## DEAR SHAREHOLDERS,

Our original headquarters was less than 2,000 square feet. What drove the opening of the Bank was a dissatisfaction with the personal service being provided by the large banks of that time. It was time to create an "alternative" to the big banks.

Today we see ourselves no differently as we position our brand of banking as the "big bank alternative." When it comes down to it, many banks are the same in terms of product and service offerings. We believe today as we did in 1927 that over the long-term the only thing that will differentiate one bank from another is the quality of "personal" service rendered by its employees. That service ethic is embodied in the culture of the organization. It is reinforced each and every day by the senior management team of the Bank.

I am grateful to the dedicated employees of The First National Bank of Long Island. They are a talented and motivated group of individuals who live in and are an integral part of the fabric of the communities they serve. On a daily basis, they routinely exceed my expectations ensuring clients receive superior service. They have made our institution a warm, friendly place to bank and it is my pleasure to work beside them on a daily basis. I am proud to say we have delivered this kind of service approach for the last 90 years. I truly believe our culture and friendly approach helps drive shareholder value.

On that note, I am pleased to report another year of strong financial performance for our bank. Net Income for 2017 was \$35.1 million, an increase of \$4.2 million, or 13.7%, over 2016. The increase was primarily attributable to growth in net interest income of \$10.4 million, or 12.1%, and noninterest income, before security gains and losses, of \$1.2 million, or 15.8%. The increase in net interest income is mainly attributable to growth in average interest-earning assets of \$335.6 million, or 10.4%, which was driven by an increase in the average balance of loans of \$393.9 million or 16.7%. Our loan growth occurred in commercial and residential mortgage loans and, to a lesser degree, commercial and industrial loans. Our loan growth was mainly funded by growing our deposits through the continued expansion of our branch distribution system, targeted solicitation efforts, delivery of high quality personalized service and offering a competitive product suite.

I am also pleased to report that the average balance of our noninterest-bearing checking deposits grew 10.2%. We consider the checking account to be the primary relationship account, and growth in this product category demonstrates the genuine franchise value that we continue to build for our investors. Robust growth in deposits and earning assets is essential in a challenging interest rate environment.

Some other significant highlights include the continued increase in our cash dividends per share which increased 5.5% to \$.58 this year from \$.55. Over the years, the continued and consistent increases in our cash dividends demonstrates the confidence that management and the Board have in the Bank's future earnings power. We remain confident in our organic growth strategy. Over the last ten years, our net income increased at a compound annual growth rate ("CAGR") of 11.8%. We are proud of our results.

In the process of growing earnings, our book value per share increased 11.4% to \$14.37 at December 31, 2017 from \$12.90 at December 31, 2016. In our opinion, the growth in our book value is a strong indicator of the shareholder value we are creating. Over the last ten years, our book value per share has grown at a CAGR of 8.9%. Book value growth over the long-term is consistent with how we manage the Bank. We do not focus on short-term performance. We do not manage the Bank on a day-to-day or quarter-to-quarter basis. It is always about our performance over the longterm. It is interesting to note that our stock's total return, including dividend reinvestment, for the 15-year period ended December 31, 2017 is 410%.

Our growth and profitability has been enhanced by the expansion of our branch distribution system. We believe in branches. As we enter new micro-markets within the New York Metropolitan area, our branches have been the catalyst for gaining market share. Their locations and design are well thought out in terms of the target markets we serve, the amount of capital we invest and efficiency of our expense base. During the year, we opened four more branches. These include our East Islip and East Setauket locations in Suffolk County opened in February and July and our Little Neck and Astoria locations in Queens opened in December. The Astoria branch was our sixth location in the boroughs of Queens and Brooklyn. As these boroughs are lucrative

retail banking markets, we plan to open three or four more branches there before the end of 2018 and are committed to continued expansion in the coming years. We anticipate gaining market-share in the process which will drop to the bottom line. Our model remains utilizing continued branch expansion to fund loan growth with core deposits and maintaining pristine credit quality and best-in-class operating efficiency. This approach remains valid and has been driving shareholder value.

The conservative mix of the earning assets on our balance sheet is measured by our asset quality. In a flat yield curve environment, asset quality is paramount. At December 31, 2017, our nonaccrual loans amounted to \$1 million, or 3 basis points of total loans outstanding, compared to \$2.6 million, or 10 basis points at December 31, 2016. Troubled debt restructurings amounted to \$1 million, or 4 basis points of total loans outstanding at December 31, 2017, representing a decrease of \$498,000 from year-end 2016. Loans past due 30 to 89 days amounted to only \$2.8 million, or 9 basis points of total loans outstanding. Any way you look at it, our loan quality remains excellent.

The credit quality of the Bank's securities also remains excellent. 74% of our mortgage securities are full faith and credit obligations of the U.S. government. The balance are obligations of government-sponsored entities. The remainder of the Bank's securities portfolio principally consists of high quality, general obligation municipal securities rated AA or better by major rating agencies. In buying municipal securities, the Bank uses credit agency ratings for screening purposes only and then performs its own credit analysis. On an ongoing basis, the bank periodically assesses the credit strength of the municipal securities in its portfolio and makes decisions to hold or sell our securities based on such assessments.

We are serious about maintaining our credit quality. As bankers, we believe that conservatism is essential to producing consistently strong financial results and creating long-term shareholder value.

We will face a variety of challenges in 2018 and beyond. In the current interest rate environment, competitive market forces are driving up our cost of deposits while yields on our earning assets are not expected to increase as quickly or as much. As a result, our net interest margin will remain under pressure and our net interest income and corresponding earnings will only be able to increase with appropriate growth. Price competition will remain a significant factor especially as we compete for core deposits and high quality loans.

The banking industry continues to face new and complex regulatory requirements and enhanced supervisory oversight which is exerting downward pressure on revenues and upward pressure on required capital levels and the cost of doing business. Although the markets are expecting some regulatory relief, the timing and magnitude of that remains uncertain.

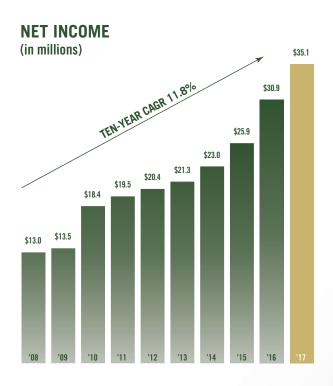

Despite these challenges, the Bank has been able to produce long-term results that we are proud of. We have assembled a talented management team and a dedicated staff. Expenses are well-managed, and our asset quality is among the best in our peer group. We continue to grow organically in a measured and disciplined way. The morale of our employees is high, and they are proud of the Bank. This has certainly worked in our favor in building brand and reputation in the market. Our board, myself, our senior management and our employees remain committed to building long-term franchise value and the shareholder value that you are entitled to.

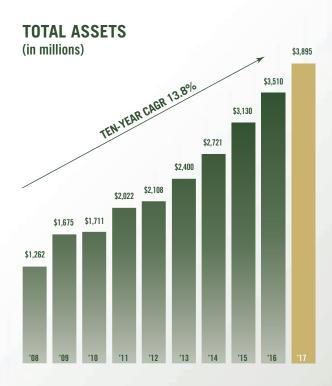

It is my distinct honor to be your President and Chief Executive Officer. Always feel free to contact me to answer any questions you may have.

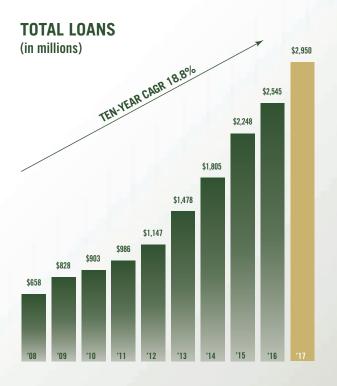

Sincerely,

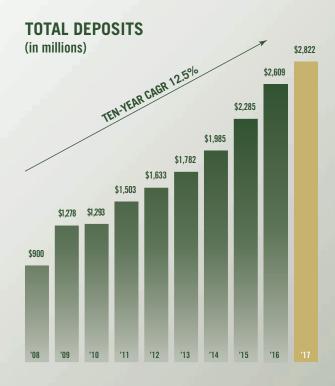

Michael N. Vittorio President and Chief Executive Officer

## FINANCIAL OVERVIEW

GROWING OUR PRESENCE

## LONG ISLAND

#### EAST ISLIP | 151 WEST MAIN STREET | OPENED 2/6/17

There are many success stories in the local communities we serve. Our clients' loyalty and longevity with our Bank is a result of the significant contributions our employees make every day to help our customers with their banking needs.

DEPOSITS AS OF 2/16/18: \$39,166,000

#### BUSINESS OF THE CORPORATION

The First of Long Island Corporation ("Corporation") is a one-bank holding company organized under the laws of the State of New York. Its primary business is the operation of its sole subsidiary, The First National Bank of Long Island ("Bank").

The Bank was organized in 1927 under national banking laws and became the sole subsidiary of the Corporation under a plan of reorganization effected April 30, 1984.

The Bank is a full service commercial bank which provides a broad range of financial services to individual, professional, corporate, institutional and government customers through its branch system in Nassau and Suffolk Counties, Long Island and the New York City boroughs of Queens, Brooklyn and Manhattan.

The Corporation is subject to regulation and supervision of the Federal Reserve Board and the Securities and Exchange Commission. The Bank is subject to regulation and supervision of the Federal Reserve Board, the Office of the Comptroller of the Currency (OCC) and the Federal Deposit Insurance Corporation, which also insures its deposits. The OCC is the primary banking agency responsible for regulating and supervising the Bank.
