**TSX-V: CWC**

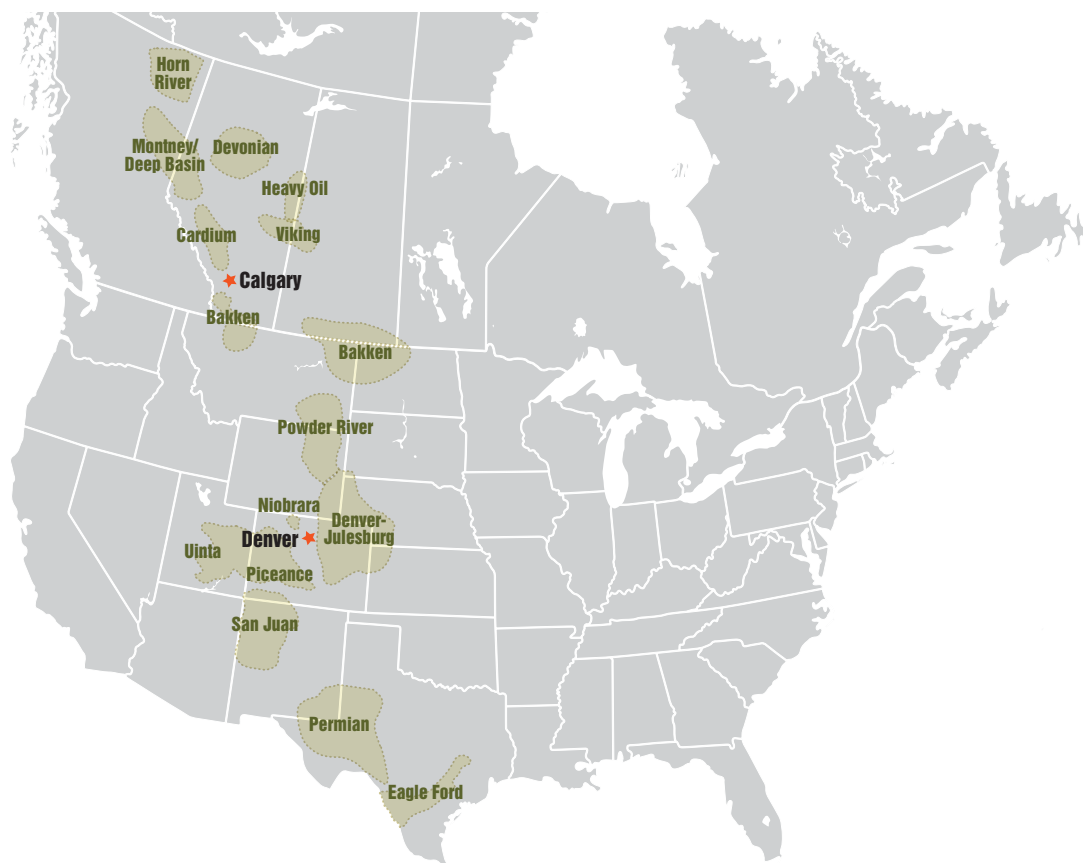

CWC Energy Services Corp. provides drilling rigs and service rigs to established oil and gas producers in Canada and the United States. These oilfield service activities are necessary to complete newly drilled wells and to maintain ongoing servicing of producing wells. CWC’s services are provided through 2 divisions: Contract Drilling and Production Services.

## Divisions

### Contract Drilling

The Contract Drilling division operates under the trade name CWC Ironhand Drilling and is comprised of 13 electric triple drilling rigs with depth ratings from 3,600 to 7,600 metres and 9 telescopic double drilling rigs with depth ratings from 3,200 to 5,000 metres. All 22 drilling rigs have top drives, 17 have walking systems, 9 have 7,500 psi pumping systems, 3 have carbon reduction bi-fuel capabilities, and 2 have high line power capabilities. All of the drilling rigs are ideally suited for the most active depths for horizontal drilling in the Western Canadian Sedimentary Basin (“WCSB”), including the Montney, Cardium, Duvernay and other deep basin horizons, and select United States basins including the Permian, Eagle Ford, Niobrara, Denver-Julesburg (“DJ”), Powder River, and Bakken. With operational bases in Nisku, Alberta and Casper, Wyoming, CWC Ironhand Drilling is ideally positioned for the deeper depths of the Canadian and U.S. basins.

### Production Services

The Production Services division operates under the trade name CWC Well Services. With 140 service rigs, CWC is one of the largest well servicing companies in Canada as measured by active fleet and operating hours, offering the most technologically advanced service rig fleet in the WCSB. These service rigs provide completions, maintenance, workovers and well decommissioning with depths ranging from 1,500 to 5,000 metres and are well positioned throughout the WCSB with operating locations in Grande Prairie, Slave Lake, Sylvan Lake, Drayton Valley, Lloydminster, Provost and Brooks, Alberta.

## **President's Message**

### **Dear Fellow Shareholders,**

I am very excited to share with you CWC Energy Services Corp.'s ("CWC" or the "Company") 2022 Annual Report. 2022 was a record-breaking year in CWC's 18 year history. The Company took advantage of the downturn in 2020 and the recovery in 2021 to become extremely efficient and lean in its cost structure that resulted in a strong balance sheet. The Company used this strong balance sheet to purchase 10 triple drilling rigs in November 2021 and 3 triple drilling rigs in June 2022 at \$0.08 and \$0.17 on the \$1.00 respectively, compared to the replacement cost to build new. These acquisition metrics have proven to be highly accretive for the benefit of our shareholders. The purchase of these 13 triple drilling rigs geographically diversifies our operations to the United States and increases our total drilling rig fleet in Canada and the U.S. by 144% from 9 to 22 drilling rigs. For 2023, CWC expects the approximate revenue and Adjusted EBITDA contribution from Contract Drilling in Canada to be 18%, Contract Drilling in the U.S. to be 38% and from Production Services in Canada to be 45%, thereby providing CWC shareholders with a more resilient, balanced and stronger Company.

### **Highlights of 2022**

2022 started the year with West Texas Intermediate ("WTI") crude oil prices at US\$75/bbl and rising to US\$123/bbl by early June 2022, primarily as a result of Russia's invasion of Ukraine and the economic sanctions put on Russia by democratic countries around the world, before its steady decline to end the year at US\$80/bbl. The higher crude oil and natural gas prices, government's concern over energy security, and rising inflation and interest rates, translated into a stellar year for North American oilfield services activity throughout 2022 and, by extension, increased business and record-breaking financial results for CWC. In 2022, CWC increased revenue to \$205.3 million (a \$102.7 million increase or 100% from 2021) and increased Adjusted EBITDA to \$45.9 million (a \$27.1 million increase or 143% from 2021) resulting in net income of \$41.7 million (a \$37.1 million increase or 811% from 2021).

As CWC proved out the highly accretive nature of the 10 triple drilling rig acquisition made in November 2021 and under the backdrop of many countries and governments prioritizing energy security, CWC's Board of Directors announced on June 24, 2022 the acquisition of an additional 3 high-spec triple drilling rigs for US\$7.4 million (approximately \$9.6 million) using our existing credit facilities from our banking syndicate. Along with this acquisition, CWC's Board of Directors approved an \$8.3 million increase to the capital expenditure budget to complete upgrades and Level IV recertifications on these 3 drilling rigs. For a total investment of \$17.9 million, CWC acquired these 3 triple drilling rigs at a very attractive price, estimating the replacement cost of these drilling rigs and related equipment and inventory to be \$103 million resulting in the total investment being 17.4% of replacement cost. The cash flow expected to be generated from these 3 triple drilling rigs in 2023 and future years is expected to be highly accretive for CWC's shareholders.

On July 29, 2022 our banking syndicate agreed to CWC's exercise of its accordion feature to expand the credit facilities from \$70 million to \$80 million to accommodate the acquisition of the 3 triple drilling rigs and to extend the maturity of the credit facilities to July 31, 2025. Such support from our debtholders allows CWC to focus on its business operations and strategic growth initiatives to create long-term shareholder value.

On November 16, 2022, the Company reinstated its Normal Course Issuer Bid ("NCIB") with an Automatic Securities Purchase Plan ("ASPP") with Raymond James Ltd. During 2022, CWC purchased 210,000 common shares under the NCIB which were cancelled and returned to treasury. These common shares represented

0.6% of the 34,170,116 shares traded on the TSX Venture Exchange in 2022, as the Company added value for its remaining shareholders by reducing the number of common shares outstanding and providing liquidity for those shareholders looking to sell their shares.

On June 23, 2022, CWC made history drilling Alberta's first two lithium brine evaluation wells for our customer. In the last 2 years, CWC has worked on lithium brine, carbon capture, helium and salt water disposal wells. These projects show the diversity and versatility of our equipment as we transition to a new energy environment.

Also in June 2022, CWC released its second annual Environmental, Social and Governance ("ESG") Report using the framework established by the Sustainability Accounting Standards Board ("SASB") for Oil and Gas Services. This 2022 ESG Report covers performance metrics for 2018 to 2021. CWC's commitment to ESG and sustainability has shown improvement over the last four years and the Company is proud to be the first Canadian contract drilling and well servicing company to report our Scope 1 and 2 emissions as outlined in this report. Management will continue to work towards advancing these efforts further in future years, especially in the area of emission reductions and establishing goals and targets. One of the initial steps CWC has taken towards meeting its ESG targets has been to convert some of our drilling rig field equipment to have carbon reduction bi-fuel and high-line power capabilities and one of our service rigs to a Tier 4 engine. Management is confident that CWC will continue to be regarded as a leader on ESG and sustainability matters in the oilfield services industry as the nature of the work for our equipment evolves.

### **Outlook For 2023**

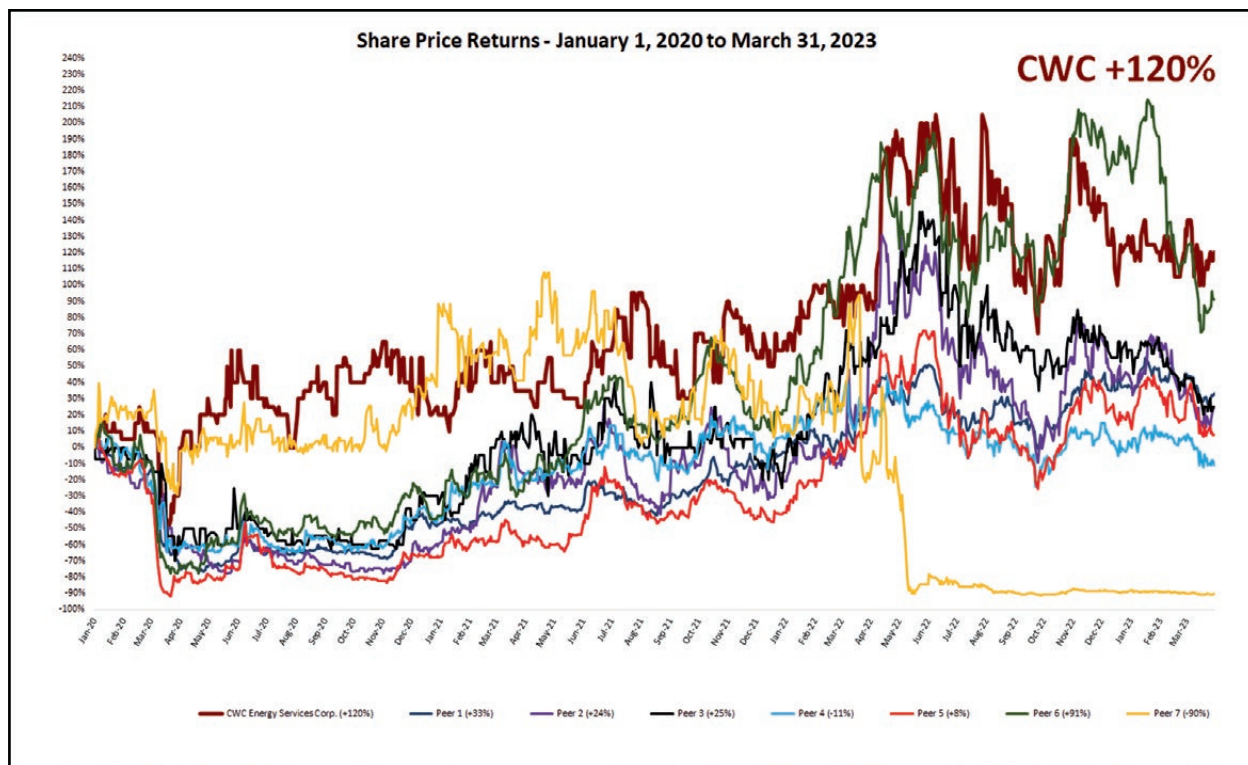

As strong as the activity level and pricing was in 2022, the expectation for 2023 is even higher. On November 23, 2022, the CAOEC forecasted 70,495 operating days for Canadian drilling rigs in 2023, an increase of 20% compared to 2022. While inflation, interest rate increases by central banks and a potential global recession continue to be a concern for the price of crude oil and natural gas, North American oilfield services activity and pricing has not shown any signs of a significant pullback to date. The discipline among our North American E&P customers to return free cash flow in the form of dividends and share buybacks to their shareholders remains strong and will keep the potential of any oversupply of crude oil or natural gas in check. This should result in a steady stream of North American oilfield services activity throughout 2023 and beyond.

For CWC, Q1 2023 has started off strong. Activity levels in both Canada and the U.S. are as high as last year's comparable quarter, while pricing continues to increase compared to the prior quarter for both drilling rigs and service rigs. The day and hourly rates for both the drilling rigs and service rigs are now at record levels in CWC's 19 year history buoyed by inflation for both labour and supplies. The biggest challenge for CWC and the industry will be to attract more field labour or rig crews to accommodate any further increases in activity levels, if required by our E&P customers. CWC has been successful in its recruiting efforts hitting a high of 720 employees in 2022, an increase of 17% more employees than our pre-COVID-19 levels in January 2020.

Should CWC continue on its current path, 2023 will be another record-breaking year for revenue and Adjusted EBITDA in the Company's 19 year history.

### **Shareholder Returns**

From a shareholder return perspective, I am very pleased to report that CWC is the best performing public Canadian contract drilling and well servicing company with a share price appreciation of 120% of what it was prior to the COVID-19 induced downturn as the graph of Share Price Returns from January 1, 2020 to March 31, 2023 on the following page indicates:

The recent pullback in share price to the \$0.22 per share level is an extremely attractive entry point as the forecasted 2023 free cash flow of \$20 million would result in a free cash flow yield of 20%. Should CWC achieve these forecasted financial results in 2023, there would be the potential by our Board of Directors to make decisions related to shareholder friendly outcomes in the form of dividends and share buybacks barring any other potential use of the free cash flow, such as mergers and acquisitions, that could be more attractive and accretive to CWC's shareholders.

## Conclusion

In closing, I would like to express my sincere thanks to CWC's employees for their truly hard work and dedication for the outstanding results in 2022 and making CWC the best performing contract drilling and well servicing company in Canada and the U.S. To our customers, we cherish your ongoing business and relationship and thank you for sharing your good cash flow fortunes in 2022 and 2023 with our drilling and service rig pricing increases, which will help create a healthy and sustainable energy industry for all stakeholders. To my Board of Directors, thank you for your support, wisdom, guidance and belief in this management team, who continue to push forward and give their best every day. And to all my fellow shareholders who continue to believe and support us, discipline, patience, and perseverance has and will continue to reward us in what I believe is the beginning of a multi-year energy uptrend.

Sincerely submitted on behalf of the Board of Directors,

Duncan T. Au  
 President & Chief Executive Officer  
 March 31, 2023

## MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

Management's Discussion and Analysis ("MD&A") is a review of the results of operations and liquidity and capital resources of CWC Energy Services Corp. (unless the context indicates otherwise, a reference in this MD&A to "CWC", the "Company", "we", "us", or "our" means CWC Energy Services Corp.). The following discussion and analysis provided by CWC is dated March 1, 2023 and should be read in conjunction with audited consolidated financial statements for the year ended December 31, 2022. Additional information regarding CWC can be found in the Company's latest Annual Information Form ("AIF"). The consolidated financial statements are prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of financial statements. All amounts are expressed in Canadian dollars unless otherwise noted. Additional information relating to CWC is available on SEDAR at [www.sedar.com](http://www.sedar.com).

<sup>(1)</sup> Please refer to the "Non-GAAP and Other Financial Measures" section for further information.

<sup>(2)</sup> Net income (loss) margin is a Non-GAAP Measure which is calculated as net income (loss) divided by total revenue.

<sup>(3)</sup> Not meaningful.

Working capital (excluding debt) for December 31, 2022, has increased \$17.0 million (90%) since December 31, 2021, driven by increases in accounts receivable (\$19.7 million (75%)) and prepaid expenses and deposits (\$2.3 million (143%)) offset by increases in accounts payable (\$5.0 million (56%)). Long-term debt (including current portion) of \$43.0 million has decreased \$2.9 million (6%) from December 31, 2021, primarily due to the repayment of long-term debt from operating cash flows in 2022.

## Highlights for the Three Months Ended December 31, 2022

- Q4 2022 saw the Company achieve a new milestone for the fourth quarter with Q4 record revenue, Adjusted EBITDA and net income in CWC's eighteen (18) year history.
- Record Q4 2022 revenue of \$60.0 million, an increase of \$26.3 million (78%) compared to \$33.7 million in Q4 2021. Revenue increased \$22.7 million (181%) in Q4 2022 for the Contract Drilling segment and \$3.6 million (17%) for the Production Services segment compared to Q4 2021.
- Record Q4 2022 Adjusted EBITDA<sup>(1)</sup> of \$13.7 million, an increase of \$7.6 million (124%) compared to \$6.1 million in Q4 2021.
- Record Q4 2022 net income of \$26.0 million, an increase of \$23.2 million compared to \$2.9 million in Q4 2021. The increase is primarily due to a \$23.3 million reversal of an impairment charge to assets taken in 2015 and 2020.
- During Q4 2022, 210,000 (Q4 2021: nil) common shares were purchased under the Normal Course Issuer Bid ("NCIB") which were cancelled and returned to treasury.

<sup>(1)</sup> Please refer to the "Non-GAAP and Other Financial Measures" section for further information.

## Highlights for the Year Ended December 31, 2022

- The year ended December 31, 2022 saw the Company achieve a new milestone with record revenue, Adjusted EBITDA<sup>(1)</sup> and net income in CWC's eighteen (18) year history.
- Record revenue for 2022 of \$205.3 million, an increase of \$102.7 million (100%) compared to \$102.6 million in 2021, surpassing the previous annual record revenue of \$144.8 million for the year ended 2018. Revenue increased \$78.9 million (249%) in the Contract Drilling segment and \$23.8 million (34%) in the Production Services segment compared to 2021.
- Record Adjusted EBITDA<sup>(1)</sup> for 2022 of \$45.9 million, an increase of \$27.0 million (143%) compared to \$18.9 million in 2021, surpassing the previous annual record Adjusted EBITDA of \$34.1 million for the year ended 2014.
- Record net income for 2022 of \$41.7 million, an increase of \$37.1 million compared to \$4.6 million in 2021, surpassing the previous annual record net income of \$12.7 million for the year ended 2011.
- On June 24, 2022, purchased three (3) triple drilling rigs and critical spare components for US\$7.4 million (C\$9.6 million).
- On July 29, 2022, the Company exercised the accordion feature to expand the Credit Facility to an \$80.3 million Bank Loan comprised of a \$50.7 million Canadian syndicated facility, a US\$12.0 million (C\$15.6 million) U.S. syndicated facility, a \$7.5 million Canadian operating facility and a US\$5.0 million (C\$6.5 million) U.S. operating facility. The Company further amended the Credit Facility to extend the maturity to July 31, 2025.
- On November 16, 2022, the Company reinstated its NCIB with an Automatic Securities Purchase Plan ("ASPP") with Raymond James Ltd., which expires on November 15, 2023. For the year ended December 31, 2022, the Company purchased 210,000 (2021: 2,249,500) common shares under the NCIB which were cancelled and returned to treasury.
- Drilled Alberta's first lithium brine evaluation well in June 2022, showing the diversity and versatility of our equipment.
- First Canadian drilling and well servicing company to publicly report our Scope 1 and 2 emissions in our 2022 ESG Report in June 2022.

<sup>(1)</sup> Please refer to the "Non-GAAP and Other Financial Measures" section for further information.

## Industry Overview

### Average crude oil and natural gas prices

	Three months ended

Source: GLJ Ltd price forecasts.

Russia's invasion of Ukraine and the western world's response with trade sanctions against Russia, including sanctions on crude oil and natural gas by certain countries, have resulted in significant increases in crude oil and natural gas prices in 2022. In addition, the continued re-opening of the global economy after being significantly slowed down in 2020 and 2021 due to the COVID-19 health pandemic, has resulted in a steady rise in global demand without a significant corresponding increase in global supply for crude oil and natural gas, further justifying the higher prices experienced in 2022. However, significant inflationary increases and rising interest rates have sparked fears of a global recession, which has recently pulled WTI back to a range of US\$70 to US\$80/bbl. Despite recessionary fears, discussion about energy security is at the top of many governmental agendas, which should bode well for North American oil and gas activity and oilfield service companies for the foreseeable future.

## Corporate Overview

---

CWC Energy Services Corp. is a premier contract drilling and well servicing company operating in Canada and the United States with a complementary suite of oilfield services including drilling rigs and service rigs. The Company's corporate office is located in Calgary, Alberta, with operational locations in Nisku, Grande Prairie, Slave Lake, Sylvan Lake, Drayton Valley, Lloydminster, Provost and Brooks, Alberta and U.S. offices in Denver, Colorado and Casper, Wyoming. The Company's shares trade on the TSX Venture Exchange under the symbol "CWC".

The Contract Drilling division operates under the trade name CWC Ironhand Drilling and is comprised of thirteen (13) electric triple drilling rigs with depth ratings from 3,600 to 7,600 metres and nine (9) telescopic double drilling rigs with depth ratings from 3,200 to 5,000 metres. All twenty-two (22) rigs have top drives, seventeen (17) have pad rig moving systems, nine (9) have 7,500 psi pumping systems, three (3) have carbon reduction bi-fuel capabilities, and two (2) have high line power capabilities. All of the drilling rigs are ideally suited for the most active depths for horizontal drilling in the Western Canadian Sedimentary Basin ("WCSB"), including the Montney, Cardium, Duvernay and other deep basin horizons, and select United States basins including the Permian, Eagle Ford, Niobrara, Denver-Julesburg ("DJ"), Powder River and Bakken.

The Production Services division operates under the trade name CWC Well Services. With a fleet of 143 service rigs, CWC is one of Canada's largest well servicing companies as measured by active fleet and operating hours. CWC's service rig fleet consists of 75 single, 54 double and 14 slant rigs providing services which include completions, maintenance, workovers and well decommissioning with depth ratings from 1,500 to 5,000 metres. In 2022, CWC chose to park 79 of its service rigs and focus its sales and operational efforts on the remaining 64 active service rigs due to the reduction in the number of service rigs currently required to service the WCSB and the tight labour market experienced in the industry for service rig crews.

For the year ended December 31, 2022, approximately 88% of revenue (2021: 71%) was from work on crude oil wells, 11% (2021: 27%) was from natural gas wells and 1% was from other wells comprised of carbon capture and lithium brine wells (2021: 2% was from other wells comprised of carbon capture, helium, and salt water disposal wells). Further, approximately 60% of revenue (2021: 36%) was related to drilling and completions work, 29% of revenue (2021: 47%) was from maintenance and workovers on producing wells and 11% of revenue (2021: 17%) was from well decommissioning.

## Outlook

---

The outlook for contract drilling and well servicing in Canada and the U.S. continues to improve as the removal of economic restrictions due to the COVID-19 health pandemic has created an increased demand for crude oil and natural gas without a sufficient corresponding increase in global supply. This supply/demand imbalance, along with Russia's invasion of Ukraine, has resulted in increases in the crude oil and natural gas prices that we saw in 2022. Discussion about energy security is at the top of many governmental agendas, which should bode well for North American oil and gas activity and oilfield service companies for the foreseeable future. Analysts forecast North American drilling activity will continue to rise under a favourable crude oil and natural gas price environment, although at a sustainable and measured pace given the capital discipline instilled upon E&P companies by their debt and equity stakeholders for return of capital through debt reduction, dividends and share buybacks. These sustainable and measured increases in oilfield activity levels should bode well for CWC as E&P customers gradually increase their drilling programs and complete maintenance on existing wells to increase their production.

Barring a severe global recession, some analysts believe that global crude oil prices could continue to move higher to US\$100/bbl<sup>(1)</sup> in 2023 based on the following factors:

- Increased demand for crude oil as a result of the re-opening of China's economy from COVID-19 lockdown;
- OPEC announced in October 2022 a crude oil production cut of 2.0 million bbls/day throughout 2023;
- Sanctions on the purchase of Russian crude oil by European Union ("EU") members and G7 nations, which took effect in December 2022, with EU members capping the purchase price of Russian crude oil at \$60/bbl;

- Russia announced in February 2023 a crude oil production cut of 500,000 bbls/day in response to western nation sanctions; and
- U.S. Strategic Petroleum Reserve (“SPR”) inventory is at one of its lowest levels in four (4) decades as a result of the U.S. approving a release of 180 million bbls over six (6) months that ended in October 2022 as a response to Russia’s invasion of Ukraine and the resultant increase in crude oil prices. The U.S. administration intends to replenish its SPR inventory in 2023 when WTI is at a price of \$72/bbl or lower.

<sup>(1)</sup> Source: Goldman Sachs

CWC believes the increased global demand and decreased global supply should result in an upward movement in crude oil prices, which could translate into increased North American oilfield services activity in 2023.

2022 was a record year for CWC in its eighteen (18) year history. The Company has been successful in recruiting new field employees and crewing both its drilling and service rigs. As at December 31, 2022 the Company employed 665 employees; a higher employee count than its February 2020 pre-COVID-19 employment level of 620 employees. However, the primary constraint for how quickly the industry and CWC can grow continues to be the available labour market for rig crews, which remains extremely tight. This limited availability of rig crews has resulted in inflationary pressure on field labour costs as well as fuel and supplies in 2022, which have been and will continue to be passed on to E&P customers if further price increases arise in 2023.

While CWC expects a continuation of its strong operational and financial results for 2023, various global uncertainties may derail the Company’s expected positive path. Russia’s invasion of Ukraine has elicited a strong global response of sanctions against Russia from many western countries. Such sanctions may have a negative effect on the global economy through supply chain disruptions and volatile commodity prices. In addition, many global economies are experiencing high levels of inflation resulting in central banks increasing interest rates at a rapid pace, which is intended to slow economic growth and the pace of inflation. If interest rates increase too rapidly, or rise to a high enough level whereby economic activity slows significantly resulting in a global recession, CWC may be negatively impacted.

In June 2022, CWC released its 2022 Environmental, Social and Governance (“ESG”) Report. Since the release of its inaugural report in 2021, the Company has made numerous strides in its ESG journey, including as a leader in the Canadian drilling and well services sector by publicly reporting its Scope 1 and 2 emissions. CWC is committed to further advancing these efforts in future years as the Company works with its customers on emission reductions and setting targets to reduce its collective environmental impact. One of the initial steps CWC has taken towards meeting its ESG targets has been to convert some field equipment to have carbon reduction bi-fuel capabilities and converting a service rig to a Tier 4 engine. As the Company moves into 2023, CWC is deepening its commitment to ESG excellence and to sharing these initiatives and progress with its stakeholders. In 2022, CWC was honoured to have worked with a customer on drilling Alberta’s first lithium brine evaluation well. CWC is proud of the versatility of its equipment which is not limited to working strictly in the oil and gas fields. CWC has worked on carbon capture, helium, potash and saltwater disposal wells in the past, thereby reflecting the diversity and versatility of the nature of work for its drilling rigs. Management is confident that CWC will continue to be regarded as a leader in ESG and sustainability matters in the oilfield services industry as the nature of the work for CWC’s equipment evolves.

## Results of Operations

	55%	56%	n/a	(1%)	47%	38%	n/a	9%

(1) Please refer to the “Non-GAAP and Other Financial Measures” section for further information.

(2) Revenue per operating day is calculated based on operating days (i.e. spud to rig release basis). New or inactive drilling rigs are added based on the first day of field service.

(3) Drilling rig utilization is calculated based on operating days (i.e. spud to rig release basis). Drilling rigs requiring their Level IV recertification, refurbishment or have been otherwise removed from service for greater than 90 days are excluded from the utilization calculation until their first day back in field service.

Canadian Contract Drilling revenue of \$12.4 million in Q4 2022, an increase of \$2.7 million (27%) compared to \$9.8 million in Q4 2021, was achieved with a utilization rate of 61% (Q4 2021: 60%), compared to the CAOEC industry average of 38% (Q4 2021: 29%). CWC completed 389 Canadian drilling rig operating days in Q4 2022, an increase of 2 operating days (1%) compared to 387 Canadian drilling rig operating days in Q4 2021 as all seven (7) Canadian drilling rigs were working during the quarter.

Gross margin in the Canadian Contract Drilling segment was \$4.2 million, an increase of \$1.2 million from \$2.9 million in Q4 2021. The gross margin increase is a result of a 27% increase in average revenue per operating day while the increase in direct operating expenses, primarily related to inflationary increases in field labour, fuel and supplies cost, was successfully recovered from customers.

U.S. Contract Drilling revenue of \$22.8 million in Q4 2022, an increase of \$20.0 million (721%) compared to \$2.8 million in Q4 2021, was achieved with 563 U.S. drilling rig operating days (Q4 2021: 79 U.S. drilling rig operating days). During Q4 2022, CWC had eight (8) of twelve (12) marketable drilling rigs working in the U.S.

Gross margin in the U.S. Contract Drilling segment was \$7.0 million, an increase of \$6.3 million compared to \$0.7 million in Q4 2021. The gross margin increase is a result of a 613% increase in U.S. drilling rig operating days.

Total Contract Drilling's gross margin percentage of 32% in Q4 2022 is higher than the 29% gross margin percentage in Q4 2021 as the Company was successful in increasing pricing and recovering inflationary increases for field labour, fuel and supplies cost from customers.

### Production Services – Canada

\$ thousands, except margins, number of rigs, revenue per operating hour, and utilization	Three months ended December 31,				Twelve months ended December 31,			
	2022	2021	Change \$	Change %	2022	2021	Change \$	Change %
<b>Revenue</b>	24,790	21,160	3,630	17%	94,758	70,923	23,835	34%
<b>Direct operating expenses</b>	15,523	13,298	2,225	17%	59,900	48,161	11,739	24%
<b>Gross margin <sup>(1)</sup></b>	9,267	7,862	1,405	18%	34,858	22,762	12,096	53%
<b>Gross margin percentage <sup>(1)</sup></b>	37%	37%	n/a	0%	37%	32%	n/a	5%
<b>Service rigs, end of period</b>								
Active service rigs	64	67	(3)	(4%)	64	67	(3)	(4%)
Inactive service rigs	79	77	2	3%	79	77	2	3%
Total service rigs	143	144	(1)	(1%)	143	144	(1)	(1%)
<b>Revenue per hour</b>	\$923	\$712	\$211	30%	\$860	\$672	\$188	28%
<b>Service rig operating hours</b>	26,854	29,732	(2,878)	(10%)	110,241	105,570	4,675	4%
<b>Service rig utilization %<sup>(2)</sup></b>	64%	68%	n/a	(4%)	66%	60%	n/a	6%

<sup>(1)</sup> Please refer to the "Non-GAAP and Other Financial Measures" section for further information.

<sup>(2)</sup> In accordance with CAOEC methodology, service rig utilization is calculated based on 10 operating hours a day x number of days per quarter x 5 days a week divided by 7 days in a week to reflect maximum utilization available due to hours of service restrictions on rig crews. Service rigs requiring their 24,000-hour recertification, refurbishment, or have been otherwise removed from service for greater than 90 days are excluded from the utilization calculation until their first day back in field service.

Production Services revenue of \$24.8 million in Q4 2022, an increase of \$3.6 million (17%) compared to \$21.2 million in Q4 2021 as the Company was successful in implementing pricing adjustments to partially offset higher inflationary field labour, fuel and supply costs as evident from the average revenue per hour of \$923 in Q4 2022 increasing \$211 per hour (30%) compared to the \$712 per hour in Q4 2021. CWC's service rig utilization in Q4 2022 of 64% (Q4 2021: 68%) with 26,854 operating hours was 10% lower than the 29,732 operating hours in Q4 2021 as extremely cold weather conditions in December 2022 and budget exhaustion from our E&P customers resulted in reduced activity in Q4 2022 compared to Q4 2021.

During Q4 2022, the Company earned \$0.7 million (Q4 2021: \$1.3 million) in revenue on 34 oil and gas sites (Q4 2021: 87) requiring well decommissioning under the Alberta Site Rehabilitation Program ("SRP") and 8 oil and gas sites (Q4 2021: 2) under the Saskatchewan Accelerated Site Closure Program ("ASCP") as the Company appropriately pivoted away from well decommissioning work to production-oriented maintenance and workover work. The \$1.0 billion Alberta SRP, the \$400 million ASCP and the \$100 million B.C. Dormant Sites Reclamation Program ("DSRP") provided grants until February 14, 2023 to eligible oilfield service contractors to perform well, pipeline, and oil and gas site closure and reclamation work, creating jobs and supporting the environment.

### Selling and Administrative Expenses

\$ thousands	Three months ended December 31,				Twelve months ended December 31,			
	2022	2021	Change \$	Change %	2022	2021	Change \$	Change %
Selling and administrative expenses	6,738	4,463	2,275	51%	22,454	15,310	7,144	47%

Selling and administrative expenses of \$6.7 million in Q4 2022, an increase of \$2.3 million (51%) compared to \$4.5 million in Q4 2021. For the year ended December 31, 2022, selling and administrative expenses of \$22.5 million, an increase of \$7.1 million (47%) compared to \$15.3 million in 2021. The increase in selling and administrative expenses for the quarter and year ended December 31, 2022 compared to 2021 was primarily due to an increase in the number of employees and compensation in response to higher activity levels.

## Adjusted EBITDA<sup>(1)</sup>

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
<b>Adjusted EBITDA<sup>(1)</sup></b>								
Contract Drilling	9,224	2,935	6,289	214%	27,414	6,313	21,101	334%
Production Services	6,819	5,947	872	15%	25,615	18,689	6,926	37%
Corporate	(2,307)	(2,747)	440	16%	(7,098)	(6,130)	(968)	(16)%
	13,736	6,135	7,601	124%	45,931	18,872	27,059	143%
Adjusted EBITDA margin (%) <sup>(1)</sup>	23%	18%	n/a	5%	22%	18%	n/a	4%

<sup>(1)</sup> Please refer to the "Reconciliation of Non-IFRS Measures" section for further information.

Management uses Adjusted EBITDA<sup>(1)</sup> as a measure of the cash flow generated by the Company. Positive Adjusted EBITDA<sup>(1)</sup> provides the cash flow needed to grow the business through the purchase of equipment or business acquisitions, to fund working capital, and service and reduce outstanding long-term debt.

Adjusted EBITDA<sup>(1)</sup> was \$13.7 million in Q4 2022, an increase of \$7.6 million (124%) compared to \$6.1 million in Q4 2021.

Adjusted EBITDA<sup>(1)</sup> was \$45.9 million for 2022, an increase of \$27.1 million (143%) compared to \$18.9 million in 2021. The increase in Adjusted EBITDA<sup>(1)</sup> is primarily due to the expansion of our U.S. operations with the addition of thirteen (13) triple drilling rigs and the overall increase in industry activity and pricing as restrictive measures taken to reduce the spread of COVID-19 globally were eased and crude oil and natural gas prices increased.

## Stock Based Compensation

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
Stock based compensation	356	263	93	35%	1,049	782	267	34%

Stock based compensation is primarily a function of outstanding stock options and restricted share units ("RSUs") being expensed over their vesting periods.

Stock based compensation of \$0.4 million in Q4 2022, an increase of \$0.1 million (35%) compared to \$0.3 million in Q4 2021.

Stock based compensation of \$1.0 million for 2022, an increase of \$0.3 million (34%) compared to \$0.8 million in 2021.

## Finance Costs

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
Finance costs	855	294	561	191%	2,558	1,086	1,472	136%

Finance costs of \$0.9 million in Q4 2022, an increase of \$0.6 million (191%) compared to \$0.3 million in Q4 2021.

Finance costs of \$2.6 million for 2022, an increase of \$1.5 million (136%) compared to \$1.1 million in 2021. The increase in finance costs for the quarter and year ended December 31, 2022 compared to 2021 was primarily due to the increased interest rates in 2022.

## Depreciation

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
Depreciation	3,033	2,774	259	9%	12,162	10,563	1,599	15%

Depreciation of \$3.0 million in Q4 2022, an increase of \$0.3 million (9%) compared to \$2.8 million in Q4 2021.

Depreciation of \$12.2 million in 2022, an increase of \$1.6 million (15%) compared to \$10.6 million in 2021 was primarily due to the higher depreciable asset base in 2022 compared to 2021.

## Impairment (Reversal) of Assets

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
<b>Impairment (reversal) of assets</b>								
Contract Drilling	(22,952)	-	(22,952)	n/m <sup>(1)</sup>	(22,952)	-	(22,952)	n/m <sup>(1)</sup>
Production Services	(309)	-	(309)	n/m <sup>(1)</sup>	(309)	1,296	(1,605)	(124%)
	(23,261)	-	(23,261)	n/m <sup>(1)</sup>	(23,261)	1,296	(24,557)	(1,895%)

The removal of economic restrictions due to the COVID-19 health pandemic created an increased demand for crude oil and natural gas without a sufficient corresponding increase in global supply. This positively affected current and forecasted drilling and production levels in Canada and the United States resulting in increased demand for the Company's services. As such, the Company concluded that there were indicators of impairment reversal and performed an impairment test for the Company's cash generating units ("CGUs") at December 31, 2022.

The recoverable amount of the CGU was based on the value in use method, estimated using discounted cash flows incorporating the Company's most recent 2023 internal 5-year forecasts at December 31, 2022. The calculation of estimated future cash flows were discounted to their present value using an after-tax discount rate of 20% which reflects current market assessments of the time value of money and the risks specific to the assets. The fair value of measurement was categorized as Level 3 fair value based on the inputs in the valuation technique used.

The impairment reversal test concluded that the recoverable amounts of the Company's CGUs exceeded their carrying amounts. At December 31, 2022, the Company recorded a reversal of historical impairment charges of \$22,952 related to the Contract Drilling CGU and \$309 related to the Production Services CGU in the consolidated statements of comprehensive income. No historical impairments remain for either of the Company's CGUs.

## (Gain) Loss on Disposal of Equipment

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
(Gain) loss on disposal of equipment	(27)	(208)	(181)	(87%)	50	(251)	(301)	(120%)

Management continually monitors the asset mix and equipment needs of the Company and divests assets as needed to optimize operations.

For the year ended December 31, 2022, the loss on disposal of equipment of \$0.1 million, a decrease of \$0.3 million (120%) compared to a gain on disposal of equipment of \$0.3 million in 2021, was primarily related to drill pipe lost downhole that was partially recovered from customers and the disposal of service rig equipment.

## Deferred Income Tax Expense

\$ thousands	Three months ended		Twelve months ended	
	December 31,		December 31,	
	2022	2021	2022	2021
Net income before income taxes	32,780	3,012	53,373	5,396
Current income tax	114	-	114	-
Deferred income tax expense	6,626	146	11,599	823
Deferred income tax expense as a % of net income before income taxes	20%	5%	22%	15%
Expected statutory income tax rate	23.1%	23.7%	23.1%	23.7%

Income taxes are a function of taxable income and are calculated differently than tax provisions on accounting income. Differences between accounting income and taxable income include such things as gains or losses on disposal of fixed assets, stock based compensation, differences between income tax estimates and actual tax filings, and other differences.

The deferred income tax expense in Q4 2022 of \$6.6 million (Q4 2021: \$0.1 million) and \$11.6 million for 2022 (2021: \$0.8 million) is a result of the income before income taxes. The increase in deferred income tax expense in 2022 was primarily due to the reversal of impairment of asset charges of \$23.3 million in 2022 compared to an impairment of assets charge of \$1.3 million in 2021.

The Company has substantial tax pools and non-capital losses available to reduce future taxable income in Canada and the United States.

### Net Income and Comprehensive Income

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
Net income	26,040	2,866	23,174	809%	41,660	4,573	37,087	811%
Unrealized gain (loss) on translation of foreign operations	(823)	187	(1,010)	(540%)	3,544	264	3,280	1,242%
Comprehensive income	25,217	3,053	22,164	726%	45,204	4,837	40,367	835%

<sup>(1)</sup> Not meaningful

Net income of \$26.0 million in Q4 2022, an increase of \$23.2 million compared to \$2.9 million in Q4 2021. Comprehensive income of \$25.2 million in Q4 2022, an increase of \$22.2 million compared to \$3.1 million in Q4 2021.

Net income of \$41.7 million in 2022, an increase of \$37.1 million compared to \$4.6 million in 2021. Comprehensive income of \$45.2 million in 2022, an increase of \$40.4 million compared to \$4.8 million in 2021. The increases in net income and comprehensive income in 2022 were primarily due to the reversal of impairment of asset charges of \$23.3 million in 2022 compared to an impairment of assets charge of \$1.3 million in 2021. As addition, the Company saw increases in net income and comprehensive income primarily due to the expansion of our U.S. operations with the addition of 13 triple drilling rigs and the overall increase in industry activity and pricing as restrictive measures taken to reduce the spread of COVID-19 globally were eased and crude oil and natural gas prices increased.

## Liquidity and Capital Resources

### Source of Funds

The Company's liquidity needs in the short and long term can be sourced in several ways including funds from operations, borrowing against existing credit facilities, new debt instruments, equity issuances and proceeds from the sale of assets. Cash inflows are used to repay outstanding amounts on the Company's credit facilities and fund capital requirements.

During 2022, the Company's operating cash flow of \$29.8 million, proceeds on disposal of equipment of \$1.2 million, and cash settlement from the exercise of stock options of \$0.9 million was used to fund capital expenditures of \$25.4 million, repayments of long-term debt of \$3.3 million, payments of interest on long-term debt, finance costs and leases of \$3.1 million and acquisition of common shares under the NCIB of \$0.1 million.

As at December 31, 2022 the Company had working capital (excluding debt) of \$35.9 million, an increase of \$17.0 million (90%) from \$19.0 million at December 31, 2021 (please refer to the "Non-GAAP and Other Financial Measures" section for further information). The increase in working capital (excluding debt) is primarily due to higher accounts receivable related to increased activity levels, particularly in the U.S., in Q4 2022 versus Q4 2021. Typically as activity levels increase or decrease, working capital will also increase or decrease.

The Company has credit facilities with a syndicate of four Canadian financial institutions (the "Credit Facility"). On July 29, 2022, the Company exercised the accordion feature to expand the Credit Facility comprised of a \$50,710 Canadian syndicated facility, a US\$12,000 U.S. syndicated facility, a \$7,500 Canadian operating facility and a US\$5,000 U.S. operating facility. The Company further amended the Credit Facility to extend the maturity to July 31, 2025 ("Maturity Date"). No principal payments are required under the Credit Facility until the Maturity Date, at which time any amounts outstanding are due and payable. The Company may, on an annual basis, request the Maturity Date be extended for a period not to exceed three years from the date of the request. If a request for an extension is not approved by the banking syndicate, the Maturity Date will remain unchanged.

The Company is in compliance with each of the financial covenants at December 31, 2022. Effective December 31, 2022, the applicable rates under the Bank Loan are bank prime rate plus 1.25%, bankers' acceptances rate plus a stamping fee of 2.25%, and standby fee rate of 0.563%.

The Company's Mortgage Loan is a loan maturing on June 30, 2028 that is amortized over 22 years with blended monthly principal and interest payments of \$86 thousand. At maturity, approximately \$7.0 million of principal will become payable assuming only regular monthly payments are made. On May 2, 2022 the Company entered into an interest rate swap to exchange the floating rate interest payments for fixed rate interest payments, which fix the Bankers' Acceptance-Canadian Dollar Offered Rate components of its interest payment on the outstanding term debt.

Under the interest rate swap agreement, the Company pays a fixed rate of 3.38% per annum plus the applicable credit spread of 1.35%, for an effective fixed rate of 4.73%. The fair value of the interest rate swap arrangement is the difference between the forward interest rates and the discounted contract rate. As at December 31, 2022, the mark-to-market value of the interest rate swap of \$152 thousand is included within accounts receivable on the Consolidated Statements of Financial Position (December 31, 2021: \$210 thousand included within accounts payable and accrued liabilities).

## Capital Requirements

On December 5, 2022, the Company announced its capital expenditure budget for 2023 of \$26.3 million including \$4.0 million of 2022 capital expenditure being carried forward into 2023 for the upgrades and Level IV re-certifications of the three (3) triple drilling rigs acquired in June 2022. \$6.7 million of the 2023 capital expenditure is for maintenance and infrastructure capital related to re-certifications, additions and upgrades to field equipment for the drilling rig and service rig divisions as well as information technology infrastructure, with the remaining \$15.6 million being for growth capital to complete upgrades to four (4) of the drilling rigs and to purchase additional strings of specialty drill pipe. The 2023 capital expenditures budget is consistent with CWC's commitment to safety and operational efficiency with high-quality and well-maintained equipment. CWC intends to finance its 2023 capital expenditures budget from operating cash flows.

The Company's 2022 capital expenditures are detailed in the section below titled "Capital Expenditures". In the future, additional discretionary capital expenditures will be required in order to continue to grow the Company's assets and revenue. It is anticipated future cash requirements for capital expenditures will be met through a combination of funds from operations and borrowing against existing credit facilities as required. However, additional funds may be raised by new debt instruments, equity issuances and proceeds from the sale of assets.

CWC may require additional financing in the future to implement its strategies and business objectives. It is possible that such financing will not be available, or if available, will not be available on favourable terms. If CWC issues any shares in the future to finance its operations or implement its strategies, the current shareholders of CWC may incur a dilution of their interest.

## Common Shares and Dividends

The following table summarizes outstanding share data and potentially dilutive securities:

	March 1, 2023	December 31, 2022	December 31, 2021
Common shares	518,171,894	518,084,727	509,072,091
Stock options	89,000	89,000	7,323,000
Restricted share units	17,361,744	17,448,911	16,085,887

For the year ended December 31, 2022, 4,615,000 stock options were exercised and 2,619,000 expired. In addition, 6,024,000 Restricted Share Units ("RSUs") were granted, 4,607,636 were exercised and 53,340 expired.

On November 16, 2022, the Company reinstated its NCIB which expires on November 15, 2023. Under this NCIB the Company may purchase, from time to time as it considers advisable, up to 25,620,671 issued and outstanding common shares through the facilities of the TSXV or other recognized marketplaces. In addition, CWC entered into an automatic securities purchase plan (the "ASPP") (as defined under applicable securities laws) with Raymond James Ltd. ("Raymond James") for the purpose of making purchases under the ASPP. Such purchases will be determined by Raymond James in its sole discretion, without consultation with CWC having regard to the price limitation and aggregate purchase limitation and other terms of the ASPP and the rules of the TSXV. Conducting the NCIB as an ASPP allows common shares to be purchased at times when CWC would otherwise be prohibited from doing so pursuant to securities laws and its internal trading policies.

For the year ended December 31, 2022, the Company purchased 210,000 (2021: 2,249,500) common shares under the NCIB which were cancelled and returned to treasury.

## Capital Expenditures

\$ thousands	Three months ended				Twelve months ended			
	December 31,		Change	Change	December 31,		Change	Change
	2022	2021	\$	%	2022	2021	\$	%
<b>Capital expenditures</b>								
Contract drilling	4,433	24,778	(20,345)	(82%)	21,493	27,793	(6,300)	(23%)
Production services	1,290	250	1,040	416%	4,420	1,470	2,950	201%
Other equipment	1	11	(10)	(91%)	128	15	113	753%
	5,724	25,039	(19,315)	(77%)	26,041	29,278	(3,237)	(11%)
Growth capital	4,267	23,664	(19,397)	(82%)	19,559	25,393	(5,834)	(23%)
Maintenance and infrastructure capital	1,457	1,375	82	8%	6,482	3,885	2,597	67%
Total capital expenditures	5,724	25,039	(19,315)	(77%)	26,041	29,278	(3,237)	(11%)

Capital expenditures of \$5.7 million in Q4 2022, a decrease of \$19.3 million compared to \$25.0 million in Q4 2021. The decreased capital expenditures for Q4 2022 was primarily due to the purchase of ten (10) triple drilling rigs and ancillary equipment for US\$18.5 million (C\$23.5 million) in Q4 2021 with no comparable purchase in Q4 2022.

Capital expenditures of \$26.0 million for the year ended December 31, 2022, a decrease of \$3.2 million compared to \$29.3 million in 2021. The decreased capital expenditure for 2022 compared to 2021 was primarily due to the purchase of three (3) triple drilling rigs and critical spare components for US\$7.4 million (C\$9.6 million) and upgrades and Level IV re-certifications of these three (3) triple drilling rigs spent in 2022 of \$4.6 million, which was less than the amount spent to purchase ten (10) triple drilling rigs and ancillary equipment for US\$18.5 million (C\$23.5 million) in 2021.

## Commitments and Contractual Obligations

Under the terms of the Company's amended Bank Loan, the borrowings under the Bank Loan are due in full on July 31, 2025. The Company is committed to monthly payments of interest and bank charges until July 31, 2025. The Company's Mortgage Loan is being amortized over 22 years with blended monthly principal and interest payments and matures on June 30, 2028. Management believes that there will be sufficient cash flows generated from operations to service the interest on the debt and finance the required capital expenditures of the Company through 2023.

## Summary and Analysis of Quarterly Data

\$ thousands, except per share amounts	Three months ended							
	Dec. 31, 2022	Sep. 30, 2022	Jun. 30, 2022	Mar. 31, 2022	Dec. 31, 2021	Sep. 30, 2021	Jun. 30, 2021	Mar. 31, 2021
Revenue	60,039	61,781	42,681	40,831	33,693	27,776	16,497	24,669
Adjusted EBITDA <sup>(1)</sup>	13,736	16,169	7,600	8,426	6,135	5,394	2,489	4,854
Net income (loss)	26,040	9,517	2,664	3,439	2,866	2,019	(759)	447

Shareholders' equity	210,381	184,499	170,976	166,445	163,269	159,953	157,242	158,108

<sup>(1)</sup> Please refer to the "Non-GAAP and Other Financial Measures" section for further information.

The table above summarizes CWC's quarterly results for the previous eight financial quarters. CWC's operations are carried out in western Canada and the United States. The second quarter is typically expected to be the weakest financial and operating quarter for the Company due to ground conditions being impacted by spring breakup in Canada. The ability to move heavy equipment in the Canadian crude oil and natural gas fields is dependent on weather conditions. As warm weather returns in the spring, the winter's frost comes out of the ground rendering many secondary roads incapable of supporting the weight of heavy equipment until they have thoroughly dried out. The duration of this spring breakup has a direct impact

on the Company's activity levels. In addition, many exploration and production areas in northern Canada are accessible only in winter months when the ground is frozen enough to support equipment. As a result, mid-March through June is traditionally the Company's slowest time, and as such the revenue, operating costs, and financial results of the Company will vary on a quarterly basis.

Through the eight quarters presented, the amount of revenue and net income (loss), adjusted for the effects of seasonality, have fluctuated primarily due to changes in the utilization of equipment, changes in the day and hourly billing rate, and the increase in the number of drilling rigs and service rigs over the period as detailed in the section titled "Results of Operations".

Other significant impacts have been a result of:

- Q4 2022 saw the Company achieve record Q4 revenue, Adjusted EBITDA<sup>(1)</sup> and net income in its eighteen (18) year history primarily due to the expansion of our U.S. operations with the addition of ten (10) triple drilling rigs and the overall increase in industry activity and pricing as inflationary costs from field labour, fuel and supplies continue to be recovered from our E&P customers. During Q4 2022, 210,000 common shares were purchased, cancelled, and returned to treasury under the NCIB.
- Q3 2022 saw the Company achieve record quarterly revenue, Adjusted EBITDA<sup>(1)</sup> and net income in its seventeen (17) year history primarily due to the expansion of our U.S. operations with the addition of ten (10) triple drilling rigs and the overall increase in industry activity and pricing as inflationary costs from field labour, fuel and supplies were successfully recovered from our E&P customers.
- Q2 2022 saw the Company achieve record Q2 revenue, Adjusted EBITDA<sup>(1)</sup> and net income in its seventeen (17) year history with the continuation of higher activity levels as crude oil, as measured by WTI, rose to an average of US\$108/bbl with natural gas, as measured by AECO, averaging over \$6.90/mcf which resulted in both increases in activity levels and pricing. Additionally in the quarter, the Company acquired three (3) high-spec AC triple drilling rigs for US\$7.4 million (CAD\$9.6 million) further expanding the Company's presence in the U.S.
- Q1 2022 saw crude oil prices continue to rise above US\$105/bbl as activity levels rose to pre-COVID-19 health pandemic levels. Inflation rose in field labour, fuel and supply costs, which resulted in pricing increases for the Company's customers, which more than offset the higher inflation resulting in higher Adjusted EBITDA and margins in over seven (7) years.
- Q4 2021 saw the Company acquire ten (10) triple drilling rigs and related ancillary equipment based in Casper, Wyoming for total cash consideration including transaction costs of US\$18.5 million (approximately C\$23.5 million). The purchase further expanded the Company's presence in the U.S. and more than doubled the size of the Company's active drilling fleet to nineteen (19) drilling rigs comprised of seven (7) conventional heavy double drilling rigs in Canada and five (5) AC triple, five (5) DC triple and two (2) conventional heavy double drilling rigs in the U.S. The Company believes the purchase of these ten (10) triple drilling rigs will have a significant positive impact on future quarterly operational and financial results.
- Q3 2021 saw the continuation of higher activity levels as crude oil prices continued to rise towards US\$80/bbl. A continuation of a shortage of field labour or rig crews in the industry during the quarter resulted in a further increase in wages, which led to higher pricing for the Company's well servicing work.
- Q2 2021 saw the continuation of higher activity levels adjusted for seasonality as crude oil prices continued to rise to over US\$70/bbl. Shortage of available field labour or rig crews in the industry during the quarter became a constraint to higher growth, which is expected to lead to higher pricing for the Company's drilling and well servicing work in future quarters.
- Q1 2021 saw the continuation of a recovery in Canadian oilfield service activity compared to Q4 2020 as the belief of the return to normalcy as a result of the rollout of the COVID-19 vaccines provided support for an increased forecast of global crude oil demand for the remainder of 2021. As such, oil prices continued to rise during the quarter to over US\$60/bbl. During Q1 2021, 2,249,500 common shares were purchased, cancelled and returned to treasury under the NCIB.

<sup>(1)</sup> Please refer to the "Non-GAAP and Other Financial Measures" section for further information.

## **Critical Accounting Estimates and Judgments**

---

This MD&A of the Company's financial condition and results of operations is based on the consolidated financial statements which are prepared in accordance with IFRS. The preparation of the consolidated financial statements in conformity with IFRS requires that certain estimates and judgments be made with respect to the reported amounts of revenue and expenses and the carrying amounts of assets and liabilities. These estimates are based on historical experience and management's judgment. Anticipating future events involves uncertainty and consequently the estimates used by management in the preparation of the consolidated financial statements may change as future events unfold, additional experience is acquired or the Company's operating environment changes. In many cases the use of judgment is required to make estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

## **CEO and CFO Certifications**

---

The CEO and CFO of TSX Venture Exchange listed companies, such as CWC, are not required to certify they have designed internal control over financial reporting or caused it to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. Instead, an optional form of certification has been made available to TSX Venture Exchange listed companies and has been used by CWC's certifying officers for the December 31, 2022, annual filings. The certification reflects what the Company considers to be a more appropriate level of CEO and CFO certification given the size and nature of the Company's operations.

This certification requires that the certifying officers state:

- They have reviewed the annual financial report and MD&A;
- That, based on their knowledge, they have determined there is no untrue statement of a material fact or any omission of material fact required to be stated which would make any statement not misleading in light of the circumstances under which it was made within the annual filings; and
- That based upon their knowledge, the annual filings, together with the other financial information included in the annual filings, fairly present in all material respects the financial condition, financial performance and cash flows of the Company as of the date and for the periods presented in the annual filings.

## **Risks and Uncertainties**

---

Certain activities of the Company are affected by factors that are beyond its control or influence. Additional risks and uncertainties not currently known to management or that may currently not be considered material by management, could nevertheless also have an adverse effect on the Company's business. Along with the risks discussed in this MD&A, other business risks faced by the Company may be found under "Risk Factors" in the Company's most recent Annual Information Form which is available under the Company's profile at [www.sedar.com](http://www.sedar.com). These risks are not an exhaustive list and should not be taken as a complete summary or description of all the risks associated with the Company's business and the energy services industry generally. While some exposures may be reduced by the Company's risk management strategies, many risks are driven by external factors beyond its control or are of a nature which cannot be eliminated.

CWC's business is generally tied in large part to the oil and gas exploration and production industry in Western Canada and the United States. CWC's business is sensitive to and will be affected by changing industry conditions in the oil and gas industry and economic and geopolitical developments generally including changes in the level of demand, changes in pricing levels, changes in legislation or in regulation relating to exploration, development, production, refining, transportation, or marketing in the oil and gas industry. The following is a summary of certain risk factors relevant to CWC's business. All of these risk factors could negatively impact CWC's business and its financial and operating results including its revenue, margins and cash flow.

### **Market Events and Conditions**

Market events and conditions, including global excess crude oil and natural gas supply, actions taken by OPEC+, sanctions against, and civil unrest in, Iran and Venezuela, slowing growth in China and emerging economies, market volatility and disruptions in Asia, weakening global relationships, conflict between the United States and Iran, isolationist and punitive trade policies, increased United States shale production, sovereign debt levels, world health emergencies (including the COVID-19 pandemic), climate change concerns and political upheavals in various countries, including growing anti-fossil fuel sentiment, have caused significant weakness and volatility in commodity prices. Following extreme supply/demand imbalance in 2020, the crude oil and natural gas industry rebounded strongly throughout 2021 and 2022, with oil prices

reaching their highest levels in eight years. However, the ongoing war in the Ukraine and price caps and sanctions on oil from Russia have impacted demand and oil prices throughout the latter half of 2022. It is anticipated that the petroleum and natural gas industry will experience more pressure from investors to take meaningful strides towards combating climate change in the upcoming years, including diversifying their energy portfolios. These events and conditions have caused a significant decrease in the valuation of crude oil and natural gas companies and a decrease in confidence in the petroleum and natural gas industry. Such difficulties have been exacerbated in Canada by political and other actions resulting in uncertainty surrounding regulatory, tax, royalty changes and environmental regulation.

In addition, difficulties encountered by midstream proponents to obtain the necessary approvals on a timely basis to build pipelines, liquefied natural gas plants and other facilities to provide better access to markets for the petroleum and natural gas industry in Western Canada and cross-border with the United States has led to additional downward price pressure on crude oil and natural gas produced in Western Canada. The resulting price differential between Western Canadian Select crude oil, Brent and West Texas Intermediate crude oil has created uncertainty and reduced confidence in the petroleum and natural gas industry in Western Canada.

### **Geopolitical Events**

The Company's business may be adversely affected by recent geopolitical and events and decisions made in Canada, the United States, China, Europe and elsewhere.

The current war in Ukraine and the international response has, and may continue to have, potential wide ranging consequences for global market volatility and economic conditions, including energy and commodity prices, which may, in turn, increase inflationary pressures and interest rates. Certain countries, including Canada and the United States, have imposed strict financial and trade sanctions against Russia, which have, and may continue to have, far-reaching effects on the global economy and energy and commodity prices. The short, medium and long-term implications of the war in Ukraine are difficult to predict with any certainty at this time and there remains uncertainty relating to the potential direct and indirect impact of the war on the Company, and it could have a material and adverse effect on its business, financial condition and results of operations. Depending on the extent, duration, and severity of the war, it may have the effect of heightening many of the other risks described herein, including, without limitation, the risks relating to the Company's exposure to commodity prices; the successful completion of the Company's growth and expansion projects, including the expected return on investment thereof; supply chains and the Company's ability to obtain required equipment, materials or labour; cybersecurity risks; inflationary pressures; and restricted access to capital and increased borrowing costs as a result of increased interest rates.

### **Inflation and Cost Management**

A failure to secure the services and equipment necessary to the Company's operations for the expected price, on the expected timeline, or at all, may have an adverse effect on the Company's financial performance and cash flows. Third party production companies' operating costs could escalate and become uncompetitive due to supply chain disruptions, inflationary cost pressures, equipment limitations, escalating supply costs, commodity prices, and additional government intervention through stimulus spending or additional regulations, which may reduce the Company's revenue. Third party production companies' inability to manage costs may impact project returns and future development decisions, which, in turn, could have a material adverse effect on the Company's business and financial condition.

The Company's operating costs could escalate and become uncompetitive due to supply chain disruptions, inflationary cost pressures, equipment limitations, escalating supply costs, commodity prices, and additional government intervention through stimulus spending or additional regulations. The Company's inability to manage costs may impact margins which could have a material adverse effect on its financial performance and cash flows.

### **Reliance on Skilled Crews**

An inability to recruit and retain skilled drilling and service rig crews and key personnel could negatively impact the Company's operations. The operations and management of the Company require the recruitment and retention of a skilled workforce, including crews, technical personnel and other professionals. The loss of key members of such workforce, or a substantial portion of the workforce as a whole, could result in the failure to implement the Company's business plans which could have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

There is competition for qualified personnel in the petroleum and natural gas industry and there can be no assurance that the Company will be able to continue to attract and retain all personnel necessary for the development and operation of its business. Contributions of the existing management team to the immediate and near-term operations of the Company are likely to be of central importance. In addition, certain of the Company's current employees are senior and have significant institutional knowledge that must be transferred to other employees prior to their departure from the workforce. If the Company is unable to: (i) retain current employees; (ii) successfully complete effective knowledge transfers; and/or (iii)

recruit new employees with the requisite knowledge and experience, the Company could be negatively impacted, which negative impact could prove to be material over time. In addition, the Company could experience increased costs to retain and recruit these professionals.

### **Industry Competition**

The petroleum and natural gas industry is competitive throughout its lifecycle. The Company competes with numerous other entities in the energy services industry. Other companies may have access to substantially greater financial resources, crews, staff and equipment than those of the Company and who may have lower costs of, and better access to, capital.

### **Infectious Diseases (including COVID-19)**

Pandemics, epidemics or outbreaks of an infectious disease in Canada or worldwide could have an adverse impact on the Company's business, including changes to the way the Company and its counterparties operate, and on the Company's financial results and condition. The spread of the COVID-19 pandemic continues to pose risks to the global economy and the petroleum and natural gas industry more broadly. While the duration and full impact of the COVID-19 pandemic is not yet known, effects of COVID-19 may also include disruptions to production operations, reduced access to materials and services, increased employee absenteeism from illness, and temporary closures of the Company's office or field sites. At the onset of the COVID-19 pandemic in March 2020, governments and regulatory bodies in affected areas imposed a number of measures designed to contain the COVID-19 pandemic, including widespread business closures, social distancing protocols, travel restrictions, quarantines, curfews and restrictions on gatherings and events. While substantially all containment measures in Canada and the United States have been lifted, additional safety precautions and operating protocols aimed at containing the spread of COVID-19 may be instituted in line with guidance of public health authorities. Additional waves of the COVID-19 pandemic, together with the emergence of new COVID-19 variant strains, may lead to the imposition of containment measures to varying degrees in many regions within Canada, the United States and globally. These containment measures have the potential to impact global economic activity, and such measures may also contribute to the decreased demand for hydrocarbons, increased market volatility and continued changes to the macroeconomic environment. The prolonged effects of any disruption may have adverse impacts on the Company's business strategies and initiatives, resulting in ongoing effects to its financial results, including the increase of counterparty, market and operational risks.

While the duration and full impact of the COVID-19 pandemic is not yet known, the effects of COVID-19 may also include disruptions to production operations, access to materials and services, increased employee absenteeism from illness and temporary closures of the Company's facilities. Uncertainty remains as to the full impacts of the COVID-19 pandemic on the global economy, commodity and financial markets, crude oil and natural gas capital investment levels in the Western Canadian Sedimentary Basin and the energy business more broadly. The ultimate impacts will depend on future developments that are highly uncertain and cannot be predicted, including the scope, severity, duration and additional subsequent waves of the COVID-19 pandemic, including the introduction of new variants, as well as the effectiveness of actions and measures taken by the various levels of government. If the COVID-19 pandemic is further prolonged, including the possibility of additional subsequent waves, and introduction of new variants, or further diseases emerge that give rise to similar effects, the adverse impact on the economy could deepen and result in further volatility and declines in commodity and financial markets. Moreover, it remains uncertain how the macroeconomic environment will be impacted following the COVID-19 pandemic. Unexpected developments in commodity and financial markets, regulatory environments, industrial activity or consumer behavior and confidence may also have adverse impacts on the Company's business and financial condition, potentially for a substantial period of time.

### **Price Competition and Cyclical Nature of the Oilfield Services Business**

The drilling rig and service rig businesses are highly competitive with numerous industry participants. Management believes pricing and rig availability are the primary factors considered by CWC's potential customers in determining which drilling rig or service rig contractor to select. Management believes other factors are also important, including:

- the capabilities and condition of drilling rigs or service rigs;
- the quality and safety of service and availability and experience of crews;
- the safety record of the contractor and the particular drilling rig or service rig;
- the offering of ancillary services;
- the ability to provide equipment adaptable to, and personnel familiar with, new technologies;
- the mobility and efficiency of the drilling rigs or service rigs; and
- marketing relationships.

The drilling rig and service rig industry historically has been cyclical and has experienced periods of low demand, excess rig supply, and low daily or hourly rates, followed by periods of high demand, short rig supply and increasing daily or hourly rates. Periods of excess rig supply intensify the competition in the industry and result in rigs being idle. There are numerous drilling rig and service rig suppliers in each of the markets in which CWC operates. In all of those markets, an oversupply of equipment can cause greater price competition. Oilfield services companies compete primarily on a regional basis, and the intensity of competition may vary significantly from region to region at any particular time.

CWC provides services primarily to the field operation locations of oil and natural gas exploration and production companies located in Western Canada and the United States. The oil and natural gas services business in which CWC operates is highly competitive. To be successful, CWC must provide quality services in a safe manner that meets the specific needs of its clients at competitive prices. CWC will compete with several regional competitors that are both smaller and larger than it is. These competitors offer similar services in all geographic regions in which CWC operates. As a result of competition, CWC may be unable to continue to provide its present services or to acquire additional business opportunities, which could have a material adverse effect on CWC's business, financial condition, results of operations and cash flows.

### **Oversupply of Oilfield Services Equipment in the Drilling Rig and Service Rig Industry**

Because of the long-life nature of drilling rigs and service rigs and the lag between the moment a decision to build a rig is made and the moment the rig is placed into service, the number of rigs in the industry does not always correlate to the level of demand for those rigs. Periods of high demand often spur increased capital expenditures on rigs, and those capital expenditures may exceed actual demand. An oversupply of oilfield services equipment could cause CWC's competitors to lower their rates and could lead to a decrease in rates in the oilfield services industry generally, which would have a material adverse effect on the revenue, cash flows and earnings of CWC.

### **Operational Risks**

Demand and prices for CWC's products and services depend upon the level of activity in the oil and gas exploration and production industry in Canada and the United States which in turn depends on the level of oil and gas prices, expectations about future oil and gas prices, the cost of exploring for, producing and delivering oil and gas, the discovery rate of new oil and gas reserves, available pipeline and other oil and gas transportation capacity, worldwide weather conditions, political, military, regulatory and economic conditions and the ability of oil and gas companies to raise capital or continue to use its capital to make capital expenditures, as further discussed above. The level of activity in the oil and gas exploration and production industry in Canada and the United States is volatile. The marketability of any oil and natural gas acquired or discovered by CWC's customers will be affected by numerous factors beyond the control of such customers. These factors include market fluctuations, the price of crude oil, the price of natural gas, the supply and demand for oil and natural gas, the proximity and capacity of oil and natural gas pipelines and processing equipment, and government regulations, including regulations relating to prices, taxes, royalties, land tenure, allowable production, the import and export of oil and natural gas, and environmental protection. The effect of these factors cannot be accurately predicted. No assurances can be given that current levels of oil and gas exploration and production activities will improve, deteriorate further, or continue or that demand for the Company's services will continue to reflect the level of activity in the industry generally. Industry conditions will continue to be influenced by numerous factors over which the Company will have no control. Prices for oil and gas are expected to continue to be volatile and affect the demand for and pricing of the Company's products and services.

### **Merger and Acquisition Activity**

Merger and acquisition activity in the oil and gas exploration and production sector may impact demand for CWC's services as customers focus on reorganizing their business prior to committing funds to exploration and development projects. Further, in any merger or acquisition transaction, the resulting or acquired company may have preferred supplier relationships with oilfield service providers other than CWC.

### **Oilfield Services Industry Risks**

There are many risks inherent in the oilfield services industry, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. The Company's operations are subject to hazards inherent in the oilfield service industry, such as explosions, fires and spills that can cause personal injury or loss of life, damage to or destruction of property, equipment and the environment and suspension of operations. In addition, claims for loss of oil and gas production, damage to formations, damage to facilities and business interruptions can occur. While the Company maintains insurance coverage that it believes to be adequate and customary in the industry, there can be no assurances that insurance proceeds will be available or sufficient or that CWC will be able to maintain adequate insurance in the future at rates considered reasonable. The single occurrence of a significant uninsured claim or a claim in excess of the insurance coverage limits maintained by the Company could have a material adverse effect on the Company's business, results of operation and prospects.

Hazards such as unusual or unexpected geological formations, pressures, blowouts, fires or other conditions may be encountered in drilling or servicing wells. CWC will have the benefit of insurance maintained by it; however, CWC may become liable for damages arising from pollution, blowouts or other hazards against which it cannot insure or against which it may elect not to insure because of high premium costs or other reasons.

### **Reputational Risk Associated with the Company's Operations**

The Company's business, operations or financial condition may be negatively impacted as a result of any negative public opinion towards the Company or as a result of any negative sentiment toward, or in respect of, the Company's reputation with stakeholders, special interest groups, political leadership, the media or other entities. Public opinion may be influenced by certain media and special interest groups' negative portrayal of the industry in which the Company operates as well as their opposition to certain oil and natural gas projects. Potential impacts of negative public opinion or reputational issues may include delays or interruptions in operations, legal or regulatory actions or challenges, blockades, increased regulatory oversight, reduced support for, delays in, challenges to, or the revocation of regulatory approvals, permits and/or licenses and increased costs and/or cost overruns. The Company's reputation and public opinion could also be impacted by the actions and activities of other companies operating in the oil and natural gas industry, particularly other oilfield service providers, over which the Company has no control. Similarly, the Company's reputation could be impacted by negative publicity related to loss of life, injury or damage to property and environmental damage caused by the Company's operations. In addition, if the Company develops a reputation of having an unsafe work site, it may impact the ability of the Company to attract and retain the necessary skilled employees and consultants to operate its business. Opposition from special interest groups opposed to oil and natural gas development and the possibility of climate related litigation against governments and fossil fuel companies may impact the Company's reputation. Reputational risk cannot be managed in isolation from other forms of risk. Credit, market, operational, insurance, regulatory and legal risks, among others, must all be managed effectively to safeguard the Company's reputation. Damage to the Company's reputation could result in negative investor sentiment towards the Company, which may result in limiting the Company's access to capital, increasing the cost of capital, and decreasing the price and liquidity of the Company's securities.

### **Changing Investor Sentiment**

A number of factors, including the concerns of the effects of the use of fossil fuels on climate change, the impact of oil and natural gas operations on the environment, environmental damage relating to spills of petroleum products during transportation and indigenous rights, have affected certain investors' sentiments towards investing in the oil and natural gas industry. As a result of these concerns, some institutional, retail and public investors have announced that they no longer are willing to fund or invest in oil and natural gas properties or companies, or are reducing the amount thereof over time. In addition, certain institutional investors are requesting that issuers develop and implement more robust environmental, social, and governance policies and practices. Developing and implementing such policies and practices can involve significant cost and require a significant time commitment from the Board, management and employees of the Company. Failing to implement the policies and practices, as requested by institutional investors, may result in such investors reducing their investment in the Company, or not investing in the Company at all. Any reduction in the investor base interested or willing to invest in the oil and natural gas industry and more specifically, the Company, may result in limiting the Company's access to capital, increasing the cost of capital, and decreasing the price and liquidity of the Company's securities even if the Company's operating results, underlying asset values or prospects have not changed. Additionally, these factors, as well as other related factors, may cause a decrease in the value of the Company's assets which may result in an impairment charge.

### **Leverage and Restrictive Covenants**

The ability of CWC to make payments or advances will be subject to applicable laws and contractual restrictions in the instruments governing any indebtedness of those entities including the credit facilities. The degree to which CWC is leveraged could have important consequences for investors including: (i) CWC's ability to obtain additional financing for working capital, capital expenditures or future acquisitions; (ii) all or part of CWC's cash flow from operations may be dedicated to the payment of the principal of and interest on CWC's indebtedness, thereby reducing funds available for future operations and to pay dividends; (iii) certain of CWC's borrowings may be at variable rates of interest, which exposes CWC to the risk of increased interest rates; and (iv) CWC may be more vulnerable to economic downturns and be limited in its ability to withstand competitor pressures. These factors could have a material adverse effect on CWC's business, financial condition, results of operations and cash flows.

The credit facilities contain numerous covenants that limit the discretion of management with respect to certain business matters. These covenants will place restrictions on, among other things, the ability of CWC to create liens or other encumbrances; to pay dividends or make other distributions, or make certain other investments, loans and guarantees; to sell or otherwise dispose of assets or repurchase stock, merge, amalgamate or consolidate with another entity. In addition, the credit facilities, contain a number of financial covenants that require CWC to meet certain financial ratios and financial

condition tests. CWC's ability to meet such tests could be affected by events beyond its control, and it may not be able to meet such tests.

A failure to comply with the obligations in the credit facilities, including financial ratios and financial condition tests, could result in a default which, if not cured or waived, would permit acceleration of the repayment of the relevant indebtedness as the lenders could elect to declare all amounts outstanding under the credit facilities to be immediately due and payable and terminate all commitments to extend further credit. If the lenders were to accelerate the repayment of borrowings, CWC may not have sufficient assets to repay balances owing on the credit facilities as well as its unsecured indebtedness as the acceleration of CWC's indebtedness under one agreement may permit acceleration of indebtedness under other agreements that contain cross-default or cross-acceleration provisions. If CWC's indebtedness is accelerated and the Company was not able to repay its indebtedness or borrow sufficient funds to refinance it, the lenders under the credit facilities could proceed to realize upon the collateral granted to them to secure that indebtedness which could have a material adverse effect on CWC and its cash flows. Even if CWC is able to obtain new financing, it may not be on commercially reasonable terms or on terms that are acceptable to CWC and may impose financial restrictions and other covenants on it that may be more restrictive than the credit facilities.

Notwithstanding an event of default, there is also no assurance that CWC will be able to refinance any or all of the credit facilities at their maturity dates on acceptable terms, or on any basis.

### **Liquidity Risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due or can do so only at excessive cost. The Company's liquidity could be adversely affected by a material negative change in the oilfield services industry, which in turn could lead to covenant breaches of the credit facilities, which, if not amended or waived, could limit the Company's access to the credit facilities. If available liquidity is not sufficient to meet CWC's operating and debt obligations as they come due, CWC will need to significantly reduce expenditure, pursue alternative financing arrangements, dispose of significant assets, or pursue other corporate strategic alternatives, the ability of which to do so is uncertain.

### **Government Regulation**

CWC operations are subject to a variety of federal, provincial and local laws, regulations and guidelines, including laws and regulations related to health and safety, transportation, the conduct of operations, the manufacture, management, transportation and disposal of certain materials used in the Company's operations. Changes in any such laws, regulations or guidelines could have a material adverse effect on CWC's operations.

In addition, the oil and gas industry in general is subject to extensive government policies and regulations, which result in additional cost and risk for industry participants or parties, such as CWC, that service the industry. Royalty rates, carbon taxes, transportation regulations, other laws or government incentive programs relating to the oil and gas industry generally may in the future be changed or interpreted in a manner that adversely affects the Company and its shareholders.

### **Seasonal Nature of CWC's Business**

The Company's operations are carried on generally in Western Canada and the United States. The ability to move heavy equipment in the Western Canadian oil and natural gas fields is dependent on weather conditions. As warm weather returns in the spring, the winter's frost comes out of the ground rendering many secondary roads incapable of supporting the weight of heavy equipment until they have thoroughly dried out. The duration of this "spring breakup" has a direct impact on the Company's activity levels. In addition, many exploration and production areas in northern Canada are accessible only in winter months when the ground is frozen enough to support equipment. The timing of freeze-up and spring breakup affects the ability to move equipment in and out of these areas. As a result, mid-March through June is traditionally the Company's slowest time, and as such, the operating results of the Company will vary on a quarterly basis.

### **Dependence on Key Personnel**

CWC's future performance and development will depend, to a significant extent, on the efforts and abilities of its executive officers and key management personnel, and on the ability to attract and retain qualified field staff. The loss of the services of one or more of its management team could harm the Company. Also, CWC's success largely depends on the Company's continuing ability to attract, develop and retain skilled employees in all areas of its business. The ability of the Company to expand its services is dependent upon its ability to attract additional qualified employees. The ability to secure the services of additional personnel is constrained in times of strong industry activity.

## **Climate Change**

Global climate issues continue to attract public and scientific attention. Numerous reports, including reports from the Intergovernmental Panel on Climate Change, have engendered concern about the impacts of human activity, especially hydrocarbon combustion, on global climate issues. In turn, increasing public, government, and investor attention is being paid to global climate issues and to emissions of greenhouse gas ("GHG"), including emissions of carbon dioxide and methane from the production and use of oil, liquids and natural gas. The majority of countries across the globe, including Canada, have agreed to reduce their carbon emissions in accordance with the Paris Agreement. In addition, during the course of the 2021 United Nations Climate Change Conference in Glasgow, Scotland, Canada's Prime Minister Justin Trudeau made several pledges aimed at reducing Canada's GHG emissions and environmental impact. As discussed below, the Company faces both transition risks and physical risks associated with climate change and climate change policy and regulations.

### ***Transition risks***

Foreign and domestic governments continue to evaluate and implement policy, legislation, and regulations focused on restricting emissions commonly referred to as GHG emissions and promoting adaptation to climate change and the transition to a low-carbon economy. It is not possible to predict what measures foreign and domestic governments may implement in this regard, nor is it possible to predict the requirements that such measures may impose or when such measures may be implemented. However, international multilateral agreements, the obligations adopted thereunder and legal challenges concerning the adequacy of climate-related policy brought against foreign and domestic governments may accelerate the implementation of these measures. Given the evolving nature of climate change policy and the control of GHG emissions and resulting requirements, including carbon taxes and carbon pricing schemes implemented by varying levels of government, it is expected that current and future climate change regulations will have the effect of increasing the Company's operating expenses, and, in the long-term, potentially reducing the demand for oil, liquids, natural gas and related products, resulting in a decrease in the Company's profitability and a reduction in the value of its assets and services.

Claims have been made against certain energy companies alleging that GHG emissions from oil and natural gas operations constitute a public nuisance under certain laws or that such energy companies provided misleading disclosure to the public and investors of current or future risks associated with climate change. As a result, individuals, government authorities, or other organizations may make claims against oil and natural gas companies, including the Company, for alleged personal injury, property damage, or other potential liabilities. While the Company is not a party to any such litigation or proceedings, it could be named in actions making similar allegations. An unfavourable ruling in any such case could adversely affect the demand for and price of securities issued by the Company, impact its operations and have an adverse impact on its financial condition.

Given the perceived elevated long-term risks associated with policy development, regulatory changes, public and private legal challenges, or other market developments related to climate change, there have also been efforts in recent years affecting the investment community, including investment advisors, sovereign wealth funds, banks, public pension funds, universities and other institutional investors, promoting direct engagement and dialogue with companies in their portfolios on climate change action (including exercising their voting rights on matters relating to climate change) and increased capital allocation to investments in low-carbon assets and businesses while decreasing the carbon intensity of their portfolios through, among other measures, divestments of companies with high exposure to GHG-intensive operations and products. Certain stakeholders have also pressured insurance providers and commercial and investment banks to reduce or stop financing, and providing insurance coverage to oil and natural gas and related infrastructure businesses and projects. The impact of such efforts requires the Company's management to dedicate significant time and resources to these climate change-related concerns, which may adversely affect the Company's operations, the demand for and price of the Company's securities and may negatively impact the Company's cost of capital and access to the capital markets.

Emissions, carbon and other regulations impacting climate and climate-related matters are constantly evolving. With respect to environmental, social, governance and climate reporting, the International Sustainability Standards Board has issued an IFRS Sustainability Disclosure Standard with the aim to develop sustainability disclosure standards that are globally consistent, comparable and reliable. In addition, the Canadian Securities Administrators published for comment Proposed National Instrument 51-107 – Disclosure of Climate-Related Matters, intended to introduce climate-related disclosure requirements for reporting issuers in Canada with limited exceptions. If the Company is not able to meet future sustainability reporting requirements of regulators or current and future expectations of investors, insurance providers, or other stakeholders, its business and ability to attract and retain skilled employees, obtain regulatory permits, licences, registrations, approvals, and authorizations from various governmental authorities, and raise capital may be adversely affected.

### ***Physical risks***

Based on the Company's current understanding, the potential physical risks resulting from climate change are long-term in nature and associated with a high degree of uncertainty regarding timing, scope, and severity of potential impacts. Many experts believe global climate change could increase extreme variability in weather patterns such as increased frequency of severe weather, rising mean temperature and sea levels, and long-term changes in precipitation patterns. Extreme hot and cold weather, heavy snowfall, heavy rainfall, and wildfires may restrict the Company's ability to access properties and cause operational difficulties, including damage to equipment. Extreme weather also increases the risk of personnel injury as a result of dangerous working conditions.

### **Political Uncertainty**

In the last several years, the United States and certain European countries have experienced significant political events that have cast uncertainty on global financial and economic markets. Since the 2016 U.S. presidential election, the American administration has withdrawn the United States from the Trans-Pacific Partnership (TPP) and the United States Congress has passed sweeping tax reform, which, among other things, significantly reduces U.S. corporate tax rates. This has affected the competitiveness of other jurisdictions, including Canada.

The U.S. has not indicated any intention to rejoin the TPP but could try to negotiate stronger labour and environmental standards. On January 20, 2021, Mr. Joseph Biden was sworn in as the 46th President of the United States. The political unrest associated with the transition to the new Biden administration was unprecedented in the United States, and the short and long-term impacts on business and capital markets are unknown. Additionally, on January 20, 2021, the Biden administration announced its decision to revoke the federal permit granted by the former administration for the Keystone XL Pipeline, which has overturned a comprehensive regulatory process that lasted more than a decade. In addition, NAFTA has been replaced with the USMCA. This has affected the competitiveness of other jurisdictions, including Canada. On January 25, 2021, the Biden administration signed an executive order with respect to stringent new Made-In-America rules for the U.S. government and has indicated that the exceptions to such rules will be very limited. It is unclear what the impact of this executive order will be and how it may impact the USMCA and the Canada-U.S. supply chain. Further, it is unclear exactly what other actions the U.S. administration will implement, and if implemented, how these actions may impact Canada and in particular the petroleum and natural gas industry.

Any actions taken by the current United States administration may have a negative impact on the Canadian economy and on the businesses, financial condition, results of operations, prospects and the valuation of Canadian crude oil and natural gas companies, which could also negatively impact the Company, which negative impact could prove to be material over time.

In addition to the political disruption in the United States, the impact of the United Kingdom's exit from the European Union remains to be determined, especially in a post-pandemic era. Some European countries have also experienced the rise of anti-establishment political parties and public protests held against open-door immigration policies, trade and globalization. Conflict and political uncertainty also continues to progress in the Middle East. To the extent that certain political actions taken in North America, Europe and elsewhere in the world result in a marked decrease in free trade, access to personnel and freedom of movement, costs for goods and services required for the Company's business could increase and access to skilled labour could decrease, negatively impacting the Company's business, financial condition, results of operations, prospects and the market value of its Common Shares, which negative impact could prove to be material over time.

Beginning in November 2021, Russia began to amass troops along the Ukrainian border, heightening military tension in Eastern Europe. In February 2022, Russia sent troops into pro-Russian separatist regions in Ukraine. Ongoing military tensions between Russia and Ukraine have the potential to threaten supply of oil and gas from the region and demand from other European countries as well as the possibility that other nations will impose certain tariffs and restrictions on oil from Russia. The long-term impacts of the war between Russia and the Ukraine remains unclear, including the responses from other nations globally.

A change in federal, provincial or municipal governments in Canada may have an impact on the directions taken by such governments on matters that may impact the petroleum and natural gas industry including the balance between economic development and environmental policy. Alberta elected a new government in 2019 that is supportive of the Trans Mountain Pipeline expansion project. In January 2020, the Supreme Court of Canada unanimously rejected the government of British Columbia's proposed regulation of the transport of heavy oil products into and through British Columbia, tensions remain between provincial and federal governments. Continued uncertainty and delays, including a temporary shutdown due to flooding in British Columbia have led to decreased investor confidence, increased capital costs and operational delays for producers and service providers.

Following former Alberta Premier Jason Kenney's resignation on May 18, 2022, Danielle Smith was elected as Premier on October 11, 2022. Shortly after her appointment, Premier Smith introduced Bill 1: *The Alberta Sovereignty Within a United Canada Act* (the *Sovereignty Act*). The *Sovereignty Act* was passed on December 8, 2022 and received Royal Assent on December 15, 2022. The *Sovereignty Act*, amongst other things, enables the Alberta Government to choose which federal legislation, policies or programs it will enforce in Alberta, providing an overriding right to not enforce those which the Alberta Government deems to be "harmful" to Alberta's interests or infringe on the Federal Constitution and its division of powers. The *Sovereignty Act* has been opposed by many, including the New Democratic Party and various Indigenous groups who have expressed concern as to how the *Sovereignty Act* will affect Indigenous rights and consultation obligations in Alberta. It is unclear what the effect the *Sovereignty Act* will have on Alberta, including the petroleum and natural gas industry, Alberta businesses and its federal and interprovincial relationships, including the application of certain federal legislation in Alberta, such as the GGPPA and the IAA and the way in which the Alberta Government may address any legislative and policy gaps created. Although the *Sovereignty Act* has not yet been challenged in court, it is possible the *Sovereignty Act's* constitutionality will be challenged.

The federal government was re-elected in 2019, but in a minority position. Another federal election was held on September 20, 2021 and the federal government was re-elected again in a minority position. The ability of the minority federal government to pass legislation will be subject to whether it is able to come to agreement with, and garner the support of, the other elected parties, most of whom are opposed to the development of the petroleum and natural gas industry. The minority federal government will also be required to rely on the support of the other elected parties to remain in power, which provides less stability and may lead to an earlier subsequent federal election. Lack of political consensus, at both the federal and provincial government level, continues to create regulatory uncertainty, the effects of which become apparent on an ongoing basis, particularly with respect to carbon pricing regimes, curtailment of crude oil production and transportation and export capacity, and may affect the business of participants in the petroleum and natural gas industry, which effect could prove to be material over time.

#### **Non-Governmental Organizations and Eco-Terrorism Risks**

The business activities conducted by the Company may, at times, be subject to public opposition. Such public opposition could expose the Company to the risk of higher costs, delays or even project cancellations due to increased pressure on governments and regulators by special interest groups including Indigenous groups, landowners, environmental interest groups (including those opposed to oil and natural gas production operations) and other non-governmental organizations, blockades, legal or regulatory actions or challenges, increased regulatory oversight, reduced support of the federal, provincial or municipal governments, delays in, challenges to, or the revocation of regulatory approvals, permits and/or licenses, and direct legal challenges, including the possibility of climate-related litigation. There is no guarantee that the Company will be able to satisfy the concerns of the special interest groups and non-governmental organizations and attempting to address such concerns may require the Company to incur significant and unanticipated capital and operating expenditures.

In addition, the Company's oilfield services equipment could be the subject of a terrorist attack. If any of the Company's equipment is the subject of a terrorist attack it may have a material adverse effect on the Company's business, financial condition, results of operations and prospects. The Company does not have insurance to protect against the risk from acts of terrorism in Canada, however, does have coverage under the Terrorism Risk Insurance Act in the United States.

#### **Equipment and Technology Risks**

Complex drilling programs for the exploration and development of remaining conventional and unconventional oil and natural gas reserves in North America place high demands on drilling rigs, service rigs, and related equipment. CWC's ability to deliver equipment and services that are more efficient than equipment and services offered by its competitors is critical to continued success. There is no assurance that competitors will not achieve technological improvements that are more advantageous, timely or cost-effective than improvements developed by CWC.

The ability of CWC to meet customer demands in respect of performance and cost will depend upon continuous improvements in operating equipment and there can be no assurance that CWC will be successful in its efforts in this regard or that it will have the resources available to meet this continuing demand. Failure by CWC to do so could have a material adverse effect on CWC's business, financial condition, results of operations and cash flows. No assurances can be given that competitors will not achieve technological advantages over CWC.

In the future, the Company may seek patents or other similar protections in respect of particular tools, equipment and technology; however, the Company may not be successful in such efforts. Competitors may also develop similar tools, equipment and technology to those of the Company thereby adversely affecting the Company's competitive advantage in one or more of its businesses. Additionally, there can be no assurance that certain tools, equipment or technology developed by the Company may not be the subject of future patent infringement claims or other similar matters which could result in

litigation, the requirement to pay licensing fees or other results that could have a material adverse effect on the business, results of operations and financial condition of the Company.

### **Significant Shareholder**

Brookfield Business Partners L.P. (“Brookfield”), through its ownership of 55.8% of CWC's outstanding voting shares is a significant shareholder. As such, Brookfield will have, subject to applicable law, the ability to determine the outcome of certain matters submitted to shareholders for approval in the future, including the election and removal of directors, amendments to CWC's corporate governance documents and certain business combinations. CWC's interests and those of its controlling shareholder may at times conflict, and this conflict might be resolved against CWC's interests. The concentration of control in the hands of a significant shareholder may impact the potential for the initiation, or the success, of an unsolicited bid for CWC's securities.

### **Drilling Rig and Service Rig Construction Risks**

When CWC contracts for the construction of a drilling rig or service rig, the cost of construction of the rig and the timeline for completing the construction, are estimated at that time. Actual costs of construction may, however, vary significantly from those estimated as a result of numerous factors, including, without limitation, changes in input costs such as the price of steel; variations in labour rates; and, to the extent that component parts must be sourced from other countries, fluctuations in exchange rates. In addition, several factors could cause delays in the construction of a drilling rig or service rig, including, and without limitation, shortages in skilled labour and delays or shortages in the supply of component parts. Construction delays may lead to postponements of the anticipated date for deployment of the newly constructed rig into operation and any such postponement could have a negative effect on cash flows generated from operations, of which the effect may be material.

### **Equipment and Parts Availability**

The Company's ability to expand its operations and provide reliable service is dependent upon the timely delivery of new equipment and replacement parts from fabricators and suppliers. A lack of skilled labour to build equipment combined with new competitors entering the oilfield service sector has resulted in increased order times on new equipment and increased uncertainty surrounding final delivery dates. Significant delays in the arrival of new equipment from expected dates may impact future growth and the financial performance of the Company. CWC attempts to mitigate this risk by maintaining strong relations with key fabricators and suppliers.

### **Dependence on Suppliers**

The ability of the Company to compete and grow will be dependent on the Company having access, at a reasonable cost and in a timely manner, to equipment, parts, components and consumables. Failure of suppliers to deliver such equipment, parts, components and consumables at a reasonable cost and in a timely manner would be detrimental to the Company's ability to maintain existing customers and expand its customer list. No assurances can be given that the Company will be successful in maintaining its required supply of equipment, parts, components and consumables.

The Company's ability to provide services to its customers is also dependent upon the availability at reasonable prices of raw materials which the Company purchases from various suppliers, most of whom are located in Canada or the United States. Alternate suppliers exist for all raw materials. In periods of high industry activity periodic industry shortages of certain materials have been experienced and costs may be affected. In contrast, periods of low industry activity levels may cause financial distress for a supplier, thus limiting their ability to continue to operate and provide the Company with necessary services and supplies.

Management maintains relationships with a number of suppliers in an attempt to mitigate this risk. However, if the current suppliers are unable to provide the necessary raw materials, or otherwise fail to deliver products in the quantities required, any resulting delays in the provision of services to the Company's customers could have a material adverse effect on CWC's business, financial condition, results of operations and cash flows.

### **Risks of Interruption, Casualty Losses and Insurance**

CWC's operations are or will be, subject to many hazards inherent in the well drilling, workover and completion industry, including blowouts, cratering, explosions, fires, loss of well control, loss of hole, damaged or lost drilling equipment and damage or loss from inclement weather or natural disasters and reservoir damage. Any of these hazards could result in personal injury or death, damage to or destruction of equipment and facilities, suspension of operations, environmental damage, damage to the property of others and damage to producing or potentially productive oil and natural gas formations. Generally, drilling rig and service rig contracts provide for the division of responsibilities between a drilling rig or service rig provider and its customer, and CWC will seek to obtain indemnification from its customers by contract for certain of these risks. CWC will also seek protection through insurance. However, CWC cannot ensure that such insurance or indemnification

agreements will adequately protect it against liability from all of the consequences of the hazards described above. The occurrence of an event not fully insured or indemnified against, or the failure of a customer or insurer to meet its indemnification or insurance obligations, could result in substantial losses. In addition, insurance may not be available to cover any or all of these risks, or, even if available, may not be adequate. Insurance premiums or other costs may rise significantly in the future, so as to make such insurance prohibitively expensive or uneconomic.

The Company's insurance policies are generally renewed on an annual basis and, depending on factors such as market conditions, the premiums, policy limits and/or deductibles for certain insurance policies can vary substantially. In some instances, certain insurance may become unavailable or available only for reduced amounts of coverage. Significantly increased costs could lead the Company to decide to reduce or possibly eliminate coverage. In addition, insurance is purchased from a number of third-party insurers, often in layered insurance arrangements, some of whom may discontinue providing insurance coverage for their own policy or strategic reasons. Should any of these insurers refuse to continue to provide insurance coverage, the Company's overall risk exposure could be increased and the Company could incur significant costs.

### **Future Capital Requirements and Future Sales of Common Shares by CWC**

CWC may require additional financing in the future to implement its strategies and business objectives. It is possible that such financing will not be available, or if available, will not be available on favourable terms. CWC may issue additional common shares in the future, which may dilute a shareholder's holdings in CWC or negatively affect the market price of common shares. CWC's articles permit the issuance of an unlimited number of common shares. The directors of CWC have the discretion to determine the price and the terms of further issuances of common shares, subject to applicable law. Also, additional common shares will be issued by CWC on the exercise of stock options granted pursuant to CWC's stock option plan, or pursuant to its restricted share unit plan.

### **Capital and Financial Markets**

As future capital expenditures and potential acquisitions will need to be financed out of cash generated from operations, through debt or, if available, equity offerings, the Company's ability to access new capital is dependent on, among other factors, the overall state of capital markets generally, and the appetite for investments in the energy industry and the Company's securities specifically. All of these factors could have a negative effect on CWC's ability to obtain new capital on acceptable terms, or at all, and this could have a material adverse effect on operations and share price.

### **Environmental Protection**

CWC is subject to various environmental laws and regulations enacted in most jurisdictions in which the Company operates, which primarily govern the manufacture, processing, importation, transportation, handling and disposal of certain materials used in the Company's operations. CWC believes that all of the Company's business lines are currently in compliance with such laws and regulations. CWC's customers are subject to similar laws and regulations, as well as limits on emissions into the air and discharges into surface and sub-surface waters. While regulatory developments that may follow in subsequent years could have the effect of reducing industry activity, CWC cannot predict the nature of the restrictions that may be imposed. CWC may be required to increase operating expenses or capital expenditures in order to comply with any new restrictions or regulations.

Historically, environmental protection requirements have not had a significant financial operational effect on capital expenditures, earnings or the competitive position of the Company. Environmental protection requirements are not presently anticipated to have a significant effect on such matters in the future.

The services provided by CWC, in some cases, involve flammable products being pumped under high pressure. To address these risks, CWC has developed and implemented safety and training programs. In addition, a comprehensive insurance and risk management program has been established to protect CWC's assets and operations. CWC also complies with current environmental requirements and maintains ongoing participation in various industry-related committees and programs.

The Company has established procedures to address compliance with current environmental laws and regulations and monitors its practices concerning the handling of environmentally hazardous materials. However, there can be no assurance that the Company's procedures will prevent environmental damage from occurring from spills of materials handled by the Company or that such damage has not already occurred. On occasion, substantial liabilities to third parties may be incurred. The Company may have the benefit of insurance maintained by it or the operator; however, the Company may become liable for damages against which it cannot adequately insure or against which it may elect not to insure because of high costs or other reasons.

### **Third-Party Credit Risk**

CWC is exposed to third-party credit risk through its contractual arrangements with other parties. In the event such entities fail to meet their contractual obligations to the Company, such failures could have a material adverse effect on the Company.

### **Failure to Realize Anticipated Benefits of Acquisitions**

The Company makes acquisitions of businesses and assets in the ordinary course of business. Achieving the benefits of acquisitions depends in part on successfully consolidating functions, retaining key employees and customer relationships and integrating operations and procedures in a timely and efficient manner. Such integration may require substantial management effort, time and resources, may divert management's focus from other strategic opportunities and operational matters and ultimately the Company may fail to realize the anticipated benefits of acquisitions.

### **Management of Growth**

The Company may be subject to growth-related risks including capacity constraints and pressure on its internal systems and controls. The ability of the Company to manage growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train and manage its employee base. If the Company is unable to deal with this growth, it may have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

### **CWC May Make Dispositions of Businesses and Assets in the Ordinary Course of Business**

Management continually assesses the value and contribution of services provided and the assets required to provide such services. In this regard, non-core assets are periodically disposed of, so that CWC can focus its efforts and resources more efficiently. Depending on the state of the market for such non-core assets, certain non-core assets of CWC, if disposed of, could be expected to realize less than their carrying value on the financial statements of CWC.

### **Tax Matters**

The taxation of companies is complex. In the ordinary course of business, CWC is subject to ongoing audits by tax authorities. While CWC believes that its tax filing positions are appropriate and supportable, it is possible that tax matters, including the calculation and determination of revenue, expenditures, deductions, credits and other tax attributes, taxable income and taxes payable, may be reviewed and challenged by the tax authorities. In addition, the tax filing positions of businesses acquired by CWC may be reviewed and challenged by the tax authorities. If such a challenge were to succeed, it could have a material adverse effect on CWC's tax position. Further, the interpretation of, and changes in, tax laws, whether by legislative or judicial action or decision and the administrative policies and assessing practices of taxation authorities, could materially adversely affect CWC's tax position. As a consequence, CWC is unable to predict with certainty the effect of the foregoing on CWC's effective tax rate and earnings.

CWC regularly reviews the adequacy of its tax provisions and believes that it has adequately provided for those matters. Should the ultimate outcomes materially differ from the provisions, CWC's effective tax rate and earnings may be affected positively or negatively in the period in which the matters are resolved. CWC intends to mitigate this risk by ensuring staff is well trained and supervised and that tax filing positions are carefully scrutinized by management and external consultants, as appropriate.

There can be no assurance that income tax laws or the interpretation thereof in any of the jurisdictions in which CWC operates will not be changed or interpreted or administered in a manner which adversely affects CWC and its shareholders. In addition, there is no assurance that the Canada Revenue Agency or a provincial or foreign tax agency (collectively the "**Tax Agencies**") will agree with the manner in which CWC or its subsidiaries calculate their income or taxable income for tax purposes or that any of the Tax Agencies will not change their administrative practices to the detriment of CWC or its shareholders (or both).

### **Vulnerability to Market Changes**

Fixed costs, including costs associated with leases, labour and depreciation will account for a significant portion of the Company's costs and expenses. As a result, reduced utilization of equipment and other fixed assets resulting from reduced demand, equipment failure, weather or other factors could significantly affect financial results.

### **Alternatives to and Changing Demand for Petroleum Products**

Regulation, fuel conservation measures, alternative fuel requirements, increasing consumer demand for alternatives to oil and natural gas, and technological advances in fuel economy and energy generation devices could reduce the demand for crude oil and other liquid hydrocarbons. The Company cannot predict the impact of changing demand for oil and natural gas products, and any major changes may have a material adverse effect on the Company's business, financial condition, results of operations and cash flows.

## **Interest Rate Risk**

The Company is exposed to interest rate price risk as its bank loan has floating interest rate terms. However, the floating interest rate terms do give rise to interest rate cash flow risk as interest payments are recalculated as the market rates change. Management does anticipate that interest rates are likely to continue to increase in 2023 to combat inflation, but do not expect rates to increase to a level that will have a large impact on future cash flows.

## **Conflicts of Interest**

Certain of the directors and officers of the Company are also directors and officers of other oil and natural gas exploration and/or production entities and oil and natural gas services companies, and conflicts of interest may arise between their duties as officers and directors of the Company and as officers and directors of such other companies. Such conflicts must be disclosed in accordance with, and are subject to such other procedures and remedies as apply, under the Alberta Business Corporations Act.

## **Legal and Regulatory Proceedings**

The Company is involved in legal and regulatory proceedings from time to time in the ordinary course of business. No assurance can be given as to the final outcome of any legal or regulatory proceedings or that the ultimate resolution of any legal proceedings will not have a material adverse effect on the Company.

## **Indigenous Land and Rights Claims**

Opposition by Indigenous groups to the conduct of the Company's operations in any of the jurisdictions in which the Company conducts business may negatively impact it in terms of public perception, diversion of management's time and resources, legal and other advisory expenses, and could adversely impact the Company's progress.

Some Indigenous groups have established or asserted Indigenous treaty, title and rights to portions of Canada. No certainty exists that any lands currently unaffected by claims brought by Indigenous groups will remain unaffected by future claims. Such claims, if successful, could have a material adverse impact on its operations or pace of growth.

The Canadian federal and provincial governments have a duty to consult with Indigenous people when contemplating actions that may adversely affect the asserted or proven Indigenous or treaty rights and, in certain circumstances, accommodate their concerns. The scope of the duty to consult by federal and provincial governments varies with the circumstances and is often the subject of ongoing litigation. The fulfillment of the duty to consult Indigenous people and any associated accommodations may adversely affect the Company's ability to, or increase the timeline to, obtain or renew, permits, leases, licenses and other approvals, or to meet the terms and conditions of those approvals. For example, a recent British Columbia Supreme Court decision determined that the cumulative impacts of government sanctioned industrial development on the traditional territories of a First Nations group in northeast British Columbia breached that group's treaty rights. Going forward, this decision may have significant impacts on the regulation of industrial activities in northeast British Columbia. Further, it may lead to similar claims of cumulative effects across Canada in other areas covered by numbered treaties. The long-term impacts of and associated risks of the decision on the Canadian oil and natural gas industry and the Company remain uncertain.

In addition, the federal government has introduced legislation to implement the UNDRIP. Other Canadian jurisdictions, including British Columbia, have also introduced or passed similar legislation, or begun considering the principles and objectives of UNDRIP, or may do so in the future. The means and timelines associated with UNDRIP's implementation by government is uncertain; additional processes may be created or legislation amended or introduced associated with project development and operations, further increasing uncertainty with respect to project regulatory approval timelines and requirements.

## **Intellectual Property Litigation**

Due to the rapid development of oil and natural gas technology, in the normal course of the Company's operations, the Company may become involved in, named as a party to, or be the subject of, various legal proceedings in which it is alleged that the Company has infringed the intellectual property rights of others or which the Company initiates against others it believes are infringing upon its intellectual property rights. The Company's involvement in intellectual property litigation could result in significant expense, adversely affecting the development of its assets or intellectual property or diverting the efforts of its technical and management personnel, whether or not such litigation is resolved in the Company's favour. In the event of an adverse outcome as a defendant in any such litigation, the Company may, among other things, be required to: (a) pay substantial damages and/or cease the development, use, sale or importation of processes that infringe upon other patented intellectual property; (b) expend significant resources to develop or acquire non-infringing intellectual property; (c) discontinue processes incorporating infringing technology; or (d) obtain licences to the infringing intellectual property. However, the Company may not be successful in such development or acquisition, or such licences may not be available on

reasonable terms. Any such development, acquisition or licence could require the expenditure of substantial time and other resources and could have a material adverse effect on the Company's business and financial results.

### **Breach of Confidentiality**

While discussing potential business relationships or other transactions with third parties, the Company may disclose confidential information relating to its business, operations or affairs. Although confidentiality agreements are generally signed by third parties prior to the disclosure of any confidential information, a breach could put the Company at competitive risk and may cause significant damage to its business. The harm to the Company's business from a breach of confidentiality cannot presently be quantified, but may be material and may not be compensable in damages. There is no assurance that, in the event of a breach of confidentiality, the Company will be able to obtain equitable remedies, such as injunctive relief, from a court of competent jurisdiction in a timely manner, if at all, in order to prevent or mitigate any damage to its business that such a breach of confidentiality may cause.

### **Cyber-Security Threats and Reliance on Information Technology**

CWC's operations are dependent on the functioning of several information technology systems. Exposure of CWC's information technology systems to external threats poses a risk to the security of these systems. Such cyber-security threats include unauthorized access to information technology systems due to hacking, viruses and other causes that can result in service disruptions, system failures and the disclosure, deliberate or inadvertent, of confidential business information. Significant interruption or failure of any or all of these systems could result in operational outages, delays, lost profits, lost data, increased costs, and other adverse outcomes. These factors could include a loss of communication links or reliable information, security breaches by computer hackers and cyber terrorists, and the inability to automatically process commercial transactions or engage in similar automated or computerized business activities.

Increasingly, social media is used as a vehicle to carry out cyber phishing attacks. Information posted on social media sites, for business or personal purposes, may be used by attackers to gain entry into the Company's systems and obtain confidential information. The Company restricts the social media access of its employees and periodically reviews, supervises, retains and maintains the ability to retrieve social media content. Despite these efforts, as social media continues to grow in influence and access to social media platforms becomes increasingly prevalent, there are significant risks that the Company may not be able to properly regulate social media use and preserve adequate records of business activities and client communications conducted through the use of social media platforms. Additionally, insensitive messages, negative reviews, or inappropriate online behaviour of employees on social media presents reputational risks to the Company.

Further, the Company is subject to a variety of information technology and system risks as a part of its normal course operations, including potential breakdown, invasion, virus, cyber-attack, cyber-fraud, security breach, and destruction or interruption of the Company's information technology systems by third parties or insiders. Unauthorized access to these systems by employees or third parties could lead to corruption or exposure of confidential, fiduciary or proprietary information, interruption to communications or operations or disruption to our business activities or our competitive position. In addition, cyber phishing attempts, in which a malicious party attempts to obtain sensitive information such as usernames, passwords, and credit card details (and money) by disguising itself as a trustworthy entity in electronic communication, have become more widespread and sophisticated in recent years. If the Company becomes a victim of a cyber phishing attack it could result in a loss or theft of the Company's financial resources or critical data and information or could result in a loss of control of the Company's technological infrastructure or financial resources. The Company applies technical and process controls in line with industry-accepted standards to protect our information assets and systems; however, these controls may not adequately prevent cyber-security breaches. Disruption of critical information technology services, or breaches of information security, could have a negative effect on our performance and earnings, as well as on our reputation. The significance of any such event is difficult to quantify, but may in certain circumstances be material and could have a material adverse effect on the Company's business, financial condition and results of operations.

### **Forward-Looking Information may Prove Inaccurate**

Shareholders and prospective investors are cautioned not to place undue reliance on the company's forward-looking information. By its nature, forward-looking information involves numerous assumptions, known and unknown risks and uncertainties, of both a general and specific nature, that could cause actual results to differ materially from those suggested by the forward-looking information or contribute to the possibility that predictions, forecasts or projections will prove to be materially inaccurate.

## Forward-Looking Information

---

*This MD&A contains certain forward-looking information and statements (collectively, "forward-looking statements") within the meaning of applicable Canadian securities legislation. Certain statements contained in this MD&A, including those contained in the section titled "Outlook" and including statements which may contain such words as "anticipate", "could", "continue", "should", "seek", "may", "intend", "likely", "plan", "estimate", "believe", "expect", "will", "objective", "ongoing", "project" and similar expressions are intended to identify forward-looking statements. In particular, this MD&A contains forward-looking statements including management's assessment of future plans and operations, planned levels of capital expenditures, expectations as to industry and Company activity levels in various areas, expectations on the sustainability of future cash flow and earnings, expectations with respect to crude oil and natural gas prices, expectations regarding the level and type of drilling and production and related drilling and well services activity in the WCSB and U.S. basins, expectations regarding entering into long term drilling contracts and expanding our customer base, and expectations regarding the business, operations, revenue and debt levels of the Company in addition to general economic conditions including industry labour shortages, inflationary pressures and a rising interest rate environment and the impact of those conditions on the Company. Although the Company believes that the expectations and assumptions on which such forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because the Company can give no assurances that they will prove to be correct. Since forward-looking statements address future events and conditions, by their very nature they involve inherent risks and uncertainties. Factors that could cause actual results to vary from forward-looking statements or may affect the operations, performance, development and results of CWC's businesses include, among other things: risks and assumptions associated with operations, such as CWC's ability to successfully implement its strategic initiatives and achieve expected benefits therefrom; assumptions concerning operational reliability; the ability to access sufficient capital from internal and external sources including debt and equity capital; risks inherent in CWC's Canadian and U.S. operations; CWC's ability to generate sufficient cash flow from operations to meet its current and future obligations; risks associated with the failure to finalize formal agreements with counterparties in certain circumstances; CWC's ability to make capital investments and the amounts of capital investments; increases in maintenance, operating or financing costs; the realization of the anticipated benefits of transactions; the possibility that CWC is unable to identify or consummate any acceptable strategic alternatives; the availability and price of labour, equipment and construction materials; the status, credit risk and continued existence of customers having contracts with CWC and its affiliates; availability of energy commodities; volatility of and assumptions regarding prices of energy commodities; competitive factors, including competition from third parties in the areas in which CWC operates or intends to operate, pricing pressures and supply and demand in the drilling and service rig business; fluctuations in currency and interest rates; inflation; risks of war (including the war in Ukraine), hostilities, civil insurrection, pandemics (including COVID-19), instability and political and economic conditions in or affecting jurisdictions in which CWC and its affiliates operate; severe weather conditions and risks related to climate change; terrorist threats; risks associated with technology; changes in laws and regulations, including environmental, regulatory and taxation laws, and the interpretation of such changes to CWC's business; the risks associated with existing and potential or threatened future lawsuits, legal proceedings and regulatory actions against CWC and its affiliates; availability of adequate levels of insurance; difficulty in obtaining necessary regulatory approvals or land access rights and maintenance of support of such approvals and rights; the effects and impacts of the COVID-19 pandemic on CWC's business and general economic and business conditions and markets; and such other risks and uncertainties described in the Annual MD&A under the section entitled "Risk Factors" and from time to time in CWC's reports and filings with the Canadian securities authorities. The impact of any one assumption, risk, uncertainty or other factor on a forward-looking statement cannot be determined with certainty, as these are interdependent and CWC's future course of action depends on management's assessment of all information available at the relevant time. You can find a discussion of those risks and uncertainties in the Annual MD&A under the section entitled "Risk Factors" and in CWC's other securities filings at [www.sedar.com](http://www.sedar.com).*

*Readers are cautioned that the foregoing list of assumptions, risks, uncertainties and factors is not exhaustive. See also the section entitled "Risks and Uncertainties" for further risk factors. The forward-looking statements contained in this MD&A are made as of the date of this MD&A and, except to the extent expressly required by applicable securities laws and regulations, CWC assumes no obligation to update or revise forward-looking statements made herein or otherwise, whether as a result of new information, future events, or otherwise. The forward-looking statements contained in this MD&A and all subsequent forward-looking statements, whether written or oral, attributable to CWC or persons acting on CWC's behalf are expressly qualified in their entirety by these cautionary statements. Any forward-looking statements made previously may be inaccurate now.*

Add: Current liabilities	14,848	9,709	7,004
<b>Net debt<sup>(4)</sup></b>	<b>7,062</b>	<b>26,881</b>	<b>18,162</b>

<sup>(1)</sup>Adjusted EBITDA (earnings before interest and finance costs, income tax expense, depreciation, gain or loss on disposal of asset, impairment of assets, goodwill impairment, transaction costs, stock based compensation and other one-time non-cash gains and losses) is not a recognized measure under IFRS. Management believes that in addition to net income, Adjusted EBITDA is a useful supplemental measure as it provides an indication of the Company's ability to generate cash flow in order to fund working capital, service debt, pay current income taxes, repurchase common shares under the Normal Course Issuer Bid, and fund capital programs. Investors should be cautioned, however, that Adjusted EBITDA should not be construed as an alternative to net income (loss) determined in accordance with IFRS as an indicator of the Company's performance. CWC's method of calculating Adjusted EBITDA may differ from other entities and accordingly, Adjusted EBITDA may not be comparable to measures used by other entities. Adjusted EBITDA margin is calculated as Adjusted EBITDA divided by revenue and provides a measure of the percentage of Adjusted EBITDA per dollar of revenue. Adjusted EBITDA per share is calculated by dividing Adjusted EBITDA by the weighted average number of shares outstanding as used for the calculation of earnings per share.

<sup>(2)</sup>Gross margin is calculated from the statement of comprehensive income (loss) as revenue less direct operating costs and is used to assist management and investors in assessing the Company's financial results from operations excluding fixed overhead costs. Gross margin percentage is calculated as gross margin divided by revenue. The Company believes the relationship between revenue and costs expressed by the gross margin percentage is a useful measure when compared over different financial periods as it demonstrates the trending relationship between revenue, costs and margins. Gross margin and gross margin percentage are non-GAAP measures and do not have any standardized meaning prescribed by IFRS and may not be comparable to similar measures provided by other companies.

- <sup>(3)</sup>Working capital (excluding debt) is calculated based on current assets less current liabilities excluding the current portion of long-term debt. Working capital (excluding debt) is used to assist management and investors in assessing the Company's liquidity. Working capital (excluding debt) does not have any meaning prescribed under IFRS and may not be comparable to similar measures provided by other companies. Working capital (excluding debt) ratio is calculated as current assets divided by the difference of current liabilities less the current portion of long-term debt.
- <sup>(4)</sup>Net debt is calculated based on long-term debt less current assets plus current liabilities. Net debt is not a recognized measure under IFRS and does not have any standardized meaning prescribed by IFRS and may not be comparable to similar measures provided by other companies. Management believes net debt is a useful indicator of a company's debt position.

**CWC ENERGY SERVICES CORP.**

Consolidated Financial Statements

For the years ended December 31, 2022 and 2021

## INDEPENDENT AUDITOR'S REPORT

To the shareholders of **CWC Energy Services Corp.**

### Opinion

We have audited the consolidated financial statements of CWC Energy Services Corp. (the "Company") which comprise the consolidated statements of financial position as at December 31, 2022 and 2021, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at December 31, 2022 and 2021, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

### Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor’s responsibilities for the audit of the consolidated financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key audit matter	How our audit addressed the key audit matter
<p>Impairment reversal recorded pertaining to Contract Drilling cash generating unit.</p> <p>As of December 31, 2022, management assessed that indicators of impairment reversal existed with respect to the Company’s Contract Drilling cash generating unit (“CGU”). Refer to Note 3 Significant Accounting Policies of the consolidated financial statements for a description of the Company’s accounting policy with respect to impairment of non-financial assets.</p> <p>The Company’s balance sheet includes \$237.6 million in property, plant and equipment. Management recorded an impairment reversal on the Contract Drilling CGU of \$22.9 million as of and for the year ended December 31, 2022, based on the recoverable amount of the CGU exceeding it carrying amount.</p> <p>The recoverable amount of a CGU is the greater of its value-in-use and its fair value less costs of disposal. The Company discloses significant judgments, estimates and assumptions and the result of their analysis in respect of impairment in Notes 2 and 5 to the consolidated financial statements.</p> <p>Auditing the Company’s estimated recoverable amount was complex due to the subjective nature of the various management inputs and assumptions and the significant effect changes in these would have on the recoverable amount. Additionally, the evaluation of this estimate required specialized skills and knowledge. The primary inputs noted in value in use were the discount rate and estimated cash flows arising from the Company’s future drilling activities.</p>	<p>To test the estimated recoverable amount of the Contract Drilling CGU, we performed the following procedures, among others:</p> <ul style="list-style-type: none"> <li>• With the assistance of our valuation specialists, we evaluated the Company’s model, valuation methodology, and discount rate. We assessed the selection and application of the discount rate by evaluating the inputs and mathematical accuracy of the calculation.</li> <li>• We assessed the accuracy of management’s forecasting by comparing management’s past projections to actual performance.</li> <li>• We assessed the cash flow projections through comparison to historical results, assessed reasonability of the cashflows (Revenue, EBITDA, corporate expenses, capital expenditure, working capital), comparing to third-party sources.</li> <li>• We performed sensitivity analysis on EBITDA to evaluate any resulting changes to the recoverable amount.</li> <li>• We assessed the adequacy of the Company’s disclosure around impairment and impairment reversal as included in Note 5 to the consolidated financial statements.</li> </ul>

## **Other information**

Management is responsible for the other information. The other information comprises:

- Management's Discussion and Analysis
- The information, other than the consolidated financial statements and our auditor's report thereon, in the Annual Report

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion & Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

The Annual Report is expected to be made available to us after the date of the auditor's report. If based on the work we will perform on this other information, we conclude there is a material misstatement of other information, we are required to report that fact to those charged with governance.

## **Responsibilities of management and those charged with governance for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## **Auditor's responsibilities for the audit of the consolidated financial statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

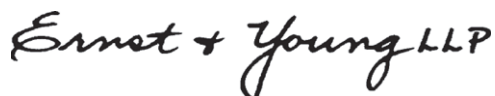

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Robert Troy Jubenvill.

# CWC ENERGY SERVICES CORP.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

---

### 1. Reporting entity

CWC Energy Services Corp. (“CWC” or the “Company”) is incorporated under the Business Corporations Act (Alberta). The address of the Company’s head office is Suite 2910, 605 – 5th Avenue SW, Calgary, Alberta, Canada. The Company is an oilfield services company providing drilling and well servicing to oil and gas exploration and development companies throughout the Western Canadian Sedimentary Basin (“WCSB”) and select United States basins including the Permian, Eagle Ford, Niobrara, Denver-Julesburg (“DJ”), Powder River and Bakken. These consolidated financial statements reflect only the Company’s proportionate interests in such activities and are comprised of the Company and its subsidiaries. The Company’s common stock is listed and traded on the TSX Venture Exchange under the symbol CWC. Additional information regarding CWC’s business is available in CWC’s most recent Annual Information Form available on SEDAR at [www.sedar.com](http://www.sedar.com), on the Company’s website at [www.cwcenergyservices.com](http://www.cwcenergyservices.com), or by contacting the Company at the address noted above.

### 2. Basis of presentation

#### (a) Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”). The accounting policies that follow have been consistently applied to all years presented.

These consolidated financial statements were approved by the Board of Directors on March 1, 2023.

#### (b) Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis.

#### (c) Functional and presentation currency

These annual consolidated financial statements are presented in Canadian dollars, which is the Company’s functional currency. All financial information presented in Canadian dollars has been rounded to the nearest thousand except where otherwise noted.

#### (d) Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with IFRS requires that certain estimates and judgments be made with respect to the reported amounts of revenue and expenses and the carrying amounts of assets and liabilities. These estimates are based on historical experience and management’s judgment. Anticipating future events involves uncertainty and consequently the estimates used by management in the preparation of the consolidated financial statements may change as future events unfold, additional experience is acquired or the Company’s operating environment changes. In many cases the use of judgment is required to make estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Further details of the nature of these estimates and assumptions may be found in the relevant notes to the consolidated financial statements.

Management considers the following to be the most significant of the judgments, apart from those involved in making estimates, made in preparation of the consolidated financial statements:

#### Determination of cash-generating units

For the purpose of assessing the impairment of tangible and intangible assets, assets are grouped at the lowest level for which there are separately identifiable cash flows (cash-generating units or “CGUs”). The grouping of assets into CGUs requires management to exercise significant judgment.

#### Impairment of tangible assets

Property, plant and equipment are reviewed annually with respect to their useful lives, or more frequently if events or changes in circumstances indicate that the assets might be impaired. If any such indication exists, the

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

---

recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. The recoverable amount is the higher of fair value less costs to dispose (“FVLCD”) and value in use (“VIU”). In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. As a result, any impairment losses are a result of management’s best estimates of expected revenue, expenses and cash flows at a specific point in time. These estimates are subject to measurement uncertainty as they are dependent on factors outside of management’s control. In addition, by their nature impairment tests involve a significant degree of judgment as expectations concerning future cash flows and the selection of appropriate market inputs are subject to considerable risks and uncertainties.

#### Depreciation

Depreciation of property and equipment is carried out on the basis of the estimated useful lives of the related assets. Assessing the reasonableness of the estimated useful lives of property, plant and equipment requires judgment and is based on currently available information, including historical experience by the Company. Additionally, the Company may consult with external equipment builders or manufacturers to assess whether the methodologies and rates utilized are consistent with their expectations. Changes in circumstances, such as technological advances, changes to the Company’s business strategy, changes in the Company’s capital strategy or changes in regulations may result in the actual useful lives differing from the Company’s estimates. A change in the remaining useful life of a group of assets, or their expected residual value, will affect the depreciation rate used to amortize the group of assets and thus affect depreciation expense as reported in the Company’s results of operations. These changes are reported prospectively when they occur.

#### Income taxes

The Company uses the liability method of accounting for income taxes. Under this method, deferred income tax assets and liabilities are recorded based on temporary differences between the carrying amount of an asset or liability and its tax base. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. The Company’s operations are complex and computation of the provision for income taxes involves tax interpretations, regulations and legislation that are continually changing. Any changes in the estimated amounts are recognized prospectively in the consolidated statements of comprehensive income (loss).

### **3. Significant accounting policies**

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements.

#### (a) Property and equipment and depreciation

Property and equipment are recorded at cost less accumulated depreciation and accumulated impairment. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the following:

- the cost of materials and direct labour; and
- any other costs directly attributable to bringing the assets to a working condition for their intended use.

The costs of replacing a component of property and equipment are capitalized only when it is probable that the future economic benefits associated with the component will flow to the Company. The carrying amount of the replaced component is derecognized. The cost of routine repairs and maintenance is expensed as incurred.

When parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

Any gain or loss on disposal of an item of property and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized in profit or loss.

Items of property and equipment are depreciated from the date that they are inspected and determined to be ready for field use, or in respect of internally constructed assets, from the date that the asset is completed or ready for use.

The following is a summary of depreciation estimates for the Company's property and equipment:

Assets	Method	Rate
Drilling rigs and related equipment	Straight-line with residual values of up to 10%	25 years
Buildings	Straight-line with residual values of up to 20%	25 years
Production equipment – service rigs	Straight-line with residual values of up to 10%	25 years
Production equipment - Level IV recertifications	Units of production	24,000 operating hours
Support equipment	Straight-line with residual values of up to 15%	2 to 10 years
Miscellaneous equipment	Straight-line with no residual value	3 to 5 years

Assets under construction are not depreciated until they are available for use. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Land is not depreciated.

Depreciation method, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

#### (b) Impairment of non-financial assets

Non-financial assets are assessed at the end of each reporting period to determine if any indication of impairment exists. If any such indication exists, the Company estimates the recoverable amount of the asset. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

If an impairment loss has been recognized in a prior period, an assessment is performed at each reporting date to determine if there are indicators that the circumstances which led to the impairment loss have reversed. If the change in circumstances results in the recoverable amount being higher than the carrying value after the impairment loss, then the impairment loss (net of depreciation that would otherwise have been recorded) is reversed.

The recoverable amount of an asset or CGU is the greater of its VIU and its FVLCD. In assessing VIU, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

Impairment losses or reversals are recognized in profit or loss. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of goodwill, if any, allocated to the CGU (group of CGUs), and then to reduce the carrying amounts of the other assets in the CGU (group of CGUs) on a pro-rata basis.

CWC's corporate assets, which do not generate separate cash inflows, are allocated to the CGUs on a reasonable basis for impairment testing purposes.

#### (c) Financial instruments

Financial assets include cash and accounts receivable. The Company determines the classification of its financial assets at initial recognition and records the assets at their fair value. Cash and accounts receivable are carried at amortized cost.

All financial liabilities are initially recognized at fair value net of transaction costs and subsequently carried at amortized cost.

## **CWC ENERGY SERVICES CORP.**

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

---

Derivative financial instruments are classified at fair value through profit or loss. The Company's derivatives are interest rate swaps with changes in fair value recorded in the consolidated statements of comprehensive income.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained is recognized as a separate asset or liability.

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire.

Financial assets and liabilities are offset, and the net amount is presented in the consolidated statement of financial position when, and only when, there is a legal right to offset the amounts and the Company intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

#### (d) Cash

Cash comprises cash balances that are subject to an insignificant risk of changes in their fair value and are used by the Company in the management of its short-term commitments.

#### (e) Common shares

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares are recognized as a deduction from equity, net of any tax effects.

When share capital recognized as equity is repurchased, the amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognized as a deduction from equity. Repurchased shares are returned to treasury and cancelled no more than six months from repurchase.

#### (f) Provisions

A provision is recognized in the consolidated financial statements when the Company has an obligation, whether existing or potential as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation. If the obligation is determined to be material, then the estimated amount of the provision is determined by discounting the expected future cash outflows. As at December 31, 2022 and 2021, there were no provisions recognized in the consolidated financial statements.

#### (g) Leases

A contract is, or contains, a lease if the contract conveys the right of control of the use of an identified asset for a period of time in exchange for considerations. A lease obligation is recognized at the commencement of the lease term at the present value of the lease payments that are not paid at that date. Interest expense is recognized on the lease obligations using the effective interest rate method and payments are applied against the lease obligation. At the commencement date, a corresponding right of use ("ROU") asset is recognized at the amount of the lease obligation, adjusted for lease incentives received and initial direct costs. Depreciation is recognized on the ROU asset over the lease term.

#### (h) Revenue recognition

Contract Drilling provides drilling rigs and related ancillary equipment to oil and gas exploration and production companies. Customer contracts may be for a single well, multiple wells or a fixed term and are based upon daily, hourly or contracted rates. The Company recognizes revenue when it has a right to invoice for all contracts in which the value of the performance completed to date directly corresponds with the right to consideration. Operating time is measured through industry standard tour sheets that document the daily activity of the rig.

Production Services provides well servicing to oil and gas exploration and production companies through the use of service rigs. In general, Production Services are not performed under long-term contracts and do not include penalties for termination. Contracts are based upon daily, hourly or contracted rates and the Company recognizes revenue when it has a right to invoice for all contracts in which the value of the performance

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

---

completed to date directly corresponds with the right to consideration. Operating time is measured through daily tour sheets and field tickets.

The Company has both short-term contracts with a term less than one year and long-term contracts with a term greater than one year. The Company satisfies its performance obligations related to both short and long-term contracts on a per day or hourly basis. For both its Contract Drilling and Production Services, the Company does not expect to have any revenue contracts where the period between the transfer of the promised goods or services to the customer and payments by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money. The Company does not incur material costs to obtain contracts with customers and consequently, does not recognize any contract assets. The Company does not have any contract liabilities associated with its Contract Drilling or Production Services customer contracts. As revenue from Contract Drilling and Production Services contracts is recognized as invoiced, the transaction price allocated to remaining performance obligations and an explanation of when the Company expects to recognize such amounts as revenue is not disclosed.

#### (i) Finance costs

Finance costs encompass interest expense on financial liabilities and accretion expense on debt issuance costs and are recognized in profit or loss in the period in which they are incurred using the effective interest method.

#### (j) Foreign currency translation

Functional currency is the currency of the primary economic environment in which the Company and its subsidiaries operate and is normally the currency in which the entity primarily generates and expends cash. The financial statements of the Company's subsidiaries are translated into Canadian dollars, which is the presentation currency of the Company. The assets and liabilities of subsidiaries whose functional currencies are other than Canadian dollars are translated into Canadian dollars at the foreign exchange rate at the balance sheet date, while revenues and expenses of such subsidiaries are translated using average monthly foreign exchange rates, which approximate the foreign exchange rates on the dates of the transactions. Foreign exchange differences arising on translation are included in other comprehensive income.

The Company's transactions in foreign currencies are translated to the appropriate functional currency at the foreign exchange rate on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the foreign exchange rate at the balance sheet date and differences arising on translation are recognized in net income. Non-monetary assets that are measured in terms of historical cost in foreign currency are translated using the exchange rate at the dates of the transactions.

#### (k) Income Tax

Tax is recognized in profit or loss, except to the extent that it relates to a business combination or items recognized in other comprehensive income or directly in equity.

Current tax is the expected tax on taxable income less adjustments to prior periods using tax rates enacted, or substantively enacted as at the reporting date in jurisdictions where the Company operates.

Deferred income taxes are recognized based on temporary differences arising between the tax value of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill and are not accounted for if they arise from the initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable income. Deferred income taxes are calculated on the basis of the tax laws enacted or substantively enacted as at the reporting date and apply to when the related deferred income tax asset is realized, or the deferred income tax liability is settled.

Current and deferred income tax assets and liabilities are offset when there is a legally enforceable right to settle on a net basis and when such assets and liabilities relate to income taxes imposed by the same taxation authority.

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

---

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

#### (l) Employee costs

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid under the bonus plan when a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can reasonably be estimated.

Termination benefits are recognized as an expense when the Company is demonstrably committed, without realistic possibility of withdrawal to a formal detailed plan to either terminate employment before the normal retirement date or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Company has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be measured reliably. If benefits are payable more than twelve months after the reporting date, then they are discounted to their present value.

Under the Company's stock option plan described in note 8(c), options to purchase common shares are granted to directors, officers and employees. The fair value of common share purchase options is calculated at the date of grant using the Black-Scholes option pricing model and that value is recorded as compensation expense over the vesting period of the option with an offsetting credit to contributed surplus. Upon exercise of the share purchase options: i) if shares are issued from treasury, consideration paid together with the amount previously recognized in contributed surplus is recorded as an increase in common share capital, or ii) if a cash payment is made to the participant, contributed surplus is reduced by the amount of the cash payment. It is the Company's intent to settle future common share purchase options by means of the issuance of shares from treasury.

Under the Company's restricted share unit plan described in note 8(d), RSUs are granted to directors, officers and employees. The fair value of RSUs is calculated at the date of grant using the market price of the common shares and that value is recorded as compensation expense over the vesting period of the RSU with an offsetting credit to contributed surplus. Upon settlement of the RSUs: i) if shares are issued from treasury, share capital is increased and contributed surplus is decreased by the amount previously expensed for stock based compensation for the RSUs, or ii) if common shares are purchased in open market purchases or purchases pursuant to private transactions with third parties, the amount paid for such purchases is recorded as a reduction in contributed surplus, or iii) if a cash payment is made to the participant, contributed surplus is reduced by the amount of the cash payment. It is the Company's intent to settle future RSUs by means of the issuance of shares from treasury.

The Company estimates future forfeitures for both stock options and RSUs and expenses stock options and RSUs based on the Company's estimate of stock options and RSUs expected to reach vesting. Any difference between the number of stock options and RSUs expected to vest and the number of stock options and RSUs which actually vest is accounted for as a change in estimate when those stock options or RSUs become vested or are forfeited before vesting.

#### (m) Per share amounts

Basic per share amounts are calculated using the weighted average number of common shares outstanding during the period. Diluted per share amounts are calculated considering the effects of all dilutive potential common shares. The Company's dilutive potential common shares assumes that all dilutive stock options and restricted share units are exercised, and the proceeds obtained on the exercise of dilutive stock options would be used to purchase common shares at the average market price during the period. The weighted average number of common shares outstanding is then adjusted accordingly.

## **CWC ENERGY SERVICES CORP.**

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

---

#### (n) Segmented information

The operating divisions are grouped into two distinct reporting segments: Contract Drilling and Production Services and are supported by the Corporate segment. The reporting segments share common economic characteristics and are differentiated by the type of service provided and customer needs. The reporting segments' financial results are reviewed regularly by the Company's senior management. Senior management makes decisions about resource allocation and assesses segment performance based on the internally prepared segment information.

#### (o) Government grants

A government grant is recognized where there is reasonable assurance that the grant will be received and that the Company will comply with any conditions attached to the grant. When the grant relates to an expense item, it is recognized as other income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, it reduces the carrying amount of the asset and is recognized as income over the useful life of a depreciable asset by way of a reduced depreciation charge.

#### (p) IAS 16 - Property, Plant and Equipment

On May 14, 2020, the IASB issued an amendment to IAS 16 Property, Plant and Equipment to prohibit deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The proceeds from selling such items, and the cost of producing those items are to be recognized in profit and loss. The amendments are effective for annual periods beginning on or after January 1, 2022 with early adoption permitted. The amendment is to be applied retrospectively only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the earliest period presented in the financial statements in the year in which the amendments are first applied.

Management has adopted the amendment to IAS 16 in these consolidated financial statements and it did not have a material impact on the Company.

#### (q) IAS 37 - Provisions, Contingent Liabilities and Contingent Assets

On May 14, 2020, the IASB issued an amendment to IAS 37 Provisions, Contingent Liabilities and Contingent Assets to specify which costs an entity includes in determining the cost of fulfilling a contract for the purpose of assessing whether the contract is onerous. The amendment specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to the contract can either be incremental costs of fulfilling the contract or an allocation of other costs that relate directly to fulfilling contracts. The amendments are effective for contracts for which the Company has not yet fulfilled all its obligations on or after January 1, 2022 with early adoption permitted.

Management has adopted the amendment to IAS 37 in these consolidated financial statements and it did not have a material impact on the Company.

#### (r) IFRS 9 - Financial Instruments

On May 14, 2020, the IASB issued an amendment to IFRS 9 Financial Instruments clarifying which fees to include in the test in assessing whether to derecognize a financial liability. Only those fees paid or received between the borrower and the lender, including fees paid or received by either the entity or the lender on the other's behalf are included. The amendment is effective for annual periods beginning on or after January 1, 2022 with early adoption permitted.

Management has adopted the amendment to IFRS 9 in these consolidated financial statements and it did not have a material impact on the Company.

*Stated in thousands of Canadian dollars except share and per share amounts*

---

#### (s) Future standard amendments

The following amendments to accounting standards, as issued by the IASB, are effective for annual periods beginning on or after January 1, 2023.

The pronouncements will be adopted on their respective effective dates; however, each is not expected to have a material impact on the consolidated financial statements.

#### IAS 1 - Presentation of Financial Statements

In February 2021, the IASB issued an amendment to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors in which it provides clarity as to the definition of accounting estimates, particularly in terms of the difference between accounting estimates and accounting policies. Materially the amendment will have little impact to an entity's financial statements however will provide guidance in determining whether changes are to be treated as changes in estimates, changes in policies, or errors.

The amendment is effective for annual periods beginning on or after January 1, 2023, with early adoption permitted. The Company is assessing the impact of the amendment on its consolidated financial statements.

In January 2020 and October 2022, the IASB issued amendments to IAS 1 Presentation of Financial Statements providing a more general approach to the classification of liabilities. The amendment clarifies that the classification of liabilities as current or non-current depends on the rights existing at the end of the reporting period as opposed to the expectations of exercising the right for settlement of the liability. The amendments further clarify that settlement refers to the transfer of cash, equity instruments, other assets, or services to the counterparty.

The amendments are effective for annual periods beginning on or after January 1, 2024 and are to be applied retrospectively, with early adoption permitted. The Company is assessing the financial impact of the amendment on its consolidated financial statements.

#### IAS 8 - Accounting Policies, Changes in Accounting Estimates and Errors

In February 2021, the IASB issued an amendment to IAS 1 Presentation of Financial Statements in which it provides guidance to help entities apply materiality judgements to accounting policy disclosures. When assessing materiality, entities need to consider the size of the transactions along with other events or conditions and the nature of them. Standardized accounting policy information should also be included in circumstances where users may need it to understand material information in the financial statements.

The amendment is effective for annual periods beginning on or after January 1, 2023, with early adoption permitted. The Company is assessing the impact of the amendment on its consolidated financial statements.

#### IAS 12 - Income Taxes

On May 7, 2021, the IASB issued an amendment to IAS 12 Income taxes to clarify the accounting for deferred tax on transactions such as leases and decommissioning obligations. The scope of the recognition exemption in IAS 12 no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.

The amendments are effective for annual periods beginning on or after January 1, 2023, with early adoption permitted. The Company is assessing the financial impact of the amendment on its consolidated financial statements.

#### **4. Determination of fair values**

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities.

The fair value of long-term debt approximates its carrying value as the debt bears interest at floating rates and the credit spreads approximate current market rates.

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

Fair value hierarchy financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The removal of economic restrictions due to the COVID-19 health pandemic created an increased demand for crude oil and natural gas without a sufficient corresponding increase in global supply. This positively affected current and forecasted drilling and production levels in Canada and the United States resulting in increased demand for the Company's services. As such, the Company concluded that there were indicators of impairment reversal and performed an impairment test for the Company's cash generating units ("CGUs") at December 31, 2022.

The recoverable amount of the CGU was based on the value in use method, estimated using discounted cash flows incorporating the Company's most recent 2023 internal 5-year forecasts at December 31, 2022. The calculation of estimated future cash flows were discounted to their present value using an after-tax discount rate of 20% which reflects current market assessments of the time value of money and the risks specific to the assets. The fair value of measurement was categorized as Level 3 fair value based on the inputs in the valuation technique used.

The impairment reversal test concluded that the recoverable amounts of the Company's CGUs exceeded their carrying amounts. At December 31, 2022, the Company recorded a reversal of historical impairment charges of \$22,952 related to the Contract Drilling CGU and \$309 related to the Production Services CGU in the consolidated statements of comprehensive income. No historical impairments remain for either of the Company's CGUs.

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

Stated in thousands of Canadian dollars except share and per share amounts

#### 6. Loans and borrowings

The following table provides information with respect to amounts included in the consolidated statement of financial position related to loans and borrowings:

	December 31, 2022	December 31, 2021
<b>Current liabilities</b>		
Current portion of lease liabilities	\$ 283	\$ 182
Current portion of Mortgage Loan	582	582
	<b>\$ 865</b>	<b>\$ 764</b>
<b>Non-current liabilities</b>		
Credit Facility	\$ 32,356	\$ 35,088
Mortgage Loan	9,600	10,182
Lease liabilities	589	215
Financing fees	(406)	(402)
	<b>\$ 42,139</b>	<b>45,083</b>
<b>Total loans and borrowings</b>	<b>\$ 43,004</b>	<b>\$ 45,847</b>

The Company has credit facilities with a syndicate of four Canadian financial institutions (the "Credit Facility"). On July 29, 2022, the Company exercised the accordion feature to expand the Credit Facility comprised of a \$50,710 Canadian syndicated facility, a US\$12,000 U.S. syndicated facility, a \$7,500 Canadian operating facility and a US\$5,000 U.S. operating facility. The Company further amended the Credit Facility to extend the maturity to July 31, 2025 ("Maturity Date"). No principal payments are required under the Credit Facility until the Maturity Date, at which time any amounts outstanding are due and payable. The Company may, on an annual basis, request the Maturity Date be extended for a period not to exceed three years from the date of the request. If a request for an extension is not approved by the banking syndicate, the Maturity Date will remain unchanged.

The Credit Facility bears interest based on a sliding scale pricing grid tied to the Company's trailing Consolidated Debt<sup>(2)</sup> to Consolidated EBITDA<sup>(1)</sup> ratio from a minimum of the bank's prime rate plus 1.25% to a maximum of the bank's prime rate plus 4.25% or from a minimum of the bankers' acceptances rate plus a stamping fee of 2.25% to a maximum of the bankers' acceptances rate plus a stamping fee of 5.25%. Standby fees under the Credit Facility range between 0.56% and 1.31%. Interest and fees under the Credit Facility are payable monthly. The Company has the option to borrow funds denominated in either Canadian or United States dollars under the Credit Facility. Borrowings under the Credit Facility are limited to an aggregate of 75% of accounts receivable outstanding less than 90 days plus 60% of the net book value of property and equipment less certain priority payables. When translated at December 31, 2022, the total Credit Facility was \$81,235, of which \$48,879 was available for immediate borrowing and \$32,356 was outstanding (December 31, 2021: \$35,088). The Credit Facility has an accordion feature which provides the Company with the ability to increase the maximum borrowings up to \$125,000, subject to the approval of the lenders. The Credit Facility is secured by a security agreement covering all the assets of the Company and a first charge security interest covering all assets of the Company (other than real estate assets related to the Mortgage Loan). Effective December 31, 2022, the applicable rates under the Credit Facility are bank prime rate plus 1.25%, bankers' acceptances rate plus a stamping fee of 2.25%, and standby fee rate of 0.56%.

Under the terms of the Credit Facility, the Company is required to comply with the following financial covenants:

	Covenant limits	December 31, 2022
Consolidated Debt <sup>(2)</sup> to Consolidated EBITDA <sup>(1)</sup>	3.50:1.00 or less	<b>0.74:1.00</b>
Consolidated Debt <sup>(2)</sup> to Capitalization <sup>(3)</sup>	0.50:1.00 or less	<b>0.14:1.00</b>
Consolidated Adjusted Cash Flow <sup>(4)</sup> to Consolidated Adjusted Finance Obligations <sup>(5)</sup>	1.15:1.00 or more	<b>16.38:1.00</b>

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

- (1) Consolidated EBITDA is calculated as net income plus finance costs, plus current and deferred income taxes, plus depreciation, plus stock-based compensation, plus any non-recurring losses or impairment losses, or permitted severance costs, minus any non-recurring gain, plus any expenses related to corporate or business acquisitions with all amounts being for the twelve-month period ended the calculation date, minus all principal paid or payable in connection with the Mortgage Loan. Consolidated EBITDA is adjusted to reflect the inclusion of material acquisitions or material dispositions on a pro forma basis for the twelve-month period ended the calculation date. Consolidated EBITDA is increased if debt repayments from the proceeds of equity issuance are used to repay the syndicated facility and designated by the Company as an Equity Cure amount.
- (2) Consolidated Debt is calculated as total loans and borrowings as shown in the schedule above adjusted to exclude: the Mortgage Loan, the funds held in any segregated accounts and to remove any financing fees included.
- (3) Capitalization is calculated as Consolidated Debt plus Shareholders' Equity as at the calculation date.
- (4) Consolidated Adjusted Cash Flow is calculated as Consolidated EBITDA minus amounts paid for transaction costs, dividends or share repurchases in the twelve-month period ended the calculation date. The Calculation of Adjusted Cash Flow excludes Consolidated EBITDA resulting from an Equity Cure.
- (5) Consolidated Adjusted Finance Obligations is calculated as finance costs plus scheduled principal payments on debt including scheduled principal payments under finance leases minus accretion of finance fees included in finance costs for the twelve-month period ended the calculation date (excluding scheduled principal payments attributed to the Mortgage Loan).

Mortgage Loan is a loan maturing on June 30, 2028 that is amortized over 22 years with blended monthly principal and interest payments of \$86. At maturity, approximately \$7,030 of principal will become payable assuming only regular monthly payments are made. On May 2, 2022, the Company entered into an interest rate swap to exchange the floating rate interest payments for fixed rate interest payments, which fix the Bankers' Acceptance-Canadian Dollar Offered Rate components of its interest payment on the outstanding Mortgage Loan.

Under the interest rate swap agreement, the Company pays a fixed rate of 3.38% per annum plus the applicable credit spread of 1.35%, for an effective fixed rate of 4.73%. The fair value of the interest rate swap arrangement is the difference between the forward interest rates and the discounted contract rate and are classified as Level 2 on the fair value hierarchy. As at December 31, 2022, the mark-to-market value of the interest rate swap of \$152 is included within accounts receivable on the consolidated statements of financial position (December 31, 2021: \$210 included within accounts payable and accrued liabilities).

Lease liabilities consist of office space and motor vehicles which mature in 1 to 6 years. The incremental borrowing rates applied to the individual lease liabilities vary from 5.0% to 8.5% per annum.

The following table summarizes changes in the carrying amounts of right-of-use assets recognized and the movements during the period:

	Office space	Motor vehicles	Total
Balance at January 1, 2021	\$ 67	\$ 126	\$ 193
Additions	-	442	442
Disposals	-	(18)	(18)
Depreciation expense	(50)	(197)	(247)
<b>Balance at December 31, 2021</b>	<b>\$ 17</b>	<b>\$ 353</b>	<b>\$ 370</b>
<b>Additions</b>	<b>262</b>	<b>421</b>	<b>683</b>
<b>Depreciation expense</b>	<b>(46)</b>	<b>(199)</b>	<b>(245)</b>
<b>Effect of foreign currency exchange differences</b>	<b>-</b>	<b>(3)</b>	<b>(3)</b>
<b>Balance at December 31, 2022</b>	<b>\$ 233</b>	<b>\$ 572</b>	<b>\$ 805</b>

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

Stated in thousands of Canadian dollars except share and per share amounts

The following table summarizes the carrying amounts of lease liabilities and the movements during the period:

	2022	2021
Balance as at January 1	\$ 397	\$ 206
Additions	683	442
Accretion of interest	34	19
Payments	(239)	(256)
Disposals	-	(14)
Effect of foreign currency exchange differences	(3)	-
<b>Balance as at December 31</b>	<b>\$ 872</b>	<b>\$ 397</b>

Financing fees consist of commitment fees and legal expenses relating to the Credit Facility and are being amortized using the effective interest rate method over the term of the Credit Facility. Financing fees of \$257 for the year ended December 31, 2022 were amortized and included in finance costs (year ended December 31, 2021: \$235).

#### 7. Income Taxes

The provision for income taxes differs from that which would be expected by applying statutory rates. A reconciliation of the difference is as follows:

Years ended December 31,	2022	2021
Income before income taxes	\$ 53,373	\$ 5,396
Combined federal and provincial income tax rate	23.1%	23.0%
Expected income taxes	12,329	1,241
Increase (decrease) resulting from:		
Non-deductible items	44	19
Tax rate changes	145	(42)
Stock based compensation	244	182
Recognition of deferred tax asset	(1,750)	(89)
Adjustments related to prior year	74	(459)
Other	513	(29)
	<b>\$ 11,599</b>	<b>\$ 823</b>

The deferred income tax liability is comprised of:

	December 31, 2021	Recognized in Earnings	December 31, 2022
Deferred tax assets			
Non capital losses <sup>(1)</sup>	\$ 13,666	\$ (2,488)	\$ 11,178
Finance lease liabilities	92	66	158
Unrecognized deferred tax asset	(1,538)	1,538	-
Other	258	(93)	165
	12,478	(977)	11,501
Deferred tax liabilities:			
Property and equipment	(21,062)	(10,623)	(31,685)
<b>Net deferred income tax liability</b>	<b>\$ (8,584)</b>	<b>\$ (11,600)</b>	<b>\$ (20,184)</b>

<sup>(1)</sup> The Company has \$30,622 (2021: \$47,906) of non-capital loss carry forwards in Canada and \$13,305 (2021: \$8,424) of net operating losses in the United States for income tax purposes which are available for application against future taxable income. These loss carry forwards expire between 2029 and 2043.

All changes in deferred income tax temporary differences were recognized in income in the years ended December 31, 2022 and 2021.

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

#### 8. Share capital

##### a. Authorized

Unlimited number of Common voting shares without par value.

Unlimited number of Preferred shares without par value.

##### b. Normal course issuer bid

On November 16, 2022, the Company commenced a normal course issuer bid ("NCIB") which will expire on November 15, 2023 or such earlier date as the NCIB is completed. Under this NCIB the Company is entitled to purchase, from time to time as it considers advisable, up to 25,620,671 issued and outstanding common shares through the facilities of the TSXV or other recognized marketplaces.

CWC makes its NCIB purchases through an automatic securities purchase plan (the "ASPP") (as defined under applicable securities laws) with Raymond James Ltd. ("Raymond James"). Such purchases are determined by Raymond James in its sole discretion, without consultation with CWC having regard to the price limitation and aggregate purchase limitation and other terms of the ASPP and the rules of the TSXV. Conducting the NCIB as an ASPP allows common shares to be purchased at times when CWC would otherwise be prohibited from doing so pursuant to securities laws and its internal trading policies.

For the year ended December 31, 2022, 210,000 common shares for consideration of \$46, including commissions, were purchased, cancelled, and returned to treasury under the NCIB (year ended December 31, 2021: 2,249,500 common shares for consideration of \$327 were purchased, cancelled, and returned to treasury).

##### c. Stock options

The Company has a stock option plan which allows the Company to issue options to purchase common shares at prevailing market prices on the date of the option grant. The aggregate number of stock options and RSUs outstanding is limited to a maximum of ten percent of the outstanding common shares. The Company has granted stock options to directors, officers and key employees. Stock options vest annually over three years from the date of grant as employees or directors render continuous service to the Company and have a maximum term of five years. The Company may choose to settle stock options for the intrinsic value of the stock option on the exercise date.

The following table summarizes changes in the number of stock options outstanding:

	Number of options	Weighted average exercise price
Balance at January 1, 2021	16,038,000	0.19
Expired	(8,420,000)	0.18
Forfeited	(295,000)	0.19
<b>Balance at December 31, 2021</b>	<b>7,323,000</b>	<b>0.20</b>
<b>Exercised</b>	<b>(4,615,000)</b>	<b>0.20</b>
<b>Expired</b>	<b>(2,619,000)</b>	<b>0.20</b>
<b>Balance at December 31, 2022</b>	<b>89,000</b>	<b>0.10</b>

The following table summarizes information about stock options outstanding as at December 31, 2022:

Exercise price	Number of options outstanding	Weighted average remaining life (years) contractual	Weighted average exercise price	Number of options exercisable
\$ 0.10	89,000	1.93	\$ 0.10	89,000

For the year ended December 31, 2022, stock-based compensation expense relating to stock options totaled \$4 (year ended December 31, 2021: \$5).

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

#### d. Restricted share unit ("RSU") plan

The Company has a restricted share unit plan which allows CWC to issue RSUs which are redeemable for common shares at future vesting dates. The aggregate number of RSUs and stock options outstanding is limited to a maximum of ten percent of the outstanding common shares. The Company has granted RSUs to directors, officers, and key employees. RSUs vest annually over three years from the date of grant as employees or directors render continuous service to the Company and have a maximum term of the end of the third year following their grant date. The Company may choose to settle RSUs for the intrinsic value of the RSUs on the settlement date, but the Company has no current intention or obligation to do so.

The following table summarizes changes in the number of Restricted Share Units ("RSUs") outstanding:

	Number of RSUs	Weighted average fair value at issue date
Balance at January 1, 2021	14,954,562	0.13
Granted	7,218,000	0.16
Redeemed for common shares	(5,700,675)	0.13
Forfeited - unvested	(386,000)	0.13
<b>Balance at December 31, 2021</b>	<b>16,085,887</b>	<b>0.14</b>
<b>Granted</b>	<b>6,024,000</b>	<b>0.25</b>
<b>Redeemed for common shares</b>	<b>(4,607,636)</b>	<b>0.12</b>
<b>Expired - vested</b>	<b>(53,340)</b>	<b>0.09</b>
<b>Balance at December 31, 2022</b>	<b>17,448,911</b>	<b>0.18</b>

The following table summarizes information about RSUs outstanding as at December 31, 2022:

Issue date fair value	Number of RSUs outstanding	Weighted average remaining life (years) contractual	Weighted average exercise price (\$)	Number of RSUs exercisable
\$ 0.14 - \$ 0.25	17,448,911	2.01	n/a	3,905,913

For the year end December 31, 2022, stock-based compensation expense relating to RSUs totaled \$1,045 (For the year end December 31, 2021: \$777).

#### e. Weighted average common shares outstanding

The following table reconciles the common shares used in computing per share amounts for the periods noted:

	For the year ended December 31,	
	2022	2021
Weighted average common shares outstanding - basic	511,284,083	505,337,978
Effect of dilutive share-based compensation plans	17,537,911	7,865,809
Weighted average common shares outstanding - diluted	528,821,994	513,203,787

#### f. Contributed surplus

Contributed surplus comprises amounts paid in by equity holders. Contributed surplus in the form of surplus paid in by equity holders includes premiums on shares issued, any portion of the proceeds of issue of shares without par value not allocated to share capital, gain on forfeited shares, proceeds arising from shares donated by equity holders, credits resulting from redemption or conversion of shares at less than the amount set up as share capital, and any other contribution by equity holders in excess of amounts allocated to share capital. Contributed surplus also includes increases and decreases in equity as a result of share-based payments under the Company's stock option and RSU plans.

*Stated in thousands of Canadian dollars except share and per share amounts*

#### 9. Supplemental cash flow information

	2022	2021
Source (use) of cash related to working capital items:		
Accounts receivable	\$ (19,719)	\$ (9,995)
Prepaid expenses and deposits	(2,281)	331
Accounts payable and accrued liabilities	5,038	2,691
	<u>\$ (16,962)</u>	<u>\$ (6,973)</u>

#### 10. Segmented information

The Company operates its Contract Drilling segment in both Canada and the United States while its Production Services segment operates in Canada. The Contract Drilling segment provides drilling rigs and related ancillary equipment to oil and gas exploration and production companies. The Production Services segment provides well services to oil and gas exploration and production companies through the use of service rigs.

Management uses net income before depreciation and income taxes ("segment income (loss)") in management reports reviewed by key management personnel and the board of directors to measure performance at a segment basis. Segment income (loss) is used to measure performance, as management believes this is the most relevant measure in evaluating the results of our segments relative to each other and to other entities that operate within the respective industries.

The Corporate segment captures general and administrative expenses associated with supporting each of the reporting segments' operations, plus costs associated with being a public company. Also included in the Corporate segment is interest expense for debt servicing, income tax expense and other amounts not directly related to the two primary segments.

**CWC ENERGY SERVICES CORP.**

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

The amounts related to each industry segment are as follows:

<b>For the year ended December 31, 2022</b>	<b>Contract Drilling</b>	<b>Production Services</b>	<b>Corporate</b>	<b>Total</b>

Other income recorded in 2021 consisted of Government of Canada grants received under the Canada Emergency Wage Subsidy ("CEWS") and Canada Emergency Rent Subsidy ("CERS") programs. CEWS was a program to assist employers facing financial hardship, as measured by certain monthly revenue declines compared to the prior year as a result of the COVID-19 health pandemic. CERS was a program to assist businesses who had seen a drop in revenue due to the COVID-19 health pandemic to cover part of their commercial rent and mortgage and property expenses.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

#### 14. Related parties

Of the total outstanding shares of the Company, 55.8% are directly or indirectly owned by Brookfield Business Partners L.P. ("Brookfield"). The Company is related to Brookfield by virtue of control and is therefore also related to Brookfield's affiliates.

During 2022, the Company had revenue totaling \$973 (2021: \$1,208) and \$nil in accounts receivable as at December 31, 2022 (December 31, 2021: \$225) in the normal course of business with companies under common control. The terms and conditions of these transactions were no more favourable than those available, or which might reasonably be expected to be available, in similar transactions with non-related companies on an arm's length basis.

Key management personnel include the Company's directors and officers. The following table summarizes compensation provided to key management personnel for the years ended:

<b>For the years ended December 31,</b>	<b>2022</b>	<b>2021</b>
Short-term employee benefits (including directors' fees)	\$ 2,798	\$ 1,648
Share-based payments (stock options and RSUs)	807	653
<b>Total compensation to key management including directors and officers</b>	<b>\$ 3,605</b>	<b>\$ 2,301</b>

Certain executive officers are subject to a mutual term of notice of three months. On resignation at the Company's request, they are entitled to termination benefits of 18 to 24 months gross salary, bonus and benefits.

The Board of Directors of the Company has a Compensation and Corporate Governance Committee which recommends compensation for directors and key executives of the Company for review and approval by the Board of Directors.

#### 15. Financial risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's Audit Committee is also responsible for developing and monitoring the Company's risk management policies. The Audit Committee reports regularly to the Board of Directors on its activities.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its policies and procedures and training, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company has exposure to credit risk, liquidity risk and market risk as follows:

##### a. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables from customers. The carrying amount of accounts receivable and cash, prior to the amount offset against long-term debt, represents the maximum exposure to credit risk as at December 31, 2022 and 2021.

Cash balance are held with large reputable financial institutions; accordingly management concluded that credit risk associated with this balance is low.

Accounts receivable include balances from a large number of customers primarily operating in the oil and gas industry. The Company assesses the creditworthiness of its customers on an ongoing basis as well as monitoring the amount and age of balances outstanding.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer, however, management also considers the demographics of the Company's customer base. For the year ended

## CWC ENERGY SERVICES CORP.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2022 and 2021

*Stated in thousands of Canadian dollars except share and per share amounts*

December 31, 2022, ten customers comprised 43% of revenue (2021: ten customers comprised 52% of revenue) with no customers comprising greater than 10% of revenue (2021: two customers comprised 12% and 13% of revenue respectively). As at December 31, 2022, ten customers comprised 56% of trade accounts receivable (2021: ten customers comprised 57% of trade receivables) and one customer comprised 13% of trade accounts receivable (2021: one customer comprised 11% of revenue).

The Company has a credit policy under which each new customer is analyzed individually for creditworthiness before the Company begins to provide services to the customer and prior to offering standard payment terms and conditions. The Company's review includes external ratings, when available, as well as contacting credit references and evaluating banking information provided by the customer. Customers that fail to meet the Company's benchmark creditworthiness may be required to provide a cash deposit for part or all of the anticipated job cost until they have a sufficient payment history with the Company. Under some circumstances, the Company may lien a customer's location where the services were provided.

The following table details the age of the outstanding trade accounts receivable and the related allowance for impairment of accounts:

As at December 31,	2022	2021
Trade accounts receivable:		
1 to 30 days outstanding – not past due	\$ 24,441	\$ 13,204
31 to 90 days outstanding	18,550	12,315
>90 days overdue	3,676	1,267
Allowance for impairment of accounts	(721)	(559)
	<b>\$ 45,946</b>	<b>\$ 26,227</b>

The change in the allowance for impairment in respect of trade accounts receivable for the years ended December 31 is as follows:

	2022	2021
Balance as at January 1	\$ 559	\$ 934
Additional allowance	270	28
Amounts recovered	(108)	-
Amounts used	-	(403)
Balance as at December 31	<b>\$ 721</b>	<b>\$ 559</b>

For accounts receivable, the Company applies a simplified approach and recognizes lifetime expected credit losses upon initial recognition of the receivables. Historical customer default rates, age of balances outstanding, and forward-looking information are used to determine the expected credit losses. When an expected credit loss is required to be recognized, the carrying amount of the asset is reduced by the amount with an offsetting entry to net income.

#### b. Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

As at December 31, 2022, the Company has available committed amounts under its Credit Facility in the amount of \$48,879 (2021: \$34,889) plus account receivables of \$45,946 (2021: \$26,227) for a total of \$94,825 (2021: \$61,116) available to fund the cash outflows related to its financial liabilities.

The Company anticipates that its existing capital resources including its Credit Facility and cash flows from operations will be adequate to satisfy its liquidity requirements through 2023 and beyond. This expectation could be adversely affected by a material negative change in the oilfield service industry, which in turn could lead to covenant breaches on the Company's Credit Facility, which, if not amended or waived, could limit the Company's access to the Credit Facility. If available liquidity is not sufficient to meet CWC's operating and debt

*Stated in thousands of Canadian dollars except share and per share amounts*

servicing obligations as they come due, management's plans include further expenditure reductions, pursuing alternative financing arrangements, asset dispositions, or pursuing other corporate strategic alternatives.

The following table summarizes contractual maturities for non-derivative financial instruments:

Year ended December 31, 2022	2023	2024	2025	2026	2027 and beyond
Accounts payable and accrued liabilities	\$ 13,983	\$ -	\$ -	\$ -	\$ -
Long-term debt	865	811	33,098	690	7,945
	\$ 14,848	\$ 811	\$ 33,098	\$ 690	\$ 7,945

Year ended December 31, 2021	2022	2023	2024	2025	2026 and beyond
Accounts payable and accrued liabilities	\$ 8,945	\$ -	\$ -	\$ -	\$ -
Long-term debt	764	10,334	35,151	-	-
	\$ 9,709	\$ 10,334	\$ 35,151	\$ -	\$ -

#### c. Market risk

Market risk is the risk of changes in market prices, such as commodity prices, foreign currency exchange rates, and interest rates that affect the net earnings or the value of financial instruments. The objective of managing market risk is to control market risk exposures within acceptable limits, while maximizing returns. Market risks to which the Company is subject include:

##### Foreign currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company is exposed to foreign currency fluctuations on its operations in the United States. As at December 31, 2022, portions of the Company's accounts payable and accrued liabilities were denominated in United States dollars and subject to foreign currency exchange fluctuations which are recorded in net income. In addition, the Company's United States subsidiary is subject to foreign currency translation adjustments upon consolidation, which are recorded separately within other comprehensive income. For the year ended December 31, 2022, the increase or decrease in comprehensive income for each \$0.01 change in the U.S. dollar to Canadian dollar is estimated to be \$97 (December 31, 2021: \$261).

##### Interest rate risk

Interest rate risk is the risk that future cash flow will fluctuate as a result of change in market interest rates. The Company is exposed to interest rate fluctuations on its long-term debt which bears interest at floating market rates. For the year ended December 31, 2022, if the prime interest rate increased by 1.0%, with all other variables held constant, net income would have been \$366 lower (2021: \$297 lower).

##### Commodity price risk

The Company is not directly exposed to commodity price risk as it does not have any contracts that are directly based on commodity prices, however, many of the Company's customers are exposed to commodity price risk which poses an indirect risk to the Company. A change in commodity prices, specifically crude oil and natural gas prices may have a material impact on cash flows of the Company's customers and therefore affect the demand for our products or services from these customers. However, given that this is an indirect influence, the financial impact for the Company of changing oil and natural gas prices is not reasonably determinable.

#### 16. Capital management

The Company's policy is to maintain a strong capital base thereby maintaining investor, creditor and market confidence resulting in sustainable future development of the business. The Company strives to maintain a balance between debt and equity to ensure continued access to capital markets to fund growth and ensure long-term viability. The Company continually assesses the cash flow from operations to make decisions regarding required capital maintenance, growth capital and dividends to shareholders. When those cash flows

## **CWC ENERGY SERVICES CORP.**

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

*Stated in thousands of Canadian dollars except share and per share amounts*

---

are not anticipated to be sufficient, the Company then assesses the impact on its capital structure of funding through additional debt.

The Company manages its capital structure and makes adjustments in accordance with the aforementioned objectives, as well as in light of changes in economic conditions. In order to maintain or adjust its capital structure, the Company may, but is not limited to, issuing new shares, new debt, new debt replacing existing debt with different characteristics, paying a dividend to shareholders, or purchasing shares for cancellation pursuant to normal course issuer bids.

The Company monitors capital using a financial metric of Consolidated Debt to Consolidated EBITDA ratio as defined in the Credit Facility (see Note 6). Consolidated Debt to Consolidated EBITDA is not a recognized measure under IFRS and, therefore, is unlikely to be comparable to similar measures of other companies.

During the year ended December 31, 2022, Consolidated Debt to Consolidated EBITDA of the Company declined, primarily due to a higher Consolidated EBITDA compared to the prior year. The Consolidated Debt to Consolidated EBITDA ratio at December 31, 2022 was 0.74:1.00 (December 31, 2021: 1.99:1.00). The Company was in compliance with all externally imposed capital requirements as at December 31, 2022 and 2021.
