(1) Stockholders' equity divided by common shares outstanding.

(2) Net interest income before provision for credit losses divided by average interest-earning assets. Computed on a tax-equivalent basis using an effective marginal rate of 35 percent.

(3) Non-performing loans, excluding loans held for sale, consist of non-accrual loan and loans past due 90 days or more still accruing interest.

(4) Net income (loss) divided by average assets.

(5) Net income (loss) divided by average stockholders' equity.

Dear fellow shareholders

No longer constrained by vestiges of the “great recession”, we entered 2013 with high hopes. The board of directors introduced a new leadership team at mid-year to execute a strategy to elevate Hanmi Financial Corporation to be, once again, the premier Korean American financial institution. This strategy is focused on investing in our people, technology and infrastructure to support our goals to expand our franchise organically as well as through mergers and acquisitions. We believe that building an organization that people want to *work for* and want to *bank with*, will enable Hanmi to become the premier bank that we strive to be.

We generated solidly profitable financial results, reflecting the growth in the core earnings power of our franchise. Pretax income grew 44% to \$62 million in 2013, compared to \$43 million a year ago. Net income was \$40 million, or \$1.26 per diluted share, in 2013.

Banking on Our People

Our ability to recruit and retain top talent in operations, lending and relationship management is one of our core competencies. We have initiated the Hanmi Banking School to provide

training in traditional banking products and services, as well as general business and communication skills. We know our future success goes hand-in-hand with the success of our employees. By investing in our people, we are creating the next generation of Hanmi’s leaders and a culture to attract the best and brightest in the banking industry.

To generate organic growth, we have revitalized our business banking capacity. We launched our new Corporate Banking Center in 2013, recruiting seasoned business bankers. In combination with our existing commercial real estate and SBA lenders, we generated 9% growth in our loan portfolio, ending the year with \$2.23 billion in gross loans.

As important as new loan growth is to profitability, core deposit growth is equally vital to our success. In 2013, we created our Treasury Management Department, with a new, highly experienced manager. Hanmi will be actively marketing a full complement of contemporary treasury management products and services.

Treasury management will deepen our customer relationships, attract new business customers, and generate additional core deposits.

Keeping current with technology is critical to meeting the expectations of our customers and providing the productivity tools our employees need to stay competitive. It drives productivity. It drives customer satisfaction. It drives efficiency.

C. G. Kum

Joseph K. Rho

Improving Our Balance Sheet

Effectively managing our balance sheet is another important contributor to overall profitability. In 2013, we continued to manage our assets, liabilities and capital as efficiently as possible. Over the course of the past few years, we have significantly improved asset quality, allowing us to focus on growth. Nevertheless, safety remains a very high priority and underpins all of our underwriting criteria and decision making processes.

In addition to our strong asset quality, we continue to improve the diversity of our loan portfolio. As our C&I lending team gains momentum, our loan portfolio will diversify further in the coming years. Likewise, our deposit mix continues to improve. Demand deposits and core deposits are growing, helping to sustain strong net interest margin.

We are also reducing excess liquidity to improve profitability. Last year, we redeemed all of our trust preferred securities, reducing interest expense more than \$2.5 million annually and further contributing to net interest margin.

Another important use of capital was our decision to re-initiate cash dividends. In September, we paid a \$0.07 per share dividend, and will pay our third consecutive cash dividend in April of 2014 to reward the loyalty of our valued shareholders.

Building Our Future

As we look to the future, our vision is to expand our strong brand nationwide, serving multiple ethnic communities. We are building on the rich heritage of Hanmi to create a national footprint.

One of the most exciting developments in 2013 was our December announcement that Hanmi will be acquiring Central Bancorp Inc., parent of Texas-based United Central Bank. This acquisition, which is still subject to regulatory approval, has the potential to transform Hanmi Financial. Should the transaction close later this year, we would have approximately \$4.3 billion in assets, \$2.8 billion in gross loans, \$3.8 billion in deposits, 50 banking offices and two loan production offices in California, Texas, Illinois, New York, New Jersey, and Virginia. In addition to opening new geographic markets for us, the acquisition also leapfrogs Hanmi into new ethnic markets, including the

Indo-Pakistani, Chinese, and mainstream communities. The acquisition will add significant momentum for us, positioning us for future growth on a national scale.

We have transformed our vision into action through the hard work of all our team members and the support from our board of directors. The future of Hanmi is bright. Thank you all for your loyalty, support and continued business. We are looking forward to an exciting milestone year in 2014.

Sincerely,

Joseph K. Rho
Chairman of the Board of Directors

April 2, 2014

Hanmi Bank's roots run deep. As the first, and oldest, bank in the Korean-American immigrant community, our history and that of our loyal customers has evolved together.

We are strategically gearing up for the next generation of customers and investors. With our strong infrastructure and solid core values as our foundation, we are delivering a steady stream of products and services to meet the continually evolving needs of our customers.

Assets
(dollars in thousands)

A heritage of integrity

We built Hanmi Bank by addressing the unique needs of our community with integrity and foresight. We go the extra mile for our customers, providing superior service founded in the core values we demonstrate with every interaction. As a result, we have the strongest brand affinity and the strongest customer loyalty among our peers. This combination of a rich heritage and active customer support is essential as we move forward towards our goal of becoming a leading nationwide community bank.

Earning the trust of the next generation

We understand that this kind of loyalty cannot be bought – it must be earned every day. Our customer base grows younger, more sophisticated, and more ethnically diverse every day. We are prepared to meet their needs. We are confident that our products, services, technology and personnel are ready for our growing customer base.

Growing deeper roots

*Our heritage provides us
with the foundation we need
to set new standards
in the Korean-American
banking industry.*

Building solid relationships

Our customers rely on our experienced personnel to understand their specific needs, providing them with products and services to help their businesses thrive.

Hanmi is known to its customers for consummate professionalism with a personal touch. As a community bank, we are uniquely positioned to understand the specific needs of our valued customers. The steps we have taken during the past year underscore our commitment to each and every customer.

We added several outstanding new members to our management team. We strengthened both our retail and corporate banking operations. We actively engaged in marketing outreach to support our growth.

Pre-Tax Pre-Provision Earnings
(dollars in thousands)

Superior business banking

This year, we created a dedicated Corporate Banking Center, staffed by seasoned lending managers with deep roots in the communities we serve. By offering greater lending options for customers, Corporate Banking should add significantly to loan and deposit growth.

We further enhanced our branch marketing efforts by bringing both a Chief Lending Officer and a Chief Banking Officer on board. These experienced officers will oversee our retail operations, and by actively acquiring new customers, strengthen our business branches as well.

Our customers rely on the experience of our personnel to help them reach their financial goals. Now, more than ever, Hanmi is the bank of choice when customers select a banking partner.

We are maintaining the values that have defined us from the beginning, while adjusting to consumers' shifting banking behavior. We are transforming our bank with newly streamlined processes and offering important new products and services. Our strong performance in 2013 reflects the soundness of the steps we are taking.

Gross Loans
(dollars in thousands)

Superior technology, stronger business banking

This year, we also put our resources to work by investing in the technology that is essential to meet our customers' increasingly sophisticated needs. New treasury management services underpin our commitment to enhance business banking. Upon complete implementation of treasury management services, our mobile banking services will be superior to those offered by our peers.

To maintain our competitive edge, we are adding new services and enhancing existing ones. We are adding online payroll services to our product offerings. We enhanced our merchant card services and contracted with world-class credit card providers. We remain committed to providing the most valuable products and services for our customers.

Committing to progress

*Formation of treasury management
is one of the ways we
demonstrate our commitment
to better business banking.*

Serving our communities

As we strengthen our presence, we will invest fully in each local community through service.

Hanmi is an active, engaged member of every community in which we have a presence. Not only do we provide local jobs, as well as the products and services needed by local residents and businesses, we reach out to the underserved through the growing Hanmi Neighbor program and other initiatives.

Stockholders' Equity
(dollars in thousands)

Hanmi Neighbor

Participation in Hanmi Neighbor has increased every year since its inception – for both employees and neighborhood charitable organizations. This program emphasizes the importance of investing in our community. It rewards individual employees with volunteer credits for their service, which can be redeemed for a donation to the nonprofit of their choice. In 2013, hours invested grew from 1,596 to 1,961, an increase of nearly 23%.

Service takes many forms

We have continued offering educational seminars on topics geared to our customers and our communities. This year, seminars included retirement planning and other small business topics. Hanmi has also supported communities throughout California by purchasing \$13.2 million in securities benefiting low- to moderate-income individuals and families.

Just as our high standards and emphasis on customer service make us the bank of choice for our customers, they make us the employer of choice as well. Hanmi is younger, smarter, and stronger than ever before. We're attracting the best and brightest at all levels of operations, and ensuring that we offer them the opportunities and training to learn and grow.

Net Interest Margin

Investing in future generations

The actions we take today ensure our continued success tomorrow. A critical aspect of our success will be based on how well we train the leaders and decision makers who will help drive Hanmi's future. Hanmi Banking School provides employees with comprehensive training in the skills and knowledge they need to become confident, educated bankers. Classes we offer to employees include credit, lending and communication skills.

Korean-American banking 2.0

By investing in people, we are developing our strongest asset. Growing the next generation of bankers is the best way to ensure the support and trust of the next generations of customers. The success of this investment is demonstrated every day in our ability to maintain our core values, to adjust to customers' needs, and to continue to set higher standards with every passing year.

Nurturing new leaders

*Hanmi Banking School is
dedicated to training the
next generation of bankers,
ensuring our ongoing success.*

Cautionary Note Regarding Forward-Looking Statements

Some of the statements contained in this Annual Report on Form 10-K are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). All statements in this Annual Report on Form 10-K other than statements of historical fact are “forward –looking statements” for purposes of federal and state securities laws, including, but not limited to, statements about anticipated future operating and financial performance, financial position and liquidity, business strategies, regulatory and competitive outlook, investment and expenditure plans, capital and financing needs, plans and objectives of management for future operations, and other similar forecasts and statements of expectation and statements of assumption underlying any of the foregoing. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “could,” “expects,” “plans,” “intends,” “anticipates,” “believes,” “estimates,” “predicts,” “potential,” or “continue,” or the negative of such terms and other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ from those expressed or implied by the forward-looking statement. For additional information concerning risks we face, see “Item 1A. Risk Factors.” We undertake no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date on which such statements were made, except as required by law.

Part I

Item 1. Business

General

Hanmi Financial Corporation (“Hanmi Financial,” the “Company,” “we,” “us” or “our”) is a Delaware corporation incorporated on March 14, 2000 to be the holding company for Hanmi Bank (the “Bank”) and is subject to the Bank Holding Company Act of 1956, as amended (“BHCA”). Hanmi Financial also elected financial holding company status under the BHCA in 2000. Our principal office is located at 3660 Wilshire Boulevard, Penthouse Suite A, Los Angeles, California 90010, and our telephone number is (213) 382-2200.

Hanmi Bank, our primary subsidiary, is a state chartered bank incorporated under the laws of the State of California on August 24, 1981, and licensed pursuant to the California Financial Code (“Financial Code”) on December 15, 1982. The Bank’s deposit accounts are insured under the Federal Deposit Insurance Act (“FDIA”) up to applicable limits thereof, and the Bank is a member of the Federal Reserve System. The Bank’s headquarters is located at 3660 Wilshire Boulevard, Penthouse Suite A, Los Angeles, California 90010.

The Bank is a community bank conducting general business banking, with its primary market encompassing the Korean-American community as well as other communities in the multi-ethnic populations of Los Angeles County, Orange County, San Bernardino County, San Diego County, the San Francisco Bay area, and the Silicon Valley area in Santa Clara County. The Bank’s full-service offices are located in markets where many of the businesses are run by immigrants and other minority groups. The Bank’s client base reflects the multi-ethnic composition of these communities. At December 31, 2013, the Bank maintained a network of 27 full-service branch offices in California and two loan production offices (“LPO”) in Washington and Texas.

Our other subsidiaries are Chun-Ha Insurance Services, Inc. (“Chun-Ha”) and All World Insurance Services, Inc. (“All World”), which were acquired in January 2007. Founded in 1989, Chun-Ha and All World are insurance agencies that offer a complete line of insurance products, including life, commercial, automobile, health, and property and casualty.

On December 15, 2013, Hanmi Financial entered into an Agreement and Plan of Merger (the “Merger Agreement”) with Central Bancorp, Inc., a Texas corporation (“CBI”) and Harmony Merger Sub Inc., a Texas corporation and a wholly owned subsidiary of Hanmi Financial (“Merger Sub”), pursuant to which Merger Sub will merge with and into CBI, with CBI as the surviving corporation (the “CBI Merger”). The Merger Agreement also provides that immediately after the CBI Merger, United Central Bank, a Texas state-chartered bank and a wholly owned subsidiary of CBI (“UCB”), will merge with and into the Bank, with the Bank as the surviving bank (the “Bank Merger”). The consideration to be paid in the CBI Merger will be \$50 million in cash, subject to potential purchase price adjustments. As of December 31, 2013, CBI had \$1.4 billion in assets. The transaction is expected to close in the second half of 2014, subject to approval by CBI’s stockholders, regulatory approvals and other closing conditions. Following the close of the transaction, the combined entity would have approximately \$4.3 billion in assets, \$2.8 billion in gross loans and \$3.8 billion in deposits, based on information as of September 30, 2013, with 50 banking offices and two loan production offices serving a broad range of communities across California, Texas, Illinois, New York, New Jersey, and Virginia. See “—Pending CBI Merger” below for a description of the terms and conditions of the proposed transaction and “Item 1.A. Risk Factors – Risks Relating to the Pending CBI Merger” for a description of the risks relating to the proposed transaction.

The Bank’s revenues are derived primarily from interest and fees on loans, interest and dividends on securities portfolio, and service charges on deposit accounts. A summary of revenues for the periods indicated follows:

	Year Ended December 31,					
	2013		2012		2011	
	<i>(In thousands)</i>					
Interest and fees on loans	\$111,992	72.8%	\$108,982	75.3%	\$117,671	77.1%
Interest and dividends on investments	10,121	6.6%	9,630	6.7%	10,518	6.9%
Other interest income	215	0.1%	1,188	0.8%	618	0.4%
Service charges on deposit accounts	11,307	7.4%	12,146	8.4%	12,826	8.4%
Other non-interest income	20,110	13.1%	12,666	8.8%	11,025	7.2%
Total revenues	<u>\$153,745</u>	<u>100.0%</u>	<u>\$144,612</u>	<u>100.0%</u>	<u>\$152,658</u>	<u>100.0%</u>

Market Area

The Bank historically has provided its banking services through its branch network to a wide variety of small- to medium-sized businesses. Throughout the Bank's service areas, competition is intense for both loans and deposits. While the market for banking services is dominated by a few nationwide banks with many offices operating over wide geographic areas, the Bank's primary competitors are relatively smaller community banks that focus their marketing efforts on Korean-American businesses in the Bank's service areas. Substantially all of our assets are located in, and substantially all of our revenues are derived from, clients located within Southern California.

Lending Activities

The Bank originates loans for its own portfolio and for sale in the secondary market. Lending activities include real estate loans (commercial property, construction and residential property), commercial and industrial loans (commercial term loans, commercial lines of credit, SBA loans and international trade finance), and consumer loans.

Real Estate Loans

Real estate lending involves risks associated with the potential decline in the value of the underlying real estate collateral and the cash flow from income-producing properties. Declines in real estate values and cash flows can be caused by a number of factors, including adversity in general economic conditions, rising interest rates, changes in tax and other laws and regulations affecting the holding of real estate, environmental conditions, governmental and other use restrictions, development of competitive properties and increasing vacancy rates. When real estate values decline, the Bank's real estate dependence increases the risk of loss both in the Bank's loan portfolio and the Bank's holdings of "other real estate owned" ("OREO"), which are the result of foreclosures on real property due to default by borrowers who use the property as collateral for loans. OREO properties are categorized as real property that is owned by the Bank but which is not directly related to the Bank's business.

Commercial Property

The Bank offers commercial real estate loans, which are usually collateralized by first deeds of trust. The Bank generally obtains formal appraisals in accordance with applicable regulations to support the value of the real estate collateral. All appraisal reports on commercial mortgage loans are reviewed by an appraisal review officer. The review generally covers an examination of the appraiser's assumptions and methods that were used to derive a value for the property, as well as compliance with the Uniform Standards of Professional Appraisal Practice ("USPAP"). The Bank first looks to cash flow from the borrower to repay the loan and then to cash flow from other sources. The majority of the properties securing these loans are located in Los Angeles County and Orange County.

The Bank's commercial real estate loans are principally secured by investor-owned commercial buildings and owner-occupied commercial and industrial buildings. Generally, these types of loans are made for a period of up to seven years based on a longer amortization period. These loans usually have a loan-to-value ratio at time of origination of 65 percent or less, using an adjustable rate indexed to the prime rate appearing in the West Coast edition of *The Wall Street Journal* ("WSJ Prime Rate") or the Bank's prime rate ("Bank Prime Rate"), as adjusted from time to time. The Bank also offers fixed-rate commercial real estate loans, including hybrid-fixed rate loans that are fixed for one to five years and convert to adjustable rate loans for the remaining term. Amortization schedules for commercial real estate loans generally do not exceed 25 years.

Payments on loans secured by investor-owned and owner-occupied properties are often dependent upon successful operation or management of the properties. Repayment of such loans may be subject to a greater extent to the risk of adverse conditions in the real estate market or the economy. The Bank seeks to minimize these risks in a variety of ways, including limiting the size of such loans in relation to the market value of the property and strictly scrutinizing the property securing the loan, which includes vacancy and interest rate hike sensitivity analysis at the time of loan origination and quarterly risk assessment of the total commercial real estate secured loan portfolio that includes most recent industry trends. When possible, the Bank also obtains corporate or individual guarantees. Representatives of the Bank conduct site visits of all of the properties securing the Bank's real estate loans before the loans are approved.

The Bank requires title insurance to insure the status of its lien on all of the real estate secured loans when a trust deed on the real estate is taken as collateral. The Bank also requires the borrower to maintain fire insurance, extended coverage casualty insurance and, if the property is in a flood zone, flood insurance, in an amount equal to the outstanding loan balance, subject to applicable laws that may limit the amount of hazard insurance a lender can require to replace such improvements. We cannot assure that these procedures will protect against losses on loans secured by real property.

Construction

The Bank finances the construction of multifamily, low-income housing, commercial and industrial properties within its market area. The future condition of the local economy could negatively affect the collateral values of such loans. The Bank's construction loans typically have the following structure:

- maturities of two years or less;
- a floating rate of interest based on the Bank Prime Rate or the WSJ Prime Rate;
- minimum cash equity of 35 percent of project cost;
- reserve of anticipated interest costs during construction or advance of fees;
- first lien position on the underlying real estate;
- loan-to-value ratios at time of origination that do not exceed 65 percent; and
- recourse against the borrower or a guarantor in the event of default.

On a case-by-case basis, the Bank does commit to making permanent loans on the property under loan conditions that require strong project stability and debt service coverage. Construction loans involve additional risks compared to loans secured by existing improved real property. Such risks include:

- the uncertain value of the project prior to completion;
- the inherent uncertainty in estimating construction costs, which are often beyond the borrower's control;
- construction delays and cost overruns;
- possible difficulties encountered in connection with municipal, state or other governmental ordinances or regulations during construction; and
- the difficulty in accurately evaluating the market value of the completed project.

Because of these uncertainties, construction lending often involves the disbursement of substantial funds where repayment of the loan is dependent, in part, on the success of the final project rather than the ability of the borrower or guarantor to repay principal and interest on the loan. If the Bank is forced to foreclose on a construction project prior to or at completion due to a default under the terms of a loan, there can be no assurance that the Bank will be able to recover all of the unpaid balance of, or accrued interest on, the loan as well as the related foreclosure and holding costs. In addition, the Bank may be required to fund additional amounts in order to complete a pending construction project and may have to hold the property for an indeterminable period of time. The Bank has underwriting procedures designed to identify factors that it believes to be acceptable levels of risk in construction lending, including, among other procedures, engaging qualified and bonded third parties to provide progress reports and recommendations for construction loan disbursements. No assurance can be given that these procedures will prevent losses arising from the risks associated with construction loans described above.

Residential Property

The Bank originates fixed-rate and variable-rate mortgage loans secured by one- to four-family properties with amortization schedules of 15 to 30 years and maturity schedules of up to 30 years. The loan fees, interest rates and other provisions of the Bank's residential loans are determined by an analysis of the Bank's cost of funds, cost of origination, cost of servicing, risk factors and portfolio needs.

The Bank may sell some of the mortgage loans that it originates to secondary market participants. The average turn-around time from origination of a mortgage loan to its sale to a secondary market participant ranges from 30 to 90 days. The interest rate and the price of the loan are typically agreed upon between the Bank and the secondary market purchaser prior to the origination of the loan.

Commercial and Industrial Loans

The Bank offers commercial loans for intermediate and short-term credit. Commercial loans may be unsecured, partially secured or fully secured. The majority of the commercial loans that the Bank originates are for business located in Los Angeles County and Orange County, and the maturity schedules range from 12 to 60 months. The Bank finances primarily small- and middle-market businesses in a wide spectrum of industries. Commercial and industrial loans consist of credit lines for operating needs, loans for equipment purchases and working capital, and various other business purposes. The Bank requires a credit underwriting before considering any extension of credit.

In contrast with consumer lending, commercial lending entails significant additional risks. Commercial lending loans typically involve larger loan balances, are generally dependent on the cash flow of the business and may be subject to adverse conditions in the general economy or in a specific industry. Short-term business loans are customarily intended to finance current operations and typically provide for principal payment at maturity, with interest payable monthly. Term loans typically provide for floating interest rates, with monthly payments of both principal and interest.

In general, it is the intent of the Bank to take collateral whenever possible, regardless of the loan purpose(s). Collateral may include, but is not limited to, liens on inventory, accounts receivable, fixtures and equipment, leasehold improvements and real estate. Where real estate is the primary collateral, the Bank obtains formal appraisals in accordance with applicable regulations to support the value of the real estate collateral. Typically, the Bank requires all principals of a business to be co-obligors on all loan instruments and all significant stockholders of corporations to execute a specific debt guaranty. All borrowers must demonstrate the ability to service and repay not only their obligations to the Bank, but also any and all outstanding business debt, without liquidating the collateral, based on historical earnings or reliable projections.

Commercial Term Loans

The Bank offers term loans for a variety of needs, including loans for working capital, purchases of equipment, machinery or inventory, business acquisitions, renovation of facilities, and refinancing of existing business-related debts. These loans have repayment terms of up to seven years.

Commercial Lines of Credit

The Bank offers lines of credit for a variety of short-term needs, including lines of credit for working capital, accounts receivable and inventory financing, and other purposes related to business operations. Commercial lines of credit usually have a term of 12 months or less.

SBA Loans

The Bank originates loans (“SBA Loans”) that are guaranteed by the U.S. Small Business Administration (“SBA”), an independent agency of the federal government. SBA loans are offered for business purposes such as owner-occupied commercial real estate, business acquisitions, start-ups, franchise financing, working capital, improvements and renovations, inventory and equipment and debt-refinancing. SBA loans offer lower down payments and longer term financing which helps small business that are starting out, or about to expand. The guarantees on SBA Loans currently range from 75 percent to 85 percent of the principal amount of the loan. The Bank typically requires that SBA Loans be secured by business assets and by a first or second deed of trust on any available real property. When the SBA Loan is secured by a first deed of trust on real property, the Bank generally obtains appraisals in accordance with applicable regulations. SBA Loans have terms ranging from 5 to 25 years depending on the use of the proceeds. To qualify for a SBA Loan, a borrower must demonstrate the capacity to service and repay the loan, without liquidating the collateral, based on historical earnings or reliable projections.

The Bank normally sells to unrelated third parties a substantial amount of the guaranteed portion of the SBA Loans that it originates. When the Bank sells a SBA Loan, it has an option to repurchase the loan if the loan defaults. If the Bank repurchases a loan, the Bank will make a demand for guarantee purchase to the SBA. Even after the sale of an SBA Loan, the Bank retains the right to service the SBA Loan and to receive servicing fees. The unsold portions of the SBA Loans that remain owned by the Bank are included in loans receivable on the Consolidated Balance Sheets. As of December 31, 2013, the Bank had \$151.5 million of SBA Loans in its portfolio, and was servicing \$350.0 million of SBA Loans sold to investors.

International Trade Finance

The Bank offers a variety of international finance and trade services and products, including letters of credit, import financing (trust receipt financing and bankers’ acceptances) and export financing. Although most of our trade finance activities are related to trade with Asian countries, all of our loans are made to companies domiciled in the United States, and a substantial portion of those borrowers are California-based businesses engaged in import and export activities.

Consumer Loans

Consumer loans are extended for a variety of purposes, including automobile loans, secured and unsecured personal loans, home improvement loans, home equity lines of credit, unsecured lines of credit and credit cards. Management assesses the borrower’s creditworthiness and ability to repay the debt through a review of credit history and ratings, verification of employment and other income, review of debt-to-income ratios and other measures of repayment ability. Although creditworthiness of the applicant is of primary importance, the underwriting process also includes a comparison of the value of the collateral, if any, to the proposed loan amount. Most of the Bank’s loans to individual consumers are repayable on an installment basis.

Off-Balance Sheet Commitments

As part of the suite of services available to its small- to medium-sized business customers, the Bank from time to time issues formal commitments and lines of credit. These commitments can be either secured or unsecured. They may be in the form of

revolving lines of credit for seasonal working capital needs or may take the form of commercial letters of credit or standby letters of credit. Commercial letters of credit facilitate import trade. Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party.

Lending Procedures and Loan Limits

Individual lending authority is granted to the Chief Credit Officer and certain additional designated officers. Loans for which direct and indirect borrower liability exceeds an individual's lending authority are referred to the Bank's Management Credit Committee and, for those in excess of the Management Credit Committee's approval limits, to the Board of Directors' Loan Committee.

Legal lending limits are calculated in conformance with the California Financial Code, which prohibits a bank from lending to any one individual or entity or its related interests on an unsecured basis any amount that exceeds 15 percent of the sum of such bank's stockholders' equity plus the allowance for loan losses, capital notes and any debentures, plus an additional 10 percent on a secured basis. At December 31, 2013, the Bank's authorized legal lending limits for loans to one borrower were \$65.6 million for unsecured loans plus an additional \$43.7 million for specific secured loans. However, the Bank has established internal loan limits that are below the legal lending limits.

The Bank seeks to mitigate the risks inherent in its loan portfolio by adhering to certain underwriting practices. The review of each loan application includes analysis of the applicant's experience, prior credit history, income level, cash flow, financial condition, tax returns, cash flow projections, and the value of any collateral to secure the loan, based upon reports of independent appraisers and/or audits of accounts receivable or inventory pledged as security. In the case of real estate loans over a specified threshold, the review of collateral value includes an appraisal report prepared by an independent Bank-approved appraiser. All appraisal reports on commercial real property secured loans are reviewed by an appraisal review officer. The review generally covers an examination of the appraiser's assumptions and methods that were used to derive a value for the property, as well as compliance with the USPAP.

Allowance for Loan Losses, Allowance for Off-Balance Sheet Items and Provision for Credit Losses

The Bank maintains an allowance for loan losses at a level considered by management to be adequate to cover the inherent risks of loss associated with its loan portfolio under prevailing economic conditions. In addition, the Bank maintains an allowance for off-balance sheet items associated with unfunded commitments and letters of credit, which is included in other liabilities on the Consolidated Balance Sheets.

The Bank analyzes its allowance for loan losses on a quarterly basis. As an integral part of the quarterly credit review process of the Bank, the allowance for loan losses and allowance for off-balance sheet items are reviewed for adequacy. The California Department of Business Oversight ("DBO"), formerly known as the California Department of Financial Institutions, and the Federal Reserve Bank ("FRB") may require the Bank to recognize additions to the allowance for loan losses through a provision for credit losses based upon their assessment of the information available to them at the time of their examinations.

Deposits

The Bank offers a traditional array of deposit products, including non-interest bearing checking accounts, interest bearing checking and savings accounts, negotiable order of withdrawal ("NOW") accounts, money market accounts and certificates of deposit. These accounts, except for non-interest bearing checking accounts, earn interest at rates established by management based on competitive market factors and management's desire to increase certain types or maturities of deposit liabilities. Our approach is to tailor fit products and bundle those that meet the customer's needs. This approach is designed to add value for the customer, increase products per household and produce higher service fee income.

Available Information

We file reports with the U.S. Securities and Exchange Commission (the "SEC"), including our Proxy Statements, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and any amendments thereto. These reports and other information on file can be inspected and copied at the public reference facilities of the SEC at 100 F Street, N.E., Washington D.C., 20549 on official business days during the hours of 10 a.m. to 3 p.m. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains a website that contains the reports, proxy and information statements and other information we file with them. The address of the site is www.sec.gov.

We also maintain an Internet website at www.hanmi.com. We make available free of charge throughout our website our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments thereto, as soon as reasonably practicable after we file such reports with the SEC. We make our website content available for information purposes only. It should not be relied upon for investment purposes. None of the information contained in or hyperlinked from our website is incorporated into this Annual Report on Form 10-K.

Employees

As of December 31, 2013, the Bank had a total of 437 full-time employees and 17 part-time employees, and Chun-Ha and All World, together, had a total of 43 full-time employees and 2 part-time employees. None of the employees are represented by a union or covered by a collective bargaining agreement. The managements of the Bank, Chun-Ha and All World believe that their employee relations are satisfactory.

Insurance

We maintain financial institution bond and commercial insurance at levels deemed adequate by management to protect Hanmi Financial from certain litigation and other losses.

Competition

The banking and financial services industry in California generally, and in the Bank's market areas specifically, are highly competitive. The increasingly competitive environment faced by banks is primarily the result of changes in laws and regulation, changes in technology and product delivery systems, new competitors in the market, and the accelerating pace of consolidation among financial service providers. We compete for loans, deposits and customers with other commercial banks, savings institutions, securities and brokerage companies, mortgage companies, real estate investment trusts, insurance companies, finance companies, money market funds, credit unions and other non-bank financial service providers. Some of these competitors are larger in total assets and capitalization, have greater access to capital markets, including foreign-ownership, and/or offer a broader range of financial services.

Many of our competitors are larger financial institutions that offer some services, such as extensive and established branch networks and trust services, which the Bank does not provide.

Other institutions, including brokerage firms, credit card companies and retail establishments, offer banking services and products to consumers that are in direct competition with the Bank, including money market funds with check access and cash advances on credit card accounts. In addition, many non-bank competitors are not subject to the same extensive federal or state regulations that govern bank holding companies and federally insured banks.

The Bank's direct competitors are community banks that focus their marketing efforts on Korean-American businesses, while offering the same or similar services and products as those offered by the Bank. These banks compete for loans and deposits primarily through the interest rates and fees they charge and the convenience and quality of service they provide to customers.

Economic, Legislative and Regulatory Developments

Future profitability, like that of most financial institutions, is primarily dependent on interest rate differentials and credit quality. In general, the difference between the interest rates paid by us on interest-bearing liabilities, such as deposits and other borrowings, and the interest rates received by us on our interest-earning assets, such as loans extended to our customers and securities held in our investment portfolio, will comprise the major portion of our earnings. These rates are highly sensitive to many factors that are beyond our control, such as inflation, recession and unemployment, and the impact that future changes in domestic and foreign economic conditions might have on us cannot be predicted.

Our business is also influenced by the monetary and fiscal policies of the Board of Governors of the Federal Reserve System (the "Federal Reserve"), the federal government, and the policies of regulatory agencies, particularly the FRB. The Federal Reserve implements national monetary policies (with objectives such as curbing inflation and combating recession) through its open-market operations in U.S. government securities, by adjusting the required level of reserves for depository institutions subject to its reserve requirements, and by varying the target federal funds and discount rates applicable to borrowings by depository institutions. The actions of the Federal Reserve in these areas influence the growth of bank loans, investments and deposits, and affect interest earned on interest-earning assets and interest paid on interest-bearing liabilities. The nature and impact on us of any future changes in monetary and fiscal policies cannot be predicted.

From time to time, federal and state legislation is enacted that may have the effect of materially increasing the cost of doing business, limiting or expanding permissible activities, or affecting the competitive balance between banks and other financial services providers, such as federal legislation permitting affiliations among commercial banks, insurance companies and securities firms. We cannot predict whether or when any potential legislation will be enacted, and if enacted, the effect that it, or any

implementing regulations, would have on our financial condition or results of operations. In addition, the outcome of any investigations initiated by state authorities or litigation raising issues may result in necessary changes in our operations, additional regulation and increased compliance costs.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank”) was signed into law on July 21, 2010 and significantly revised and expanded the rulemaking, supervisory and enforcement authority of federal bank regulators. Dodd-Frank followed other legislative and regulatory initiatives which were enacted in 2008 and 2009 in response to the economic downturn and financial industry instability. Dodd-Frank impacts many aspects of the financial industry and, in many cases, will impact larger and smaller financial institutions and community banks differently over time. Dodd-Frank includes, among other things, the following:

- (i) creation of a Financial Services Oversight Counsel to identify emerging systemic risks and improve interagency cooperation;
- (ii) expanded Federal Deposit Insurance Corporation (“FDIC”) resolution authority to conduct the orderly liquidation of certain systemically significant non-bank financial companies in addition to depository institutions;
- (iii) establishment of strengthened capital and liquidity requirements for banks and bank holding companies, including minimum leverage and risk-based capital requirements no less than the strictest requirements in effect for depository institutions as of the date of enactment;
- (iv) requirement by statute that bank holding companies serve as a source of financial strength for their depository institution subsidiaries;
- (v) enhanced regulation of financial markets, including the derivative and securitization markets, and the elimination of certain proprietary trading activities by banks;
- (vi) termination of investments by the U.S. Department of the Treasury (the “Treasury Department”) under the Troubled Asset Relief Program (“TARP”);
- (vii) elimination and phase out of trust preferred securities from Tier 1 capital with certain exceptions;
- (viii) a permanent increase of FDIC deposit insurance to \$250,000;
- (ix) authorization for financial institutions to pay interest on business checking accounts;
- (x) changes in the calculation of FDIC deposit insurance assessments, such that the assessment base will no longer be the institution’s deposit base, but instead, will be its average consolidated total assets less its average tangible equity and an increase in the minimum insurance ratio for the Deposit Insurance Fund (“DIF”) from 1.15 percent to 1.35 percent;
- (xi) elimination of remaining barriers to de novo interstate branching by federal- and state-chartered banks;
- (xii) expanded restrictions on transactions with affiliates and insiders under Section 23A and 23B of the Federal Reserve Act (the “FRA”) and lending limits for derivative transactions, repurchase agreements and securities lending and borrowing transactions;
- (xiii) transfer of oversight of federally chartered thrift institutions to the Office of the Comptroller of the Currency and state chartered savings banks to the FDIC, and the elimination of the Office of Thrift Supervision;
- (xiv) provisions that affect corporate governance and executive compensation at most United States publicly traded companies, including financial institutions, including (1) stockholder advisory votes on executive compensation, (2) executive compensation “clawback” requirements for companies listed on national securities exchanges in the event of materially inaccurate statements of earnings, revenues, gains or other criteria, (3) enhanced independence requirements for compensation committee members, and (4) authority for the SEC to adopt proxy access rules which would permit stockholders of publicly traded companies to nominate candidates for election as director and have those nominees included in a company’s proxy statement;
- (xv) creation of the Consumer Financial Protection Bureau (the “CFPB”), which is authorized to promulgate consumer protection regulations relating to bank and non-bank financial products and examine and enforce these regulations on banks with more than \$10 billion in assets; and
- (xvi) adoption, on December 10, 2013, by federal bank regulatory agencies, including our primary federal regulator, the Federal Reserve, of final rules implementing the prohibitions required by the “Volcker Rule” of Dodd-Frank. The final rules prohibit banking entities from, among other things, (1) engaging in short-term proprietary trading for their own accounts, and (2) having certain ownership interests in, and relationships with, hedge funds or private equity funds. The final rules are intended to provide greater clarity with respect to both the extent of those primary prohibitions and of the

related exemptions and exclusions. The final rules also require each regulated entity to establish an internal compliance program that is consistent with the extent to which it engages in activities covered by the Volcker Rule. The final rules will become effective on April 1, 2014 with a compliance period that has been extended through July 21, 2015. The compliance requirements under the final rules vary based on the size of the banking entity and the scope of activities conducted. Although the Volcker Rule has significant implications for many larger financial institutions, we do not currently anticipate that the Volcker Rule will have a material effect on the operations of Hanmi Financial or the Bank. Until the application of the final rules is fully understood, the precise financial impact of the Volcker Rule on Hanmi Financial, the Bank, our customers or the financial industry more generally, cannot be determined.

We cannot predict the extent to which the interpretations and implementation of this wide-ranging federal legislation may affect us. As a result of the changes required by Dodd-Frank, the profitability of our business activities may be impacted, and we may be required to make changes to certain of our business practices. These changes may also require us to invest significant management attention and resources to evaluate and make any changes necessary to comply with new statutory and regulatory requirements.

Many of the requirements of Dodd-Frank will be implemented over time, and most will be subject to regulations which have not yet been implemented or which will not become fully effective for several years. There can be no assurance that these or future reforms (such as possible new standards for commercial real estate (“CRE”) lending or new stress testing guidance for all banks) required by Dodd-Frank will not significantly increase our compliance or other operating costs and earnings or otherwise have a significant impact on our business, financial condition and results of operations. Dodd-Frank may result in more stringent capital, liquidity and leverage requirements, and may otherwise adversely affect our business. For example, the provisions that affect the payment of interest on demand deposits and interchange fees are likely to increase the costs associated with deposits as well as place limitations on certain revenues generated by those deposits. Provisions that revoke the Tier 1 capital treatment of trust preferred securities could require Hanmi Financial and the Bank to seek other sources of capital in the future.

International Capital and Liquidity Initiatives

The International Basel Committee on Banking Supervision (the “Basel Committee”) is a committee of central banks and bank supervisors and regulators from the major industrialized countries. The Basel Committee develops broad policy guidelines for use by each country’s supervisors in determining the supervisory policies they apply. In December 2010, the Basel Committee released its final framework for strengthening international capital and liquidity regulation, now officially identified as “Basel III.”

Basel III, when fully phased-in, would require bank holding companies and their bank subsidiaries to maintain substantially more capital than currently required, with a greater emphasis on common equity. Basel III provides for increases in the minimum Tier 1 common equity ratio and the minimum requirement for the Tier 1 capital ratio. Basel III additionally includes a “capital conservation buffer” on top of the minimum requirement designed to absorb losses in periods of financial and economic distress; and an additional required countercyclical buffer percentage to be implemented according to a particular nation’s circumstances. These capital requirements are further supplemented under Basel III by a non-risk-based leverage ratio. Basel III also reaffirms the Basel Committee’s intention to introduce higher capital requirements on securitization and trading activities at the end of 2011.

On July 2, 2013, the federal banking regulators approved the final proposed rules for a U.S. version of Basel III. The final rules, among other things, include a new common equity Tier 1 capital (“CET1”) to risk-weighted assets ratio, including a capital conservation buffer, which will gradually increase from 4.5% on January 1, 2015 to 7.0% on January 1, 2019. The final rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% on January 1, 2015 to 8.5% on January 1, 2019, as well as require a minimum leverage ratio of 4.0%.

Under the final rules, if an institution grows above \$15 billion as a result of an acquisition, or organically grows above \$15 billion and then makes an acquisition, the combined trust preferred security debt issuances would be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016).

The final rules also provide for a number of adjustments to and deductions from the new CET1. Under current capital standards, the effects of accumulated other comprehensive income items included in capital are excluded for the purposes of determining regulatory capital ratios. Under Basel III, the effects of certain accumulated other comprehensive items are not excluded; however, non-advanced approaches banking organizations, including the Company and the Bank, may make a one-time permanent election to continue to exclude these items. The Company and Bank expect to make this election in order to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of the Bank’s securities portfolio. In addition, deductions include, for example, the requirement that mortgage servicing rights, certain deferred tax assets not dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1. The Company and the Bank are currently evaluating the provisions of the final rules and expected impact. The phase-in period for the final rules will begin for the Company and the Bank on January 1, 2015, with full compliance with the final rules entire requirement phased in on January 1, 2019.

Pending CBI Merger

On December 15, 2013, Hanmi Financial entered into the Merger Agreement with CBI and Merger Sub pursuant to which Merger Sub will merge with and into CBI, with CBI as the surviving corporation. The Merger Agreement also provides that

immediately after the CBI Merger, UCB will merge with and into the Bank, with the Bank as the surviving bank. In conjunction with the Merger Agreement, certain directors of CBI and UCB entered into voting agreements with Hanmi Financial pursuant to which they agreed, among other things, to vote their shares of CBI common stock, par value \$1.00 per share (the "CBI Shares"), in favor of the Merger Agreement.

Subject to the terms and conditions of the Merger Agreement, upon consummation of the CBI Merger, Hanmi Financial will pay an aggregate merger consideration of \$50 million in cash in respect of the outstanding CBI Shares which will be reduced on a dollar-for-dollar basis (i) by up to \$19 million depending on CBI's ability to realize certain tax refunds arising from CBI's restatement of previous years' tax returns or refunds of prior overpayments, in each case prior to the closing date, or CBI's 2013 tax liabilities exceeding a specified amount and (ii) by the amount of certain losses incurred or reasonably expected to be incurred in the event UCB fails to secure reimbursements or assurances of reimbursement under the loss share agreements (the "Loss Share Agreements") between UCB and the FDIC or the FDIC asserts any clawbacks with respect to prior reimbursements.

Prior to closing, the parties will seek to obtain the agreement of the Treasury Department to the repurchase, as of immediately prior to the closing, of CBI's fixed rate cumulative perpetual preferred stock issued under the Treasury Department's Capital Purchase Program (the "TARP Shares"). If for any reason the TARP Shares cannot be purchased prior to closing, the CBI Merger is conditioned on receiving the approval of the Federal Reserve and the applicable state regulatory authorities to redeem the TARP Shares following closing.

Each party's obligation to consummate the CBI Merger is conditioned upon customary matters for a transaction of this nature, including required regulatory approvals and approval of CBI's shareholders. The parties currently anticipate that the requisite regulatory applications will be submitted after the financial information for the first quarter of 2014 becomes available. In addition, Hanmi Financial's obligation to consummate the CBI Merger is further conditioned upon, among other things, (i) holders of no more than 10% of the outstanding CBI Shares having exercised appraisal rights with respect to the CBI Merger, (ii) (A) the consent of the FDIC to the transaction under the Loss Share Agreements, (B) UCB's filing all claims certificates required or permitted to be filed pursuant to the Loss Share Agreements and either the FDIC having reimbursed these claims in full or Hanmi Financial having received assurances that the claims will be reimbursed and (C) there having not been any clawbacks asserted by the FDIC with respect to reimbursements under the Loss Share Agreements (provided that in the event items (B) and (C) are not satisfied, the condition described in this item (ii) will be deemed satisfied if CBI elects to decrease the aggregate merger consideration as described above), (iii) the carrying value as of the month-end immediately preceding the consummation of the CBI Merger of all loans of CBI or any of its subsidiaries that are then classified as "substandard," "doubtful," or "loss" and assets classified as "other real estate owned" not exceeding the higher of (1) \$160 million and (2) if Hanmi Financial elects in its sole discretion, such higher number as Hanmi Financial reasonably determines necessary and (iv) CBI having completed its financial statements for the year ended December 31, 2013 and Crowe and Horwath LLP having issued an audit report thereon in each case satisfying the applicable rules and regulations of the SEC.

The Merger Agreement contains certain termination rights including the right of either Hanmi Financial or CBI to terminate the Merger Agreement if (i) the CBI Merger is not consummated by September 30, 2014, which date may be extended by Hanmi Financial to December 31, 2014 if the parties have not received the necessary approvals from the applicable regulatory authorities (the "Drop Dead Date"), (ii) the required approval of CBI's shareholders is not obtained or (iii) any court or governmental authority issues an order or takes other action permanently enjoining the CBI Merger or the Bank Merger. The Merger Agreement contains certain other termination rights customary for a transaction of this nature.

Termination of the Merger Agreement may result in CBI having to pay a termination fee of three percent of the \$50 million aggregate merger consideration, subject to potential adjustment as otherwise described herein in the event that (i) CBI, prior to obtaining shareholder approval, terminates the Merger Agreement to enter into an alternative acquisition agreement, (ii) a *bona fide* acquisition proposal is made to CBI and is not publicly withdrawn and thereafter the Merger Agreement is terminated by either Hanmi Financial or CBI because (A) the CBI Merger is not consummated by the Drop Dead Date or (B) CBI's shareholders fail to approve the CBI Merger or (iii) (A) Hanmi Financial terminates the Merger Agreement because CBI's board of directors changes its recommendation to its shareholders, (B) CBI fails to hold a shareholder vote, (C) CBI fails to reaffirm its recommendation to its shareholders after receiving an acquisition proposal or after the public disclosure of a tender offer for CBI shares or (D) CBI terminates the Merger Agreement after failing to obtain the requisite vote at its shareholder meeting, provided that the Termination Fee will be payable under (B) above only if within 12 months of termination CBI enters into an acquisition agreement with respect to certain business combination transactions or any such combination is effected.

The foregoing description of the Merger Agreement does not purport to be complete and is qualified in its entirety by reference to the Merger Agreement, attached as Exhibit 2.1 to Hanmi Financial's Current Report on Form 8-K which was filed with the SEC on December 16, 2013.

Supervision and Regulation

General

We are extensively regulated under both federal and certain state laws. Regulation and supervision by the federal and state banking agencies is intended primarily for the protection of depositors and the Deposit Insurance Fund administered by the FDIC, and not for the benefit of stockholders. Set forth below is a summary description of the principal laws and regulations that relate to our operations. These descriptions are qualified in their entirety by reference to the applicable laws and regulations.

Hanmi Financial

Hanmi Financial is a legal entity separate and distinct from the Bank. As a bank and financial holding company, we are regulated by the BHCA and are subject to inspection, supervision and examination by the FRB. Accordingly, we are subject to the FRB's authority to:

- require periodic reports and such additional information as the FRB may require.
- require bank holding companies to maintain certain levels of capital.
- require that bank holding companies serve as a source of financial and managerial strength to subsidiary banks and commit resources as necessary to support each subsidiary bank.
- restrict the ability of bank holding companies to obtain dividends or other distributions from their subsidiary banks.
- terminate an activity or terminate control of or liquidate or divest certain subsidiaries, affiliates or investments if the FRB believes the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any bank subsidiary.
- take formal or informal enforcement action or issue other supervisory directives and assess civil money penalties for non-compliance under certain circumstances.
- require the prior approval of senior executive officers or director changes and golden parachute payments, including change in control agreements or new employment agreements with payment terms which are contingent upon termination.
- regulate provisions of certain bank holding company debt, including the authority to impose interest ceilings and reserve requirements on such debt and require prior approval to purchase or redeem securities in certain situations.
- limit or prohibit and require the FRB's prior approval of the payment of dividends.
- require financial holding companies to divest non-banking activities or subsidiary banks if they fail to meet certain financial holding company standards.
- approve acquisitions of more than 5 percent of the voting shares of another bank and mergers with other banks or savings institutions and consider certain competitive, management, financial and other factors in granting these approvals, subject to similar California and other state banking agency approvals, as may be required.

A bank holding company is required to file with the FRB annual reports and other information regarding its business operations and those of its non-banking subsidiaries. It is also subject to supervision and examination by the FRB. Examinations are designed to inform the FRB of the financial condition and nature of the operations of the bank holding company and its subsidiaries and to monitor compliance with the BHCA and other laws affecting the operations of bank holding companies. To determine whether potential weaknesses in the condition or operations of bank holding companies might pose a risk to the safety and soundness of their subsidiary banks, examinations focus on whether a bank holding company has adequate systems and internal controls in place to manage the risks inherent in its business, including credit risk, interest rate risk, market risk, liquidity risk, operational risk, legal risk and reputation risk.

Bank holding companies may be subject to potential enforcement actions by the FRB for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation or any condition imposed in writing by the FRB. Enforcement actions may include the issuance of cease and desist orders, the imposition of civil money penalties, the requirement to meet and maintain specific capital levels for any capital measure, the issuance of directives to increase capital, formal and informal agreements, or removal and prohibition orders against officers or directors and other "institution-affiliated" parties.

Regulatory Restrictions on Dividends; Source of Strength

Hanmi Financial is regarded as a legal entity separate and distinct from its other subsidiaries. The principal source of our revenue is dividends received from the Bank. Various federal and state statutory provisions limit the amount of dividends the Bank can pay to Hanmi Financial without regulatory approval. It is the policy of the Federal Reserve that bank holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines the bank holding company's ability to serve as a source of strength to its banking subsidiaries.

The Federal Reserve's view is that in serving as a source of strength to its subsidiary banks, a bank holding company should stand ready to use available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity and should maintain financial flexibility and capital-raising capacity to obtain additional resources for assisting its subsidiary banks. A bank holding company's failure to meet its source-of-strength obligations may constitute an unsafe and unsound practice or a violation of the Federal Reserve's regulations, or both. The source-of-strength doctrine, now codified in the federal banking statutes pursuant to Dodd-Frank, most directly affects bank holding companies where a bank holding company's subsidiary bank fails to maintain adequate capital levels. In such a situation, the subsidiary bank will be required by the bank's federal regulator to take "prompt corrective action" including obtaining a guarantee by the bank holding company of a capital plan for undercapitalized bank subsidiaries. See "Prompt Corrective Action Regulations" below. Additionally, if a bank holding company has more than one bank subsidiary, the FDIA provides that each subsidiary bank may have "cross-guaranty" liability for any loss incurred by the FDIC in connection with the failure of another commonly-controlled bank.

Because Hanmi Financial is a legal entity separate and distinct from the Bank, its right to participate in the distribution of assets of any subsidiary upon the subsidiary's liquidation or reorganization will be subject to the prior claims of the subsidiary's creditors. In the event of a liquidation or other resolution of the Bank, the claims of depositors and other general or subordinated creditors of the Bank would be entitled to a priority of payment over the claims of holders of any obligation of the Bank to its stockholders, including any depository institution holding company (such as Hanmi Financial) or any stockholder or creditor of such holding company. In the event of a bank holding company's bankruptcy under Chapter 11 of the United States Bankruptcy Code, the trustee will be deemed to have assumed, and is required to cure immediately, any deficit under any commitment by the debtor holding company to any of the federal banking agencies to maintain the capital of an insured depository institution, and any claim for breach of such obligation will generally have priority over most other unsecured claims.

Regulatory Restrictions on Activities

Subject to prior notice or FRB approval, as applicable, bank holding companies may generally engage in, or acquire shares of companies engaged in, activities determined by the FRB to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. Bank holding companies which elect and retain "financial holding company" status pursuant to the Gramm-Leach-Bliley Act of 1999 ("GLBA") may engage in these nonbanking activities and broader securities, insurance, merchant banking and other activities that are determined to be "financial in nature" or are incidental or complementary to activities that are financial in nature without prior Federal Reserve approval. Pursuant to GLBA and Dodd-Frank, in order to elect and retain financial holding company status, a bank holding company and all depository institution subsidiaries of a bank holding company must be well capitalized, and well managed, and, except in limited circumstances, depository subsidiaries must be in satisfactory compliance with the Community Reinvestment Act ("CRA"), which requires banks to help meet the credit needs of the communities in which they operate. Failure to sustain compliance with these requirements or correct any non-compliance within a fixed time period could lead to divestiture of subsidiary banks or require all activities to conform to those permissible for a bank holding company. Hanmi Financial elected financial holding company status, and Chun-Ha and All World are considered financial subsidiaries of Hanmi Financial.

Hanmi Financial is also a bank holding company within the meaning of Section 3700 of the California Financial Code. Therefore, Hanmi Financial and any of its subsidiaries are subject to examination by, and may be required to file reports with, the DBO.

Privacy Policies

Under GLBA, all financial institutions are required to adopt privacy policies, restrict the sharing of nonpublic customer data with nonaffiliated parties and establish procedures and practices to protect customer data from unauthorized access. Hanmi Financial and its subsidiaries have established policies and procedures to assure our compliance with all privacy provisions of GLBA.

Capital Adequacy Requirements

Under the current capital guidelines, there are three fundamental capital ratios: a total risk-based capital ratio, a Tier 1 risk-based capital ratio and a Tier 1 leverage ratio. To be deemed “well capitalized,” a bank must have a total risk-based capital ratio, a Tier 1 risk-based capital ratio and a Tier 1 leverage ratio of at least 10 percent, 6 percent and 5 percent, respectively. At December 31, 2013, the respective capital ratios of Hanmi Financial and the Bank exceeded the minimum percentage requirements to be deemed “well-capitalized” for regulatory purposes. See “Notes to Consolidated Financial Statements, Note 11 — Regulatory Matters.” The regulatory capital guidelines and the actual capital ratios for Hanmi Financial and the Bank as of December 31, 2013 were as follows:

	Regulatory Capital Guidelines		Actual	
	Adequately Capitalized	Well Capitalized	Hanmi Financial	Hanmi Bank
Total risk-based capital ratio	8.00%	10.00%	17.53%	16.84%
Tier 1 risk-based capital ratio	4.00%	6.00%	16.26%	15.58%
Tier 1 leverage ratio	4.00%	5.00%	13.66%	13.09%

Bank holding companies and banks are subject to various regulatory capital requirements administered by state and federal banking agencies. Increased capital requirements are expected as a result of Dodd-Frank and the Basel III international supervisory developments. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting, and other factors.

The current risk-based capital guidelines for bank holding companies and banks adopted by the federal banking agencies are expected to provide a measure of capital that reflects the degree of risk associated with a banking organization’s operations for both transactions reported on the balance sheet as assets, such as loans, and those recorded as off-balance sheet items, such as commitments, letters of credit and recourse arrangements. The risk-based capital ratio is determined by classifying assets and certain off-balance sheet financial instruments into weighted categories, with higher levels of capital being required for those categories perceived as representing greater risks and dividing its qualifying capital by its total risk-adjusted assets and off-balance sheet items.

Under the risk-based capital guidelines, the nominal dollar amounts of assets and credit-equivalent amounts of off-balance sheet items are multiplied by one of several risk adjustment percentages, which range from 0 percent for assets with low credit risk, such as certain U.S. Treasury securities, to 100 percent for assets with relatively high credit risk, such as business loans.

The risk-based capital requirements also take into account concentrations of credit (i.e., relatively large proportions of loans involving one borrower, industry, location, collateral or loan type) and the risks of “non-traditional” activities (those that have not customarily been part of the banking business). The risk-based capital regulations also include exposure to interest rate risk as a factor that the regulators will consider in evaluating a bank’s capital adequacy. Interest rate risk is the exposure of a bank’s current and future earnings and equity capital arising from adverse movements in interest rates. While interest rate risk is inherent in a bank’s role as financial intermediary, it introduces volatility to bank earnings and to the economic value of the institution. Bank holding companies and banks engaged in significant trading activity may also be subject to the market risk capital guidelines and be required to incorporate additional market and interest rate risk components into their risk-based capital standards. Neither Hanmi Financial nor the Bank is currently subject to the market risk capital rules.

Qualifying capital is classified depending on the type of capital:

- “Tier I capital” currently includes common equity and trust preferred securities, subject to certain criteria and quantitative limits. The capital received from trust preferred offerings also qualifies as Tier I capital, subject to the new provisions of Dodd-Frank. Under Dodd-Frank, depository institution holding companies with more than \$15 billion in total consolidated assets as of December 31, 2009, will no longer be able to include trust preferred securities as Tier 1 regulatory capital after the end of a 3-year phase-out period beginning 2013, and would need to replace any outstanding trust preferred securities issued prior to May 19, 2010 with qualifying Tier 1 regulatory capital during the phase-out period. For institutions with less than \$15 billion in total consolidated assets, existing trust preferred capital will still qualify as Tier 1.
- “Tier II capital” includes hybrid capital instruments, other qualifying debt instruments, a limited amount of the allowance for loan and lease losses, and a limited amount of unrealized holding gains on equity securities. Following the phase-out period under Dodd-Frank, trust preferred securities will be treated as Tier II capital. The maximum amount of supplemental capital elements that qualifies as Tier 2 capital is limited to 100 percent of Tier 1 capital.
- “Tier III capital” consists of qualifying unsecured debt. The sum of Tier II and Tier III capital may not exceed the amount of Tier I capital.

Pursuant to federal regulations, banks must maintain capital levels commensurate with the level of risk to which they are exposed, including the volume and severity of problem loans. The FRB guidelines also provide that banking organizations experiencing internal growth or making acquisitions will be expected to maintain strong capital positions, substantially above the minimum supervisory levels, without significant reliance on intangible assets. Federal banking regulators may set higher capital requirements when a bank's particular circumstances warrant and have required many banks and bank holding companies subject to enforcement actions to maintain capital ratios in excess of the minimum ratios otherwise required to be deemed well capitalized. In such cases, the institutions may no longer be deemed well capitalized and may therefore additionally be subject to restrictions on taking brokered deposits.

Hanmi Financial and the Bank are also required to maintain a leverage capital ratio designed to supplement the risk-based capital guidelines. Banks and bank holding companies that have received the highest rating of the five categories used by regulators to rate banks and that are not anticipating or experiencing any significant growth must maintain a ratio of Tier 1 capital (net of all intangibles) to adjusted total assets of at least 3 percent. All other institutions are required to maintain a leverage ratio of at least 100 to 200 basis points above the 3 percent minimum, for a minimum of 4 percent to 5 percent. As of December 31, 2013, the Hanmi Financial's leverage capital ratio was 13.66 percent, and the Bank's leverage capital ratio was 13.09 percent, both ratios well exceeding regulatory minimums.

Imposition of Liability for Undercapitalized Subsidiaries

Bank regulators are required to take "prompt corrective action" to resolve problems associated with insured depository institutions whose capital declines below certain levels. In the event an institution becomes "undercapitalized," it must submit a capital restoration plan. The capital restoration plan will not be accepted by the regulators unless each company having control of the undercapitalized institution guarantees the subsidiary's compliance with the capital restoration plan up to a certain specified amount. Any such guarantee from a depository institution's holding company is entitled to a priority of payment in bankruptcy.

The aggregate liability of the holding company of an undercapitalized bank is limited to the lesser of 5 percent of the institution's assets at the time it became undercapitalized or the amount necessary to cause the institution to be "adequately capitalized." The bank regulators have greater power in situations where an institution becomes "significantly" or "critically" undercapitalized or fails to submit a capital restoration plan. For example, a bank holding company controlling such an institution can be required to obtain prior Federal Reserve approval of proposed dividends, or might be required to consent to a consolidation or to divest the troubled institution or other affiliates.

Acquisitions by Bank Holding Companies

The BHCA requires every bank holding company to obtain the prior approval of the Federal Reserve before it may acquire all, or substantially all, of the assets of any bank, or ownership or control of any voting shares of any bank, if after such acquisition the bank holding company would own or control, directly or indirectly, more than 5 percent of the voting shares of such bank. In approving bank acquisitions by bank holding companies, the Federal Reserve is required to consider the financial and managerial resources and future prospects of the bank holding company and the banks concerned, the convenience and needs of the communities to be served, and various competitive factors.

Control Acquisitions

The Change in Bank Control Act prohibits a person or group of persons from acquiring "control" of a bank holding company unless the Federal Reserve has been notified and has not objected to the transaction. Under a rebuttable presumption established by the Federal Reserve, the acquisition of 10 percent or more of a class of voting stock of a bank holding company with a class of securities registered under Section 12 of the Exchange Act would, under the circumstances set forth in the presumption, constitute acquisition of control.

In addition, any company is required to obtain the approval of the Federal Reserve under the BHCA before acquiring 25 percent (5 percent in the case of an acquirer that is a bank holding company) or more of the outstanding common stock of the company, or otherwise obtaining control or a "controlling influence" over the company.

Sarbanes-Oxley Act

The Company is subject to the accounting oversight and corporate governance requirements of the Sarbanes-Oxley Act of 2002, which requires, among other things, executive certification of financial presentations, increased requirements for board audit committees and their members, and enhanced disclosure of controls and procedures and internal control over financial reporting.

Securities Registration

Our common stock is listed on the NASDAQ Global Select Market (“NASDAQ”). We are subject to the periodic reporting, information, proxy solicitation, insider trading, corporate governance and other requirements and restrictions of the Exchange Act, SEC regulations, and NASDAQ listing rules and requirements. These requirements and regulations include certain provisions of Dodd-Frank that affect corporate governance and executive compensation, including: (i) stockholder advisory votes on executive compensation, (ii) executive compensation “clawback” requirements for companies listed on national securities exchanges in the event of materially inaccurate statements of earnings, revenues, gains or other criteria similar to the requirements of the American Recovery and Reinvestment Act of 2009 for TARP CPP recipients, (iii) enhanced independence requirements for compensation committee members, and (iv) SEC authority to adopt proxy access rules which would permit stockholders of publicly traded companies to nominate candidates for election as director and have those nominees included in a company’s proxy statement.

The Bank

The Bank is a California state-chartered bank whose deposits are insured by the FDIC. The Bank is subject to regulation, supervision and regular examination by the DBO, its state banking regulator, and by the FRB, the Bank’s primary federal regulator. Additionally, the Bank must comply with certain applicable regulations of the Federal Reserve and the FDIC. Specific federal and state laws and regulations which are applicable to banks regulate, among other things, the scope of their business, their investments, their reserves against deposits, the timing of the availability of deposited funds, their activities relating to dividends, investments, loans, the nature and amount of and collateral for certain loans, borrowings, capital requirements, certain check-clearing activities, branching, and mergers and acquisitions.

The California Financial Code provides that a state-chartered commercial bank has the powers of a California corporation, subject to the general limitation of state bank powers under the Federal Deposit Insurance Corporation Improvement Act to those permissible for national banks. California law also permits state-chartered commercial banks to engage in any activity permissible for national banks, including the many so-called “closely related to banking” or “nonbanking” activities commonly conducted by national banks in operating subsidiaries or by non-bank subsidiaries of bank holding companies. GLBA also provides that the Bank may conduct certain “financial” activities in a subsidiary to the same extent as may a national bank, provided the bank is and remains “well-capitalized,” “well-managed” and in satisfactory compliance with the CRA. The Bank currently has no financial subsidiaries.

Enforcement Authority

Bank regulatory agencies have the ability to exercise extensive discretion in connection with their supervisory and enforcement activities and examination policies. The regulatory agencies have adopted guidelines to assist in identifying, evaluating and addressing potential safety and soundness concerns before a financial institution’s capital becomes impaired. The guidelines set forth operational and managerial standards generally relating to: (i) internal controls, information systems, and internal audit systems; (ii) loan documentation; (iii) credit underwriting; (iv) interest-rate exposure; (v) asset growth and asset quality; and (vi) compensation, fees, and benefits. The regulatory agencies have also adopted safety and soundness guidelines for asset quality and for evaluating and monitoring earnings to ensure that earnings are sufficient for the maintenance of adequate capital and reserves. If, as a result of an examination, the DBO or the FRB assesses that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of the Bank’s operations are unsatisfactory or that the Bank or its management is violating or has violated any law or regulation, the DBO and the FRB, and separately the FDIC as insurer of the Bank’s deposits, have residual authority to:

- require affirmative action to correct any conditions resulting from any violation or practice;
- direct an increase in capital or establish specific minimum capital ratios;
- restrict the Bank’s growth geographically, by products and services or by mergers and acquisitions;
- enter into informal non-public or formal public memoranda of understanding or written agreements;
- enjoin unsafe and unsound practices and issue cease and desist orders to take corrective action;
- remove officers and directors and assess civil monetary penalties;
- terminate the Bank’s deposit insurance, which would also result in the revocation of the Bank’s license by the DBO; or
- take possession and close and liquidate the Bank.

Brokered Deposits

Under the FDIA, banks may be restricted in their ability to accept brokered deposits, depending on their capital classification. “Well-capitalized” banks are permitted to accept brokered deposits, but any banks that are not well-capitalized could be restricted from accepting such deposits. The FDIC may, on a case-by-case basis, permit banks that are adequately capitalized to accept brokered deposits if the FDIC determines that acceptance of such deposits would not constitute an unsafe or unsound banking practice with respect to the bank. As of December 31, 2013, the Bank had no brokered deposits.

Community Reinvestment Act

Under the CRA, a financial institution has a continuing and affirmative obligation, consistent with its safe and sound operation, to help meet the credit needs of all segments of the greater community that it services, including low and moderate income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. However, the CRA requires federal examiners, in connection with the examination of a financial institution, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institution. The CRA also requires all institutions to make public disclosure of their CRA ratings. The Bank has a Compliance Committee, which oversees the Bank's performance under CRA to ensure that the Bank satisfactorily meets the lending, service and investment tests by meeting the credit needs of the community, including low and moderate income communities, consistent with safe and sound operations. The Federal Reserve rated the Bank as "satisfactory" in meeting community credit needs under the CRA at its most recent examination for CRA performance.

Federal Home Loan Bank System

The Bank is a member and holder of the capital stock of the Federal Home Loan Bank of San Francisco ("FHLBSF"). There are a total of twelve Federal Home Loan Banks (each, an "FHLB") across the U.S. owned by their members who are more than 7,500 community financial institutes of all sizes and types. Each FHLB serves as a reserve or central bank for its members within its assigned region and makes available loans or advances to its members. Each FHLB is financed primarily from the sale of consolidated obligations of the FHLB system. Each FHLB makes available loans or advances to its members in compliance with the policies and procedures established by the Board of Directors of the individual FHLB. Each member of FHLBSF is required to own stock in an amount equal to the greater of (i) a membership stock requirement of 1.0 percent of an institution's "membership asset value" which is determined by multiplying the amount of the member's membership assets by the applicable membership asset factors and is capped at \$25 million, or (ii) an activity based stock requirement (4.7% of the member's outstanding advances plus 5.0% of the member's outstanding mortgage loans purchased and held by FHLBSF). At December 31, 2013, the Bank was in compliance with the FHLBSF's stock ownership requirement, and our investment in FHLBSF capital stock totaled \$14.1 million. The total borrowing capacity available based on pledged collateral and the remaining available borrowing capacity as of December 31, 2013 were \$343.3 million and \$215.8 million, respectively.

Federal Reserve System

The FRB requires all depository institutions to maintain noninterest-bearing reserves at specified levels against their transaction accounts. At December 31, 2013, the Bank was in compliance with these requirements.

Prompt Corrective Action Regulations

Pursuant to the FDIA, federal banking authorities are required to take "prompt corrective action" with respect to a depository institution if it fails to meet certain capital adequacy standards. There are five capital tiers established under the FDIA. They include: "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized."

A depository institution's capital tier under the prompt corrective action regulations will depend upon how its capital levels compare with various relevant capital measures and the other factors established by the regulations. The relevant capital measures are the capital ratio, the Tier 1 capital ratio, and the leverage ratio. The assessment of a bank's capital category may not be an accurate representation of the bank's overall financial condition. The capital category is determined solely for the purpose of requiring prompt corrective action regulations and may have no application to the bank's overall financial condition or prospects for other purposes. A bank will be: (i) "well capitalized" if the institution has a total risk-based capital ratio of 10.0 percent or greater, a Tier 1 risk-based capital ratio of 6.0 percent or greater, and a leverage ratio of 5.0 percent or greater and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure; (ii) "adequately capitalized" if the institution has a total risk-based capital ratio of 8.0 percent or greater, a Tier 1 risk-based capital ratio of 4.0 percent or greater, and a leverage ratio of 4.0 percent or greater and is not "well capitalized"; (iii) "undercapitalized" if the institution has a total risk-based capital ratio that is less than 8.0 percent, a Tier 1 risk-based capital ratio of less than 4.0 percent, or a leverage ratio of less than 4.0 percent; (iv) "significantly undercapitalized" if the institution has a total risk-based capital ratio of less than 6.0 percent, a Tier 1 risk-based capital ratio of less than 3.0 percent, or a leverage ratio of less than 3.0 percent; and (v) "critically undercapitalized" if the institution's tangible equity is equal to or less than 2.0 percent of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters.

The FDIA generally prohibits a depository institution from making any capital distributions (including payment of a dividend) or paying any management fee to its parent holding company if the depository institution would thereafter be “undercapitalized.” “Undercapitalized” institutions are subject to growth limitations and are required to submit a capital restoration plan. The regulatory agencies may not accept such a plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution’s capital. In addition, for a capital restoration plan to be acceptable, the depository institution’s parent holding company must guarantee that the institution will comply with such capital restoration plan. The bank holding company must also provide appropriate assurances of performance. The aggregate liability of the parent holding company is limited to the lesser of (i) an amount equal to 5.0 percent of the depository institution’s total assets at the time it became undercapitalized and (ii) the amount which is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it is “significantly undercapitalized.” “Significantly undercapitalized” depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become “adequately capitalized,” requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. “Critically undercapitalized” institutions are subject to the appointment of a receiver or conservator.

The appropriate federal banking agency may, under certain circumstances, reclassify a well-capitalized insured depository institution as adequately capitalized. The FDIA provides that an institution may be reclassified if the appropriate federal banking agency determines (after notice and opportunity for a hearing) that the institution is in an unsafe or unsound condition or deems the institution to be engaging in an unsafe or unsound practice. The appropriate agency is also permitted to require an adequately capitalized or undercapitalized institution to comply with the supervisory provisions as if the institution were in the next lower category (but not treat a significantly undercapitalized institution as critically undercapitalized) based on supervisory information other than the capital levels of the institution.

FDIC Deposit Insurance

The FDIC is an independent federal agency that insures deposits of federally insured banks and savings institutions up to prescribed statutory limits, and safeguards the safety and soundness of the banking and savings industries. The FDIC insures our customer deposits through the Deposit Insurance Fund (the “DIF”). Pursuant to Dodd-Frank, the maximum deposit insurance amount per depositor has been permanently increased to \$250,000. The amount of FDIC assessments paid by each DIF member institution is based on its relative risk of default as measured by regulatory capital ratios and other supervisory factors.

Our FDIC insurance expense totaled \$1.2 million for 2013. FDIC insurance expense includes deposit insurance assessments and Financing Corporation (“FICO”) assessments related to outstanding FICO bonds to fund interest payments on bonds to recapitalize the predecessor to the DIF. These assessments will continue until the FICO bonds mature in 2017. The FICO assessment rate, which is determined quarterly, was 0.00155% of insured deposits for the year ended December 31, 2013. The total FICO assessment in 2013 was \$155,000.

We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures or if the FDIC otherwise determines, we may be required to pay even higher FDIC premiums than the recently increased levels. These announced increases and any future increases in FDIC insurance premiums may have a material effect on our earnings.

The FDIC may terminate the deposit insurance of any insured depository institution if it determines that the institution has engaged in or is engaging in unsafe and unsound banking practices, is in an unsafe or unsound condition or has violated any applicable law, regulation or order or any condition imposed in writing by, or pursuant to, any written agreement with the FDIC.

Federal Banking Agency Guidance on Sound Incentive Compensation Policies

Effective June 25, 2010, federal banking agencies adopted the Interagency Guidance on Sound Incentive Compensation Policies (the “Compensation Guidance”) to assist banking organizations in designing and implementing incentive compensation arrangements, policies and procedures that are consistent with promoting the safety and soundness of the organization. The Compensation Guidance covers all employees who have the ability to materially affect the risk profile of an organization, either individually or as part of a group. It is based upon the key principles that a banking organization’s incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization’s ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the organization’s board of directors. Any deficiencies in compensation practices that are identified may be incorporated into the organization’s supervisory ratings, which can affect its ability to make acquisitions or perform other actions. The Compensation Guidance provides that enforcement actions may be taken against a banking organization if its incentive compensation arrangements or related risk-management control or governance processes pose a risk to the organization’s safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

Some of the considerations used by federal agencies to determine if compensation is excessive include: (i) the combined value of all cash and noncash benefits provided to the individual; (ii) the compensation history of the individual and other individuals with comparable expertise at the institution; (iii) the financial condition of the institution; (iv) the compensation practices at comparable institutions, based upon such factors as assets size, geographic location and the complexity of the loan portfolio or other assets; (v) for post-employment benefits, the projected total cost and benefit to the institution; (vi) any connection between the individual and any fraudulent act, omission, breach of trust or fiduciary duty, or insider abuse with regard to the institution; and (vii) any other factors the agencies determine to be relevant.

In 2011, the FRB and other federal regulatory agencies, including the SEC, proposed joint rules to implement Section 956 of Dodd-Frank for banks with \$1 billion or more in assets. Section 956 prohibits incentive-based compensation arrangements that encourage inappropriate risk taking by covered financial institutions and are deemed to be excessive, or that may lead to material losses. The proposed rule would move the U.S. closer to aspects of international compensation standards by (i) requiring deferral of a substantial portion of incentive compensation for executive officers of particularly large institutions described above; (ii) prohibiting incentive-based compensation arrangements for covered persons that would encourage inappropriate risks by providing excessive compensation; (iii) prohibiting incentive-based compensation arrangements for covered persons that would expose the institution to inappropriate risks by providing compensation that could lead to a material financial loss; (iv) requiring policies and procedures for incentive-based compensation arrangements that are commensurate with the size and complexity of the institution; and (v) requiring annual reports on incentive compensation structures to the institution's appropriate federal regulator. Final rules are still pending.

Loans to One Borrower

With certain limited exceptions, the maximum amount that a California bank may lend to any borrower at any one time (including the obligations to the bank of certain related entities of the borrower) may not exceed 25 percent (and unsecured loans may not exceed 15 percent) of the bank's stockholders' equity, allowance for loan losses, and any capital notes and debentures of the bank. The Bank has established internal loan limits which are lower than the legal lending limits for U.S. banks.

Extensions of Credit to Insiders and Transactions with Affiliates

Both the FRA and FRB Regulation O place limitations and conditions on loans or extensions of credit ("Regulation O Loans") to:

- a bank or bank holding company's executive officers, directors and principal stockholders (i.e., in most cases, those persons who own, control or have power to vote more than 10 percent of any class of voting securities);
- any company controlled by any such executive officer, director or stockholder; or
- any political or campaign committee controlled by such executive officer, director or principal stockholder.

Regulation O Loans:

- must comply with loan-to-one-borrower limits;
- require prior full board approval when aggregate extensions of credit to the person exceed specified amounts;
- must be made on substantially the same terms (including interest rates and collateral) and follow credit-underwriting procedures no less stringent than those prevailing at the time for comparable transactions with non-insiders;
- must not involve more than the normal risk of repayment or present other unfavorable features; and
- in the aggregate limit not exceed the bank's unimpaired capital and unimpaired surplus.

Both California law and regulations promulgated by the DBO adopt and apply the provisions of Regulation O to the Bank.

The Bank is also subject to certain restrictions imposed by Sections 23A and 23B of the FRA, as amended by Dodd-Frank, and FRB Regulation W, which restrict or limit loans or any extensions of credit to, or on behalf of, any affiliates or purchases of assets from affiliates, except pursuant to certain limits and exceptions and only on terms and conditions at least as favorable as those prevailing for comparable transactions with unaffiliated parties. Affiliates include parent holding companies, sister banks, sponsored and advised companies, financial subsidiaries and investment companies where the Bank's affiliate serves as investment advisor.

Additional restrictions on transactions with affiliates may be imposed on the Bank under the FDIA's prompt corrective action regulations and the supervisory authority of the federal and state banking agencies discussed above.

Dividends

Hanmi Financial receives income through dividends paid by the Bank. The Bank is subject to various statutory and regulatory restrictions on its ability to pay dividends. The FRB has advised bank holding companies that it believes that payment of cash dividends in excess of current earnings from operations is inappropriate and may be cause for supervisory action. It is FRB policy that bank holding companies should generally pay dividends on common stock only out of income available over the past year, and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. It is also FRB policy that bank holding companies should not maintain dividend levels that undermine the company's ability to be a source of strength to its banking subsidiaries. Additionally, in consideration of the current financial and economic environment, the FRB has stated that bank holding companies should carefully review their dividend policy and has discouraged payment ratios that are at maximum allowable levels unless both asset quality and capital are very strong.

In addition, the banking agencies have the authority to prohibit or limit the Bank from paying dividends, depending upon the Bank's financial condition, if such payment is deemed to constitute an unsafe or unsound practice. Furthermore, under the federal prompt corrective action regulations, the FRB or FDIC may prohibit a bank holding company from paying any dividends if the holding company's bank subsidiary is classified as "undercapitalized." For more information on capitalization, see "Capital Adequacy Requirements" above.

Any cash dividend from the Bank to its holding company is subject to the California Financial Code, which restricts the amount available for cash dividends to the lesser of a bank's retained earnings or net income for its last three fiscal years (less any distributions to stockholders made during such period). Where the above test is not met, cash dividends may still be paid, with the prior approval of the DBO, within specified parameters.

The ability of Hanmi Financial to pay dividends to its stockholders is also directly dependent on the ability of the Bank to pay dividends to us. Section 642 of the California Financial Code provides that neither a California state-chartered bank nor a majority-owned subsidiary of a bank can pay dividends to its stockholders in an amount which exceeds the lesser of (i) the retained earnings of the bank or (ii) the net income of the bank for its last three fiscal years, in each case less the amount of any previous distributions made during such period. FRB Regulation H Section 208.5 provides that the Bank must obtain FRB approval to declare and pay a dividend if the total of all dividends declared during the calendar year, including the proposed dividend, exceeds the sum of the Bank's net income during the current calendar year and the retained net income of the prior two calendar years.

California Financial Code Section 643 provides, alternatively, that, notwithstanding the foregoing restriction set forth in Section 642, dividends in an amount not exceeding the greatest of (i) the retained earnings of the bank, (ii) the net income of the bank for its last fiscal year or (iii) the net income of the bank for its current fiscal year may be declared with the prior approval of the California Commissioner of Business Oversight.

Bank Secrecy Act and USA PATRIOT Act

The Bank Secrecy Act ("BSA") is a disclosure law that forms the basis of the federal government's framework to prevent and detect money laundering and to deter other criminal enterprises. Under the BSA, financial institutions such as the Bank are required to maintain certain records and file certain reports regarding domestic currency transactions and cross-border transportations of currency. Among other requirements, the BSA requires financial institutions to report imports and exports of currency in the amount of \$10,000 or more and, in general, all cash transactions of \$10,000 or more. The Bank has established a BSA compliance policy under which, among other precautions, the Bank keeps currency transaction reports to document cash transactions in excess of \$10,000 or in multiples totaling more than \$10,000 during one business day, monitors certain potentially suspicious transactions such as the exchange of a large number of small denomination bills for large denomination bills, and scrutinizes electronic funds transfers for BSA compliance. The BSA also requires that financial institutions report to relevant law enforcement agencies any suspicious transactions potentially involving violations of law.

The USA PATRIOT Act of 2001 (the "Patriot Act") and the regulations promulgated under it significantly expanded the anti-money laundering and financial transparency laws. The Patriot Act contains significant record keeping and customer identity requirements, expands the government's powers to freeze or confiscate assets and increases the available penalties that may be assessed against financial institutions for violation of the requirements of the Patriot Act intended to detect and deter money laundering. The Bank has adopted additional comprehensive policies and procedures to address the requirements of the Patriot Act.

Consumer Laws

The Bank must comply with numerous consumer protection statutes and regulations, including the Consumer Financial Protection Act of 2010, the Fair Credit Reporting Act, as amended by the Fair and Accurate Credit Transactions Act, the Equal Credit

Opportunity Act, the Truth in Lending Act, the Fair Housing Act, the Home Mortgage Disclosure Act, the Real Estate Settlement Procedures Act, the National Flood Insurance Act, the Americans with Disabilities Act, statutes and regulations regarding unfair, deceptive or abusive acts or practices, and various federal and state privacy protection laws. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans, collecting loans, and providing other services. Failure to comply with these laws and regulations can subject the Bank to various penalties, including, but not limited to, enforcement actions, injunctions, fines or criminal penalties, punitive damages to consumers, and the loss of certain contractual rights.

Dodd-Frank provides for the creation of the CFPB as an independent entity within the Federal Reserve. The CFPB is a new regulatory agency for United States banks. It will have broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards, and contains provisions on mortgage-related matters such as steering incentives, determinations as to a borrower's ability to repay and prepayment penalties. The CFPB's functions include investigating consumer complaints, conducting market research, rulemaking, supervising and examining banks' consumer transactions, and enforcing rules related to consumer financial products and services. Banks with less than \$10 billion in assets will continue to be examined for consumer financial protection compliance by their primary federal banking agency.

Regulation of Subsidiaries

Non-bank subsidiaries are subject to additional or separate regulation and supervision by other state, federal and self-regulatory bodies. Chun-Ha and All World are subject to the licensing and supervisory authority of the California Commissioner of Insurance.

Item 1A. Risk Factors

You should carefully consider the risks and uncertainties described below, together with the information included elsewhere in this Annual Report on Form 10-K (this "Report") and other documents we filed with the SEC. The following risks and uncertainties described below are those that we have identified as material. Events or circumstances arising from one or more of these risks could adversely affect our business, financial condition, operating results and prospects and the value and price of our common stock could decline. The risks identified below are not intended to be a comprehensive list of all risks we face. Additional risks and uncertainties not presently known to us, or that we may currently view as not material, may also adversely impact our financial condition, business operations and results of operations.

Risks Relating to our Business

Unfavorable economic and market conditions could continue to adversely affect our industry. Declines in the housing market, with decreasing home prices and increasing delinquencies and foreclosures, have negatively impacted the credit performance of mortgage and construction loans and resulted in significant write-downs of assets by many financial institutions. Unfavorable economic developments beginning in 2008 have negatively impacted the credit performance of commercial and consumer credit, resulting in additional write-downs. These write-downs have caused many financial institutions to seek additional capital, to merge with larger and stronger institutions and, in some cases, to fail. The impact on the Bank's credit quality has stabilized; however, there is a risk that economic conditions will deteriorate. Further economic deterioration could exacerbate the adverse effects of the difficult market conditions on us and others in the financial institutions industry. Particularly, we may face the following risks in connection with these events:

- We potentially face increased regulation of our industry. Compliance with such regulation may increase our costs and limit our ability to pursue business opportunities.
- The process we use to estimate losses inherent in our credit exposure requires difficult, subjective and complex judgments, including forecasts of economic conditions and how these economic conditions might impair the ability of our borrowers to repay their loans. The level of uncertainty concerning economic conditions may adversely affect the accuracy of our estimates, which may, in turn, impact the reliability of the process.
- Our liquidity could be negatively impacted by an inability to access the capital markets, unforeseen or extraordinary demands on cash, or regulatory restrictions.

Our Southern California business focus and economic conditions in Southern California could adversely affect our operations. The Bank's operations are located primarily in Los Angeles County and Orange County in Southern California. Because of this geographic concentration, our results depend largely upon economic conditions in these areas. A further deterioration in the economic conditions or a prolonged delay in economic recovery in the Bank's market areas, or a significant natural or man-made disaster in these market areas, could have a material adverse effect on the quality of the Bank's loan portfolio, the demand for its products and services and on its overall financial condition and results of operations.

Our concentration in loans collateralized by commercial real estate property located primarily in Southern California could have adverse effects on credit quality. As of December 31, 2013, the Bank's loan portfolio included commercial property, construction, and commercial and industrial loans, which were collateralized by commercial real estate properties located primarily in Southern California, totaling \$1.98 billion, or 88.6 percent of total gross loans. Because of this concentration, a potential deterioration of the commercial real estate market in Southern California could affect the ability of borrowers, guarantors and related parties to perform in accordance with the terms of their loans. Among the factors that could contribute to such a potential decline are general economic conditions in Southern California, interest rates and local market construction and sales activity.

Our concentrations of loans in certain industries could have adverse effects on credit quality. As of December 31, 2013, the Bank's loan portfolio included loans to: (i) lessors of non-residential buildings totaling \$615.0 million, or 27.5 percent of total gross loans; (ii) borrowers in the accommodation industry totaling \$332.1 million, or 14.9 percent of total gross loans; and (iii) gas stations totaling \$304.6 million, or 13.6 percent of total gross loans. Most of these loans are in Southern California. Because of these concentrations of loans in specific industries, a continued deterioration of the Southern California economy overall, and specifically within these industries, could affect the ability of borrowers, guarantors and related parties to perform in accordance with the terms of their loans, which could have material and adverse consequences for the Bank.

Our focus on lending to small to mid-sized community-based businesses may increase our credit risk. Most of our commercial business and commercial real estate loans are made to small or middle market businesses. These businesses generally have fewer financial resources in terms of capital or borrowing capacity than larger entities and have a heightened vulnerability to economic conditions. If general economic conditions in the markets in which we operate negatively impact this important customer sector, our results of operations and financial condition and the value of our common stock may be adversely affected. Moreover, a portion of these loans have been made by us in recent years and the borrowers may not have experienced a complete business or economic cycle. Furthermore, the deterioration of our borrowers' businesses may hinder their ability to repay their loans with us, which could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

Our use of appraisals in deciding whether to make loans secured by real property does not ensure that the value of the real property collateral will be sufficient to repay our loans. In considering whether to make a loan secured by real property, we require an appraisal of the property. However, an appraisal is only an estimate of the value of the property at the time the appraisal is made and requires the exercise of a considerable degree of judgment and adherence to professional standards. If the appraisal does not reflect the amount that may be obtained upon sale or foreclosure of the property, whether due to declines in property values after the date of the original appraisal or defective preparation, we may not realize an amount equal to the indebtedness secured by the property and may suffer losses.

Changes in economic conditions could materially hurt our business. Our business is directly affected by changes in economic conditions, including financial, legislative and regulatory changes and changes in government monetary and fiscal policies and inflation, all of which are beyond our control. The economic conditions in the markets in which many of our borrowers operate have deteriorated and the levels of loan delinquency and defaults that we experienced were substantially higher than historical levels.

If economic conditions deteriorate, it may exacerbate the following consequences:

- problem assets and foreclosures may increase;
- demand for our products and services may decline;
- low cost or non-interest bearing deposits may decrease; and
- collateral for loans made by us, especially real estate, may decline in value.

If a significant number of borrowers, guarantors or related parties fail to perform as required by the terms of their loans, we could sustain losses. A significant source of risk arises from the possibility that losses will be sustained because borrowers, guarantors or related parties may fail to perform in accordance with the terms of their loans. We have adopted underwriting and credit monitoring procedures and credit policies, including the establishment and review of the allowance for loan losses, that management believe are appropriate to limit this risk by assessing the likelihood of non-performance, tracking loan performance and diversifying our credit portfolio.

Our loan portfolio is predominantly secured by real estate and thus we have a higher degree of risk from a downturn in our real estate markets. A downturn in the real estate markets could hurt our business because many of our loans are secured by real estate. Real estate values and real estate markets are generally affected by changes in national, regional or local economic conditions, fluctuations in interest rates and the availability of loans to potential purchasers, changes in tax laws and other governmental statutes, regulations and policies, and acts of nature, such as earthquakes and national disasters particular to California. Substantially all of our real estate collateral is located in California. If real estate values continue to decline, the value of real estate collateral securing our loans could be significantly reduced. Our ability to recover on defaulted loans by foreclosing and selling the real estate collateral would then be diminished, and we would be more likely to suffer material losses on defaulted loans.

We are exposed to risk of environmental liabilities with respect to properties to which we take title. In the course of our business, we may foreclose and take title to real estate, and could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean up hazardous or toxic substances, or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. If we become subject to significant environmental liabilities, our business, financial condition, results of operations and prospects could be materially and adversely affected.

Our allowance for loan losses may not be adequate to cover actual losses. A significant source of risk arises from the possibility that we could sustain losses because borrowers, guarantors and related parties may fail to perform in accordance with the terms of their loans. The underwriting and credit monitoring policies and procedures that we have adopted to address this risk may not prevent unexpected losses that could have a material adverse effect on our business, financial condition, results of operations and cash flows. We maintain an allowance for loan losses to provide for loan defaults and non-performance. The allowance is also increased for new loan growth. While we believe that our allowance for loan losses is adequate to cover inherent losses, we cannot assure you that we will not increase the allowance for loan losses further or that our regulators will not require us to increase this allowance.

Our earnings are affected by changing interest rates. Changes in interest rates affect the level of loans, deposits and investments, the credit profile of existing loans, the rates received on loans and securities and the rates paid on deposits and borrowings. Significant fluctuations in interest rates may have a material adverse effect on our financial condition and results of operations. The current historically low interest rate environment caused by the response to the financial market crisis and the global economic recession may affect our operating earnings negatively.

Liquidity risk could impair our ability to fund operations and jeopardize our financial condition. Liquidity is essential to our business. An inability to raise funds through deposits, including brokered deposits, borrowings, the sale of loans and other sources could have a material adverse effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us.

Our ability to acquire deposits or borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole as a result of the recent turmoil faced by banking organizations in the domestic and worldwide credit markets.

We are subject to government regulations that could limit or restrict our activities, which in turn could adversely affect our operations. The financial services industry is subject to extensive federal and state supervision and regulation. Significant new laws, including the enactment of Dodd-Frank, changes in existing laws, or repeals of existing laws, may cause our results to differ materially from historical and projected performance. Further, federal monetary policy, particularly as implemented through the Federal Reserve, significantly affects credit conditions, and a material change in these conditions could have a material adverse impact on our financial condition and results of operations.

Additional requirements imposed by Dodd-Frank and other regulations could adversely affect us. Dodd-Frank and related regulations subject us and other financial institutions to more restrictions, oversight, reporting obligations and costs. In addition, this increased regulation of the financial services industry restricts the ability of institutions within the industry to conduct business consistent with historical practices, including aspects such as compensation, interest rates, new and inconsistent consumer protection regulations and mortgage regulation, among others. Federal and state regulatory agencies also frequently adopt changes to their regulations or change the manner in which existing regulations are applied.

Current and future legal and regulatory requirements, restrictions and regulations, including those imposed under Dodd-Frank, may adversely impact our business, financial condition, and results of operations, may require us to invest significant management attention and resources to evaluate and make any changes required by the legislation and accompanying rules, and may make it more difficult for us to attract and retain qualified executive officers and employees.

The Consumer Financial Protection Bureau. Dodd-Frank created the CFPB within the Federal Reserve. The CFPB is tasked with establishing and implementing rules and regulations under certain federal consumer protection laws with respect to the conduct of providers of certain consumer financial products and services. The CFPB has rulemaking authority over many of the

statutes governing products and services offered to bank consumers. In addition, Dodd-Frank permits states to adopt consumer protection laws and regulations that are more stringent than those regulations promulgated by the CFPB, and state attorneys general are permitted to enforce consumer protection rules adopted by the CFPB against state-chartered institutions, including the Bank.

The FDIC's restoration plan and the related increased assessment rate could adversely affect our earnings. As required by Dodd-Frank, the FDIC adopted a new DIF restoration plan which became effective on January 1, 2011. Among other things, the plan (i) raises the minimum designated reserve ratio, which the FDIC is required to set each year, to 1.35 percent (from the former minimum of 1.15 percent) and removes the upper limit on the designated reserve ratio (which was formerly capped at 1.5 percent) and consequently on the size of the fund, and (ii) requires that the fund reserve ratio reach 1.35 percent by September 30, 2020 (rather than 1.15 percent by the end of 2016, as formerly required). The FDIA continues to require that the FDIC's Board of Directors consider the appropriate level for the designated reserve ratio annually and, if changing the designated reserve ratio, engage in notice-and-comment rulemaking before the beginning of the calendar year. The FDIC has set a long-term goal of getting its reserve ratio up to 2 percent of insured deposits by 2027.

The amount of premiums that we are required to pay for FDIC insurance is generally beyond our control. If there are additional bank or financial institution failures or if the FDIC otherwise determines, we may be required to pay even higher FDIC premiums than the recently increased levels. These increases and any future increases in FDIC insurance premiums may have a material and adverse effect on our earnings and could have a material adverse effect on the value of, or market for, our common stock.

The impact of the new Basel III capital standards will likely impose enhanced capital adequacy standards on us. In June 2013, federal banking regulators jointly issued the Basel III Rules. The rules impose new capital requirements and implement Section 171 of Dodd-Frank. The new rules are to be phased in through 2019, beginning January 1, 2015. Among other things, the rules will require that we maintain a common equity Tier 1 capital ratio of 4.5%, a Tier 1 capital ratio of 6%, a total capital ratio of 8%, and a leverage ratio of 4%. In addition, we will have to maintain an additional capital conservation buffer of 2.5% of total risk weighted assets or be subject to limitations on dividends and other capital distributions, as well as limiting discretionary bonus payments to executive officers. The new rules also restrict trust preferred securities from comprising more than 25% of Tier 1 capital. If an institution grows above \$15 billion as a result of an acquisition, or organically grows above \$15 billion and then makes an acquisition, the combined trust preferred issuances would be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016). The application of more stringent capital requirements could, among other things, result in lower returns on invested capital and result in regulatory actions if we were to be unable to comply with such requirements.

Competition may adversely affect our performance. The banking and financial services businesses in our market areas are highly competitive. We face competition in attracting deposits, making loans, and attracting and retaining employees, particularly in the Korean-American community. The increasingly competitive environment is a result of changes in regulation, changes in technology and product delivery systems, new competitors in the market, and the pace of consolidation among financial services providers. Our results in the future may be materially and adversely impacted depending upon the nature and level of competition.

The soundness of other financial institutions could adversely affect us. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the financial instrument exposure due us. Any such losses could have a material adverse effect on our financial condition and results of operations.

We could be liable for breaches of security in our online banking services. Fear of security breaches could limit the growth of our online services. We offer various Internet-based services to our clients, including online banking services. The secure transmission of confidential information over the Internet is essential to maintain our clients' confidence in our online services. Advances in computer capabilities, new discoveries or other developments could result in a compromise or breach of the technology we use to protect client transaction data. Although we have developed systems and processes that are designed to prevent security breaches and periodically test our security, failure to mitigate breaches of security could adversely affect our ability to offer and grow our online services and could harm our business.

Our information systems may experience an interruption or security breach. We rely heavily on communications and information systems to conduct our business. We, our customers, and other financial institutions with which we interact, are subject to ongoing, continuous attempts to penetrate key systems by individual hackers, organized criminals, and in some cases, state-sponsored organizations. Any failure, interruption or breach in security of these systems could result in failures or disruptions in our customer relationship management, general ledger, deposit, loan and other systems, misappropriation of funds, and theft of proprietary Company, Bank or customer data. While we have policies and procedures designed to prevent or limit the effect of the possible failure, interruption or security breach of our information systems, there can be no assurance that any such failure, interruption or security

breach will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failure, interruption or security breach of our information systems could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability.

We are subject to operational risks relating to our technology and information systems. The continued efficacy of our technology and information systems, related operational infrastructure and relationships with third party vendors in our ongoing operations is integral to our performance. Failure of any of these resources, including but not limited to operational or systems failures, interruptions of client service operations and ineffectiveness of or interruption in third party data processing or other vendor support, may cause material disruptions in our business, impairment of customer relations and exposure to liability for our customers, as well as action by bank regulatory authorities.

Negative publicity could damage our reputation. Reputation risk, or the risk to our earnings and capital from negative publicity or public opinion, is inherent in our business. Negative publicity or public opinion could adversely affect our ability to keep and attract customers and expose us to adverse legal and regulatory consequences. Negative public opinion could result from our actual or perceived conduct in any number of activities, including lending practices, corporate governance, regulatory compliance, mergers and acquisitions, and disclosure, sharing or inadequate protection of customer information, and from actions taken by government regulators and community organizations in response to that conduct.

We are dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect our prospects. Our success depends in large part on our ability to attract key people who are qualified and have knowledge and experience in the banking industry in our markets and to retain those people to successfully implement our business objectives. Competition for qualified employees and personnel in the banking industry is intense, particularly for qualified persons with knowledge of, and experience in, our banking space. The process of recruiting personnel with the combination of skills and attributes required to carry out our strategies is often lengthy. In addition, legislation and regulations which impose restrictions on executive compensation may make it more difficult for us to retain and recruit key personnel. Our success depends to a significant degree upon our ability to attract and retain qualified management, loan origination, finance, administrative, marketing and technical personnel and upon the continued contributions of our management and employees. The unexpected loss of services of one or more of our key personnel or failure to attract or retain such employees could have a material adverse effect on our financial condition and results of operations.

If we fail to maintain an effective system of internal controls and disclosure controls and procedures, we may not be able to accurately report our financial results or prevent fraud. Effective internal controls and disclosure controls and procedures are necessary for us to provide reliable financial reports and disclosures to stockholders, to prevent fraud and to operate successfully as a public company. If we cannot provide reliable financial reports and disclosures or prevent fraud, our business may be adversely affected and our reputation and operating results would be harmed. Any failure to develop or maintain effective internal controls and disclosure controls and procedures or difficulties encountered in their implementation may also result in regulatory enforcement action against us, adversely affect our operating results or cause us to fail to meet our reporting obligations.

Changes in accounting standards may affect how we record and report our financial condition and results of operations. Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. From time to time, the Financial Accounting Standards Board and SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes and their impacts on us can be hard to predict and may result in unexpected and materially adverse impacts on our reported financial condition and results of operations.

We are required to assess the recoverability of our deferred tax assets on an ongoing basis. Deferred tax assets are evaluated on a quarterly basis to determine if they are expected to be recoverable in the future. Our evaluation considers positive and negative evidence to assess whether it is more likely than not that a portion of the asset will not be realized. Future negative operating performance or other negative evidence may result in a valuation allowance being recorded against some or the entire amount.

We may become subject to regulatory restrictions in the event that our capital levels decline. We cannot provide any assurance that our total risk-based capital ratio or other capital ratios will not decline in the future such that the Bank may be considered to be “undercapitalized” for regulatory purposes. If a state member bank, like the Bank, is classified as undercapitalized, the bank is required to submit a capital restoration plan to the FRB. Pursuant to the Federal Deposit Insurance Corporation Improvement Act (the “FDICIA”), an undercapitalized bank is prohibited from increasing its assets, engaging in a new line of business, acquiring any interest in any company or insured depository institution, or opening or acquiring a new branch office, except under certain circumstances, including the acceptance by the FRB of a capital restoration plan for the bank. Pursuant to Section 38 of the FDIA and Federal Reserve Regulation H, the FRB also has the discretion to impose certain other corrective actions.

If a bank is classified as significantly undercapitalized, the FRB would be required to take one or more prompt corrective actions. These actions would include, among other things, requiring sales of new securities to bolster capital; improvements in

management; limits on interest rates paid; prohibitions on transactions with affiliates; termination of certain risky activities and restrictions on compensation paid to executive officers. These actions may also be taken by the FRB at any time on an undercapitalized bank if it determines those restrictions are necessary. If a bank is classified as critically undercapitalized, in addition to the foregoing restrictions, the FDICIA prohibits payment on any subordinated debt and requires the bank to be placed into conservatorship or receivership within 90 days, unless the FRB determines that other action would better achieve the purposes of the FDICIA regarding prompt corrective action with respect to undercapitalized banks.

As we expand outside our California markets, we may encounter additional risks that may adversely affect us. Currently, the majority of our offices are located in Southern California, but we also have two branches in Northern California and two LPOs in Washington and Texas. Over time, we may also seek to establish offices to serve Korean-American communities in other parts of the United States. In the course of these expansion activities, we may encounter significant risks, including unfamiliarity with the characteristics and business dynamics of new markets, increased marketing and administrative expenses and operational difficulties arising from our efforts to attract business in new markets, manage operations in noncontiguous geographic markets, comply with local laws and regulations and effectively and consistently manage our non-California personnel and business. If we are unable to manage these risks, our operations may be adversely affected.

Changing conditions in South Korea could adversely affect our business. A substantial number of our customers have economic and cultural ties to South Korea and, as a result, we are likely to feel the effects of adverse economic and political conditions in South Korea. U.S. and global economic policies, political or political tension, and global economic conditions may adversely impact the South Korean economy.

Management closely monitors our exposure to the South Korean economy and, to date, we have not experienced any significant loss attributable to our exposure to South Korea. Nevertheless, our efforts to minimize exposure to downturns in the South Korean economy may not be successful in the future, and a significant downturn in the South Korean economy could possibly have a material adverse effect on our financial condition and results of operations. If economic conditions in South Korea change, we could experience an outflow of deposits by those of our customers with connections to South Korea and a significant decrease in deposits could have a material adverse effect on our financial condition and results of operations.

We are exposed to the risks of natural disasters. A significant portion of our operations is concentrated in Southern California. California is in an earthquake-prone region. A major earthquake may result in material loss to us. A significant percentage of our loans are and will be secured by real estate. Many of our borrowers may suffer uninsured property damage, experience interruption of their businesses or lose their jobs after an earthquake. Those borrowers might not be able to repay their loans, and the collateral for such loans may decline significantly in value. Unlike a bank with operations that are more geographically diversified, we are vulnerable to greater losses if an earthquake, fire, flood or other natural catastrophe occurs in Southern California.

We may experience adverse effects from acquisitions. We have acquired other banking companies in the past and consider additional acquisitions as opportunities arise. If we do not adequately address the financial and operational risks associated with acquisitions of other companies, including in connection with our pending acquisition of CBI, described in greater detail in this section under the subsection captioned “Risks Relating to the CBI Merger” and elsewhere in this Report, we may incur material unexpected costs and disruption of our business. Risks involved in acquisitions of other companies include:

- the risk of failure to adequately evaluate the asset quality of the acquired company;
- difficulty in assimilating the operations, technology and personnel of the acquired company;
- diversion of management’s attention from other important business activities;
- difficulty in maintaining good relations with the loan and deposit customers of the acquired company;
- inability to maintain uniform standards, controls, procedures and policies, especially considering geographic diversification;
- potentially dilutive issuances of equity securities or the incurrence of debt and contingent liabilities; and
- amortization of expenses related to acquired intangible assets that have finite lives.

Risks Relating to Ownership of Our Common Stock

The Bank could be restricted from paying dividends to us, its sole shareholder, and, thus, we would be restricted from paying dividends to our stockholders in the future. The primary source of our income from which we pay our obligations and distribute dividends to our stockholders is from the receipt of dividends from the Bank. The availability of dividends from the Bank is limited by various statutes and regulations. The Bank has a retained deficit of \$79.7 million as of December 31, 2013 and suffered net losses in 2010, 2009 and 2008, largely caused by provision for credit losses and goodwill impairments. As a result, the California Financial Code does not provide authority for the Bank to declare a dividend to us, with or without approval of the Commissioner of Business Oversight.

The price of our common stock may be volatile or may decline. The trading price of our common stock may fluctuate significantly due to a number of factors, many of which are outside our control. In addition, the stock market is subject to fluctuations in the share prices and trading volumes that affect the market prices of the shares of many companies. These broad market fluctuations could adversely affect the market price of our common stock. Among the factors that could affect our stock price are:

- actual or anticipated quarterly fluctuations in our operating results and financial condition;
- changes in revenue or earnings estimates or publication of research reports and recommendations by financial analysts;
- failure to meet analysts' revenue or earnings estimates;
- speculation in the press or investment community;
- strategic actions by us or our competitors, such as acquisitions or restructurings;
- actions by institutional stockholders;
- fluctuations in the stock price and operating results of our competitors;
- general market conditions and, in particular, developments related to market conditions for the financial services industry;
- proposed or adopted legislative or regulatory changes or developments;
- anticipated or pending investigations, proceedings or litigation that involve or affect us; or
- domestic and international economic factors unrelated to our performance.

The stock market and, in particular, the market for financial institution stocks, has experienced significant volatility. As a result, the market price of our common stock may be volatile. In addition, the trading volume in our common stock may fluctuate more than usual and cause significant price variations to occur. The trading price of the shares of our common stock will depend on many factors, which may change from time to time, including, without limitation, our financial condition, performance, creditworthiness and prospects, future sales of our equity or equity-related securities, and other factors identified above in the section captioned "Cautionary Note Regarding Forward-Looking Statements." A significant decline in our stock price could result in substantial losses for individual stockholders and could lead to costly and disruptive securities litigation and potential delisting from NASDAQ.

Your share ownership may be diluted by the issuance of additional shares of our common stock in the future. Your share ownership may be diluted by the issuance of additional shares of our common stock in the future. We may decide to raise additional funds through public or private debt or equity financings for a number of reasons, including in response to regulatory or other requirements to meet our liquidity and capital needs, to finance our operations and business strategy or for other reasons. If we raise funds by issuing equity securities or instruments that are convertible into equity securities, the percentage ownership of our existing stockholders will further be reduced, the new equity securities may have rights, preferences and privileges superior to those of our common stock, and the market of our common stock could decline.

In addition, we have adopted a stock option plan that provides for the granting of stock options to our directors, executive officers and other employees. As of December 31, 2013, 1,078,668 shares of our common stock were issuable under options granted in connection with our stock option plans and stock warrants issued in connection with the registered rights and best efforts offerings. It is probable that the stock options will be exercised during their respective terms if the fair market value of our common stock exceeds the exercise price of the particular option. If the stock options are exercised, your share ownership will be diluted.

Furthermore, as of December 31, 2013, our Amended and Restated Certificate of Incorporation authorizes the issuance of up to 62,500,000 shares of common stock. Our Amended and Restated Certificate of Incorporation does not provide for preemptive rights to the holders of our common stock. Any authorized but unissued shares are available for issuance by our Board of Directors. As a result, if we issue additional shares of common stock to raise additional capital or for other corporate purposes, you may be unable to maintain your pro rata ownership in the Company.

Future sales of common stock by existing stockholders may have an adverse impact on the market price of our common stock. Sales of a substantial number of shares of our common stock in the public market by existing stockholders, or the perception that large sales could occur, could cause the market price of our common stock to decline or limit our future ability to raise capital through an offering of equity securities.

Anti-takeover provisions and state and federal law may limit the ability of another party to acquire us, which could cause our stock price to decline. Various provisions of our Amended and Restated Certificate of Incorporation and By-laws could delay or prevent a third-party from acquiring us, even if doing so might be beneficial to our stockholders. These provisions provide for, among other things, supermajority voting approval for certain actions, limitation on large stockholders taking certain actions and authorization to issue “blank check” preferred stock by action of the Board of Directors acting alone without obtaining stockholder approval. In addition, the BHCA and the Change in Bank Control Act of 1978, as amended, together with applicable federal regulations, require that, depending on the particular circumstances, either FRB approval must be obtained or notice must be furnished to FRB and not disapproved prior to any person or entity acquiring “control” of a state member bank, such as the Bank. These provisions may prevent a merger or acquisition that would be attractive to stockholders and could limit the price investors would be willing to pay in the future for our common stock.

Risks Relating to the Pending CBI Merger

We may be not be able to realize the anticipated benefits of the CBI Merger, including estimated cost savings and synergies, or it may take longer than anticipated to achieve such benefits. The realization of the benefits anticipated as a result of the CBI Merger, including cost savings and synergies, will depend in part on the integration of CBI’s operations with our operations. Hanmi Financial and CBI have operated and, until the consummation of the CBI Merger, will continue to operate independently. To realize the anticipated benefits and cost savings, after the completion of the CBI Merger, we expect to integrate CBI’s business into our own. There can be no assurance that CBI’s operations can be integrated successfully into our operations in a timely fashion, or at all. The dedication of management and other internal resources to such integration may divert attention from our day-to-day business, and there can be no assurance that there will not be substantial costs associated with the transition process or that there will not be other material adverse effects as a result of these integration efforts. Such effects, including, but not limited to, incurring unexpected costs or delays in connection with such integration, may have a material adverse effect on our financial results.

Required regulatory approvals may not be received, may take longer to receive than expected or may impose conditions that are materially burdensome or cannot be met. Before the transactions contemplated by the Merger Agreement, including both the CBI Merger and the Bank Merger, may be completed, various approvals must be obtained from our and the Bank’s regulatory authorities. The parties currently anticipate that the requisite applications will be submitted after the financial information for the first quarter of 2014 becomes available. Other approvals, waivers or consents from regulators may also be required. In determining whether to grant these approvals, the regulators consider a variety of factors, including the regulatory standing of the parties to the Merger Agreement. Poor regulatory standing or an adverse development in such standing or other factors could result in an inability to obtain approval or delay their receipt. UCB is the subject of a consent order by the Texas Department of Banking (the “TDB”) and the FDIC. CBI is party to a written agreement with the Federal Reserve and the banking commissioner of the TDB. Regulators may impose conditions on the completion of the CBI Merger or the Bank Merger which we may not be able to meet or require changes to the terms of the proposed merger. Such conditions or changes could have the effect of delaying or preventing completion of the CBI Merger as currently contemplated or imposing additional costs on or limiting the revenues of the combined company following the CBI Merger, any of which might have an adverse effect on the combined company following the completion of the CBI Merger.

We will be subject to business uncertainties and contractual restrictions while the CBI Merger is pending. Uncertainty about the effect of the CBI Merger on employees, suppliers, vendors, and customers (including depositors and borrowers) may have an adverse effect on both Hanmi Financial and CBI. These uncertainties may impair our ability to attract, retain or motivate key personnel until the CBI Merger is completed and may cause customers and others that transact business with us or CBI to seek to change existing business relationships with either us and/or CBI. If key employees depart because of issues relating to the uncertainty and difficulty of integration or a desire not to remain with the business, the combined company’s business following the CBI Merger may be negatively affected. Additionally, these uncertainties could cause suppliers, vendors, and customers (including depositors and borrowers) and others who deal with us to seek to change existing business relationships with us or fail to extend an existing relationship with us. In addition, competitors may target our or CBI’s existing customers by highlighting potential uncertainties and integration difficulties that may result from the CBI Merger. In addition, the Merger Agreement restricts CBI from making certain acquisitions and taking other specified actions while the CBI Merger is pending, without the prior consent of Hanmi Financial.

If the CBI Merger is not consummated, we will not benefit from the expenses incurred in pursuing it. The Merger Agreement is subject to a number of conditions which must be fulfilled in order to complete the CBI Merger. The conditions to the consummation of the CBI Merger may not be fulfilled and, accordingly, the CBI Merger may not be completed. In addition, if the CBI Merger is not completed by the Drop Dead Date, either Hanmi Financial or CBI may choose not to proceed with the CBI Merger, and the parties can mutually decide to terminate the Merger Agreement at any time. Hanmi Financial has incurred and will incur substantial expenses, including in connection with the negotiation and completion of the transactions contemplated by the Merger Agreement as well as combining the business, operations, networks, systems, technologies, policies and procedures of CBI with ours. If the CBI Merger is not completed, we would have to recognize these expenses without realizing the expected benefits of the transactions contemplated by the Merger Agreement. Although we have assumed that a certain level of transaction and combination expenses would be incurred, there are a number of factors beyond our control that could affect the total amount or the timing of such

combination expenses. Many of the expenses that will be incurred, by their nature, are difficult to estimate accurately at the present time. Due to these factors, the transaction and combination expenses associated with the CBI Merger could, particularly in the near term, exceed the savings that we expect to achieve from the elimination of duplicative expenses and the realization of economies of scale and cost savings related to the combination of the businesses following the consummation of the CBI Merger. As a result of these expenses, we expect to take charges against our earnings before and after the completion of the CBI Merger. The charges taken in connection with the CBI Merger are expected to be significant, although the aggregate amount and timing of such charges, including investment banking, legal and accounting fees and other related charges, are uncertain at present.

Termination of the Merger Agreement may negatively affect us. If the Merger Agreement is terminated, we may suffer various adverse consequences, including:

- our business may have been adversely impacted by the failure to pursue other beneficial opportunities due to the focus of management on the CBI Merger, without realizing any of the anticipated benefits of completing the CBI Merger; and
- the market price of our common stock may decline to the extent that the market price prior to termination reflects a market assumption that the CBI Merger will be completed, in each case, without realizing any of the benefits of having completed the CBI Merger.

For a detailed description of the CBI Merger, see the section captioned “Pending CBI Merger.”

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Hanmi Financial's principal office is located at 3660 Wilshire Boulevard, Penthouse Suite A, Los Angeles, California.

The following table sets forth information about the Bank's branch offices as of December 31, 2013:

<u>Office</u>	<u>Address</u>	<u>City/State</u>	<u>Owned/ Leased</u>
Corporate Headquarters ⁽¹⁾	3660 Wilshire Boulevard, Penthouse Suite A	Los Angeles, CA	Leased
Branches:			
Beverly Hills Branch	9300 Wilshire Boulevard, Suite 101	Beverly Hills, CA	Leased
Cerritos – Artesia Branch	11754 East Artesia Boulevard	Artesia, CA	Leased
Cerritos – South Branch	11900 South Street, Suite 109	Cerritos, CA	Leased
Downtown – Los Angeles Branch	950 South Los Angeles Street	Los Angeles, CA	Leased
Diamond Bar Branch	1101 Brea Canyon Road, Suite A-1	Diamond Bar, CA	Leased
Fashion District Branch	726 East 12th Street, Suite 211	Los Angeles, CA	Leased
Fullerton – Beach Branch ⁽³⁾	5245 Beach Boulevard	Buena Park, CA	Leased
Garden Grove – Brookhurst Branch	9820 Garden Grove Boulevard	Garden Grove, CA	Owned
Garden Grove – Magnolia Branch	9122 Garden Grove Boulevard	Garden Grove, CA	Owned
Gardena Branch	2001 West Redondo Beach Boulevard	Gardena, CA	Leased
Irvine Branch	14474 Culver Drive, Suite D	Irvine, CA	Leased
Koreatown Galleria Branch	3250 West Olympic Boulevard, Suite 200	Los Angeles, CA	Leased
Koreatown Plaza Branch	928 South Western Avenue, Suite 260	Los Angeles, CA	Leased
Northridge Branch	10180 Reseda Boulevard	Northridge, CA	Leased
Olympic Branch ⁽²⁾	3737 West Olympic Boulevard	Los Angeles, CA	Owned
Olympic – Kingsley Branch	3099 West Olympic Boulevard	Los Angeles, CA	Owned

Dallas LPO ⁽¹⁾	11461 Harry Hines Boulevard, Suite 103	Dallas, TX	Leased
Chun-Ha/All World ⁽¹⁾	12912 Brookhurst Street, Suite 480	Garden Grove, CA	Leased
Chun-Ha ⁽¹⁾	3660 Wilshire Boulevard, Suite 528	Los Angeles, CA	Leased

⁽¹⁾ Deposits are not accepted at this facility.

⁽²⁾ Training Facility is also located at this facility.

⁽³⁾ Administrative offices are also located at this facility.

As of December 31, 2013, our consolidated investment in premises and equipment, net of accumulated depreciation and amortization, totaled \$14.2 million. Our lease expense was \$5.6 million for the year ended December 31, 2013. We consider our present facilities to be sufficient for our current operations.

Item 3. Legal Proceedings

Hanmi Financial and its subsidiaries are subject to lawsuits and claims that arise in the ordinary course of their businesses. Neither Hanmi Financial nor any of its subsidiaries is currently involved in any legal proceedings, the outcome of which we believe would have a material adverse effect on the business, financial condition or results of operations of Hanmi Financial or its subsidiaries.

Item 4. Mine Safety Disclosures

Not applicable.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

The following table sets forth, for the periods indicated, the high and low trading prices of Hanmi Financial's common stock for the last two years as reported on NASDAQ under the symbol "HAFC":

	<u>High</u>	<u>Low</u>	<u>Cash Dividend</u>
2013:			
Fourth quarter	\$22.40	\$16.59	\$ 0.07
Third quarter	\$18.05	\$16.01	\$ 0.07
Second quarter	\$17.67	\$15.20	\$ —
First quarter	\$17.27	\$14.10	\$ —
2012:			
Fourth quarter	\$13.62	\$11.77	\$ —
Third quarter	\$13.33	\$10.38	\$ —
Second quarter	\$10.68	\$ 9.17	\$ —
First quarter	\$10.59	\$ 7.72	\$ —

Holders

Hanmi Financial had 275 registered stockholders of record as of February 1, 2014.

Performance Graph

The following graph shows a comparison of stockholder return on Hanmi Financial's common stock with the cumulative total returns for: (i) the NASDAQ Composite® (U.S.) Index; (ii) the Standard and Poor's ("S&P") 500 Financials Index; and (iii) the SNL U.S. Bank \$1B-\$5B Index, which was compiled by SNL Financial LC of Charlottesville, Virginia. The graph assumes an initial investment of \$100 and reinvestment of dividends. The graph is historical only and may not be indicative of possible future performance. The performance graph shall not be deemed incorporated by reference to any general statement incorporating by reference this Annual Report on Form 10-K into any filing under the Act, or under the Exchange Act, except to the extent that we specifically incorporate this information by reference, and shall not otherwise be deemed filed under either the Act or the Exchange Act.

	As of December 31,					
	2008	2009	2010	2011	2012	2013
Hanmi Financial Corporation	\$100.00	\$ 58.25	\$ 55.83	\$ 44.90	\$ 82.46	\$132.83
NASDAQ Composite	\$100.00	\$143.89	\$168.22	\$165.19	\$191.47	\$264.84
S&P 500 Financials	\$100.00	\$114.80	\$127.24	\$103.82	\$131.07	\$174.60
SNL Bank \$1B-\$5B	\$100.00	\$ 69.65	\$ 77.28	\$ 69.01	\$ 83.24	\$118.87

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

During the fourth quarter of 2013, there were no repurchases of Hanmi Financial's equity securities by Hanmi Financial or its affiliates. As of December 31, 2013, there was no current plan authorizing purchases of Hanmi Financial's equity securities by Hanmi Financial or its affiliates.

Item 6. Selected Financial Data

The following table presents selected historical financial information, including per share information as adjusted for the stock dividends and stock splits declared by us. This selected historical financial data should be read in conjunction with our Consolidated Financial Statements and the Notes thereto appearing elsewhere in this Report and the information contained in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.” The selected historical financial data as of and for each of the years in the five-year period ended December 31, 2013 is derived from our audited financial statements. In the opinion of management, the information presented reflects all adjustments, including normal and recurring accruals, considered necessary for a fair presentation of the results of such periods.

	As of and for the Year Ended December 31,				
	2013	2012	2011	2010	2009
<i>(In thousands, except share and per share data)</i>					
Summary Statements of Operations:					
Interest and dividend income	\$ 122,328	\$ 119,800	\$ 128,807	\$ 144,512	\$ 184,147
Interest expense	13,507	18,745	27,630	38,638	82,918
Net interest income before provision for credit losses	108,821	101,055	101,177	105,874	101,229

⁽¹³⁾ Non-performing assets consist of non-performing loans and other real estate owned.

Non-GAAP Financial Measures

Return on Average Tangible Equity

Return on average tangible equity is supplemental financial information determined by a method other than in accordance with U.S. generally accepted accounting principles (“GAAP”). This non-GAAP measure is used by management in the analysis of Hanmi Financial’s performance. Average tangible equity is calculated by subtracting average goodwill and average other intangible assets from average stockholders’ equity. Banking and financial institution regulators also exclude goodwill and other intangible assets from stockholders’ equity when assessing the capital adequacy of a financial institution. Management believes the presentation of this financial measure excluding the impact of these items provides useful supplemental information that is essential to a proper understanding of the financial results of Hanmi Financial, as it provides a method to assess management’s success in utilizing tangible capital. This disclosure should not be viewed as a substitution for results determined in accordance with GAAP, nor is it necessarily comparable to non-GAAP performance measures that may be presented by other companies.

The following table reconciles this non-GAAP performance measure to the GAAP performance measure for the periods indicated:

	Year Ended December 31,				
	2013	2012	2011	2010	2009
	<i>(In thousands)</i>				
Average stockholders’ equity	\$393,734	\$328,016	\$200,517	\$137,968	\$225,708
Less average other intangible assets	(1,259)	(1,427)	(1,891)	(2,797)	(4,171)

Return on average tangible equity	10.17%	27.67%	14.17%	-65.11%	-55.19%

Tangible Book Value Per Share

Tangible book value per share is supplemental financial information determined by a method other than in accordance with GAAP. This non-GAAP measure is used by management in the analysis of Hanmi Financial’s performance. Tangible book value per share is calculated by subtracting goodwill and other intangible assets from stockholders’ equity and dividing the difference by the number of shares of common stock outstanding. Management believes the presentation of this financial measure excluding the impact of these items provides useful supplemental information that is essential to a proper understanding of the financial results of Hanmi Financial, as it provides a method to assess management’s success in utilizing tangible capital. This disclosure should not be viewed as a substitution for results determined in accordance with GAAP, nor is it necessarily comparable to non-GAAP performance measures that may be presented by other companies.

The following table reconciles this non-GAAP performance measure to the GAAP performance measure for the periods indicated:

	Year Ended December 31,				
	2013	2012	2011	2010	2009
	<i>(In thousands, except per share data)</i>				
Stockholders’ equity	\$401,237	\$378,364	\$285,608	\$173,256	\$149,744

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

This discussion presents management’s analysis of the financial condition and results of operations as of and for the years ended December 31, 2013, 2012 and 2011. This discussion should be read in conjunction with our Consolidated Financial Statements and the Notes related thereto presented elsewhere in this Report. See also “Cautionary Note Regarding Forward-Looking Statements.”

Critical Accounting Policies

We have established various accounting policies that govern the application of GAAP in the preparation of our Consolidated Financial Statements. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions to arrive at the carrying value of assets and liabilities and amounts reported for revenues and expenses. Our financial position and results of operations can be materially affected by these estimates and assumptions. Critical accounting policies are those policies that are most important to the determination of our financial condition and results of operations or that require management to make assumptions and estimates that are subjective or complex. Our significant accounting policies are discussed in the “Notes to Consolidated Financial Statements, Note 1 — Summary of Significant Accounting Policies.” Management believes that the following policies are critical.

Allowance for Loan Losses and Allowance for Off-Balance Sheet Items

Our allowance for loan losses methodologies incorporate a variety of risk considerations, both quantitative and qualitative, in establishing an allowance for loan losses that management believes is appropriate at each reporting date. Quantitative factors include our historical loss experiences on 14 segmented loan pools by type and risk rating, delinquency and charge-off trends, collateral values, changes in non-performing loans, and other factors. Qualitative factors include the general economic environment in our markets, delinquency and charge-off trends, and the change in non-performing loans. Concentration of credit, change of lending management and staff, quality of loan review system, and change in interest rates are other qualitative factors that are considered in our methodologies. See “Financial Condition — Allowance for Loan Losses and Allowance for Off-Balance Sheet Items,” “Results of Operations — Provision for Credit Losses” and “Notes to Consolidated Financial Statements, Note 1 — Summary of Significant Accounting Policies” for additional information on methodologies used to determine the allowance for loan losses and allowance for off-balance sheet items.

Loan Sales

The guaranteed portions of certain SBA Loans are normally sold to secondary market investors. When SBA Loans are sold, we generally retain the right to service the loans. We record a loan servicing asset when the benefits of servicing are expected to be more than adequate compensation to a servicer, which is determined by discounting all of the future net cash flows associated with the contractual rights and obligations of the servicing agreement. The expected future net cash flows are discounted at a rate equal to the return that would adequately compensate a substitute servicer for performing the servicing. In addition to the anticipated rate of loan prepayments and discount rates, other assumptions (such as the cost to service the underlying loans, foreclosure costs, ancillary income and float rates) are also used in determining the value of the loan servicing assets. Loan servicing assets are discussed in more detail in “Notes to Consolidated Financial Statements, Note 1 — Summary of Significant Accounting Policies” and “Note 3 — Loans” presented elsewhere herein.

We reclassify certain loans to loans held for sale. Any such reclassification takes into consideration a number of factors, including, but not limited to, the following:

- NPL and/or classified status, non-accrual status, and days delinquent;
- possibility of rehabilitation or workout for the near future and long term earning capability as an asset;
- number of times the loan was modified;
- overall debt coverage ratio;
- whether the debt is on troubled debt restructure status;
- the location of the collateral; and
- the borrower’s overall financial condition.

The fair value of nonperforming loans held for sale is generally based upon the recent appraisals, quotes, bids or sales contract prices which approximate the fair value. All loans held for sale are recorded at the lower of cost or fair value.

Investment Securities

The classification and accounting for investment securities are discussed in more detail in “Notes to Consolidated Financial Statements, Note 1 — Summary of Significant Accounting Policies” and “Note 2 – Investment Securities” presented elsewhere herein.

Under FASB ASC 320, "*Investment*," investment securities generally must be classified as held to maturity, available for sale or trading. The appropriate classification is based partially on our ability to hold the securities to maturity and largely on management's intentions with respect to either holding or selling the securities. The classification of investment securities is significant since it directly impacts the accounting for unrealized gains and losses on securities. Unrealized gains and losses on trading securities flow directly through earnings during the periods in which they arise. Investment securities that are classified as held to maturity are recorded at amortized cost. Unrealized gains and losses on available-for-sale securities are recorded as a separate component of stockholders' equity (accumulated other comprehensive income or loss) and do not affect earnings until realized or are deemed to be other-than-temporarily impaired.

The fair values of investment securities are generally determined by quoted market prices obtained from independent external brokers or independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, we have evaluated the methodologies used to develop the resulting fair values. We perform a monthly analysis on the broker quotes received from third parties to ensure that the prices represent a reasonable estimate of the fair value. The procedures include, but are not limited to, initial and on-going review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes.

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment ("OTTI") or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors.

For debt securities, the classification of OTTI depends on whether we intend to sell the security or if it is more likely than not that we will be required to sell the security before recovery of its costs basis, and on the nature of the impairment. If we intend to sell a security or if it is more likely than not that we will be required to sell the security before recovery, an OTTI write-down is recognized in earnings equal to the entire difference between the security's amortized cost basis and its fair value. If we do not intend to sell the security or it is not more likely than not that we will be required to sell the security before recovery, the OTTI write-down is separated into an amount representing credit loss, which is recognized in earnings, and the amount related to all other factors, which is recognized in other comprehensive income net of tax. A credit loss is the difference between the cost basis of the security and the present value of cash flows expected to be collected, discounted at the security's effective interest rate at the date of acquisition. The cost basis of an other than temporarily impaired security is written down by the amount of impairment recognized in earnings. The new cost basis is not adjusted for subsequent recoveries in fair value.

Management does not believe that there are any investment securities that are deemed OTTI as of December 31, 2013.

Income Taxes

In accordance with the provisions of FASB ASC 740, the Company periodically reviews its income tax positions based on tax laws and regulations and financial reporting considerations, and records adjustments as appropriate. This review takes into consideration the status of current taxing authorities' examinations of the Company's tax returns, recent positions taken by the taxing authorities on similar transactions, if any, and the overall tax environment.

As of each reporting date, management considers the realization of deferred tax assets based on management's judgment of various future events and uncertainties, including the timing and amount of future income, as well as the implementation of various tax planning strategies to maximize realization of deferred tax assets. A valuation allowance is provided when it is more likely than not that some portion of deferred tax assets will not be realized. As of December 31, 2013, management determined that no valuation allowance for deferred tax assets is required, as management believes it is more likely than not that deferred tax assets will be realized principally through future reversals of existing taxable temporary differences. Management further believes that future taxable income will be sufficient to realize the benefits of temporary deductible differences that cannot be realized through carry-back to prior years or through the reversal of future temporary taxable differences.

Income taxes are discussed in more detail in "Notes to Consolidated Financial Statements, Note 1 — Summary of Significant Accounting Policies" and "Note 8 — Income Taxes" presented elsewhere herein.

Executive Overview

For the years ended December 31, 2013, 2012 and 2011, we recognized net income of \$39.9 million, \$90.4 million and \$28.1 million, respectively. The decrease in net income for the year ended December 31, 2013 as compared to the year ended December 31, 2012 was primarily attributable to the absence of the reversal of the deferred tax asset (“DTA”) valuation allowance, which contributed an income tax benefit of \$47.4 million in 2012. For the years ended December 31, 2013, 2012 and 2011, our earnings per diluted share were \$1.26, \$2.87 and \$1.38, respectively.

Significant financial highlights include:

- Total assets increased 6.0 percent to \$3.06 billion at December 31, 2013, compared to \$2.88 billion at December 31, 2012, resulting from increases in investment portfolio and gross loans.
- With new loan growth across the portfolio, particularly in commercial and industrial loans, gross loans increased by \$185.5 million, or 9.1 percent, to \$2.23 billion as of December 31, 2013, compared to \$2.05 billion as of December 31, 2012. During 2012, gross loans decreased by \$109.8 million, or 5.7 percent, compared to \$1.94 billion as of December 31, 2011.
- Asset quality improved in all major aspects as of December 31, 2013 compared to December 31, 2012. Non-performing assets declined to 0.87 percent of total assets as of December 2013 from 1.32 percent of total assets as of December 31, 2012. Net loss on sales of other loans was \$557,000 for the year ended December 31, 2013, compared to \$9.5 million for the year ended December 31, 2012. Classified loans were \$80.3 million, or 3.6 percent of gross loans, at December 31, 2013, down from \$100.4 million, or 4.9 percent, at December 31, 2012.
- Net income was \$39.9 million, or \$1.26 per diluted share, for the year ended December 31, 2013, compared to \$90.4 million, or \$2.87 per diluted share, for the year ended December 31, 2012, which included \$47.4 million net tax benefit from the DTA valuation allowance reversal.
- Net interest margin continued to increase year over year. For the year ended December 31, 2013, net interest margin was 4.05 percent, increases of 28 and 37 basis points compared to 3.77 percent and 3.68 percent for the years ended December 31, 2012 and 2011, respectively.
- Operating efficiency improved to 55.80 percent for the year ended December 31, 2013, from 61.07 percent for the year ended December 31, 2012 and 67.22 percent for the year ended the December 31, 2011, reflecting higher revenues.
- Cash dividends of \$0.07 per share of common stock were paid on December 23 and September 17, 2013.

Results of Operations

Net Interest Income

Our primary source of revenue is net interest income, which is the difference between interest and fees derived from earning assets, and interest paid on liabilities obtained to fund those assets. Our net interest income is affected by changes in the level and mix of interest-earning assets and interest-bearing liabilities, referred to as volume changes. Net interest income is also affected by changes in the yields earned on assets and rates paid on liabilities, referred to as rate changes. Interest rates charged on loans are affected principally by changes to interest rates, the demand for such loans, the supply of money available for lending purposes, and other competitive factors. Those factors are, in turn, affected by general economic conditions and other factors beyond our control, such as federal economic policies, the general supply of money in the economy, legislative tax policies, governmental budgetary matters, and the actions of the Federal Reserve.

(1) Loans are net of deferred fees and related direct costs, but exclude the allowance for loan losses. Non-accrual loans are included in the average loan balance. Loan fees have been included in the calculation of interest income. Loan fees were \$1.4 million, \$1.5 million and \$2.0 million for the years ended December 31, 2013, 2012 and 2011, respectively.

(2) Computed on a tax-equivalent basis using an effective marginal rate of 35 percent.

(3) Represents the average yield earned on interest-earning assets less the average rate paid on interest-bearing liabilities.

(4) Represents net interest income as a percentage of average interest-earning assets.

The table below shows changes in interest income and interest expense and the amounts attributable to variations in interest rates and volumes for the periods indicated. The variances attributable to simultaneous volume and rate changes have been allocated to the change due to volume and the change due to rate categories in proportion to the relationship of the absolute dollar amount attributable solely to the change in volume and to the change in rate.

For the years ended December 31, 2013, 2012 and 2011, net interest income before provision for credit losses on a tax-equivalent basis was \$109.0 million, \$101.3 million and \$101.3 million, respectively. The increase in net interest income in 2013, as compared to 2012, was primarily attributable to an increase in average gross loans, a decline in jumbo time deposits, lower deposit costs resulting from the replacement of high-cost time deposits with low-cost deposit products, and a decrease in interest expense from the full redemption of \$80 million of trust preferred securities (“TPS”). Net interest income remained stable for the years ended December 31, 2012 and 2011 due to the decrease in interest income, which was primarily offset by the decrease in interest expense. The decrease in interest income was due primarily to declines in average gross loans and loan yields, and a decrease in other debt securities yield. This decrease was primarily offset in the interest expense by lower deposit costs resulting from the replacement of high-cost promotional time deposits with low-cost deposits. The net interest spread and net interest margin for the year ended December 31, 2013 were 3.76 percent and 4.05 percent, respectively, compared to 3.40 percent and 3.77 percent, respectively, for the year ended December 31, 2012, and 3.27 percent and 3.68 percent, respectively, for the year ended December 31, 2011.

Average gross loans were \$2.16 billion in 2013, as compared with \$1.99 billion in 2012 and \$2.11 billion in 2011, representing an increase of 8.2 percent in 2013 and a decrease of 5.7 percent in 2012. Average investment securities were \$446.6 million in 2013, as compared with \$443.9 million in 2012 and \$479.8 million in 2011, representing an increase of 0.6 percent in 2013 and a decrease of 7.5 percent in 2012. Average interest-earning assets remained stable at \$2.69 billion for the years ended December 31, 2013 and 2012, as compared with \$2.75 billion in 2011, representing a decrease of 2.4 percent in 2012. The decrease in average interest earning assets in 2012 was a direct result of the proactive disposition of problem loans under the credit quality improvement strategy and the balance sheet deleveraging strategy. Average interest-bearing liabilities were \$1.68 billion in 2013, as compared to \$1.76 billion in 2012 and \$1.96 billion in 2011, representing decreases of 4.5 percent and 10.2 percent in 2013 and 2012, respectively. The decrease in average interest-bearing liabilities resulted primarily from the full redemption of \$80 million of TPS in 2013 and the continuing reduction of high-cost time deposits in 2013 and 2012.

The average yield on interest-earning assets increased by 9 basis points to 4.56 percent in 2013, after a decrease of 21 basis points to 4.47 percent in 2012 from 4.68 percent in 2011. The increase in 2013 was attributable to deployment of lower yielding funds to higher yielding loans, and the decrease in 2012 was due primarily to an increase in lower yielding funds and lower yields on investment securities and loans. The average yield on gross loans decreased by 28 basis points to 5.19 percent in 2013, after a 9 basis point decrease to 5.47 percent in 2012 from 5.56 percent in 2011. The continued decreases in 2013 and 2012 were attributable to the current low interest rate environment. The average cost on interest-bearing liabilities decreased by 27 basis points to 0.80 percent in 2013, after a decrease of 34 basis points to 1.07 percent in 2012 from 1.41 percent in 2011. The decrease in 2013 was due mainly to the elimination of interest payments on TPS and the decline in the balance and cost of jumbo CDs, and the decrease in 2012 was attributable to a continued shift in funding sources toward lower-cost funds through disciplined deposit pricing while reducing wholesale funds and rate sensitive deposits.

Provision for Credit Losses

In anticipation of credit risks inherent in our lending business, we set aside allowance for loan losses through charges to earnings. These charges are made not only for our outstanding loan portfolio, but also for off-balance sheet items, such as commitments to extend credit, or letters of credit. The charges made for our outstanding loan portfolio are recorded to the allowance for loan losses, whereas charges for off-balance sheet items are recorded to the reserve for off-balance sheet items, and are presented as a component of other liabilities.

Net charge-offs decreased by \$27.5 million, or 81.3 percent, to \$6.3 million for the year ended December 31, 2013 from \$33.8 million for the year ended December 31, 2012, and decreased by \$34.9 million, or 50.8 percent, for the year ended December 31, 2012 from \$68.7 million for the year ended December 31, 2011. Non-performing loans decreased by \$11.4 million, or 30.6 percent, to \$25.9 million for the year ended December 31, 2013 from \$37.3 million for the year ended December 31, 2012, and decreased by \$15.1 million, or 28.8 percent, for the year ended December 31, 2012 from \$52.4 million for the year ended December 31, 2011. All other credit metrics also experienced improvements as the quality of the loan portfolio improved. Therefore, provision for credit losses was zero for the year ended December 31, 2013, compared to \$6.0 million for the year ended December 31, 2012. See “Non-Performing Assets” and “Allowance for Loan Losses and Allowance for Off-Balance Sheet Items” for further details.

Non-Interest Income

The following table sets forth the various components of non-interest income for the years indicated:

	Year Ended December 31,		
	2013	2012	2011
		<i>(In thousands)</i>	
Service charges on deposit accounts	\$11,307	\$12,146	\$12,826
Insurance commissions	5,247	4,857	4,500
Remittance fees	2,036	1,976	1,925
Trade finance fees	1,064	1,140	1,305
Other service charges and fees	1,375	1,499	1,447
Bank-owned life insurance income	1,171	1,110	939
Gain on sales of SBA loans guaranteed portion	8,000	9,923	4,543
Net loss on sales of other loans	(557)	(9,481)	(6,020)
Net gain on sales of investment securities	1,039	1,396	1,635
Other-than-temporary impairment loss on investment securities	—	(292)	—
Other operating income	735	538	751
Total non-interest income	\$31,417	\$24,812	\$23,851

For the year ended December 31, 2013, non-interest income was \$31.4 million, an increase of \$6.6 million, or 26.6 percent, from \$24.8 million for the year ended December 31, 2012. This increase was primarily attributable to an \$8.9 million decrease in net loss on sales of other loans, mainly offset by a \$1.9 million decrease in gain on sales of the guaranteed portion of SBA loans. Service charges on deposit accounts, which represent 36.0 percent of total non-interest income for the year ended December 31, 2013, decreased to \$11.3 million for the year ended December 31, 2013, compared with \$12.1 million for the year ended December 31, 2012, due mainly to a decrease in non-sufficient fund charges. Gain on sales of the guaranteed portion of SBA loans for the year ended December 31, 2013 totaled \$8.0 million, or 25.5 percent of total non-interest income. Insurance commissions increased \$390,000, or 8.0 percent, to \$5.2 million for the year ended December 31, 2013 from \$4.9 million for the year ended December 31, 2012.

For the year ended December 31, 2012, non-interest income was \$24.8 million, an increase of \$961,000, or 4.0 percent, from \$23.9 million for the year ended December 31, 2011. The increase in non-interest income for 2012 was primarily attributable to a gain from selling the guaranteed portion of SBA loans, partially offset by a net loss recognized from selling other loans. Gain from selling the guaranteed portion of SBA loans for the year ended December 31, 2012 totaled \$9.9 million, or 40.0 percent of total non-interest income, a \$5.4 million increase from \$4.5 million for the year ended December 31, 2011. However, net loss on sales of other loans increased to \$9.5 million for the year ended December 31, 2012 from \$6.0 million for the year ended December 31, 2011. This increase was a result of management's effort to reduce problem and non-performing assets. The other large source of non-interest income for the year ended December 31, 2012 was service charges on deposit accounts, which represented 49.0 percent of total non-interest income for the year ended December 31, 2012. Service charge income decreased to \$12.1 million for the year ended December 31, 2012, compared with \$12.8 million for the year ended December 31, 2011, due mainly to a decrease in number of non-interest bearing demand deposit accounts.

Non-Interest Expense

The following table sets forth the breakdown of non-interest expense for the years indicated:

	Year Ended December 31,		
	2013	2012	2011
		(In thousands)	
Salaries and employee benefits	\$38,628	\$36,931	\$35,465
Occupancy and equipment	10,309	10,424	10,353
Deposit insurance premiums and regulatory assessments	1,435	4,431	6,630
Data processing	4,627	4,941	5,601
Other real estate owned expense	(59)	344	1,620
Professional fees	7,403	4,694	4,187
Directors and officers liability insurance	879	1,186	2,940
Supplies and communications	2,287	2,370	2,323
Advertising and promotion	4,081	3,876	2,993
Loan-related expense	396	527	827
Amortization of other intangible assets	164	198	700
Expense related to unconsummated capital offerings	—	—	2,220
Other operating expenses	8,097	6,939	8,189
Total non-interest expense	\$78,247	\$76,861	\$84,048

For the year ended December 31, 2013, non-interest expense was \$78.2 million, an increase of \$1.4 million, or 1.8 percent, compared to \$76.9 million for the year ended December 31, 2012. The increase was due primarily to the increases in salaries and employee benefits, and professional fees, mainly offset by the decrease in deposit insurance premiums and regulatory assessments. Professional fees increased \$2.7 million, 57.7 percent, to \$7.4 million for the year ended December 31, 2013 from \$4.7 million for the year ended December 31, 2012, due mainly to additional professional services required for several strategic transactions pursued during 2013. Deposit insurance premiums and regulatory assessments for the year ended December 31, 2013 decreased by \$3.0 million, or 67.6 percent, to \$1.4 million, compared to \$4.4 million for the year ended December 31, 2012, due primarily to the lower assessment rates for the FDIC insurance on deposits resulting from our improved overall financial conditions. The largest component of non-interest expense for the year ended December 31, 2013 was salaries and employee benefits, which represented 49.4 percent of total non-interest expense for the year ended December 31, 2013. Salaries and employee benefits increased \$1.7 million, or 4.6 percent, to \$38.6 million, compared to \$36.9 million for the year ended December 31, 2012, due mainly to an annual salary increase, an increase in the average number of employees, and additional share-based compensation reflecting stock options and restricted stock awards granted.

For the year ended December 31, 2012, non-interest expense was \$76.9 million, a decrease of \$7.1 million, or 8.5 percent, from \$84.0 million for the year ended December 31, 2011. This decrease was due primarily to a non-recurring expense of \$2.2 million related to an unconsummated capital raise in 2011, and reductions in deposit insurance premiums, directors and officers liability insurance and other real estate owned expense. Reflecting improved overall financial conditions, deposit insurance premiums and regulatory assessments decreased by \$2.2 million, or 33.2 percent, to \$4.4 million for the year ended December 31, 2012, compared to \$6.6 million for the year ended December 31, 2011. For the same reason, along with a change in new insurance carriers, directors and officers liability insurance also decreased by \$1.7 million, or 58.6 percent, to \$1.2 million for the year ended December 31, 2012, compared to \$2.9 million for the year ended December 31, 2011. Salaries and employee benefits, however, increased by \$1.4 million, or 4.0 percent, to \$36.9 million for the year ended December 31, 2012, compared to \$35.5 million for the year ended December 31, 2011, due mainly to increased bonus provisions and incentive awards during 2012. Other real estate owned expenses decreased by \$1.3 million, or 78.8 percent, to \$344,000 for the year ended December 31, 2012, compared to \$1.6 million for the year ended December 31, 2011, due mainly to a reduction of OREO properties.

Income Taxes

As of December 31, 2013, the Company's net deferred tax assets of \$51.8 million were primarily the result of net operating loss carryforwards, allowance for loan losses and unrealized loss on securities available for sale. For the year ended December 31, 2012, the Company recorded a net valuation allowance release of \$62.6 million based on management's reassessment of the amount of its deferred tax assets that are more likely than not to be realized. A valuation allowance of \$82.3 million was recorded against its gross deferred tax asset balance as of December 31, 2011.

Income taxes are discussed in more detail in "Notes to Consolidated Financial Statements, Note 1 — Summary of Significant Accounting Policies" and "Note 8 — Income Taxes" presented elsewhere herein.

Financial Condition

Investment Portfolio

Investment securities are classified as held to maturity or available for sale in accordance with GAAP. Those securities that we have the ability and the intent to hold to maturity are classified as “held to maturity.” All other securities are classified as “available for sale.” There were no trading securities as of December 31, 2013, 2012 and 2011. Securities classified as held to maturity are stated at cost, adjusted for amortization of premiums and accretion of discounts, and available for sale securities are stated at fair value. The composition of our investment portfolio reflects our investment strategy of providing a relatively stable source of interest income while maintaining an appropriate level of liquidity. Our investment portfolio also provides a source of liquidity by pledging as collateral or through repurchase agreement and collateral for certain public funds deposits.

As of December 31, 2013, our investment portfolio was composed primarily of mortgage-backed securities, collateralized mortgage obligations and U.S. government agency securities. Investment securities available for sale were 100 percent, 100 percent and 99.8 percent of the total investment portfolio as of December 31, 2013, 2012 and 2011, respectively. Most of the investment securities carried fixed interest rates. Other than holdings of U.S. government agency securities, there were no investments in securities of any one issuer exceeding 10 percent of stockholders’ equity as of December 31, 2013, 2012 and 2011.

As of December 31, 2013, securities available for sale were \$530.9 million, or 17.4 percent of total assets, compared to \$451.1 million, or 15.6 percent of total assets, as of December 31, 2012. For the year ended December 31, 2013, investment portfolio increased by \$79.9 million, or 17.7 percent, to \$530.9 million from \$451.1 million as of December 31, 2012, due to purchases of \$250.9 million of investment securities primarily consisting of mortgage-backed securities and collateralized mortgage obligations, mainly offset by sales, calls, prepayments and scheduled amortization.

The following table summarizes the amortized cost, fair value and distribution of investment securities as of the dates indicated:

	As of December 31,

⁽¹⁾ The yield on municipal bonds has been computed on a federal tax-equivalent basis of 35%.

The amortized cost and estimated fair value of investment securities as of December 31, 2013, by contractual maturity, are shown below. Although mortgage-backed securities and collateralized mortgage obligations have contractual maturities through 2063, expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Available for Sale	
	Amortized Cost	Estimated Fair Value
	(In thousands)	
Within one year	\$ 19,998	\$ 19,996
Over one year through five years	31,560	31,306
Over five years through ten years	101,992	95,869
Over ten years	42,159	39,003
Mortgage-backed securities	222,768	217,059
Collateralized mortgage obligations	130,636	127,693
Total	\$549,113	\$530,926

FASB ASC 320, "Investments – Debt and Equity Securities," requires us to periodically evaluate our investments for OTTI. There was no OTTI charge for the year ended December 31, 2013.

Gross unrealized losses on investment securities available for sale, the estimated fair value of the related securities and the number of securities aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, were as follows as of December 31, 2013 and December 31, 2012:

	Holding Period								
	Less Than 12 Months			12 Months or More			Total		
	Gross Unrealized Loss	Estimated Fair Value	Number of Securities	Gross Unrealized Loss	Estimated Fair Value	Number of Securities	Gross Unrealized Loss	Estimated Fair Value	Number of Securities

All individual securities that have been in a continuous unrealized loss position for 12 months or longer as of December 31, 2013 and 2012 had investment grade ratings upon purchase. The issuers of these securities have not established any cause for default on these securities and the various rating agencies have reaffirmed these securities' long-term investment grade status as of December 31, 2013. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated.

FASB ASC 320 requires other-than-temporarily impaired investment securities to be written down when fair value is below amortized cost in circumstances where: (i) an entity has the intent to sell a security; (ii) it is more likely than not that an entity will be required to sell the security before recovery of its amortized cost basis; or (iii) an entity does not expect to recover the entire amortized cost basis of the security. If an entity intends to sell a security or if it is more likely than not the entity will be required to sell the security before recovery, an OTTI write-down is recognized in earnings equal to the entire difference between the security's amortized cost basis and its fair value. If an entity does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the OTTI write-down is separated into an amount representing credit loss, which is recognized in earnings, and the amount related to all other factors, which is recognized in other comprehensive income.

The Company does not intend to sell these securities and it is not more likely than not that we will be required to sell the investments before the recovery of its amortized cost basis. In addition, the unrealized losses on municipal and corporate bonds are not considered other-than-temporarily impaired as the bonds are rated investment grade and there are no credit quality concerns with the issuers. Interest payments have been made as scheduled, and management believes this will continue in the future and that the bonds will be repaid in full as scheduled. Therefore, in management's opinion, all securities that have been in a continuous unrealized loss position for the past 12 months or longer as of December 31, 2013 and 2012 were not other-than-temporarily impaired, and therefore, no impairment charges as of December 31, 2013 and 2012 were warranted.

Investment securities available for sale with carrying values of \$47.6 million and \$18.2 million as of December 31, 2013 and 2012, respectively, were pledged to secure FHLB advances, public deposits and for other purposes as required or permitted by law.

Loan Portfolio

Real estate loans are extended to finance the purchase and/or improvement of commercial real estate and residential property. The properties generally are investor-owned, but may be for user-owned purposes. Underwriting guidelines include, among other things, an appraisal in conformity with the USPAP, limitations on loan-to-value ratios, and minimum cash flow requirements to service debt. The majority of the properties taken as collateral are located in Southern California. Commercial loans include term loans and revolving lines of credit. Term loans typically have a maturity schedule ranging from three to seven years and are extended to finance the purchase of business entities, owner-occupied commercial property, business equipment, leasehold improvements or for

permanent working capital. SBA loans usually have a longer maturity schedule ranging from five to 20 years. Lines of credit, in general, are extended on an annual basis to businesses that need temporary working capital and/or import/export financing. These borrowers are well diversified as to industry, location and their current and target markets.

The following table sets forth the amount of total loans outstanding in each category as of the dates indicated, excluding loans held for sale:

	As of December 31,				
	2013	2012	2011	2010	2009
	<i>(In thousands)</i>				
Real estate loans:

⁽¹⁾ Consumer loans include home equity lines of credit

As of December 31, 2013 and 2012, loans receivable (excluding loans held for sale), net of deferred loan costs and allowance for loan losses, totaled \$2.18 billion and \$1.99 billion, respectively, representing an increase of \$119.4 million, or 9.6 percent. Total gross loans increased by \$185.5 million, or 9.1 percent, to \$2.23 billion as of December 31, 2013, from \$2.05 billion as of December 31, 2012.

During the year ended December 31, 2013, total loan disbursement consisted of \$461.4 million in commercial real estate loans, \$118.9 million in SBA loans and \$76.8 million in commercial and industrial loans. The increase was offset by \$88.5 million of transfers to loans held for sale, \$11.9 million of gross charge-offs and \$374.6 million of pay-offs and other net amortizations.

The following table sets forth the percentage distribution of loans in each category as of the dates indicated:

	As of December 31,				
	2013	2012	2011	2010	2009
Real estate loans:					
Commercial property	41.8%	38.4%	34.2%	32.7%	29.9%
Construction	0.0%	0.0%	1.8%	2.7%	4.5%

Total commercial and industrial loans	53.2%	54.8%	59.1%	59.5%	60.7%
Consumer loans	1.5%	1.8%	2.2%	2.3%	2.2%
Total gross loans	100.0%	100.0%	100.0%	100.0%	100.0%

The following table shows the distribution of undisbursed loan commitments as of the dates indicated:

	As of December 31,				
	2013	2012	2011	2010	2009
	<i>(In thousands)</i>				
Commitments to extend credit	\$246,161	\$182,746	\$158,748	\$178,424	\$262,821
Standby letters of credit	8,926	10,588	12,742	15,226	17,225
Commercial letters of credit	4,179	6,092	9,298	11,899	13,544
Unused credit card lines	12,223	13,459	15,937	24,649	23,408
Total undisbursed loan commitments	\$271,488	\$212,885	\$196,725	\$230,198	\$316,998

The table below shows the maturity distribution of outstanding loans as of December 31, 2013. In addition, the table shows the distribution of such loans between those with floating or variable interest rates and those with fixed or predetermined interest rates. The table includes non-accrual loans of \$25.9 million.

	Within	After One Year	After Five Years	Total
	One Year	but Within Five Years		
	<i>(In thousands)</i>			
Real estate loans:				
Commercial property	\$ 43,975	\$ 381,610	\$ 507,813	\$ 933,398
Residential property	890	2,005	76,183	79,078
Total real estate loans	44,865	383,615	583,996	1,012,476
Commercial and industrial loans:				
Commercial term	178,991	292,969	457,688	929,648
Commercial lines of credit	67,977	3,600	—	71,577
SBA loans	788	26,425	124,317	151,530
International loans	36,353	—	—	36,353
Total commercial and industrial loans	284,109	322,994	582,005	1,189,108
Consumer loans	4,025	1,469	27,011	32,505
Total gross loans	\$332,999	\$ 708,078	\$ 1,193,012	\$2,234,089
Loans with predetermined interest rates	\$ 84,244	\$ 286,670	\$ 132,330	\$ 503,244
Loans with variable interest rates	\$248,755	\$ 421,408	\$ 1,060,682	\$1,730,845

As of December 31, 2013, the loan portfolio included the following concentrations of loans to one type of industry that were greater than 10 percent of total gross loans outstanding:

Industry	Balance as of December 31, 2013	Percentage of Gross Loans Outstanding
	<i>(In thousands)</i>	
Lessor of non-residential buildings	\$ 615,006	27.5%
Accommodation/hospitality	\$ 332,066	14.9%
Gasoline stations	\$ 304,642	13.6%

There was no other concentration of loans to any one type of industry exceeding 10 percent of total gross loans outstanding.

Non-Performing Assets

Non-performing loans consist of loans on non-accrual status and loans 90 days or more past due and still accruing interest. Non-performing assets consist of non-performing loans and OREO. Loans are placed on non-accrual status when, in the opinion of management, the full timely collection of principal or interest is in doubt. Generally, the accrual of interest is discontinued when principal or interest payments become more than 90 days past due, unless management believes the loan is adequately collateralized and in the process of collection. However, in certain instances, we may place a particular loan on non-accrual status earlier, depending upon the individual circumstances surrounding the loan's delinquency. When an asset is placed on non-accrual status, previously accrued but unpaid interest is reversed against current income. Subsequent collections of cash are applied as principal reductions when received, except when the ultimate collectability of principal is probable, in which case interest payments are credited to income. Non-accrual assets may be restored to accrual status when principal and interest become current and full repayment is expected. Interest income is recognized on the accrual basis for impaired loans not meeting the criteria for non-accrual. OREO consists of properties acquired by foreclosure or similar means that management intends to offer for sale.

Except for non-performing loans set forth below, management is not aware of any loans as of December 31, 2013 and 2012 for which known credit problems of the borrower would cause serious doubts as to the ability of such borrowers to comply with their present loan repayment terms, or any known events that would result in the loan being designated as non-performing at some future date. Management cannot, however, predict the extent to which a deterioration in general economic conditions, real estate values, increases in general rates of interest, or changes in the financial condition or business of borrower may adversely affect a borrower's ability to pay.

The following table provides information with respect to the components of non-performing assets as of the dates indicated:

	As of December 31,				
	2013	2012	2011	2010	2009
	<i>(In thousands)</i>

Total non-accrual loans	25,877	37,279	52,378	142,437	219,000
Loans 90 days or more past due and still accruing	—	—	—	—	67
Total non-performing loans ⁽¹⁾	25,877	37,279	52,378	142,437	219,067
Other real estate owned	756	774	180	4,089	26,306
Total non-performing assets	\$26,633	\$38,053	\$52,558	\$146,526	\$245,373
Performing troubled debt restructured loans	\$19,416	\$16,980	\$28,375	\$ 47,395	\$ —
Non-performing loans as a percentage of gross loans	1.16%	1.82%	2.70%	6.38%	7.78%
Non-performing assets as a percentage of assets	0.87%	1.32%	1.91%	5.04%	7.76%

⁽¹⁾ Include troubled debt restructured non-performing loans of \$10.5 million, \$18.8 million and \$23.2 million as of December 31, 2013, 2012 and 2011, respectively.

Non-accrual loans, excluding loans held for sale, totaled \$25.9 million as of December 31, 2013, compared to \$37.3 million as of December 31, 2012, representing a 30.6 percent decrease. Delinquent loans (defined as 30 days or more past due), excluding loans held for sale, were \$16.3 million as of December 31, 2013, compared to \$16.5 million as of December 31, 2012, representing a 1.2 percent decrease. Delinquent loans of \$12.2 million and \$14.1 million were included in non-performing loans as of December 31, 2013 and 2012, respectively. During the year ended December 31, 2013, loans totaling \$14.6 million were placed on non-accrual status. The additions to non-accrual loans were offset by \$8.3 million in charge-offs, \$6.9 million in principal paydowns and payoffs, \$5.7 million in transfer to loans held for sale, \$2.1 million in upgrades to accrual, \$1.3 million in SBA guaranteed portions received, \$1.2 million in note sales and \$515,000 transfer to OREO.

The ratio of non-performing loans to gross loans also decreased to 1.16 percent at December 31, 2013 from 1.82 percent at December 31, 2012. During the same period, allowance for loan losses decreased by \$5.8 million, or 9.1 percent, to \$57.6 million from \$63.3 million. Of the \$25.9 million non-performing loans, approximately \$22.4 million were impaired based on the definition contained in FASB ASC 310, "Receivables," which resulted in aggregate impairment reserve of \$3.9 million as of December 31, 2013. The allowance for collateral-dependent loans is calculated as the difference between the outstanding loan balance and the value of the collateral as determined by recent appraisals less estimated costs to sell. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage, based on recent appraisals, on these loans on a quarterly basis and adjust the allowance accordingly.

As of December 31, 2013, there were three OREO properties located in Washington and California with a combined carrying value of \$756,000 and a valuation adjustment of \$56,000. As of December 31, 2012, there were two OREO properties located in Illinois and Virginia with a combined carrying value of \$774,000 and no valuation adjustment.

We evaluate loan impairment in accordance with applicable GAAP. Loans are considered impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement, including scheduled interest payments. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as an expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral

dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established. Additionally, impaired loans are specifically excluded from the quarterly migration analysis when determining the amount of the allowance for loan losses required for the period.

The following table provides information on impaired loans, disaggregated by loan class, as of the dates indicated:

	<u>Recorded Investment</u>	<u>Unpaid Principal Balance</u>	<u>With No Related Allowance Recorded</u>	<u>With an Allowance Recorded</u>	<u>Related Allowance</u>	<u>Average Recorded Investment</u>	<u>Interest Income Recognized</u>

The following is a summary of interest foregone on impaired loans for the periods indicated:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Interest income that would have been recognized had impaired loans performed in accordance with their original terms	\$ 4,451	\$ 5,887	\$ 9,192
Less: Interest income recognized on impaired loans ⁽¹⁾	<u>(3,708)</u>	<u>(4,541)</u>	<u>(8,348)</u>
Interest foregone on impaired loans	<u>\$ 743</u>	<u>\$ 1,346</u>	<u>\$ 844</u>

⁽¹⁾ Includes interest recognized on accrual basis prior to classification as impaired.

For the year ended December 31, 2013, we restructured monthly payments for 33 loans, with a net carrying value of \$8.6 million at the time of modification, which we subsequently classified as troubled debt restructured loans. Temporary payment structure modifications included, but were not limited to, extending the maturity date, reducing the amount of principal and/or interest due monthly, and/or allowing for interest only monthly payments for six months or less. As of December 31, 2013, troubled debt restructurings on accrual status totaled \$19.4 million, all of which were temporary interest rate and payment reductions and extensions of maturity, and a \$1.4 million reserve relating to these loans was included in the allowance for loan losses. For the restructured loans on accrual status, we determined that, based on the financial capabilities of the borrowers at the time of the loan restructuring and the borrowers' past performance in the payment of debt service under the previous loan terms, performance and collection under the revised terms is probable. As of December 31, 2013, restructured loans on non-accrual status totaled \$10.5 million, and a \$1.4 million reserve relating to these loans was included in the allowance for loan losses.

As of December 31, 2012, troubled debt restructurings on accrual status totaled \$17.0 million, all of which were temporary interest rate and payment reductions and extensions of maturity, and a \$1.5 million reserve relating to these loans was included in the allowance for loan losses. For the restructured loans on accrual status, we determined that, based on the financial capabilities of the borrowers at the time of the loan restructuring and the borrowers' past performance in the payment of debt service under the previous loan terms, performance and collection under the revised terms is probable. As of December 31, 2012, restructured loans on non-accrual status totaled \$18.8 million, and a \$2.1 million reserve relating to these loans was included in the allowance for loan losses.

Allowance for Loan Losses and Allowance for Off-Balance Sheet Items

Provisions to allowance for loan losses are made quarterly to recognize probable loan losses. The quarterly provision is based on the allowance need, which is determined through analysis involving quantitative calculations based on historic loss rates for general reserves and individual impairment calculations for specific allocations to impaired loans as well as qualitative adjustments.

In the first quarter of 2010, the look-back period was reduced from twelve quarters to eight quarters, with 60.0 percent weighting given to the most recent four quarters and 40.0 percent to the oldest four quarters, to place greater emphasis on losses taken by the Bank during the economic downturn. In the second quarter of 2013, management reevaluated the look-back period and restored the twelve quarter look-back period in order to capture a period of higher losses that would have otherwise been excluded. Risk factor calculations are weighted at 50.0 percent for the most recent four quarters, 33.0 percent for the next four quarters, and 17.0 percent for the oldest four quarters. Homogenous loans are collectively evaluated for loss potential. The change in methodology maintained the Bank's allowance at a level consistent with the prior quarter.

To determine general reserve requirements, existing loans are divided into 11 general loan pools of risk-rated loans as well as three homogenous loan pools. For risk-rated loans, migration analysis allocates historical losses by loan pool and risk grade to determine risk factors for potential loss inherent in the current outstanding loan portfolio.

Specific reserves are allocated for loans deemed "impaired." A loan is "impaired" when it is probable that a creditor will be unable to collect all amounts due, including principal and interest, according to the contractual terms and schedules of the loan agreement. The loans identified as impaired are measured using one of the three methods of valuations: (i) the present value of expected future cash flows discounted at the loan's effective interest rate, (ii) the fair market value of the collateral if the loan is collateral dependent, or (iii) the loan's observable market price.

When determining the appropriate level for allowance for loan losses, management considers qualitative adjustments for any factors that are likely to cause estimated credit losses associated with the Bank's current portfolio to differ from historical loss experience, including, but not limited to, national and local economic and business conditions, volume and geographic concentrations, and problem loan trends.

To systematically quantify the credit risk impact of trends and changes within the loan portfolio, a credit risk matrix is utilized. The qualitative factors are considered on a loan pool by loan pool basis subsequent to, and in conjunction with, a loss migration analysis. The credit risk matrix provides various scenarios with positive or negative impact on the portfolio along with corresponding basis points for qualitative adjustments.

The following table reflects our allocation of allowance for loan losses by loan category as well as the loans receivable for each loan type:

	2013		2012		2011		2010		2009	
	Allowance Amount	Loans Receivable	Allowance Amount	Loans Receivable	Allowance Amount	Loans Receivable	Allowance Amount	Loans Receivable	Allowance Amount	Loans Receivable

Net loan charge-offs to allowance for loan losses	10.99%	53.37%	76.34%	83.45%	84.55%
Net loan charge-offs to provision charged to operating expenses	1098.26%	472.10%	547.69%	99.14%	62.36%
Allowance for loan losses to non-performing loans	222.42%	169.81%	171.71%	102.54%	66.19%
Balance:					

Average gross loans during period	\$2,156,626	\$1,993,367	\$2,114,546	\$2,545,408	\$3,158,624
Gross loans at end of period	\$2,234,089	\$2,048,560	\$1,938,740	\$2,231,072	\$2,820,612
Non-performing loans at end of period	\$ 25,877	\$ 37,279	\$ 52,378	\$ 142,437	\$ 219,067

Allowance for loan losses decreased by \$5.7 million, or 9.1 percent, to \$57.6 million at December 31, 2013 as compared to \$63.3 million at December 31, 2012, which decreased by \$26.6 million, or 29.6 percent, as compared to \$89.9 million at December

31, 2011. Allowance for loan losses as a percentage of total gross loans decreased to 2.58 percent as of December 31, 2013 compared to 3.09 percent as of December 31, 2012 and 4.64 percent as of December 31, 2011. Provision for credit losses decreased by \$6.0 million, or 100 percent, to zero for the year ended December 31, 2013, as compared to \$6.0 million for the year ended December 31, 2012, and decreased by \$6.1 million, or 50.4 percent, as compared to \$12.1 million at December 31, 2011.

The decrease in the allowance for loan losses as of December 31, 2013 was due primarily to decreases in historical loss rates and classified assets. Due to these factors, general reserves decreased by \$12.5 million, or 43.1 percent, to \$16.5 million as of December 31, 2013 as compared to \$29.1 million at December 31, 2012. However, total qualitative reserves increased by \$6.1 million, or 22.7 percent, to \$33.1 million as of December 31, 2013 as compared to \$27.0 million as of December 31, 2012, due mainly to increases in unsecured and non-performing loans and levels of competition, legal and regulation factors.

Impaired loans, excluding loans held for sale, decreased by \$1.7 million, or 3.1 percent, to \$53.1 million as of December 31, 2013 as compared to \$54.7 million at December 31, 2012. However, specific reserve allocations associated with impaired loans increased by \$237,000, or 3.81 percent, to \$6.5 million as of December 31, 2013 as compared to \$6.2 million as of December 31, 2012.

Deposits

The following table shows the composition of deposits by type as of the dates indicated:

	As of December 31,					
	2013		2012		2011	
	Balance	Percent	Balance	Percent	Balance	Percent
	<i>(In thousands)</i>					
Demand – noninterest-bearing	\$ 819,015	32.5%	\$ 720,931	30.1%	\$ 634,466	27.1%
Interest-bearing:						
Savings	115,371	4.6%	114,302	4.8%	104,664	4.4%
Money market checking and NOW accounts	574,334	22.9%	575,744	24.0%	449,854	19.2%
Time deposits of \$100,000 or more	506,946	20.2%	616,187	25.7%	822,165	35.1%
Other time deposits	496,659	19.8%	368,799	15.4%	333,761	14.2%
Total deposits	\$2,512,325	100.0%	\$2,395,963	100.0%	\$2,344,910	100.0%

Total deposits increased by \$116.4 million, or 4.9 percent, to \$2.51 billion as of December 31, 2013 from \$2.40 billion as of December 31, 2012. The increase in total deposits was mainly attributable to increases of \$98.1 million, or 13.6 percent, in demand deposits and \$127.9 million, or 34.7 percent, in other time deposits, partially offset by a decrease of \$109.2 million, or 17.7 percent, in time deposits of \$100,000 or more.

The overall mix of funding improved with no-cost transaction account balances increasing. Core deposits (defined as demand, savings, money market checking and NOW accounts and other time deposits) increased by \$225.6 million, or 12.7 percent, to \$2.01 billion at December 31, 2013 from \$1.78 billion at December 31, 2012. Time deposits of \$100,000 or more decreased by \$109.2 million, or 17.7 percent, to \$506.9 million at December 31, 2013 from \$616.2 million at December 31, 2012. Noninterest-bearing demand deposits represented 32.5 percent of total deposits at December 31, 2013 compared to 30.1 percent and 27.1 percent of total deposits at December 31, 2012 and 2011, respectively. We had no brokered deposits as of December 31, 2013, 2012 and 2011.

The following table shows the distribution of average deposits and the average rates paid for dates indicated:

	As of December 31,					
	2013		2012		2011	
	Average Balance	Average Rate	Average Balance	Average Rate	Average Balance	Average Rate
	<i>(In thousands)</i>					
Demand – noninterest-bearing	\$ 740,445	—	\$ 676,707	—	\$ 600,726	—
Interest-bearing:						
Savings	114,968	1.58%	110,349	1.95%	109,272	2.52%
Money market checking and NOW accounts	567,860	0.51%	529,976	0.58%	465,840	0.74%
Time deposits of \$100,000 or more	546,588	0.75%	681,173	1.07%	913,643	1.52%
Other time deposits	421,387	0.92%	350,877	0.95%	315,174	1.23%
Total deposits	\$2,391,248	0.53%	\$2,349,082	0.68%	\$2,404,655	1.00%

Average deposits for the years ended December 31, 2013, 2012 and 2011 were \$2.39 billion, \$2.35 billion and \$2.40 billion, respectively. Average deposits increased by 1.8 percent in 2013 but decreased by 2.3 percent in 2012.

The following table summarizes the maturity of time deposits of \$100,000 or more at December 31 for the years indicated:

	As of December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Three months or less	\$152,967	\$173,179	\$357,527
Over three months through six months	137,228	134,213	186,230
Over six months through twelve months	161,016	136,855	202,780
Over twelve months	55,735	171,940	75,628
	<u>\$506,946</u>	<u>\$616,187</u>	<u>\$822,165</u>

Federal Home Loan Bank Advances

FHLB advances and other borrowings mostly take the form of advances from the FHLBSF and overnight federal funds. At December 31, 2013, advances from the FHLB were \$127.5 million, an increase of \$124.6 million from the December 31, 2012 balance of \$2.9 million. At December 31, 2013, all FHLB advances have remaining maturities of less than one year, and the weighted-average interest rate was 0.16 percent. See “Note 7 – FHLB Advances and Other Borrowings” for more details.

Interest Rate Risk Management

Interest rate risk indicates our exposure to market interest rate fluctuations. The movement of interest rates directly and inversely affects the economic value of fixed-income assets, which is the present value of future cash flow discounted by the current interest rate; under the same conditions, the higher the current interest rate, the higher the denominator of discounting. Interest rate risk management is intended to decrease or increase the level of our exposure to market interest rates. The level of interest rate risk can be managed through such means as the changing of gap positions and the volume of fixed-income assets. For successful management of interest rate risk, we use various methods to measure existing and future interest rate risk exposures, giving effect to historical attrition rates of core deposits. In addition to regular reports used in business operations, repricing gap analysis, stress testing and simulation modeling are the main measurement techniques used to quantify interest rate risk exposure.

The following table shows the status of our gap position as of December 31, 2013:

	<u>Less Than Three Months</u>	<u>More Than Three Months But Less Than One Year</u>	<u>More Than One Year But Less Than Five Years</u>	<u>More Than Five Years</u>	<u>Non- Interest- Sensitive</u>	<u>Total</u>

Repricing gap	859,764	(446,285)	746,972	(61,672)	(1,098,779)	
Cumulative repricing gap	859,764	413,479	1,160,451	1,098,779	—	
Cumulative repricing gap as a percentage of total assets	28.14%	13.53%	37.98%	35.96%	0.00%	
Cumulative repricing gap as a percentage of interest-earning assets	29.84%	14.35%	40.28%	38.14%	0.00%	
Interest-earning assets						\$2,881,123

The repricing gap analysis measures the static timing of repricing risk of assets and liabilities (i.e., a point-in-time analysis measuring the difference between assets maturing or repricing in a period and liabilities maturing or repricing within the same period). Assets are assigned to maturity and repricing categories based on their expected repayment or repricing dates, and liabilities are assigned based on their repricing or maturity dates. Core deposits that have no maturity dates (demand deposits, savings, and money market checking and NOW accounts) are assigned to categories based on expected decay rates.

As of December 31, 2013, the cumulative repricing gap for the three-month period was at an asset-sensitive position of 29.84 percent of interest-earning assets, which decreased from 34.96 percent as of December 31, 2012. This decrease was due mainly to a \$69.6 million decrease in interest-bearing deposits in other banks and a \$125.0 million increase in federal home loan bank advances, mainly offset by a \$41.8 million increase in fixed rate investment securities, a \$40.5 million decrease in money market checking and NOW accounts, and an \$82.4 million decrease in junior subordinated debentures.

As of December 31, 2013, the cumulative repricing gap for the twelve-month period was at an asset-sensitive position of 14.35 percent of interest-earning assets, which decreased from 22.32 percent as of December 31, 2012. The decrease was due mainly to a \$69.6 million decrease in interest-bearing deposits in other banks and \$165.4 million and \$127.2 million increases in fixed rate time deposits and federal home loan bank advances, respectively, primarily offset by a \$72.1 million decrease in money market checking and NOW accounts and an \$82.4 million decrease in junior subordinated debentures.

The following table summarizes the status of the cumulative gap position as of the dates indicated.

	Less Than Three Months		Less Than Twelve Months	
	December 31, 2013	December 31, 2012	December 31, 2013	December 31, 2012
	<i>(In thousands)</i>			
Cumulative repricing gap	\$ 859,764	\$ 926,923	\$ 413,479	\$ 591,748
Percentage of total assets	28.14%	32.16%	13.53%	20.53%
Percentage of interest-earning assets	29.84%	34.96%	14.35%	22.32%

The spread between interest income on interest-earning assets and interest expense on interest-bearing liabilities is the principal component of net interest income, and interest rate changes substantially affect our financial performance. We emphasize capital protection through stable earnings rather than maximizing yield. In order to achieve stable earnings, we prudently manage our assets and liabilities and closely monitor the percentage changes in net interest income and equity value in relation to limits established within our guidelines.

To supplement traditional gap analysis, we perform simulation modeling to estimate the potential effects of interest rate changes. The following table summarizes one of the stress simulations performed to forecast the impact of changing interest rates on net interest income and the market value of interest-earning assets and interest-bearing liabilities reflected on our balance sheet (i.e., an instantaneous parallel shift in the yield curve of the magnitude indicated below). This sensitivity analysis is compared to policy limits, which specify the maximum tolerance level for net interest income exposure over a one-year horizon, given the basis point adjustment in interest rates reflected below.

Change in Interest Rate	Percentage Changes		Change in Amount	
	Net Interest Income	Economic Value of Equity	Net Interest Income	Economic Value of Equity
	<i>(In thousands)</i>			
300%	15.60%	5.24%	\$17,835	\$26,705
200%	10.18%	4.25%	\$11,630	\$21,685
100%	4.68%	2.86%	\$ 5,347	\$14,602
-100%	(1)	(1)	(1)	(1)

⁽¹⁾ Results are not meaningful in a low interest rate environment

The estimated sensitivity does not necessarily represent our forecast, and the results may not be indicative of actual changes to our net interest income. These estimates are based upon a number of assumptions including: the nature and timing of interest rate levels including yield curve shape, prepayments on loans and securities, pricing strategies on loans and deposits, and replacement of asset and liability cash flows. While the assumptions used are based on current economic and local market conditions, there is no assurance as to the predictive nature of these conditions, including how customer preferences or competitor influences might change.

Capital Resources and Liquidity

Capital Resources

Historically, our primary source of capital has been the retention of operating earnings. In order to ensure adequate levels of capital, the Board continually assesses projected sources and uses of capital in conjunction with projected increases in assets and levels of risk. Management considers, among other things, earnings generated from operations, and access to capital from financial markets through the issuance of additional securities, including common stock or notes, to meet our capital needs.

At December 31, 2013, the Bank's Tier 1 risk-based capital ratio of 15.58 percent, total risk-based capital ratio of 16.84 percent, and Tier 1 leverage capital ratio of 13.09 percent, placed the Bank in the "well capitalized" category, which is defined as institutions with Tier 1 risk-based capital ratio equal to or greater than 6.00%, total risk-based capital ratio equal to or greater than 10.00%, and Tier 1 leverage capital ratio equal to or greater than 5.00%.

Liquidity – Hanmi Financial

Management currently believes that Hanmi Financial, on a stand-alone basis, has adequate liquid assets to meet its operating cash needs through December 31, 2014. Hanmi Financial redeemed \$30.9 million of TPS in March 2013 and fully paid the remaining \$51.5 million on TPS in April 2013.

Liquidity – Hanmi Bank

The principal objective of our liquidity management program is to maintain the Bank's ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs. Management believes that the Bank, on a stand-alone basis, has adequate liquid assets to meet its current obligations. The Bank's primary funding source will continue to be deposits originating from its branch platform. The Bank's wholesale funds historically consisted of FHLB advances and brokered deposits. As of December 31, 2013, the Bank had no brokered deposits, and had a FHLB advance of \$127.5 million compared to \$2.9 million as of December 31, 2012.

We monitor the sources and uses of funds on a regular basis to maintain an acceptable liquidity position. The Bank's primary source of borrowings is the FHLB, from which the Bank is eligible to borrow up to 30 percent of its total assets. As of December 31, 2013, the total borrowing capacity available based on pledged collateral and the remaining available borrowing capacity were \$343.3 million and \$215.8 million, respectively, compared to \$275.1 million and \$272.2 million, respectively, as of December 31, 2012. The Bank's FHLB borrowings as of December 31, 2013 and 2012 totaled \$127.5 million and \$2.9 million, respectively, which represented 4.17 percent and 0.10 percent of total assets as of December 31, 2013 and 2012, respectively.

The amount that the FHLB is willing to advance differs based on the quality and character of qualifying collateral pledged by the Bank, and the advance rates for qualifying collateral may be adjusted upwards or downwards by the FHLB from time to time. To the extent deposit renewals and deposit growth are not sufficient to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans and investment securities and otherwise fund working capital needs and capital expenditures, the Bank may utilize the remaining borrowing capacity from its FHLB borrowing arrangement.

As a means of augmenting its liquidity, the Bank had an available borrowing source of \$87.1 million from the Federal Reserve Discount Window (the "Fed Discount Window"), to which the Bank pledged loans with a carrying value of \$118.4 million, and had no borrowings as of December 31, 2013. In December 2012, the Bank established a line of credit with Raymond James & Associates, Inc. for repurchase agreements up to a maximum of \$100.0 million.

The Bank has Contingency Funding Plans ("CFPs") designed to ensure that liquidity sources are sufficient to meet its ongoing obligations and commitments, particularly in the event of a liquidity contraction. The CFPs are designed to examine and quantify its liquidity under various "stress" scenarios. Furthermore, the CFPs provide a framework for management and other critical personnel to follow in the event of a liquidity contraction or in anticipation of such an event. The CFPs address authority for activation and decision making, liquidity options and the responsibilities of key departments in the event of a liquidity contraction.

Off-Balance Sheet Arrangements

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk similar to the risk involved in on-balance sheet items recognized in the Consolidated Balance Sheets.

The Bank's exposure to credit losses in the event of non-performance by the other party to commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for extending loan facilities to customers. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counterparty at the time of the credit extension.

The types of collateral that the Bank holds varies but may include accounts receivable, inventory, premises and equipment, and income-producing or borrower-occupied properties. The following table shows the distribution of undisbursed loan commitments as of the dates indicated:

	December 31, 2013	December 31, 2012
	<i>(In thousands)</i>	
Commitments to extend credit	\$ 246,161	\$ 182,746
Standby letters of credit	8,926	10,588
Commercial letters of credit	4,179	6,092
Unused credit card lines	12,223	13,459
Total undisbursed loan commitments	<u>\$ 271,488</u>	<u>\$ 212,885</u>

Contractual Obligations

Our contractual obligations, excluding accrued interest payments, as of December 31, 2013 are as follows:

	Less Than One Year	More Than One Year and Less Than Three Years	More Than Three Years and Less Than Five Years	More Than Five Years	Total
	<i>(In thousands)</i>				
Time deposits	\$ 910,636	\$ 89,080	\$ 3,889	\$ —	\$1,003,605
Federal home loan bank advances	127,546	—	—	—	127,546
Commitments to extend credit	246,161	—	—	—	246,161
Standby letter of credit	8,926	—	—	—	8,926
Operating lease obligations	5,347	9,100	3,445	2,034	19,926
Total	<u>\$1,298,616</u>	<u>\$ 98,180</u>	<u>\$ 7,334</u>	<u>\$ 2,034</u>	<u>\$1,406,164</u>

Operating lease obligations represent the total minimum lease payments under non-cancelable operating leases with remaining terms of up to nine years.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

For quantitative and qualitative disclosures regarding market risks in the Bank's portfolio, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations — Interest Rate Risk Management" and "—Capital Resources and Liquidity."

Item 8. Financial Statements and Supplementary Data

The financial statements required to be filed as a part of this Report are set forth on pages 62 through 113.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

As of December 31, 2013, Hanmi Financial carried out an evaluation of the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act, under the supervision and with the participation of our senior management, including our Chief Executive Officer (principal executive officer) and our Chief Financial Officer (principal financial and accounting officer). The purpose of the disclosure controls and procedures is to ensure that information required to be disclosed in the reports that are filed or submitted under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that Hanmi Financial's disclosure controls and procedures were effective as of the end of the period covered by this Annual Report.

Management's Annual Report on Internal Control Over Financial Reporting

The management of Hanmi Financial is responsible for establishing and maintaining adequate internal control over financial reporting pursuant to the rules and regulations of the SEC. Hanmi Financial's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Consolidated Financial Statements for external purposes in accordance with GAAP. Internal control over financial reporting includes those written policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the Company's assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles;
- provide reasonable assurance that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the Consolidated Financial Statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Hanmi Financial's internal control over financial reporting as of December 31, 2013. Management based this assessment on criteria for effective internal control over financial reporting described in *Internal Control-Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included an evaluation of the design of Hanmi Financial's internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of our Board of Directors.

Based on this assessment, management determined that, as of December 31, 2013, Hanmi Financial maintained effective internal control over financial reporting.

Changes in Internal Control Over Financial Reporting

During the quarter ended December 31, 2013, there has been no change in Hanmi Financial's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, Hanmi Financial's internal control over financial reporting.

Attestation Report of the Company's Registered Public Accounting Firm

KPMG LLP, the independent registered public accounting firm that audited and reported on the Consolidated Financial Statements of Hanmi Financial and its subsidiaries, has issued an audit report on Hanmi Financial's internal control over financial reporting as of December 31, 2013.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Hanmi Financial Corporation:

We have audited Hanmi Financial Corporation's (the "Company") internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control-Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Hanmi Financial Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control-Integrated Framework* (1992) issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Hanmi Financial Corporation and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013, and our report dated March 17, 2014 expressed an unqualified opinion on those consolidated financial statements.

Item 9B. Other Information

None.

Part III**Item 10. Directors, Executive Officers and Corporate Governance**

Except as hereinafter noted, the response to this item is incorporated by reference from the sections entitled “*Named Executive Officers*,” “*Election of Directors*,” “*Corporate Governance Principles and Board Matters*,” “*Executive Compensation*,” and “*Beneficial Ownership of Principal Stockholders and Management*” in Hanmi Financial’s definitive Proxy Statement for the 2014 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days after the close of Hanmi Financial’s fiscal year ended December 31, 2013 (or information will be provided in an amendment to this Annual Report on Form 10-K).

Code of Ethics

We have adopted a Code of Business Conduct and Ethics that applies to our principal executive officer, principal financial and accounting officer, controller and other persons performing similar functions. It will be provided to any stockholder without charge, upon the written request. Such requests should be addressed to Ms. Juliet Stone, General Counsel, Hanmi Financial Corporation, 3660 Wilshire Boulevard, Penthouse Suite A, Los Angeles, California 90010. It is also available on our website at www.hanmi.com.

Item 11. Executive Compensation

The information required by this item is set forth in the sections entitled “*Executive Compensation*” and “*NCGC Committee Report*” in Hanmi Financial’s definitive Proxy Statement for the 2014 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days after the close of Hanmi Financial’s fiscal year ended December 31, 2013 (or information will be provided in an amendment to this Form 10-K), and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item is set forth in the sections entitled “*Executive Compensation – Summary Compensation Table*” and “*Beneficial Ownership of Principal Stockholders and Management*” in Hanmi Financial’s definitive Proxy Statement for the 2014 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days after the close of Hanmi Financial’s fiscal year ended December 31, 2013 (or information will be provided by amendment to this Form 10-K), and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item is set forth in the sections entitled “*Certain Relationships and Related Transactions*” and “*Director Independence*” in Hanmi Financial’s definitive Proxy Statement for the 2014 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days after the close of Hanmi Financial’s fiscal year ended December 31, 2013 (or information will be provided by amendment to this Form 10-K), and is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

The information required by this item is set forth in the section entitled “*Ratification of the Appointment of the Independent Registered Public Accounting Firm*” in Hanmi Financial’s definitive Proxy Statement for the 2014 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days after the close of Hanmi Financial’s fiscal year ended December 31, 2013 (or information will be provided by amendment to this Form 10-K), and is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

- (1) The financial statements are listed in the Index to consolidated financial statements on page 62 of this Report.
- (2) All financial statement schedules have been omitted, as the required information is not applicable, not material or has been included in the notes to consolidated financial statements.
- (3) The exhibits required to be filed with this Report are listed in the exhibit index included herein at pages 115—116.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Hanmi Financial Corporation:

We have audited the accompanying consolidated balance sheets of Hanmi Financial Corporation and subsidiaries (the “Company”) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in stockholders’ equity, and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Hanmi Financial Corporation and subsidiaries as of December 31, 2013 and 2012, and the results of their operations, and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Hanmi Financial Corporation’s internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control-Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 17, 2014 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011

Note 1 — Summary of Significant Accounting Policies

Summary of Operations

Hanmi Financial Corporation (“Hanmi Financial,” the “Company,” “we,” “us” or “our”) was formed as a holding company of Hanmi Bank (the “Bank”) and registered with the Securities and Exchange Commission under the Act on March 17, 2001. Subsequent to its formation, each of the Bank’s shares was exchanged for one share of Hanmi Financial with an equal value. Our primary operations are related to traditional banking activities, including the acceptance of deposits and the lending and investing of money through operation of the Bank.

The Bank is a community bank conducting general business banking, with its primary market encompassing the Korean-American community as well as other ethnic communities in Los Angeles County, Orange County, San Bernardino County, San Diego County, the San Francisco Bay area, and the Silicon Valley area in Santa Clara County. The Bank’s full-service offices are located in markets where many of the businesses are run by immigrants and other minority groups. The Bank’s client base reflects the multi-ethnic composition of these communities. The Bank is a California state-chartered financial institution insured by the FDIC. As of December 31, 2013, the Bank maintained a network of 27 full-service branch offices in California and two loan production offices in Washington and Texas.

Our other subsidiaries, Chun-Ha Insurance Services, Inc. (“Chun-Ha”) and All World Insurance Services, Inc. (“All World”), were acquired in January 2007. Founded in 1989, Chun-Ha and All World are insurance agencies that offer a complete line of insurance products, including life, commercial, automobile, health, and property and casualty.

Basis of Presentation

The accounting and reporting policies of Hanmi Financial and subsidiaries conform, in all material respects, to U.S. generally accepted accounting principles (“GAAP”) and general practices within the banking industry. The following is a summary of the significant accounting policies consistently applied in the preparation of the accompanying Consolidated Financial Statements.

The number of shares of our common stock and the computation of basic and diluted earnings (loss) per share were adjusted retroactively for all periods presented to reflect the 1-for-8 reverse stock split, which became effective on December 19, 2011.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Hanmi Financial and our wholly owned subsidiaries, the Bank, Chun-Ha and All World. All intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant areas where estimates are made consist of the allowance for loan losses, other-than-temporary impairment, investment securities valuations and income taxes. Actual results could differ from those estimates.

Reclassifications

Certain reclassifications were made to the prior year’s presentation to conform to the current year’s presentation.

Cash and Cash Equivalents

Cash and cash equivalents include cash, due from banks, overnight federal funds sold and Treasury bills, all of which have original or purchased maturities of less than 90 days.

Restricted Cash

Effective June 30, 2011, the Bank was required to enter into a reserve account agreement with the SBA to sell loans into the secondary market. Under the agreement, the Bank was required to maintain a reserve account at a well-capitalized FDIC insured depository financial institution for the amount equal to the percentage of the guaranteed portion sold into the secondary market. The reserve account was terminated on February 4, 2013.

Securities

Securities are classified into three categories and accounted for as follows:

- (i) Securities that we have the positive intent and ability to hold to maturity are classified as “held to maturity” and reported at amortized cost;
- (ii) Securities that are bought and held principally for the purpose of selling them in the near future are classified as “trading securities” and reported at fair value. Unrealized gains and losses are recognized in earnings; and
- (iii) Securities not classified as held to maturity or trading securities are classified as “available for sale” and reported at fair value. Unrealized gains and losses are reported as a separate component of stockholders’ equity as accumulated other comprehensive income, net of income taxes.

Accreted discounts and amortized premiums on investment securities are included in interest income using the effective interest method over the remaining period to the call date or contractual maturity and, in the case of mortgage-backed securities and securities with call features, adjusted for anticipated prepayments. Unrealized and realized gains or losses related to holding or selling of securities are calculated using the specific-identification method.

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (“OTTI”) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors.

For debt securities, the classification of OTTI depends on whether we intend to sell the security or if it is more likely than not that we will be required to sell the security before recovery of its costs basis, and on the nature of the impairment. If we intend to sell a security or if it is more likely than not that we will be required to sell the security before recovery, an OTTI write-down is recognized in earnings equal to the entire difference between the security’s amortized cost basis and its fair value. If we do not intend to sell the security or it is not more likely than not that we will be required to sell the security before recovery, the OTTI write-down is separated into an amount representing credit loss, which is recognized in earnings, and the amount related to all other factors, which is recognized in other comprehensive income net of tax. A credit loss is the difference between the cost basis of the security and the present value of cash flows expected to be collected, discounted at the security’s effective interest rate at the date of acquisition. The cost basis of an other than temporarily impaired security is written down by the amount of impairment recognized in earnings. The new cost basis is not adjusted for subsequent recoveries in fair value.

Loans Receivable

We originate loans for investment, with such designation made at the time of origination. Loans receivable that we have the intent and ability to hold for the foreseeable future, or until maturity, are stated at their outstanding principal, reduced by an allowance for loan losses and net of deferred loan fees or costs on originated loans and unamortized premiums or discounts on purchased loans. Non-refundable fees and direct costs associated with the origination or purchase of loans are deferred and netted against outstanding loan balances. The deferred net loan fees and costs are recognized in interest income as an adjustment to yield over the loan term using the effective interest method. Discounts or premiums on purchased loans are accreted or amortized to interest income using the effective interest method over the remaining period to contractual maturity adjusted for anticipated prepayments. Interest on loans is credited to income as earned and is accrued only if deemed collectible. Accretion of discounts and deferred loan fees is discontinued when loans are placed on non-accrual status.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

Loans are placed on non-accrual status when, in the opinion of management, the full timely collection of principal or interest is in doubt. Generally, the accrual of interest is discontinued when principal or interest payments become more than 90 days past due. However, in certain instances, we may place a particular loan on non-accrual status earlier, depending upon the individual circumstances surrounding the loan's delinquency. When an asset is placed on non-accrual status, previously accrued but unpaid interest is reversed against current income. Subsequent collections of cash are applied as principal reductions when received, except when the ultimate collectability of principal is probable, in which case interest payments are credited to income. Non-accrual assets may be restored to accrual status when principal and interest become current and full repayment is expected. Interest income is recognized on the accrual basis for impaired loans not meeting the criteria for non-accrual.

Non-performing assets consist of loans on non-accrual status, loans 90 days or more past due and still accruing interest, loans restructured with troubled borrowers where the terms of repayment have been renegotiated resulting in a reduction or deferral of interest or principal, and other real estate owned ("OREO"). Loans are generally placed on non-accrual status when they become 90 days past due unless management believes the loan is adequately collateralized and in the process of collection. Additionally, the Bank may place loans that are not 90 days past due on non-accrual status, if management reasonably believes the borrower will not be able to comply with the contractual loan repayment terms and collection of principal or interest is in question.

Loans Held for Sale

Loans originated, or transferred from loans receivable, and intended for sale in the secondary market are carried at the lower of aggregate cost or fair market value. Fair market value, if lower than cost, is determined based on valuations obtained from market participants or the value of underlying collateral, calculated individually. A valuation allowance is established if the market value of such loans is lower than their cost and net unrealized losses, if any, are recognized through a valuation allowance by charges to income. Origination fees on loans held for sale, net of certain costs of processing and closing the loans, are deferred until the time of sale and are included in the computation of the gain or loss from the sale of the related loans.

Allowance for Loan Losses

Management believes the allowance for loan losses is adequate to provide for probable losses inherent in the loan portfolio. However, the allowance is an estimate that is inherently uncertain and depends on the outcome of future events. Management's estimates are based on previous loan loss experience; volume, growth and composition of the loan portfolio; the value of collateral; and current economic conditions. Our lending is concentrated in commercial, consumer, construction and real estate loans in greater Los Angeles County and Orange County.

Provisions to allowance for loan losses are made quarterly to recognize probable loan losses. The quarterly provision is based on the allowance need, which is determined through analysis involving quantitative calculations based on historic loss rates for general reserves and individual impairment calculations for specific allocations to impaired loans as well as qualitative adjustments.

In the first quarter of 2010, the look-back period was reduced from twelve quarters to eight quarters, with 60 percent weighting given to the most recent four quarters and 40 percent to the oldest four quarters, to place greater emphasis on losses taken by the Bank during the economic downturn. In the second quarter of 2013, management reevaluated the look-back period and restored the twelve quarter look-back period in order to capture a period of higher losses that would have otherwise been excluded. Risk factor calculations are weighted at 50 percent for the most recent four quarters, 33 percent for the next four quarters, and 17 percent for the oldest four quarters. Homogenous loans are collectively evaluated for loss potential. The change in methodology maintained the Bank's allowance at a level consistent with the prior quarter.

To determine general reserve requirements, existing loans are divided into 11 general loan pools of risk-rated loans as well as three homogenous loan pools. For risk-rated loans, migration analysis allocates historical losses by loan pool and risk grade to determine risk factors for potential loss inherent in the current outstanding loan portfolio. In addition, specific reserves are allocated for loans deemed "impaired."

When determining the appropriate level for allowance for loan losses, management considers qualitative adjustments for any factors that are likely to cause estimated credit losses associated with the Bank's current portfolio to differ from historical loss experience, including, but not limited to, national and local economic and business conditions, volume and geographic concentrations, and problem loan trends.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

To systematically quantify the credit risk impact of trends and changes within the loan portfolio, a credit risk matrix is utilized. The qualitative factors are considered on a loan pool by loan pool basis subsequent to, and in conjunction with, a loss migration analysis. The credit risk matrix provides various scenarios with positive or negative impact on the portfolio along with corresponding basis points for qualitative adjustments.

Loan losses are charged off, and recoveries are credited, to the allowance account. Additions to the allowance account are charged to the provision for credit losses. The allowance for loan losses is maintained at a level considered adequate by management to absorb probable losses in the loan portfolio. The adequacy of the allowance is determined by management based upon an evaluation and review of the loan portfolio, consideration of historical loan loss experience, current economic conditions, changes in the composition of the loan portfolio, analysis of collateral values and other pertinent factors.

Loans are measured for impairment when it is probable that not all amounts, including principal and interest, will be collected in accordance with the original contractual terms of the loan agreement. The amount of impairment and any subsequent changes are recorded through the provision for credit losses as an adjustment to the allowance for loan losses.

The Bank follows the “*Interagency Policy Statement on the Allowance for Loan and Lease Losses*” and, as an integral part of the quarterly credit review process, the allowance for loan losses and allowance for off-balance sheet items are reviewed for adequacy. The California Department of Business Oversight (“DBO”) and/or the Board of Governors of the Federal Reserve System (“Federal Reserve”) require the Bank to recognize additions to the allowance for loan losses based upon their assessment of the information available to them at the time of their examinations.

In general, the Bank will charge off a loan and declare a loss when its collectability is questionable and when the Bank can no longer justify presenting the loan as an asset on its balance sheet. To determine if a loan should be charged off, all possible sources of repayment are analyzed, including the potential for future cash flow from income or liquidation of other assets, the value of any collateral, and the strength of co-makers or guarantors. When these sources do not provide a reasonable probability that principal can be collected in full, the Bank will fully or partially charge off the loan.

For a real estate loan, including commercial term loans secured by collateral, any impaired portion is considered as loss if the loan is more than 90 days past due. In a case where the fair value of collateral is less than the loan balance and the borrower has no other assets or income to support repayment, the amount of the deficiency is considered loss and charged off.

For a commercial and industrial loan other than those secured by real estate, if the borrower is in the process of a bankruptcy filing in which the Bank is an unsecured creditor or deemed virtually unsecured by lack of collateral equity or lien position and the borrower has no realizable equity in assets and prospects for recovery are negligible, the loan is considered loss and charged off. Additionally, a commercial and industrial unsecured loan that is more than 120 days past due is considered loss and charged off.

An unsecured consumer loan where a borrower files for bankruptcy, the loan is considered loss within 60 days of receipt of notification of filing from the bankruptcy court. Other consumer loans are considered loss if they are more than 90 days past due. Other events, such as bankruptcy, fraud, or death result in charge offs being recorded in an earlier period.

Impaired Loans

Loans are identified and classified as impaired when it is probable that not all amounts, including principal and interest, will be collected in accordance with the contractual terms of the loan agreement. The Bank will consider the following loans as impaired: non-accrual loans or loans where principal or interest payments have been contractually past due for 90 days or more, unless the loan is both well-collateralized and in the process of collection; loans classified as troubled debt restructuring loans; or any loan classified as Substandard that the amount is over 5 percent of the Bank’s Tier 1 Capital.

The Bank considers whether the borrower is experiencing problems such as operating losses, marginal working capital, inadequate cash flow or business deterioration in realizable value. The Bank also considers the financial condition of a borrower who is in industries or countries experiencing economic or political instability.

When a loan is considered impaired, any future cash receipts on such loans will be treated as either interest income or return of principal depending upon management’s opinion of the ultimate risk of loss on the individual loan. Cash payments are treated as interest income where management believes the remaining principal balance is fully collectible.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

We evaluate loan impairment in accordance with applicable GAAP. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established. Additionally, impaired loans are specifically excluded from the quarterly migration analysis when determining the amount of the allowance for loan losses required for the period.

For impaired loans where the impairment amount is measured based on the present value of expected future cash flows discounted at the loan's original effective interest rate, any impairment that represents the change in present value attributable to the passage of time is recognized as provision for credit losses.

The amount of interest income recognized on impaired loans using a cash basis method is disclosed in Note 3 – Loans.

Troubled Debt Restructuring

A loan is identified as a troubled debt restructuring (“TDR”) loan when a borrower is experiencing financial difficulties and, for economic or legal reasons related to these difficulties, the Bank grants a concession to the borrower in the restructuring that it would not otherwise consider. The Bank has granted a concession when, as a result of the restructuring, it does not expect to collect all amounts due, including principal and/or interest accrued at the original terms of the loan. The concessions may be granted in various forms, including a below-market change in the stated interest rate, a reduction in the loan balance or accrued interest, an extension of the maturity date, or a note split with principal forgiveness. All troubled debt restructurings are reviewed for potential impairment. Generally, a nonaccrual loan that is restructured remains on nonaccrual status for a period of six months to demonstrate that the borrower can perform under the restructured terms. If the borrower's performance under the new terms is not reasonably assured, the loan remains classified as a nonaccrual loan. Loans classified as TDRs are reported as impaired loans.

Premises and Equipment

Premises and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed on the straight-line method over the estimated useful lives of the various classes of assets. The ranges of useful lives for the principal classes of assets are as follows:

Buildings and improvements	10 to 30 years
Furniture and equipment	3 to 7 years
Leasehold improvements	Term of lease or useful life, whichever is shorter
Software	3 years

Impairment of Long-Lived Assets

We account for long-lived assets in accordance with the provisions of FASB ASC 360, “*Property, Plant and Equipment*.” This requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Other Real Estate Owned

Assets acquired through loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. If fair value declines subsequent to foreclosure, valuation impairment is recorded through expense. Operating costs after acquisition are expensed.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

Servicing Assets

Servicing assets are recorded at the lower of amortized cost or fair value in accordance with the provisions of FASB ASC 860, “*Transfers and Servicing*.” The fair values of servicing assets represent either the price paid if purchased, or the allocated carrying amounts based on relative values when retained in a sale. Servicing assets are amortized in proportion to, and over the period of, estimated net servicing income. The fair value of servicing assets is determined based on the present value of estimated net future cash flows related to contractually specified servicing fees.

The servicing asset is recorded based on the present value of the contractually specified servicing fee, net of adequate compensation, for the estimated life of the loan, using a discount rate and a constant prepayment rate. Management periodically evaluates the servicing asset for impairment. Impairment, if it occurs, is recognized in a valuation allowance in the period of impairment.

Interest-only strips are recorded based on the present value of the excess of total servicing fee over the contractually specified servicing fee for the estimated life of the loan, calculated using the same assumptions as noted above. Such interest-only strips are accounted for at their estimated fair value, with unrealized gains or losses recorded as adjustments to accumulated other comprehensive income (loss).

Other Intangible Assets

Other intangible assets consist of acquired intangible assets arising from acquisitions, including trade names, carrier relationships and client/insured relationships. The acquired intangible assets were initially measured at fair value and then are amortized on the straight-line method over their estimated useful lives.

As required by FASB ASC 350, other intangible assets are assessed for impairment or recoverability whenever events or changes in circumstances indicate the carrying amount may not be recoverable.

Federal Home Loan Bank Stock

The Bank is a member of the Federal Home Loan Bank of San Francisco (“FHLB”) and is required to own common stock in the FHLB based upon the Bank’s balance of outstanding FHLB advances. FHLB stock is carried at cost and may be sold back to the FHLB at its carrying value. FHLB stock is periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends received are reported as dividend income.

Federal Reserve Bank Stock

The Bank is a member of the Federal Reserve Bank of San Francisco (“FRB”) and is required to maintain stock in the FRB based on a specified ratio relative to the Bank’s capital. FRB stock is carried at cost and may be sold back to the FRB at its carrying value. FRB stock is periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends received are reported as dividend income.

Bank-Owned Life Insurance

We have purchased single premium life insurance policies (“bank-owned life insurance”) on certain officers. The Bank is the beneficiary under the policy. In the event of the death of a covered officer, we will receive the specified insurance benefit from the insurance carrier. Bank-owned life insurance is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due, if any, that are probable at settlement.

Affordable Housing Investments

The Bank has invested in limited partnerships formed to develop and operate affordable housing units for lower income tenants throughout California. The partnership interests are accounted for utilizing the equity method of accounting. The costs of the investments are being amortized on a straight-line method over the life of related tax credits. If the partnerships cease to qualify during the compliance period, the credits may be denied for any period in which the projects are not in compliance and a portion of the credits previously taken is subject to recapture with interest. Such investments are recorded in other assets in the accompanying Consolidated Balance Sheets.

Income Tax

We provide for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Share-Based Compensation

We adopted FASB ASC 718, "*Compensation-Stock Compensation*," on January 1, 2006 using the "modified prospective" method. Under this method, awards that are granted, modified or settled after December 31, 2005 are measured and accounted for in accordance with FASB ASC 718. Also under this method, expense is recognized for services attributed to the current period for unvested awards that were granted prior to January 1, 2006, based upon the fair value determined at the grant date under SFAS No. 123, "*Accounting for Stock-Based Compensation*."

FASB ASC 718 requires that cash flows resulting from the realization of excess tax benefits recognized on awards that were fully vested at the time of adoption of FASB ASC 718 be classified as a financing cash inflow and an operating cash outflow on the Consolidated Statements of Cash Flows. Before the adoption of FASB ASC 718, we presented all tax benefits realized from the exercise of stock options as an operating cash inflow.

In addition, FASB ASC 718 requires that any unearned compensation related to awards granted prior to the adoption of FASB ASC 718 be eliminated against the appropriate equity accounts. As a result, the presentation of stockholders' equity was revised to reflect the transfer of the balance previously reported in unearned compensation to additional paid-in capital.

Earnings Per Share

Basic earnings per share is computed by dividing earnings available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution of securities that could share in the earnings.

Treasury Stock

We use the cost method of accounting for treasury stock. The cost method requires us to record the reacquisition cost of treasury stock as a deduction from stockholders' equity on the Consolidated Balance Sheets.

Recently Issued Accounting Standards

FASB ASU 2014-04 "Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (Topic 310-40)" was issued to define a term in substance a repossession or foreclosure and physical possession in accounting literature and when a creditor should derecognize the loan receivable and recognize the real estate property. The amendments in this update are intended to reduce diversity in practice by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendment is effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The adoption of FASB ASU 2014-04 is not expected to have a significant impact on our financial condition or result of operations.

FASB ASU 2014-01 "Accounting for Investments in Qualified Affordable Housing Projects (Topic 323)" was issued to provide guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. The amendments in this update permit reporting

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The amendment is effective for public business entities for annual periods and interim presorting periods within those annual periods, beginning after December 15, 2014. The adoption of FASB ASU 2014-01 is not expected to have a significant impact on our financial condition or result of operations.

FASB ASU 2013-11 “Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (Topic 740)” was issued to improve the reporting for unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The pronouncement is expected to reduce diversity in practice by providing guidance on the presentation of unrecognized tax benefits and will better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. The pronouncement is effective prospectively for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this pronouncement did not have a material impact on our consolidated financial statements.

FASB ASU 2013-02 “Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income (Topic 220)” was issued to address concerns raised in the initial issuance of ASU 2011-05, “*Presentation of Comprehensive Income*.” For items reclassified out of accumulated other comprehensive income into net income in their entirety, entities must disclose the effect of the reclassification on each affected net income line item. For accumulated other comprehensive income reclassification items that are not reclassified in their entirety into net income, entities must provide a cross reference to other required U.S. GAAP disclosures. This information may be provided either in the notes or parenthetically on the face of the statement that reports net income as long as all the information is disclosed in a single location. However, an entity is prohibited from providing this information parenthetically on the face of the statement that reports net income if it has items that are not reclassified in their entirety into net income. The amendments are effective for annual reporting periods beginning after December 15, 2012 and interim periods within those years. The adoption of FASB ASU 2013-02 did not have a significant impact on our financial condition or result of operations.

All individual securities that have been in a continuous unrealized loss position for 12 months or longer as of December 31, 2013 and December 31, 2012 had investment grade ratings upon purchase. The issuers of these securities have not established any cause for default on these securities and the various rating agencies have reaffirmed these securities' long-term investment grade status as of December 31, 2013. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated.

FASB ASC 320 requires other-than-temporarily impaired investment securities to be written down when fair value is below amortized cost in circumstances where: (1) an entity has the intent to sell a security; (2) it is more likely than not that an entity will be required to sell the security before recovery of its amortized cost basis; or (3) an entity does not expect to recover the entire amortized cost basis of the security. If an entity intends to sell a security or if it is more likely than not the entity will be required to sell the security before recovery, an OTTI write-down is recognized in earnings equal to the entire difference between the security's amortized cost basis and its fair value. If an entity does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the OTTI write-down is separated into an amount representing credit loss, which is recognized in earnings, and the amount related to all other factors, which is recognized in other comprehensive income.

The Company does not intend to sell these securities and it is not more likely than not that we will be required to sell the investments before the recovery of its amortized cost basis. In addition, the unrealized losses on municipal and corporate bonds are not considered other-than-temporarily impaired as the bonds are rated investment grade and there are no credit quality concerns with the issuers. Interest payments have been made as scheduled, and management believes this will continue in the future and that the bonds will be repaid in full as scheduled. Therefore, in management's opinion, all securities that have been in a continuous unrealized loss position for the past 12 months or longer as of December 31, 2013 and 2012 were not other-than-temporarily impaired, and therefore, no impairment charges as of December 31, 2013 and 2012 were warranted.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 *(Continued)*

Realized gains and losses on sales of investment securities, proceeds from sales of investment securities and the tax expense on sales of investment securities were as follows for the periods indicated:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Gross realized gains on sales of investment securities	\$ 1,602	\$ 1,447	\$ 2,674
Gross realized losses on sales of investment securities	(563)	(50)	(1,039)
Net realized gains on sales of investment securities	\$ 1,039	\$ 1,397	\$ 1,635
Proceeds from sales of investment securities	\$78,473	\$102,538	\$155,468
Tax expense on sales of investment securities	\$ 437	\$ 587	\$ 687

For the year ended December 31, 2013, there was a \$1.0 million net gain in earnings resulting from the redemption and sale of investment securities that had previously been recognized as net unrealized gains of \$3.3 million in comprehensive income. For the year ended December 31, 2012, there was a \$1.4 million net gain in earnings resulting from the redemption and sale of investment securities that had previously been recorded as net unrealized gains of \$1.7 million in comprehensive income.

Investment securities available for sale with carrying values of \$47.6 million and \$18.2 million as of December 31, 2013 and 2012, respectively, were pledged to secure FHLB advances, public deposits and for other purposes as required or permitted by law.

Note 3 — Loans

The Board of Directors and management review and approve the Bank's loan policy and procedures on a regular basis to reflect issues such as regulatory and organizational structure changes, strategic planning revisions, concentrations of credit, loan delinquencies and non-performing loans, problem loans, and policy adjustments.

Real estate loans are loans secured by liens or interest in real estate, to provide purchase, construction, and refinance on real estate properties. Commercial and industrial loans consist of commercial term loans, commercial lines of credit, and Small Business Administration ("SBA") loans. Consumer loans consist of auto loans, credit cards, personal loans, and home equity lines of credit. We maintain management loan review and monitoring departments that review and monitor pass graded loans as well as problem loans to prevent further deterioration.

Concentrations of Credit: The majority of the Bank's loan portfolio consists of commercial real estate and commercial and industrial loans. The Bank has been diversifying and monitoring commercial real estate loans based on property types, tightening underwriting standards, and portfolio liquidity and management, and has not exceeded certain specified limits set forth in the Bank's loan policy. Most of the Bank's lending activity occurs within Southern California.

For the year ended December 31, 2013, loans receivable of \$8.0 million were reclassified as loans held for sale, and loans held for sale of \$96.8 million were sold. For the year ended December 31, 2012, loans receivable of \$95.6 million were reclassified as loans held for sale, and loans held for sale of \$220.2 million were sold.

Allowance for Loan Losses and Allowance for Off-Balance Sheet Items

Activity in the allowance for loan losses and allowance for off-balance sheet items was as follows for the periods indicated:

	<u>As of and for the Year Ended December 31,</u>		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
	<i>(In thousands)</i>		
Allowance for loan losses:			
Balance at beginning of period	\$ 63,305	\$ 89,936	\$ 146,059
Actual charge-offs	(11,862)	(38,227)	(78,652)
Recoveries on loans previously charged off	5,536	4,439	9,993
Net loan charge-offs	(6,326)	(33,788)	(68,659)
Provision charged to operating expense	576	7,157	12,536
Balance at end of period	<u>\$ 57,555</u>	<u>\$ 63,305</u>	<u>\$ 89,936</u>
Allowance for off-balance sheet items:			
Balance at beginning of period	\$ 1,824	\$ 2,981	\$ 3,417
Provision charged to operating expense	(576)	(1,157)	(436)
Balance at end of period	<u>\$ 1,248</u>	<u>\$ 1,824</u>	<u>\$ 2,981</u>

The allowance for off-balance sheet items and provisions is maintained at a level believed to be sufficient to absorb estimated probable losses related to these unfunded credit facilities. The determination of the allowance adequacy is based on periodic

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

evaluations of the unfunded credit facilities including an assessment of the probability of commitment usage, credit risk factors for loans outstanding to these same customers, and the terms and expiration dates of the unfunded credit facilities. As of December 31, 2013 and 2012, the allowance for off-balance sheet items amounted to \$1.2 million and \$1.8 million, respectively. Net adjustments to the allowance for off-balance sheet items are included in the provision for credit losses.

The following table details the information on the allowance for loan losses by portfolio segment for the years ended December 31, 2013 and 2012:

Credit Quality Indicators

As part of the on-going monitoring of the credit quality of our loan portfolio, we utilize an internal loan grading system to identify credit risk and assign an appropriate grade (from (0) to (8)) for each and every loan in our loan portfolio. A third-party loan review is required on an annual basis. Additional adjustments are made when determined to be necessary. The loan grade definitions are as follows:

Pass: Pass loans, grades (0) to (4), are in compliance in all respects with the Bank's credit policy and regulatory requirements, and do not exhibit any potential or defined weaknesses as defined under "Special Mention (5)," "Substandard (6)" or "Doubtful (7)." This category is the strongest level of the Bank's loan grading system. It incorporates all performing loans with no credit weaknesses. It includes cash and stock/security secured loans or other investment grade loans. The following are sub categories within the Pass category, or grades (0) to (4):

Pass (0): Loans or commitments secured in full by cash or cash equivalents.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

- Pass (1): Loans or commitments requiring a very strong, well-structured credit relationship with an established borrower. The relationship should be supported by audited financial statements indicating cash flow well in excess of debt service requirements, excellent liquidity, and very strong capital.
- Pass (2): Loans or commitments requiring a well-structured credit that may not be as seasoned or as high quality as grade (1). Capital, liquidity, debt service capacity, and collateral coverage must all be well above average. This grade includes individuals with substantial net worth supported by liquid assets and strong income.
- Pass (3): Loans or commitments to borrowers exhibiting a fully acceptable credit risk. These borrowers should have sound balance sheets and significant cash flow coverage, although they may be somewhat more leveraged and exhibit greater fluctuations in earning and financing but generally would be considered very attractive to the Bank as a borrower. The borrower has historically demonstrated the ability to manage economic adversity. Real estate and asset-based loans with this grade must have characteristics that place them well above the minimum underwriting requirements. Asset-based borrowers assigned this grade must exhibit extremely favorable leverage and cash flow characteristics and consistently demonstrate a high level of unused borrowing capacity.
- Pass (4): Loans or commitments to borrowers exhibiting either somewhat weaker balance sheets or positive, but inconsistent, cash flow coverage. These borrowers may exhibit somewhat greater credit risk, and as a result, the Bank may have secured its exposure to mitigate the risk. If so, the collateral taken should provide an unquestionable ability to repay the indebtedness in full through liquidation, if necessary. Cash flows should be adequate to cover debt service and fixed obligations, although there may be a question about the borrower's ability to provide alternative sources of funds in emergencies. Better quality real estate and asset-based borrowers who fully comply with all underwriting standards and are performing according to projections would be assigned this grade.

Special Mention: A Special Mention credit, grade (5), has potential weaknesses that deserve management's close attention. If not corrected, these potential weaknesses may result in deterioration of the repayment of the debt and result in a Substandard classification. Loans that have significant actual, not potential, weaknesses are considered more severely classified.

Substandard: A Substandard credit, grade (6), has a well-defined weakness that jeopardizes the liquidation of the debt. A credit graded Substandard is not protected by the sound worth and paying capacity of the borrower, or of the value and type of collateral pledged. With a Substandard loan, there is a distinct possibility that the Bank will sustain some loss if the weaknesses or deficiencies are not corrected.

Doubtful: A Doubtful credit, grade (7), is one that has critical weaknesses that would make the collection or liquidation of the full amount due improbable. However, there may be pending events which may work to strengthen the credit, and therefore the amount or timing of a possible loss cannot be determined at the current time.

Loss: A loan classified as Loss, grade (8), is considered uncollectible and of such little value that their continuance as active bank assets is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be possible in the future. Loans classified Loss will be charged off in a timely manner.

Impaired Loans

Loans are considered impaired when non-accrual and principal or interest payments have been contractually past due for 90 days or more, unless the loan is both well-collateralized and in the process of collection; or they are classified as TDR loans to offer terms not typically granted by the Bank; or when current information or events make it unlikely to collect in full according to the contractual terms of the loan agreements; or there is a deterioration in the borrower's financial condition that raises uncertainty as to timely collection of either principal or interest; or full payment of both interest and principal is in doubt according to the original contractual terms.

We evaluate loan impairment in accordance with applicable GAAP. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established. Additionally, loans that are considered impaired are specifically excluded from the quarterly migration analysis when determining the amount of the allowance for loan losses required for the period.

The allowance for collateral-dependent loans is determined by calculating the difference between the outstanding loan balance and the value of the collateral as determined by recent appraisals. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage, using recent appraisals, on these loans on a quarterly basis and adjust the allowance accordingly.

December 31, 2013, 2012 and 2011 *(Continued)*

The following is a summary of interest foregone on impaired loans for the periods indicated:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Interest income that would have been recognized had impaired loans performed in accordance with their original terms	\$ 4,451	\$ 5,887	\$ 9,192
Less: Interest income recognized on impaired loans ⁽¹⁾	(3,708)	(4,541)	(8,348)
Interest foregone on impaired loans	<u>\$ 743</u>	<u>\$ 1,346</u>	<u>\$ 844</u>

⁽¹⁾ Includes interest recognized on accrual basis prior to classification as impaired.

There were no commitments to lend additional funds to borrowers whose loans are included above.

Non-Accrual Loans

Loans are placed on non-accrual status when, in the opinion of management, the full timely collection of principal or interest is in doubt. Generally, the accrual of interest is discontinued when principal or interest payments become more than 90 days past due, unless management believes the loan is adequately collateralized and in the process of collection. However, in certain instances, we may place a particular loan on non-accrual status earlier, depending upon the individual circumstances surrounding the loan's delinquency. When a loan is placed on non-accrual status, previously accrued but unpaid interest is reversed against current income. Subsequent collections of cash are applied as principal reductions when received, except when the ultimate collectability of principal is probable, in which case interest payments are credited to income. Non-accrual loans may be restored to accrual status when principal and interest payments become current and full repayment is expected.

The following table details non-accrual loans, disaggregated by loan class, as of the dates indicated:

	As of December 31,

	<u>As of December 31,</u>	
	<u>2013</u>	<u>2012</u>
	<i>(In thousands)</i>	
Non-accrual loans	\$25,877	\$37,279
Loans 90 days or more past due and still accruing	—	—
Total non-performing loans	<u>25,877</u>	<u>37,279</u>
Other real estate owned	756	774
Total non-performing assets	<u>\$26,633</u>	<u>\$38,053</u>

Loans on non-accrual status, excluding loans held for sale, totaled \$25.9 million as of December 31, 2013, compared to \$37.3 million as of December 31, 2012, representing a 30.6 percent decrease. Delinquent loans (defined as 30 days or more past due), excluding loans held for sale, were \$16.3 million as of December 31, 2013, compared to \$16.5 million as of December 31, 2012, representing a 1.2 percent decrease.

As of December 31, 2013, there were three OREOs located in Washington and California with a combined carrying value of \$756,000 and a valuation adjustment of \$56,000. As of December 31, 2012, there were two OREOs located in Illinois and Virginia with a combined carrying value of \$774,000 and no valuation adjustment.

Troubled Debt Restructuring

In April 2011, the FASB issued ASU 2011-02, “*A Creditor’s Determination of Whether a Restructuring is a Troubled Debt Restructuring*,” which clarifies the guidance for evaluating whether a restructuring constitutes a TDR. This guidance is effective for the first interim or annual period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. For the purposes of measuring impairment of loans that are newly considered impaired, the guidance should be applied prospectively for the first interim or annual period beginning on or after June 15, 2011.

As a result of the amendments in ASU 2011-02, we reassessed all restructurings that occurred on or after the beginning of the annual period and identified certain receivables as TDRs. Upon identifying those receivables as TDRs, we considered them impaired and applied the impairment measurement guidance prospectively for those receivables newly identified as impaired.

As of December 31, 2013, 2012 and 2011, total TDRs, excluding loans held for sale, were \$30.0 million, \$35.7 million and \$51.4 million, respectively. A debt restructuring is considered a TDR if we grant a concession that we would not have otherwise considered to the borrower, for economic or legal reasons related to the borrower's financial difficulties. Loans are considered to be TDRs if they were restructured through payment structure modifications such as reducing the amount of principal and interest due monthly and/or allowing for interest only monthly payments for six months or less. All TDRs are impaired and are individually evaluated for

specific impairment using one of these three criteria: (1) the present value of expected future cash flows discounted at the loan's effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral if the loan is collateral dependent.

At December 31, 2013, 2012 and 2011, TDRs, excluding loans held for sale, were subjected to specific impairment analysis, and \$2.8 million, \$3.6 million and \$14.2 million, respectively, of reserves relating to these loans were included in the allowance for loan losses.

December 31, 2011.

- (8) Includes modifications of \$1.1 million through reductions of principal or accrued interest for the year ended December 31, 2013.*
- (9) Includes a modification of \$149,000 through a reduction of principal or accrued interest for the year ended December 31, 2013.*

During the year ended December 31, 2013, we restructured monthly payments on 33 loans, with a net carrying value of \$8.6 million as of December 31, 2013, through temporary payment structure modifications or re-amortization. For the restructured loans on accrual status, we determined that, based on the financial capabilities of the borrowers at the time of the loan restructuring and the borrowers' past performance in the payment of debt service under the previous loan terms, performance and collection under the revised terms are probable.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 *(Continued)*

The following table details troubled debt restructurings that defaulted subsequent to the modifications occurring within the previous twelve months, disaggregated by loan class, for years ended December 31, 2013, 2012 and 2011, respectively:

	For the Year Ended					
	December 31, 2013		December 31, 2012		December 31, 2011	
	Number of Loans	Recorded Investment	Number of Loans	Recorded Investment	Number of Loans	Recorded Investment
<i>(In thousands except number of loans)</i>						
Commercial and industrial loans:						
Commercial term						
Unsecured	2	\$ 123	8	\$ 554	6	\$ 2,368
Secured by real estate	—	—	—	—	—	—
Commercial lines of credit	—	—	1	188	—	—
SBA loans	2	215	3	165	8	1,450
Total	4	\$ 338	12	\$ 907	14	\$ 3,818

Servicing Assets

The changes in servicing assets for the years ended December 31, 2013 and 2012 were as follows:

	As of December 31,	
	2013	2012
	<i>(In thousands)</i>	
Balance at beginning of period	\$ 5,542	\$ 3,720
Additions	2,755	2,889
Amortization	(1,463)	(1,067)
Balance at end of period	\$ 6,834	\$ 5,542

At December 31, 2013 and 2012, we serviced loans sold to unaffiliated parties in the amounts of \$350.0 million and \$297.2 million, respectively. These represented loans that have been sold for which the Bank continues to provide servicing. These loans are maintained off balance sheet and are not included in the loans receivable balance. All of the loans being serviced were SBA loans.

Note 4 — Premises and Equipment

The following is a summary of the major components of premises and equipment:

	As of December 31,	
	2013	2012
	<i>(In thousands)</i>	
Land	\$ 6,120	\$ 6,120
Building and improvements	9,248	9,197
Furniture and equipment	15,654	15,039
Leasehold improvements	10,389	10,320
Software	862	862
	42,273	41,538
Accumulated depreciation and amortization	(28,052)	(26,388)
Total premises and equipment, net	\$ 14,221	\$ 15,150

Depreciation and amortization expense totaled \$1.9 million, \$2.1 million and \$2.2 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

Note 5 — Other Intangible Assets

Other intangible assets were as follows for the periods indicated:

	Amortization Period	December 31, 2013			December 31, 2012		
		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
<i>(In thousands)</i>							
Other intangible assets:							
Trade names	20 years	\$ 970	\$ (338)	\$ 632	\$ 970	\$ (290)	\$ 680
Client/insured relationships	10 years	770	(539)	231	770	(462)	308
Carrier relationships	15 years	580	(272)	308	580	(233)	347
Total other intangible assets		\$ 2,320	\$ (1,149)	\$ 1,171	\$ 2,320	\$ (985)	\$ 1,335

The weighted-average amortization period for other intangible assets is 15.4 years. The total amortization expense for other intangible assets was \$164,000, \$198,000 and \$700,000 during the years ended December 31, 2013, 2012 and 2011, respectively.

Estimated future amortization expense related to other intangible assets for each of the next five years is as follows:

Year Ending December 31,	Amount
	<i>(In thousands)</i>
2014	\$ 164
2015	164
2016	164
2017	87
2018	87
Thereafter	505
Total	\$ 1,171

As of December 31, 2013 and 2012, management is not aware of any circumstances that would indicate impairment of other intangible assets. There was no impairment charges related to other intangible asset recorded through earnings in 2013 or 2012.

Note 6 — Deposits

At December 31, 2013, the scheduled maturities of time deposits are as follows:

Year Ending December 31,	Time Deposits of \$100,000 or More	Other Time Deposits	Total
	<i>(In thousands)</i>		
2014	\$451,211	\$459,424	\$ 910,635
2015	51,355	28,446	79,801
2016	4,380	4,900	9,280
2017	—	3,889	3,889
2018 and thereafter	—	—	—
Total	\$506,946	\$496,659	\$1,003,605

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

A summary of interest expense on deposits was as follows for the periods indicated:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Savings	\$ 1,812	\$ 2,152	\$ 2,757
Money market checking and NOW accounts	2,912	3,085	3,461
Time deposits of \$100,000 or more	4,094	7,290	13,855
Other time deposits	3,860	3,350	3,885
Total interest expense on deposits	<u>\$12,678</u>	<u>\$15,877</u>	<u>\$23,958</u>

Accrued interest payable on deposits totaled \$3.4 million and \$3.5 million at December 31, 2013 and 2012, respectively. Total deposits reclassified to loans due to overdrafts at December 31, 2013 and 2012 were \$1.1 million and \$1.8 million, respectively.

Note 7 — FHLB Advances and Other Borrowings

FHLB advances and other borrowings consisted of the following:

	As of December 31,	
	2013	2012
	<i>(In thousands)</i>	
FHLB advances	\$127,546	\$2,935
Total FHLB advances	<u>\$127,546</u>	<u>\$2,935</u>

FHLB advances represent collateralized obligations with the FHLB. The following is a summary of contractual maturities pertaining to FHLB advances:

Year of Maturity	Amount	Weighted-Average Interest Rate
	<i>(In thousands)</i>	
2014	\$127,546	0.16%
Total	<u>\$127,546</u>	<u>0.16%</u>

The following is financial data pertaining to FHLB advances:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Weighted-average interest rate at end of year	0.16%	5.27%	5.27%
Weighted-average interest rate during the year	2.28%	5.27%	1.00%
Average balance of FHLB advances	\$ 6,573	\$3,354	\$ 66,191
Maximum amount outstanding at any month-end	\$127,546	\$3,273	\$153,622

We have pledged investment securities available for sale and loans receivable with carrying values of \$11.2 million and \$414.7 million, respectively, as collateral with the FHLB for this borrowing facility. The total borrowing capacity available from the collateral that has been pledged is \$343.3 million, of which \$215.8 million remained available as of December 31, 2013. At December 31, 2013, we had \$87.1 million available for use through the Fed Discount Window, as we pledged loans with a carrying value of \$118.4 million, and there were no borrowings.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 *(Continued)*

At December 31, 2013, advances from the FHLB were \$127.5 million, an increase of \$124.6 million from the December 31, 2012 balance of \$2.9 million. At December 31, 2013, the FHLB advances, primarily consisting of overnight borrowings, have remaining maturities of less than one year.

For the years ended December 31, 2013, 2012 and 2011 interest expense on FHLB advances were \$151,000, \$165,000 and \$662,000, respectively, and the weighted-average interest rates were 2.28 percent, 5.27 percent and 1.00 percent, respectively.

Note 8 — Income Taxes

In accordance with the provisions of FASB ASC 740, the Company periodically reviews its income tax positions based on tax laws and regulations and financial reporting considerations, and records adjustments as appropriate. This review takes into consideration the status of current taxing authorities' examinations of the Company's tax returns, recent positions taken by the taxing authorities on similar transactions, if any, and the overall tax environment.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	Year Ended December 31,		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
	<i>(In thousands)</i>		
Unrecognized tax benefits at beginning of year	\$1,254	\$1,281	\$ 940
Gross increases for tax positions of prior years	—	14	515
Lapse of statute of limitations	—	(41)	(174)
Unrecognized tax benefits at end of year	<u>\$1,254</u>	<u>\$1,254</u>	<u>\$1,281</u>

The total amount of unrecognized tax benefits that would affect our effective tax rate if recognized was \$1.0 million as of December 31, 2013, 2012 and 2011.

For the year ended December 31, 2013, there was no addition in unrecognized tax benefit except increases in accrued interest. For the year ended December 31, 2012, unrecognized tax benefits decreased by \$27,000 in connection with the tax position taken on expense related to prior business acquisition cost. For the year ended December 31, 2011, unrecognized tax benefits increased by \$341,000 in connection with the tax position taken on expense related to non-qualified stock option and prior business acquisition costs.

In 2013, 2012 and 2011, the Company accrued interest of \$45,000, \$41,000 and \$181,000 for uncertain tax benefits, respectively. As of December 31, 2013, 2012 and 2011, the total amounts of accrued interest related to uncertain tax positions, net of federal tax benefit, were \$403,000, \$360,000 and \$319,000, respectively. We account for interest and penalties related to uncertain tax positions as part of our provision for federal and state income taxes. Accrued interest and penalties are included within the related tax liability line on the Consolidated Balance Sheets.

Unrecognized tax benefits primarily include state exposures from California Enterprise Zone interest deductions and income tax treatment for prior business acquisition costs, dividend income from FRB stock and expense related to non-qualified stock options. We believe that it is reasonably possible that certain remaining unrecognized tax positions, each of which are individually insignificant, may be recognized by the end of 2014 because of a lapse of the statute of limitations. We do not anticipate any material change in the total amount of unrecognized tax benefits to occur within the next twelve months.

As of December 31, 2013, the Company was subject to examination by various federal and state tax authorities for the years ended December 31, 2004 through 2012. As of December 31, 2013, the Company was subjected to audit or examination by Internal Revenue Service for the 2009 tax year and California FTB for the 2008 and 2009 tax years. Management does not anticipate any material changes in our financial statements due to the result of the audits.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

A summary of the provision (benefit) for income taxes was as follows:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Current expense:			
Federal	\$12,028	\$ 4,993	\$704
State	407	(19)	29
Total current expense	<u>12,435</u>	<u>4,974</u>	<u>733</u>
Deferred expense:			
Federal	8,235	(25,836)	—
State	1,415	(26,506)	—
Total deferred expense	<u>9,650</u>	<u>(52,342)</u>	<u>—</u>
Provision (benefit) for income taxes	<u>\$22,085</u>	<u>\$(47,368)</u>	<u>\$733</u>

Deferred tax assets and liabilities were as follows:

	Year Ended December 31,		
	2013	2012	2011
	<i>(In thousands)</i>		
Deferred tax assets:			
Credit loss provision	\$ 27,607	\$ 29,995	\$ 42,712
Depreciation	1,180	1,253	1,240
Net operating loss carryforward	31,140	33,875	50,255
Unrealized loss on securities available for sale, interest-only strips	7,641	—	—
Tax credit	5,661	5,426	5,803
State taxes	—	—	91
Other	2,831	3,766	3,517
Total deferred tax assets	<u>76,060</u>	<u>74,315</u>	<u>103,618</u>
Deferred tax liabilities:			
Mark to market	(10,112)	(5,562)	(14,820)
Purchase accounting	(3,083)	(3,217)	(3,119)
Unrealized gain on securities available for sale, interest-only strips	—	(3,096)	(1,752)
State taxes	(8,848)	(9,429)	—
Other	(2,250)	(2,013)	(1,658)
Total deferred tax liabilities	<u>(24,293)</u>	<u>(23,317)</u>	<u>(21,349)</u>
Valuation allowance	—	—	(82,269)
Net deferred tax assets	<u>\$ 51,767</u>	<u>\$ 50,998</u>	<u>\$ —</u>

As of December 31, 2013, the Company's net deferred tax assets were primarily the result of net operating loss carryforwards, allowance for loan losses and unrealized loss on securities available for sale. For the year ended December 31, 2012, the Company recorded a net valuation allowance release of \$62.6 million based on management's reassessment of the amount of its deferred tax assets that are more likely than not to be realized. A valuation allowance of \$82.3 million was recorded against its gross deferred tax asset balance as of December 31, 2011.

As of each reporting date, management considers the realization of deferred tax assets based on management's judgment of various future events and uncertainties, including the timing and amount of future income, as well as the implementation of various tax planning strategies to maximize realization of deferred tax assets. A valuation allowance is provided when it is more likely than not that some portion of deferred tax assets will not be realized. As of December 31, 2013, management determined that no valuation allowance for deferred tax assets is required, as management believes it is more likely than not that deferred tax assets will be realized.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

principally through future reversals of existing taxable temporary differences. Management further believes that future taxable income will be sufficient to realize the benefits of temporary deductible differences that cannot be realized through carry-back to prior years or through the reversal of future temporary taxable differences.

As of December 31, 2013, the Company had net operating loss carryforwards of \$31.2 million and \$186.3 million for federal and state income tax purposes, respectively, which are available to offset future taxable income, if any, through 2031.

Reconciliation between the federal statutory income tax rate and the effective tax rate is shown in the following table:

	Year Ended December 31,		
	2013	2012	2011
Federal statutory income tax rate	35.00%	35.00%	35.00%
State taxes, net of federal tax benefits	4.37%	0.03%	0.00%
Tax-exempt municipal securities	-0.16%	-0.32%	-0.26%
Tax credit—federal	-1.41%	-2.10%	-2.97%
Other	-2.17%	-2.16%	-0.80%
Valuation allowance	0.00%	140.59%	28.50%
Effective tax rate	35.63%	110.14%	2.47%

Note 9 — Stockholders' Equity

Stock Warrants

As part of the agreement dated as of July 27, 2010 with Cappello Capital Corp., the placement agent in connection with our best efforts offering and the financial advisor in connection with our completed rights offering, we issued warrants to purchase 250,000 shares of our common stock for services performed. The warrants have an exercise price of \$9.60 per share. According to the agreement, the warrants vested on October 14, 2010 and are exercisable until its expiration on October 14, 2015. The Company followed the guidance of FASB ASC Topic 815-40, "*Derivatives and Hedging—Contracts in Entity's Own Stock*," which establishes a framework for determining whether certain freestanding and embedded instruments are indexed to a company's own stock for purposes of evaluation of the accounting for such instruments under existing accounting literature. Under GAAP, the issuer is required to measure the fair value of the equity instruments in the transaction as of earlier of (i) the date at which a commitment for performance by the counterparty to earn the equity instruments is reached or (ii) the date at which the counterparty's performance is complete. The fair value of the warrants at the date of issuance totaling \$2.0 million was recorded as a liability and a cost of equity, which was determined by the Black-Scholes option pricing model. The expected stock volatility was based on historical volatility of our common stock over the expected term of the warrants. We used a weighted average expected stock volatility of 111.46 percent. The expected life assumption was based on the contract term of five years. The dividend yield of zero was based on the fact that we had no intention to pay cash dividends for the term at the grant date. The risk free rate of 2.07 percent used for the warrants was equal to the zero coupon rate in effect at the time of the grant.

Upon re-measuring the fair value of the stock warrants remaining, the fair value was \$2,000 at December 31, 2013, compared to \$906,000 at December 31, 2012. We used a weighted average expected stock volatility of 25.97 percent and a remaining contractual life of 1.6 years based on the contract terms. We also used a dividend yield of 1.29 percent and the risk free rate of 0.43 percent used for the warrants was equal to the zero coupon rate in effect at the end of the measurement period.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

Note 10 — Accumulated Other Comprehensive Income

Activity in accumulated other comprehensive income for the year ended December 31, 2013 and 2012 was as follows:

	<u>Unrealized Gains and Losses on Available-for-Sale Securities</u>	<u>Unrealized Gains and Losses on Interest Rate Swap</u>	<u>Unrealized Gains and Losses on Interest-Only Strip</u>	<u>Tax(Expense) Benefit</u>	<u>Total</u>
	<i>(In thousands)</i>				
For the year ended December 31 2013:					
Balance at beginning of period	\$ 7,348	\$ —	\$ 16	\$ (1,946)	\$ 5,418
Other comprehensive (loss) income before reclassification	(24,496)	—	—	10,737	(13,759)
Reclassification from accumulated other comprehensive income	(1,039)	—	—	—	(1,039)
Period change	(25,535)	—	—	10,737	(14,798)
Balance at end of period	\$ (18,187)	\$ —	\$ 16	\$ 8,791	\$ (9,380)
For the year ended December 31, 2012:					
Balance at beginning of period	\$ 4,115	\$ (9)	\$ 20	\$ (602)	\$ 3,524
Other comprehensive income (loss) before reclassification	4,337	9	(4)	(1,344)	2,998
Reclassification from accumulated other comprehensive income	(1,104)	—	—	—	(1,104)
Period change	3,233	9	(4)	(1,344)	1,894
Balance at end of period	\$ 7,348	\$ —	\$ 16	\$ (1,946)	\$ 5,418

For the year ended December 31, 2013, there was a \$1.0 million reclassification from accumulated other comprehensive income to gains in earnings resulting from the redemption and sale of available-for-sale securities. The \$1.0 million reclassification adjustment out of accumulated other comprehensive income was included in net gain on sales of investment securities under non-interest income. The securities were previously recorded as an unrealized gain of \$3.3 million in accumulated other comprehensive income.

For the years ended December 31, 2012, there was a \$1.1 million reclassification from accumulated other comprehensive income to gains in earnings, which resulted from the redemption and sale of available-for-sale securities, and a \$292,000 reclassification from other comprehensive loss to OTTI charge in earnings, which resulted from write-down of the value of investment securities to its fair value. The reclassification adjustments of a \$1.4 million gain and a \$292,000 loss out of accumulated other comprehensive income were included in net gain on sales of investment securities and impairment loss on investment securities, respectively, under non-interest income. The securities were previously recorded as an unrealized gain of \$1.7 million in accumulated other comprehensive income.

Note 11 — Regulatory Matters

Risk-Based Capital

Federal bank regulatory agencies require bank holding companies and banks to maintain a minimum ratio of qualifying total capital to risk-weighted assets of 8.0 percent and a minimum ratio of Tier 1 capital to risk-weighted assets of 4.0 percent. In addition to the risk-based guidelines, federal bank regulatory agencies require bank holding companies and banks to maintain a minimum ratio of Tier 1 capital to average assets, referred to as the leverage ratio, of 4.0 percent.

In order for banks to be considered “well capitalized,” federal bank regulatory agencies require them to maintain a minimum ratio of qualifying total capital to risk-weighted assets of 10.0 percent and a minimum ratio of Tier 1 capital to risk-weighted assets of 6.0 percent. In addition to the risk-based guidelines, federal bank regulatory agencies require depository institutions to maintain a minimum ratio of Tier 1 capital to average assets, referred to as the leverage ratio, of 5.0 percent.

Hanmi Financial Corporation and Subsidiaries

Hanmi Bank	\$405,801	14.33%	\$113,278	4.00%	\$141,597	5.00%

Regulatory Capital Rule Adjustments

In July 2013, the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation approved the Basel III regulatory capital framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act changes. The rules revise minimum capital requirements and adjust prompt corrective action thresholds. The rules also revise the regulatory capital elements, add a new common equity Tier I capital ratio, and increase the minimum Tier I capital ratio requirement. The revisions permit banking organizations to retain, through a one-time election, the existing treatment for accumulated other comprehensive income. Additionally, the rules implement a new capital conservation buffer. Under the final rules, institutions are subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its capital level falls below the capital conservation buffer amount. The rules will become effective January 1, 2015 for smaller, non-complex banking organizations with full implementation of the capital conservation buffer and certain deductions and adjustments to regulatory capital through January 1, 2019. The Company will continue to evaluate the new changes, and expects that the Company and the Bank will meet the capital requirements.

Note 12 — Fair Value Measurements

Fair Value Measurements

FASB ASC 820, “*Fair Value Measurements and Disclosures*,” defines fair value, establishes a framework for measuring fair value including a three-level valuation hierarchy, and expands disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The three-level fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value are defined as follows:

- Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- Level 2 - Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.
- Level 3 - Significant unobservable inputs that reflect a company’s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Fair value is used on a recurring basis for certain assets and liabilities in which fair value is the primary basis of accounting. Additionally, fair value is used on a non-recurring basis to evaluate assets or liabilities for impairment or for disclosure purposes.

We record investment securities available for sale at fair value on a recurring basis. Certain other assets, such as loans held for sale, impaired loans, other real estate owned, and other intangible assets, are recorded at fair value on a non-recurring basis. Non-recurring fair value measurements typically involve assets that are periodically evaluated for impairment and for which any impairment is recorded in the period in which the re-measurement is performed.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument below:

Investment securities available for sale – The fair values of investment securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges. If quoted prices are not available, fair values are measured using matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities’ relationship to other benchmark quoted securities, or other model-based valuation techniques requiring observable inputs other than quoted prices such as yield curve, prepayment speeds, and default rates. Level 1 investment securities include U.S. government and agency debentures and equity securities that are traded on an active exchange or by dealers or brokers in active over-the-counter markets. The fair value of these securities is determined by quoted prices on an active exchange or over-the-counter market. Level 2 investment securities primarily include mortgage-backed securities, municipal bonds, collateralized mortgage obligations, and SBA loan pool securities. In determining the fair value of the securities categorized as Level 2, we obtain reports from nationally recognized broker-dealers detailing the fair value of each investment security held as of each reporting date. The broker-dealers use prices obtained from nationally recognized pricing services to value our fixed income securities. The fair value of the municipal bonds is determined based on a proprietary model maintained by the broker-dealers. We review the prices obtained for reasonableness based on our understanding of the marketplace, and also consider any credit issues related to the bonds. As we have not made any adjustments to the market quotes provided to us and as they are based on observable market data, they have been categorized as Level 2 within the fair value hierarchy. Level 3 investment securities are instruments that are not traded in the market. As such, no observable market data for the instrument is available, which necessitates the use of significant unobservable inputs.

As of December 31, 2013, we had a zero coupon tax credit municipal bond of \$748,000, compared to \$779,000 as of December 31, 2012. This bond was recorded at estimated fair value using a discounted cash flow method, and was measured on a recurring basis with Level 3 inputs. Key assumptions used in measuring the fair value of the tax credit bond as of December 31, 2013 were discount rate and cash flows. The discount rate was derived from the term structure of Bank Qualified (“BQ”) “A-” rated municipal bonds, as the tax credit bond’s guarantee had the similar credit strength. The contractual future cash flows were the tax credits to be received for a remaining life of 1.2 years. If the discount rate is adjusted down to the term structure of BQ “BBB-” rating municipal bonds, the tax credit bond’s value would decline by 0.61 percent. We do not anticipate a significant deterioration of the tax credit bond’s credit quality. Management reviews the discount rate on an ongoing basis based on current market rates.

SBA loans held for sale – SBA loans held for sale are carried at the lower of cost or fair value. As of December 31, 2013 and

2012, we had zero and \$7.8 million of SBA loans held for sale, respectively. Management obtains quotes, bids or pricing indication sheets on all or part of these loans directly from the purchasing financial institutions. Premiums received or to be received on the quotes, bids or pricing indication sheets are indicative of the fact that cost is lower than fair value. At December 31, 2012, the entire balance of SBA loans held for sale was recorded at its cost. We record SBA loans held for sale on a nonrecurring basis with Level 2 inputs.

Non-performing loans held for sale – We reclassify certain non-performing loans as held for sale when we decide to sell those loans. The fair value of non-performing loans held for sale is generally based upon the quotes, bids or sales contract prices which approximate their fair value. Non-performing loans held for sale are recorded at estimated fair value less anticipated liquidation cost. As of December 31, 2013 and 2012, we had zero and \$484,000 of non-performing loans held for sale, respectively, which are measured on a nonrecurring basis with Level 2 inputs.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (*Continued*)

Stock warrants - The Company followed the guidance of FASB ASC Topic 815- 40, “*Derivatives and Hedging—Contracts in Entity’s Own Stock*,” which establishes a framework for determining whether certain freestanding and embedded instruments are indexed to a company’s own stock for purposes of evaluation of the accounting for such instruments under existing accounting literature. Under GAAP, the issuer is required to measure the fair value of the equity instruments in the transaction as of earlier of (i) the date at which a commitment for performance by the counterparty to earn the equity instruments is reached or (ii) the date at which the counterparty’s performance is complete. The fair value of the warrants was recorded as a liability and a cost of equity, which was determined by the Black-Scholes option pricing modeling and was measured on a recurring basis with Level 3 inputs.

Assets:					
Municipal bonds-tax exempt ⁽¹⁾	\$ 779	\$ —	\$ —	\$ (31)	\$ 748
Liabilities:					
Stock warrants ⁽²⁾	\$ 906	\$ (843)	\$ (61)	\$ —	\$ 2

⁽¹⁾ Reflects a zero coupon tax credit municipal bond. As the Company was not able to obtain a price from independent external pricing service providers, the discounted cash flow method was used to determine its fair value. The bond carried a par value of \$700,000 and an amortized value of \$699,000 with a remaining life of 1.2 years at December 31, 2013.

⁽²⁾ Reflects warrants for our common stock issued in connection with services Cappello Capital Corp. provided to us as a placement agent in connection with our best efforts public offering and as our financial adviser in connection with our completed rights offering. The warrants were immediately exercisable when issued at an exercise price of \$9.60 per share of our common stock and expire on October 14, 2015. See "Note 9 – Stockholders' Equity" for more details.

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

As of December 31, 2013 and 2012, assets and liabilities measured at fair value on a non-recurring basis are as follows:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	
	<u>Quoted Prices in Active Markets for Identical Assets</u>	<u>Significant Observable Inputs With No Active Market With Identical Characteristics</u>	<u>Significant Unobservable Inputs</u>	<u>Loss During The Years Ended</u>
<i>(In thousands)</i>				
December 31, 2013				
Assets:				
Non-performing loans held for sale	\$ —	\$ —	\$ —	\$ —
Impaired loans ⁽¹⁾	—	36,254	1,738	2,431
Other real estate owned ⁽²⁾	—	756	—	10
December 31, 2012				
Assets:				
Non-performing loans held for sale ⁽³⁾	\$ —	\$ 484	\$ —	\$ 3,747
Impaired loans ⁽⁴⁾	—	27,844	8,888	580
Other real estate owned ⁽⁵⁾	—	774	—	301

⁽¹⁾ Includes real estate loans of \$8.6 million, commercial and industrial loans of \$28.1 million, and consumer loans of \$1.3 million.

⁽²⁾ Includes properties from the foreclosure of a residential property loan of \$756,000.

⁽³⁾ Includes a SBA loan of \$484,000.

⁽⁴⁾ Includes real estate loans of \$8.7 million, commercial and industrial loans of \$27.0 million, and consumer loans of \$1.0 million.

⁽⁵⁾ Includes properties from the foreclosure of real estate loans of \$774,000.

FASB ASC 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured on a recurring basis or non-recurring basis are discussed above.

The estimated fair value of financial instruments has been determined by using available market information and appropriate

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

valuation methodologies. However, considerable judgment is required to interpret market data in order to develop estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that we could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The estimated fair values of financial instruments were as follows:

	December 31, 2013		December 31, 2012	
	Carrying or Contract Amount	Estimated Fair Value	Carrying or Contract Amount	Estimated Fair Value
	<i>(In thousands)</i>			
Financial assets:				
Cash and cash equivalents	\$ 179,357	\$ 179,357	\$ 268,047	\$ 268,047
Restricted cash	—	—	5,350	5,350
Investment securities available for sale	530,926	530,926	451,060	451,060
Loans receivable, net of allowance for loan losses	2,177,498	2,204,069	1,986,051	1,981,669
Loans held for sale	—	—	8,306	8,306
Accrued interest receivable	7,055	7,055	7,581	7,581
Investment in federal home loan bank stock	14,060	14,060	17,800	17,800
Investment in federal reserve bank stock	11,196	11,196	12,222	12,222
Financial liabilities:				
Noninterest-bearing deposits	819,015	819,015	720,931	720,931
Interest-bearing deposits	1,693,310	1,693,739	1,675,032	1,680,211
Borrowings	127,546	127,249	85,341	85,414
Accrued interest payable	3,366	3,366	11,775	11,775
Off-balance sheet items:				
Commitments to extend credit	246,161	190	182,746	146
Standby letters of credit	8,926	25	10,588	24

The methods and assumptions used to estimate the fair value of each class of financial instruments for which it was practicable to estimate that value are explained below:

Cash and cash equivalents – The carrying amounts of cash and cash equivalents approximate fair value due to the short-term nature of these instruments (Level 1).

Restricted cash – The carrying amount of restricted cash approximates its fair value (Level 1).

Investment securities – The fair value of investment securities, consisting of investment securities available for sale, is generally obtained from market bids for similar or identical securities, from independent securities brokers or dealers, or from other model-based valuation techniques described above (Level 1, 2 and 3).

Loans receivable, net of allowance for loan losses – The fair value for loans receivable is estimated based on the discounted cash flow approach. The discount rate was derived from the associated yield curve plus spreads and reflects the offering rates offered by the Bank for loans with similar financial characteristics. Yield curves are constructed by product and payment types. These rates could be different from what other financial institutions could offer for these loans. No adjustments have been made for changes in credit within the loan portfolio. It is our opinion that the allowance for loan losses relating to performing and nonperforming loans results in a fair valuation of such loans. Additionally, the fair value of our loans may differ significantly from the values that would have been used had a ready market existed for such loans and may differ materially from the values that we may ultimately realize (Level 3).

Loans held for sale – Loans held for sale are carried at the lower of aggregate cost or fair market value, as determined based upon quotes, bids or sales contract prices, or as may be assessed based upon the fair value of the collateral which is obtained from recent real estate appraisals (Level 2). Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustment is typically significant and results in Level 3 classification of the inputs for determining fair value.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 (Continued)

Accrued interest receivable – The carrying amount of accrued interest receivable approximates its fair value (Level 1).

Investment in Federal Home Loan Bank and Federal Reserve Bank stock – The carrying amounts of investment in FHLB and FRB stock approximate fair value as such stock may be resold to the issuer at carrying value (Level 1).

Non-interest-bearing deposits – The fair value of non-interest-bearing deposits is the amount payable on demand at the reporting date (Level 2).

Interest-bearing deposits – The fair value of interest-bearing deposits, such as savings accounts, money market checking, and certificates of deposit, is estimated based on discounted cash flows. The cash flows for non-maturity deposits, including savings accounts and money market checking, are estimated based on their historical decaying experiences. The discount rate used for fair valuation is based on interest rates currently being offered by the Bank on comparable deposits as to amount and term (Level 3).

Borrowings – Borrowings consist of FHLB advances, junior subordinated debentures and other borrowings. Discounted cash flows based on current market rates for borrowings with similar remaining maturities are used to estimate the fair value of borrowings (Level 3).

Accrued interest payable – The carrying amount of accrued interest payable approximates its fair value (Level 1).

Stock warrants – The fair value of stock warrants is determined by the Black-Scholes option pricing model. The expected stock volatility is based on historical volatility of our common stock over expected term of the warrants. The expected life assumption is based on the contract term and dividend yield is based on the company’s annual dividend divided by the current share price. The risk free rate used for the warrants is equal to the zero coupon rate in effect at the time of the grant (Level 3).

Commitments to extend credit and standby letters of credit – The fair values of commitments to extend credit and standby letters of credit are based upon the difference between the current value of similar loans and the price at which the Bank has committed to make the loans (Level 3).

Note 13 — Share-based Compensations

At December 31, 2013, we had three incentive plans, the Year 2000 Stock Option Plan (the “2000 Plan”), the 2007 Equity Compensation Plan (the “2007 Plan”) which replaced the 2000 Plan and the 2013 Equity Compensation Plan (the “2013 Plan” and with the 2000 Plan and 2007 Plan, the “Plans”) which replaced the 2007 Plan.

The 2013 Plan provides awards of any options, stock appreciation right, restricted stock award, restricted stock unit award, share granted as a bonus or in lieu of another award, dividend equivalent, other stock-based award or performance award, together with any other right or interest to a participant under the plan. Plan participant includes executives and other employees, officers, directors, consultants and other persons who provide services to the Company or its related entities. Although no future stock options may be granted under the 2007 Plan and 2000 Plan, certain employees, directors and officers of Hanmi Financial and its subsidiaries still hold options to purchase Hanmi Financial common stock under the 2013 Plan.

Under the 2013 Plan, we may grant equity incentive awards for up to 1,500,000 shares of common stock. As of December 31, 2013, 1,078,668 shares were still available for issuance under the 2013 Plan.

The table below shows the share-based compensation expense and related tax benefits for the periods indicated:

	<u>Year Ended December 31,</u>		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
	<i>(In thousands)</i>		
Share-based compensation expense	\$ 705	\$ 478	\$ 608
Related tax benefits	\$ 32	\$ 201	\$ 256

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 *(Continued)*

As of December 31, 2013, unrecognized share-based compensation expense was as follows:

	Unrecognized Expense	Average Expected Recognition Period
	<i>(In thousands)</i>	
Stock option awards	\$ 1,538	2.4 years
Restricted stock awards	1,666	2.7 years
Total unrecognized share-based compensation expense	\$ 3,204	2.5 years

2013 and 2007 Equity Compensation Plans and 2000 Stock Option Plan

Stock Options

All stock options granted under the Plans have an exercise price equal to the fair market value of the underlying common stock on the date of grant. Stock options granted under the Plans generally vest based on three to five years of continuous service and expire 10 years from the date of grant. Certain option and share awards provide for accelerated vesting if there is a change in control (as defined in the Plan). New shares of common stock are issued or treasury shares are utilized upon the exercise of stock options.

The weighted-average estimated fair value per share of options granted under the Plans was as follows:

	Year Ended December 31,		
	2013	2012	2011
Weighted-average estimated fair value per share of options granted	\$4.48	\$5.40	\$6.23

The weighted-average fair value per share of options granted was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	Year Ended December 31,		
	2013	2012	2011
Weighted-average assumption			
Dividend yield	1.61%	—	—
Expected volatility	43.67%	65.23%	103.76%
Expected term	3.0 years	3.0 years	3.2 years
Risk-free interest rate	0.79%	0.32%	1.04%

Expected volatility was determined based on the historical weekly volatility of our stock price over a period equal to the expected term of the options granted. The expected term of the options represents the period that options granted are expected to be outstanding based primarily on the historical exercise behavior associated with previous option grants. The risk-free interest rate was based on the U.S. Treasury yield curve at the time of grant for a period equal to the expected term of the options granted.

(1) Intrinsic value represents the difference between the closing stock price on the last trading day of the period, which was \$21.89 as of December 31, 2013, and the exercise price, multiplied by the number of options.

Restricted Stock Awards

Restricted stock awards under the Plans become fully vested after three to five years of continued employment from the date of grant. Hanmi Financial becomes entitled to an income tax deduction in an amount equal to the taxable income reported by the holders of the restricted shares when the restrictions are released and the shares are issued. Restricted shares are forfeited if officers and employees terminate prior to the lapsing of restrictions. Forfeitures of restricted stock are treated as cancelled shares.

The table below provides information for restricted stock awards under the 2013 Plan for the periods indicated:

	2013		2012		2011	
	Number of Shares	Weighted-Average Grant Date Fair Value Per Share	Number of Shares	Weighted-Average Grant Date Fair Value Per Share	Number of Shares	Weighted-Average Grant Date Fair Value Per Share

Note 14 — Earnings per Share

Earnings per share (“EPS”) is calculated on both a basic and a diluted basis. Basic EPS excludes dilution and is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from the issuance of common stock that then shared in earnings, excluding common shares in treasury. Unvested restricted stock is excluded from the calculation of weighted-average common shares for basic EPS. For diluted EPS, weighted-average common shares include the impact of restricted stock under the treasury method.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 *(Continued)*

The following table is a reconciliation of the components used to derive basic and diluted EPS for the periods indicated:

	<u>Net Income</u> <i>(Numerator)</i>	<u>Weighted- Average Shares</u> <i>(Denominator)</i>	<u>Per Share Amount</u>
	<i>(In thousands, except share and per share data)</i>		
Year ended December 31, 2013			
Basic EPS	\$ 39,906	31,598,913	\$ 1.26
Effect of dilutive securities - options, warrants and unvested restricted stock	—	97,607	—
Diluted EPS	<u>\$ 39,906</u>	<u>31,696,520</u>	<u>\$ 1.26</u>
Year ended December 31, 2012			
Basic EPS	\$ 90,374	31,475,510	\$ 2.87
Effect of dilutive securities - options, warrants and unvested restricted stock	—	40,072	—
Diluted EPS	<u>\$ 90,374</u>	<u>31,515,582</u>	<u>\$ 2.87</u>
Year ended December 31, 2011			
Basic EPS	\$ 28,147	20,403,549	\$ 1.38
Effect of dilutive securities - options, warrants and unvested restricted stock	—	19,435	—
Diluted EPS	<u>\$ 28,147</u>	<u>20,422,984</u>	<u>\$ 1.38</u>

For the years ended December 31, 2013, 2012 and 2011, there were 60,400, 301,200 and 409,875 options, warrants and shares of unvested restricted stock outstanding, respectively, that were not included in the computation of diluted EPS because their effect would be anti-dilutive.

Note 15 — Employee Benefits

401(k) Plan

We have a Section 401(k) plan for the benefit of substantially all of our employees. We match 75 percent of participant contributions to the 401(k) plan up to 8 percent of each 401(k) plan participant's annual compensation. Contributions to the 401(k) plan were \$1.0 million for the years ended December 31, 2013, 2012 and 2011.

Bank-Owned Life Insurance

In 2001 and 2004, we purchased single premium life insurance policies called bank-owned life insurance covering certain officers. The Bank is the beneficiary under the policy. In the event of the death of a covered officer, we will receive the specified insurance benefit from the insurance carrier.

Deferred Compensation Plan

Effective November 1, 2006, the Board of Directors approved the Hanmi Financial Corporation Deferred Compensation Plan (the "DCP"). The DCP is unfunded, and a non-qualified deferred compensation program for directors and certain key employees whereby they may defer a portion of annual compensation for payment upon retirement of the amount deferred plus a guaranteed return. The liabilities for the deferred compensation plan and interest thereon were zero both as of December 31, 2013 and 2012.

Hanmi Financial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2013, 2012 and 2011 *(Continued)*

Note 16 — Commitments and Contingencies

We lease our premises under non-cancelable operating leases. At December 31, 2013, future minimum annual rental commitments under these non-cancelable operating leases, with initial or remaining terms of one year or more, were as follows:

<u>Year Ending December 31,</u>	<u>Amount</u>
2014	\$ 5,347
2015	4,948
2016	4,152
2017	2,234
2018	1,211
Thereafter	2,034
Total	<u>\$ 19,926</u>

For the years ended December 31, 2013, 2012 and 2011, rental expenses recorded under such leases amounted to \$5.6 million, \$5.5 million and \$5.4 million, respectively.

Litigation

In the normal course of business, we are involved in various legal claims. Management has reviewed all legal claims against us with in-house or outside legal counsel and has taken into consideration the views of such counsel as to the outcome of the claims. In management's opinion, the final disposition of all such claims will not have a material adverse effect on our financial position or results of operations.

Note 17 — Off-Balance Sheet Commitments

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk similar to the risk involved with on-balance sheet items recognized in the Consolidated Balance Sheets.

The Bank's exposure to credit losses in the event of non-performance by the other party to commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for extending loan facilities to customers. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, was based on management's credit evaluation of the counterparty.

Collateral held varies but may include accounts receivable, inventory, premises and equipment, and income-producing or borrower-occupied properties. The following table shows the distribution of undisbursed loan commitments as of the dates indicated:

	<u>December 31,</u> <u>2013</u>	<u>December 31,</u> <u>2012</u>
	<i>(In thousands)</i>	
Commitments to extend credit	\$ 246,161	\$ 182,746
Standby letters of credit	8,926	10,588
Commercial letters of credit	4,179	6,092
Unused credit card lines	12,223	13,459
Total undisbursed loan commitments	<u>\$ 271,488</u>	<u>\$ 212,885</u>

Note 18 — Liquidity

Hanmi Financial

Management believes that Hanmi Financial, on a stand-alone basis, has adequate liquid assets to meet its operating cash needs through December 31, 2014. Hanmi Financial redeemed \$30.9 million of trust preferred securities (“TPS”) in March 2013, and fully paid the remaining \$51.5 million of TPS in April 2013.

Hanmi Bank

The principal objective of our liquidity management program is to maintain the Bank’s ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs. Management believes that the Bank, on a stand-alone basis, has adequate liquid assets to meet its current obligations. The Bank’s primary funding source will continue to be deposits originating from its branch platform. The Bank’s wholesale funds historically consisted of FHLB advances and brokered deposits. As of December 31, 2013, the Bank had no brokered deposits, and had a FHLB advance of \$127.5 million compared to \$2.9 million as of December 31, 2012.

We monitor the sources and uses of funds on a regular basis to maintain an acceptable liquidity position. The Bank’s primary source of borrowings is the FHLB, from which the Bank is eligible to borrow up to 30 percent of its total assets. As of December 31, 2013, the total borrowing capacity available based on pledged collateral and the remaining available borrowing capacity were \$343.3 million and \$215.8 million, respectively, compared to \$275.1 million and \$272.2 million, respectively, as of December 31, 2012. The Bank’s FHLB borrowings as of December 31, 2013 and 2012 totaled \$127.5 million and \$2.9 million, respectively, which represented 4.17 percent and 0.10 percent of total assets as of December 31, 2013 and 2012, respectively.

The amount that the FHLB is willing to advance differs based on the quality and character of qualifying collateral pledged by the Bank, and the advance rates for qualifying collateral may be adjusted upwards or downwards by the FHLB from time to time. To the extent deposit renewals and deposit growth are not sufficient to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans and investment securities and otherwise fund working capital needs and capital expenditures, the Bank may utilize the remaining borrowing capacity from its FHLB borrowing arrangement.

As a means of augmenting its liquidity, the Bank had an available borrowing source of \$87.1 million from the Federal Reserve Discount Window (the “Fed Discount Window”), to which the Bank pledged loans with a carrying value of \$118.4 million, and had no borrowings as of December 31, 2013. In December 2012, the Bank established a line of credit with Raymond James & Associates, Inc. for repurchase agreements up to a maximum of \$100.0 million.

The Bank has Contingency Funding Plans (“CFPs”) designed to ensure that liquidity sources are sufficient to meet its ongoing obligations and commitments, particularly in the event of a liquidity contraction. The CFPs are designed to examine and quantify its liquidity under various “stress” scenarios. Furthermore, the CFPs provide a framework for management and other critical personnel to follow in the event of a liquidity contraction or in anticipation of such an event. The CFPs address authority for activation and decision making, liquidity options and the responsibilities of key departments in the event of a liquidity contraction.

Note 19 — Segment Reporting

Through our branch network and lending units, we provide a broad range of financial services to individuals and companies located primarily in Southern California. These services include demand, time and savings deposits; and commercial and industrial, real estate and consumer lending. While our chief decision makers monitor the revenue streams of our various products and services, operations are managed and financial performance is evaluated on a company-wide basis. Accordingly, we consider all of our operations to be aggregated in one reportable operating segment.

Certification of Chief Executive Officer

I, C. G. Kum, President and Chief Executive Officer, certify that:

1. I have reviewed this Annual Report on Form 10-K of Hanmi Financial Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
