PEOPLE POWERING
KAMAN

A photograph of Neal J. Keating, Chairman, President and Chief Executive Officer of Kaman, in a factory setting. He is wearing a light blue button-down shirt and dark trousers, with his hands on his hips. He is looking towards a woman in a blue shirt who is partially visible in the foreground, wearing safety glasses. The background shows a metal safety cage and industrial equipment.

“When I consider the future of Kaman, it’s the people who inspire the most confidence in our continued success. We have an exceptional team across all of our businesses. They are truly the future of this company.”

Neal J. Keating
Chairman, President and
Chief Executive Officer

A photograph of a man with glasses and a gold hoop earring, wearing a blue polo shirt, looking towards a piece of industrial machinery. The machinery has a white panel with the word "ACE" printed on it. The background is a factory or workshop environment with yellow walls and various equipment.

DEAR SHAREHOLDERS,

When thinking about Kaman's future, what excites me most is not our products, solutions, technologies, and infrastructure, important as these are to our continued success. What excites me most is the extraordinary blend of skills and talents our 5,300 employees across the globe bring to Kaman. Every day, here in Connecticut and as I travel to Kaman locations around the world, I see fresh examples of their dedication to exceeding customer expectations, supporting their colleagues, and building our company together.

This dedication was never more evident than in 2016, when we delivered solid results in the face of significant market headwinds. In Distribution, prolonged weakness in industrial end-markets weighed on our financial results. Despite this, we continued to invest in productivity initiatives, including operational process improvements and data analytics that position our Distribution segment to deliver improved future results. Importantly, the team at our Distribution segment has continued its focus on

delivering outstanding experiences to our customers, resulting in record satisfaction scores. In Aerospace, strong growth put pressure on our people to step up and meet increased demand – and they delivered across the board.

In 2016, Kaman reported net earnings from continuing operations of \$58.9 million, or \$2.10 per diluted share, compared to \$60.4 million, or \$2.17, in 2015. Earnings were impacted by lower organic revenues in Distribution, which were 6.5% lower than the prior year. Once again, we generated very strong cash flow during the year: \$107.7 million net cash provided by operating activities in 2016, compared to \$109.6 million during 2015. With our January 2017 dividend payment, we have paid dividends for 47 consecutive years and remain committed to returning capital to shareholders. During 2016, our share repurchase program and dividends, combined, returned \$33 million to shareholders, a record for the company.

Aerospace turned in another year of strong performance in 2016.

We have also maintained our commitment to investing in the future of our company. This includes investments in machinery and equipment, expanded facilities, and new ERP systems in both Distribution and Aerospace. Perhaps most significantly, 2016 once again demonstrated our strong commitment to investing in our people. We graduated the first class of the Kamatics Apprentice Training Program, a multi-year machinist initiative. We inducted the fourth class of the Kaman Leadership Development Program for high potential employees, and launched Women Advocating Leadership at Kaman, or WALK, which aims to increase Kaman's global representation of women in leadership roles. We also implemented a new Talent Management System, "My Kaman Career Connection," which includes performance, succession, and learning modules that empower employees and managers to better track goals and progress.

AEROSPACE

Aerospace turned in another year of strong performance in 2016. Revenues for 2016 were \$702.1 million, an increase of 17.5% from 2015 revenues of \$597.6 million. These results reflect higher organic sales, due primarily to increased deliveries of the Joint Programmable Fuze (JPF) to the U.S. Government and the contributions from our 2015 acquisitions. Operating profit for 2016 increased 4.2% to \$115.0 million from \$110.3 million in 2015, reflecting strong operating performance. This represents a five-year compound annual growth rate of 7.4% in operating profit dollars.

Our specialty bearings product lines continued to record outstanding results in 2016, led by Kamatics, which celebrated its 50th anniversary. Demand from the Airbus A350 program continues to meet our high expectations. Our RWG facility in Höchstadt, Germany, which earned site qualification from Boeing in 2015, received its first

Boeing order in 2016. We completed the expansion of our facility in Bloomfield, Connecticut, and continue to invest in other facilities to meet current and projected growth.

The integration of EXTEX, our 2015 acquisition, with our specialty bearings business has proceeded according to plan, and we are beginning to leverage our international sales force to open up significant new global opportunities. The acquisition of GRW Bearing GmbH (GRW), our largest-ever acquisition, also closed in late 2015. As with EXTEX, the integration of GRW into the Kaman family during 2016 has been very successful, and we look forward to the continued contributions of both companies as we enter 2017.

In our fuzing and precision product lines, the JPF achieved record production, revenue, and profit in 2016. The high reliability and functionality of this product has resulted in unprecedented interest and demand from outside the U.S. as well as domestically. Order backlog for the JPF remains strong, and to meet this demand, our Orlando, Florida and Middletown, Connecticut operations have expanded their workforces significantly.

In 2015, we announced that our Aerosystems group had resumed production of commercial K-MAX[®] heavy-lift utility helicopters. The aircraft are being manufactured at our Jacksonville, Florida and Bloomfield, Connecticut facilities. We expect the first new helicopter to be delivered in the first half of 2017. The first customer for the new K-MAX[®] is a Chinese firm, with orders for three helicopters. This initial sale was the result of a multi-year effort to gain access to the significant Chinese market. In addition, we continue to work with both the U.S. military and Department of the Interior to develop additional functionality, with the goal of establishing a program of record for the unmanned K-MAX[®] aircraft, developed with Lockheed Martin.

To continue to strengthen our platform, we invested in facilities and consolidated locations.

Pictured in the Bloomfield paint booth is the first K-MAX® built at the company's Jacksonville plant.

As part of our long-term strategic plan, Kaman Aerospace has continued expanding its footprint to capitalize on market opportunities and stay close to current and prospective customers. Today, we have twenty-one facilities in six countries, including the U.S.; our non-U.S.-based Aerospace workforce is now fully one-third that of our domestic workforce. Kaman Aerospace is truly a global organization well positioned in the ever-changing aerospace market.

DISTRIBUTION

Our Distribution business faces a challenging market environment. While the broader economy continues to expand, mostly driven by consumer spending on services, including housing, health care, and transportation, the industrial sector on which our Distribution business depends has not been growing. Largely as a result of this, Distribution revenues declined 6.0% in 2016 to \$1.11 billion, from \$1.18 billion in 2015. Operating profit from continuing operations for 2016 was \$41.9 million, compared to \$49.4 million in 2015. Thanks to dedicated expense management, designed to offset some of the impact of the economic climate, operating margins from continuing operations were 3.8% in 2016, down just 40 basis points from 4.2% in 2015.

During 2016, we launched an initiative at Distribution to strengthen the business through implementing operational process improvements and building proprietary data analytical tools. These efforts have been successful; today, Distribution is well positioned for future growth and improved profitability.

Through a number of acquisitions over the last five years, as well as through organic expansion, Parker Hannifin is now Distribution's largest supplier, a partnership that remains strong not only within the Fluid Power platform, but also across all three Distribution platforms. During 2016, we invested in upgrading and expanding several of our ParkerStore locations across the United States, allowing us to provide a better, higher quality experience to our customers.

To further strengthen our platform, we have invested in our facility infrastructure and have consolidated locations. Upgraded facilities will drive more efficient operations and enable us to deliver greater value to our customers. It is worth noting that the cost of implementing quality and productivity enhancements tends to mask the bottom-line improvements achieved in Distribution; we expect that they will lead to margin growth in 2017, as the costs of implementing these improvements wind down.

In 2016, we saw continued consolidation among suppliers, which favors larger national service providers like Kaman. In 2017 and beyond, we will maintain our focus on delivering value-added services, which create higher margins and competitive differentiation. We will seek attractive opportunities to further build our platforms through targeted, strategic acquisitions in the large but still fragmented distribution industry.

A LOOK AHEAD

Last year's progress demonstrated the power of our diversified business strategy, as strength in Aerospace markets offset weakness in Distribution markets. Our Aerospace business will continue to focus on further developing our industry-leading portfolio of engineered products while driving operational excellence across all areas of the business. In Distribution, we will look to the margin enhancement initiatives discussed above to improve profitability while maintaining our focus on our three-platform strategy. In both businesses, we will carefully evaluate acquisitions and other investments that enable us to deliver greater value to our customers and shareholders. Across Kaman, we will be sharpening our focus on sustainability, from monitoring and control of our greenhouse gas emissions to supporting next-generation aircraft that use more sustainable fuels.

Before I sign off, I want to acknowledge the retirement, on January 3rd, of Ronald Galla, Kaman's Senior Vice President and Chief Information Officer. When Ron joined Kaman in 1984, he was the company's first corporate IT employee. Since that time, Ron has presided over three decades of revolutionary technological change that, under his leadership, has transformed our organization and supported our growth. On behalf of everyone at Kaman, I wish Ron a long and happy retirement, which he has certainly earned.

Finally, I began this letter by mentioning the amazing dedication and talent of Kaman's 5,300 employees. I would like to end it on the same note, along with deep gratitude to our loyal customers, our supportive Board of Directors, and our shareholders.

Chairman, President and
Chief Executive Officer

Paul Kuhn 1941 – 2016

Last year saw the passing of Paul Kuhn, who served as Chairman, President and Chief Executive Officer of Kaman from 2001 – 2008. Paul, who joined the company in 1999, led a fundamental transformation of Kaman and left it much stronger than when he joined.

KAMAN IS 5,300
PEOPLE WORKING
AS ONE TEAM TO
BUILD THE FUTURE
OF OUR COMPANY.

WE'D LIKE YOU TO MEET A FEW OF THEM.

“As our relationship with an international engine OEM has grown across our sites, we’ve been able to innovate our manufacturing processes to deliver even greater value.”

Brian Cormier
Program Manager
Kaman Aerosystems - Composite Structures
Bloomfield, Connecticut

PEOPLE POWERING INNOVATION

FROM NEW PROCESSES TO NEXT-GENERATION PRODUCTS.

In 2014, a large engine original equipment manufacturer awarded Kaman Aerospace a contract to manufacture composite A-frame fairings in support of an Airbus commercial platform. It was the beginning of a successful relationship, based on trust and demonstrated performance, which continues to grow. Because of the long-term nature of this relationship, Kaman has been able to invest in innovative manufacturing processes that include purpose-built “cells” or configurations that create efficiencies benefitting both Kaman and our customer. We continue to implement such innovations across our sites, including our U.K. Composites site, which was awarded a long-term contract in 2016 to support additional engine platforms, led by program manager Wendy Crozier.

Behind this successful relationship is a cross-functional team of program managers, engineers, technicians, and quality specialists. The team works collaboratively, across four facilities in the United States and Great Britain, to ensure that we continue to deliver extraordinary results – and continuous innovation – to this important global customer.

Our focus on innovative products is exemplified by Kaman Specialty Bearings. Our industry-leading KAflex® and Tufflex® couplings are maintenance free, repairable, and have extended service life and increased reliability.

Bryan Tat, a Specialty Bearings machinist at our Bloomfield, CT facility.

72
YEARS

For over seven decades, Kaman has consistently developed technical breakthroughs and innovative solutions that help our customers solve their most critical challenges.

“Adding value means working hard to understand a client’s business and unique needs. This is how we were able to help Lite-Check develop a more efficient diagnostic testing solution.”

Cody Harmon
Account Manager
Kaman Fluid Power
Coeur d’Alene, Idaho

PEOPLE POWERING VALUE-ADDED SOLUTIONS

KAMAN DISTRIBUTION HAS EVOLVED FROM SUPPLYING PARTS TO DELIVERING SOLUTIONS.

For Kaman Distribution, delivering value to customers means being more than a parts supplier. Today, Kaman is a true partner to our customers, delivering complete solutions that make them more efficient and successful.

Consider our relationship with Lite-Check, a provider of diagnostic testing equipment for the trucking industry. Kaman's engineers designed and manufactured a pneumatic manifold for Lite-Check that increased the reliability of their testing machines. This solution was spearheaded by Cody Harmon, who joined Kaman through our acquisition of Northwest Hose & Fittings, and Tim Sly, who joined from the Calkins Fluid Power acquisition. The success of the Lite-Check relationship thus illustrates not only our focus on providing value-added solutions; it demonstrates our success in effectively integrating new acquisitions – and talented people – into the Kaman way of doing business.

\$35
BILLION

Through its three platforms – Fluid Power, Bearings & Power Transmission, and Automation – Kaman addresses a \$35 billion market.

“In the year following our acquisition, I’ve been impressed by the synergies between GRW and Kaman. Our cultures are both aligned around continuous innovation and outstanding client service.”

Reinhard Goebel
Technologist/Machine-setter
CNC Outer/Inner Grinding
Rimpar, Germany

PEOPLE POWERING GLOBAL SUCCESS

A STRATEGIC APPROACH TO GLOBAL EXPANSION.

Aerospace is among the world's most global businesses. In recent years, Kaman Aerospace has significantly expanded our business outside of the United States. Today, we conduct business in over 50 countries from 21 facilities around the world, and over one-third of our aerospace employees work outside of the U.S.

Our acquisition of GRW Bearing GmbH, a German-based designer and manufacturer of super-precision miniature ball bearings, exemplifies our strategic approach to global expansion. Acquired in 2015, GRW is focused on the demanding applications segment of the miniature ball bearings market, where low noise requirements, extreme temperatures, ultra-high speeds, and/or caustic environments require both exceptional engineering design and continuous operating performance capabilities. The company represents an outstanding complement to our own market-leading specialty bearings and engineered product lines. Like Kaman, GRW is focused on solving the toughest problems of OEM customers and achieving the highest standards of performance in the most demanding applications. The combined companies will enable us to drive significant synergies through both operational efficiencies and additional sales growth.

50
COUNTRIES

21
LOCATIONS

Kaman field engineers are on-site all over the globe, supported by inside sales teams and design engineers who provide field engineering and customers with reports, drawings, technical data, and unparalleled service levels.

“Our response to customers during Hurricane Matthew demonstrated that we really are one integrated platform, working seamlessly across our branches to meet urgent client requirements.”

Kevin Regalado
Customer Service Team Leader
Kaman Industrial Technologies
Miami, Florida

PEOPLE POWERING NEW RELATIONSHIPS

A NATURAL DISASTER REVEALS WHAT KAMAN IS MADE OF.

When Hurricane Matthew impacted the Southeast in October 2016, a multinational energy company found its regional lubricants facility under water, ruining four electric motors that were critical to its operations. Fortunately, the Kaman Distribution team had been building the foundations of a relationship with the customer, even before any business transpired, including a tour of Kaman's regional distribution center. So when disaster hit, the company knew whom to call.

Our local branch was closed by the hurricane, so the call was automatically routed to our Tampa facility. The team in Tampa got right to work, providing substitute motors from our closed distribution center, which was reopened to support the customer. Because of our quick response and seamless coordination across the organization, the customer was able to get back to full production without significant downtime. Since then, the relationship with the customer has grown, and they have purchased additional power transmission and bearing products.

240
LOCATIONS
ACROSS
THE U.S. &
PUERTO RICO

Working across locations and regions enables Kaman to deliver a seamless solution to customers, anywhere.

“Thanks to the Leadership Development Program, I was able to move from Distribution to Aerospace, and from marketing to program management, significantly enhancing my skills and providing an amazing opportunity to grow.”

Arti Sheth
Deputy Program Manager
Air Vehicles and MRO
Bloomfield, Connecticut

PEOPLE POWERING KAMAN

OUR MOST IMPORTANT INVESTMENTS ARE THOSE WE MAKE IN OUR PEOPLE.

Highly skilled, high performing people are critical to our future. Kaman invests in people through a wide range of programs. The Kaman Leadership Development Program, now working with its fourth class, recognizes and cultivates talented individuals with demonstrated potential to become future leaders. Participants in the program meet regularly with senior management and take on projects that complement their individual career aspirations. To date, 49 high-potential men and women have participated in the program.

Hiring, retaining, and promoting more women is a special focus at Kaman. In 2016, we inaugurated Women Advancing Leadership at Kaman (WALK). This important program seeks to adapt our culture to help promote women in leadership; provide women with equal access to development opportunities; and create a more work-life balanced, family-friendly company for everyone.

Tribby Warfield (pictured second from the left), Senior Vice President and General Manager of the Automation and Fluid Power platforms of our Distribution segment, is part of the team actively involved in advancing the goals of the WALK program.

49

PARTICIPANTS

Since 2010, 49 high-potential Kaman employees have successfully participated in the Kaman Leadership Development Program.

WE LOOK FORWARD
TO POWERING THE
FUTURE OF KAMAN
TOGETHER.

PART I

ITEM 1. BUSINESS

GENERAL

Kaman Corporation, headquartered in Bloomfield, Connecticut, was incorporated in 1945. We are a diversified company that conducts business in the aerospace and distribution markets. We report information for ourselves and our subsidiaries (collectively, “we,” “us,” “our,” and “the Company”) in two business segments, Distribution and Aerospace. A discussion of 2016 developments is included in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, in this Form 10-K.

Distribution Segment

The Distribution segment brings our commitment to technological leadership and value-added services to the distribution business. The Distribution segment is a leading power transmission, automation and fluid power industrial distributor with operations throughout the United States. With over 4 million SKUs, we provide electro-mechanical products, bearings, power transmission, motion control and electrical and fluid power components to a broad spectrum of industrial markets serving both maintenance, repair and overhaul (“MRO”) and original equipment manufacturer (“OEM”) customers. With approximately 240 locations, including distribution centers, assembly, fabrication and repair facilities, Kaman provides products and service solutions to more than 65,000 active customers representing a highly diversified cross section of industry.

Aerospace Segment

The Aerospace segment produces and markets proprietary aircraft bearings and components; super precision, miniature ball bearings; complex metallic and composite aerostructures for commercial, military and general aviation fixed and rotary wing aircraft; and safe and arming solutions for missile and bomb systems for the U.S. and allied militaries. The segment also markets the design and supply of aftermarket parts to businesses performing MRO in aerospace markets; performs helicopter subcontract work; restores, modifies and supports our SH-2G Super Seasprite maritime helicopters; manufactures and supports our K-MAX® manned and unmanned medium-to-heavy lift helicopters; and provides engineering design, analysis and certification services.

Principal customers include the U.S. military, Sikorsky Aircraft Corporation, The Boeing Company, Airbus, Lockheed Martin, Raytheon and Bell Helicopter. The SH-2G aircraft is currently in service with the Egyptian Air Force and the New Zealand, Peruvian and Polish navies. Operations are conducted throughout the United States, as well as in facilities located in the United Kingdom, Germany, the Czech Republic and Mexico. Additionally, the Company maintains an investment in a joint venture in India.

FINANCIAL INFORMATION ABOUT OUR SEGMENTS

Financial information about our segments is included in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, and Note 19, *Segment and Geographic Information*, of the Notes to Consolidated Financial Statements, included in Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K.

WORKING CAPITAL

A discussion of our working capital is included in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources, in this Form 10-K.

Our Distribution segment requires substantial working capital related to accounts receivable and inventories. Significant amounts of inventory are carried to meet our customers’ requirements. Sales returns do not have a material effect on our working capital requirements.

Our Aerospace segment’s working capital requirements are dependent on the nature and life cycles of the programs for which work is performed. New programs may initially require higher working capital to complete nonrecurring start-up activities and fund the purchase of inventory and equipment necessary to perform the work. Nonrecurring start-up costs on large and complex programs often take longer to recover, negatively impacting working capital in the short-term and producing a corresponding benefit in future periods. As these programs mature and efficiencies are gained in the production process, working capital requirements generally decrease.

Our credit agreement includes a revolving credit facility which is available for additional working capital requirements and investment opportunities. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Note 11, *Debt*, of the Notes to Consolidated Financial Statements, included in Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K.

PRINCIPAL PRODUCTS AND SERVICES

The following table sets forth the percentage contribution of each business segment's products and services to consolidated net sales from continuing operations for each of the three most recently completed years:

	Years Ended December 31,		
	2016	2015	2014
<i>Sales</i>			
Distribution	61.2%	66.3%	64.7%
Aerospace	38.8%	33.7%	35.3%
Total	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

AVAILABILITY OF RAW MATERIALS

While we believe we have sufficient sources for the materials, components, services and supplies used in our manufacturing activities, we are highly dependent on the availability of essential materials, parts and subassemblies from our suppliers and subcontractors. The most important raw materials required for our aerospace products are aluminum (sheet, plate, forgings and extrusions), titanium, nickel, copper and composites. Many major components and product equipment items are procured from or subcontracted on a sole-source basis with a number of domestic and non-U.S. companies. Although alternative sources generally exist for these raw materials, qualification of the sources could take a year or more. We are dependent upon the ability of a large number of suppliers and subcontractors to meet performance specifications, quality standards and delivery schedules at anticipated costs. While we maintain an extensive qualification system to control risk associated with such reliance on third parties, failure of suppliers or subcontractors to meet commitments could adversely affect production schedules and contract profitability, while jeopardizing our ability to fulfill commitments to our customers. Although price increases for raw materials important to some of our products (steel, copper, aluminum, titanium and nickel) may cause margin and cost pressures, we do not foresee any near term unavailability of materials, components or supplies that would have an adverse effect on either of our business segments. For further discussion of the possible effects of changes in the cost or availability of raw materials on our business, see Item 1A, Risk Factors, in this Form 10-K.

PATENTS AND TRADEMARKS

We hold patents and trademarks reflecting functional, design and technical accomplishments in a wide range of areas covering both basic production of certain aerospace products as well as highly specialized devices and advanced technology products in defense related and commercial fields.

Although the Company's patents and trademarks enhance our competitive position, we believe that none of such patents or trademarks is singularly or as a group essential to our business as a whole. We hold or have applied for U.S. and foreign patents with expiration dates that range through the year 2035.

Registered trademarks of the Company include KAflex®, KAron®, and K-MAX®. In all, we maintain 31 U.S. and foreign trademarks.

BACKLOG

The majority of our backlog is attributable to the Aerospace segment. We anticipate that approximately 91.2% of our backlog at the end of 2016 will be performed in 2017. Approximately 46.0% of the Aerospace segment's backlog at the end of 2016 is related to U.S. Government ("USG") contracts or subcontracts.

Total backlog at December 31, 2016, 2015 and 2014, and the portion of the backlog we expect to complete in 2017, is as follows:

	Total Backlog at December 31, 2016	2016 Backlog to be completed in 2017	Total Backlog at December 31, 2015	Total Backlog at December 31, 2014
<i>In thousands</i>				
Aerospace	\$ 581,619	\$ 521,136	\$ 659,350	\$ 518,025
Distribution.....	108,681	108,681	105,777	94,430
Total	<u>\$ 690,300</u>	<u>\$ 629,817</u>	<u>\$ 765,127</u>	<u>\$ 612,455</u>

Backlog related to uncompleted contracts for which we have recorded a provision for estimated losses was \$6.1 million as of December 31, 2016. Backlog related to firm but not yet funded orders was \$2.5 million as of December 31, 2016. Distribution backlog for 2015 and 2014 has been revised to include bearings and power transmission products. See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, for further discussion.

REGULATORY MATTERS

Government Contracts

The USG, and other governments, may terminate any of our government contracts at their convenience or for default if we fail to meet specified performance measurements. If any of our government contracts were to be terminated for convenience, we generally would be entitled to receive payment for work completed and allowable termination or cancellation costs. If any of our government contracts were to be terminated for default, generally the USG would pay only for the work that has been accepted and can require us to pay the difference between the original contract price and the cost to re-procure the contract items, net of the work accepted from the original contract. The USG can also hold us liable for damages resulting from the default.

During 2016, approximately 97.8% of the work performed by the Company directly or indirectly for the USG was performed on a fixed-price basis and the balance was performed on a cost-reimbursement basis. Under a fixed-price contract, the price paid to the contractor is negotiated at the outset of the contract and is not generally subject to adjustment to reflect the actual costs incurred by the contractor in the performance of the contract. Cost reimbursement contracts provide for the reimbursement of allowable costs and an additional negotiated fee.

Compliance with Environmental Protection Laws

Our operations are subject to and affected by a variety of federal, state, local and non-U.S. environmental laws and regulations relating to the discharge, treatment, storage, disposal, investigation and remediation of certain materials, substances and wastes. We continually assess our compliance status and management of environmental matters in an effort to ensure our operations are in substantial compliance with all applicable environmental laws and regulations.

Operating and maintenance costs associated with environmental compliance and management of sites are a normal, recurring part of our operations. These costs often are allowable costs under our contracts with the USG. It is reasonably possible that continued environmental compliance could have a material impact on our results of operations, financial condition or cash flows if more stringent clean-up standards are imposed, additional contamination is discovered and/or clean-up costs are higher than estimated.

See Environmental Matters in Item 3, Legal Proceedings, and Critical Accounting Estimates - Environmental Costs in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Note 16, *Commitments and Contingencies*, in the Notes to Consolidated Financial Statements, included in Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K, for further discussion of our environmental matters.

With respect to all other matters that may currently be pending, in the opinion of management, based on our analysis of relevant facts and circumstances, we do not believe that compliance with relevant environmental protection laws is likely to have a material adverse effect upon our capital expenditures, earnings or competitive position. In arriving at this conclusion, we have taken into consideration site-specific information available regarding total costs of any work to be performed, and the extent of work previously performed. If we are identified as a "potentially responsible party" ("PRP") by environmental authorities at a particular site, we, using information available to us, will also review and consider a number of other factors, including: (i) the financial resources of other PRPs involved in each site, and their proportionate share of the total volume of waste at the site; (ii) the existence of insurance, if any, and the financial viability of the insurers; and (iii) the success others have had in receiving reimbursement for similar costs under similar insurance policies issued during the periods applicable to each site.

International Operations

Our international sales are subject to U.S. and non-U.S. governmental regulations and procurement policies and practices, including regulations relating to import-export control, investment, exchange controls and repatriation of earnings. International sales are also subject to varying currency, political and economic risks.

Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 ("ITRA") added subsection (r) to section 13 of the Securities Exchange Act of 1934, as amended, (the "Exchange Act"), requiring a public reporting issuer to disclose in its annual or quarterly reports whether it or any of its affiliates have knowingly engaged in specified activities or transactions relating to Iran, including activities not prohibited by U.S. law and conducted outside the U.S. by non-U.S. affiliates in compliance with local law. Issuers must also file a notice with the U.S. Securities and Exchange Commission ("SEC") if any disclosable activities under ITRA have been included in the annual or quarterly report. We did not have any disclosable activities during the year ended December 31, 2016.

COMPETITION

The Distribution segment competes for business with several other national distributors of bearings, power transmission, electrical and fluid power products, two of which are substantially larger, and with many regional and local distributors and OEMs. Competitive forces have intensified due to the increasing trend towards national contracts, customers' efforts to obtain material cost savings and the extension of supplier product authorizations within the distribution channel. We compete for business based upon the breadth and quality of products offered, product availability, delivery performance, and price, as well as on the basis of value-added services that we are able to provide.

The Aerospace segment operates in a highly competitive environment with many other organizations, some of which are substantially larger than us and have greater financial strength and more extensive resources. We compete for composite and metallic aerostructures subcontracts, and helicopter sales and structures, bearings and components business on the basis of price and quality; product endurance and special performance characteristics; proprietary knowledge; the quality of our products and services; the availability of facilities, equipment and personnel to perform contracts; and the reputation of our business. Competitors for our business include small machine shops and offshore manufacturing facilities. We compete for engineering design services business primarily on the basis of technical competence, the reputation of our business, the availability of our personnel and price. We compete for advanced technology fuzing business primarily on the basis of technical competence, product quality and price; and also on the basis of our experience as a developer and manufacturer of fuzes for particular weapon types and the availability of our facilities, equipment and personnel. We are also affected by the political and economic circumstances of our potential foreign customers and, in certain situations, the relationships of those foreign customers with the USG as well as the USG's perceptions of those foreign customers.

RESEARCH AND DEVELOPMENT EXPENDITURES

Customer funded research expenditures (which are included in cost of sales) were \$0.9 million in 2016, \$0.4 million in 2015, and \$1.6 million in 2014. Independent research and development expenditures (which are included in selling, general and administrative expenses) were \$7.7 million in 2016, \$6.7 million in 2015, and \$6.7 million in 2014.

EMPLOYEES

As of December 31, 2016, we employed 5,265 individuals.

FINANCIAL INFORMATION ABOUT GEOGRAPHIC AREAS

Financial information about geographic areas is included in Note 19, *Segment and Geographic Information*, of the Notes to Consolidated Financial Statements, included in Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K.

AVAILABLE INFORMATION

We are subject to the reporting requirements of the Exchange Act and its rules and regulations. The Exchange Act requires us to file reports, proxy statements and other information with the SEC. Copies of these reports, proxy statements and other information can be read and copied at:

SEC Public Reference Room
100 F Street NE
Washington, D.C. 20549

Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-732-0330. The SEC maintains a website that contains reports, proxy statements and other information regarding issuers that file electronically with the SEC. These materials may be obtained electronically by accessing the SEC's website at <http://www.sec.gov>.

We make available, free of charge on our website, our annual reports on Form 10-K, quarterly reports on Form 10-Q, proxy statements, and current reports on Form 8-K as well as amendments to those reports filed or furnished pursuant to Section 13 or 15(d) of the Exchange Act, together with Section 16 insider beneficial stock ownership reports, as soon as reasonably practicable after we electronically file these documents with, or furnish them to, the SEC. These documents are posted on our website at www.kaman.com — select the “Investors” link, then the “Financial Information” link and then the “SEC Filings” link.

We also make available, free of charge on our website, our Certificate of Incorporation, By-Laws, Governance Principles and all Board of Directors' standing Committee Charters (Audit, Corporate Governance, Personnel & Compensation and Finance). These documents are posted on our website at www.kaman.com — select the “Investors” link, then the “Corporate Governance” link and then the “Documents and Downloads” link.

The information contained on our website is not intended to be, and shall not be deemed to be, incorporated into this Form 10-K or any other filing under the Exchange Act or the Securities Act of 1933, as amended.

EXECUTIVE OFFICERS OF THE REGISTRANT

The Company's executive officers as of the date of this report are as follows:

Name	Age	Position	Prior Experience
Neal J. Keating	61	Chairman, President, Chief Executive Officer and Director	Mr. Keating was appointed President and Chief Executive Officer as well as elected a Director of the company effective September 17, 2007. Effective January 1, 2008, he was appointed to the offices of President and Chief Executive Officer and effective March 1, 2008, he was appointed to the additional position of Chairman. Prior to joining the company, Mr. Keating served as Chief Operating Officer at Hughes Supply, a \$5.4 billion industrial distributor that was acquired by Home Depot in 2006. Prior to that, he held senior positions at GKN Aerospace, an aerospace subsidiary of GKN plc, and Rockwell Collins Commercial Systems, and served as a board member of GKN plc and Agusta-Westland.
Steven J. Smidler	58	President of Kaman Industrial Technologies and Executive Vice President of Kaman Corporation	Mr. Smidler assumed the role of President of Kaman Industrial Technologies on September 1, 2010, after joining the company in December 2009 as Senior Vice President and Chief Operating Officer of Kaman Industrial Technologies. Effective February 20, 2012, he was appointed Executive Vice President of Kaman Corporation. Mr. Smidler joined the company from Lenze Americas Corporation where he served as Executive Vice President, with responsibility for marketing, sales, finance, business systems and product technology for the Americas. Mr. Smidler was also a member of the management committee of the Lenze Group, Germany, held the position of President and Treasurer for Lenze Americas and served as Treasurer and a Board member for the Lenze ACTech production company. Prior to that, he served as Vice President, Americas Sales Operations at Eaton Corporation and Vice President, Marketing of the Global Manufacturing Group at Rockwell Automation, Inc.
Robert D. Starr	49	Executive Vice President and Chief Financial Officer	Mr. Starr was appointed Executive Vice President effective July 1, 2015, and has served as the Chief Financial Officer of the company since July 1, 2013. Mr. Starr joined the company in 2009 as Vice President - Treasurer. Prior to joining Kaman, Mr. Starr served as Assistant Treasurer at Crane Co. of Stamford, Connecticut, a \$2.6 billion diversified manufacturer of highly engineered industrial products. He also previously served as Managing Director, Corporate Finance at Aetna, Inc. of Hartford, Connecticut and as Director, Capital Markets and Risk Management at Fisher Scientific International, Inc. of Hampton, New Hampshire. Mr. Starr was also an associate at both Salomon Smith Barney in New York and Chase Securities, Inc. in New York and Singapore.
Gregory L. Steiner	59	President of Kaman Aerospace Group, Inc. and Executive Vice President of Kaman Corporation	Mr. Steiner joined the company as President of Kaman Aerospace Group, Inc., with overall responsibility for the company's Aerospace segment, effective July 7, 2008. Effective February 20, 2012, he was appointed Executive Vice President of Kaman Corporation. From 2005 to 2007, Mr. Steiner was employed at GE Aviation-Systems, serving first as Vice President and General Manager, Military Mission Systems and then as Vice President, Systems for GE Aviation-Systems. Prior to that, he served as Group Vice President at Curtiss-Wright Controls, Inc., with responsibility for four aerospace and industrial electronics businesses located in the U.S. and U.K. Before Curtiss-Wright, he had an 18-year career with Rockwell Collins, Inc., serving in a number of progressively responsible positions, departing as Vice President and General Manager of Passenger Systems.

Name	Age	Position	Prior Experience
Phillip A. Goodrich	60	Senior Vice President - Corporate Development	Mr. Goodrich joined the company in 2009 as Vice President - Corporate Development and was named Senior Vice President - Corporate Development in February 2012. He was previously Senior Vice President, Corporate Development with Barnes Group, Inc., Bristol, Connecticut. Mr. Goodrich held similar positions with Ametek, Inc., Paoli, Pennsylvania; and General Signal Corporation, Stamford, Connecticut.
Shawn G. Lisle	50	Senior Vice President and General Counsel	Mr. Lisle joined the company in 2011 and was appointed Senior Vice President and General Counsel effective December 1, 2012. Prior to joining the company, Mr. Lisle served as Senior Counsel for International Paper Company in Memphis, Tennessee. Prior to that, he served as legal counsel for Dana Corporation in Toledo, Ohio, and as an attorney at Porter Wright Morris & Arthur LLP in Columbus, Ohio. He also previously worked as a trial attorney at the U.S. Department of Justice, Tax Division in Washington, D.C. and was a Judge Advocate in the U.S. Navy.
Gregory T. Troy	61	Senior Vice President – Human Resources and Chief Human Resources Officer	Mr. Troy joined the company as Senior Vice President – Human Resources in March 2012. On February 19, 2013, he was appointed to the position of Chief Human Resources Officer. Prior to joining the company, Mr. Troy served as Chief Human Resources Officer of Force Protection, Inc. from April 2011 to March 2012, where he was a member of the Executive Committee. Prior to joining Force Protection, Mr. Troy served as Vice President and Chief Human Resources Officer at Modine Manufacturing Company from February 2006 to April 2011, providing global human resources leadership in the Americas, Europe and Asia. Mr. Troy also previously worked at OMNOVA Solutions Inc., Bosch Corporation, and Mobil Corporation, after serving as a Transportation Officer in the United States Army.
John J. Tedone	52	Vice President, Finance and Chief Accounting Officer	Mr. Tedone has served as Vice President, Finance and the company's Chief Accounting Officer since May 2007. From April 2006 to April 2007, Mr. Tedone served as the company's Vice President, Internal Audit and prior to that as Assistant Vice President, Internal Audit.
Paul M. Villani	51	Senior Vice President and Chief Information Officer	Mr. Villani joined the company in 2015 and was appointed Senior Vice President and Chief Information Officer effective as of January 1, 2017. From August 2015 to December 2016, Mr. Villani served as the Senior Director, Software Development and ERP Support at Kaman Distribution Group. Prior to joining the company, Mr. Villani served as Chief Information Officer at Med Solutions, Inc. from November 2013 to June 2015; and Chief Information Officer at Triad Healthcare, Inc. from 2007 to 2013.

Each executive officer holds office for a term of one year and until his or her successor is duly appointed and qualified, in accordance with the Company's By-Laws.

ITEM 1A. RISK FACTORS

Our business, financial condition, operating results and cash flows can be impacted by the factors set forth below, any one of which could cause our actual results to vary materially from recent results or from our anticipated future results.

Our future operating results may be impacted by changes in global economic and political conditions.

Our future operating results and liquidity may be impacted by changes in general economic and political conditions which may affect, among other things, the following:

- The availability of credit and our ability to obtain additional or renewed bank financing, the lack of which may limit our ability to invest in capital projects and planned expansions or to fully execute our business strategy;
- Market rates of interest, any increase in which would increase the interest payable on some of our borrowings and adversely impact our cash flow;
- The investment performance of our pension plan, as well as the associated discount rate, any adverse changes in which may result in a deterioration in the funded status of the plan and an increase in required contributions and plan expense;
- The relationship between the U.S. Dollar and other currencies, any adverse changes in which could negatively impact our financial results;
- The ability of our customers to pay for products and services on a timely basis, any adverse change in which could negatively impact sales and cash flows and require us to increase our bad debt reserves;
- The volume of orders we receive from our customers, any adverse change in which could result in lower operating profits as well as less absorption of fixed costs due to a decreased business base; and
- The ability of our suppliers to meet our demand requirements, maintain the pricing of their products, or continue operations, any of which may require us to find and qualify new suppliers.

While general economic and political conditions have not impaired our ability to access credit markets and finance our operations to date, there can be no assurance that we will not experience future adverse effects that may be material to our cash flows, competitive position, financial condition, results of operations, or our ability to access capital.

Our financial performance is significantly influenced by customer demand for the products we distribute.

The financial performance of our Distribution segment, which generated approximately 61.2% of our 2016 consolidated net sales and approximately 26.7% of our 2016 operating income from continuing operations before corporate expenses and net gain on sale of assets, is significantly influenced by customer demand for the products we distribute and the services we provide. Consequently, demand for our products and services has been and will continue to be significantly influenced by the same factors that affect demand for and production of our customers' goods and services, including the following:

- the level of industrial production and manufacturing capacity utilization in the markets we serve;
- the economic health of the manufacturing sector of the U.S. economy, as reflected by the Purchasing Managers Index[®] reported by the Institute for Supply Management, as an index reading of 50 or more implies an expanding manufacturing economy, while a reading below 50 implies a contracting manufacturing economy;
- the consolidation of certain of our manufacturing customers and the trend of manufacturing operations being moved overseas, which subsequently reduces demand for the products we distribute and the services we provide; and
- the general industrial economy, which in declining conditions may cause reduced demand for industrial output.

Any adverse changes in these and other factors affecting the demand for and production of our customers' goods and materials could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our financial performance is also significantly influenced by conditions within the aerospace and defense industries.

The financial performance of our Aerospace segment, which generated approximately 38.8% of our 2016 consolidated net sales, and approximately 73.3% of our 2016 operating income from continuing operations before corporate expenses and net gain on sale of assets, is directly tied to economic conditions in the commercial aviation and defense industries.

The commercial aviation industry tends to be cyclical, and capital spending by airlines and aircraft manufacturers may be influenced by a variety of global factors including current and future traffic levels, aircraft fuel pricing, labor issues, competition, the retirement of older aircraft, regulatory changes, terrorism and related safety concerns, general economic conditions, worldwide airline profits and backlog levels.

The defense industry may be influenced by a changing global political environment, continued pressure on U.S. and global defense spending, U.S. foreign policy and the activity level of military flight operations.

Changes to the aerospace and defense industries and continued pressure to reduce U.S. defense spending could have a material impact on our current and proposed aerospace programs, which could adversely affect our operating results and future prospects. In addition, changes in economic conditions may cause customers to request that firm orders be rescheduled or canceled, which could put a portion of our backlog at risk.

Furthermore, because of the lengthy research and development cycle involved in bringing new products to market, we cannot predict the economic conditions that will exist when a new product is introduced. A reduction in capital spending in the aviation or defense industries could have a significant effect on the demand for our products, which could have an adverse effect on our financial performance or results of operations.

Our USG programs are subject to unique risks.

We have several significant long-term contracts either directly with the USG or where the USG is the ultimate customer, including the Sikorsky BLACK HAWK cockpit program, the Joint Programmable Fuze (“JPF”) program, the Bell Helicopter AH-1Z program and the A-10 program. These contracts are subject to unique risks, some of which are beyond our control. Examples of such risks include:

- The USG may modify, curtail or terminate its contracts and subcontracts at its convenience without prior notice, upon payment for work done and commitments made at the time of termination. Modification, curtailment or termination of our major programs or contracts could have a material adverse effect on our business, financial condition, results of operations and cash flows.
- Our USG business is subject to specific procurement regulations and other requirements. These requirements, although customary in USG contracts, increase our performance and compliance costs. These costs might increase in the future, reducing our margins, which could have a negative effect on our financial condition. Although we have procedures designed to assure compliance with these regulations and requirements, failure to do so under certain circumstances could lead to suspension or debarment, for cause, from USG contracting or subcontracting for a period of time and could have a material adverse effect on our business, financial condition, results of operations and cash flows and could adversely impact our reputation and our ability to receive other USG contract awards in the future.
- The costs we incur on our USG contracts, including allocated indirect costs, may be audited by USG representatives. Any costs found to be improperly allocated to a specific contract would not be reimbursed, and such costs already reimbursed would have to be refunded, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. Moreover, if any audit were to reveal the existence of improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or prohibition from doing business with the USG.
- We are from time to time subject to governmental inquiries and investigations of our business practices due to our participation in domestic and foreign government contracts and programs and our transaction of business domestically and internationally. Adverse findings associated with any such inquiry or investigation could also result in civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or prohibition from doing business with domestic and foreign governments.

Our business may be adversely affected by changes in budgetary priorities of the USG.

Because a significant percentage of our revenue is derived either directly or indirectly from contracts with the USG, changes in federal government budgetary priorities could directly affect our financial performance. A significant decline in government expenditures, a shift of expenditures away from programs that we support or a change in federal government contracting policies could cause federal government agencies to reduce their purchases under contracts, to exercise their right to terminate contracts at any time without penalty or not to exercise options to renew contracts.

The cost and effort to start up new aerospace programs could negatively impact our operating results and profits.

The time required and costs incurred to ramp up a new program can be significant and include nonrecurring costs for tooling, first article testing, finalizing drawings and engineering specifications and hiring new employees able to perform the technical work required. New programs can typically involve a greater volume of scrap, higher costs due to inefficiencies, delays in production and learning curves that are often more extended than anticipated, all of which could have a material effect on our business, financial condition, results of operations and cash flows.

The ability to obtain and retain product approvals issued by the Federal Aviation Administration ("FAA") could adversely affect our Aerospace segment's operating results and profits.

Our Aerospace segment may be impacted by regulations set forth by the FAA to obtain Parts Manufacturer Approvals ("PMAs") to design or produce a modification or replacement aircraft part. The loss or suspension of the Company's product and design approvals could negatively impact our operating results and profits. We believe our current design and production processes that are subject to such regulations by the FAA are in compliance; however, there can be no assurance that we will not lose approvals for our products in the future.

Competition from domestic and foreign manufacturers may result in the loss of potential contracts and opportunities.

The aerospace markets in which we participate are highly competitive, and we often compete for work not only with large OEMs but also sometimes with our own customers and suppliers. Many of our large customers may choose not to outsource production due to, among other things, their own direct labor and overhead considerations and capacity utilization objectives. This could result in these customers supplying their own products or services and competing directly with us for sales of these products or services, all of which could significantly reduce our revenues.

Our competitors may have more extensive or more specialized engineering, manufacturing and marketing capabilities than we do in some areas and we may not have the technology, cost structure, or available resources to effectively compete with them. We believe that developing and maintaining a competitive advantage requires continued investment in product development; engineering; supply chain management; production capabilities, including technology, equipment and facilities; and sales and marketing, and we may not have enough resources to make the necessary investments to do so. Further, our significant customers may attempt to use their position to negotiate price or other concessions for a particular product or service without regard to the terms of an existing contract or the underlying cost of production.

We believe our strategies for our Aerospace segment will allow us to continue to effectively compete for key contracts and customers, but there can be no assurance that we will be able to compete successfully in this market or against such competitors.

We could be negatively impacted by the loss of key suppliers, the lack of product availability, or changes in supplier programs.

Our business depends on maintaining a sufficient supply of various products to meet our customers' demands. We have long-standing relationships with key suppliers but these relationships generally are non-exclusive and could be terminated by either party. If we were to lose a key supplier, or were unable to obtain the same levels of deliveries from these suppliers and were unable to supplement those purchases with products obtained from other suppliers, it could have a material adverse effect on our business. Additionally, we rely on foreign and domestic suppliers and commodity markets to secure raw materials used in many of the products we manufacture within our Aerospace segment or sell within our Distribution segment. This exposes us to volatility in the price and availability of raw materials. In some instances, we depend upon a single source of supply. Supply interruptions could arise from shortages of raw materials, labor disputes or weather conditions affecting suppliers' production, transportation disruptions, or other reasons beyond our control. Even if we continue with our current supplier relationships, high demand for certain products may result in us being unable to meet our customers' demands, which could put us at a competitive disadvantage. Additionally, our key suppliers could also increase the pricing of their products, which would negatively affect our operating results if we were not able to pass these price increases through to our customers. We base our supply management process on an appropriate balancing of the foreseeable risks and the costs of alternative practices. To protect ourselves against such risks, we engage in strategic inventory purchases during the year, negotiate long-term vendor supply agreements and monitor our inventory levels to ensure that we have the appropriate inventory on hand to meet our customers' requirements.

The adoption of new accounting guidance or changes in the interpretations of existing guidance could affect our financial results.

We prepare our financial statements in conformity with accounting principles generally accepted in the U.S. These accounting principles are subject to interpretation by the Financial Accounting Standards Board ("FASB") and the Securities and Exchange Commission (the "SEC"). A change in these principles or interpretations could have a significant effect on our reported financial results, may retroactively affect previously reported results, could cause unexpected financial reporting fluctuations, and may require us to make costly changes to our operational processes and accounting systems. In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers*, which supersedes nearly all existing generally accepted accounting principles ("GAAP") revenue recognition guidance. The updated standard is effective for us in the first quarter of 2018 and we intend to transition using the cumulative effect transition method. We are currently in the process of evaluating the likely impact of ASU 2014-09 on our consolidated financial statements, although our preliminary analysis indicates that it will likely change the way we account for certain revenue streams. For additional information about these matters, please refer to Note 1, *Summary of Significant Accounting Policies - Recent Accounting Standards* in the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Our failure to comply with the covenants contained in our senior credit facility could trigger an event of default, which could materially and adversely affect our operating results and our financial condition.

Our senior credit facility requires us to maintain certain financial ratios and comply with various operational and other covenants. If we were unable to maintain these ratios and comply with such covenants, we would need to seek relief from our lenders in order to avoid, cure or have waived an event of default under the facility. There can be no assurance that we would be able to obtain such relief on commercially reasonable terms or otherwise. If an event of default is not cured or waived, our lenders could, among other things, cause all outstanding indebtedness under the credit facility to be due and payable immediately. There can be no assurance that our assets or cash flows would be sufficient to enable us to fully repay those amounts or that we would be able to refinance or restructure the indebtedness. If, as or when required, we are unable to repay, refinance or restructure the indebtedness outstanding under our senior credit facility, or amend the financial ratios and covenants contained therein, the lenders under our senior credit facility could elect to terminate their commitments thereunder, cease making further loans and institute foreclosure proceedings against our assets. This, in turn, could result in an event of default under one or more of our other financing agreements, including our convertible notes.

Future tax law changes could have a material effect on our financial results.

We are subject to income taxes in the United States and certain foreign jurisdictions. The determination of the Company's provision for income taxes and other tax liabilities requires judgment and is based on legislative and regulatory structures that exist in the jurisdictions in which we operate. As a result of the change in the U.S. administration, there may be changes in tax policy, and the nature and outcome of those potential changes is uncertain at this time. Given the uncertainty surrounding the final outcome of the U.S. tax reform, it is not possible to predict the impact any changes would have on the Company's financial results.

The value of our deferred tax assets could become impaired, which could materially and adversely affect our operating results.

As of December 31, 2016, we had approximately \$52.5 million in net deferred tax assets after valuation allowance. These deferred tax assets can be used to offset taxable income in future periods and reduce income taxes payable in those future periods. Each quarter, we determine the probability of the realization of deferred tax assets, using significant judgments and estimates with respect to, among other things, historical operating results, expectations of future earnings and tax planning strategies. In the event that there is insufficient positive evidence to support the valuation of these assets, we may be required to further adjust the valuation allowance to reduce our deferred tax assets. Such a reduction could result in a material non-cash charge in the period in which the valuation allowance is adjusted and could have a material adverse effect on our results of operations. Moreover, deferred tax assets are determined based on current tax rates, and the possibility of U.S. tax reform could impact the value of our deferred tax assets. While such reform may result in future beneficial rates, it would also require a revaluation of our deferred tax assets, and could have a material adverse effect on our results of operations for the period in which such rate reduction is enacted.

The freezing of our defined benefit pension plan could trigger a material curtailment adjustment in favor of the USG.

Our defined benefit pension plan was frozen with respect to future benefit accruals effective December 31, 2015. U.S. Government Cost Accounting Standard 413 ("CAS 413") requires the Company to determine the USG's share of any resulting pension curtailment adjustment attributable to pension expense charged to Company contracts with the USG, which could result in an amount due to the USG if the plan is determined to be in a surplus position or an amount due to the Company if the plan is determined to be in a deficit position. During the fourth quarter of 2016, the Company accrued a \$0.3 million liability representing our estimate of the amount due to the USG based on our pension curtailment adjustment calculation, which was submitted to the USG for review in December. Through the date of this filing, there has been no response from the USG on this matter. There can be no assurance that the ultimate resolution of this matter will not have a material adverse effect on our results of operations, financial position and cash flows.

Estimates of future costs for long-term contracts impact our current and future operating results and profits.

We generally recognize sales and gross margin on long-term contracts based on the percentage-of-completion method of accounting. This method allows for revenue recognition as our work progresses on a contract and requires that we estimate future revenues and costs over the life of a contract. Revenues are estimated based upon the negotiated contract price, with consideration being given to exercised contract options, change orders and, in some cases, projected customer requirements. Contract costs may be incurred over a period of several years, and the estimation of these costs requires significant judgment based upon the acquired knowledge and experience of program managers, engineers and financial professionals.

Estimated costs are based primarily on anticipated purchase contract terms, historical performance trends, business base and other economic projections. The complexity of certain programs as well as technical risks and the availability of materials and labor resources could affect our ability to accurately estimate future contract costs. Additional factors that could affect recognition of revenue and gross margin under the percentage-of-completion method include:

- Accounting for initial program costs;
- The effect of nonrecurring work;
- Delayed contract start-up or changes to production schedules;
- Transition of work to or from the customer or other vendors;
- Claims or unapproved change orders;
- Product warranty issues;
- Delayed completion of certain programs for which inventory has been built up;
- Our ability to estimate or control scrap level;
- Accrual of contract losses; and
- Changes in our overhead rates.

Because of the significance of the judgments and estimation processes, it is likely that materially different sales and profit amounts could be recorded if we used different assumptions or if the underlying circumstances were to change. Changes in underlying assumptions, circumstances or estimates may adversely affect current and future financial performance. While we perform quarterly reviews of our long-term contracts to address and lessen the effects of these risks, there can be no assurance that we will not make material adjustments to underlying assumptions or estimates relating to one or more long-term contracts that have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may lose money or generate lower than expected profits on our fixed-price contracts.

Our customers set demanding specifications for product performance, reliability and cost. Most of our government contracts and subcontracts provide for a predetermined, fixed price for the products we make regardless of the costs we incur. Therefore, we must absorb cost overruns, notwithstanding the difficulty of estimating all of the costs we will incur in performing these contracts and in projecting the ultimate level of sales that we may achieve. Our failure to anticipate technical problems, estimate costs accurately, integrate technical processes effectively or control costs during performance of a fixed-price contract may reduce the profitability of a fixed-price contract or cause a loss. While we believe that we have recorded adequate provisions in our financial statements for losses on our fixed-price contracts as required under GAAP, there can be no assurance that our contract loss provisions will be adequate to cover all actual future losses.

The U.S. Navy contract award for the FMU-139 D/B bomb fuze could jeopardize the continued viability and profitability of the Company's FMU-152 A/B bomb fuze program with the U.S. Air Force ("USAF").

The Company currently provides the FMU-152 A/B bomb fuze (also referred to as the JPF) to the USAF and twenty-six other nations, but the U.S. Navy currently utilizes a different fuze - the FMU-139. During 2015, the U.S. Naval Air Systems Command ("NAVAIR") solicited proposals for a firm-fixed price production contract to implement improvements to the performance characteristics of the FMU-139 (such improved fuze having been designated the FMU-139 D/B). The USAF has stated that, if and when a contract is awarded and production begins, the funds associated with the FMU-152 A/B will be redirected to the FMU-139 D/B. During the third quarter of 2015, the U.S. Navy awarded the FMU-139 D/B contract to a competitor. In the event that the FMU-139 D/B program proceeds as planned and the USAF redirects the funds associated with the FMU-152 A/B to the FMU-139 D/B, our business, financial condition, results of operations and cash flows may be materially adversely impacted. The timing of the impact on our financial statements is dependent on the ability of our competitor to complete the design and qualification phase of the program and other factors. Our competitor has publicly stated that this program will have a 32-month qualification phase, after which production will begin. Therefore, the earliest the Company may see an impact on its financial statements is 2019; however, due to the complexity of this program, the uncertainty associated with the successful completion of each phase in accordance with the planned schedule and the pending status of the USAF's final decision to redirect funds to the FMU-139 D/B, the timing and magnitude of the impact on the Company's financial statements is not certain.

The start-up of the K-MAX® production line could adversely affect our operating results and cash flow generation.

The Company resumed production of the K-MAX® aircraft in 2015 and successfully delivered the first airframe in January of 2017 from its production line in Jacksonville, Florida to the Company's plant in Bloomfield, Connecticut where it is undergoing final assembly, testing and certification. As it has been more than a decade since we last manufactured this aircraft, the reestablishment of the production line could require significant investments of cash to fund costs associated with development and engineering work, the acquisition of new tooling, first article testing, and production inefficiencies. The Company currently has \$15.9 million of K-MAX® inventory, excluding the inventory associated with our new build aircraft currently under contract. If this inventory is determined to be unusable, then the Company could incur additional costs to replace such inventory, including potentially having to requalify suppliers for the manufacture of new components. The anticipated positive cash flows resulting from the sale of the aircraft may also be adversely impacted by production delays. Further, if we are unable to sustain interest in this program, we may incur additional costs associated with a shut-down of the production line.

A failure to develop and retain national accounts at our Distribution segment could adversely impact our financial results.

Companies continue to consolidate their purchases of industrial products through a small number of major distributors or integrated suppliers, rather than a large number of vendors. Our Distribution segment has developed a strategy to compete effectively for national accounts, but we face intensifying competition from our competitors, several of which are larger and have a more extensive geographic footprint.

If we are not awarded additional national accounts in the future, or if existing national account agreements are not renewed, our sales volume could be negatively impacted, which may result in lower gross margins and weaker operating results. Additionally, national accounts may require an increased level of customer service, such as investments in the form of opening new branches to meet our customers' needs. The cost and time associated with these activities could be significant, and if the relationship is not maintained, we ultimately may not be able to generate a return on these investments.

The loss of the Distribution segment’s key suppliers with whom we have national reseller agreements and/or national distributor agreements could adversely affect our operating results and profits.

An element of our Distribution segment’s strategy is to establish alignment with a single vendor in certain portions of its business. As a result, we currently have distribution rights for certain product lines and depend on these distribution rights as a source of business. Many of these distribution rights are ours pursuant to contracts that are subject to cancellation upon little or no prior notice. Although we believe we could obtain alternate distribution rights in the event of such a cancellation, the termination or limitation by any key supplier of its relationship with the Company could result in a temporary disruption of our business and, in turn, could adversely affect our results of operations and financial condition.

A decline in sales at our Distribution segment could adversely impact the vendor incentives and rebates we earn from suppliers.

Some of our suppliers offer vendor incentives and rebates that are tied to the amount of product that we purchase. These incentives and rebates can be market or customer-account specific, or relate to a specified program period. A decline in sales could adversely impact the vendor incentives and rebates we earn from suppliers.

Our information technology systems, processes and sites may suffer interruptions or failures which may affect our ability to conduct our business.

Our information technology systems provide critical data connectivity, information and services for internal and external users. These interactions include, but are not limited to, ordering and managing materials from suppliers, inventory management, shipping products to customers, processing transactions, summarizing and reporting results of operations, complying with regulatory, legal or tax requirements, and other processes necessary to manage our business. Our computer systems face the threat of unauthorized access, computer hackers, computer viruses, malicious code, organized cyber-attacks and other security problems and system disruptions.

Cyber-attacks are evolving and include, but are not limited to, malicious software, destructive malware, attempts to gain unauthorized access to data, disruption or denial of service attacks and other electronic security breaches that could lead to disruptions in critical systems, unauthorized release of confidential, personal or otherwise protected information and corruption of data, networks or systems. We provide products and services to customers who also face cyber threats. Our products and services may be subject to cyber threats and we may not be able to detect or deter such threats, which could result in losses that could adversely affect our customers and our company. Additionally, we could be impacted by cyber threats in products that we use in our partners' and customers' systems that are used in connection with our business. These events, if not prevented or mitigated, could damage our reputation, require remedial action, lead to loss of business, regulatory actions, potential liability and other financial losses.

We have put in place business continuity plans and security precautions for our critical systems, including a back-up data center. However, if our information technology systems are damaged or cease to function properly due to any number of causes, such as catastrophic events, power outages and security breaches resulting in unauthorized access or cyber-attacks, and our business continuity plans and security precautions do not function effectively on a timely basis, we may suffer interruptions in our operations or the misappropriation of proprietary information, which may adversely impact our business, financial condition, results of operations and cash flows.

Our implementation of enterprise resource planning (“ERP”) systems may adversely affect our business and results of operations or the effectiveness of internal controls over financial reporting.

We are currently implementing new ERP systems within our Aerospace and Distribution segments. ERP implementations are complex and time-consuming projects that involve substantial expenditures on system software and implementation activities that take several years. If we do not effectively implement the ERP systems or if the systems do not operate as intended, it could adversely affect our financial reporting systems and our ability to produce financial reports, the effectiveness of internal controls over financial reporting, and our business, financial condition, results of operations and cash flows.

A failure to maintain effective internal controls could adversely affect our ability to accurately report our financial results or prevent fraud.

Our ability to provide assurance with respect to our financial reports and to effectively prevent fraud depends on effective internal control. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements; therefore, even effective controls can only provide reasonable assurance with respect to the preparation and fair presentation of financial statements. If our internal controls were to be compromised, our financial statements could become materially misleading, which could adversely affect the trading price of our common stock. Any material weakness could adversely impact investor confidence in the accuracy of our financial statements, affecting our ability to obtain additional financing. This would likely have an adverse effect on our business, financial condition and the market value of our stock. Additionally, we would be required to incur costs to make the necessary improvements to our internal control systems.

Although management has assessed our internal control over financial reporting as effective based on criteria set forth by the Committee of Sponsoring Organizations - Integrated Framework, we can give no assurance that material weaknesses will not occur in the future nor that existing controls will continue to be adequate to prevent or identify irregularities or ensure fair presentation of our financial statements in the future.

We may make acquisitions or investments in new businesses, products or technologies that involve additional risks, which could disrupt our business or harm our financial condition or results of operations.

As part of our business strategy, we have made, and expect to continue to make, acquisitions of businesses or investments in companies that offer complementary products, services and technologies. Such acquisitions or investments involve a number of risks, including:

- Assimilating operations and products may be unexpectedly difficult;
- Management's attention may be diverted from other business concerns;
- We may enter markets in which we have limited or no direct experience;
- We may lose key employees, customers or vendors of an acquired business;
- We may not be able to achieve the synergies or cost savings we anticipated;
- We may not realize the assigned value of the acquired assets;
- We may experience quality control failures or encounter other customer relationship issues; and
- We may become subject to preexisting liabilities and obligations of the acquired businesses.

These factors could have a material adverse effect on our business, financial condition, results of operations and cash flows. In addition, the consideration paid for any future acquisitions could include our stock or require that we incur additional debt and contingent liabilities. As a result, future acquisitions could cause dilution of existing equity interests and earnings per share.

Certain of our operations are conducted through joint ventures, which entail special risks.

The Company has a 26% equity interest in Kineco-Kaman Composites - India Private Limited, a composites manufacturing joint venture located in Goa, India. The Company relies significantly on the services and skills of its joint venture partner to manage and conduct the local business operations of the joint venture and ensure compliance with all applicable laws and regulations. If our joint venture partner fails to perform these functions adequately, it may adversely affect our business, financial condition, results of operations and cash flows. Moreover, if our joint venture partner fails to honor its financial obligations to commit capital, equity or credit support to the joint venture as a result of financial or other difficulties or for any other reason, the joint venture may be unable to perform contracted services or deliver contracted products unless we provide the necessary capital, equity or credit support.

Our results of operations could be adversely affected by impairment of our goodwill or other intangible assets.

When we acquire a business, we record goodwill equal to the excess of the amount we pay for the business, including liabilities assumed, over the fair value of the tangible and identifiable intangible assets of the business we acquire. Goodwill and other intangible assets that have indefinite useful lives must be evaluated at least annually for impairment. The specific guidance for testing goodwill and other non-amortized intangible assets for impairment requires management to make certain estimates and assumptions when allocating goodwill to reporting units and determining the fair value of reporting unit net assets and liabilities, including, among other things, an assessment of market conditions, projected cash flows, investment rates, cost of capital and growth rates, which could significantly impact the reported value of goodwill and other intangible assets. Fair value is generally determined using a combination of the discounted cash flow, market multiple and market capitalization valuation approaches. Absent any impairment indicators, we generally perform our evaluations annually in the fourth quarter, using available forecast information. If at any time we determine an impairment has occurred, we are required to reflect the reduction in value as an expense within operating income, resulting in a reduction of earnings and a corresponding reduction in our net asset value in the period such impairment is identified.

We rely on the experience and expertise of our skilled employees, and must continue to attract and retain qualified technical, marketing and managerial personnel in order to succeed.

Our future success will depend largely upon our ability to attract and retain highly skilled technical, operational and financial managers and marketing personnel. There is significant competition for such personnel in the aerospace and distribution industries. We try to ensure that we offer competitive compensation and benefits as well as opportunities for continued development, and we continually strive to recruit and train qualified personnel and retain key employees. There can be no assurance, however, that we will continue to be successful in attracting and retaining the personnel we require to develop new and enhanced products and to continue to grow and operate profitably.

We are subject to litigation, tax, environmental and other legal compliance risks that could adversely affect our operating results.

We are subject to a variety of litigation, tax and legal compliance risks. These risks include, among other things, possible liability relating to contract-related claims, government contracts, product liability matters, personal injuries, intellectual property rights, taxes, environmental matters and compliance with U.S. and foreign export laws, competition laws and laws governing improper business practices. In the event that we or one of our business units engage in wrongdoing in connection with any of these kinds of matters, we could be subject to significant fines, penalties, repayments, other damages (in certain cases, treble damages), or suspension or debarment from government contracts. Moreover, our failure to comply with applicable export and trade practice laws could result in civil or criminal penalties and suspension or termination of export privileges.

As a global business, we are subject to complex laws and regulations in the U.S. and other countries in which we operate. Those laws and regulations may be interpreted in different ways. They may also change from time to time, as may related interpretations and other guidance. Changes in laws or regulations could result in higher expenses and payments, and uncertainty relating to laws or regulations may also affect how we conduct our operations and structure our investments and could limit our ability to enforce our rights. Changes in environmental and climate change laws or regulations, including laws relating to greenhouse gas emissions, could lead to new or additional investment in product designs and could increase environmental compliance expenditures. Changes in climate change concerns, or in the regulation of such concerns, including greenhouse gas emissions, could subject us to additional costs and restrictions, including increased energy and raw material costs.

Our financial results may be adversely affected by the outcome of pending legal proceedings and other contingencies that cannot be predicted. In accordance with GAAP, if a liability is deemed probable and reasonably estimable in light of the facts and circumstances known to us at a particular point in time, we make an estimate of material loss contingencies and establish reserves based on our assessment. Subsequent developments in legal proceedings may affect our assessment. The accrual of a loss contingency adversely affects our results of operations in the period in which a liability is recognized. This could also have an adverse impact on our cash flows in the period during which damages are paid.

For a discussion of these matters, please refer to Note 16, *Commitments and Contingencies*, and Note 10, *Environmental Costs*, in the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Regulations related to conflict minerals could adversely impact our business.

The Dodd-Frank Wall Street Reform and Consumer Protection Act contains provisions designed to improve transparency and accountability concerning the supply of certain minerals, known as conflict minerals, originating from the Democratic Republic of the Congo ("DRC") and adjoining countries. In August 2012, the SEC promulgated disclosure and reporting requirements for companies who use conflict minerals in their products. Complying with these disclosure and reporting requirements may require us to incur substantial costs and expenditures to conduct due diligence to determine the sources of conflict minerals used in our products. Moreover, these requirements may result in changes to the sourcing practices of our customers which may require the identification and qualification of alternate sourcing for the components of products we manufacture, which could impact the availability of, or cause increases in the price of, materials used in our products. We may face reputational challenges if we determine that certain of our products contain minerals not determined to be conflict free or if we are unable to verify the origin of conflict minerals used in our products. As there may be only a limited number of suppliers offering "conflict free" conflict minerals, there can be no assurance that we will be able to obtain necessary conflict minerals from such suppliers in sufficient quantities or at competitive prices.

Our foreign operations require us to comply with a number of United States and international laws and regulations, violations of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our operations outside the United States require us to comply with a number of United States and international laws and regulations, such as the U.S. Foreign Corrupt Practices Act of 1977 (the "FCPA"), the U.K. Bribery Act of 2010 (the "Bribery Act") and other similar anticorruption laws. The FCPA generally prohibits United States companies or their agents and employees from providing anything of value to a foreign official for the purposes of influencing any act or decision of these individuals in their official capacity to help obtain or retain business, direct business to any person or corporate entity or obtain any unfair advantage. While we have internal controls and procedures and compliance programs to train our employees and agents with respect to compliance with the FCPA and other similar international laws and regulations, there can be no assurance that our policies, procedures and programs will always protect us from reckless or criminal acts committed by our employees or agents. Allegations of violations of applicable anti-corruption laws, including the FCPA and the Bribery Act, may result in internal, independent, or government investigations. Violations of the FCPA and other international laws and regulations may lead to severe criminal or civil sanctions and could result in liabilities that have a material adverse effect on our business, financial condition, results of operations and cash flows.

Economic conditions and regulatory changes leading up to and following the United Kingdom's ("UK") likely exit from the European Union ("EU") could have a material adverse effect on our business, financial condition and results of operations.

We have business operations in both the UK and the broader EU. In June 2016, a majority of voters in the UK elected to withdraw from the EU in a national referendum. The referendum was advisory, and the terms of any withdrawal are subject to a negotiation period that could last at least two years after the government of the UK formally initiates a withdrawal process. Nevertheless, the referendum has created significant uncertainty about the future relationship between the UK and the EU, and has given rise to calls for the governments of other EU member states to consider withdrawal.

These developments, or the perception that any of them could occur, may have a material adverse effect on global economic conditions and the stability of global financial markets, and could significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Asset valuations, currency exchange rates and credit ratings may be especially subject to increased market volatility. Lack of clarity about future UK laws and regulations as the UK determines which EU laws to replace or replicate in the event of a withdrawal, including financial laws and regulations, tax and free trade agreements, intellectual property rights, supply chain logistics, environmental, health and safety laws and regulations, immigration laws and employment laws, could decrease foreign direct investment in the UK, increase costs, depress economic activity and restrict our access to capital. If the UK and the EU are unable to negotiate acceptable withdrawal terms or if other EU member states pursue withdrawal, barrier-free access between the UK and other EU member states or among the European economic area overall could be diminished or eliminated. Any of these factors could have a direct or indirect impact on our business in the UK and EU, our customers and suppliers in the UK and EU and our business outside the UK and EU. Any of these factors could have a material adverse effect on our business, financial condition and results of operations and reduce the price of our common stock.

Our foreign operations present additional risks and uncertainties which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our foreign business operations create additional risks and uncertainties, including the following:

- Longer payment cycles;
- Difficulties in accounts receivable collection;
- Changes in regulatory requirements;
- Export restrictions, tariffs and other trade barriers;
- Difficulties in staffing and managing foreign operations;
- Seasonal reductions in business activity during the summer months in Europe and certain other parts of the world;
- Political or economic instability in the markets we serve;
- Potentially adverse tax consequences; and
- Cultural and legal differences impacting the conduct of business.

Any one or more of these factors could have a material adverse effect on our domestic or international operations, and, consequently, on our business, financial condition, results of operations and cash flows.

Our insurance coverage may be inadequate to cover all significant risk exposures.

We are exposed to risks that are unique to the products and services we provide. While we believe that we maintain adequate insurance for certain risks, insurance cannot be obtained to protect against all risks and liabilities. It is therefore possible that our insurance coverage may not cover all claims or liabilities, and we may be forced to bear substantial unanticipated costs.

Business disruptions could seriously affect our sales and financial condition or increase our costs and expenses.

Our business may be impacted by disruptions including, but not limited to, threats to physical security, information technology attacks or failures, damaging weather or other acts of nature and pandemics or other public health crises. Any of these disruptions could affect our internal operations or services provided to customers, and could impact our sales, increase our expenses or adversely affect our reputation or our stock price. We have developed and are implementing business continuity plans for each of our businesses, in order to mitigate the effects disruptions may have on our financial results.

Our revenue, cash flows and quarterly results may fluctuate, which could adversely affect our stock price.

We may in the future experience significant fluctuations in our quarterly operating results attributable to a variety of factors. Such factors include but are not limited to:

- Changes in demand for our products;
- Introduction, enhancement or announcement of products by us or our competitors;
- Market acceptance of our new products;
- The growth rates of certain market segments in which we compete;
- Size, timing and shipment terms of significant orders;
- Difficulties with our technical programs;
- Budgeting cycles of customers;
- Pricing pressures from customers;
- Mix of distribution channels;
- Mix of products and services sold;
- Mix of domestic and international revenues;
- Fluctuations in currency exchange rates;
- Changes in the level of operating expenses;
- Changes in our sales incentive plans;
- Changes in tax laws in the jurisdictions in which we conduct business;
- Inventory obsolescence;
- Accrual of contract losses;
- Fluctuations in oil and utility costs;
- Health care reform;
- Completion or announcement of acquisitions; and
- General economic conditions in regions in which we conduct business.

Most of our expenses are relatively fixed in the short-term, including costs of personnel and facilities, and are not easily reduced. Thus, an unexpected reduction in our revenue, or failure to achieve an anticipated rate of growth, could have a material adverse effect on our profitability. If our operating results do not meet the expectations of investors, our stock price may decline.

FORWARD-LOOKING STATEMENTS

This report contains "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements also may be included in other publicly available documents issued by the Company and in oral statements made by our officers and representatives from time to time. These forward-looking statements are intended to provide management's current expectations or plans for our future operating and financial performance, based on assumptions currently believed to be valid. They can be identified by the use of words such as "anticipate," "intend," "plan," "goal," "seek," "believe," "project," "estimate," "expect," "strategy," "future," "likely," "may," "should," "would," "could," "will" and other words of similar meaning in connection with a discussion of future operating or financial performance. Examples of forward looking statements include, among others, statements relating to future sales, earnings, cash flows, results of operations, uses of cash and other measures of financial performance.

Because forward-looking statements relate to the future, they are subject to inherent risks, uncertainties and other factors that may cause the Company's actual results and financial condition to differ materially from those expressed or implied in the forward-looking statements. Such risks, uncertainties and other factors include, among others: (i) changes in domestic and foreign economic and competitive conditions in markets served by the Company, particularly the defense, commercial aviation and industrial production markets; (ii) changes in government and customer priorities and requirements (including cost-cutting initiatives, government and customer shut-downs, the potential deferral of awards, terminations or reductions of expenditures to respond to the priorities of Congress and the Administration, or budgetary cuts resulting from Congressional actions or automatic sequestration); (iii) changes in geopolitical conditions in countries where the Company does or intends to do business; (iv) the successful conclusion of competitions for government programs (including new, follow-on and successor programs) and thereafter successful contract negotiations with government authorities (both foreign and domestic) for the terms and conditions of the programs; (v) the existence of standard government contract provisions permitting renegotiation of terms and termination for the convenience of the government; (vi) the successful resolution of government inquiries or investigations relating to our businesses and programs; (vii) risks and uncertainties associated with the successful implementation and ramp up of significant new programs, including the ability to manufacture the products to the detailed specifications required and recover start-up costs and other investments in the programs; (viii) potential difficulties associated with variable acceptance test results, given sensitive production materials and extreme test parameters; (ix) the receipt and successful execution of production orders under the Company's existing U.S. government JPF contract, including the exercise of all contract options and receipt of orders from allied militaries, but excluding any next generation programmable fuze programs, as all have been assumed in connection with goodwill impairment evaluations; (x) the continued support of the existing K-MAX® helicopter fleet, including sale of existing K-MAX® spare parts inventory and the receipt of orders for new aircraft sufficient to recover our investment in the restart of the K-MAX® production line; (xi) the accuracy of current cost estimates associated with environmental remediation activities; (xii) the profitable integration of acquired businesses into the Company's operations; (xiii) the ability to implement our ERP systems in a cost-effective and efficient manner, limiting disruption to our business, and allowing us to capture their planned benefits while maintaining an adequate internal control environment; (xiv) changes in supplier sales or vendor incentive policies; (xv) the effects of price increases or decreases; (xvi) the effects of pension regulations, pension plan assumptions, pension plan asset performance, future contributions and the pension freeze, including the ultimate determination of the U.S. Government's share of any pension curtailment adjustment calculated in accordance with CAS 413; (xvii) future levels of indebtedness and capital expenditures; (xviii) the continued availability of raw materials and other commodities in adequate supplies and the effect of increased costs for such items; (xix) the effects of currency exchange rates and foreign competition on future operations; (xx) changes in laws and regulations, taxes, interest rates, inflation rates and general business conditions; (xxi) the effects, if any, of the UK's exit from the EU; (xxii) future repurchases and/or issuances of common stock; (xxiii) the incurrence of unanticipated restructuring costs or the failure to realize anticipated savings or benefits from past or future expense reduction actions; and (xxiv) other risks and uncertainties set forth herein.

Any forward-looking information provided in this report should be considered with these factors in mind. We assume no obligation to update any forward-looking statements contained in this report.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our facilities are generally suitable for, and adequate to serve, their intended uses. At December 31, 2016, we occupied major facilities at the following principal locations:

Segment	Location	Property Type ⁽¹⁾	Square Feet
Aerospace.....	Jacksonville, Florida	Leased - Manufacturing & Office	
	Chihuahua, Mexico	Leased - Manufacturing & Office	
	Rimpar, Germany	Owned - Manufacturing & Office	
	Prachatice, Czech Republic.....	Owned - Assembly & Office	
	Wichita, Kansas.....	Leased - Manufacturing & Office	
	Darwen, Lancashire, United Kingdom	Leased - Manufacturing & Office	
	Hyde, Greater Manchester, United Kingdom....	Leased - Manufacturing & Office	
	Burnley, Lancashire, United Kingdom.....	Leased - Manufacturing & Office	
	Orlando, Florida	Owned - Manufacturing & Office	
	Everett, Washington.....	Leased - Office	
	Höchstadt, Germany.....	Owned - Manufacturing & Office	
	Middletown, Connecticut.....	Owned - Manufacturing & Office	
	Bloomfield, Connecticut	Owned - Manufacturing, Office & Service Center	
	Bennington, Vermont.....	Owned - Manufacturing & Office	
	Mesa, Arizona	Leased - Office & Service Center	
Distribution	Bloomfield, Connecticut	Owned - Office	
	Ontario, California	Leased - Distribution Center & Office	
	Albany, New York.....	Leased - Distribution Center & Office	
	Savannah, Georgia	Leased - Distribution Center & Office	
	Salt Lake City, Utah.....	Leased - Distribution Center & Office	
	Louisville, Kentucky.....	Leased - Distribution Center & Office	
	Gurabo, Puerto Rico.....	Leased - Distribution Center & Office	
	Bolingbrook, Illinois	Leased - Office & Branch	
	Rochester, New York.....	Leased - Office & Branch	
	Akron, Ohio	Leased - Office	
Teterboro, New Jersey.....	Leased - Office & Branch		
Corporate.....	Bloomfield, Connecticut	Owned - Office & Information Technology Back-Up Data Center	
			Square Feet
Distribution ⁽²⁾			2,289,755
Aerospace.....			2,238,915
Corporate ⁽³⁾			103,041
Total			<u>4,631,711</u>

(1) Owned facilities are unencumbered.

(2) The Distribution segment also has approximately 240 branches located across the United States and in Puerto Rico, generally operating in leased facilities.

(3) We occupy a 40,000 square foot corporate headquarters building, 38,000 square foot mixed use building and 8,000 square foot data center in Bloomfield, Connecticut.

ITEM 3. LEGAL PROCEEDINGS

General

From time to time, as a normal incident of the nature and kinds of businesses in which the Company and its subsidiaries are, and were, engaged, various claims or charges are asserted and legal proceedings are commenced by or against the Company and/or one or more of its subsidiaries. Claimed amounts may be substantial but may not bear any reasonable relationship to the merits of the claim or the extent of any real risk of court or arbitral awards. We record accruals related to those matters for which we consider a loss to be both probable and reasonably estimable. Gain contingencies, if any, are not recognized until they are realized. Legal costs are generally expensed when incurred.

We evaluate, on a quarterly basis, developments in legal proceedings that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. Our loss contingencies are subject to substantial uncertainties, however, including for each such contingency the following, among other factors: (i) the procedural status of the case; (ii) whether the case has been or may be certified as a class action suit; (iii) the outcome of preliminary motions; (iv) the impact of discovery; (v) whether there are significant factual issues to be determined or resolved; (vi) whether the proceedings involve a large number of parties and/or parties and claims in multiple jurisdictions or jurisdictions in which the relevant laws are complex or unclear; (vii) the extent of potential damages, which are often unspecified or indeterminate; and (viii) the status of settlement discussions, if any, and the settlement postures of the parties. Because of these uncertainties, management has determined that, except as otherwise noted below, the amount of loss or range of loss that is reasonably possible in respect of each matter described below (including any reasonably possible losses in excess of amounts already accrued), is not reasonably estimable.

While it is not possible to predict the outcome of these matters with certainty, based upon available information, management believes that all settlements, arbitration awards and final judgments, if any, which are considered probable of being rendered against us in legal proceedings and that can be reasonably estimated are accrued for at December 31, 2016. Despite this analysis, there can be no assurance that the final outcome of these matters will not have a material adverse effect on our business, financial condition, results of operations or cash flows.

Except as set forth below, as of December 31, 2016, neither the Company nor any of its subsidiaries is a party, nor is any of its or their property subject, to any material pending legal proceedings, other than ordinary routine litigation incidental to the business of the Company and its subsidiaries. Additional information relating to certain of these matters is set forth in Note 16, *Commitments and Contingencies* of the Notes to Consolidated Financial Statements, included in Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K.

Environmental Matters

The Company and its subsidiaries are subject to numerous U.S. Federal, state and international environmental laws and regulatory requirements and are involved from time to time in investigations or litigation of various potential environmental issues concerning activities at our facilities or former facilities or remediation as a result of past activities (including past activities of companies we have acquired). From time to time, we receive notices from the U.S. Environmental Protection Agency or equivalent state or international environmental agencies that we are a potentially responsible party under the Comprehensive Environmental Response, Compensation and Liability Act (commonly known as the "Superfund Act") and/or equivalent laws. Such notices assert potential liability for cleanup costs at various sites, which may include sites owned by us, sites we previously owned and treatment or disposal sites not owned by us, allegedly containing hazardous substances attributable to us from past operations. We are currently named as a potentially responsible party at one site. While it is not possible to predict the outcome of these proceedings, in the opinion of management, any payments we may be required to make as a result of all such claims in existence at December 31, 2016, will not have a material adverse effect on our business, financial condition and results of operations or cash flows.

Asbestos Litigation

Like many other industrial companies, the Company and/or one of its subsidiaries may be named as a defendant in lawsuits alleging personal injury as a result of exposure to asbestos integrated into certain products sold or distributed by the Company and/or the named subsidiary. A substantial majority of these asbestos-related claims have been covered by insurance or other forms of indemnity or have been dismissed without payment. The rest have been resolved for amounts that are not material to the Company, either individually or in the aggregate. Based on information currently available, we do not believe that the resolution of any currently pending asbestos-related matters will have a material adverse effect on our business, financial condition, results of operations or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Information concerning mine safety violations required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") and Item 104 of Regulation S-K was not required for this Annual Report on Form 10-K as there were no reportable violations during 2016.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET, DIVIDEND AND SHAREHOLDER INFORMATION

Our Common Stock is traded on the New York Stock Exchange under the symbol "KAMN". As of January 27, 2017, there were 3,258 registered holders of our Common Stock. Holders of the Company's Common Stock are eligible to participate in the Computershare Shareowner Services program, which offers a variety of services including dividend reinvestment. A booklet describing the program may be obtained by contacting Computershare at (800) 522-6645 or via the web at www.cpushareownerservices.com.

The following table sets forth the high, low and closing sale prices per share of the Company's Common Stock and the dividends declared for the periods indicated:

	Market Quotations			Dividend Declared
	High	Low	Close

ISSUER PURCHASES OF EQUITY SECURITIES

The following table provides information about purchases of Common Stock by the Company during the three months ended December 31, 2016:

Period	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan (b)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plan (in thousands)
October 1, 2016 – October 28, 2016.....	20,800	\$ 42.78	20,800	\$ 78,958
October 29, 2016 – November 25, 2016.....	36,208	\$ 46.30	36,000	\$ 77,291
November 26, 2016 – December 31, 2016.....	48,460	\$ 49.82	48,460	\$ 74,877
Total	105,468		105,260	

(a) During the quarter the Company purchased 208 shares in connection with employee tax withholding obligations as permitted by our equity compensation plans, which are SEC Rule 16b-3 qualified compensation plans. These are not purchases under our publicly announced program.

(b) On April 29, 2015, the Company announced that its Board of Directors approved a \$100.0 million share repurchase program ("2015 Share Repurchase Program"). This program will expire December 31, 2019.

PERFORMANCE GRAPH

Following is a comparison of our total shareholder return for the period 2011 – 2016 compared to the S&P 600 Small Cap Index and the Russell 2000 Small Cap Index. The performance graph does not include a published industry or line-of-business index or peer group of similar issuers because during the performance period the Company was conducting operations in diverse lines of business and we do not believe a meaningful industry index or peer group can be reasonably identified. Accordingly, as permitted by regulation, the graph includes the S&P 600 Small Cap Index and the Russell 2000 Small Cap Index, both of which are comprised of issuers with market capitalizations generally similar to that of the Company.

	2011	2012	2013	2014	2015	2016
Kaman Corporation	100.00	137.26	150.83	154.62	160.22	195.28
S&P Small Cap 600	100.00	114.09	164.38	173.84	170.41	215.67
Russell 2000	100.00	116.35	161.52	169.42	161.95	196.45

(See Footnotes below)

(Footnotes to Five-Year Selected Financial Data above)

Included within certain annual results are a variety of unusual or significant items that may affect comparability. The most significant of such items are described below.

1. Results for 2016 include \$5.1 million of acquisition transaction and integration costs related to our 2015 acquisitions, \$2.5 million of severance costs at our Aerospace segment, of which \$1.1 million is included in acquisition transaction and integration costs, and \$1.0 million of restructuring and severance costs at our Distribution segment. Additionally, the carrying amount of the Convertible Notes was reclassified to current liabilities, as these Notes are convertible through April 3, 2017. Upon closure of the conversion period, the Notes will remain in current liabilities due to their scheduled maturity.
2. Results for 2015 include \$5.1 million in expense related to the acquisitions at both the Aerospace and Distribution segments, \$4.0 million in expense associated with the resolution of the matters related to our AH-1Z program, \$3.0 million of expenses related to foreign currency transactions associated with the purchase of GRW Bearing GmbH ("GRW"), and \$2.4 million of expenses associated with restructuring and severance costs at our Distribution segment.
3. Results for 2014 include the sale of the Distribution segment's Mexican operations for \$9.6 million on December 19, 2014. The net loss of \$5.3 million resulting from the sale is included in the loss on disposal of discontinued operations for 2014. Additionally, we incurred \$2.2 million of costs associated with the sale of our Moosup facility.
4. Results for 2013 include a \$2.1 million non-cash non-tax deductible charge for the impairment of goodwill related to Vermont Composites and a gain on discontinued operations due to a \$0.4 million favorable tax result versus previous estimates and other activity related to the settlement of the closing balance sheet of the Distribution segment's Canadian operations.
5. The Company sold substantially all of the assets and liabilities of the Distribution segment's Canadian operations for \$8.7 million on December 31, 2012, resulting in a net gain of \$1.3 million. Additionally in 2012, we recorded \$3.3 million of net loss related to the resolution of an Aerospace segment program related matter.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide readers of our consolidated financial statements with the perspectives of management. MD&A presents in narrative form information regarding our financial condition, results of operations, liquidity and certain other factors that may affect our future results. This should allow the readers of this report to obtain a comprehensive understanding of our businesses, strategies, current trends and future prospects. MD&A should be read in conjunction with the Consolidated Financial Statements and related Notes included in this Form 10-K.

OVERVIEW OF BUSINESS

Kaman Corporation conducts business through two business segments:

- The Distribution segment is a leading power transmission, automation and fluid power industrial distributor with operations throughout the United States. The segment provides electro-mechanical products, bearings, power transmission, motion control and electrical and fluid power components to a broad spectrum of industrial markets serving both MRO and OEM customers.
- The Aerospace segment produces and markets proprietary aircraft bearings and components; super precision, miniature ball bearings; complex metallic and composite aerostructures for commercial, military and general aviation fixed and rotary wing aircraft; and safe and arming solutions for missile and bomb systems for the U.S. and allied militaries. The segment also markets the design and supply of aftermarket parts to businesses performing MRO in aerospace markets; performs helicopter subcontract work; restores, modifies and supports our SH-2G Super Seasprite maritime helicopters; manufactures and supports our K-MAX® manned and unmanned medium-to-heavy lift helicopters; and provides engineering design, analysis and certification services.

Company financial performance

- Net sales from continuing operations increased 1.9% compared to the prior year.
- Earnings from continuing operations decreased 2.6% compared to the prior year.
- Diluted earnings per share from continuing operations decreased to \$2.10 in 2016 compared to \$2.17 in the prior year.
- Cash flows provided by operating activities from continuing operations were \$107.7 million for 2016, a decrease of \$1.9 million when compared to the prior year.

Recent events

- On February 21, 2017, the Board of Directors raised the quarterly dividend from \$0.18 per share to \$0.20 per share, an 11% increase to our quarterly dividend. This dividend will be paid on April 6, 2017, to shareholders of record on March 21, 2017.
- In December 2016, the Company successfully delivered its first airframe from the K-MAX® production line in Jacksonville, Florida, to the Company's plant in Bloomfield, Connecticut, where it is undergoing final assembly, testing, and certification. Delivery of this aircraft to our customer is expected to occur in the second quarter of 2017.
- On January 1, 2017, Paul M. Villani became the Company's Senior Vice President and Chief Information Officer, following the retirement of Ronald M. Galla, former Senior Vice President and Chief Information Officer.
- On July 13, 2016, our Aerospace segment announced it had been awarded a three-year contract with NAVAIR for the establishment of depot level maintenance capabilities for the Egyptian Air Force ("EAF") SH-2G(E) helicopter program, in support of the ten aircraft currently in operation. The EAF recently acquired seven Excess Defense Article ("EDA") SH-2G aircraft from NAVAIR, which could potentially increase the fleet size from ten to seventeen aircraft.
- On July 12, 2016, the Company announced that its Aerospace segment secured a contract for \$39.8 million with General Dynamics Mission Systems—Canada to commence work on the implementation phase of the previously announced Peruvian Navy's SH-2G Super Seasprite aircraft program. The total expected value to Kaman for the combined program, including this contract and previously issued contracts, now totals \$50.5 million.
- In June 2016, the Aerospace segment received PMA for the main driveshaft on the MD500 helicopter, representing the first PMA achieved in collaboration between EXTEX, a business acquired in November 2015, and our legacy specialty bearing and engineered products operations.
- In May 2016, the Company announced that its Aerospace segment was awarded the production, manufacture and supply of Bombardier Challenger CL350 and Global Express 5000/6000 metallic detail wing structure packages by MHI Canada Aerospace, Inc. Deliveries of these components will begin this year and extend through 2020.

RESULTS OF CONTINUING OPERATIONS

Consolidated Results

Net Sales from Continuing Operations

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Distribution.....	\$ 1,106,322	\$ 1,177,539	\$ 1,161,992
Aerospace.....	702,054	597,586	632,970
Total.....	<u>\$ 1,808,376</u>	<u>\$ 1,775,125</u>	<u>\$ 1,794,962</u>
\$ change.....	33,251	(19,837)	141,041
% change.....	1.9%	(1.1)%	8.5%

The following table details the components of the above changes as a percentage of consolidated net sales:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Organic Sales:			
Distribution.....	(4.3)%	(2.0)%	2.0%
Aerospace.....	2.3 %	(2.4)%	1.1%
Total Organic Sales.....	<u>(2.0)%</u>	<u>(4.4)%</u>	<u>3.1%</u>
Acquisition Sales:			
Distribution.....	0.3 %	2.9 %	5.4%
Aerospace.....	3.6 %	0.4 %	—%
Total Acquisition Sales.....	<u>3.9 %</u>	<u>3.3 %</u>	<u>5.4%</u>
% change in net sales.....	<u>1.9 %</u>	<u>(1.1)%</u>	<u>8.5%</u>

The increase in net sales from continuing operations for 2016 as compared to 2015 was attributable to the contribution of \$68.7 million in sales from our 2015 acquisitions and an increase in organic sales at our Aerospace segment. These increases were offset by a decrease in organic sales at our Distribution segment. Foreign currency exchange rates relative to the U.S. dollar had an unfavorable impact of \$5.9 million on net sales.

The decrease in net sales from continuing operations for 2015 as compared to 2014 was attributable to a decrease in organic sales at both our Aerospace and Distribution segments and the unfavorable impact on sales of foreign currency exchange rates of \$8.1 million. These decreases were offset by the contribution of \$60.1 million in sales from acquisitions completed in 2015 and 2014.

See Segment Results of Operations and Financial Condition below for further discussion of segment net sales.

Gross Profit from Continuing Operations

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Gross profit.....	\$ 549,092	\$ 517,234	\$ 507,939
\$ change.....	31,858	9,295	44,628
% change.....	6.2%	1.8%	9.6%
% of net sales.....	30.4%	29.1%	28.3%

Gross profit from continuing operations increased in 2016 as compared to 2015, primarily due to the contribution of \$22.6 million of gross profit from our 2015 acquisitions and organic growth at our Aerospace segment. The increase in organic gross profit at our Aerospace segment is primarily attributable to higher sales of our JPF and commercial bearing products, increased sales associated with our K-MAX® program and legacy missile fuze programs and the absence of \$4.0 million in expense associated with the resolution of matters related to our AH-1Z program in 2015. These increases were partially offset by lower

sales under the SH-2G(I) contract with New Zealand, lower sales volume of our military bearing products and a decrease in gross margin on the Boeing 767/777 program attributable to cost growth. Additionally, there was a decline in organic gross profit at our Distribution segment primarily due to decreases in sales in the mining, merchant wholesalers durable goods and machinery manufacturing industries. These decreases were partially offset by increases in sales in the food manufacturing, chemical manufacturing and primary metal manufacturing industries. Additionally, gross profit as a percentage of net sales increased due to management's continued productivity and efficiency initiative to improve operating performance at the Distribution segment.

Gross profit from continuing operations increased in 2015 reflecting higher gross profit at both our Distribution and Aerospace segments. The primary driver of the increases was the contribution of \$17.7 million of gross margin from acquisitions completed in 2015 and 2014. Additionally, gross profit as a percentage of net sales increased due to the mix of sales shifting to higher margin programs in our Aerospace segment, specifically higher JPF direct commercial sales, the contribution of gross profit on our SH-2G program with Peru, higher sales volume and corresponding gross profit on our military bearing products and the contribution of gross profit on our commercial bearing products primarily used in distribution, regional aircraft and engines. These increases were partially offset by lower sales under our SH-2G(I) program with New Zealand, lower sales volume on our legacy missile fuze programs, a decline in gross margin on certain composite structure programs, \$4.0 million in expense associated with the resolution of matters related to our AH-1Z program and lower sales volume on our Bell Helicopter composite blade program. Additionally, there was a decline in organic gross profit at our Distribution segment primarily due to decreases in the machinery manufacturing, merchant wholesalers durable goods, mining and transportation equipment manufacturing industries. These decreases were partially offset by increases in the computer and electronic product manufacturing, paper manufacturing and chemical manufacturing industries.

Selling, General & Administrative Expenses (S,G&A) associated with Continuing Operations

	2016	2015	2014
<i>In thousands</i>			
S,G&A.....	\$ 443,158	\$ 413,043	\$ 397,199
\$ change.....	30,115	15,844	39,447
% change.....	7.3%	4.0%	11.0%
% of net sales.....	24.5%	23.3%	22.1%

S,G&A increased for the year ended December 31, 2016, as compared to 2015. The following table details the components of this change:

	2016	2015	2014
Organic S,G&A:			
Distribution.....	1.0 %	—%	2.5%
Aerospace.....	2.5 %	0.2%	0.2%
Corporate.....	(1.1)%	0.2%	2.5%
Total Organic S,G&A.....	<u>2.4 %</u>	<u>0.4%</u>	<u>5.2%</u>
Acquisition S,G&A:			
Distribution.....	0.3 %	3.1%	5.8%
Aerospace.....	4.6 %	0.5%	—%
Total Acquisition S,G&A.....	<u>4.9 %</u>	<u>3.6%</u>	<u>5.8%</u>
% change in S,G&A.....	<u>7.3 %</u>	<u>4.0%</u>	<u>11.0%</u>

S,G&A expenses associated with continuing operations increased for 2016 as compared to 2015 primarily due to \$20.0 million of incremental S,G&A expenses related to our 2015 acquisitions and higher expenses at both our Aerospace and Distribution segments. The Aerospace segment experienced higher costs associated with the sale of government contract program inventory which included previously capitalized general and administrative expenses. The increase in expenses at our Distribution segment was primarily due to the implementation of our productivity and efficiency initiative to improve operating performance and related incentive compensation costs. These increases were partially offset by benefits received from, and the

absence of costs associated with, the Distribution segment's 2015 restructuring activities and lower costs associated with the vehicle fleet at Distribution. Additionally, partially offsetting the increases in our segment S,G&A expenses were lower corporate expenses primarily due to the absence of acquisition related costs.

S,G&A expenses associated with continuing operations increased for 2015 as compared to 2014 primarily due to \$14.4 million of S,G&A expenses related to our 2015 and 2014 acquisitions, a \$0.9 million increase in corporate expenses and higher expenses at our Aerospace segment. Corporate expenses increased due to acquisition costs associated with our 2015 acquisitions and an increase in consulting costs. These increases were partially offset by the absence of costs incurred in the prior year in connection with the sale of our Moosup facility, lower salary and benefit expenses and lower long-term incentive compensation costs. The increase in expenses at our Aerospace segment was primarily due to a reduction of inventory on government contracts where allowable general and administrative expenses are included in inventory. Organic expenses at our Distribution segment remained relatively flat from 2014 to 2015. This was a result of lower expenses primarily due to a decrease in salary and benefit expenses, specifically lower incentive compensation costs, and lower costs associated with our vehicles, offset by costs related to restructuring activities, higher pension expense, an increase in consulting costs and higher depreciation and project expenses in part attributable to the introduction of the new Enterprise Resource Planning ("ERP") system.

Operating Income from Continuing Operations

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Operating income	\$ 105,923	\$ 104,519	\$ 110,507
\$ change.....	1,404	(5,988)	7,161
% change	1.3%	(5.4)%	6.9%
% of net sales.....	5.9%	5.9 %	6.2%

The increase in operating income from continuing operations for 2016 as compared to 2015 was due to the contribution of operating income from our 2015 acquisitions, an increase in organic operating income at our Aerospace segment and lower corporate expenses, primarily due to the absence of acquisition related costs. These changes were partially offset by a decrease in operating income at our Distribution segment. The decrease in operating income from continuing operations for 2015 as compared to 2014 was driven by lower organic operating income at our Distribution segment and higher corporate expenses. These decreases were partially offset by an increase in operating income at our Aerospace segment and the contribution of operating income from our acquisitions completed in 2015 and 2014. See Segment Results of Operations and Financial Condition below for further discussion of segment operating income.

Interest Expense, Net

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Interest expense, net	\$ 15,747	\$ 13,144	\$ 13,382

Net interest expense generally consists of interest charged on the revolving credit facility and other borrowings and the amortization of debt issuance costs, offset by interest income. The increase in net interest expense for 2016 as compared to 2015 was primarily due to higher average borrowings under our revolving credit facility and a higher interest rate. At December 31, 2016, the interest rate for outstanding amounts on both the revolving credit facility and term loan agreement was 2.19% compared to 1.67% at December 31, 2015.

The decrease in net interest expense for 2015 as compared to 2014 was primarily due to lower average borrowings under our revolving credit facility. At December 31, 2015, the interest rate for outstanding amounts on both the revolving credit facility and term loan agreement was 1.67% compared to 1.70% at December 31, 2014.

Effective Income Tax Rate for Continuing Operations

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Effective income tax rate.....	34.4%	31.3%	31.8%

The effective tax rate for continuing operations represents the combined federal, state and foreign tax effects attributable to pretax earnings for the year. The increase in the effective rate for 2016 as compared to 2015 was primarily the result of discrete items recognized in 2015 related to changes in tax laws. Prior to the law changes, we had established valuation allowances against certain net operating loss carryforwards. Some of these allowances were no longer deemed necessary as the changes to the tax laws made it more likely than not that these benefits will be realized.

The effective rate for 2015 was lower than the statutory rate in large part due to the impact of the discrete items discussed in the preceding paragraph. The primary cause of the 2014 effective tax rate being lower than the statutory tax rate was favorable adjustments recorded in 2014 reflecting differences between the provision for taxes recorded in 2013 and the actual returns filed for 2013 during 2014.

Gain/(Loss) on Disposal of Discontinued Operations, Net of Tax

The Company sold the Distribution segment's Mexican business unit, Delamac, on December 19, 2014. The sale resulted in a net loss on disposal of discontinued operations of \$5.3 million for the year ended December 31, 2014.

The Company sold substantially all of the assets and liabilities of our Distribution segment's Canadian operations on December 31, 2012. We recorded a \$0.3 million adjustment to the net gain on disposal of discontinued operations during the year ended December 31, 2014.

There were no earnings or losses from these discontinued operations during 2016 and 2015. More information on these transactions can be found in Note 2, *Discontinued Operations*, in the Notes to Consolidated Financial Statements included in this Form 10-K.

Other Matters

Information regarding our various environmental remediation activities and associated accruals can be found in Note 16, *Commitments and Contingencies*, in the Notes to Consolidated Financial Statements included in this Form 10-K.

SEGMENT RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Distribution Segment

Our Strategy

The Distribution segment's strategy is to offer a comprehensive portfolio of products and services to serve the mechanical, automation and fluid power markets driven by a highly trained technical sales and service organization while investing in technology to drive increased productivity and improved operating margins.

Results of Operations

The following table presents selected financial data for our Distribution segment:

	2016	2015	2014
<i>In thousands</i>			
Net sales from continuing operations	\$ 1,106,322	\$ 1,177,539	\$ 1,161,992
\$ change	(71,217)	15,547	122,038
% change	(6.0)%	1.3 %	11.7%
Operating income	\$ 41,859	\$ 49,441	\$ 56,765
\$ change	(7,582)	(7,324)	10,559
% change	(15.3)%	(12.9)%	22.9%
% of net sales	3.8 %	4.2 %	4.9%

Net sales from continuing operations

Organic sales per sales day is a metric management uses to evaluate performance trends in its Distribution segment and is calculated by taking total organic sales during a specific period divided by the number of sales days in that period. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Non-GAAP Financial Measures, in this Form 10-K.

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Organic Sales Per Sales Day <i>(in thousands, except numbers of sales days)</i>			
<i>Current period</i>

(a) Sales contributed by an acquisition are included in organic sales beginning with the thirteenth month following the date of acquisition. Prior period information is adjusted to reflect acquisition sales for that period as organic sales when calculating organic sales per sales day.

2016 versus 2015

The decrease in net sales from continuing operations for 2016 as compared to 2015 was driven by lower sales volume to both our maintenance, repair and overhaul customers and original equipment manufacturer customers. Looking at the markets we serve, sales were lower in the mining, machinery manufacturing, merchant wholesalers durable goods and paper manufacturing markets. Partially offsetting these decreases, were higher sales in food manufacturing and nonmetallic mineral product markets.

2015 versus 2014

Net sales from continuing operations for 2015 increased as compared to 2014 due to the contribution of \$52.8 million in sales in 2015 from our 2015 and 2014 acquisitions. The Distribution segment's organic sales per sales day decreased in 2015 primarily due to lower sales volume to our original equipment manufacturer customers. Looking at the markets we serve, sales were lower in the mining, machinery manufacturing and merchant wholesalers durable goods markets. Partially offsetting these decreases, were higher sales in paper manufacturing and chemical manufacturing.

Operating Income

2016 versus 2015

Operating income from continuing operations decreased during 2016 as compared to 2015 primarily due to lower organic sales and related gross profit and higher S,G&A costs. The increase in S,G&A expenses at our Distribution segment mostly relates to \$12.6 million of implementation expenses incurred in 2016 associated with our productivity initiative which includes operational process improvements and data analytics, primarily focused on expanding operating margins. These costs are not expected to recur at the same levels in future periods. These increases were partially offset by benefits received and the absence of costs associated with restructuring activities undertaken in the fourth quarter of 2015 and lower costs associated with our vehicles.

2015 versus 2014

Operating income from continuing operations decreased during 2015 as compared to 2014 primarily due to lower operating income associated with lower organic sales. This was partially offset by the contribution of operating income from our 2015 and 2014 acquisitions. Organic operating expenses remained relatively flat from 2014 to 2015. This was a result of lower expenses primarily due to a decrease in salary and benefit expenses, specifically lower incentive compensation costs, and lower costs associated with our vehicles, offset by costs related to restructuring activities, higher pension expense, an increase in consulting costs and higher depreciation and project expenses in part attributable to the introduction of the new ERP system.

Other Matters

Enterprise Resource Planning System

In July 2012, we announced a decision to invest in a new ERP business system for our Distribution segment with an estimated total cost of \$45.0 million. Since our announcement in 2012, Distribution has acquired nine businesses. To date, we have implemented the new ERP system at four acquired entities, of which two were not included in the original project scope. Additionally, an upgraded version of the software was released during the early stages of our initial implementation plan and Distribution elected to install this major upgrade because of the increased functionality, enhanced features and new user interface it offered. Recently, we completed another upgrade to the latest commercially available version of the software, which resulted in improved performance and functionality at the four locations currently on the ERP system. In order to accomplish full deployment to the bearings and transmission platform, there remains a significant amount of effort to ensure the systems will operate to our specifications and provide expected benefits, while limiting any potential disruption to our business and ancillary information technology systems. As a result of the unplanned implementations at the acquired businesses and the software upgrades, our implementation timeline has been extended. With the extension of our implementation timeline, the estimated total project cost has increased to \$51.1 million.

For the years ended December 31, 2016, 2015, and 2014, expenses incurred totaled approximately \$1.4 million, \$1.0 million and \$0.8 million, respectively, and capital expenditures totaled \$3.7 million, \$5.1 million, and \$8.0 million, respectively. Total to date ERP system capital expenditures as of December 31, 2016 were \$34.5 million. Depreciation expense for the ERP system for the years ended December 31, 2016, 2015, and 2014, totaled \$2.8 million, \$2.9 million and \$1.9 million, respectively.

Aerospace Segment

Our Strategy

Our strategic goals for the Aerospace segment are built upon four objectives: Depth, Diversity, Differentiation and Development. In order to achieve these objectives, we focus our efforts on improving balance between commercial and defense program content, leveraging our broad capabilities to expand market positions, executing strategic acquisitions and increasing focused investments in our people and infrastructure to increase capabilities and drive continuous improvement. The creation of our “One Kaman” approach combines design and build capabilities to provide customers with global integrated solutions. This approach provides us with the size and strength to address larger, integrated work packages from OEMs and Tier 1 suppliers.

Results of Operations

The following table presents selected financial data for our Aerospace segment:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Net sales	\$ 702,054	\$ 597,586	\$ 632,970
\$ change.....	104,468	(35,384)	19,003
% change	17.5%	(5.6)%	3.1%
Operating income	\$ 115,005	\$ 110,328	\$ 108,697
\$ change.....	4,677	1,631	6,124
% change	4.2%	1.5 %	6.0%
% of net sales.....	16.4%	18.5 %	17.2%

Net Sales

2016 versus 2015

Aerospace segment net sales increased due to the contribution of \$63.5 million of sales from our 2015 acquisitions and an increase in organic sales of \$41.0 million. Organic sales increased due to increases in sales of both our commercial and military product programs of \$34.8 million and \$6.2 million, respectively.

The increase in organic sales generated by our commercial programs/products is primarily attributable to higher sales associated with our K-MAX® program and higher commercial bearing product sales to original equipment manufacturers, totaling \$33.9 million.

The increase in organic sales generated by our military programs/products is primarily due to increased sales of our JPF to the USG, higher sales associated with our legacy missile fuze programs, increased sales volume on our Bell Helicopter composite blade program and sales under the SH-2G program with Peru. These increases, totaling \$50.6 million, were partially offset by a \$43.5 million decrease due to lower sales associated with our SH-2G(I) contract with New Zealand, lower sales on the Boeing A-10 program, a decrease in military bearing product sales and lower sales under the AH-1Z program.

Foreign currency exchange rates relative to the U.S. dollar had an unfavorable impact of \$5.9 million on net sales.

2015 versus 2014

Aerospace segment net sales decreased due to decreases in sales of both our military and commercial product programs of \$28.7 million and \$6.7 million, respectively, including an adverse impact of foreign currency translation of \$8.1 million. The decrease in military sales was primarily attributable to lower sales associated with the JPF program with the USG, our SH-2G contracts with New Zealand and Egypt, legacy missile and bomb fuze programs, certain composite structure programs and the Sikorsky BLACK HAWK helicopter program. Additionally, the absence of sales under the C-17 program contributed to this decrease, as this program was completed in 2014. These decreases, totaling \$99.0 million, were offset by \$70.6 million in increases, primarily due to higher direct sales to foreign militaries of the JPF, higher sales under the AH-1Z program and sales under the SH-2G program with Peru.

The decrease in commercial sales was primarily attributable to lower sales associated with our Bell Helicopter composite blade program and certain composite structure programs and a decline in sales volume on commercial bearing products primarily used in regional aircraft and engines and sold through distribution channels. These decreases, totaling \$25.5 million, were partially offset by a \$19.1 million increase in commercial sales associated with our K-MAX® program, higher commercial bearing product sales to original equipment manufacturers, higher composite imaging sales, an increase in sales associated with our Boeing 747-8 wing-to-body program and \$7.0 million in sales from our 2015 acquisitions.

Operating Income

2016 versus 2015

The increase in operating income for 2016 as compared to 2015 was primarily due to the contribution of \$21.2 million of gross profit from our 2015 acquisitions and higher organic gross profit. The increase in organic gross profit was primarily attributable to higher sales of our JPF and commercial bearing products, increased sales under our K-MAX® program and legacy missile fuze programs and the absence of \$4.0 million in expense associated with the resolution of matters related to our AH-1Z program in 2015. These increases, totaling \$34.6 million, were partially offset by the S,G&A expenses of the businesses we acquired in 2015, lower sales and associated gross profit under the SH-2G(I) contract with New Zealand, lower military bearing products sales volume and a decrease in gross margin on the Boeing 767/777 program attributable to cost growth.

Additionally, offsetting some of the increase in operating income was higher S,G&A expenses attributable to the sale of inventory associated with government contracts which included previously capitalized general and administrative expenses. See the table below for the expense recorded or benefit received from S,G&A expenses capitalized in inventory for certain government contracts.

2015 versus 2014

The increase in operating income for 2015 as compared to 2014 was primarily due to higher direct sales to foreign militaries of our JPF and the corresponding gross profit from these sales. In addition, operating income increased, to a lesser extent, due to gross profit contribution from our SH-2G program with Peru, higher military bearing products sales volume, higher sales volume for our commercial bearing products primarily used in regional aircraft and engines and sold through distribution channels and the contribution of gross margin from our 2015 acquisitions. Additionally, improved performance on our long-term contracts leading to changes in our contract cost estimates contributed approximately \$4.8 million to operating income in 2015, the largest of these improvements being approximately \$3.4 million associated with our JPF program. These increases totaled \$35.8 million and were partially offset by lower sales associated with our SH-2G(I) program with New Zealand, lower sales volume on our legacy missile fuze programs, a decline in gross margin on certain composite structure programs, \$4.0 million in expense associated with the resolution of matters related to our AH-1Z program and lower sales volume on our Bell Helicopter composite blade program.

For certain USG contracts, S,G&A expenses are capitalized in inventory until revenue is recognized, to the extent that gross profit is available to offset the S,G&A expenses. See the table below for the expense recorded or benefit received from S,G&A expenses capitalized in inventory for certain government contracts.

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
S,G&A expensed (capitalized), net	\$ 2,465	\$ (3,267)	\$ 786

Long-Term Contracts

For long-term aerospace contracts, we generally recognize sales and income based on the percentage-of-completion method of accounting, which allows for recognition of revenue as work on a contract progresses. We recognize sales and profit based on either (1) the cost-to-cost method, which results in costs being reported as cost of sales as incurred and sales (and profit) being recorded based upon the ratio of costs incurred to estimated total costs to complete the contract, or (2) the units-of-delivery method, which results in sales being recognized as deliveries are made and cost of sales being computed on the basis of the estimated ratio of total contract cost to total contract sales.

Revenue and cost estimates for all significant long-term contracts for which revenue is recognized using the percentage-of-completion method of accounting are reviewed and reassessed quarterly. Based upon these reviews, we record the effects of adjustments in profit estimates each period. If at any time management determines that in the case of a particular contract total costs will exceed total contract revenue, we record a provision for the entire anticipated contract loss at that time. The net decrease in our operating income from changes in contract estimates totaled \$0.8 million for the year ended December 31, 2016. The decrease in 2016 was primarily a result of cost growth on various programs, including the Boeing 767/777 program, the A-10 program and certain composites structures and assembly programs. This cost growth was partially offset by improved performance on the JPF program. For the year ended December 31, 2015, the net increase in our operating income from changes in contract estimates totaled \$4.8 million, excluding \$4.0 million in expense associated with the resolution of matters related to our AH-1Z program. The increase in 2015 was primarily a result of improved performance on the JPF and another legacy bomb fuze program. The net increase in our operating income from changes in contract estimates totaled \$1.9 million for the year ended December 31, 2014. The increase in 2014 was primarily a result of improved performance on the New Zealand SH-2G(I) program, the JPF program and a mix of composite programs. These improvements were slightly offset by cost growth on the Sikorsky BLACK HAWK helicopter program.

Backlog

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Backlog.....	\$ 581,619	\$ 659,350	\$ 518,025

The backlog balance decreased from 2015 to 2016, primarily due to deliveries under various programs. These decreases were partially offset by orders associated with our AH-1Z helicopter program and the SH-2G program with Peru.

The backlog balance increased from 2014 to 2015, primarily due to the USG JPF Program Option 12 award and JPF commercial sales orders received for foreign militaries, orders for our K-MAX® aircraft and orders under certain legacy

missile and bomb fuze programs. These increases were partially offset by work performed on the SH-2G(I) New Zealand program.

Major Programs/Product Lines

Defense Markets

A-10

The segment has contracted with Boeing to produce the wing control surfaces (inboard and outboard flaps, slats and deceleron assemblies) for the USAF's A-10 fleet. This contract has a potential value of over \$110.0 million; however, annual quantities will vary, as they are dependent upon the orders Boeing receives from the USAF. Initial deliveries under this program began in the third quarter of 2010 and full rate production began during the fourth quarter of 2012. Through December 31, 2016, 162 shipsets have been delivered over the life of the program, and approximately 11 shipsets remain in backlog. In 2016, the USAF indicated that they would delay the retirement of the A-10 fleet due to its vital close air support, search and rescue capabilities and the lack of a suitable replacement. We continue to monitor the defense budget and understand that despite this positive indication, the future of this program could be at risk without the continued support of Congress. We have not received any orders for additional shipsets, and as such, we expect a break in production as we complete the units we currently have on order and wait for follow-on orders from our customer. We have not received any indication from our customer that this program will be terminated. Production and deliveries under this contract have been extended through the first quarter of 2017. Tooling and nonrecurring costs on this program are being amortized over 242 shipsets, the number of shipsets expected to be delivered under this program. At December 31, 2016 and 2015, our program backlog was \$5.3 million and \$14.4 million, respectively, and total program inventory was \$12.8 million and \$17.1 million, respectively. The current total program inventory includes nonrecurring costs of \$8.7 million, which may not be recoverable in the event of a significant break in production or contract termination prior to the completion of the 242 shipsets.

Bearings

Our bearings products are included on numerous military platforms manufactured in North America, Asia and Europe. These products are used as original equipment and/or specified as replacement parts by the manufacturers. The most significant portion of our military bearings sales is derived from U.S. military platforms, such as the AH-64 helicopter, Virginia Class submarine and Joint Strike Fighter aircraft, and sales in Europe for the Typhoon program. These products are primarily proprietary self-lubricating, ball and roller bearings for aircraft flight controls, turbine engines and landing gear, and helicopter driveline couplings.

BLACK HAWK

The Sikorsky BLACK HAWK helicopter cockpit program involves the manufacture of cockpits including the installation of all wiring harnesses, hydraulic assemblies, control pedals and sticks, seat tracks, pneumatic lines, and the composite structure that holds the windscreen for most models of the BLACK HAWK helicopter. As a result of lower customer demand, we delivered 74 cockpits in 2016 as compared to the 76 cockpits delivered in 2015. Included in backlog at December 31, 2016 and 2015, was \$45.6 million and \$56.5 million, respectively, for orders on this program. We anticipate cockpit deliveries to total 73 in 2017.

AH-1Z

In February 2016, we reached an agreement with our customer that modified the scope of the AH-1Z contract and which, among other things, resolved outstanding claims associated with this program. We agreed to pay our customer \$4.0 million, all of which had been accrued at the end of 2015, and the customer agreed to pay us \$4.3 million. Both of these transactions were completed during the third quarter of 2016. Given the current volume of firm orders, we estimate the contract to be a zero margin program, taking into consideration the \$1.4 million of S,G&A costs capitalized in inventory associated with this contract. As of December 31, 2016 and 2015, our backlog for this program was \$45.4 million and \$10.2 million, respectively.

SH-2G Peru

During 2016, we were awarded a contract for \$41.0 million with General Dynamics Mission Systems—Canada to commence work on the implementation phase of the previously announced Peruvian Navy's SH-2G Super Seasprite aircraft program. This contract is for the remanufacture and upgrade of four Kaman SH-2G Super Seasprite aircraft and support for the operation of a fifth aircraft for the Peruvian Navy. The total expected value to Kaman for the combined program, including this contract and

previously issued contracts, now totals \$50.5 million. Total backlog at December 31, 2016 and 2015, was \$32.4 million and \$10.8 million, respectively.

FMU-152 A/B – Joint Programmable Fuze

We manufacture the JPF, an electro-mechanical bomb safe and arming device, which allows the settings of a weapon to be programmed in flight. We occasionally experience lot acceptance test failures due to the complexity of the product and the extreme parameters of the acceptance test. Given the maturity of the product, we now generally experience isolated failures, rather than systemic ones. As a result, identifying a root cause can take longer and result in inconsistent delivery quantities from quarter to quarter.

Sales of these fuzes can be direct to the USG, Foreign Military Sales ("FMS") through the USG and direct commercial sales to foreign militaries that, although not funded by the USG, require proper regulatory approvals from the USG. During 2016, we were awarded direct commercial sales contracts totaling \$93.0 million. The delay in receipt of government approvals has shifted deliveries for this JPF DCS award into the fourth quarter of 2017.

A total of 5,470 fuzes passed acceptance testing and were delivered to our customers during the fourth quarter of 2016, for a total of 31,058 fuzes delivered in 2016, representing \$136.3 million of sales. We expect to deliver 33,000 to 37,000 fuzes in 2017. A significant portion of these deliveries will be under Option 12 of our JPF program with the USG. Fuzes under Option 12 were negotiated at a lower selling price than Option 11 and the transition to Option 12 is expected to have an unfavorable margin impact of approximately \$6.5 million in 2017.

The Company currently provides the FMU-152 A/B to the USAF and twenty-six other nations, but the U.S. Navy currently utilizes a different fuze - the FMU-139. In 2015, NAVAIR solicited proposals for a firm fixed price production contract to implement improvements to the performance characteristics of the FMU-139 (such improved fuze having been designated the FMU-139 D/B), and the USAF has stated that, if and when a contract is awarded and production begins, the funds associated with the FMU-152 A/B will be redirected to the FMU-139 D/B. During the third quarter of 2015, the U.S. Navy announced that a competitor was awarded the contract for the FMU-139 D/B. In the event the FMU-139 D/B program proceeds as planned and the USAF redirects the funds associated with the FMU-152 A/B to the FMU-139 D/B, our business, financial condition, results of operations and cash flows may be materially adversely impacted. The timing of the impact on our financial statements is dependent on the ability of our competitor to complete the design and qualification phase of the program and other factors. Our competitor has publicly stated that this program is expected to have a 32-month qualification phase, preceding production. Therefore, the earliest the Company may see an impact on its financial statements is 2019; however, due to the complexity of this program, the uncertainty associated with the successful completion of each phase in accordance with the planned schedule and the pending status of the USAF's final decision to redirect funds to the FMU-139 D/B, the timing and magnitude of the impact on the Company's financial statements is not certain. The Company believes there remains strong foreign demand for the FMU-152 A/B. Total JPF backlog at December 31, 2016, was \$175.0 million, which represents orders for delivery into 2018. At December 31, 2015, total JPF backlog was \$213.4 million.

Commercial Markets

K-MAX®

During the second quarter of 2015, we announced that our Aerospace segment was resuming production of commercial K-MAX® aircraft. The aircraft are being manufactured at our Jacksonville, Florida and Bloomfield, Connecticut facilities. The first new helicopter is expected to be delivered in the second quarter of 2017. As of December 31, 2016 and 2015, our backlog for this program was \$13.7 million and \$30.0 million, respectively. In addition to the six aircraft on order, we believe there is additional demand for new aircraft to support firefighting, logging and other industries requiring repetitive aerial lift capabilities for which K-MAX® is extremely well suited.

777 / 767

In January 2015, we signed a multi-year follow-on contract with Boeing for the production of fixed trailing edge ("FTE") assemblies for the Boeing 777 and 767 commercial aircraft. To date, Kaman has provided more than 1,000 FTE kits and assemblies for each of the 777 and 767 programs since 1995 and 1986, respectively. During 2016, on average we delivered eight shipsets per month on the Boeing 777 platform and two shipsets per month on the Boeing 767 platform, which includes one shipset per month associated with a military tanker derivative of the 767. For 2017, we estimate deliveries on the 777 program to be six shipsets per month and on the 767 program to be two shipsets per month which includes one shipset per month associated with a military tanker derivative of the 767. The total contract value is estimated to be in excess of \$75

million; however, annual quantities will vary, as they are dependent upon the orders Boeing receives from its customers. As of December 31, 2016 and 2015, our backlog for these programs was \$20.4 million and \$26.1 million, respectively.

Airbus

Our U.K. Composites operations provide composite components for many Airbus platforms. The most significant of these are the A320, A330 and A350. Orders for all of these platforms are dependent on the customer's build rate.

Bearings

Our bearings products are included on commercial airliners and regional/business jets manufactured in North and South America, Europe and Asia and are used as original equipment and/or specified as replacement parts by airlines and aircraft manufacturers. These products are primarily proprietary self-lubricating, ball and roller bearings for aircraft flight controls, turbine engines, landing gear, and helicopter driveline couplings. The most significant portion of our commercial sales is derived from Boeing and Airbus platforms, such as the Boeing 737, 747, 777 and 787 and the Airbus A320, A330, A350 and A380.

Additionally, our bearings offerings include super precision miniature ball bearings used primarily in aerospace applications, dental products, surgical power tools, analytical devices and various industrial applications.

Bell Helicopter

In November 2014, we were awarded an extension to our current contract with Bell Helicopter to manufacture skin and skin-to-core components for several of Bell's commercial helicopter models. This three-year follow on contract has an expected value in excess of \$24.0 million. The components are manufactured at our full-service aerospace innovation and manufacturing support center in Bloomfield, Connecticut. At December 31, 2016 and 2015, \$8.9 million and \$12.1 million, respectively was included in backlog for orders under this program. Annual quantities for this program will vary, as they are dependent upon the orders Bell receives from its customers.

Engineering Design Services

The Company offers engineering design services to Aerospace OEM customers. Engineering design service programs generate revenue primarily through the billing of employees' time spent on customer projects. Our engineers provide value to new aircraft development and product improvement programs.

Other Matters

Learjet 85

In 2010, our U.K. Composites operation was awarded a contract to manufacture composite passenger entry and over-wing exit doors for the Learjet 85, a mid-sized business jet built primarily from composites and featuring advances in aerodynamics, structures and efficiency; however, in October 2015, Bombardier Inc. announced the cancellation of its Learjet 85 business aircraft program. At December 31, 2016, total accounts receivable and inventory related to the program was \$3.1 million, all of which we anticipate recovering. During the fourth quarter, we filed suit against our customer for the purposes of collecting the above amount.

For a discussion of other matters related to our Aerospace segment see Note 16, *Commitments and Contingencies*, in the Notes to Consolidated Financial Statements included in this Form 10-K.

LIQUIDITY AND CAPITAL RESOURCES

Discussion and Analysis of Cash Flows

We assess liquidity in terms of our ability to generate cash to fund working capital requirements and investing and financing activities. Significant factors affecting liquidity include: cash flows generated from or used by operating activities, capital expenditures, investments in our business segments and their programs, acquisitions, divestitures, dividends, availability of future credit, adequacy of available bank lines of credit, and factors that might otherwise affect the Company's business and operations generally, as described under the heading "Risk Factors" and "Forward-Looking Statements" in Item 1A of Part I of this Form 10-K.

We continue to rely upon bank financing as an important source of liquidity for our business activities including acquisitions. We believe this, when combined with cash generated from operating activities, will be sufficient to support our anticipated cash requirements for the foreseeable future. However, we may decide to raise additional debt or equity capital to support other business activities including potential future acquisitions. We anticipate our capital expenditures will be approximately \$35.0 million in 2017, primarily related to machinery and equipment and information technology infrastructure. In addition to our working capital requirements, one or more of the following items could have an impact on our liquidity during the next 12 months:

- the matters described in Note 16, *Commitments and Contingencies*, in the Notes to Consolidated Financial Statements, including the cost of existing environmental remediation matters and deposits required to be made to the environmental escrow for the Moosup facility sold in 2014 discussed in Note 10, *Environmental Costs*;
- contributions to our qualified pension plan and Supplemental Employees' Retirement Plan ("SERP");
- deferred compensation payments to former directors and officers;
- repurchase of common stock under the 2015 Share Repurchase Program;
- payment of dividends;
- costs associated with the start-up of new aerospace programs; and
- the extension of payment terms by our customers.

In addition, our \$115.0 million Convertible Notes became convertible during the third quarter and are scheduled to mature on November 15, 2017, unless earlier redeemed, repurchased or converted. We are currently assessing potential alternatives for the refinancing of these instruments prior to their scheduled maturity; however, there is sufficient borrowing capacity under our revolving credit agreement to provide the cash that would be required should the noteholders elect to convert their notes or to fund the settlement of the notes. We do not believe any of these matters will lead to a shortage of capital resources or liquidity that would adversely impact our business or results of operations.

We regularly monitor credit market conditions to identify potential issues that may adversely affect, or provide opportunities for, the securing and/or pricing of additional financing, if any, that may be necessary to continue with our growth strategy and finance working capital requirements.

Management regularly monitors its pension plan asset performance and the assumptions used in the determination of our benefit obligation, comparing them to actual experience. We continue to believe the assumptions selected are valid due to the long-term nature of our benefit obligation. In 2015 and prior, we used a single-weighted average discount rate to calculate interest and service cost associated with our defined benefit pension plans. For 2016, we utilized a "spot rate approach" in the calculation of interest and service cost for these plans. The spot rate approach applies separate discount rates for each projected benefit payment in the calculation of pension interest and service cost. This calculation change is considered a change in accounting estimate and was applied prospectively in 2016. The use of the spot rate approach had a \$4.7 million favorable impact on pension expense in 2016 relative to our estimate of what the expense would have been had we not changed our approach. See additional details in the "Critical Accounting Estimates" section below.

Effective December 31, 2015, the qualified pension plan was frozen with respect to future benefit accruals. Under CAS 413 we must calculate the USG's share of any pension curtailment adjustment resulting from the freeze. Such adjustments can result in an amount due to the USG for pension plans that are in a surplus position or an amount due to the contractor for plans that are in a deficit position. During the fourth quarter of 2016, the Company accrued a \$0.3 million liability representing our estimate of the amount due to the USG based on our pension curtailment adjustment calculation which was submitted to the USG for review in December. There can be no assurance that the ultimate resolution of this matter will not have a material adverse effect on our results of operations, financial position and cash flows.

A summary of our consolidated cash flows from continuing operations is as follows:

<i>(in thousands)</i>	<u>2016</u>	<u>2015</u>	<u>2014</u>	<u>16 vs. 15</u>	<u>15 vs.14</u>

Operating activities	\$ 107,707	\$ 109,584	\$ 109,089	\$ (1,877)	\$ 495
Investing activities.....	(37,583)	(232,608)	(100,059)	195,025	(132,549)
Financing activities	(43,959)	127,588	(3,538)	(171,547)	131,126
Free Cash Flow ^(a) :					
Net cash provided by (used in) operating activities	\$ 107,707	\$ 109,584	\$ 109,089	\$ (1,877)	\$ 495
Expenditures for property, plant and equipment....	(29,777)	(29,932)	(28,283)	155	(1,649)
Free cash flow	<u>\$ 77,930</u>	<u>\$ 79,652</u>	<u>\$ 80,806</u>	<u>\$ (1,722)</u>	<u>\$ (1,154)</u>

(a) Free Cash Flow, a non-GAAP financial measure, is defined as net cash provided by operating activities less expenditures for property plant and equipment, both of which are presented in our Consolidated Statements of Cash Flows. See Management's Discussion and Analysis of Financial Condition and Results of Operations-Non-GAAP Financial Measures, in this Form 10-K.

2016 vs. 2015

Net cash provided by operating activities of continuing operations decreased \$1.9 million in 2016 compared to 2015, due to growth in inventory primarily attributable to the timing of deliveries on our JPF program and the build-up of inventory associated with the production of the K-MAX®, partially offset by higher depreciation and amortization expense, which is an adjustment to reconcile earnings from continuing operations to cash flows provided by operations. Depreciation and amortization expense increased as compared to the prior year due to the intangible and fixed assets acquired in 2015.

Net cash used in investing activities of continuing operations decreased \$195.0 million primarily due to a decrease in cash used for acquisitions.

Net cash used in financing activities of continuing operations for 2016 was \$44.0 million, compared to net cash provided by financing activities of continuing operations for 2015 of \$127.6 million. This change is due to a \$179.4 million net decrease in borrowings under our revolving credit facility and Term Loan facility. Borrowings under our revolving credit facility were higher in 2015 due to the acquisitions completed during the year. These decreases were partially offset by the change in repayments under the Term Loan facility. In 2016, we had repayments of \$5.0 million, compared to \$83.8 million of repayments in the prior year. The higher repayments in 2015 were a result of the completion of the amended and restated Credit Agreement in May 2015.

2015 vs. 2014

Net cash provided by operating activities of continuing operations increased \$0.5 million in 2015 compared to 2014, primarily due to higher accounts receivable collections, advances on contracts received for our Peru and K-MAX® programs and cash generated as we near completion of our SH-2G(I) program. Offsetting these changes were a growth in inventory due to a delay in sales associated with our legacy missile fuze and composite structure programs, and higher employee benefit related payments.

Net cash used in investing activities of continuing operations increased \$132.5 million primarily due to a \$123.6 million increase in cash used for acquisitions and the absence of \$7.9 million of proceeds received in 2014 from the disposal of our Distribution segment's Mexico business unit, Delamac.

Net cash provided by financing activities of continuing operations increased \$131.1 million primarily due to a \$227.2 million increase in borrowings under our revolving credit facility and Term Loan facility. These increases were partially offset by repayments under the revolving credit agreement in 2015 of \$83.8 million, compared to \$10.0 million of repayments in the prior year, and \$12.0 million of cash used to buy treasury stock under our share repurchase program.

Financing Arrangements

Credit Agreement

On May 6, 2015, the Company closed on an amended and restated \$700.0 million Credit Agreement (the "Credit Agreement") with JPMorgan Chase Bank N.A., as Administrative Agent, Bank of America, N.A. and Citizens Bank, N.A. as Co-Syndication Agents and SunTrust Bank, KeyBank N.A., TD Bank, N.A., BB&T and Fifth Third Bank, as Co-Documentation Agents. The Credit Agreement amends and restates the Company's previously existing credit facility in its entirety to, among other things: (i) extend the maturity date to May 6, 2020; (ii) increase the aggregate amount of revolving commitments from \$400.0 million to \$600.0 million; (iii) reinstate the aggregate amount of outstanding Term Loans to \$100.0 million; (iv) modify the affirmative and negative covenants set forth in the facility; and (v) effectuate a number of additional modifications to the terms and provisions of the facility, including its pricing. Capitalized terms used but not defined within this discussion of the Credit Agreement have the meanings ascribed thereto in the Credit Agreement.

The Term Loan commitment requires quarterly payments of principal (which commenced on June 30, 2015) at the rate of \$1.25 million, increasing to \$1.875 million on June 30, 2017, and then to \$2.5 million on June 30, 2019, with \$65.0 million payable in the final quarter of the facility's term. The facility includes an accordion feature that allows the Company to increase the aggregate amount available up to \$900.0 million with additional commitments from the Lenders.

Interest rates on amounts outstanding under the Credit Agreement are variable. At December 31, 2016 and 2015, the interest rates for the outstanding amounts on the Credit Agreement were 2.19% and 1.67%, respectively. In addition, we are required to pay a quarterly commitment fee on the unused revolving loan commitment amount at a rate ranging from 0.175% to 0.300% per annum, based on the Consolidated Senior Secured Leverage Ratio. Fees for outstanding letters of credit range from 1.25% to 2.00%, based on the Consolidated Senior Secured Leverage Ratio.

The financial covenants associated with the Credit Agreement include a requirement that (i) the Consolidated Senior Secured Leverage Ratio cannot be greater than 3.50 to 1.00, with an election to increase the maximum to 3.75 to 1.00 for four consecutive quarters, in connection with a Permitted Acquisition with consideration in excess of \$125.0 million; (ii) the Consolidated Total Leverage Ratio cannot be greater than 4.00 to 1.00, with an election to increase the maximum to 4.25 to 1.00 for four consecutive quarters, in connection with a Permitted Acquisition with consideration in excess of \$125.0 million; (iii) the Consolidated Interest Coverage Ratio cannot be less than 4.00 to 1.00; and (iv) Liquidity: (a) as of the last day of the fiscal quarter of the Company ending two full fiscal quarters prior to the stated maturity of the Specified Convertible Notes, cannot be less than an amount equal to 50% of the outstanding principal amount of the Specified Convertible Notes, and (b) as of the last day of each fiscal quarter of the Company ending thereafter, cannot be less than an amount equal to the outstanding principal amount of the Specified Convertible Notes as of such day. The Company was in compliance with those financial covenants as of and for the quarter ended December 31, 2016, and management does not anticipate noncompliance in the foreseeable future.

Total average bank borrowings under our revolving credit facility and term loan facility during the year ended December 31, 2016, were \$315.6 million compared to \$192.5 million for the year ended December 31, 2015. As of December 31, 2016 and 2015, there was \$209.5 million and \$259.9 million available for borrowing, respectively, net of letters of credit. Letters of credit are generally considered borrowings for purposes of calculating available borrowings. A total of \$5.9 million in letters of credit were outstanding as of December 31, 2016 and 2015.

Convertible Notes

In November 2010, we issued convertible unsecured notes due on November 15, 2017, in the aggregate principal amount of \$115.0 million in a private placement offering (the "Convertible Notes"). These notes bear 3.25% interest per annum on the principal amount, payable semiannually in arrears on May 15 and November 15 of each year, beginning on May 15, 2011. Proceeds from the offering were \$111.0 million, net of fees and expenses which were capitalized. The proceeds were used to repay \$62.2 million of borrowings outstanding on the Company's Revolving Credit Agreement, make a \$25.0 million voluntary contribution to the Qualified Pension Plan and pay \$13.2 million for the purchase of call options related to the convertible note offering. See below for further discussion of the call options.

The Convertible Notes will mature on November 15, 2017, unless earlier redeemed, repurchased by the Company or converted. Upon conversion, the Convertible Notes require net share settlement, where the aggregate principal amount of the notes will be paid in cash and remaining amounts due, if any, will be settled in cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election.

At December 31, 2016, the market value of the Company's Common Stock exceeded 130% of the conversion price for the notes for 20 or more of the last 30 consecutive trading days preceding the quarter end. As a result, the Convertible Notes are convertible at the option of the noteholders and will continue to be convertible through April 3, 2017. The carrying amount of the Convertible Notes was reclassified to current liabilities and a portion of the equity component, representing the unamortized debt discount, was reclassified to temporary equity on the Company's Consolidated Balance Sheet as of December 31, 2016. Upon closure of the conversion period, the Notes will remain in current liabilities due to the scheduled maturity and the temporary equity will be reclassified into permanent equity.

The following table illustrates the conversion rate at each date:

	<u>December 31, 2016</u>	<u>December 31, 2015</u>
Convertible Notes		
Conversion Rate per \$1,000 principal amount ⁽¹⁾	29.9134	29.8059
Conversion Price ⁽²⁾	\$ 33.4298	\$ 33.5504
Contingent Conversion Price ⁽³⁾	\$ 43.46	\$ 43.62
Aggregate shares to be issued upon conversion ⁽⁴⁾	3,440,045	3,427,679

⁽¹⁾ Represents the number of shares of Common Stock hypothetically issuable per \$1,000 principal amount of Notes, subject to adjustments per the Convertible Note Indenture dated November 19, 2010. At the date the Company issued the Convertible Notes, the conversion rate initially equaled 29.4499 shares of common stock per \$1,000 principal amount of notes (which is equivalent to an initial conversion price of approximately \$33.96 per share of common stock). The conversion rate is subject to adjustment upon the occurrence of certain specified events, such as an increase in the dividend paid to shareholders.

⁽²⁾ Represents \$1,000 divided by the conversion rate as of such date. The conversion price reflects the strike price of the embedded option within the Convertible Note. Were the Company's share price to exceed the conversion price at conversion the noteholders would be entitled to receive additional consideration either in cash, shares or a combination thereof, the form of which is at the sole discretion of the Company.

⁽³⁾ Prior to May 15, 2017, the notes are convertible only in the following circumstances: (1) during any fiscal quarter commencing after April 1, 2011, and only during any such fiscal quarter, if the last reported sale price of our common stock was greater than or equal to 130% of the applicable conversion price for at least 20 trading days (whether or not consecutive) during the 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, (2) upon the occurrence of specified corporate transactions, or (3) during the five consecutive business-day period following any five consecutive trading-day period in which, for each day of that period, the trading price for the notes was less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate on such trading day. On and after May 15, 2017, until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their notes at any time, regardless of the foregoing circumstances. Upon a change in control or termination of trading, holders of the notes may require us to repurchase all or a portion of their notes for cash at a repurchase price equal to 100% of the principal amount, plus any accrued and unpaid interest.

⁽⁴⁾ Represents the number of shares hypothetically issuable upon conversion of the principal balance of the Convertible Notes at each date; however, as the terms of the Convertible Notes require net share settlement, the aggregate principal amount of the notes will be paid in cash. Amounts due in excess of the principal, if any, may be settled in cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election.

Because the embedded conversion option is indexed to the Company's own stock and would be classified in shareholders' equity, it does not meet the criterion under FASB Accounting Standards Codification Topic 815 - Derivatives and Hedging ("ASC 815") that would require separate accounting as a derivative instrument.

In connection with the offering, we entered into convertible note hedge transactions with affiliates of the initial purchasers. These transactions are intended to reduce the potential dilution to our Company's shareholders upon any future conversion of the notes. The call options, which cost an aggregate \$13.2 million, were recorded as a reduction of additional paid-in capital. The Company also entered into warrant transactions concurrently with the offering, pursuant to which we sold warrants to acquire up to approximately 3.4 million shares of our common stock to the same counterparties that entered into the convertible note hedge transactions. Proceeds received from the issuance of the warrants totaled approximately \$1.9 million and were recorded as additional paid-in capital. The convertible note hedge and warrant transactions effectively increased the conversion price of the convertible notes.

The following table illustrates the warrant price at each date:

	<u>December 31, 2016</u>	<u>December 31, 2015</u>
Warrants		
Warrant Price.....	\$ 43.72	\$ 43.87

The note payable principal balance at the date of issuance of \$115.0 million was bifurcated into the debt component of \$101.7 million and the equity component of \$13.3 million. The difference between the note payable principal balance and the value of the debt component is being accreted to interest expense over a period of 7 years. The debt component was recognized at the present value of associated cash flows discounted using a 5.25% discount rate, the borrowing rate at the date of issuance for a similar debt instrument without a conversion feature. We recorded \$0.5 million of debt issuance costs as an offset to additional paid-in capital. The balance, \$3.1 million, is being amortized over the term of the notes. Total amortization expense for the years ended December 31, 2016, 2015, and 2014 was \$0.6 million, \$0.5 million and \$0.5 million.

The following table illustrates the dilutive effect of securities issued under the convertible debt and warrants at various theoretical average share prices for our stock as of December 31, 2016:

	<u>Theoretical Average Share Price of Kaman Stock</u>				
	<u>\$33.43</u>	<u>\$43.72</u>	<u>\$46.50</u>	<u>\$50.00</u>	<u>\$55.00</u>
Dilutive Shares associated with:					
Convertible Debt.....	—	809,417	966,926	1,140,045	1,349,135
Warrants.....	—	—	205,974	432,359	705,785
Total dilutive shares.....	<u>—</u>	<u>809,417</u>	<u>1,172,900</u>	<u>1,572,404</u>	<u>2,054,920</u>

Debt Issuance Costs

Total expense associated with the amortization of debt issuance costs for the years ended December 31, 2016, 2015 and 2014, was \$1.0 million, \$1.0 million and \$1.1 million, respectively.

Interest Rate Swaps

During 2015, we entered into interest rate swap agreements for the purposes of hedging the eight quarterly variable-rate Term Loan interest payments due in 2016 and 2017. Additionally, we have entered into interest rate swap agreements to effectively convert \$83.8 million of our variable rate revolving credit facility debt to a fixed interest rate. These interest rate swap agreements were designated as cash flow hedges and intended to manage interest rate risk associated with our variable-rate borrowings and minimize the impact on our earnings and cash flows of interest rate fluctuations attributable to changes in LIBOR rates. Interest expense associated with these interest rate swap agreements for the year ended December 31, 2016, was \$0.9 million. There was no interest expense associated with these interest rate swaps in 2015.

During 2013, we entered into interest rate swap agreements for the purposes of hedging the eight quarterly variable-rate Term Loan interest payments due in 2014 and 2015. These interest rate swap agreements were designated as cash flow hedges and intended to manage interest rate risk associated with our variable-rate borrowings and minimize the impact on our earnings and cash flows of interest rate fluctuations attributable to changes in LIBOR rates. Interest expense associated with the interest rate swap agreements for the years ended December 31, 2015 and 2014, was \$0.3 million and \$0.4 million, respectively. As of December 31, 2015, these interest rate swaps had matured.

Other Sources/Uses of Capital

Pension

We contributed \$10.0 million to the qualified pension plan and paid \$0.5 million in SERP benefits during both 2016 and 2015. In 2017, we have contributed \$10.0 million to the qualified pension plan (as of the date of this filing) and do not anticipate making any further contributions this year. We expect to pay \$3.1 million in SERP benefits in 2017.

Acquisitions

The following table illustrates the cash paid for acquisitions:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
Cash paid for acquisitions completed during the year	\$ —	\$ 196,395	\$ 70,948
Cash paid for holdback payments during the year	1,014	3,404	3,060
Earn-out and other payments during the year	5,617	1,453	3,610
Total cash paid for acquisitions	<u>\$ 6,631</u>	<u>\$ 201,252</u>	<u>\$ 77,618</u>

Total consideration for acquisitions completed in 2015 and 2014 was \$197.1 million and \$71.9 million, respectively. We anticipate that we will continue to identify and evaluate potential acquisition candidates, the purchase of which may require the use of additional capital.

Stock Repurchase Plans

On April 29, 2015, we announced that our Board of Directors approved a share repurchase program ("2015 Share Repurchase Program") authorizing the repurchase of up to \$100.0 million of the common stock, par value \$1.00 per share, of the Company. This new program replaces our 2000 Stock Repurchase Program. We currently intend to repurchase shares to offset the annual issuance of shares under our employee stock plans, but the timing and actual number of shares repurchased will depend on a variety of factors including stock price, market conditions, corporate and regulatory requirements, capital availability and other factors, including acquisition opportunities. As of December 31, 2016, we had repurchased 600,000 shares under the 2015 Share Repurchase Program and approximately \$74.9 million remained available for repurchases under this authorization.

NON-GAAP FINANCIAL MEASURES

Management believes that the non-GAAP measures used in this report on Form 10-K provide investors with important perspectives into our ongoing business performance. We do not intend for the information to be considered in isolation or as a substitute for the related GAAP measures. Other companies may define the measures differently. We define the non-GAAP measures used in this report and other disclosures as follows:

Organic Sales

Organic Sales is defined as "Net Sales" less sales derived from acquisitions completed during the preceding twelve months. We believe that this measure provides management and investors with a more complete understanding of underlying operating results and trends of established, ongoing operations by excluding the effect of acquisitions, which can obscure underlying trends. We also believe that presenting Organic Sales separately for our segments provides management and investors with useful information about the trends impacting our segments and enables a more direct comparison to other businesses and companies in similar industries. Management recognizes that the term "Organic Sales" may be interpreted differently by other companies and under different circumstances.

Organic Sales (in thousands)

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>Distribution</i>			
Net sales	\$1,106,322	\$1,177,539	\$1,161,992
Less: Acquisition Sales	5,171	52,798	89,388
Organic Sales	<u>\$1,101,151</u>	<u>\$1,124,741</u>	<u>\$1,072,604</u>
<i>Aerospace</i>			
Net sales	\$ 702,054	\$ 597,586	\$ 632,970
Less: Acquisition Sales	63,483	7,297	—
Organic Sales	<u>\$ 638,571</u>	<u>\$ 590,289</u>	<u>\$ 632,970</u>
<i>Consolidated</i>			
Net sales	\$1,808,376	\$1,775,125	\$1,794,962
Less: Acquisition Sales	68,654	60,095	89,388
Organic Sales	<u>\$1,739,722</u>	<u>\$1,715,030</u>	<u>\$1,705,574</u>

Organic Sales per Sales Day

Organic sales per sales day is defined as GAAP “Net sales of the Distribution segment,” less sales derived from acquisitions completed during the preceding twelve months, divided by the number of sales days in a given period. Sales days ("Sales Days") are the days that the Distribution segment’s branch locations were open for business and exclude weekends and holidays. Management believes Organic Sales per Sales Day provides an important perspective on how net sales may be impacted by the number of days the segment is open for business and provides a basis for comparing periods in which the number of sales days differs.

Free Cash Flow

Free cash flow is defined as GAAP “Net cash provided by (used in) operating activities” in a period less “Expenditures for property, plant & equipment” in the same period. Management believes Free Cash Flow provides an important perspective on our ability to generate cash from our business operations and, as such, that it is an important financial measure for use in evaluating the Company's financial performance. Free Cash Flow should not be viewed as representing the residual cash flow available for discretionary expenditures such as dividends to shareholders or acquisitions, as it may exclude certain mandatory expenditures such as repayment of maturing debt and other contractual obligations. Management uses Free Cash Flow internally to assess overall liquidity.

CONTRACTUAL OBLIGATIONS AND OFF-BALANCE SHEET ARRANGEMENTS

Contractual Obligations

The following table summarizes certain of the Company's contractual obligations as of December 31, 2016:

Contractual Obligations	Payments due by period (in millions)				
	Total	Within 1 year	1-3 years	3-5 years	More than 5 years
Long-term debt	\$ 303.9	\$ 6.9	\$ 16.9	\$ 280.1	\$ —
Convertible notes	115.0	115.0	—	—	—
Interest payments on debt ^(a)	66.9	14.3	27.3	25.3	—
Operating leases	87.8	25.3	34.2	15.6	12.7
Capital leases	3.0	0.5	1.4	0.9	0.2
Purchase obligations ^(b)	141.2	119.5	17.5	4.2	—
Other long-term obligations ^(c)	49.7	14.3	15.2	3.9	16.3
Planned funding of pension and SERP ^(d)	19.1	13.1	1.0	2.6	2.4
Total	\$ 786.6	\$ 308.9	\$ 113.5	\$ 332.6	\$ 31.6

Note: For more information refer to Note 11, *Debt*; Note 16, *Commitments and Contingencies*; Note 15, *Other Long-Term Liabilities*; Note 14, *Pension Plans*, and Note 13, *Income Taxes* in the Notes to Consolidated Financial Statements included in this Form 10-K.

- (a) Interest payments on debt are calculated based on the applicable rate and payment dates for each instrument. For variable-rate instruments, interest rates and payment dates are based on management's estimate of the most likely scenarios for each relevant debt instrument.
- (b) This category includes purchase commitments to suppliers for materials and supplies as part of the ordinary course of business, consulting arrangements and support services. Only obligations of at least \$50,000 are included.
- (c) This category includes obligations under the Company's long-term incentive plan, deferred compensation plan, environmental liabilities, acquisition holdbacks and unrecognized tax benefits.
- (d) This category includes planned funding of the Company's SERP and qualified pension plan. Projected funding for the qualified pension plan beyond one year has not been included as there are several significant factors, such as the future market value of plan assets and projected investment return rates, which could cause actual funding requirements to differ materially from projected funding.

Off-Balance Sheet Arrangements

The obligation to pay earn-out amounts depends upon the attainment of specific milestones by an aerospace operating unit acquired in 2002. Through December 31, 2016, the Company has recorded additional goodwill of \$25.0 million related to the contingency payments to the former owners of the Aerospace Orlando operations. The final contingency payment of \$1.4 million recorded in 2016 will occur in the second quarter of 2017.

As of December 31, 2016, we had \$5.9 million of outstanding standby letters of credit, of which, \$5.7 million were under the revolving credit facility.

CRITICAL ACCOUNTING ESTIMATES

Our significant accounting policies are outlined in Note 1 to the Consolidated Financial Statements included in this Form 10-K. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses and related disclosures based upon historical experience, current trends and other factors that management believes to be relevant. We are also responsible for evaluating the propriety of our estimates, judgments and accounting methods as new events occur. Actual results could differ from those estimates. Management periodically reviews the Company's critical accounting policies, estimates and judgments with the Audit Committee of our Board of Directors. The most significant areas currently involving management judgments and estimates are described below.

Long-Term Contracts

Methodology

For long-term aerospace contracts, we generally recognize sales and income based on the percentage-of-completion method of accounting, which allows for recognition of revenue as work on a contract progresses. We recognize sales and profit based upon either (1) the cost-to-cost method, in which sales and profit are recorded based upon the ratio of costs incurred to estimated total costs to complete the contract, or (2) the units-of-delivery method, in which sales are recognized as deliveries are made and cost of sales is computed on the basis of the estimated ratio of total contract cost to total contract sales.

Management performs detailed quarterly reviews of all of our significant long-term contracts. Based upon these reviews, we record the effects of adjustments in profit estimates each period. If at any time management determines that in the case of a particular contract total costs will exceed total contract revenue, we record a provision for the entire anticipated contract loss at that time.

Judgment and Uncertainties

The percentage-of-completion method requires that we estimate future revenues and costs over the life of a contract. Revenues are estimated based upon the original contract price, with consideration being given to exercised contract options, change orders and in some cases projected customer requirements. Contract costs may be incurred over a period of several years, and the estimation of these costs requires significant judgment based upon the acquired knowledge and experience of program managers, engineers and financial professionals. Estimated costs are based primarily on anticipated purchase contract terms, historical performance trends, business base and other economic projections. The complexity of certain programs as well as technical risks and uncertainty as to the future availability of materials and labor resources could affect the Company's ability to accurately estimate future contract costs.

The Company utilizes units-of-delivery to measure percentage of completion for fixed price programs involving the repetitive production and delivery of parts, components, or shipsets over an extended period of time. For other programs, the Company utilizes cost-to-cost when measuring percentage of completion. The following table illustrates the amount of revenue recognized under the percentage-of-completion method.

	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Revenue recognized under percentage of completion method			
Units-of-delivery	\$ 307,294	\$ 270,525	\$ 282,975
Cost-to-cost.....	47,085	52,734	67,936
Total revenue recognized under percentage of completion method.....	<u>\$ 354,379</u>	<u>\$ 323,259</u>	<u>\$ 350,911</u>
% of consolidated net sales - Units-of-delivery	17.0%	15.2%	15.8%
% of consolidated net sales - Cost-to-cost	2.6%	3.0%	3.8%
% of consolidated net sales - Percentage-of-completion method	<u>19.6%</u>	<u>18.2%</u>	<u>19.6%</u>

Effect if Actual Results Differ From Assumptions

While we do not believe there is a reasonable likelihood there will be a material change in estimates or assumptions used to calculate our long-term revenues and costs, estimating the percentage of work complete on certain programs is a complex task. As a result, changes to these estimates could have a significant impact on our results of operations. These programs include the Sikorsky BLACK HAWK program, the JPF program, the K-MAX® program, the Boeing A-10 program, the AH-1Z program, our other Bell Helicopter programs and several other programs. Estimating the ultimate total cost of these programs is challenging due to the complexity of the programs, unanticipated increases in production requirements, the nature of the materials needed to complete these programs, change orders related to the programs and the need to manage our customers' expectations. These programs are an important element in our continuing strategy to increase operating efficiencies and profitability as well as broaden our business base. Management continues to monitor and update program cost estimates quarterly for these contracts. A significant change in an estimate on one or more of these programs could have a material effect on our financial position and results of operations. The net decrease in our operating income from changes in contract estimates totaled \$0.8 million for the year ended December 31, 2016. The net increase in our operating income from changes in contract estimates totaled \$4.8 million, excluding the \$4.0 million in expense associated with the resolution of the matters related to our AH-1Z program, and \$1.9 million for the years ended December 31, 2015 and 2014, respectively.

Allowance for Doubtful Accounts

Methodology

The allowance for doubtful accounts represents management's best estimate of probable losses inherent in the receivable balance. These estimates are based on known past due amounts and historical write-off experience, as well as trends and factors impacting the credit risk associated with specific customers. In an effort to identify adverse trends for trade receivables, we perform ongoing reviews of account balances and the aging of receivables. Amounts are considered past due when payment has not been received within a pre-determined time frame based upon the credit terms extended. For our government and commercial contracts, we evaluate, on an ongoing basis, the amount of recoverable costs. The recoverability of costs is evaluated on a contract-by-contract basis based upon historical trends of payments, program viability and the customer's credit-worthiness.

Judgment and Uncertainties

Write-offs are charged against the allowance for doubtful accounts only after we have exhausted all collection efforts. Actual write-offs and adjustments could differ from the allowance estimates due to unanticipated changes in the business environment as well as factors and risks associated with specific customers.

Effect if Actual Results Differ From Assumptions

As of December 31, 2016 and 2015, our allowance for doubtful accounts was \$4.1 million and \$3.0 million, respectively. Receivables written off, net of recoveries, in 2016 and 2015 were \$2.1 million and \$2.0 million, respectively.

Currently we do not believe that we have a significant amount of risk relative to the allowance for doubtful accounts. A 10% change in the allowance would have a \$0.4 million effect on pre-tax earnings.

Inventory Valuation

Methodology

We have five types of inventory (a) merchandise for resale, (b) raw materials, (c) contracts in process, (d) other work in process, and (e) finished goods. Merchandise for resale and raw materials are stated at the lower of the cost of the inventory or its fair market value. Contracts in process, other work in process and finished goods are valued at production cost comprised of material, labor and overhead, including general and administrative expenses on certain government contracts. Contracts in process, other work in process and finished goods are reported at the lower of cost or net realizable value. Raw material includes certain general stock materials but primarily relates to purchases that were made in anticipation of specific programs that have not been started as of the balance sheet date.

Judgment and Uncertainties

The process for evaluating inventory obsolescence or market value often requires the Company to make subjective judgments and estimates concerning future sales levels, quantities and prices at which such inventory will be sold in the normal course of business. We adjust our inventory by the difference between the estimated market value and the actual cost of our inventory to arrive at net realizable value. Changes in estimates of future sales volume may necessitate future write-downs of inventory value. The K-MAX® inventory balance, consisting of work in process and finished goods, was \$15.9 million as of December 31, 2016. We believe it is stated at net realizable value, although lack of demand for spare parts in the future could result in additional write-downs of the inventory value. Overall, management believes that our inventory is appropriately valued and not subject to further obsolescence in the near term.

Management believes \$3.8 million of the SH-2G(I) inventory will be sold after December 31, 2017. This balance represents spares requirements and inventory to be used in SH-2G programs.

Effect if Actual Results Differ From Assumptions

Inventory valuation at our Distribution segment generally requires less subjective management judgment than the valuation of certain inventory in the Aerospace segment. Management reviews the K-MAX® inventory balance on an annual basis to determine whether any additional write-downs are necessary. We believe this inventory is stated at net realizable value, although lack of demand for spare parts in the future could result in additional write-downs of the inventory value. Overall, management believes that our inventory is appropriately valued and not subject to further obsolescence in the near term. If such

a write-down were to occur, this could have a significant impact on our operating results. A 10% write-down of the December 31, 2016, inventory balance would have affected pre-tax earnings by approximately \$1.6 million in 2016.

The balance of SH-2G(I) inventory projected to be sold after December 31, 2017, represents spares requirements and inventory to be used to support the SH-2G programs in future periods and as such is appropriately valued as of December 31, 2016.

Goodwill and Other Intangible Assets

Methodology

Goodwill and certain intangible assets that have indefinite lives are evaluated at least annually for impairment. The annual evaluation is generally performed during the fourth quarter, using forecast information. All intangible assets are also reviewed for possible impairment whenever changes in conditions indicate that their carrying value may not be recoverable. For reporting units that qualify for a qualitative assessment, management will perform the two-step impairment test after a period of three years has elapsed since the test was last performed.

In accordance with generally accepted accounting principles, we test goodwill for impairment at the reporting unit level. The identification and measurement of goodwill impairment involves the estimation of fair value of the reporting unit as compared to its carrying value. In the Distribution segment, this testing is conducted at the segment level as no components represent reporting units. In the Aerospace segment, testing is conducted one level below the segment level, and components are not aggregated for purposes of goodwill testing.

As previously disclosed in our 2015 Form 10-K, RWG, EXTEX and GRW were reorganized under the single management team of Kaman Specialty Bearings and Engineered Products. This new reporting unit was the basis for our annual test for goodwill impairment in 2016. We tested the new reporting unit for impairment immediately after its creation by comparing the sum of the fair values of the entities moved into the new reporting unit to the carrying value of the new reporting unit, noting the fair value exceeded the carrying value. Prior to the reorganization, these reporting units were standalone reporting units. The fair value of RWG was assessed as part of our 2015 annual test for goodwill impairment during the fourth quarter of 2015. EXTEX and GRW were acquired during the fourth quarter of 2015 and, as such, were not included in the 2015 annual test for goodwill impairment. There were no significant changes to the conditions of the entities in the new reporting unit that would have impacted the results of the analysis as of January 1, 2016. Since this is the first year the Company assessed goodwill at this reporting unit level, the two-step impairment test was performed.

The carrying value of goodwill as of December 31, 2016, was \$149.2 million and \$188.7 million for the Distribution and Aerospace segments, respectively. The specific Aerospace reporting units contributing to the total goodwill balance were as follows: Precision Products Orlando facility ("KPP-Orlando"), \$41.4 million; Specialty Bearings and Engineered Products, \$97.7 million; and Aerosystems, \$49.6 million. During 2016, it was determined that the two-step impairment test would be performed for the following reporting units: Distribution, Aerosystems and Specialty Bearings and Engineered Products. See Note 9, *Goodwill and Other Intangible Assets, Net*, in the Notes to Consolidated Financial Statements for additional information regarding these assets.

The carrying value of other intangible assets as of December 31, 2016, was \$45.9 million and \$80.5 million for the Distribution and Aerospace segments, respectively.

Judgment and Uncertainties

In years that management performs a qualitative assessment we consider the following qualitative factors: general economic conditions in the markets served by the reporting units carrying goodwill, relevant industry-specific performance statistics, changes in the carrying value of the individual reporting units and assumptions used in the most recent fair value calculation, including forecasted results of operations, the weighted average cost of capital and recent transaction multiples.

For Step 1 of the two-step impairment test, management estimated the fair value of the reporting units using an income methodology based on management's estimates of forecasted cash flows, with those cash flows discounted to present value using rates commensurate with the risks associated with those cash flows. In addition, management used a market-based valuation method involving analysis of market multiples of revenues and earnings before interest, taxes, depreciation and amortization ("EBITDA") for (i) a group of comparable public companies and (ii) recent transactions, if any, involving comparable companies. In estimating the fair value of the reporting units, a weighting of 80% to the income approach and 20% to the market-based valuation method was selected, consistent with the prior year. A higher weighting was applied to the estimate derived from the income approach as it is based on management's assumptions specific for the reporting units, which are the outcome of an internal planning process. While the guideline companies in the market based valuation method have

comparability to the reporting units, they may not fully reflect the market share, product portfolio and operations of the reporting units.

In performing our step one test for the reporting units, we used assumed terminal growth rates ranging from 2.5% - 3.0%. The discount rate utilized to reflect the risk and uncertainty in the financial markets and specifically in our internally developed earnings projections ranged from 10.0% - 11.0% for these reporting units. Changes in these estimates and assumptions could materially affect the results of our tests for goodwill impairment.

Under Step 2, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. The results of the Step 1 tests indicated that the Company did not need to proceed to Step 2 for any of the reporting units tested.

Effect if Actual Results Differ From Assumptions

For each reporting unit, we performed the Step 1 test and the percentage by which the fair value exceeded the carrying value was in excess of 25% for the reporting units other than Aerosystems. Aerosystems' fair value exceeded the carrying value by approximately 4.0%. A decrease of 1% in our terminal growth rate or an increase of 1% in our discount rate would not result in a fair value calculation less than the carrying value for Distribution and Specialty Bearings and Engineered Products. An increase of 1% in our discount rate would result in a fair value approximately 5% less than the carrying value for the Aerosystems reporting unit. A decrease of 1% in our terminal growth rate would not result in a fair value less than the carrying value for the Aerosystems reporting unit.

As with all assumptions, there is an inherent level of uncertainty and actual results, to the extent they differ from those assumptions, could have a material impact on fair value. For example, multiples for similar type reporting units could deteriorate due to changes in technology or a downturn in economic conditions. A reduction in customer demand would impact our assumed growth rate resulting in a reduced fair value. Potential events or circumstances could have a negative effect on the estimated fair value. The loss of a major customer or program could have a significant impact on the future cash flows of the reporting unit(s). Advances in technology by our competitors could result in our products becoming obsolete.

We do not currently believe there to be a reasonable likelihood that actual results will vary materially from estimates and assumptions used to test goodwill and other intangible assets for impairment losses. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to an impairment charge that could be material.

Long-Term Incentive Programs

Methodology

The Company maintains a Stock Incentive Plan, which provides for share-based payment awards, including non-statutory stock options, restricted stock, stock appreciation rights and long-term incentive program ("LTIP") awards. We determine the fair value of our non-qualified stock option awards at the date of grant using a Black-Scholes model. We determine the fair value of our restricted share awards at the date of grant using an average of the high and low market price of our stock.

LTIP awards provide certain senior executives an opportunity to receive award payments, generally in cash. For each performance cycle, the Company's financial results are compared to the Russell 2000 indices for the same periods based upon the following: (a) average return on total capital, (b) earnings per share growth and (c) total return to shareholders. No awards will be payable if the Company's performance is below the 25th percentile of the designated indices. The maximum award is payable if performance reaches the 75th percentile of the designated indices. Awards will be paid out at 100% at the 50th percentile. Awards for performance between the 25th and 75th percentiles are determined by straight-line interpolation between 0% and 200%.

In order to estimate the liability associated with LTIP awards, management must make assumptions as to how our current performance compares to current Russell 2000 data based upon the Russell 2000's historical results. This analysis is performed on a quarterly basis. When sufficient Russell 2000 data for a year is available, which typically will not be until May or June of the following year, management will adjust the liability to reflect its best estimate of the total award. Actual results could differ significantly from management's estimates. The total estimated liability as of December 31, 2016, was \$16.3 million.

Judgment and Uncertainties

Option-pricing models and generally accepted valuation techniques require management to make assumptions and to apply judgment to determine the fair value of our awards. These assumptions and judgments include estimating the future volatility of our stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors. Changes in these assumptions can materially affect the fair value estimate.

Our LTIP requires management to make assumptions regarding the likelihood of achieving long-term Company goals as well as estimate future Russell 2000 results.

Effect if Actual Results Differ From Assumptions

We do not currently believe there is a reasonable likelihood that there will be a material change in the estimates or assumptions we use to determine stock-based compensation expense. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to changes in share-based compensation expense that could be material.

If actual results are not consistent with the assumptions used, the share-based compensation expense reported in our financial statements may not be representative of the actual economic cost of the share-based compensation. A 10% change in our share-based compensation expense for the year ended December 31, 2016, would have affected pre-tax earnings by approximately \$0.6 million in 2016. Due to the timing of availability of the Russell 2000 data, there is a risk that the amount we have recorded as LTIP expense could be different from the actual payout. A 10.0 percentage point increase in the total performance factor earned for our LTIP would result in a reduction of 2016 pretax earnings of \$1.6 million.

Pension Plans

Methodology

We maintain a qualified defined benefit pension, as well as a non-qualified Supplemental Employees Retirement Plan ("SERP") for certain key executives. See Note 14, *Pension Plans*, in the Notes to Consolidated Financial Statements included in this Form 10-K for further discussion of these plans.

Expenses and liabilities associated with each of these plans are determined based upon actuarial valuations. Integral to these actuarial valuations are a variety of assumptions including expected return on plan assets and discount rates. We regularly review these assumptions, which are updated at the measurement date, December 31st. In accordance with generally accepted accounting principles, the impact of differences between actual results and the assumptions are accumulated and generally amortized over future periods, which will affect expense recognized in future periods.

In previous years we utilized the weighted-average discount rate in the calculation of service and interest costs, both of which are components of pension expense. For 2016 we utilized a "spot rate approach" in the calculation of pension interest and service cost. The spot rate approach applies separate discount rates for each projected benefit payment in the calculation of pension interest and service cost. This calculation change is considered a change in accounting estimate and was applied prospectively in 2016. The use of the spot rate approach resulted in a favorable impact to pension expense of \$4.7 million in 2016 relative to what pension expense would have been had we not changed our approach.

Judgment and Uncertainties

The discount rate represents the interest rate used to determine the present value of future cash flows currently expected to be required to settle the pension obligation. Management uses the Citigroup Above Median Double-A Curve for discount rate assumptions. This index was designed to provide a market average discount rate to assist plan sponsors in valuing the liabilities associated with postretirement obligations. Additionally, we reviewed the changes in the general level of interest rates since the last measurement date noting that overall rates had decreased when compared to 2015.

Based upon this information, we used a 3.98% discount rate as of December 31, 2016, for the qualified defined benefit pension plan. This rate takes into consideration the participants in our pension plan and the anticipated payment stream as compared to the Citigroup Above Median Double-A Curve. For the SERP, we used the same methodology as the pension plan and derived a discount rate of 3.43% in 2016 for the benefit obligation. The difference in the discount rates is primarily due to the expected duration of SERP payments, which is shorter than the anticipated duration of benefit payments to be made to the average participant in the pension plan. The qualified defined benefit pension plan and SERP used discount rates of 4.17% and 3.47% at December 31, 2015, respectively, for purposes of calculating the benefit obligation.

The expected long-term rate of return on plan assets of 7.5% represents the average rate of earnings expected on the funds invested to provide for anticipated benefit payments. The expected return on assets assumption is developed based upon several factors. Such factors include current and expected target asset allocation, our historical experience of returns by asset class type, a risk premium and an inflation estimate.

Effect if Actual Results Differ From Assumptions

A lower discount rate increases the present value of benefit obligations and increases pension expense. A one percentage point decrease in the assumed discount rate would have increased pension expense in 2016 by \$5.2 million. A one percentage point increase in the assumed discount rate would have decreased pension expense in 2016 by \$4.6 million.

A lower expected rate of return on pension plan assets would increase pension expense. For 2016 and 2015, the expected rate of return on plan assets was 7.5%. A one-percentage point increase/decrease in the assumed return on pension plan assets would have changed pension expense in 2016 by approximately \$5.4 million. During 2016, the actual return on pension plan assets of 7.5% was consistent with our expected long-term rate of return on pension plan assets of 7.5%.

Income Taxes

Methodology

Deferred tax assets and liabilities generally represent temporary differences between the recognition of tax benefits/expenses in our financial statements and the recognition of these tax benefits/expenses for tax purposes.

We establish reserves for deferred taxes when, despite our belief that our tax return positions are valid and defensible, we believe that certain positions may not prevail if challenged. We adjust these reserves in light of changing facts and circumstances, such as the progress of a tax audit or changes in tax legislation. Our effective tax rate includes the impact of reserve provisions and changes to reserves that we consider appropriate. This rate is then applied to our quarterly operating results. In the event that there is a significant unusual or one-time item recognized in our operating results, the tax attributable to that item would be separately calculated and recorded at the same time as the unusual or one-time item.

As of December 31, 2016, we had recognized \$52.5 million of deferred tax assets, net of valuation allowances. A portion of this amount, \$2.7 million, is related to a capital loss recorded on the disposition of our Distribution segment's Mexico operations. The realization of these benefits is dependent in part on future taxable capital gains and tax planning strategies designed to realize the benefit associated with the capital loss. For those jurisdictions where the expiration of tax loss or credit carryforwards or the projection of operating results indicates that realization is not likely, a valuation allowance is provided.

Judgment and Uncertainties

Management believes that sufficient income will be earned in the future to realize deferred income tax assets, net of valuation allowances recorded. The realization of these deferred tax assets can be impacted by changes to tax laws or statutory tax rates and future taxable income levels.

Our effective tax rate on earnings from continuing operations was 34.4% for 2016. Our effective tax rate is based on expected or reported income or loss, statutory tax rates and tax planning opportunities available to us in the various jurisdictions in which we operate. Significant judgment is required in determining our effective tax rate and in evaluating our tax positions.

Effect if Actual Results Differ From Assumptions

We do not anticipate a significant change in our unrecognized tax benefits within the next twelve months. We file tax returns in numerous U.S. and foreign jurisdictions, with returns subject to examination for varying periods, but generally back to and including 2012. It is our policy to record interest and penalties on unrecognized tax benefits as income taxes. A one percent increase/decrease in our tax rate would have affected our 2016 earnings by \$0.9 million.

Environmental Costs

Methodology

Our operations are subject to environmental regulation by federal, state and local authorities in the United States and regulatory authorities with jurisdiction over our foreign operations. As a result, we have established and update, as necessary, policies relating to environmental standards of performance for our operations worldwide.

When we become aware of an environmental risk, we perform a site study to ascertain the potential magnitude of contamination and the estimated cost of remediation.

We continually evaluate the identified environmental issues to ensure the time to complete the remediation and the total cost of remediation are consistent with our initial estimate. If there is any change in the cost and/or timing of remediation, the accrual is adjusted accordingly.

Judgment and Uncertainties

Environmental costs are accrued when it is probable that a liability has been incurred and the amount can be reasonably estimated. The most likely cost to be incurred is accrued based on an evaluation of currently available facts with respect to each individual site, including existing technology, current laws and regulations and prior remediation experience. Conditions of the site must be monitored throughout the remediation process as numerous factors could affect the estimated liability, including, but not limited to, the discovery of geological formations affecting the behavior or movement of contaminants; soil conditions and soil chemistry affecting the degradation of contaminants; or the discovery of further sources or types of contaminants. Liabilities with fixed or readily determinable payment dates are discounted.

We believe that expenditures necessary to comply with the present regulations governing environmental protection will not have a material effect upon our competitive position, consolidated financial position, results of operations or cash flows.

Effect if Actual Results Differ From Assumptions

At December 31, 2016, amounts accrued for known environmental remediation costs were \$6.6 million. A 10% change in this accrual would have impacted pre-tax earnings by \$0.7 million. Further information about our environmental costs is provided in Note 10, *Environmental Costs*, in the Notes to Consolidated Financial Statements.

RECENT ACCOUNTING STANDARDS

A summary of recent accounting standards is included in Note 1, *Summary of Significant Accounting Policies*, in the Notes to Consolidated Financial Statements, included in Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

SELECTED QUARTERLY FINANCIAL DATA

	2016				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total Year
	(in thousands, except per share amounts)				
Net sales	\$ 451,198	\$ 470,642	\$ 453,474	\$ 433,062	\$ 1,808,376
Gross profit.....	134,430	143,766	135,490	135,406	549,092
Net earnings.....	9,777	16,495	17,455	15,127	58,854
Basic earnings per share.....	0.36	0.61	0.64	0.56	2.17
Diluted earnings per share.....	0.35	0.59	0.62	0.53	2.10
	2015				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total Year
	(in thousands, except per share amounts)				
Net sales	\$ 442,782	\$ 446,324	\$ 433,742	\$ 452,277	\$ 1,775,125
Gross profit.....	127,911	131,952	129,926	127,445	517,234
Net earnings.....	12,749	21,691	17,224	8,774	60,438
Basic earnings per share.....	0.47	0.80	0.63	0.32	2.22
Diluted earnings per share.....	0.46	0.77	0.62	0.32	2.17

Included within certain quarterly results are a variety of unusual or significant adjustments that may affect comparability. The most significant of such adjustments are described below as well as within Management's Discussion and Analysis of Financial Condition and Results of Operations and the Notes to Consolidated Financial Statements. Additionally, due to the nature of the earnings per share calculation, the sum of quarterly earnings per share data may not equal the cumulative earnings per share data for the year.

Items within the 2016 quarterly results that may affect comparability are as follows:

2016	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total Year
			(in thousands)		
Costs associated with Distribution productivity initiatives	\$ 3,125	\$ 2,083	\$ 2,787	\$ 4,582	\$ 12,577
Restructuring and severance costs.....	\$ 460	\$ 312	\$ 780	\$ 869	\$ 2,421
Acquisition and integration costs	\$ 2,002	\$ 2,302	\$ 546	\$ 295	\$ 5,145

Items within the 2015 quarterly results that may affect comparability are as follows:

2015	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total Year
			(in thousands)		
Restructuring and severance costs.....	\$ 259	\$ 589	\$ —	\$ 1,496	\$ 2,344
Resolution of AH-1Z contract claims.....	\$ —	\$ —	\$ —	\$ 4,000	\$ 4,000
Foreign currency transactions associated with purchase of GRW	\$ —	\$ —	\$ —	\$ 3,002	\$ 3,002
Recognition of tax (benefit) expense from tax law changes	\$ —	\$ (4,402)	\$ —	\$ 2,113	\$ (2,289)

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have various market risk exposures that arise from our ongoing business operations. Market risk is the potential economic loss that may result from adverse changes in the fair value of financial instruments. Our financial results are impacted by changes in interest rates, certain foreign currency exchange rates and commodity prices.

Foreign Currencies

We have manufacturing, sales, and distribution facilities in various locations throughout the world. As a result, we make investments and conduct business transactions denominated in various currencies, including the U.S. dollar, the British pound, the European euro, the Czech koruna, the Japanese yen and the Indian rupee. Total annual foreign sales from continuing operations, including foreign export sales, averaged approximately \$282.8 million over the last three years. Foreign sales from continuing operations represented 18.1% of consolidated net sales from continuing operations in 2016. We estimate a hypothetical 10% adverse change in foreign currency exchange rates relative to the U.S. dollar for 2016 would have had an unfavorable impact of \$7.7 million on sales and a \$0.4 million favorable impact on operating income. We manage foreign currency exposures that are associated with committed foreign currency purchases and sales and other assets and liabilities created in the normal course of business at the subsidiary operations level. Sometimes we may, through the use of forward contracts, hedge the price risk associated with committed and forecasted foreign denominated payments and rates. Historically the use of these forward contracts has been minimal. We do not use derivatives for speculative or trading purposes.

Interest Rates

Our primary exposure to interest rate risk results from our outstanding debt obligations. The level of fees and interest charged on revolving credit commitments and borrowings are based upon leverage levels and market interest rates.

Our principal debt facilities are contained within a variable rate credit agreement that provides a \$600.0 million revolving credit facility and a \$100.0 million term loan commitment. Both these agreements were amended and restated on May 6, 2015, and expire on May 6, 2020. Total average bank borrowings for 2016 were \$315.6 million. The impact of a hypothetical 100 basis point increase in the interest rates on our average bank borrowings would have resulted in a \$0.8 million increase in interest expense.

In November 2010, we issued \$115.0 million convertible unsecured senior notes, due on November 15, 2017, in a private placement offering. These notes bear 3.25% interest per annum on the principal amount, payable semiannually in arrears on November 15 and May 15 of each year, beginning on May 15, 2011, and have an effective interest rate of 5.25%.

From time to time we will enter into interest rate swap contracts for the purpose of securing a fixed interest rate on our variable interest rate borrowings. These contracts allow us to create certainty with respect to future cash flows associated with our variable rate debt that would otherwise be impacted by fluctuations in LIBOR rates.

Commodity Prices

We are exposed to volatility in the price of raw materials used in certain manufacturing operations as well as a variety of items procured by our distribution business. These raw materials include, but are not limited to, aluminum, titanium, nickel, copper and other specialty metals. We manage our exposure related to these price changes through strategic procurement practices.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Kaman Corporation:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, of comprehensive income, of shareholders' equity, and of cash flows present fairly, in all material respects, the financial position of Kaman Corporation and its subsidiaries at December 31, 2016 and December 31, 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Kaman Corporation, headquartered in Bloomfield, Connecticut, was incorporated in 1945 and is a diversified company that conducts business in the aerospace and distribution markets. Kaman Corporation reports information for itself and its subsidiaries (collectively, the "Company") in two business segments, Distribution and Aerospace.

Basis of Presentation

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. Certain amounts in prior year financial statements and notes thereto have been reclassified to conform to current year presentation.

Use of Estimates

The preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Significant items subject to such estimates and assumptions include the carrying amount of property, plant and equipment, goodwill and other intangible assets; valuation allowances for receivables, inventories and income taxes; valuation of share-based compensation; vendor incentives; assets and obligations related to employee benefits; estimates of environmental remediation costs; and accounting for long-term contracts including claims. Actual results could differ from those estimates.

Foreign Currency Translation

The Company has certain operations outside the United States that prepare financial statements in currencies other than the U.S. dollar. For these operations, results of operations and cash flows are translated using the average exchange rate throughout the period. Assets and liabilities are generally translated at end of period rates. The gains and losses associated with these translation adjustments are included as a component of accumulated other comprehensive income (loss) in shareholders' equity.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of trade accounts receivable. The carrying amounts of these items, as well as trade accounts payable and notes payable, approximate fair value due to the short-term maturity of these instruments. At December 31, 2016 and 2015, no individual customer accounted for more than 10% of consolidated accounts receivable or consolidated net sales. Foreign sales associated with continuing operations were approximately 18.1%, 15.6% and 13.6% of the Company's net sales in 2016, 2015 and 2014, respectively, and are concentrated in the United Kingdom, Germany, France, New Zealand and Asia.

Additional Cash Flow Information

Non-cash investing activities in 2016 include an accrual of \$2.3 million for purchases of property and equipment (including capital lease obligations), \$1.4 million in earn-out payments to the former owners of an aerospace acquisition and an adjustment of \$0.2 million for a certain tax matter. Non-cash financing activities in 2016 include an adjustment to other comprehensive income related to the underfunding of the pension and SERP plans and changes in the fair value of derivative financial instruments that qualified for hedge accounting. The total net adjustment was \$4.0 million, net of tax of \$2.5 million. Additionally, non-cash financing activities in 2016 include \$4.9 million of dividends declared but not yet paid. Non-cash investing activities in 2015 include \$5.4 million in earn-out payments to the former owners of an aerospace acquisition. Non-cash financing activities in 2015 include an adjustment to other comprehensive income related to the underfunding of the pension and SERP plans and changes in the fair value of derivative financial instruments that qualified for hedge accounting. The total net adjustment was \$11.9 million, net of tax of \$7.2 million. Additionally, non-cash financing activities in 2015 include \$4.9 million of dividends declared but not yet paid. Non-cash investing activities in 2014 include an accrual of \$1.5 million for purchases of property and equipment and \$1.5 million in earn-out payments to the former owners of an aerospace acquisition. Non-cash financing activities in 2014 include an adjustment to other comprehensive income related to the underfunding of the pension and SERP plans and changes in the fair value of derivative financial instruments that qualified for hedge accounting. The total adjustment was \$38.7 million, net of tax of \$23.4 million. Additionally, non-cash financing activities in 2014 include \$4.3 million of dividends declared but not yet paid.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Additional Cash Flow Information - continued

The Company describes its pension obligations in more detail in Note 14, *Pension Plans*. The Company describes the earn-out payments to the former owners of the aerospace acquisition in more detail in Note 3, *Acquisitions*.

Revenue Recognition

Sales and estimated profits under long-term contracts are generally recognized using the percentage-of-completion method of accounting, using as a measurement basis either the ratio that costs incurred bear to estimated total costs (after giving effect to estimates of costs to complete based upon most recent information for each contract) or units-of-delivery. Reviews of contracts are made routinely throughout their lives and the impact of revisions in profit estimates are recorded in the accounting period in which the revisions are made. Anticipated contract losses are charged to operations when they are probable. In cases where we have multiple contracts with a single customer, each contract is generally treated as a separate profit center and accounted for as such. Except in the case of contracts accounted for using the cost-to-cost method of percentage-of-completion accounting, revenues are recognized when the product has been shipped or delivered, depending upon when title and risk of loss have passed. For certain U.S. Government ("USG") contracts delivery is deemed to have occurred when work is substantially complete and acceptance by the customer has occurred by execution of a Material Inspection and Receiving Report, DD Form 250 or Memorandum of Shipment.

Sales contracts are initially reviewed to ascertain if they involve multiple element arrangements. If such an arrangement exists and there is no evidence of stand-alone value for each element of the undelivered items, recognition of sales for the arrangement is deferred until all elements of the arrangement are delivered and risk of loss and title have passed (except in the case of contracts accounted for using the percentage-of-completion method of accounting). For elements that do have stand-alone value or contracts that are not considered multiple element arrangements, sales and related costs of sales are recognized as services are performed or when the product has been shipped or delivered depending upon when title and risk of loss have passed.

Pre-contract costs incurred for items such as materials or tooling for anticipated contracts are included in inventory if recovery of such costs is considered probable. Thereafter, if the Company determines it will not be awarded an anticipated contract and the associated pre-contract costs cannot be applied to another program the costs are expensed immediately. As of December 31, 2016 and 2015, approximately \$2.0 million and \$2.4 million, respectively, of pre-contract costs were included in inventory, which, in both cases, represented less than 1% of total inventory. Learning or start-up costs incurred in connection with existing or anticipated follow-on contracts are charged to the existing contract unless the terms of the contract permit recovery of these costs over a specific contractual term and provide for reimbursement if the contract is canceled.

If it is probable that a claim with respect to change orders will result in additional contract revenue and the amount of such additional revenue can be reliably estimated, then the additional contract revenue is considered in our accounting for the program, but only if the contract provides a legal basis for the claim, the additional costs were unforeseen and not caused by deficiencies in our performance, the costs are identifiable and reasonable in view of the work performed and the evidence supporting the claim is objective and verifiable. If these requirements are met, the claim portion of the program is accounted for separately to ensure revenue from the claim is recorded only to the extent claim related costs have been incurred; accordingly, no profit with respect to such costs is recorded until the change order is formally approved. If these requirements are not met, the forecast of total contract cost at completion (which is used to calculate the gross margin rate) for the basic contract is generally increased to include all incurred and anticipated claim related costs.

Recognition of sales not accounted for under the cost-to-cost method of percentage-of-completion accounting occurs when the sales price is fixed, collectability is reasonably assured and the product's title and risk of loss has transferred to the customer. The Company includes freight costs charged to customers in net sales and the correlating expense as a cost of sales. Sales tax collected from customers is excluded from net sales in the accompanying Consolidated Statements of Operations.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Cost of Sales and Selling, General and Administrative Expenses

Cost of sales includes costs of products and services sold (i.e., purchased product, raw material, direct labor, engineering labor, outbound freight charges, depreciation and amortization, indirect costs and overhead charges). Selling expenses primarily consist of advertising, promotion, bid and proposal, employee payroll and corresponding benefits and commissions paid to sales and marketing personnel. General and administrative expenses primarily consist of employee payroll including executive, administrative and financial personnel and corresponding benefits, incentive compensation, independent research and development, consulting expenses, warehousing costs, depreciation and amortization. Legal costs are expensed as incurred and are generally included in general and administrative expenses. The Aerospace segment includes general and administrative expenses as an element of program cost and inventory for certain government contracts.

Certain inventory related costs, including purchasing costs, receiving costs and inspection costs, for the Distribution segment are not included in cost of sales. For the years ended December 31, 2016, 2015 and 2014, \$3.5 million, \$3.2 million and \$3.4 million, respectively, of such costs are included in general and administrative expenses.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, demand deposits and short-term cash investments. These investments are liquid in nature and have original maturities of three months or less. Bank overdraft positions, which occur when total outstanding issued checks exceed available cash balances at a single financial institution at the end of a reporting period, are reclassified to other current liabilities within the consolidated balance sheets. At December 31, 2016 and 2015, the Company had bank overdrafts of \$4.3 million and \$4.0 million, respectively, included in other current liabilities.

Accounts Receivable

The Company has three types of accounts receivable: (a) Trade receivables, which consist of amounts billed and currently due from customers; (b) USG contracts, which consist of (1) amounts billed, and (2) costs and accrued profit – not billed; and (c) Commercial and other government contracts, which consist of (1) amounts billed, and (2) costs and accrued profit – not billed.

The allowance for doubtful accounts reflects management's best estimate of probable losses inherent in the trade accounts receivable and billed contracts balance. Management determines the allowance based on known troubled accounts, historical experience and other currently available evidence.

Inventories

Inventory of merchandise for resale is stated at cost (using the average costing method) or market, whichever is lower. Contracts and other work in process and finished goods are valued at production cost represented by raw material, labor and overhead. For certain government contracts, allowable general and administrative expenses are also included in inventory. Initial tooling and startup costs may be included, where applicable. Contracts and other work in process and finished goods are not reported at amounts in excess of net realizable values. The Company includes raw material amounts in the contracts in process and other work in process balances. Raw material includes certain general stock materials but primarily relates to purchases that were made in anticipation of specific programs for which production has not been started as of the balance sheet date.

Property, Plant and Equipment

Property, plant and equipment is recorded at cost. Depreciation is computed primarily on a straight-line basis over the estimated useful lives of the assets. The estimated useful lives for buildings range from 15 to 40 years and for leasehold improvements range from 1 to 20 years, whereas machinery, office furniture and equipment generally have useful lives ranging from 3 to 15 years. At the time of retirement or disposal, the acquisition cost of the asset and related accumulated depreciation are eliminated and any gain or loss is credited to or charged against income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Property, Plant and Equipment - continued

Long-lived assets, such as property, plant and equipment and purchased intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset be tested for possible impairment, the Company first compares undiscounted cash flows expected to be generated by an asset to the carrying value of the asset. If the carrying value of the long-lived asset is not recoverable on an undiscounted cash flow basis, impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values and third-party independent appraisals, as considered necessary.

Maintenance and repair items are charged against income as incurred, whereas renewals and betterments are capitalized and depreciated.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the aggregate purchase price over the fair value of the net assets acquired in a purchase business combination and is reviewed for impairment at least annually.

Accounting Standards Codification Topic 350, "Intangibles - Goodwill and Other," ("ASC 350") permits the assessment of qualitative factors to determine whether events and circumstances lead to the conclusion that it is necessary to perform the two-step goodwill impairment test required under ASC 350. The qualitative assessment management performs takes into consideration the following factors: general economic conditions, industry specific performance, changes in carrying values of the reporting units, the assessment of assumptions used in the previous fair value calculation and changes in transaction multiples.

In the first step of the two-step test, the fair value of the reporting unit is compared with its carrying value (including goodwill). If the fair value of the reporting unit is less than its carrying value, an indication of goodwill impairment exists for the reporting unit and the enterprise must perform step two of the impairment test (measurement). In Step 2, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill.

Fair value of the reporting unit is determined using an income methodology based on management's estimates of forecasted cash flows for each business unit, with those cash flows discounted to present value using rates commensurate with the risks associated with those cash flows. In addition, management uses a market-based valuation method involving analysis of market multiples of revenues and earnings before interest, taxes, depreciation and amortization ("EBITDA") for (i) a group of comparable public companies and (ii) recent transactions, if any, involving comparable companies. If the fair value of the reporting unit exceeds its carrying value, step two need not be performed.

Goodwill and intangible assets with indefinite lives are evaluated annually for impairment in the fourth quarter, based on annual forecast information. Intangible assets with finite lives are amortized using the straight-line method over their estimated period of benefit. Goodwill and other intangible assets are reviewed for possible impairment whenever changes in conditions indicate that the fair value of a reporting unit is more likely than not below its carrying value. No such charges were recorded in 2016, 2015 or 2014.

Vendor Incentives

The Company's Distribution segment enters into agreements with certain vendors providing for inventory purchase incentives that are generally earned upon achieving specified volume-purchasing levels. The Company recognizes rebate income relative to specific rebate programs as a reduction of the cost of inventory based on a systematic and rational allocation of the cash consideration offered to each of the underlying transactions that results in progress toward earning the rebate, provided that the amounts are probable and reasonably estimable. As of December 31, 2016 and 2015, total vendor incentive receivables, included in other current assets, were approximately \$13.3 million and \$16.4 million, respectively.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Self-Insured Retentions

To limit exposure to losses related to group health, workers' compensation, auto and product general liability claims, the Company obtains third-party insurance coverage. The Company has varying levels of deductibles for these claims. The total liability/deductible for group health is limited to \$0.3 million per claim, workers' compensation is limited to \$0.4 million per claim and for product/general liability and auto liability the limit is \$0.3 million per claim. The cost of such benefits is recognized as expense based on claims filed in each reporting period and an estimate of claims incurred but not reported ("IBNR") during such period. The estimates for the IBNR are based upon historical trends and information provided to us by the claims administrators, and are periodically revised to reflect changes in loss trends. These amounts are included in other accruals and payables on the Consolidated Balance Sheets.

Liabilities associated with these claims are estimated in part by considering historical claims experience, severity factors and other actuarial assumptions. Projections of future losses are inherently uncertain because of the random nature of insurance claim occurrences and the potential for differences between actual developments and actuarial assumptions. Such self-insurance accruals will likely include claims for which the ultimate losses will be settled over a period of years.

Restructuring Costs

During the fourth quarter of 2015, the Company initiated restructuring activities at its Distribution segment in order to align the cost structure of the organization to its then current revenue levels. Such actions included workforce reductions and the consolidation of field operations where its Distribution segment had multiple facilities in the same location.

The restructuring resulted in net workforce reductions of 60 employees and the exiting of four facilities. As of December 31, 2015, we had communicated the workforce reductions to affected employees. The Company recorded all the related workforce reduction and facility consolidation costs during 2015 in "Selling, general and administrative expenses" on the Company's Consolidated Statements of Operations.

The following table summarizes the accrual balances by cost type for the 2015 restructuring actions:

<i>In thousands</i>	Severance	Other^(a)	Total
Restructuring accrual balance at December 31, 2015	\$ 654	\$ 375	\$ 1,029
Provision.....	(75)	6	(69)
Cash payments.....	(579)	(381)	(960)
Restructuring accrual balance at December 31, 2016	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>

(a) Includes costs associated with consolidation of facilities

During the third quarter of 2016, the Company offered a voluntary retirement program to certain employees of its Distribution segment. This program resulted in \$0.3 million of expense, all of which was included in "Selling, general and administrative expenses" on the Company's Consolidated Statements of Operations for the year ended December 31, 2016. In addition to the restructuring activity, the Distribution segment and Aerospace segment incurred \$0.7 million and \$2.5 million of severance expense in 2016, respectively. These amounts are not included in the table above.

Research and Development

Customer funded research expenditures (which are included in cost of sales) were \$0.9 million in 2016, \$0.4 million in 2015, and \$1.6 million in 2014. Research and development costs not specifically covered by contracts are charged against income as incurred and included in selling, general and administrative expenses. Such costs amounted to \$7.7 million, \$6.7 million and \$6.7 million in 2016, 2015 and 2014, respectively.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income Taxes

Income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss, capital loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company records a benefit for uncertain tax positions in the financial statements only when it determines it is more likely than not that such a position will be sustained upon examination by taxing authorities based on the technical merits of the position. Unrecognized tax benefits represent the difference between the position taken in the tax return and the benefit reflected in the financial statements.

Share-Based Payment Arrangements

The Company records compensation expense for share-based awards based upon an assessment of the grant date fair value of the awards. The fair value of each option award is estimated on the date of grant using the Black-Scholes option valuation model. A number of assumptions are used to determine the fair value of options granted. These include expected term, dividend yield, volatility of the options and the risk free interest rate. See Note 18, *Share-Based Arrangements*, for further information.

Derivative Financial Instruments

The Company is exposed to certain risks relating to its ongoing business operations, including market risks relating to fluctuations in foreign currency exchange rates and interest rates. Derivative financial instruments are recognized on the Consolidated Balance Sheets as either assets or liabilities and are measured at fair value. Changes in the fair values of derivatives are recorded each period in earnings or accumulated other comprehensive income, depending on whether a derivative is effective as part of a hedged transaction. Gains and losses on derivative instruments reported in accumulated other comprehensive income are subsequently included in earnings in the periods in which earnings are affected by the hedged item. The Company does not use derivative instruments for speculative purposes. See Note 6, *Derivative Financial Instruments*, for further information.

Pension Accounting

The Company accounts for its defined benefit pension plan by recognizing the overfunded or underfunded status of the plan, calculated as the difference between the plan assets and the projected benefit obligation, as an asset or liability on the balance sheet, with changes in the funded status recognized in comprehensive income in the year in which they occur.

Expenses and liabilities associated with the plan are determined based upon actuarial valuations. Integral to the actuarial valuations are a variety of assumptions including expected return on plan assets and discount rate. The Company regularly reviews the assumptions, which are updated at the measurement date, December 31st. The impact of differences between actual results and the assumptions are accumulated and generally amortized over future periods, which will affect expense recognized in future periods. See Note 14, *Pension Plans*, for further information.

Recent Accounting Standards

In January 2017, the FASB issued Accounting Standards Update ("ASU") 2017-04, "Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment". The objective of this standard update is to simplify the subsequent measurement of goodwill, eliminating Step 2 from the goodwill impairment test. Under this ASU, an entity should perform its annual goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity would recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, assuming the loss recognized does not exceed the total amount of goodwill for the reporting unit. The standard update is effective for fiscal years beginning after December 15, 2019. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Standards - continued

In November 2016, the FASB issued ASU 2016-18, "Statement of Cash Flows (Topic 230) - Restricted Cash". The objective of this standard update is to address the diversity in classification and presentation of changes in restricted cash on the statement of cash flows. Under this ASU, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In October 2016, the FASB issued ASU 2016-16, "Income Taxes (Topic 740) - Intra-Entity Transfers of Assets Other Than Inventory". Under this ASU, income tax consequences of an intra-entity transfer of an asset other than inventory will be recognized when the transfer occurs. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230) - Classification of Certain Cash Receipts and Cash Payments". This standard update was issued to address diversity in practice in how certain cash receipts and cash payments are presented and classified. The provisions of ASU 2016-15 will be effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, "Compensation - Stock Compensation (Topic 718) - Improvements to Employee Share-Based Payment Accounting". The objective of this standard update is to simplify several aspects of the accounting for share-based payment transactions, including, but not limited to, income tax consequences, classification of awards as equity or liabilities and classification on the statement of cash flows. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. As early adoption is permitted, the Company adopted this standard during the fourth quarter, resulting in a tax benefit of \$0.5 million for 2016. See Note 13, *Income Taxes*, and Note 18, *Share-Based Arrangements*, for further information.

In March 2016, the FASB issued ASU 2016-07, "Investments - Equity Method and Joint Ventures (Topic 323) - Simplifying the Transition to the Equity Method of Accounting". This standard update eliminates the requirement to retroactively adopt the equity method of accounting when an investment qualifies for use of the equity method. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-06, "Derivatives and Hedging (Topic 815) - Contingent Put and Call Options in Debt Instruments". The objective of this standard update is to eliminate inconsistent practices with regards to assessing embedded contingent put and call options in debt instruments. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-05, "Derivatives and Hedging (Topic 815) - Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships". The objective of this standard update is to clarify whether a change in the counterparty to a derivative instrument results in a requirement to dedesignate that hedging relationship and discontinue the application of hedge accounting. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Standards - continued

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)". Under this ASU as amended, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: (i) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (ii) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessor accounting is largely unchanged under this ASU as amended. This standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company is developing a project plan to implement this standard update and is currently assessing the potential impact this standard update might have on its consolidated financial statements. The Company anticipates the ASU will have a material impact on its assets and liabilities due to the addition of right-of-use assets and lease liabilities to the balance sheet, however it does not expect the ASU to have a material impact on the Company's cash flows or results of operations.

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments - Overall (Subtopic 825-10) - Recognition and Measurement of Financial Assets and Financial Liabilities". The objective of this standard update is to remove inconsistent practices with regards to the accounting for financial instruments between Generally Accepted Accounting Principles ("US GAAP") and International Financial Reporting Standards ("IFRS"). The standard update intends to improve the reporting model for financial instruments to provide users of financial statements with more decision-useful information. The provisions of this standard update are effective for interim and annual periods beginning after December 15, 2017. The Company does not expect these changes to have a material impact on its consolidated financial statements.

In September 2015, the FASB issued ASU 2015-16, "Business Combinations: Simplifying the Accounting for Measurement-Period Adjustments". This standard update requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The standard update became effective the first quarter of 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

In August 2015, the FASB issued ASU 2015-15, "Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements", which amends ASC 835-30, "Interest - Imputation of Interest". This standard update clarifies the presentation and subsequent measurement of debt issuance costs associated with lines of credit. These costs may be presented as an asset and amortized ratably over the term of the line of credit arrangement, regardless of whether there are outstanding borrowings on the arrangement. The standard update became effective the first quarter of 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, "Inventory (Topic 330) - Simplifying the Measurement of Inventory". ASU 2015-11 requires an entity to measure inventory within the scope of the standard at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The standard update is effective for fiscal years beginning after December 15, 2016, including interim periods within those years. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-03, "Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs". ASU No. 2015-03 requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the related liability. Such treatment is now consistent with the presentation of debt discounts or premiums. As it stood prior to amendment, debt issuance costs were reported in the balance sheet as an asset (i.e., a deferred charge), whereas debt discounts and premiums were, and remain, reported as deductions from or additions to the debt itself. Recognition and measurement guidance for debt issuance costs is not affected by this standard update. The standard update became effective the first quarter of 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued ASU No. 2015-02, "Consolidation (Topic 810)". ASU 2015-02 focuses on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. The standard update became effective the first quarter of 2016. The adoption of this standard update had no impact on the Company's consolidated financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Standards - continued

In January 2015, the FASB issued ASU No. 2015-01, "Income Statement - Extraordinary and Unusual Items (Subtopic 225-20)". The standard update eliminates the concept of extraordinary items and their segregation from the results of ordinary operations and expands presentation and disclosure guidance to include items that are both unusual in nature and occur infrequently. The standard update became effective the first quarter of 2016. The adoption of this standard update had no impact on the Company's consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern". The standard update provides guidance regarding management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The standard update became effective the first quarter of 2016. The adoption of this standard update had no impact on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, "Compensation - Stock Compensation (Topic 718) - Accounting for Share-Based Payments When the Terms of an Award Provide that a Performance Target Could Be Achieved after the Requisite Service Period". The objective of this standard update is to eliminate inconsistent practices with regards to the accounting treatment of share-based payment awards. The provisions of this standard update became effective the first quarter of 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

Revenue Recognition

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)". The objective of this standard update is to remove inconsistent practices with regard to revenue recognition between US GAAP and IFRS. The standard intends to improve comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. The provisions of ASU No. 2014-09 will be effective for interim and annual periods beginning after December 15, 2017, with early adoption permitted for annual periods beginning after December 15, 2016. The Company has developed a project plan that includes a three-phase approach to implementing this standard update. Phase one, the assessment phase, was completed in early 2016. The Company concluded the second phase of the project, which included conversion activities such as establishing policies, identifying system impacts and understanding the initial financial impact this standard update will have, during the fourth quarter of 2016. Phase three, which began during the first quarter of 2017, includes the integration of the standard update into financial reporting processes and systems, and developing a more robust understanding of the financial impact of this standard update on the Company's consolidated financial statements. The Company anticipates the transition to the new standard could have a material impact on the Company's consolidated financial statements but will be unable to quantify that impact until the third phase of the project has been completed. The Company intends to transition using the modified retrospective method upon adoption of this standard update. The Distribution segment currently recognizes the majority of its revenue at a point in time, whereas the new standard will result in certain revenue streams moving to an overtime revenue recognition model. The majority of our long-term contracts in the Aerospace segment are currently accounted for under the percentage-of-completion method using units-of-delivery as a measurement basis. The Company anticipates that many of these contracts will move to a cost-to-cost model under the percentage-of-completion method. The Company expects the cost of the activities it is undertaking to transition to the new standard will result in an increase in selling, general and administrative expenses in 2017 and beyond.

Subsequent to the issuance of ASU No. 2014-09, the FASB has issued the following updates: ASU 2016-08, "Revenue from Contracts with Customers (Topic 606) - Principal versus Agent Considerations (Reporting Revenue Gross versus Net)"; ASU 2016-10, "Revenue from Contracts with Customers (Topic 606) - Identifying Performance Obligations and Licensing"; ASU 2016-12, "Revenue from Contracts with Customers (Topic 606) - Narrow-Scope Improvements and Practical Expedients"; and ASU 2016-20, "Technical Corrections and Improvements to Topic 606". The amendments in these updates affect the guidance contained within ASU 2014-09 and will be assessed as part of the Company's revenue recognition project plan.

2. DISCONTINUED OPERATIONS

The following table provides information regarding the results of discontinued operations:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
Net sales of discontinued operations.....	\$ —	\$ —	\$ 23,540
Operating loss from discontinued operations.....	—	—	(3,806)
Other expense from discontinued operations.....	—	—	(353)
Loss from discontinued operations before income taxes and loss on disposal.....	—	—	(4,159)
Income tax benefit.....	—	—	1,235
Loss from discontinued operations before loss on disposal.....	—	—	(2,924)
Loss on disposal of discontinued operations.....	—	—	(7,567)
Income tax benefit.....	—	—	2,583
Net loss on disposal of discontinued operations.....	—	—	(4,984)
Net loss from discontinued operations.....	\$ —	\$ —	\$ (7,908)

Delamac Disposal

On December 19, 2014, the Company sold its Distribution segment's Mexico business unit, Delamac. As a result, the Company has reported the results of operations of this component as discontinued operations within the consolidated financial statements for all periods presented. The sale resulted in a net loss on disposal of discontinued operations of \$5.3 million for the year ended December 31, 2014.

Canadian Operations Disposal

On December 31, 2012, the Company sold substantially all of the assets and liabilities of the Distribution segment's Canadian operations. During 2014, the Company recorded earnings from discontinued operations of \$0.3 million due to a pension settlement that resulted from this disposal.

3. ACQUISITIONS

The following table illustrates cash paid for acquisitions:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
Cash paid for acquisitions completed during the year.....	\$ —	\$ 196,395	\$ 70,948
Cash paid for holdback payments during the year.....	1,014	3,404	3,060
Earn-out and other payments during the year.....	5,617	1,453	3,610
Total cash paid for acquisitions.....	\$ 6,631	\$ 201,252	\$ 77,618

Included in acquisition costs are contingency payments to the former owners of the Aerospace Orlando operations acquired in 2002. These payments are based on the attainment of certain milestones, and over the term of the agreement totaled \$25.0 million. Additional goodwill totaling \$1.6 million, \$5.4 million and \$1.5 million was recorded during 2016, 2015 and 2014, respectively, related to the attainment of certain milestones. Through December 31, 2016, the Company has recorded additional goodwill of \$25.0 million related to these contingency payments. The final contingency payment of \$1.4 million recorded in 2016 will occur in the second quarter of 2017.

3. ACQUISITIONS (CONTINUED)

2015 Acquisitions

On November 30, 2015, the Company acquired GRW Bearing GmbH ("GRW"), a German-based designer and manufacturer of super precision, miniature ball bearings, at a purchase price of approximately €134.1 million, net of cash acquired. GRW is focused on the demanding applications segment of the miniature ball bearings market, where low noise requirements, extreme temperatures, ultra-high speeds and/or caustic environments require both exceptional engineering design and continuous operating performance capabilities. GRW operates from two state-of-the-art production facilities in Rimpär, Germany and Prachatic, Czech Republic. GRW brings additional scale and new market segments to the Company's specialty bearing and engineered products lines. The businesses are aligned through a focus on solving the critical problems of original equipment manufacturer ("OEM") customers and achieving the highest standards of performance in the most demanding applications.

On October 21, 2015, the Company acquired Timken Alcor Aerospace Technologies, Inc. ("TAAT") of Mesa, Arizona, at a purchase price of approximately \$44.5 million, net of cash acquired. TAAT, which was renamed EXTEX Engineered Products, Inc. ("EXTEX"), designs and supplies aftermarket parts to support businesses conducting maintenance, repair and overhaul ("MRO") in aerospace markets primarily located in North America. This acquisition strengthened the Company's position in the MRO market and provides synergy opportunities to leverage the Company's global sales organization to accelerate growth. EXTEX complements the aftermarket business of the Company's specialty bearings and engineered products lines.

On January 30, 2015, the Company acquired substantially all the operating assets of G.C. Fabrication, Inc. ("GCF") for a purchase price of approximately \$9.5 million, net of cash acquired. Now located in Teterboro, New Jersey, GCF is a premier Schneider Electric/Square D distributor and carries a variety of electrical power, automation, process controls, specialized HVAC, water and wastewater systems, communication and networking devices from a premier set of global manufacturers. The acquisition of GCF has expanded the Company's automation, control and energy product offerings into the New York metro market. This acquisition is immaterial to the Company's results of operations and financial position.

In addition to the above acquisitions, the Company's Distribution segment acquired substantially all the assets of Calkins Fluid Power, Inc. ("Calkins"), a small distributor of fluid power components and systems, on December 1, 2015. This acquisition is immaterial to the Company's results of operations and financial position.

These acquisitions were accounted for as purchase transactions. The following amounts represent the fair value of the assets acquired and liabilities assumed from the 2015 acquisitions, including adjustments made for the GRW acquisition during the one-year measurement period from the date of acquisition.

In thousands

Cash	\$	6,345
Accounts receivable.....		10,786
Inventories		24,319
Property, plant and equipment.....		24,790
Other tangible assets.....		7,305
Goodwill		99,606
Other intangible assets.....		61,323
Liabilities.....		(30,980)
Net assets acquired.....	\$	203,494
Less cash received.....		(6,345)
Net consideration	\$	<u>197,149</u>

The preliminary purchase price allocations for the acquisitions of GRW and EXTEX, completed during the fourth quarter of 2015, were based upon a preliminary valuation and the Company's estimates and assumptions for these acquisitions were adjusted as additional information was obtained during the measurement periods. The principle areas of these purchase price allocations that were not yet finalized related to certain environmental matters, income and non-income based taxes and residual goodwill. During the purchase price measurement period, the Company made adjustments to the purchase price allocation related to the GRW acquisition. These adjustments were for the finalization of certain tax matters and the reduction of the accrual related to the environmental remediation at the Rimpär, Germany facility.

3. ACQUISITIONS (CONTINUED)

2015 Acquisitions - continued

The goodwill associated with these acquisitions is tax deductible and is the result of expected synergies from combining the operations of the acquired businesses with the Company's operations and intangible assets that do not qualify for separate recognition, such as an assembled workforce. Included in the Consolidated Statements of Operations for the years ended December 31, 2016 and 2015 is \$95.4 million and \$26.1 million, respectively, of revenue from these acquisitions.

The fair value of the identifiable intangible assets of \$61.3 million, consisting of customer relationships, developed technologies, non-compete agreements, trade names and acquired backlog, was determined using the income approach. Specifically, the discounted cash flows method was utilized for the customer relationships, backlog and non-compete agreements, and the relief-from-royalty method was utilized for the trade names and developed technology. The fair value of the customer relationships (\$36.0 million) is being amortized on a straight-line basis over periods ranging from 6 to 26 years; the fair value of the developed technologies (\$19.1 million) is being amortized over periods ranging from 10 to 20 years; the fair value of the non-compete agreements (\$0.6 million) is being amortized over 1 year; the fair value of the trade names (\$4.8 million) is being amortized over periods ranging from 3 to 15 years; and the fair value of the acquired backlog (\$0.8 million) is being amortized over 2 years. These amortization periods represent the estimated useful lives of the assets.

The following table reflects the unaudited pro forma operating results of the Company for the years ended December 31, 2015 and 2014, which give effect to the acquisitions of GRW, EXTEX, GCF, and Calkins as if the companies had been acquired on January 1, 2014. The pro forma results are based on assumptions that the Company believes are reasonable under the circumstances. The pro forma results are not necessarily indicative of the operating results that would have occurred had the acquisitions been effective January 1, 2015 or 2014, nor are they intended to be indicative of results that may occur in the future. The underlying pro forma information includes the historical financial results of the Company and the four acquired businesses adjusted for certain items including depreciation and amortization expenses associated with the assets acquired and the Company's expenses related to financing arrangements, with the related tax effects. The pro forma information does not include the effects of any synergies, cost reduction initiatives or anticipated integration costs related to the acquisitions.

	For the year ended December 31,	
	2015	2014
<i>In thousands</i>		
Net sales.....	\$ 1,844,535	\$ 1,895,990
Earnings from continuing operations	\$ 69,450	\$ 59,223
Net earnings.....	\$ 69,450	\$ 51,315

The pro forma earnings during the year ended December 31, 2015, were adjusted to exclude non-recurring items including acquisition-related costs and expenses related to the fair value adjustments to inventory. The pro forma earnings in 2014 were adjusted to include these items, reflecting acquisition-related costs of \$4.2 million and expenses of \$3.0 million related to adjustments to inventory.

4. ACCOUNTS RECEIVABLE, NET

Accounts receivable consist of the following:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Trade receivables.....	\$ 143,471	\$ 144,616
U.S. Government contracts:		
Billed.....	17,244	20,289
Costs and accrued profit – not billed	1,478	4,248
Commercial and other government contracts:		
Billed.....	50,560	68,066
Costs and accrued profit – not billed	22,234	3,872
Less allowance for doubtful accounts	(4,123)	(2,989)
Total.....	<u>\$ 230,864</u>	<u>\$ 238,102</u>

The increase in commercial and other government contracts unbilled costs and accrued profits is primarily related to receivables due under the K-MAX® program. The decrease in commercial and other government contracts billed is primarily due to the receipt of payments under the JPF program.

Additionally, \$3.7 million of unbilled receivables and accrued profit for the K-MAX® program were included in Other assets on the Company's Consolidated Balance Sheet as of December 31, 2016, as the amounts due are expected to be collected after December 31, 2017.

Accounts receivable, net includes amounts for matters such as contract changes, negotiated settlements and claims for unanticipated contract costs. These amounts are as follows:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Contract changes, negotiated settlements and claims for unanticipated contract costs	\$ 900	\$ 900
Total.....	<u>\$ 900</u>	<u>\$ 900</u>

5. FAIR VALUE MEASUREMENTS

Fair value is defined as the exchange price that would be received for an asset or the price paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

The Company uses a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires us to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

- Level 1 — Quoted prices in active markets for identical assets or liabilities.
- Level 2 — Observable inputs other than quoted prices included in Level 1, such as quoted prices for markets that are not active or other inputs that are observable or can be corroborated by observable market data.
- Level 3 — Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

5. FAIR VALUE MEASUREMENTS (CONTINUED)

The following table provides the carrying value and fair value of financial instruments that are not carried at fair value at December 31, 2016 and 2015:

<i>In thousands</i>	2016		2015	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt:				
Level 1	\$ 113,203	\$ 170,935	\$ 111,058	\$ 140,156
Level 2	303,855	279,582	329,763	305,681
Total.....	<u>\$ 417,058</u>	<u>\$ 450,517</u>	<u>\$ 440,821</u>	<u>\$ 445,837</u>

The above fair values were computed based on quoted market prices and discounted future cash flows, as applicable. Differences from carrying amounts are attributable to interest rate changes subsequent to when the transactions occurred. The fair values of Cash and cash equivalents, Accounts receivable, net, Notes payable and Accounts payable - trade approximate their carrying amounts due to the short-term maturities of these instruments.

Recurring Fair Value Measurements

The Company holds derivative instruments for foreign exchange contracts and interest rate swaps that are measured at fair value using observable market inputs such as forward rates and our counterparties' credit risks. Based on these inputs, the derivative instruments are classified within Level 2 of the valuation hierarchy and have been included in Other current assets and Other assets on the Consolidated Balance Sheet at December 31, 2016 and 2015. Based on the continued ability to trade and enter into forward contracts and interest rate swaps, we consider the markets for our fair value instruments to be active.

The Company evaluated the credit risk associated with the counterparties to these derivative instruments and determined that as of December 31, 2016, such credit risks have not had an adverse impact on the fair value of these instruments.

Nonrecurring Fair Value Measurements

Goodwill and indefinite-lived intangible assets are tested for possible impairment during the fourth quarter of each year. The nonrecurring fair value measurement for goodwill was developed using significant unobservable inputs (Level 3). For step-one of the impairment analysis, the primary valuation technique used was an income methodology based on management's estimates of forecasted cash flows for each business unit, with those cash flows discounted to present value using rates commensurate with the risks associated with those cash flows. In addition, management used a market-based valuation method involving analysis of market multiples of revenues and EBITDA for a group of comparable public companies.

6. DERIVATIVE FINANCIAL INSTRUMENTS

The Company is exposed to certain risks relating to its ongoing business operations, including market risks relating to fluctuations in foreign currency exchange rates and interest rates. Derivative financial instruments are reported on the Consolidated Balance Sheets at fair value. Changes in the fair values of derivatives are reported each period in earnings or accumulated other comprehensive income, depending on whether a derivative is effective as part of a hedged transaction. Gains and losses on derivative instruments reported in accumulated other comprehensive income are subsequently included in earnings in the periods in which earnings are affected by the hedged item. The Company does not use derivative instruments for speculative purposes.

The Company held forward exchange contracts designed to hedge forecasted transactions denominated in foreign currencies and to minimize the impact of foreign currency fluctuations on the Company's earnings and cash flows. Some of those contracts were designated as cash flow hedges. The Company will include in earnings amounts currently included in accumulated other comprehensive income upon recognition of cost of sales related to the underlying transaction.

6. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

Cash Flow Hedges

Interest Rate Swaps

The Company's Term Loan Facility ("Term Loan") contains floating rate obligations and is subject to interest rate fluctuations. During 2013, the Company entered into interest rate swap agreements for the purposes of hedging the eight quarterly variable-rate interest payments on its Term Loan due in 2014 and 2015. These interest rate swap agreements were designated as cash flow hedges and intended to manage interest rate risk associated with the Company's variable-rate borrowings and minimize the impact on the Company's earnings and cash flows of interest rate fluctuations attributable to changes in LIBOR rates. These agreements were not material to the Company's Consolidated Financial Statements for the years ended 2015 and 2014. As of December 31, 2015, these interest rate swap agreements had all matured.

During 2015, we entered into interest rate swap agreements for the purposes of hedging the eight quarterly variable-rate Term Loan interest payments due in 2016 and 2017. Additionally, we entered into interest rate swap agreements to effectively convert \$83.8 million of our variable rate revolving credit facility debt to a fixed interest rate. These interest rate swap agreements were designated as cash flow hedges and intended to manage interest rate risk associated with our variable-rate borrowings and minimize the impact on our earnings and cash flows of interest rate fluctuations attributable to changes in LIBOR rates. These agreements are not material to the Company's Consolidated Balance Sheets for the years ended December 31, 2016 and 2015.

The Company reclassified \$0.9 million of expense from other comprehensive income for the year ended December 31, 2016. There was no expense reclassified from other comprehensive income associated with these interest rate swaps in 2015. Over the next twelve months, the expense related to cash flow hedges expected to be reclassified from other comprehensive income is \$0.1 million.

Derivatives Not Designated as Hedges

Forward Exchange Contracts

From time to time, the Company will enter into foreign exchange contracts that are not designated as hedging instruments. These contracts are entered into in order to minimize the impact of foreign currency fluctuations on the Company's earnings and cash flows. The Company reports expense related to these contracts in Other expense, net on the Consolidated Statements of Operations.

During the fourth quarter of 2015, the Company entered into forward exchange contracts to minimize the impact of foreign currency fluctuations on the Company's earnings and cash flows. These contracts were entered into as a result of forecasted foreign currency transactions associated with a portion of the purchase price of GRW in the amount of €135.0 million. For the year ended December 31, 2015, the Company reported expense of \$2.2 million in Other expense, net related to the change in the value of these contracts from the date we entered into them to their settlement date. At the settlement date, the Company took delivery of the Euros and further decreases in the exchange rate resulted in expense of \$0.8 million, reported in Other expense, net for the period of time between the settlement of the contracts and the closing of the acquisition.

In addition to the forward exchange contract mentioned above, the Company held forward exchange contracts to mitigate the risk associated with foreign currencies that were not designated as hedging instruments as of December 31, 2016 and 2015. The balances associated with the contracts and the gains or losses reported in Other expense, net were not material for the years ended December 31, 2016, 2015 or 2014.

7. INVENTORIES

Inventories consist of the following:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Merchandise for resale	\$ 158,618	\$ 161,691
Raw materials	20,592	24,721
Contracts in process:		
U.S. Government, net of progress payments of \$28,824 and \$28,812 in 2016 and 2015, respectively	85,779	88,345
Commercial and other government contracts	81,420	61,197
Other work in process (including certain general stock materials)	22,096	26,588
Finished goods	25,309	23,205
Total	<u>\$ 393,814</u>	<u>\$ 385,747</u>

General and administrative costs charged to inventory by Aerospace segment operations during 2016 and 2015 were \$13.0 million and \$15.8 million, respectively. The estimated amounts of general and administrative costs remaining in contracts in process at December 31, 2016 and 2015, were \$11.0 million and \$13.5 million, respectively. These estimates are based on the ratio of such costs to total costs of production.

The Company had inventory of \$6.4 million and \$6.5 million as of December 31, 2016 and 2015, respectively, on consignment at customer locations, the majority of which is held by Distribution segment customers.

Inventories include amounts associated with matters such as contract changes, negotiated settlements and claims for unanticipated contract costs, which totaled \$3.6 million and \$7.1 million at December 31, 2016 and 2015, respectively. The reduction in this balance is due to the resolution of the of the AH-1Z claims as discussed further in Note 16, *Commitments and Contingencies*.

K-MAX® inventory of \$15.9 million and \$14.9 million as of December 31, 2016 and 2015, respectively, is included in contracts and other work in process inventory and finished goods. These amounts exclude the inventory associated with our new build aircraft currently under contract. Management believes that a significant portion of this K-MAX® inventory will be sold after December 31, 2017, based upon the anticipation of additional aircraft manufacturing and supporting the fleet for the foreseeable future.

At December 31, 2016 and 2015, \$7.2 million and \$9.0 million, respectively, of SH-2G(I), formerly SH-2G(A), inventory was included on the Company's balance sheet in contracts and other work in process inventory. Management believes that approximately \$3.8 million of the SH-2G(I) inventory will be sold after December 31, 2017. This balance represents spares requirements and inventory to be used in SH-2G programs.

At December 31, 2016, backlog for the A-10 program with Boeing was \$5.3 million, representing 11 shipsets, and total program inventory was \$12.8 million, of which \$8.7 million is associated with nonrecurring costs. Through December 31, 2016, the Company has delivered 162 shipsets over the life of the program. During 2016, the U.S. Air Force ("USAF") indicated that they would delay the retirement of the A-10 fleet due to its vital close air support, search and rescue capabilities and the lack of a suitable replacement. The Company continues to monitor the defense budget and understands that despite this positive indication, the future of this program could be at risk without the continued support of Congress. The Company has not received any orders for additional shipsets in 2016; however, the customer has not given any indication that this program will be terminated. Production and deliveries under this contract have been extended through the first quarter of 2017. Tooling and nonrecurring costs on this program are being amortized over 242 shipsets, the number of shipsets under the program of record. These nonrecurring costs may not be recoverable in the event of a significant break in production or contract termination prior to the completion of the 242 shipsets.

8. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment, net is summarized as follows:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Land.....	\$ 14,921	\$ 14,115
Buildings	97,265	93,465
Leasehold improvements.....	20,068	18,430
Machinery, office furniture and equipment.....	249,068	242,147
Construction in process	21,565	10,077
Total.....	<u>402,887</u>	<u>378,234</u>
Less accumulated depreciation.....	(226,366)	(202,648)
Property, plant and equipment, net.....	<u>\$ 176,521</u>	<u>\$ 175,586</u>

Depreciation expense was \$27.5 million, \$24.1 million and \$23.8 million for 2016, 2015 and 2014, respectively.

The Company is currently implementing new enterprise resource planning ("ERP") systems at both its Aerospace segment and its Distribution segment. For the years ended December 31, 2016, 2015, and 2014, expenses incurred totaled approximately \$2.0 million, \$1.2 million and \$1.1 million, respectively, and capital expenditures totaled \$4.1 million, \$6.4 million, and \$9.8 million, respectively. Total to date ERP system capital expenditures as of December 31, 2016, were \$44.6 million. Depreciation expense for the ERP systems for the years ended December 31, 2016, 2015, and 2014, totaled \$3.9 million, \$3.8 million and \$2.6 million, respectively.

Capital Leases

For the year ended December 31, 2016, \$3.6 million of assets purchased under the Company's master leasing agreement with PNC and accounted for as capital leases was included in machinery, office furniture and equipment and construction in process, with accumulated depreciation of \$0.4 million. For the year ended December 31, 2015, \$1.6 million of assets purchased under the Company's master leasing agreement with PNC and accounted for as capital leases was included in machinery, office furniture and equipment with accumulated depreciation of \$0.1 million. Depreciation expense associated with the capital leases was \$0.3 million and \$0.1 million for 2016 and 2015, respectively. There was no depreciation expense associated with the capital leases in 2014. See Note 16, *Commitments and Contingencies*, for a discussion on the master leasing agreement.

9. GOODWILL AND OTHER INTANGIBLE ASSETS, NET

Goodwill

The following table sets forth the change in the carrying amount of goodwill for each reportable segment and for the Company:

	2016			2015		
	Distribution	Aerospace	Total	Distribution	Aerospace	Total
<i>In thousands</i>						
Gross balance at beginning of period.....	\$ 149,204	\$ 219,758	\$ 368,962	\$ 141,612	\$ 113,221	\$ 254,833
Accumulated impairment.....	—	(16,252)	(16,252)	—	(16,252)	(16,252)
Net balance at beginning of period.....	149,204	203,506	352,710	141,612	96,969	238,581
Additions.....	—	2,138	2,138	7,592	106,488	114,080
Impairments.....	—	—	—	—	—	—
Foreign currency translation.....	—	(7,342)	(7,342)	—	49	49
Purchase price adjustment.....	—	(9,612)	(9,612)	—	—	—
Net balance at end of period.....	<u>\$ 149,204</u>	<u>\$ 188,690</u>	<u>\$ 337,894</u>	<u>\$ 149,204</u>	<u>\$ 203,506</u>	<u>\$ 352,710</u>
Accumulated impairment at end of period.....	<u>\$ —</u>	<u>\$ (16,252)</u>	<u>\$ (16,252)</u>	<u>\$ —</u>	<u>\$ (16,252)</u>	<u>\$ (16,252)</u>

Additions to goodwill in the Company's Aerospace segment primarily relate to an earnout payment associated with a previous acquisition. See Note 3, *Acquisitions*, for further discussion of these acquisitions. During the purchase price measurement period, the Company made adjustments to the purchase price allocation related to the GRW acquisition. These adjustments were for the finalization of certain tax matters and the reduction of the accrual related to the environmental remediation at the Rimpär, Germany facility.

2016 Analysis

The Company performed a reevaluation of its reporting units for the purposes of its annual goodwill assessment. As previously disclosed in our 2015 Form 10-K, RWG, EXTEX and GRW were reorganized under the single management team of Kaman Specialty Bearings and Engineered Products. The Company tested the new reporting unit for impairment immediately after its creation by comparing the sum of the fair values of the entities moved into the new reporting unit to the carrying value of the new reporting unit, noting the fair value exceeded the carrying value. Prior to the reorganization, these reporting units were stand-alone reporting units. The fair value of RWG was assessed as part of our 2015 annual test for goodwill impairment, prepared during the fourth quarter of 2015. EXTEX and GRW were acquired during the fourth quarter of 2015 and as such were not included in the 2015 annual test for goodwill impairment. There were no significant changes to the conditions of the entities in the new reporting unit that would have impacted the results of the analysis as of January 1, 2016. Since this is the first year the Company assessed goodwill at this reporting unit level, the two-step impairment test was performed.

In accordance with ASC 350, Intangibles – Goodwill and Other (“ASC 350”), the Company evaluates goodwill for possible impairment on at least an annual basis. Upon completion of our 2016 qualitative assessment of events and circumstances affecting recorded goodwill as described in Note 1, *Summary of Significant Accounting Policies*, the Company concluded that all reporting units, other than KPP - Orlando, should receive a Step 1 analysis. The qualitative assessment performed for KPP - Orlando took into consideration the following factors: general economic conditions, industry specific performance, changes in carrying values of the reporting unit, the assessment of assumptions used in the previous fair value calculation and changes in transaction multiples. The results of this analysis indicated that this reporting unit did not need to proceed to the two-step impairment test.

9. GOODWILL AND OTHER INTANGIBLE ASSETS, NET (CONTINUED)

Goodwill - continued

2016 Analysis - continued

For the remaining reporting units the Company performed a Step 1 analysis. The results of the Step 1 analyses indicated that the Company did not need to proceed to Step 2, as the percentage by which the fair value exceeds the carrying value was greater than 25% for all reporting units other than Aerosystems, whose fair value exceeded carrying value by 4%. The Company performed a sensitivity analysis relative to the discount rate and growth rate selected and determined a decrease of 1% in the terminal growth rate or an increase of 1% in the discount rate would not result in a fair value calculation less than the carrying value for the Kaman Specialty Bearings and Engineered Products and Kaman Distribution reporting units. An increase of 1% in the discount rate would result in a fair value approximately 5% less than the carrying value for the Kaman Aerosystems reporting unit. A decrease of 1% in the terminal growth rate would not result in a fair value calculation less than the carrying value for the Kaman Aerosystems reporting unit.

2015 Analysis

In accordance with ASC 350, the Company evaluates goodwill for possible impairment on at least an annual basis. For the Company's 2015 annual assessment a Step 1 analysis was performed for all of its reporting units that carry goodwill. The result of these analyses indicated that the Company did not need to proceed to Step 2, as the percentage by which the fair value exceeded the carrying value was greater than 13% for all reporting units. The Company performed a sensitivity analysis relative to the discount rate and growth rate selected and determined a decrease of 1% in the terminal growth rate or an increase of 1% in the discount rate would not result in a fair value calculation less than the carrying value for any of the reporting units.

Other Intangible Assets

Other intangible assets consisted of:

	Amortization Period	At December 31, 2016		At December 31, 2015	
		Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
<i>In thousands</i>					
Customer lists / relationships	6-26 years	\$ 154,745	\$ (51,800)	\$ 158,831	\$ (41,445)
Developed technologies	10-20 years	19,049	(1,394)	19,055	(154)
Trademarks / trade names	3-15 years	8,344	(3,250)	8,478	(2,556)
Non-compete agreements and other..	1-9 years	8,096	(7,444)	8,453	(6,006)
Patents	17 years	523	(425)	523	(416)
Total.....		<u>\$ 190,757</u>	<u>\$ (64,313)</u>	<u>\$ 195,340</u>	<u>\$ (50,577)</u>

The decrease in the other intangible assets balance at December 31, 2016, as compared to December 31, 2015, is primarily due to amortization. See Note 3, *Acquisitions*, for further discussion of these acquisitions. Intangible asset amortization expense was \$15.6 million, \$11.8 million and \$10.6 million in 2016, 2015 and 2014, respectively.

In accordance with ASC 360 - Property, Plant, and Equipment ("ASC 360"), the Company is required to evaluate long-lived intangible assets for possible impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. During the fourth quarter of 2016, the Company evaluated certain long-lived intangible assets associated with our U.K. Composites facility. The Company compared the carrying amount of these long-lived intangible assets to the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the assets. The carrying value did not exceed the fair value, indicating there was no impairment of long-lived intangible assets held by the U.K. Composites business.

9. GOODWILL AND OTHER INTANGIBLE ASSETS, NET (CONTINUED)

Other Intangible Assets - continued

Estimated amortization expense for the next five years associated with intangible assets existing as of December 31, 2016, is as follows:

In thousands

2017	\$	15,435
2018	\$	14,173
2019	\$	12,217
2020	\$	11,718
2021	\$	11,232

In order to determine the useful life of acquired intangible assets, the Company considered numerous factors, most importantly the industry considerations associated with the acquired entities. The Company determined the amortization period for the acquired intangible assets for its acquisitions in 2015 based primarily on an analysis of their historical customer sales attrition information and the period over which the assets are expected to deliver meaningful cash flow generation in support of the fair value of the asset.

10. ENVIRONMENTAL COSTS

The following table displays the activity and balances associated with accruals related to environmental costs included in other accruals and payables and other long-term liabilities:

<i>In thousands</i>	<u>2016</u>	<u>2015</u>
Balance at January 1	\$ 11,609	\$ 10,598
Additions to accrual	314	4,731
Payments	(1,543)	(3,714)
Other ¹	(3,779)	—
Changes in foreign currency exchange rates	34	(6)
Balance at December 31	<u>\$ 6,635</u>	<u>\$ 11,609</u>

¹ In 2015, the Company recorded approximately \$4.2 million related to environmental remediation at the newly acquired Rimpur, Germany facility. During 2016, the Company reduced this liability to approximately \$0.5 million based on the results of the Phase II assessment. See Note 16, *Commitments and Contingencies* for further detail on this matter.

Bloomfield

In August 2008, the Company completed its purchase of the portion of the Bloomfield campus that Kaman Aerospace Corporation had leased from NAVAIR for many years. In connection with the purchase, the Company has assumed responsibility for environmental remediation at the facility as may be required under the Connecticut Transfer Act (the “Transfer Act”) and it continues the effort to define the scope of the remediation that will be required by the Connecticut Department of Environmental Protection (“CTDEP”). The transaction was recorded by taking the undiscounted estimated remediation liability of \$20.8 million and discounting it at a rate of 8% to its present value. The fair value of the Navy Property asset, which at that time approximated the discounted present value of the assumed environmental liability of \$10.3 million, is included in Property, plant and equipment, net. This remediation process will take many years to complete.

10. ENVIRONMENTAL COSTS (CONTINUED)

Bloomfield - continued

The following represents estimated future payments for the undiscounted environmental remediation liability related to the Bloomfield campus as of December 31, 2016:

In thousands

2017	\$	1,003
2018		403
2019		451
2020		171
2021		513
Thereafter		6,375
Total	<u>\$</u>	<u>8,916</u>

Other

During 2014, the Company sold its former manufacturing facility in Moosup, Connecticut to TD Development, LLC. In connection with the sale, the Company agreed to contribute \$4.0 million in cash to an escrow account over a four-year period to fund TD's environmental remediation work performed on the site. The Company funded \$1.6 million to the escrow account between 2014 and 2015. TD stopped work on the site in 2016 and is in default of its obligations under the sale agreements. The accrual related to this matter remained at \$2.4 million as of December 31, 2016, unchanged from the prior year.

The Company's environmental accrual also includes estimated environmental remediation costs that the Company expects to incur at the former Music segment's New Hartford, CT facility and the Aerospace segment's facility in Rimpar, Germany. The Company continues to assess the work that may be required at each of these facilities, which may result in a change to this accrual. For further discussion of these matters, see Note 16, *Commitments and Contingencies*.

11. DEBT

Long-Term Debt

The Company has long-term debt as follows:

	<u>At December 31,</u>	
	<u>2016</u>	<u>2015</u>
<i>In thousands</i>		
Revolving credit agreement	\$ 212,605	\$ 233,513
Term loan	91,250	96,250
Convertible notes	113,203	111,058
Total	<u>417,058</u>	<u>440,821</u>
Less current portion	120,078	5,000
Total excluding current portion.....	<u>\$ 296,980</u>	<u>\$ 435,821</u>

At December 31, 2016 and 2015, the Company's Consolidated Balance Sheets were net of debt issuance costs of \$0.9 million and \$1.6 million, respectively.

The weighted average interest rate on long-term borrowings outstanding as of December 31, 2016 and 2015, was 2.48% and 2.08%, respectively.

11. DEBT (CONTINUED)

Long-Term Debt - continued

For the years ended December 31, 2016 and 2015, \$2.6 million and \$1.1 million, respectively of liabilities associated with our capital leases are included in other long-term liabilities. See note 16, *Commitments and Contingencies*, for a discussion of the master leasing agreement.

The aggregate annual maturities of long-term debt for each of the next five years are approximately as follows:

In thousands

2017.....	\$	121,875
2018.....		7,500
2019.....		9,375
2020.....		280,105
2021.....		—

In the above table, the total principal of the Convertible Notes of \$115.0 million is included in the amount due in 2017. The carrying value of the Convertible Notes at December 31, 2016, is \$113.2 million.

Revolving Credit and Term Loan Agreements

On May 6, 2015, the Company closed on an amended and restated \$700.0 million Credit Agreement (the "Credit Agreement") with JPMorgan Chase Bank N.A., as Administrative Agent, Bank of America, N.A. and Citizens Bank, N.A. as Co-Syndication Agents and SunTrust Bank, KeyBank N.A., TD Bank, N.A., BB&T and Fifth Third Bank, as Co-Documentation Agents. The Credit Agreement amends and restates the Company's previously existing credit facility in its entirety to, among other things: (i) extend the maturity date to May 6, 2020; (ii) increase the aggregate amount of revolving commitments from \$400.0 million to \$600.0 million; (iii) reinstate the aggregate amount of outstanding Term Loans to \$100.0 million; (iv) modify the affirmative and negative covenants set forth in the facility; and (v) effectuate a number of additional modifications to the terms and provisions of the facility, including its pricing. Capitalized terms used but not defined within this Note 11, *Debt*, have the meanings ascribed thereto in the Credit Agreement.

The Term Loan commitment requires quarterly payments of principal (which commenced on June 30, 2015) at the rate of \$1.25 million, increasing to \$1.875 million on June 30, 2017, and then to \$2.5 million on June 30, 2019, with \$65.0 million payable in the final quarter of the facility's term. The facility includes an accordion feature that allows the Company to increase the aggregate amount available up to \$900.0 million with additional commitments from the Lenders.

The revolving credit facility permits the Company to pay cash dividends. The Lenders have been granted a security interest in substantially all of the Company's and its domestic subsidiaries' personal property and other assets (including intellectual property but excluding real estate), including a pledge of 66% of the Company's equity interest in certain foreign subsidiaries and 100% of the Company's equity interest in its domestic subsidiaries, as collateral for the Company's obligations under the Credit Agreement.

The following table shows the amounts available for borrowing under the Company's revolving credit facility:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Total facility.....	\$ 600,000	\$ 600,000
Amounts outstanding, excluding letters of credit.....	212,605	233,513
Amounts available for borrowing, excluding letters of credit.....	387,395	366,487
Letters of credit under the credit facility.....	5,655	5,900
Amounts available for borrowing.....	\$ 381,740	\$ 360,587
Amounts available for borrowing subject to EBITDA.....	\$ 209,467	\$ 259,883

11. DEBT (CONTINUED)

Revolving Credit and Term Loan Agreements - continued

Interest rates on amounts outstanding under the Credit Agreement are variable, and are determined based on the Consolidated Senior Secured Leverage Ratio, as defined in the Credit Agreement. In addition, the Company is required to pay a quarterly commitment fee on the unused revolving loan commitment amount at a rate ranging from 0.175% to 0.300% per annum, based on the Consolidated Senior Secured Leverage Ratio. Fees for outstanding letters of credit range from 1.25% to 2.00%, based on the Consolidated Senior Secured Leverage Ratio.

The interest rate for the outstanding amounts on both the revolving credit facility and term loan commitment are as follows:

	At December 31,	
	2016	2015
Interest rate	2.19%	1.67%

The financial covenants associated with the Credit Agreement include a requirement that (i) the Consolidated Senior Secured Leverage Ratio cannot be greater than 3.50 to 1.00, with an election to increase the maximum to 3.75 to 1.00 for four consecutive quarters, in connection with a Permitted Acquisition with consideration in excess of \$125.0 million; (ii) the Consolidated Total Leverage Ratio, as defined in the Credit Agreement, cannot be greater than 4.00 to 1.00, with an election to increase the maximum to 4.25 to 1.00 for four consecutive quarters, in connection with a Permitted Acquisition with consideration in excess of \$125.0 million; (iii) the Consolidated Interest Coverage Ratio cannot be less than 4.00 to 1.00; and (iv) Liquidity: (a) as of the last day of the fiscal quarter of the Company ending two full fiscal quarters prior to the stated maturity of the Specified Convertible Notes, cannot be less than an amount equal to 50% of the outstanding principal amount of the Specified Convertible Notes, and (b) as of the last day of each fiscal quarter of the Company ending thereafter, cannot be less than an amount equal to the outstanding principal amount of the Specified Convertible Notes as of such day. The Company was in compliance with those financial covenants as of and for the quarter ended December 31, 2016, and management does not anticipate noncompliance in the foreseeable future.

Convertible Notes

In November 2010, the Company issued convertible unsecured notes due on November 15, 2017, in the aggregate principal amount of \$115.0 million in a private placement offering (the "Convertible Notes"). These notes bear 3.25% interest per annum on the principal amount, payable semiannually in arrears on May 15 and November 15 of each year, beginning on May 15, 2011. Proceeds from the offering were \$111.0 million, net of fees and expenses which were capitalized. The proceeds were used to repay \$62.2 million of borrowings outstanding on the Company's former Revolving Credit Agreement, make a \$25.0 million voluntary contribution to the Qualified Pension Plan and pay \$13.2 million for the purchase of call options related to the convertible note offering. See below for further discussion of the call options.

The Convertible Notes will mature on November 15, 2017, unless earlier redeemed, repurchased by the Company or converted. Upon conversion, the Convertible Notes require net share settlement, where the aggregate principal amount of the notes will be paid in cash and remaining amounts due, if any, will be settled in cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election.

At December 31, 2016, the market value of the Company's Common Stock exceeded 130% of the conversion price for the notes for 20 or more of the last 30 consecutive trading days preceding the quarter end. As a result, the Convertible Notes are convertible at the option of the noteholders and will continue to be convertible through April 3, 2017. The carrying amount of the Convertible Notes was reclassified to current liabilities and a portion of the equity component, representing the unamortized debt discount, was reclassified to temporary equity on the Company's Consolidated Balance Sheet as of December 31, 2016. Upon closure of the conversion period, the Notes will remain in current liabilities due to their scheduled maturity and the temporary equity will be reclassified into permanent equity.

11. DEBT (CONTINUED)

Convertible Notes - continued

The following table illustrates the conversion rate at each date:

<i>Convertible Notes</i>	<u>December 31, 2016</u>	<u>December 31, 2015</u>
Conversion Rate per \$1,000 principal amount ⁽¹⁾	29.9134	29.8059
Conversion Price ⁽²⁾	\$ 33.4298	\$ 33.5504
Contingent Conversion Price ⁽³⁾	\$ 43.46	\$ 43.62
Aggregate shares to be issued upon conversion ⁽⁴⁾	3,440,045	3,427,679

⁽¹⁾ Represents the number of shares of Common Stock hypothetically issuable per \$1,000 principal amount of Notes, subject to adjustments per the Convertible Note Indenture dated November 19, 2010. At the date the Company issued the Convertible Notes, the conversion rate initially equaled 29.4499 shares of common stock per \$1,000 principal amount of notes (which is equivalent to an initial conversion price of approximately \$33.96 per share of common stock). The conversion rate is subject to adjustment upon the occurrence of certain specified events, such as an increase in the dividend paid to shareholders.

⁽²⁾ Represents \$1,000 divided by the conversion rate as of such date. The conversion price reflects the strike price of the embedded option within the Convertible Note. Were the Company's share price to exceed the conversion price at conversion the noteholders would be entitled to receive additional consideration either in cash, shares or a combination thereof, the form of which is at the sole discretion of the Company.

⁽³⁾ Prior to May 15, 2017, the notes are convertible only in the following circumstances: (1) during any fiscal quarter commencing after April 1, 2011, and only during any such fiscal quarter, if the last reported sale price of our common stock was greater than or equal to 130% of the applicable conversion price for at least 20 trading days (whether or not consecutive) during the 30 consecutive trading days ending on the last trading day of the previous fiscal quarter, (2) upon the occurrence of specified corporate transactions, or (3) during the five consecutive business-day period following any five consecutive trading-day period in which, for each day of that period, the trading price for the notes was less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate on such trading day. On and after May 15, 2017, until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their notes at any time, regardless of the foregoing circumstances. Upon a change in control or termination of trading, holders of the notes may require us to repurchase all or a portion of their notes for cash at a repurchase price equal to 100% of the principal amount, plus any accrued and unpaid interest.

⁽⁴⁾ This represents the number of shares hypothetically issuable upon conversion of the principal balance of the Convertible Notes at each date; however, as the terms of the Convertible Notes require net share settlement, the aggregate principal amount of the notes will be paid in cash. Amounts due in excess of the principal, if any, may be settled in cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election.

Because the embedded conversion option is indexed to the Company's own stock and would be classified in shareholders' equity, it does not meet the criterion under FASB Accounting Standards Codification Topic 815 - Derivatives and Hedging ("ASC 815") that would require separate accounting as a derivative instrument.

In connection with the offering, we entered into convertible note hedge transactions with affiliates of the initial purchasers. These transactions are intended to reduce the potential dilution to our Company's shareholders upon any future conversion of the notes. The call options, which cost an aggregate \$13.2 million, were recorded as a reduction of additional paid-in capital. The Company also entered into warrant transactions concurrently with the offering, pursuant to which we sold warrants to acquire up to approximately 3.4 million shares of our common stock to the same counterparties that entered into the convertible note hedge transactions. Proceeds received from the issuance of the warrants totaled approximately \$1.9 million and were recorded as additional paid-in capital. The convertible note hedge and warrant transactions effectively increased the conversion price of the convertible notes.

11. DEBT (CONTINUED)

Convertible Notes - continued

The following table illustrates the warrant price at each date:

	<u>December 31, 2016</u>	<u>December 31, 2015</u>
<i>Warrants</i>		
Warrant Price.....	\$ 43.72	\$ 43.87

ASC 815 provides that contracts are initially classified as equity if (1) the contract requires physical settlement or net-share settlement, or (2) the contract gives the company a choice of net-cash settlement or settlement in its own shares (physical settlement or net-share settlement). The settlement terms of our purchased call options and sold warrant contracts require net-share settlement. Based on the guidance in ASC 815, the purchased call option contracts were recorded as a reduction of equity and the warrants were recorded as an addition to equity as of the trade date. ASC 815 states that a reporting entity shall not consider contracts to be derivative instruments if the contract issued or held by the reporting entity is both indexed to its own stock and classified in shareholders' equity in its balance sheet. The Company concluded the purchased call option contracts and the warrant contracts should be accounted for in shareholders' equity and are therefore not to be considered derivative instruments.

ASC 470-20 "Debt with Conversion and Other Options" ("ASC 470-20"), clarifies the accounting for convertible debt instruments that may be settled in cash upon conversion, including partial cash settlement. ASC 470-20 specifies that an issuer of such instruments should separately account for the liability and equity components of the instruments in a manner that reflects the issuer's non-convertible debt borrowing rate which interest costs are to be recognized in subsequent periods. The note payable principal balance at the date of issuance of \$115.0 million was bifurcated into the debt component of \$101.7 million and the equity component of \$13.3 million. The difference between the note payable principal balance and the value of the debt component is being accreted to interest expense over the term of the notes. The debt component was recognized at the present value of associated cash flows discounted using a 5.25% discount rate, the borrowing rate at the date of issuance for a similar debt instrument without a conversion feature. The Company incurred \$3.6 million of debt issuance costs in connection with the sale of the Convertible Notes, of which \$0.5 million was recorded as an offset to additional paid-in capital. The balance, \$3.1 million, is being amortized over the term of the notes. Total amortization expense for the years ended December 31, 2016, 2015 and 2014 was \$0.6 million, \$0.5 million and \$0.5 million.

The carrying amount of the equity component and the principal amount of the liability component, the unamortized discount and the net carrying value of the liability are as follows:

	<u>December 31, 2016</u>	<u>December 31, 2015</u>
<i>In thousands</i>		
Principal amount of liability	\$ 115,000	\$ 115,000
Unamortized discount	1,797	3,942
Carrying value of liability.....	<u>\$ 113,203</u>	<u>\$ 111,058</u>
Equity component	<u>\$ 13,329</u>	<u>\$ 13,329</u>

As of December 31, 2016, the "if converted value" exceeds the principal amount of the Convertible Notes by \$45.0 million.

Interest expense associated with the Convertible Notes consisted of the following:

	<u>For the year ended December 31,</u>		
	<u>2016</u>	<u>2015</u>	<u>2014</u>
<i>In thousands</i>			
Contractual coupon rate of interest	\$ 3,738	\$ 3,738	\$ 3,738
Accretion of convertible notes discount.....	2,144	2,035	1,931
Interest expense - convertible notes.....	<u>\$ 5,882</u>	<u>\$ 5,773</u>	<u>\$ 5,669</u>

11. DEBT (CONTINUED)

Debt Issuance Costs

In 2015, the Company incurred \$2.3 million in debt issuance costs in connection with the Credit Agreement. These costs have been capitalized and will be amortized over the term of the agreement. Total amortization expense for the year ended December 31, 2016, 2015 and 2014 was \$1.0 million, 1.0 million and \$1.1 million, respectively.

Interest Payments

Cash payments for interest were \$14.3 million, \$11.4 million and \$11.9 million in 2016, 2015 and 2014, respectively.

12. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

^(a) These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see Note 14, *Pension Plans* for additional information)

^(b) See Note 6, *Derivative Financial Instruments*, for additional information regarding our derivative instruments.

13. INCOME TAXES

The components of income tax expense (benefit) associated with continuing operations are as follows:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
Current:			
Federal.....	\$ 20,405	\$ 25,170	\$ 26,296
State.....	2,312	349	(796)
Foreign.....	738	931	905
	<u>23,455</u>	<u>26,450</u>	<u>26,405</u>
Deferred:			
Federal.....	10,133	5,474	5,256
State.....	(1,023)	(2,682)	(380)
Foreign.....	(1,715)	(1,691)	(559)
	<u>7,395</u>	<u>1,101</u>	<u>4,317</u>
Total.....	<u>\$ 30,850</u>	<u>\$ 27,551</u>	<u>\$ 30,722</u>

The tax effects of temporary differences that give rise to deferred tax assets and liabilities are presented below:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Deferred tax assets:		
Deferred employee benefits.....	\$ 82,836	\$ 83,390
Inventories.....	9,694	9,410
Tax loss and credit carryforwards.....	19,216	19,529
Accrued liabilities and other items.....	12,433	12,491
Total deferred tax assets.....	<u>124,179</u>	<u>124,820</u>
Deferred tax liabilities:		
Property, plant and equipment.....	(15,653)	(17,178)
Intangibles.....	(48,785)	(42,717)
Other items.....	(3,100)	(2,195)
Total deferred tax liabilities.....	<u>(67,538)</u>	<u>(62,090)</u>
Net deferred tax assets before valuation allowance.....	56,641	62,730
Valuation allowance.....	(4,143)	(11,122)
Net deferred tax assets after valuation allowance.....	<u>\$ 52,498</u>	<u>\$ 51,608</u>

The \$7.0 million change in the valuation allowance from December 31, 2015 to December 31, 2016, primarily relates to tax attributes acquired with GRW which the Company has determined are more likely than not to be realized, partially offset by the establishment of valuation allowances relating to certain state and foreign loss carryforwards. Valuation allowances reduced the deferred tax asset attributable to these state and foreign loss and credit carryforwards to an amount that, based upon all available information, is more likely than not to be realized. Reversal of the valuation allowance is contingent upon the recognition of future taxable income in the respective jurisdictions or changes in circumstances which cause the realization of the benefits of carryforwards to become more likely than not.

A portion of the net deferred tax assets, \$2.7 million, is related to a capital loss recorded on the disposition of the Company's Distribution segment's Mexico operations. The realization of these benefits is dependent in part on future taxable capital gains.

Pre-tax loss from foreign operations amounted to \$5.0 million, \$4.3 million and \$2.3 million in 2016, 2015 and 2014, respectively. U.S. income taxes have not been provided on \$29.9 million of undistributed earnings of foreign subsidiaries since it is the Company's intention to permanently reinvest such earnings or to distribute them only when it is tax efficient to do so. It is impracticable to estimate the total tax liability, if any, that would be created by the future distribution of these earnings.

13. INCOME TAXES (CONTINUED)

The provision for income taxes associated with continuing operations differs from that computed at the federal statutory corporate tax rate as follows:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
Federal tax at 35% statutory rate.....	\$ 31,396	\$ 30,796	\$ 33,776
State income taxes, net of federal benefit	999	(1,517)	(765)
Tax effect of:			
Section 199 Manufacturing deduction	(2,153)	(2,275)	(2,000)
Other, net.....	608	547	(289)
Income tax expense	<u>\$ 30,850</u>	<u>\$ 27,551</u>	<u>\$ 30,722</u>

During the fourth quarter of 2016, the Company elected to early adopt ASU 2016-09, "Compensation - Stock Compensation (Topic 718) - Improvements to Employee Share-Based Payment Accounting". The objective of this standard update is to simplify several aspects of the accounting for share-based payment transactions, including, but not limited to, income tax consequences. The standard update was effective for fiscal years, and interim periods within those years, beginning after December 31, 2016. The Company's early adoption resulted in a tax benefit of \$0.5 million for 2016.

The Company records a benefit for uncertain tax positions in the financial statements only when it determines it is more likely than not that such a position will be sustained upon examination by taxing authorities. Unrecognized tax benefits represent the difference between the position taken and the benefit reflected in the financial statements. On December 31, 2016, 2015 and 2014, the total liability for unrecognized tax benefits was \$2.8 million, \$3.0 million and \$2.4 million, respectively (including interest and penalties of \$0.2 million in 2016, \$0.5 million in 2015 and \$0.3 million in 2014). The change in the liability for 2016, 2015 and 2014 is explained as follows:

	2016	2015	2014
<i>In thousands</i>			
Balance at January 1.....	\$ 2,996	\$ 2,441	\$ 2,302
Additions based on current year tax positions	211	117	512
Changes for tax positions of prior years	(96)	(160)	33
Settlements	(155)	19	(165)
Additions due to acquired business.....	—	954	—
Reductions due to lapses in statutes of limitation	(124)	(375)	(241)
Balance at December 31.....	<u>\$ 2,832</u>	<u>\$ 2,996</u>	<u>\$ 2,441</u>

Included in unrecognized tax benefits at December 31, 2016, were items approximating \$2.2 million that, if recognized, would favorably affect the Company's effective tax rate in future periods. The Company files tax returns in numerous U.S. and foreign jurisdictions, with returns subject to examination for varying periods, but generally back to and including 2012. During 2016, 2015 and 2014, \$0.1 million or less of interest and penalties was recognized each year as a component of income tax expense. It is the Company's policy to record interest and penalties on unrecognized tax benefits as income taxes.

Cash payments for income taxes, net of refunds, were \$24.8 million, \$35.7 million and \$22.8 million in 2016, 2015 and 2014, respectively.

14. PENSION PLANS

The Company has a non-contributory qualified defined benefit pension plan (the “Qualified Pension Plan”). On February 23, 2010, the Company’s Board of Directors approved an amendment to the Qualified Pension Plan that, among other things, closed the Qualified Pension Plan to all new hires on or after March 1, 2010, and stipulated that years of service would continue to be added for purposes of the benefit calculations only through December 31, 2015, with no further accrual of benefits for service thereafter. Given that effective December 31, 2015, the qualified pension plan was frozen with respect to future benefit accruals, under U.S. Government Cost Accounting Standard (“CAS”) 413 the Company must determine the USG’s share of any pension curtailment adjustment calculated in accordance with CAS. During the fourth quarter of 2016, the Company accrued a \$0.3 million liability representing our estimate of the amount due to the USG based on our pension curtailment adjustment calculation, which was submitted to the USG for review in December. There can be no assurance that the ultimate resolution of this matter will not have a material adverse effect on our results of operations, financial position and cash flows.

The Company also has a Supplemental Employees’ Retirement Plan (“SERP”), which is considered a non-qualified pension plan. The SERP provides certain key executives, whose compensation is in excess of the limitations imposed by federal law on the qualified defined benefit pension plan, with supplemental benefits based upon eligible earnings, years of service and age at retirement. During 2010, the Company’s Board of Directors also approved an amendment to the SERP that made changes consistent with the pension plan amendment. The Board’s Personnel & Compensation Committee and the Board have not approved any new participants to the SERP since February 28, 2010, and do not intend to do so at any time in the future. The measurement date for both these plans is December 31.

Obligations and Funded Status

The changes in the actuarial present value of the projected benefit obligation and fair value of plan assets are as follows:

	For the year ended December 31,			
	Qualified Pension Plan		SERP	
	2016	2015	2016	2015
<i>In thousands</i>				
Projected benefit obligation at beginning of year	\$ 712,842	\$ 738,279	\$ 10,184	\$ 10,349
Service cost	4,596	14,131	—	206
Interest cost	24,488	27,514	254	318
Actuarial liability (gain) loss ^(a)	20,588	(36,245)	155	(155)
Benefit payments	(33,913)	(30,837)	(534)	(534)
Projected benefit obligation at end of year	<u>\$ 728,601</u>	<u>\$ 712,842</u>	<u>\$ 10,059</u>	<u>\$ 10,184</u>
Fair value of plan assets at beginning of year	\$ 553,858	\$ 596,733	\$ —	\$ —
Actual return on plan assets	42,229	(22,038)	—	—
Employer contributions	10,000	10,000	534	534
Benefit payments	(33,913)	(30,837)	(534)	(534)
Fair value of plan assets at end of year	<u>\$ 572,174</u>	<u>\$ 553,858</u>	<u>\$ —</u>	<u>\$ —</u>
Funded status at end of year	<u>\$ (156,427)</u>	<u>\$ (158,984)</u>	<u>\$ (10,059)</u>	<u>\$ (10,184)</u>
Accumulated benefit obligation	<u>\$ 728,601</u>	<u>\$ 712,842</u>	<u>\$ 10,059</u>	<u>\$ 10,184</u>

^(a)The actuarial liability (gain)/loss amount for the qualified pension plan for 2016 and 2015 is principally due to the effect of changes in the discount rate.

14. PENSION PLANS (CONTINUED)

Obligations and Funded Status - continued

The Company has recorded liabilities related to our qualified pension plan and SERP as follows:

	At December 31,			
	Qualified Pension Plan		SERP	
	2016	2015	2016	2015
<i>In thousands</i>				
Current liabilities ^(a)	\$ —	\$ —	\$ (3,061)	\$ (530)
Noncurrent liabilities	(156,427)	(158,984)	(6,998)	(9,654)
Total	<u>\$ (156,427)</u>	<u>\$ (158,984)</u>	<u>\$ (10,059)</u>	<u>\$ (10,184)</u>

^(a) The current liabilities are included in other accruals and payables on the Consolidated Balance Sheets.

The following table presents amounts included in accumulated other comprehensive income on the Consolidated Balance Sheets that will be recognized as components of pension cost in future periods.

	At December 31,			
	Qualified Pension Plan		SERP	
	2016	2015	2016	2015
<i>In thousands</i>				
Unrecognized (gain) or loss	\$ 193,764	\$ 187,331	\$ 1,209	\$ 1,236
Amount included in accumulated other comprehensive income	<u>\$ 193,764</u>	<u>\$ 187,331</u>	<u>\$ 1,209</u>	<u>\$ 1,236</u>

The amount of unrecognized loss for the qualified pension plan and the SERP, respectively, that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next year is estimated to be \$13.4 million and \$0.2 million.

14. PENSION PLANS (CONTINUED)

Obligations and Funded Status - continued

The pension plan net periodic benefit costs on the Consolidated Statements of Operations and other amounts recognized in other comprehensive income (loss) on the Consolidated Statements of Comprehensive Income and Consolidated Statements of Shareholders' Equity were computed using the projected unit credit actuarial cost method and included the following components:

	For the year ended December 31,					
	Qualified Pension Plan			SERP		
	2016	2015	2014	2016	2015	2014
<i>In thousands</i>

	2016	2015	2016
<i>In thousands</i>			
Expected contributions during 2017	\$	10,000	\$ 3,061

^(a) The Company contributed \$10.0 million to the qualified pension plan in January 2017 and does not intend to make any further contributions to the qualified pension plan in 2017.

14. PENSION PLANS (CONTINUED)

Obligations and Funded Status - continued

Expected future benefit payments, which reflect expected future service, are as follows:

<i>In thousands</i>	<u>Qualified Pension Plan</u>	<u>SERP</u>
2017	\$ 33,480	\$ 3,061
2018	35,021	519
2019	36,948	506
2020	38,533	492
2021	39,770	2,145
2022-2026	218,335	2,423

In 2014, the Society of Actuaries finalized a new set of mortality tables. Mortality is a key assumption in developing actuarial estimates, and therefore could significantly impact the valuation of the Company's obligations under the qualified pension plan and SERP. The Company reviewed the mortality data and based on the size and demographics of the plan's participant population, the Company determined the RP-2000 Scale AA Generational based mortality table was the most appropriate assumption.

Since 2014, the Company has been using the Citigroup Above Median Double-A Curve, as it is deemed to be the most appropriate basis for generating the Company's discount rate assumption, as the future cash flows of the plan are most closely aligned to the Above Median Double-A Curve. The discount rates used in determining benefit obligations of the pension plans are as follows:

	At December 31,			
	<u>Qualified Pension Plan</u>		<u>SERP</u>	
	2016	2015	2016	2015
Discount rate	3.98%	4.17%	3.43%	3.47%

The actuarial assumptions used in determining the net periodic benefit cost of the pension plans are as follows:

	For the year ended December 31,			
	<u>Qualified Pension Plan</u>		<u>SERP</u>	
	2016	2015	2016	2015
Discount rate	4.17%	3.80%	3.47%	3.15%
Expected return on plan assets	7.50%	7.50%	N/A	N/A
Average rate of increase in compensation levels.....	N/A	N/A	N/A	N/A

Other

In 2015 and prior, we used a single-weighted average discount rate to calculate interest and service cost associated with our defined benefit pension plans. In 2016 we utilized a "spot rate approach" in the calculation of interest and service cost for these plans. The spot rate approach applies separate discount rates for each projected benefit payment in the calculation of pension interest and service cost. This calculation change is considered a change in accounting estimate and is being applied prospectively beginning in 2016. The use of the spot rate approach had a favorable impact on pension expense in 2016 of \$4.7 million relative to what pension expense would have been had we not changed our approach.

14. PENSION PLANS (CONTINUED)

Qualified Pension Plan Assets

The expected return on plan assets rate was determined based upon historical returns adjusted for estimated future market fluctuations. For 2016 and 2015, the expected rate of return on plan assets was 7.5%. During 2016, the actual return on pension plan assets, net of expenses, was 7.5%.

Plan assets are invested in a diversified portfolio consisting of equity and fixed income securities. The investment goals for pension plan assets are to improve and/or maintain the Plan's funded status by generating long-term asset returns that exceed the rate of growth of the Plan's liabilities. The Plan invests assets in a manner that seeks to (a) maximize return within reasonable and prudent levels of risk of loss of funded status; and (b) maintain sufficient liquidity to meet benefit payment obligations and other periodic cash flow requirements on a timely basis. The return generation/liability matching asset allocation ratio is currently 55.6%/44.4%. As the plan's funded status changes, the pension plan's Administrative Committee (the management committee that is responsible for plan administration) will act through an immediate or gradual process, as appropriate, to reallocate assets.

Under the current investment policy, no Investment Manager may invest in investments deemed illiquid by the Investment Manager at the time of purchase, development programs, real estate, mortgages or private equities or securities of Kaman Corporation without prior written authorization from the Finance Committee of the Board of Directors. In addition, with the exception of USG securities, managers' holdings in the securities of any one issuer, at the time of purchase, may not exceed 7.5% of the total market value of that manager's account.

The pension plan assets are valued at fair value. The following is a description of the valuation methodologies used for the investments measured at fair value, including the general classification of such instruments pursuant to the valuation hierarchy.

Short-term Investments – This investment category consists of cash and cash equivalents and futures and options contracts. Cash and cash equivalents are comprised of investments with maturities of three months or less when purchased, including certain short-term fixed-income securities, and are classified as Level 1 investments. Futures contracts and options contracts requiring the investment managers to receive from or pay to the broker an amount of cash equal to daily fluctuations are included in short-term investments and are classified as Level 2 investments.

Corporate Stock – This investment category consists primarily of domestic common stock issued by U.S. corporations. Common shares are traded actively on exchanges and price quotes for these shares are readily available. Holdings of corporate stock are classified as Level 1 investments.

Mutual Funds – Mutual funds are traded actively on public exchanges. The share prices for these mutual funds are published at the close of each business day. Holdings of mutual funds are classified as Level 1 investments.

Common Trust Funds – Common trust funds are comprised of shares or units in commingled funds that are not publicly traded. The values of the commingled funds are not publicly quoted and must trade through a broker. For equity and fixed-income commingled funds traded through a broker, the fund administrator values the fund using the net asset value ("NAV") per fund share, derived from the value of the underlying assets. The underlying assets in these funds (equity securities, fixed income securities, and commodity-related securities) are publicly traded on exchanges and price quotes for the assets held by these funds are readily available. Holdings of common trust funds are not subject to leveling.

Fixed Income Securities - For fixed income securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue for each security. The fair values of fixed income securities are based on evaluated prices that reflect observable market information, such as actual trade information of similar securities, adjusted for observable differences, and are categorized as Level 2. These securities are primarily investment grade securities.

14. PENSION PLANS (CONTINUED)

Qualified Pension Plan Assets - continued

The fair values of the Company's qualified pension plan assets at December 31, 2016 and 2015, are as follows:

¹ In accordance with ASU 2015-07, Fair Value Measurement (Topic 820), certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented for the total pension plan assets.

Derivatives are primarily used to manage risk and gain asset class exposure while still maintaining liquidity. Derivative instruments mainly consist of equity futures and interest rate futures.

14. PENSION PLANS (CONTINUED)

Other Plans

The Company also maintains a Defined Contribution Plan that has been adopted by most of its U.S. subsidiaries. Employees of the adopting employers who meet the eligibility requirements of the plan may participate. Employer matching contributions are made to the plan based on a percentage of each participant’s pre-tax contribution. For each dollar that a participant contributes, up to 5% of compensation, participating subsidiaries make employer contributions of one dollar. Employer contributions to the plan totaled \$11.9 million, \$11.9 million and \$11.2 million in 2016, 2015 and 2014, respectively.

One of the Company’s acquired U.S. subsidiaries maintains a separate defined contribution plan for its eligible employees. Employer matching contributions are made on a discretionary basis. Additionally, one of our foreign subsidiaries maintains a defined benefit plan of its own for its local employees. The net pension liability associated with these plans as of December 31, 2016 and 2015, of \$0.1 million is included in Other current liabilities on the Consolidated Balance Sheet.

15. OTHER LONG-TERM LIABILITIES

Other long-term liabilities consist of the following:

	At December 31,	
	2016	2015
<i>In thousands</i>		
Supplemental employees' retirement plan ("SERP")	\$ 6,998	\$ 9,654
Deferred compensation	15,238	16,244
Long-term incentive plan	8,346	7,973
Noncurrent income taxes payable	2,903	2,672
Environmental remediation liability.....	3,763	9,307
Other.....	7,668	5,577
Total	<u>\$ 44,916</u>	<u>\$ 51,427</u>

The Company maintains a non-qualified deferred compensation plan for certain of its employees as well as a non-qualified deferred compensation plan for its Board of Directors. Generally, participants in these plans have the ability to defer a certain amount of their compensation, as defined in the agreement. The deferred compensation liability will be paid out either upon retirement or as requested based upon certain terms in the agreements and in accordance with Internal Revenue Code Section 409A.

Disclosures regarding the assumptions used in the determination of the SERP liabilities are included in Note 14, *Pension Plans*. Discussions of our environmental remediation liabilities are in Note 10, *Environmental Costs*, and Note 16, *Commitments and Contingencies*.

16. COMMITMENTS AND CONTINGENCIES

Asset Retirement Obligations

The Company has unrecorded Asset Retirement Obligation’s (“AROs”) that are conditional upon certain events. These AROs generally include the removal and disposition of non-friable asbestos. The Company has not recorded a liability for these conditional AROs at December 31, 2016, because the Company does not currently believe there is a reasonable basis for estimating a date or range of dates for major renovation or demolition of these facilities. In reaching this conclusion, the Company considered the historical performance of each facility and has taken into account factors such as planned maintenance, asset replacements and upgrades, which, if conducted as in the past, can extend the physical lives of the facilities indefinitely. The Company also considered the possibility of changes in technology and risk of obsolescence in arriving at its conclusion.

16. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Asset Retirement Obligations - continued

The Company currently leases various properties under leases that give the lessor the right to make the determination as to whether the lessee must return the premises to their original condition, except for normal wear and tear. The Company does not normally make substantial modifications to leased property, and many of the Company's leases either require lessor approval of planned improvements or transfer ownership of such improvements to the lessor at the termination of the lease. Historically we have not incurred significant costs to return leased premises to their original condition.

Operating Leases

Rent commitments under various leases for office space, warehouses, land and buildings expire at varying dates from January 2017 to December 2026. The terms of most of these leases are in the range of 3 to 5 years. Some of the Company's leases have rent escalations, rent holidays or contingent rent that are recognized on a straight-line basis over the entire lease term. Material leasehold improvements and other landlord incentives are amortized over the shorter of their economic lives or the lease term, including renewal periods, if reasonably assured. Certain annual rentals are subject to renegotiation, with certain leases renewable for varying periods.

Lease periods for machinery and equipment range from 1 to 5 years.

Substantially all real estate taxes, insurance and maintenance expenses associated with leased facilities are obligations of the Company. It is expected that in the normal course of business leases that expire will be renewed or replaced by leases on other similar property.

The following minimum future rental payments are required under operating leases that have initial or remaining non-cancellable lease terms in excess of one year as of December 31, 2016:

In thousands

2017	\$	25,347
2018		20,444
2019		13,693
2020		9,192
2021		6,401
Thereafter		12,739
Total	\$	<u>87,816</u>

Lease expense for all operating leases, including leases with terms of less than one year, amounted to \$27.3 million, \$26.4 million and \$25.0 million for 2016, 2015 and 2014, respectively.

Capital Leases

During 2014, the Company entered into a master leasing agreement with PNC Equipment Finance for financing the purchases of equipment, with total capacity of \$5.0 million. Such leases are classified as capital for accounting purposes and are recorded at the present value of the future minimum lease payments at the inception of the lease. Amounts due under capital leases are recorded as liabilities, and assets acquired under capital leases are recorded as equipment. Amortization of assets recorded under capital leases is included in depreciation and amortization expense.

16. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Capital Leases - continued

The following minimum payments are required under capital leases that have initial or remaining non-cancellable lease terms in excess of one year as of December 31, 2016:

In thousands

2017	\$	504
2018		718
2019		718
2020		507
2021		380
Thereafter		222
Total.....	\$	<u>3,049</u>

Interest expense related to capital leases was immaterial in 2016 and 2015. There was no interest expense associated with capital leases in 2014. See Note 8, *Property, Plant and Equipment, Net*, for additional information regarding our capital leases.

Other Matters

Pension Freeze

Effective December 31, 2015, the Company's qualified pension plan was frozen with respect to future benefit accruals. Under USG Cost Accounting Standard ("CAS") 413 the Company must determine the USG's share of any pension curtailment adjustment calculated in accordance with CAS. Such adjustments can result in an amount due to the USG for pension plans that are in a surplus position or an amount due to the contractor for plans that are in a deficit position. During the fourth quarter of 2016, the Company accrued a \$0.3 million liability representing our estimate of the amount due to the USG based on our pension curtailment adjustment calculation, which was submitted to the USG for review in December. Through the date of this filing there has been no response from the USG on this matter. There can be no assurance that the ultimate resolution of this matter will not have a material adverse effect on the Company's results of operations, financial position and cash flows.

AH-1Z Program

In February 2016, the Company reached an agreement with our customer that modified the scope of the AH-1Z contract and which, among other things, resolved outstanding claims associated with this program. The Company agreed to pay its customer \$4.0 million, all of which was accrued at the end of 2015 and paid in 2016, and the customer agreed to pay the Company \$4.3 million which was received in the third quarter of 2016. Given the current volume of firm orders, the Company estimates the contract to be a zero margin program, taking into consideration the \$1.4 million of G&A costs capitalized in inventory associated with this contract. As of December 31, 2016 and 2015, our backlog for this program was \$45.4 million and \$10.2 million, respectively.

Aerospace Claim Matter

On June 29, 2016, the Company received notification from a customer of their intent to file a claim for recovery of costs and expenses related to rework on certain aerostructures components previously delivered by the Company to the customer. The notification did not indicate the extent of the rework undertaken by the customer, the cost or expenses incurred by the customer, or the time frame in which the customer anticipated filing its formal claim. Based on initial discussions with the customer, the Company believes the customer is seeking recovery of \$12.4 million representing the cost of rework associated with these components and related costs incurred by the customer. The Company is currently discussing this matter with its customer in order to reach a mutually acceptable resolution and estimates the cost to rework the aerostructure components delivered to the customer over the time period in question is approximately \$0.2 million. Based on this analysis, the Company has accrued \$0.2 million, the estimated cost to rework the aerostructure components, as of December 31, 2016.

16. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Other Matters - continued

New Hartford

In connection with sale of the Company's Music segment in 2007, the Company assumed responsibility for meeting certain requirements of the Transfer Act that applied to our transfer of the New Hartford, Connecticut, facility leased by that segment for guitar manufacturing purposes ("Ovation"). Under the Transfer Act, those responsibilities essentially consist of assessing the site's environmental conditions and remediating environmental impairments, if any, caused by Ovation's operations prior to the sale. The site is a multi-tenant industrial park, in which Ovation and other unrelated entities lease space. The environmental assessment, which began in 2008, has been completed and site remediation is in process.

The Company's estimate of its portion of the cost to assess the environmental conditions and remediate this site is \$2.3 million, all of which has been accrued. The total amount paid to date in connection with these environmental remediation activities is \$1.6 million. A portion (\$0.1 million) of the accrual related to this property is included in other accruals and payables and the balance is included in other long-term liabilities. The remaining balance of the accrual reflects the total anticipated cost of completing these environmental remediation activities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

Bloomfield

In connection with the Company's 2008 purchase of the portion of the Bloomfield campus that Kaman Aerospace Corporation had leased from NAVAIR, the Company assumed responsibility for environmental remediation at the facility as may be required under the Transfer Act and continues the effort to define the scope of the remediation that will be required by the Connecticut Department of Environmental Protection ("CTDEP"). The assumed environmental liability of \$10.3 million was determined by taking the undiscounted estimated remediation liability of \$20.8 million and discounting it at a rate of 8%. This remediation process will take many years to complete. The total amount paid to date in connection with these environmental remediation activities is \$11.9 million. At December 31, 2016, the Company had \$3.1 million accrued for these environmental remediation activities. A portion (\$1.0 million) of the accrual related to this property is included in other accruals and payables, and the balance is included in other long-term liabilities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

Rimpar

In connection with the Company's purchase of GRW, the Company assumed responsibility for the environmental remediation at the Rimpar, Germany facility. As part of the purchase price allocation, the Company initially accrued approximately \$4.2 million during the year ended December 31, 2015. In 2016, the Company completed a Phase II assessment in order to better understand the extent of the environmental effort necessary to remediate the facility. Based on this assessment, the Company adjusted the accrual to \$0.5 million, as results of the assessment indicate a lower level of remediation effort will be required. The total amount paid to date in connection with these environmental remediation activities is \$0.1 million. A portion (\$0.1 million) of the accrual related to this property is included in other accruals and payables and the balance is included in long-term liabilities.

17. COMPUTATION OF EARNINGS PER SHARE

The computation of basic earnings per share is based on net earnings divided by the weighted average number of shares of common stock outstanding for each year. The computation of diluted earnings per share includes the common stock equivalency of dilutive options granted to employees under the Company's stock incentive plan and shares issuable on redemption of its Convertible Notes.

	For the Year Ended December 31,

Loss per share from disposal of discontinued operations.....	—	—	(0.18)
Diluted earnings per share.....	<u>\$ 2.10</u>	<u>\$ 2.17</u>	<u>\$ 2.08</u>

Equity awards

Excluded from the diluted earnings per share calculation for the years ended December 31, 2016, 2015 and 2014, respectively, are 472,328, 487,071 and 342,994 shares associated with equity awards granted to employees that are anti-dilutive based on the average stock price.

Convertible Notes

For the years ended December 31, 2016, 2015 and 2014, shares issuable under the Convertible Notes that were dilutive during the period were included in the calculation of earnings per share as the conversion price for the Convertible Notes was less than the average share price of the Company's stock.

Warrants

Excluded from the diluted earnings per share calculation for the years ended December 31, 2016, 2015 and 2014, respectively were 3,383,826, 3,422,477, and 3,411,539 shares, issuable under the warrants sold in connection with the Company's Convertible Note offering as they would be anti-dilutive. For further information on the Convertible Notes, see *Note II, Debt*.

18. SHARE-BASED ARRANGEMENTS

General

The Company accounts for stock options, restricted stock awards, restricted stock units and performance shares as equity awards and measures the cost of all share-based payments, including stock options, at fair value on the grant date and recognizes this cost in the statement of operations. The Company also has an employee stock purchase plan which is accounted for as a liability award.

Compensation expense for stock options, restricted stock awards and restricted stock units is recognized on a straight-line basis over the vesting period of the awards. Share-based compensation expense recorded for the years ended December 31, 2016, 2015 and 2014 was \$5.7 million, \$6.4 million and \$5.4 million, respectively.

Stock Incentive Plan

On April 17, 2013, the shareholders of the Company approved the 2013 Management Incentive Plan (the "2013 Plan"), which replaced the 2003 Stock Incentive Plan. The 2013 Plan provides the Company with the ability to use equity-based awards of up to 2,250,000 authorized shares and is designed as a flexible share authorization plan, such that the Company's share authorization is based on the least costly type of award (stock options). Shares issued pursuant to "Full Value Awards" as defined in the 2013 Plan (awards other than stock options or stock appreciation rights which are settled by the issuance of shares, e.g., restricted stock, restricted stock units, performance shares, performance units if settled with stock, or other stock-based awards) count against the 2013 Plan's share authorization at a rate of 3 to 1, while shares issued upon exercise of stock options or stock appreciation rights count against the share authorization at a rate of 1 to 1. This means that every time an option is granted, the authorized pool of shares is reduced by one (1) share and every time a Full Value Award is granted, the authorized pool of shares is reduced by 3 shares. In deriving the valuation ratio used in the 2013 Plan, the Company used the Black Scholes Fair Value model as the basis for determining the approximate value of an option as compared to a "full value share." As of December 31, 2016, there were 867,569 shares available for grant under the plan.

LTIP awards provide certain senior executives an opportunity to receive award payments in either stock or cash as determined by the Personnel and Compensation Committee of the Board of Directors in accordance with the Plan, at the end of each performance cycle. For the performance cycle, the Company's financial results are compared to the Russell 2000 indices for the same periods based upon the following: (a) average return on total capital, (b) earnings per share growth and (c) total return to shareholders. No awards will be payable if the Company's performance is in the bottom quartile of the designated indices. The maximum award is payable if performance reaches the 75th percentile of the designated indices. Awards are paid out at 100% at the 50th percentile. Awards for performance between the 25th and 75th percentiles are determined by straight-line interpolation between 0% and 200%. Generally, LTIP awards are paid in cash.

Stock options are granted with an exercise price equal to the average market price of our stock at the date of grant. Stock options and Stock Appreciation Rights ("SARs") granted under the plan generally expire ten years from the date of grant and vest 20% each year over a 5-year period on each of the first five anniversaries of the date of grant. Restricted Stock Awards ("RSAs") are generally granted with restrictions that lapse at the rate of 20% per year over a 5-year period on each of the first five anniversaries of the date of grant. Generally, these awards are subject to forfeiture if a recipient separates from service with the Company.

During the first quarter of 2016, the Company issued additional stock awards with market and performance based conditions, bringing the total of these shares to 8,979, assuming a 100% achievement level. The Company measures the cost of these awards based on their grant date fair value to the extent of the probable number of shares to be earned upon vesting. Amortization of this cost will be recorded on a straight-line basis over the requisite service period. Throughout the course of the requisite service period, the Company will monitor the level of achievement compared to the target and adjust the number of shares expected to be earned, and the related compensation expense recorded thereafter, to reflect the updated most probable outcome. Compensation expense for these awards for the years ended December 31, 2016 and 2015 was not material.

18. SHARE-BASED ARRANGEMENTS (CONTINUED)

Stock Incentive Plan - continued

Stock option activity is as follows:

	Options	Weighted average- exercise price
Options outstanding at December 31, 2015	1,040,036	\$ 33.22
Granted	230,197	42.86
Exercised.....	(272,411)	30.04
Forfeited or expired	(39,143)	39.32
Options outstanding at December 31, 2016.....	<u>958,679</u>	<u>\$ 36.18</u>

The following table presents information regarding options outstanding as of December 31, 2016:

Weighted-average remaining contractual term - options outstanding (years)	6.2
Aggregate intrinsic value - options outstanding (in thousands).....	\$ 12,219
Weighted-average exercise price - options outstanding.....	\$ 36.18
Options exercisable.....	425,307
Weighted-average remaining contractual term - options exercisable (years).....	4.2
Aggregate intrinsic value - options exercisable (in thousands).....	\$ 7,587
Weighted-average exercise price - options exercisable.....	\$ 31.09

The intrinsic value represents the amount by which the market price of the stock on the measurement date exceeds the exercise price of the option. The intrinsic value of options exercised in 2016, 2015 and 2014 was \$3.9 million, \$1.0 million and \$2.9 million, respectively. The Company currently has an open stock repurchase plan, which would enable the Company to repurchase shares as needed. Since 2008 the Company has generally issued shares related to option exercises and RSAs from its authorized but unissued common stock.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option valuation model. The following table indicates the weighted-average assumptions used in estimating fair value:

	2016	2015	2014
Expected option term (years)	5.2	5.1	5.1
Expected volatility.....	26.0%	29.0%	37.5%
Risk-free interest rate	1.2%	1.6%	1.5%
Expected dividend yield.....	1.8%	1.6%	1.7%
Per share fair value of options granted.....	\$ 8.63	\$ 9.28	\$ 11.60

The expected term of options granted represents the period of time option grants are expected to be outstanding based upon historical exercise patterns. Forfeitures of options are estimated based upon historical data and are adjusted based upon actual occurrences. The cumulative effect of stock award forfeitures was immaterial. The volatility assumption is based on the historical daily price data of the Company's stock over a period equivalent to the weighted-average expected term of the options. Management evaluated whether there were factors during that period that were unusual and would distort the volatility figure if used to estimate future volatility and concluded that there were no such factors. The Company relies only on historical volatility since future volatility is expected to be consistent with historical volatility.

The risk-free interest rate assumption is based upon the interpolation of various U.S. Treasury rates determined at the date of option grant. Expected dividends are based upon a historical analysis of our dividend yield over the past year.

18. SHARE-BASED ARRANGEMENTS (CONTINUED)

Stock Incentive Plan - continued

Restricted Stock Award and Restricted Stock Unit activity is as follows:

	Restricted Stock Awards	Weighted-average grant date fair value
Restricted Stock outstanding at December 31, 2015	183,543	\$ 37.80
Granted	82,519	42.73
Vested.....	(87,424)	37.94
Forfeited or expired	(10,964)	39.71
Restricted Stock outstanding at December 31, 2016	<u>167,674</u>	<u>\$ 40.27</u>

The grant date fair value for restricted stock is the average market price of the unrestricted shares on the date of grant. The total fair value of restricted stock awards vested during 2016, 2015 and 2014 was \$4.3 million, \$3.8 million and \$4.5 million, respectively.

We record a tax benefit and associated deferred tax asset for compensation expense recognized on non-qualified stock options and restricted stock for which we are allowed a tax deduction. For 2016, 2015 and 2014, respectively, we recorded a tax benefit of \$2.0 million, \$2.2 million and \$1.9 million for these two types of compensation expense.

The windfall tax benefit is the tax benefit realized on the exercise of non-qualified stock options and disqualifying dispositions of stock acquired by exercise of incentive stock options and Employee Stock Purchase Plan stock purchases in excess of the deferred tax asset originally recorded. During the fourth quarter of 2016, the Company early adopted ASU 2016-09, "Compensation - Stock Compensation (Topic 718) - Improvements to Employee Share-Based Payment Accounting". Prior to the adoption of this standard update, windfall tax benefits were recorded in equity. With the adoption of this standard update, all of the tax effects related to share-based payments at settlement or expiration now flow through the income statement. Accordingly, there was no windfall tax benefit realized in 2016. The total windfall tax benefit realized in 2015 and 2014 was \$0.3 million and \$0.8 million, respectively.

As of December 31, 2016, future compensation costs related to non-vested stock options and restricted stock grants is \$7.4 million. The Company anticipates that this cost will be recognized over a weighted-average period of 2.9 years.

Employees Stock Purchase Plan

The Kaman Corporation Employees Stock Purchase Plan ("ESPP") allows employees to purchase common stock of the Company, through payroll deductions, at 85% of the market value of shares at the time of purchase. The plan provides for the grant of rights to employees to purchase a maximum of 1,500,000 shares of common stock.

During 2016, 74,273 shares were issued to employees at prices ranging from \$32.95 to \$42.40. During 2015, 79,294 shares were issued to employees at prices ranging from \$31.64 to \$36.46. During 2014, 76,805 shares were issued to employees at prices ranging from \$32.48 to \$36.42. At December 31, 2016, there were 235,065 shares available for purchase under the plan.

19. SEGMENT AND GEOGRAPHIC INFORMATION

The Company is organized based upon the nature of its products and services, and is composed of two operating segments each overseen by a segment manager. These segments are reflective of how the Company's Chief Executive Officer, who is its Chief Operating Decision Maker ("CODM"), reviews operating results for the purposes of allocating resources and assessing performance. The Company has not aggregated operating segments for purposes of identifying reportable segments.

The Distribution segment is a leading power transmission, motion control, and fluid power industrial distributor with operations throughout the United States. Distribution conducts business in the mechanical power transmission and bearings, electrical, automation and control, and fluid power product platforms and provides total solutions from system design and integration to machine parts and value-added services to the national manufacturing industry.

19. SEGMENT AND GEOGRAPHIC INFORMATION (CONTINUED)

The Aerospace segment produces and markets proprietary aircraft bearings and components; super precision, miniature ball bearings; complex metallic and composite aerostructures for commercial, military and general aviation fixed and rotary wing aircraft; and safe and arming solutions for missile and bomb systems for the U.S. and allied militaries. The segment also markets the design and supply of aftermarket parts to businesses performing MRO in aerospace markets; performs helicopter subcontract work; restores, modifies and supports the Company's SH-2G Super Seasprite maritime helicopters; manufactures and supports the Company's K-MAX® manned and unmanned medium-to-heavy lift helicopters; and provides engineering design, analysis and certification services.

Summarized financial information by business segment is as follows:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
Net sales from continuing operations:			
Distribution	\$ 1,106,322	\$ 1,177,539	\$ 1,161,992
Aerospace ^(a)	702,054	597,586	632,970
Net sales	<u>\$ 1,808,376</u>	<u>\$ 1,775,125</u>	<u>\$ 1,794,962</u>
Operating income:			
Distribution	\$ 41,859	\$ 49,441	\$ 56,765
Aerospace	115,005	110,328	108,697

Corporate expense	(50,930)	(55,578)	(54,722)
Operating income from continuing operations	<u>105,923</u>	<u>104,519</u>	<u>110,507</u>
Interest expense, net	15,747	13,144	13,382
Other expense, net	472	3,386	623
Earnings before income taxes from continuing operations	<u>89,704</u>	<u>87,989</u>	<u>96,502</u>
Income tax expense	30,850	27,551	30,722
Earnings from continuing operations	<u>\$ 58,854</u>	<u>\$ 60,438</u>	<u>\$ 65,780</u>

^(a) Net sales by the Aerospace segment under contracts with USG agencies (including sales to foreign governments through foreign military sales contracts with USG agencies) totaled \$244.4 million, \$211.4 million and \$271.7 million in 2016, 2015 and 2014, respectively, and represent direct and indirect sales to the USG and related agencies.

19. SEGMENT AND GEOGRAPHIC INFORMATION (CONTINUED)

<i>In thousands</i>	At December 31,		
	2016	2015	2014
Identifiable assets ^(a) :			
Distribution	\$ 540,900	\$ 558,630	\$ 547,350
Aerospace	720,823	738,426	531,868
Corporate ^(b)	164,563	142,555	120,063
Total assets	<u>\$ 1,426,286</u>	<u>\$ 1,439,611</u>	<u>\$ 1,199,281</u>
Capital expenditures:			
Distribution	\$ 9,016	\$ 10,685	\$ 12,205
Aerospace	17,935	13,378	12,044
Corporate	2,826	5,869	4,034
Total capital expenditures	<u>\$ 29,777</u>	<u>\$ 29,932</u>	<u>\$ 28,283</u>
Depreciation and amortization:			
Distribution	\$ 16,107	\$ 16,368	\$ 14,461
Aerospace	23,584	16,275	16,039
Corporate	5,238	5,086	5,709
Total depreciation and amortization	<u>\$ 44,929</u>	<u>\$ 37,729</u>	<u>\$ 36,209</u>

^(a) Identifiable assets are year-end assets at their respective net carrying values segregated as to segment and corporate use.

^(b) For the periods presented, the corporate identifiable assets are principally comprised of cash, short-term and long-term deferred income tax assets, cash surrender value of life insurance policies and fixed assets.

The following table summarizes total sales of the Company, which are principally derived from the sale of products:

<i>in thousands</i>	For the year ended December 31,		
	2016	2015	2014
Bearings and Power Transmission ^(a)	\$ 548,736	\$ 594,511	\$ 630,557
Automation, Control and Energy	337,428	354,771	300,861

Military and Defense, other than fuzes	205,812	242,112	265,096
Missile and Bomb Fuzes ^(b)	164,187	120,755	126,436
Commercial Aerospace and Other	332,055	234,719	241,438
Total sales ^(c)	<u>\$ 1,808,376</u>	<u>\$ 1,775,125</u>	<u>\$ 1,794,962</u>

(a) Aerospace bearings are not included in this caption, as they are reported in either the "Military and Defense" or "Commercial Aerospace and Other" categories.

(b) Sales of missile and bomb fuzes are to the USG and Foreign Militaries and were previously included in the Military and Defense line item.

(c) Service revenue was not material for the years ended December 31, 2016, 2015 and 2014.

19. SEGMENT AND GEOGRAPHIC INFORMATION (CONTINUED)

Sales are attributed to geographic regions based on the location to which the product is shipped. Geographic distribution of sales recorded by continuing operations is as follows:

	For the year ended December 31,		
	2016	2015	2014
<i>In thousands</i>			
North America.....	\$ 1,514,595	\$ 1,518,416	\$ 1,576,041
Europe	168,456	112,057	117,686
Middle East	61,409	65,740	4,378
Asia.....	46,805	33,020	29,115
Oceania.....	13,385	37,959	65,122
Other.....	3,726	7,933	2,620
Total.....	<u>\$ 1,808,376</u>	<u>\$ 1,775,125</u>	<u>\$ 1,794,962</u>

Geographic distribution of long-lived assets is as follows:

	At December 31,	
	2016	2015
<i>In thousands</i>		
United States	\$ 465,906	\$ 466,626
Germany	151,336	168,182
United Kingdom.....	44,702	55,627
Czech Republic	4,766	4,389
Mexico.....	1,650	1,937
Total.....	<u>\$ 668,360</u>	<u>\$ 696,761</u>

The decreases in long-lived assets in Germany and the United Kingdom are primarily related to changes in foreign currency rates. For the purpose of this disclosure the Company excluded deferred tax assets of \$59.4 million and \$66.8 million as of December 31, 2016 and 2015, respectively.

20. SUBSEQUENT EVENTS

The Company has evaluated subsequent events through the issuance date of these financial statements. No material subsequent events were identified that require disclosure.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company has carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that, as of December 31, 2016, the Company's disclosure controls and procedures were effective.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Management has assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2016.

In making its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2016, management utilized the criteria set forth by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission in Internal Control—Integrated Framework (2013). Management concluded that based on its assessment the Company's internal control over financial reporting was effective as of December 31, 2016. The effectiveness of internal control over financial reporting as of December 31, 2016, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which is included in Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control Over Financial Reporting

Management of the Company has evaluated, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, changes in the Company's internal controls over financial reporting during 2016.

During the fourth quarter ended December 31, 2016, management made no changes to internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations of Controls

The Company's evaluation described in this Item was undertaken acknowledging that there are inherent limitations to the effectiveness of any system of controls, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective controls can only provide reasonable assurance of achieving their control objectives.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Other than the list of executive officers of the Company set forth in Item 1, Executive Officers of the Registrant, all information under this caption may be found in the Company's proxy statement to be delivered to stockholders in connection with the Annual Meeting of Shareholders, which is scheduled for April 19, 2017, (the "Proxy Statement") in the following sections: "Class 3 Director Nominees for Election at the 2017 Annual Meeting," "Continuing Directors," "Section 16(a) Beneficial Ownership Reporting Compliance," "Director Nominees," and "Audit Committee." Those portions of the Proxy Statement are incorporated by reference into this Item 10.

ITEM 11. EXECUTIVE COMPENSATION

Information about the compensation of Kaman's named executive officers appears under the captions "Compensation Discussion and Analysis" and "Summary Compensation Table" in the Proxy Statement. Information about the compensation of Kaman's directors appears under "Non-Employee Director Compensation" in the Proxy Statement. Those portions of the Proxy Statement are incorporated by reference into this Item 11.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information about security ownership of certain beneficial owners and management appears under "Security Ownership of Certain Beneficial Owners and Management" in the Proxy Statement. That portion of the Proxy Statement is incorporated by reference into this Item 12.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The following table provides information as of December 31, 2016, concerning Common Stock issuable under the Company's equity compensation plans.

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted- average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders:			
2003 Stock Incentive Plan	413,311	\$ 30.12	—
2013 Management Incentive Plan	545,368	40.78	867,569
Employees Stock Purchase Plan	—	—	235,065
Equity compensation plans not approved by security holders	—	—	—
Total	958,679	\$ 36.18	1,102,634

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information about certain relationships and related transactions appears under "Transactions With Related Persons" and "Board and Committee Independence Requirements" in the Proxy Statement. Those portions of the Proxy Statement are incorporated by reference into this Item 13.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information regarding audit fees and all other fees, in addition to the Audit Committee's pre-approval policies and procedures appears under "Principal Accounting Fees and Services" in the Proxy Statement. That portion of the Proxy Statement is incorporated by reference into this Item 14.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a)(1) FINANCIAL STATEMENTS.

See Item 8 of this Form 10-K setting forth our Consolidated Financial Statements.

(a)(2) FINANCIAL STATEMENT SCHEDULES.

An index to the financial statement schedule immediately precedes such schedule.

(a)(3) EXHIBITS.

An index to the exhibits filed or incorporated by reference immediately precedes such exhibits.

ITEM 16. FORM 10-K SUMMARY

None.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this Form 10-K to be signed on its behalf by the undersigned, thereunto duly authorized, in the Town of Bloomfield, State of Connecticut, on this 28th day of February 2017.

Report of Independent Registered Public Accounting Firm

Financial Statement Schedule:

Schedule II - Valuation and Qualifying Accounts

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON FINANCIAL STATEMENT SCHEDULE

To the Board of Directors
of Kaman Corporation:

Our audits of the consolidated financial statements and of the effectiveness of internal control over financial reporting referred to in our report dated February 28, 2017 included under Item 8 in this Annual Report on Form 10-K also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.
