 Notes"). The USD 2026 Notes are fully and unconditionally guaranteed, jointly and severally, by all of the wholly owned U.S. subsidiaries of Operating Company that guarantee its senior secured credit facilities. The USD 2026 Notes were offered in the U.S. to qualified institutional buyers in reliance on Rule 144A under the Securities Act of 1933, as amended (the "Securities Act") and outside the U.S. only to non-U.S. investors pursuant to Regulation S under the Securities Act. The USD 2026 Notes will mature on January 15, 2026 and bear interest at the rate of 4.875% per annum. Interest is payable semi-annually in arrears on January 15 and July 15 of each year, beginning on July 15, 2018.

U.S. dollar-denominated 5.00% Senior Notes due 2027

In June 2019, Operating Company completed a private offering of \$500.0 million aggregate principal amount of 5.00% Senior Notes due 2027 (the "USD 2027 Notes"). The USD 2027 Notes are fully and unconditionally guaranteed, jointly and severally, by all of the wholly owned U.S. subsidiaries of Operating Company that guarantee its senior secured credit facilities. The USD 2027 Notes were offered in the U.S. to qualified institutional buyers in reliance on Rule 144A under the Securities Act and outside the U.S. only to non-U.S. investors pursuant to Regulation S under the Securities Act. The USD 2027 Notes will mature on July 15, 2027 and bear interest at the rate of 5.00% per annum. Interest is payable semi-annually in arrears on January 15 and July 15 of each year, beginning on January 15, 2020.

Euro-denominated 2.375% Senior Notes due 2028

In March 2020, Operating Company completed a private offering of €825.0 million aggregate principal amount of 2.375% Senior Notes due 2028 (the "Euro 2028 Notes" and, together with the USD 2026 Notes and USD 2027 Notes, the "Senior Notes"). The Euro 2028 Notes are fully and unconditionally guaranteed, jointly and severally, by all of the wholly owned U.S. subsidiaries of Operating Company that guarantee its senior secured credit facilities. The Euro 2028 Notes were offered in the U.S. to qualified institutional buyers in reliance on Rule 144A under the Securities Act and outside the U.S. only to non-U.S. investors pursuant to Regulation S under the Securities Act. The Euro 2028 Notes will mature on March 1, 2028 and bear interest at the rate of 2.375% per annum. Interest is payable semi-annually in arrears on March 1 and September 1 of each year. The proceeds of the Euro 2028 Notes after payment of the offering fees and expenses were used to repay in full the outstanding borrowings under Operating Company's euro-denominated term loans under the Credit Agreement, which would have matured in May 2024, and euro-denominated 4.75% Senior Notes due 2024 (the "Euro 2024 Notes"), which would have matured in December 2024, plus any accrued and unpaid interest thereon, with the remainder available for general corporate purposes.

Deferred Purchase Consideration

In connection with the acquisition of Catalent Indiana in October 2017, \$200.0 million of the \$950.0 million aggregate nominal purchase price is payable in \$50.0 million installments, on each of the first four anniversaries of the closing date. The Company made installment payments in October 2018 and October 2019. The balance of the deferred purchase consideration was recorded at fair value as of the acquisition date, with the difference between the remaining nominal amount and the fair value treated as imputed interest.

Long-Term and Other Obligations

Other obligations consist primarily of finance leases for buildings and other loans for business and working capital needs. Maturities of long-term obligations, including finance leases of \$142.2 million, and other short-term borrowings for future fiscal years are:

(Dollars in millions)	2021	2022	2023	2024	2025	Thereafter	Total
Maturities of long-term and other obligations	\$ 71.4	71.0	20.6	20.3	18.0	2,853.3	\$3,054.6

Debt Issuance Costs

Debt issuance costs associated with the Credit Agreement (other than its revolving credit facility component) and the Senior Notes are presented as a reduction to the carrying value of the related debt, while debt issuance costs associated with the revolving credit facility are capitalized within prepaid expenses and other assets on the consolidated balance sheet. All debt issuance costs are amortized over the life of the related obligation through charges to interest expense in the consolidated statements of operations. The unamortized total debt issuance costs were \$39.0 million and \$34.6 million as of June 30, 2020 and 2019, respectively. Amortization of debt issuance costs totaled \$6.4 million and \$3.8 million for the fiscal years ended June 30, 2020 and 2019, respectively.

Guarantees and Security

Senior Secured Credit Facilities

All obligations under the Credit Agreement, and the guarantees of those obligations, are secured by substantially all of the following assets of Operating Company and each guarantor (Operating Company's parent entity, PTS Intermediate, and each of Operating Company's material domestic subsidiaries), subject to certain exceptions:

- a pledge of 100% of the capital stock of Operating Company and 100% of the equity interests directly held by Operating Company and each guarantor in any wholly owned material subsidiary of Operating Company or any guarantor (which pledge, in the case of any non-U.S. subsidiary of a U.S. subsidiary, will not include more than 65% of the voting stock of such non-U.S. subsidiary); and
- a security interest in, and mortgages on, substantially all tangible and intangible assets of Operating Company and of each guarantor, subject to certain limited exceptions.

The Senior Notes

All obligations under the Senior Notes are general, unsecured, and subordinated to all existing and future secured indebtedness of the guarantors to the extent of the value of the assets securing such indebtedness. Each of the Senior Notes is separately guaranteed by all of Operating Company's wholly owned U.S. subsidiaries that guarantee the senior secured credit facilities. None of the Senior Notes is guaranteed by either PTS Intermediate or the Company.

Debt Covenants

Senior Secured Credit Facilities

The Credit Agreement contains a number of covenants that, among other things, restrict, subject to certain exceptions, Operating Company's (and Operating Company's restricted subsidiaries') ability to incur additional indebtedness or issue certain preferred shares; create liens on assets; engage in mergers and consolidations; sell assets; pay dividends and distributions or repurchase capital stock; repay subordinated indebtedness; engage in certain transactions with affiliates; make investments, loans or advances; make certain acquisitions; enter into sale and leaseback transactions; amend material agreements governing Operating Company's subordinated indebtedness and change Operating Company's lines of business.

The Credit Agreement also contains change of control provisions and certain customary affirmative covenants and events of default. The revolving credit facility requires compliance with a net leverage covenant when there is a 30% or more draw outstanding at a period end. As of June 30, 2020, the Company was in compliance with all material covenants related to the Credit Agreement.

Subject to certain exceptions, the Credit Agreement permits Operating Company and its restricted subsidiaries to incur certain additional indebtedness, including secured indebtedness. None of Operating Company's non-U.S. subsidiaries nor its dormant Puerto Rico subsidiary is a guarantor of the loans.

Under the Credit Agreement, Operating Company's ability to engage in certain activities such as incurring certain additional indebtedness, making certain investments and paying certain dividends is tied to ratios based on Adjusted EBITDA

(which is defined as “Consolidated EBITDA” in the Credit Agreement). Adjusted EBITDA is based on the definitions in the Credit Agreement, is not defined under U.S. GAAP, and is subject to important limitations.

The Senior Notes

The various indentures governing the Senior Notes (collectively, the “Indentures”) contain covenants that, among other things, limit the ability of Operating Company and its restricted subsidiaries to incur or guarantee more debt or issue certain preferred shares; pay dividends on, repurchase, or make distributions in respect of their capital stock or make other restricted payments; make certain investments; sell certain assets; create liens; consolidate, merge, sell; or otherwise dispose of all or substantially all of their assets; enter into certain transactions with their affiliates, and designate their subsidiaries as unrestricted subsidiaries. These covenants are subject to a number of exceptions, limitations, and qualifications as set forth in the Indentures. The Indentures also contain customary events of default, including, but not limited to, nonpayment, breach of covenants, and payment or acceleration defaults in certain other indebtedness of Operating Company or certain of its subsidiaries. Upon an event of default, either the holders of at least 30% in principal amount of each of the then-outstanding Senior Notes or the applicable Trustee under the Indentures may declare the applicable notes immediately due and payable; or in certain circumstances, the applicable notes will become automatically immediately due and payable. As of June 30, 2020, Operating Company was in compliance with all material covenants under the Indentures.

Fair Value of Debt Measurements

The estimated fair values of the senior secured credit facilities and Senior Notes are classified as Level 2 in the fair value hierarchy and are calculated by using a discounted cash flow model with market interest rate as a significant input. The carrying amounts and the estimated fair values of financial instruments as of June 30, 2020 and June 30, 2019 are as follows:

(Dollars in millions)	Fair Value Measurement	June 30, 2020		June 30, 2019	
		Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Euro-denominated 4.75% Senior Notes	Level 2	\$ —	\$ —	\$ 428.3	\$ 454.2
U.S. dollar-denominated 4.875% Senior Notes	Level 2	445.4	463.6	444.6	457.0
U.S. dollar-denominated 5.00% Senior Notes	Level 2	493.1	537.9	492.1	509.0
Euro-denominated 2.375% Senior Notes	Level 2	909.9	844.1	—	—
Senior secured credit facilities & other	Level 2	1,169.6	1,160.1	1,594.3	1,526.0
Total		<u>\$ 3,018.0</u>	<u>\$ 3,005.7</u>	<u>\$ 2,959.3</u>	<u>\$ 2,946.2</u>

8. EARNINGS PER SHARE

The Company computes earnings per share (“EPS”) of the Common Stock using the two-class method required due to the participating nature of the Series A Preferred Stock (as noted in Note 12, *Equity and Accumulated Other Comprehensive Income/(Loss)*). Diluted net income per share is computed using the weighted-average number of shares outstanding plus the number of common shares that would be issued assuming exercise or conversion of all potentially dilutive instruments. Dilutive securities having an anti-dilutive effect on diluted net income per share are excluded from the calculation. The dilutive effect of the securities that are issuable under the Company’s equity incentive plans (see Note 14, *Equity-Based Compensation*) are reflected in diluted earnings per share by application of the treasury stock method. The dilutive effect of the Series A Preferred

Stock is computed by applying the if-converted method. The reconciliations between basic and diluted earnings per share attributable to Catalent common shareholders for the fiscal years ended June 30, 2020, 2019, and 2018 are as follows:

(Dollars in millions, except per share data)	Fiscal year ended June 30,		
	2020	2019	2018
Net earnings	\$ 220.7	\$ 137.4	\$ 83.6
Less: Net earnings attributable to participating securities	(47.7)	(5.4)	—
Net earnings attributable to common shareholders	<u>\$ 173.0</u>	<u>\$ 132.0</u>	<u>\$ 83.6</u>
Weighted average shares outstanding	149,794,191	144,245,956	131,226,110
Weighted average dilutive securities issuable—stock plans	2,527,612	1,708,519	1,975,106
Total weighted average diluted shares outstanding	<u>152,321,803</u>	<u>145,954,475</u>	<u>133,201,216</u>
Earnings per share:			
Basic	\$ 1.16	\$ 0.92	\$ 0.64
Diluted	\$ 1.14	\$ 0.90	\$ 0.63

The computations of diluted earnings per share for the fiscal years ended June 30, 2020, 2019, and 2018 exclude the effect of shares potentially issuable under pre-IPO employee stock options totaling 0.0 million, 0.0 million, and 0.4 million options, respectively, because the vesting provisions of those awards specify performance or market-based conditions that had not been met as of the period end. Further, the computation of diluted earnings per share for the fiscal years ended June 30, 2020 and 2019 excludes the effect of approximately 13.1 million and 1.6 million, respectively, “if-converted” shares of Common Stock, on a weighted average basis, potentially issuable on the conversion of Series A Preferred Stock, as those shares would be anti-dilutive.

9. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Risk Management Objective of Using Derivatives

The Company is exposed to fluctuations in the currency exchange rates applicable to its investments in foreign operations. While the Company does not actively hedge against changes in foreign currency, the Company has mitigated the exposure arising from its investments in its European operations by denominating a portion of its Senior Notes in euros. At June 30, 2020, the Company had euro-denominated debt outstanding of \$909.9 million (U.S. dollar equivalent), which qualifies as a hedge of a net investment in foreign operations. For non-derivatives designated and qualifying as net investment hedges, the effective portion of the translation gains or losses are reported in accumulated other comprehensive income/(loss) as part of the cumulative translation adjustment. The unhedged portions of the translation gains or losses are reported in the consolidated statements of operations. The following table includes net investment hedge activity during the fiscal years ended June 30, 2020 and 2019, respectively:

(Dollars in millions)	June 30, 2020	June 30, 2019
Unrealized foreign exchange gain/(loss) within Other Comprehensive Income	\$ 2.7	\$ 12.2
Unrealized foreign exchange gain/(loss) within the Consolidated Statements of Operations	\$ 6.1	\$ 7.6

The net accumulated gain of this net investment within accumulated other comprehensive income/(loss) was \$62.5 million as of June 30, 2020. Amounts are reclassified out of accumulated other comprehensive income/(loss) into earnings when the entity in which the gains and losses reside is either sold or substantially liquidated.

2020 Derivative Liability

As discussed in Note 13, *Redeemable Preferred Stock—Series A Preferred*, in May 2019, the Company issued shares of Series A Preferred Stock in exchange for net proceeds of \$646.3 million after taking into account the \$3.7 million issuance cost.

The dividend rate used to determine the amount of the quarterly dividend payable on shares of the Series A Preferred Stock is subject to adjustment so as to provide holders of shares of Series A Preferred Stock with certain protections against a decline in the trading price of shares of Common Stock. The Company determined that this feature should be accounted for as a derivative liability, since the feature fluctuates inversely to changes in the trading price and is also linked to the performance of

the S&P 500 stock index. Accordingly, the Company bifurcated the adjustable dividend feature from the remainder of the Series A Preferred Stock and accounted for this feature as a derivative liability at fair value. Changes in the fair value of the derivative liability are recognized in the consolidated statements of operations for each reporting period. The fair value was based on an option pricing methodology, specifically both a Monte Carlo simulation and a binomial lattice model. The methodology incorporates the terms and conditions of the preferred stock arrangement, historical stock price volatility, the risk-free interest rate, a credit spread based on the yield indexes of high-yield bonds, and the trading price of shares of the Common Stock. The calculation of the estimated fair value of the derivative liability is highly sensitive to changes in the unobservable inputs, such as the expected volatility and the Company's specific credit spread.

The Company recorded a gain of \$3.2 million on the change in the estimated fair value of the derivative liability from issuance through June 30, 2020, which is reflected as a non-operating expense in the consolidated statements of operations. The fair value of the derivative liability as of June 30, 2020 was \$23.6 million.

The fair value is classified as Level 3 in the fair value hierarchy due to the significant management judgment required for the assumptions underlying the calculation of value. The following table sets forth a summary of changes in the estimated fair value of the derivative liability:

(Dollars in millions)	Fair Value Measurements of Series A Preferred Stock Derivative Liability Using Significant Unobservable Inputs (Level 3)	
Balance at July 1, 2019	\$	26.8
Change in estimated fair value of Series A Preferred Stock derivative liability		(3.2)
Balance at June 30, 2020	\$	23.6

Interest-Rate Swap

Pursuant to its interest rate and risk management strategy, in April 2020, Operating Company entered into an interest-rate swap agreement with Bank of America N.A. as a hedge against the economic effect of a portion of the variable interest obligation associated with its U.S dollar-denominated term loans under its senior secured credit facilities, so that the interest payable on that portion of the debt becomes fixed at a certain rate, thereby reducing the impact of future interest rate changes on future interest expense. As a result of entering into the interest-rate swap agreement, the floating portion of the applicable rate on \$500.0 million of the term loans is now effectively fixed at 1.26%, for a total fixed rate of 3.51%.

The interest-rate swap agreement qualifies for and is designated as a cash-flow hedge. All hedging relationships are formally documented, and the hedges are designed to offset changes to future cash flows on hedged transactions. We evaluate hedge effectiveness at the inception of the hedge and on an ongoing basis.

The fair value of the interest-rate swap agreement is determined at the end of each reporting period based on valuation models that use interest rate yield curves and discount rates as inputs. The discount rates are based on U.S. Deposit or U.S. Treasury rates. The significant inputs used in the valuation models are readily available in public markets or can be derived from observable market transactions and, therefore, have been classified as Level 2 in the fair value hierarchy. The estimated fair value of the interest rate swap as of June 30, 2020 was reported as a derivative liability of \$3.7 million within other liabilities in the consolidated balance sheet. The cash flows associated with the interest-rate swap are reported in net cash provided by operating activities in the consolidated statement of cash flows. The unrealized gain from the mark-to-market of the interest-rate swap valuation during the fiscal year ended June 30, 2020 was immaterial.

10. INCOME TAXES

Earnings before income taxes are as follows for fiscal 2020, 2019, and 2018:

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
U.S. operations	\$ 120.9	\$ 36.1	\$ 13.3
Non-U.S. operations	139.5	124.2	138.7
Total	\$ 260.4	\$ 160.3	\$ 152.0

The provision/(benefit) for income taxes consists of the following for fiscal 2020, 2019, and 2018:

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Current:			
Federal	\$ 1.2	\$ 2.4	\$ 14.1
State and local	0.8	0.3	0.1
Non-U.S.	33.0	25.8	24.9
Total current	\$ 35.0	\$ 28.5	\$ 39.1
Deferred:			
Federal	\$ 11.1	\$ 3.6	\$ 24.2
State and local	6.9	(11.6)	(1.0)
Non-U.S.	(13.3)	2.4	6.1
Total deferred	\$ 4.7	\$ (5.6)	\$ 29.3
Total provision	\$ 39.7	\$ 22.9	\$ 68.4

A reconciliation of the provision/(benefit) starting from the tax computed at the federal statutory income tax rate to the tax computed at the Company's effective income tax rate is as follows for the fiscal years ended 2020, 2019, and 2018:

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Provision at U.S. federal statutory tax rate	\$ 54.7	\$ 33.7	\$ 42.7
State and local income taxes	6.1	(0.3)	(2.5)
Foreign tax rate differential	(6.4)	(3.0)	(15.4)
Global intangible low tax income	2.9	3.4	—
Other permanent items	2.6	4.9	2.7
Unrecognized tax positions	(0.4)	1.1	(2.4)
Tax valuation allowance	(21.3)	(11.3)	7.2
Foreign tax credit	(2.6)	(4.2)	—
Withholding tax and other foreign taxes	0.9	1.1	1.3
Change in tax rate	3.8	0.8	(3.6)
R&D tax credit	(1.9)	(2.3)	(2.4)
Impact of U.S. tax reform	—	—	42.5
Other	1.3	(1.0)	(1.7)
Total provision	\$ 39.7	\$ 22.9	\$ 68.4

The income tax provision for the fiscal year ended June 30, 2020 is not comparable to the provision in the prior year due to changes in the geographic mix of pretax income, changes in the tax impact of permanent differences and credits, and the tax impact of discrete items. The effective tax rate for the fiscal year ended June 30, 2020 reflects a reduction to the federal and foreign valuation allowance partially offset by permanent items, and an increase in state tax. The effective tax rate for the fiscal year ended June 30, 2019 reflects a reduction to the state valuation allowance, and the impact of permanent differences, including "global intangible low-taxed income" ("GILTI"), offset by the benefit of an increase in foreign earnings taxed at rates lower than the U.S. statutory rate.

The Company intends to repatriate foreign earnings taxed in prior fiscal years as a result of the changes imposed by the 2017 U.S. Tax Cuts and Jobs Act. In addition to these foreign earnings previously taxed, as of June 30, 2020, for purposes of ASC 740-10-25-3, the Company had \$84.8 million of undistributed earnings from non-U.S. subsidiaries that it intends to reinvest permanently in its non-U.S. operations. As these ASC 740-10-25-3 earnings are considered permanently reinvested, no tax provision has been accrued. It is not feasible to estimate the amount of tax that might be payable on the eventual remittance of such earnings.

Deferred income taxes arise from temporary differences between the financial reporting and tax reporting bases of assets and liabilities, and operating loss and tax credit carryforwards for tax purposes. The components of the Company's deferred income tax assets and liabilities are as follows at June 30, 2020 and 2019:

(Dollars in millions)	Fiscal Year Ended June 30,	
	2020	2019
Deferred income tax assets:		
Accrued liabilities	\$ 30.0	\$ 27.0
Equity compensation	16.0	35.9
Loss and tax credit carryforwards	193.8	150.0
Foreign currency	14.8	11.0
Pension	27.5	30.7
Interest-related	9.3	1.0
Deferred revenue	—	3.0
Lease liabilities	34.4	11.5
Euro-denominated debt	7.1	6.0
Total deferred income tax assets	\$ 332.9	\$ 276.1
Valuation allowance	(52.9)	(76.3)
Net deferred income tax assets	\$ 280.0	\$ 199.8

(Dollars in millions)	Fiscal Year Ended June 30,	
	2020	2019
Deferred income tax liabilities:		
Deferred revenue	\$ (7.6)	\$ —
Property-related	(99.5)	(53.1)
Goodwill and other intangibles	(192.1)	(181.0)
Right-of-use assets	(22.0)	—
Other	(3.4)	(1.5)
Total deferred income tax liabilities	\$ (324.6)	\$ (235.6)
Net deferred tax asset/(liability)	\$ (44.6)	\$ (35.8)

Deferred tax assets and liabilities in the preceding table are in the following captions in the consolidated balance sheets at June 30, 2020 and 2019:

(Dollars in millions)	Fiscal Year Ended June 30,	
	2020	2019
Non-current deferred tax asset	\$ 49.4	\$ 38.6
Non-current deferred tax liability	94.0	74.4
Net deferred tax asset/(liability)	\$ (44.6)	\$ (35.8)

At June 30, 2020, the Company had federal net operating loss (“NOL”) carryforwards of \$491.0 million, \$251.4 million of which are subject to limitations under Section 382 of the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”). The majority of the \$251.4 million federal NOL carryforwards subject to Section 382 of the Internal Revenue Code are attributed to the Company's acquisitions of Pharmatek, Juniper, Paragon, and MaSThercell. As of June 30, 2020, \$267.0 million of the Company's federal NOL carryforwards have an indefinite life and the remaining NOL carryforwards will expire in fiscal years 2023 through 2037.

At June 30, 2020, the Company had state tax NOL carryforwards of \$503.3 million. Approximately \$48.7 million of these losses are state tax losses generated in periods ending on or before April 10, 2007. Substantially all state NOL carryforwards have a twenty-year carryforward period. At June 30, 2020, the Company had non-U.S. tax NOL carryforwards of \$116.8 million, a majority of which, are available for at least three years or have an indefinite carryforward period.

The Company had valuation allowances of \$52.9 million and \$76.3 million as of June 30, 2020 and 2019, respectively, against its deferred tax assets. The Company considered all available evidence, both positive and negative, in assessing the need for a valuation allowance against tax assets. Four possible sources of taxable income were evaluated when assessing the realization of deferred tax assets:

- carrybacks of existing NOLs (if and to the extent permitted under the tax law);
- future reversals of existing taxable temporary differences;
- tax planning strategies; and
- future taxable income exclusive of reversing temporary differences and carryforwards.

While the valuation allowance related to certain U.S. combined states was released during the fiscal year ended June 30, 2019, there remained as of June 30, 2020 a valuation allowance for the NOLs and deductible temporary differences in the remaining combined and separate states of \$33.8 million. The state valuation allowance as of June 30, 2020 is due to the Company's history of tax losses and anticipated loss utilization rates in separate filing status states as well as the difference in the rules related to allocated and apportioned income for separate filing status states versus combined filing status states.

The Company considered the need to maintain a valuation allowance on deferred tax assets based on management's assessment of whether it is more likely than not that the Company would realize the value of its deferred tax assets based on future reversals of existing taxable temporary differences and the ability to generate sufficient taxable income within the carryforward period available under the applicable tax laws. During the fiscal year ended June 30, 2020, the Company released \$23.1 million of its valuation allowances. The amount released is comprised of \$8.9 million for U.S. foreign tax credits and \$14.2 million of NOLs and temporary differences for certain Belgian operations. The \$23.1 million release of the Company's valuation allowance was partially offset by establishing a \$1.1 million valuation allowance on NOL and temporary differences related to certain French operations.

In the normal course of business, the Company's income taxes are subject to audits by federal, state, and foreign tax authorities, some of which are ongoing and may result in proposed assessments. Germany and the U.K. are among the jurisdictions where the Company has substantial tax positions. The Company is no longer subject to examinations by the relevant tax authorities for years prior to fiscal 2009. The Company's estimate for the potential outcome for any uncertain tax issue is highly judgmental. The Company assesses its income tax positions and records benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting date. For those tax positions for which it is more likely than not that a tax benefit will be sustained, the Company records the amount that has a greater than 50% likelihood of being realized upon resolution with the taxing authority that has full knowledge of all relevant information based on the technical merit. Interest and penalties are accrued, where applicable.

As of June 30, 2020, the Company had a total of \$4.4 million of unrecognized tax benefits. A reconciliation of unrecognized tax benefits, excluding accrued interest, for June 30, 2020, 2019, and 2018 is as follows:

(Dollars in millions)	
Balance at June 30, 2017	\$ 52.5
Additions based on tax positions related to the current year	0.1
Additions for tax positions of prior years	—
Reductions for tax positions of prior years	(2.7)
Settlements	(47.5)
Lapse of the applicable statute of limitations	(0.2)
Balance at June 30, 2018	\$ 2.2
Additions based on tax positions related to the current year	—
Additions for tax positions of prior years	3.0
Reductions for tax positions of prior years	(0.1)
Settlements	—
Lapse of the applicable statute of limitations	(1.3)
Balance at June 30, 2019	\$ 3.8
Additions based on tax positions related to the current year	—
Additions for tax positions of prior years	0.7
Reductions for tax positions of prior years	—
Settlements	—
Lapse of the applicable statute of limitations	(0.1)
Balance at June 30, 2020	\$ 4.4

All of the unrecognized tax benefits as of June 30, 2020 and 2019 would, if subsequently recognized, favorably affect the effective income tax rate.

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. As of June 30, 2020, the Company has \$1.2 million of accrued interest related to uncertain tax positions, a decrease of \$0.2 million from the prior year, the majority of which relates to lapses of the applicable statute of limitations with respect to the imposition of such interest. The Company had \$1.4 million and \$2.0 million of accrued interest related to uncertain tax positions as of June 30, 2019 and 2018, respectively.

11. EMPLOYEE RETIREMENT BENEFIT PLANS

The Company sponsors various retirement plans, including defined benefit pension plans and defined contribution plans. Substantially all of the Company's domestic non-union employees are eligible to participate in employer-sponsored retirement savings plans, which include plans created under Section 401(k) of the Internal Revenue Code that provide for the Company to match a portion of contributions by participating U.S. employees. The Company's contributions to the plans are discretionary but are subject to certain minimum requirements as specified in the plans. The Company uses a measurement date of June 30 for all of its retirement and postretirement benefit plans.

The Company recorded obligations related to its withdrawal from one multi-employer pension plan that covered former employees at three former sites. Its withdrawal has been classified as a mass withdrawal under the Multiemployer Pension Plan Amendments Act of 1980, as amended, and the Pension Protection Act of 2006 and resulted in the recognition of liabilities associated with the Company's long-term obligations in prior-year periods not presented, which were primarily recorded as an expense within discontinued operations. The estimated discounted value of the projected contributions related to these plans is \$38.6 million and \$38.8 million as of June 30, 2020 and 2019, respectively. The annual cash impact associated with the Company's long-term obligation arising from this plan is \$1.7 million per year.

The following table provides a reconciliation of the change in projected benefit obligation and fair value of plan assets for the defined benefit retirement and other retirement plans, excluding the multi-employer pension plan liability:

(Dollars in millions)	Retirement Benefits		Other Post-Retirement Benefits	
	June 30,		June 30,	
	2020	2019	2020	2019
Accumulated Benefit Obligation	\$ 350.7	\$ 341.7	\$ 2.9	\$ 2.9
Change in Benefit Obligation				
Benefit obligation at beginning of year	349.7	331.1	2.9	2.8
Company service cost	4.0	3.6	—	—
Interest cost	5.5	7.5	0.1	0.1
Employee contributions	0.4	0.3	—	—
Plan amendments	(0.1)	—	—	—

The Company's Investment Committee employs a building-block approach in determining the long-term rate of return for plan assets, with proper consideration of diversification and rebalancing. Historical markets are studied and long-term historical relationships between equities and fixed income are preserved consistent with the widely accepted capital market principle that assets with higher volatility generate a greater return over the long run. Current market factors such as inflation and interest rates are evaluated before long-term capital market assumptions are determined. Peer data are reviewed to check for reasonability and appropriateness.

Plan assets are recognized and measured at fair value in accordance with the accounting standards regarding fair value measurements. The following are valuation techniques used to determine the fair value of each major category of assets:

- Short-term investments, equity securities, fixed-income securities, and real estate are valued using quoted market prices or other valuation methods, and thus are classified within Level 1 or Level 2.

- Insurance contracts and other types of investments include investments with some observable and unobservable prices that are adjusted by cash contributions and distributions, and thus are classified within Level 2 or Level 3.
- Other assets as of June 30, 2020 and 2019, including \$31.1 million and \$24.3 million of investments in hedge funds related to the Company's U.K. pension plan, are classified as Level 2.

The following tables provide a summary of plan assets that are measured at fair value as of June 30, 2020 and 2019, aggregated by the level in the fair value hierarchy within which those measurements fall:

As of June 30, 2020 (dollars in millions)	Level 1	Level 2	Level 3	Investments Measured at Net Asset Value	Total Assets
Equity securities	\$ —	\$ 28.8	\$ —	\$ —	\$ 28.8
Debt securities	—	152.1	—	—	152.1
Real estate	—	6.9	—	2.1	9.0
Other	—	84.2	21.1	—	105.3
Total	\$ —	\$ 272.0	\$ 21.1	\$ 2.1	\$ 295.2

As of June 30, 2019 (dollars in millions)	Level 1	Level 2	Level 3	Investments Measured at Net Asset Value	Total Assets
Equity securities	\$ 1.8	\$ 46.0	\$ —	\$ —	\$ 47.8
Debt securities	0.1	122.2	—	—	122.3
Real estate	0.4	4.9	—	1.9	7.2
Other	0.6	73.4	21.0	—	95.0
Total	\$ 2.9	\$ 246.5	\$ 21.0	\$ 1.9	\$ 272.3

Level 3 other assets consist of an insurance contract in the U.K. to fulfill the benefit obligations for a portion of the participant benefits. The value of this commitment is determined using the same assumptions and methods used to value the pension liability of the associated plan. Level 3 other assets also include the partial funding of a pension liability relating to current and former employees of the Company's Eberbach, Germany facility through a Company promissory note with an annual rate of interest of 5%. The value of this commitment fluctuates due to contributions and benefit payments in addition to loan interest.

The following table provides a reconciliation of the beginning and ending balances of level 3 assets as well as the changes during the period attributable to assets held and those purchases, sales, settlements, contributions and benefits that were paid:

Total (Level 3) (Dollars in millions)	Fair Value Measurement Using Significant Unobservable Inputs Total (Level 3)	Fair Value Measurement Using Significant Unobservable Inputs Insurance Contracts	Fair Value Measurement Using Significant Unobservable Inputs Other
Beginning Balance at June 30, 2019	\$ 21.0	\$ 3.1	\$ 17.9

Relating to assets sold during the period	—	—	—
Purchases, sales, settlements, contributions and benefits paid	(1.7)	(0.1)	(1.6)
Transfers in or out of Level 3, net	0.9	—	0.9
Ending Balance at June 30, 2020	\$ 21.1	\$ 3.3	\$ 17.8

The investment policy reflects the long-term nature of the plans' funding obligations. The assets are invested to provide the opportunity for both income and growth of principal. This objective is pursued as a long-term goal designed to provide required benefits for participants without undue risk. It is expected that this objective can be achieved through a well-diversified asset portfolio. All equity investments are made within the guidelines of quality, marketability, and diversification mandated by the Employee Retirement Income Security Act of 1974, as amended ("ERISA") (for plans subject to ERISA) and other relevant legal requirements. Investment managers are directed to maintain equity portfolios at a risk level approximately equivalent to that of the specific benchmark established for that portfolio. Assets invested in fixed income securities and pooled fixed-income

portfolios are managed actively to pursue opportunities presented by changes in interest rates, credit ratings, or maturity premiums.

12. EQUITY AND ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)

Description of Capital Stock

The Company is authorized to issue 1,000,000,000 shares of its Common Stock and 100,000,000 shares of preferred stock, par value \$0.01 per share. In accordance with the Company's amended and restated certificate of incorporation, each share of Common Stock has one vote, and the Common Stock votes together as a single class.

Recent Public Offerings of its Common Stock

On June 15, 2020, the Company completed the June 2020 Equity Offering, in which the Company sold 7.7 million shares of Common Stock at a price of \$70.72 per share, net of underwriting discounts and commissions. The Company obtained total net proceeds from the June 2020 Equity Offering of \$547.5 million after the payment of associated offering expenses. The net proceeds of the June 2020 Equity Offering were used to repay \$200.0 million of prophylactic borrowings from the third quarter of fiscal 2020 under Operating Company's revolving credit facility, with the remainder available for general corporate purposes. On July 10, 2020, the underwriter for the June 2020 Equity Offering exercised its over-allotment option on 1.2 million additional shares, resulting in net proceeds of \$82.2 million from the June 2020 Equity Offering, which will be recorded in the first quarter of fiscal 2021.

On February 6, 2020, the Company completed the February 2020 Equity Offering, in which the Company sold 8.4 million shares of Common Stock at a price of \$58.58 per share, net of underwriting discounts and commissions. The Company obtained total net proceeds from the February 2020 Equity Offering of \$494.2 million. The net proceeds of the February 2020 Equity Offering were used to repay \$100.0 million of borrowings earlier in the quarter under Operating Company's revolving credit facility and the consideration for the MaSTherCell acquisition due at its closing, with the remainder available for general corporate purposes.

On July 27, 2018, the Company completed a public offering of its Common Stock (the "2018 Equity Offering") pursuant to which the Company sold 11.4 million shares, including shares sold pursuant to an exercise of the underwriters' over-allotment option, at a price of \$40.24 per share, before underwriting discounts and commissions. Net of these discounts and

commissions and other offering expenses, the Company's proceeds from the 2018 Equity Offering, including the over-allotment exercise, totaled \$445.5 million. The net proceeds of the 2018 Equity Offering were used to repay a corresponding portion of the outstanding borrowings under Operating Company's U.S. dollar-denominated term loans.

Effect of Restricted Stock

Shares outstanding of Common Stock include shares of unvested restricted stock. Unvested restricted stock included in reportable shares outstanding was 0.5 million shares as of June 30, 2020. Shares of unvested restricted stock are excluded from the calculation of basic weighted average shares outstanding, but their dilutive impact is added back in the calculation of diluted weighted average shares outstanding.

Stock Repurchase Program

On October 29, 2015, the Company's board of directors authorized a share repurchase program, permitting the use of up to \$100.0 million to repurchase shares of outstanding Common Stock. On August 27, 2020, the Company's board of directors terminated this share repurchase program. There has been no purchase pursuant to this program in the fiscal year ended June 30, 2020 or at any time since the share repurchase program was authorized by the Company's board of directors in 2015.

Accumulated Other Comprehensive Income/(Loss)

Accumulated other comprehensive income/(loss) by component and changes for the fiscal years ended June 30, 2020, 2019, and 2018 consist of:

(Dollars in millions)	Foreign Currency Translation Adjustment	Available for Sale Investment Adjustments	Derivatives and Hedges	Pension Liability Adjustments	Other Comprehensive Income/(Loss)

The Company held an investment in a specialty pharmaceutical company, which was treated as a cost method investment prior to the second quarter of fiscal 2017. In the second quarter of fiscal 2017, the specialty pharmaceutical company became publicly traded after an initial public offering, and, as a result, the Company recognized an initial unrealized gain on the investment of \$15.3 million, net of tax. The Company recorded an other-than-temporary impairment in the fourth quarter of fiscal 2018, and the investment has been fully impaired. This amount is reflected in accumulated other comprehensive income.

The components of the changes in the cumulative translation adjustment, derivatives and hedges, minimum pension liability, and available for sale investment for the fiscal years ended June 30, 2020, 2019, and 2018 consists of:

13. REDEEMABLE PREFERRED STOCK — SERIES A PREFERRED

In May 2019, the Company designated 1,000,000 shares of its preferred stock, par value \$0.01, as its “Series A Convertible Preferred Stock” (the “Series A Preferred Stock”), pursuant to a certificate of designation of preferences, rights, and limitations (as amended, the “Certificate of Designation”) filed with the Delaware Secretary of State, and issued and sold 650,000 shares of the Series A Preferred Stock for an aggregate purchase price of \$650.0 million, to affiliates of Leonard Green & Partners, L.P. (the “Series A Investors”), each share having an initial stated value of \$1,000 (as such value may be adjusted in accordance with the terms of the Certificate of Designation, the “Stated Value”). The Series A Preferred Stock ranks senior to the Company’s Common Stock with respect to dividend rights and rights upon the voluntary or involuntary liquidation, dissolution, or winding up of the affairs of the Company.

The holders of Series A Preferred Stock are entitled to vote with the holders of the Common Stock as a single class on an “as-converted” basis and, for so long as the Series A Investors or their successors have the right to designate a nominee for

election to the board pursuant to their stockholders' agreement with the Company, have the right to elect one board member voting as a separate class. They also have veto rights over certain amendments to the Company's organizational documents that would have an adverse effect on the rights of the Series A Preferred Stock; issuance of senior or *pari passu* securities; or the incurrence of indebtedness above certain leverage ratios, as set forth in the Certificate of Designation.

Holders of Series A Preferred Stock have the right under the Certificate of Designation to receive a liquidation preference entitling them to be paid out of our assets available for distribution to stockholders before any payment may be made to holders of any other class or series of capital stock, the value of which preference is equal to the greater of (a) the Stated Value plus all accrued and unpaid dividends or (b) the amount that such holders would have been entitled to receive upon the Company's liquidation, dissolution, and winding up if all outstanding shares of Series A Preferred Stock had been converted into shares of Common Stock immediately prior to such liquidation, dissolution, or winding up.

Holders of Series A Preferred Stock are also entitled (a) to receive a cumulative annual dividend equal to 5.0% of the Stated Value, payable quarterly in arrears in cash, by increasing the Stated Value, or in a combination thereof at Catalent's election, with such rate subject to an increase to 6.5% or 8.0% depending on the price of the Common Stock at the fourth (or in certain cases fifth) anniversary of the initial issuance, as set forth in the Certificate of Designation, and (b) to participate in the distribution of any ordinary dividend on the Common Stock calculated on an as-converted basis.

The Series A Preferred Stock is subject to conversion or redemption under various circumstances, including the right of holders to convert some or all of their shares into shares of Common Stock after twelve months at a fixed price of \$49.54 (the "Conversion Price") and the Company's right to (x) convert all outstanding shares of Series A Preferred Stock at any time after the third anniversary of the initial issuance if the price of the Common Stock exceeds 150.0% of the Conversion Price or (y) redeem all outstanding shares of Series A Preferred Stock at any time after the fifth anniversary of the initial issuance at a price per share equal to the Stated Value, plus accrued and unpaid dividends, for cash, shares of Common Stock, or a combination of these. The Conversion Price is subject to customary anti-dilution and other adjustments. In addition, holders of shares of Series A Preferred Stock are eligible to demand redemption of their shares in the event of a change of control. Due to these various rights, privileges, and preferences, the Company has classified the Series A Preferred Stock as temporary (mezzanine) equity on its consolidated balance sheets.

Proceeds from the offering of the Series A Preferred Stock, net of stock issuance costs, were \$646.3 million, in fiscal 2019 which were used to fund a portion of the consideration for the Paragon acquisition due at its closing. Of the net proceeds, \$39.7 million was allocated to the dividend adjustment feature at its issuance and separately accounted for as a derivative liability, as disclosed in Note 9, *Derivative Instruments and Hedging Activities*. The preferred stock balance totaled \$606.6 million as of June 30, 2020 and 2019, respectively.

14. EQUITY-BASED COMPENSATION

The Company's stock-based compensation is comprised of stock options, restricted stock units, and restricted stock.

2007 Stock Incentive Plan

Awards issued under the Company's pre-IPO incentive compensation plan, known as the 2007 PTS Holdings Corp. Stock Incentive Plan, as amended (the "2007 Plan"), were generally issued for the purpose of retaining key employees and directors. Certain awards remain outstanding under the 2007 Plan, but it is no longer possible to issue new awards.

2014 and 2018 Omnibus Incentive Plans

In connection with the IPO, the Company's board of directors adopted, and the holder of a majority of the shares approved, the 2014 Omnibus Incentive Plan effective July 31, 2014 (the "2014 Plan"). The 2014 Plan provided certain members of management, employees, and directors of the Company and its subsidiaries with the opportunity to obtain various incentives, including grants of stock options, restricted stock units (defined below), and restricted stock. In October 2018, the Company's shareholders approved the 2018 Omnibus Incentive Plan (the "2018 Plan"), and, as a result, new awards may no longer be issued under the 2014 Plan, although it remains in effect as to any previously granted award. The 2018 Plan is substantially similar to the 2014 Plan, except that (a) a total of 15,600,000 shares of Common Stock (subject to adjustment) may be issued under the 2018 Plan, (b) each share of Common Stock issuable under the 2018 Plan pursuant to a restricted stock or restricted stock unit award will reduce the number of reserved shares by 2.25 shares, and (c) the 2018 Plan imposes a limit on the aggregate value of awards that may be made in a single year to a non-employee director. Both the 2014 Plan and the 2018 Plan permit "net settlement" of vested awards, pursuant to which the award holder forfeits a portion of the vested award to satisfy the purchase price (in the case of options), the holder's withholding tax obligation, if any (in all cases), or both. Where the holder net-settles the tax obligation, the Company pays the amount of the withholding tax to the U.S. government in cash, which is accounted for as an adjustment to Additional Paid in Capital.

Stock Compensation Expense

Stock compensation expense recognized in the consolidated statements of operations was \$48.1 million, \$33.3 million, and \$27.2 million in fiscal 2020, 2019, and 2018, respectively. Stock compensation expense is classified in selling, general, and administrative expenses as well as cost of sales. The Company has elected to account for forfeitures as they occur.

Stock Options

The Company adopted two forms of non-qualified stock option agreement (each, a “Form Option Agreement”) for stock options granted under the 2007 Plan. Under the Company’s Form Option Agreement adopted in 2009, a portion of the stock option awards vest in equal annual installments over a five-year period contingent solely upon the participant’s continued employment with the Company, or one of its subsidiaries, another portion of the stock option awards vests over a specified performance period upon achievement of pre-determined operating performance targets over time, and the remaining portion of the stock option awards vests upon realization of certain internal rates of return or multiple of investment goals. Under the Company’s other Form Option Agreement, adopted in 2013, a portion of the stock option awards vests over a specified performance period upon achievement of pre-determined operating performance targets over time while the other portion of the stock option awards vests upon realization of a specified multiple of investment goal. The Form Option Agreements include certain forfeiture provisions upon a participant’s separation from service with the Company. Following the IPO, the Company decided not to grant any further award under the 2007 Plan; however, all outstanding awards granted prior to the IPO remained outstanding in accordance with the terms of the 2007 Plan.

Stock options granted under the 2014 Plan or 2018 Plan, as applicable, during fiscal 2020, 2019, and 2018 had an intrinsic value of \$6.1 million, \$24.0 million, and \$2.3 million, respectively, which represents approximately 329,000, 1,179,000, and 442,000 shares of Common Stock, respectively. Each stock option granted under the 2014 Plan or 2018 Plan vests in equal annual installments over a four-year period from the date of grant, contingent upon the participant’s continued employment with the Company, except for a small number of grants that vest based on the achievement of operating performance targets set forth in the award documents.

Methodology and Assumptions

All outstanding stock options have an exercise price per share equal to the fair market value of one share of Common Stock on the date of grant. All outstanding stock options have a contractual term of 10 years, subject to forfeiture under certain conditions upon separation of employment. The grant-date fair value is recognized as expense on a graded-vesting basis over the vesting period. The fair value of stock options is determined using the Black-Scholes-Merton option pricing model for service and performance-based awards, and an adaptation of the Black-Scholes-Merton option valuation model, which takes into consideration the internal rate of return thresholds, for market-based awards. This model adaptation is essentially equivalent to the use of a path dependent-lattice model.

The weighted average of assumptions used in estimating the fair value of stock options granted during each year were as follows:

	Fiscal Year Ended June 30,		
	2020	2019	2018
Expected volatility	23 %- 24%	22 %- 24%	24 %- 27%
Expected life (in years)	6.25	6.25	6.25
Risk-free interest rates	1.7 %- 1.9%	2.2 %- 2.8%	1.9 %- 2.1%
Dividend yield	None	None	None

Public trading of the Common Stock commenced only in July 2014, and, as a result, there is only available limited relevant historical volatility experience; therefore, the expected volatility assumption is based on the historical volatility of the closing share prices of a comparable peer group. The Company selected peer companies from the pharmaceutical industry with similar characteristics, including market capitalization, number of employees and product focus. In addition, since the Company does not have a pattern of exercise behavior of option holders, the Company used the simplified method to determine the expected life of each option, which is the mid-point between the vesting date and the end of the contractual term. The risk-free interest-rate for the expected life of the option is based on the comparable U.S. Treasury yield curve in effect at the time of grant. The weighted-average grant-date fair value of stock options in fiscal 2020, 2019, and 2018 was \$15.22 per share, \$9.49 per share, and \$10.39 per share, respectively.

The following table summarizes stock option activity and shares subject to outstanding options for the fiscal year ended June 30, 2020:

	Weighted Average Exercise Price	Time			Performance			Market		
		Number of Shares	Weighted Average Contractual Term	Aggregate Intrinsic Value	Number of Shares	Weighted Average Contractual Term	Aggregate Intrinsic Value	Number of Shares	Weighted Average Contractual Term	Aggregate Intrinsic Value
Outstanding as of June 30, 2019	\$ 30.55	2,179,814	7.56	\$51,739,617	127,734	7.68	\$ 2,369,291	37,402	3.52	\$ 1,373,525
Granted	\$ 54.97	328,726	—	—	—	—	—	—	—	—
Exercised	\$ 24.37	417,546	—	14,863,342	42,252	—	1,512,124	37,402	—	1,573,107
Forfeited	\$ 39.07	88,875	—	—	—	—	—	—	—	—
Expired / Canceled	\$ 32.47	4,231	—	—	—	—	—	—	—	—
Outstanding as of June 30, 2020	\$ 35.53	1,997,888	8.63	76,229,381	85,482	5.01	2,453,938	—	0.00	—
Vest and expected to vest as of June 30, 2020	\$ 35.53	1,997,888	8.63	76,229,381	85,482	5.01	2,453,938	—	0.00	—
Vested and exercisable as of June 30, 2020	\$ 23.23	779,690	2.99	\$39,024,280	2,492	5.82	\$ 136,028	—	0.00	\$ —

In fiscal 2020, participants exercised options to purchase approximately 166,000 net settled shares, resulting in \$7.1 million of cash paid on behalf of participants for withholding taxes. The intrinsic value of the options exercised in fiscal 2020 was \$17.9 million. The total fair value of options vested during the period was \$4.3 million.

In fiscal 2019, participants exercised options to purchase approximately 283,000 net settled shares, resulting in \$8.9 million of cash paid on behalf of participants for withholding taxes. The intrinsic value of the options exercised in fiscal 2019 was \$21.0. The total fair value of options vested during the period was \$3.6 million. As part of the time-based options granted, there were 230,093 shares granted in consideration for the acquisition of Paragon. Excluding this grant, the Weighted Average Exercise Price for fiscal 2019 would have been \$41.47.

As of June 30, 2020, \$2.5 million of unrecognized compensation cost related to granted and not forfeited stock options is expected to be recognized as expense over a weighted-average period of approximately 1.9 years.

Restricted Stock and Restricted Stock Units

The Company may grant to employees and members of its board of directors under the 2018 Plan (and formerly granted under the 2014 Plan) shares of restricted stock and units each representing the right to one share of Common Stock (“restricted stock units”). Since the IPO, the Company has granted to employees and directors restricted stock units and restricted stock that vest over specified periods as well as restricted stock units and restricted stock that have certain performance-related vesting requirements (“performance share units” and “performance shares,” respectively). The restricted stock and restricted stock units granted during fiscal 2020 and 2019 had grant date fair values aggregating \$42.8 million and \$47.6 million, respectively, which represent approximately 748,000 and 1,066,000 shares of Common Stock, respectively. Under the 2014 Plan or 2018 Plan, as appropriate, the performance shares and performance share units vest upon achieving Company financial performance metrics established at the outset of the three-year performance period associated with each grant. The metrics for the fiscal 2016 performance share unit grant were based on performance against a mix of cumulative revenue and cumulative Adjusted EBITDA targets, and these grants vested in fiscal 2018 based on achievement against those targets. Note that Adjusted EBITDA (which is called “Consolidated EBITDA” in the Credit Agreement) is calculated based on the definition in the Credit Agreement, is not defined under U.S. GAAP, and is subject to important limitations. The metrics for the fiscal 2017, 2018, and 2019 performance share and performance share unit grants were based on performance against a mix of adjusted EPS targets and relative total shareholder return (“RTSR”) targets. Note that adjusted EPS is calculated as a quotient of tax-effected Adjusted EBITDA by the weighted average number of fully diluted shares, a financial measure that is not defined under U.S. GAAP and is subject to important limitations. The performance shares and performance share units vest following the end of their respective three-year performance periods upon a determination of achievement relative to the targets. Each quarter during the period in which the performance shares and performance share units are outstanding, the Company estimates the likelihood of such achievement by the end of the performance period in order to determine the probability of vesting. The number of shares actually earned at the end of the three-year period for the fiscal 2017, 2018 and 2019 grants will vary, based only on actual performance, from 0% to 200%, or from 0% to 150%, of the target number of performance shares or performance share units specified on the date of grant, in the case of adjusted EPS and RTSR grants, respectively. Time-based restricted stock units and restricted stock generally vest on the second or third anniversary of the date of grant, subject to the participant’s continued employment with the Company.

Methodology and Assumptions - Expense Recognition and Grant Date Fair Value

The fair values of (a) time-based restricted stock units and restricted stock are recognized as expense on a cliff-vesting schedule over the applicable vesting period and (b) performance shares and performance share units are re-assessed quarterly as discussed above.

The grant date fair values of both time-based and performance-based shares and units are determined based on the number of shares subject to the grants and the fair value of the Common Stock on the dates of the grants, as determined by the closing market prices.

Time-Based Restricted Stock Units and Restricted Stock

The following table summarizes activity in unvested time-based restricted stock units and restricted stock for the fiscal year ended June 30, 2020:

	Time-Based Units and Shares	Weighted Average Grant-Date Fair Value
Unvested as of June 30, 2019	1,394,850	\$ 37.53
Granted	468,586	56.16
Vested	(637,920)	32.85
Cancelled/forfeited/adjusted	(143,868)	44.38
Unvested as of June 30, 2020	<u>1,081,648</u>	<u>\$ 47.45</u>

Adjusted EPS and RTSR-Based Performance Share Units and Performance Shares

The following table summarizes activity in unvested performance share units and performance shares for the fiscal year ended June 30, 2020:

	Performance-Based Units and Shares	Weighted Average Grant-Date Fair Value
Target Number Unvested as of June 30, 2019	644,455	\$ 33.70
Target Number Granted	149,342	55.08
Target Number Vested	(324,725)	24.59
Target Number Cancelled/forfeited/adjusted	47,344	31.21
Target Number Unvested as of June 30, 2020	<u>516,416</u>	<u>\$ 43.37</u>

Valuation of RTSR Performance Shares and Performance Share Units

The fair value of each RTSR performance share unit and performance share is determined using the Monte Carlo pricing model because the number of shares to be awarded is subject to a market condition. The Monte Carlo simulation is a generally accepted statistical technique used to simulate a range of possible future outcomes. Because the valuation model considers a range of possible outcomes, compensation cost is recognized regardless of whether the market condition is actually satisfied.

The assumptions used in estimating the fair value of the RTSR performance share units and performance shares granted during each year were as follows:

	Fiscal Year Ended June 30,	
	2020	2019
Expected volatility	30 %- 31%	30 %- 33%
Expected life (in years)	2.4 - 2.9	2.4 - 3.0
Risk-free interest rates	1.5 %- 1.8%	2.5 %- 3.0%
Dividend yield	None	None

The following table summarizes activity in unvested RTSR performance share units and performance shares for the fiscal year ended June 30, 2020:

	RTSR Units and Shares	Weighted Average Grant-Date Fair Value
Target Number Unvested as of June 30, 2019	525,256	\$ 35.75
Target Number Granted	130,284	63.12
Target Number Vested	(230,261)	25.25
Target Number Cancelled/forfeited/adjusted	2,624	40.53
Target Number Unvested as of June 30, 2020	427,903	\$ 49.02

In fiscal 2020, participants vested and settled 734,000 net settled shares, resulting in \$24.0 million of cash paid on behalf of participants for withholding taxes. In fiscal 2019, participants vested and settled 262,000 net settled shares, resulting in \$5.4 million of cash paid on behalf of participants for withholding taxes.

As of June 30, 2020, \$37.0 million of unrecognized compensation cost related to restricted stock and restricted stock units (including performance shares and performance share units, respectively) is expected to be recognized as expense over a weighted-average period of approximately 1.7 years. The weighted-average grant-date fair value of restricted stock and restricted stock units in fiscal 2020, 2019, and 2018 was \$57.17, \$44.65, and \$34.99, respectively. The fair value of restricted stock units vested in fiscal 2020, 2019, and 2018 was \$34.8 million, \$13.2 million, and \$13.6 million, respectively.

15. OTHER (INCOME)/EXPENSE, NET

The components of other (income)/expense, net for the fiscal year ended June 30, 2020, 2019, and 2018 are as follows:

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Other (income)/expense, net			
Debt refinancing costs ⁽¹⁾	\$ 16.3	\$ 15.8	\$ 11.8
Foreign currency (gains) and losses ⁽²⁾	(3.0)	(0.5)	(4.6)
Other ⁽³⁾	(5.4)	(12.6)	(1.7)
Total other (income)/expense	\$ 7.9	\$ 2.7	\$ 5.5

- (1) The expense in the fiscal year ended June 30, 2020 includes (a) a write-off of \$6.0 million of previously capitalized financing charges related to the Company's recently repaid euro-denominated term loan under its senior secured credit facilities and the Company's recently redeemed Euro 2024 Notes and (b) a \$10.0 million premium on early redemption of the Euro 2024 Notes. The expense in the fiscal year ended June 30, 2019 includes \$15.8 million of financing charges related to the offering of the USD 2028 Notes. The fiscal year ended June 30, 2018 include financing charges of \$11.8 million related to the offering of the USD 2026 Notes and an amendment to the Credit Agreement, which included a \$6.1 million charge for commitment fees paid during the first quarter of fiscal 2018 on a related bridge facility.
- (2) Foreign currency (gains) and losses include both cash and non-cash transactions.
- (3) Included within Other are unrealized derivative instrument gains of \$3.2 million and \$12.9 million during the fiscal years ended June 30, 2020 and 2019, respectively.

16. LEASES

The Company leases certain manufacturing and office facilities, land, vehicles, and equipment. The terms of these leases vary widely, although most have terms between 3 and 10 years.

In accordance with ASC 842, *Leases*, the Company recognizes a "right-of-use" asset and related lease liability at the commencement date of each lease based on the present value of the fixed lease payments over the expected lease term. The lease term for this purpose will include any renewal period where the Company determines that it is reasonably certain that it will exercise the option to renew. While certain leases also permit Catalent to terminate the lease in advance of the nominal term upon payment of an associated penalty, the Company generally does not take into account potential early termination dates

in its determination of the lease term as it is reasonably certain not to exercise an early-termination option as of the lease commencement date.

The Company uses its incremental borrowing rate, which represents the interest rate the Company would expect to pay on a collateralized basis to borrow an amount equal to the lease payments under similar terms, in order to calculate the present value of a lease, since the implicit discount rate for its leases is not readily determinable.

Fixed lease payments are recognized on straight-line basis over the lease term, while variable payments are recognized in the period incurred. As permitted by ASC 842, the Company has elected not to separate those components of a lease agreement not related to the leasing of an asset from those components that are related.

The Company does not record leases with an initial lease term of 12 months or less on its consolidated balance sheets. The Company recognizes lease expense for these short-term leases on a straight-line basis over the lease term.

Supplemental information concerning the leases recorded in the Company's consolidated balance sheet as of June 30, 2020 is detailed in the following table:

(Dollars in millions)	Line item in the consolidated balance sheet	Balance at June 30, 2020
Right-of-use assets:		
Finance leases	Property, plant, and equipment, net	\$ 89.9
Operating leases	Other assets	101.4
Current lease liabilities:		
Finance leases	Current portion of long-term obligations and other short-term borrowings	13.8
Operating leases	Other accrued liabilities	14.6
Non-current lease liabilities:		
Finance leases	Long-term obligations, less current portion	128.4
Operating leases	Other liabilities	88.2

The components of the net lease costs for the fiscal year ended June 30, 2020 reflected in the Company's consolidated statement of operations were as follows:

(Dollars in millions)	Fiscal Year Ended June 30, 2020
Finance lease costs:	
Amortization of right-of-use assets	\$ 12.6
Interest on lease liabilities	12.3
Total	24.9
Operating lease costs	
Operating lease costs	19.4
Variable lease costs	6.2
Total lease costs	\$ 50.5

The short-term lease cost amounted to \$3.3 million during the fiscal year ended June 30, 2020.

The weighted average remaining lease term and weighted average discount rate related to the Company's right-of-use assets and lease liabilities as of June 30, 2020 are as follows:

Weighted average remaining lease term (years):	
Finance leases	12.8
Operating leases	11.6
Weighted average discount rate:	
Finance leases	8.3 %
Operating leases	4.4 %

Supplemental information concerning the cash-flow impact arising from the Company's leases for the fiscal year ended June 30, 2020 recorded in the Company's unaudited consolidated statement of cash flows is detailed in the following table (in millions):

	Fiscal Year Ended June 30, 2020
Cash paid for amounts included in lease liabilities:	
Financing cash flows used for finance leases	\$ 48.1
Operating cash flows used for finance leases	12.3
Operating cash flows used for operating leases	16.6
Non-cash transactions:	
Right-of-use assets obtained in exchange for new finance lease liabilities	19.1
Right-of-use assets obtained in exchange for new operating lease liabilities	64.9

As of June 30, 2020, the Company expects that its future minimum lease payments will become due and payable as follows:

(Dollars in millions)	Finance Leases	Operating Leases	Total
2021	\$ 23.3	\$ 18.1	\$ 41.4
2022	21.0	17.4	38.4
2023	20.4	16.9	37.3
2024	18.9	13.3	32.2
2025	15.8	10.0	25.8
Thereafter	128.9	64.4	193.3
Total minimum lease payments	228.3	140.1	368.4
Less: interest	86.1	37.3	123.4
Total lease liabilities	\$ 142.2	\$ 102.8	\$ 245.0

17. COMMITMENTS AND CONTINGENCIES

Contingent Losses

From time to time, the Company may be involved in legal proceedings arising in the ordinary course of business, including, without limitation, inquiries and claims concerning environmental contamination as well as litigation and allegations in connection with acquisitions, product liability, manufacturing or packaging defects, and claims for reimbursement for the cost of lost or damaged active pharmaceutical ingredients, the cost of any of which could be significant. The Company intends to vigorously defend itself against any such litigation and does not currently believe that the outcome of any such litigation will have a material adverse effect on the Company's financial statements. In addition, the healthcare industry is highly regulated and government agencies continue to scrutinize certain practices affecting government programs and otherwise.

From time to time, the Company receives subpoenas or requests for information relating to the business practices and activities of customers or suppliers from various governmental agencies or private parties, including from state attorneys

general, the U.S. Department of Justice, and private parties engaged in patent infringement, antitrust, tort, and other litigation. The Company generally responds to such subpoenas and requests in a timely and thorough manner, which responses sometimes require considerable time and effort and can result in considerable costs being incurred. The Company expects to incur costs in future periods in connection with future requests.

18. SEGMENT AND GEOGRAPHIC INFORMATION

As discussed in Note 1, *Basis of Presentation and Summary of Significant Accounting Policies*, the Company conducts its business within the following segments: Softgel and Oral Technologies, Biologics, Oral and Specialty Delivery, and Clinical Supply Services. The Company evaluates the performance of its segments based on segment revenue and segment earnings before non-controlling interest, other (income)/expense, impairments, restructuring costs, interest expense, income tax (benefit)/expense, and depreciation and amortization (“Segment EBITDA”). The Company considers its reporting segments results in the context of a similar Company-wide measure: EBITDA from operations, which the Company defines as consolidated earnings from operations before interest expense, income tax (benefit)/expense, depreciation and amortization, adjusted for the income or loss attributable to non-controlling interest. Neither Segment EBITDA nor EBITDA from operations is defined under U.S. GAAP, and neither is a measure of operating income, operating performance, or liquidity presented in accordance with U.S. GAAP. Each of these non-GAAP measures is subject to important limitations. This Note to the consolidated financial statements includes information concerning Segment EBITDA and EBITDA from operations (a) because Segment EBITDA and EBITDA from operations are operational measures used by management in the assessment of the operating segments, the allocation of resources to the segments, and the setting of strategic goals and annual goals for the segments, and (b) in order to provide supplemental information that the Company considers relevant for the readers of the consolidated financial statements, but such information is not meant to replace or supersede U.S. GAAP measures. The Company’s presentation of Segment EBITDA and EBITDA from operations may not be comparable to similarly titled measures used by other companies. The most directly comparable U.S. GAAP measure to EBITDA from operations is net earnings/(loss). Included in this Note is a reconciliation of net earnings/(loss) to EBITDA from operations.

The following tables include net revenue and Segment EBITDA for each of the Company's current reporting segments during the fiscal years ended June 30, 2020, 2019, and 2018 (restated in accordance with ASC 280, *Segment Reporting*; see Note 1, *Basis of Presentation and Summary of Significant Accounting Policies* concerning the reorganization of the reporting segments during fiscal 2020):

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Net revenue:			
Softgel and Oral Technologies	\$ 1,062.0	\$ 1,039.2	\$ 1,114.5
Biologics	1,021.6	573.3	437.0
Oral and Specialty Delivery	675.9	597.7	503.3
Clinical Supply Services	345.0	321.4	430.4
Inter-segment revenue elimination	(10.2)	(13.6)	(21.8)
Net revenue	\$ 3,094.3	\$ 2,518.0	\$ 2,463.4

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Segment EBITDA reconciled to net earnings:			
Softgel and Oral Technologies	\$ 256.5	\$ 236.3	\$ 275.1
Biologics	237.6	146.9	111.1
Oral and Specialty Delivery	200.8	175.1	129.9
Clinical Supply Services	91.2	84.4	76.2
Sub-Total	\$ 786.1	\$ 642.7	\$ 592.3
Reconciling items to net earnings			
Unallocated costs ⁽¹⁾	(145.9)	(142.9)	(138.8)
Depreciation and amortization	(253.7)	(228.6)	(190.1)
Interest expense, net	(126.1)	(110.9)	(111.4)
Income tax expense	(39.7)	(22.9)	(68.4)
Net earnings	\$ 220.7	\$ 137.4	\$ 83.6

- (1) Unallocated costs include restructuring and special items, equity-based compensation, impairment charges, certain other corporate directed costs, and other costs that are not allocated to the segments as follows:

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Impairment charges and gain/(loss) on sale of assets	\$ (5.5)	\$ (5.1)	\$ (8.7)
Equity compensation	(48.1)	(33.3)	(27.2)
Restructuring and other special items ^(a)	(42.2)	(57.7)	(54.4)
Other income/(expense), net ^(b)	(7.9)	(2.7)	(5.5)
Non-allocated corporate costs, net	(42.2)	(44.1)	(43.0)
Total unallocated costs	<u>\$ (145.9)</u>	<u>\$ (142.9)</u>	<u>\$ (138.8)</u>

- (a) Restructuring and other special items during fiscal 2020 include transaction and integration costs associated with the Company's Biologics acquisitions, the disposal of its site in Australia, and other restructuring initiatives across the Company's network of sites.

Restructuring and other special items during fiscal 2019 include transaction and integration costs associated with the acquisitions of Paragon and Juniper Pharmaceuticals, Inc. Restructuring and other special items during fiscal 2018 also include transaction and integration costs associated with the acquisition of Catalent Indiana.

- (b) Refer to Note 15, *Other (income)/expense, net*, for details of financing charges and foreign currency translation adjustments recorded within other income/(expense), net.

The following table includes total assets for each segment, as well as reconciling items necessary to total the amounts reported in the consolidated balance sheets.

Total Assets

(Dollars in millions)	June 30, 2020	June 30, 2019
Softgel and Oral Technologies	\$ 1,501.8	\$ 1,586.5
Biologics	3,775.0	2,825.7
Oral and Specialty Delivery	1,247.4	1,098.7
Clinical Supply Services	451.2	463.2
Corporate and eliminations	801.1	209.9
Total assets	<u>\$ 7,776.5</u>	<u>\$ 6,184.0</u>

The following tables include depreciation and amortization expense and capital expenditures for the fiscal years ended June 30, 2020, 2019, and 2018 for each segment, as well as reconciling items necessary to total the amounts reported in the consolidated statements of operations:

Depreciation and Amortization Expense

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Softgel and Oral Technologies	\$ 46.1	\$ 54.1	\$ 59.0
Biologics	112.0	65.4	44.7
Oral and Specialty Delivery	55.1	69.7	49.3
Clinical Supply Services	18.8	18.8	19.5
Corporate	21.7	20.6	17.6
Total depreciation and amortization expense	<u>\$ 253.7</u>	<u>\$ 228.6</u>	<u>\$ 190.1</u>

Capital Expenditures

(Dollars in millions)	Fiscal Year Ended June 30,		
	2020	2019	2018
Softgel and Oral Technologies	\$ 53.6	\$ 82.5	\$ 65.8
Biologics	329.6	79.3	42.0
Oral and Specialty Delivery	55.4	29.2	28.9
Clinical Supply Services	10.0	2.9	11.5
Corporate	17.2	24.2	28.3
Total capital expenditures	<u>\$ 465.8</u>	<u>\$ 218.1</u>	<u>\$ 176.5</u>

The following table presents long-lived assets⁽¹⁾ by geographic area:

(Dollars in millions)	Long-Lived Assets ⁽¹⁾	
	June 30, 2020	June 30, 2019
United States	\$ 1,396.0	\$ 1,066.0
Europe	404.5	344.4
International Other	100.3	126.3
Total	<u>\$ 1,900.8</u>	<u>\$ 1,536.7</u>

(1) Long-lived assets include property, plant, and equipment, net of accumulated depreciation.

19. SUPPLEMENTAL BALANCE SHEET INFORMATION

Supplemental balance sheet information at June 30, 2020 and June 30, 2019 is detailed in the following tables.

Inventories

Work-in-process and inventories include raw materials, labor, and overhead. Total inventories consist of the following:

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer, and our Senior Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Our management, with the participation of our Chief Executive Officer, and our Senior Vice President and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Annual Report. Based upon that evaluation, our Chief Executive Officer and our Senior Vice President and Chief Financial Officer concluded that, as of June 30, 2020, our disclosure controls and procedures were effective to accomplish their objectives at the reasonable assurance level.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over our financial reporting. Our internal control over financial reporting is designed to provide reasonable assurances regarding the reliability of financial reporting and the preparation of our consolidated financial statements in accordance with U.S. GAAP.

Our internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because either conditions change or the degree of compliance with our policies and procedures may deteriorate.

Our management has assessed the effectiveness of our internal control over financial reporting as of June 30, 2020. In making this assessment, management used the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (2013)*. Based on this assessment, our management concluded that our internal control over financial reporting was effective as of June 30, 2020.

The effectiveness of our internal control over financial reporting as of June 30, 2020 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in its report, which is included in Item 8. Financial Statements and Supplementary Data in this Annual Report.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information concerning our Directors and Executive Officers, “Section 16(a) Beneficial Ownership Reporting Compliance,” definitive shareholder communications with our board of directors, and corporate governance may be found in our Proxy Statement for the 2020 Annual Meeting of Shareholders (the “Proxy Statement”), which will be filed within 120 days after June 30, 2020, the close of our fiscal year covered by this Annual Report. Such information is incorporated by reference.

ITEM 11. EXECUTIVE COMPENSATION

Information concerning executive compensation may be found in the Proxy Statement, which will be filed within 120 days after June 30, 2020, the close of our fiscal year covered by this Annual Report. Such information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information regarding security ownership of certain beneficial owners and management may be found in the Proxy Statement, which will be filed within 120 days after June 30, 2020, the close of our fiscal year covered by this Annual Report. Such information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information regarding certain relationships and related-party transactions and director independence may be found in the Proxy Statement, which will be filed within 120 days after June 30, 2020, the close of our fiscal year covered by this Annual Report. Such information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information regarding the fees paid to and services performed by our independent accountants may be found in the Proxy Statement, which will be filed within 120 days after June 30, 2020, the close of our fiscal year covered by this Annual Report. Such information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBIT AND FINANCIAL STATEMENT SCHEDULES

(a)(1) Financial Statements. The Financial Statements listed in the Index to Financial Statements are filed under Item 8. Financial Statements and Supplementary Data of this Annual Report.

(a)(2) Financial Statements Schedule.

Deferred Tax Assets - Valuation Allowance

(Dollars in millions)	Beginning Balance	Current Period (Charge) / Benefit	Deductions and Other	Ending Balance
Fiscal year ended June 30, 2018				
Tax valuation allowance	\$ (78.8)	\$ (13.8)	\$ 6.4	\$ (86.2)
Fiscal year ended June 30, 2019				
Tax valuation allowance	\$ (86.2)	\$ 11.3	\$ (1.4)	\$ (76.3)
Fiscal year ended June 30, 2020				
Tax valuation allowance	\$ (76.3)	\$ 21.3	\$ 2.1	\$ (52.9)

The schedule for the allowance for doubtful accounts is not included in this Item 15 as the required information is included in Note 19 to the Consolidated Financial Statements. The remaining schedules are not applicable.

(b) Exhibits.

The agreements and other documents filed as exhibits to this report are not intended to provide factual information or other disclosure other than with respect to the terms of the agreements or other documents themselves and you should not rely on them for that purpose. In particular, any representation or warranty made by us in these agreements or other documents were made solely within the specific context of the relevant agreement or document and may not describe the actual state of affairs as of the date they were made or at any other time.

<u>Exhibit No.</u>	<u>Description</u>
2.1	Agreement and Plan of Merger, dated April 14, 2019, by and among Catalent Pharma Solutions, Inc., Paragon Bioservices, Inc., solely for purposes of Section 4.12 (solely with respect to the Equity Financing (as defined therein)) and Section 8.19, Catalent, Inc., and Pearl Shareholder Representative, LLC (incorporated by reference to exhibit 2.1 to the Company's Current Report on Form 8-K filed on April 17, 2019).
