

GOLDEN ST

# Company Profile

Golden Star is an established gold mining company that owns and operates the Wassa and Prestea mines situated on the prolific Ashanti Gold Belt in western Ghana. Africa. Golden Star is strategically focused on increasing operating margins and cash flow through the development of two high grade, low cost underground mines both in conjunction with existing open pit operations. The Wassa Underground is expected to commence production in 2016 followed by the Prestea Underground commencing production in 2017. Both projects are fully funded and on track to begin production as expected.

Production in 2016 is expected to be between 180,000 – 205,000 ounces of gold with cash operating costs\* between \$815 – \$925 per ounce.

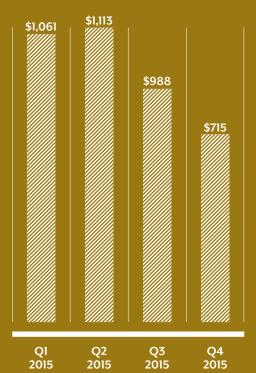

Golden Star is listed on the Toronto Stock Exchange (TSX: GSC), the New York Stock Exchange MKT (NYSE MKT: GSS) and the Ghanaian Stock Exchange (GSE: GSR).

# Message from the Chairman

**Tim Baker** Chairman

Golden Star Resources came through another difficult year and is now transforming into a low cost producer of gold from both open pit and underground mines, with significantly lower cash operating costs and all-in sustaining costs.

The board and I are very proud of the team who, despite the uncertainties of the gold price and the challenge of power supply reliability in Ghana, fundamentally changed the nature of our business by suspending the refractory operation at Bogoso and advancing the Wassa and Prestea Underground projects, all while maintaining strong community, government and stakeholder support, and achieving the streaming deal with Royal Gold which has ensured sufficient funding for our projects.

We were very saddened with the death of Yahaya Mumuni who was working as a contractor for us at Bogoso. The safety and well-being of our employees and contractors is a top priority for Golden Star and the commitment of the management team to this

end is absolute. As the Company advances in its transition to an underground producer, special efforts are being made to install proper systems, adhere to high standards of training and maintain committed leadership.

The recent move in gold prices is certainly encouraging as we move into 2016, and even more encouraging is the fact that we are now expecting to produce every ounce of gold produced during 2016 at cash operating costs between \$815 and \$925 per ounce and that the projects are advancing as planned. We know that we cannot depend on the price of the gold, but that we can depend on the efforts and abilities and leadership of our team!

<u>"Samuel T. Coetzer"</u> **Tim Baker**Chairman

# Message from the CEO

Sam Coetzer
President and CEO

Reflecting on what has been achieved over the last few years and more specifically, where we have ended up, I am very proud of what we, as a board and management, have achieved. In June 2013 we stated that we would adjust the spending of capital to focus on establishing a leaner company, reducing our annual costs, focus on exploration at Wassa and re-optimize our pits to adjust to the new environment for gold and to build a stronger company for the future.

We also stated, in line with the new strategy, that the high-cost Bogoso refractory operation would be suspended before the end of 2016 which would significantly reduce our cost structure. We remained committed to building two new mines that would ensure the sustainability of our new lower cost structure. The challenges of executing this new strategic direction were beyond technical, they included the challenge of creating an environment of stability, an environment that would provide a future for our employees, one that we could all believe in, providing a ray of hope and a vision to fight for. As we undertook these challenges the economic environment became increasingly difficult, impacting our financial and operational results yet this team remained focused on making Golden Star a new and better company. Not only did we achieve what we set out to do we also did so while not sacrificing but building on the pillars of success. Our safety, environmental, stakeholder and community support continued to improve.

The results of the execution of our strategy, became evident with what we achieved in our operational and financial results in the fourth quarter of 2015. These results are an indication of what we can expect going forward from our new leaner and more efficient company. Our fourth quarter included the lowest costs we have achieved for the last five years, we significantly advanced our projects internally and developed a new business line at Prestea. These efforts and achievements provide stability and predictability for the future of this Company, a future that I strongly believe will be bright and prosperous.

The company today is leaner and less complex allowing us to now consider additional ways to unlock and create further value.

I am confident that we have now achieved a new steady state in operations and that we have become more proactive in terms of our approach to the business and value creation. We will remain diligent and conservative in terms of spending, allowing us greater flexibility in dealing with the changing economic environment.

During the year, I regret that the Company had a fatality at our Bogoso operation, a full review took place and measures were put into place to prevent recurrence. At Golden Star we are committed to developing a culture that fully integrates health and safety into operations, as we believe that job-related injuries and illnesses are unacceptable. Our Wassa operation was recognised at the National Mining Industry Awards in Ghana as the Best Performer in Occupational Health and Safety. Wassa was also recognized in the Best Improved Mine and the Best Mine Based on Occupational Injury Statistics, as well as winning the National Mines Safety and First Aid competition for the third successive year. More importantly, the operation achieved more than 10 million loss time injuries ("LTI") free manhours, the equivalent of 628 days of the team going home LTI free. The Prestea Underground Mine has been LTI free since April 2013. For 2015 the corporate LTI frequency rate was 0.25, decreasing from a much higher rate five years ago. This is a tremendous effort but will not stop as we continually strive for improvement.

Looking forward, I am confident we will deliver on expectations for production and costs now that we have a stable and predictable portfolio and will continue to grow our production and reduce our costs as our development projects come into full production into 2017. I want to thank the board and management team for the efforts, patience and input over the last year.

<u>"Samuel T. Coetzer"</u> **Samuel T. Coetzer**President and CEO

# Management's discussion and analysis

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Golden Star Resources Ltd. and its subsidiaries ("Golden Star" or "the Company" or "we" or "our"). This Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2015, which are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). This MD&A includes information available to, and is dated, February 24, 2016. Unless noted otherwise, all currency amounts are stated in U.S. dollars and all information presented in this MD&A is prepared in accordance with IFRS.

### Cautionary note regarding forward-looking information

This MD&A contains "forward-looking information" within the meaning of applicable Canadian securities laws and "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995, concerning the business, operations and financial performance and condition of Golden Star. Generally, forward-looking information and statements can be identified by the use of forwardlooking terminology such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes" or variations of such words and phrases (including negative or grammatical variations) or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative connotation thereof. Forward-looking information and statements in this MD&A include, but are not limited to, information or statements with respect to: production, cash operating costs, strip ratios and sources of ore for 2016; estimates of mineral reserves and mineral resources, including grades; the timing for transforming and the ability to transform Wassa and Prestea into lower cost producers; sustaining and development capital expenditures for 2016, including Wassa Underground Mine revenue offsetting development capital expenditures; the results of the Prestea Underground Mine feasibility study, including the post-tax internal rate of return, net present value (including assumed discount rates and gold price) and cash operating costs per ounce and all-in sustaining costs per ounce; timing for production from each of Wassa Underground Mine and Prestea Underground Mine; the life of mine at each of Wassa, Wassa Underground Mine and Prestea Underground Mine; future work to be completed at Wassa Underground Mine, including the rate of decline advances; future work to be completed at Prestea Underground Mine, including the timing for its development and refurbishment, as well as for mechanical and electrical rehabilitation work, stoping and production; timing of receipt of outstanding environmental permits and funding at Prestea Underground Mine; the sources of funds and sufficiency thereof to fund operations and capital expenditures; the timing and amount of payments from the Streaming Agreement (as referred to herein); working capital, debt repayments and requirements for additional capital; the availability of power from the Company's electricity provider or from other sources; the ability of the Company to repay the 5% Convertible Debentures when due or to restructure them or make alternate arrangements; and the sufficiency of the Company's cash, the available Ecobank Loan II (as referred to herein) drawdown and the proceeds from the Streaming Agreement, together with the expected mine operating margin, to fund operations and capital expenditures required for the development of the Wassa Underground Mine and the Prestea surface and Prestea Underground Mine.

Forward-looking information and statements are made based upon certain assumptions and other important factors that, if untrue, could cause the actual results, performance or achievements of Golden Star to be materially different from future results, performance or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Golden Star will operate in the future, including the price of gold, anticipated costs and ability to achieve goals. Certain important factors that could cause actual results, performances or achievements to differ materially from those set forth in the forward-looking information and statements include, among others, gold price volatility, discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries, mining operational and development risks, litigation risks, liquidity risks, suppliers suspending or denying delivery of products or services, regulatory restrictions (including environmental regulatory restrictions and liability), actions by governmental authorities (including changes in taxation), currency fluctuations, the speculative nature of gold exploration, the global economic climate, dilution, share price volatility, the availability of capital on reasonable terms or at all, local and community impacts and issues, results of pending or future feasibility studies, competition, loss of key employees, additional funding requirements and defective title to mineral claims or property. Although Golden Star has attempted to identify important factors that could cause actual results, performance or achievements to differ materially from those described in forward-looking information and statements, there may be other factors that cause results, performance or achievements not to be as anticipated, estimated or intended.

Forward-looking information and statements are subject to known and unknown risks, uncertainties and other important factors that may cause the actual results, performance or achievements of Golden Star to be materially different from those expressed or implied by such forward-looking information and statements, including but not limited to: risks related to international operations, including economic and political instability in foreign jurisdictions in which Golden Star operates; risks related to current global financial conditions; risks related to joint venture operations; actual results of current exploration activities; environmental risks; future prices of gold; possible variations in mineral reserves and mineral resources, grade or recovery rates; mine development and operating risks; an inability to obtain power for operations or mine development terms or at all; mining plant or equipment breakdowns or failures; an inability to obtain products or services for operations or mine development

from vendors and suppliers on reasonable terms, including pricing, or at all; accidents, labor disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; risks related to indebtedness and the service of such indebtedness, as well as those factors discussed in the section entitled "Risk Factors" in Golden Star's Annual Information Form for the year ended December 31, 2014. Although Golden Star has attempted to identify important factors that could cause actual results, performances and achievements to differ materially from those contained in forward-looking information and statements, there may be other factors that cause results, performance and achievements not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results, performance, and achievements and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information and statements. Forward-looking information and statements are made as of the date hereof and accordingly are subject to change after such date. Except as otherwise indicated by Golden Star, these statements do not reflect the potential impact of any non-recurring or other special items or of any dispositions, monetizations, mergers, acquisitions, other business combinations or other transactions that may be announced or that may occur after the date hereof. Forward-looking information and statements are provided for the purpose of providing information about management's current expectations and plans and allowing investors and others to get a better understanding of the Company's operating environment. Golden Star does not undertake to update any forward-looking information and statements that are included in this MD&A, except as required by applicable securities laws.

### Cautionary note regarding reserves and resources

Scientific and technical information contained in this MD&A was reviewed and approved by Dr. Martin Raffield, Senior Vice- President, Technical Services for Golden Star who is a "qualified person" as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") and by S. Mitchel Wasel, BSc Geology who is a Qualified Person pursuant to NI 43-101. Mr. Wasel is Vice President Exploration for Golden Star and an active member of the Australasian Institute of Mining and Metallurgy. All mineral reserves and mineral resources have been calculated in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") and in compliance with the requirements of NI 43-101. All mineral resources are reported inclusive of mineral reserves. Mineral resources which are not mineral reserves have not demonstrated economic viability. Information on data verification performed on, and other scientific and technical information relating to, the mineral properties mentioned in this MD&A that are considered to be material mineral properties to the Company are contained in Golden Star's Annual Information Form for the year ended December 31, 2014 and the following current technical reports for those properties available at www.sedar.com: (i) Wassa – "NI 43-101 Technical Report on feasibility study of the Wassa open pit mine and underground project in Ghana" effective date December 31, 2014; (ii) Bogoso – "NI 43-101 Technical Report on Resources and Reserves Golden Star Resources Ltd., Bogoso Prestea Gold Mine, Ghana" effective date December 31, 2013; and (iii) Prestea Underground – "NI 43-101 Technical Report on a Feasibility Study of the Prestea Underground Gold Project in Ghana" effective date November 3, 2015.

### Cautionary Note to U.S. Investors

This MD&A has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ materially from the requirements of United States securities laws applicable to U.S. companies. Information concerning our mineral properties has been prepared in accordance with the requirements of Canadian securities laws, which differ in material respects from the requirements of the Securities and Exchange Commission (the "SEC") set forth in Industry Guide 7. Under the SEC's Industry Guide 7, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time of the reserve determination, and the SEC does not recognize the reporting of mineral deposits which do not meet the SEC Industry Guide 7 definition of "Reserve". In accordance with NI 43-101, the terms "mineral reserve", "proven mineral reserve", "probable mineral reserve", "mineral resource", "measured mineral resource" and "inferred mineral resource" are defined in accordance with CIM standards. While the terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" and "inferred mineral resource" are recognized and required by NI 43-101, the SEC does not recognize them. You are cautioned that, except for that portion of mineral resources classified as mineral resources and as to whether they can be economically or legally mined. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Therefore, you are cautioned not to assume that all or any part of an inferred mineral resource exists, that it can be economically or legally mined, or that it will ever be upgraded into mineral reserves.

### Overview of Golden Star

Golden Star is an established gold producer that holds a 90% interest in the Wassa and Bogoso/Prestea gold mines in Ghana. The Company is pursuing brownfield development projects at its Wassa and Prestea mines that are expected to transform these operations into low cost producers beginning in 2016. The Company is a reporting issuer or the equivalent in all provinces of Canada, in Ghana and in the United States, and files disclosure documents with securities regulatory authorities in Canada, Ghana and with the SEC in the United States.

<sup>3</sup> See "Non-GAAP Financial Measures" below for an explanation of the calculation of cash provided by operations before working capital changes.

- Consolidated cash operating cost per ounce was \$715 in the fourth quarter of 2015, 22% lower than \$919 in the same period in 2014. Wassa achieved cash operating cost per ounce of \$625 in the fourth quarter of 2015. This was the operation's lowest cash operating cost per ounce in five years, compared to \$908 in the same period in 2014. The lower cash operating cost per ounce at Wassa was the result of cost savings measures implemented, resulting in a decline in mine operating expenses. Bogoso's cash operating cost per ounce of \$849 was also its best quarterly result in five years, compared to \$926 in the same period in 2014. The lower cash operating cost per ounce at Bogoso was a result of lower costs of exclusively mining and processing Prestea oxide ore through the non-refractory plant, which commenced in the third quarter of 2015. For the year ended December 31, 2015, consolidated cash operating cost per ounce was \$976, a 10% decline compared to \$1,090 in 2014.
- Gold sales of 51,378 ounces in the fourth quarter of 2015 were 29% lower than the 72,085 ounces sold in the same period in 2014. Wassa gold sales in the fourth quarter increased by 20% compared to the same period in 2014 due mainly to higher grade ore processed and higher recovery. Bogoso/Prestea gold sales decreased by 56% in the fourth quarter of 2015 compared to the same period in 2014 as a result of lower plant throughput as the high cost refractory operation at Bogoso was suspended at the end of the third quarter of 2015. Production in the fourth quarter of 2015 was attributable to the lower cost non-refractory operation only, resulting in the decline in ounces compared to prior year. For the year ended December 31, 2015, gold sales of 221,653 ounces were 15% lower than the 260,788 ounces sold in 2014, due to the lower throughput at both operations, primarily as a result of suspending the high cost refractory operation at Bogoso in the third quarter of 2015.
- Gold revenues totaled \$56.4 million in the fourth quarter of 2015, compared to \$86.6 million in the same period in 2014. For the year ended December 31, 2015, gold revenue totaled \$255.2 million compared to \$328.9 million in the same period in 2014. The decline in realized gold price and fewer ounces sold resulted in the decrease in revenue for both the quarter and year ended December 31, 2015 compared to the same periods in 2014. The decline in ounces sold were primarily a result of suspending the high cost refractory operation at Bogoso in the third quarter of 2015.
- Cost of sales excluding depreciation and amortization in the fourth quarter of 2015 totaled \$39.4 million compared to \$71.4 million in the same period in 2014. The decrease of cost of sales excluding depreciation and amortization was due to a decrease in mine operating expenses at both Wassa and Bogoso/Prestea mines. Although Wassa mined and processed more tonnes, mine operating expenses declined by 12% as a result of cost savings measures implemented. Bogoso/Prestea mine operating expenses declined by 59% compared to the same prior year quarter as a result of exclusively mining and processing lower cost Prestea oxide ore through the non-refractory plant. For the year ended December 31, 2015, cost of sales excluding depreciation and amortization totaled \$245.5 million compared to \$304.9 million in the same period in 2014. Lower mine operating expenses were a result of less material mined at Bogoso/Prestea and lower mining and haulage costs at Wassa for 2015. These costs were partially offset by the \$14.6 million severance charges recognized during the year.
- Depreciation and amortization expense totaled \$7.1 million in the fourth quarter of 2015 compared to \$8.2 million in the same period in 2014. The decrease in depreciation and amortization expense was mainly due to lower production at Bogoso/Prestea as well as the impairment charge on the refractory assets recorded in the second quarter of 2015. For the year ended December 31, 2015, depreciation and amortization expense increased to \$37.3 million from \$26.2 million in the same period in 2014. The increase in depreciation and amortization expense for the year ended December 31, 2015 is a result of the decrease in recoverable ounces at the Bogoso/Prestea operation in 2015, offset slightly by the lower production at both operations.
- General and administrative costs totaled \$2.5 million in the fourth quarter of 2015, compared to \$2.8 million in the same period in 2014. For the year ended December 31, 2015, general and administrative costs totaled \$14.3 million compared to \$16.4 million in 2014. The decrease in head office costs for the quarter and year ended December 31, 2015 compared to the same periods in 2014 were mainly due to a decrease in legal fees and share based compensation during the current year.
- The Company recorded a non-cash fair value gain of \$1.5 million on the 5% Convertible Debentures in the fourth quarter of 2015 compared to a non-cash fair value gain of \$1.5 million in the same period in 2014. The gain was calculated based on the discounted cash flows of the debt component and a Black-Scholes valuation of the conversion feature. For the year ended December 31, 2015, the Company recorded a non-cash fair value gain of 1.4 million on the 5% Convertible Debentures compared to a non-cash fair value loss of \$0.5 million in 2014.
- Net income attributable to Golden Star shareholders for the fourth quarter of 2015 totaled \$13.8 million or \$0.05 earnings per share, compared with a net loss of \$48.2 million or \$0.19 loss per share for the same period in 2014. The net income in the fourth quarter of 2015 compared to the net loss for the same period in 2014 due to the \$5.7 million gain on reduction of the Bogoso refractory operation asset retirement obligations and the \$5.7 million impairment charge recognized on Bogoso's refractory assets during the fourth quarter of 2014. For the year ended December 31, 2015, net loss attributable to Golden Star shareholders totaled \$67.7 million compared to \$73.1 million in 2014. This decrease is due to the \$5.7 million gain on reduction of the Bogoso refractory operation asset retirement obligations and lower impairment charges recorded in 2015, offset by the lower mine operating margins.

- Adjusted net income attributable to Golden Star shareholders (see "Non-GAAP Financial Measures" section) was \$6.8 million in the fourth quarter of 2015, compared to \$8.8 million for the same period in 2014. The decrease in adjusted net income for the fourth quarter was mainly due to an increase in finance expense in 2015. Adjusted net loss was \$30.4 million and \$12.2 million respectively for the year ended December 31, 2015 and 2014. The higher adjusted net loss for the year was mainly due to a higher mine operating loss in 2015 as a result of lower production, lower realized gold price and higher depreciation in 2015.
- Cash provided by operations before working capital changes was \$29.7 million for the fourth quarter of 2015, compared to \$11.7 million in the same period in 2014. This increase is attributable to higher operating margin at Wassa and proceeds received from the streaming transaction (See "Gold stream agreement and \$20 million term loan" in Corporate Development section), offset by a reduction in accounts payable and the lower operating margin at Bogoso/Prestea. For the year ended December 31, 2015, cash provided by operations before working capital changes was \$53.4 million, compared to \$4.5 million for the same period in 2014. Cash provided by operations increased in 2015 due to proceeds received from the streaming transaction offset by lower mine operating margins at Wassa and Bogoso/Prestea. The lower mine operating margin at Wassa was due to the decline in realized gold price. At Bogoso/Prestea, the lower margin was a result of the lower realized gold price and lower gold production as well as the \$12.8 million of severance charges incurred during the year.
- Capital expenditures for the fourth quarter of 2015 totaled \$13.7 million compared to \$9.2 million in the same period in 2014. The major capital expenditures in the fourth quarter of 2015 at Wassa included \$4.8 million on expenditures relating to the development of the Wassa Underground Mine and \$2.0 million on the improvement of the Wassa tailings storage facility and processing plant. Capital expenditures at Bogoso/Prestea during the fourth quarter of 2015 included \$3.4 million on expenditures relating to the development of Prestea Underground Mine and \$1.7 million on the development of the Prestea Open Pit Mines. For the year ended December 31, 2015, capital expenditures totaled \$57.1 million compared to \$33.7 million incurred in 2014. The major capital expenditures in 2015 at Wassa included \$20.1 million on expenditures relating to the development of the Wassa Underground Mine, \$5.4 million on the improvement of the tailings storage facility, \$4.8 million on processing plant upgrades and \$1.9 million developmental drilling. Capital expenditures at Bogoso/Prestea during 2015 included \$17.1 million on expenditures relating to the Prestea Underground Mine and \$4.5 million on the development of the Prestea Open Pit Mines.

13

### Outlook for 2016

### PRODUCTION AND COST GUIDANCE

	Gold production thousands of ounces	Cash operating costs \$ per ounce
Wassa Open Pit	100 – 110	800 – 900
Wassa Underground	20 – 25	N/A <sup>1</sup>
Prestea Open Pit Mines	60 – 70	840 – 970
CONSOLIDATED	180 – 205	815 – 925

<sup>1</sup> Costs incurred at Wassa Underground will be capitalized until commercial production is achieved. As a result, these costs are reflected in the Company's development capital expenditure guidance set out in the table below and are not included in the Company's cash operating cost per ounce guidance set out in the table above.

**Wassa** – Production is expected to remain at approximately the same level as 2015. Grade and strip ratio are expected to decline slightly in 2016 resulting in slightly lower production guidance.

**Wassa Underground** – During the development phase of the Wassa Underground Mine, the Company expects to produce 20,000 – 25,000 ounces in 2016. As these ounces are expected to be produced prior to the commercial production phase of the mine, the revenues from these ounces will be credited against the capital expenditures incurred.

**Prestea Open Pit Mines** – Production at Prestea/Bogoso is expected to be lower in 2016 relative to the prior year as mining is expected to be exclusively focused on the low-cost non-refractory ore. Production is expected to come from satellite pits in the Prestea South property.

### CAPITAL EXPENDITURES GUIDANCE

	Sustaining (\$ millions)	Development (\$ millions)	Total (\$ millions)
Wassa Open Pit and Processing Plant	6	2	8
Wassa tailings expansion	_	9	9
Wassa Underground	_	34	34
Prestea Open Pit Mines	3	-	3
Prestea Underground	_	36	36
CONSOLIDATED	9	81	90

**Wassa** – The Company expects to spend \$6 million on sustaining capital expenditures at the Wassa open pit operations. The Company expects to spend \$34 million of capital on development activities related to the Wassa Underground Mine, \$9 million on the expansion of the Wassa tailings facility and \$2 million on development activities related to the Wassa Open Pit and Processing Plant. Revenue earned on underground ounces produced will be credited against capital expenditures until commercial production is achieved.

**Prestea** – The Company expects to spend \$3 million on sustaining capital expenditures at the Prestea Open Pit Mines. The Company expects to spend \$36 million on the development of the Prestea Underground Mine during 2016.

### Corporate developments

### **GOLD PRICES**

Spot gold prices decreased from \$1,199 per ounce at December 31, 2014 to \$1,062 per ounce at December 31, 2015. The Company realized an average gold price of \$1,151 per ounce for gold sales during 2015, compared to average realized gold price of \$1,261 per ounce for 2014. The spot gold price on February 23, 2016 was \$1,227 per ounce.

The average gold price realized by the Company during the year was affected by the streaming arrangement entered into with RGLD Gold AG ("RGLD"). Revenue from spot sales during the year resulted in an average realized price of \$1,161 per ounce whereas revenue recognized from the stream agreement resulted in a realized price of \$984 per ounce (see table below). During the fourth quarter ended December 31, 2015, 6,366 ounces of gold were delivered to RGLD at an average realized gold price of \$972 per ounce. Cash proceeds received from RGLD totaled \$226 per ounce for the quarter and year ending December 31, 2015.

	Three months ended December 31, 2015					For the year ended December 31, 2015			
	\$'000	Ounces		Realized price		\$'000	Ounces		Realized price
Revenue – Stream arrangement									
Cash proceeds	\$ 1,442				\$	2,873			
Deferred revenue recognized	4,747					9,621			
	\$ 6,189	6,366	\$	972	\$	12,494	12,701	\$	984
Revenue – Spot sales	50,231	45,012		1,116		242,693	208,952		1,161
TOTAL REVENUE	\$ 56,420	51,378	\$	1,098	\$	255,187	221,653	\$	1,151

### GOLD STREAM AGREEMENT ("STREAMING AGREEMENT") AND \$20 MILLION TERM LOAN

On July 28, 2015, the Company successfully closed a \$130 million Streaming Agreement and \$20 million loan financing with Royal Gold, Inc. ("RGI") and its wholly-owned subsidiary RGLD. Under the July 28, 2015 Streaming Agreement, Golden Star initially delivered 8.5% of Bogoso/Prestea and Wassa ("the Mines") production to RGLD at a cash purchase price of 20% of spot gold. This cash purchase price of 20% of spot gold of 8.5% of the Mines production was to remain in effect until 185,000 ounces had been delivered. A further 5% of the Mines production at a cash purchase price of 20% of spot gold was to be delivered thereafter until an additional 22,500 ounces was delivered. Thereafter, 3% of the Mines production at a cash purchase price of 30% of spot gold was to be delivered in perpetuity. The economic effective date of delivery was April 1, 2015.

The Streaming Agreement was subsequently amended on December 30, 2015 to provide an additional \$15 million of streaming advance payment with an option, subject to Golden Star satisfying certain conditions, to access a further \$5 million. The Streaming percentages were adjusted as follows to reflect the \$15 million additional advance payment: From January 1, 2016, the Company will deliver 9.25% of the Mines' production to RGLD at a cash purchase price of 20% of spot gold. From the earlier of January 1, 2018 or commercial production of the underground mines, Golden Star will deliver 10.5% of production at a cash purchase price of 20% of spot gold until 240,000 ounces have been delivered. If Golden Star exercises its option on the additional \$5 million stream advance, the stream percentage from the earlier of January 1, 2018 or commercial production of the underground mines would be increased to 10.9% at a cash purchase price of 20% spot gold until 250,000 ounces have been delivered; Thereafter, 5.5% of production at a cash purchase price of 30% of spot gold will be delivered.

The Streaming Agreement is a contract for the future delivery of gold ounces at the contracted cash purchase price. During the year ended December 31, 2015, the Company delivered 12,701 ounces of gold to RGLD. Revenue of \$12.5 million was recognized for the year ended December 31, 2015, consisting of \$2.9 million cash proceeds and \$9.6 million of deferred revenue realized.

### **ECOBANK LOAN II**

In the third quarter of 2014, the Company through its subsidiary Golden Star (Wassa) Limited closed a \$25 million secured Medium Term Loan Facility ("Ecobank Loan II") with Ecobank Ghana Limited. Drawdowns under the loan facility will be available to finance the development of the Wassa Underground Mine. This \$25 million loan has a term of 60 months from the date of initial drawdown and is secured by, among other things, Wassa's existing plant, machinery and equipment. The interest rate on the loan facility is three month LIBOR plus 11%, per annum, payable monthly in arrears beginning a month following the initial drawdown. Payment of principal commences six months following the initial drawdown and is thereafter payable quarterly in arrears. The Company will be required to adhere to certain financial covenants from the end of 2016. At December 31, 2014, the Company had not made any drawdowns on this facility.

During the year ended December 31, 2015, the Company drew down \$22.0 million of the Ecobank Loan II. The Company has until the second quarter of 2016 to draw down the remaining \$3.0 million available under the Ecobank Loan II.

### **BOGOSO/PRESTEA OPERATION**

In the fourth quarter of 2015, Bogoso cash operating costs were the lowest achieved in five years. The Company suspended the Bogoso refractory operation at the end of the third of quarter of 2015 and focused on mining the oxide pits south of Prestea and processing ore in the non-refractory plant. This is consistent with the Company's strategy of lowering the cash operating cost per ounce. The non-refractory operation, which commenced in August 2015 produced 19,704 ounces and achieved a cash operating cost per ounce of \$849 in the fourth quarter of 2015. The total gold production of the non-refractory operation was 37,169 for the year ended December 31, 2015.

As a result of the suspension of refractory operation, the Company recorded a severance charge of \$12.8 million and recognized an impairment charge of \$34.4 million during the second quarter of 2015. The impairment charge included \$12.9 million on material and supplies inventories, \$12.8 million on refractory ore inventory and \$8.7 million on mining interests.

### **GHANA TAX LEGISLATION UPDATE**

A new income tax act ("ITA") was passed by Ghana's parliament and assented to by the President on September 1, 2015, on which date the ITA entered into force. The implementation of the ITA commenced on January 1, 2016. The introduction of the ITA did not impact the Company's tax expenses for the year ended December 31, 2015. The significant change in the ITA that may affect the Company is that tax depreciation claims on plant, equipment and mining properties will be included in losses which expire after five years rather than being included in a capital allowance balance that carries forward indefinitely.

### **GOLD HEDGES**

During the first quarter of 2016, the Company initiated a gold hedging program to limit its exposure to the fluctuations in the gold price during the development phrase of the Wassa Underground and Prestea Underground projects. Pursuant to the program, the Company can enter into forward contracts and collar contracts in respect of up to one quarter of 2016 expected gold production. To date, the Company has entered into (i) forward contracts for 9,000 ounces (or 1,000 ounces per month from April to December 2016) at a gold price of \$1,188 per ounce, and (ii) collars on 30,000 ounces at gold prices of no less than \$1,125 per ounce and up to \$1,255 per ounce, for months ranging from March to December 2016.

### Development projects update

### WASSA UNDERGROUND DEVELOPMENT

In March 2015 the results of a Feasibility Study on the economic viability of an underground mine operating in conjunction with the existing open pit mine were announced and the decision to progress with the construction of the underground mine was affirmed.

Decline development commenced in July 2015. Approximately 1258 meters of advance was achieved on the Main and Ventilation declines by February 23, 2016. Decline development advanced at an average of seven metres per day during the fourth quarter of 2015. The rate of development is expected to increase in 2016 as efficiencies improve.

An update to the resource model has been completed which includes additional drilling undertaken between July 2014 (when the feasibility study resource model was completed) and March 2015. The mine design and schedule has been updated to reflect the changes to the resource model and the expansion of the F shoot area which now has an independent footwall decline access which will allow access to 100 meters of vertical extent on three separate ore lenses. Development towards the main B shoot area will continue as per the feasibility study design.

Construction of the surface infrastructure and the transfer from generator power to grid power was completed in the fourth quarter of 2015.

Project to date capital expenditures have totaled \$22.2 million at December 31, 2015 including \$2.5 million of capitalized interest. The Company expects to incur approximately \$34 million of capital expenditures in 2016.

### **PRESTEA**

The Prestea mine consists of an underground mine that has been in existence for over 100 years along with adjacent surface deposits. The Prestea mine is located 16 km south of the Bogoso mine and processing plants in the town of Prestea. The underground mine is currently being refurbished and development is expected to commence in the fourth quarter of 2016. A Feasibility Study ("FS") to restart mining was finalized in December 2015. A number of high grade surface deposits exist to the south of underground mine which the Company are currently mining and processing through the non-refractory processing plant.

### Prestea Underground

The FS results for the Prestea Underground Mine were reported in December 2015 and indicated a post-tax internal rate of return of 42% and net present value of \$124 million based on a discount rate of 5% and gold price assumption of \$1,150 per ounce. Cash operating costs of \$462 per ounce and all-in sustaining costs of \$603 per ounce were estimated over the life of mine.

Construction capital expenditure for the underground mine was approved during the third quarter of 2015 and work has commenced on procurement for the long-lead time components.

Rehabilitation works are ongoing in 17 level and 24 level access development and in the Central Shaft are completed. All rehabilitation works are on schedule for completion in the first quarter of 2016. Mechanical and electrical rehabilitation work is planned to be completed in the third quarter of 2016 after which, development will commence. Pre-development of the resource will take place from the fourth quarter of 2016 to mid-2017. Stoping is expected to start in mid-2017, with expectation to ramp up to 500 tonnes per day by the end of the 2017.

During the year ended December 31, 2015, the Company incurred capital expenditures totaling \$17.1 million at the underground operation. The Company expects to incur approximately \$36 million of capital expenditures in 2016.

## Wassa operations

Through a 90% owned subsidiary Golden Star (Wassa) Limited, the Company owns and operates the Wassa open pit mine, located in the southwestern region of Ghana approximately 35 kilometers northeast of the town of Tarkwa, Ghana. Wassa has a non-refractory processing plant ("Wassa processing plant") consisting of a carbon-in-leach ("CIL") system with a capacity of 2.7 million tonnes per annum. Ore from the Wassa mine is processed at the Wassa processing plant.

<sup>1</sup> See "Non-GAAP Financial Measures" below for a reconciliation of cash operating cost per ounce to cost of sales excluding depreciation and amortization.

### THREE MONTHS ENDED DECEMBER 31, 2015 COMPARED TO THREE MONTHS ENDED DECEMBER 31, 2014

### Production

Gold production was 31,395 ounces for the fourth quarter of 2015, a 22% increase from the 25,831 ounces sold during the same period of 2014 due to higher grade processed and higher recovery. Higher grade ore was mined from the lower elevation of the pit, resulting in higher grade ore processed in the quarter.

### Gold revenues

Gold revenues were \$33.8 million for the fourth quarter of 2015, a 9% increase compared to \$31.0 million for the same period in 2014. The increase was due to a 20% increase in ounces of gold sold, offset by the decline in the average realized gold price to \$1,093 per ounce in the fourth quarter of 2015, compared to \$1,199 per ounce for the same quarter in 2014.

### Cost of sales excluding depreciation and amortization

Cost of sales excluding depreciation and amortization totaled \$21.0 million during the fourth quarter of 2015, compared to \$25.0 million incurred during the same period of 2014. The lower cost of sales compared to the same prior year period is mainly due to reduction of headcount, review and renegotiation of contracts, and lower fuel and cyanide costs incurred as a result of cost saving measures implemented.

### Depreciation and amortization

Depreciation and amortization for the fourth quarter of 2015 decreased to \$4.1 million from \$4.4 million during the same period in 2014. The depreciation and amortization expense in the fourth quarter of 2015 was slightly lower due to lower net book values of depreciable assets.

### Cash operating cost per ounce

Wassa's cash operating cost per ounce of \$625 for the fourth quarter of 2015 was the lowest quarterly result in five years, compared to \$908 in the same period in 2014. The lower cash operating cost per ounce was due to a 20% increase in gold sold and a 12% decrease in mine operating expense as a result of cost savings measures implemented.

### Capital expenditures

Capital expenditures for the fourth quarter of 2015 totaled \$8.0 million compared with \$5.9 million during the same period in 2014. Sustaining capital expenditures totaled \$1.1 million during the three months ended December 31, 2015 compared to \$2.2 million incurred in the comparable period of 2014. Development capital expenditures totaled \$6.9 million during the three months ended December 31, 2015 and \$3.7 million in the same period of 2014. Development capital expenditures in the fourth quarter of 2015 included \$4.8 million of expenditures relating to the development of the Wassa Underground Mine and \$1.6 million for the improvement of the tailings storage facility.

### FOR THE YEARS ENDED DECEMBER 31, 2015 COMPARED TO YEAR ENDED DECEMBER 31, 2014

### Production

Gold production was 108,266 ounces for 2015, a 5% decrease from the 112,831 ounces sold during 2014. Although ore grade processed and recovery were higher in 2015, production was impacted by lower throughput as Wassa had ore feed from the Father Brown pit in 2014.

### Gold revenues

Gold revenues were \$123.2 million for 2015, compared to \$142.7 million for the same period in 2014. The decrease was due to a 5% decrease in ounces of gold sold and the decline in the average realized gold price to \$1,143 per ounce for the year ended December 31, 2015, compared to \$1,265 per ounce for the year ended December 31, 2014.

### Cost of sales excluding depreciation and amortization

Cost of sales excluding depreciation and amortization was \$99.8 million for 2015, compared to \$117.5 million incurred during 2014. The lower cost of sales is mainly related to the \$19.5 million decrease in mine operating expenses. Lower mining and processing costs incurred during 2015 and the completion of mining of the Father Brown pit contributed to the lower mine operating expenses for the year ended December 31, 2015.

### Depreciation and amortization

Depreciation and amortization for the year ended December 31, 2015 totaled \$14.5 million, consistent with the \$14.6 million recorded for the same period in 2014.

### Cash operating cost per ounce

Wassa's cash operating cost per ounce for the year ended December 31, 2015 totaled \$838, down 14% from \$971 in the same period of 2014. The lower cash operating cost per ounce was due to a decline in mine operating expense as a result of cost saving measures implemented.

### Capital expenditures

Capital expenditures for 2015 were \$33.9 million compared with \$16.4 million in 2014. Sustaining capital expenditures were \$6.5 million for the year ended December 31, 2015 compared to \$4.6 million in 2014. Development capital expenditures were \$27.4 million for the year ended December 31, 2015 compared to \$11.8 million in 2014. Development capital expenditures in the year ended December 31, 2015 included \$20.1 million of expenditures relating to the development of the Wassa Underground Mine, \$5.4 million for the improvement of the tailings storage facility and \$1.9 million developmental drilling at Wassa.

### Bogoso/Prestea operations

Through a 90% owned subsidiary Golden Star (Bogoso/Prestea) Limited, the Company owns and operates the Bogoso gold mining and processing operations and the Prestea mining operations located near the town of Prestea, Ghana. Bogoso/Prestea has a CIL processing facility which is suitable for treating non-refractory gold ore ("Non-refractory plant") with capacity of up to 1.5 million tonnes per annum. Bogoso/Prestea also operated a gold ore processing facility with a capacity of 2.7 million tonnes of ore per annum, which used bio-oxidation technology to treat refractory ore ("Refractory plant"). The Company suspended the refractory operation at the end of the third quarter of 2015.

The Prestea mining operations consists of an existing underground mine, neighbouring open pit deposits and associated support facilities. Bogoso/Prestea currently processes the Prestea open pit ore through the Non-refractory plant. Ore feed from the open pit operations commenced in the third quarter of 2015. The Prestea underground mine is currently being refurbished and development commenced in 2016.

### THREE MONTHS ENDED DECEMBER 31, 2015 COMPARED TO THREE MONTHS ENDED DECEMBER 31, 2014

### Production

Bogoso/Prestea gold production was 20,746 ounces for the fourth quarter of 2015 compared to 46,254 ounces during the same period of 2014. The refractory operation was suspended at the end of the third quarter of 2015 which resulted in a decrease of 25,508 refractory ounces in the fourth quarter of 2015 compared to fourth quarter of 2014.

The decrease in refractory ore production was partially offset by an increase of 19,704 ounces in non-refractory gold production. Mining and processing of non-refractory ore from the Prestea open pits began in the third quarter of 2015.

### Gold revenues

Gold revenues for the fourth quarter of 2015 were \$22.7 million, down \$32.9 million from \$55.6 million in the fourth quarter of 2014 as a result of lower gold production and a lower realized gold price. Gold sold totaled 20,498 ounces in the fourth quarter of 2015, down 56% from 46,254 ounces sold in the same period of 2014 due to the suspension of the refractory operation in the third quarter of 2015. The realized gold price was down 8%, averaging \$1,105 per ounce in the fourth quarter of 2015, compared with \$1,202 per ounce in the same period in 2014.

### Cost of sales excluding depreciation and amortization

Cost of sales excluding depreciation and amortization was \$18.3 million for the fourth quarter of 2015, down 61% from \$46.4 million for the same period in 2014. The decrease was a result of lower costs of mining and processing the Prestea oxide ore through the non-refractory plant, which commenced in the third quarter of 2015. The 59% decline in total ore mined and the 68% decline in total ore processed during the fourth quarter of 2015 compared to the same period in 2014 also contributed to the lower cost of sales excluding depreciation and amortization.

### Depreciation and amortization

Depreciation and amortization expense decreased to \$3.0 million for the fourth quarter of 2015 from \$3.7 million for the fourth quarter of 2014. The depreciation and amortization expense in the fourth quarter of 2015 was lower as a result of lower production compared to the same period in 2014 as well as the impairment charge on the refractory assets recorded in the second quarter of 2015.

### Cash operating cost per ounce

Cash operating cost per ounce of \$849 for the fourth quarter of 2015 was the lowest in five years, compared to \$926 for the same period in 2014 due to the change in cost profile at Bogoso/Prestea. Mining and processing costs in the fourth quarter of 2015 were attributable to the non-refractory operation whereas 91% of the gold sold in the same prior year period was attributable to the higher cost refractory operation that has since been suspended at the end of the third quarter of 2015.

### Capital expenditures

Capital expenditures for the fourth quarter of 2015 were \$5.7 million compared to \$3.3 million incurred during the same period in 2014 as a result of an increase in development capital expenditures. Development capital expenditures increased to \$3.4 million in the fourth quarter of 2015 compared to \$3.1 million in the same period in 2014. Development capital expenditures in the fourth quarter of 2015 were spent on the Prestea Underground Mine.

### FOR THE YEARS ENDED DECEMBER 31, 2015 COMPARED TO YEAR ENDED DECEMBER 31, 2014

### Production

Bogoso/Prestea gold production was 114,150 ounces for the year ended December 31, 2015, down 23% compared to 147,957 ounces in 2014. Refractory gold production decreased to 76,981 ounces in 2015 from the 130,208 ounces produced in 2014 as a result of suspension of the refractory operation at the end of the third quarter of 2015. Non-refractory gold production increased to 37,169 ounces in 2015, more than double the production of 17,749 ounces in 2014 as a result of higher throughput, higher ore grade processed and higher recovery achieved during the year ended December 31, 2015. This increase is due to the commencement of mining and processing of the Prestea oxide ore in the third quarter of 2015.

### Gold revenues

Gold revenues for the year ended December 31, 2015 were \$132.0 million compared to \$186.2 million in 2014. Gold sold totaled 113,902 ounces in the year ended December 31, 2015, down 23% from 147,957 ounces sold in 2014. The realized gold price was down 8%, averaging \$1,159 per ounce in 2015, compared with \$1,258 per ounce in 2014.

### Cost of sales excluding depreciation and amortization

Cost of sales excluding depreciation and amortization was \$145.7 million for the year ended December 31, 2015, down from \$187.4 million in 2014. Mine operating expenses totaled \$128.3 million, 29% lower than the \$180.0 million incurred during 2014 mainly as a result of less material mined and processed in the refractory operation, offset by the \$12.8 million severance charge recorded during 2015 due to of the suspension of refractory operation. Inventory movements in 2015 also offset the mine operating expense decrease by \$4.4 million compared to 2014.

### Depreciation and amortization

Depreciation and amortization expense increased to \$22.8 million for the year ended December 31, 2015, compared to \$11.6 million for 2014. The depreciation and amortization expense for the year ended December 31, 2015 increased due to the lower reserve and resource estimates of the refractory operations compared to the same period in 2014.

### Cash operating cost per ounce

Cash operating cost per ounce was \$1,108 for the year ended December 31, 2015, compared to \$1,180 in 2014 which represents the lowest cost per ounce achieved in five years. The lower cash operating cost per ounce in 2015 was due mainly to the change in cost profile at Bogoso/Prestea. Mining and processing costs per tonne were lower in 2015 as a result of commencement of mining and processing of lower cost Prestea oxide ore through the non-refractory plant in the third quarter of 2015. Mining and processing costs per tonne were higher in 2014 due to higher strip ratio at the refractory pits and higher processing cost per tonne milled on materials from tailings.

### Capital expenditures

Capital expenditures for the year ended December 31, 2015 were \$23.1 million compared to \$17.2 million during 2014. Development capital expenditures were \$19.8 million in 2015 compared to \$15.7 million in 2014. Development capital expenditures in the year ended December 31, 2015 included \$17.1 million on the Prestea Underground Mine and \$2.8 million on the development of the Prestea open pit mines.

<sup>1</sup> Working Capital is calculated as Current Assets minus Current Liabilities as disclosed on the Consolidated Balance Sheet.

### Liquidity and financial condition

The Company held \$35.1 million in cash and cash equivalents as of December 31, 2015, down from \$39.4 million at December 31, 2014. During the year ended December 31, 2015, operations provided \$60.1 million of cash, which included \$75 million proceeds received during 2015 from the Streaming Agreement. Investing activities used cash of \$56.5 million and financing activities used cash of \$7.9 million.

Before working capital changes, operations provided \$53.4 million of operating cash flow during the year ended December 31, 2015, compared to \$4.5 million provided by operations in the same period in 2014 due to the \$75 million proceeds received during 2015 from the Streaming Agreement. Working capital changes provided \$6.7 million during 2015, compared to \$2.1 million used by working capital in 2014. The working capital changes in 2015 related to a \$9.7 million decrease in accounts receivable, \$4.5 million increase in accounts payable and accrued liabilities, offset by a \$6.8 million increase in inventory and \$0.7 million increase in prepaid and other.

The working capital deficit increased from \$32.0 million at December 31, 2014 to \$65.8 million at December 31, 2015 mainly due to a decrease in inventories by \$17.6 million, decrease in accounts receivable by \$9.7 million and a \$11.5 million increase in current portion of deferred revenue.

Investing activities used \$56.5 million during 2015, which included \$20.1 million on the development of the Wassa Underground Mine, \$17.1 million on the Prestea Underground Mine, \$4.5 million on the development of the Prestea open pit mines and \$10.2 million on upgrades of the processing plant and the expansion of the tailings facility at Wassa.

Financing activities used \$7.9 million cash in 2015 compared to \$8.0 million provided in 2014. During the year ended December 31, 2015, the Company drew down \$22.0 million on the Ecobank Loan II and received \$20.0 million from the term loan financing with RGI. The Company fully settled the Ecobank loan I in the amount of \$39.2 million and made an additional \$9.4 million of principal debt repayments in 2015. During the same period in 2014, the Company drew down a total of \$20.0 million under the Ecobank Loan I and made \$12.0 million principal repayments of debt.

### Liquidity outlook

As of December 31, 2015, the Company had \$35.1 million in cash and a working capital deficit of \$65.8 million. Excluding the non-cash deferred revenue the working capital deficit is \$54.2 million. The ability of the Company to reduce the working capital deficit will depend on whether gold prices for 2016 increase significantly beyond the average realized gold price for 2015. The Company expects to produce 180,000 to 205,000 ounces of gold at a cash operating cost of \$815 – \$925 per ounce.

The current liabilities include an outstanding amount due to the electricity provider in Ghana of \$44.8 million. The Company has been in negotiations with the electricity provider since late 2013 to determine a mutually beneficial method to settle the outstanding balance. However, to date no such settlement has been reached. Accordingly, if the electricity provider demands repayment of the outstanding balance and it is not repaid, it could cease to provide power to Bogoso/Prestea which could also result in the Company being in default of certain of its contractual obligations with third parties. Unless alternative sources of power are available on terms acceptable to the Company, this could have a material adverse effect on the Company's results of operations and financial condition.

In addition to the cash operating costs the Company has to pay a 5% royalty to the Government of Ghana, reclamation expenditures, corporate general and administration expenditures, interest and principal payments on long term debt and capital expenditures.

The Company expects to incur \$90 million on capital expenditures during 2016, of which \$81 million is development capital expenditure and \$9 million is sustaining capital expenditure. If gold prices fall significantly from current levels the Company could defer some of the development capital expenditure to meet its obligations.

During 2015, the Company closed the streaming and financing arrangements with RGI and its wholly-owned subsidiary RGLD. The Streaming Agreement, consists of \$145 million gold stream of which \$75 million was received in 2015. The Company expects to receive a further \$70 million in quarterly stream payments upon satisfaction of the development progress of the Wassa and Prestea underground mines. At Golden Star's option, an additional \$5 million of stream financing is available subject to certain conditions including procurement of a minimum of \$5 million of third party investment.

The Company expects that the existing cash balance, the funds available from the Ecobank Loan II facility and the proceeds from the Streaming Agreement combined with the expected mine operating margin will be sufficient to fund operations and capital expenditures as required for the development of the Wassa Underground and the Prestea Underground Mines.

The Company has a \$77.5 million 5% Convertible Debenture due on June 1, 2017. On maturity, the Company may, at its option, satisfy the repayment obligation by paying the principal amount of the 5% Convertible Debentures in cash or, subject to certain limitations, by issuing that number of the Company's common shares obtained by dividing the principal amount of the 5% Convertible Debentures outstanding by 95% of the weighted average trading price of the Company's common shares on the NYSE MKT for the 20 consecutive trading days ending five trading days preceding the maturity date (the "Current Market Price") provided that the aggregate maximum number of common shares to be issued may not exceed 19.99% of the issued and outstanding common shares as of the closing date. If the Company elects to repay the principal amount of the 5% Convertible Debentures at maturity by issuing common shares, and the Company is limited under the terms of the indenture from issuing a number of common shares sufficient to fully repay the 5% Convertible Debentures outstanding at maturity, the Company is required to pay the balance owing in cash, based on the difference between the principal amount of the 5% Convertible Debentures outstanding and the value of the common shares (based on the Current Market Price) delivered in repayment of the 5% Convertible Debentures.

The Company will assess the optimal settlement closer to the maturity of the Convertible Debenture. Considerations of the optimal settlement will include, expected gold price, the Company's cash balance prior to maturity, the Company's share price prior to maturity and the expected future cash flow generated by operations. Failure by the Company to repay the 5% Convertible Debentures when due, or to make other satisfactory arrangements and/or the failure to restructure the 5% Convertible Debentures may cause the Company to delay or indefinitely postpone development activities or may cause the Company to suspend or terminate its operations or development activities, any of which could have a material adverse effect on the Company's results of operations and financial condition.

GOLDEN STAR RESOURCES | ANNUAL REPORT 2015

25

# Table of contractual obligations

### Payment due by period

Accounts payable and accrued liabilities Debt <sup>1</sup>	\$ 110,811 4,889	\$ – 87,268	\$ – 27,333	\$ - -	\$ 110,811 119,490
Finance leases	3,777	3,644	_	_	7,421
Interest on long term debt	7,978	7,908	1,573	_	17,459
Other long term liabilities <sup>2</sup> Purchase obligations	13,369 7,944	8,630 -	_	_	21,999 7,944
Rehabilitation provisions <sup>3</sup>	3,660	17,916	26,208	38,941	86,725
TOTAL	\$ 152,428	\$ 125,366	\$ 55,114	\$ 38,941	\$ 371,849

<sup>1</sup> Includes the outstanding repayment amounts from the 5% Convertible Debentures maturing in June 2017, the Ecobank Loan II, the loan from RGI and the equipment financing loans. Golden Star has the right to repay the \$77.5 million principal amount of the 5% Convertible Debentures in cash or in common shares at the due date under certain circumstances provided that the aggregate maximum number of common shares to be issued may not exceed 19.99% of the issued and outstanding common shares as of the closing date. The presentation shown above assumes payment is made in cash and also assumes no conversions of the 5% Convertible Debentures into common shares by the holders prior to the maturity date.

### Related party transactions

There were no material related party transactions in 2015 and 2014 other than compensation of key management personnel which is presented in the table below. Key management personnel are defined as members of the Board of Directors and certain senior officers.

	For the years ended December 31,						
(Stated in thousands of U.S dollars)	2015		2014				
Salaries, wages, and other benefits	\$ 2,438	\$	2,139				
Bonuses	983		868				
Share-based compensation	593		1,145				
	\$ 4,014	\$	4,152				

### Off-balance sheet arrangements

The Company has no material off-balance sheet arrangements.

<sup>2</sup> These amounts represent the agreement with the electricity provider in Ghana for deferral of payments of certain accounts payable to 2016 and 2017.

<sup>3</sup> Rehabilitation provisions indicates the expected undiscounted cash flows for each period.

### Non-GAAP financial measures

In this MD&A, we use the terms "cash operating cost", "cash operating cost per ounce", "all-in sustaining costs", "all-in sustaining costs per ounce", "cash provided by operations before working capital changes", "adjusted net income/(loss) attributable to Golden Star shareholders" and "adjusted earnings/(loss) per share attributable to Golden Star shareholders" and "cash provided by operations before working capital changes".

"Cost of sales excluding depreciation and amortization" as found in the statements of operations includes all mine-site operating costs, including the costs of mining, ore processing, maintenance, work-in-process inventory changes, mine-site overhead as well as production taxes, royalties, and by-product credits, but excludes exploration costs, property holding costs, corporate office general and administrative expenses, foreign currency gains and losses, gains and losses on asset sales, interest expense, gains and losses on derivatives, gains and losses on investments and income tax expense/benefit.

"Cash operating cost" for a period is equal to "Cost of sales excluding depreciation and amortization" for the period less royalties and production taxes, minus the cash component of metals inventory net realizable value adjustments and severance charges, and "cash operating cost per ounce" is that amount divided by the number of ounces of gold sold during the period. We use cash operating cost per ounce as a key operating indicator. We monitor this measure monthly, comparing each month's values to prior periods' values to detect trends that may indicate increases or decreases in operating efficiencies. We provide this measure to investors to allow them to also monitor operational efficiencies of the Company's mines. We calculate this measure for both individual operating units and on a consolidated basis. Since cash operating costs do not incorporate revenues, changes in working capital and non-operating cash costs, they are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Changes in numerous factors including, but not limited to, mining rates, milling rates, ore grade, gold recovery, costs of labor, consumables and mine site general and administrative activities can cause these measures to increase or decrease. We believe that these measures are similar to the measures of other gold mining companies, but may not be comparable to similarly titled measures in every instance.

"All-in sustaining costs" commences with cash operating costs and then adds sustaining capital expenditures, corporate general and administrative costs, mine site exploratory drilling and greenfield evaluation costs and environmental rehabilitation costs. "All-in sustaining costs per ounce" is that amount divided by the number of ounces of gold sold during the period. This measure seeks to represent the total costs of producing gold from current operations, and therefore it does not include capital expenditures attributable to projects or mine expansions, exploration and evaluation costs attributable to growth projects, income tax payments, interest costs or dividend payments. Consequently, this measure is not representative of all of the Company's cash expenditures. In addition, the calculation of all-in sustaining costs does not include depreciation expense as it does not reflect the impact of expenditures incurred in prior periods. Therefore, it is not indicative of the Company's overall profitability.

The Company believes that "all-in sustaining costs" will better meet the needs of analysts, investors and other stakeholders of the Company in understanding the costs associated with producing gold, understanding the economics of gold mining, assessing the operating performance and also the Company's ability to generate free cash flow from current operations and to generate free cash flow on an overall Company basis. Due to the capital intensive nature of the industry and the long useful lives over which these items are depreciated, there can be a disconnect between net earnings calculated in accordance with IFRS and the amount of free cash flow that is being generated by a mine. In the current market environment for gold mining equities, many investors and analysts are more focused on the ability of gold mining companies to generate free cash flow from current operations, and consequently the Company believes these measures are useful non-IFRS operating metrics ("non-GAAP measures") and supplement the IFRS disclosures made by the Company. These measures are not representative of all of Golden Star's cash expenditures as they do not include income tax payments or interest costs. Non-GAAP measures are intended to provide additional information only and do not have standardized definitions under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. The table below reconciles these non-GAAP measures to the most directly comparable IFRS measures and previous periods have been recalculated to conform to the current definition.

The table below reconciles consolidated cost of sales excluding depreciation and amortization to cash operating cost per ounce and all-in sustaining costs per ounce:

	Three months ended December 31,			For the years ended December 31,			
(Stated in thousands of U.S dollars except cost per ounce data)	2015		2014	2015	2014		
COST OF SALES EXCLUDING DEPRECIATION AND AMORTIZATION	\$ 39,354	\$	71,410	\$ 245,494	\$ 304,912		
Severance charges	231		(815)	(14,626)	(2,844)

Ounces sold	112,831	147,957	260,788
Cash operating cost per ounce	\$ 971	\$ 1,180	\$ 1,090

"Cash provided by operations before working capital changes" is calculated by subtracting the "Changes in working capital" from "Net cash provided by operating activities" as found in the statements of cash flows.

We use cash operating cost per ounce and cash (used in)/provided by operations before working capital changes as key operating indicators. We monitor these measures monthly, comparing each month's values to prior periods' values to detect trends that may indicate increases or decreases in operating efficiencies. These measures are also compared against budget to alert management of trends that may cause actual results to deviate from planned operational results. We provide these measures to the investors to allow them to also monitor operational efficiencies of the mines owned by the Company. We calculate these measures for both individual operating units and on a consolidated basis.

Cash operating cost per ounce and cash provided by operations before working capital changes should be considered as non-GAAP financial measures as defined in the Canadian securities laws and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. There are material limitations associated with the use of such non-GAAP measures. Since these measures do not incorporate revenues, changes in working capital and non-operating cash costs, they are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Changes in numerous factors including, but not limited to, mining rates, milling rates, ore grade, gold recovery, costs of labor, consumables and mine site general and administrative activities can cause these measures to increase or decrease. We believe that these measures are similar to the measures of other gold mining companies, but may not be comparable to similarly titled measures in every instance.

### ADJUSTED NET INCOME/(LOSS) ATTRIBUTABLE TO GOLDEN STAR SHAREHOLDERS

The table below shows the reconciliation of net income/(loss) attributable to Golden Star shareholders to adjusted net income/(loss) attributable to Golden Star shareholders and adjusted earnings/(loss) per share attributable to Golden Star shareholders:

		Three months ended December 31,			For the years ended December 31,			
(Stated in thousands of U.S dollars except per share data)		2015		2014		2015		2014
Net income/(loss) attributable to Golden Star shareholders	\$	13,781	\$	(48,155)	\$	(67,681)	\$	(73,079)
Add back:								
Loss/(gain) on fair value of financial instruments		(1,658)		(1,501)		(1,712)		538
Severance charges		(231)		815		14,626		2,844
Gain on reduction of asset retirement obligations		(5,651)		-		(5,651)		-
Impairment charges		-		57,747		34,396		57,747
		6,241		8,906		(26,022)		(11,950)
Adjustments attributable to non-controlling interest		588		(81)		(4,337)		(284)
Adjusted net income/(loss) attributable to Golden Star shareholders	\$	6,829	\$	8,825	\$	(30,359)	\$	(12,234)
Adjusted earnings/(loss) per share attributable to Golden Star shareholders								
Basic and diluted	\$	0.03	\$	0.03	\$	(0.12)	\$	(0.05)
Weighted average shares outstanding – basic and diluted (millions)		259.8		259.4		259.7		259.4

In order to indicate to stakeholders the Company's earnings excluding the non-cash (gain)/loss on the fair value of the 5% Convertible Debentures, non-cash impairment charges, non-cash gain on reduction of asset retirement obligations and severance charges, the Company calculates "adjusted net income/(loss) attributable to Golden Star shareholders" and "adjusted net income/(loss) per share attributable to Golden Star shareholders" to supplement the condensed interim consolidated financial statements.

Adjusted net income/(loss) attributable to Golden Star shareholders and adjusted net earnings/(loss) per share attributable to Golden Star shareholders should be considered as non-GAAP financial measures as defined in the Canadian securities laws and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. There are material limitations associated with the use of such non-GAAP measures. Since these measures do not incorporate all non-cash expense and income items, changes in working capital and non-operating cash costs, they are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Changes in numerous factors including, but not limited to, our share price, risk free interest rates, gold prices, mining rates, milling rates, ore grade, gold recovery, costs of labor, consumables and mine site general and administrative activities can cause these measures to increase or decrease. The Company believes that these measures are similar to the measures of other gold mining companies, but may not be comparable to similarly titled measures in every instance.

### Outstanding share data

As of February 24, 2016, there were 259,897,095 common shares of the Company issued and outstanding, 13,911,234 stock options outstanding, 4,496,279 deferred share units outstanding, 5,000,000 warrants outstanding and 5% Convertible Debentures which are convertible into an aggregate of 46,963,636 common shares. The Company's share appreciation rights, performance share units and restricted share units are cash settled instruments.

### Critical accounting judgments, estimates and assumptions

The critical accounting estimates and assumptions are disclosed in Note 4 of the audited consolidated financial statements for the year ended December 31, 2015.

### Changes in accounting policies

The changes in accounting policies and standards, interpretations and amendments not yet effective are disclosed in Note 3 of the audited consolidated financial statements for the year ended December 31, 2015.

### Financial instruments

(Stated in thousands of U.S dollars)	 air value at cember 31, 2015	Basis of measurement	Associated risks
Cash and cash equivalents	\$ 35,108	Loans and receivables	Interest/Credit/Foreign exchange
Accounts receivable	5,114	Loans and receivables	Foreign exchange/Credit
Trade and other payables	71,081	Amortized cost	Foreign exchange/Interest
5% Convertible Debentures	46,406	Fair value through profit and loss	Interest
Warrants	407	Fair value through profit and loss	Market price
Royal Gold Ioan, net of fees	18,175	Amortized cost	Interest
Ecobank Loan II, net of fees	21,437	Amortized cost	Interest
Equipment financing facility	4,386	Amortized cost	Interest
Finance leases	3,035	Amortized cost	Interest
Other long term liabilities	20,495	Amortized cost	Interest/Foreign exchange

Loans and receivables – Cash and cash equivalents and accounts receivables mature in the short term and approximate their fair values.

Amortized costs – Trade and other payables, the Royal Gold loan, the Ecobank Loan II, the equipment financing facility and the finance leases approximate their carrying values as the interest rates are comparable to current market rates. Carrying value of the other long term liabilities has been discounted to reflect its fair value.

### FAIR VALUE THROUGH PROFIT OR LOSS

5% Convertible Debentures – The debt component of the 5% Convertible Debentures is valued based on discounted cash flows and the conversion feature is valued using a Black Scholes model. The risk free interest rate used in the fair value computation is the interest rate on the US treasury rate with maturity similar to the remaining life of the 5% Convertible Debentures. The discount rate used is determined by adding the risk premium to the risk free interest rate. A market-based volatility rate was also applied to the fair value computation. For the three and twelve months ended December 31, 2015, a revaluation gain of \$1.5 million and \$1.4 million were recorded respectively while revaluation gain of \$1.5 million and revaluation loss of \$0.5 million were included in earnings for the three and twelve months ended December 31, 2014.

Warrants – The fair value of the warrants is estimated based on the Black-Scholes model. For the three and twelve months ended December 31, 2015, a revaluation gain of \$0.2 million and \$0.3 million were recorded respectively.

### Disclosures about risks

The Company's exposure to significant risks include, but is not limited to, the following risks: change in interest rates on our debt, change in foreign currency exchange rates, commodity price fluctuations, liquidity risk and credit risk. In recognition of the Company's increase in accounts payable, the Company cannot guarantee that vendors or suppliers will not suspend or deny delivery of products or services to the Company. For a complete discussion of the risks, refer to the disclosures in Notes 25 and 26 of the audited consolidated financial statements for the year ended December 31, 2015.

### Controls and procedures

### **DISCLOSURE CONTROLS AND PROCEDURES**

The Company's management, with the participation of its President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures. Based upon the results of that evaluation, the Company's President and Chief Executive Officer and Executive Vice President and Chief Financial Officer have concluded that, as of December 31, 2015, the Company's disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by the Company in reports it files is recorded, processed, summarized and reported, within the appropriate time periods and is accumulated and communicated to management, including the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

### MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Company's management, with the participation of its President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, are responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision of the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, the Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Company's internal control over financial reporting includes policies and procedures that:

- pertain to the maintenance of records that accurately and fairly reflect, in reasonable detail, the transactions and dispositions of assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS and that the Company's receipts and expenditures are made only in accordance with authorizations of management and the Company's directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's consolidated financial statements.

The Company's management, including the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, believes that any disclosure controls and procedures or internal control over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any control system also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

The Company's management, under the supervision of the President and Chief Executive Officer and the Executive Vice President and Chief Financial Officer, assessed the effectiveness of the Company's internal control over financial reporting as at December 31, 2014. In making this assessment, it used the criteria set forth in the Internal Control – integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013). Based on our assessment, management has concluded that, as at December 31, 2015, the Company's internal control over financial reporting is effective based on those criteria.

The Company's internal control over financial reporting as at December 31, 2015 has been audited by PricewaterhouseCoopers ("PWC") Chartered Professional Accountants, Licensed Public Accountants who also audited the Company's Consolidated Financial Statements for the year ended December 31, 2015. PwC as stated in their report that immediately precedes the Company's audited consolidated financial statements for the year ended December 31, 2015, expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

### CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There has been no change in the Company's design of internal controls and procedures over financial reporting that has materially affected, or is reasonable likely to materially affect, the Company's internal control over financial reporting during the period covered by this MD&A.

### Risk factors and additional information

The risk factors for the year ended December 31, 2015, are substantially the same as those disclosed and discussed in our annual information form for the year ended December 31, 2014. Additional and/or updated risk factors, if applicable, will be included in our annual information form for the year ended December 31, 2015, which will be filed on SEDAR at www.sedar.com.

# Financial statements Management's responsibility for financial statements

The accompanying consolidated financial statements of Golden Star Resources Ltd. (the "Company") and all information in this financial report are the responsibility of management. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards and, where appropriate, include management's best estimates and judgments.

Management maintains a system of internal control designed to provide reasonable assurance that assets are safeguarded from loss or unauthorized use, and that financial information is timely and reliable. However, any system of internal control over financial reporting, no matter how well designed and implemented, has inherent limitations and may not prevent or detect all misstatements.

The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the consolidated financial statements.

The Board carries out this responsibility principally through its Audit Committee. The Board of Directors appoints the Audit Committee, and all of its members are independent directors. The Audit Committee meets periodically with management and the auditors to review internal controls, audit results, accounting principles and related matters. The Board of Directors approves the consolidated financial statements on recommendation from the Audit Committee.

PricewaterhouseCoopers LLP, an independent firm of Chartered Professional Accountants, was appointed by the shareholders at the last annual meeting to examine the consolidated financial statements and provide an independent professional opinion. PricewaterhouseCoopers LLP has full and free access to the Audit Committee.

### February 24, 2016

### To the Shareholders of Golden Star Resources Ltd.

We have completed an integrated audit of Golden Star Resources Ltd.'s (the company) 2015 and 2014 consolidated financial statements and its internal control over financial reporting as at December 31, 2015. Our opinions, based on our audits, are presented below.

#### REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

We have audited the accompanying consolidated financial statements of the company, which comprise the consolidated balance sheets as at December 31, 2015 and 2014 and the consolidated statements of operations and comprehensive loss, cash flows, and changes in shareholders' equity for the years ended December 31, 2015 and 2014, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

### MANAGEMENT'S RESPONSIBILITY FOR THE CONSOLIDATED FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### **AUDITOR'S RESPONSIBILITY**

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement. Canadian generally accepted auditing standards also require that we comply with ethical requirements.

An audit involves performing procedures to obtain audit evidence, on a test basis, about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting principles and policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

### OPINION

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the company as at December 31, 2015 and 2014 and its financial performance and its cash flows for the years ended December 31, 2015 and 2014 in accordance with IFRS as issued by the IASB.

PricewaterhouseCoopers LLP PwC Tower, 18 York Street, Suite 2600, Toronto, ON, Canada M5J 0B2 T: +1 416 863 1133, F:+1 416 365 8215, www.pwc.com/ca

"PwC" refers to PricewaterhouseCoopers LLP, an Ontario limited liability partnership.

# Independent auditor's report - continued

### REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

We have also audited the company's internal control over financial reporting as at December 31, 2015, based on criteria established in Internal Control – Integrated Framework (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

### MANAGEMENT'S RESPONSIBILITY FOR INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting.

#### **AUDITOR'S RESPONSIBILITY**

Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control, based on the assessed risk, and performing such other procedures as we consider necessary in the circumstances.

We believe that our audit provides a reasonable basis for our audit opinion on the company's internal control over financial reporting.

### **DEFINITION OF INTERNAL CONTROL OVER FINANCIAL REPORTING**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### **INHERENT LIMITATIONS**

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

### OPINION

In our opinion, the company maintained, in all material respects, effective internal control over financial reporting as at December 31, 2015, based on criteria established in Internal Control – Integrated Framework (2013) issued by COSO.

### Golden Star Resources Ltd

# Notes to the consolidated financial statements For the year ended December 31, 2015

(All currency amounts in tables are in thousands of U.S. dollars unless noted otherwise)

## 1. Nature of operations

Golden Star Resources Ltd. ("Golden Star" or "the Company" or "we" or "our") is a Canadian federally-incorporated, international gold mining and exploration company headquartered in Toronto, Canada. The Company's shares are listed on the Toronto Stock Exchange (the "TSX") under the symbol GSC, the NYSE MKT under the symbol GSS and the Ghana stock exchange under the symbol GSR. The Company's registered office is located at 150 King Street West, Sun Life Financial Tower, Suite 1200, Toronto, Ontario, M5H IJ9, Canada.

Through a 90% owned subsidiary, Golden Star (Wassa) Limited, we own and operate the Wassa open-pit gold mine, the Wassa underground development project and a carbon-in-leach ("CIL") processing plant (collectively, "Wassa"), located approximately 35 kilometers northeast of the town of Tarkwa, Ghana. Through our 90% owned subsidiary Golden Star (Bogoso/Prestea) Limited, the Company owns and operates the Bogoso gold mining and processing operations ("Bogoso") and the Prestea mining operations located near the town of Prestea, Ghana. We hold interests in several gold exploration projects in Ghana and other parts of West Africa, and in South America we hold and manage exploration properties in Brazil.

At Bogoso/Prestea, the Company processed both refractory and non-refractory ore. The Company suspended the refractory operation in the third quarter of 2015 in conjunction with its business strategy to focus on lower cost mining opportunities.

## 2. Basis of presentation

### STATEMENT OF COMPLIANCE

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and with interpretations of the International Financial Reporting Interpretations Committee ("IFRIC") which the Canadian Accounting Standards Board has approved for incorporation into Part 1 of the CPA Canada Handbook – Accounting.

These consolidated financial statements were approved by the Board of Directors of the Company on February 24, 2016.

### **BASIS OF PRESENTATION**

These consolidated financial statements include the accounts of the Company and its subsidiaries, whether owned directly or indirectly. The financial statements of the subsidiaries are prepared for the same period as the Company using consistent accounting policies for all periods presented. All inter-company balances and transactions have been eliminated. Subsidiaries are entities controlled by the Company. Non-controlling interests in the net assets of consolidated subsidiaries are a separate component of the Company's equity.

These consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and discharge of all liabilities in the normal course of business.

The consolidated financial statements have been prepared on a historical cost basis, except for derivative financial instruments which are measured at fair value through profit or loss.

## 3. Summary of accounting policies

### **CASH AND CASH EQUIVALENTS**

Cash includes cash deposits in any currency residing in chequing and sweep accounts. Cash equivalents consist of money market funds and other highly liquid investments purchased with maturities of three months or less. Investments with maturities greater than three months and up to one year are classified as short-term investments, while those with maturities in excess of one year are classified as long-term investments. Cash equivalents and short-term investments are stated at amortized cost, which typically approximates market value.

### **INVENTORIES**

Inventory classifications include "stockpiled ore," "in-process inventory," "finished goods inventory" and "materials and supplies". The stated value of all production inventories include direct production costs and attributable overhead and depreciation incurred to bring the materials to their current point in the processing cycle. General and administrative costs for corporate offices are not included in any inventories.

Stockpiled ore represents coarse ore that has been extracted from the mine and is stored for future processing. Stockpiled ore is measured by estimating the number of tonnes (via truck counts or by physical surveys) added to, or removed from the stockpile, the number of contained ounces (based on assay data) and estimated gold recovery percentage. Stockpiled ore value is based on the costs incurred (including depreciation and amortization) in bringing the ore to the stockpile. Costs are added to the stockpiled ore based on current mining costs per tonne and are removed at the average cost per tonne of ore in the stockpile.

In-process inventory represents material that is currently being treated in the processing plants to extract the contained gold and to transform it into a saleable product. The amount of gold in the in-process inventory is determined by assay and by measure of the quantities of the various gold-bearing materials in the recovery process. The in-process gold is valued at the average of the beginning inventory and the cost of material fed into the processing stream plus in-process conversion costs including applicable mine-site overheads, depreciation and amortization related to the processing facilities.

Finished goods inventory is saleable gold in the form of doré bars. Included in the costs are the direct costs of the mining and processing operations as well as direct mine-site overheads, amortization and depreciation.

Materials and supplies inventories consist mostly of equipment parts and other consumables required in the mining and ore processing activities.

All inventories are valued at the lower of average cost or net realizable value.

### PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment assets, including machinery, processing equipment, mining equipment, mine site facilities, buildings, vehicles and expenditures that extend the life of such assets, are initially recorded at cost including acquisition and installation costs. Property, plant and equipment are subsequently measured at cost, less accumulated depreciation and accumulated impairment losses.

The costs of self-constructed assets include direct construction costs and direct overhead during the construction phase. Indirect overhead costs are not included in the cost of self-constructed assets.

Depreciation for mobile equipment and other assets having estimated lives shorter than the estimated life of the ore reserves is calculated using the straight-line method at rates which depreciate the cost of the assets, less their anticipated residual values, if any, over their estimated useful lives. Mobile mining equipment is amortized over a five year life. Assets, such as processing plants, power generators and buildings, which have an estimated life equal to or greater than the estimated life of the ore reserves, are amortized over the life of the proven and probable reserves of the associated mining property using a units-of-production amortization method, less their anticipated residual values, if any. The net book value of property, plant and equipment assets is charged against income if the mine site is abandoned and it is determined that the assets cannot be economically transferred to another project or sold.

The residual values, useful lives and method of depreciation of property, plant and equipment are reviewed at each reporting period end, and adjusted prospectively if appropriate.

Gains and losses on the disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount, and are recognized net in the consolidated statement of operations.

# Golden Star Resources Ltd

# Notes to the consolidated financial statements – continued

### MINING PROPERTIES

Mining property assets, including property acquisition costs, tailings storage facilities, mine-site development and drilling costs where proven and probable reserves have been established, pre-production waste stripping, condemnation drilling, roads, feasibility studies and wells are recorded at cost. The costs of self-constructed assets include direct construction costs, direct overhead costs and allocated interest during the construction phase. Indirect overhead costs are not included in the cost of self-constructed assets.

Mining property assets are amortized over the life of the proven and probable reserves to which they relate, using a units-of-production amortization method. At open pit mines the costs of removing overburden from an ore body in order to expose ore during its initial development period are capitalized.

### UNDERGROUND MINE DEVELOPMENT COSTS

Underground mine development costs include development costs to build new shafts, drifts and ramps that will enable the Company to physically access ore underground. The time over which the Company will continue to incur these costs depends on the mine life. These underground development costs are capitalized as incurred. Capitalized underground development costs incurred to enable access to specific ore blocks or areas of the underground mine, and which only provide an economic benefit over the period of mining that ore block or area, are depreciated on a units-of-production basis, whereby the denominator is estimated ounces of gold in proven and probable reserves and the portion of resources within that ore block or area that is considered probable of economic extraction. If capitalized underground development costs provide an economic benefit over the entire mine life, the costs are depreciated on a units-of-production basis, whereby the denominator is the estimated ounces of gold in total accessible proven and probable reserves and the portion of resources that is considered probable of economic extraction.

### **BETTERMENT STRIPPING (WASTE REMOVAL) COSTS**

As part of its operations, the Company incurs stripping (waste removal) costs both during the development phase and production phase of its operations. Stripping costs incurred as part of development stage mining activities incurred by the Company are capitalized as part of mining properties.

Stripping costs incurred during the production stage are incurred in order to produce inventory or to improve access to ore which will be mined in the future. Where the costs are incurred to produce inventory, the production stripping costs are accounted for as a cost of producing those inventories. Where the costs are incurred to improve access to ore to be mined in the future, the costs are recognized as a stripping activity asset (a non-current asset) if improved access to the ore body is probable, the component of the ore body can be accurately identified and the costs associated with improving the access can be reliably measured. If these criteria are not met the cost is expensed to the consolidated statement of operations as incurred.

The betterment stripping asset is subsequently depreciated using the units-of-production amortization method over the life of the identified component of the ore body that became more accessible as a result of the betterment stripping activity.

### **BORROWING COSTS**

Borrowing costs attributable to the acquisition, construction or production of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use are capitalized until such time as the assets are substantially ready for their intended use. Other borrowing costs are recognized as an expense in the period in which they are incurred.

### IMPAIRMENT OF LONG-LIVED ASSETS

The Company assesses at each reporting period whether there is an indication that an asset or group of assets may be impaired. When impairment indicators exist, the Company estimates the recoverable amount of the asset and compares it against the asset's carrying amount. The recoverable amount is the higher of its fair value less cost of disposal ("FVLCD") and the asset's value in use ("VIU"). If the carrying amount exceeds the recoverable amount, an impairment loss is recorded in the consolidated statement of operations.

In assessing VIU, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset not already reflected in the estimates of future cash flows. The cash flows are based on best estimates of expected future cash flows from the continued use of the asset and its eventual disposal.

FVLCD is best evidenced if obtained from an active market or binding sale agreement. Where neither exists, the fair value is based on the best estimates available to reflect the amount that could be received from an arm's length transaction.

Future cash flows are based on estimated quantities of gold and other recoverable metals, expected price of gold (considering current and historical prices, price trends and related factors), production levels and cash costs of production, capital and reclamation costs, all based on detailed engineered life-of-mine plans.

Numerous factors including, but not limited to, unexpected grade changes, gold recovery variances, shortages of equipment and consumables, equipment failures, and collapse of pit walls could impact our ability to achieve forecasted production schedules from proven and probable reserves. Additionally, commodity prices, capital expenditure requirements and reclamation costs could differ from the assumptions used in the cash flow models used to assess impairment. The ability to achieve the estimated quantities of recoverable minerals from exploration stage mineral interests involves further risks in addition to those factors applicable to mineral interests where proven and probable reserves have been identified, due to the lower level of confidence that the identified mineralized material can ultimately be mined economically.

If an impairment loss reverses in a subsequent period, the carrying amount (post reversal) of the related asset is increased to the revised estimate of recoverable amount to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset previously. Reversals of impairment losses are recognized in the statement of operations in the period the reversals occur.

Material changes to any of the factors or assumptions discussed above could result in future asset impairments.

#### REHABILITATION PROVISIONS

The Company records a liability and corresponding asset for the present value of the estimated costs of legal and constructive obligations for future site reclamation and closure where the liability is probable and a reasonable estimate can be made of the obligation. The estimated present value of the obligation is reassessed on a periodic basis or when new material information becomes available. Increases or decreases to the obligation usually arise due to changes in legal or regulatory requirements, the extent of environmental remediation required, methods of reclamation, cost estimates, inflation rates, or discount rates. Changes to the provision for reclamation and remediation obligations related to operating mines, which are not the result of current production of inventory, are recorded with an offsetting change to the related asset. Changes to the provision for reclamation and remediation obligations related to suspended mine operations are recognized in the consolidated statements of operations and comprehensive loss. The present value is determined based on current market assessments of the time value of money using discount rates based on the risk-free rate maturing approximating the timing of expected expenditures to be incurred, and adjusted for country related risks. The periodic unwinding of the discount is recognized in the consolidated statement of operations as a finance expense.

### **DEFERRED REVENUE**

Deferred revenue consists of payments received by the Company for future delivery of payable gold under the terms of the Company's Streaming Agreement. As deliveries are made, the Company will record a portion of the deferred revenue as sales, on a unit of production basis over the volume of gold expected to be delivered during the term of the streaming arrangement. The amount by which the deferred revenue balance is reduced and recognized into revenue is based on a rate per ounce of gold delivered under the stream. This rate per ounce of gold delivered is based on the remaining deferred revenue balance divided by the ounces that are expected to be delivered under the Stream Arrangement over the life of the arrangement. This estimate is re-evaluated at each reporting period with any resulting changes in estimate reflected prospectively.

The Streaming Agreement has been recorded as a contract for the future delivery of gold ounces at the contracted price. The upfront payments are accounted for as prepayments of yet-to-be delivered ounces under the contract and are recorded as deferred revenue. The initial term of the contract is 40 years and the deposit bears no interest.

# Golden Star Resources Ltd

# Notes to the consolidated financial statements – continued

### PROPERTY HOLDING COST

Property holding costs are costs incurred to retain and maintain properties. Such costs are expensed in the period incurred.

### FOREIGN CURRENCY TRANSACTIONS

The Company's presentation currency of its consolidated financial statements is the U.S. dollar, as is the functional currency of its operations. The functional currency of all consolidated subsidiaries is the U.S. dollar. All values are rounded to the nearest thousand, unless otherwise stated.

Monetary assets and liabilities denominated in foreign currencies are translated into U.S. dollars at period end exchange rates. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated into U.S. dollars at the exchange rate at the date that the fair value was determined. Income and expense items are translated at the exchange rate in effect on the date of the translation. Exchange gains and losses resulting from the translation of these amounts are included in net loss, except those arising on the translation of available-for-sale investments that are recorded in other comprehensive income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at historical cost are translated at the exchange rate in effect at the transaction date.

#### **INCOME TAXES**

Income taxes comprise the provision for (or recovery of) taxes actually paid or payable (current taxes) and for deferred taxes.

Current taxes are based on taxable earnings in the year. Current tax is calculated using tax rates and laws that were enacted or substantively enacted at the balance sheet date in the respective jurisdictions.

Current income tax assets and current income tax liabilities are only offset if a legally enforceable right exists to offset the amounts and the Company intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

Deferred income tax assets and liabilities are recognized for the expected future tax consequences attributable to temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. Deferred income tax assets and liabilities are computed using enacted or substantially enacted income tax rates in effect when the temporary differences are expected to reverse. The effect on the deferred tax assets and liabilities of a change in tax rates is recognized in the period of substantial enactment. The provision for or the recovery of deferred taxes is based on the changes in deferred tax assets and liabilities during the period.

The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and recognized to the extent that it is probable that taxable earnings will be available against which deductible temporary differences can be utilized.

### **NET INCOME/(LOSS) PER SHARE**

Basic income/(loss) per share of common stock is calculated by dividing income available to Golden Star's common shareholders by the weighted average number of common shares issued and outstanding during the period. In periods with earnings, the calculation of diluted net income per common share uses the treasury stock method to compute the dilutive effects of stock options and warrants, and other potentially dilutive instruments. In periods of loss, diluted net loss per share is equal to basic income per share.

### **REVENUE RECOGNITION**

Revenue from the sale of metal is recognized when the significant risks and rewards of ownership have passed to the purchaser. This occurs when the amount of revenue can be measured reliably, the metal has been delivered, title has passed to the buyer and it is probable that the economic benefits associated with the transaction will flow to the entity. All of our spot sales of gold are transported to a South African gold refiner who locates a buyer and arranges for sale of our gold on the same day that the gold is shipped from the mine site. The sales price is based on the London P.M. fix on the day of shipment. Title and risk of ownership pass to the buyer on the day doré is shipped from the mine sites. Revenue recognition for our stream arrangement is disclosed in the accounting policy for deferred revenue.

#### SHARE-BASED COMPENSATION

Under the Company's Third Amended and Restated 1997 Stock Option Plan, common share options may be granted to executives, employees, consultants and non-employee directors. Compensation expense for such grants is recorded in the consolidated statements of operations and comprehensive loss, with a corresponding increase recorded in the contributed surplus account in the consolidated balance sheets. The expense is based on the fair value of the option at the time of grant, measured by reference to the fair value determined using a Black-Scholes valuation model, and is recognized over the vesting periods of the respective options on a graded basis. Consideration paid to the Company on exercise of options is credited to share capital.

Under the Company's Deferred Share Unit ("DSU") plan, DSUs may be granted to executive officers and directors. Compensation expense for such grants is recorded in the consolidated statements of operations and comprehensive loss with a corresponding increase recorded in the contributed surplus account in the consolidated balance sheets. The expense is based on the fair values at the time of grant and is recognized over the vesting periods of the respective DSUs. Upon exercise the Company's compensation committee may, at its discretion, issue cash, shares of a combination thereof.

The Company's Share Appreciation Rights ("SARs") plan allows SARs to be issued to executives, employees and directors. These awards are settled in cash on the exercise date equal to the Company's stock price less the strike price. Since these awards are settled in cash, the Company marks-to-market the associated expense for each award at the end of each reporting period. The Company accounts for these as liability awards and marks-to-market the fair value of the award until final settlement.

### PERFORMANCE SHARE UNITS

Under the Company's Performance Share Units ("PSU") plan, PSUs may be granted to executives, employees and non-employee directors. Each PSU represents one notional common share that is redeemed for cash based on the value of a common share at the end of the three year performance period, to the extent performance and vesting criteria have been met. The cash award is determined by multiplying the number of units by the performance adjusting factor, which range from 0% to 200%. The performance factor is determined by comparing the Company's share price performance to the share price performance of a peer group of companies. As the Company is required to settle these awards in cash, they are accounted for as liability awards with corresponding compensation expense recognized.

### **LEASES**

Leases that transfer substantially all of the benefits and risks of ownership to the Company are recorded as finance leases and classified as property, plant and equipment with a corresponding amount recorded with current and long-term debt. All other leases are classified as operating leases under which leasing costs are expensed in the period incurred.

### FINANCIAL INSTRUMENTS

The Company recognizes all financial assets initially at fair value and classifies them into one of the following three categories: fair value through profit or loss ("FVTPL"), available-for-sale ("AFS") or loans and receivables, as appropriate. The Company has not classified any of its financial assets as held to maturity.

The Company recognizes all financial liabilities initially at fair value and classifies them as either FVTPL or loans and borrowings, as appropriate. The Company has not classified any of its derivatives as designated as hedging instruments in an effective hedge.

### Convertible debentures

The Company's convertible debentures are considered financial instruments at FVTPL. The convertible debentures contain embedded derivatives that significantly modify the cash flows that otherwise would be required by the contract. The convertible debentures are recorded at fair value determined based on unadjusted quoted prices in active markets when available, otherwise by valuing the embedded derivative conversion feature and the debt component separately. The conversion feature is valued using a Black-Scholes model and the value of the debt is determined based on the present value of the future cash flows. Changes in fair value are recorded in the consolidated statement of operations. Upfront costs and fees related to the convertible debentures were recognized in the statement of operations as incurred and not deferred.

# Golden Star Resources Ltd Notes to the consolidated financial statements – continued

#### Warrants

The Company's warrants are considered financial instruments at FVTPL. The holder of the warrants can exercise for Golden Star common shares and has an option to request a cashless exercise. As a result, the warrants have been classified as financial liability instruments and are recorded at fair value at each reporting period end using a Black-Scholes model. Warrant pricing models require the input of certain assumptions including price volatility and expected life. Changes in these assumptions could affect the reported fair value of the warrants.

#### **Derivatives**

From time to time the Company may utilize foreign exchange and commodity price derivatives to manage exposure to fluctuations in foreign currency exchange rates and gold prices, respectively. The Company does not employ derivative financial instruments for trading purposes or for speculative purposes. Our derivative instruments are recorded on the balance sheet at fair value with changes in fair value recorded in the consolidated statement of operations. The Company did not have any foreign exchange derivatives outstanding at December 31, 2015.

### **CHANGES IN ACCOUNTING POLICIES**

The Company has adopted the following new and revised standards, effective January 1, 2015. These changes were made in accordance with the applicable transitional provisions.

IFRS 13 Fair value measurements provides clarification related to the portfolio exception. The adoption of this improvement did not result in any impact to the Company's financial statements.

IFRS 8 Operating segments amended to require (i) disclosure of judgements made by management in aggregating segments, and (ii) a reconciliation of segment assets to the entity's assets when segment assets are reported. The adoption of this amendment did not result in any impact to the Company's financial statements.

### STANDARDS, INTERPRETATIONS AND AMENDMENTS NOT YET EFFECTIVE

IFRS 15 Revenue from contracts with customers supersedes IAS 18, Revenue, IAS 11, Construction Contracts and related interpretations. This standard is effective for first interim periods within years beginning on or after January 1, 2018. The Company is still assessing the impact of this standard.

IFRS 9 Financial Instruments, issued in November 2009 replaces IAS 39, Financial Instruments: Recognition & Measurement. IFRS 9 introduces new requirements for classification, measurement and impairment of financial assets and hedge accounting. IFRS 9 establishes two primary measurement categories for financial assets: (i) amortized cost, and (ii) fair value; establishes criteria for classification of financial assets within the measurement category based on business model and cash flow characteristics; and eliminates existing held for trading, held to maturity, available for sale, loans and receivable and other financial liabilities categories. IFRS 9 was originally issued in November 2009, reissued in October 2010, amended in November 2013 and completed in July 2014. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted. The Company is still assessing the impact of this standard.

IFRS 7 Financial Instruments – Disclosures amended to require additional disclosures on transition from IAS 39 to IFRS 9. Effective on adoption of IFRS 9.

IFRS 16 Leases specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. IFRS 16 was issued in January 2016 and applies to annual reporting periods beginning on or after January 1, 2019. The Company is still assessing the impact of this standard.

## 4. Critical accounting judgements, estimates and assumptions

Preparation of our consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that can affect reported amounts of assets, liabilities, revenues and expenses and the accompanying disclosures. Estimates and assumptions are continuously evaluated and are based on management's historical experience and on other assumptions we believe to be reasonable under the circumstances. However, uncertainty about these judgments, estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

### **INVENTORY VALUATION**

Inventories are recorded at the lower of average cost or net realizable value ("NRV"). The allocation of costs to ore in stockpiles and the determination of NRV involve the use of estimates. Stockpiled ore represents coarse ore that has been extracted from the mine and is stored for future processing. Stockpiled ore is measured using estimates such as the number of tonnes (via truck counts or by physical surveys) added to, or removed from the stockpile, the number of contained ounces (based on assay data) and estimated gold recovery percentage. Timing and recovery of stockpiled ore can vary significantly from the estimates.

The net realizable value of materials and supplies is recorded based on the expected usage of the inventory items, salvage value and condition of the inventory items, all of which are based management estimates and judgments.

### MINERAL RESERVES

Determining mineral reserves and resources is a complex process involving numerous variables and is based on a professional evaluation using accepted international standards for the assessment of mineral reserves. Estimation is a subjective process, and the accuracy of such estimates is a function of the quantity and quality of available data, the assumptions made and judgments used in engineering and geological interpretation. Mineral reserve estimation may vary as a result of changes in the price of gold, production costs, and with additional knowledge of the ore deposits and mining conditions.

Differences between management's assumptions including economic assumptions such as metal prices and market conditions could have a material effect in the future on the Company's results and financial position, particularly a change in the rate of depreciation and amortization of the related mining assets and the recognition of deferred revenue.

### **BETTERMENT STRIPPING COSTS**

Significant judgment is required to distinguish between development stripping, production stripping which relates to extraction of inventory and development stripping which relates to the creation of a betterment stripping and stripping activity asset. Once the Company has identified its stripping for each surface mining operation, it identifies the separate components for the ore bodies in each of its mining operations. An identifiable component is a specific volume of the ore body that is made more accessible by the stripping activity. Significant judgment is required to identify these components and to determine the expected volumes (waste and ore) to be stripped in each component.

Judgment is also required to identify a suitable production measure to be used to allocate production stripping costs between inventory and betterment stripping for each component. The Company considers the ratio of the expected volume of ore to be mined for a specific component of the ore body to be the most suitable production measure.

### UNITS OF PRODUCTION DEPRECIATION

The mineral properties and a large portion of the property, plant and equipment is depreciated/amortized using the units of production method over the expected operating life of the mine based on estimated recoverable ounces of gold, which are the prime determinants of the life of a mine. Estimated recoverable ounces of gold include proven and probable reserves. Changes in the estimated mineral reserves will result in changes to the depreciation charges over the remaining life of the operation. A decrease in the mineral reserves would increase depreciation and amortization expense and this could have a material impact on the operating results. The amortization base is updated on an annual basis based on the new mineral reserve estimates.

# Golden Star Resources Ltd

# Notes to the consolidated financial statements – continued

### CARRYING VALUE OF ASSETS AND IMPAIRMENT CHARGES

The Company undertakes a review of its assets at each reporting period to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount of the asset or CGU is made, which is considered to be the higher of its FVLCD and VIU. An impairment loss is recognized when the carrying value of the asset or CGU is higher than the recoverable amount. In undertaking this review, management of the Company is required to make significant estimates of, amongst other things, discount rates, future production and sale volumes, metal prices, reserves and resource quantities, future operating and capital costs and reclamation costs to the end of the mine's life. These estimates are subject to various risks and uncertainties, which may ultimately have an effect on the expected recoverability of the carrying values of the asset or CGU. In determining a CGU, management has examined the smallest identifiable group of assets that generates cash inflows that are largely independent of cash inflows from other assets or group of assets.

### **REHABILITATION PROVISIONS**

Environmental reclamation and closure liabilities are recognized at the time of environmental disturbance, in amounts equal to the discounted value of expected future reclamation and closure costs. The estimated future cash costs of such liabilities are based primarily upon environmental and regulatory requirements of the various jurisdictions in which we operate as well as any other constructive obligations that exist. The liability represents management's best estimates of cash required to settle the liability, inflation, assumptions of risks associated with future cash flows and the applicable risk-free interest rates for discounting the future cash outflow. The liability is reassessed and remeasured at each reporting date.

### FAIR VALUE OF CONVERTIBLE DEBENTURES

The debt component of the 5% Convertible Debentures is valued based on discounted cash flows and the conversion feature is valued using a Black-Scholes model. The inputs to these models are taken from observable markets where possible, but if this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

### **INCOME TAXES**

We deal with uncertainties and judgments in the application of complex tax regulations in the various jurisdictions where our properties are located. The amount of taxes paid is dependent upon many factors, including negotiations with taxing authorities in the various jurisdictions and resolution of disputes arising from our international tax audits. We recognize potential liabilities and record tax liabilities for anticipated tax audit issues in our various tax jurisdictions based on our best estimate of additional taxes payable. We adjust these tax estimates in light of changing facts and circumstances, however, due to the complexity of some of these uncertainties, the ultimate resolution may result in payment that is materially different from our estimates of our tax liabilities. If our estimate of tax liability proves to be less than the ultimate assessment, an additional charge to expense would result. If the estimate of tax liabilities proves to be greater that the ultimate assessment, a tax benefit is recognized.

A deferred tax asset is recognized to the extent that it is probable that taxable earnings will be available against which deductible temporary differences can be utilized.

### **DEFERRED REVENUE**

Significant judgment is required in determining the appropriate accounting for the RGLD Streaming Agreement that has been entered into. Management has determined that based on the agreements reached that RGLD assumes significant business risk associated with the timing and amount of ounces of gold being delivered. As such, the deposits received from RGLD have been recorded as deferred revenue liabilities in the consolidated balance sheet.

### 5. Financial instruments

The following tables illustrate the classification of the Company's recurring fair value measurements for financial instruments within the fair value hierarchy and their carrying values and fair values as at December 31, 2015 and December 31, 2014:

		Deceml	ber 31, 2015	Decembe	r 31, 2014
	Level	Carrying value	Fair value	Carrying value	Fair value
FINANCIAL LIABILITIES					
Fair value through profit or loss					
5% Convertible Debentures	3	\$ 46,406	\$ 46,406	\$ 47,846	\$ 47,846
Warrants	2	407	407	_	_

There were no non-recurring fair value measurements of financial instruments as at December 31, 2015.

The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The Company's policy is to recognize transfers into and transfers out of the fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer. During the year ended December 31, 2015, the warrants issued to Royal Gold, Inc. ("RGI") were added to the Level 2 fair value measurement hierarchy. During the year ended December 31, 2015, there were no transfers into or out of Level 1 or Level 3 fair value measurements.

The Company's finance department is responsible for performing the valuation of financial instruments, including Level 3 fair values. The valuation processes and results are reviewed and approved by the Executive Vice President and Chief Financial Officer at least once every quarter, in line with the Company's quarterly reporting dates. Valuation results are discussed with the Audit Committee as part of its quarterly review of the Company's consolidated financial statements.

The valuation techniques that are used to measure fair value are as follows:

### **5% CONVERTIBLE DEBENTURES**

The debt component of the 5% Convertible Debentures is valued based on discounted cash flows and the conversion feature is valued based on a Black-Scholes model. The risk free interest rate used in the fair value computation is the interest rate on US treasury bills with maturity similar to the remaining life of the 5% Convertible Debentures. The discount rate used is determined by adding our risk premium to the risk free interest rate. A market-based volatility rate has been applied to the fair value computation. Inputs used to determine the fair value on December 31, 2015 and December 31, 2014 were as follows:

	December 31, 2015	December 31, 2014
5% CONVERTIBLE DEBENTURES		
Risk-free interest rate	1.1%	0.9%
Risk premium	41.0%	25.1%
Expected volatility	40.0%	40.0%
Remaining life (years)	1.4	2.4

## Golden Star Resources Ltd

# Notes to the consolidated financial statements – continued

The following table presents the changes in the Level 3 investments for the year ended December 31, 2015:

BALANCE, DECEMBER 31, 2015	\$ 46,406
Gain in the period included in earnings	(1,440)
BALANCE, DECEMBER 31, 2014	\$ 47,846
	Fair value

If the risk premium increases by 5%, the fair value of the 5% Convertible Debentures would decrease and the related gain in the consolidated statement of operations would increase by \$3.1 million for the year ended December 31, 2015. In general, an increase in risk premium would increase the gain on fair value of the 5% Convertible Debentures.

### **WARRANTS**

Inputs used to determine the fair value of the Company's warrants at December 31, 2015 were as follows:

	December 31, 2015
WARRANTS	
Risk-free interest rate	1.2%
Expected volatility	83.2%
Remaining life (years)	3.6

The following table presents the changes in the Level 2 investments for the year ended December 31, 2015:

	Fair value
Balance, December 31, 2014	\$ _
Warrants granted	679
Gain in the period included in earnings	(272)
BALANCE, DECEMBER 31, 2015	\$ 407

### 6. Inventories

Inventories include the following components:

As of December 31
-------------------

	2015	2014
Stockpiled ore	\$ 20,338	\$ 21,035
In-process ore	3,843	8,093
Materials and supplies	12,024	25,151
Finished goods	489	-
TOTAL	\$ 36,694	\$ 54,279

The cost of inventories expensed for the year ended December 31, 2015 and 2014 was \$232.6 million and \$288.5 million, respectively.

A total of \$12.9 million of materials and supplies inventories and \$12.8 million of refractory ore inventory were written off in the year ended December 31, 2015 (December 31, 2014 – \$18.0 million of materials and supplies inventories) (See Note 24). \$2.2 million of net realizable value adjustments were recorded for stockpiled and in-process ore in the year ended December 31, 2015 (December 31, 2014 – \$3.8 million).

# 7. Mining interests

The following table shows the breakdown of the cost, accumulated depreciation and net book value of plant and equipment, and mining properties:

	Plant and		Mining	_	onstruction		Total
	equipment		properties		in progress		Total
COST							
AS OF DECEMBER 31, 2013	\$ 454,070	\$	679,260	\$	45,195	\$	1,178,525

As at December 31, 2015, equipment under finance leases had net carrying amounts of \$1.9 million. The total minimum lease payments are disclosed in Note 12 – Debt.

No depreciation is charged to construction in progress assets. Accumulated depreciation of construction in progress assets represents impairment charges taken on these assets in previous years.

# Notes to the consolidated financial statements – continued

### 8. Income taxes

We recognize deferred tax assets and liabilities based on the difference between the financial reporting and tax basis of assets and liabilities using the tax rates enacted or substantively enacted when the temporary differences are expected to reverse.

Our net deferred tax liabilities at December 31, 2015 and December 31, 2014 include the following components:

As of December 31	Δ	451	of.	D	e	C	er	m	h	er	- 3	1
-------------------	---	-----	-----	---	---	---	----	---	---	----	-----	---

	2015	2014

Indefinite	22,379	561,748	-
TOTAL	\$ 159,240	\$ 730,385	\$ 782

\$691.4 million of the Ghana tax pool is usable against taxable income generated at Bogoso/Prestea, with the remaining amount totaling \$39.0 million usable against taxable income generated at Wassa.

# Golden Star Resources Ltd Notes to the consolidated financial statements – continued

# 9. Accounts payable and accrued liabilities

Accounts payable and accrued liabilities include the following components:

Λ.	of.	$\Box$	00	am	ber	Z :	
A.S	OI	∟	CU.	CHI	DEL	. )	Ι.

	2015	2014
Trade and other payables	\$ 71,081	\$ 79,528
Accrued liabilities	33,214	38,201
Payroll related liabilities	4,658	4,954
Accrued severance	1,858	768
TOTAL	\$ 110,811	\$ 123,451

During the year ended December 31, 2015, certain payables have been reclassified to other long-term liabilities (See Note 12).

In 2015, the Company recorded accrued severance of \$12.8 million relating to the suspension of the Bogoso refractory operation. \$10.9 million of this amount has been paid by December 31, 2015. The Company also expensed \$1.8 million of severance at the Wassa operation.

## 10. Rehabilitation provisions

At December 31, 2015, the total undiscounted amount of the estimated future cash needs was estimated to be \$86.7 million. A discount rate assumption of 2% and an inflation rate assumption of 2% were used to value the rehabilitation provisions. The changes in the carrying amount of the rehabilitation provisions are as follows:

For the years ended December 31,

	2015	2014
BEGINNING BALANCE	\$ 85,816	\$ 86,310
Accretion of rehabilitation provisions	1,761	1,746
Changes in estimates	(4,945)	1,314
Cost of reclamation work performed	(2,947)	(3,554)
BALANCE AT THE END OF THE PERIOD	\$ 79,685	\$ 85,816
Current portion	3,660	4,562
Long term portion	76,025	81,254
TOTAL	\$ 79,685	\$ 85,816

For the year ended December 31, 2015, the Company has recorded a change of estimates of \$4.9 million on its rehabilitation provisions of the mine sites. The impact of the changes of estimates were an increase of \$1.9 million to the reclamation provisions for Wassa and a decrease of \$6.8 million to the reclamation provisions for Bogoso/Prestea. The rehabilitation provision for Wassa was \$18.8 million (2014 – \$18.2 million) The Company expects the payments for reclamation to be incurred between 2016 to 2029. An increase in estimate for Wassa of \$1.9 million was recorded due to a revision in the timing of payments. The rehabilitation provision for Bogoso/Prestea was \$60.9 million (2014 – \$67.6 million). The Company expects the payments for reclamation to be incurred between 2016 to 2027. A decrease in estimate for Bogoso/Prestea of \$6.8 million relates to a \$5.7 million reduction in expected reclamation costs relating to the refractory operation and a \$1.1 million reduction in the expected reclamation costs relating to the non-refractory operation. The reduction of \$5.7 million relating to the reclamation costs of the refractory operation was recorded as other income since the carrying value of the underlying refractory assets were \$Nil after suspension of its operation in 2015.

### 11. Deferred revenue

On July 28, 2015, the Company completed a \$130 million gold purchase and sale agreement ("Streaming Agreement") with RGLD Gold AG ("RGLD"), a wholly-owned subsidiary of RGI. This Streaming Agreement was subsequently amended on December 30, 2015 due to the significant decline in gold price in the second half of 2015. Under the July 28, 2015 Streaming Agreement, Golden Star initially delivered 8.5% of Bogoso/Prestea and Wassa ("the Mines") production to RGLD at a cash purchase price of 20% of spot gold. This cash purchase price of 20% of spot gold of 8.5% of the Mines production was to remain in effect until 185,000 ounces had been delivered. A further 5% of the Mines production at a cash purchase price of 20% of spot gold was to be delivered thereafter until an additional 22,500 ounces was delivered. Thereafter, 3% of the Mines production at a cash purchase price of 30% of spot gold was to be delivered in perpetuity. The economic effective date of delivery was April 1, 2015.

The Streaming Agreement was subsequently amended on December 30, 2015 to provide an additional \$15 million of streaming advance payment with an option, subject to Golden Star satisfying certain conditions, to access a further \$5 million. The Streaming percentages were adjusted as follows to reflect the \$15 million additional advance payment: From January 1, 2016, the Company will deliver 9.25% of the Mines' production to RGLD at a cash purchase price of 20% of spot gold. From the earlier of January 1, 2018 or commercial production of the underground mines, Golden Star will deliver 10.5% of production at a cash purchase price of 20% of spot gold until 240,000 ounces have been delivered. If Golden Star exercises its option on the additional \$5 million stream advance, the stream percentage from the earlier of January 1, 2018 or commercial production of the underground mines would be increased to 10.9% at a cash purchase price of 20% spot gold until 250,000 ounces have been delivered. Thereafter, 5.5% of production at a cash purchase price of 30% of spot gold will be delivered.

The upfront payments are accounted for as prepayments of yet-to-be delivered ounces under the contract and are recorded as deferred revenue. The initial term of the contract is 40 years and the deposit bears no interest.

During the year ended December 31, 2015, the Company has received advanced payments of \$75 million and the balance will be advanced in quarterly payments, as the Wassa and Prestea development projects progress on satisfaction of certain requirements. Since the inception of the Streaming Agreement, the Company has sold 12,701 ounces of gold to RGLD. Revenue recognized on the ounces sold to RGLD during the year ended December 31, 2015 consisted of \$2.9 million of spot payment proceeds and \$9.6 million of deferred revenue recognized (see Note 16).

### **EQUIPMENT FINANCING CREDIT FACILITY**

Bogoso/Prestea and Wassa maintained an equipment financing facility with Caterpillar Financial Services Corporation, with Golden Star as the guarantor of all amounts borrowed. The facility provided credit financing for mining equipment at a fixed interest rate of 6.5%. Amounts drawn under this facility are repayable over a period of two to five years. Each outstanding equipment loan is secured by the title of the specific equipment purchased with the loan until the loan has been repaid in full.

7,126

91,899

85,798

\$

### **FINANCE LEASES**

Other long term liabilities

**TOTAL LONG TERM DEBT** 

The Company financed mining equipment at Wassa and Bogoso/Prestea through equipment financing leases. These finance leases are payable in equal installments over a period of 60 months and have implicit interest rates of 6.9%. Each outstanding finance lease is secured by the title of the specific equipment purchased with the lease until the lease has been repaid in full.

### **ECOBANK LOANS**

### Ecobank loan I

In 2013, the Company through its subsidiary Golden Star (Wassa) Limited closed a \$50 million secured Medium Term Loan Facility ("Ecobank Loan I") with Ecobank Ghana Limited and subsequently drew down \$50 million of the facility. The loan had a term of 60 months from the date of initial drawing and was secured by, among other things, Wassa's existing plant, machinery and equipment. The interest rate was three month LIBOR plus 9% per annum, payable monthly in arrears. Principal amounts are payable quarterly in arrears.

During the year ended December 31, 2015, the Company retired the remaining \$38.0 million outstanding on the Ecobank loan I with funds received from RGI and RGLD.

#### Ecobank Ioan II

In the third quarter of 2014, the Company through its subsidiary Golden Star (Wassa) Limited closed an additional \$25 million secured Medium Term Loan Facility ("Ecobank Loan II") with Ecobank Ghana Limited. Drawdowns under the loan have been available to finance the development of the underground mine at Wassa. This additional \$25 million loan has a term of 60 months from the date of initial drawdown and is secured by, among other things, Wassa's existing plant, machinery and equipment. The interest rate on the loan is three month LIBOR plus 11%, per annum, payable monthly in arrears beginning a month following the initial drawdown. Payment of principal commences six months following the initial drawdown and is thereafter payable quarterly in arrears. The Company will be required to adhere to certain financial covenants from the end of 2016. At December 31, 2014, the Company had not made any drawdowns on this facility.

During the year ended December 31, 2015, the Company drew down \$22.0 million on the Ecobank loan II. The Company has until the second quarter of 2016 to make further draw downs on the remaining \$3.0 million available under the loan.

### **CONVERTIBLE DEBENTURES**

The 5% Convertible Debentures were issued on May 31, 2012, in the amount of \$77.5 million, in exchange for \$74.5 million of our 4% convertible senior unsecured debentures (the "4% Convertible Debentures") in privately negotiated transactions with certain holders of the 4% Convertible Debentures exempt from the registration requirements of the U.S. Securities Act of 1933, as amended.

The 5% Convertible Debentures are governed by the terms of an indenture dated May 31, 2012, by and between the Company and The Bank of New York Mellon, as Indenture Trustee.

Interest on the 5% Convertible Debentures is payable semi-annually in arrears on May 31 and November 30 of each year until maturity on June 1, 2017. The 5% Convertible Debentures are, subject to certain limitations, convertible into common shares at a conversion rate of 606.0606 common shares per \$1,000 principal amount of the 5% Convertible Debentures (equal to an initial conversion price of \$1.65 per share), or approximately 25% above the closing price of the Company's common shares on the NYSE MKT on May 17, 2012, the last full trading day prior to entry into the purchase agreement. The 5% Convertible Debentures are not redeemable at the Company's option, except in the event of certain change in control transactions where 90% or more of the outstanding 5% Convertible Debentures have accepted a mandatory offer from the Company to purchase them.

On maturity, the Company may, at its option, satisfy the repayment obligation by paying the principal amount of the 5% Convertible Debentures in cash or, subject to certain limitations, by issuing that number of the Company's common shares obtained by dividing the principal amount of the 5% Convertible Debentures outstanding by 95% of the weighted average trading price of the Company's common shares on the NYSE MKT for the 20 consecutive trading days ending five trading days preceding the maturity date (the "Current Market Price") provided that the aggregate maximum number of common shares to be issued may not exceed 19.99% of the issued and outstanding common shares as of the closing date. If the Company elects to repay the principal amount of the 5% Convertible Debentures at maturity by issuing common shares, and the Company is limited under the terms of the indenture from issuing a number of common shares sufficient to fully repay the 5% Convertible Debentures outstanding at maturity, the Company is required to pay the balance owing in cash, based on the difference between the principal amount of the 5% Convertible Debentures outstanding and the value of the common shares (based on the Current Market Price) delivered in repayment of the 5% Convertible Debentures.

The 5% Convertible Debentures are direct senior unsecured indebtedness of the Company, ranking equally and ratably with all other senior unsecured indebtedness, and senior to all subordinated indebtedness of the Company. None of the Company's subsidiaries has guaranteed the 5% Convertible Debentures, and the 5% Convertible Debentures do not limit the amount of debt that the Company or our subsidiaries may incur.

The 5% Convertible Debentures are accounted for at fair value and marked to market each reporting period and the corresponding gain/loss on fair value is recorded in the Statement of Operations.

# Golden Star Resources Ltd Notes to the consolidated financial statements – continued

#### **ROYAL GOLD LOAN**

In July 2015, the Company through its subsidiary Caystar Finance Co. closed a \$20 million term loan with RGI and subsequently drew down \$20 million of the facility. The loan has a term of 4 years and is secured by, among other things, assets of Wassa and Bogoso/Prestea. Interest is payable based on the average daily London Bullion Market Association ("LBMA") gold price multiplied by 62.5% divided by 10,000 to a maximum interest rate of 11.5% per annum. Interest payments are to be made on the last business day of each fiscal quarter, commencing in the quarter which the funding occurred. Commencing June 30, 2017, the Company will be required to make mandatory repayments at a percentage of any excess cash flow earned. For the year ended December 31, 2015, interest was paid at a rate of 7% with a total of \$0.6 million paid during the year ended December 31, 2015. The fair value of the loan is net of initial valuation of the warrants issued to RGI and financing fees incurred.

### **WARRANTS**

As part of the term loan transaction with RGI, 5,000,000 warrants to purchase Golden Star shares were issued to RGI. In addition to exercising the warrants for Golden Star common shares, the holder of the warrants has an option to request a cashless exercise. As a result, the warrants have been classified as financial liability instruments and are recorded at fair value at each reporting period using a Black-Scholes model. Warrant pricing models require the input of certain assumptions including price volatility and expected life. Changes in these assumptions could affect the reported fair value of the warrants. The warrants have a \$0.27 exercise price and expire on the fourth year anniversary of the date of issuance.

### OTHER LONG TERM LIABILITIES

During the year ended December 31, 2015, the Company reached an agreement with the electricity provider in Ghana, to repay \$30.4 million of payables. The plan includes a deferral of \$22.0 million of amounts owed to 2016 and 2017, which have been reclassified from accounts payable to other long term liabilities, net of a \$2.4 million gain on deferral of other long term liabilities and \$0.9 million of accretion thereof in the year ended December 31, 2015. If the Company's electricity provider demands repayment of the outstanding balance and it is not repaid, it could cease to provide power to the Company which would impact the Company's ability to operate the Bogoso/Prestea operation and which also could result in the Company being in default of certain of its contractual obligations with third parties. Unless alternative sources of power are available to Bogoso/Prestea on terms acceptable to the Company, this could have a material adverse effect on the Company's results of operations and financial condition.

Schedule of payments on outstanding debt as of December 31, 2015:

### 13. Commitments and contingencies

Our commitments and contingencies include the following items:

### **ENVIRONMENTAL BONDING IN GHANA**

The Ghana Environmental Protection Agency ("EPA") requires environmental compliance bonds that provide assurance for environmental remediation at our Bogoso/Prestea and Wassa mining operations. To meet this requirement the Company has environmental bonds totaling \$9.6 million and \$8.1 million for Wassa and Bogoso/Prestea respectively with a commercial bank in Ghana. These bonds are guaranteed by Golden Star Resources Ltd. There is also a cross guarantee between Wassa and Bogoso/Prestea. The Company also held cash deposits of \$3.5 million and \$3.0 million for each operation, which are recorded as restricted cash on the consolidated balance sheets.

### **GOVERNMENT OF GHANA'S RIGHTS TO INCREASE ITS PARTICIPATION**

Under Act 703, the Government of Ghana has the right to acquire a special share in our Ghanaian subsidiaries at any time for no consideration or such consideration as the Government of Ghana and such subsidiaries might agree, and a pre-emptive right to purchase all gold and other minerals produced by such subsidiaries. A special share carries no voting rights and does not participate in dividends, profits or assets. If the Government of Ghana acquires a special share, it may require us to redeem the special share at any time for no consideration or for consideration determined by us. To date, the Government of Ghana has not sought to exercise any of these rights at our properties.

### **ROYALTIES**

### Government of Ghana

The Ghana Government receives a royalty equal to 5% of mineral revenues earned by Bogoso/Prestea and Wassa.

# Golden Star Resources Ltd

# Notes to the consolidated financial statements – continued

### **Dunkwa Properties**

As part of the acquisition of the Dunkwa properties in 2003, we agreed to pay the seller a net smelter return royalty on future gold production from the Mansiso and Asikuma properties. As per the acquisition agreement, there will be no royalty due on the first 200,000 ounces produced from Mampon which is located on the Asikuma property. The amount of the royalty is based on a sliding scale which ranges from 2% of net smelter return at gold prices at or below \$300 per ounce and progressively increases to 3.5% for gold prices in excess of \$400 per ounce. Since this property is currently undeveloped, we are not required to pay a royalty on this property.

### **EXPLORATION AGREEMENTS**

#### Obuom

In October 2007, we entered into an agreement with AMI Resources Inc. ("AMI"), which gives AMI the right to earn our 54% ownership position in the Obuom property in Ghana. Should AMI eventually obtain full rights to our position on the property and develop a gold mining operation at Obuom, we would receive from AMI a 2% net smelter return royalty on 54% of the property's gold production.

### **OPERATING LEASES AND CAPITAL COMMITMENTS**

The Company is a party to certain contracts relating to operating leases, office rent and capital commitments. Future minimum payments under these agreements as at December 31, 2015 are as follows:

Less than 1 year	\$ 3,236
Between 1 and 5 years	1,341
More than 5 years	-
TOTAL	\$ 4,577

## 14. Share-based compensation

Non-cash employee compensation expenses recognized in general and administrative expense in the statements of operations and comprehensive loss are as follows:

For the years	ended	December	31,
---------------	-------	----------	-----

	2015	2014
SHARE-BASED COMPENSATION	\$ 2,005	\$ 2,515

### **SHARE OPTIONS**

We have one stock option plan, the Third Amended and Restated 1997 Stock Option Plan (the "Plan") approved by shareholders in May 2010, under which options are granted at the discretion of the Board of Directors. Options granted are non-assignable and are exercisable for a period of ten years or such other period as is stipulated in a stock option agreement between Golden Star and the optionee. Under the Plan, we may grant options to employees, consultants and directors of the Company or its subsidiaries for up to 25,000,000 shares, of which 3,365,151 are available for grant as of December 31, 2015. The exercise price of each option is not less than the closing price of our shares on the Toronto Stock Exchange on the day prior to the date of grant. Options typically vest over periods ranging from immediately to four years from the date of grant. Vesting periods are determined at the discretion of the Compensation Committee.

The fair value of option grants is estimated at the grant dates using the Black-Scholes option-pricing model. Fair values of options granted during the year ended December 31, 2015 and 2014 were based on the weighted average assumptions noted in the following table:

For the years ended December 31,

	2015	2014
		2014
Expected volatility	68.98%	77.85%
Risk-free interest rate	1.30%	1.43%
Expected lives	5.59 years	6.01 years
Dividend yield	0%	0%

Expected volatilities are based on the mean reversion tendency of the volatility of Golden Star's shares. Golden Star uses historical data to estimate share option exercise and employee departure behavior and this data is used in determining input data for the Black-Scholes model. Groups of employees that have dissimilar historical behavior are considered separately for valuation purposes. The expected term of the options granted represents the period of time that the options granted are expected to be outstanding. The risk-free rate for periods within the contractual term of the option is based on the Bank of Canada administered interest rates in effect at the time of the grant.

The weighted average fair value per option granted during the year ended December 31, 2015 was \$0.23 (year ended December 31, 2014 – \$0.57). As at December 31, 2015, there was \$0.3 million of share-based compensation expense (December 31, 2014 – \$0.7 million) relating to the Company's share options to be recorded in future periods. For the year ended December 31, 2015, the Company recognized an expense of \$0.7 million (year ended December 31, 2014 – \$2.1 million).

A summary of option activity under the Company's Stock Option Plan during the years ended December 31, 2015 and 2014 are as follows:

	Options ('000)	Weighted- average exercise price	Weighted- average remaining contractual term (years)
OUTSTANDING AS OF DECEMBER 31, 2013	12,848	2.45	5.5
Granted	3,975	0.86	9.2

	14,935	5.7	2.01	10,808	2.33

### **SHARE BONUS PLAN**

In December 1992, the Company established an Employees' Stock Bonus Plan (the "Bonus Plan") for any full-time or part-time employee (whether or not a director) of the Company or any of our subsidiaries who has rendered meritorious services which contributed to the success of the Company or any of its subsidiaries. The Bonus Plan provides that a specifically designated committee of the Board of Directors may grant bonus common shares on terms that it might determine, within the limitations of the Bonus Plan and subject to the rules of applicable regulatory authorities. The Bonus Plan, as amended, provides for the issuance of 900,000 common shares of bonus stock, of which 710,854 common shares were issued as at December 31, 2012. There were no bonus shares issued subsequent to the issuance on December 31, 2012.

### **DEFERRED SHARE UNITS**

On March 9, 2011 the Board adopted a Deferred Share Unit Plan ("DSU Plan") which was subsequently approved by shareholders at the May 2011 annual meeting of shareholders. The DSU Plan provides for the issuance of Deferred Share Units ("DSUs"), each representing the right to receive one Golden Star common share upon redemption. DSUs may be redeemed only upon termination of the holder's services to the Company, and may be subject to vesting provisions. DSU awards are granted at the sole discretion of the Company's compensation committee. The DSU Plan allows directors, at their option, to receive all or any portion of their director retainer by accepting DSUs in lieu of cash.

The compensation committee may also award DSUs to executive officers and/or directors in lieu of cash as a component of their long term performance compensation, the amount of such awards being in proportion to the officer's or director's achievement of pre-determined performance goals. As with DSU awards for directors' retainers, DSUs received as performance compensation are redeemable only upon termination of the holder's services to the Company. The Company may, at its option, provide cash in lieu of common shares upon a holder's redemption, the cash value being established by the share price on the DSU original award date, less all applicable tax withholding.

For the year ended December 31, 2015, the DSUs that were granted vested immediately and a compensation expense of \$0.7 million was recognized for these grants (year ended December 31, 2014 – \$0.5 million). As of December 31, 2015, there was no unrecognized compensation expense related to DSUs granted under the Company's DSU Plan.

A summary of DSU activity during the year ended December 31, 2015 and 2014:

### For the years ended December 31,

	2015	2014
Number of DSUs, beginning of period ('000)	1,962	1,382
Grants	2,941	965
Exercises	(407)	(384)
NUMBER OF DSUS, END OF PERIOD ('000)	4,496	1,962

### **SHARE APPRECIATION RIGHTS**

On February 13, 2012, the Company adopted a Share Appreciation Rights Plan, and granted 1,543,043 share appreciation rights ("SARs") that vest after a period of three years.

As of December 31, 2015, there was approximately \$0.2 million of total unrecognized compensation cost related to unvested SARs (December 31, 2014 – \$0.6 million). For the year ended December 31, 2015, the Company recognized an expense of \$nil related to these cash settled awards (year ended December 31, 2014 – \$nil).

A summary of the SARs activity during the year ended December 31, 2015 and 2014:

### For the years ended December 31,

	2015	2014
	2015	
Number of SARs, beginning of period ('000)	3,220	3,027
Grants	1,255	460
Forfeited	(1,541)	(267)
NUMBER OF SARS, END OF PERIOD ('000)	2,934	3,220

### PERFORMANCE SHARE UNITS

On January 1, 2014, the Company adopted a Performance Share Unit ("PSU") Plan. Each PSU represents one notional common share that is redeemed for cash based on the value of a common share at the end of the three year performance period, to the extent performance and vesting criteria have been met. The PSUs vest at the end of a three year performance period based on the Company's total shareholder return relative to a performance peer group of gold companies as listed in the PSU Plan. The cash award is determined by multiplying the number of units by the performance adjustment factor, which range from 0% to 200%. The performance adjustment factor is determined by comparing the Company's share price performance to the share price performance of a peer group of companies. As the Company is required to settle these awards in cash, they are accounted for as liability awards with corresponding compensation expense recognized. For the year ended December 31, 2015, the Company recognized an expense of \$0.6 million (year ended December 31, 2014 – nil).

A summary of the PSU activity during the year ended December 31, 2015 and 2014:

### For the years ended December 31,

NUMBER OF PSUS, END OF PERIOD ('000)		
Forfeited	(738)	(302)
Grants	8,010	2,648
Number of PSUs, beginning of period ('000)	2,346	-
	2015	2014

## 15. Loss per common share

The following table provides reconciliation between basic and diluted loss per common share:

	For the years ended December 51,			
		2015		2014
Net loss attributable to Golden Star shareholders	\$	(67,681)	\$	(73,079)
WEIGHTED AVERAGE NUMBER OF BASIC AND DILUTED SHARES (MILLIONS)		259.7		259.4
NET LOSS PER SHARE ATTRIBUTABLE TO GOLDEN STAR SHAREHOLDERS:				
Basic and diluted	\$	(0.26)	\$	(0.28)

### 16. Revenue

Revenue includes the following components:

	For the years ended December 31				
		2015		2014	
Revenue – Stream arrangement					
Spot payment proceeds	\$	2,873	\$	_	
Deferred revenue recognized		9,621		-	
		12,494		_	
Revenue – Spot sales		242,693		328,915	
TOTAL REVENUE	\$	255,187	\$	328,915	

# 17. Cost of sales excluding depreciation and amortization

Cost of sales excluding depreciation and amortization include the following components:

For the years ended [	Decemi	ber 31,
-----------------------	--------	---------

	2015	2014
Contractors	\$ 37,112	\$ 58,732
Electricity	39,042	47,621
Fuel	19,915	28,622
Raw materials and consumables	62,835	90,716
Salaries and benefits	45,255	53,087
Transportation costs	2,093	2,503
General and administrative	9,698	9,780
Other	7,534	9,490
Betterment stripping costs capitalized	-	(5,864)
Mine operating expenses	\$ 223,484	\$ 294,687
Severance charges	14,626	2,844
Operating costs to metal inventory	(7,043)	(10,531)
Inventory net realizable value adjustment	1,524	1,453
Royalties	12,903	16,459
	\$ 245,494	\$ 304,912

# 18. Finance expense, net

Finance income and expense includes the following components:

### For the years ended December 31,

	2015	2014
Interest income	\$ (26)	\$ (30)
Interest expense, net of capitalized interest (see Note 7)	8,344	7,560
Net foreign exchange loss/(gain)	591	(1,901)
Accretion of rehabilitation provision	1,761	1,746
	\$ 10,670	\$ 7,375

### 19. Other income

Other income includes the following components:

### For the years ended December 31,

	2015	2014
Loss/(gain) on retirement of assets	\$ 88	\$ (271)
Gain on reduction of asset retirement obligations	(5,652)	_
Other income	(2,614)	(833)
	\$ (8,178)	\$ (1,104)

# 20. Related party transactions

There were no material related party transactions for the years ended December 31, 2015 and 2014 other than the items disclosed below.

### **KEY MANAGEMENT PERSONNEL**

Key management personnel is defined as members of the Board of Directors and certain senior officers. Compensation of key management personnel are as follows, such compensation made on terms equivalent to those prevailing in an arm's length transaction:

### For the years ended December 31,

	\$ 4,014	\$ 4,152
Share-based compensation	593	1,145
Bonuses	983	868
Salaries, wages, and other benefits	\$ 2,438	\$ 2,139
	2015	2014

# Notes to the consolidated financial statements – continued

## 21. Principal subsidiaries

The consolidated financial statements include the accounts of the Company and all of its subsidiaries at December 31, 2015. The principal operating subsidiaries are Wassa and Bogoso/Prestea, in which the Company has a 90% ownership interest in each.

Set out below is summarized financial information for each subsidiary that has non-controlling interests that are material to the group. The amounts are disclosed on a 100% basis and disclosure for each subsidiary are based on those included in the consolidated financial statements before inter-company eliminations.

### SUMMARIZED STATEMENT OF FINANCIAL POSITION

	Wassa			Bogoso/Prestea

Currently our gold production is shipped to a South African gold refinery. Except for the sales to RGLD as part of the streaming arrangement, the refinery arranges for sale of the gold on the day it is shipped from the mine sites and we receive payment for gold sold two working days after the gold leaves the mine site. The global gold market is competitive with numerous banks and refineries willing to buy gold on short notice. Therefore, we believe that the loss of our current customer would not materially delay or disrupt revenue.

# Golden Star Resources Ltd

# Notes to the consolidated financial statements – continued

# 23. Supplemental cash flow information

During the year ended December 31, 2015, there was no payment of income taxes (year ended December 31, 2014 – \$9.3 million). The Company paid \$8.7 million of interest during the year ended December 31, 2015 (year ended December 31, 2014 – \$7.9 million).

Changes in working capital for the year ended December 31, 2015 and 2014 are as follows:

### For the years ended December 31,

	2015	2014
Decrease/(increase) in accounts receivable	\$ 9,718	\$ (6,632)
Increase in inventories	(6,804)	(6,273)
(Increase)/decrease in prepaids and other	(670)	2,193
Increase in accounts payable and accrued liabilities	4,467	18,088
Decrease in current tax liability	-	(9,506)
TOTAL CHANGES IN WORKING CAPITAL	\$ 6,711	\$ (2,130)

Other include the following components:

### For the years ended December 31,

	2015	2014
Loss/(gain) on retirement of assets	\$ 88	\$ (117)
(Gain)/loss on fair value of 5% Convertible Debentures (see Note 5)	(1,440)	538
Gain on fair value of warrants (see Note 5)	(272)	_
Loss/(gain) on marketable securities	56	(151)
Long term inventory	-	1,290
	\$ (1,568)	\$ 1,560

### 24. Impairment charges

The following table shows the breakdown of the impairment charges recognized during the year ended December 31, 2015 and 2014:

### For the years ended December 31,

	2015	2014
Mining interests	\$ 8,734	\$ 30,000
Materials and supplies inventories	12,887	18,000
Refractory ore inventory	12,775	_
Exploration and evaluation assets	-	9,747
	\$ 34,396	\$ 57,747

Impairment charges recorded during 2015 totaled \$34.4 million were based on the Company's assessment at June 30, 2015 that forecasted mine operating loss for the Bogoso refractory operation prior to the planned suspension was an indicator of impairment for the Bogoso refractory assets.

#### MINING INTERESTS

An impairment charge of \$8.7 million (\$8.7 million, net of tax) was recorded against Bogoso's refractory assets at June 30, 2015. The impairment charge comprised of \$4.2 million related to mine property and \$4.5 million related to property, plant and equipment. These impairment charges represent the excess of carrying values over the total recoverable amount calculated on a value-in-use basis of the Bogoso refractory assets.

The gold price assumption used for the impairment assessment at June 30, 2015 was based on a short-term gold price of \$1,150 per ounce. Projected cash flows were discounted using a weighted average cost of capital which includes estimates for risk-free interest rates, market return on equity, share volatility, debt-to-equity ratios and risks specific to the CGUs. Management's estimates of the recoverable amounts were classified as Level 3 in the fair value hierarchy.

### Sensitivities

The projected cash flows were significantly affected by changes in assumptions including future capital expenditures and production cost estimates.

For the impairment charge recorded at June 30, 2015, a 10% change to the gold price assumption would not have had any impact to the impairment charge recognized on the Bogoso refractory assets.

### **INVENTORY WRITE-OFF**

\$12.9 million of materials and supplies inventories and \$12.8 million of refractory ore inventory at the Bogoso refractory operation were written off at June 30, 2015 based on a review of the inventory turnover and the expected inventory usage and recovery of ounces in ore prior to the subsequent suspension of the refractory operation in the third quarter of 2015.

### 25. Financial risk management

Our exposure to market risk includes, but is not limited to, the following risks: changes in interest rates on our debt, changes in foreign currency exchange rates and commodity price fluctuations.

### LIQUIDITY RISK

Liquidity risk is the risk that we will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. We manage the liquidity risk inherent in these financial obligations by preparing monthly financial summaries, quarterly forecasts and annual long-term budgets which forecast cash needs and expected cash availability to meet future obligations. Typically these obligations are met by cash flows from operations and from cash on hand. Scheduling of capital spending and acquisitions of financial resources may also be employed, as needed and as available, to meet the cash demands of our obligations.

Our ability to repay or refinance our future obligations depends on a number of factors, some of which may be beyond our control. Factors that influence our ability to meet these obligations include general global economic conditions, credit and capital market conditions, results of operations, mineral reserves and resources and the price of gold.

# Golden Star Resources Ltd Notes to the consolidated financial statements – continued

The following table shows our contractual obligations as at December 31, 2015:

### Payment due (in thousands) by period

(Stated in thousands of U.S dollars)	Less than 1 Year	1 to 3 years	3	3 to 5 years	More than 5 Years	Total

- 1 Includes the outstanding repayment amounts from the 5% Convertible Debentures maturing in June 2017, the Ecobank Loan II, the loan from RGI and the equipment financing loans. Golden Star has the right to repay the \$77.5 million principal amount of the 5% Convertible Debentures in cash or in common shares at the due date under certain circumstances provided that the aggregate maximum number of common shares to be issued may not exceed 19.99% of the issued and outstanding common shares as of the closing date. The presentation shown above assumes payment is made in cash and also assumes no conversions of the 5% Convertible Debentures into common shares by the holders prior to the maturity date.
- 2 These amounts represent the agreement with the electricity provider in Ghana for deferral of payments of certain accounts payable to 2016 and 2017.
- 3 Rehabilitation provisions indicates the expected undiscounted cash flows for each period.

As at December 31, 2015, the Company has current assets of \$82.7 million compared to current liabilities of \$148.4 million. During 2015, the Company reached an agreement with the electricity provider in Ghana to repay \$30.4 million of payables. The repayment plan includes a deferral of approximately \$22 million to 2016 and 2017. If the Company's electricity provider demands repayment of the outstanding balance and it is not repaid, it could cease to provide power to the Company which would impact the Company's ability to operate the Bogoso/Prestea operation and which also could result in the Company being in default of certain of its contractual obligations with third parties. Unless alternative sources of power are available to Bogoso/Prestea on terms acceptable to the Company, this could have a material adverse effect on the Company's results of operations and financial condition.

The Company expects to meet its short-term financing needs through cash flow from operations, \$70 million of further upfront payments to be received in 2016 and 2017 under the Streaming Agreement, with an option to access an additional \$5 million, subject to the Company satisfying certain conditions (See Note 11), the \$3 million undrawn Ecobank Loan II, and future long term financing as required, including alternative options to facilitate the repayment or refinancing, in whole or in part, of the 5% Convertible Debentures maturing on June 1, 2017. These alternatives should provide the Company with the flexibility to fund any potential cash flow shortfall. There can be no assurance however that if additional financing is required it will be available at all or on terms acceptable to the Company. Failure by the Company to repay the 5% Convertible Debentures when due, or to make other satisfactory arrangements and/or the failure to restructure the 5% Convertible Debentures may cause the Company to delay or indefinitely postpone development activities or may cause the Company to suspend or terminate its operations, forfeit rights in its properties, or default under various other third party obligations, any of which could have a material adverse effect on the Company's results of operations and financial condition.

#### INTEREST RATE RISK

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Our 5% Convertible Debentures and the outstanding loans under our equipment financing facility bear interest at a fixed rate and are not subject to changes in interest payments. The Ecobank Loan II bears interest based on the three month LIBOR plus 11% per annum. Based on our current \$22.0 million outstanding balance on Ecobank Loan II, a 100 basis points change in the three month LIBOR rate will result in \$0.3 million per annum change in interest expense. The Royal Gold loan has interest calculated based on the average daily London Bullion Market Association ("LBMA") gold price multiplied by 62.5% divided by 10,000 to a maximum interest rate of 11.5% per annum. Based on our current \$20.0 million outstanding balance on the Royal Gold loan, a \$100 increase in the LBMA gold price would increase interest charges by \$0.1 million on an annual basis. We have not entered into any agreements to hedge against unfavorable changes in interest rates, but may in the future actively manage our exposure to interest rate risk.

### FOREIGN CURRENCY EXCHANGE RATE RISK

Currency risk is risk that the fair value of future cash flows will fluctuate because of changes in foreign currency exchange rates. In addition, the value of cash and cash equivalents and other financial assets and liabilities denominated in foreign currencies can fluctuate with changes in currency exchange rates.

Since our revenues are denominated in U.S. dollars and our operating units transact much of their business in U.S. dollars, we are typically not subject to significant impacts from currency fluctuations. However, certain purchases of labor, operating supplies and capital assets are denominated in Ghana cedis, euros, British pounds, Australian dollars, South African rand and Canadian dollars. To accommodate these purchases, we maintain operating cash accounts in non-US dollar currencies and appreciation of these non-US dollar currencies against the U.S. dollar results in a foreign currency gain and a decrease in non-U.S. dollar currencies results in a loss. In the past, we have entered into forward purchase contracts for South African rand, euros and other currencies to hedge expected purchase costs of capital assets. During 2015 and 2014, we had no currency related derivatives. At December 31, 2015 and December 31, 2014, we held \$1.2 million and \$1.5 million, respectively, of foreign currency.

### **COMMODITY PRICE RISK**

Gold is our primary product and, as a result, changes in the price of gold can significantly affect our results of operations and cash flows. Based on our gold production in the year, a \$10 per ounce change in gold price would result in approximately a \$2.1 million and \$2.0 million change in our sales revenues and operating cash flows, respectively. To reduce gold price volatility, we have at various times entered into gold price hedges. As at December 31, 2015, the Company does not have any outstanding gold price derivative contracts.

### **CREDIT RISK**

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Our credit risk is primarily associated with liquid financial assets and derivatives. We limit exposure to credit risk on liquid financial assets by holding our cash, cash equivalents, restricted cash and deposits at highly-rated financial institutions. Risks associated with gold trade receivables is considered minimal as we sell gold to a credit-worthy buyer who settles promptly within two days of receipt of gold bullion.

2015 73

# Golden Star Resources Ltd Notes to the consolidated financial statements – continued

# 26. Capital risk management

The Company manages its capital in order that it will be able to continue as a going concern while maximizing the return to shareholders through the optimization of the debt and equity balance.

In the management of capital, the Company includes the components of equity, long-term debt, net of cash and cash equivalents, and investments.

### As of December 31,

	2015	2014
Equity	\$ (131,234)	\$ (54,193)
Long-term debt	91,899	85,798
	\$ (39,335)	\$ 31,605
Cash and cash equivalents	35,108	39,352
	\$ (4,227)	\$ 70,957

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In doing so, the Company may issue new shares, restructure or issue new debt and acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares annual budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The Company's treasury policy specifies that cash is to be held in banks with a rating of A or higher by Moody's or Standard & Poor's. In addition, the Company's investment policy allows investment of surplus funds in permitted investments consisting of US treasury bills, notes and bonds, government sponsored agency debt obligations, corporate debt or municipal securities with credit rating of at least AA. All investments must have a maximum term to maturity of one year.

### Notes to the Mineral Reserve Statement:

- (1) The Mineral Reserves as of December 31, 2015 were estimated using a gold price assumption of \$1,100 per ounce.
- (2) The slope angles of all pit designs are based on geotechnical criteria as established by external consultants. The size and shape of the pit designs are guided by consideration of the results from a pit optimization program.
- (3) Cut-off grades have been estimated based on operating cost projections, mining dilution and recovery, government royalty payment requirements and applicable metallurgical recovery. Marginal cut-off grade estimates for the open pits are as follows: Wassa 0.70 g/t; Mampon 1.52 g/t; and Prestea South 1.23 g/t. Break-even cut-off grade estimates for the underground mines are as follows: Wassa Underground 2.39 g/t; and Prestea Underground 7.50 g/t.

### Notes to the Measured and Indicated Mineral Resources and the Inferred Mineral Resources:\*

- (1) The Mineral Resources for Wassa Other include Father Brown, Benso and Chichiwilli.
- (2) The Mineral Resources for Bogoso/Prestea Other include Chujah, Dumasi, Bogoso North, Buesichem, Opon, and Ablifa.
- (3) The Wassa Underground Mineral Resource has been estimated below the \$1,300 per ounce of gold pit shell using an economic gold grade cut-off of 1.81 g/t Au, which the Company believes would be the lower cut-off for underground.
- (4) The Father Brown Underground Mineral Resource has been estimated below the \$1,300 per ounce of gold pit shell using an economic gold grade cut-off of 3.17 g/t Au, which the Company believes would be the lower cut-off for underground.
- (5) Prestea Underground Mineral Resource has been estimated below the \$1,300 pit shell of Prestea South down to 3,800m elevation using a gold cut-off at 5.43 g/t Au.
- (6) Mineral Resources were estimated using optimized pit shells at a gold price of \$1,300 per ounce. Other than gold price, the same optimized pit shell and underground parameters and modifying factors used to determine the Mineral Resources.
- (7) Mineral Resources are inclusive of Mineral Reserves.

### **Additional Information**

The Mineral Resources estimates in the above tables were reviewed and approved by S. Mitchel Wasel, Vice President Exploration for Golden Star and a "Qualified Person" pursuant to National Instrument 43-101, and the Mineral Reserves estimates in the above tables were reviewed and approved by Dr. Martin Raffield, Senior Vice President Technical Services for Golden Star and a "Qualified Person" pursuant to National Instrument 43-101. See "Note Regarding Reserves and Resources" in the MD&A.

### Cautionary Note regarding Forward-Looking Information

Some statements contained in this Annual Report are "forward-looking statements" and "forward looking information" within the meaning of applicable securities laws. Readers are cautioned that forward-looking statements and information are inherently uncertain and involve risks, assumptions and uncertainties that could cause actual performance, results and achievements to differ materially. There can be no assurance that future developments affecting Golden Star will be those anticipated by management. Please refer to the discussion in the MD&A under the heading "Cautionary Note Regarding Forward-Looking Information". The forecasts contained in this Annual Report constitute management's current estimates as of the date hereof with respect to the matters covered thereby. Golden Star expects that these estimates will change as new information is received. While Golden Star may elect to update these estimates at any time, Golden Star does not undertake to update any estimate at any particular time or in response to any particular event.
