

**FUELING
CLIENT GROWTH
AND PROFITABILITY**

DEAR FELLOW STOCKHOLDERS

A MESSAGE FROM SETH A. RAVIN
CO-FOUNDER, PRESIDENT, CHIEF EXECUTIVE OFFICER AND CHAIRMAN

Positioning the Company for Increased Growth and Profitability

In 2022, we achieved substantial milestones and progress towards our operational and financial goals, delivered modest revenue growth and advanced towards resolving our ongoing litigation with Oracle. It was also a year of continued strategic investment as we brought a substantially broadened, new solutions portfolio to market and successfully sold these new service lines. We focused on improving sales execution, servicing our larger portfolio of clients and scaling for billion-dollar revenue operations.

While Rimini Street continues to be the leading independent software support provider for Oracle and SAP products based on both the number of active clients supported and recognition by industry analyst firms such as Gartner, clients and prospects have been asking us to expand the scope of our support, product and service offerings to meet their other current and evolving needs related to their enterprise software — allowing them to also reduce their number of IT service partners.

To serve these expanded market opportunities, Rimini Street has matured into a global provider of end-to-end enterprise software support, products and services that deliver even more industry-leading value, ROI and engineering capability. We now offer a unique, comprehensive and integrated family of unified solutions to run, manage, support, customize, configure, connect, protect, monitor and optimize clients' enterprise application, database and technology software platforms — including Rimini ONE™, a unique “turnkey” outsourcing option for Oracle and SAP landscapes designed to optimize our clients' existing technologies and enable them to focus their IT talent and budget on potentially higher-value, innovative projects that will support both increased profits and revenue growth.

With operations in 21 countries and services provided in 155 countries by more than 1,900 full-time employees, we deliver uninterrupted, mission-critical 24/7/365 support services globally, with an industry-leading, guaranteed 10-minute response time for critical issues. We have consistently earned a client satisfaction rating of more than 4.9 out of 5, where 5 is considered “excellent.” Since inception, we have served more than 5,000 clients and liberated more than \$7 billion of spend that could be saved or reinvested.

Fiscal Year 2022 Financial Results

For the fiscal year ended December 31, 2022, we generated record revenue of \$409.7 million, a year-over-year increase of 9.4%, achieved an improved gross margin of 62.8% and generated cash flow from operations of \$34.9 million. At the end of 2022, we held cash and short-term fixed income investments of \$129 million and had a non-cancelable bookings backlog of \$578 million.

Looking Ahead

In 2023, we are executing on our global go-to-market plan for our comprehensive new solutions portfolio. We believe this plan will accelerate growth and increase profitability as we progress towards our goal of \$1 billion in annual revenue and operating profit of about 20 percent.

I am grateful for the support of our Board and stockholders, the leadership of our management team, the passionate commitment and hard work of Rimini Street colleagues around the world and the trust placed in us by our clients to help them navigate and thrive in these extraordinary times. Thank you.

Sincerely Yours,
Seth A. Ravin

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Report on Form 10-K (this “Report”) or in other materials we have filed or will file with the Securities and Exchange Commission (“SEC”), and incorporated herein by reference, are forward-looking statements. All statements other than statements of historical facts contained in this Report and such other materials, including statements regarding our future results of operations and financial position, business strategy and plans, and our objectives for future operations, are forward-looking statements. The words “anticipate,” “believe,” “can,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “might,” “plan,” “possible,” “potential,” “predict,” “project,” “seek,” “should,” “will,” “would” and similar expressions that convey uncertainty of future events or outcomes are intended to identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements include, but are not limited to, information concerning:

- the evolution of the enterprise software management and support landscape facing our clients and prospects;
- our ability to educate the market regarding the advantages of our enterprise software management and support services and products;
- estimates of our total addressable market;
- expectations of client savings relative to use of other providers;
- the occurrence of catastrophic events, including terrorism and geopolitical actions specific to an international region, that may disrupt our business or that of our current and prospective clients;
- our ability to maintain an adequate rate of revenue growth;
- our ability to maintain sufficient cash flow and capital or raise additional capital necessary to fund our operations and invest in new services and products;
- the impact of our Credit Facility’s debt service obligations and financial and operational covenants on our business and related interest rate risk;
- our business plan and our ability to effectively manage our growth and associated investments;
- the impact of any recessionary economic trends, including inflation, rising interest rates and changes in foreign exchange rates;
- beliefs and objectives for future operations;
- our ability to expand our leadership position in independent enterprise software support and to sell our application management services (“AMS”) and Rimini ONE™ integrated services;
- our ability to attract and retain clients and our ability to further penetrate our existing client base;
- any future actions taken by governmental authorities, clients or others in response to any lingering impacts of the COVID-19 pandemic;
- our ability to maintain our competitive technological advantages against new entrants in our industry;
- our ability to timely and effectively scale and adapt our existing technology;
- our ability to innovate new products and bring them to market in a timely manner;
- our ability to maintain, protect, and enhance our brand and intellectual property;
- our ability to capitalize on changing market conditions including a market shift to hybrid and cloud/SaaS offerings for information technology environments and retirement of certain software releases by software vendors;
- our ability to develop strategic partnerships;
- benefits associated with the use of our services;
- our ability to expand internationally;
- our need and ability to raise equity or debt financing on favorable terms and our ability to generate cash flows from operations to help fund increased investment in our growth initiatives;
- the effects of increased competition in our market and our ability to compete effectively;
- our intentions with respect to our pricing model;
- cost of revenue, including changes in costs associated with production and client support;
- changes in laws or regulations, including tax laws or unfavorable outcomes of tax positions we take, or a failure by us to establish adequate reserves for tax events;
- our ability to maintain our good standing with the United States and international governments and capture new contracts;
- costs associated with defending intellectual property infringement and other claims, such as those claims discussed under “*Legal Proceedings*” in Part I, Item 3 of this Report and our expectations with respect to such litigation;
- economic and industry trends or trend analysis;
- our ability to prevent unauthorized access to our information technology systems and other cybersecurity threats, protect the confidential information of our employees and clients and comply with privacy and data protection regulations;
- the amount and timing of repurchases, if any, under our stock repurchase program and our ability to enhance stockholder value through such program or any other actions to provide value to stockholders;
- the attraction and retention of additional qualified personnel, including sales personnel, and the retention of key personnel;

- future acquisitions of or investments in complementary companies, products, subscriptions or technologies;
- uncertainty from the discontinuance of LIBOR and the transition to SOFR or other interest rate benchmarks;
- the effects of seasonal trends on our results of operations, including the contract renewal cycles for vendor-supplied software support and managed services;
- our ability to maintain an effective system of internal control over financial reporting and our ability to remediate any identified material weaknesses in our internal controls; and
- other risks and uncertainties, including those discussed under “Risk Factors” in Part I, Item 1A of this Report.

We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions, that are difficult to predict and many of which are outside of our control, including those described in the section titled “*Risk Factors*.” Moreover, we operate in a very competitive and rapidly changing market. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this Report may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. The forward-looking statements in this Report are made as of the date of the filing, and except as required by law, we disclaim and do not undertake any obligation to update or revise publicly any forward-looking statements in this Report. You should read this Report and the documents that we reference in this Report and have filed with the SEC as exhibits to this Report with the understanding that our actual future results, levels of activity and performance, as well as other events and circumstances, may be materially different from what we expect.

PART I

Item 1. Business

Business Overview

Rimini Street, Inc. and its subsidiaries (referred to as “Rimini Street”, the “Company”, “we” and “us”) are global providers of end-to-end enterprise software support, products and services. The Company offers a comprehensive family of unified solutions to run, manage, support, customize, configure, connect, protect, monitor, and optimize clients’ enterprise application, database, and technology software platforms.

Rimini Street, Inc. was formed in the State of Nevada in 2005 (“RSI” or “predecessor”) and, through a merger in 2017 with a public company, became Rimini Street, Inc., a Delaware corporation, trading on the Nasdaq Global Market under the ticker symbol “RMNI.”

We founded Rimini Street to disrupt and redefine the enterprise software support market by developing and delivering innovative new solutions that filled a then-unmet need in the enterprise software market. We became and remain the leading independent software support provider for Oracle and SAP products based on both the number of active clients supported and recognition by industry analyst firms.

Over the years, as our reputation for technical capability, value, innovation, responsiveness and trusted reliability grew, clients and prospects began asking us to expand the scope of our support, product and service offerings to meet other current and evolving needs and opportunities related to their enterprise software. We also heard from prospects and clients that their goals include reducing the number of IT vendors to more manageable numbers from a governance perspective, with a desire to select vendors who can provide a wider scope of IT services and become true trusted partners.

To meet the needs of our clients and prospects and to service what we believe is a significantly expanded addressable market opportunity, we designed, developed and are now delivering a new, expanded solutions portfolio (our “Solutions Portfolio”) for a wider array of enterprise software – including an expanded list of supported software; managed services for Oracle, SAP, IBM, Salesforce and open-source database software; and new solutions for security, interoperability, observability and consulting. We also now offer an integrated package of our services as Rimini ONE™, a unique end-to-end, “turnkey” outsourcing option for Oracle and SAP landscapes designed to optimize our clients’ existing technologies with a minimum of 15 extended years of operating lifespan and enable our clients to focus their IT talent and budget on potentially higher-value, innovative projects that will support competitive advantage and growth.

Deployment Models
Local | Hybrid | Cloud

Rimini ONE™ is our service program designed to offer a comprehensive set of unified, integrated services to run, manage, support, customize, configure, connect, protect, monitor, and optimize our clients' application, database, and technology enterprise software. We believe Rimini ONE will provide clients with a comprehensive, unified "turnkey" service solution that can completely outsource their entire application, database, and technology infrastructure – all at a competitive, predictable cost and delivered by ONE trusted partner.

Rimini Support™ is our award-winning, mission-critical support for Oracle, SAP, proprietary and open-source database, and technology software – delivered 24x7x365 with service level agreements ("SLAs") providing 10-minute guaranteed support time. We extended the global availability of our award-winning, mission-critical, 24x7x365 support services beyond proprietary databases to leading open-source database platforms, including, but not limited to, MySQL, MariaDB, PostgreSQL, and MongoDB.

Rimini Manage™ is our suite of managed services for application and database software (known in the industry as application management services "AMS") delivered by highly-skilled engineers, featuring unlimited service ticket requests and industry-leading SLAs that we believe can resolve IT staffing/skill shortages and provide smoother system operations at optimized cost. Rimini Manage permits us to "run" our clients' systems for them day-to-day with an integrated application management and support services solution provided by a single trusted vendor.

Rimini Protect™ is our suite of innovative managed security solutions for applications, databases and technology infrastructure that is designed to be able to block newly identified attack vectors in minutes without any code changes to the software being protected; providing clients the ability to quickly protect their systems and data rather than risk remaining exposed potentially for weeks, months, or longer waiting for a solution from what we believe are dated, traditional vendor patching models that are typically not as responsive. As a pivotal part of a "defense-in-depth strategy," Rimini Protect operates in conjunction with a client's current security solutions and capabilities, while enhancing and strengthening the protection of the application stack. Utilizing advanced, real-time, active security controls, Rimini Protect is designed to monitor, remediate, and secure malicious application stack activity including the attempted exploitation of known and unknown vulnerabilities.

Rimini Connect™ is our suite of managed interoperability solutions for browsers, operating systems, and email systems that we believe can enable continued utilization of and integration with existing software and infrastructure without the need for expensive system and software upgrades and migrations. For example, our patented Rimini Connect for Browsers allows certain new browsers that are incompatible with HTML messaging being sent by some applications to connect to those applications using our "universal translator." In addition, Rimini Connect for OS supports new versions of operating systems that may be uncertified or incompatible for use with a particular software application version or release. The Rimini Connect for Email solution supports multiple new authentication and email protocols designed to promote seamless integration with existing email systems.

Rimini Watch™ is our suite of observability solutions that include monitoring and system health check solutions designed to monitor the performance and execution of thousands of processes continuously 24x7x365 and identify potential issues before they happen so system downtime and impacts can be avoided. With Rimini Watch, we believe our clients will benefit from the predictability and confidence that their critical business applications are continuously monitored and will stay up and running, that problem resolution will be reduced through root cause analysis and that changes will be managed and documented.

Rimini Consult™ is our suite of professional services available for clients' enterprise software customization, configuration, implementation, integration, interoperability, migration, staff augmentation and other project needs and delivered by experienced professionals. Rimini Consult also provides specialized advisory services, software resources planning, development services and technology and application roadmap planning designed to help clients successfully complete digital transformation and other innovation initiatives.

As of December 31, 2022, we employed over 1,920 professionals and supported 3,020 active clients globally, including 75 Fortune 500 companies and 17 Fortune Global 100 companies, across a broad range of industries. We define an active client as a distinct entity, such as a company, an educational or government institution, or a business unit of a company that purchases our services to support a specific product. For example, we count as two separate active client instances in circumstances where we provide support for two different products to the same entity. We market and sell our services globally, primarily through our direct sales force, and currently have wholly-owned subsidiaries in Australia, Brazil, UAE (Dubai), France, Germany, Hong Kong, India, Israel, Japan, Korea, Malaysia, Mexico, Netherlands, New Zealand, Poland, Singapore, Sweden, Taiwan, Canada, the United Kingdom and the United States.

Our subscription-based revenue provides a strong foundation for, and visibility into, future period results. We generated revenue of \$409.7 million, \$374.4 million and \$326.8 million for the years ended December 31, 2022, 2021 and 2020, respectively, representing a year-over-year increase of 9% and 15% for 2022 and 2021, respectively. We have a history of losses, and as of December 31, 2022, we had an accumulated deficit of \$228.3 million. We recorded a net loss of \$2.5 million for the year ended December 31, 2022 and we recorded net income of \$75.2 million and \$11.6 million for the years ended December 31, 2021 and 2020, respectively. We generated approximately 53%, 53% and 59% of our revenue in the United States and approximately 47%, 47% and 41% of our revenue from our international business for the years ended December 31, 2022, 2021 and 2020, respectively.

Our Industry

We compete in the global IT services market for enterprise software support, products and services. We believe several major trends are shaping the IT services and support industry, impacting the manner in which businesses engage with service providers and creating significant sales and service needs that Rimini Street's Solutions Portfolio can fulfill.

Growth in hybrid IT environments

Today, we believe many organizations are defining business-driven roadmaps that better enable competitive advantage and growth by combining different software under perpetual, subscription and open-source licenses into an integrated business platform that is deployed across their own systems and cloud providers, commonly referred to as "hybrid IT" environments. We also believe that for many of these organizations, the cost of operating and supporting their hybrid IT environments consumes too many financial and labor resources, potentially preventing the strategic investment that is needed to compete effectively, grow revenue and improve margins.

We believe that most IT organizations operate, manage, and support hybrid, multivendor IT environments. Hybrid IT is presented in a variety of ways including cloud and locally hosted hybrid IT, hybrid licensing, hybrid support, or a hybrid IT strategy. As a result, IT services have become more complex. Most enterprises still organize service and support around products and vendors, yet the complexity of a hybrid environment can put enterprises at risk of overwhelming their existing IT service model's ability to deliver high-quality, timely results. For example, multiple service levels that span cloud vendors and partners could mean longer service times in a vendor-based support model. Another example is the challenge of strategic solutioning across vendors that each have their own roadmaps and evolution timelines.

Success with a hybrid IT environment can be achieved with a unified approach to services. We believe that businesses can address the complexity of a hybrid IT environment by consolidating services and support with a limited number of service-providers. This IT service modernization strategy leverages simplicity to help improve service quality, scalability, and delivery speed. It also positions IT to be more strategic and helps improve business outcomes.

To meet this need, we believe that IT service providers must be able to expand their offerings and thereby limit the disruption that can occur when multiple vendors and partners are involved in operating, managing, and supporting the technology portfolio. Scaling digital solutions successfully, for example, depends on the ability to make seamless service and support handoffs between services. When multiple IT service providers do work together, they must minimize accountability issues that can occur with multiple vendors when using a hybrid IT model.

The desire for business-control in IT roadmaps

We believe enterprise software vendors have historically been the primary providers of software support services for their products, enabling such vendors to dictate which products and releases are supported and for how long, the scope of support services offered, service levels, terms and pricing. We also believe the lack of credible competitors of any scale other than the enterprise software vendors left software licensees with little choice but to agree to the software vendors' terms of service, or risk potential tax, legal and regulatory non-compliance or failures of critical systems that require knowledge and skill sets beyond a licensee's own abilities to resolve. Some software vendor support customers may be required to perform expensive and disruptive upgrades to newer product releases - even if they find no business value in doing so - just to remain eligible to receive full support.

We believe enterprises are steadily increasing their use of open-source databases, which have now surpassed commercial databases in popularity according to DB-Engines, in order to save on license and support costs, speed time to results, and avoid complex license compliance issues. We believe there is a gap in open-source database support sufficient and reliable enough for enterprises. Trial-and-error self-support and open-source community support are generally insufficient to

allow IT organizations to meet service-level requirements of business applications or to bring non-production workloads under their administration. We further believe enterprises seek help in navigating how to migrate parts of their enterprise software portfolio to open-source software and in supporting the resulting hybrid environment.

We believe that application management services (AMS) for enterprise software is a large market with significant unmet needs in client satisfaction and value. Traditional AMS providers compete on price, but the traditional AMS model is broken with a focus on a “land and expand” model based on initially cheaper, less-skilled workers that frequently leads to higher costs, poor client satisfaction and potential degradation in service over time. Providers may under-bid contracts with the goal to grow revenue through scope expansion by adding hours to open tickets or selling new project work. These lower-cost AMS support models seem cost-effective, but their contractual structures can both enable and incent traditional AMS providers to maximize their own revenue at their clients’ expense by “addressing” issues (sometimes neither quickly nor efficiently), but not necessarily resolving them or their root causes. In addition, traditional AMS offerings are often disparate and separate from software vendor support, with inherent inefficiencies and gaps that further limit responsiveness, root cause analysis and business value.

We believe that businesses are pursuing and adopting new, next-generation enterprise resource planning (“ERP”) system strategies, architectures and technologies referred to collectively as “composable ERP” by leading industry analysts. We believe composable ERP can provide organizations with greater systems flexibility and business agility to respond and meet current and future needs. We believe we are helping clients achieve the business benefits of composable ERP with a unique **Rimini Street Smart Path™** solution that leverages their current ERP system investment as the foundation for a modern composable ERP architecture that is designed to enable the seamless integration of new software components and capabilities from a variety of software vendors. In a composable ERP strategy, we believe that businesses can take advantage of a modular functionality approach by selecting a mix of best-of-breed vendors, products and technologies to achieve their strategic, financial and operational goals - instead of being confined to the architecture, technology, products and capabilities of a single ERP software vendor like SAP or Oracle.

Traditional IT service offerings not meeting full and evolving client needs

Enterprise software support, products and services is one of the largest categories of overall global information technology (“IT”) spending. We believe ERP, customer relationship management (“CRM”), product lifecycle management (“PLM”) database and technology software platforms have become increasingly important in the operation of mission-critical business processes over the last 30 years, and also that the costs associated with failure, downtime, security exposure and maintaining the tax, legal and regulatory compliance of these core software systems have also increased. As a result, we believe that licensees often view software support as a mandatory cost of doing business.

In a traditional licensing model, the customer typically procures a perpetual software license and pays for the license in a single upfront fee (“perpetual license”), and base software support services can be optionally procured from the software vendor for an annual fee that is typically 20-23% of the total cost of the software license. In a newer subscription-based licensing model, such as software as a service (“SaaS”), the customer generally pays as it goes for the usage of the software on a monthly or annual basis (“subscription license”). Under a subscription license, the product license and a base level of software support are generally bundled together as a single purchase, and the base level of software support is not procured separately nor is it an optional purchase.

The result is recurring and highly profitable revenue streams for enterprise software vendors. For example, for fiscal year 2022, SAP reported that support revenue represented approximately 39% of its total revenue and, for fiscal year 2022, Oracle reported a margin of 83% for cloud services and license support.

In our experience, the base level of software support provided by enterprise software vendors for both perpetual licenses and subscription licenses has traditionally been delivered through call centers and generally includes the right to receive and use product support services, software bug fixes, and functional, technical, tax, legal and regulatory updates. In both licensing models, software support also generally includes the right to receive and use new releases of the licensed products, if and when made available. Base software support provided by enterprise software vendors for both models generally excludes other important, commonly needed enterprise services, such as support for interoperability, security, software performance, how-to questions, add-ons and customizations. Some enterprise software vendors do not include major new releases in the base support services, and instead, they charge additional license fees for such releases.

For all these reasons and others, we believe the software products and services historically offered by software vendors, such as IBM, Microsoft, Oracle and SAP, do not meet the full and evolving needs of their customers across perpetual, subscription and open-source software, and are often more costly than alternatives. We further believe that disparate AMS

offerings from other managed service providers are disconnected from the needs of enterprises and promote incremental costs and inefficiencies. The product, service and cost gaps have created a significant market opportunity for our unique portfolio of solutions for software support and management to meet the underserved needs of enterprise software licensees at a value-driven price point.

Our Solutions

Our subscription and fee-based software services offer enterprise software licensees a choice of solutions that replace or supplement the support products and services offered by enterprise software vendors for their products, as well as products and services offered by system integrators and other software service firms. We believe features, service levels, service breadth, technology and pricing differentiate our software products and services from our competitors. We also believe clients utilize our portfolio of software support products and services to facilitate achieving their strategic, operational, and financial objectives.

Our clients often first replace vendor support and leverage our comprehensive support for their licensed software and customizations, along with tax, legal, and regulatory updates for their specific applications and locales. A growing number of our clients then expand their service contracts with us, utilizing our application management services, database management services, security solutions, integration and interoperability capabilities, advanced strategic technology advisory services, and project-based professional services. By utilizing Rimini Street’s expanded portfolio of unified solutions, we believe our clients can achieve substantial cost savings; achieve better business outcomes; obtain support for their customized software that is not generally covered under the enterprise software vendor’s service offerings; enhance their software functionality, capabilities, and data usage; integrate and protect their systems and extend the life of their existing software releases and products.

Our products and services seek to enable our clients to keep their mission-critical systems operating smoothly and to remain in tax, legal and regulatory compliance; improve productivity; and better allocate limited budgets, labor and other resources to investments that potentially provide competitive advantage and support growth.

The following table summarizes and compares the software support features of our Rimini Support solution to what management believes in its experience are the typical features of competing support offerings from enterprise software vendors:

Base Software Support Feature	Rimini Street	Typical Enterprise Software Vendor
Annual Cost and Resource Savings Compared to the Software Vendor	•	
Guaranteed 10-Minute Response Time 24x7 For Critical (Priority 1) Issues	•	
Guaranteed Cadence of Case Update Communications for Open Cases	•	
Named Primary Support Engineer (PSE) for Each Client	•	
Issue Resolution and Software Bug Fixes	•	•
Support for Application Customizations	•	
Operational, Installation, Configuration and Upgrade Support	•	•
Migration Support	•	
Performance, Interoperability and Integration Support	•	
Security Support (RSI - Security Advisory Services only)	•	•
Localization Support	•	
New Features, Functions and Technical Releases	•	•
Tax, Legal and Regulatory Updates	•	•

Our current Rimini Support solution provides services for a broad range of enterprise software vendors, product families and product lines. In the future, we intend to expand our support services to additional software vendors and products to meet the growing and diverse needs of our clients. The table below sets out the vendors and products we currently support and/or could support in the future:

Supported Vendor or Product Category	Supported Software
SAP Applications	Business Suite, R/3, BusinessObjects, S/4HANA, SuccessFactors, Ariba, Hybris, SAP IBP, SAP Analytics, Governance Risk and Compliance, IS-Oil, IS-Retail, IS-Media, IS-Utilities, IS-Auto, IS-Mills
SAP Databases	HANA, ASE (Sybase), IQ, MaxDB, SQL Anywhere
Oracle Applications	E-Business Suite, PeopleSoft, JD Edwards - Enterprise One, JD Edwards – World, Siebel, Hyperion, Oracle Retail (Retek), Agile Product Lifecycle Management (PLM), ATG Web Commerce, Oracle Utilities, Financial Services Analytical Applications (OFSAA), Communications, Endeca, Demantra, Governance Risk and Compliance (GRC), Oracle Transportation Manager (OTM), Primavera, Oracle Global Knowledge Software Releases/ User Productivity Kit (UPK), Oracle Banking
Oracle Technology	Oracle's Application Integration Architecture Releases, GoldenGate, OBI and OBIEE, Essbase, Fusion Middleware, Identity Management, WebLogic, WebCenter, SOA Suite, Oracle Data Integrator (ODI)
Oracle Databases	Oracle Database
Microsoft Databases	SQL Server
IBM Databases	Db2
Open-Source Databases	PostgreSQL, MySQL, MongoDB, MariaDB
Salesforce	Service Cloud, Sales Cloud, Experience Cloud, Revenue Cloud, Marketing Cloud, Commerce Cloud
Other Software	OpenText, Informatica, IBM Middleware

When we provide our Rimini Support solutions for a perpetual software license, we generally offer our clients service for a fee that is equal to approximately 50% of the annual fees charged by the software vendor for their base support. When providing supplemental software support for a perpetual license, where the client procures our support service in addition to retaining the software vendor's base support, we generally offer our clients service for a fee that is equal to approximately 25% of the annual fees charged by the software vendor for their base support. We also offer a special support service, Rimini Street Extra Secure Support, available to clients that require a more rigorous level of security background checks and/or government security clearance for engineers accessing a client's system than our standard employment security background check and requirements. Clients may be asked to pay an additional fee for Rimini Street Extra Secure Support.

We also offer additional support, products and services through our Rimini Manage, Rimini Protect, Rimini Connect, Rimini Watch and Rimini Consult solutions at an additional fee. Subscriptions for additional solutions are designed to meet specific client needs and are designed to provide what we believe is exceptional value and return for the fees charged.

Since our inception over 17 years ago, we have invested significant resources in developing our proprietary knowledge, software tools and processes to meet the growing needs of our clients. During the year ended December 31, 2022, we delivered more than 57,000 tax, legal and regulatory updates to our global client base. We believe that we offer the most comprehensive scope of tax, legal and regulatory research available from a single vendor, including collecting and analyzing information from more than 5,300 government sites, close to 3,500 information sources and over 26,000 localities for 145 countries. We utilize a certified triple-scope verification process that involves multiple third parties such as premier subject matter experts including industry associations as well as accounting, consulting and law firms. Our capabilities are enabled by our proprietary data capture, management and analysis tool and ISO 9001:2015-based management system processes that we believe provide us with a significant competitive advantage.

We believe that we have product and service advantages that will benefit our clients. Our key strengths include:

Client Support Delivery

Our Client Support Delivery operation is staffed globally and provides product support services to our clients 24 hours a day, seven days a week. A key element of our support delivery model is the assignment of one or more named Primary Support Engineers ("PSE"), who serve as the primary product support contact for our clients. PSEs provide technical advice, functional expertise and general support to ensure the resolution of all support issues. Our PSEs are focused exclusively on supporting our clients and have on average over 20 years of experience and significant real-world understanding of client

implementations and deployments. For the year ended December 31, 2022, we delivered an average support call response time of less than two minutes for an experienced engineer to engage with a client to address critical (P1) and serious (P2) issues, which is significantly shorter than the 10-minute guaranteed response time that is standard in our client support agreements.

Each PSE works as part of our global network of engineers and provides deep expertise for a vendor, product family and product line. Support engineers across the company are able to leverage their collective knowledge and experience to meet the complex support needs of our clients.

In 2020, we brought to market our artificial intelligence (“AI”) support applications. These AI applications were developed by Rimini Street’s Global Service Delivery Innovation Team, whose mission is to invent innovative solutions that further enhance a client’s overall service experience. Built using open-source technologies, the AI applications can be integrated into support processes along with other new AI applications when they become available.

In 2021, we were granted a U.S. patent for our “Case Assignment Advisor,” which is one of our AI applications used as a competitive advantage in servicing our clients. We believe our AI applications have already delivered substantial service benefits to clients, including accelerating case resolution times by an average of 23% and reducing case escalations by approximately 29%.

Product Delivery

The Product Delivery team manages the scoping, development, testing, and delivery of all client deliverables and internally developed applications, tools and technologies. The primary client deliverables are grouped into the following categories:

Global tax, legal and regulatory updates

We provide our clients with the proactive updates they need to maintain compliance with changing tax, payroll, accounting, fixed asset and related rates, regulations and standards. In addition, we also create and update documentation that supports our tax, legal and regulatory updates.

New client synchronization

When a client switches to our support, they may not be up to date with the latest tax, legal and regulatory updates made available by the enterprise software vendor. As part of the client onboarding process, our Product Delivery team assesses the compliance level of each client deployment and creates initial updates as needed for clients to enable full adherence to current tax, legal and regulatory standards in their jurisdictions of operation and to streamline the process for future updates.

We believe the quality and scope of our Product Delivery processes and deliverables surpass those of traditional enterprise software vendors. For example, we maintain updates for tax, legal, and regulatory changes for over 100 countries on a continuous basis by employing a rigorous software development lifecycle that complies with ISO 9001:2015 standards to ensure that required and identified tax, legal, and regulatory changes are delivered in an accurate and timely manner that based on management’s experience and analysis, we believe is typically earlier than traditional enterprise software vendors. Our Product Delivery organization is scalable and has the capability to deploy its solutions for additional countries based on the needs of our clients. For the year ended December 31, 2022, we have delivered more than 57,000 tax, legal and regulatory updates to clients with quality and accuracy.

Product Delivery professionals serve in a variety of roles which include business, functional and technical analysts as well as software development, testing, quality assurance and delivery professionals. Scoping professionals and business analysts utilize proprietary methodologies to search for updates across all supported jurisdictions and provide support for all product groups. Technical and software development professionals are product-focused and have relevant domain expertise. Testing and delivery professionals are responsible for the implementation of any changes and support all product groups. Engineers support all aspects of analysis, development and testing for the Product Delivery team. We believe this flexible model has enabled us to identify best practices and solutions for the multiple product lines we service. Additionally, we utilize internally developed proprietary tools, technologies and processes to efficiently research and deliver quality and timely tax, legal and regulatory updates.

Client Engagement

Client success managers in our Client Engagement organization serve as a single point of contact for all non-product support-related client issues. The Client Engagement organization works closely with our Support, Product Delivery and Sales organizations to provide what we believe, based on client feedback, support case satisfaction survey results and analyst checks, is an exceptional client experience with superior client satisfaction and success, with the ultimate goal of retention, renewal and expansion of our client contracts. The Client Engagement team oversees the following client management processes:

Onboarding

When a client switches to our support products and services, a client success manager oversees the onboarding process, which is a set of interwoven processes that new clients undertake to facilitate a successful migration to our support model. During this time, we help clients smoothly transition their support while we gain an in-depth understanding of a client's business needs, IT infrastructure, IT strategies and objectives.

Account Management

Following the onboarding period, client success managers coordinate our resources and capabilities to provide personalized support to each client. When issues arise, client success managers escalate them within our organization as appropriate to help ensure client satisfaction. Client success managers are also tasked with establishing and maintaining executive relationships and promoting expansion of usage and cross-sell of our extensive services within each client's organization.

Account Retention

Client success managers play an integral role in client retention by helping to ensure our clients are realizing the full value of our service offering and working with our Renewal Sales team on the renewal and extension of client contracts.

Sales and Marketing

We sell our solutions primarily through our global direct sales organization. We organize our sales force by geographic region with sales teams currently covering North America, Latin America, Europe, Africa, Middle East, Asia and Asia-Pacific. We organize our sales and marketing professionals into territory-specific teams in order to align sales and marketing toward common sales goals. In some cases, we organize our sales professionals in a specific region or territory by the industry of our prospective or current clients and focus certain marketing activities by industry. A typical sales cycle with a prospective client begins with the generation of a sales lead through trade shows, industry events, online marketing, outbound calling or other means of referral. The sales cycle for our support services continues with an assessment of the prospective client's support contract renewal date, sales presentations and, in many cases, client reference calls. Our sales cycle can vary substantially from client to client, but typically requires six to twelve months depending on the scope of the support, products or services being purchased. Enterprise software customers typically need to renew their vendor support contracts on an annual basis so there usually is already a budget for our Rimini Support solutions, and that budget is usually larger than our fees since most of our prospective clients are enterprise software vendor customers paying higher annual fees for their current support services than we charge for our Rimini Support solution. The sales cycle for our Rimini Manage or other solutions, beyond our Rimini Support solutions, may or may not be replacing the services of an incumbent vendor and therefore may not be dependent on the renewal date of an existing annual contract.

We attempt to commence discussions with prospective clients far enough in advance of that prospective client's services end date with their current vendor, to provide enough time to complete the sale and to perform certain transition tasks. In certain situations, we will engage with a prospective client over multiple renewal cycles with their current vendor. In addition to new support, products and service sales to prospective and existing clients, we have a dedicated sales team focused on renewals of existing client subscription contracts.

We generate global prospect leads, accelerate sales opportunities and build brand awareness through our marketing programs. Our marketing programs target chief financial officers, chief information officers, chief procurement officers and other IT executives, senior business leaders and procurement specialists. We focus on the unique benefits of our offerings. Additionally, our marketing programs serve to create further market awareness of the benefits of each offering in our solutions portfolio. As a result of our efforts in educating organizations, we believe we are recognized as a thought leader in the enterprise application support market and a growing, serious competitor in our other newer solution markets such as managed services, security, interoperability, observability, and consulting.

Our marketing programs include the following:

- use of our website to provide enterprise application and Rimini Street company information, as well as learning opportunities for potential clients;
- business development representatives who respond to incoming leads to convert them into new sales opportunities;
- participation in, and sponsorship of, field marketing events including user conferences, trade shows and industry events;
- online marketing activities including email campaigns, online advertising, social media, webinars and content syndication;
- public relations;
- thought leadership through marketing to industry analysts, webinars, speaking engagements and sponsored research; and
- outreach and engagement with our active clients to explore cross-sell opportunities and maintain high retention rates.

Our Competitive Advantages

We believe that we have a number of competitive advantages that will enable us to strengthen our position as the leading independent provider of enterprise software support and our other new solution markets. Our key competitive strengths include:

Unique end-to-end software support, products and services model

Our enterprise software support, products and services model differentiates us from traditional enterprise software vendors. We built our company from the ground up to disrupt the traditional enterprise software vendor support model with what we believe is a better model and value for clients, and we have expanded our enterprise software products and services beyond support to include integrated managed services; security; interoperability; observability; and professional services. While this extended line of unified services expands our competitive field to include systems integrators, consultants, and some specialized software product providers, we believe that no other organization provides our unique set of unified support, products and services across multiple enterprise software product lines, anchored by our comprehensive enterprise software support solutions.

We continue to be focused on delivering unique, highly responsive and award-winning enterprise software support solutions, along with our additional services. We believe our innovative support products and services, offered at a value-driven price point, provide a significant return on investment for our clients that cannot be achieved by the use of traditional enterprise software vendor offerings. Our model includes unlimited support cases, requests, and tasks, and we offer industry-leading SLAs for response time and case update communications.

Our team of over 1,000 support engineers, developers, and other experts span the globe, providing 24/7/365 “follow-the-sun” support to clients with operations in over 155 countries. On average, our highly qualified PSEs have over 20 years of relevant industry experience, which we believe provides us with a competitive advantage and is a key element of our proven track record of providing exceptional client service.

Comprehensive support services

We offer clients a comprehensive suite of independent support offerings in terms of features and capabilities; global breadth; vendor products and releases supported; and tax, legal and regulatory updates. We believe our continued investment in our software support, products and services will expand our scope of services to the benefit of our clients.

Scalable business model

We have developed proprietary knowledge, software tools and processes in the design, development and delivery of our enterprise software support services. We have also designed an innovative support model that organizes our support engineers into modular, scalable teams. We believe our client support model enables us to scale quickly and cost-effectively to meet growing global demand in our existing product lines. We have become proficient at applying our support methodologies and approach to new product lines, enabling us to rapidly and efficiently support additional enterprise software products in the future. We have increased our ability to scale by investing in support-related infrastructure and by developing patented and patent-pending artificial intelligence support applications that further optimize our support processes and ensure service

delivery outcomes at scale for our clients. Additionally, we have received ISO certifications for our support services, which we believe helps ensure our clients consistently receive high quality, responsive service as our client base continues to grow.

Large global client base

As of December 31, 2022, we provided support, products and services for 3,020 active clients globally, including 75 Fortune 500 companies and 17 Fortune Global 100 companies. We also believe that our proven ability to deliver value to an extensive list of clients across a broad range of industries validates our business model and provides us with important references to prospective clients.

Clear leadership position

We are the global leader of independent enterprise software support services for Oracle and SAP products, based on both number of active clients and recognition by industry analyst firms. We believe we have substantial thought leadership in our market through our extensive marketing efforts and promotion of the independent enterprise software support model, including participation in key industry conferences, publishing white papers and hosting webinars. We believe that our leadership position enables us to bring new services to market more quickly, attract and retain high quality personnel, and acquire new clients.

Highly experienced management team

Our senior management team has over 150 years of combined experience in the enterprise software and services industry with companies such as Accenture, EDS, Hewlett-Packard, JD Edwards, Oracle, PeopleSoft, ServiceSource, SAP, and Wind River and with a significant amount of time and experience focused on building, managing and delivering support products and services. We believe our senior management team's significant relevant industry experience positions us to continue to extend our market leadership.

Client-centric culture

We believe that our culture is a key element of our success and one of our core values. We recruit employees who share a passion for delivering exceptional service to our clients and continuously measure, recognize and reward employees for achieving exemplary client satisfaction. We further believe that our culture has enabled us to attract and retain high-quality, experienced and skilled professionals. Over the years, we have earned several Great Place To Work® awards globally, have achieved exceptional client satisfaction ratings and have won numerous Stevie Awards for customer service.

Our Growth Strategy

We possess deep expertise in enterprise software products, services and support and intend to leverage our leadership position to further penetrate our current markets and expand our support product and service capabilities into new markets. The key elements of our growth strategy include:

Add new clients

We believe that the market for independent enterprise software support products and services is large, growing and underserved. We expect significant growth opportunities in our market as organizations increasingly look to achieve more value from their technology budgets. We are continuing to make significant investments in sales and marketing and will continue our strong focus on acquiring new clients.

Continue global expansion

For the year ended December 31, 2022, we generated approximately 47% of our revenue outside of the United States. We believe that there is a large opportunity to grow our global business by increasing our direct sales force and by selective use of strategic marketing and sales partnerships around the world. We attribute revenue to individual countries based on the location of the contracting entity. No foreign country individually comprised more than 10% of revenue for the three-year period ended December 31, 2022.

Expand the portfolio of supported vendors and products

Since our inception over 17 years ago, we have developed a comprehensive portfolio of enterprise software support and related products and services, including support services for applications, databases and technologies; management services for applications, databases, technologies, cloud and security; security, interoperability and observability solutions; and professional services. We offer more than 20 Rimini Street solutions across six suites of products and services: Rimini Support, Rimini Manage, Rimini Protect, Rimini Connect, Rimini Watch and Rimini Consult. These products and services cover over 40,000 SKUs of software and technologies from primarily five software vendors, Oracle, SAP, Salesforce, Microsoft and IBM, as well as for open-source software. We believe there is a significant market opportunity to offer support and related products and services for additional vendors and software, and we intend to extend our Rimini Support offerings to additional enterprise software vendors, product lines and releases.

Capitalize on the shift to hybrid IT

We believe organizations are increasingly creating more complex IT environments that are a mixture of multiple technologies, business models and vendors, including perpetual license and subscription license software solutions, deployed across the client's system and cloud computing providers (hybrid IT environments), and consisting of proprietary and non-proprietary open-source software, all from a multitude of different technology vendors. We believe traditional enterprise software vendors and general consulting firms cannot effectively support these heterogeneous environments because of complex integrations, customizations, multi-vendor relationships and other unique challenges. Further, we believe a hybrid IT strategy enables organizations to reliably and cost-effectively run their business on an existing, stable core enterprise software platform, while at the same time enabling them to more quickly adopt new innovative applications and services, including digital, cloud, mobile and analytics. Multi-application, multi-environment solutions create a unique growth opportunity for independent support providers like Rimini Street.

Further penetrate our existing client base

We intend to increase adoption of our solutions among our existing clients by selling additional Rimini Support contracts for other software products, releases and instances used within their organizations as well as by selling new contracts for our expanded portfolio of solutions, including, but not limited to, managed services, security, interoperability, observability and professional services. As of December 31, 2022, approximately 64% of our over 1,510 unique clients have selected us to provide services, products and solutions for more than one of their software product lines, and we believe there is additional opportunity for growth within our existing client base. Our client-centric focus in combination with the critical nature of our portfolio of solutions, enables us to maintain close working relationships with our clients' primary decision makers, which we believe helps us identify and capitalize on additional growth opportunities.

Expand Managed Services global offering

Our Rimini Manage for SAP and Oracle enterprise software was launched during the second half of 2019 and integrates our ultra-responsive traditional support services with clients' day-to-day AMS needs. AMS is comprised of system administration, operational support, health monitoring and enhancement support, and we believe this offering can provide clients with a better model, better people, and better outcomes with higher satisfaction and potentially significant savings of time, labor and money. We also believe that Rimini Manage can deliver these same benefits to clients who require database management services for a wide array of databases. In addition, we are a Salesforce partner and offer Rimini Manage for their Salesforce Sales Cloud, Salesforce Service Cloud, and other Salesforce products. We are also an Amazon Web Services (AWS) partner and offer Rimini Manage for their cloud offering used by our clients.

Launch new enterprise software support solutions

We intend to develop and bring to market new enterprise software solutions that help our clients with various business needs. For example, we recently announced multiple suites of services that bring together existing and new support, products and service solutions.

Clients

As of December 31, 2022, we supported 3,020 active clients globally, including 75 Fortune 500 companies and 17 Fortune Global 100 companies across a broad range of industries. We define an active client as a distinct entity, such as a company, an educational or government institution, or a business unit of a company that purchases our support, products or services. For example, we count as two separate active client instances in circumstances where we provide support for two

different products to the same entity. We define a unique client as a distinct entity, such as a company, an educational or government institution or subsidiary, division or business unit of a company that purchases one or more of our products or services. For example, we count as two separate unique clients when two separate subsidiaries, divisions or business units of an entity purchase our products or services.

Human Capital Resources

We have built our culture centered on our dedication to provide our clients with an exceptional service experience. Our employees focus on providing exceptional service to our clients, and we strive to foster an environment that enables and encourages them in this pursuit. To this end, we view all employees as partners and are committed to providing an exciting, participatory and team-oriented work environment. This commitment starts with our Core Values, known as our “4 C’s”:

Who is Rimini Street?
As we grow and evolve, our shared Mission and 4 C's continue to guide and drive us.

Mission
To provide extraordinary technology solutions powered by extraordinary people that achieve each client's strategic, operational, and financial goals

The Rimini Way

- We strive to deliver the extraordinary, always
- We choose what is right, not what is easy
- We stand for equality and fairness for all
- We act with urgency, driven by our passion for quality

Our 4 C's

<p>Company</p> <p>Dream big, innovate boldly and operate at the highest ethical, professional, and quality standards</p> <ul style="list-style-type: none"> • Taking ownership and pride in all we do • Prioritizing client over Company 	<p>Clients</p> <p>Improve client performance significantly</p> <ul style="list-style-type: none"> • Relentlessly pursuing solutions for clients • Delivering unmatched client care rooted in passion for service 	<p>Colleagues</p> <p>Build a great company that attracts, develops, inspires, and retains extraordinary people</p> <ul style="list-style-type: none"> • Sharing a common purpose, mission, and values • Fostering a high-performance, results-focused culture based on mutual respect, professionalism, and appreciation 	<p>Communities</p> <p>Leave the world better than we found it</p> <ul style="list-style-type: none"> • Offering a helping hand • Creating equal opportunity for all

Rimini Street

As a key aspect of our success, we believe our culture enables us to recruit and retain high quality talent. In addition, we strive to offer compensation, bonus and benefit programs appropriate for proven top-performing professionals. To ensure alignment with our short- and long-term objectives, our compensation programs for all employees include base pay, short-term incentives, and opportunities for long-term incentives. Furthermore, we believe our remote delivery model provides an attractive employment option for our highly experienced PSEs compared to consulting roles that can require significant travel, and also reduces our carbon footprint. Further, we offer programs and resources designed to support the mental, physical, social and financial well-being of our employees. In addition to resources available through our health care plan providers, we provide voluntary web-based training on health and wellness topics (such as first aid/CPR, fire safety, and how to prepare for inclement weather conditions), as well as professional development seminars on topics such as time management and leadership skills.

We are committed to creating a diverse and inclusive environment and are proud to be an Equal Employment Opportunity Employer. Qualified applicants will receive consideration for employment without regard to age, race, color, religion, national origin, sexual orientation, gender or gender identity, disability, protected veterans' status or any other characteristic protected by law.

We have achieved Great Place to Work® (a recognized global authority on workplace culture and employee satisfaction) certifications in the United States, the United Kingdom, India, Korea, Australia, New Zealand, Japan, France and Israel. The certification is achieved by distributing a third-party, anonymous survey to all employees in a geographic area and renewed each year to maintain certification.

From 2020 through 2022, in response to the COVID-19 pandemic, we provided special compensation bonuses for lower-paid employees and special compensation bonuses for the few of our employees who tested positive for COVID-19.

Finally, through the Rimini Street Foundation, which is an initiative funded by the Company, we encourage our employees to “support humankind” and share our Company’s success by investing back into the communities we serve through in-kind donations, employee time and Company financial support.

As of December 31, 2022, we employed over 1,920 professionals globally. We also engage temporary employees and consultants as needed. None of our U.S.-based employees are covered by collective bargaining agreements. Certain of our non-U.S.-based employees are members of unions, works councils, trade associations or are otherwise subject to collective bargaining agreements in particular jurisdictions, as required by local labor laws. We have not experienced any work stoppages, and we consider our relations with our employees to be very good.

Technology Infrastructure and Operations

We have IT infrastructure and staff globally. Our operations support our client offerings, compliance requirements and future global expansion. To connect to systems owned, leased or otherwise controlled by our clients, we utilize site-to-site tunnels, virtual private networks with secure firewall administration and other secure connection methodologies underpinned with a high level of global network reliability, security and performance.

We maintain a formal and comprehensive information security management system, which is certified to ISO 27001:2013. It is designed to ensure the confidentiality and integrity of client data, protect against security threats or data breaches, and prevent unauthorized access to the data of our clients. We control access to our office space where confidential and security-controlled information is located or may be visible while in use, have deployed advanced security software and hardware, and utilize advanced security measures. In addition, we have responsibility to comply with certain client-specific security contractual requirements and government security laws and regulations for some of our clients.

Compliance and Certifications

ISO certifications are part of our commitment to developing and executing best-in-class processes to ensure our clients consistently receive exceptional service. We have achieved and maintain ISO 9001 and ISO 27001 certifications.

In 2010, we achieved ISO 9001 Quality Management System certification for “Third-party provider of enterprise software support services specifically on-boarding of client and client environments”. In 2011, we expanded our certification for “Provision of third-party enterprise software support services specifically on-boarding of client, building of client environments, worldwide tax and regulatory research and delivery of tax and regulatory updates”. In 2012, we expanded our certification for “Global provision of enterprise software support services, including client onboarding; client account management; product support for vendor delivered and client customized code; fix development and delivery; and research, development and delivery of worldwide tax, legal and regulatory updates”. The certification process verifies that detailed processes for relevant business areas are reviewed, continuously monitored and improved to ensure services and deliverables are consistently delivered with excellence. During 2018, the ISO standard was upgraded. Our current ISO 9001:2015 certification is effective December 2022 through December 2025. During this certification cycle, annual surveillance audits are conducted to validate ongoing compliance to the requirements.

In 2013, we achieved worldwide ISO 27001 information security certification for our support services. ISO 27001 is a security standard covering “The information security management system that supports the global provisioning of third-party software maintenance services”. Independent assessments of our conformity to the ISO 27001 standard includes evaluating security risks, designing and implementing comprehensive security controls and adopting an information security management process to meet security needs on an ongoing basis. Our current ISO 27001:2013 certification is effective April 2022 through March 2025. During this certification cycle, annual surveillance audits are conducted to validate ongoing compliance to the requirements.

Competition

We compete in the global IT services market for enterprise software support, products and services and believe the principal competitive factors in our market include, but are not limited to, the following:

- track record of technical capability to provide the required software support;
- ability to identify, develop and deliver required tax, legal and regulatory updates;

- infrastructure model to deliver support globally within guaranteed service levels;
- track record of providing a high level of client satisfaction;
- ease of support model onboarding, deployment and usage;
- breadth and depth of support functionality, including the ability to support customized software;
- cost of products and services;
- brand awareness and reputation;
- capability for delivering services in a secure, scalable and reliable manner;
- ability to innovate and respond to client needs rapidly; and
- size of referenceable client base.

As further discussed under “Our Competitive Advantages,” above, we believe we compete favorably with our competitors on the basis of these factors. We have also invested significant resources in developing our unique service methodologies. We believe our support management model allows us to gain an in-depth understanding of a given client’s unique software environment, enabling rapid and accurate responses to a client’s service requests.

We believe our primary competitors for our Rimini Support solutions are the enterprise software vendors whose products we service and support, including, but not limited to, IBM, Microsoft, Oracle and SAP. We expect that continued growth in our market could lead to significantly increased competition resulting from new entrants. In the meantime, our success and growth will depend to a substantial extent on the willingness of companies to engage an independent service vendor such as us to provide software maintenance and support services for their enterprise software.

We believe our primary competitors for our Rimini Manage, Rimini Consult and Rimini Watch solutions are systems integrators and consulting firms globally, including, but not limited to, Accenture, IBM, Wipro, Cap Gemini and DXC. We expect the market for these solutions to continue to be highly competitive. Our success and growth in management services will rely in part on our ability to differentiate the value and benefits of our fully integrated support and management solutions compared to other vendors’ offerings or internal resources, and our success and growth in consulting will rely in part on our ability to differentiate our talent, experience, value and benefits compared to other vendors’ resources and offerings.

We believe our primary competitors for our Rimini Protect solutions are manufacturers of other enterprise software security solutions, including, but not limited to, Oracle, SAP and IBM. We believe our primary competitors for our Rimini Connect solutions are manufacturers of other enterprise interoperability and connectivity products, including, but not limited to Citrix, Dell, Salesforce, Oracle and IBM. We expect the market for these solutions to continue to be highly competitive. Our success and growth in security and interoperability solutions will rely in part on our ability to differentiate the value and benefits of our solutions compared to other vendors’ offerings.

However, we also believe some of our actual and potential competitors currently have advantages over us, such as longer operating histories, significantly greater financial, technical, marketing or other resources, greater name recognition and deeper customer relationships. Additionally, some software licensees are reluctant to engage a smaller independent company such as us to provide services for their enterprise application software, choosing instead to rely on services provided by their enterprise software vendor or other larger competitors in our various service markets.

Intellectual Property

We rely on federal, state, common law and international rights, as well as contractual restrictions, to protect our intellectual property consisting of a combination of trade secrets, copyrights, trademarks, service marks, domain names and patented technology. We control access to our proprietary technology by entering into confidentiality and invention assignment agreements with our employees and contractors, and confidentiality agreements with third parties, such as service providers, vendors, individuals and entities that may be exploring a business relationship with us.

On December 17, 2019, the United States Patent and Trademark Office granted Rimini Street its first patent, U.S. Patent No. 10,509,639 for the invention “Automatic Software-Update Framework”. On August 18, 2020, the United States Patent and Trademark Office granted Rimini Street its second patent, U.S. Patent No. 10,749,926 for the invention “Proxy for Modifying HTTP Messages to Comply with Browser,” and on November 23, 2021, the United States Patent and Trademark Office granted Rimini Street its third patent, U.S. Patent No. 11,182,707 for the invention “Case Assignment Advisor,” which is a proprietary artificial intelligence (AI) based application. We currently have four patent applications pending in the United States. We own U.S. Patent No. 10,509,639 which will expire in August 2035, U.S. Patent No. 10,749,926 which will expire in September 2034, and U.S. Patent No. 11,182,707 which will expire in July 2039, as long as the patent maintenance fees are paid during the corresponding fee payment windows.

We maintain trademark registrations for the Rimini Street and Engineered for Support trademarks in the United States. We also maintain trademark registrations for Rimini Street in Canada, the European Union, China, Japan, India, Australia and maintain or have applied for trademarks in certain other countries. Such registered trademarks will expire unless renewed at various times in the future.

Policing unauthorized use of our processes and software tools and intellectual property rights is difficult. As of the date of this Report, we are not aware of any material breaches of our intellectual property rights.

Information about our Executive Officers.

The following table sets forth the names, ages and positions of our executive officers as of March 1, 2023:

Name	Age	Position
Executive Officers		
Seth A. Ravin	56	Chief Executive Officer, Chairman of the Board of Directors and President
Nancy Lyskawa	60	Executive Vice President, Global Client Onboarding
Kevin Maddock	57	Executive Vice President and Chief Recurring Revenue Officer
Michael L. Perica	51	Executive Vice President and Chief Financial Officer
David Rowe	57	Executive Vice President, Global Transformation & Chief Product Officer
Steven Salaets	45	Chief Information Officer & Executive Vice President, Global Shared Services

Seth A. Ravin founded our company and has served as our Chief Executive Officer and Chairman of the Board since September 2005 and as our President since March 2023. He also previously served as our President from September 2005 to January 2011. Prior to founding Rimini Street, Mr. Ravin served in various executive roles at TomorrowNow, Inc. from May 2002 to April 2005, most recently as President and a board director. TomorrowNow, Inc. was a supplier of software maintenance and support services for Oracle’s PeopleSoft and J.D. Edwards applications, and was acquired in January 2005 as a wholly-owned subsidiary of SAP America, Inc. From April 2000 to March 2001, Mr. Ravin served as Vice President of Inside Sales for Saba Software, Inc., a provider of e-Learning and human resource management software. From April 1996 to April 2000, Mr. Ravin served in various management roles at PeopleSoft, Inc. (acquired by Oracle), most recently as a Vice President of the Customer Sales Division. Mr. Ravin holds a Bachelor of Science in Business Administration from the University of Southern California.

Nancy Lyskawa has served as our Executive Vice President, Global Client Onboarding since March 2020. Previously she served as our Senior Vice President, Global Client Onboarding since joining the Company in September 2009. Prior to joining us, Ms. Lyskawa was with Oracle, a computer technology company, from December 2004 to September 2009, where she served in various executive roles, most recently as Vice President, Support Services and Marketing, from August 2005 to September 2009. From March 1994 to December 2004, she served as head of Global Services Marketing for PeopleSoft, Inc. (acquired by Oracle). From May 1986 to March 1994, Ms. Lyskawa served in various roles with Electronic Data Systems Corporation (acquired by Hewlett-Packard Company). Ms. Lyskawa is a Certified Management Accountant (CMA). Ms. Lyskawa holds a Bachelor of Business Administration in Accounting and Finance from the University of North Dakota and a Masters Certificate in Marketing from the Cox School of Business at Southern Methodist University.

Kevin Maddock has served as our Executive Vice President and Chief Recurring Revenue Officer since March 2021. Previously, he served as our Executive Vice President, Global Sales - Recurring Revenue from March 2020 until March 2021, our Senior Vice President, Global Sales - Recurring Revenue from January 2018 to March 2020 and our Senior Vice President, Global Sales from December 2008 to January 2018. Prior to joining us, Mr. Maddock served as Executive Vice President of Worldwide Inside Sales and Operations for ServiceSource, a recurring revenue management company, from October 2004 to March 2008. From May 1998 to September 2004, Mr. Maddock served as Vice President of Worldwide Support Service Sales at PeopleSoft, Inc. (acquired by Oracle). From September 1995 to May 1998, Mr. Maddock served in multiple roles at KPMG Consulting. From August 1987 to April 1993, Mr. Maddock served in various roles at Accenture (formerly Andersen Consulting). Mr. Maddock holds a Bachelor of Business Administration in Finance with Honors from the University of Notre Dame and a Masters of Business Administration from the Anderson School of Management at UCLA.

Michael L. Perica has served as our Executive Vice President and Chief Financial Officer since October 2020. Prior to joining us, Mr. Perica served as Vice President Finance and Chief Financial Officer of the \$1.2 billion Energy Systems Global business unit at Enersys (NYSE: ENS), a global leader in stored energy solutions. Mr. Perica joined Enersys in December 2018 as the result of Enersys' acquisition of Alpha Technologies, where he led the sell-side process as Alpha Technologies' Chief Financial Officer. Prior to his appointment as Chief Financial Officer in August 2015, he served as Alpha Technologies Vice President, International Finance and Operations since November 2013. Prior to his tenure at Alpha Technologies, Perica served as the Chief Financial Officer of Channell Commercial Corporation and spent 12 years as a sell-side analyst on Wall Street where he worked in senior publishing analyst positions at various investment banks. Mr. Perica holds a Bachelor of Business Administration degree in Accounting from Central Michigan University and a Master of Business Administration degree from the University of Southern California, Marshall School of Business.

David Rowe has served as our Executive Vice President, Global Transformation & Chief Product Officer since March 2023. Previously, he served as our Executive Vice President, Global Transformation from September 2021 until March 2023, our Executive Vice President and Chief Marketing Officer from March 2020 to September 2021, our Senior Vice President and Chief Marketing Officer from April 2012 to March 2020, our Senior Vice President of Global Marketing and Alliances from December 2008 to April 2012 and our Vice President Marketing and Alliances from September 2006 to December 2008. Prior to joining us, Mr. Rowe served as Vice President of Product Management and Marketing at Perfect Commerce, Inc., an eProcurement company, from November 2004 to June 2006. From May 1995 to June 1999, Mr. Rowe held various positions with PeopleSoft, Inc. (acquired by Oracle), most recently serving as Director, Product Strategy. From July 1988 to April 1995, Mr. Rowe served in various roles at Accenture (formerly Andersen Consulting). Mr. Rowe holds a Bachelor of Science degree in Engineering from Harvey Mudd College.

Steven Salaets joined our company in 2009 and has served as our Chief Information Officer & Executive Vice President, Global Shared Services since January 2022. Previously, he served as our Chief Information Officer, Chief People Officer & Executive Vice President, Global Security, Facilities, Quality and Internal Audit from July 2020 to January 2022, our Chief Information Officer and Executive Vice President, Global Security, Internal Audit and Quality from March 2020 until July 2020, our Chief Information Officer & Senior Vice President, Global Security, Quality and Internal Audit from December 2019 until March 2020 and our Senior Vice President, Global Security & Compliance and Chief Information Officer from August 2018 to December 2019. Prior to that, he served as our Group Vice President, Information Technology & Global Security, Compliance and Internal Audit (December 2016 to July 2018) and our Group Vice President, Global Human Resources and Global Security, Risk and Compliance (September 2013 to November 2016). Prior to September 2013, he held multiple other senior and director-level roles within our company focused on global security, risk and compliance. Prior to joining our company Mr. Salaets held management-level positions with Moody's KMV and Wind River. He holds a Bachelor of Science degree in Computer Science from Groep-T in Leuven, Belgium.

Available Information

We make our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports, as well as our other SEC filings, available on our website, free of charge, as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. Our website address is www.riministreet.com. References to our Report are provided as a convenience, and the information contained on our website is not incorporated by reference in this, or any other, SEC filing.

Item 1A. Risk Factors

Various factors could affect our business, financial condition, results of operations and cash flows. Any of the principal factors described in this section or other risks described elsewhere in this Report could result in a significant or material adverse effect on our business, financial condition, results of operations and cash flows. Additional risk factors not presently known to us or that we currently deem immaterial may also impair our business or results of operations. If any of these factors should materialize, the trading price of our securities and the value of your investment might significantly decline.

You should also refer to the explanation of the qualifications and limitations on forward-looking statements under "Cautionary Note Regarding Forward-Looking Statements" set forth in the introduction to Part I of this Report. All forward-looking statements made by us are qualified by the risk factors described below.

The following is a summary of some of the principal risk factors which are more fully described below.

Risks Related to Our Business, Operations and Industry

- Since 2010, we and our Chief Executive Officer and President have been involved in continuing litigation with Oracle. An adverse outcome in the litigation could result in the payment of substantial attorneys' fees and/or costs and/or an injunction against certain of our business practices.
- The Oracle software products that are part of our ongoing injunction compliance and Rimini II litigation with Oracle represent a significant portion of our revenue.
- Our ongoing litigation with Oracle presents challenges for growing our business.
- Oracle has a history of litigation against companies offering alternative support programs for Oracle products.
- Economic uncertainties, changes in economic conditions, including rising inflation, or downturns in the general economy or the industries in which our clients operate could disproportionately affect the demand for our products and services and may have a material adverse effect on our business.
- The market for independent software support services is relatively undeveloped and may not grow.
- We face significant competition for all components of our Solutions Portfolio.
- We have had a history of losses and may not achieve or sustain revenue growth or profitability in the future.
- If we are unable to attract new clients or retain and sell additional products or services to existing clients, our revenue growth will be adversely affected.
- Because we recognize revenue from subscriptions over the term of the relevant contract, downturns or upturns in sales are not immediately reflected in full in our results of operations.
- Our future liquidity and results of operations may be adversely affected by the timing of new orders, the level of client renewals and cash receipts from clients.
- The loss of one or more key employees could harm our business.
- The failure to attract and retain additional qualified personnel, including sales personnel, or to expand our marketing and sales capacities could prevent us from executing our business strategy.
- Our past growth is not indicative of future growth, and, if we grow rapidly, we may not be able to manage our growth effectively.
- Our failure to generate significant capital or raise additional capital necessary to fund our operations and invest in new services and products could reduce our ability to compete and could harm our business.
- Our business may suffer if it is alleged or determined that our technology infringes others' intellectual property rights.
- Interruptions to or degraded performance of our services, including as a result of interruptions or performance problems with technologies provided by third parties, could result in client dissatisfaction, damage to our reputation, loss of clients, limited growth and reduction in revenue.
- We may experience fluctuations in our results of operations due to the sales cycles for our products and services, which makes our future results difficult to predict and could cause our results of operations to fall below expectations or our guidance.
- We may be subject to additional obligations to collect and remit sales tax and other taxes, and we may be subject to tax liability, interest and/or penalties for past sales, which could adversely harm our business.
- Our reputation and/or business could be negatively impacted by ESG matters and/or our reporting of such matters.
- Any actions taken by governments or clients in response to any lingering impacts of the COVID-19 pandemic in the future may have a material adverse effect on our business.
- We may need to change our pricing to compete successfully.
- If we are not able to scale our business quickly and grow efficiently, our results of operations could be harmed.
- Our business will be susceptible to risks associated with global operations as our growth strategy involves further expansion of our sales to clients outside the United States.
- Consolidation in our target sales markets is continuing at a rapid pace, which could harm our business.
- If there is a widespread shift by clients or potential clients to enterprise software vendors, products and releases for which we do not provide software products or services, our business would be adversely impacted.
- Cybersecurity threats continue to increase in frequency and sophistication; if our data security measures are compromised or our services are perceived as not being secure, clients may curtail or cease their use of our services, our reputation may be harmed, and we may incur significant liabilities.
- We are subject to governmental and other legal obligations related to privacy, and our actual or perceived failure to comply with such obligations could harm our business.
- If we are not able to maintain an effective system of internal control over financial reporting, investors could lose confidence in our financial reporting, which could harm our business and have an adverse effect on our stock price.
- If we fail to enhance our brand, our ability to expand our client base will be impaired.
- If we fail to adequately protect our proprietary rights, our competitive position could be impaired and we may lose valuable assets, experience reduced revenue and incur costly litigation to protect our rights.
- The amount of and ultimate realization of the benefits from the net operating loss carryforwards for income tax purposes is dependent, in part, upon future events, the effects of which cannot be determined; if we are not able to use a significant portion of our net operating loss carryforwards, our profitability could be adversely affected.

- We are a multinational organization, and we could be obligated to pay additional taxes in various jurisdictions.
- Reports published by analysts, including projections in those reports that differ from our actual results, could adversely affect the price and trading volume of our Common Stock.

Risks Related to our Indebtedness, Capitalization Matters and Corporate Governance

- Our level of indebtedness and any future indebtedness we may incur may limit our operational and financing flexibility.
- The terms of our Credit Facility impose operating and financial restrictions on us.
- Our variable rate indebtedness subjects us to interest rate risk, which, along with the phase-out of LIBOR and transition to SOFR, could cause our indebtedness service obligations to increase significantly.
- The price of our Common Stock may be volatile.
- Any issuance of Common Stock upon the exercise of remaining warrants will cause dilution to existing stockholders and may depress the market price of our Common Stock.
- Certain of our common stockholders can exercise significant control, which could limit our stockholders' ability to influence the outcome of key transactions, including a change of control.
- Future resales of our Common Stock held by significant stockholders may cause the market price of our Common Stock to drop significantly.
- Our stock repurchase program could affect the price of our Common Stock and increase volatility and may be suspended or terminated at any time, which may result in a decrease in the trading price of our Common Stock.
- We do not currently intend to pay dividends on our Common Stock.
- The DGCL and our organizational documents contain provisions that limit the ability of stockholders to take certain actions and could delay or discourage takeover attempts that stockholders may consider favorable.
- Our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, stockholders or employees could be limited by our choice of forum in our bylaws.

Risks Related to Our Business, Operations and Industry

Risks Related to Litigation

We and our Chief Executive Officer and President have been involved in continuing litigation with Oracle since 2010. An adverse outcome in the ongoing litigation could result in the payment of substantial attorneys' fees and/or costs and/or an injunction against certain of our business practices, which could have a material adverse effect on our business and financial results.

In January 2010, certain subsidiaries of Oracle Corporation (together with its subsidiaries individually and collectively, "Oracle") filed a lawsuit, *Oracle USA, Inc. et al v. Rimini Street, Inc. et al* (United States District Court for the District of Nevada) ("District Court"), against us and our Chief Executive Officer and President, Seth Ravin, alleging that certain of our processes (Process 1.0) violated Oracle's license agreements with its customers and that we committed acts of copyright infringement and violated other federal and state laws ("Rimini I"). The litigation involved our business processes and the manner in which we provided our services to our clients.

After completion of jury trial in 2015 and subsequent appeals, the final outcome of Rimini I was that Mr. Ravin was found not liable for any claims and we were found liable for only one claim: "innocent infringement," a jury finding that we did not know and had no reason to know that our former support processes were infringing. The jury also found that the infringement did not cause Oracle to suffer lost profits. We were ordered to pay a judgment of \$124.4 million in 2016, which we promptly paid and then pursued appeals. With interest, attorneys' fees and costs, the total judgment paid by us to Oracle after the completion of all appeals was approximately \$89.9 million. A portion of such judgment was paid by our insurance carriers (for additional information on this topic, see Note 10 to our Consolidated Financial Statements included in Part II, Item 8 of this Report).

Since November 2018, we have been subject to a permanent injunction which prohibits us from using certain support processes that had been found in Rimini I to "innocently" infringe certain Oracle copyrights ("Injunction"). The Injunction does not prohibit the Company's provision of support services for any Oracle product lines, but rather defines the manner in which the Company can provide support services for certain Oracle product lines.

On July 10, 2020, Oracle filed a motion to show cause contending that we are in contempt of the Injunction, which we opposed. On January 12, 2022, the District Court issued its findings and order regarding whether we (i) violated the Injunction for certain accused conduct and (ii) should be held in contempt in those instances where the District Court found a violation of the Injunction, and what sanctions, if any, are appropriate.

In the order, the District Court ruled in favor of us with respect to five out of ten items. With respect to the other five items, the District Court found that we violated the Injunction, awarded sanctions to Oracle of \$0.6 million and ordered that certain computer files be quarantined from use and notice and proof of such quarantining be provided to Oracle. The District Court also ruled that Oracle may recover its reasonable attorneys' fees and costs. We reserve all rights, including appellate rights, with respect to the District Court rulings and findings.

On February 7, 2022, we filed a notice of appeal in the District Court, commencing an appeal of the District Court's January 12, 2022 decision to the Ninth Circuit Court of Appeals ("Court of Appeals"). On February 8, 2022, the District Court stayed the briefing on Oracle's bill of attorneys' fees and costs until our appeal is resolved. Oral argument on our appeal was held in San Francisco on February 6, 2023, and the matter remains pending in front of the Court of Appeals. At this time, we believe that we are in substantial compliance with the Injunction and have complied with the order regarding the quarantining of certain computer files. As of December 31, 2022, we have accrued \$6.9 million for an estimate related to Oracle's reasonable attorneys' fees and costs for this matter. Regarding our estimate for reasonable attorneys' fees and costs, significant judgment is required to determine the amount of loss related to this matter as the outcome is inherently unpredictable and subject to uncertainties. We reserve all rights, including appellate rights, with respect to the District Court's rulings and findings in the contempt matter, including any award of legal fees and costs.

Oracle may file additional contempt motions against us at any time to attempt to enforce its interpretation of the Injunction or if it has reason to believe we are not in compliance with the express terms of the Injunction. Such contempt proceedings or any judicial finding of contempt could result in a material adverse effect on our business and financial condition. In addition, the existence of the Injunction, alone, or the District Court's January 12, 2022 order, could dissuade clients from purchasing or continuing to purchase our services. If we are obligated to pay substantial civil assessments arising from any finding of contempt, this could reduce the amount of cash flows available to pay principal, interest, fees and other amounts due under our Credit Facility, which could result in an event of default, in which case the lenders could demand accelerated payment of principal, accrued and unpaid interest, and other fees. We cannot provide assurances that we will have sufficient assets which would allow us to repay such indebtedness in full at such time. As a result, we could be forced into bankruptcy or liquidation.

In October 2014, we filed a separate lawsuit, *Rimini Street Inc. v. Oracle Int'l Corp.*, in the District Court against Oracle seeking a declaratory judgment that our support practices, in use since at least July 2014, do not infringe certain Oracle copyrights ("Rimini II"). Our operative complaint asserts declaratory judgment, tort, and statutory claims. Oracle's operative counterclaim asserts declaratory judgment and copyright infringement claims and Lanham Act, breach of contract, and business tort violations.

On September 15, 2020, the District Court issued an order resolving the parties' motions for summary judgment. It found infringement of 17 Oracle PeopleSoft copyrights for work we performed for a discrete set of "gap customers" that were supported by processes litigated in Rimini I, and that became our customers after Rimini I was filed. The District Court also found infringement of four Oracle PeopleSoft copyrights involving support of two specific clients, described by the District Court as "limited cases" and involving "limited circumstance[s]." There was no finding of infringement on any other Oracle copyrights at issue.

During a status conference with the District Court on October 14, 2022, attorneys for Oracle confirmed that Oracle would withdraw all of its monetary damages claims against us in Rimini II and proceed with a bench trial instead of a jury trial for its claims for equitable relief.

As ordered by the District Court, on October 21, 2022, the parties filed a stipulation to dismiss with prejudice the Rimini II claims affected by Oracle's decision, including all of Oracle's monetary damages claims against us and Mr. Ravin. On October 24, 2022, the District Court entered an order granting the Stipulation, dismissing with prejudice Oracle's claims in Rimini II "for monetary relief of any kind under any legal theory [,] including but not limited to claims for damages, restitution, unjust enrichment, and engorgement [. . .]." In addition, Oracle's claims for breach of contract, inducing breach of contract and an accounting were dismissed with prejudice. Per the Stipulation, the parties have each reserved the right to seek attorneys' fees and/or costs to the extent permissible by law. Prior to the date of the District Court's order granting the Stipulation, no damages of any kind were awarded by the District Court in Rimini II. Whether to award any attorneys' fees and/or costs will be a decision for the District Court. We reserve all rights, including appellate rights, with respect to the District Court's rulings and findings in Rimini II.

The Rimini II bench trial began in Las Vegas on November 29, 2022 and concluded on December 15, 2022. The parties submitted their proposed findings of fact and conclusions of law to the District Court on February 23, 2023, and the matter remains pending.

We could be required to pay substantial attorneys' fees and/or costs in connection with litigation relating to our current or past business activities and/or be enjoined from certain business practices. Any of these outcomes could result in a material adverse effect on our business and financial condition, and the pendency of the litigation alone could dissuade clients from purchasing or continuing to purchase our services. If we are obligated to pay substantial attorneys' fees and/or costs to Oracle or are enjoined from certain business practices, this could reduce the amount of cash flows available to pay principal, interest, fees and other amounts due under our Credit Facility, which could result in an event of default, in which case the lenders could demand accelerated payment of principal, accrued and unpaid interest, and other fees. If we default in our payment obligations under the Credit Facility and the indebtedness under the Credit Facility were to be accelerated, there can be no assurance that our assets would be sufficient to repay such indebtedness in full, and we could be forced into bankruptcy or liquidation.

Our business has been and may continue to be materially harmed by this litigation and Oracle's conduct. During the course of these cases, we anticipate there will be rulings by the District Court in Rimini II, the District Court in the contempt proceedings, and the Court of Appeals in both the contempt proceedings and in Rimini II in connection with hearings, motions, decisions, and other matters, as well as other interim developments related to the litigations. If securities analysts or investors regard these rulings as negative, the market price of our Common Stock may decline. If current or prospective clients regard these rulings as negative, it could negatively impact our new client sales or renewal sales.

While we plan to continue to vigorously litigate the pending matters in the contempt proceedings and in Rimini II, we are unable to predict the timing or outcome of these matters. No assurance is or can be given that we will prevail on any appeal, contempt proceeding, claim, or counterclaim.

See the section titled "*Legal Proceedings*" in Part I, Item 3 and Note 10 to our Consolidated Financial Statements included in Part II, Item 8 of this Report for more information related to this litigation.

The Oracle software products that are part of our ongoing Injunction compliance and Rimini II litigation with Oracle represent a significant portion of our current revenue.

In addition to the ongoing litigation with Oracle over compliance with the Injunction that is in place, Oracle filed counterclaims in Rimini II relating to our support services for Oracle's PeopleSoft, J.D. Edwards, Siebel, E-Business Suite, and Database software products. For the year ended December 31, 2022, approximately 63% of our revenue was derived from the support services that we provide for our clients using Oracle's PeopleSoft, J.D. Edwards, Siebel, E-Business Suite and Database software products. The percentage of revenue derived from services we provide for PeopleSoft software only was approximately 9% of our total revenue during this same period. Although we provide support services for additional Oracle product lines that are not subject to the Injunction and litigation with Oracle, as well as for software products provided by companies other than Oracle, our current revenue depends significantly on the product lines that are the subject of the Injunction and Rimini II litigation. Should Oracle prevail on its claims in Rimini II or should a contempt proceeding on the Injunction result in a final order holding us in contempt, we could be required to change the way we provide support services to some of our clients, which could result in the loss of clients and revenue, and may also give rise to claims for compensation from our clients, any of which could have a material adverse effect on our business, financial condition and results of operations.

Our ongoing litigation with Oracle presents challenges for growing our business.

We have experienced challenges growing our business as a result of our ongoing litigation with Oracle. Many of our existing and prospective clients have expressed concerns regarding our ongoing litigation and, in some cases, have been subjected to various negative communications by Oracle in connection with the litigation. We have experienced in the past, and may continue to experience in the future, volatility and slowness in acquiring new clients, as well as clients not renewing their agreements with us, due to these challenges relating to our ongoing litigation with Oracle. Further, certain of our prospective and existing clients may be subject to additional negative communications from software vendors. We have taken steps to minimize disruptions to our existing and prospective clients regarding the litigation, but we continue to face challenges growing our business while the litigation remains ongoing. In certain cases, we have agreed to pay certain liquidated damages to our clients if we are no longer able to provide services to these clients, and/or reimburse our clients and our former lenders for their reasonable legal fees incurred in connection with any litigation-related subpoenas and depositions or to provide certain client indemnification or termination rights if any outcome of litigation results in our inability to continue providing any of the paid-for services. In addition, we believe the length of our sales cycle is longer than it otherwise would be due to prospective client

diligence on possible effects of the Oracle litigation on our business. We cannot provide assurances that we will continue to overcome the challenges we face as a result of the litigation and continue to renew existing clients or secure new clients.

Additionally, the existence of this ongoing litigation, including the January 12, 2022 District Court order, could negatively impact the value of our equity securities, and could negatively impact our ability to raise additional equity or debt financing.

We are self-insured for any costs related to any current or future intellectual property litigation, although we maintain and have tendered our errors and omissions insurance coverage for the wrongful acts alleged in Oracle's contempt proceeding in order to seek determinations of a duty to defend. We obtained a determination of a duty to defend with respect to our primary errors and omission insurance carrier and are seeking a determination of a duty to defend by one of our excess errors and omissions insurance carriers. We cannot provide assurances that we will prevail on this claim or any other similar claims that we may tender in the future.

While we currently believe our cash on hand, accounts receivable and contractually committed backlog provides us with liquidity to cover attorneys' fees and related costs, such as travel, hotels, and consultants, associated ongoing litigation with Oracle, we cannot assure our liquidity will be sufficient.

Oracle has a history of litigation against companies offering alternative support programs for Oracle products, and Oracle could pursue additional litigation with us.

Oracle has been active in litigating against companies that have offered competing maintenance and support services for their products. For example, in March 2007, Oracle filed a lawsuit against SAP and its wholly-owned subsidiary, TomorrowNow, Inc. After a jury verdict awarding Oracle \$1.3 billion, the parties stipulated to a final judgment of \$306 million subject to appeal. After the appeal, the parties settled the case in November 2014 for \$356.7 million. In February 2012, Oracle filed suit against ServiceKey, Inc. and settled the case in October 2013 after the District Court issued an injunction against ServiceKey and its CEO. Oracle also filed suit against CedarCrestone Corporation in September 2012 and settled the case in July 2013. TomorrowNow and CedarCrestone offered maintenance and support for Oracle software products, and Service Key offered maintenance and support for Oracle technology products. Given Oracle's history of litigation against companies offering alternative support programs for Oracle products, we can provide no assurance, regardless of the outcome of our current litigations with Oracle, that Oracle will not pursue additional litigation against us. Such additional litigation could be costly, distract our management team from running our business and reduce client interest and our sales revenue.

Other Risks Related to Our Business, Operations and Industry

Economic uncertainties, changes in economic conditions, including rising inflation, or downturns in the general economy or the industries in which our clients operate, may result in increased costs of operations, could disproportionately affect the demand for our products and services and could negatively impact our results of operations.

General worldwide economic conditions have experienced significant fluctuations in recent years, and market volatility and uncertainty remain widespread, with the expectation that inflation (including hyperinflation), other economic challenges and possible recession will be exacerbated for an extended period. Inflation has accelerated in the U.S. and globally due in part to global supply chain issues, a rise in energy prices, fiscal and monetary policies adopted during the COVID-19 pandemic and continued strong consumer demand. An inflationary environment may increase our and our clients' cost of labor due to higher wages, as well as result in higher financing costs and/or higher supplier prices for both us and our clients. As a result, we and our clients may find it difficult to accurately forecast and plan future business activities. In addition, these conditions could cause our clients or prospective clients to reduce their IT budgets, which could decrease corporate spending on our products and services, resulting in delayed and lengthened sales cycles, a decrease in new client acquisition and loss of clients. Furthermore, during challenging economic times, our clients may face issues with their cash flows and in gaining timely access to sufficient credit or obtaining credit on reasonable terms, which could impair their ability to make timely payments to us, impact client renewal rates and adversely affect our revenue. If such conditions occur, we may be required to increase our reserves, allowances for doubtful accounts and write-offs of accounts receivable, and our results of operations would be harmed. We cannot predict the timing, strength or duration of any economic slowdown or recovery, whether global, regional or within specific markets. If the conditions of the general economy or markets in which we operate worsen, our business could be harmed. In addition, even if the overall economy improves, the market for our products and services may not experience growth. Moreover, multiple events, including changes in U.S. trade policies and responsive changes in policy by foreign jurisdictions, governmental and multinational organizations' responses to the COVID-19 pandemic and geopolitical developments and uncertainty in the European Union and elsewhere, such as the current conflict between Russia and Ukraine,

have increased levels of political and economic unpredictability globally, and may increase the volatility of global financial markets and the global and regional economies.

The market for independent software support services is relatively undeveloped and may not grow.

The market for independent enterprise software support services is still relatively undeveloped, has not yet achieved widespread acceptance and may not grow quickly or at all. Our success will depend to a substantial extent on the willingness of companies to engage a third party such as us to provide software support services for their enterprise software. Many enterprise software licensees remain hesitant to use a third party to provide such support services, choosing instead to rely on support services provided by the enterprise software vendor. Other enterprise software licensees have invested substantial personnel, infrastructure and financial resources in their own organizations with respect to support of their licensed enterprise software products and may choose to self-support with their own internal resources instead of purchasing services from the enterprise software vendor or an independent provider such as ourselves. Particularly because our market is relatively undeveloped, we must address any potential clients' concerns and explain the benefits of our approach to convince them of the value of our services. If companies are not sufficiently convinced that we can address their concerns and that the benefits of our services are compelling, then the market for our services may not develop as we anticipate, and our business will not grow.

We face significant competition for the services comprising each component of our Solutions Portfolio, from both enterprise software vendors and other companies offering independent enterprise software support, products and services, as well as from software licensees that attempt to self-support, which may harm our ability to add new clients, retain existing clients and grow our client base across all of our Solutions Portfolio offerings.

Our current and potential competitors across each component of our Solutions Portfolio, which include enterprise software vendors, may have significantly more financial, technical, sales and marketing teams and other resources than we have, may be able to devote greater resources to the development, promotion, sale and support of their products and services, may have more extensive customer bases and broader customer relationships than we have and may have longer operating histories and greater name recognition than we have. Specifically, we face intense competition from enterprise software vendors, such as Oracle and SAP, who provide software support for their own products, as well as from other competitors who provide independent enterprise software support, products and services. Competitors, including enterprise software vendors, have offered, and may continue to offer, discounts to companies to whom we have marketed our services. In addition, competitors, including enterprise software vendors, may take other actions in an attempt to maintain their business, including changing the terms of their customer agreements, the functionality of their support, products or services, or their pricing terms. For example, starting in the second quarter of 2017 Oracle has prohibited us from accessing its support websites to download software updates on behalf of our clients who are authorized to do so and permitted to authorize a third party to do so on their behalf. In addition, the support, license or other contractual policies of our future and current competitors, including Oracle and SAP, may include clauses that penalize customers that choose to use our or any independent provider's services or products. Further, the contractual policies of enterprise software vendors, such as Oracle and SAP, may contain clauses that penalize customers that seek to return to the software vendor to purchase new licenses following a departure from the software vendor's support program. In addition, our current and potential competitors may develop and market new technologies that render our existing or future enterprise software support, products or services less competitive or obsolete. Finally, we also face competition from software licensees that choose to self-support. Competition could significantly impede our ability to sell our enterprise support, products and services on terms favorable to us, and we may need to decrease the prices for our support, products or services to remain competitive. If we are unable to maintain our current pricing due to competitive pressures, our margins will be reduced and our results of operations will be negatively affected.

There are also several smaller support services vendors in the independent enterprise software support services market with whom we compete with respect to certain of our support services. We expect competition to continue to increase in the future, particularly if we prevail in Rimini II, which could harm our ability to increase sales, maintain or increase renewals and maintain our prices. In addition, certain providers of independent enterprise software support, products and services may have or may develop more strategic relationships with enterprise software vendors, which may allow them to compete more effectively than us over the long term. To the extent any of our competitors have existing relationships with potential clients for any component of our Solutions Portfolio, those potential clients may be unwilling to purchase our services because of those existing relationships, which could cause the demand for our services to be substantially impacted. Further, our competitors may attempt to use the Oracle litigation and the existence of the Injunction described above under the section titled "Risks Related to Litigation," to dissuade certain of our prospective or existing clients from purchasing or continuing to purchase any or all of the components of our Solutions Portfolio, including our enterprise software support services.

We have had a history of losses and may not achieve or sustain revenue growth or profitability in the future. Further, if we are unable to attract new clients or retain and/or sell additional products or services to our existing clients, our revenue growth could be adversely affected.

We recorded a net loss of \$2.5 million for the year ended December 31, 2022, and we had an accumulated deficit of \$228.3 million as of December 31, 2022. We will need to generate and sustain increased revenue levels in future periods while managing our costs to be profitable, and, even if we do, we may not be able to maintain or increase our level of profitability. To increase our revenue, we must add new clients, secure renewals or service extensions by existing clients on terms favorable to us and sell additional products and services to existing clients. As competitors introduce low-cost and/or differentiated services that are perceived to compete with ours, or as enterprise software vendors introduce competitive pricing or additional products and services or implement other sales strategies to compete with us, our ability to sell to new clients and renew agreements with existing clients based on pricing, service levels, technology and functionality could be impaired. In addition, certain of our existing clients may choose to license a new or different version of enterprise software from an enterprise software vendor, and such clients' license agreements with the enterprise software vendor will typically include a minimum one-year mandatory maintenance and support services agreement. In such cases, it is unlikely that these clients would renew their maintenance and support services agreements with us, at least during the early term of the license agreement. In addition, such existing clients could move to another enterprise software vendor, product or release for which we do not offer any products or services. As a result, we may be unable to renew or extend our agreements with existing clients or attract new clients or new business from existing clients on terms that would be favorable or comparable to prior periods, which could have an adverse effect on our revenue and growth.

Additionally, we intend to continue to expend significant funds to expand our sales and marketing operations, enhance our service offerings, expand into new markets, launch new product offerings and meet the increased compliance requirements associated with our operations as a public company. Our efforts to grow our business may be costlier than we expect, and we may not be able to increase our revenue enough to offset our higher operating expenses. Further, many companies with which we compete have larger and longer-tenured sales and marketing teams, which may impact the ability to grow our business, which could have an adverse effect on our revenue and growth. If we are unable to achieve and sustain revenue growth or profitability, the market price of our securities may significantly decrease.

If our retention rates decrease, or we do not accurately predict retention rates, our future revenue and results of operations may be harmed.

Our clients have no obligation to renew their product or service subscription agreements with us after the expiration of a non-cancelable agreement term. In addition, the majority of our multi-year, non-cancelable client agreements are not pre-paid other than the first year of the non-cancelable service period. We may not accurately predict retention rates for our clients. Our retention rates may decline or fluctuate as a result of a number of factors, including our clients' decision to license a new product or release from an enterprise software vendor, our clients' decision to move to another enterprise software vendor, product or release for which we do not offer products or services, any remaining impact of the COVID-19 pandemic and global economic conditions, including rising inflation and interest rates, on our clients' businesses, client satisfaction with our products and services, the acquisition of our clients by other companies, and clients going out of business. If our clients do not renew their agreements for our products and services or if our clients decrease the amount they spend with us, our revenue will decline and our business will suffer. In addition, certain of our existing clients may choose to license a new or different version of enterprise software from an enterprise software vendor, and such clients' license agreements with the enterprise software vendor will typically include a minimum one-year mandatory maintenance and support services agreement. In such cases, it is unlikely that these clients would renew their maintenance and support services agreements with us, at least during the early term of the license agreement. In addition, such existing clients could move to another enterprise software vendor, product or release for which we do not offer any products or services.

Because we recognize revenue from subscriptions over the term of the relevant contract, downturns or upturns in sales are not immediately reflected in full in our results of operations.

As a subscription-based business, we recognize revenue over the service period of our contracts. As a result, much of our reported revenue each quarter results from contracts entered into during previous quarters. Consequently, while a shortfall in demand for our products and services or a decline in new or renewed contracts in any one quarter may not significantly reduce our revenue for that quarter, it could negatively affect our revenue in future quarters and full year periods. Accordingly, the effect of significant downturns in new sales, renewals or extensions of our service agreements for a quarter will not be reflected in full in our results of operations until future periods. Our revenue recognition model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, as revenue from new clients must be recognized over the applicable service contract term.

Due to the variability of timing in our sales cycle, if we fail to forecast our revenue accurately, or if we fail to match our expenditures with corresponding revenue, our results of operations and liquidity could be adversely affected.

The variability of the sales cycle for the evaluation and implementation of our products and services, which typically has been six to twelve months once a client is engaged, may cause us to experience a delay between increasing operating expenses for such sales efforts, and the generation of corresponding revenue. Accordingly, we may be unable to prepare accurate internal financial forecasts or replace anticipated revenue that we do not receive as a result of delays arising from these factors. As a result, our results of operations and liquidity in future reporting periods may be significantly below the expectations of the public market, securities analysts or investors, which could negatively impact the price of our Common Stock.

Our future liquidity and results of operations may be adversely affected by the timing of new orders, the level of client renewals and cash receipts from clients.

Due to the collection of cash from our clients before services are provided, our revenue is recognized over future periods when there are no corresponding cash receipts from such clients. Accordingly, our future liquidity depends upon the ability to continue to attract new clients and to enter into renewal arrangements with existing clients. If we experience a decline in orders from new clients or renewals from existing clients, our revenue may continue to increase while our liquidity and cash levels decline. Any such decline, however, will negatively affect our revenues in future quarters. Accordingly, the effect of declines in orders from new clients or renewals from existing clients may not be fully reflected in our results of operations and cash flows until future periods. Comparing our revenues and operating results on a period-to-period basis may not be meaningful, as it may not be an indicator of the future sufficiency of our cash and cash equivalents to meet our liquidity requirements. You should not rely on our past results as an indication of our future performance or liquidity.

We rely on our management team and other key employees, including our Chief Executive Officer and President, and the loss or disability of one or more key employees could harm our business. Additionally, the failure to attract and retain additional qualified personnel, including sales personnel, or to expand our marketing and sales capabilities could prevent us from executing our business strategy.

The loss of or a disability that would prevent our Chief Executive Officer and President or any of our key senior members of management from substantially performing their duties could have a material adverse effect on our business, operating results and financial condition, particularly if we are unable to hire and integrate suitable replacements on a timely basis. Mr. Ravin has been under long-standing medical care for kidney disease, which includes ongoing treatment. Although Mr. Ravin's condition has not adversely impacted his performance as Chief Executive Officer and President or on the overall management of the Company, we can provide no assurance that his condition will not affect his ability to perform the role of Chief Executive Officer and President in the future. Further, as we continue to grow our business, we will continue to adjust our senior management team to best address our growth opportunities. If we are unable to attract or retain the right individuals for the team, it could hinder our ability to grow our business and could disrupt our operations or otherwise have a material adverse effect on our business. We do not maintain key man life insurance on any of our employees.

Furthermore, to execute our business strategy, we must attract and retain highly qualified personnel, including sales personnel. Our ability to increase our client base and achieve broader market acceptance of our services will depend to a significant extent on our ability to expand our marketing and sales operations. We plan to continue expanding our sales force globally. We are experiencing a very competitive recruiting environment, creating difficulty in hiring and retaining sufficient numbers of highly skilled sales personnel and other employees with appropriate qualifications. In particular, we have experienced extreme hiring competition in the San Francisco Bay Area, where we have a significant amount of operations, but also face extremely competitive hiring environments across the United States and the other countries in which we operate. Our efforts to attract, develop, integrate and retain highly skilled employees with appropriate qualifications may be compounded by intensified restrictions on travel (including restrictions implemented during a pandemic or similar circumstance), immigration, or the availability of work visas. Many companies with which we compete for experienced personnel have greater resources and less stock price volatility than we do. In making employment decisions, job candidates often consider the value of the equity incentives they are to receive in connection with their employment. If the price of our stock continues to experience significant volatility, our ability to attract or retain qualified employees will be adversely affected. In addition, as we continue to expand into new geographic markets, there can be no assurance that we will be able to attract and retain the required management, sales, marketing and support services personnel to profitably grow our business. If we fail to attract highly qualified new sales and other personnel or fail to retain and motivate our current personnel, our growth prospects could be severely harmed.

Moreover, our sales personnel typically take an average of between nine to twelve months before any new sales personnel can operate at the capacity typically expected of experienced sales personnel. This ramp cycle, combined with our typical six- to twelve-month sales cycle for engaged prospects, means that we will not immediately recognize a return on this investment in our sales results. In addition, the cost to acquire clients is high due to the cost of these marketing and sales efforts. Further, the cost of marketing and sales efforts will likely increase as we continue to offer new products and services, as even our experienced sales personnel will need to receive specialized training on our new offerings. Our business may be materially harmed if our efforts do not generate a corresponding increase in revenue. We may not achieve anticipated revenue growth from expanding our sales force if we are unable to hire, develop and retain talented sales personnel, if our new sales personnel are unable to achieve desired productivity levels in a reasonable period of time or if our sales and marketing programs are not effective.

Our past growth is not indicative of our future growth, and if we grow rapidly, we may not be able to manage our growth effectively.

Our revenue grew from \$374.4 million for the year ended December 31, 2021 to \$409.7 million for the year ended December 31, 2022, representing a period over period increase of 9%. You should not consider our past growth as indicative of our future performance. We believe growth of our revenue depends on a number of factors, including our ability to:

- price our products and services effectively so that we are able to attract new clients and retain existing clients without compromising our profitability;
- introduce our products and services to new geographic markets;
- introduce new enterprise software products and services supporting additional enterprise software vendors, products and releases;
- satisfactorily conclude any Oracle-related litigation and any other litigation or governmental inquiry that may occur; and
- increase awareness of our company, products and services on a global basis.

We may not successfully accomplish all or any of these objectives.

In addition, our historical rapid growth has placed and may continue to place significant demands on our management and our operational and financial resources. Our organizational structure is becoming more complex as we add additional staff, and we will need to improve our operational, financial and management controls, as well as our reporting systems and procedures. Further, we believe that our corporate culture has been a critical component of our success. We have invested substantial time and resources in building our team and nurturing our culture. As we continue to expand our business and operate as a public company, we may find it difficult to maintain our corporate culture while managing our employee growth. We will require significant capital expenditures and the allocation of valuable management resources to grow and change in these areas without undermining our corporate culture of rapid innovation, teamwork and attention to client service that has been central to our growth. Any failure to manage our anticipated growth and related organizational changes in a manner that preserves our culture could negatively impact future growth and achievement of our business objectives.

Our failure to generate significant capital through our operations or raise additional capital necessary to fund and expand our operations, invest in new services and products, and service our debt could reduce our ability to compete and could harm our business.

We may need to incur additional debt under our Credit Facility and/or raise additional capital beyond what is available under our Credit Facility if we cannot fund our growth or service our debt through our operating cash flows. Should this occur, we may not be able to obtain additional debt or additional equity financing on favorable terms, if at all, which could harm our business, results of operations and financial condition. We are also subject to certain restrictions for future financings as discussed in the risk factor “*The terms of our Credit Facility impose operating and financial restrictions on us.*” If we raise additional equity financing, our stockholders may experience significant dilution of their ownership interests and the value of our Common Stock could decline. If we engage in additional debt financings, the holders of the debt securities or lenders would have priority over the holders of our Common Stock. We may also be required to accept terms that further restrict our ability to incur additional indebtedness, take other actions that would adversely impact the short-term price of our Common Stock, or force us to maintain specified liquidity or other ratios, any of which could harm our business, results of operations and financial condition and reduce the value of our Common Stock.

Our business may suffer if it is alleged or determined that our technology infringes the intellectual property rights of others.

The software industry is characterized by the existence of a large number of patents, copyrights, trademarks, trade secrets and other intellectual and proprietary rights. Companies in the software industry are often required to defend against claims and litigation alleging infringement or other violations of intellectual property rights. Many of our competitors and other industry participants have been issued patents and/or have filed patent applications and may assert patent or other intellectual property rights within the industry. Our ongoing litigation with Oracle relates in part to copyright infringement claims and, from time to time, we may receive threatening letters or notices alleging infringement or may be the subject of claims that our services and underlying technology infringe or violate the intellectual property rights of others. Any allegation of infringement, whether innocent or intentional, can adversely impact marketing, sales and our reputation.

Interruptions to or degraded performance of our service could result in client dissatisfaction, damage to our reputation, loss of clients, limited growth and reduction in revenue.

Our software support agreements with our clients generally guarantee a 10-minute response time with respect to certain high-priority issues. If we do not meet the 10-minute guarantee, our clients may in some instances be entitled to liquidated damages, service credits or refunds. To date, no such payments have been made.

We also deliver tax, legal and regulatory updates to our clients. If there are inaccuracies in these updates, or if we are not able to deliver them on a timely basis to our clients, our reputation may be damaged, and we could face claims for compensation from our clients and potentially lose clients.

Any interruptions or delays in our service, whether as a result of third-party error, our own error, natural disasters or other catastrophic events, security breaches or a result of any other issues, whether accidental or willful, could harm our relationships with clients and cause our revenue to decrease and our expenses to increase. Also, in the event of damage or interruption, our insurance policies may not adequately compensate us for any losses that we may incur. These factors, in turn, could further reduce our revenue, subject us to liability, cause us to pay liquidated damages, issue credits or cause clients not to renew their agreements with us, any of which could materially adversely affect our business.

We depend and rely on SaaS technologies and related services from third parties in order to operate critical functions of our business and interruptions or performance problems with these technologies or services may adversely affect our business and operating results.

We depend and rely on software-as-a-service, or SaaS, technologies and related services from third parties in order to operate critical functions of our business, including billing and order management, financial accounting services, and customer relationship management services. If these services become unavailable due to extended outages or interruptions, security vulnerabilities, or cyber-attacks, because they are no longer available on commercially reasonable terms or prices, or due to other unforeseen circumstances, our expenses could increase, our ability to manage these critical functions could be interrupted, and our processes for and ability to manage sales of our products, recognize revenue, and support our customers could be impaired, all of which could adversely affect our business and operating results.

We may experience fluctuations in our results of operations due to the sales cycles for our products and services, which makes our future results difficult to predict and could cause our results of operations to fall below expectations or our guidance.

Our results of operations have fluctuated in the past and are expected to fluctuate in the future due to a variety of factors, many of which are outside of our control, including seasonality linked to certain of the sales cycles for our products and services. Historically, our sales cycle has been tied to the renewal dates for our clients' existing and prior vendor support agreements for the products that we support. Because our clients make support vendor selection decisions in conjunction with the renewal of their existing support agreements with Oracle and SAP, among other enterprise software vendors, we have experienced an increase in business activity during the quarterly periods in which those agreements are up for renewal. However, because we have introduced and intend to continue to introduce products and services for additional software products that do not follow the same renewal timeline or pattern, our past results may not be indicative of our future performance, and comparing our results of operations on a period-to-period basis may not be meaningful. Also, if we are unable to engage a potential client before its renewal date for software support services in a particular year, it will likely be at least another year before we would have the opportunity to engage that potential client again, given that such potential client likely had to renew or extend its existing support agreement for at least an additional year's worth of service with its existing support provider. Furthermore, our existing clients generally renew their agreements with us at or near the end of each calendar year, so we have also experienced and expect to continue to experience heavier renewal rates in the fourth quarter.

We may not be able to accurately forecast the amount and mix of future product and service subscriptions, revenue and expenses, and as a result, our results of operations may fall below our estimates or the expectations of securities analysts and investors. If our revenue or results of operations fall below the expectations of investors or securities analysts, or below any guidance we may provide, the price of our Common Stock could decline.

Our reputation and/or business could be negatively impacted by ESG matters and/or our reporting of such matters.

There is an increasing focus from regulators, certain investors, certain clients, the communities in which we operate and other stakeholders concerning environmental, social, and governance (“ESG”) matters, both in the United States and internationally. These stakeholders may have differing priorities and expectations regarding ESG matters. In particular, certain of our clients or potential clients might require that we implement specified ESG procedures or standards in order to do business or continue to do business with them. In addition, proxy advisory firms and certain institutional investors who manage investments in public companies are increasingly integrating ESG factors into their investment analysis. The consideration of ESG factors in making business, investment and voting decisions is relatively new. Accordingly, the frameworks and methods for assessing ESG policies are not fully developed, likely vary across our various stakeholders and will likely continue to evolve over time.

Moreover, the subjective nature of methods used by our various stakeholders to assess a company with respect to ESG criteria could result in erroneous perceptions or a misrepresentation of our actual ESG policies and practices. In addition, we could also incur additional costs and require additional resources to monitor, report and comply with various ESG practices and associated legal, legislative and regulatory requirements. To the extent that our required and voluntary disclosures about ESG matters increase, we could be criticized for the accuracy, adequacy, or completeness of such disclosures. If we fail to comply with specific ESG-related client/potential client or investor expectations and standards, or to provide the disclosure relating to ESG issues that any third parties may believe is necessary or appropriate (regardless of whether there is a legal requirement to do so), our reputation, business, financial condition, and/or results of operations, as well as the price of our common stock, could be negatively impacted.

Any actions taken by governmental authorities, clients or others in response to any lingering impacts of the COVID-19 pandemic in the future may have a material adverse effect on our business, financial condition, results of operations, and cash flows.

The COVID-19 pandemic has adversely affected the global economy, created significant financial market volatility and disrupted global supply chains, business operations and consumer confidence. In response to the COVID-19 pandemic, we have taken, and expect to continue to take, measures designed to protect the health of our employees and to minimize our operational disruption and resulting provision of services to our clients. However, there is still some remaining uncertainty around any lingering impacts of the pandemic on the global economy and consumer confidence. The COVID-19 pandemic could have a sustained adverse impact on economic and market conditions, which may delay prospective clients’ decisions regarding engaging our services, impair the ability of our current clients to make timely payments to us, cause our current clients to ask for payment concessions or discounts, impact client renewal rates and adversely affect our revenue. If such conditions occur, we may be required to increase our reserves, allowances for doubtful accounts and write-offs of accounts receivable, and our results of operations would be harmed.

We are unable to accurately predict any future impact of the COVID-19 pandemic due to various uncertainties, including the duration and scope of new variants and surges, and actions that may be taken by governmental authorities to contain the virus in the future. We continue to monitor the remaining impact of the COVID-19 pandemic to assess its potential effects on our business. The extent to which our results may be affected will largely depend on future developments which cannot be accurately predicted and are uncertain, but any lingering impacts of the COVID-19 pandemic could have a material adverse effect on our business, financial condition, results of operations, or cash flows. Further, due to our subscription-based business model, the effect of the pandemic may not be fully reflected in our results of operations until future periods, and any global macroeconomic effects of the pandemic may persist for an indefinite period. The COVID-19 pandemic may also have the effect of heightening many of the other risks described in this “Risk Factors” section. Refer to the section titled “*Impact of the COVID-19 Pandemic and Current Economic Conditions*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7 of this Report for additional information.

We may need to change our pricing models to compete successfully.

We currently offer our clients support services for a fee that is equal to a percentage of the annual fees charged by the enterprise software vendor; therefore, changes in such vendors’ fee structures would impact the fees we would receive from our clients. If the enterprise software vendors offer deep discounts on certain services or lower prices generally, we may need to

change our pricing models, which could have an adverse effect on our results of operations. In addition, our other product and service offerings, such as our Rimini ONE integrated services, have pricing models that use a variety of different metrics and formulas as compared to our support solutions. To the extent that we do not have substantial experience with pricing such new products and services, we may need to adjust our pricing models for these offerings over time to ensure that we remain competitive and realize a return on our investment in developing these new products and services. If we do not adapt our pricing models as necessary or appropriate, our revenue could decrease and adversely affect our results of operations.

We may not be able to scale our business systems quickly enough to meet our clients' growing needs, and if we are not able to grow efficiently, our results of operations could be harmed.

As enterprise software products become more advanced and complex, we will need to devote additional resources to innovating, improving and expanding our offerings to provide relevant products and services to our clients using these more advanced and complex products. In addition, we will need to appropriately scale our internal business systems and our global operations and client engagement teams to serve our growing client base, particularly as our client demographics expand over time. Any such expansion may be expensive and complex, requiring financial investments, management time and attention. Any failure of or delay in these efforts could adversely affect the quality or success of our services and negatively impact client satisfaction, resulting in potential decreased sales to new clients and possibly lower renewal rates by existing clients.

We could also face inefficiencies or operational failures as a result of our efforts to scale our infrastructure. There can be no assurance that the expansion and improvements to our infrastructure and systems will be fully or effectively implemented within budgets or on a timely basis, if at all. Any failure to efficiently scale our business could result in reduced revenue and increased expenditures and adversely impact our operating margins and results of operations.

Because our long-term growth strategy involves further expansion of our sales to clients outside the United States, our business will be susceptible to risks associated with global operations, including currency exchange rate fluctuations.

A significant component of our growth strategy involves the further expansion of our operations and client base outside the United States. Accordingly, our international revenue grew from \$174.6 million for the year ended December 31, 2021 to \$194.3 million for the year ended December 31, 2022, an increase of \$19.7 million or 11%. We currently have subsidiaries outside of the United States in Australia, Brazil, Canada, UAE (Dubai), France, Germany, Hong Kong, India, Israel, Japan, Korea, Malaysia, Mexico, Netherlands, New Zealand, Poland, Singapore, Sweden, Taiwan and the United Kingdom, which focus primarily on selling our services in those regions.

In the future, we may expand to other locations outside of the United States. Our current global operations and future initiatives will involve a variety of risks, including among others:

- changes in a specific country's or region's political or economic conditions;
- the occurrence of catastrophic events, including natural disasters, that may disrupt our business;
- changes in regulatory requirements, taxes or trade laws or the imposition of trade sanctions;
- currency exchange rate fluctuations and the resulting effect on our revenue and expenses, and the cost and risk of entering into currency exchange rate hedging transactions;
- more stringent regulations relating to data security, such as where and how data can be housed, accessed and used, and the unauthorized use of, or access to, commercial and personal information;
- differing labor regulations, especially in countries and geographies where labor laws are more advantageous to employees as compared to the United States, including deemed hourly wage and overtime regulations;
- challenges inherent in efficiently managing an increased number of employees over large geographic distances, including the need to implement appropriate systems, policies, benefits and compliance programs as well as hire and retain local management, sales, marketing and support personnel, along with the ability to recapture costs to open up new geographies;
- difficulties in managing a business in new markets with diverse cultures, languages, customs, legal systems, alternative dispute systems and regulatory systems;
- increased logistics, travel, real estate, infrastructure and legal compliance costs associated with global operations;
- limitations on our ability to reinvest earnings from operations in one country to fund the capital needs of our operations in other countries;
- laws and business practices favoring local competitors or general preferences for local vendors;
- limited or insufficient intellectual property protection;
- war, political instability or terrorist activities, including geopolitical actions specific to an international region, such as the conflict between Russia and Ukraine;
- exposure to liabilities under anti-corruption and anti-money laundering laws, including the United States Foreign Corrupt Practices Act and similar laws and regulations in other jurisdictions; and

- adverse tax burdens and foreign exchange controls that could make it difficult to repatriate earnings and cash.

Our exposure in operating our business globally with the risks noted above and the unique challenges of each new geography increase the risk that any potential future expansion efforts that we may undertake will not be successful. If we invest substantial time and resources to expand our global operations and are unable to do so successfully and in a timely manner, our business and results of operations will be adversely affected.

Consolidation in our target sales markets is continuing at a rapid pace, which could harm our business in the event that our clients are acquired and their agreements are terminated, or not renewed or extended.

Consolidation among companies in our target sales markets has been robust in recent years, and this continuing trend poses a risk for us. If such consolidation rates continue, we expect that some of the acquiring companies will terminate, renegotiate and elect not to renew our agreements with the clients they acquire, which may have an adverse effect on our business and results of operations.

If there is a widespread shift by clients or potential clients to enterprise software vendors, products and releases for which we do not provide software products or services, our business, financial condition and results of operations would be adversely impacted.

Our current revenue is primarily derived from the provision of support services for Oracle and SAP enterprise software products. If other enterprise software vendors, products and releases emerge to take substantial market share from current Oracle and SAP products and releases we support, and we are unable to, or do not, offer products or services for such vendors, products or releases, demand for our products and services may decline or our products and services may become obsolete. Developing new products and services to address different emerging enterprise software vendors, products and releases could take a substantial investment of time and financial resources, and we cannot guarantee that we will be successful. If fewer clients use enterprise software products for which we provide products and services, and we are not able to provide services for new vendors, products and releases, our business may be adversely impacted.

We continue to invest resources in research and development to enhance our current product and service offerings, and other new offerings that will appeal to clients and potential clients, for example, our partnership with Salesforce to support SaaS solutions, our Application Management Services (AMS) for SAP and Oracle products and our Rimini ONE integrated services. The development of new product and service offerings may not generate sufficient revenue to offset the increased research and development expenses and may not generate gross profit margins consistent with our current margins. Also, our new product and service offerings may be in markets that are more competitive than markets for our existing product and service offerings, making it more difficult to introduce them to clients and potential clients effectively or provide them profitably.

If our new or modified products, services or technology do not work as intended, are not responsive to client needs or industry or regulatory changes, are not appropriately timed with market opportunity, or are not effectively brought to market, we may lose existing and prospective clients or related opportunities, in which case our financial condition and results of operations may be adversely impacted, and if we are not successful in implementing any new product and service offerings, we may need to write off the value of our investment in such offerings.

Cybersecurity threats continue to increase in frequency and sophistication; if our data security measures are compromised or unauthorized access to or misuse of client data occurs, our services may be perceived as not being secure, clients may curtail or cease their use of our services, our reputation and our business may be harmed, and we may incur significant liabilities.

Our services sometimes involve accessing, processing, sharing, using, storing and transmitting proprietary information and protected data of our clients. We rely on proprietary and commercially available systems, software, tools and monitoring, as well as other processes, to provide security for accessing, processing, sharing, using, storing and transmitting such information and data. If our security measures are compromised as a result of third-party action, employee, vendor or client error, malfeasance, stolen or fraudulently obtained log-in credentials or otherwise, our reputation could be damaged, our business and our clients may be harmed, and we could incur significant liabilities. Cyberattacks continue to increase in frequency and in magnitude generally, and these threats are being driven by a variety of sources, including nation-state sponsored espionage and hacking activities, industrial espionage, organized crime, sophisticated organizations and hacking groups and individuals. Furthermore, due to geopolitical tensions related to the conflict between Russia and Ukraine and developments in China, the risk of cyber-attacks may be elevated. We have been the subject of cybersecurity threats and expect such threats to continue in the future. In addition, if the security measures of our clients are compromised, even without any actual compromise of our own systems or security measures, we may face negative publicity or reputational harm if our clients or anyone else incorrectly

attributes the blame for such security breaches to us, our products and services, or our systems. We may also be responsible for repairing any damage caused to our clients' systems that we support, and we may not be able to make such repairs in a timely manner or at all.

We may be unable to anticipate or prevent techniques used to obtain unauthorized access or to sabotage systems because they change frequently and generally are not detected until after an incident has occurred. As we increase our client base and our brand becomes more widely known and recognized, we may become more of a target for third parties seeking to compromise our systems or security measures or gain unauthorized access to our clients' proprietary information and protected data as was the case in a 2021 successful phishing incident where we were a victim, which resulted in some unauthorized sharing of client addresses and outstanding billing data information, but did not significantly impact our business or client relationships.

Although we attempt to mitigate these risks by employing a number of measures, including insurance, monitoring of our systems and networks, employee training and maintenance of backup and protective systems, our systems, networks, products and services remain potentially vulnerable to increasingly sophisticated advanced persistent threats that may have a material effect on our business. In addition, the devotion of additional resources to the security of our information technology systems in the future could significantly increase the cost of doing business or otherwise adversely impact our financial results.

In addition, many governments have enacted laws requiring companies to notify individuals of data security incidents involving certain types of personal data, and some of our clients contractually require notification of any data security compromise. In the event of a data security compromise, we may have difficulty timely complying with notification requirements that are unreasonably short or burdensome. Security compromises experienced by our clients, by our competitors or by us may lead to public disclosures, which may lead to widespread negative publicity. Any data security compromise in our industry, whether actual or perceived, could harm our reputation, erode client confidence in the effectiveness of our security measures, negatively impact our ability to attract new clients, cause existing clients to elect not to renew their agreements with us, or subject us to third party lawsuits, government investigations, regulatory fines or other action or liability, all or any of which could materially and adversely affect our business, financial condition and results of operations.

We cannot provide assurances that any limitations of liability provisions in our contracts for a security breach would be enforceable or adequate or would otherwise protect us from any such liabilities or damages with respect to any particular claim. Further, certain of our contracts do not contain limitations of liability specific to security breaches, which could expose us to significant liabilities or damages, all or any of which could materially and adversely affect our business, financial condition and results of operations. We also cannot be sure that our existing general liability insurance coverage and coverage for errors or omissions will continue to be available on acceptable terms or will be available in sufficient amounts to cover one or more claims, or that the insurer will not deny coverage as to any future claim. The successful assertion of one or more claims against us that exceed available insurance coverage, or the occurrence of changes in our insurance policies, including premium increases or the imposition of substantial deductible or co-insurance requirements, could have a material adverse effect on our business, financial condition and results of operations.

We are subject to governmental and other legal obligations related to privacy and security, and our actual or perceived failure to comply with such obligations could harm our business.

As an expanding global company, we are subject to the laws and regulations of numerous jurisdictions worldwide regarding accessing, processing, sharing, using, storing, transmitting, disclosure and protection of personal data, the scope of which are constantly changing, subject to differing interpretation and related to jurisdictions where we have operations, customers, or where we conduct marketing, and such laws may be inconsistent between countries or in conflict with other laws, legal obligations or industry standards. For example, the General Data Protection Regulation ("GDPR") in the European Union ("EU"), creates a broad range of requirements and imposes substantial penalties for non-compliance, including possible fines of up to 4% of global annual revenue for the preceding financial year or €20 million (whichever is higher) for the most serious infringements. We are also subject to certain requirements in other international jurisdictions with or developing strong privacy and security legislation, as well as expanding U.S. state law, including the California Consumer Privacy Act of 2018, the California Privacy Rights Act of 2020, the Virginia Consumer Data Protection Act of 2021 (effective Jan 1, 2023), the Colorado Consumer Privacy Act of 2021 (effective July 1, 2023), as well as privacy and security legislation in other states, including Nevada, each of which add to the range of privacy- and security-related compliance requirements. We generally comply with industry standards and strive to comply with all applicable legal obligations relating to privacy, data protection and security, but it is possible that these laws and other legal obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with industry standards or our practices or may be mandated at a pace that exceeds our ability to comply. Compliance with such requirements may be costly and may require us to modify our business practices, which could adversely affect our business and profitability. Any failure or perceived failure by us to comply

with these laws, policies or other obligations may result in governmental enforcement actions or litigation against us, with potential consequences such as fines and other expenses related to such governmental actions, an order requiring that we change our data practices or business practices, and could cause our clients to lose trust in us, any of which could have an adverse effect on our business.

If our products and services fail due to defects or similar problems, and if we fail to correct any defect or other software problems, we could lose clients, become subject to service performance or warranty claims or incur significant costs.

Our products and services and the systems infrastructure necessary for the successful delivery of our products and services to clients are inherently complex and may contain material defects or errors unknown to us. We have from time to time found defects in our products and services after delivery to our customers and may discover additional defects in the future. In particular, we have developed our own tools and processes to deliver comprehensive tax, legal and regulatory updates tailored for each client, which we endeavor to deliver to our clients in a shorter timeframe than our competitors, which may result in an increased risk of material defects or errors occurring. We may not be able to detect and correct all defects or errors before clients begin to use our products and services, as some may be unknown. Consequently, defects or errors may be discovered after our products and services are provided and used. These defects or errors could also cause inaccuracies in the data we collect and process for our clients, or even the loss, damage or inadvertent release of such confidential data. Even if we are able to implement fixes or corrections to our tax, legal and regulatory updates in a timely manner, any history of defects or inaccuracies in the data we collect for our clients, or the loss, damage or inadvertent release of such confidential data could cause our reputation to be harmed, and clients may elect not to renew, extend or expand their agreements with us and subject us to service performance credits, warranty or other claims or increased insurance costs. The costs associated with any material defects or errors in our products and services or other performance problems may be substantial and could materially adversely affect our financial condition and results of operations.

If we are not able to maintain an effective system of internal control over financial reporting, current and potential investors could lose confidence in our financial reporting, which could harm our business and have an adverse effect on our Common Stock price.

We have had material weaknesses in our internal control over financial reporting. As described under “Controls and Procedures” in Part II, Item 9A of our 2021 Form 10-K, our management concluded that we had a material weakness in our internal control over financial reporting as of March 31, 2021 and December 31, 2020, due to inadequate controls in relation to improperly applying the accounting guidance for our GP Sponsor Private Placement Warrants, recognizing the warrants as equity instead of as a liability.

As described under “Controls and Procedures” in Part II, Item 9A of our 2021 Form 10-K, we remediated the material weakness in relation to the accounting for our GP Sponsor Private Placement Warrants; however, we cannot provide assurance that material weaknesses in our internal control over financial reporting will not be identified in the future.

With respect to controls over revenue accounting procedures, we intend to continue to work on automating our processes, especially around Accounting Standards Codification 606 (“ASC 606”), *Revenue from Contracts with Customers*, as well as to continue to enhance our review processes around new and renewal contracts. In addition, we are required to have our independent registered public accounting firm attest to and report on management’s assessment of the effectiveness of our internal control over financial reporting. If we are unable to conclude that we have effective internal control over financial reporting, or if our independent registered public accounting firm is unable to provide us with an attestation and an unqualified report as to the effectiveness of our internal control over financial reporting, investors could lose confidence in the reliability of our financial statements, which could result in a decrease in the value of our securities. For further information regarding our controls and procedures, see “Controls and Procedures” in Part II, Item 9A of this Report.

If we fail to enhance and protect our brand, our ability to expand our client base will be impaired and our financial condition may suffer.

We believe that our development and protection of the Rimini Street brand is critical to achieving widespread awareness of our products and services, and as a result, is important to attracting new clients and maintaining existing clients. We also believe that the importance of brand recognition will increase as competition in our market increases. Successful promotion of our brand will depend largely on the effectiveness of our marketing efforts and on our ability to provide reliable products and services at competitive prices, as well as the outcome of our ongoing litigation with Oracle. Brand promotion activities may not yield increased revenue, and even if they do, any increased revenue may not offset the expenses we incurred in building our brand. If we fail to successfully promote, maintain and protect our brand, our business could be adversely impacted.

If we fail to adequately protect our proprietary rights, our competitive position could be impaired and we may lose valuable assets, experience reduced revenue and incur costly litigation to protect our rights.

Our success depends, in part, upon protecting our proprietary products, services, knowledge, software tools and processes. We rely on a combination of copyrights, trademarks, service marks, trade secret laws and contractual restrictions to establish and protect our proprietary rights. However, the steps we take to protect our intellectual property may be inadequate. We will not be able to protect our intellectual property if we are unable to enforce our rights or if we do not detect unauthorized use of our intellectual property. Any of our copyrights, trademarks, service marks, trade secret rights or other intellectual property rights may be challenged by others or invalidated through administrative process or litigation. Furthermore, legal standards relating to the validity, enforceability and scope of protection of intellectual property rights are uncertain. Despite our precautions, it may be possible for unauthorized third parties to copy or use information that we regard as proprietary to create products and services that compete with ours. In addition, the laws of some countries do not protect proprietary rights to the same extent as the laws of the United States. To the extent we expand our global activities, our exposure to unauthorized copying and use of our brand, processes and software tools may increase.

We enter into confidentiality and invention assignment agreements with our employees and consultants and enter into confidentiality agreements with the parties with whom we have strategic relationships and business alliances. No assurance can be given that these agreements will be effective in controlling access to and distribution of our proprietary intellectual property. Further, these agreements may not prevent our competitors from independently developing products and services that are substantially equivalent or superior to our products and services.

Although we have been successful in the past, there can be no assurance that we will receive any additional patent protection for our proprietary software tools and processes. Even if we were to receive patent protection, those patent rights could be invalidated at a later date. Furthermore, any such patent rights may not adequately protect our processes, our software tools or prevent others from designing around our patent claims.

To protect our intellectual property rights, we may be required to spend significant resources to monitor and protect these rights. Litigation brought to protect and enforce our intellectual property rights could be costly, time consuming and distracting to management and could result in the impairment or loss of portions of our intellectual property. Furthermore, our efforts to enforce our intellectual property rights may be met with defenses, counterclaims and countersuits attacking the validity and enforceability of our intellectual property rights. Our inability to protect our products, processes and software tools against unauthorized copying or use, as well as any costly litigation or diversion of our management's attention and resources, could delay further sales or the implementation of our products and services, impair the functionality of our products and services, delay introductions of new products and services, result in our substituting inferior or more costly technologies into our products and services, or injure our reputation.

We may be subject to additional obligations to collect and remit sales tax and other taxes, and we may be subject to tax liability, interest and/or penalties for past sales, which could adversely harm our business.

State, local and foreign jurisdictions have differing and complex rules and regulations governing sales, use, value-added and other taxes, and these rules and regulations can be subject to varying interpretations that may change over time. In particular, the applicability of such taxes to our products and services in various jurisdictions is unclear. Further, these jurisdictions' rules regarding tax nexus are complex and can vary significantly. As a result, we could face the possibility of tax assessments and audits, and our liability for these taxes and associated interest and penalties could exceed our original estimates. Should these jurisdictions determine that we should be collecting additional sales, use, value-added or other taxes, it could result in substantial tax liabilities and related penalties for past sales, discourage clients from purchasing our products and services or otherwise harm our business and results of operations.

The amount of and ultimate realization of the benefits from the net operating loss carryforwards for income tax purposes is dependent, in part, upon the tax laws in effect, our future earnings, and other future events, the effects of which cannot be determined; if we are not able to use a significant portion of our net operating loss carryforwards, our profitability could be adversely affected.

We have United States federal and state net operating loss carryforwards due to prior period losses, which could expire unused and be unavailable to offset future income tax liabilities, which could adversely affect our profitability.

In addition, under Section 382 of the Internal Revenue Code of 1986, as amended, our ability to utilize net operating loss carryforwards or other tax attributes in any taxable year may be limited if we experience an "ownership change." A Section

382 “ownership change” generally occurs if one or more stockholders or groups of stockholders who own at least 5% of our stock increase their ownership by more than 50 percentage points over their lowest ownership percentage within a rolling three-year period. Similar rules may apply under state tax laws in the United States. While our ownership changes to date have not triggered any limitations under Section 382, it is possible that any future ownership changes or issuances of our capital stock, could have a material effect on the use of our net operating loss carryforwards or other tax attributes, which could adversely affect our profitability.

We are a multinational organization faced with increasingly complex tax issues in many jurisdictions, and we could be obligated to pay additional taxes in various jurisdictions.

As a multinational organization, we may be subject to taxation in several jurisdictions worldwide with increasingly complex tax laws, the application of which can be uncertain. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. As such, our results may differ from previous estimates and may materially affect our financial position.

The amount of taxes we pay in jurisdictions in which we operate could increase substantially as a result of changes in the applicable tax principles, including increased tax rates, new tax laws or revised interpretations of existing tax laws and precedents, which could have a material adverse effect on our liquidity and results of operations. In addition, the authorities in these jurisdictions could review our tax returns and impose additional tax, interest and penalties, and the authorities could claim that various withholding requirements apply to us or our subsidiaries or assert that benefits of tax treaties are not available to us or our subsidiaries, any of which could have a material impact on our business and results of operations.

Risks Related to our Indebtedness and Securities

Our level of indebtedness and any future indebtedness we may incur may limit our operational and financing flexibility and negatively impact our business.

On December 31, 2022, our outstanding indebtedness under the Credit Facility and finance leases totaled \$78.8 million. We may incur substantial additional indebtedness in the future. Our Credit Facility and other debt instruments we may enter into in the future may significantly impact our business, including the following among others:

- our ability to obtain additional financing for working capital, capital expenditures, acquisitions or general corporate purposes may be impaired;
- our requirement to use a significant portion of our cash flows from operations to pay principal and interest on our indebtedness, which will reduce the funds available to us for operations and other purposes;
- our level of indebtedness could place us at a competitive disadvantage compared to our competitors that may have proportionately less debt;
- our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate may be limited; and
- our level of indebtedness may make us more vulnerable to economic downturns and adverse developments in our business.

We expect to depend primarily on cash generated by our operations for funds to pay our expenses and any amounts due under our Credit Facility and any other indebtedness we may incur. Our ability to make these payments depends on our future performance, which will be affected by financial, business, economic and other factors, many of which we cannot control, including any lingering impacts of the COVID-19 pandemic, inflation and global economic conditions. Our business may not generate sufficient cash flows from operations in the future and our currently anticipated growth in net sales and cash flows may not be realized, either or both of which could result in our being unable to repay indebtedness or to fund other liquidity needs. If we do not generate adequate resources, we may be required to refinance all or part of our then existing debt, sell assets or borrow more money, in each case on terms that may not be acceptable to us. In addition, the terms of existing or future debt agreements, including our existing Credit Facility, may restrict us from adopting some or any of these alternatives. Our inability to incur additional debt in the future could also delay or prevent a change in control of our Company, make some transactions more difficult and impose additional financial or other covenants on us. In addition, any significant levels of indebtedness in the future could make us more vulnerable to economic downturns and adverse developments in our business. Our current indebtedness and any inability to pay our debt obligations as they come due or an inability to incur additional debt could adversely affect our business and results of operations.

The terms of our Credit Facility impose operating and financial restrictions on us.

Our Credit Facility contains certain restrictions and covenants that generally limit our ability to, among other things, create liens on assets, sell assets, engage in mergers or consolidations, make loans or investments, incur additional indebtedness, engage in certain transactions with affiliates, incur certain material ERISA or pension liabilities and pay dividends or repurchase capital stock and in each case, subject to certain exceptions set forth in our credit agreement. Our Credit Facility may limit our ability to engage in these types of transactions even if we believe that a specific transaction would contribute to our future growth or improve our operating results. Our Credit Facility also requires us to achieve specified financial and operating results and maintain compliance with specified financial ratios, including as a condition to accessing additional amounts available for borrowing. As of December 31, 2022 and on the date of filing this Report, we were in compliance with each of these financial covenants. Our ability to comply with these provisions may be affected by events beyond our control. A breach of any of these financial covenants or our inability to comply with required financial ratios in our Credit Facility could result in a default under the Credit Facility in which case the lenders would have the right to declare all borrowings, which includes any principal amount outstanding, together with all accrued, unpaid interest and other amounts owing in respect thereof, to be immediately due and payable. If we are unable to repay all borrowings when due, whether at maturity or if declared due and payable following a default, the lenders would have the right to proceed against the collateral granted to secure the indebtedness. If we breach these covenants or fail to comply with other terms of the Credit Facility and the lenders accelerate the amounts outstanding under the Credit Facility, our business and results of operations would be adversely affected. Additionally, we may need to refinance our Credit Facility at maturity or upon default, and future financing may not be available on acceptable terms, or at all.

Our variable rate indebtedness subjects us to interest rate risk, which, along with the phase-out of LIBOR and transition to SOFR, could cause our indebtedness service obligations to increase significantly.

As a result of market interest rate fluctuations, interest rates under our Credit Facility or other variable rate indebtedness we may incur in the future could be higher or lower than current levels. As interest rates increase, our debt service obligations under our Credit Facility may increase even though the amounts borrowed remain the same, and our net income (loss) and cash flows, including cash available for servicing our indebtedness, would correspondingly decrease. We have entered into an interest rate swap agreement that involves the exchange of floating for fixed rate interest payments in order to partially reduce interest rate volatility under our Credit Facility. However, we currently do not maintain interest rate swap agreements with respect to all of our variable rate indebtedness, and any interest rate swap agreements we enter into in the future may not fully mitigate our interest rate risk.

Effective February 28, 2023, we amended both our Credit Facility and our then-effective interest rate swap agreement to implement certain changes in the reference rate from LIBOR to the Secured Overnight Financing Rate (“SOFR”) in response to the previous announcement by the ICE Benchmark Administration, the administrator of LIBOR, that it would cease publication of all remaining U.S. Dollar LIBOR settings effective June 30, 2023. As a result, we have a choice of interest rates between (a) Adjusted Term SOFR and (b) a Base Rate, in each case plus an applicable margin and as further defined in the Credit Facility. The applicable margin is based on our Consolidated Leverage Ratio (as defined in the Credit Facility) and whether we elect Adjusted Term SOFR (ranging from 1.75 to 2.50%) or Base Rate (ranging from 0.75 to 1.50%). SOFR is a relatively new reference rate, and its composition and characteristics are not the same as LIBOR. SOFR is calculated based on short-term repurchase agreements, backed by Treasury securities. As such, SOFR is observed and backward looking, which stands in contrast with LIBOR under the previous methodology, which is an estimated forward-looking rate and relies, to some degree, on the expert judgment of submitting bank panel members. Given SOFR’s limited history, the future performance of SOFR cannot be predicted based on historical performance, and there is no assurance that SOFR will perform in the same way as LIBOR would have performed at any time or that it is a comparable substitute for LIBOR. The consequences of transitioning to SOFR could result in an increase in the cost of our variable rate indebtedness, which may impact our ability to refinance some or all of our existing indebtedness or otherwise have a material adverse impact on our business, financial condition and results of operations.

Our stock repurchase program could affect the price of our Common Stock and increase volatility and may be suspended or terminated at any time, which may result in a decrease in the trading price of our Common Stock.

Our Board of Directors has authorized a \$50.0 million stock repurchase program. During the year ended December 31, 2022, we acquired 0.9 million shares of Common Stock on the open market at a cost of \$4.7 million. Upon completion of this repurchase, these shares of Common Stock were retired. Repurchases pursuant to any such stock repurchase program could affect our Common Stock price and increase its volatility. The existence of a stock repurchase program could also cause our Common Stock price to be higher than it would be in the absence of such a program and could potentially reduce the market liquidity for our Common Stock. Such repurchase program will not obligate us to repurchase any further specific dollar amount

or number of shares of Common Stock within that authorization and may be suspended or discontinued at any time, which could cause the market price of our Common Stock to decline. The timing and actual number of further shares repurchased under any such stock repurchase program depends on a variety of factors including the timing of open trading windows, price, corporate and regulatory requirements, and other market conditions. Further, the provisions of the Inflation Reduction Act of 2022 impose an excise tax of 1% tax on the fair market value of stock repurchases made after December 31, 2022, net of certain adjustments for issuances of incentive and other equity. The impact of this provision will depend on the extent of share repurchases and qualified reductions for issuances made in future periods. There can be no assurance that any stock repurchases will enhance stockholder value because the market price of our Common Stock may decline below the levels at which we repurchased shares of Common Stock. Although our stock repurchase program is intended to enhance stockholder value, short-term stock price fluctuations could reduce the program's effectiveness.

The price of our Common Stock may be volatile, any issuance of Common Stock upon the exercise of remaining warrants will dilute existing stockholders and such issuances and/or any sales of Common Stock by large stockholders may depress the market price of our Common Stock.

The price of our Common Stock may fluctuate due to various factors enumerated in this Risk Factors section and elsewhere in this Report. Additional factors impacting the price of our Common Stock could include:

- the failure of securities analysts to publish research about us, or shortfalls in our results of operations compared to levels forecast by securities analysts;
- any delisting of our Common Stock from Nasdaq Global Market due to any failure to meet listing requirements; and
- the general state of securities markets.

These factors may materially reduce the market price of our Common Stock, regardless of our operating performance. Additionally, we have registered for resale the shares of Common Stock of certain of our significant holders of our Common Stock, including our largest stockholder, Adams Street Partners, LLC. Any sale of large amounts of our Common Stock on the open market or in privately negotiated transactions could have the effect of increasing the volatility in the price of our Common Stock or putting significant downward pressure on the price of our Common Stock. Also, the issuance of Common Stock upon exercise of warrants that remain outstanding and exercisable may result in immediate dilution to the equity interests of our existing common stockholders and might result in dilution in the tangible net book value of a share of Common Stock, depending upon the price on which the additional shares are issued. We may also seek to engage in further capital optimization transactions in the future, the result of which could trigger some dilution or have other impacts on the market price of our Common Stock and not achieve an improved capital structure. Any issuance of equity we may undertake in the future to raise additional capital could cause the price of our Common Stock to decline or require us to issue shares at a price that is lower than that paid by holders of our Common Stock in the past, which would result in those newly issued shares being dilutive.

Certain of our common stockholders can exercise significant control, which could limit our stockholders' ability to influence the outcome of key transactions, including a change of control.

Based on the number of shares of Common Stock outstanding as of December 31, 2022, two of our stockholders have aggregate voting power of 39.6% of our outstanding capital stock. As of December 31, 2022, (i) approximately 26.6% of our outstanding voting capital stock is held by Adams Street Partners LLC and certain Adams Street fund limited partnerships and (ii) approximately 12.9% of our outstanding voting capital stock is beneficially owned by our Chief Executive Officer and President. Our directors and officers or persons affiliated with our directors and officers have aggregate voting power of approximately 42.0% as of December 31, 2022.

As a result, these stockholders, acting together, have significant influence over all matters that require approval by our stockholders, including the election of directors and approval of significant corporate transactions. Corporate action might be taken even if other stockholders oppose the action being taken. This concentration of ownership might also have the effect of delaying or preventing a change of control of our company that other stockholders may view as beneficial.

We do not currently intend to pay dividends on our Common Stock and, consequently, the ability to achieve a return on investment in our Common Stock will depend on appreciation in the price of our Common Stock.

We have not paid any cash dividends on our Common Stock to date. The payment of any cash dividends on our Common Stock will depend upon our revenue, earnings, cash flow and financial condition from time to time. The payment of any dividends is at the discretion of our Board of Directors and is also limited under the terms of our Credit Facility. Our ability to declare dividends on our Common Stock may also be limited by the terms of future financing and other agreements entered into by us from time to time. It is presently expected that we will retain all earnings for use in our business operations and,

accordingly, it is not expected that our Board of Directors will declare any dividends on our Common Stock in the foreseeable future. Therefore, the success of an investment in shares of our Common Stock will depend upon any future appreciation in its value. There is no guarantee that shares of our Common Stock will appreciate in value or even maintain the price at which our stockholders have purchased their shares.

Risks Relating to our Corporate Governance

The DGCL and our certificate of incorporation, bylaws and corporate governance policies contain certain provisions, including anti-takeover provisions that limit the ability of stockholders to take certain actions and could delay or discourage takeover attempts that stockholders may consider favorable.

Our certificate of incorporation and bylaws, and Delaware General Corporation Law (the “DGCL”), contain provisions that could have the effect of rendering more difficult, delaying, or preventing an acquisition deemed undesirable by our Board of Directors and therefore depress the trading price of our Common Stock. These provisions could also make it difficult for stockholders to take certain actions, including electing directors who are not nominated by the current members of our Board of Directors or taking other corporate actions, including effecting changes in our management and corporate governance policies and practices. Among other things, our certificate of incorporation and bylaws include provisions regarding:

- a classified Board of Directors with three-year staggered terms, which could delay the ability of stockholders to change the membership of a majority of our Board of Directors;
- the ability of our Board of Directors to issue shares of preferred stock, including “blank check” preferred stock, and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;
- the limitation of the liability of, and the indemnification of our directors and officers;
- the exclusive right of our Board of Directors to elect a director to fill a vacancy created by the expansion of the Board of Directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our Board of Directors;
- the requirement that directors may only be removed from our Board of Directors for cause;
- a prohibition on common stockholder action by written consent, which forces common stockholder action to be taken at an annual or special meeting of stockholders and could delay the ability of stockholders to force consideration of a stockholder proposal or to take action, including the removal of directors;
- the requirement that a special meeting of stockholders may be called only by our Board of Directors, the chairperson of our Board of Directors, our chief executive officer or our president (in the absence of a chief executive officer), which could delay the ability of stockholders to force consideration of a proposal or to take action, including the removal of directors;
- controlling the procedures for the conduct and scheduling of Board of Directors and stockholder meetings;
- the requirement for the affirmative vote of holders of at least 66 2/3% of the voting power of the then outstanding shares of the voting stock, voting together as a single class, to amend, alter, change or repeal any provision of our certificate of incorporation or our bylaws, which could preclude stockholders from bringing matters before annual or special meetings of stockholders and delay changes in our Board of Directors and also may inhibit the ability of an acquirer to effect such amendments to facilitate an unsolicited takeover attempt;
- the ability of our Board of Directors to amend the bylaws, which may allow our Board of Directors to take additional actions to prevent an unsolicited takeover and inhibit the ability of an acquirer to amend the bylaws to facilitate an unsolicited takeover attempt; and
- advance notice procedures with which stockholders must comply to nominate candidates to our Board of Directors or to propose matters to be acted upon at a stockholders’ meeting, which could preclude stockholders from bringing matters before annual or special meetings of stockholders and delay changes in our Board of Directors and also may discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer’s own slate of directors or otherwise attempting to obtain control of our company.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in our Board of Directors or management and corporate governance policies.

In addition, as a Delaware corporation, we are subject to provisions of Delaware law, including Section 203 of the DGCL, which may prohibit certain stockholders holding 15% or more of our outstanding capital stock from engaging in certain business combinations with us for a specified period of time.

Any provision of our certificate of incorporation, bylaws or DGCL that has the effect of delaying or preventing a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our Common Stock and could also affect the price that some investors are willing to pay for our Common Stock.

Our bylaws designate a state or federal court located within the State of Delaware as the sole and exclusive forum for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, stockholders or employees.

Our bylaws provide that the Court of Chancery of the State of Delaware will be the sole and exclusive forum for:

- any derivative action or proceeding brought on behalf of us;
- any action asserting a claim of breach of a fiduciary duty owed to us or our stockholders by any of our directors, officers or other employees;
- any action asserting a claim against us or any of our directors, officers or employees arising out of or relating to any provision of the DGCL, our certificate of incorporation or our bylaws; or
- any action asserting a claim against us or any of our directors, officers, stockholders or employees that is governed by the internal affairs doctrine of the Court of Chancery.

This choice of forum provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or any of our directors, officers, or other employees, which may discourage lawsuits with respect to such claims. Alternatively, if a court were to find the choice of forum provision to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, results of operations and financial condition. This choice of forum provision does not operate to restrict suits brought to enforce any liability or duty created by the Securities Act or the Exchange Act.

General Risks

Future acquisitions, strategic investments, partnerships or alliances could be difficult to identify and integrate, divert the attention of management, disrupt our business, dilute stockholder value and adversely affect our financial condition and results of operations.

We may in the future seek to acquire or invest in businesses, products or technologies that we believe could complement or expand our services, enhance our technical capabilities or otherwise offer growth opportunities. The pursuit of potential acquisitions may divert the attention of management and cause us to incur various expenses in identifying, investigating and pursuing suitable acquisitions, whether or not the acquisitions are completed. If we acquire businesses, we may not be able to integrate successfully the acquired personnel, operations and technologies, or effectively manage the combined business following the acquisition. We may not be able to find and identify desirable acquisition targets or be successful in entering into an agreement with any particular target or obtain adequate financing to complete such acquisitions. Acquisitions could also result in dilutive issuances of equity securities or the incurrence of debt, which could adversely affect our results of operations. In addition, if an acquired business fails to meet our expectations, our business, financial condition and results of operations may be adversely affected.

The commercial insurance market is changing rapidly in response to rising insurance losses and claims, changes in available insurance capacity and adverse worldwide economic conditions, uncertainties, and risks, which may lead to higher premium costs, higher policy deductibles, self-insured retentions, and/or lower coverage limits, potentially impacting our ability to continue our present limits of insurance coverage, obtain sufficient insurance capacity to adequately insure our risks or maintain adequate insurance at a reasonable cost.

Commercial insurance availability and coverage terms, including deductibles, self-insured retentions and pricing, continue to vary with market conditions. While we believe our insurance coverage addresses all material risks to which we are exposed and is adequate and customary for our current global operations, we have observed rapidly changing conditions in the insurance markets relating to nearly all areas of traditional corporate insurance, resulting in higher premium costs, rising policy deductibles/self-insured retentions and lower coverage limits. If these changes continue, we may not be able to continue our present limits of insurance coverage, obtain sufficient insurance capacity to adequately insure our risks and/or obtain and maintain adequate insurance at a reasonable cost. Our insurance policies cover a number of risks and potential liabilities, such as general liability, property coverage, errors and omissions liability, employment liability, business interruptions, cybersecurity liability, crime, and directors' and officers' liability. We cannot be certain that our insurance coverage will be adequate to cover liabilities actually incurred, that insurance will continue to be available to us on commercially reasonable terms, or at all, or that any insurer will not deny coverage as to any future claim or become insolvent. The successful assertion of one or more large

claims against us that exceed available insurance coverage, the occurrence of changes in our insurance policies, including premium increases, decreases in coverage and the imposition of large deductible, self-insured retentions, or co-insurance requirements, or the insolvency of any of our insurers, could have a material adverse effect on our business, results of operations and financial condition.

Catastrophic events may disrupt our business.

We rely heavily on our network infrastructure and information technology systems for our business operations. A disruption or failure of these systems in the event of an online attack, earthquake, fire, terrorist attack, geopolitical instability including the ongoing conflict between Russia and Ukraine, war, power loss, telecommunications failure, extreme weather conditions (such as hurricanes, wildfires or floods) or other catastrophic event could cause system interruptions, delays in accessing our service, reputational harm, loss of critical data or could prevent us from providing our products and services to our clients. In addition, several of our employee groups reside in areas particularly susceptible to earthquakes, such as the San Francisco Bay Area and Japan, and a major earthquake or other catastrophic event could affect our employees, who may not be able to access our systems, or otherwise continue to provide our services to our clients. A catastrophic event that results in the destruction or disruption of our data centers, or our network infrastructure or information technology systems, or access to our systems could affect our ability to conduct normal business operations and adversely affect our business, financial condition and results of operations. Additionally, the emergence or spread of a pandemic or other widespread health emergency (or concerns over and response to the possibility of such an emergency), including any lingering impacts of the COVID-19 pandemic could adversely affect our business, financial condition and results of operations.

Failure to comply with laws and regulations applicable to our operations could harm our business.

Our business is subject to regulation by various global governmental agencies, including agencies responsible for monitoring and enforcing employment and labor laws, workplace safety, environmental laws, consumer protection laws, anti-bribery laws, import/export controls, securities laws and tax laws and regulations. For example, transfer of certain software outside of the United States or to certain persons is regulated by export controls.

In certain jurisdictions, these regulatory requirements may be more stringent than those in the United States. Noncompliance with applicable requirements could subject us to investigations, sanctions, enforcement actions, disgorgement of profits, fines, damages, civil and criminal penalties or injunctions and may result in our inability to provide certain products and services. If any governmental sanctions are imposed, or if we do not prevail in any possible civil or criminal litigation, or if clients make claims against us for compensation for such non-compliance, our business, financial condition and results of operations could be harmed, and responding to any such type of action will likely result in a significant diversion of management's attention and resources.

Reports published by analysts, including projections in those reports that differ from our actual results, could adversely affect the price and trading volume of our Common Stock.

Securities research analysts may establish and publish their own periodic projections for us. These projections may vary widely and may not accurately predict the results we actually achieve. Our share price may decline if our actual results do not meet the projections of these securities research analysts. Similarly, if one or more of the analysts who write reports on us downgrades our stock or publishes inaccurate or unfavorable research about our business, our share price could decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, our share price or trading volume could decline. If no additional analysts commence coverage of us, the market price and volume for our common shares could be adversely affected.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal executive offices are located in Las Vegas, Nevada. We also have offices located in Pleasanton, California; Chicago, Illinois; New York, New York; Wilmington, Delaware; Greensboro, North Carolina; Hong Kong; London, United Kingdom; Sydney, Australia; Melbourne, Australia; Brisbane, Australia; Auckland, New Zealand; Dubai, United Arab Emirates; Kuala Lumpur, Malaysia; Mexico City, Mexico; Amsterdam, Netherlands; São Paulo, Brazil; Frankfurt, Germany; Paris, France; Warsaw, Poland; Stockholm, Sweden; Taipei, Taiwan; Tel Aviv, Israel; Tokyo, Japan; Osaka, Japan; Seoul, South Korea; Hyderabad, India; Bengaluru, India; and Singapore.

We lease all of our facilities, and we do not own any real property. We are expanding in multiple locations globally. To the extent we may require additional office space in the future, we believe that it would be readily available on commercially reasonable terms. For additional information regarding impairment charges related to certain of our office leases, please refer to Part II, Item 7 of this report “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Impairment charges related to operating lease right-of-use assets.”

Item 3. Legal Proceedings

The legal proceedings and government inquiry described in Note 10 of the 2022 consolidated financial statements included in Item 8 of this Report are incorporated in this Item 3. *Legal Proceedings* by reference.

In addition, from time to time, we may be a party to litigation and subject to claims incident to the ordinary course of business. Although the results of litigation and claims cannot be predicted with certainty, we currently believe that the final outcome of these ordinary course matters will not have a material adverse effect on our business. Regardless of the outcome, litigation can have an adverse impact on us because of judgment, defense and settlement costs, diversion of management resources and other factors.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our Common Stock trades on the Nasdaq Global Market under the symbol “RMNI.”

Holdings

On February 27, 2023, there were approximately 45 stockholders of record of our Common Stock. We believe the number of beneficial owners of our Common Stock are substantially greater than the number of record holders because a large portion of our outstanding Common Stock are held of record in broker “street names” for the benefit of individual investors.

Dividends

On July 20, 2021, we redeemed the remaining 87,802 shares of our 13.00% Series A Preferred Stock at an aggregate total redemption price of \$88.4 million. The total redemption price consisted of \$87.8 million related to the outstanding shares of Series A Preferred Stock with a face value of \$1,000 per share and \$0.6 million or \$6.86 per share of Series A Preferred Stock related to the dividends earned for the period from July 1, 2021 through July 19, 2021. The redeemed shares of the Series A Preferred Stock, along with the dividends, were recorded on the redemption date of July 20, 2021.

The holders of Series A Preferred Stock were entitled to (i) a cash dividend of 10.0% per annum (the “Cash Dividend”), payable quarterly in arrears, and (ii) a quarterly payment-in-kind dividend of 3.0% per annum (the “PIK Dividend” and together with the Cash Dividend, the “Dividends”). The PIK dividend had been accrued quarterly in arrears following the July 19, 2018 issuance and through July 1, 2021. Thereafter all Dividends on such Series A Preferred Stock were payable in cash at a rate of 13.0% per annum until the redemption of the Series A Preferred Stock.

For further information about dividends on our Series A Preferred Stock, please refer to Note 6 of our consolidated financial statements included in Part II, Item 8 of this Report.

The payment of any dividends on our Common Stock is currently within the discretion of our Board of Directors subject to certain restrictions under the terms of our Credit Facility. We have not paid any cash dividends on our Common Stock to date and the payment of any future cash dividends will be dependent upon our revenue, earnings and financial condition from time to time. It is presently expected that we will retain all earnings for use in our business operations and our stock repurchase program and, accordingly, it is not expected that our Board of Directors will declare any dividends on our outstanding shares of Common Stock in the foreseeable future.

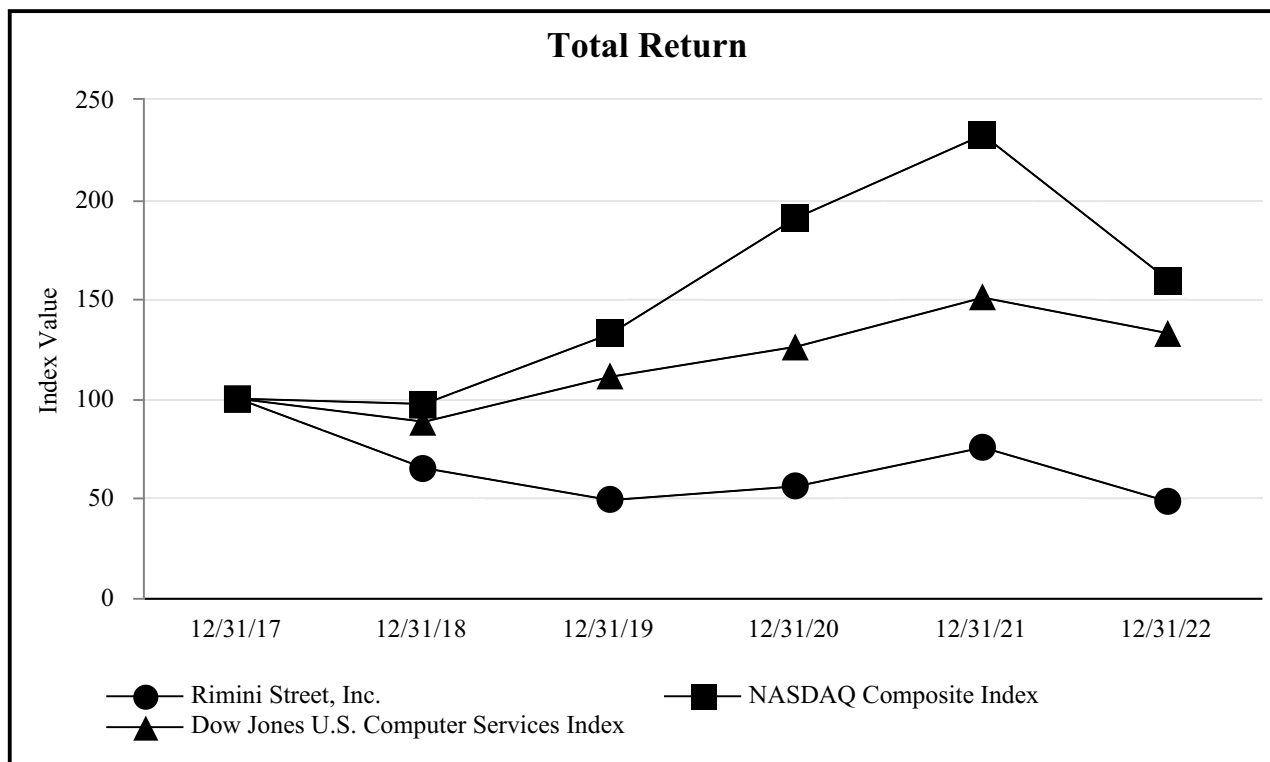

Securities Authorized for Issuance under Equity Compensation Plans

Reference is made to “Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters” for the information required by this item.

Stock Performance

The accompanying performance graph compares the cumulative total stockholder return on our Common Stock, \$0.0001 par value per share, for the period beginning December 31, 2017 and ended December 31, 2022, with the cumulative total return on the Nasdaq Composite Index and the Dow Jones U.S. Computer Services Index over the same period (assuming the investment of \$100 in our Common Stock, the Nasdaq Composite Index and the Dow Jones U.S. Computer Services Index on December 31, 2017), and the reinvestment of dividends. The cumulative total stockholder return on the following graph is historical and is not necessarily indicative of future stock price performance.

	12/31/2017	12/31/2018	12/31/2019	12/31/2020	12/31/2021	12/31/2022
Rimini Street, Inc.	\$100.00	\$65.11	\$49.05	\$56.01	\$75.47	\$48.17
Nasdaq Composite Index	\$100.00	\$97.33	\$132.54	\$190.84	\$232.41	\$159.23
Dow Jones U.S. Computer Services Index	\$100.00	\$88.39	\$110.98	\$126.14	\$150.73	\$132.74

This stock performance information is “furnished” and shall not be deemed to be “soliciting material” or subject to Regulation 14A under the Securities Exchange Act of 1934 (the “Exchange Act”), shall not be deemed “filed” for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities of that section, and shall not be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, whether made before or after the date of this report and irrespective of any general incorporation by reference language in any such filing, except to the extent we specifically incorporate the information by reference.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

For the three months ended December 31, 2022, the Company did not acquire any of its shares of Common Stock. For the year ended December 31, 2022, the Company acquired an aggregate 0.9 million shares of Common Stock on the open market at a total cost of \$4.7 million. Upon completion of all repurchase transactions, the associated shares of Common Stock were retired.

On August 6, 2021, we reacquired 0.1 million shares of Common Stock for \$1.1 million related to restricted stock units that vested on that date. As further discussed in this report, we also redeemed all remaining outstanding shares of our Series A Preferred Stock in July 2021.

Item 6. Reserved

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Rimini Street, Inc. was formed in the State of Nevada in 2005 (“RSI” or “predecessor”) and, through a merger in 2017 with a public company, became Rimini Street, Inc., a Delaware corporation (referred to as the “Company”, “we” and “us”), trading on the Nasdaq Global Market under the ticker symbol “RMNI”. References to “management” or “management team” refer to the officers and directors of the Company.

A discussion regarding our financial condition and results of operations for fiscal 2022 compared to fiscal 2021 is presented below. A discussion regarding our financial condition and results of operations for fiscal 2021 compared to fiscal 2020 that are not in this Report can be found under Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in our Annual Report on the Form 10-K for the fiscal year ended December 31, 2021, which was filed with the SEC on March 2, 2022, and is available on the SEC’s website at sec.gov.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the consolidated financial statements and the related notes to those statements included in Item 8 of this Report. In addition to historical financial information, the following discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results and timing of selected events may differ materially from those anticipated in these forward-looking statements as a result of many factors, including those discussed under “*Risk Factors*” in Item 1A and elsewhere in this Report. See also “*Cautionary Note Regarding Forward-Looking Statements*” contained in this Report.

Certain figures, such as interest rates and other percentages included in this section have been rounded for ease of presentation. Percentage figures included in this section have not in all cases been calculated on the basis of such rounded figures but on the basis of such amounts prior to rounding. For this reason, percentage amounts in this section may vary slightly from those obtained by performing the same calculations using the figures in our consolidated financial statements or in the associated text. Certain other amounts that appear in this section may similarly not sum due to rounding.

Overview

Rimini Street, Inc. and its subsidiaries (referred to as “Rimini Street”, the “Company”, “we” and “us”) are global providers of end-to-end enterprise software support, products and services. The Company offers a comprehensive family of unified solutions to run, manage, support, customize, configure, connect, protect, monitor, and optimize clients’ enterprise application, database, and technology software platforms.

We founded Rimini Street to disrupt and redefine the enterprise software support market by developing and delivering innovative new solutions that filled a then-unmet need in the enterprise software market. We became and remain the leading independent software support provider for Oracle and SAP products based on both the number of active clients supported and recognition by industry analyst firms.

Over the years, as our reputation for technical capability, value, innovation, responsiveness and trusted reliability grew, clients and prospects began asking us to expand the scope of our support, product and service offerings to meet other needs and opportunities related to their enterprise software. We also heard from prospects and clients that their goals include reducing the number of IT vendors to more manageable numbers from a governance perspective, with a desire to select vendors who can provide a wider scope of IT services and become true trusted partners.

To meet the needs of our clients and prospects and to service a significantly expanded addressable market opportunity, we designed, developed and are now delivering a new, expanded solutions portfolio for a wider array of enterprise software – including an expanded list of supported software; managed services for Oracle, SAP, IBM, Salesforce and open-source database software; and new solutions for security, interoperability, observability and consulting. We also now offer an integrated package of our services in a unique end-to-end, “turnkey” outsourcing option for Oracle and SAP landscapes that optimizes our clients’ existing technologies with a minimum of 15 extended years of operating lifespan and enables our clients to focus their IT talent and budget on higher-value, innovative projects that will support competitive advantage and growth.

As of December 31, 2022, we employed over 1,920 professionals and supported 3,020 active clients globally, including approximately 75 Fortune 500 companies and 17 Fortune Global 100 companies across a broad range of industries. We define an active client as a distinct entity, such as a company, an educational or government institution, or a business unit of a company that purchases our support, products or services. For example, we count as two separate active client instances in circumstances where we provide support for two different products to the same entity. We market and sell our services globally, primarily through our direct sales force, and have wholly-owned subsidiaries in Australia, Brazil, Canada, UAE (Dubai), France, Germany, Hong Kong, India, Israel, Japan, Korea, Malaysia, Mexico, Netherlands, New Zealand, Poland, Singapore, Sweden, Taiwan, the United Kingdom and the United States. We believe our primary competitors for our support services are the enterprise software vendors whose products we service and support, including IBM, Microsoft, Oracle and SAP. We believe our primary competitors for our other solutions include systems integrators, security, interoperability and observability vendors; and IT consulting firms.

Our subscription-based revenue provides a strong foundation for, and visibility into, future period results. We generated revenue of \$409.7 million, \$374.4 million and \$326.8 million for the years ended December 31, 2022, 2021 and 2020, respectively, representing a year-over-year increase of 9% and 15% for 2022 and 2021, respectively. We have a history of losses, and as of December 31, 2022, we had an accumulated deficit of \$228.3 million. We recorded net loss of \$2.5 million for the year ended December 31, 2022 and we recorded net income of \$75.2 million and \$11.6 million for the years ended December 31, 2021 and 2020, respectively. We generated approximately 53% of our revenue in the United States and approximately 47% of our revenue from our international business for the year ended December 31, 2022.

Since our inception, we have financed our operations through cash collected from clients and net proceeds from equity financings and borrowings.

We intend to continue investing for long-term revenue growth and profitability. We have invested and expect to continue investing in expanding our ability to market, sell and provide our current and future products and services to clients globally. We also expect to continue investing in the development and improvement of new and existing enterprise software support, products, and services to address current and evolving client needs.

Recent Developments

On February 22, 2023, the Company amended its Credit Facility. The amendment implemented certain changes in the reference rate from LIBOR to the Secured Overnight Financing Rate (“SOFR”). As of February 28, 2023, the Company has a choice of interest rates between (a) Adjusted Term SOFR and (b) Base Rate, in each case plus an applicable margin. The applicable margin remains the same as the existing Credit Agreement, and is based on the Company’s Consolidated Leverage Ratio (as defined in the Credit Agreement) and whether the Company elects Adjusted Term SOFR (ranging from 1.75 to 2.50%) or Base Rate (ranging from 0.75 to 1.50%).

In addition, the amendment adjusted the definition of Consolidated EBITDA to provide an addback solely for the fourth fiscal quarter of 2022, and any period including such quarter, that costs and legal fees and expenses incurred by the Company in connection with its ongoing litigation with Oracle up to \$10.0 million can be added back and included in the applicable calculation of the Consolidated EBITDA.

On October 10, 2022, our Public Warrants, including the one-half Public Warrant underlying each of our then-outstanding units, and our Private Placement Warrants expired unexercised in accordance with their terms. Prior to this date, each of the units consisted of one-half Public Warrant and one share of our Common Stock. As such, upon the expiration of the Public Warrants, our units were separated into the component underlying securities so that each former unit holder became the beneficial owner of one share of our Common Stock.

On May 28, 2022, the Board of Directors authorized an increase to our previously announced Common Stock repurchase program to increase the value of the securities that could be acquired by us from up to \$15.0 million over two years to up to \$50.0 million over the next four years, subject to continuing compliance with our Credit Facility, provided that all other applicable conditions and legal requirements are satisfied.

On February 27, 2022, the Board of Directors approved the adoption of a stock repurchase program to acquire up to \$15.0 million of our Common Stock both on the open market and in privately negotiated transactions, including through Rule 10b5-1 plans, through March 4, 2024, subject to compliance with our Credit Facility, which was amended effective January 14, 2022 to increase the aggregate value of the shares of Common Stock that could be acquired by us to no greater than \$15.0 million during the term of the Credit Facility, provided that all other applicable conditions and legal requirements are satisfied.

For the year ended December 31, 2022, we acquired an aggregate 0.9 million shares of Common Stock on the open market at a total cost of \$4.7 million. Upon completion of all repurchase transactions, the acquired shares of Common Stock were retired.

Additionally, reference is made to Note 6 to our consolidated financial statements included in Part II, Item 8 of this Report for a discussion of developments related to our Series A Preferred Stock and Credit Facility.

Also, reference is made to Note 10 to our consolidated financial statements included in Part II, Item 8 of this Report for a discussion of developments in our litigation with Oracle.

Our Business Model

Enterprise software support, products and services is one of the largest categories of overall global information technology (“IT”) spending. We believe enterprise resource planning (“ERP”), customer relationship management (“CRM”), product lifecycle management (“PLM”) database and technology software systems have become increasingly important in the operation of mission-critical business processes over the last 30 years. Also the costs associated with running and supporting these systems; failure and downtime; security exposure; integrating and monitoring; and maintaining the tax, legal and regulatory compliance of these software systems, have increased in both actual spend and as a percentage of the full IT budget. As a result, we believe that licensees often view enterprise software support, products and services as a mandatory cost of doing business.

The majority of our revenue through December 31, 2022, was generated from our support solutions.

In a traditional licensing model, the customer typically procures a perpetual software license and pays for the license in a single upfront fee (“perpetual license”), and base software support services can be optionally procured from the software vendor for an annual fee that is typically 20-23% of the total cost of the software license. In a newer subscription-based licensing model, such as software as a service (“SaaS”), the customer generally pays for the usage of the software on a monthly or annual basis (“subscription license”). Under a subscription license, the product license and a base level of software support are generally bundled together as a single purchase, and the base level of software support is not procured separately nor is it an optional purchase.

When we provide our support solutions for a perpetual software license, we generally offer our clients service for a fee that is equal to approximately 50% of the annual fees charged by the software vendor for their base support. When providing supplemental software support for a perpetual license, where the client procures our support service in addition to retaining the software vendor’s base support, we generally offer our clients service for a fee that is equal to approximately 25% of the annual fees charged by the software vendor for their base support. We also offer a special support service, Rimini Street Extra Secure Support, available to clients that require a more rigorous level of security background checks and/or government security clearance for engineers accessing a client’s system than our standard employment security background check and requirements. Clients may be asked to pay an additional fee for Rimini Street Extra Secure Support.

In addition to our support services, we also offer a breadth of enterprise software support, products and services through our full portfolio of solutions at an additional fee that is calculated based on a variety of factors and metrics. Our solutions are designed to meet specific client needs and are designed to provide what we believe is exceptional value and return for the fees charged. For more details about our Solutions Portfolio, please see Item 1 “Business” included in Part I of this Report.

Key Business Metrics

Number of clients

Since we founded our company, we have made the expansion of our client base a priority. We believe that our ability to expand our client base is an indicator of the growth of our business, the success of our sales and marketing activities, and the value that our services bring to our clients. We define an active client as a distinct entity, such as a company, an educational or government institution, or a business unit of a company that purchases our services to support a specific product. For example, we count as two separate active clients when support for two different products is being provided to the same entity. As of December 31, 2022, 2021 and 2020, we had approximately 3,020, 2,840 and 2,480 active clients, respectively.

We define a unique client as a distinct entity, such as a company, an educational or government institution or a subsidiary, division or business unit of a company that purchases one or more of our support, products or services. We count as two separate unique clients when two separate subsidiaries, divisions or business units of an entity purchase our products or services. As of December 31, 2022, 2021 and 2020, we had over 1,510, 1,470 and 1,310 unique clients, respectively.

The increase in both our active and unique client counts has been a combination of new unique client wins as well as cross-sales of new support, products and services to existing clients. As noted previously, we intend to focus future growth on both new and existing clients. We believe that the growth in our number of clients is an indication of the increased adoption of our enterprise software products and services.

Annualized subscription revenue

We recognize subscription revenue on a daily basis. We define annualized subscription revenue as the amount of subscription revenue recognized during a quarter and multiplied by four. This gives us an indication of the revenue that can be earned in the following 12-month period from our existing client base assuming no cancellations or price changes occur during that period. Subscription revenue excludes any non-recurring revenue, which has been insignificant to date. Our annualized subscription revenue was approximately \$420 million, \$393 million and \$349 million as of December 31, 2022, 2021 and 2020, respectively.

Revenue retention rate

A key part of our business model is the recurring nature of our revenue. As a result, it is important that we retain clients after the completion of the non-cancelable portion of the support period. We believe that our revenue retention rate provides insight into the quality of our products and services and the value that our products and services provide our clients.

We define revenue retention rate as the actual subscription revenue (dollar-based) recognized in a 12-month period from clients that existed on the day prior to the start of the 12-month period divided by our annualized subscription revenue as of the day prior to the start of the 12-month period. Our revenue retention rate was 92% for each of the years ended December 31, 2022, 2021 and 2020.

Gross margin

We derive revenue through the sale of our enterprise software products and services. All the costs incurred in providing these products and services are recognized as part of the cost of revenue. The cost of revenue includes all direct product line expenses, as well as the expenses incurred by our shared services organization which supports all product lines.

We define gross profit as the difference between revenue and the costs incurred in providing the software products and services. Gross margin is the ratio of gross profit divided by revenue. Our gross margin was approximately 62.8%, 63.6% and 61.4% for the years ended December 31, 2022, 2021 and 2020, respectively. We believe the gross margin provides an indication of how efficiently and effectively we are operating our business and serving our clients.

Factors Affecting Our Operating Performance

Litigation

The information from Item 3, *Legal Proceedings* and Item 1A, “*Risk Factors—Risks Related to Litigation—“We and our Chief Executive Officer and President are involved in litigation with Oracle. An adverse outcome in the ongoing litigation could result in the payment of substantial damages and/or an injunction against certain of our business practices, either of which could have a material adverse effect on our business and financial results,”* is incorporated by reference herein. For claims on which Oracle has prevailed or may prevail, we have been and could be required to pay substantial damages for our current or past business activities or be enjoined from certain business practices. Any of these outcomes could result in a material adverse effect on our business.

Adoption of enterprise software products and services

We believe the existing market for independent enterprise software support services is underserved. We are a global provider of enterprise software products and services, the leading third-party support provider for Oracle and SAP software products, and a Salesforce partner. We also believe the existing market for our other enterprise software products and services is underserved, and that we have unique products and services that can meet client needs in the marketplace. For example, we provide security, interoperability and compatibility products and services with the Rimini Protect and Rimini Connect solutions.

We also believe that our total addressable market for our enterprise software products and services is substantially larger than our current client base and the products and services we currently offer. As a result, we believe we have the opportunity to expand our global client base and to further increase adoption of our software products and services within and across existing clients. However, as the market for independent enterprise software support services as well as our other software products and services is still emerging, it is difficult for us to predict the timing of when and if widespread acceptance will occur.

Sales cycle

We sell our services to our clients primarily through our direct sales organization. Our sales cycle, depending on the product or service, typically ranges from six months to a year from when a prospective client is engaged. While we believe that there is a significant market opportunity for our enterprise software support, products and services, we often must educate prospective clients about the value of our products and services, which can result in lengthy and multiple sales cycles, particularly for larger prospective clients, as well as the incurrence of significant marketing expenses. Our typical sales cycle with a prospective client begins with the generation of a sales lead through trade shows, industry events, online marketing, media interviews and articles, inbound calls, outbound calls or client, analyst or other referral. The sales lead is followed by an

assessment of the prospect's current software license contract terms where relevant, systems environment, products and releases being used, needs and objectives.

The variability in our sales cycle for software support services is impacted by whether software vendors or other current software support providers are able to convince potential clients that they should renew their software support contract with the existing vendor or procure or renew supplemental support services from the existing vendor, respectively. Another driver of our sales cycle variability is any announcement by a software vendor of their discontinuation, reduction or limitation of support services for a particular software product or release for which we continue to offer a competing support service. In addition, our sales cycle variability for software support is impacted by vendor discounts provided by software vendors to retain existing clients or attract potential clients. Finally, our litigation with Oracle around our support service offerings can also drive sales cycle variability as clients oftentimes perform their own legal due diligence, which can lengthen the sales cycle.

Global Economic Uncertainty and Impact of COVID-19

We have experienced some clients not renewing our services as their businesses have been adversely impacted during the COVID-19 pandemic and the resulting global economic uncertainty, as well as by the further economic disruption caused by the Russian invasion of Ukraine in early fiscal 2022 and recent political turmoil in China. While we do not physically operate in Russia, the Ukraine or in mainland China, these global events, together with fiscal and monetary policy adopted during the pandemic, has increased inflationary cost pressures, negatively impacting the global economy and causing the U.S. Federal Reserve began to raise interest rates in March 2022. We expect additional rate increases in the future. Despite these macroeconomic and geopolitical pressures, we expect to continue to be able to market, sell and provide our current and future products and services to clients globally. We also expect to continue investing in the development and improvement of new and existing products and services to address client needs. Further, although our operations are influenced by general economic conditions, we do not believe the lingering impacts of the COVID-19 pandemic had a significant net impact on our revenue or results of operations during the ended December 31, 2022.

The extent to which any lingering impacts of the COVID-19 pandemic, rising inflation, interest rate increases and continuing global economic and geopolitical uncertainty impact our business going forward, however, will depend on numerous evolving factors we cannot reliably predict, including continued governmental and business actions in response to any lingering impacts of the pandemic and increasing global economic uncertainty, including the possibility of recession or financial market instability. As such, the effects of the COVID-19 pandemic, rising inflation, interest rate increases and other negative impacts on the global economy may not be fully reflected in our financial results until future periods. Refer to "Risk Factors" (Part I, Item 1A of this Report) for a discussion of these factors and other risks.

Key Components of Consolidated Statements of Operations

Revenue. We currently derive nearly all of our revenue from subscription-based contracts for software services. Revenue from these contracts is recognized ratably on a straight-line basis over the applicable service period.

Cost of revenue. Cost of revenue includes salaries, benefits and stock-based compensation expenses associated with our technical support and service delivery organizations, as well as allocated overhead and non-personnel expenses such as outside services, professional fees and travel-related expenses. Allocated overhead includes overhead costs for depreciation of equipment, facilities (consisting of leasehold improvements and rent) and technical operations (including costs for compensation of our personnel and costs associated with our infrastructure). We recognize expenses related to our technical support and service delivery organizations as they are incurred. All other costs include royalties paid for the use of products or services resold or licensed to clients, which were provided by other vendors.

Sales and marketing expenses. Sales and marketing expenses consist primarily of personnel costs for our sales, marketing and business development employees and executives, amortization expense associated with capitalized sales commissions, sales commissions that do not qualify for capitalization, travel related expenses, outside services and allocated overhead. Sales commissions are costs of obtaining customer contracts and are capitalized and then amortized over a period of benefit that we have determined to be 4 years.

General and administrative expenses. General and administrative expenses consist primarily of personnel costs for our administrative, legal, human resources, finance and accounting employees and executives. These expenses also include non-employee expenses, such as travel-related expenses, outside services, legal, auditing and other professional fees, and general corporate expenses, along with an allocation of our general overhead expenses.

Impairment charges related to operating lease right-of-use assets. Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Impairment exists for other long-lived assets if the carrying amounts of such assets exceed the estimates of future net undiscounted cash flows expected to be generated by such assets. An impairment charge is recognized for the amount by which the carrying amount of the asset, or asset group, exceeds its fair value.

Reorganization costs. These costs consist primarily of severance costs associated with our reorganization plan that occurred as of the year-end.

Litigation costs and related recoveries, net. Litigation costs consist of legal settlements, pre-judgment interest, and third-party professional fees to defend against litigation claims. In the past, we have had liability insurance policies where a portion of our defense costs and litigation judgments or settlements have been reimbursed under the terms of the policies. Such insurance recoveries were reflected as a reduction of litigation costs upon notification of approval for reimbursement by the insurance company. For legal expenses related to Rimini II litigation, the deferred settlement liability was reduced with a corresponding reduction of legal expenses when the costs were incurred.

Interest expense. Interest expense is incurred under our Credit Facility and other debt obligations. The components of interest expense include the amount of interest payable in cash at the stated interest rate, interest that is payable in kind through additional borrowings, make-whole applicable premium, and accretion of debt discounts and issuance costs (“DDIC”) using the effective interest method.

Loss from change in fair value of redeemable warrants. Loss on change in fair value of redeemable warrants amounted to a loss of \$4.2 million for the year ended December 31, 2021. The fair value per warrant changed from \$0.35 per warrant as of December 31, 2020 to \$1.04 per warrant as of October 29, 2021, which was the date whereby the GP Sponsor Warrants were determined to no longer be treated as a liability.

Other expenses, net. Other expenses, net consists primarily of gains or losses on foreign currency transactions, write-off of deferred debt financing costs related to unsuccessful financings, and interest income.

Income taxes. The provision for income taxes is based on the amount of our taxable income and enacted federal, state and foreign tax rates, as adjusted for allowable credits and deductions. Our provision for income taxes consists primarily of foreign taxes for the periods presented, as our taxable income for U.S. federal and state purposes is offset by net operating losses. In addition, based on all available evidence, we determined that it was more likely than not that we could benefit from our deferred tax assets, resulting in a tax benefit of \$62.3 million in the year ended December 31, 2021. In assessing the realizability of deferred tax assets, we considered whether it is more likely than not that some portion or all of the deferred tax assets would not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. We considered the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. In prior years, the domestic net deferred tax assets had been fully offset by a valuation allowance because of our lack of domestic earnings history.

Results of Operations

Comparison of Years ended December 31, 2022 and 2021

Our consolidated statements of operations for the years ended December 31, 2022 and 2021 are presented below (in thousands):

	2022	2021	Variance	
			Amount	Percent
Revenue	\$ 409,662	\$374,430	\$ 35,232	9.4%
Cost of revenue:				
Employee compensation and benefits	102,314	95,053	7,261	7.6%
Engineering consulting costs	23,296	18,871	4,425	23.4%
Administrative allocations ⁽¹⁾	15,416	14,681	735	5.0%
All other costs	11,359	7,859	3,500	44.5%
Total cost of revenue	152,385	136,464	15,921	11.7%
Gross profit	257,277	237,966	19,311	8.1%
<i>Gross margin</i>	62.8 %	63.6 %		
Operating expenses:				
Sales and marketing	143,018	128,496	14,522	11.3%
General and administrative	75,367	64,172	11,195	17.4%
Impairment charges related to operating lease right-of-use assets	3,013	1,649	1,364	82.7%
Reorganization costs	2,525	—	2,525	N/A
Litigation costs and related recoveries, net	25,265	16,876	8,389	49.7%
Total operating expenses	249,188	211,193	37,995	18.0%
Operating income	8,089	26,773	(18,684)	(69.8)%
Non-operating expenses:				
Interest expense	(4,271)	(1,550)	(2,721)	175.5%
Loss from change in fair value of redeemable warrants	—	(4,183)	4,183	(100.0)%
Other expenses, net	(13)	(1,605)	1,592	(99.2)%
Income before income taxes	3,805	19,435	(15,630)	(80.4)%
Income taxes	(6,285)	55,784	(62,069)	(111.3)%
Net income (loss)	\$ (2,480)	\$ 75,219	\$ (77,699)	(103.3)%

⁽¹⁾ Includes the portion of costs for information technology, security services and facilities costs that are allocated to cost of revenue. In our consolidated financial statements, such costs are allocated between cost of revenue, sales and marketing, and general and administrative expenses based primarily on relative headcount, except for facilities which is based on occupancy.

Revenue. Revenue increased from \$374.4 million for the year ended December 31, 2021 to \$409.7 million for the year ended December 31, 2022, an increase of \$35.2 million or 9%. The vast majority of this increase was driven by a 7% increase in the average number of unique clients, as opposed to existing unique clients subscribing to additional services. On a regional basis, United States revenue grew from \$199.8 million for fiscal 2021 to \$215.4 million for fiscal 2022, an increase of \$15.6 million or 8%, while international revenue grew from \$174.6 million for fiscal 2021 to \$194.3 million for fiscal 2022, an increase of \$19.7 million or 11%.

Cost of revenue. Total cost of revenue increased from \$136.5 million for the year ended December 31, 2021 to \$152.4 million for the year ended December 31, 2022, an increase of \$15.9 million or 12%. This increase was primarily due to additional support required for the client growth which resulted in an increase in employee compensation and benefits of \$7.3 million, an increase in engineering consulting costs of \$4.4 million, an increase in all other costs of \$3.5 million and an increase in allocated costs of \$0.7 million.

The \$7.3 million increase in cost of revenue attributable to employee compensation and benefits for the year ended December 31, 2022, was primarily due to an increase in salaries, wages and benefit costs due to a 20% increase in the average number of employees devoted to cost of revenue functions, annual pay increases, and increased bonus payouts.

As discussed in Note 10 to our consolidated financial statements included in Item 8 of this Report, in August 2018 Oracle obtained an Injunction from the District Court that prohibits us from using certain processes and could require us to incur additional labor costs to provide support for our clients as contracted. In August 2019, the Court of Appeals entered an order affirming the Injunction and the award of attorneys' fees that were previously paid to Oracle. However, the Court of Appeals agreed that the Injunction was overbroad in two respects and instructed the District Court to remove the restriction on "local hosting" of J.D. Edwards and Siebel software and the prohibition against "accessing" J.D. Edwards and Siebel software source code. Since the date the temporary stay was lifted on the permanent injunction, we have incurred and will continue to incur additional expenses in the range of 1% to 2% of revenue for additional labor costs because the Injunction contains language that could be read to cover some current support practices that are being litigated in the "Rimini II" lawsuit and that have not been found to be infringing.

Gross Profit. Gross profit increased from \$238.0 million for the year ended December 31, 2021 to \$257.3 million for the year ended December 31, 2022, an increase of \$19.3 million or 8%. Gross margin for the year ended December 31, 2021 was 63.6% compared to 62.8% for the year ended December 31, 2022. Our revenue for the year ended December 31, 2022 increased by \$35.2 million or 9% compared to the year ended December 31, 2021. Total cost of revenue for the year ended December 31, 2022 increased by \$15.9 million, or 12%, compared to the year ended December 31, 2021. Given that the increase in the cost of revenue was 12% compared to the increase in revenue of 9%, it resulted in a decrease of 80 basis points in our gross margin for the year ended December 31, 2022 compared to the year ended December 31, 2021. The lower gross margin for the year ended December 31, 2022 was primarily due to accelerating employee compensation and benefits, engineering consulting costs and all other costs more rapidly than our revenue growth.

Sales and marketing expenses. As a percentage of our revenue, sales and marketing expenses have increased from 34% for the year ended December 31, 2021 to 35% for the year ended December 31, 2022. In dollar terms, sales and marketing expenses increased from \$128.5 million for the year ended December 31, 2021 to \$143.0 million for the year ended December 31, 2022, an increase of \$14.5 million or 11%. This increase was primarily due to (i) a \$6.1 million increase in employee compensation and benefits as a result of a 4% increase in average headcount, (ii) an increase in travel and entertainment of \$5.8 million, (iii) an increase in trade show costs of \$2.7 million, (iv) an increase of all other costs of \$1.5 million, and (v) an increase of advertising costs of \$0.5 million. These increases were offset by a decline in marketing and promotion costs of \$2.1 million.

The \$6.1 million increase in sales and marketing expense attributable to employee compensation and benefits for the year ended December 31, 2022 was primarily due to an increase in (i) salaries, wages and benefit costs of \$5.5 million due to a 4% increase in the average number of employees devoted to sales and marketing functions, annual pay increases, and higher bonus payouts and (ii) commissions of \$0.6 million due to new customer wins in excess of the prior year. Our overall spending increased as we attempt to accelerate our future revenue growth by investing in more resources.

General and administrative. General and administrative expenses increased from \$64.2 million for the year ended December 31, 2021 to \$75.4 million for the year ended December 31, 2022, an increase of \$11.2 million or 17%. This increase was primarily due to (i) increases in compensation and benefit costs of \$6.6 million, (ii) an increase in computer software and license costs of \$3.1 million, (iii) an increase of travel expenses of \$2.3 million, (iv) an increase in other taxes of \$1.5 million, (v) an increase in contract labor of \$0.9 million, and (vi) an increase in all other costs of \$0.5 million. These unfavorable variances were offset, in part, by (i) a reduction in professional fees of \$2.7 million, (ii) a favorable increase in our administrative allocations of \$0.9 million, and (iii) a reduction in rent of \$0.4 million.

The \$6.6 million increase in general and administrative expenses attributable to employee compensation and benefits for the year ended December 31, 2022, was primarily due to an increase in salaries, wages and benefit costs of \$6.1 million due to a 22% increase in the average number of employees devoted to general and administrative functions, annual pay increases, and increased bonus payouts, and an increase of \$0.5 million in stock-based compensation expense.

We expect to continue to incur higher expenses associated with supporting the growth of our business, both in terms of size and geographical diversity, and to meet the increased compliance requirements associated with being a public company. Public company costs that are expected to increase in the future include additional information systems costs, costs for additional personnel in our accounting, human resources, IT and legal functions, SEC and Nasdaq fees, and incremental professional, legal, audit and insurance costs. As a result, we currently expect our general and administrative expenses to increase in dollar terms in future periods.

Impairment charges related to operating lease right-of-use assets. We recognized an impairment charge of \$1.6 million for the year ended December 31, 2021 compared to \$3.0 million for the year ended December 31, 2022, related to our

office leases as we ceased to use additional portions of our office space due to increased use of remote work. In addition, we revised our estimates for sublease rent due to current real estate market conditions.

Reorganization costs. We recognized reorganization costs of \$2.5 million for the year ended December 31, 2022. The costs consist primarily of severance costs associated with our reorganization plan.

Litigation costs and related recoveries, net. For the years ended December 31, 2022 and 2021, litigation costs and related recoveries, net consist of the following (in thousands):

	2022	2021	Change
Litigation settlement expense	\$ —	\$ 7,530	\$ (7,530)
Professional fees and other defense costs of litigation	25,654	16,457	9,197
Insurance recoveries, net	(389)	(7,111)	6,722
Litigation costs, net of related insurance recoveries	<u>\$ 25,265</u>	<u>\$ 16,876</u>	<u>\$ 8,389</u>

Litigation settlement expense decreased from \$7.5 million for the year ended December 31, 2021 to no expense for the year ended December 31, 2022. Following nearly two years of discovery by Oracle, the District Court ruled in favor of the Company with respect to five of the items. With respect to the other five items, the District Court found the Company violated the Injunction, awarded sanctions to Oracle of \$0.6 million and ordered that certain computer files be quarantined from use, and notice and proof of such quarantining be provided to Oracle. The District Court also ruled that Oracle may recover its reasonable attorneys' fees and costs. We estimated those costs to be \$6.9 million for the year ended December 31, 2021 with no change to our estimate during the year ended December 31, 2022.

Professional fees and other defense costs associated with litigation increased from \$16.5 million for the year ended December 31, 2021 to \$25.7 million for the year ended December 31, 2022, an increase of \$9.2 million. This increase was primarily due to costs associated with the Rimini II trial, which occurred from November 2022 to December 2022, compared to the costs incurred with our September 2021 hearing related to determining if we had been in contempt of the Injunction.

Insurance costs and related recoveries, net decreased from a net benefit of \$7.1 million for the year ended December 31, 2021 to net benefit of \$0.4 million for the year ended December 31, 2022. These balances represent insurance proceeds received relating to our litigation costs incurred as part of the injunction proceedings. We are self-insured for any costs related to any current or future intellectual property litigation. We currently believe our cash on hand, accounts receivable and contractually committed backlog provides us with sufficient liquidity to cover costs related to our litigation with Oracle.

Interest expense. Interest expense increased from \$1.6 million for the year ended December 31, 2021 to \$4.3 million for the year ended December 31, 2022, an increase of \$2.7 million. Interest expense increased primarily due to us entering into a five-year Credit Facility for \$90 million on July 20, 2021, resulting in only 165 days of interest in the prior year ended December 31, 2021 compared to 365 days during the current year ended December 31, 2022. In addition, our Credit Facility's LIBOR rate increased from 0.13% as of December 31, 2021 to 4.07% as of December 31, 2022. Lastly, we incurred \$0.2 million of interest expense during the year ended December 31, 2022, related to the net payment activity associated with our interest rate swap, which was entered into on May 18, 2022.

Loss on change in fair value of redeemable warrants. Loss on change in fair value of redeemable warrants amounted to a loss of \$4.2 million for the year ended December 31, 2021 compared to no loss for the year ended December 31, 2022. The fair value per warrant changed from \$0.35 per warrant as of December 31, 2020 to \$1.04 per warrant as of October 29, 2021, which was the date whereby the GP Sponsor Warrants were determined to no longer be treated as a liability. Hence as of October 29, 2021, no further changes in fair value were recorded to the income statement.

Other expenses, net. For the year ended December 31, 2021, we had other expenses, net of \$1.6 million as compared to other expenses net of \$13 thousand for the year ended December 31, 2022, a decrease of \$1.6 million. For the year ended December 31, 2021, other expense, net of \$1.6 million was primarily comprised of foreign exchange losses of \$1.4 million and other non-operating expenses of \$0.2 million. For the year ended December 31, 2022, we experienced a significant change in foreign currency exchange rates as the U.S. Dollar initially strengthened against the majority of foreign currencies where our foreign entities operate and then weakened during the fourth quarter of 2022. As a result, we ended up experiencing a small gain of \$12 thousand for the year ended December 31, 2022. The foreign exchange gain was offset by other non-operating expenses of \$25 thousand for the year ended December 31, 2022.

Income taxes. Income taxes went from a benefit of \$55.8 million for the year ended December 31, 2021 to a tax expense of \$6.3 million for the year ended December 31, 2022, an increase of income tax expense of \$62.1 million or 111%.

This was primarily the result of reducing our valuation allowance by \$65.7 million during the year ended December 31, 2021 as we determined that it was more likely than not that we could benefit from our deferred tax assets based on all of the available evidence.

Liquidity and Capital Resources

Overview

As of December 31, 2022, we had a working capital deficit of \$71.3 million and we had an accumulated deficit of \$228.3 million. We recorded a net loss of \$2.5 million and net income of \$75.2 million for the years ended December 31, 2022 and 2021, respectively.

Redemption of Series A Preferred Stock

On July 20, 2021, we redeemed the remaining 87,802 shares of our 13.00% Series A Preferred Stock at an aggregate total redemption price of \$88.4 million. The total redemption price consisted of \$87.8 million related to the outstanding shares of Series A Preferred Stock with a face value of \$1,000 per share and \$0.6 million related to the dividends earned for the period from July 1, 2021 through July 19, 2021. The redeemed shares of the Series A Preferred Stock, along with the dividends, were recorded on the redemption date of July 20, 2021.

We funded the redemption with borrowings from a five year term loan of \$90 million, which was entered into on July 20, 2021 (the "Credit Facility"). The Credit Facility originally bore interest at LIBOR plus a margin ranging from 1.75% to 2.50% and contains certain financial covenants, including a minimum fixed charge coverage ratio, a total leverage ratio, and a minimum liquidity of \$20 million in U.S. cash. Annual minimum principal payments over the five year term for the Credit Facility will be 5%, 5%, 7.5%, 7.5%, and 10%, respectively, with the remaining balance due at the end of the term.

On April 16, 2021, we redeemed 60,000 shares of our 13.00% Series A Preferred Stock at an aggregate total redemption price of \$62.3 million. The total price consisted of \$60.0 million related to the face value of \$1,000 per share of Series A Preferred Stock and \$2.3 million related to the dividends to be earned for the period from April 1, 2021 through July 18, 2021. The redeemed shares of Series A Preferred Stock, along with the dividends were recorded when the Series A Preferred Stock became mandatorily redeemable on April 16, 2021.

On March 11, 2021, we completed a public offering of 7.8 million shares of our Common Stock (the "March 2021 Offering") at a price of \$7.75 per share for total gross proceeds of \$57.0 million. Net proceeds from the March 2021 Offering were \$55.6 million after underwriter and offering expenses. We used the net proceeds from the March 2021 Offering to redeem 60,000 shares of Series A Preferred Stock.

On January 5, 2021, we entered into an agreement with certain of the holders of its Series A Preferred Stock (the "January 2021 Stock Repurchase Agreement") to repurchase 10,000 shares of Series A Preferred Stock and the associated obligations pursuant to our Convertible Secured Promissory Notes outstanding in respect thereof (the "Note Obligations") for an aggregate purchase price of approximately \$9.0 million representing a discount to the face value of such shares of Series A Preferred Stock and no make-whole payments were required.

The holders of Series A Preferred Stock were entitled to, from the respective issuance date, a cash dividend of 10.0% per annum and a payment-in-kind dividend of 3.0% per annum for the first five years following the initial June 2018 closing and thereafter all dividends accruing on such Series A Preferred Stock will be payable in cash at a rate of 13.0% per annum.

Credit Facility

On February 22, 2023, the Company amended its Credit Facility. The amendment implemented certain changes in the reference rate from LIBOR to the Secured Overnight Financing Rate ("SOFR"). As of February 28, 2023, the Company has a choice of interest rates between (a) Adjusted Term SOFR and (b) Base Rate, in each case plus an applicable margin. The applicable margin remains the same as the existing Credit Agreement, and is based on the Company's Consolidated Leverage Ratio (as defined in the Credit Agreement) and whether the Company elects Adjusted Term SOFR (ranging from 1.75 to 2.50%) or Base Rate (ranging from 0.75 to 1.50%).

In addition, the amendment adjusted the definition of Consolidated EBITDA to provide an addback solely for the fourth fiscal quarter of 2022, and any period including such quarter, that costs and legal fees and expenses incurred by the

Company in connection with its ongoing litigation with Oracle up to \$10.0 million can be added back and included in the applicable calculation of the Consolidated EBITDA.

Effective July 20, 2021, we received \$89.3 million of net proceeds related to the Credit Facility. The borrowings under the Credit Facility were discounted at 0.375%. As part of the transaction, we incurred issuance costs of \$4.2 million, which were capitalized and will be amortized over the term of the Credit Facility.

The Credit Facility originally bore interest at the London Interbank Offered Rate (“LIBOR”), plus a margin ranging from 1.75% to 2.50%. For the year ended December 31, 2022, the interest rate on the Credit Facility was 5.8%. Effective February 28, 2023, we amended the Facility to implement certain changes in the reference rate from LIBOR to SOFR.

The Credit Facility contains certain financial covenants, including a minimum fixed charge coverage ratio greater than 1.25, a total leverage ratio less than 3.75, and a minimum liquidity of \$20 million in U.S. cash. Annual minimum principal payments over the five year term for the Credit Facility will be 5%, 5%, 7.5%, 7.5%, and 10%, respectively, with the remaining balance due at the end of the term. For the year ended December 31, 2022, the Company made principal payments of \$9.5 million.

Pursuant to a Guaranty and Security Agreement, dated July 2, 2021 (the “Guaranty and Security Agreement”), among the Credit Parties and Capital One, National Association, as agent, the obligations under the Credit Agreement are guaranteed by certain of our subsidiaries (the Company and the guarantors, collectively, the “Credit Parties”) and are secured, subject to customary permitted liens and exceptions, by a lien on substantially all assets of the Credit Parties.

Please refer to Notes 5 through 8 to the consolidated financial statements included in Part II, Item 8 of this Report for information regarding our Credit Facility, our Series A Preferred Stock and our Common Stock Offerings.

A key component of our business model generally requires that customers prepay us annually for the services we will provide over the following year or longer. As a result, we collect cash from our customers in advance of when the related service costs are incurred, which resulted in deferred revenue of \$265.8 million that is included in current liabilities as of December 31, 2022. Therefore, we believe that working capital deficit is not as meaningful in evaluating our liquidity since the costs of fulfilling our commitments to provide services to customers are currently limited to approximately 37% of the related deferred revenue based on our gross margin of 63% for the year ended December 31, 2022.

For the next 12 months, assuming that our operations are not significantly adversely impacted by the lingering impacts of the COVID-19 pandemic or the slowing economy, we believe that cash, cash equivalents, and restricted cash of \$109.4 million as of December 31, 2022, plus future cash flow from operating activities will be sufficient to meet our anticipated cash needs including working capital requirements, planned capital expenditures, and our contractual obligations of approximately \$16.1 million that are due during the 12 months ending December 31, 2023.

Our future capital requirements depend on many factors, including client growth, number of employees, expansion of sales and marketing activities, the introduction of new and enhanced services offerings and any lingering impacts of the COVID-19 pandemic. We may also enter into arrangements to acquire or invest in complementary businesses, services, technologies, or intellectual property rights in the future. We may choose to seek additional debt or equity financing to support these long-term capital requirements. Alternatively, we may also consider reducing amounts outstanding under our Credit Facility to minimize our exposure to rising interest rates. If interest rates continue to increase as expected and adverse economic changes occur, we may not be able to access credit on terms favorable to us, impacting our ability to support these long-term capital requirements. In an economic downturn, we may also be unable to raise capital through debt or equity financings on terms acceptable to us or at all. Covenants in our Credit Facility could also have consequences on our operations, including restricting or delaying our ability to obtain additional financing, potentially limiting our ability to adjust to rapidly changing market conditions or respond to business opportunities. Additionally, in challenging and uncertain economic environments, we cannot predict when macroeconomic uncertainty may arise, whether or when such circumstances may improve or worsen or what impact such circumstances could have on our business and our liquidity requirements.

As discussed below in greater detail, for the year ended December 31, 2022, we generated cash flows from our operating activities of \$34.9 million. We believe our operating cash flows for the year ending December 31, 2022 will be sufficient to fund the portion of our contractual obligations that is not funded with existing capital resources.

Cash Flows Summary

Presented below is a summary of our operating, investing and financing cash flows for the years ended December 31, 2022 and 2021 (in thousands):

	<u>2022</u>	<u>2021</u>	<u>Change</u>
Net cash provided by (used in):			
Operating activities	\$ 34,898	\$ 66,945	\$ (32,047)
Investing activities	(24,445)	(2,108)	(22,337)
Financing activities	(13,568)	(26,565)	12,997

The effect of foreign currency translation was unfavorable by \$7.4 million and \$6.2 million for the years ended December 31, 2022 and 2021, respectively, due to unfavorable foreign exchange impacts related to foreign cash. For the year ended December 31, 2022, we experienced significant changes in foreign currency exchange rates as the U.S. Dollar strengthened against the majority of foreign currencies where our foreign entities operate until the fourth quarter of 2022, when the U.S. Dollar started to weaken against some of our foreign currencies. The overall strengthening of the U.S. Dollar reduced the reported amount of our foreign-denominated cash and cash equivalents which are translated into U.S. Dollars and reported in our Consolidated Financial Statements for the year ended and as of December 31, 2022.

Cash Flows Provided by Operating Activities

A key component of our business model generally requires that customers prepay us annually for the services we will provide over the following year or longer. As a result, we collect cash in advance of the date when the vast majority of the related services are provided. For the years ended December 31, 2022 and 2021, cash flows provided by operating activities amounted to \$34.9 million and \$66.9 million, respectively.

For the year ended December 31, 2022, cash flows provided by operating activities amounted to \$34.9 million. We recognized a net loss of \$2.5 million, non-cash expenses, net amounted to \$20.9 million, and favorable changes in operating assets and liabilities, net were \$16.5 million for the year ended December 31, 2022. For the year ended December 31, 2022, the non-cash expenses, net amounted to \$20.9 million and were comprised of the following: stock-based compensation expense of \$10.9 million, amortization and accretion related to ROU assets and liabilities of \$5.5 million, a non-cash impairment charge related to ROU assets of \$3.0 million, depreciation and amortization expense of \$2.5 million, and accretion and amortization of debt discount and issuance costs of \$1.0 million. These expenses were offset by a benefit in our deferred tax provision of \$2.1 million.

For the year ended December 31, 2022, changes in operating assets and liabilities were favorable by \$16.5 million to the operating cash flows due to several items. The first item was a favorable change of \$18.9 million for accounts receivable as we collected \$434.5 million of accounts receivable during the year ended December 31, 2022 compared to billings, net of \$409.3 million, for the year ended December 31, 2022. As a result, our days sales outstanding for accounts receivable was 72 days as of December 31, 2022. In addition, our deferred revenue had a favorable impact on our operating cash flows of \$3.2 million, primarily due to changes in foreign exchange rates during the year as billings, net of \$409.3 million and revenue of \$409.7 million for the year ended December 31, 2022 offset each other. Also, accounts payable had a favorable operating cash flow impact of \$2.4 million during the year ended December 31, 2022. This was a result of an increase in the number of our payment days by 22% over the prior year. Accrued compensation, benefits, commissions and other liabilities were also favorable to our operating cash flows for \$2.8 million during the year ended December 31, 2022. This was due to having accrued for reorganization costs as of December 31, 2022. These favorable changes were offset by unfavorable changes in prepaid expenses, deposits and other assets of \$6.6 million and deferred contract costs of \$4.2 million for the year ended December 31, 2022. The change in prepaid expenses, deposits and other assets of \$6.6 million was primarily due to making a long-term prepayment of \$5.0 million in 2022. The unfavorable change in deferred costs was due to capitalizing \$22.0 million of commission costs and amortizing \$17.7 million of these costs during the year ended December 31, 2022.

For the year ended December 31, 2021, cash flows provided by operating activities amounted to \$66.9 million. We recognized net income of \$75.2 million, non-cash expenses resulting in a use of \$37.8 million and favorable changes in operating assets and liabilities, net of \$29.5 million for the year ended December 31, 2021. For year ended December 31, 2021, the non-cash expenses, net amounted to a use of \$37.8 million and were comprised of stock-based compensation expense of \$9.7 million, amortization and accretion related to ROU assets and liabilities of \$6.1 million, a loss from change in fair value of redeemable warrants of \$4.2 million, depreciation and amortization expense of \$2.4 million, a non-cash impairment charge related to ROU assets of \$1.6 million and accretion and amortization of debt discount and issuance costs of \$0.4 million. These

expenses were offset by a change in our deferred tax asset provision which amounted to a benefit of \$62.3 million, related primarily to the reduction in our valuation allowance during 2021.

For the year ended December 31, 2021, changes in operating assets and liabilities were favorable by \$29.5 million to the operating cash flows due to several items. The primary reason was due to a favorable change in deferred revenue of \$47.3 million as billings, net of \$417.8 million for the year ended December 31, 2021 were offset by revenue of \$374.4 million for the year ended December 31, 2021. In addition, accrued compensation, benefits and other liabilities was favorable for \$3.5 million during the year ended December 31, 2021 primarily because of accruing for legal liabilities as of December 31, 2021. Also, accounts payable were favorable by \$2.5 million for the year ended December 31, 2021 because our payment days increased 58% over the prior year. These favorable changes were offset by the unfavorable changes of \$18.8 million for accounts receivable, \$3.5 million related to prepaid expenses, deposits and other and \$1.6 million deferred contract costs. The unfavorable change in accounts receivable of \$18.8 million was due to collecting \$407.9 million of receivables during the year ended December 31, 2021 compared to billings, net of \$417.8 million. Consequently, our days sales outstanding for accounts receivable was 83 days as of December 31, 2021. The unfavorable change of \$3.5 million in prepaid expenses, deposits and other assets was due to incremental payments made in 2021. Finally, the deferred contract costs were unfavorable by \$1.6 million for the year ended December 31, 2021 as capitalized commissions amounted to \$17.5 million for the year ended December 31, 2021, while we amortized \$16.0 million of these costs during the year ended December 31, 2021.

Cash Flows Used in Investing Activities

Cash flows used in investing activities were primarily driven by investment purchases, investment sales and capital expenditures for computer equipment as we continued to invest in our business infrastructure and advance our geographic expansion. Cash used in investing activities totaled \$24.4 million and \$2.1 million for the years ended December 31, 2022 and 2021, respectively.

For the year ended December 31, 2022, cash used in investing activities of \$24.4 million consisted of investment purchases of \$31.2 million, offset in part by investment sales of \$11.1 million as we began to invest funds in September 2022, and capital expenditures of \$4.3 million. The capital expenditures of \$4.3 million consisted of new computer equipment and capitalized development costs for a new payroll and client portal system in our U.S. entity.

For the year ended December 31, 2021, capital expenditures of \$2.1 million consisted of new computer equipment and leasehold improvements of \$1.1 million for our U.S. facilities, and \$1.0 million for computer equipment at our foreign locations, primarily in India.

Cash Flows from Financing Activities

For the year ended December 31, 2022, cash utilized in financing activities of \$13.6 million was attributable to principal payments related to the Credit Facility of \$9.5 million, payments to repurchase shares of Common Stock totaling \$4.7 million and finance lease payments of \$0.3 million. These cash uses were offset by proceeds of \$1.0 million received from stock option exercises.

For the year ended December 31, 2021, cash utilized in financing activities of \$26.6 million was attributable to payments to repurchase shares of Series A Preferred Stock totaling \$156.8 million, which included \$87.8 million in July 2021, \$60.0 million in April 2021 and \$9.0 million in January 2021; recurring dividend payments \$9.7 million and a make-whole dividend payments of \$2.9 million; payments related to debt issuance costs of \$4.2 million; payments for professional fees associated with our March 2021 Offering of \$1.3 million; principal payments related to the Credit Facility of \$2.3 million; payments of \$1.1 million related to treasury stock and capital lease payments of \$0.4 million. These cash uses were offset by proceeds of \$89.3 million from the new Credit Facility, proceeds of \$57.0 million generated from the March 2021 Offering and proceeds of \$5.9 million received from stock option exercises.

Foreign Subsidiaries

Our foreign subsidiaries and branches are dependent on our U.S.-based parent for continued funding. We currently do not intend to repatriate any amounts that have been invested overseas back to the U.S.-based parent. The imposition of the Transition Tax set forth in the U.S. Tax Cuts and Jobs Act of 2017 may reduce or eliminate U.S. federal deferred taxes on the unremitted earnings of our foreign subsidiaries. However, we may still be liable for withholding taxes, state taxes, or other income taxes that might be incurred upon the repatriation of foreign earnings. We have not made any provision for additional

income taxes on undistributed earnings of our foreign subsidiaries. As of December 31, 2022, we had cash and cash equivalents of \$65.0 million in our foreign subsidiaries.

Contractual Obligations

The following table summarizes our contractual obligations on an undiscounted basis as of December 31, 2022 and the period in which each contractual obligation is due (in thousands):

	Year Ending December 31:						Total
	2023	2024	2025	2026	2027	Thereafter	
Credit Facility							
Principal payments plus interest at 6.1%	\$ 10,377	\$ 11,120	\$ 11,804	\$ 59,936	\$ —	\$ —	\$ 93,237
Lease obligations:							
Operating	5,340	4,625	3,050	2,446	208	—	15,669
Financing	398	398	332	—	—	—	1,128
Total	\$ 16,115	\$ 16,143	\$ 15,186	\$ 62,382	\$ 208	\$ —	\$ 110,034

Off-Balance Sheet Arrangements

During the periods presented, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities, which were established for the purpose of facilitating off-balance sheet arrangements.

Critical Accounting Estimates

Our management’s discussion and analysis of financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, as well as the reported revenue and expenses during the reporting periods. These items are monitored and analyzed for changes in facts and circumstances, and material changes in these estimates could occur in the future. We base our estimates on historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Changes in estimates are reflected in reported results for the period in which they become known. Actual results may differ from these estimates under different assumptions or conditions.

With respect to our significant accounting policies that are described in Note 2 to our consolidated financial statements included in Item 8 of this Report, we believe that the following accounting policies involve a greater degree of judgment and complexity. Accordingly, these are the policies we believe are the most critical to aid in fully understanding and evaluating our consolidated financial condition and results of operations.

Income Taxes and Valuation of Deferred Tax Assets

We account for income taxes in accordance with ASC 740, “Income Taxes” (“ASC 740”). Significant judgment is required in determining income tax benefit or expense and in evaluating uncertainties under ASC 740. Deferred taxes are recorded for the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Valuation allowances are established when it is determined that it is more likely than not that some portion or all of a deferred tax asset will not be realized. The Company’s deferred tax assets are primarily the result of U.S. federal net operating loss carryforwards (“NOLs”) and tax credit carryforwards.

During the year ended December 31, 2021, we released our valuation allowance related to our deferred tax assets and recognized a \$55.8 million income tax benefit. Management determined that, as a result of generating pretax earnings, utilization of net operating loss carryovers and projected pre-tax earnings, there is sufficient positive evidence to conclude that it is more likely than not that its U.S. deferred taxes are realizable. The realization of deferred tax assets is dependent upon our ability to generate sufficient future taxable income during the periods in which those temporary differences become deductible, prior to the expiration of the tax attributes. The evaluation of deferred tax assets requires judgment in assessing the

likely future tax consequences of events that have been recognized in our financial statements or tax returns and forecasting future profitability.

We assessed the available positive and negative evidence to estimate if sufficient future taxable income will be generated to utilize existing deferred tax assets within the applicable expiration period. While we believe that we have utilized a reasonable method to determine our deferred tax assets and the related release of our valuation allowance, should factors and conditions differ materially from those used by us, the actual realization of deferred tax assets could differ materially from the reported amounts.

Loss Contingencies

We are subject to various loss contingencies arising in the ordinary course of business. An estimated loss contingency is accrued when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. If some amount within a range of probable loss appears to be a better estimate than any other amount within the range, we accrue that amount. Alternatively, when no amount within a range of probable loss appears to be a better estimate than any other amount, we accrue the lowest amount in the range. If we determine that a loss is reasonably possible and the range of the loss is estimable, then we disclose the range of the possible loss if the upper end of the range is material. If we cannot estimate the range of loss, we will disclose the reason why it cannot estimate the range of loss, if there is a reasonable possibility that the amount of loss may be material. We regularly evaluate current information available to it to determine whether an accrual is required, an accrual should be adjusted and if a range of possible loss should be disclosed.

Recent Accounting Pronouncements

From time to time, new accounting pronouncements are issued by the FASB or other standard setting bodies that are adopted by us as of the specified effective date. For additional information on recently issued accounting standards and our plans for adoption of those standards, please refer to the section titled *Recent Accounting Pronouncements* under Note 2 to our Consolidated Financial Statements included in Item 8 of this Report.

Recently Issued Accounting Standards

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting*, and amended in December 2020 with ASU 2022-06, *Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848*. ASU 2020-04 provides guidance to alleviate the burden in accounting for reference rate reform by allowing certain expedients and exceptions in applying GAAP to contracts, hedging relationships and other transactions impacted by reference rate reform. The provisions apply only to those transactions that reference LIBOR or another reference rate expected to be discontinued due to reference rate reform. Adoption of the provisions of ASU 2020-04 are optional and are effective from March 12, 2020 through December 31, 2024, as amended by ASU 2022-06. As of December 31, 2022, we have not adopted any expedients and exceptions under ASU 2020-04, however we will be adopting ASU 2020-04 effective January 1, 2023.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Foreign Currency Exchange Risk

We have foreign currency risks related to our revenue and operating expenses denominated in currencies other than the U.S. Dollar, primarily the Euro, British Pound Sterling, Brazilian Real, Australian Dollar, Indian Rupee and Japanese Yen. We generated between 41% and 47% of our revenue from our international business for the years ended December 31, 2022, 2021 and 2020. Increases in the relative value of the U.S. Dollar to other currencies may negatively affect our revenue, partially offset by a positive impact to operating expenses in other currencies as expressed in U.S. Dollars. We have experienced and will continue to experience fluctuations in our net income (loss) as a result of transaction gains or losses related to revaluing certain current asset and current liability balances, including intercompany receivables and payables, which are denominated in currencies other than the functional currency of the entities in which they are recorded. While we have not engaged in the hedging of our foreign currency transactions to date, we are evaluating the costs and benefits with the expectation that we will initiate such a program and we may in the future hedge selected significant transactions denominated in currencies other than the U.S. Dollar.

As of December 31, 2022, the effect of a hypothetical 10% change in foreign currency exchange rates applicable to our business would have impacted our income before income taxes by a plus or minus of \$1.1 million in our Consolidated Statements of Operations and Comprehensive Income (Loss) and would have impacted the effect of foreign currency changes on cash by a plus or minus \$6.5 million in our Consolidated Statement of Cash Flows.

Interest Rate Sensitivity

We hold cash and cash equivalents for working capital purposes. We do not have material exposure to market risk with respect to investments, as any investments we enter into are primarily highly liquid investments.

Variable Rate Debt

In July 2021, we entered into the Credit Facility, which originally bore interest at LIBOR plus a margin ranging from 1.75% to 2.50%. Effective February 28, 2023, we amended our Credit Facility to implement certain changes in the reference rate from LIBOR to SOFR. Accordingly, we were previously exposed to market risk due to variable interest rates based on LIBOR and are currently exposed to market risk due to variable interest rates based on SOFR. As of December 31, 2022, we had \$74.8 million outstanding debt under the Credit Facility. As of this date, a reasonably possible hypothetical adverse change of 100 basis points in would have resulted in an increase of approximately \$0.1 million in annual interest expense. See the section titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” in Part II, Item 7 and Note 5 of our consolidated financial statements included in Part II, Item 8 of this Report for more information related to the Credit Facility.

Inflation Risk

With regards to inflation risk and other economic conditions, please refer to Item 1A. Risk Factors included in Part I of this Report.

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors
Rimini Street, Inc.:

Opinions on the Consolidated Financial Statements and Internal Control Over Financial Reporting

We have audited the accompanying consolidated balance sheets of Rimini Street, Inc. and subsidiaries (the Company) as of December 31, 2022 and 2021, the related consolidated statements of operations and comprehensive income (loss), stockholders' deficit, and cash flows for each of the years in the three-year period ended December 31, 2022, and the related notes (collectively, the consolidated financial statements). We also have audited the Company's internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2022, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022 based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audit of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Evaluation of revenue contracts with non-standard provisions

As discussed in Note 2 and Note 4 to the consolidated financial statements, the Company recognized \$409,662 thousand in revenue which was primarily derived from the subscription-based software support revenue for the year ended December 31, 2022. A significant portion of the Company's contracts contain non-standard provisions which require judgment to determine the appropriate accounting through the five-step framework prescribed by *ASC Topic 606 – Revenue from Contracts with Customers*.

We identified the evaluation of revenue contracts with non-standard provisions related to subscription-based software support revenue as a critical audit matter. This matter required a higher degree of auditor judgment to assess whether non-standard provisions in contracts and amendments were appropriately evaluated by management.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of an internal control over the Company's subscription-based software support revenue processes that included identifying and evaluating non-standard contract provisions. We applied auditor judgment to determine the nature and extent of procedures to be performed over subscriptions-based software support revenue. For a selection of revenue transactions, we developed independent expectations of the revenue recognized based on the provisions in contracts and amendments and compared them to the amounts recorded by the Company. We also evaluated the overall sufficiency of the audit evidence over revenue by assessing the results of our procedures.

/s/ KPMG LLP

We have served as the Company's auditor since 2016.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 — BASIS OF PRESENTATION

Nature of Business

Rimini Street, Inc. was formed in the State of Nevada in 2005 (“RSI” or “predecessor”) and, through a merger in 2017 with a public company, became Rimini Street, Inc., a Delaware corporation (referred to as the “Company”, “we” and “us”), trading on the Nasdaq Global Market under the ticker symbol “RMNI”. The Company is a global provider of enterprise software support services. Its subscription-based software support products and services offer enterprise software licensees a choice of solutions that replace or supplement the support products offered by enterprise software vendors.

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES

Consolidation

The consolidated financial statements, which include the accounts of the Company and its wholly-owned subsidiaries, are prepared in conformity with generally accepted accounting principles in the United States of America (“U.S. GAAP”). All significant intercompany balances and transactions have been eliminated.

Liquidity

As of December 31, 2022, the Company's current liabilities exceeded its current assets by \$71.3 million, and the Company incurred a net loss of \$2.5 million for the year ended December 31, 2022. As of December 31, 2022, the Company had available cash, cash equivalents and restricted cash of \$109.4 million. As of December 31, 2022, the Company's current liabilities included \$265.8 million of deferred revenue whereby the historical costs of fulfilling the Company's commitments to provide services to its customers was approximately 37% of the related deferred revenue for the year ended December 31, 2022.

On July 20, 2021, the Company redeemed the remaining 87,802 shares of its 13.00% Series A Preferred Stock at an aggregate total redemption price of \$88.4 million. The total redemption price consisted of \$87.8 million related to the outstanding shares of Series A Preferred Stock with a face value of \$1,000 per share and \$0.6 million or \$6.86 per share of Series A Preferred Stock related to the dividends earned for the period from July 1, 2021 through July 19, 2021. The redeemed shares of the Series A Preferred Stock, along with the dividends, were recorded on the redemption date of July 20, 2021.

The Company funded the July 20, 2021 redemption with borrowings from a five year term loan of \$90 million, which was entered into on July 20, 2021 (the “Credit Facility”). Annual minimum principal payments over the five year term for the Credit Facility will be 5%, 5%, 7.5%, 7.5% and 10%, respectively, with the remaining balance due at the end of the term. See Note 5 for further information regarding the Company's Credit Facility.

As discussed in Note 7, the Company completed a firm commitment underwritten public offering on March 11, 2021 (the “March 2021 Offering”) of 7.8 million shares of its common stock, par value \$0.0001 per share (“Common Stock”), at a price of \$7.75 per share for total gross proceeds of \$57.0 million. Underwriter discounts and commissions were \$2.9 million and the underwriter expenses were \$0.2 million. The Company also incurred additional professional fees and expenses of \$1.3 million as part of the transaction, resulting in net proceeds from the March 2021 Offering of approximately \$55.6 million. The Company had previously completed a firm commitment underwritten public offering on August 18, 2020 (the “August 2020 Offering”) of 6.1 million shares of its Common Stock at a price of \$4.50 per share for total gross proceeds of \$27.5 million. Underwriter discounts and commissions were \$1.7 million and the underwriter expenses were \$0.1 million. The Company also incurred additional professional fees of \$0.6 million as part of the transaction, resulting in net proceeds from the August 2020 Offering of approximately \$25.1 million.

Additionally, the Company is obligated to make operating and financing lease payments that are due within the next 12 months in the aggregate amount of \$5.7 million. In March 2020, the World Health Organization declared the outbreak of a novel strain of the coronavirus (“COVID-19”) to be a pandemic. After the issuance date of these financial statements, the Company's ability to operate continues not to be significantly adversely impacted by the COVID-19 pandemic, the Company believes that current cash, cash equivalents, restricted cash, and future cash flow from operating activities will be sufficient to meet the Company's

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

anticipated cash needs, including Credit Facility repayments, working capital needs, capital expenditures and other contractual obligations for at least 12 months from the issuance date of these financial statements.

Use of Estimates

The preparation of financial statements and related disclosures in conformity with U.S. GAAP requires the Company to make judgments, assumptions, and estimates that affect the amounts reported in its consolidated financial statements and accompanying notes. The full extent to which the COVID-19 pandemic will impact the Company's business and operating results will depend on circumstances which are highly uncertain and cannot be accurately predicted. The Company bases its estimates and assumptions on current facts, historical experience, and various other factors that it believes are reasonable under the circumstances, to determine the carrying values of assets and liabilities that are not readily apparent from other sources. The Company's significant accounting estimates include, but are not necessarily limited to, the allowance for doubtful accounts receivable, valuation assumptions for stock options, operating lease right-of-use assets and liabilities, deferred income taxes and the related valuation allowances, accretion of discounts on debt and Series A Preferred Stock, and the evaluation and measurement of contingencies. To the extent there are material differences between the Company's estimates and the actual results, the Company's future consolidated results of operation may be affected.

Risks and Uncertainties

Inherent in the Company's business are various risks and uncertainties, including its limited operating history in a rapidly changing industry. These risks include the Company's ability to manage its rapid growth and its ability to attract new customers and expand sales to existing customers, risks related to litigation, as well as other risks and uncertainties. In the event that the Company does not successfully execute its business plan, certain assets may not be recoverable, certain liabilities may not be paid and investments in its capital stock may not be recoverable. The Company's success depends upon the acceptance of its expertise in providing services, development of sales and distribution channels, and its ability to generate significant revenues and cash flows from the use of this expertise.

Segments

The Company's chief operating decision maker (the "CODM"), who is the Company's Chief Executive Officer and President, allocates resources and assesses performance based on financial information of the Company. The CODM reviews financial information presented on an entity-level basis for purposes of making operating decisions and assessing financial performance. The entity-level financial information is identical to the information presented in the accompanying consolidated statements of operations and comprehensive loss. Accordingly, the Company has determined that it operates in a single operating and reportable segment.

Cash, Cash Equivalents and Restricted Cash

All highly liquid investments purchased with an original maturity of three months or less that are freely available for the Company's immediate and general business use are classified as cash and cash equivalents. Cash and cash equivalents consist primarily of demand deposits with financial institutions. The restricted cash consists of demand deposits that are pledged as collateral for corporate credit card debts.

Allowance for Doubtful Accounts

The Company records a provision for doubtful accounts based on historical experience and a detailed assessment of the collectability of its accounts receivable. In estimating the allowance for doubtful accounts, the Company considers, among other factors, the aging of the accounts receivable, its historical write-offs, the credit worthiness of customers, and general economic conditions. Account balances are charged off against the allowance when the Company believes that it is probable that the receivable will not be recovered. Actual write-offs may either be in excess or less than the estimated allowance.

Property and Equipment

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Property and equipment are recorded at cost less accumulated depreciation and amortization. Depreciation and amortization is calculated using the straight-line method over the estimated useful life of the following assets:

	Years
Computer equipment	1 - 3
Furniture and fixtures	3 - 7
Capitalized software costs	3
Leasehold improvements	Up to 8 years, not to exceed lease term

Maintenance and repairs are expensed as incurred. Application development costs related to internal use software projects are capitalized and included in property and equipment. Preliminary planning activities and post implementation activities for internal use software projects are expensed as incurred. Construction-in-progress primarily consists of computer equipment and leasehold improvements that have not yet been placed into service for their intended use. Depreciation and amortization commence when assets are initially placed into service for their intended use.

Deferred Contract Costs

Costs incurred to obtain new client contracts and to extend existing client contracts are primarily comprised of sales commissions. Initial sales commissions are generally deferred and amortized over their estimated useful life, which is generally 4 years. We determined the period of benefit by taking into consideration the estimated life cycles for our customers, our technology and other factors. We recognized amortization expense related to deferred contract costs of \$17.7 million, \$16.0 million and \$14.0 million for the years ended December 31, 2022, 2021 and 2020, respectively.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

The Company accounts for uncertain tax positions in accordance with ASC 740, Income Taxes (“ASC 740”), which applies to all tax positions related to income taxes. Under ASC 740, tax benefits are recognized when it is more-likely-than-not that a tax position will be sustained upon examination by the authorities. The Company recognizes interest and penalties accrued related to uncertain tax benefits as a component of income tax expense.

Impairment of Long-lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Impairment is recognized only if the carrying amount of the long-lived assets is not recoverable and exceeds their fair value. The carrying amount of a long-lived asset is not recoverable if the carrying amounts of such assets exceed the estimates of future net undiscounted cash flows expected to be generated by such assets. An impairment charge is recognized for the amount by which the carrying amount of the asset, or asset group, exceeds its fair value. The Company recognized an impairment charge of \$3.0 million, \$1.6 million and \$1.2 million for the years ended December 31, 2022, 2021 and 2020, respectively, related to two of its office leases as the Company ceased use of a portion of the office space due to increased remote work since the COVID-19 pandemic.

Debt Issuance Costs and Discounts

Debt issuance costs are costs incurred to obtain new debt financing or modify existing debt financing and consist of incremental direct costs incurred for professional fees and due diligence services, including reimbursement of similar costs incurred by the lenders. Debt issuance costs are allocated proportionately between funded and unfunded portions of debt. Amounts paid to the lenders when a financing is consummated are a reduction of the proceeds and are treated as a debt discount. Debt issuance costs and discounts related to funded debt are presented in the accompanying consolidated balance sheet as a reduction in the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

carrying value of the debt and are accreted to interest expense using the effective interest method. Debt issuance costs related to unfunded debt is presented in the accompanying consolidated balance sheet as a long-term asset and are amortized using the straight-line method over the contractual term of the debt agreement. Unamortized deferred debt issuance costs are not charged to expense when the related debt becomes a demand obligation due to the violation of terms so long as it is probable that the lenders will either waive the violation or will agree to amend or restructure the terms of the indebtedness. If either circumstance is probable, the deferred debt issuance costs continue to be amortized over the remaining term of the initial amortization period. If it is not probable, the costs will be charged to expense. Debt discounts and issuance costs are collectively referred to as DDIC.

Accounting for Series A Preferred Stock

Series A Preferred Stock was previously classified as mezzanine equity in the Company's consolidated balance sheet since the holders had redemption rights beginning in July 2023 (and earlier under certain circumstances). Discounts and incremental and direct costs incurred to consummate the Private Placement were allocated pro rata between the Series A Preferred Stock and the Common Stock issued based on the relative fair value on the Closing Date. The discount related to Series A Preferred Stock was being accreted using the effective interest method. Accordingly, the carrying value of the Series A Preferred Stock was being increased with a corresponding reduction in additional paid-in capital from the issuance date of July 19, 2018 until the final redemption on July 20, 2021, when the carrying value was equal to the aggregate liquidation preference. The Company recorded a liability for dividends in the period incurred. Accrued dividends were a component of the liquidation preference until paid in cash or settled in additional shares of Series A Preferred Stock. Accretion and accrued dividends were treated as deductions in the calculation of earnings attributable to common stockholders. As noted above, the remaining shares of Series A Preferred Stock were redeemed on July 20, 2021.

Revenue Recognition

Revenue is primarily derived from support services, and to a lesser extent, software licensing and related maintenance and professional services.

Revenue is recognized when performance obligations, as stipulated in the contracts, are transferred to a customer for an amount that reflects the consideration the Company expects to receive in exchange for those support services and service contracts. This occurs when the contracts are executed by both parties, the rights and obligations of the parties are identified, payment terms are identified, the contracts have commercial substance and collectability of consideration is probable. The Company's contracts generally do not contain any refund provisions other than in the event of our non-performance or breach. However, the Company's contracts may include non-standard terms negotiated with each respective client that may impact the amount and timing of revenue recognized.

The Company determines revenue recognition through the following steps:

- *Identification of the contract with the customer.*
- *Identification of the performance obligations.*
- *Determination of the transaction price.*
- *Allocation of the transaction price to the performance obligations.*
- *Recognition of revenue when the performance obligations are satisfied.*

Most of the Company's contracts contain a single performance obligation for subscription support services. In a limited number of arrangements, the Company also licenses software and related maintenance services under term-based arrangements or provides professional services. The Company's performance obligations are evaluated for whether they can be distinct or should be accounted for as one performance obligation and primarily consist of (i) subscription support services or (ii) professional services sold on a time and materials basis.

The transaction price is generally the same as the contractual price. Typically, the structure of our arrangements do not give rise to variable consideration. However, in those instances where variable consideration should exist, the Company includes in its estimates, additional revenue for variable consideration when it has an enforceable right, the amount can be estimated reliably and its realization is probable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Subscription Services

The Company's subscription support services are part of a comprehensive support program that helps clients keep their software and systems running smoothly and in full legal compliance. Subscription support services include product support (fixes and installation support), security, advanced support (performance tuning and interoperability), strategic roadmap services (upgrade process), global tax, legal and regulatory services, global security, proactive support services, strategic roadmap services, device and user interface support and account management services. Subscription contracts are generally non-cancelable and do not contain general rights of return. The Company's support subscription is viewed as a stand-ready performance obligation comprised of a series of distinct services that is satisfied ratably over time as the services are provided. A time-elapsed output method is used to measure progress as the Company's efforts are expended evenly throughout the period given the nature of the promise is a stand-ready service.

Other Services

Other services include both software licensing services and professional services. The Company's software licensing includes both internally developed software licenses as well as third party licenses. The Company's professional services consist of various consulting services, which include project oversight, minor software customization or enhancement, and testing of client-developed software customization. Services may be provided solely by the Company, by a partner of the Company, or in combination with the Company's partners. The Company's professional services are generally provided under a separate statement of work from our subscription support services. Revenue is recognized as services are performed.

Revenues generally include any taxes withheld by foreign customers and subsequently remitted to governmental authorities in those foreign jurisdictions. Foreign withholding taxes included in revenues amounted to \$3.9 million, \$3.3 million and \$2.1 million for the years ended December 31, 2022, 2021 and 2020, respectively.

The Company's remaining performance obligations represent all future non-cancellable revenue under contract that has not yet been recognized as revenue, and includes deferred revenue and unbilled amounts. As of December 31, 2022, remaining performance obligations amounted to \$577.9 million, of which \$299.9 million was billed and recorded as deferred revenue.

Deferred revenue is a contract liability that consists of billings issued that are non-cancellable and payments received in advance of revenue recognition. The Company typically invoices its customers at the beginning of the contract term, in annual and multi-year installments. Deferred revenue is recognized as the Company satisfies its performance obligations over the term of the contracted service period. The Company expects to recognize revenue on approximately \$265.8 million of the billed remaining performance obligations over the next 12 months, with the remaining deferred revenue balance recognized thereafter.

Advertising

Advertising costs are charged to sales and marketing expense in the period incurred.

Legal Costs and Deferred Settlement Proceeds

Legal fees and costs are charged to general and administrative expense as incurred, other than legal fees and costs that are accounted for as deferred offering costs and debt issuance costs. The proceeds from legal fee insurance coverage prepaid settlements were accounted for as a deferred liability that was reduced as legal expenses related to the litigation were incurred.

Loss Contingencies

The Company is subject to various loss contingencies arising in the ordinary course of business. An estimated loss contingency is accrued when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. If some amount within a range of probable loss appears to be a better estimate than any other amount within the range, the Company accrues that amount. Alternatively, when no amount within a range of probable loss appears to be a better estimate than any other amount, the Company accrues the lowest amount in the range. If the Company determines that a loss is reasonably possible and the range of the loss is estimable, then the Company discloses the range of the possible loss if the upper end of the range is material. If the Company cannot estimate the range of loss, it will disclose the reason why it cannot estimate the range of loss, if there is a reasonable possibility that the amount of loss may be material. The Company

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

regularly evaluates current information available to it to determine whether an accrual is required, an accrual should be adjusted and if a range of possible loss should be disclosed.

Stock-Based Compensation

The Company measures the cost of employee and director services received in exchange for all equity awards granted, based on the fair market value of the award as of the grant date. The Company computes the fair value of options using the Black-Scholes-Merton (“BSM”) option pricing model. The Company recognizes the cost of the equity awards over the period that services are provided to earn the award, usually the vesting period. For awards granted which contain a graded vesting schedule, and the only condition for vesting is a service condition, compensation cost is recognized as an expense on a straight-line basis over the requisite service period as if the award was, in substance, a single award. Stock-based compensation expense is recognized based on awards ultimately expected to vest whereby estimates of forfeitures are based upon historical experience.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using enacted tax rates and laws that are expected to be in effect when the differences are expected to be recovered or settled. Realization of deferred tax assets is dependent upon future taxable income. A valuation allowance is recognized if it is more likely than not that some portion or all of a deferred tax asset will not be realized based on the weight of available evidence, including expected future earnings.

The Company recognizes an uncertain tax position in its financial statements when it concludes that a tax position is more likely than not to be sustained upon examination based solely on its technical merits. Only after a tax position passes the first step of recognition will measurement be required. Under the measurement step, the tax benefit is measured as the largest amount of benefit that is more likely than not to be realized upon effective settlement. This is determined on a cumulative probability basis. The full impact of any change in recognition or measurement is reflected in the period in which such change occurs. Interest and penalties related to income taxes are recognized in the provision for income taxes.

Foreign Currency

The Company’s reporting currency is the U.S. Dollar, while the functional currencies of its foreign subsidiaries are their respective local currencies. The asset and liability accounts of the foreign subsidiaries are translated from their local currencies at the exchange rates in effect on the balance sheet date. Revenue and expenses are translated at average rates of exchange prevailing during the period. Gains and losses resulting from the translation of the subsidiary balance sheets are recorded net of tax as a component of accumulated other comprehensive loss. Gains and losses from foreign currency transactions are recorded in other income and expense in the consolidated statements of operations and comprehensive loss. The tax effect has not been material to date.

Earnings (Loss) Per Common Share

Basic net loss per common share is computed by dividing the net loss applicable to common stockholders by the weighted average number of common shares outstanding for each period presented. Diluted net loss per common share is computed using the treasury stock method by giving effect to the exercise of all potential shares of Common Stock, including stock options and warrants, and the conversion of RSI Preferred Stock, to the extent dilutive. RSI Preferred Stock participated in dividends but was not considered participating securities when there was a net loss because the holders did not have a contractual obligation to share in the losses.

The holders of Series A Preferred Stock are entitled to participate in Common Stock dividends, if and when declared, on a one-to-one per-share basis. Accordingly, in periods in which the Company has net income, earnings per share will be computed using the two-class method whereby the pro rata dividends distributable to the holders of Series A Preferred Stock will be deducted from earnings applicable to common stockholders, regardless of whether a dividend is declared for such undistributed earnings.

Recent Accounting Pronouncements

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following accounting standards were adopted during the fiscal year 2022:

In August 2020, the FASB issued ASU 2020-6, *Debt—Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging - Contracts in Entity's Own Equity (Subtopic 815-40)*. The guidance eliminates the beneficial conversion and cash conversion accounting for convertible instruments. The new guidance also modifies how particular convertible instruments and certain contracts that may be settled in cash or shares impact the diluted EPS computation. The new guidance was effective for us as of January 1, 2022. The impact of the adoption of this guidance did not have a material impact on our Consolidated Financial Statements.

NOTE 3 — LEASES

Operating Leases

Effective at the start of fiscal 2020, the Company adopted the provisions and expanded disclosure requirements described in Topic 842. The Company adopted the standard using the prospective method. Accordingly, the results for the prior comparable periods were not adjusted to conform to the current period measurement or recognition of results. The Company has operating leases for real estate and equipment with an option to renew the leases in the range of one month to five years. Some of the leases include the option to terminate the leases upon 30-days' notice with a penalty. The Company's leases have various remaining lease terms ranging from January 2023 to January 2027. The Company's lease agreements may include renewal or termination options for varying periods that are generally at the Company's discretion. The Company's lease terms only include those periods related to renewal options the Company believes are reasonably certain to exercise. The Company generally does not include these renewal options as it is not reasonably certain to renew at the lease commencement date. This determination is based on consideration of certain economic, strategic and other factors that the Company evaluates at lease commencement date and reevaluates throughout the lease term. Some leases also include options to terminate the leases and the Company only includes those periods beyond the termination date if it is reasonably certain not to exercise the termination option.

The Company uses a discount rate to calculate the ROU asset and lease liability. As most of the Company's leases do not provide an implicit rate, the Company uses an estimated incremental borrowing rate based on the information available at the lease commencement date in determining the present value of future payments.

Some leasing arrangements require variable payments that are dependent on usage or may vary for other reasons, such as payments for insurance and tax payments. The variable portion of lease payments is not included in the Company's ROU assets or lease liabilities. Rather, variable payments, other than those dependent upon an index or rate, are expensed when the obligation for those payments is incurred and are included in lease expenses recorded in selling and administrative expenses on the Consolidated Statements of Operations.

The Company has lease agreements with both lease and non-lease components that are treated as a single lease component for all underlying asset classes. Accordingly, all expenses associated with a lease contract are accounted for as lease expenses.

The Company has elected to apply the short-term lease exception for all underlying asset classes. That is, leases with a term of 12 months or less are not recognized on the balance sheet, but rather expensed on a straight-line basis over the lease term. The Company's leases do not include significant restrictions or covenants, and residual value guarantees are generally not included within its operating leases. As of December 31, 2022, the Company did not have any material additional operating leases that have not yet commenced.

The components of operating lease expense and supplemental balance sheet information for the years ended December 31, were as follows (in thousands):

	2022	2021	2020
Operating lease expense related to ROU assets and liabilities	\$ 5,530	\$ 6,139	\$ 6,192
Other lease expense	838	660	1,076
Total lease expense	\$ 6,368	\$ 6,799	\$ 7,268

Other information related to leases as of December 31, was as follows (in thousands):

RIMINI STREET, INC.

Advertising

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Advertising expenses were \$1.7 million, \$1.2 million and \$3.1 million for the years ended December 31, 2022, 2021 and 2020, respectively.

Other Expenses, Net

For the years ended December 31, 2022, 2021 and 2020, other expenses, net consisted of the following (in thousands):

	2022	2021	2020
Interest and other income	\$ 228	\$ 55	\$ 24
Foreign currency gain (loss)	12	(1,394)	(77)
Other expenses	(253)	(266)	(205)
Total other expenses, net	<u>\$ (13)</u>	<u>\$ (1,605)</u>	<u>\$ (258)</u>

NOTE 5 — DEBT

Debt is presented net of debt discounts and issuance costs in the Company's balance sheets. As of December 31, 2022 and December 31, 2021, debt consisted of the following (in thousands):

	2022	2021
Credit Facility	\$ 74,792	\$ 83,319
Less current maturities	4,789	3,664
Long-term debt, net of current maturities	<u>\$ 70,003</u>	<u>\$ 79,655</u>

On May 31, 2022, the Company prepaid \$5.0 million of indebtedness outstanding under its Credit Facility with no prepayment penalty. On December 31, 2022, September 30, 2022, June 30, 2022 and March 31, 2022, the Company made its required quarterly principal payments of \$1.1 million, respectively, which totaled \$4.5 million for the year ended December 31, 2022.

On May 31, 2022, the Company also amended the Credit Facility to increase the aggregate value of the Common Stock shares that can be repurchased by the Company to \$50 million during the term of the Credit Facility.

Effective July 20, 2021, the Company received \$89.3 million of net proceeds related to the Credit Facility. The borrowings under the Credit Facility were discounted at 0.375%. As part of the transaction, the Company incurred issuance costs of \$4.2 million, which were capitalized and are being amortized over the term of the Credit Facility.

The Credit Facility originally bore interest at the London Interbank Offered Rate (“LIBOR”), plus a margin ranging from 1.75% to 2.50%. From January 1, 2022 through March 31, 2022, the margin for the Credit Facility was 2.25%. Effective April 1, 2022, the margin for the Credit Facility decreased to 1.75% for the remainder of fiscal year 2022. For the year ended December 31, 2022 and 2021, the effective interest rates on the Credit Facility were 4.8% and 3.5%, respectively. Effective February 28, 2023, the Company amended the Credit Facility to implement certain changes in the reference rate from LIBOR to SOFR.

The fair value of the Credit Facility was \$78.8 million (Level 2 inputs) as of December 31, 2022 compared to the carrying value of \$77.8 million as of December 31, 2022. The LIBOR rate as of December 31, 2021 was not materially different from the interest rate for the year ended December 31, 2021. Hence the fair value of the Credit Facility approximated the carrying value as of December 31, 2021.

The Credit Facility contains certain financial covenants, including a minimum fixed charge coverage ratio greater than 1.25, a total leverage ratio less than 3.75, and a minimum liquidity of \$20 million in U.S. cash. Annual minimum principal payments over the five year term for the Credit Facility will be 5%, 5%, 7.5%, 7.5%, and 10%, respectively, with the remaining balance due at the end of the term. For the year ended December 31, 2021, the Company made principal payments of \$2.3 million.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Pursuant to a Guaranty and Security Agreement, dated July 2, 2021 (the “Guaranty and Security Agreement”), among the Credit Parties and Capital One, National Association, as agent, the obligations under the Credit Agreement are guaranteed by certain of the Company’s subsidiaries (the Company and the guarantors, collectively, the “Credit Parties”) and are secured, subject to customary permitted liens and exceptions, by a lien on substantially all assets of the Credit Parties.

On May 28, 2022, the Board of Directors authorized an increase to our previously announced Common Stock repurchase program to increase the value of the securities that could be acquired by us from up to \$15.0 million over two years to up to \$50.0 million over the next four years, subject to continuing compliance with our Credit Facility, provided that all other applicable conditions and legal requirements are satisfied.

On February 27, 2022, the Board of Directors approved the adoption of a stock repurchase program to acquire up to \$15.0 million of our Common Stock both on the open market and in privately negotiated transactions, including through Rule 10b5-1 plans, through March 4, 2024, subject to compliance with our Credit Facility, which was amended effective January 14, 2022 to increase the aggregate value of the shares of Common Stock that could be acquired by us to no greater than \$15.0 million during the term of the Credit Facility, provided that all other applicable conditions and legal requirements are satisfied.

On May 18, 2022, the Company entered into an interest rate swap agreement with a notional value of \$40 million, with a fixed payer LIBOR rate of 2.9935% and an initial floating LIBOR rate of 0.93557%. The floating rate is reset at each month end and has an embedded floor rate of 0.0%. The term of the interest rate swap agreement coincides with that of the Credit Facility. See Note 13 for further information regarding the fair value accounting for the interest rate swap agreement. Effective February 28, 2023, the interest rate swap agreement was amended in connection with the amendment of the Credit Facility to implement certain changes in the reference rate from LIBOR to SOFR, as described below.

Subsequent Event

On February 22, 2023, the Company amended its Credit Facility. The amendment implemented certain changes in the reference rate from LIBOR to the Secured Overnight Financing Rate (“SOFR”). As of February 28, 2023, the Company has a choice of interest rates between (a) Adjusted Term SOFR and (b) Base Rate, in each case plus an applicable margin. The applicable margin remains the same as the existing Credit Agreement, and is based on the Company’s Consolidated Leverage Ratio (as defined in the Credit Agreement) and whether the Company elects Adjusted Term SOFR (ranging from 1.75 to 2.50%) or Base Rate (ranging from 0.75 to 1.50%).

In addition, the amendment adjusted the definition of Consolidated EBITDA to provide an addback solely for the fourth fiscal quarter of 2022, and any period including such quarter, that costs and legal fees and expenses incurred by the Company in connection with its ongoing litigation with Oracle up to \$10.0 million can be added back and included in the applicable calculation of the Consolidated EBITDA.

Based on voluntary prepayments made to date under the Credit Facility, the Company currently has available \$40 million in incremental borrowings available for future use, subject to the terms of the Credit Facility.

Interest Expense

The components of interest expense for the years ended December 31, 2022, 2021 and 2020 are presented below (in thousands):

	2022	2021	2020
Credit Facility:			
Interest expense	\$ 3,205	\$ 977	\$ —
Accretion expense related to discount and issuance costs	973	442	—
Interest on other borrowings	93	131	77
Total interest expense	<u>\$ 4,271</u>	<u>\$ 1,550</u>	<u>\$ 77</u>

NOTE 6 — REDEEMABLE SERIES A PREFERRED STOCK

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Series A Preferred Stock was previously classified as mezzanine equity in the Company’s consolidated balance sheet from July 19, 2018 through July 20, 2021 because the holders had redemption rights beginning in July 2023 (and earlier under certain circumstances). Discounts and incremental and direct costs incurred to consummate the Private Placement were allocated pro rata between the Series A Preferred Stock and the Common Stock issued based on the relative fair value on the Closing Date of three different transactions, which are listed below. The discount related to Series A Preferred Stock was being accreted using the effective interest method. Accordingly, the carrying value of the Series A Preferred Stock was being increased with a corresponding reduction in additional paid-in capital from the issuance date of July 19, 2018 until the final redemption on July 20, 2021, when the carrying value will be equal to the aggregate liquidation preference. The Company recorded a liability for dividends in the period incurred. Accrued dividends were a component of the liquidation preference until paid in cash or settled in additional shares of Series A Preferred Stock. Accretion and accrued dividends are treated as deductions in the calculation of earnings attributable to common stockholders.

2018 Securities Purchase Agreement

On July 19, 2018, the Company closed a Securities Purchase Agreement (the “2018 SPA”) with several accredited investors (the “Purchasers”) for a private placement (the “Initial Private Placement”) of (i) 140,000 shares of Series A Preferred Stock, (ii) approximately 2.9 million shares of Common Stock, and (iii) convertible secured promissory notes (the “Convertible Notes”), with no principal amount outstanding at issuance that solely collateralize amounts, if any, that may become payable by the Company pursuant to certain redemption provisions of the Series A Preferred Stock.

Pursuant to the 2018 SPA, the Purchasers acquired an aggregate of 140,000 shares of Series A Preferred Stock, 2.9 million shares of Common Stock, and Convertible Notes with no principal amount outstanding as of the issuance date, for an aggregate purchase price equal to \$133.0 million in cash (after taking into account a discount of \$7.0 million, but before the incremental and direct transaction costs associated with the Private Placement of \$4.6 million). The allocation of the net proceeds as of the Closing Date, along with changes in the net carrying value of the Series A Preferred Stock through December 31, 2019 are set forth below (dollars in thousands):

	Series A Preferred Stock		Common	Convertible	Total
	Shares	Amount	Stock	Notes	
Fair value on July 19, 2018:					
Series A Preferred Stock	140,000	\$ 126,763 ⁽¹⁾	\$ —	\$ —	\$ 126,763
Common Stock	—	—	20,131 ⁽²⁾	—	20,131
Convertible Notes	—	—	—	—	—
Total	<u>140,000</u>	<u>\$ 126,763</u>	<u>\$ 20,131</u>	<u>\$ —</u>	<u>\$ 146,894</u>
Relative fair value allocation on July 19, 2018:					
Aggregate cash proceeds on July 19, 2018	140,000	\$ 114,773 ⁽³⁾	\$ 18,227 ⁽³⁾	\$ —	\$ 133,000
Incremental and direct costs	—	(3,994) ⁽⁴⁾	(634) ⁽⁴⁾	—	(4,628)
Net carrying value on July 19, 2018	<u>140,000</u>	<u>\$ 110,779</u>	<u>\$ 17,593</u>	<u>\$ —</u>	<u>\$ 128,372</u>

1. The liquidation preference for each share of Series A Preferred Stock on the closing date for the Initial Private Placement was \$1,000 per for an aggregate liquidation preference of \$140.0 million. The estimated fair value of the Series A Preferred Stock was approximately \$126.8 million on July 19, 2018, which is the basis for allocation of the net proceeds. Please refer to Note 13 for further discussion of the valuation methodology employed.
2. The fair value of the issuance of approximately 2.9 million shares of the Common Stock was based on the last closing price of \$6.95 per share on the date prior to closing the transaction.
3. The aggregate cash proceeds of \$133.0 million on July 19, 2018 were allocated pro rata based on the fair value of all consideration issued.
4. Incremental and direct costs of the Initial Private Placement were allocated pro rata based on the fair value of all consideration issued. Such costs include financial advisory and professional fees of \$2.7 million that were incurred by the Company, and due diligence and professional fees incurred by the investors of \$1.9 million.

At the closing, the Company used the \$133.0 million of proceeds from the Initial Private Placement plus cash and cash equivalents of \$2.7 million to (i) repay all outstanding indebtedness and various operating and financing fees and expenses under the former Credit Facility in the aggregate amount of \$132.8 million, (ii) pay incremental and direct transaction costs of \$2.7 million, and (iii) pay a professional services retainer of \$0.2 million.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In connection with the completion of the Initial Private Placement, the Company, among other customary closing actions, (i) filed a Certificate of Designations with the State of Delaware setting forth the rights, preferences, privileges, qualifications, restrictions and limitations on the Series A Preferred Stock, (ii) entered into a Registration Rights Agreement with the Purchasers setting forth certain registration rights of capital stock held by the Purchasers (the "Registration Rights Agreement"), (iii) delivered a Convertible Note to each Purchaser, and (iv) entered into a Security Agreement (the "Security Agreement") in respect of the Company's assets collateralizing the amounts that may become payable pursuant to the Convertible Notes if certain redemption provisions of the Series A Preferred Stock are triggered in the future.

March 2019 Securities Purchase Agreement

On March 7, 2019, the Company entered into a securities purchase agreement (the "March 2019 SPA") with an accredited investor for a private placement (the "March 2019 Private Placement") of (i) 6,500 shares of Series A Preferred Stock, (ii) 134,483 shares of Common Stock, and (iii) a Convertible Note (as defined below) with no principal balance outstanding. The shares of Series A Preferred Stock were authorized pursuant to the Certificate of Designations and are subject to the provisions set forth in an amended Security Agreement, a Convertible Note and a registration rights agreement that is substantially similar in all material respects to the Registration Rights Agreement entered into in connection with the 2018 Securities Purchase Agreement discussed below. The accredited investor in the March 2019 Private Placement is affiliated with one of the accredited investors in the Initial Private Placement.

The aggregate cash proceeds from the March 2019 Private Placement were \$5.8 million in cash (after an 11.0% discount or \$0.7 million). The net proceeds were approximately \$5.0 million after estimated transaction costs payable by the Company of \$0.8 million. The transaction costs consisted of 85,000 shares of Common Stock issued to the existing holders of the Series A Preferred Stock for their consent at a cost of approximately \$0.5 million and direct transaction costs of approximately \$0.3 million related to due diligence and professional fees. The net proceeds were allocated based on their relative fair values at issuance of the Series A Preferred Stock and the Common Stock. The allocation of the net proceeds from the March 2019 Private Placement are set forth below (dollars in thousands):

	Series A Preferred Stock		Common	Convertible	
	Shares	Amount	Stock	Notes	Total
Fair value on March 7, 2019:					
Series A Preferred Stock	6,500	\$ 5,313 ⁽¹⁾	\$ —	\$ —	\$ 5,313
Common Stock	—	—	722 ⁽²⁾	—	722
Convertible Notes	—	—	—	—	—
Total	<u>6,500</u>	<u>\$ 5,313</u>	<u>\$ 722</u>	<u>\$ —</u>	<u>\$ 6,035</u>
Relative fair value allocation on March 7, 2019:					
Aggregate cash proceeds on March 7, 2019	6,500	\$ 5,093 ⁽³⁾	\$ 692 ⁽³⁾	\$ —	\$ 5,785
Incremental and direct costs	—	(661) ⁽⁴⁾	(90) ⁽⁴⁾	—	(751)
Net carrying value on March 7, 2019	<u>6,500</u>	<u>\$ 4,432</u>	<u>\$ 602</u>	<u>\$ —</u>	<u>\$ 5,034</u>

1. The liquidation preference for each share of Series A Preferred Stock on the closing date for the March 2019 Private Placement was \$1,000 per share for an aggregate liquidation preference of \$6.5 million. The estimated fair value of the Series A Preferred Stock was approximately \$5.3 million on March 7, 2019, which is the basis for allocation of the net proceeds. Please refer to Note 13 for further discussion of the valuation methodology employed.
2. The fair value of the issuance of approximately 134,483 shares of the Common Stock was based on the closing price of \$5.37 per share on the date prior to closing of the transaction.
3. The aggregate cash proceeds of \$5.8 million on March 7, 2019 were allocated pro rata based on the fair value of all consideration issued.
4. Incremental and direct costs related to the March 2019 Private Placement were allocated pro rata based on the fair value of all consideration issued. Such costs included the issuance of 85,000 shares of Common Stock to the Initial Private Placement investors in the Series A Preferred Stock for their consent of approximately \$0.5 million and financial advisory and professional fees that were incurred of approximately \$0.3 million that were either paid or accrued directly by the Company as of March 31, 2019.

June 2019 Securities Purchase Agreement

On June 20, 2019, the Company entered into a securities purchase agreement (the "June 2019 SPA") with accredited investors for a private placement (the "June 2019 Private Placement") of (i) 3,500 shares of Series A Preferred Stock, (ii) 72,414 shares

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

of Common Stock, and (iii) a Convertible Note (as defined below) with no principal balance outstanding. The shares of the Series A Preferred Stock were authorized pursuant to the Certificate of Designations (as defined below) and are subject to the provisions set forth in an amended Security Agreement (as defined below), a Convertible Note and a registration rights agreement that is substantially similar in all material respects to the Registration Rights Agreement (as defined below) entered into connection with the 2018 Securities Purchase Agreement discussed below. The accredited investors in the June 2019 Private Placement are not affiliated with the accredited investors in the March 2019 Private Placement or the Initial Private Placement.

The aggregate cash proceeds from the June 2019 Private Placement were \$3.3 million in cash (after a 5.0% discount or \$0.2 million). The net proceeds were approximately \$3.0 million after estimated transaction costs payable by the Company of \$0.3 million. The transaction costs consisted of 35,000 shares of Common Stock issued to the existing holders of the Series A Preferred Stock for their consent at a cost of approximately \$0.2 million and direct transaction costs of approximately \$0.2 million related to professional fees of the investors, existing holders of Series A Preferred Stock and the Company. The net proceeds were allocated based on their relative fair values at issuance of the Series A Preferred Stock and the Common Stock. The allocation of the net proceeds from the June 2019 Private Placement are set forth below (dollars in thousands):

	Series A Preferred Stock		Common	Convertible	Total
	Shares	Amount	Stock	Notes	
Fair value on June 20, 2019:					
Series A Preferred Stock	3,500	\$ 2,997 ⁽¹⁾	\$ —	\$ —	\$ 2,997

Incremental and direct costs	—	(301) ⁽⁴⁾	(38) ⁽⁴⁾	—	(339)
Net carrying value on June 20, 2019	<u>3,500</u>	<u>\$ 2,653</u>	<u>\$ 333</u>	<u>\$ —</u>	<u>\$ 2,986</u>

1. The liquidation preference for each share of Series A Preferred Stock on the closing date for the June 2019 Private Placement was \$1,000 per share for an aggregate liquidation preference of \$3.5 million. The estimated fair value of the Series A Preferred Stock was approximately \$3.0 million on June 20, 2019, which is the basis for allocation of the net proceeds. Please refer to Note 13 for further discussion of the valuation methodology employed.
2. The fair value of the issuance of approximately 72,414 shares of the Common Stock was based on the closing price of \$5.19 per share on the date prior to closing of the transaction.
3. The aggregate cash proceeds of \$3.3 million on June 20, 2019 were allocated pro rata based on the fair value of all consideration issued.
4. Incremental and direct costs related to the June 2019 Private Placement were allocated pro rata based on the fair value of all consideration issued. Such costs included the issuance of 35,000 shares of Common Stock to the Initial Private Placement investors in the Series A Preferred Stock for their consent of approximately \$0.2 million and financial advisory and professional fees that were incurred of approximately \$0.2 million that were either paid or accrued directly by the Company as of June 30, 2019.

On July 20, 2021, the Company redeemed the remaining 87,802 shares of its 13.00% Series A Preferred Stock at an aggregate total redemption price of \$88.4 million. The total price consisted of \$87.8 million related to the outstanding shares of Series A Preferred Stock with a face value of \$1,000 per share and \$0.6 million or \$6.86 per share of Series A Preferred Stock related to the dividends earned for the period from July 1, 2021 through July 19, 2021. The redeemed shares of the Series A Preferred Stock, along with the dividends, were recorded on the redemption date of July 20, 2021.

The Company funded the July 20, 2021 redemption with borrowings under the Credit Facility. See Note 5 for further information regarding the Company's Credit Facility.

On April 16, 2021, the Company redeemed 60,000 shares of its 13.00% Series A Preferred Stock at an aggregate total redemption price of \$62.3 million. The total price consisted of \$60.0 million related to the face value of \$1,000 per share of Series A Preferred Stock and \$2.3 million or \$39.05 per share of Series A Preferred Stock related to the dividends to be earned for the period from April 1, 2021 through July 18, 2021. The redeemed shares of Series A Preferred Stock, along with the dividends were recorded when the Series A Preferred Stock became mandatorily redeemable on April 16, 2021.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company funded the April 16, 2021 redemption with a portion of the proceeds from the March 2021 Offering and the August 2020 Offering, which raised aggregate net proceeds of approximately \$80.7 million.

On January 5, 2021, the Company entered into an agreement with certain of the holders of its Series A Preferred Stock (the “January 2021 Stock Repurchase Agreement”) to repurchase 10,000 shares of Series A Preferred Stock and the associated obligations pursuant to the Company’s Convertible Secured Promissory Notes outstanding in respect thereof (the “Note Obligations”) for an aggregate purchase price of approximately \$8.95 million representing a discount to the face value of such shares of Series A Preferred Stock and no make-whole payments were required.

On October 30, 2020, the Company entered into the Stock Repurchase Agreement with certain of the holders of its Series A Preferred Stock to repurchase 5,000 shares of Series A Preferred Stock and the associated Note Obligations for an aggregate purchase price of approximately \$4.5 million representing a discount to the face value of such shares of Series A Preferred Stock and no make-whole payments were required.

Upon the closing of the transactions contemplated by the January 2021 Stock Repurchase Agreement, the shares of Series A Preferred Stock purchased by the Company were retired (and the underlying Note Obligations cancelled) and are not eligible for re-issuance by the Company in accordance with the terms of the CoD.

The changes in the net carrying value of Series A Preferred Stock from December 31, 2020 to December 31, 2021, are set forth below (dollars in thousands):

	Series A Preferred Stock	
	Shares	Amount
Net carrying value as of December 31, 2020	154,911	\$ 137,854

NOTE 7 — CAPITAL STRUCTURE

Preferred Stock

Upon completion of the Delaware Domestication discussed in Note 1, the Company is authorized to issue 100,000,000 preferred shares with a par value of \$0.0001 per share in one or more series. The Company's board of directors is authorized to establish the voting rights, if any, designations, powers, preferences, special rights, and any qualifications, limitations and restrictions thereof, applicable to the shares of each series. The Board of Directors had authorized the issuance of up to 180,000 shares of Series A Preferred Stock. As of December 31, 2021, all shares of the Series A Preferred Stock had been redeemed. The specific terms of the Series A Preferred Stock are discussed in Note 6.

Common Stock

As of December 31, 2022 and 2021, the Company is authorized to issue up to 1,000,000,000 shares of Common Stock, with a par value of \$0.0001 per share. Holders of the Company's shares of Common Stock are entitled to one vote for each share.

On March 11, 2021, the Company completed the March 2021 Offering of 7.8 million shares of its Common Stock at a price of \$7.75 per share for total gross proceeds of \$57.0 million. Underwriter discounts and commissions were \$2.9 million and the underwriter expenses were \$0.2 million. The Company also incurred additional professional fees and expenses of \$1.3 million as part of the transaction, resulting in net proceeds from the March 2021 Offering of approximately \$55.6 million. The Company used the net proceeds from the March 2021 Offering to redeem 60,000 shares of Series A Preferred Stock in April 2021.

Common Stock Retired

On May 28, 2022, the Board of Directors authorized an increase to the Company's previously announced Common Stock repurchase program to increase the value of the shares that could be acquired by the Company from up to \$15.0 million over two years to up to \$50.0 million over the next four years, subject to compliance with the Company's Credit Facility, provided that all other applicable conditions and legal requirements are satisfied.

On February 27, 2022, the Board of Directors approved the adoption of a stock repurchase program to acquire up to \$15.0 million of the Company's Common Stock both on the open market and in privately negotiated transactions, including through Rule 10b5-1 plans, through March 4, 2024, subject to compliance with the Company's Credit Facility, which was

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

amended effective January 14, 2022 to increase the aggregate value of the shares of Common Stock that could be acquired by the Company to no greater than \$15.0 million during the term of the Credit Facility, provided that all other applicable conditions and legal requirements are satisfied.

For the year ended December 31, 2022, the Company acquired an aggregate 0.9 million shares of Common Stock on the open market at a total cost of \$4.7 million. Upon completion of all repurchase transactions, the associated shares of Common Stock were retired.

Acquisition of Common Stock upon Vesting of Restricted Stock Units

On August 6, 2021, the Company reacquired 0.1 million shares of common stock for \$1.1 million related to restricted stock units ("RSUs") that vested on that date.

NOTE 8 — STOCK-BASED COMPENSATION AND WARRANTS

Overview of Equity Incentive Plans

The Company's 2007 Stock Plan (the "2007 Plan") reserved up to approximately 14.3 million shares of Common Stock for the grant of stock options and stock purchase rights to employees and directors. The 2007 Plan was terminated in November 2013; however, the terms of the 2007 Plan continue to govern any outstanding awards thereunder. As of December 31, 2022, stock options for approximately 0.4 million shares are outstanding under the 2007 Plan, all of which are vested.

In October 2013, the Company established the 2013 Equity Incentive Plan, as amended and restated in July 2017 (the "2013 Plan") that provides for grants of stock options, stock appreciation rights, restricted stock, restricted stock units ("RSU's"), performance units and performance shares. As of December 31, 2022, options for approximately 6.6 million shares are outstanding and RSU's for approximately 2.0 million shares outstanding under the 2013 Plan. There are approximately 7.5 million shares available for future grants. Through December 31, 2022, grants under the 2013 Plan consist of stock options and RSU's. The 2013 Plan will expire on July 31, 2027.

The 2007 Plan and the 2013 Plan (collectively referred to as the "Stock Plans") provide for stock options to be granted to employees and directors at an exercise price not less than 100% of the fair value at the grant date. The options granted generally have a maximum term of 10 years from grant date and are exercisable upon vesting. Option granted to employees generally vest as to one-third of the shares subject to the award on each anniversary of the designated vesting commencement date, which may precede the grant date of such award. Options granted to directors generally vest for all of the shares one year after the grant date.

On the first day of each fiscal year beginning in 2018, the 2013 Plan provides that the number of authorized shares available for issuance will increase in an amount equal to the lesser of (i) 4.8 million shares, (ii) 4% of the outstanding shares of all classes of the Company's Common Stock as of the last day of the immediately preceding fiscal year; or (iii) such other amount as the Company's Board of Directors may determine. The Board of Directors approved an increase in the authorized shares for 3.5 million shares on February 23, 2023.

Stock Options

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table sets forth the summary of stock option activity under the Company's Stock Plans for the years ended December 31, 2022, 2021 and 2020, (shares in thousands):

	2022			2021			2020		
	Shares	Price (1)	Term (2)	Shares	Price (1)	Term (2)	Shares	Price (1)	Term (2)
Outstanding, beginning of year	6,824	\$ 5.92		7,007	\$ 5.24		8,677	\$ 4.55

(1) Represents the weighted average exercise price.

(2) Represents the weighted average remaining contractual term until the stock options expire.

(3) As of December 31, 2022, 2021 and 2020, the aggregate intrinsic value of stock options outstanding was \$0.2 million, \$5.9 million, and \$3.8 million, respectively. As of December 31, 2022, 2021 and 2020, the aggregate intrinsic value of vested stock options was \$0.2 million, \$5.1 million and \$3.6 million, respectively.

(4) The number of outstanding stock options that are not expected to ultimately vest due to forfeiture amounted to 0.3 million shares as of December 31, 2022.

The following table presents the total number of shares available for grant under the 2013 Plan for the years ended December 31, 2022, 2021 and 2020 (in thousands):

	2022	2021	2020
Available, beginning of year	4,324	4,037	2,885
Stock options granted	(1,352)	(1,759)	(600)
RSU's granted	(893)	(2,105)	(1,846)
Expired options under 2007 Plan	194	208	191
Forfeited options under Stock Plans	434	249	390
Forfeited RSUs under Stock Plans	559	501	317
Shares issued	(60)	—	—
Shares repurchased	853	137	—
Newly authorized by Board of Directors	3,484	3,056	2,700
Available, end of year	<u>7,543</u>	<u>4,324</u>	<u>4,037</u>

Fair Value of Stock Options

The fair value of each stock option grant under the Stock Plans was estimated on the date of grant using the BSM option-pricing model, with the following weighted-average assumptions for the years ended December 31, 2022, 2021 and 2020:

	2022	2021	2020
Expected life (in years)	6.0	6.0	6.0
Volatility	46 %	44 %	40 %
Dividend yield	— %	— %	— %
Risk-free interest rate	2.7 %	1.1 %	0.5 %

The BSM model requires various highly subjective assumptions that represent management's best estimates of the fair value of the Company's Common Stock, volatility, risk-free interest rates, expected term, and dividend yield. The Common Stock option value is based on the Company's closing market price on the date of grant.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The expected term represents the weighted-average period that options granted are expected to be outstanding giving consideration to vesting schedules. Since the Company does not have an extended history of actual exercises, the Company has estimated the expected term using a simplified method which calculates the expected term as the average of the time-to-vesting and the contractual life of the awards. The Company has never declared or paid cash dividends and does not plan to pay cash dividends in the foreseeable future; therefore, the Company used an expected dividend yield of zero. The risk-free interest rate is based on U.S. Treasury rates in effect during the expected term of the grant. The expected volatility is based on historical volatility of publicly-traded peer companies.

The intrinsic value of the vested employee options exercised during the years ended December 31, 2022, 2021, and 2020 was \$1.9 million, \$6.6 million and \$6.1 million, respectively. The weighted-average grant date fair value per share of employee options granted for the years ended December 31, 2022, 2021 and 2020 was \$2.64, \$3.05 and \$1.65, respectively.

As of December 31, 2022, 2021 and 2020, total unrecognized compensation cost related to unvested stock options was \$4.1 million, \$3.9 million and \$1.2 million, respectively. The remaining unrecognized costs are expected to be recognized on a straight-line basis over a weighted-average period of approximately 1.95 years.

Restricted Stock Units

For the year ended December 31, 2022, the Board of Directors granted RSU's under the 2013 Plan for an aggregate of approximately 0.9 million shares of Common Stock to non-employee members of the Board of Directors, officers and employees of the Company. These RSU's vest over periods ranging from 12 to 36 months from the respective grant dates and the awards are subject to forfeiture upon termination of employment or service on the Board of Directors. Based on the weighted average fair market value of the Common Stock of \$5.05 per share on the date of grant, the aggregate fair value for the shares underlying the RSU's amounted to \$4.5 million as of the grant date that is being recognized as compensation cost over the vesting period. Accordingly, compensation expense of \$8.2 million was recognized for the year ended December 31, 2022. The unrecognized portion of \$7.9 million is expected to be charged to expense on a straight-line basis as the RSU's vest over a weighted-average period of approximately 1.62 years.

Stock-Based Compensation Expense

The aggregate stock-based compensation expense for stock options and RSU's for the years ended December 31, 2022, 2021 and 2020 is classified as follows (in thousands):

	2022	2021	2020
Cost of revenues	\$ 2,052	\$ 1,474	\$ 1,174
Sales and marketing	3,146	3,018	2,450
General and administrative	5,697	5,218	3,837
Total	<u>\$ 10,895</u>	<u>\$ 9,710</u>	<u>\$ 7,461</u>

Employee Stock Purchase Plan

At the Annual Meeting of Stockholders held on June 7, 2018, the Company's stockholders approved the Rimini Street, Inc. 2018 Employee Stock Purchase Plan (the "ESPP"). The ESPP provides for the purchase by employees of up to an aggregate of 5.0 million shares of Common Stock. The purchase price per share at which shares are sold in an offering period under the ESPP will be equal to the lesser of 85% of the fair market value of the shares (i) on the first trading day of the offering period, or (ii) on the purchase date (i.e., the last trading day of the offering period). Offering periods will consist of two six-month periods generally commencing twice each calendar year. The purpose of the ESPP is to provide an opportunity for eligible employees of the Company to purchase shares of the Company at a discount through voluntary contributions from such employees' eligible pay, thereby attracting, retaining and rewarding such persons and strengthening the mutuality of interest between such employees and the Company's stockholders. Through December 31, 2022, no offering period under the ESPP had commenced and no shares of Common Stock have been issued under the ESPP.

Outstanding Warrants

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On April 12, 2021, the SEC issued a Staff Statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies (the “SEC Staff Statement”). Upon review of the SEC Staff Statement which addressed certain accounting and reporting considerations related to warrants similar to the Company’s GP Sponsor Private Placement Warrants and upon review of ASC 815-40, Contracts in Entity’s Own Equity, the Company determined that its GP Sponsor Private Placement Warrants should have been classified as a liability instead of equity. On October 29, 2021, the GP Sponsor sold the warrants for \$1.04 per warrant to outside holders. As a result of the sale, the new holders of the Private Placement Warrants had the same rights as that of the Public Warrant holders. Therefore as of October 29, 2021, the Company reclassified the liability for redeemable warrants to additional paid-in capital for \$6.3 million. See Note 13 for information regarding the fair value of the GP Sponsor Private Placement Warrants as of October 29, 2021.

As of December 31, 2022, warrants were outstanding for an aggregate of 3.4 million shares of Common Stock and were exercisable at \$5.64 per share. On October 10, 2022, the Public Warrants and the Private Placement Warrants expired. These warrants aggregated to 14.7 million shares of Common Stock at an exercise price of \$11.50 per share.

As of December 31, 2021, warrants were outstanding for an aggregate of 18.1 million shares of Common Stock, including 3.4 million shares of Common Stock exercisable at \$5.64 per share, and an aggregate of 14.7 million shares of Common Stock exercisable at \$11.50 per share.

The Company’s remaining outstanding warrants are currently exercisable. The exercise price and number of shares issuable upon exercise of the warrants may be adjusted in certain circumstances including in the event of a stock dividend, recapitalization, reorganization, merger or consolidation. A summary of the terms of outstanding warrants and the number of shares of RMNI Common Stock issuable upon exercise, is presented below as of December 31, 2022 and 2021 (in thousands, except per share amounts):

Description	Issuance Date	Expiration Date	Exercise Price	Number of Shares	
				2022	2021
Origination Agent Warrant	October 2017	June 2026 ⁽¹⁾	\$ 5.64	3,440	3,440 ⁽²⁾
GPIA Public Warrants	May 2015	October 2022	11.50	—	8,625 ⁽³⁾
GP Sponsor Private Placement Warrants	May 2015	October 2022	11.50	—	6,063 ⁽⁴⁾
Total				3,440	18,128

⁽¹⁾ The expiration date for the Origination Agent Warrant is the earlier to occur of the stated expiration date or the date when the Company experiences a change of control.

⁽²⁾ The Origination Agent Warrant was issued upon consummation of the Mergers discussed in Note 4 and resulted in the elimination of the redemption features associated with two warrants issued in 2016 as discussed below under / RSI Redeemable Warrants.

⁽³⁾ On May 26, 2015, GPIA completed an initial public offering that included warrants for 8.6 million shares of Common Stock (the “Public Warrants”). Each Public Warrant entitled the holder to the right to purchase one share of Common Stock at an exercise price of \$11.50 per share. These warrants expired unexercised on October 10, 2022.

⁽⁴⁾ Simultaneously with GPIA’s initial public offering in May 2015, GP Sponsor purchased an aggregate of 6.1 million warrants at a purchase price of \$1.00 per warrant in a private placement (the “Private Placement Warrants”). The Private Placement Warrants could not be redeemed by the Company so long as the Private Placement Warrants were held by the initial purchasers, or such purchasers’ permitted transferees. If the Private Placement Warrants were held by someone other than the initial purchasers or such purchasers’ permitted transferees, the Private Placement Warrants were redeemable by the Company and exercisable by such holders on the same basis as the Public Warrants. On October 29, 2021, GP Sponsor sold the warrants for \$1.04 per warrant to outside holders. As a result of the sale, the new holders of the GP Sponsor Private Placement Warrants had the same rights as that of the GPIA Public Warrant holders. These warrants expired unexercised on October 10, 2022.

NOTE 9 — INCOME TAXES

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On March 27, 2020, the Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”) was passed into law, amending portions of relevant US tax laws. The CARES Act contains changes to corporate taxation, including among other things, adjusting net operating loss (NOL) limitations and carryback rules, refundable AMT credits, bonus depreciation and interest expense limitations. The CARES Act also provides for an Employee Retention Credit, a fully refundable payroll tax credit for certain eligible employers and the ability for all eligible employers to defer payment of the employer share of payroll taxes owed on wages paid for the period ending December 31, 2020. The Company had elected to defer payroll tax payments which totaled \$3.2 million. We paid \$1.6 million in December 2022 and 2021, respectively, as required under the CARES Act. There is no remaining amount required to be paid as of December 31, 2022.

For the years ended December 31, 2022, 2021 and 2020, income before income tax expense was as follows (in thousands):

	2022	2021	2020
Domestic	\$ (9,012)	\$ 8,255	\$ 7,123
International	12,817	11,180	9,032
	<u>\$ 3,805</u>	<u>\$ 19,435</u>	<u>\$ 16,155</u>

For the years ended December 31, 2022, 2021 and 2020, the reconciliation between the income tax benefit computed by applying the statutory U.S. federal income tax rate to the pre-tax income before income taxes and total income tax expense recognized in the financial statements was as follows (in thousands):

	2022	2021	2020
Income tax (expense) benefit at statutory U.S. federal rate	\$ (799)	\$ (4,082)	\$ (3,685)
Income tax expense attributable to U.S. states, net	53	(2,005)	(639)
Permanent differences:			
Non-deductible expenses	(206)	(1,178)	(107)
Stock-based compensation	(796)	1,021	324
Other	600	507	274
Global intangible low taxed income	(206)	(65)	(226)
Foreign rate differential and foreign tax credits	(868)	(596)	(400)
Foreign withholding taxes	(3,495)	(2,910)	(1,686)
Other	(650)	(600)	(515)
Decrease in valuation allowance	82	65,692	2,091
Total income taxes	<u>\$ (6,285)</u>	<u>\$ 55,784</u>	<u>\$ (4,569)</u>

For tax years beginning after January 1, 2018, Global Intangible Low Tax Income (GILTI) requires companies to report income from its foreign subsidiaries that exceeds 10% of the calculated deemed tangible return on its fixed assets. The Company determined the tax effect (before valuation allowance) of the GILTI income inclusion for the year ended December 31, 2022 was \$1.0 million.

For the years ended December 31, 2022, 2021 and 2020, income tax expense consisted of the following (in thousands):

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

	2022	2021	2020
Current income tax expense:			
Federal	\$ —	\$ —	\$ —
State	(273)	(264)	(321)
Foreign	(8,083)	(6,270)	(4,762)
Total current income tax expense	(8,356)	(6,534)	(5,083)
Deferred income tax benefit:			
Federal	1,336	51,542	—
State	155	10,732	—
Foreign	580	44	514
Total deferred income tax benefit	2,071	62,318	514
Total income taxes	<u>\$ (6,285)</u>	<u>\$ 55,784</u>	<u>\$ (4,569)</u>

As of December 31, 2022 and 2021, the tax effects of temporary differences that give rise to significant portions of the deferred tax assets and liabilities were as follows (in thousands):

	2022	2021
Deferred income tax assets:		
Net operating loss carryforwards	\$ 37,752	\$ 37,132
Deferred revenue	5,525	2,875
Accounts payable and accrued expenses	12,659	16,361
Stock-based compensation	1,565	1,735
Operating lease liabilities	2,181	2,815
Tax credit carryforwards	321	404
Other	2,158	128
Foreign deferred assets	2,097	1,759
Business interest carryforwards	16,298	15,504
Gross deferred income tax assets	80,556	78,713
Valuation allowance for deferred income tax assets	(316)	(399)
Net deferred income tax assets	80,240	78,314
Deferred income tax liabilities:		
Deferred contract costs	(9,940)	(8,890)
Operating lease right-of-use assets	(628)	(1,866)
Other	(4,157)	(3,525)
Deferred tax assets, net	<u>\$ 65,515</u>	<u>\$ 64,033</u>

Net deferred tax assets consist of U.S. and foreign net deferred tax assets which are expected to be realized in the future, and that are included in long-term assets in the accompanying consolidated balance sheets. For the years ended December 31, 2022 and 2021, the net decrease in the valuation allowance was \$0.1 million and \$65.7 million, respectively. The valuation allowance decreased in 2021 as the Company determined that it was more likely than not that it could benefit from its deferred tax assets based on all of the available evidence. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. In prior years, the domestic net deferred tax assets had been fully offset by a valuation allowance because of the Company's lack of domestic earnings history.

As of December 31, 2022, the Company has federal net operating tax loss carryforwards of approximately \$141.2 million and varying amounts of U.S. state net operating loss carryforwards, totaling \$131.9 million, that begin to expire in 2035 and 2023,

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

respectively. As of December 31, 2022, the Company has federal foreign tax credits carryforwards of \$0.3 million expiring beginning in 2023.

Federal and state laws impose substantial restrictions on the utilization of net operating loss and tax credit carryforwards in the event of an ownership change for tax purposes, as defined in Section 382 of the Internal Revenue Code. Depending on the significance of past and future ownership changes, the Company's ability to realize the potential future benefit of tax losses and tax credits that existed at the time of the ownership change may be significantly reduced. Through December 31, 2022, the Company has not experienced an ownership change, as defined in Section 382.

The Company considers any undistributed foreign subsidiaries' earnings to be indefinitely reinvested and, accordingly, no related provision for U.S. federal or state income taxes has been provided. Upon distribution of the foreign earnings in the form of dividends or otherwise, the company could be subject to both U.S. income taxes subject to an adjustment for foreign tax credits and withholding taxes in the various countries. As of December 31, 2022, the cumulative amount of unremitted earnings of the Company's foreign subsidiaries was approximately \$39.8 million. The unrecognized deferred tax liability for these earnings was approximately \$3.1 million, consisting primarily of foreign withholding taxes.

The Company files income tax returns in the U.S. federal jurisdiction, the State of California and various other state and foreign jurisdictions. The Company's federal and state tax years for 2010 and forward are subject to examination by taxing authorities, due to unutilized net operating losses. All foreign jurisdictions tax years are also subject to examination. The Company does not have any unrecognized tax benefits to date.

NOTE 10 — COMMITMENTS AND CONTINGENCIES

Retirement Plan

The Company has defined contribution plans for both its U.S. and foreign employees. For certain of these plans, employees may contribute up to the statutory maximum, which is set by law each year. The plans also provide for employer contributions. The Company's matching contribution to these plans totaled \$3.5 million, \$3.2 million and \$2.7 million for the years ended December 31, 2022, 2021 and 2020, respectively.

Rimini I Litigation

In January 2010, certain subsidiaries of Oracle Corporation (together with its subsidiaries individually and collectively, "Oracle") filed a lawsuit, *Oracle USA, Inc. et al. v. Rimini Street, Inc. et al.* (United States District Court for the District of Nevada) (the "District Court") ("Rimini I"), against the Company and its Chief Executive Officer and President, Seth Ravin, alleging that certain of the Company's processes (Process 1.0) violated Oracle's license agreements with its customers and that the Company committed acts of copyright infringement and violated other federal and state laws. The litigation involved the Company's business processes and the manner in which the Company provided services to its clients.

After completion of a jury trial in 2015 and subsequent appeals, the final outcome of Rimini I was that Mr. Ravin was found not liable for any claims and the Company was found liable for only one claim: "innocent infringement," a jury finding that the Company did not know and had no reason to know that its former support processes were infringing. The jury also found that the infringement did not cause Oracle to suffer lost profits. The Company was ordered to pay a judgment of \$124.4 million in 2016, which the Company promptly paid and then pursued appeals. With interest, attorneys' fees and costs, the total judgment paid by the Company to Oracle after the completion of all appeals was approximately \$89.9 million. A portion of such judgment was paid by the Company's insurance carriers.

Injunction Proceedings

Since November 2018, the Company has been subject to a permanent injunction ("Injunction") prohibiting it from using certain support processes that had been found in Rimini I to "innocently" infringe certain Oracle copyrights. The Injunction does not prohibit the Company's provision of support services for any Oracle product lines, but rather defines the manner in which the Company can provide support services for certain Oracle product lines.

On July 10, 2020, Oracle filed a motion to show cause contending that the Company was in violation of the Injunction, and the Company opposed this motion, disputing Oracle's claims. On January 12, 2022, the District Court issued its findings and order

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

following an evidentiary hearing held in September 2021 regarding whether the Company (i) violated the Injunction for certain accused conduct and (ii) should be held in contempt in those instances where the District Court found a violation of the Injunction, and what sanctions, if any, are appropriate.

In the order, the District Court ruled in favor of the Company with respect to five of the items. With respect to the other five items, the District Court found the Company violated the Injunction, awarded sanctions to Oracle of \$0.6 million and ordered that certain computer files be quarantined from use and notice and proof of such quarantining be provided to Oracle. The District Court also ruled that Oracle may recover its reasonable attorneys' fees and costs. The Company reserves all rights, including appellate rights, with respect to the District Court rulings and findings.

On February 7, 2022, Rimini filed a notice of appeal in the District Court, commencing an appeal of the District Court's January 12, 2022 decision to the Ninth Circuit Court of Appeals ("Court of Appeals"). On February 8, 2022, the District Court stayed the briefing on Oracle's bill of attorneys' fees and costs until Rimini's appeal is resolved. Briefing on Rimini's appeal has been completed. Oral argument on the appeal was held in San Francisco on February 6, 2023, and the matter remains pending in front of the Court of Appeals. At this time, the Company believes that it is in substantial compliance with the Injunction and has complied with the order regarding the quarantining of certain computer files. As of December 31, 2022 and 2021, the Company had accrued \$6.9 million, respectively, as an estimate related to reasonable attorneys' fees and costs. During the year ended December 31, 2022, the Company paid \$0.6 million to Oracle for the sanctions award. Regarding the Company's estimate for reasonable attorneys' fees and costs, significant judgment is required to determine the amount of loss related to this matter as the outcome is inherently unpredictable and subject to uncertainties.

Rimini II Litigation

In October 2014, the Company filed a separate lawsuit, *Rimini Street Inc. v. Oracle Int'l Corp.*, in the District Court against Oracle seeking a declaratory judgment that the Company's revised "Process 2.0" support practices, in use since at least July 2014, do not infringe certain Oracle copyrights ("Rimini II"). The Company's operative complaint asserts declaratory judgment, tort, and statutory claims. Oracle's operative counterclaim asserts declaratory judgment and copyright infringement claims and Lanham Act, breach of contract, and business tort violations.

On September 15, 2020, the District Court issued an order resolving the parties' motions for summary judgment. It found infringement of 17 Oracle PeopleSoft copyrights for work the Company performed for a set of "gap customers" that were supported by processes litigated in Rimini I, and that became the Company's customers after Rimini I was filed. The District Court also found infringement of four Oracle PeopleSoft copyrights involving support of two specific Company clients, described by the District Court as "limited cases" and involving "limited circumstance[s]." There was no finding of infringement on any other Oracle copyrights at issue. The Court also reiterated that the Company has the legal right to provide aftermarket support for Oracle's enterprise software.

On September 3, 2021, the District Court granted Oracle's motion to realign the parties with Oracle now designated as plaintiff and the Company and Mr. Ravin now designated as the defendants in the case caption and at trial. The District Court also granted Oracle's motion to bifurcate the trial – originally providing for a jury trial on Oracle's monetary damages claims against the Company, followed by a separate bench trial on the parties' equitable claims for unfair competition and Oracle's claim for an accounting.

On April 14, 2022, the District Court judge who had previously presided over the case entered an order referring the case for reassignment, resulting in the case being reassigned to another District Court judge. During a status conference with the District Court on October 14, 2022, attorneys for Oracle confirmed that Oracle would withdraw all of its monetary damages claims against the Company in Rimini II and proceed with a bench trial instead of a jury trial for its claims for equitable relief.

As ordered by the District Court, on October 21, 2022, the parties filed a joint stipulation (the "Stipulation") to dismiss with prejudice the Rimini II claims affected by Oracle's decision, including all of Oracle's monetary damages claims against the Company and Mr. Ravin. On October 24, 2022, the District Court entered an order granting the Stipulation, dismissing with prejudice Oracle's claims in Rimini II "for monetary relief of any kind under any legal theory [,] including but not limited to claims for damages, restitution, unjust enrichment, and engorgement [. . .]." In addition, Oracle's claims for breach of contract, inducing breach of contract and an accounting were dismissed with prejudice. Per the Stipulation, the parties have each reserved the right to seek attorneys' fees and/or costs to the extent permissible by law. Prior to the date of the District Court's order granting the Stipulation, no damages of any kind were awarded by the District Court in Rimini II. Whether to award any attorneys' fees and/or costs will be a decision for the District Court.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Rimini II bench trial began in Las Vegas on November 29, 2022 and concluded on December 15, 2022. The parties submitted their proposed findings of fact and conclusions of law to the District Court on February 23, 2023, and the matter remains pending.

At this time, the Company does not have sufficient information regarding the possible recovery by Oracle of its attorneys' fees and/or costs in the Rimini II litigation. The Company maintains that Oracle should not be permitted to recover its attorneys' fees and/or costs. Both parties have sought injunctive relief in this matter, and the Company has reserved its rights to appeal regarding the possible recovery of damages by the Company in connection with the Company's claims against Oracle. As a result, an estimate of the range of loss, if any, cannot be reasonably determined. The Company also believes that an award of Oracle's attorneys' fees and/or costs is not probable, so no accrual has been made as of December 31, 2022. However, the ultimate outcome may be different from the Company's best estimates and could have a material adverse impact on the Company's financial results and business. The Company reserves all rights, including appellate rights, with respect to the District Court's rulings and findings in Rimini II.

Other Litigation

From time to time, the Company may be a party to litigation and subject to claims incident to the ordinary course of business. Although the results of litigation and claims cannot be predicted with certainty, the Company currently believes that the final outcome of these ordinary course matters will not have a material adverse effect on its business. Regardless of the outcome, litigation can have an adverse impact on the Company because of judgment, defense and settlement costs, diversion of management resources and other factors. At each reporting period, the Company evaluates whether or not a potential loss amount or a potential range of loss is probable and reasonably estimable under ASC 450, *Contingencies*. Legal fees are expensed as incurred.

Liquidated Damages

The Company enters into agreements with customers that contain provisions related to liquidated damages that would be triggered in the event that the Company is no longer able to provide services to these customers. The maximum cash payments related to these liquidated damages is approximately \$8.1 million and \$8.3 million as of December 31, 2022 and 2021, respectively. To date, the Company has not incurred any costs as a result of such provisions and has not accrued any liabilities related to such provisions in these consolidated financial statements.

NOTE 11 — RELATED PARTY TRANSACTIONS

In May 2017, RSI entered into an Agreement and Plan of Merger (the "Merger Agreement") with GP Investments Acquisition Corp. ("GPIA"), a publicly-held company formed for the purpose of effecting a business combination with one or more businesses. The Merger Agreement was approved by the respective shareholders of RSI and GPIA in October 2017 and closing occurred on October 10, 2017. Prior to the consummation of the mergers, the ultimate parent entity of GPIA was GP Investments, Ltd. ("GP Investments"), a global private equity firm and a former affiliate of the Company. An affiliate of GP Investments (Mr. Antonio Bonchristiano) was a member of our Board of Directors until May 5, 2021.

In addition, an affiliate of Adams Street Partners and its affiliates (collectively referred to as "ASP") is also a member of the Company's Board of Directors. As of December 31, 2022, ASP owned approximately 26.6% of the Company's issued and outstanding shares of Common Stock. In July 2018, ASP acquired 19,209 shares of Series A Preferred Stock and approximately 0.4 million shares of Common Stock issued in the Initial Private Placement for total consideration of approximately \$19.2 million, which shares of Series A Preferred Stock were all redeemed by the Company in 2021 on the same terms as the redemption applicable to other holders of Series A Preferred Stock.

NOTE 12 — EARNINGS (LOSS) PER SHARE

The following table sets forth the computation of basic and diluted net (loss) per share of Common Stock for the years ended December 31, 2022, 2021 and 2020 (in thousands, except per share amounts):

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

	2022	2021	2020
Net income (loss) attributable to common stockholders:			
Net income (loss)	\$ (2,480)	\$ 75,219	\$ 11,586
Return on repurchase of Series A Preferred Stock shares	—	(38)	(83)
Accretion related to redemption of Series A Preferred Stock	—	(13,693)	—
Make-whole dividends related to redemption of Series A Preferred Stock	—	(2,945)	—
Dividends and accretion related to Series A Preferred Stock:			
Cash dividends declared	—	(5,839)	(15,713)
PIK dividends declared	—	(1,752)	(4,738)
Accretion of discount	—	(2,277)	(6,275)
	(2,480)	48,675	(15,223)
Undistributed earnings using the two-class method	—	(3,478)	—
Net income (loss) attributable to common stockholders	<u>\$ (2,480)</u>	<u>\$ 45,197</u>	<u>\$ (15,223)</u>
	2022	2021	2020
Weighted average number of shares of Common Stock outstanding	87,672	84,318	71,231
Additional shares outstanding if Series A Preferred Stock is converted	—	6,489	15,729
Total shares outstanding if Series A Preferred Stock is converted to Common Stock	<u>87,672</u>	<u>90,807</u>	<u>86,960</u>
Percentage of shares allocable to Series A Preferred Stock	— %	7.1 %	18.1 %
Basic weighted average number of shares of Common Stock outstanding	87,672	84,318	71,231
Dilutive effect:			
Warrants	—	983	—
Stock options	—	1,899	—
Restricted stock units	—	1,770	—
Diluted weighted average number of shares of Common Stock outstanding	<u>87,672</u>	<u>88,970</u>	<u>71,231</u>
Net income (loss) per share attributable to Common Stock - basic	<u>\$ (0.03)</u>	<u>\$ 0.54</u>	<u>\$ (0.21)</u>
Net income (loss) per share attributable to Common Stock - diluted	<u>\$ (0.03)</u>	<u>\$ 0.51</u>	<u>\$ (0.21)</u>

For the years ended December 31, 2021 and 2020, the holders of Series A Preferred Stock were entitled to participate in Common Stock dividends, if and when declared, on a one-to-one per-share basis. For the year ended December 31, 2020, the Company incurred a net loss and, accordingly, there were no undistributed earnings to allocate under the two-class method.

As of December 31, 2022, 2021 and 2020, the following potential Common Stock equivalents were excluded from the computation of diluted net income (loss) per share since the impact of inclusion was anti-dilutive (in thousands):

	2022	2021	2020
Warrants	3,440	14,688	18,128
Series A Preferred Stock	—	—	15,491
Stock options	6,994	2,458	7,007
Restricted stock units	2,009	248	3,322
Total	<u>12,443</u>	<u>17,394</u>	<u>43,948</u>

NOTE 13 — FINANCIAL INSTRUMENTS AND SIGNIFICANT CONCENTRATIONS

Fair Value Measurements

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fair value is defined as the price that would be received upon sale of an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. When determining fair value, the Company considers the principal or most advantageous market in which it transacts and considers assumptions that market participants would use when pricing the asset or liability. The Company applies the following fair value hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair measurement:

Level 1—Quoted prices in active markets for identical assets or liabilities accessible to the reporting entity at the measurement date

Level 2—Other than quoted prices included in Level 1 that are observable for the asset and liability, either directly or indirectly through market collaboration, for substantially the full term of the asset or liability

Level 3—Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any market activity for the asset or liability at measurement date.

Investments

During September 2022, the Company invested \$20 million of its cash and cash equivalents into U.S. Federal agency bonds, U.S. government bonds, U.S. treasury notes and other securities. We consider all highly liquid interest-earning investments with a maturity of three months or less at the date of purchase to be cash equivalents. The fair values of these investments approximate their carrying values.

In general, investments with original maturities of greater than three months and remaining maturities of less than one year are classified as short-term investments. Debt investments are classified as available-for-sale and gains and losses are recorded using the specific identification method. Changes in fair value are recorded in the operating statement. Fair value is calculated based on publicly available market information.

Listed below are the cash equivalent and short-term investment balances as of December 31, 2022 (in thousands):

	Fair Value Level	Cost Basis	Unrealized Gains (Losses)	Recorded Basis	Cash Equivalents	Short-term Investments
Federal agency bonds	Level 2	\$ 15,893	\$ 67	\$ 15,960	\$ —	\$ 15,960
US government bonds	Level 2	494	5	499	—	499
US treasury notes	Level 2	3,625	31	3,656	—	3,656
Variable note	Level 2	52	—	52	52	—
Cash		—	—	—	—	—
		<u>\$ 20,064</u>	<u>\$ 103</u>	<u>\$ 20,167</u>	<u>\$ 52</u>	<u>\$ 20,115</u>

Derivatives

On May 18, 2022, the Company entered into an interest rate swap agreement for a notional value of \$40.0 million. The derivative was recognized in the accompanying Consolidated Balance Sheets at its estimated fair value as of December 31, 2022. The Company uses derivatives to manage the risk associated with changes in interest rates. The Company does not enter into derivatives for speculative purposes.

To estimate fair value for the Company's interest rate swap agreement as of December 31, 2022, the Company utilized a present value of future cash flows, leveraging a model-derived valuation that uses Level 2 observable inputs such as interest rate yield curves. The Company estimated the fair value of the interest rate swap agreement to be \$1.4 million as of December 31, 2022.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Changes in the fair value of the derivatives that qualify as cash flow hedges are recorded in Accumulated other comprehensive loss in the accompanying Consolidated Balance Sheets until earnings are affected by the variability of the cash flows.

During the year ended December 31, 2022, the Company incurred payments of \$0.2 million and received payments of \$0.1 million related to the interest swap instrument. These payments were recorded as interest expense during the year ended December 31, 2022.

The amounts recorded for the interest rate swap agreement are described below (in thousands):

Derivative Instrument	Balance Sheet Classification	December 31, 2022	December 31, 2021
Interest rate swap	Deposits and other	\$ 1,402	\$ —
	Accumulated comprehensive loss	1,107	—
For the years ended December 31,			
Derivative Instrument	Income Statement Classification	2022	2021
Interest rate swap	Interest expense	\$ 158	\$ —

Warrants

During the year ended December 31, 2021, the Company determined that its GP Sponsor Private Placement Warrants were subject to treatment as a liability. The GP Sponsor Private Placement Warrants may not be redeemed by the Company so long as these warrants are held by the initial purchasers or such purchasers' permitted transferees. If these warrants are held by someone other than the initial purchasers or such purchasers' permitted transferees, these warrants are redeemable by the Company and exercisable on the same basis as certain warrants to purchase approximately 8.6 million shares of the Company's Common Stock, at \$11.50 per share (the "Public Warrants"). As a result, the GP Sponsor Private Placement Warrants were reclassified as a liability. On October 29, 2021, the holders of the GP Sponsor Private Placement Warrants sold the warrants for \$1.04 per warrant, thereby removing the unique rights held by these holders. Therefore, the fair value of these instruments as of October 29, 2021 was \$6.3 million. The GP Sponsor Private Placement Warrants were then reclassified as additional paid-in capital as of October 29, 2021. The key assumptions used to determine the fair value was the term period of the warrants, the risk free rate and volatility. The Public Warrants and the Private Placement Warrants expired unexercised on October 10, 2022. See Note 8 for further information related to the expired warrants.

Series A Preferred Stock

As discussed in Note 6, the fair value of our Series A Preferred Stock issuances on June 20, 2019, March 7, 2019 and July 19, 2018 were determined to be \$3.0 million, \$5.3 million and \$126.8 million, respectively, which was the basis for allocating the net proceeds. The fair value was determined by utilizing a combination of a discounted cash flow methodology related to funds generated by the Series A Preferred Stock, along with the BSM option-pricing model in relation to the conversion feature. Key assumptions applied for the discounted cash flow and BSM analysis included (i) three different scenarios whereby the Series A Preferred Stock would remain outstanding between 4 and 5 years along with a probability weighting assigned to each scenario, (ii) an implied yield of the Series A Preferred Stock ranging from 20.9% to 22.9% calibrated to the transaction values as of June 20, 2019, March 7, 2019 and July 19, 2018, respectively, (iii) a risk-free interest rate of 1.72%, 2.44% and 2.8%, and (iv) historical volatility of 30%.

The Company's policy is to recognize asset or liability transfers among Level 1, Level 2 and Level 3 as of the actual date of the events or change in circumstances that caused the transfer. During the years ended December 31, 2022, 2021 and 2020, the Company had no transfers of its assets or liabilities between levels of the fair value hierarchy. As of December 31, 2021, the Company did not have any assets or liabilities that are carried at fair value on a recurring basis.

The carrying amounts of the Company's financial instruments including cash and cash equivalents, restricted cash, accounts receivable, accounts payable, and accrued liabilities approximate fair values due to their short-term maturities. Based on borrowing rates currently available to the Company for debt with similar terms, the carrying value of capital lease obligations and the related party note payable to GP Sponsor both approximate fair value as of the respective balance sheet dates.

RIMINI STREET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Significant Concentrations

The Company attributes revenues to geographic regions based on the location of its customers' contracting entity. The following shows revenues by geographic region for the years ended December 31, 2022, 2021 and 2020 (in thousands):

	<u>2022</u>	<u>2021</u>	<u>2020</u>
United States of America	\$ 215,372	\$ 199,811	\$ 191,448
International	194,290	174,619	135,332
Total revenue	<u>\$ 409,662</u>	<u>\$ 374,430</u>	<u>\$ 326,780</u>

No customers represented more than 10% of revenue for the years ended December 31, 2022, 2021 and 2020. As of December 31, 2022, the Company had no customers greater than 10% of total net accounts receivable. As of December 31, 2021, the Company had one customer greater than 10% of total net accounts receivable. The Company tracks its assets by physical location. As of December 31, 2022 and 2021, the net carrying value of the Company's property and equipment located outside of the United States amounted to approximately \$1.8 million and \$1.5 million, respectively. As of December 31, 2022, the Company had operating lease right of use assets of \$2.6 million, \$3.4 million and \$1.2 million in the United States, India and the rest of the world, respectively. As of December 31, 2021, the Company had operating lease right-of-use assets of \$7.7 million, \$4.7 million and \$0.4 million in the United States, India and the rest of the world, respectively.

Financial instruments that subject the Company to concentrations of credit risk consist primarily of cash, cash equivalents, restricted cash, and accounts receivable. The Company maintains its cash, cash equivalents and restricted cash at high-quality financial institutions, primarily in the United States of America. Deposits, including those held in foreign branches of global banks, may exceed the amount of insurance provided on such deposits. As of December 31, 2022 and 2021, the Company had cash and restricted cash with a single financial institution for an aggregate of \$44.9 million and \$70.6 million, respectively. The Company also had \$0.3 million of restricted cash with a second financial institution as of December 31, 2022. The Company has never experienced any losses related to these balances.

Generally, credit risk with respect to accounts receivable is diversified due to the number of entities comprising the Company's customer base and their dispersion across different geographies and industries. The Company performs ongoing credit evaluations on certain customers and generally does not require collateral on accounts receivable. The Company maintains reserves for potential bad debts, and historically such losses are generally not significant.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain a system of disclosure controls and procedures that are designed to reasonably ensure that information required to be disclosed in our SEC reports is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and to reasonably ensure that such information is accumulated and communicated to our management, including our Chief Executive Officer and President and our Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure.

Our management, including our Chief Executive Officer and President and our Chief Financial Officer, does not expect that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) ("Disclosure Controls") will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. We monitor our Disclosure Controls and make modifications as necessary; our intent in this regard is that the Disclosure Controls will be modified as systems change and conditions warrant.

An evaluation of the effectiveness of the design and operation of our Disclosure Controls was performed as of the end of the period covered by this Report. This evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and President and our Chief Financial Officer. Based on this evaluation, we concluded that our disclosure controls and procedures were effective.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act). Our internal control over financial reporting is a process designed to provide reasonable assurance to management and the Board of Directors regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision of our management, including our Chief Executive Officer and President and our Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the control documentation, evaluation of the design effectiveness of controls, testing the operating effectiveness of controls and a conclusion on this evaluation. Based on our evaluation, we have concluded that our internal control over financial reporting was effective as of December 31, 2022.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter ended December 31, 2022 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Attestation Report of Independent Registered Public Accounting Firm

Our independent registered public accounting firm, KPMG LLP, has issued an attestation report with respect to the effectiveness of our internal control over financial reporting, which appears in Part II, Item 8 of this Annual Report on Form 10-K.

Item 9B. Other Information

On February 23, 2023, in accordance with Section 5.1 of our Amended and Restated Bylaws dated October 10, 2017, our Board of Directors appointed Seth A. Ravin, our then-current Chief Executive Officer and Chairman of the Board, to the additional role of President effective March 1, 2023. Mr. Ravin will receive no additional compensation in connection with his assuming the additional role of President, and there are no arrangements or understandings between Mr. Ravin and any other persons pursuant to which Mr. Ravin was appointed as President. Also effective March 1, 2023, our former President, Sebastian Grady, has assumed a new role as our President, Strategic Initiatives.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

A list of our executive officers and biographical information appears in Part I of this Report under the heading “Information about our Executive Officers.” The remaining information required by this item is incorporated by reference to the 2023 Proxy Statement to be filed with the SEC within 120 days after the year ended December 31, 2022.

We have adopted a Code of Business Conduct and Ethics for directors, officers and employees, including our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. The code is available on the corporate governance section of our investor relations website at investors.riministreet.com. We intend to satisfy the disclosure requirements under Item 5.05 of Form 8-K regarding amendments to and waivers from the code by posting such information on the same website.

Item 11. Executive Compensation

The information required by this item is incorporated by reference to the 2023 Proxy Statement to be filed with the SEC within 120 days after the year ended December 31, 2022.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item is incorporated by reference to the 2023 Proxy Statement to be filed with the SEC within 120 days after the year ended December 31, 2022.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item is incorporated by reference to the 2023 Proxy Statement to be filed with the SEC within 120 days after the year ended December 31, 2022.

Item 14. Principal Accounting Fees and Services

Our independent registered public accounting firm is KPMG LLP, Santa Clara, CA, Auditor Firm ID: 185.

The information required by this item is incorporated by reference to the 2023 Proxy Statement to be filed with the SEC within 120 days after the year ended December 31, 2022.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a)(1) and (a)(2) Financial Statements and Financial Statement Schedules:

Reference is made to the Index to Financial Statements of the Company under Item 8 of Part II. All financial statement schedules are omitted because they are not applicable, or the amounts are immaterial, not required, or the required information is presented in the financial statements and notes thereto in Item 8 of Part II above.

(b) Exhibits. Certain of the agreements filed as exhibits to this Report contain representations and warranties by the parties to the agreements that have been made solely for the benefit of the parties to the agreement. These representations and warranties:

- may have been qualified by disclosures that were made to the other parties in connection with the negotiation of the agreements, which disclosures are not necessarily reflected in the agreements;
- may apply standards of materiality that differ from those of a reasonable investor; and
- were made only as of specified dates contained in the agreements and are subject to subsequent developments and changed circumstances.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date that these representations and warranties were made or at any other time. Investors should not rely on them as statements of fact.

The exhibits listed in the following Exhibit Index are filed or incorporated by reference as part of this Report. The following are exhibits to this Report and, if incorporated by reference, we have indicated the document previously filed with the SEC in which the exhibit was included.

WHY WE'RE DIFFERENT

Rimini Street, Inc. (Nasdaq: RMNI), a Russell 2000® Company, is a global provider of end-to-end enterprise software support, products and services, the leading third-party support provider for Oracle and SAP software, and a Salesforce and AWS partner.

At Rimini Street, we see enterprise IT differently. We believe that IT and organization leaders and their vision – not software vendors, their policies or resource constraints – should drive IT strategy. We support these leaders with a comprehensive portfolio of end-to-end IT services that give clients a single-provider solution to many

different IT and organizational challenges. Our innovative support products and services provide our clients with unique value, ROI and engineering capabilities.

With an average of more than 20 years of relevant industry experience, we believe our Primary Support Engineers provide our clients the best and broadest technical talent available in the industry, and provide us with a competitive advantage in our proven track record of exceptional client service.

Rimini Street Foundation: A Year of RMNI LOVE

The Rimini Street Foundation, founded on the principle of “Supporting Humankind,” humbly reflects on a powerful year of giving and growth. As a privately funded philanthropic program of Rimini Street, Inc. and governed by employees representing our richly diverse teams, the Rimini Street Foundation remains true to its mission to “Leave the World a Better Place Than We Found it,” and demonstrates this through financial and in-kind donations as well as hosting heartwarming volunteer activities around the world.

In 2022, the Rimini Street Foundation launched the RMNI LOVE Grant program, welcoming nonprofit organizations from the community to apply for one of five \$10,000 grants to further their impact on those they serve. For its inaugural year, we selected the city of Las Vegas, our hometown and headquarters. RMNI LOVE was featured on the news, applications poured in and cycles of reviews and votes produced five winners from many deserving charities. The grant winners shared that their donation would be used to house eight formerly incarcerated women finding their road to independence (True Beginnings), feed 30,000 food insecure individuals (Three Square), provide 700 families with 35,000 diapers

(Baby’s Bounty), fund 6 months of physical therapy for children battling cancer (Cure 4 The Kids Foundation) and support the night programs keeping unhoused teens safe from predators (Nevada Partnership for Homeless Youth).

The RMNI LOVE program continued to light the way for friends in need, from granting \$50,000 in aid to families and individuals impacted by the Ukraine-Russia conflict to addressing food insecurity challenges in Australia, Canada, France, Korea, the United Kingdom and the United States to working alongside 300 colleagues to handcraft hundreds of blankets for foster children and pets in a single afternoon.

In total, 70 charities received a hand-up from the Rimini Street Foundation, and 20 activities were arranged to take our RMNI LOVE to the streets and into the homes and hearts of our community friends.

The work we do in “Supporting Humankind” is made possible only through the support of our clients and the collective passions of the Rimini Street Family, a RMNI LOVE for all.

Over 300 Rimini Street colleagues gathered to create hundreds of blankets for children entering the foster system in Clark County, NV.

The Rimini Street Foundation is a charitable operation funded solely by Rimini Street Inc. and its global subsidiaries, whose mission is to Support Humankind through financial contributions, in-kind donations, and company-wide employee volunteerism.
