Metal Bank Limited
and its controlled entities

Annual Financial Report

For the year ended
30 June 2016

METAL BANK LIMITED AND ITS CONTROLLED ENTITIES
CONTENTS

Dear Shareholder

On behalf of the Directors of Metal Bank Limited (Metal Bank, MBK or the Company), I am pleased to report on the activities of the Company for the year ended 30 June 2016.

2016 has seen a change in focus from the Mason Valley Copper Project in Nevada, USA to the Company's Eastern Australian gold projects with significant exploration success at the Triumph Project, Queensland.

Near surface, high grade gold mineralisation has been intersected in drilling on both of the targets tested so far and we are confident of further discoveries as we expand our programme and begin testing other priority targets and move towards resource definition. We are also excited by the prospect that the high grade mineralisation intersected to date may represent gold leakage from a significant bulk tonnage gold system.

We believe the Triumph project has compelling upside that will contribute significantly to the future growth of Metal Bank.

The Company's Eidsvold Project is also very prospective and is centred on an historical goldfield with past production (circa. 1900's) of approximately 100,000oz Au. We have secured tenure over a $250km^2$ igneous complex prospective for intrusion related gold which is underexplored. This project has many similarities to the Triumph project being centred on an historical goldfield with the surrounding prospective rocks concealed by sedimentary cover. Initial exploration by Metal Bank in 2014 led to the discovery of high grade mineralisation including 1m @ 17.45g/t Au, 90g/t Ag, and 2.5% Cu which confirmed our targeting and exploration model. With renewal of the tenement for a further five years, we anticipate commencing further exploration work during the 2017 period.

The Company is also continuing to review new project opportunities with a view to identifying projects that fit with its growth strategy and have the ability to add shareholder value.

Successful capital raisings in September 2015, March 2016 and more recently in September 2016 show investor confidence in the Company and strong continuing support by shareholders.

Inés Scotland
Non-executive Chair
28 September 2016

REVIEW OF OPERATIONS

The operations of the consolidated entity during the year are as described below:

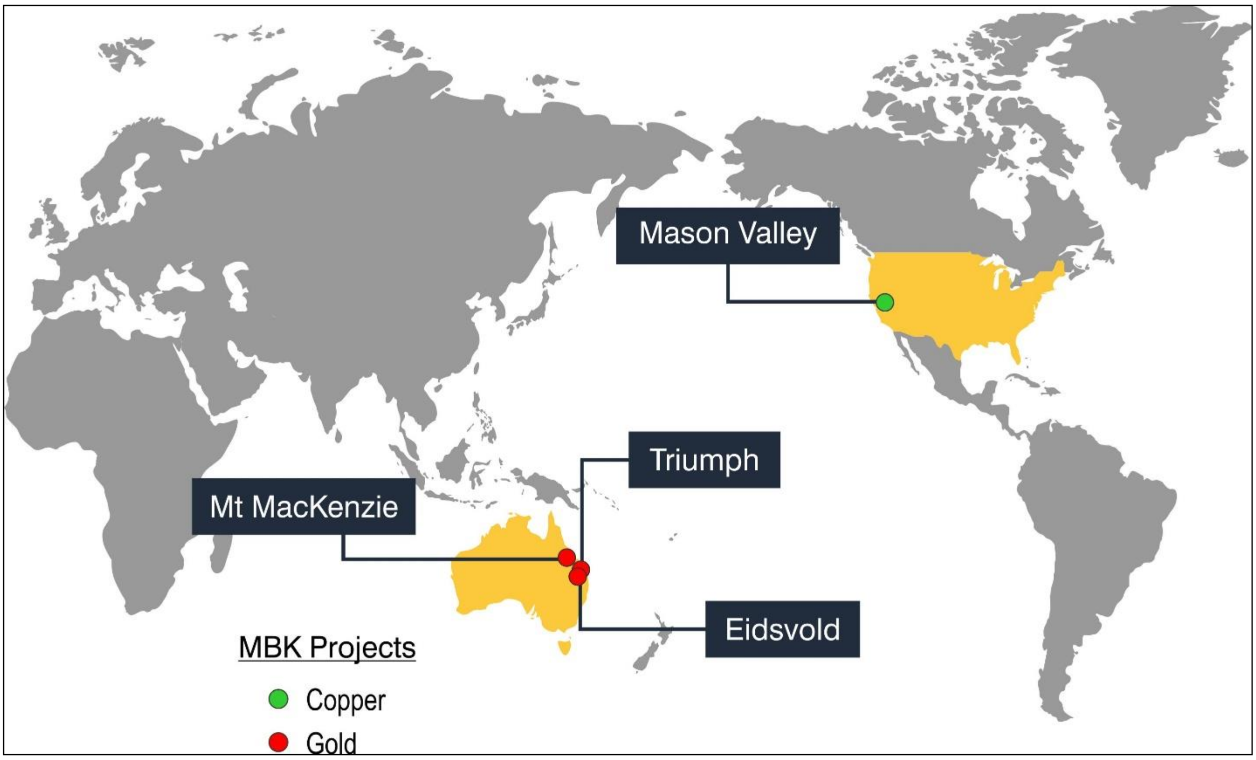

Figure 1: Metal Bank Limited –Project Locations (note Mason Valley JV finished in April 2016)

During the year Metal Bank focussed on its gold projects in Queensland, particularly the **Triumph project** where near surface, high grade drill results were returned. MBK has invested in significant greenfields exploration over the past five years resulting in the definition of an extensive gold camp / system predominantly concealed by shallow cover. Only two of the targets have been drill tested so far with both returning near surface high grade gold mineralisation. The priority on the project is to define near surface gold resources to support an initial open pit mining scenario.

Drilling results on the **Mason Valley Copper project** Joint Venture (Nevada) during the year were encouraging although not considered sufficient to justify continuing beyond Year 1 of the Joint Venture. The Joint Venture ceased on 31 March 2016 after meeting the initial commitments.

Gold - Eastern Australia

MBK holds two gold projects prospective for intrusion related gold mineralisation within the northern New England Orogen of eastern Australia (**Error! Reference source not found.**). This region hosts several gold mines including the Cracow (3Moz Au), Mt Rawdon (2Moz Au) gold mines and Mt Carlton gold-silver-copper mine (1.4Moz AuEq) as well as the historical Mt Morgan deposit (8Moz Au). Refer to **Error! Reference source not found.** showing the intrusion related gold model and MBK projects.

The **Triumph project** represents the highest priority for MBK. High grade gold mineralisation intersected in drilling this year provide strong support for multi-million ounce gold potential within a large under-explored gold system dominantly concealed by shallow cover.

The **Eidsvold project** is centred on a historical goldfield (100,000oz Au historical production) with almost no exploration completed beneath the surrounding sedimentary cover in the district. Regional airborne magnetics provides support for large untested targets beneath the cover.

Limited surface sampling on the **Mt Mackenzie project** did not identify anomalous gold associated with a Cu-Mo porphyry system (not previously sampled for gold). While other gold targets exist on the project they are not a current core priority for MBK.

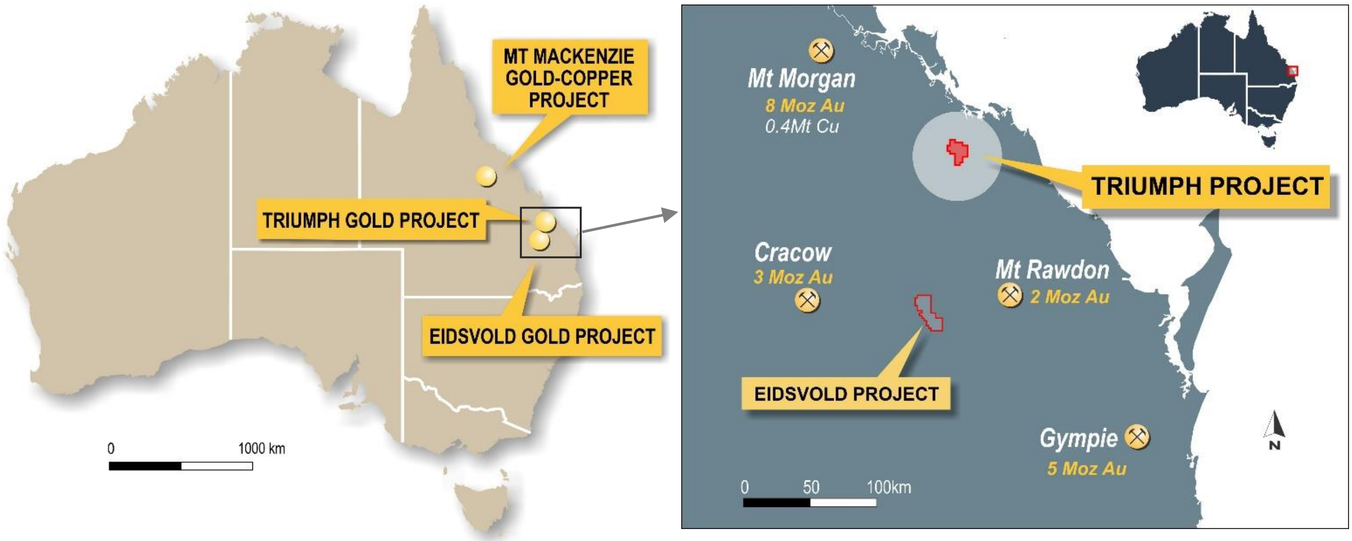

Figure 2: Location of MBK gold/copper projects in Eastern Australia

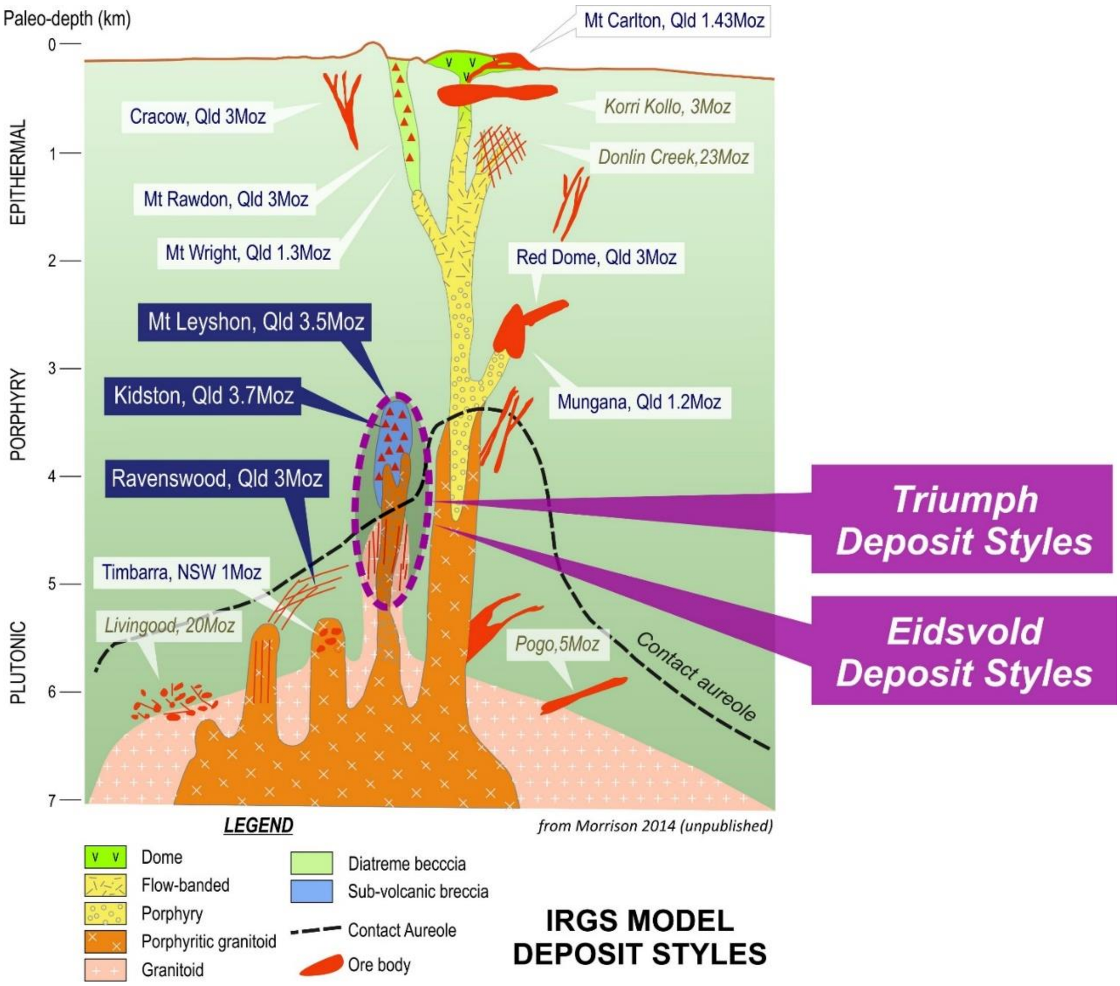

Figure 3: Intrusive related gold deposit styles showing MBK projects

Triumph Project (100% MBK)

The Triumph project (135km^2) is centred about the historical high grade Norton goldfield (mined in the late 1800's and again in the 1990's) located between Mt Rawdon (2Moz Au) gold mine and the historical Mt Morgan (8Moz Au and 0.4Mt Cu) mine in the Northern New England Orogen, south east Queensland (**Error! Reference source not found.**).

Near surface high grade gold mineralisation has been intersected in MBK's drilling completed this year with only two of the priority targets tested to date. MBK has invested in a significant greenfields exploration programme on the Triumph project over the past five years resulting in the definition of an extensive gold camp / system predominantly concealed by shallow cover. The exploration priority on the Triumph project is to define near-surface high grade gold resources particularly at Bald Hill and in parallel target the potential for a bulk tonnage gold style system as part of the causative mineralising intrusive.

RC drilling was completed during 2016 on outcropping gold targets defined by soil and rock chip geochemistry at **Bald Hill** and **New Constitution** prospects. In addition, an orientation aircore bedrock sampling programme was completed as a first pass evaluation of broad, regional exploration target areas concealed by shallow sedimentary cover.

RC drilling at the **Bald Hill** prospect (9 holes for 181m to 30 June 2016) has now defined an extensive near surface gold mineralised system with potential for high grade gold including significant Ag and Cu mineralisation credits. It is possible that the high grade mineralisation intersected represents leakage from a significant bulk tonnage gold system associated with the causative mineralising intrusive.

Significant results at **Bald Hill** prospect during the year include[1]:

- **15m @ 10.3g/t Au, 76g/t Ag, 0.5% Cu** from 9m (TDH039)
    - incl. **4m @ 34.2g/t Au, 220g/t Ag, 1.4% Cu** from 14m
- **6m @ 2.4g/t Au**, 18g/t Ag from 7m (TDH021)
- **15m @ 1.6g/t Au**, 9g/t Ag from 7m (TDH022)

Refer to Figure 4 showing Bald Hill long section.

RC drilling at the **New Constitution** prospect (12 holes for 149m to 30 June 2016) targeted soil and rock chip gold geochemical anomalies not previously drill tested. Drill results highlight potential for multiple sub-parallel to parallel zones of gold-silver mineralisation and define a zone >600m x 600m and mostly concealed beneath shallow cover (<4m).

Significant results at **New Constitution prospect** during the year include[2]:

- **18m @ 2.0g/t Au**, 8g/t Ag from surface (TDH037) including
    - **3m @ 3.7g/t Au**, 29g/t Ag from 6m
    - **4m @ 5.3g/t Au**, 8g/t Ag from 13m

To date, the Company's exploration has focussed on zones of outcropping mineralisation, which has essentially only tested a small portion (<20%) within the 15km^2 Triumph gold camp which is dominantly (>90%) concealed beneath shallow cover.

A revision of the geological model for the Triumph gold camp now provides strong indication for a bulk tonnage gold target. Large intrusion related gold systems in eastern Australia (and around the world) are commonly zoned in both hydrothermal alteration and multi-element geochemistry patterns. Improved understanding of the zoning patterns within the 15km^2 Triumph gold camp has directly contributed to the recent near surface high grade gold drilling success at both Bald Hill and New Constitution prospects. This success underpins the Company's confidence in the other high priority targets in the project pipeline yet to be tested. Refer to current priority targets in Table 1 below with locations shown in Figure 5.

[1] MBK ASX 20 June 2016
[2] MBK ASX 21 June 2016

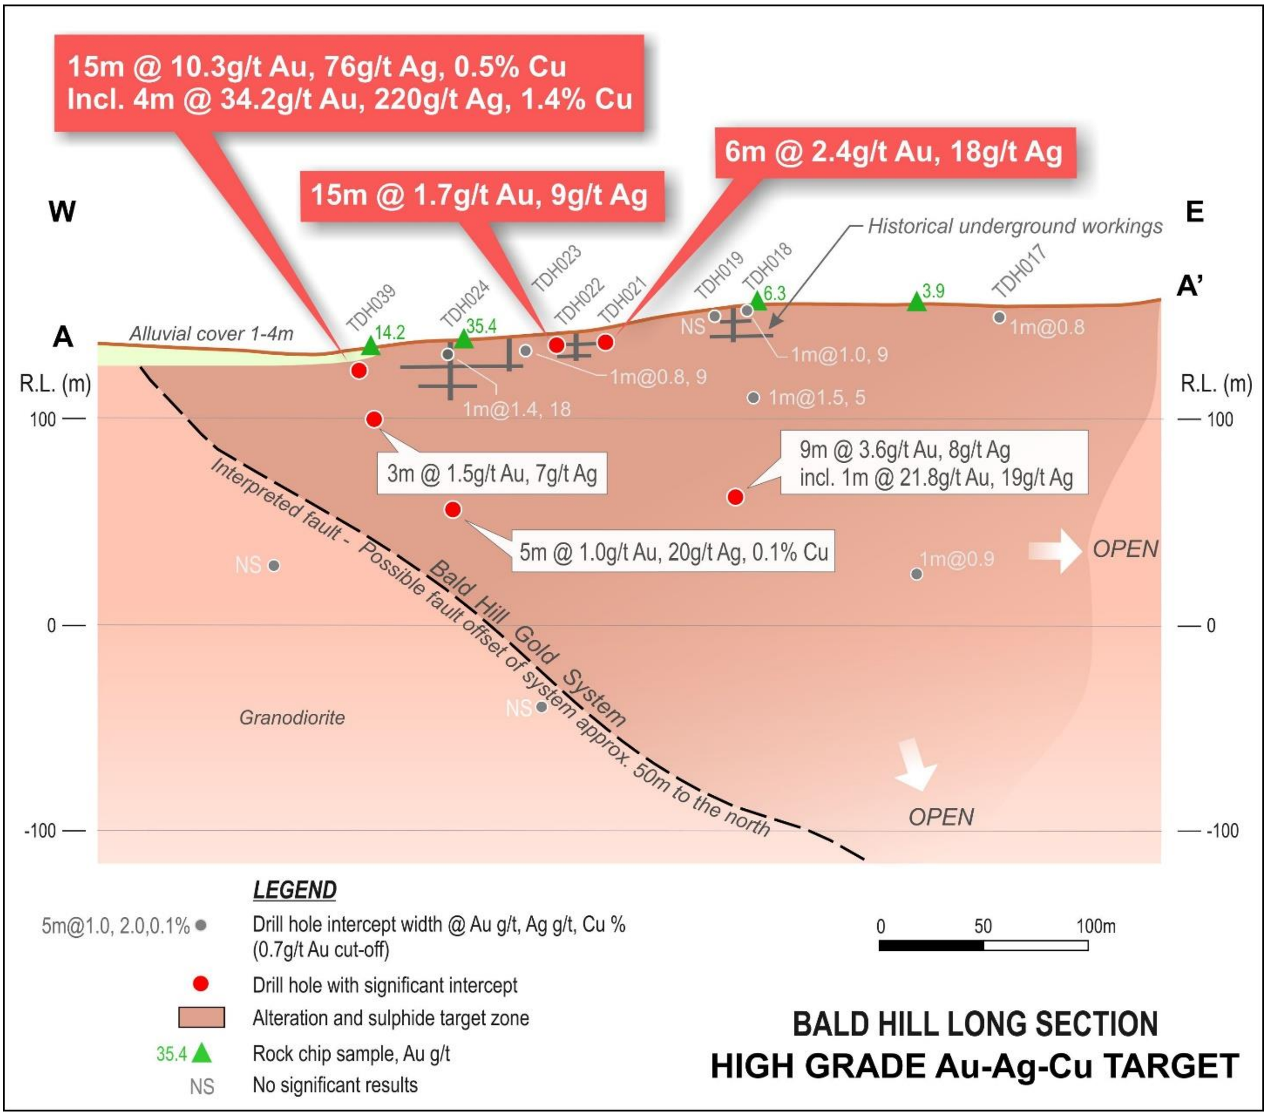

Figure 4: Bald Hill long section showing recent high grade gold intersections

Table 1: Priority gold targets within the Triumph gold camp (locations shown in Figure 5)

	Target	Attributes	Highlights
ADVANCED	**Bald Hill**	Resource definition	Up to 15m @ 10.3g/t Au, 76g/t Ag, 0.5% Cu from 9m in drilling
	New Constitution	Combined 3km strike potential	Up to 18m @ 2.0 g/t Au, 8 g/t Ag from surface in drilling
	Advance	Historical gold camp	4500 Oz Au at 94 g/t Au historical production
	Big Hans	Interpreted extension of Bald Hill	Up to 4m @ 3.67 g/t Au from 22m historical drilling
BROWNFIELDS	**Harmony**	>1km strike potential	Up to 62.8 g/t Au and 161 g/t Ag in rockchip
	Handbrake Hill	>1km strike potential	4m @ 10.55 g/t Au from historical drilling
	Super Hans	100m x >500m long shear zone	Up to 20.1 g/t Au in rockchip
	Old Welcome	>800m long shear zone	Up to 32.7 g/t Au in rockchip
	Cattle Creek	>1km long shear zone	Up to 53.5 g/t Au in rockchip
GREENFIELDS	**Bonneville**	>1km strike potential	Up to 255 g/t Au in float rockchip
	Rands	Southern extension of Bald Hill	Up to 20.3 g/t Au in historical stream sediment
	NE Regional	5km^2	Untested area within fertile intrusive, masked by shallow cover

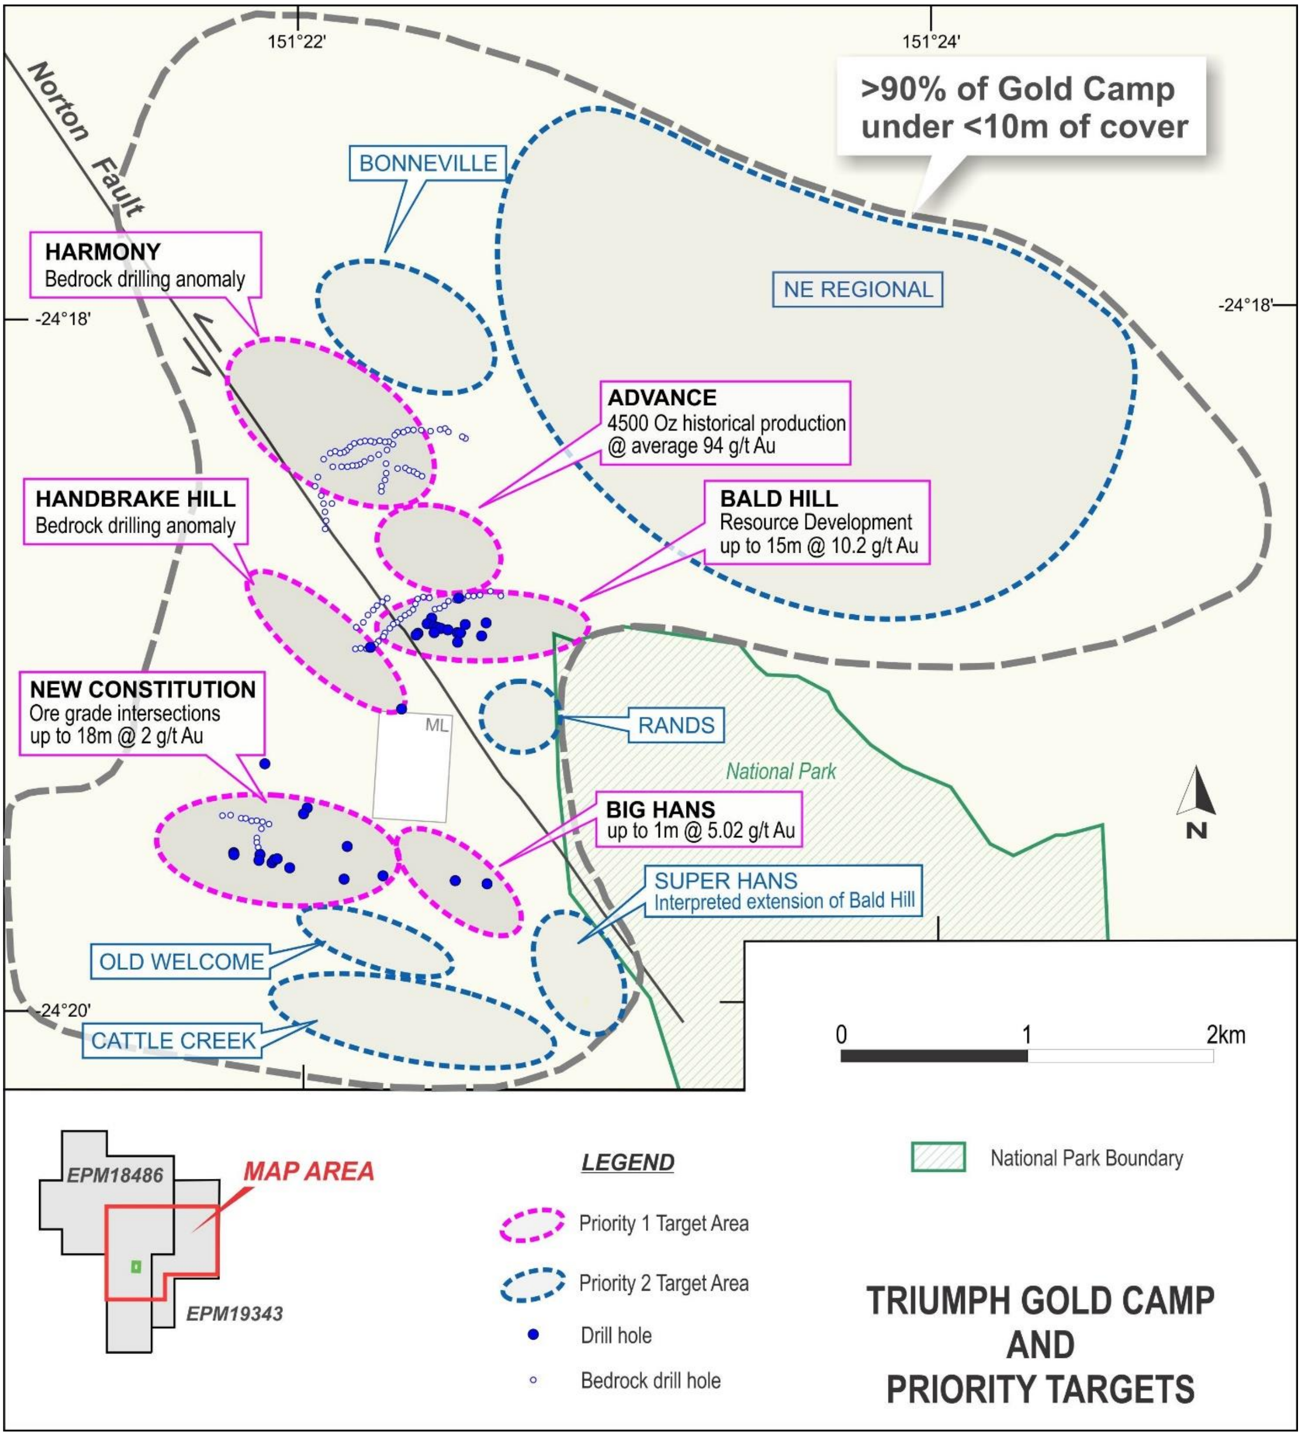

Figure 5: Triumph gold camp and priority targets

Eidsvold Project (100% MBK)

The Eidsvold project is centred on the historical Eidsvold goldfield (100,000oz Au mined in the early 1900's) within the Eidsvold intrusive complex, located between the Cracow (3Moz Au) and Mt Rawdon (2Moz Au) gold mines in the Northern New England Orogen (refer Figure and Figure). Planned exploration on the Eidsvold project was postponed following exploration success on the Triumph project. The Eidsvold project represents an excellent greenfields opportunity for MBK and remains a priority project.

The discovery of high grade gold mineralisation including 1m @ 17.45g/t Au, 90g/t Ag, and 2.5% Cu[3] as part of an intrusion related gold system confirmed the Company's exploration model and has opened up the potential of the entire Eidsvold intrusive complex (250km^2) which is almost entirely concealed beneath sedimentary cover.

A renewal application of the main tenement (EPM18431) has been approved for a further 5 years.

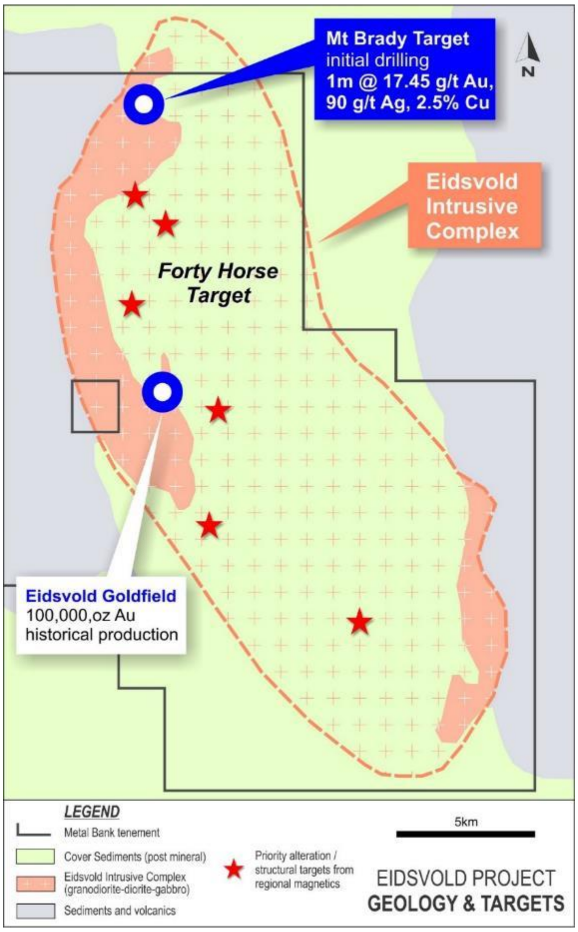

Figure 5: Location of priority target areas on regional geology summary

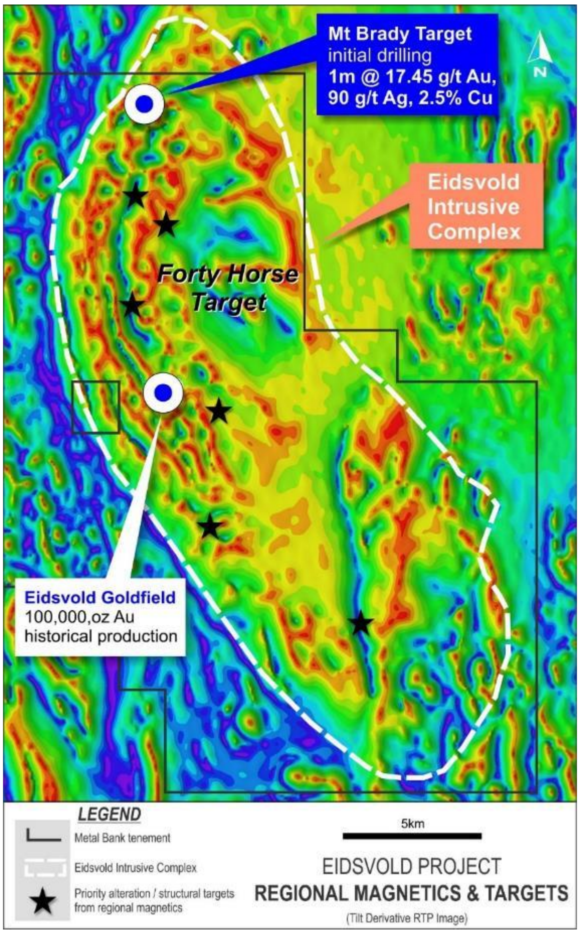

Figure 6: Location of priority target areas on RTP tilt derivative processed regional magnetics

Mt Mackenzie Project (100% MBK)

The Mt Mackenzie project is located 40km NE of the Mt Carlton Au-Ag-Cu mining operation owned by Evolution Mining; an operation that produces approximately 85,000 gold equivalent ounces per year.

During the year a small field programme involving field geological mapping and surface geochemical sampling including 155 soil samples and 15 rock chip samples was completed over a porphyry system identified from historical 1970's sampling that had been overlooked by modern exploration. While strongly anomalous copper and molybdenum results were achieved, the lack of associated gold anomalism suggests that the gold

[3] ASX Release 15/4/2014

target zone could be more distal (further away) along the main structural corridor. A review of the project will be conducted prior to completing further exploration.

Many large porphyry style gold deposits in eastern Australia contain elevated copper and molybdenum with examples including the Mt Leyshon (3.5Moz Au) and Kidston (3.7Moz Au) deposits.

Copper – Western USA

Mason Valley Copper Project (MBK withdrawal from JV)

MBK entered into a Joint Venture ("JV") with GRG International in early 2015 covering the Mason Valley Copper Project in the copper rich Yerington district of Nevada. During the first 12 months of the JV (during 2015) exploration and drilling concentrated on evaluating four historical copper mines which had been overlooked by modern exploration. A total of 18 RC holes were completed for 1846m. Encouraging results were returned from the drilling including:

- Bluestone mine – 42m @ 1.5% Cu (oxide) from surface[4]
- Malachite mine – 8m @ 2.7% Cu (sulphide) from 61m[5]
- Mason Valley mine – 12m @ 0.8% Cu (sulphide) from 181m[6]
- Copper Hill mine – 3m @ 1.2% Cu, 88g/t Ag, 1.0% Pb and 5.5% Zn (oxide) from surface[7]

MBK elected not to continue with the JV beyond the first sole funding period (31 March 2016) after meeting the minimum commitments. While ore grade copper was intersected in drilling we did not see the near term scope to support a production profile of at least 20,000t copper per year based on the exploration completed. Furthermore, given the recent downturn in metal markets, MBK has elected not to continue with the Mason Valley Copper Project Joint Venture on the commercial terms announced on 4 February 2016.

EPM – Exploration Permit

Competent Persons Statement

The information in this Report that relates to Exploration Results is based on information compiled or reviewed by Mr Tony Schreck, who is a Member of The Australasian Institute of Geoscientists. Mr Schreck is an employee of the Company. Mr Schreck has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Schreck consents to the inclusion in the Report of the matters based on his information in the form and context in which it applies.

The Exploration Targets described in this report are conceptual in nature and there is insufficient information to establish whether further exploration will result in the determination of Mineral Resources. Any resources referred to in this report are not based on estimations of Ore Reserves or Mineral Resources made in accordance with the JORC Code and caution should be exercised in any external technical or economic evaluation.

Metal Bank Limited ("**Metal Bank**"), through its board and executives, recognises the need to establish and maintain corporate governance policies and practices that reflect the requirements of the market regulators and participants, and the expectations of members and others who deal with Metal Bank. These policies and practices remain under constant review as the corporate governance environment and good practices evolve.

ASX Corporate Governance Principles and Recommendations

The third edition of ASX Corporate Governance Council Principles and Recommendations (the "Principles") sets out recommended corporate governance practices for entities listed on the ASX.

The Company has issued a Corporate Governance Statement which discloses the Company's corporate governance practices and the extent to which the Company has followed the recommendations set out in the Principles. The Corporate Governance Statement was approved by the Board on 26 September 2016 and is available on the Company's website: http://metalbank.com.au/corporate-governance

Your directors present their report on Metal Bank Limited and its subsidiaries (**Consolidated Entity** or the **Group**) for the year ended 30 June 2016.

DIRECTORS
The names of directors in office at any time during or since the end of the year are:

Current Directors

INĖS SCOTLAND
NON-EXECUTIVE CHAIR
B App Sc

Ms Scotland was most recently the Managing Director and CEO of Ivanhoe Australia, an ASX listed entity with a market capitalisation of $500m.

Prior to this Ms Scotland was the Managing Director and CEO of Citadel Resource Group Limited. Ms Scotland was a founding shareholder of Citadel and was its managing director through its growth, until its acquisition by Equinox Minerals in January 2011.

At the time of acquisition by Equinox, Citadel was developing the Jabal Sayid Copper Project in Saudi Arabia, had a market capitalisation of $1.3B and had raised more than $380m on the equity markets.

Ms Scotland has worked in the mining industry for over 20 years for large scale gold and copper companies in Australia, Papua New Guinea, USA and the Middle East. This has included working for Rio Tinto companies, Comalco, Lihir and Kennecott Utah Copper.

Appointed 13 August 2013.

Other current public company directorships:

- None

Former directorships in the last 3 years:

- St Barbara Limited
- Ivanhoe Australia Limited
- Citadel Resource Group Limited

ANTHONY SCHRECK
EXECUTIVE DIRECTOR
B App Sc(Geol), GDipSc, MAIG, GAICD

Mr Schreck has 25 years of mineral exploration experience in Australia and the South West Pacific region (Solomon Islands). He has managed large exploration projects in challenging terrains for major companies including North Flinders Mines, Normandy, Newmont, Anglo Gold Ashanti and Xstrata.

Mr Schreck is credited with the grassroots discovery of the multi-million ounce Twin Bonanza gold system (Buccaneer and Old Pirate gold deposits) in the Northern Territory. He has been key in the successful startup and management of a number of private resource companies.

Appointed 29 November 2013.

Mr Schreck has held no other current public company directorships or former directorships in the last 3 years.

GUY ROBERTSON
EXECUTIVE DIRECTOR
B Com (Hons), CA.

Mr Robertson has more than 30 years' experience as Chief Financial Officer, Company Secretary and Director of both public and private companies in Australia and Hong Kong.

Previous roles included Chief Financial Officer/GM Finance of Jardine Lloyd Thompson, Colliers International Limited and Franklins Limited.

GUY ROBERTSON (CONTINUED)

Mr Robertson has over 8 years' experience in ASX listed mineral exploration companies and is currently a Director of Estrella Resources Limited and Draig Resources Limited.

Appointed 17 September 2012.

Former directorships in the last 3 years:

- Hastings Rare Metals Limited
- Artemis Resources Limited

Secretary

SUE-ANN HIGGINS
(Company Secretary)
BA LLB Hons ACIS GAICD

Ms Higgins is an experienced company executive who has worked for over 25 years in the mining industry including in senior legal and commercial roles with ARCO Coal Australia Inc, WMC Resources Ltd, Oxiana Limited and Citadel Resource Group Limited. Ms Higgins has extensive experience in governance and compliance, mergers and acquisitions, equity capital markets and mineral exploration, development and operations.

Appointed 21 August 2013

Interest in the shares and options of the Company

As at the date of this report, the interests of the directors in the shares and options of Metal Bank Limited were:

	Ordinary Shares	Options	Performance Rights
Inés Scotland	72,585,647	-	-
Anthony Schreck	14,584,678	9,000,000	-
Guy Robertson	-	-	-

SIGNIFICANT CHANGES IN STATE OF AFFAIRS

Other than as outlined in the Chairman's report, there were no significant changes in the state of affairs of the Company during the year.

PRINCIPAL ACTIVITIES

The principal activity of the Company during the financial year was mineral exploration. There have been no significant changes in the nature of the Company's principal activities during the financial year.

SIGNIFICANT AFTER BALANCE SHEET DATE EVENTS

Subsequent to balance date the Company has completed a capital raise of $3.5 million and is undertaking a rights issue to raise up to a further $1.9m.

Other than as outlined above there are no matters or circumstances that have arisen since the end of the financial period that have significantly affected or may significantly affect the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.

LIKELY FUTURE DEVELOPMENTS AND EXPECTED RESULTS

The primary objective of Metal Bank is to continue its exploration activities on its current Triumph and Eidsvold Projects in Australia and to continue to pursue new project opportunities as they arise.

The material business risks faced by the Company that are likely to have an effect on the financial prospects of the Company, and how the Company manages these risks, are:

- Future Capital Needs – the Company does not currently generate cash from its operations. The Company will require further funding in order to meet its corporate expenses, continue its exploration activities and complete studies necessary to assess the economic viability of its projects. The Company's financial position is monitored on a regular basis and processes put into place to ensure that fund raising activities will be conducted in a timely manner to ensure the Company has sufficient funds to conduct its activities.
- Exploration and Developments Risks – the business of exploration for gold and other minerals and their development involves a significant degree of risk, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. To prosper, the Company depends on factors that include successful exploration and the establishment of resources and reserves within the meaning of the 2012 JORC Code. The Company may fail to discover mineral resources on its projects and once determined, there is a risk that the Company's mineral deposits may not be economically viable. The Company employs geologists and other technical specialists, and engages external consultants where appropriate to address this risk.
- Commodity Price Risk – as a Company which is focused on the exploration of gold and base and precious metals, it is exposed to movements in the price of these commodities. The Company monitors historical and forecast price information from a range of sources in order to inform its planning and decision making.
- Title and permit risks - each permit or licence under which exploration activities can be undertaken is issued for a specific term and carries with it work commitments and reporting obligations, as well as other conditions requiring compliance. Consequently, the Company could lose title to, or its interests in, one or more of its tenements if conditions are not met or if sufficient funds are not available to meet work commitments. Any failure to comply with the work commitments or other conditions on which a permit or tenement is held exposes the permit or tenement to forfeiture or may result in it not being renewed as and when renewal is sought. The Company monitors compliance with its commitments and reporting obligations using internal and external resources to mitigate this risk.

PERFORMANCE IN RELATION TO ENVIRONMENTAL REGULATION

The consolidated entity will comply with its obligations in relation to environmental regulation on its Queensland projects and when it undertakes exploration in the future. The Directors are not aware of any breaches of any environmental regulations during the period covered by this report.

OPERATING RESULTS AND FINANCIAL REVIEW

The loss of the consolidated entity after providing for income tax amounted to $1,980,229 (2015: loss of $965,138). The result for the year was impacted by the following:

The Group's operating income decreased to $2,988 (2015 - $6,415) primarily the result of a reduction in interest income given less funds on hand.

Expenses increased to $1,983,217 (2015 - $971,553). The expenses for the period included a write off of exploration expenditure in the amount of $1,354,065 relating to the Mason Valley copper project.

Exploration costs decreased to $3,426,949 (2015 - $4,057,883) reflecting the write off of exploration expenditure on the Mason Valley Copper Project.

Net assets decreased to $3,013,882 (2015 - $3,889,271) reflecting a capital raise of approximately $1.1 million and the result for the year.

DIVIDENDS PAID OR RECOMMENDED

The directors do not recommend the payment of a dividend and no amount has been paid or declared by way of a dividend to the date of this report.

REMUNERATION REPORT

Remuneration Policy

The Board determines, on a case by case basis, the terms and conditions of employment of company executives and consultants, including remuneration.

The Board's policy for determining the nature and amount of remuneration for Board members and executives (***Remuneration Policy***) is as follows:

- The terms and conditions for the executive directors and other senior staff members, are developed by the Chair and Company Secretary and approved by the Board;
- Remuneration for directors and senior executives is determined and reviewed by the Board by reference to the Company's performance, the individual's performance, as well as comparable information from listed companies in similar industries;
- In determining competitive remuneration rates, the Board may seek independent advice on local and international trends among comparative companies and industry generally. It examines terms and conditions for employee incentive schemes, benefit plans and share plans. Independent advice may be obtained to confirm that executive remuneration is in line with market practice and is reasonable in the context of Australian executive reward practices;
- The Company is a mineral exploration company and does not generate cash from its operations. In order to preserve cash for exploration activities, the Board has determined, where possible, to pay a base remuneration less than market rates to its executive directors, employees and individual contractors with base remuneration to be supplemented by options and performance incentives to ensure attraction, retention and ongoing incentives for its directors and executives;
- All remuneration paid to directors is valued at the cost to the Company and expensed. Where appropriate, shares given to directors and executives are valued as the difference between the market price of those shares and the amount paid by the director or executive. Options are valued using the Black-Scholes methodology;
- Issue of performance rights are subject to the terms of Metal Bank Performance Rights Plan and their vesting is subject to vesting conditions and performance hurdles relating to the performance of both the Company and the individual as determined and assessed by the Board;
- The Board policy is to remunerate non-executive directors at market rates for comparable companies for time, commitment and responsibilities. The Board determines payments to the non-executive directors and reviews their remuneration annually, based on market practice, duties and accountability.

The Company has not tabled figures for earnings and shareholders' funds for the last five years as, being an exploration company, these historical figures have no relevance in determining remuneration structure.

DIRECTORS' AND EXECUTIVE OFFICERS' EMOLUMENTS –

(a) Details of Directors and Key Management Personnel

(i) *Current Directors*
Inés Scotland – Non-Executive Chair (appointed 13 August 2013)
Anthony Schreck – Executive Director (appointed 29 November 2013)
Guy Robertson – Executive Director (appointed 17 September 2012)

(ii) *Company Secretary*
Sue-Ann Higgins (appointed 21 August 2013)

(iii) *Key Management Personnel*
Trevor Wright (appointed 4 July 2016)

Other than the directors and the company secretary, the Company had no Key Management Personnel for the financial year ended 30 June 2016. Mr Trevor Wright was appointed as Exploration Manager after the end of the reporting period.

Directors' remuneration and other terms of employment are reviewed annually by the Board having regard to performance against goals set at the start of the year, relative comparative information and independent expert advice, where appropriate.

Except as detailed in Notes (a) – (c) to the Remuneration Report, no director or officer has received or become entitled to receive, during or since the financial year, a benefit because of a contract made by the Company or a related body corporate with a director, a firm of which a director is a member or an entity in which a director has a substantial financial interest. This statement excludes a benefit included in the aggregate amount of emoluments received or due and receivable by directors and shown in Notes (a) – (c) to the Remuneration Report, prepared in accordance with the Corporations Regulations, or the fixed salary of a full time employee of the Company.

(b) Remuneration of Directors and Key Management Personnel

Remuneration Policy

The Company's Remuneration Policy is outlined above. Remuneration of Directors of the Group and Key Management Personnel is set out below.

Parent & Group Key Management Personnel –

	2016				2015			
	Base Salary and Fees	Share Based Payments	Super-annuation	Total	Base Salary and Fees	Share Based Payments[1]	Super-annuation	Total
I. Scotland	-	-	-	-	38,139	-	3,624	41,763
A. Schreck	165,000	-	15,675	180,675	155,000	37,500	14,725	207,225
G. Robertson	50,000	-	-	50,000	50,000	-	-	50,000
S. Higgins	90,220	-	-	90,220	109,230	-	-	109,230
Totals	**305,220**	**-**	**15,675**	**320,895**	**352,369**	**37,500**	**18,349**	**408,218**

[1]Performance rights were granted to Tony Schreck, the executive director responsible for the Company's exploration activities on 2 July 2015. Details of the number and terms of the performance rights issued are set out in Note (c) below.

During the year 1,271,186 shares were issued to Mr Tony Schreck on the vesting of performance rights during the performance period. The Performance Period ended on 9 March 2016, and the balance of performance rights on issue lapsed as at this date.

There are no other employment benefits, either short term, post-employment or long term, non-monetary or otherwise other than those outlined above.

(c) Employee Related Share-based compensation

Options

To ensure that the Company has appropriate mechanisms to continue to attract and retain the services of directors and employees of a high calibre, the Company has a policy of issuing options that are exercisable in the future at a certain fixed price.

No options were issued to employees or to directors or executives as part of their remuneration for the year ended 30 June 2016

Performance Rights

The Metal Bank Performance Rights Plan (the ***Rights Plan***) and issue of securities under the Rights Plan was first approved by shareholders at the Annual General Meeting of the Company held on 30 November 2012 and this approval was renewed by shareholders at the Annual General Meeting of the Company held on 12 November 2015.

To be eligible to participate in the Rights Plan, a person must be a full or part time employee, contractor or consultant (approved by the Board) of the Company or any subsidiary of the Company or a director.

No performance rights were issued under the Rights Plan during the reporting period.

During the year 1,271,186 shares were issued to Mr Tony Schreck on the vesting of performance rights during the performance period. The Performance Period ended on 9 March 2016, and the balance of performance rights on issue lapsed as at this date.

MEETINGS OF DIRECTORS

The number of directors' meetings (including committees) held during the financial period, each director who held office during the financial period and the number of meetings attended by each director are:

	Directors Meetings	
Director	**Meetings Attended**	**Number Eligible to Attend**
I. Scotland	4	5
A. Schreck	5	5
G. Robertson	5	5

In addition to the board meetings there were three circular resolutions by the board during the financial period.

INDEMNIFYING OFFICERS

In accordance with the constitution, except as may be prohibited by the Corporations Act 2001, every officer or agent of the Company shall be indemnified out of the property of the Company against any liability incurred by him or her in his or her capacity as officer or agent of the Company or any related corporation in respect of any act or omission whatsoever and howsoever occurring or in defending any proceedings, whether civil or criminal.

The Company paid insurance premiums of $9516 in September 2016 in respect of directors' and officers' liability. The insurance premiums relate to:

- costs and expenses incurred by the relevant officers in defending legal proceedings, whether civil or criminal and whatever their outcome;
- other liabilities that may arise from their position, with the exception of conduct involving wilful breach of duty or improper use of information to gain a personal advantage.

PROCEEDINGS ON BEHALF OF COMPANY

No person has applied for leave of court to bring proceedings on behalf of the Company or intervene in any proceeding to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings. The Company was not a party to any such proceedings during the year.

AUDITOR'S INDEPENDENCE DECLARATION

The lead auditor's independence declaration under Section 307C in relation to auditor's independence for the year ended 30 June 2016 has been received and can be found on the following page.

NON-AUDIT SERVICES

The Board of Directors advises that no non-audit services were provided by the Company's auditors during the year.

This report is made in accordance with a resolution of the directors.

AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the audit of the financial report of Metal Bank Limited for the year ended 30 June 2016, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

(i) the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and

(ii) any applicable code of professional conduct in relation to the audit.

This financial report includes the consolidated financial statements and notes of Metal Bank Limited and its controlled entities (**Consolidated Group** or **Group**), and a separate note on the accounts of Metal Bank Limited as the parent entity (**Parent**).

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PREPARATION

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001*.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in a financial report containing relevant and reliable information about transactions, events and conditions. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of this financial report are presented below and have been consistently applied unless otherwise stated.

This financial report is presented in Australian Dollars.

The financial report has been prepared on an accruals basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

The financial report covers the Group of Metal Bank Limited and controlled entities. Metal Bank Limited is a public listed company, incorporated and domiciled in Australia.

a. Principles of Consolidation

The consolidated financial statements incorporate the assets, liabilities and results of entities controlled by Metal Bank Limited at the end of the reporting period. A controlled entity is any entity over which Metal Bank Limited has the ability and right to govern the financial and operating policies so as to obtain benefits from the entity's activities.

Where controlled entities have entered or left the Group during the year, the financial performance of those entities is included only for the period of the year that they were controlled. A list of controlled entities is contained in Note 9 to the financial statements.

In preparing the consolidated financial statements, all inter-group balances and transactions between entities in the consolidated group have been eliminated in full on consolidation.

Non-controlling interests, being the equity in a subsidiary not attributable, directly or indirectly, to a parent, are reported separately within the equity section of the consolidated statement of financial position and statement of comprehensive income. The non-controlling interests in the net assets comprise their interests at the date of the original business combination and their share of changes in equity since that date.

Business Combinations

Business combinations occur where an acquirer obtains control over one or more businesses.

A business combination is accounted for by applying the acquisition method, unless it is a combination involving entities or businesses under common control. The business combination will be accounted for from the date that control is attained, whereby the fair value of the identifiable assets acquired and liabilities (including contingent liabilities) assumed is recognised (subject to certain limited exemptions).

When measuring the consideration transferred in the business combination, any asset or liability resulting from a contingent consideration arrangement is also included. Subsequent to initial recognition, contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability is remeasured each reporting period to fair value, recognising any change to fair value in profit or loss, unless the change in value can be identified as existing at acquisition date.

All transaction costs incurred in relation to the business combination are expensed to the statement of comprehensive income.

The acquisition of a business may result in the recognition of goodwill or a gain from a bargain purchase.

b. Going Concern

The financial statements have been prepared on the going concern basis, which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business.

As disclosed in the financial statements, the consolidated entity had incurred a loss of $1,980,229 and had net cash outflows from operating and investing activities of $1,238,274 for the year ended 30 June 2016. As at that date the consolidated entity had net current liabilities of $415,178.

The Directors believe that it is reasonably foreseeable that the consolidated entity will continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report after consideration of the following factors:

- The consolidated entity had net assets of $3,013,882 as at 30 June 2016;
- Subsequent to year end the company announced a capital raising of up to $5.4 million. The raising is comprised of a placement of $3.5 million and a rights issue of up to $1.9 million. The Company expects that these raisings will be successfully completed in accordance with a timetable lodged with the ASX (Note 24);
- Subsequent to year end the loan holder has advised their intention to convert the loan and interest of $702,854 (note 12) to equity, subject to shareholder approval;
- The ability of the Company to raise further capital to enable the consolidated entity to meet scheduled exploration expenditure requirements.
- The company has successfully raised capital of $1,064,500 during the year (per note 13); and
- The directors have assessed and satisfied themselves that the company will have adequate funding over the next 12 months to meet its obligations as and when these fall due.

c. Adoption of New and Revised Accounting Standards

Changes in accounting policies on initial application of Accounting Standards

In the year ended 30 June 2016, the Group has reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for the current annual reporting period.

It has been determined by Directors of the Group that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change is necessary to Group accounting policies.

The Directors have also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the year ended 30 June 2016. As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change necessary to Group accounting policies.

d. Income Taxes

The income tax expense (revenue) for the year comprises current income tax expense (income) and deferred tax expense (income). Current income tax expense charged to the profit or loss is the tax payable on taxable income calculated using applicable income tax rates enacted, or substantially enacted, as at reporting date. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well unused tax losses. Current and deferred income tax expense (income) is charged or credited directly to equity instead of the profit or loss when the tax relates to items that are credited or charged directly to equity. Deferred tax assets and liabilities are ascertained based on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets also result where amounts have been fully expensed but future tax deductions are available. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates enacted or substantively enacted at reporting date. Their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability. Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised. Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where a legally enforceable right of set-off exists, the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

e. Property, plant and equipment

Plant and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on a straight-line basis over the estimated useful life of the assets as follows:

Plant and equipment – over 5 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate, at each financial year end.

(i) Impairment

The carrying values of plant and equipment are reviewed for impairment at each balance date, with recoverable amount being estimated when events or changes in circumstances indicate that the carrying value may be impaired.

The recoverable amount of plant and equipment is the higher of fair value less costs to sell and value in use.

An impairment exists when the carrying value of an asset exceeds its estimated recoverable amount. The asset is then written down to its recoverable amount.

For plant and equipment, impairment losses are recognised in the statement of comprehensive income.

An annual transfer from the asset revaluation reserve to retained earnings is made for the difference between depreciation based on the re-valued carrying amounts of the assets and depreciation based on the assets' original costs. Additionally, any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amounts of the assets and the net amounts are restated to the re-valued amounts of the assets.

Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

(ii) Derecognition and disposal

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of comprehensive income in the year the asset is derecognised.

f. Exploration and Evaluation Costs

Exploration, evaluation and development expenditure incurred is accumulated in respect of each identifiable area of interest. These costs are only carried forward to the extent that they are expected to be recouped through the successful development of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves. Accumulated costs in relation to an abandoned area are written off in full against profit in the year in which the decision to abandon the area is made.

When production commences, the accumulated costs for the relevant area of interest are amortised over the life of the area according to the rate of depletion of the economically recoverable reserves. A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest. Costs of site restoration are provided over the life of the facility from when exploration commences and are included in the costs of that stage. Site restoration costs include the dismantling and removal of mining plant, equipment and building structures, waste removal, and rehabilitation of the site in accordance with clauses of the mining permits. Such costs have been determined using estimates of future costs, current legal requirements and technology on an undiscounted basis.

Any changes in the estimates for the costs are accounted on a prospective basis. In determining the costs of site restoration, there is uncertainty regarding the nature and extent of the restoration due to community expectations and future legislation. Accordingly the costs have been determined on the basis that the restoration will be completed within one year of abandoning the site.

g. Financial Instruments

Recognition and initial measurement
Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions to the instrument. For financial assets, this is equivalent to the date that the company commits itself to either the purchase or sale of the asset (i.e. trade date accounting is adopted).
Financial instruments are initially measured at fair value plus transaction costs, except where the instrument is classified "at fair value through profit or loss", in which case transaction costs are expensed to profit or loss immediately.

Classification and subsequent measurement
Financial instruments are subsequently measured at fair value, amortised cost using the effective interest rate method, or cost.

Amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition less principal repayments and any reduction for impairment, and adjusted for any cumulative recognised of the difference between that initial amount and the maturity amount calculated using the effective interest method.
Fair value is determined based on current bid prices for all quoted investments. Valuation techniques are applied to determine the fair value for all unlisted securities, including recent arm's length transactions, reference to similar instruments and option pricing models.
The effective interest method is used to allocate interest income or interest expense over the relevant period and is equivalent to the rate that discounts estimated future cash payments or receipts (including fees, transaction costs and other premiums or discounts) through the expected life (or when this cannot be reliably predicted, the contractual term) of the financial instrument to the net carrying amount of the financial asset or financial liability. Revisions to expected future net cash flows will necessitate an adjustment to the carrying value with a consequential recognition of an income or expense item in profit or loss.
The Group does not designate any interests in subsidiaries, associates or joint venture entities as being subject to the requirements of Accounting Standards specifically applicable to financial instruments.

(i) Financial assets at fair value through profit or loss

Financial assets are classified at "fair value through profit or loss" when they are held for trading for the purpose of short-term profit taking, derivatives not held for hedging purposes, or when they are designated as such to avoid an accounting mismatch or to enable performance evaluation where a Group of financial assets is managed by key management personnel on a fair value basis in accordance with a documented risk management or investment strategy. Such assets are subsequently measured at fair value with changes in carrying value being included in profit or loss.

(ii) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost.
Loans and receivables are included in current assets, where they are expected to mature within 12 months after the end of the reporting period.

(iii) Held-to-maturity investments

Held-to-maturity investments are included in non-current assets where they are expected to mature within 12 months after the end of the reporting period. All other investments are classified as current assets.

(iv) *(Available-for-sale financial assets*

Available-for-sale financial assets are non-derivative financial assets that are either not suitable to be classified into other categories of financial assets due to their nature, or they are designated as such by management. They comprise investments in the equity of other entities where there is neither a fixed maturity nor fixed or determinable payments.
They are subsequently measured at fair value with changes in such fair value (i.e. gains or losses) recognised in other comprehensive income (except for impairment losses and foreign exchange gains and losses). When the financial asset is recognised, the cumulative gain or loss pertaining to that asset previously recognised in other comprehensive income is reclassified into profit or loss.
Available-for-sale financial assets are included in non-current assets where they are expected to be sold within 12 months after the end of the reporting period. All other financial assets are classified as current assets.

(v) *Financial liabilities*

Non-derivative financial liabilities (excluding financial guarantees) are subsequently measured at amortised cost.

Derivative instruments

The Group designates certain derivatives as either:

i. hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge); or
ii. hedges of highly probable forecast transactions (cash flow hedges).

At the inception of the transaction the relationship between hedging instruments and hedged items, as well as the Group's risk management objective and strategy for undertaking various hedge transactions, is documented.

Assessments, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been and will continue to be highly effective in offsetting changes in fair values or cash flows of hedged items, are also documented.

(i) Fair value hedge

Changes in the fair value of derivatives that are designated and qualified as fair value hedges are recorded in the statement of comprehensive income, together with any changes in the fair value of hedged assets or liabilities that are attributable to the hedged risk.

(ii) Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is deferred to a hedge reserve in equity. The gain or loss relating to the ineffective portion is recognised immediately in the statement of comprehensive income.

Amounts accumulated in the hedge reserve in equity are transferred to the statement of comprehensive income in the periods when the hedged item will affect profit or loss.

Impairment

At the end of each reporting period, the Group assesses whether there is objective evidence that a financial instrument has been impaired. In the case of available-for-sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether an impairment has arisen. Impairment losses are recognised in profit or loss. Also, any cumulative decline in fair value previously recognized in other comprehensive income is reclassified to profit or loss at this point

Financial guarantees

Where material, financial guarantees issued that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due are recognized as a financial liability at fair value on initial recognition.

The guarantee is subsequently measured at the higher of the best estimate of the obligation and the amount initially recognised less, when appropriate, cumulative amortisation in accordance with AASB 118: Revenue. Where the entity gives guarantees in exchange for a fee, revenue is recognised under AASB 118.

The fair value of financial guarantee contracts has been assessed using a probability-weighted discounted cash flow approach. The probability has been based on:

(ii) the likelihood of the guaranteed party defaulting in a year period;
(iii) the proportion of the exposure that is not expected to be recovered due to the guaranteed party defaulting; and
(iv) the maximum loss exposed if the guaranteed party were to default.

Derecognition
Financial assets are recognised where the contractual rights to receipt of cash flows expire or the asset is transferred to another party whereby the entity no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are recognised where the related obligations are discharged, cancelled or expired. The difference between the carrying value of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of non-cash assets or liabilities assumed, is recognised in profit or loss.

h. Impairment of Assets

At each reporting date, the Company reviews the carrying values of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the consolidated statement of comprehensive income. Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. In the case of available-for-sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether impairment has arisen.

i. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of 3 months or less, and bank overdrafts. Bank overdrafts are shown within short-term borrowings in current liabilities on the statement of financial performance.

j. Revenue Recognition

Interest revenue is recognised using the effective interest method. It includes the amortisation of any discount or premium.

k. Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the statement of financial position are shown inclusive of GST. Cash flows are presented in the statement of cash flows on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

l. Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

m. Significant judgements and key assumptions

The directors evaluate estimates and judgements incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Company.

n. Key judgements and estimates

Key Judgement Exploration Expenditure

The Company capitalises expenditure relating to exploration and evaluation where it is considered likely to be recoverable or where the activities have not reached a stage which permits a reasonable assessment of the existence of reserves. While there are certain areas of interest from which no reserves have been extracted, the directors are of the continued belief that such expenditure should not be written off since feasibility studies in such areas have not yet concluded. Such capitalised expenditure is carried at reporting date at $3,426,949.

Key Judgement Environmental Issues

Balances disclosed in the financial statements and notes thereto are not adjusted for any pending or enacted environmental legislation, and the directors understanding thereof. At the current stage of the company's development and its current environmental impact the directors believe such treatment is reasonable and appropriate.

Key Estimate Taxation

Balances disclosed in the financial statements and the notes thereto, relating to taxation, are based on the best estimates of directors. These estimates take into account both the financial performance and position of the company as they pertain to current income taxation legislation, and the directors understanding thereof. No adjustment has been made for pending or future taxation legislation. The current income tax position represents that directors' best estimate, pending an assessment by the Australian Taxation Office.

Key Estimate Share based payment transactions

The Company measures the cost of equity-settled transactions by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by reference to the market price. Refer note 25.

Standards and Interpretations in issue not yet adopted

The Directors have reviewed all new Standards and Interpretations that have been issued but are not yet effective for the year ended 30 June 2016. As a result of this review the Directors have determined that there is no material impact, of the new and revised Standards and Interpretations on the Group and, therefore, no change is necessary to Group accounting policies.

2. REVENUE AND OTHER INCOME

	2016	2015
	$	$
Interest received	**811**	6,415
Other income	**2,177**	-

	-	-

(e) Tax losses

Unused tax losses for which no deferred tax asset has been recognised	**6,107,116**	5,230,610

Potential deferred tax assets attributable to tax losses and exploration expenditure carried forward have not been brought to account at 30 June 2016 because the directors do not believe it is appropriate to regard realisation of the deferred tax assets as probable at this point in time. These benefits will only be obtained if:

- the Company derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deductions for the loss and exploration expenditure to be realised;
- the Company continues to comply with conditions for deductibility imposed by law; and
- no changes in tax legislation adversely affect the company in realising the benefit from the deductions for the loss and exploration expenditure.

The applicable tax rate is the national tax rate in Australia for companies, which is 30% at the reporting date.

Capital Management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, so that it may continue to provide returns for shareholders and benefits for other stakeholders.

The Company's capital includes ordinary share capital and financial liabilities, supported by financial assets.

Due to the nature of the Company's activities, being mineral exploration, it does not have ready access to credit facilities, with the primary source of funding being equity raisings. Accordingly, the objective of the Company's capital risk management is to balance the current working capital position against the requirements of the Company to meet exploration programmes and corporate overheads. This is achieved by maintaining appropriate liquidity to meet anticipated operating requirements, with a view to initiating appropriate capital raisings as required.

	2016 $	2015 $

15. FINANCIAL RISK MANAGEMENT

The group's principal financial instruments comprise mainly of borrowings and deposits with banks and shares in listed companies shown as financial assets at fair value through profit and loss. The main purpose of the financial instruments is to achieve optimal funding for the group with limited risk and earn the maximum amount of interest at a low risk to the group. The group also has other financial instruments such as trade debtors and creditors which arise directly from its operations.

The consolidated entity holds the following financial instruments at the end of the reporting period:

	2016	2015
	$	$
Financial assets		
Cash and cash equivalents	**367,846**	544,445
Trade and other receivables	**38,902**	35,975
Financial assets at fair value through profit and loss	**1,250**	1.250
	407,998	581,670
Financial liabilities		
Trade and other payables	**120,322**	111,307
Borrowings	**702,854**	641,848
	823,176	753,155

The main risks arising from the Company's financial instruments are market risk, credit risk and liquidity risk. The Board reviews and agrees policies for managing each of these risks and they are summarised below:

a. Market risk

Cash flow and fair value interest rate risk
The group's main interest rate risk arises from borrowings and cash deposits to be applied to exploration and development areas of interest. Borrowings are primarily to bridge the gap between funding requirements and obtaining shareholder approval for equity issues. It is the group's policy to invest cash in short term deposits to minimise the group's exposure to interest rate fluctuations. The group's deposits were denominated in Australian dollars throughout the year. The group did not enter into any interest rate swap contracts.

b. Credit Risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the group. The group has adopted the policy of only dealing with credit worthy counterparties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults. The cash transactions of the group are limited to high credit quality financial institutions.

The group does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The carrying amount of financial assets recorded in the financial statements, net of any provisions for losses, represents the group's maximum exposure to credit risk.

All cash holdings within the Group are currently held with AA rated financial institutions.

c. Liquidity Risk

The group manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. Surplus funds when available are generally only invested in high credit quality financial institutions in highly liquid markets.

Financial Instrument composition and maturity analysis

The tables below reflect the undiscounted contractual settlement terms for financial instruments of a fixed period of maturity, as well as management's expectations of the settlement period for all other financial instruments. As such, the amounts may not reconcile to the statement of financial position.

Consolidated Group	**Within 1 year**		**1 to 5 years**		**Over 5 years**		**Total**	
	2016 $	2015 $	**2016 $**	2015 $	**2016 $**	2015 $	**2016 $**	2015 $

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased/(decreased) equity and profit or loss by the amounts shown below.

		Change in profit		**Change in equity**	
	Carrying Value	**100bp Increase**	**100bp decrease**	**100bp increase**	**100bp decrease**
30 June 2016	$	$	$	$	$
Cash and cash equivalents	367,846	3,678	(3,678)	3,678	(3,678)
Borrowings	(702,854)	(7,028)	7,028	(7,028)	7,028
	(335,008)	(3,350)	3,350	(3,350)	3,350
30 June 2015					
Cash and cash equivalents	544,445	5,444	(5,444)	5,444	(5,444)
Borrowings	(641,848)	(6,418)	6,418	(6,418)	6,418
	(97,403)	(974)	974	(974)	974

Maturity of financial assets and liabilities

The note below summarises the maturity of the group's financial assets and liabilities as per the director's expectations. The amounts disclosed are the contractual undiscounted cash flows. There are no derivatives.

	< 6 months	6 – 12 months	1- 5 years	>5 years	Total
30 June 2016	**$**	**$**	**$**	**$**	**$**
Trade and other receivables	38,902	-	-	-	38,902
Trade and other payables	120,322	-	-	-	120,322
Borrowings	-	702,854	-	-	702,854
30 June 2015					
Trade and other receivables	35,975	-	-	-	35,975
Trade and other payables	111,307	-	-	-	111,307
Borrowings	-	-	641,848	-	641,848

Fair value of financial assets and financial liabilities

There is no difference between the fair values and the carrying amounts of the group's financial instruments. The Group has no unrecognised financial instruments at balance date.

Financial Instruments Measured at Fair Value

The financial instruments recognised at fair value in the statement of financial position have been analysed and classified using a fair value hierarchy reflecting the significance of the inputs used in making the measurements. The fair value hierarchy consists of the following levels:

- quoted prices in active markets for identical assets or liabilities (Level 1);
- inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2); and
- inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

Sensitivity analysis on changes in market rates

A change of 20% in equity prices at the reporting date would increase/(decrease) equity and profit or loss as shown below:

		Change in profit		**Change in equity**	
	Carrying Value	**20% increase**	**20% decrease**	**20% increase**	**20% decrease**
	$	$	$	$	$
30 June 2016 & 30 June 2015					
Financial assets available for sale					
ASX listed investments	1,250	250	(250)	250	(250)

16. COMMITMENTS

The consolidated group currently has commitments for expenditure at 30 June 2016 on its Australian exploration tenements, up to the date of expiry, as follows:

	2016	2015
	$	$
Not later than 12 months	**242,000**	382,000
Between 12 months and 5 years	**650,000**	730,000
Greater than 5 years	**-**	100,000
	892,000	1,212,000

17. CONTINGENT LIABILITIES AND CONTINGENT ASSETS

There are no contingent liabilities or assets in existence at balance sheet date.

18. RELATED PARTY DISCLOSURES

Refer to the Remuneration Report contained in the Directors Report for details of the remuneration paid or payable to each member of the Group's key management personnel for the year ended 30 June 2016. Other than the Directors and secretary, the Company had no key management personnel for the financial period ended 30 June 2016.

The total remuneration paid to key management personnel of the company and the group during the year are as follows:

	2016	2015
	$	$
Short term employee benefits	**305,220**	352,369
Superannuation	**15,675**	18,349
Share based payments	**-**	37,500
	320,895	408,218

DIRECTORS' AND EXECUTIVE OFFICERS' EMOLUMENTS

(a) Details of Directors and Key Management Personnel

(i) Directors

Inés Scotland (Non-Executive Chairman) (Appointed 13 August 2013)
Anthony Schreck (Executive Director) (Appointed 29 November 2013)
Guy Robertson (Executive Director) (Appointed 17 September 2012)

(ii) Company secretary

Sue-Ann Higgins (Company Secretary) (Appointed 21 August 2013)

(iii) Directors' remuneration

Directors' remuneration and other terms of employment are reviewed annually by the Board having regard to performance against goals set at the start of the year, relative comparative information and, where applicable, independent expert advice.

Except as detailed in Notes (a) – (c) to the Remuneration Report in the Director's Report, no director has received or become entitled to receive, during or since the financial period, a benefit because of a contract made by the Company or a related body corporate with a director, a firm of which a director is a member or an entity in which a director has a substantial financial interest. This statement excludes a benefit included in the aggregate amount of emoluments received or due and receivable by directors and shown in Notes (a) - (c) to the Remuneration Report, prepared in accordance with the Corporations regulations, or the fixed salary of a full time employee of the Company.

(b) Key Management Personnel

Other than the Directors and secretary, the Company had no key management personnel for the financial period ended 30 June 2016.

(c) Remuneration Options: Granted and vested during the financial year ended 30 June 2016

There were no remuneration options granted during the financial year ended 30 June 2016.

(d) Share and Option holdings

All equity dealings with directors have been entered into with terms and conditions no more favourable than those that the entity would have adopted if dealing at arm's length.

Performance Rights

During the year 1,271,186 performance rights vested as at the performance date of 9 March 2016. The balance of the performance rights on issue as at that date lapsed.

19. SEGMENT INFORMATION

The group's operations are in one business segment being the resources sector. The group operates in Australia and the United States of America (from February 2015). All subsidiaries in the group operate within the same segment.

Basis of accounting for purposes of reporting by operating segments

Accounting policies adopted

Unless stated otherwise, all amounts reported to the Board of Directors as the chief decision maker with respect to operating segments are determined in accordance with accounting policies that are consistent to those adopted in the annual financial statements of the Company.

Inter-segment transactions

Inter-segment loans payable and receivable are initially recognised at the consideration received net of transaction costs. If inter-segment loans receivable and payable are not on commercial terms, these are not adjusted to fair value based on market interest rates. This policy represents a departure from that applied to the statutory financial statements

Segment assets

Where an asset is used across multiple segments, the asset is allocated to the segment that receives the majority of economic value from the asset. In the majority of instances, segment assets are clearly identifiable on the basis of their nature and physical location.

Unless indicated otherwise in the segment assets note, investments in financial assets, deferred tax assets and intangible assets have not been allocated to operating segments.

Segment liabilities

Liabilities are allocated to segments where there is direct nexus between the incurrence of the liability and the operations of the segment. Borrowings and tax liabilities are generally considered to relate to the Company as a whole and are not allocated. Segment liabilities include trade and other payables and certain direct borrowings.

*Unallocated item*s

Administration and other operating expenses are not allocated to operating segments as they are not considered part of the core operations of any segment.

i. Financial Performance

The subsidiary acquired did not trade from the date of acquisition with the result that the result of the Group equates to the result of the parent for the year.

ii. Contingent liabilities and contingent assets

The parent entity is responsible for the contingent liabilities and contingent assets outlined in note 17.

iii. Commitments

The parent entity is responsible for the commitments outlined in note 16.

iv. Related parties

An interest in subsidiary is set out in note 9.

Disclosures relating to key management personnel are set out in note 18.

24. SIGNIFICANT AFTER BALANCE DATE EVENTS

Subsequent to balance date the Company announced a capital raising of up to $5.4 million which is comprised of placement of $3.5 million and a rights issue to raise up to a further $1.9m. The Company expects that these raisings will be successfully completed in accordance with the timetable lodged with the ASX.

Other than as outlined above there are currently no matters or circumstances that have arisen since the end of the financial period that have significantly affected or may significantly affect the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.

25. SHARE BASED PAYMENTS

Performance Rights

The Company granted 6,355,932 performance rights to a director on 2 July 2015. Of these rights 1,271,186 vested on 9 March 2016, with the balance lapsing as at this date.

In accordance with a resolution of the directors of Metal Bank Limited, the directors of the company declare that:

1. the financial statements and notes, as set out on pages 21 to 48, are in accordance with the *Corporations Act 2001* and:

   a. comply with Australian Accounting Standards, which, as stated in accounting policy Note 1 to the financial statements, constitutes compliance with International Financial Reporting Standards (IFRS); and

   b. give a true and fair view of the financial position as at 30 June 2016 and of the performance for the year ended on that date of the consolidated group;

2. in the directors' opinion there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and

3. the directors have been given the declarations required by s295A of the *Corporations Act 2001* from the Chief Executive Officer and Chief Financial Officer.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF

METAL BANK LIMITED

Report on the Financial Report

We have audited the accompanying financial report of Metal Bank Limited, which comprises the consolidated statement of financial position as at 30 June 2016, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' Responsibility for the Financial Report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance about whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a bases for our audit opinions.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Metal Bank Limited, would be in the same terms if given to the directors as at the time of this auditor's report

Opinion

In our opinion:

(a) the financial report of Metal Bank Limited is in accordance with the *Corporations Act 2001*, including:

   (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2016 and of its performance for the year ended on that date; and

   (ii) complying with Australian Accounting Standards and the *Corporations Regulations 2001*; and

(b) the financial report also complies with *International Financial Reporting Standards* as disclosed in Note 1.

Report on the Remuneration Report

We have audited the Remuneration Report included in pages 15 to 18 of the directors' report for the year ended 30 June 2016. The directors of the company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001.* Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Opinion

In our opinion the Remuneration Report of Metal Bank Limited for the year ended 30 June 2016 complies with section 300A of the *Corporations Act 2001*.
