Balanced Growth

Generating Balanced Growth

Our brands compete in large and growing food categories that are on-trend with consumer tastes around the world. We're investing in our established brands while also developing new products. And we're building our business in developed markets while increasing our presence in emerging markets worldwide. Our goal is to generate balanced, long-term growth.

To our Shareholders

Ken Powell
Chairman and
Chief Executive Officer

I appreciate this opportunity to give you an update on General Mills' recent business performance and our plans for continuing growth in the years ahead.

Fiscal 2012 was characterized by the highest input-cost inflation that we've experienced in more than three decades. Our supply chain costs – primarily food ingredients and energy – rose more than 10 percent during the year ended May 27, 2012. This sharp inflation, roughly double the average annual inflation rate we use for long-term planning assumptions, restrained our earnings growth for the year. In addition, slow economic recovery kept many consumer budgets under pressure. In this environment, we took strategic actions that increased our worldwide sales base and strengthened our portfolio. In particular, we increased advertising and media investment on our base business, we sustained a high level of new product activity worldwide, and we made several acquisitions that expand our participation in fast-growing food categories and emerging markets around the globe. We also took restructuring actions designed to improve our organizational effectiveness and alignment on key growth strategies.

General Mills' net sales grew 12 percent in fiscal 2012 to reach \$16.7 billion. The international Yoplait yogurt business that we acquired in July 2011 contributed 7 points of net sales growth, and sales for our base business grew 5 percent. Segment operating profit increased 2 percent to exceed \$3 billion for the first time in company history. Profits grew at a slower rate than sales primarily due to the

higher input costs, the change in our business mix to include the Yoplait acquisition, and an 8 percent increase in worldwide advertising and media investment supporting our brands.

Diluted earnings per share (EPS) of \$2.35 were below prior-year results primarily due to changes in market-to-market valuation of certain commodity positions in both years, as well as restructuring charges recorded in the fourth quarter of fiscal 2012. Adjusted diluted EPS, which excludes restructuring expense, market-to-market effects, and certain other items affecting comparability of results, totaled \$2.56 in 2012 compared to \$2.48 a year ago.

Fiscal 2012

GIS

S&P 500 Index

S&P Packaged Foods Index

Last 4 Fiscal Years

(compound annual return)

Results for our U.S. Retail segment reflected the challenging packaged foods industry environment. Branded and private label food manufacturers increased prices last year across many grocery categories to partially offset higher input costs, and food industry volumes were weaker as a result. Our 2012 U.S. Retail net sales grew 3 percent to \$10.5 billion, but volume as measured in pounds declined 6 percent. Segment operating profit of \$2.3 billion was 2 percent below year-ago levels, reflecting higher input costs, lower volume, and a 5 percent increase in advertising and media expense.

New products generated 5 percent of U.S. Retail segment sales in 2012, with particularly strong contributions from *Fiber One* 90-calorie brownie snack bars, Peanut Butter *Multi Grain Cheerios* cereal, and *Yoplait* yogurt and granola parfaits. Each of our U.S. Retail divisions generated net sales that matched or exceeded year-ago levels, with the exception of *Yoplait USA*, where lower volumes on certain established product lines offset strong growth by *Yoplait Go-GURT* and *Yoplait* Greek yogurt varieties. We increased our share of retail dollar sales in several key product categories. In particular, our U.S. cereal market share grew for the fifth consecutive year, and exceeds 31 percent of category sales. Our share of the \$3.2 billion grain snacks category increased by nearly 5 percentage points to 36 percent.

Our Bakeries and Foodservice segment competes primarily in U.S. channels for food eaten away from home. While foodservice industry trends

were generally weak in 2012, reflecting the broader economic climate, our Bakeries and Foodservice net sales grew 8 percent to \$2.0 billion. This included growth in sales to foodservice distributors and operators, to convenience stores, and to bakery and national restaurant accounts. As anticipated, segment operating profit of \$287 million was below unusually strong year-ago levels.

Sales and profit results for our International segment included 10 months of contribution from the acquired *Yoplait* international business. Net sales grew 46 percent in 2012 to reach \$4.2 billion. Foreign currency translation contributed 1 point of sales growth. Excluding currency effects, sales essentially doubled in Europe and rose 28 percent in Canada, reflecting the acquisition. Net sales grew 17 percent in the Asia/Pacific region and 14 percent in Latin America. International segment operating profit grew 47 percent to reach \$430 million. Excluding the *Yoplait* acquisition, our International segment net sales and profit still grew at double-digit rates.

Our Cereal Partners Worldwide (CPW) and Häagen-Dazs Japan (HDJ) joint ventures generated a combined \$88 million in after-tax earnings in 2012. This was below 2011 levels primarily due to higher effective tax rates and a particularly difficult operating environment for HDJ following the March 2011 earthquakes and tsunamis. Our 50 percent share of combined CPW and HDJ net sales, which is not consolidated in General Mills results, rose 5 percent to nearly \$1.3 billion.

Input Cost Inflation

Percent

Gross Margin

Percent of net sales

Our input costs rose more than 10 percent in fiscal 2012, the highest increase we've seen in years. We were able to offset some, but not all, of that cost increase through Holistic Margin Management (HMM), our companywide productivity initiative.

Our financial results in fiscal 2012 build on a track record of consistent growth in recent years. Since 2007, General Mills' net sales and segment operating profit have both grown at a 6 percent compound annual rate. And our adjusted diluted EPS (this measure excludes certain items affecting comparability of results) has increased at a 10 percent compound rate. These results meet or exceed our targets for long-term growth, shown below.

General Mills Long-term Growth Model

Growth Factor	Compound Annual Growth Target
Net Sales	Low single-digit
Segment Operating Profit	Mid single-digit
Adjusted Diluted Earnings per Share	High single-digit
Dividend Yield	2 to 3 percent
Total Return to Shareholders	Double-digit

In fiscal 2012, total return to General Mills shareholders through stock price performance and dividends was 3 percent. This was below the return generated by our peer group of packaged food companies, and below our long-term target for shareholder returns, but it was above the return generated by the broader market in 2012. As shown in the chart on the previous page, over the past four fiscal years, General Mills has delivered a double-digit compound annual return to shareholders – superior performance over a challenging period for the capital markets.

Returns to General Mills shareholders in fiscal 2013 will include the 8 percent dividend increase we

announced in June 2012, to a new annualized rate of \$1.32 per share. General Mills and its predecessor firm have now paid dividends without interruption or reduction for 113 years. We see dividend growth over time as an important component of our value creation for shareholders.

Looking Ahead, our Goal is to Continue Generating Balanced Growth

As we begin our 2013 fiscal year, our goal is to generate continued growth, balanced across several key dimensions.

- We want to generate growth in our **core, developed markets** – while we expand our business in **emerging markets** worldwide.
- We target sales and earnings growth from **established brands** – and we launch **new items** that we believe can become consumer favorites over time.
- We build plans to drive growth in **traditional grocery stores** – and in the many **other retail formats** selling food today.
- Our marketing plans include strong investment in **traditional media** – but we're also investing in **new digital and social media** applications.
- And we build plans designed to generate growth in the **current year** – and **over the long term**.

In recent years, we've worked to shift General Mills' business mix beyond the U.S. to participate

A Selection of our New Products Launched in 2012

in faster-growing markets worldwide. We've made good progress and in 2012, a full 25 percent of our sales came from outside the U.S. This doesn't include the growing sales of our international joint ventures (which are not consolidated), or the fiscal 2013 Yoki Alimentos S.A. acquisition in Brazil. Including joint venture sales, international operations generate roughly 30 percent of the total. We expect our international businesses to lead the company's growth in the years ahead.

We plan to generate ongoing sales and profit increases by keeping our key established brands vital and growing. We'll also introduce brand extensions and new items that we believe can become sustaining consumer favorites. You can see several of our recent introductions pictured above, and you'll find others throughout our annual report. Targeted acquisitions are part of our growth plan, too. I've already mentioned the Yoplait international business, and Yoki in Brazil. We also have added the [Food Should Taste Good](#) line of wholesome salty snacks to our U.S. portfolio, and the Parampara Foods meal starters business in India.

In total, we expect to generate good growth in sales and operating profit in 2013. Cost savings from Holistic Margin Management (HMM) initiatives are expected to offset the 2 to 3 percent inflation we've forecast for this year. Our plan also includes investments to fuel longer-term growth. These include strong investment in marketing and merchandising for our U.S. yogurt business, where we have

lagged the rapid growth of the new Greek segment of the market. We'll also make investments behind the Yoplait business in Canada that we will run beginning this fall. And we are investing in development activities to accelerate our growth in emerging markets, particularly China. We believe this balanced approach – targeting growth in the current year, and over the longer term – serves our company and our shareholders well.

A Note of Thanks

Our company's growth and success is the product of 34,500 talented employees around the world. I'll close this letter by thanking General Mills people across our organization for all that you do, every day, to build our company. I'd particularly like to acknowledge John Machuzick, Senior Vice President and President of our Bakeries and Foodservice business, who retired this summer following a distinguished 34-year career with General Mills.

I'd also like to thank you for your investment in General Mills. We appreciate your confidence in our business and its prospects, and we look forward to reporting on our continuing growth.

Kendall J. Powell
Chairman and Chief Executive Officer
August 2, 2012

Generating Balanced Growth

General Mills now has five global product platforms that account for more than 60 percent of our net sales. We're building these platforms in our core, developed markets and in emerging markets worldwide.

Ready-to-eat Cereal

We market cereal through our wholly owned businesses in North America and through Cereal Partners Worldwide, our 50/50 joint venture with Nestlé.

Throughout the years, we've taken a balanced approach to growing our business. By innovating on well-established brands like [Cheerios](#), [Yoplait](#) and [Nature Valley](#), we've kept them vibrant and growing. At the same time, we've introduced new brands that meet changing consumer needs, like [Fiber One](#) cereals and snacks, [Cascadian Farm](#) organic cereals and [Wanchai Ferry](#) frozen Chinese cuisine.

We're growing our brands in markets around the world. Ten years ago, 10 percent of our sales were generated outside of the U.S. Today, approximately 30 percent of our sales come from non-U.S. markets, including our proportionate share of joint venture sales. While the U.S. remains a very attractive — and growing — core market, we've been increasing our presence in emerging markets where a

Refrigerated Yogurt

As of July 2011, we market [Yoplait](#) yogurt globally in partnership with Sodiaal, a dairy cooperative in France. Our other yogurt brands include [Liberté](#) in North America and [Mountain High](#) in the U.S.

growing middle class is creating heightened demand for convenient food products. For example, our net sales in China are growing at a double-digit rate, approaching \$550 million in fiscal 2012. We also have a small but fast-growing business in India, and we recently acquired the Yoki food business in Brazil.

We'll continue to drive growth in fiscal 2013 and beyond by focusing

Super-premium Ice Cream

Our [Häagen-Dazs](#) brand is available in more than 80 countries, including China.

Convenient Meals

Our [Old El Paso](#), [Wanchai Ferry](#), [Progresso](#) and [Helper](#) brands give consumers great options for a quick and easy meal.

Wholesome Snack Bars

[Nature Valley](#) and [Cascadian Farm](#) granola bars, [Fiber One](#) bars and [Lärabar](#) fruit and nut bars are nutritious snack choices.

on our five global platforms shown here. The categories where these businesses compete are large, and growing at mid- to high-single-digit rates worldwide. You can read more about how we are building our global businesses on the following pages.

General Mills Fiscal 2012 Worldwide Net Sales*

- Ready-to-eat Cereal*
- Convenient Meals
- Refrigerated Yogurt
- Wholesome Snack Bars
- Super-premium Ice Cream*
- All Other Businesses

*Includes our proportionate share of joint venture net sales.

Building our Brands in the **U.S.**

The ready-to-eat cereal category generates \$10 billion in retail sales in the U.S. We've increased our dollar share of the category in each of the last five years.

Growing Cereal Sales Around the World

High in nutrition and low in calories, ready-to-eat cereal is a great food choice for consumers everywhere.

We're generating good sales growth by expanding many of our established cereal brands. In the U.S., effective advertising and a new peanut butter flavor drove 21 percent retail sales

growth for *Multi Grain Cheerios*. Retail sales for *Cascadian Farm* organic cereals grew 19 percent in 2012, including new varieties of America's No. 1 granola brand.

Cereal eaten away from home is a growth opportunity for us, too. For example, breakfast programs in U.S. schools have increased at a 5 percent compound rate over the past three years. Our sales in this channel are outpacing that growth, and we are the cereal

market leader in U.S. school breakfast programs.

Our cereal brands also have great growth opportunities outside the U.S. In Canada, *Chocolate Cheerios* and gluten-free varieties of *Chex* cereals contributed to 4 percent constant-currency net sales growth for our cereal business in this market. Cereal Partners Worldwide (CPW), our joint venture with Nestlé, has been showing good growth in developed

Innovating in Cereal Markets **Worldwide**

In Canada, our cereal business gained 2 points of market share in 2012. Cereal Partners Worldwide, our joint venture with Nestlé, is the No. 2 cereal company outside North America, with a 23 percent value share.

Cereal Consumption per Capita

Annual kilograms per person

Source: Euromonitor 2011

cereal markets, such as Australia, the UK and France. And CPW holds leading share positions in emerging markets, such as Russia and Turkey.

Per capita cereal consumption is growing in markets around the world, yet consumption is still quite low in many countries. So we see great growth opportunities ahead for our cereal brands.

Fitness is CPW's largest brand. It is performing well in emerging markets, like Turkey, as we emphasize the weight management benefits of this great-tasting cereal.

Broadening our **International** Snacks Portfolio

Wholesome snack bars are an \$11 billion category worldwide. In the U.S., we've gained more than 10 points of market share over the past five years, and we're expanding our brands in markets around the world.

Fast-growing Wholesome Options

Healthy snack bars and yogurt are large, fast-growing food categories in markets around the world.

Retail sales for the wholesome snack bar category are projected to grow at a 6 percent compound rate worldwide over the next five years. Our [Nature Valley](#) granola bars are available in nearly

80 markets today. We continue to enter new countries and introduce new varieties, like *Nature Valley* Protein bars, with 10 grams of protein per serving. In the U.S., 90-calorie [Fiber One](#) brownies generated more than \$100 million in retail sales in their first year. And new sweet and salty [über bars](#) extend our [Lärabar](#) brand of natural fruit and nut bars.

Yogurt is a \$73 billion global category, and sales are projected

to grow at a 7 percent pace, as yogurt consumption is still developing in many markets around the world. We've marketed [Yoplait](#) yogurt in the U.S. since 1977, focusing on a variety of segments, such as light yogurt and offerings for kids. In 2013, we have more innovation coming, including a 100-calorie [Yoplait Greek](#) yogurt and multipacks of [Trix](#) yogurt for kids. We're also expanding [Mountain High](#) all-natural yoghurt into more U.S. retail outlets.

Building our **U.S.** and **European** Yogurt Brands

Our yogurt business generates \$1.4 billion in net sales in the U.S. alone. In addition, we have more than \$1 billion in net sales in international markets.

Yogurt Consumption per Capita

Annual kilograms per person

Source: Euromonitor 2011

In Europe, we posted sales and share gains with innovation on yogurt brands like *Calin* and *Perle de Lait*. And in Canada, retail sales for *Liberté* are growing at a 50 percent pace, making it a leader in the Greek yogurt segment. We'll expand this brand in the U.S. in 2013.

With our broad snack and yogurt portfolio, we like the growth prospects for our brands in these fast-growing, good-for-you categories.

Retail sales for [Yoplait Go-GURT](#) yogurt in a tube grew 11 percent in fiscal 2012 with more new flavors popular with kids.

Our Convenient Meals Span the **Globe**

The global convenient meals category is projected to grow at a 4 percent pace. We compete in many markets with products like *Hamburger Helper* in the U.S., *Wanchai Ferry* dumplings in China, and *Pasta Master* entrées in Australia.

Convenience for Dinner and Dessert

As the middle class expands in markets around the world, the demand for convenient, great-tasting foods will continue to grow.

The convenient meals category generates more than \$90 billion in worldwide retail sales. Families in 60 markets enjoy *Old El Paso* Mexican meal kits – net sales for

this brand are greater outside the U.S. than in the U.S., and since 2008, they've been growing at a 5 percent compound rate internationally on a constant-currency basis. In China, net sales for *Wanchai Ferry* frozen foods increased 14 percent in 2012. We see opportunities to expand the brand into additional cities across China and additional markets in Southeast Asia.

In the U.S., retail sales for *Progresso* soup grew 8 percent in 2012. In

2013, watch for new flavors of *Light* soups and *Progresso Recipe Starters* cooking sauces.

Ice cream is a \$69 billion global category, projected to grow at a 5 percent pace. Net sales for *Häagen-Dazs* have been growing faster, up 16 percent in fiscal 2012 on a constant-currency basis. In Europe, new *Häagen-Dazs Secret Sensations* ice cream cups with liquid centers contributed to 6 percent sales growth for

Expanding the Great Taste of Häagen-Dazs

Consumers in more than 80 countries enjoy *Häagen-Dazs* super-premium ice cream at home or in our upscale shops. *Häagen-Dazs* is the world's No. 1 ice cream brand.

General Mills Net Sales in Greater China*

Constant currency, dollars in millions, percent growth

*Estimated net sales converting local currency data at a fixed exchange rate.

the brand in that market. And in China, our sales grew more than 30 percent as we opened nearly 50 new shops. We'll open another 50 shops there in fiscal 2013.

The worldwide growth of the convenient meals and ice cream categories provides great opportunities for our brands.

China is the largest international market for [Häagen-Dazs](#) ice cream. In our shops, we offer a tantalizing array of ice cream treats.

Building our Brand Portfolio

We build our brands by investing in product development and impactful consumer marketing initiatives, and by expanding our portfolio through acquisitions. We leverage this portfolio strength as we partner with our customers to generate sales and profit growth.

New product development and improvements on established brands are vital to our growth. Health and nutrition benefits are a key focus of our product improvement efforts. In 2012, 68 percent of our U.S. Retail sales volume came from products that we've improved in recent years.

We support established and new brands with strong levels of media spending. Over the past five years, our worldwide advertising and media expense has grown at a double-digit rate, reaching \$914 million in 2012. Investments in new digital media and in vehicles targeted at multicultural consumers have been growing at the fastest rates.

Research and Development Expense
Dollars in millions

12	245
11	235
10	218
09	208
08	205

We've made several strategic acquisitions that position us for future growth. In July 2011, we acquired a controlling interest in Yoplait S.A.S. to market *Yoplait* yogurt around the world. We have agreed to assume the Yoplait license in Canada in September 2012, and we have reacquired the license in Ireland. We acquired Food Should Taste Good, a U.S.-based wholesome snack producer and

Parampara Foods meal starters in India. And in early fiscal 2013, we acquired Yoki Alimentos S.A. in Brazil.

Our portfolio of leading brands makes us an important supplier to food retailers worldwide. In the U.S., General Mills accounts for about 3 percent of total food and beverage sales, with the majority of those sales coming

from traditional grocery stores. Our sales in nontraditional retail outlets, such as club, drug and discount stores, are growing faster than in traditional outlets. In international markets, we hold leading positions in key growth categories. We'll continue to partner with all of our retail and foodservice customers to generate growth for their businesses and ours.

(a) Fiscal 2009 was a 53-week year; all other fiscal years were 52 weeks.

(b) See Glossary on page 83 of this report for definition.

(c) See page 85 of this report for our discussion of this measure not defined by generally accepted accounting principles.

Management's Discussion and Analysis of Financial Condition and Results of Operations

EXECUTIVE OVERVIEW

We are a global consumer foods company. We develop distinctive value-added food products and market them under unique brand names. We work continuously to improve our established products and to create new products that meet consumers' evolving needs and preferences. In addition, we build the equity of our brands over time with strong consumer-directed marketing and innovative merchandising. We believe our brand-building strategy is the key to winning and sustaining leading share positions in markets around the globe.

Our fundamental business goal is to generate superior returns for our stockholders over the long term. We believe that increases in net sales, segment operating profit, earnings per share (EPS), and return on average total capital are the key measures of financial performance for our business. See the "Non-GAAP Measures" section on page 85 for a description of our discussion of total segment operating profit, diluted EPS excluding certain items affecting comparability and return on average total capital, which are not defined by generally accepted accounting principles (GAAP).

Our objectives are to consistently deliver:

- low single-digit annual growth in net sales;
- mid single-digit annual growth in total segment operating profit;
- high single-digit annual growth in diluted EPS excluding certain items affecting comparability; and
- improvements in return on average total capital.

We believe that this financial performance, coupled with an attractive dividend yield, should result in long-term value creation for stockholders. We return a substantial amount of cash to stockholders through share repurchases and dividends.

Fiscal 2012 was a challenging year for us as well as the rest of the food industry, as we experienced double-digit input cost inflation and consumers were affected by the slow economic recovery around the world. For the fiscal year ended May 27, 2012, our net sales grew 12 percent and total segment operating profit grew 2 percent. Diluted EPS declined 13 percent and our return on average total capital declined by 110 basis points. Diluted EPS excluding certain items affecting comparability increased 3 percent from fiscal 2011 (see the "Non-GAAP Measures" section on page 85 for our use of this measure and our discussion of the items affecting comparability). Net cash provided by operations totaled \$2.4 billion in fiscal 2012, enabling us to partially fund the acquisition of Yoplait S.A.S. and Yoplait Marques S.A.S.

and to increase our annual dividend payments per share by 9 percent from fiscal 2011. We also made significant capital investments totaling \$676 million in fiscal 2012.

We achieved the following related to our three key operating objectives for fiscal 2012:

- Net sales growth of 12 percent was primarily driven by contributions from our Yoplait S.A.S. acquisition, volume gains in our International segment, and net price realization and mix.
- We increased marketing, merchandising, and innovation investment in support of our leading brands and continued to build our global platforms around the world. Our global advertising and media expense increased 8 percent, including investment in our core developed markets and continued media support behind our international Yoplait business.
- We achieved a 2 percent increase in total segment operating profit despite the high levels of input cost inflation. We continued to focus on our holistic margin management (HMM) program, which includes cost-savings initiatives, marketing spending efficiencies, and profitable sales mix strategies.

Details of our financial results are provided in the "Fiscal 2012 Consolidated Results of Operations" section below.

Looking ahead, we expect slow improvement in the operating environment for food companies around the globe. Although we believe the consumer environment will remain challenging in fiscal 2013, we expect to deliver another year of quality growth. Excluding the effects of our pending acquisition of Yoki Alimentos S.A. (Yoki), we expect to achieve these results:

- We are targeting mid single-digit growth in net sales driven by acquisitions, volume growth, mix improvements, and modest net price realization.
- We have a strong line-up of consumer marketing, merchandising, and innovation planned to support our leading brands. We will continue to build our global platforms in markets around the world, accelerating our efforts in rapidly growing emerging markets.
- We are targeting mid single-digit growth in total segment operating profit in fiscal 2013, as we expect our HMM discipline of cost savings, mix management, and price realization to offset lower input cost inflation.

Our businesses generate strong levels of cash flows and we use some of this cash to reinvest in our business. Our fiscal 2013 plans call for approximately \$650 million of expenditures for capital projects, excluding expenditures that may be required for Yoki. On June 26, 2012, our Board of Directors approved a dividend increase to

an annual rate of \$1.32 per share, an 8 percent increase from the rate paid in fiscal 2012.

We expect that share repurchases will at least offset normal levels of stock option exercises in fiscal 2013.

Certain terms used throughout this report are defined in a glossary on pages 83 and 84 of this report.

FISCAL 2012 CONSOLIDATED RESULTS OF OPERATIONS

Fiscal 2012 net sales grew 12 percent to \$16,658 million. In fiscal 2012, **net earnings attributable to General Mills** was \$1,567 million, down 13 percent from \$1,798 million in fiscal 2011, and we reported **diluted EPS** of \$2.35 in fiscal 2012, down 13 percent from \$2.70 in fiscal 2011. Fiscal 2012 results include losses from the mark-to-market valuation of certain commodity positions and grain inventories versus fiscal 2011 which included gains. Fiscal 2012 results also include restructuring charges reflecting employee severance expense and the write-off of certain long-lived assets related to our 2012 productivity and cost savings plan and integration costs resulting from the acquisitions of Yoplait S.A.S. and Yoplait Marques S.A.S. Fiscal 2011 results include the net benefit from the resolution of uncertain tax matters. Diluted EPS excluding these items affecting comparability was \$2.56 in fiscal 2012, up 3 percent from \$2.48 in fiscal 2011 (see the "Non-GAAP Measures" section on page 85 for our use of this measure and our discussion of the items affecting comparability).

The components of net sales growth are shown in the following table:

Components of Net Sales Growth

	Fiscal 2012 vs. 2011
Contributions from volume growth ^(a)	9 pts
Net price realization and mix	3 pts
Foreign currency exchange	Flat
Net sales growth	12 pts

(a) Measured in tons based on the stated weight of our product shipments.

Net sales grew 12 percent in fiscal 2012, due to 9 percentage points of contribution from volume growth, including 12 percentage points of volume growth contributed by the acquisition of Yoplait S.A.S. Net price realization and mix contributed 3 percentage points of net sales growth. Foreign currency exchange was flat compared to fiscal 2011.

Cost of sales increased \$1,686 million in fiscal 2012 to \$10,613 million. This increase was driven by an \$877 million increase attributable to higher volume and a \$610 million increase attributable to higher input costs and product mix. We recorded a \$104 million net increase in cost of sales related to mark-to-market valuation of certain commodity positions and grain inventories as described in Note 7 to the Consolidated Financial Statements on page 56 of this report, compared to a net decrease of \$95 million in fiscal 2011.

Gross margin grew 2 percent in fiscal 2012 versus fiscal 2011. Gross margin as a percent of net sales decreased by 370 basis points from fiscal 2011 to fiscal 2012. This decrease was primarily driven by higher input costs and losses from mark-to-market valuation of certain commodity positions and grain inventories in fiscal 2012 versus gains in fiscal 2011.

Selling, general and administrative (SG&A) expenses were up \$189 million in fiscal 2012 versus fiscal 2011. SG&A expenses as a percent of net sales in fiscal 2012 decreased by 1 percentage point compared to fiscal 2011. The increase in SG&A expenses was primarily driven by the acquisition of Yoplait S.A.S. and an 8 percent increase in advertising and media expense.

There were no divestitures in fiscal 2012. In fiscal 2011, we recorded a **net divestiture gain** of \$17 million consisting of a gain of \$14 million related to the sale of a foodservice frozen baked goods product line in our International segment and a gain of \$3 million related to the sale of a pie shell product line in our Bakeries and Foodservice segment.

Restructuring, impairment, and other exit costs totaled \$102 million in fiscal 2012 as follows:

Expense, in Millions	
Productivity and cost savings plan	\$ 100.6
Charges associated with restructuring actions previously announced	1.0
Total	\$ 101.6

In fiscal 2012, we approved a major productivity and cost savings plan designed to improve organizational effectiveness and focus on key growth strategies. The plan includes organizational changes that strengthen business alignment, and actions to accelerate administrative efficiencies across all of our operating segments and support functions. In connection with this initiative, we expect to eliminate approximately 850 positions globally and recorded a \$101 million restructuring

charge, consisting of \$88 million of employee severance expense and a non-cash charge of \$13 million related to the write-off of certain long-lived assets in our U.S. Retail segment. All of our operating segments and support functions were affected by these actions including \$70 million related to our U.S. Retail segment, \$12 million related to our Bakeries and Foodservice segment, \$10 million related to our International segment, and \$9 million related to our administrative functions. We expect to record approximately \$19 million of restructuring charges as a result of these actions in fiscal 2013. These restructuring actions are expected to be completed by the end of fiscal 2014. In fiscal 2012, we paid \$4 million in cash related to restructuring actions taken in fiscal 2012 and previous years.

Interest, net for fiscal 2012 totaled \$352 million, \$6 million higher than fiscal 2011. Average interest bearing instruments increased \$792 million in fiscal 2012, primarily due to the acquisitions of Yoplait S.A.S. and Yoplait Marques S.A.S., generating a \$46 million increase in net interest. The average interest rate decreased 55 basis points, including the effect of the mix of debt, generating a \$40 million decrease in net interest.

Our consolidated **effective tax rate** for fiscal 2012 was 32.1 percent compared to 29.7 percent in fiscal 2011. The 2.4 percentage point increase was primarily due to a \$100 million reduction to tax expense recorded in fiscal 2011 related to a settlement with the Internal Revenue Service (IRS) concerning corporate income tax adjustments for fiscal years 2002 to 2008.

After-tax earnings from joint ventures for fiscal 2012 decreased to \$88 million compared to \$96 million in fiscal 2011 primarily due to higher effective tax rates as a result of discrete tax items in fiscal 2012.

The change in net sales for each joint venture is set forth in the following table:

Joint Venture Change in Net Sales

	Fiscal 2012 vs. 2011
CPW	4%
HDJ	11
Joint Ventures	5%

In fiscal 2012, CPW net sales grew by 4 percent due to 3 percentage points attributable to net price realization and mix, and a 2 percentage point increase from volume, partially offset by a 1 percentage point decrease from unfavorable foreign currency exchange. In fiscal 2012,

net sales for HDJ increased 11 percent from fiscal 2011 due to 7 percentage points of favorable foreign currency exchange, 3 percentage points due to an increase in volume, and 1 percentage point attributable to net price realization and mix.

Average diluted shares outstanding increased by 2 million in fiscal 2012 from fiscal 2011, due primarily to the issuance of common stock from stock option exercises, partially offset by share repurchases.

FISCAL 2012 CONSOLIDATED BALANCE SHEET ANALYSIS

Cash and cash equivalents decreased \$148 million from fiscal 2011, as discussed in the "Liquidity" section on page 28.

Receivables increased \$161 million from fiscal 2011 primarily as a result of the acquisition of Yoplait S.A.S.

Inventories decreased \$130 million from fiscal 2011 primarily as a result of inventory reduction efforts in fiscal 2012.

Prepaid expenses and other current assets decreased \$125 million from fiscal 2011, mainly due to decreases in derivative receivable balances.

Land, buildings, and equipment increased \$307 million from fiscal 2011, as \$676 million of capital expenditures and \$252 million of additions from the acquisition of Yoplait S.A.S. were partially offset by depreciation expense of \$512 million and \$84 million of foreign currency translation in fiscal 2012.

Goodwill and other intangible assets increased \$2,323 million from fiscal 2011 primarily due to the acquisitions of Yoplait S.A.S. and Yoplait Marques S.A.S. We recorded \$1,617 million of goodwill and \$1,108 million of other intangible assets related to fiscal 2012 acquisitions which were partially offset by \$348 million of foreign currency translation.

Other assets increased \$3 million from fiscal 2011.

Accounts payable increased \$154 million from fiscal 2011, primarily due to the acquisition of Yoplait S.A.S. and shifts in the timing of payments.

Long-term debt, including current portion, and notes payable increased \$544 million from fiscal 2011 primarily due to the consolidation of Yoplait S.A.S. debt of \$376 million and our debt refinancing activities in fiscal 2012.

The current and noncurrent portions of net **deferred income taxes liability** increased \$12 million from fiscal 2011.

Other current liabilities increased \$105 million from fiscal 2011, primarily driven by increases in restructuring and other exit cost reserves and consumer marketing accruals, partially offset by a decrease in accrued taxes.

Other liabilities increased \$457 million from fiscal 2011, primarily driven by an increase of \$426 million in pension, postemployment, and postretirement liabilities.

Redeemable interest of \$848 million represents the redemption value of Sodiaal International's (Sodiaal) 49 percent interest in Yoplait S.A.S. as of May 27, 2012. Please refer to Note 9 to the Consolidated Financial Statements on page 64 of this report.

Retained earnings increased \$767 million from fiscal 2011, reflecting fiscal 2012 net earnings of \$1,567 million less dividends paid of \$800 million. **Treasury stock** decreased \$33 million from fiscal 2011, due to \$346 million related to stock-based compensation plans partially offset by \$313 million of share repurchases. **Additional paid in capital** decreased \$11 million from fiscal 2011. **Accumulated other comprehensive loss (AOCI)** increased by \$733 million after-tax from fiscal 2011, primarily driven by pension and postemployment activity of \$423 million and foreign currency translation of \$270 million.

Noncontrolling interests increased \$214 million in fiscal 2012 primarily due to the addition of Sodiaal's 50 percent interest in Yoplait Marques S.A.S. Please refer to Note 9 to the Consolidated Financial Statements on page 64 of this report.

FISCAL 2011 CONSOLIDATED RESULTS OF OPERATIONS

Fiscal 2011 net sales grew 2 percent to \$14,880 million. **Net earnings attributable to General Mills** were \$1,798 million in fiscal 2011, up 18 percent from \$1,530 million in fiscal 2010, and we reported **diluted EPS** of \$2.70 in fiscal 2011, up 20 percent from \$2.24 in fiscal 2010. Fiscal 2011 results include gains from the mark-to-market valuation of certain commodity positions and grain inventories versus fiscal 2010 which included losses. Fiscal 2011 results also include the net benefit from the resolution of uncertain tax matters, and fiscal 2010 results include income tax expense related to the enactment of federal health care reform. Diluted EPS excluding these items affecting comparability was \$2.48 in fiscal 2011, up 8 percent from \$2.30 in fiscal 2010 (see the "Non-GAAP Measures" section on page 85 for our use of this measure and our discussion of the items affecting comparability).

The components of net sales growth are shown in the following table:

Components of Net Sales Growth

	Fiscal 2011 vs. 2010
Contributions from volume growth ^(a)	1 pt
Net price realization and mix	1 pt
Foreign currency exchange	Flat
Net sales growth	2 pts

(a) Measured in tons based on the stated weight of our product shipments.

Net sales grew 2 percent in fiscal 2011, due to 1 percentage point of contribution from volume growth and 1 percentage point of growth from net price realization and mix. Foreign exchange was flat compared to fiscal 2010.

Cost of sales increased \$91 million in fiscal 2011 to \$8,927 million. This was driven by a \$157 million increase attributable to higher net input costs and product mix and an \$84 million increase attributable to higher volume, partially offset by a \$95 million net decrease in cost of sales related to mark-to-market valuation of certain commodity positions and grain inventories compared to a net increase of \$7 million in fiscal 2010. In fiscal 2010, we recorded a charge of \$48 million resulting from a change in the capitalization threshold for certain equipment parts.

Gross margin grew 3 percent in fiscal 2011 versus fiscal 2010. Gross margin as a percent of net sales increased by 40 basis points from fiscal 2010 to fiscal 2011. These improvements were primarily driven by gains from the mark-to-market valuation of certain commodity positions and grain inventories in fiscal 2011 versus losses in fiscal 2010.

Selling, general and administrative (SG&A) expenses were up \$29 million in fiscal 2011 versus fiscal 2010, while SG&A expenses as a percent of net sales remained essentially flat from fiscal 2010 to fiscal 2011. The increase in SG&A expenses was primarily driven by a \$69 million increase in corporate pension expense partially offset by a 7 percent decrease in advertising and media expense. In fiscal 2010, the Venezuelan government devalued the bolivar fuerte exchange rate against the U.S. dollar. The \$14 million foreign exchange loss resulting from the devaluation was substantially offset by a \$13 million recovery against a corporate investment.

During fiscal 2011, we recorded a **net divestiture gain** of \$17 million. We recorded a gain of \$14 million related

to the sale of a foodservice frozen baked goods product line in our International segment and a gain of \$3 million related to the sale of a pie shell product line in our Bakeries and Foodservice segment. There were no divestitures in fiscal 2010.

Restructuring, impairment, and other exit costs totaled \$4 million in fiscal 2011 as follows:

Expense, in Millions	
Discontinuation of fruit-flavored snack product line	\$ 1.7
Charges associated with restructuring actions previously announced	2.7
Total	\$ 4.4

In fiscal 2011, we decided to exit an underperforming product line in our U.S. Retail segment. As a result of this decision, we concluded that the future cash flows generated by this product line were insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$2 million related to the impairment of the associated long-lived assets. No employees were affected by these actions. In addition, we recorded \$3 million of charges associated with restructuring actions previously announced. In fiscal 2011, we paid \$6 million in cash related to restructuring actions taken in fiscal 2011 and previous years.

Interest, net for fiscal 2011 totaled \$346 million, \$55 million lower than fiscal 2010. The average interest rate on our total outstanding debt was 5.6 percent in fiscal 2011 compared to 6.3 percent in fiscal 2010, generating a \$45 million decrease in net interest. Average interest bearing instruments increased \$474 million in fiscal 2011, primarily due to more share repurchases than in fiscal 2010, leading to a \$30 million increase in net interest. In fiscal 2010, we also recorded a loss of \$40 million related to the repurchase of certain notes, which represented the premium paid, the write-off of remaining discount and unamortized fees, and the settlement of related swaps.

Our consolidated **effective tax rate** for fiscal 2011 was 29.7 percent compared to 35.0 percent in fiscal 2010. The 5.3 percentage point decrease was primarily due to a \$100 million reduction to tax expense recorded in fiscal 2011 related to a settlement with the IRS concerning corporate income tax adjustments for fiscal years 2002 to 2008. The adjustments primarily relate to the amount of capital loss, depreciation, and amortization we reported as a result of the sale of noncontrolling interests in

our General Mills Cereals, LLC (GMC) subsidiary. Fiscal 2010 income tax expense included a \$35 million increase related to the enactment of federal health care reform (the Patient Protection and Affordable Care Act, as amended by Health Care and Education Reconciliation Act of 2010). This legislation changed the tax treatment of subsidies to companies that provide prescription drug benefits that are at least the equivalent of benefits under Medicare Part D (see the "Impact of Inflation" section on page 28 for additional discussion of this legislation).

After-tax earnings from joint ventures for fiscal 2011 decreased to \$96 million compared to \$102 million in fiscal 2010. The decrease is primarily due to higher advertising and media spending and increased service cost allocations, all in CPW.

The change in net sales for each joint venture is set forth in the following table:

Joint Venture Change in Net Sales

	Fiscal 2011 vs. 2010
CPW	3%
HDJ	4
Joint Ventures	4%

In fiscal 2011, CPW net sales grew by 3 percent due to a 2 percentage point increase in volume and a 1 percentage point increase from favorable foreign exchange. Net price realization and mix was flat compared to fiscal 2010. In fiscal 2011, net sales for HDJ increased 4 percent from fiscal 2010 primarily due to 9 percentage points of favorable foreign exchange, partially offset by a 5 percentage point decline in net price realization and mix. Volume was flat compared to fiscal 2010.

Average diluted shares outstanding decreased by 18 million in fiscal 2011 from fiscal 2010, due primarily to the repurchase of 32 million shares, partially offset by the issuance of shares upon stock option exercises.

RESULTS OF SEGMENT OPERATIONS

Our businesses are organized into three operating segments: U.S. Retail; International; and Bakeries and Foodservice.

The following tables provide the dollar amount and percentage of net sales and operating profit from each segment for fiscal years 2012, 2011, and 2010:

Net Sales

In Millions	Fiscal Year					
	2012		2011		2010	
	Dollars	Percent of Total	Dollars	Percent of Total	Dollars	Percent of Total
U.S. Retail	\$10,480.2	63%	\$10,163.9	69%	\$10,209.8	70%
International	4,194.3	25	2,875.5	19	2,684.9	18
Bakeries and Foodservice	1,983.4	12	1,840.8	12	1,740.9	12
Total	\$16,657.9	100%	\$14,880.2	100%	\$14,635.6	100%

Segment Operating Profit

U.S. Retail	\$ 2,295.3	76%	\$ 2,347.9	80%	\$ 2,385.2	84%
International	429.6	14	291.4	10	192.1	7
Bakeries and Foodservice	286.7	10	306.3	10	263.2	9
Total	\$ 3,011.6	100%	\$ 2,945.6	100%	\$ 2,840.5	100%

Segment operating profit excludes unallocated corporate items, gain on divestitures, and restructuring, impairment, and other exit costs because these items affecting operating profit are centrally managed at the corporate level and are excluded from the measure of segment profitability reviewed by our executive management.

U.S. Retail Segment Our U.S. Retail segment reflects business with a wide variety of grocery stores, mass merchandisers, membership stores, natural food chains, and drug, dollar and discount chains operating throughout the United States. Our major product categories in this business segment are ready-to-eat cereals, refrigerated yogurt, ready-to-serve soup, dry dinners, shelf stable and frozen vegetables, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza and pizza snacks, grain, fruit and savory snacks, and a wide variety of organic products, including granola bars, cereal, and soup.

In fiscal 2012, net sales for our U.S. Retail segment were \$10.5 billion, up 3 percent from fiscal 2011. Net price realization and mix contributed 9 percentage points of growth, partially offset by a 6 percentage point decrease due to lower pound volume.

In fiscal 2011, net sales for this segment totaled \$10.2 billion, flat compared to fiscal 2010. Volume on a tonnage basis and net price realization and mix were both flat compared to fiscal 2010.

Components of U.S. Retail Net Sales Growth

Small Planet Foods	19	13
Total	3%	Flat

In fiscal 2012, net sales for Big G cereals grew 4 percent from last year driven by growth from established brands such as *Honey Nut Cheerios*, *Cinnamon Toast Crunch*, and *Chex* varieties along with contributions from new products including *Peanut Butter Multi Grain Cheerios* and *Fiber One 80 Calories* cereals. Meals division net sales were flat. Pillsbury net sales grew 3 percent, led by frozen breakfast items, biscuits, and sweet rolls. Snacks net sales grew 15 percent, driven by *Fiber One* and *Nature Valley* snack bars. Net sales for Yoplait declined 5 percent as growth from *Go-GURT* and *Yoplait Greek* was offset by volume declines on certain established product lines. Net sales for Baking Products grew 3 percent, driven by flour pricing. Small Planet Food's net sales were up 19 percent, led by *Lärabar* natural fruit and nut bars, and *Cascadian Farm* organic cereals and grain snack bars.

In fiscal 2011, net sales for Big G cereals declined 2 percent from fiscal 2010 which included *Chocolate Cheerios* and *Wheaties Fuel* introductory volume. Meals division net sales decreased 1 percent as *Helper* dinner mixes and *Green Giant* canned vegetables declines were partially offset by growth in *Old El Paso* Mexican products, *Progresso* ready-to-serve soups, and *Wanchai Ferry* and *Macaroni Grill* frozen entrees. Pillsbury net sales declined 2 percent due to sales declines in *Totino's* pizza. Snacks net sales grew 5 percent, driven by *Nature Valley* and *Fiber One* grain snack bars. Net sales for Yoplait grew 1 percent including the acquisition of the *Mountain High* yogurt business. Net sales for Baking Products declined 4 percent. Small Planet Food's net sales were up 13 percent driven by double-digit growth for *Lärabar* natural fruit and nut bars.

Segment operating profit of \$2.3 billion in fiscal 2012 declined \$53 million, or 2 percent, from fiscal 2011. The decrease was primarily driven by higher input costs, lower volume, and a 5 percent increase in advertising and media expense.

Segment operating profit of \$2.3 billion in fiscal 2011 declined \$37 million, or 2 percent, from fiscal 2010. The decrease was primarily driven by unfavorable supply chain costs of \$81 million, partially offset by a 9 percent reduction in advertising and media expense.

International Segment Our International segment consists of retail and foodservice businesses outside of the United States. In Canada, our major product categories are ready-to-eat cereals, shelf stable and frozen vegetables, dry dinners, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza snacks, refrigerated yogurt, and grain and fruit snacks. In markets outside North America, our product categories include super-premium ice cream and frozen desserts, refrigerated yogurt, grain snacks, shelf stable and frozen vegetables, refrigerated and frozen dough products, and dry dinners. Our International segment also includes products manufactured in the United States for export, mainly to Caribbean and Latin American markets, as well as products we manufacture for sale to our international joint ventures. Revenues from export activities and franchise fees are reported in the region or country where the end customer is located.

In fiscal 2012, net sales for our International segment were \$4,194 million, up 46 percent from fiscal 2011. This growth was driven by 36 percentage points contributed by the acquisition of Yoplait S.A.S. Volume contributed 65 percentage points of net sales growth, including 63 percentage points resulting from the acquisition of Yoplait S.A.S., and favorable foreign currency exchange contributed 1 percentage point of net sales growth. These gains were partially offset by a decrease of 20 percentage points due to unfavorable net price realization and mix resulting from the acquisition of Yoplait S.A.S.

Net sales totaled \$2,876 million in fiscal 2011, up 7 percent from \$2,685 million in fiscal 2010. The growth in fiscal 2011 was driven by 6 percentage points of contributions from volume and 1 percentage point from net price realization and mix. Foreign currency exchange was flat compared to fiscal 2010.

Canada	29	8	28	3
Latin America	11	(5)	14	11
Total	46%	7%	45%	7%

(a) See the "Non-GAAP Measures" section on page 85 for our use of this measure.

In fiscal 2012, net sales in Europe grew 97 percent, including 90 percentage points from the acquisition of Yoplait S.A.S. The remaining growth was driven by *Old El Paso* Mexican products and *Häagen Dazs* in France, *Green Giant*, *Nature Valley* and *Betty Crocker* products in the United Kingdom, and favorable foreign currency exchange. In the Asia/Pacific region, net sales grew 21 percent driven by growth from *Häagen-Dazs* products in China, the fiscal 2011 acquisition of *Pasta Master* in Australia, and favorable foreign currency exchange. Net sales in Canada increased 29 percent primarily due to 27 percentage points of net sales growth from the acquisition of Yoplait S.A.S. The remaining growth was driven by *Cheerios* varieties, *Old El Paso* Mexican products, and favorable foreign currency exchange. Latin America net sales increased 11 percent driven by growth in *La Salteña* in Argentina and *Diablitos* in Venezuela, partially offset by unfavorable foreign currency exchange.

In fiscal 2011, net sales in Europe increased by 5 percent, driven by growth in *Häagen Dazs* and *Nature Valley* in the United Kingdom, and *Old El Paso* Mexican products in France and Switzerland, partially offset by unfavorable foreign currency exchange. In the Asia/Pacific region, net sales grew 14 percent due to growth from *Häagen-Dazs* and *Wanchai Ferry* brands in China, and atta flour in India. Net sales in Canada

increased 8 percent due to favorable foreign currency exchange and growth in ready-to-eat-cereals. Latin America net sales decreased 5 percent due to unfavorable foreign currency exchange primarily related to the 2010 devaluation of the Venezuelan currency, partially offset by *Diablitos* growth in Venezuela and *La Salteña* growth in Argentina.

Segment operating profit for fiscal 2012 grew 47 percent to \$430 million from \$291 million in fiscal 2011, primarily driven by the acquisition of Yoplait S.A.S., higher volume, and favorable foreign currency effects.

Segment operating profit for fiscal 2011 grew 52 percent to \$291 million, from \$192 million in fiscal 2010, primarily driven by volume growth and favorable foreign currency exchange. In fiscal 2010, we incurred a \$14 million foreign exchange loss on the revaluation of non-bolivar fuerte monetary balances in Venezuela.

In January 2010, the Venezuelan government devalued the bolivar fuerte by resetting the official exchange rate. The effect of the devaluation was a \$14 million foreign exchange loss in fiscal 2010, primarily on the revaluation of non-bolivar fuerte monetary balances in Venezuela. We continue to use the official exchange rate to remeasure the financial statements of our Venezuelan operations, as we intend to remit dividends solely through the government-operated Foreign Exchange Administration Board (CADIVI). The devaluation of the bolivar fuerte also reduced the U.S. dollar equivalent of our Venezuelan results of operations and financial condition, but this did not have a material impact on our results. During fiscal 2010, Venezuela became a highly inflationary economy, which did not have a material impact on our results in fiscal 2012, 2011, or 2010.

Bakeries and Foodservice Segment In our Bakeries and Foodservice segment our major product categories are cereals, snacks, refrigerated yogurt, unbaked and fully baked frozen dough products, baking mixes, and flour. Many products we sell are branded to the consumer and nearly all are branded to our customers. We sell to distributors and operators in many customer channels, including foodservice, convenience stores, vending, and supermarket bakeries.

For fiscal 2012, net sales for our Bakeries and Foodservice segment increased 8 percent to \$1,983 million. The increase in fiscal 2012 was driven by an increase in net price realization and mix of 7 percentage points and 1 percentage point contributed by volume growth.

For fiscal 2011, net sales for our Bakeries and Foodservice segment increased 6 percent to \$1,841 million. The increase in fiscal 2011 was driven by an increase in net price realization and mix of 6 percentage points, primarily from prices indexed to commodity markets. Contributions from volume were flat, including a 2 percentage point decline from a divested product line.

Components of Bakeries and Foodservice Net Sales Growth

	Fiscal 2012 vs. 2011	Fiscal 2011 vs. 2010
Bakeries and National Restaurant Accounts	8%	6%
Foodservice Distributors	8	3
Convenience Stores	8	11
Total	8%	6%

In fiscal 2012, segment operating profit was \$287 million, down from \$306 million in fiscal 2011. The decrease was primarily driven by lower grain merchandising earnings.

Segment operating profit was \$306 million in fiscal 2011, up from \$263 million in fiscal 2010. The increase was primarily driven by net price realization and mix and increased grain merchandising earnings, partially offset by higher input costs.

Unallocated Corporate Items Unallocated corporate items include corporate overhead expenses, variances to planned domestic employee benefits and incentives, contributions to the General Mills Foundation, and other items that are not part of our measurement of segment operating performance. This includes gains and losses from mark-to-market valuation of certain commodity positions until passed back to our operating segments in accordance with our policy as discussed in Note 2 of the Consolidated Financial Statements on page 49 of this report.

For fiscal 2012, unallocated corporate expense totaled \$348 million compared to \$184 million last year. In fiscal 2012 we recorded a \$104 million net increase in expense related to mark-to-market valuation of certain commodity positions and grain inventories, compared to a \$95 million net decrease in expense last year. In fiscal 2012, we also recorded \$11 million of integration costs related to the acquisition of Yoplait S.A.S. and Yoplait Marques S.A.S. These increases in expense were partially offset by a decrease in compensation and benefit expense compared to fiscal 2011.

Unallocated corporate expense totaled \$184 million in fiscal 2011 compared to \$203 million in fiscal 2010. In fiscal 2011, we recorded a \$95 million net decrease in expense related to mark-to-market valuation of certain commodity positions and grain inventories, compared to a \$7 million net increase in expense in fiscal 2010. This was partially offset by a \$69 million increase in corporate pension expense in fiscal 2011. In fiscal 2010, we recorded a \$13 million recovery against a corporate investment.

IMPACT OF INFLATION

We have experienced significant input cost volatility since fiscal 2006. Our gross margin performance in fiscal 2012 reflects the impact of 10 percent input cost inflation, primarily on commodities inputs. We expect the rate of inflation of commodities and energy costs to moderate in fiscal 2013. We attempt to minimize the effects of inflation through planning and operating practices. Our risk management practices are discussed on pages 41 through 42 of this report.

The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the Act) was signed into law in March 2010. The Act codifies health care reforms with staggered effective dates from 2010

to 2018. Many provisions in the Act require the issuance of additional guidance from various government agencies. Because the Act does not take effect fully until future years, the Act did not have a material impact on our fiscal 2012, 2011, or 2010 results of operations. Given the complexity of the Act, the extended time period over which the reforms will be implemented, and the unknown impact of future regulatory guidance, the full impact of the Act on future periods will not be known until those regulations are adopted.

LIQUIDITY

The primary source of our liquidity is cash flow from operations. Over the most recent three-year period, our operations have generated \$6.1 billion in cash. A substantial portion of this operating cash flow has been returned to stockholders through share repurchases and dividends. We also use this source of liquidity to fund our capital expenditures. We typically use a combination of cash, notes payable, and long-term debt to finance acquisitions and major capital expansions.

As of May 27, 2012, we had \$446 million of cash and cash equivalents held in foreign jurisdictions which will be used to fund foreign operations and acquisitions. There is currently no intent or need to repatriate these funds in order to meet domestic funding obligations or scheduled cash distributions. If we choose to repatriate cash held in foreign jurisdictions, we will only do so in a tax-neutral manner.

Cash Flows from Operations

In Millions	Fiscal Year		
	2012	2011	2010
Net earnings, including earnings attributable to noncontrolling interests	\$1,589.1	\$1,803.5	\$1,535.0
Depreciation and amortization	541.5	472.6	457.1
After-tax earnings from joint ventures	(88.2)	(96.4)	(101.7)
Stock-based compensation	108.3	105.3	107.3
Deferred income taxes	149.4	205.3	22.3
Tax benefit on exercised options	(63.1)	(106.2)	(114.0)
Distributions of earnings from joint ventures	68.0	72.7	88.0
Pension and other postretirement benefit plan contributions	(222.2)	(220.8)	(17.2)
Pension and other postretirement benefit plan expense (income)	77.8	73.6	(37.9)
Divestitures (gain)	—	(17.4)	—
Restructuring, impairment, and other exit costs (income)	97.8	(1.3)	23.4
Changes in current assets and liabilities	243.8	(720.9)	143.4
Other, net	(100.2)	(43.2)	75.5
Net cash provided by operating activities	\$2,402.0	\$1,526.8	\$2,181.2

In fiscal 2012, our operations generated \$2.4 billion of cash compared to \$1.5 billion in fiscal 2011. The \$875 million increase primarily reflects changes in current assets and liabilities, including a \$384 million increase driven by inventory reduction efforts in fiscal 2012. Prepaid expenses and other current assets accounted for a \$245 million increase, primarily reflecting changes in foreign currency hedges and the fair value of open grain contracts. Other current liabilities accounted for a \$386 million increase, primarily reflecting changes in accrued income taxes as a result of audit settlements and court decisions in fiscal 2011 and changes in consumer marketing and related accruals. The favorable change in working capital was offset by a \$214 million decrease in net earnings. Additionally, fiscal 2012 includes non-cash restructuring charges of \$101 million reflecting employee severance expense and the write-off of certain long-lived assets. In both fiscal 2012 and fiscal 2011, we made a \$200 million voluntary contribution to our principal domestic pension plans.

We strive to grow core working capital at or below our growth in net sales. For fiscal 2012, core working capital

decreased 7 percent, compared to net sales growth of 12 percent, primarily reflecting our inventory reduction efforts. In fiscal 2011, core working capital increased 16 percent, compared to net sales growth of 2 percent, and in fiscal 2010, core working capital increased 3 percent, compared to net sales growth of 1 percent.

In fiscal 2011, our operations generated \$1.5 billion of cash compared to \$2.2 billion in fiscal 2010. The decrease primarily reflects an \$864 million increase in use of cash for net current assets and liabilities and a \$200 million voluntary contribution to our principal domestic pension plans, partially offset by the \$268 million increase in net earnings and a \$183 million change in deferred income taxes primarily related to our pension plan contribution and a change in tax legislation related to depreciation deductions.

Cash Flows from Investing Activities

In Millions	Fiscal Year		
	2012	2011	2010
Purchases of land, buildings, and equipment	\$ (675.9)	\$(648.8)	\$(649.9)
Acquisitions	(1,050.1)	(123.3)	—
Investments in affiliates, net	(22.2)	(1.8)	(130.7)
Proceeds from disposal of land, buildings, and equipment	2.2	4.1	7.4
Proceeds from divestiture of product lines	—	34.4	—
Exchangeable note	(131.6)	—	—
Other, net	6.8	20.3	52.0
Net cash used by investing activities	\$(1,870.8)	\$(715.1)	\$(721.2)

In fiscal 2012, cash used by investing activities increased by \$1.2 billion from fiscal 2011. The increased use of cash primarily reflects the acquisitions of Yoplait S.A.S. and Yoplait Marques S.A.S. in fiscal 2012 for an aggregate purchase price of \$1.2 billion, comprised of \$900 million of cash, net of \$30 million of cash acquired, and \$261 million of non-cash consideration for debt assumed. In addition, we purchased a zero coupon exchangeable note due in 2016 from Sodial with a notional amount of \$132 million. We invested \$676 million in land, buildings, and equipment in fiscal 2012.

In fiscal 2011, cash used by investing activities decreased by \$6 million from fiscal 2010. The decreased use of cash reflects \$25 million of proceeds from the divestiture of a foodservice frozen baked goods product

line in our International segment and \$9 million of proceeds from the sale of a pie shell product line in our Bakeries and Foodservice segment in fiscal 2011. In addition, in fiscal 2011, we paid \$123 million for acquisitions during the year. We also invested \$131 million in affiliates in fiscal 2010, mainly our CPW joint venture, to repay local borrowings.

We expect capital expenditures to be approximately \$650 million in fiscal 2013, excluding any expenditures required to support Yoki. These expenditures will support initiatives that are expected to: increase manufacturing capacity for grain snacks and Greek yogurt; fuel International growth and expansion; continue HMM initiatives throughout the supply chain; and support yogurt capacity initiatives of Yoplait S.A.S.

Cash Flows from Financing Activities

In Millions	Fiscal Year		
	2012	2011	2010
Change in notes payable	\$ 227.9	\$ (742.6)	\$ 235.8
Issuance of long-term debt	1,390.5	1,200.0	—
Payment of long-term debt	(1,450.1)	(7.4)	(906.9)

stock for treasury	(313.0)	(1,163.5)	(691.8)
Dividends paid	(800.1)	(729.4)	(643.7)
Other, net	(13.2)	(10.3)	—
Net cash used by			
financing activities	\$ (661.4)	\$ (936.6)	\$(1,503.8)

Net cash used by financing activities decreased by \$275 million in fiscal 2012.

In February 2012, we repaid \$1.0 billion of 6.0 percent notes. In November 2011, we issued \$1.0 billion aggregate principal amount of 3.15 percent notes due December 15, 2021. The net proceeds were used to repay a portion of our notes due February 2012, to reduce our commercial paper borrowings, and for general corporate purposes. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time prior to September 15, 2021 for a specified make whole amount and any time on or after that date at par. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

As part of our acquisition of Yoplait S.A.S., we consolidated \$458 million of primarily euro-denominated

Euribor-based floating-rate bank debt. In December 2011, we refinanced this debt with \$390 million of euro-denominated Euribor-based floating-rate bank debt due at various dates through December 15, 2014.

In May 2011, we issued \$300 million aggregate principal amount of 1.55 percent fixed-rate notes and \$400 million aggregate principal amount of floating-rate notes, both due May 16, 2014. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. The floating-rate notes bear interest equal to three-month LIBOR plus 35 basis points, subject to quarterly reset. Interest on the floating-rate notes is payable quarterly in arrears. Interest on the fixed-rate notes is payable semi-annually in arrears. The fixed-rate notes may be redeemed at our option at any time for a specified make whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

In June 2010, we issued \$500 million aggregate principal amount of 5.4 percent notes due 2040. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time for a specified make whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

In May 2010, we paid \$437 million to repurchase in a cash tender offer \$400 million of our previously issued debt. We repurchased \$221 million of our 6.0 percent notes due 2012 and \$179 million of our 5.65 percent notes due 2012. We issued commercial paper to fund the repurchase.

During fiscal 2012, we had \$234 million in proceeds from common stock issued on exercised options compared to \$410 million in fiscal 2011, a decrease of \$177 million. During fiscal 2010, we had \$389 million proceeds from common stock issued on exercised options.

During fiscal 2012, we repurchased 8 million shares of our common stock for an aggregate purchase price of \$313 million. During fiscal 2011, we repurchased 32 million shares of our common stock for an aggregate purchase price of \$1,164 million. During fiscal 2010, we repurchased 21 million shares of our common stock for an aggregate purchase price of \$692 million. On June 28, 2010, our Board of Directors authorized the repurchase of up to 100 million shares of our common stock. Purchases under the authorization can be made in the open market or in privately negotiated transactions, including the use of call options and other derivative

instruments, Rule 10b5-1 trading plans, and accelerated repurchase programs. The authorization has no specified termination date.

Dividends paid in fiscal 2012 totaled \$800 million, or \$1.22 per share, a 9 percent per share increase from fiscal 2011. Dividends paid in fiscal 2011 totaled \$729 million, or \$1.12 per share, a 17 percent per share increase from fiscal 2010 dividends of \$0.96 per share. On June 26, 2012, our Board of Directors approved a dividend increase to an annual rate of \$1.32 per share, an 8 percent increase from the rate paid in fiscal 2012.

Selected Cash Flows from Joint Ventures

Selected cash flows from our joint ventures are set forth in the following table:

Inflow (Outflow), in Millions	Fiscal Year		
	2012	2011	2010
Advances to joint ventures, net	\$(22.2)	\$(1.8)	\$(128.1)
Dividends received	68.0	72.7	88.0

CAPITAL RESOURCES

Total capital consisted of the following:

In Millions	May 27, 2012	May 29, 2011
Notes payable	\$ 526.5	\$ 311.3
Current portion of long-term debt	741.2	1,031.3
Long-term debt	6,161.9	5,542.5
Total debt	7,429.6	6,885.1
Redeemable interest	847.8	—
Noncontrolling interests	461.0	246.7
Stockholders' equity	6,421.7	6,365.5
Total capital	\$15,160.1	\$13,497.3

The increase in total capital from fiscal 2011 to fiscal 2012 was primarily due to additional non-controlling interests and the redeemable interest generated as a result of the acquisitions of Yoplait S.A.S. and Yoplait Marques S.A.S., as well as an increase in long-term debt and notes payable as a result of our debt refinancing activities during fiscal 2012.

The following table details the fee-paid committed and uncommitted credit lines we had available as of May 27, 2012:

In Billions	Amount
Credit facility expiring:	
April 2015	\$1.0
April 2017	1.7
Total committed credit facilities	2.7
Uncommitted credit facilities	0.4
Total committed and uncommitted credit facilities	\$3.1

To ensure availability of funds, we maintain bank credit lines sufficient to cover our outstanding short-term borrowings. Commercial paper is a continuing source of short-term financing. We have commercial paper programs available to us in the United States and Europe. Our commercial paper borrowings are supported by \$2.7 billion of fee-paid committed credit lines, consisting of a \$1.0 billion facility expiring in April 2015 and a \$1.7 billion facility expiring in April 2017. We also have \$394 million in uncommitted credit lines that support our foreign operations. As of May 27, 2012, there were no amounts outstanding on the fee-paid committed credit lines and \$114 million was drawn on the uncommitted lines. The credit facilities contain several covenants, including a requirement to maintain a fixed charge coverage ratio of at least 2.5 times.

Certain of our long-term debt agreements, our credit facilities, and our noncontrolling interests contain restrictive covenants. As of May 27, 2012, we were in compliance with all of these covenants.

We have \$741 million of long-term debt maturing in the next 12 months that is classified as current. We believe that cash flows from operations, together with available short- and long-term debt financing, will be adequate to meet our liquidity and capital needs for at least the next 12 months.

As of May 27, 2012, our total debt, including the impact of derivative instruments designated as hedges, was 71 percent in fixed-rate and 29 percent in floating-rate instruments, compared to 77 percent in fixed-rate and 23 percent in floating-rate instruments on May 29, 2011. The change in the fixed-rate and floating-rate percentages was driven by the addition of the floating-rate debt consolidated as part of the acquisition of Yoplait S.A.S. and an increase in notes payable in fiscal 2012.

Growth in return on average total capital is one of our key performance measures (see the "Non-GAAP Measures" section on page 85 for our discussion of this

measure, which is not defined by GAAP). Return on average total capital decreased from 13.8 percent in fiscal 2011 to 12.7 percent in fiscal 2012 primarily reflecting the impact of the acquisition of Yoplait S.A.S. and Yoplait Marques S.A.S. We also believe that the ratio of fixed charge coverage and the ratio of operating cash flow to debt are important measures of our financial strength. Our fixed charge coverage ratio in fiscal 2012 was 6.26 compared to 7.03 in fiscal 2011. The measure decreased from fiscal 2011 as earnings before income taxes and after-tax earnings from joint ventures decreased by \$218 million and fixed charges increased by \$18 million, driven mainly by higher interest and rent expense. Our operating cash flow to debt ratio increased 10.1 percentage points to 32.3 percent in fiscal 2012, primarily driven by an increase of \$875 million in cash flows from operations.

During the fourth quarter of fiscal 2012, we entered into a purchase agreement with Yoki, a privately held food company headquartered in Sao Bernardo do Campo, Brazil, for an aggregate purchase price of approximately 1.97 billion Brazilian reais (approximately \$990 million as of May 27, 2012) including the assumption of approximately 220 million Brazilian reais (approximately \$110 million as of May 27, 2012) of outstanding debt. The purchase price is subject to an adjustment based on the net asset value of the business at the closing date. Yoki operates in several food categories, including snacks, convenient meals, basic foods, and seasonings. We expect the transaction to be completed in the first half of fiscal 2013. We expect to fund this transaction using cash available in our foreign subsidiaries and commercial paper.

During the first quarter of fiscal 2012, we acquired a 51 percent controlling interest in Yoplait S.A.S. and a 50 percent interest in Yoplait Marques S.A.S. Sodiaal holds the remaining interests in each of the entities. We consolidated both entities into our consolidated financial statements. At the date of the acquisition, we recorded the \$264 million fair value of Sodiaal's 50 percent interest in Yoplait Marques S.A.S. as a noncontrolling interest, and the \$904 million fair value of its 49 percent interest in Yoplait S.A.S. as a redeemable interest on our Consolidated Balance Sheets. These euro-denominated interests are reported in U.S. dollars on our Consolidated Balance Sheets. Sodiaal has the ability to put a limited portion of its redeemable interest to us at fair value once per year up to a maximum of 9 years. As of May 27, 2012, the redemption value of the redeemable interest was \$848 million which approximates its fair value.

As of May 27, 2012, we also had a noncontrolling interest related to our subsidiary General Mills Cereals, LLC (GMC). We hold all interests in GMC other than Class A Limited Membership Interests (Class A Interests) which were held by an unrelated third-party investor. On June 1, 2012, subsequent to our year end, we restructured GMC through the distribution of its manufacturing assets, stock, inventory, cash and certain intellectual property to a wholly owned subsidiary. GMC retained the remaining intellectual property. Immediately following the restructuring, the Class A Interests were sold by the current holder to another unrelated third-party investor.

The third-party holder of the Class A Interests receives quarterly preferred distributions from available net income based on the application of a floating preferred return rate, currently equal to the sum of three-month LIBOR plus 110 basis points, to the holder's capital account balance established in the most recent market-to-market valuation (currently \$252 million). The preferred return rate is adjusted every three years through a negotiated agreement with the Class A Interest holder or through a remarketing auction.

The holder of the Class A Interests may initiate a liquidation of GMC under certain circumstances, including, without limitation, the bankruptcy of GMC or its subsidiaries, GMC's failure to deliver the preferred distributions on the Class A Interests, GMC's failure to comply with portfolio requirements, breaches of certain covenants, lowering of our senior debt rating below either Baa3 by Moody's or BBB- by Standard & Poor's, and a failed attempt to remarket the Class A Interests. In the event of a liquidation of GMC, each member of GMC will receive the amount of its then current capital account balance. The managing member may avoid liquidation by exercising its option to purchase the Class A Interests.

We may exercise our option to purchase the Class A Interests for consideration equal to the then current capital account value, plus any unpaid preferred return and the prescribed make-whole amount. If we purchase these interests, any change in the unrelated third-party investor's capital account from its original value will be charged directly to retained earnings and will increase or decrease the net earnings used to calculate EPS in that period.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

As of May 27, 2012, we have issued guarantees and comfort letters of \$398 million for the debt and other obligations of consolidated subsidiaries, and guarantees and comfort letters of \$335 million for the debt and other obligations of non-consolidated affiliates, mainly CPW. In addition, off-balance sheet arrangements are generally limited to the future payments under non-cancelable operating leases, which totaled \$338 million as of May 27, 2012.

As of May 27, 2012, we had invested in five variable interest entities (VIEs). None of our VIEs are material to our results of operations, financial condition, or liquidity as of and for the year ended May 27, 2012. We determined whether or not we were the primary beneficiary (PB) of each VIE using a qualitative assessment that considered the VIE's purpose and design, the involvement of each of the interest holders, and the risks and benefits of the VIE. We are the PB of three of the VIEs. We provided minimal financial or other support to our VIEs during fiscal 2012 and there are no arrangements related to VIEs that would require us to provide significant financial support in the future.

Our defined benefit plans in the United States are subject to the requirements of the Pension Protection Act (PPA). The PPA revised the basis and methodology for determining defined benefit plan minimum funding requirements as well as maximum contributions to and benefits paid from tax-qualified plans. Most of these provisions were applicable to our domestic defined benefit pension plans in fiscal 2011. The PPA may ultimately require us to make additional contributions to our domestic plans. We made \$200 million of voluntary contributions to our principal domestic plans in each of fiscal 2012 and fiscal 2011. We do not expect to be required to make any contributions in fiscal 2013. Actual fiscal 2013 contributions could exceed our current projections, and may be influenced by our decision to undertake discretionary funding of our benefit trusts or by changes in regulatory requirements. Additionally, our projections concerning timing of the PPA funding requirements are subject to change and may be influenced by factors such as general market conditions affecting trust asset performance, interest rates, and our future decisions regarding certain elective provisions of the PPA.

The following table summarizes our future estimated cash payments under existing contractual obligations, including payments due by period:

In Millions	Payments Due by Fiscal Year				
	Total	2013	2014-15	2016-17	2018 and Thereafter
Long-term debt ^(a)	\$ 6,900.5	\$ 739.6	\$ 2,511.0	\$ 999.9	\$ 2,650.0
Accrued interest	100.2	100.2	—	—	—
Operating leases ^(b)	337.7	86.8	124.2	78.1	48.6
Capital leases	3.8	1.8	1.7	0.3	—
Purchase obligations ^(c)	2,633.2	2,286.9	168.1	91.8	86.4
Total contractual obligations	9,975.4	3,215.3	2,805.0	1,170.1	2,785.0
Other long-term obligations ^(d)	2,142.4	—	—	—	—
Total long-term obligations	\$12,117.8	\$3,215.3	\$2,805.0	\$1,170.1	\$2,785.0

(a) Amounts represent the expected cash payments of our long-term debt and do not include \$4 million for capital leases or \$1 million for net unamortized bond premiums and discounts and fair value adjustments.

(b) Operating leases represents the minimum rental commitments under non-cancelable operating leases.

(c) The majority of the purchase obligations represent commitments for raw material and packaging to be utilized in the normal course of business and for consumer marketing spending commitments that support our brands. For purposes of this table, arrangements are considered purchase obligations if a contract specifies all significant terms, including fixed or minimum quantities to be purchased, a pricing structure, and approximate timing of the transaction. Most arrangements are cancelable without a significant penalty and with short notice (usually 30 days). Any amounts reflected on the Consolidated Balance Sheets as accounts payable and accrued liabilities are excluded from the table above.

(d) The fair value of our foreign exchange, equity, commodity, and grain derivative contracts with a payable position to the counterparty was \$56 million as of May 27, 2012, based on fair market values as of that date. Future changes in market values will impact the amount of cash ultimately paid or received to settle those instruments in the future. Other long-term obligations mainly consist of liabilities for accrued compensation and benefits, including the underfunded status of certain of our defined benefit pension, other postretirement, and postemployment plans, and miscellaneous liabilities. We expect to pay \$19 million of benefits from our unfunded postemployment benefit plans and \$10 million of deferred compensation in fiscal 2013. We are unable to reliably estimate the amount of these payments beyond fiscal 2013. As of May 27, 2012, our total liability for uncertain tax positions and accrued interest and penalties was \$281 million.

SIGNIFICANT ACCOUNTING ESTIMATES

For a complete description of our significant accounting policies, see Note 2 to the Consolidated Financial Statements on page 49 of this report. Our significant accounting estimates are those that have a meaningful impact on the reporting of our financial condition and results of operations. These estimates include our accounting for promotional expenditures, valuation of long-lived assets, intangible assets, redeemable interest, stock-based compensation, income taxes, and defined benefit pension, other postretirement and postemployment benefits.

Promotional Expenditures Our promotional activities are conducted through our customers and directly or indirectly with end consumers. These activities include: payments to customers to perform merchandising activities on our behalf, such as advertising or in-store displays; discounts to our list prices to lower retail shelf prices; payments to gain distribution of new products; coupons, contests, and other incentives; and media and advertising expenditures. The media and advertising expenditures are generally recognized as expense when the advertisement airs. The cost of payments to customers and other consumer-related activities are recognized as the related revenue is recorded, which generally precedes the actual cash expenditure. The recognition of these costs requires estimation of customer participation and performance levels. These estimates are made based on the forecasted customer sales, the timing and forecasted costs of promotional activities, and other factors. Differences between estimated expenses and actual costs are normally insignificant and are recognized as a change in management estimate in a subsequent period. Our accrued trade, coupon, and consumer marketing liabilities were \$561 million as of May 27, 2012, and \$463 million as of May 29, 2011. Because our total promotional expenditures (including amounts classified as a reduction of revenues) are significant, if our estimates are inaccurate we would have to make adjustments in subsequent periods that could have a material effect on our results of operations.

Valuation of Long-lived Assets Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. An impairment loss would be recognized when estimated undiscounted future cash flows from the operation and

disposition of the asset group are less than the carrying amount of the asset group. Asset groups have identifiable cash flows independent of other asset groups. Measurement of an impairment loss would be based on the excess of the carrying amount of the asset or asset group over its fair value. Fair value is measured using discounted cash flows or independent appraisals, as appropriate.

Intangible Assets Goodwill is not subject to amortization and is tested for impairment annually and whenever events or changes in circumstances indicate that impairment may have occurred. Impairment testing is performed for each of our reporting units. We compare the carrying value of a reporting unit, including goodwill, to the fair value of the unit. Carrying value is based on the assets and liabilities associated with the operations of that reporting unit, which often requires allocation of shared or corporate items among reporting units. If the carrying amount of a reporting unit exceeds its fair value, we revalue all assets and liabilities of the reporting unit, excluding goodwill, to determine if the fair value of the net assets is greater than the net assets including goodwill. If the fair value of the net assets is less than the carrying amount of net assets including goodwill, impairment has occurred. Our estimates of fair value are determined based on a discounted cash flow model. Growth rates for sales and profits are determined using inputs from our annual long-range planning process. We also make estimates of discount rates, perpetuity growth assumptions, market comparables, and other factors. We performed our fiscal 2012 assessment as of November 28, 2011, and determined there was no impairment of goodwill for any of our reporting units as their related fair values were substantially in excess of their carrying values.

We evaluate the useful lives of our other intangible assets, mainly brands, to determine if they are finite or indefinite-lived. Reaching a determination on useful life requires significant judgments and assumptions regarding the future effects of obsolescence, demand, competition, other economic factors (such as the stability of the industry, known technological advances, legislative action that results in an uncertain or changing regulatory environment, and expected changes in distribution channels), the level of required maintenance expenditures, and the expected lives of other related groups of assets. Intangible assets that are deemed to have definite lives are amortized on a straight-line basis, over their useful lives, generally ranging from 4 to 30 years.

Our indefinite-lived intangible assets, mainly intangible assets primarily associated with the *Pillsbury*, *Totino's*, *Progreso*, *Green Giant*, *Yoplait*, *Old El Paso*, and *Häagen-Dazs* brands, are also tested for impairment annually and whenever events or changes in circumstances indicate that their carrying value may not be recoverable. We performed our fiscal 2012 assessment of our brand intangibles as of November 28, 2011. Our estimate of the fair value of the brands was based on a discounted cash flow model using inputs which included: projected revenues from our annual long-range plan; assumed royalty rates that could be payable if we did not own the brands; and a discount rate. As of our assessment date, there was no impairment of any of our indefinite-lived intangible assets as their related fair values were substantially in excess of the carrying values.

As of May 27, 2012, we had \$12.4 billion of goodwill and indefinite-lived intangible assets. While we currently believe that the fair value of each intangible exceeds its carrying value and that those intangibles so classified will contribute indefinitely to our cash flows, materially different assumptions regarding future performance of our businesses or a different weighted-average cost of capital could result in significant impairment losses and amortization expense.

In addition, we assess our investments in our joint ventures if we have reason to believe an impairment may have occurred including, but not limited to, ongoing operating losses, projected decreases in earnings, increases in the weighted average cost of capital or significant business disruptions. The significant assumptions used to estimate fair value include revenue growth and profitability, royalty rates, capital spending, depreciation and taxes, foreign currency exchange rates and a discount rate. By their nature, these projections and assumptions are uncertain. If we were to determine the current fair value of our investment was less than the carrying value of the investment, then we would assess if the shortfall was of a temporary or permanent nature and write down the investment to its fair value if we concluded the impairment is other than temporary.

Redeemable Interest On July 1, 2011, we acquired a 51 percent controlling interest in Yoplait S.A.S., a consolidated entity. Sodiaal holds the remaining 49 percent interest in Yoplait S.A.S. Sodiaal has the ability to put a limited portion of its redeemable interest to us at fair value once per year up to a maximum of 9 years. This put option requires us to classify Sodiaal's

interest as a redeemable interest outside of equity on our Consolidated Balance Sheets for as long as the put is exercisable by Sodiaal. When the put is no longer exercisable, the redeemable interest will be reclassified to non-controlling interests on our Consolidated Balance Sheets. We adjust the value of the redeemable interest through additional paid-in capital on our Consolidated Balance Sheets quarterly to the redeemable interest's redemption value, which approximates its fair value. During the fourth quarter of fiscal 2012, we adjusted the redeemable interest's redemption value based on a discounted cash flow model. The significant assumptions used to estimate the redemption value include projected revenue growth and profitability from our long range plan, capital spending, depreciation and taxes, foreign currency rates, and a discount rate.

Stock-based Compensation The valuation of stock options is a significant accounting estimate that requires us to use judgments and assumptions that are likely to have a material impact on our financial statements. Annually, we make predictive assumptions regarding future stock price volatility, employee exercise behavior, dividend yield, and the forfeiture rate.

We estimate our future stock price volatility using the historical volatility over the expected term of the option, excluding time periods of volatility we believe a marketplace participant would exclude in estimating our stock price volatility. We also have considered, but did not use, implied volatility in our estimate, because trading activity in options on our stock, especially those with tenors of greater than 6 months, is insufficient to provide a reliable measure of expected volatility. If all other assumptions are held constant, a one percentage point increase in our fiscal 2012 volatility assumption would increase the grant-date fair value of our fiscal 2012 option awards by 6 percent.

Our expected term represents the period of time that options granted are expected to be outstanding based on historical data to estimate option exercises and employee terminations within the valuation model. Separate groups of employees have similar historical exercise behavior and therefore were aggregated into a single pool for valuation purposes. The weighted-average expected term for all employee groups is presented in the table below. An increase in the expected term by 1 year, leaving all other assumptions constant, would change the grant date fair value by 17 percent.

The risk-free interest rate for periods during the expected term of the options is based on the U.S. Treasury zero-coupon yield curve in effect at the time of grant.

The estimated fair values of stock options granted and the assumptions used for the Black-Scholes option-pricing model were as follows:

	Fiscal Year		
	2012	2011	2010
Estimated fair values of stock options granted	\$ 5.88	\$ 4.12	\$ 3.20
Assumptions:			
Risk-free interest rate	2.9%	2.9%	3.7%
Expected term	8.5 years	8.5 years	8.5 years
Expected volatility	17.6%	18.5%	18.9%
Dividend yield	3.3%	3.0%	3.4%

To the extent that actual outcomes differ from our assumptions, we are not required to true up grant-date fair value-based expense to final intrinsic values. However, these differences can impact the classification of cash tax benefits realized upon exercise of stock options, as explained in the following two paragraphs. Furthermore, historical data has a significant bearing on our forward-looking assumptions. Significant variances between actual and predicted experience could lead to prospective revisions in our assumptions, which could then significantly impact the year-over-year comparability of stock-based compensation expense.

Any corporate income tax benefit realized upon exercise or vesting of an award in excess of that previously recognized in earnings (referred to as a windfall tax benefit) is presented in the Consolidated Statements of Cash Flows as a financing cash flow. The actual impact on future years' financing cash flow will depend, in part, on the volume of employee stock option exercises during a particular year and the relationship between the exercise-date market value of the underlying stock and the original grant-date fair value previously determined for financial reporting purposes.

Realized windfall tax benefits are credited to additional paid-in capital within the Consolidated Balance Sheets. Realized shortfall tax benefits (amounts which are less than that previously recognized in earnings) are first offset against the cumulative balance of windfall tax benefits, if any, and then charged directly to income tax expense, potentially resulting in volatility in our consolidated effective income tax rate. We calculated a cumulative amount of windfall tax benefits

from post-1995 fiscal years for the purpose of accounting for future shortfall tax benefits and currently have sufficient cumulative windfall tax benefits to absorb projected arising shortfalls, such that we do not currently expect future earnings to be affected by this provision. However, as employee stock option exercise behavior is not within our control, it is possible that materially different reported results could occur if different assumptions or conditions were to prevail.

Income Taxes We apply a more-likely-than-not threshold to the recognition and derecognition of uncertain tax positions. Accordingly we recognize the amount of tax benefit that has a greater than 50 percent likelihood of being ultimately realized upon settlement. Future changes in judgment related to the expected ultimate resolution of uncertain tax positions will affect earnings in the quarter of such change.

We are subject to federal income taxes in the United States as well as various state, local, and foreign jurisdictions. A number of years may elapse before an uncertain tax position is audited and finally resolved. While it is often difficult to predict the final outcome or the timing of resolution of any particular uncertain tax position, we believe that our liabilities for income taxes reflect the most likely outcome. We adjust these liabilities, as well as the related interest, in light of changing facts and circumstances. Settlement of any particular position would usually require the use of cash.

The number of years with open tax audits varies depending on the tax jurisdiction. Our major taxing jurisdictions include the United States (federal and state) and Canada. The IRS initiated its audit of our fiscal 2009 and fiscal 2010 tax years during fiscal 2012.

During fiscal 2012, we reached a settlement with the IRS concerning research and development tax credits claimed for fiscal years 2002 to 2008. This settlement did not have a material impact on our results of operations or financial position. As of the end of fiscal 2012, we have effectively settled all issues with the IRS for fiscal years 2008 and prior.

During fiscal 2011, we reached a settlement with the IRS concerning certain corporate income tax adjustments for fiscal years 2002 to 2008. The adjustments primarily relate to the amount of capital loss, depreciation, and amortization we reported as a result of the sale of noncontrolling interests in our GMC subsidiary. As a result, we recorded a \$108 million reduction in our total liabilities for uncertain tax positions in fiscal 2011.

We made payments totaling \$385 million in fiscal 2011 related to this settlement.

Also during fiscal 2011, the Superior Court of the State of California issued an adverse decision concerning our state income tax apportionment calculations. As a result, we recorded a \$12 million increase in our total liabilities for uncertain tax positions in fiscal 2011. We believe our positions are supported by substantial technical authority and have appealed this decision. We do not expect to make a payment related to this matter until it is definitively resolved.

Various tax examinations by United States state taxing authorities could be conducted for any open tax year, which vary by jurisdiction, but are generally from 3 to 5 years. Currently, several state examinations are in progress. The Canada Revenue Agency (CRA) has completed its review of our income tax returns in Canada for fiscal years 2003 to 2005. The CRA has raised assessments for these years to which we have objected or otherwise addressed through the Mutual Agreement procedures of the Canada-US tax treaty. We believe our positions are supported by substantial technical authority and are vigorously defending our positions. We do not anticipate that any United States or Canadian tax adjustments will have a significant impact on our financial position or results of operations.

As of May 27, 2012, our total liability for uncertain tax positions and accrued interest and penalties was \$281 million. We do not expect to pay any amounts related to uncertain tax positions or accrued interest in the next 12 months. We are not able to reasonably estimate the timing of future cash flows beyond 12 months due to uncertainties in the timing of tax audit outcomes.

Defined Benefit Pension, Other Postretirement And Postemployment Benefit Plans

Defined Benefit Pension Plans We have defined benefit pension plans covering most employees in the United States, Canada, France, and the United Kingdom. Benefits for salaried employees are based on length of service and final average compensation. Benefits for hourly employees include various monthly amounts for each year of credited service. Our funding policy is consistent with the requirements of applicable laws. We made \$200 million of voluntary contributions to our principal U.S. plans in each of fiscal 2012 and fiscal 2011. We do not expect to be required to make any contributions in fiscal 2013. Our principal domestic retirement plan covering

salaried employees has a provision that any excess pension assets would be allocated to active participants if the plan is terminated within five years of a change in control. In fiscal 2012, we announced changes to our U.S. defined benefit pension plans. All new salaried employees hired on or after June 1, 2013, will be eligible for a new retirement program that does not include a defined benefit pension plan. Current salaried employees will remain in the existing defined benefit pension plan with adjustments to benefits.

Other Postretirement Benefit Plans We also sponsor plans that provide health care benefits to the majority of our retirees in the United States and Canada. The salaried health care benefit plan is contributory, with retiree contributions based on years of service. We make decisions to fund related trusts for certain employees and retirees on an annual basis. We did not make voluntary contributions to these plans in fiscal 2012. The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the Act), was signed into law in March 2010. We continue to evaluate the effect of the Act, including its potential impact on the future cost of our benefit plans.

Postemployment Benefit Plans Under certain circumstances, we also provide accruable benefits to former or inactive employees in the United States, Canada, and Mexico, and members of our Board of Directors, including severance and certain other benefits payable upon death. We recognize an obligation for any of these benefits that vest or accumulate with service. Postemployment benefits that do not vest or accumulate with service (such as severance based solely on annual pay rather than years of service) are charged to expense when incurred. Our postemployment benefit plans are unfunded.

We recognize benefits provided during retirement or following employment over the plan participants' active working life. Accordingly, we make various assumptions to predict and measure costs and obligations many years prior to the settlement of our obligations. Assumptions that require significant management judgment and have a material impact on the measurement of our net periodic benefit expense or income and accumulated benefit obligations include the long-term rates of return on plan assets, the interest rates used to discount the obligations for our benefit plans, and the health care cost trend rates.

Expected Rate of Return on Plan Assets Our expected rate of return on plan assets is determined by our asset allocation, our historical long-term investment performance, our estimate of future long-term returns by asset class (using input from our actuaries, investment services, and investment managers), and long-term inflation assumptions. We review this assumption annually for each plan, however, our annual investment performance for one particular year does not, by itself, significantly influence our evaluation.

The investment objective for our defined benefit pension and other postretirement benefit plans is to secure the benefit obligations to participants at a reasonable cost to us. Our goal is to optimize the long-term return on plan assets at a moderate level of risk. The defined benefit pension and other postretirement portfolios are broadly diversified across asset classes. Within asset classes, the portfolios are further diversified across investment styles and investment organizations. For the defined benefit pension plans, the long-term investment policy allocation is: 25 percent to equities in the United States; 15 percent to international equities; 10 percent to private equities; 35 percent to fixed income; and 15 percent to real assets (real estate, energy, and timber). For other postretirement benefit plans, the long-term investment policy allocations are: 30 percent to equities in the United States; 20 percent to international equities; 10 percent to private equities; 30 percent to fixed income; and 10 percent to real assets (real estate, energy, and timber). The actual allocations to these asset classes may vary tactically around the long-term policy allocations based on relative market valuations.

Our historical investment returns (compound annual growth rates) for our United States defined benefit pension and other postretirement plan assets were 1.2 percent, 2.3 percent, 7.7 percent, 8.1 percent, and 9.5 percent for the 1, 5, 10, 15, and 20 year periods ended May 27, 2012.

On a weighted-average basis, the expected rate of return for all defined benefit plans was 9.52 percent for fiscal 2012, 9.53 percent for fiscal 2011, and 9.55 percent for fiscal 2010. During fiscal 2012, we lowered our weighted-average expected rate of return on plan assets for our principal defined benefit pension and other postretirement plans in the United States to 8.6 percent due to generally lower expectations for long-term rates of return across our asset classes due to the recent global economic slowdown and our expectation of an extended time frame for recovery.

Lowering the expected long-term rate of return on assets by 50 basis points would increase our net pension and postretirement expense by \$26.5 million for fiscal 2013. A market-related valuation basis is used to reduce year-to-year expense volatility. The market-related valuation recognizes certain investment gains or losses over a five-year period from the year in which they occur. Investment gains or losses for this purpose are the difference between the expected return calculated using the market-related value of assets and the actual return based on the market-related value of assets. Our outside actuaries perform these calculations as part of our determination of annual expense or income.

Discount Rates Our discount rate assumptions are determined annually as of the last day of our fiscal year for our defined benefit pension, other postretirement, and postemployment benefit plan obligations. We also use the same discount rates to determine defined benefit pension, other postretirement, and postemployment benefit plan income and expense for the following fiscal year. We work with our actuaries to determine the timing and amount of expected future cash outflows to plan participants and, using the top quartile of AA-rated corporate bond yields, to develop a forward interest rate curve, including a margin to that index based on our credit risk. This forward interest rate curve is applied to our expected future cash outflows to determine our discount rate assumptions.

Our weighted-average discount rates were as follows:

Weighted-average Discount Rates

	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Postemployment Benefit Plans
Obligations as of May 27, 2012, and fiscal 2013 expense	4.85%	4.70%	3.86 %
Obligations as of May 29, 2011, and fiscal 2012 expense	5.45%	5.35%	4.77 %
Fiscal 2011 expense	5.85%	5.80%	5.12 %

Lowering the discount rates by 50 basis points would increase our net defined benefit pension, other postretirement, and postemployment benefit plan expense for fiscal 2013 by approximately \$41.8 million. All obligation-related experience gains and losses are amortized using

a straight-line method over the average remaining service period of active plan participants.

Health Care Cost Trend Rates We review our health care cost trend rates annually. Our review is based on data we collect about our health care claims experience and information provided by our actuaries. This information includes recent plan experience, plan design, overall industry experience and projections, and assumptions used by other similar organizations. Our initial health care cost trend rate is adjusted as necessary to remain consistent with this review, recent experiences, and short-term expectations. Our initial health care cost trend rate assumption is 8.5 percent for all retirees. Rates are graded down annually until the ultimate trend rate of 5.2 percent is reached in 2019 for all retirees. The trend rates are applicable for calculations only if the retirees' benefits increase as a result of health care inflation. The ultimate trend rate is adjusted annually, as necessary, to approximate the current economic view on the rate of long-term inflation plus an appropriate health care cost premium. Assumed trend rates for health care costs have an important effect on the amounts reported for the other postretirement benefit plans.

A one percentage point change in the health care cost trend rate would have the following effects:

In Millions	One Percentage Point Increase	One Percentage Point Decrease
Effect on the aggregate of the service and interest cost components in fiscal 2013	\$ 5.7	\$ (4.7)
Effect on the other postretirement accumulated benefit obligation as of May 27, 2012	96.7	(85.4)

Any arising health care claims cost-related experience gain or loss is recognized in the calculation of expected future claims. Once recognized, experience gains and losses are amortized using a straight-line method over 15 years, resulting in at least the minimum amortization required being recorded.

Financial Statement Impact In fiscal 2012, we recorded net defined benefit pension, other postretirement, and postemployment benefit plan expense of \$106 million compared to \$95 million of expense in fiscal 2011 and \$11 million of income in fiscal 2010. As of May 27, 2012, we had cumulative unrecognized actuarial net losses of \$1.7 billion on our defined benefit pension plans and

\$232 million on our postretirement and postemployment benefit plans, mainly as the result of liability increases from lower interest rates and declines in the values of plan assets. These unrecognized actuarial net losses will result in increases in our future pension expense and increases in postretirement expense since they currently exceed the corridors defined by GAAP.

We use the 2012 IRS Static Mortality Table projected forward to our plans' measurement dates to calculate the year-end defined benefit pension, other postretirement, and postemployment benefit obligations and annual expense.

Actual future net defined benefit pension, other postretirement, and postemployment benefit plan income or expense will depend on investment performance, changes in future discount rates, changes in health care cost trend rates, and other factors related to the populations participating in these plans.

The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the Act), was signed into law in March 2010. The Act codifies health care reforms with staggered effective dates from 2010 to 2018 with many provisions in the Act requiring the issuance of additional guidance from various government agencies. Estimates of the future impacts of several of the Act's provisions are incorporated into our postretirement benefit liability including the elimination of lifetime maximums and the imposition of an excise tax on high cost health plans. These changes resulted in a \$24 million increase in our postretirement benefit liability in fiscal 2010. Given the complexity of the Act, the extended time period over which the reforms will be implemented, and the unknown impact of future regulatory guidance, further financial impacts to our postretirement benefit liability and related future expense may occur.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In June 2011, the Financial Accounting Standards Board (FASB) issued new accounting guidance for the presentation of other comprehensive income (OCI). This guidance requires entities to present net income and OCI in either a single continuous statement or in separate consecutive statements. The guidance does not change the components of net income or OCI, when OCI should be reclassified to net income, or the EPS calculation. The guidance is effective for fiscal years beginning after December 15, 2011, which for us is the first quarter of fiscal 2013. This guidance will not impact our results of operations or financial position.

In December 2011, the FASB issued new accounting disclosure requirements about the nature and exposure of offsetting arrangements related to financial and derivative instruments. The requirements are effective for fiscal years beginning after January 1, 2013, which for us is the first quarter of fiscal 2014. The requirements will not impact our results of operations or financial position.

CAUTIONARY STATEMENT RELEVANT TO FORWARD-LOOKING INFORMATION FOR THE PURPOSE OF "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This report contains or incorporates by reference forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that are based on our current expectations and assumptions. We also may make written or oral forward-looking statements, including statements contained in our filings with the SEC and in our reports to stockholders.

The words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "plan," "project," or similar expressions identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical results and those currently anticipated or projected. We wish to caution you not to place undue reliance on any such forward-looking statements.

In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, we are identifying important factors that could affect our financial performance and could cause our actual results in future periods to differ materially from any current opinions or statements.

Our future results could be affected by a variety of factors, such as: competitive dynamics in the consumer foods industry and the markets for our products, including new product introductions, advertising activities,

pricing actions, and promotional activities of our competitors; economic conditions, including changes in inflation rates, interest rates, tax rates, or the availability of capital; product development and innovation; consumer acceptance of new products and product improvements; consumer reaction to pricing actions and changes in promotion levels; acquisitions or dispositions of businesses or assets; changes in capital structure; changes in laws and regulations, including labeling and advertising regulations; impairments in the carrying value of goodwill, other intangible assets, or other long-lived assets, or changes in the useful lives of other intangible assets; changes in accounting standards and the impact of significant accounting estimates; product quality and safety issues, including recalls and product liability; changes in consumer demand for our products; effectiveness of advertising, marketing, and promotional programs; changes in consumer behavior, trends, and preferences, including weight loss trends; consumer perception of health-related issues, including obesity; consolidation in the retail environment; changes in purchasing and inventory levels of significant customers; fluctuations in the cost and availability of supply chain resources, including raw materials, packaging, and energy; disruptions or inefficiencies in the supply chain; volatility in the market value of derivatives used to manage price risk for certain commodities; benefit plan expenses due to changes in plan asset values and discount rates used to determine plan liabilities; failure of our information technology systems; foreign economic conditions, including currency rate fluctuations; and political unrest in foreign markets and economic uncertainty due to terrorism or war.

You should also consider the risk factors that we identify in Item 1A of our 2012 Form 10-K, which could also affect our future results.

We undertake no obligation to publicly revise any forward-looking statements to reflect events or circumstances after the date of those statements or to reflect the occurrence of anticipated or unanticipated events.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk stemming from changes in interest rates, foreign exchange rates, commodity prices, and equity prices. Changes in these factors could cause fluctuations in our earnings and cash flows. In the normal course of business, we actively manage our exposure to these market risks by entering into various hedging transactions, authorized under established policies that place clear controls on these activities. The counterparties in these transactions are generally highly rated institutions. We establish credit limits for each counterparty. Our hedging transactions include but are not limited to a variety of derivative financial instruments.

INTEREST RATE RISK

We are exposed to interest rate volatility with regard to future issuances of fixed-rate debt, and existing and future issuances of floating-rate debt. Primary exposures include U.S. Treasury rates, LIBOR, Euribor, and commercial paper rates in the United States and Europe. We use interest rate swaps and forward-starting interest rate swaps to hedge our exposure to interest rate changes, to reduce the volatility of our financing costs, and to achieve a desired proportion of fixed versus floating-rate debt, based on current and projected market conditions. Generally under these swaps, we agree with a counterparty to exchange the difference between fixed-rate and floating-rate interest amounts based on an agreed upon notional principal amount.

As of May 27, 2012, we had interest rate swaps with \$835 million of aggregate notional principal amount outstanding, all of which converts fixed-rate notes to floating-rate notes.

FOREIGN EXCHANGE RISK

Foreign currency fluctuations affect our net investments in foreign subsidiaries and foreign currency cash flows related to third party purchases, intercompany loans, product shipments, and foreign-denominated commercial paper. We are also exposed to the translation of foreign currency earnings to the U.S. dollar. Our principal exposures are to the Australian dollar, Brazilian real, British pound sterling, Canadian dollar, Chinese renminbi, euro, Japanese yen, Swiss franc, and Mexican peso. We mainly use foreign currency forward contracts to selectively

hedge our foreign currency cash flow exposures. We also generally swap our foreign-denominated commercial paper borrowings and nonfunctional currency intercompany loans back to U.S. dollars or the functional currency; the gains or losses on these derivatives offset the foreign currency revaluation gains or losses recorded in earnings on the associated borrowings. We generally do not hedge more than 18 months forward.

We also have many net investments in foreign subsidiaries that are denominated in euros. We previously hedged a portion of these net investments by issuing euro-denominated commercial paper and foreign exchange forward contracts. As of May 27, 2012, we had deferred net foreign currency transaction losses of \$96 million in AOCI associated with hedging activity.

COMMODITY PRICE RISK

Many commodities we use in the production and distribution of our products are exposed to market price risks. We utilize derivatives to manage price risk for our principal ingredients and energy costs, including grains (oats, wheat, and corn), oils (principally soybean), non-fat dry milk, natural gas, and diesel fuel. Our primary objective when entering into these derivative contracts is to achieve certainty with regard to the future price of commodities purchased for use in our supply chain. We manage our exposures through a combination of purchase orders, long-term contracts with suppliers, exchange-traded futures and options, and over-the-counter options and swaps. We offset our exposures based on current and projected market conditions and generally seek to acquire the inputs at as close to our planned cost as possible.

As of May 27, 2012, the net notional value of commodity derivatives was \$307 million, of which \$127 million related to agricultural inputs and \$180 million related to energy inputs. These contracts relate to inputs that generally will be utilized within the next 12 months.

EQUITY INSTRUMENTS

Equity price movements affect our compensation expense as certain investments made by our employees in our deferred compensation plan are revalued. We use equity swaps to manage this risk. As of May 27, 2012, the net notional amount of our equity swaps was \$48 million.

VALUE AT RISK

The estimates in the table below are intended to measure the maximum potential fair value we could lose in one day from adverse changes in market interest rates, foreign exchange rates, commodity prices, and equity prices under normal market conditions. A Monte Carlo value-at-risk (VAR) methodology was used to quantify the market risk for our exposures. The models assumed normal market conditions and used a 95 percent confidence level.

The VAR calculation used historical interest rates, foreign exchange rates, and commodity and equity prices from the past year to estimate the potential volatility and correlation of these rates in the future. The market data were drawn from the RiskMetrics™ data set. The calculations are not intended to represent actual losses in fair value that we expect to incur. Further, since the hedging instrument (the derivative) inversely correlates with the underlying exposure, we would expect that any loss or gain in the fair value of our derivatives would be generally offset by an increase or decrease in the fair

value of the underlying exposure. The positions included in the calculations were: debt; investments; interest rate swaps; foreign exchange forwards; commodity swaps, futures and options; and equity instruments. The calculations do not include the underlying foreign exchange and commodities or equity-related positions that are offset by these market-risk-sensitive instruments.

The table below presents the estimated maximum potential VAR arising from a one-day loss in fair value for our interest rate, foreign currency, commodity, and equity market-risk-sensitive instruments outstanding as of May 27, 2012, and May 29, 2011, and the average fair value impact during the year ended May 27, 2012.

In Millions	Fair Value Impact		
	May 27, 2012	Average During Fiscal 2012	May 29, 2011
Interest rate instruments	\$29.4	\$29.9	\$26.5
Foreign currency instruments	7.1	7.6	8.7
Commodity instruments	3.8	4.4	3.9
Equity instruments	1.1	0.6	—

Reports of Management and Independent Registered Public Accounting Firm

REPORT OF MANAGEMENT RESPONSIBILITIES

The management of General Mills, Inc. is responsible for the fairness and accuracy of the consolidated financial statements. The statements have been prepared in accordance with accounting principles that are generally accepted in the United States, using management's best estimates and judgments where appropriate. The financial information throughout the Annual Report on Form 10-K is consistent with our consolidated financial statements.

Management has established a system of internal controls that provides reasonable assurance that assets are adequately safeguarded and transactions are recorded accurately in all material respects, in accordance with management's authorization. We maintain a strong audit program that independently evaluates the adequacy and effectiveness of internal controls. Our internal controls provide for appropriate separation of duties and responsibilities, and there are documented policies regarding use of our assets and proper financial reporting. These formally stated and regularly communicated policies demand highly ethical conduct from all employees.

The Audit Committee of the Board of Directors meets regularly with management, internal auditors, and our independent registered public accounting firm to review internal control, auditing, and financial reporting matters. The independent registered public accounting firm, internal auditors, and employees have full and free access to the Audit Committee at any time.

The Audit Committee reviewed and approved the Company's annual financial statements. The Audit Committee recommended, and the Board of Directors approved, that the consolidated financial statements be included in the Annual Report. The Audit Committee also appointed KPMG LLP to serve as the Company's independent registered public accounting firm for fiscal 2013, subject to ratification by the stockholders at the annual meeting.

K. J. Powell

and Chief Financial Officer

July 3, 2012

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
General Mills, Inc.:

We have audited the accompanying consolidated balance sheets of General Mills, Inc. and subsidiaries as of May 27, 2012 and May 29, 2011, and the related consolidated statements of earnings, total equity, comprehensive income, and redeemable interest, and cash flows for each of the fiscal years in the three-year period ended May 27, 2012. In connection with our audits of the consolidated financial statements, we have audited the accompanying financial statement schedule. We also have audited General Mills, Inc.'s internal control over financial reporting as of May 27, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). General Mills, Inc.'s management is responsible for these consolidated financial statements and financial statement schedule, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing

such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that

controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of General Mills, Inc. and subsidiaries as of May 27, 2012 and May 29, 2011, and the results of their operations and their cash flows for each of the fiscal years in the three-year period ended May 27, 2012, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the accompanying financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein. Also in our opinion, General Mills, Inc. maintained, in all material respects, effective internal control over financial reporting as of May 27, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Changes in current assets and liabilities	\$ 243.8	\$ (720.9)	\$ 143.4

See accompanying notes to consolidated financial statements.

Notes to Consolidated Financial Statements

GENERAL MILLS, INC. AND SUBSIDIARIES

NOTE 1. BASIS OF PRESENTATION AND RECLASSIFICATIONS

Basis of Presentation Our Consolidated Financial Statements include the accounts of General Mills, Inc. and all subsidiaries in which we have a controlling financial interest. Intercompany transactions and accounts, including any noncontrolling and redeemable interests' share of those transactions, are eliminated in consolidation.

Our fiscal year ends on the last Sunday in May. Fiscal years 2012, 2011 and 2010 each consisted of 52 weeks.

Change in Reporting Period As part of a long-term plan to conform the fiscal year ends of all our operations, we have changed the reporting period of certain countries within our International segment from an April fiscal year end to a May fiscal year end to match our fiscal calendar. Accordingly, in the year of change, our results include 13 months of results from the affected operations compared to 12 months in previous fiscal years. In fiscal 2012, we changed the reporting period for our China operations and in fiscal 2010 we changed many of the countries in our Asia/Pacific region. The impact of these changes was not material to our results of operations and, therefore, we did not restate prior period financial statements for comparability. Countries within the International segment that remain on an April fiscal year end include our European operations, Australia, and Brazil.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Cash and Cash Equivalents We consider all investments purchased with an original maturity of three months or less to be cash equivalents.

Inventories All inventories in the United States other than grain are valued at the lower of cost, using the last-in, first-out (LIFO) method, or market. Grain inventories and all related cash contracts and derivatives are valued at market with all net changes in value recorded in earnings currently.

Inventories outside of the United States are generally valued at the lower of cost, using the first-in, first-out (FIFO) method, or market.

Shipping costs associated with the distribution of finished product to our customers are recorded as cost of

sales, and are recognized when the related finished product is shipped to and accepted by the customer.

Land, Buildings, Equipment, and Depreciation Land is recorded at historical cost. Buildings and equipment, including capitalized interest and internal engineering costs, are recorded at cost and depreciated over estimated useful lives, primarily using the straight-line method. Ordinary maintenance and repairs are charged to cost of sales. Buildings are usually depreciated over 40 to 50 years, and equipment, furniture, and software are usually depreciated over 3 to 10 years. Fully depreciated assets are retained in buildings and equipment until disposal. When an item is sold or retired, the accounts are relieved of its cost and related accumulated depreciation and the resulting gains and losses, if any, are recognized in earnings. As of May 27, 2012, assets held for sale were insignificant.

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. An impairment loss would be recognized when estimated undiscounted future cash flows from the operation and disposition of the asset group are less than the carrying amount of the asset group. Asset groups have identifiable cash flows and are largely independent of other asset groups. Measurement of an impairment loss would be based on the excess of the carrying amount of the asset group over its fair value. Fair value is measured using a discounted cash flow model or independent appraisals, as appropriate.

Goodwill and Other Intangible Assets Goodwill is not subject to amortization and is tested for impairment annually and whenever events or changes in circumstances indicate that impairment may have occurred. Impairment testing is performed for each of our reporting units. We compare the carrying value of a reporting unit, including goodwill, to the fair value of the unit. Carrying value is based on the assets and liabilities associated with the operations of that reporting unit, which often requires allocation of shared or corporate items among reporting units. If the carrying amount of a reporting unit exceeds its fair value, we revalue all assets and liabilities of the reporting unit, excluding goodwill, to determine if the fair value of the net assets is greater than the net assets including goodwill. If the fair value of the net assets is less than the carrying amount of net assets including goodwill, impairment has occurred.

Our estimates of fair value are determined based on a discounted cash flow model. Growth rates for sales and profits are determined using inputs from our annual long-range planning process. We also make estimates of discount rates, perpetuity growth assumptions, market comparables, and other factors. We performed our fiscal 2012 assessment as of November 28, 2011, and determined there was no impairment of goodwill for any of our reporting units as their related fair values were substantially in excess of their carrying values.

We evaluate the useful lives of our other intangible assets, mainly brands, to determine if they are finite or indefinite-lived. Reaching a determination on useful life requires significant judgments and assumptions regarding the future effects of obsolescence, demand, competition, other economic factors (such as the stability of the industry, known technological advances, legislative action that results in an uncertain or changing regulatory environment, and expected changes in distribution channels), the level of required maintenance expenditures, and the expected lives of other related groups of assets. Intangible assets that are deemed to have definite lives are amortized on a straight-line basis, over their useful lives, generally ranging from 4 to 30 years.

Our indefinite-lived intangible assets, mainly intangible assets primarily associated with the *Pillsbury*, *Totino's*, *Progresso*, *Green Giant*, *Yoplait*, *Old El Paso*, and *Häagen-Dazs* brands, are also tested for impairment annually and whenever events or changes in circumstances indicate that their carrying value may not be recoverable. We performed our fiscal 2012 assessment of our brand intangibles as of November 28, 2011. Our estimate of the fair value of the brands was based on a discounted cash flow model using inputs which included: projected revenues from our annual long-range plan; assumed royalty rates that could be payable if we did not own the brands; and a discount rate. As of our assessment date, there was no impairment of any of our indefinite-lived intangible assets as their related fair values were substantially in excess of the carrying values.

Our finite-lived intangible assets, primarily acquired franchise agreements and customer relationships, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss would be recognized when estimated undiscounted future cash flows from the operation and disposition of the asset are less than the carrying amount of the asset. Assets generally have identifiable cash flows and are largely

independent of other assets. Measurement of an impairment loss would be based on the excess of the carrying amount of the asset over its fair value. Fair value is measured using a discounted cash flow model or other similar valuation model, as appropriate.

Investments in Joint Ventures Our investments in companies over which we have the ability to exercise significant influence are stated at cost plus our share of undistributed earnings or losses. We receive royalty income from certain joint ventures, incur various expenses (primarily research and development), and record the tax impact of certain joint venture operations that are structured as partnerships. In addition, we make advances to our joint ventures in the form of loans or capital investments. We also sell certain raw materials, semi-finished goods, and finished goods to the joint ventures, generally at market prices.

In addition, we assess our investments in our joint ventures if we have reason to believe an impairment may have occurred including, but not limited to, ongoing operating losses, projected decreases in earnings, increases in the weighted average cost of capital or significant business disruptions. The significant assumptions used to estimate fair value include revenue growth and profitability, royalty rates, capital spending, depreciation and taxes, foreign currency exchange rates and a discount rate. By their nature, these projections and assumptions are uncertain. If we were to determine the current fair value of our investment was less than the carrying value of the investment, then we would assess if the shortfall was of a temporary or permanent nature and write down the investment to its fair value if we concluded the impairment is other than temporary.

Redeemable Interest On July 1, 2011, we acquired a 51 percent controlling interest in Yoplait S.A.S., a consolidated entity. Sodiaal International (Sodiaal) holds the remaining 49 percent interest in Yoplait S.A.S. Sodiaal has the ability to put a limited portion of its redeemable interest to us at fair value once per year up to a maximum of 9 years. This put option requires us to classify Sodiaal's interest as a redeemable interest outside of equity on our Consolidated Balance Sheets for as long as the put is exercisable by Sodiaal. When the put is no longer exercisable, the redeemable interest will be reclassified to noncontrolling interests on our Consolidated Balance Sheets. We adjust the value of the redeemable interest through additional paid-in capital on our

Consolidated Balance Sheets quarterly to the redeemable interest's redemption value, which approximates its fair value. During the fourth quarter of fiscal 2012, we adjusted the redeemable interest's redemption value based on a discounted cash flow model. The significant assumptions used to estimate the redemption value include projected revenue growth and profitability from our long range plan, capital spending, depreciation and taxes, foreign currency rates, and a discount rate.

Variable Interest Entities As of May 27, 2012, we had invested in five variable interest entities (VIEs). None of our VIEs are material to our results of operations, financial condition, or liquidity as of and for the year ended May 27, 2012. We determined whether or not we were the primary beneficiary (PB) of each VIE using a qualitative assessment that considered the VIE's purpose and design, the involvement of each of the interest holders, and the risks and benefits of the VIE. We are the PB of three of the VIEs. We provided minimal financial or other support to our VIEs during fiscal 2012, and there are no arrangements related to VIEs that would require us to provide significant financial support in the future.

Revenue Recognition We recognize sales revenue when the shipment is accepted by our customer. Sales include shipping and handling charges billed to the customer and are reported net of consumer coupon redemption, trade promotion and other costs, including estimated allowances for returns, unsalable product, and prompt pay discounts. Sales, use, value-added, and other excise taxes are not recognized in revenue. Coupons are recorded when distributed, based on estimated redemption rates. Trade promotions are recorded based on estimated participation and performance levels for offered programs at the time of sale. We generally do not allow a right of return. However, on a limited case-by-case basis with prior approval, we may allow customers to return product. In limited circumstances, product returned in saleable condition is resold to other customers or outlets. Receivables from customers generally do not bear interest. Terms and collection patterns vary around the world and by channel. The allowance for doubtful accounts represents our estimate of probable non-payments and credit losses in our existing receivables, as determined based on a review of past due balances and other specific account data. Account balances are written off against the allowance when we deem the amount is uncollectible.

Environmental Environmental costs relating to existing conditions caused by past operations that do not contribute to current or future revenues are expensed. Liabilities for anticipated remediation costs are recorded on an undiscounted basis when they are probable and reasonably estimable, generally no later than the completion of feasibility studies or our commitment to a plan of action.

Advertising Production Costs We expense the production costs of advertising the first time that the advertising takes place.

Research and Development All expenditures for research and development (R&D) are charged against earnings in the year incurred. R&D includes expenditures for new product and manufacturing process innovation, and the annual expenditures are comprised primarily of internal salaries, wages, consulting, and other supplies attributable to time spent on R&D activities. Other costs include depreciation and maintenance of research facilities, including assets at facilities that are engaged in pilot plant activities.

Foreign Currency Translation For all significant foreign operations, the functional currency is the local currency. Assets and liabilities of these operations are translated at the period-end exchange rates. Income statement accounts are translated using the average exchange rates prevailing during the year. Translation adjustments are reflected within accumulated other comprehensive loss (AOCI) in stockholders' equity. Gains and losses from foreign currency transactions are included in net earnings for the period, except for gains and losses on investments in subsidiaries for which settlement is not planned for the foreseeable future and foreign exchange gains and losses on instruments designated as net investment hedges. These gains and losses are recorded in AOCI.

Derivative Instruments All derivatives are recognized on the Consolidated Balance Sheets at fair value based on quoted market prices or our estimate of their fair value, and are recorded in either current or noncurrent assets or liabilities based on their maturity. Changes in the fair values of derivatives are recorded in net earnings or other comprehensive income, based on whether the instrument is designated and effective as a hedge transaction and, if so, the type of hedge transaction. Gains or losses on derivative instruments reported in AOCI are

reclassified to earnings in the period the hedged item affects earnings. If the underlying hedged transaction ceases to exist, any associated amounts reported in AOCI are reclassified to earnings at that time. Any ineffectiveness is recognized in earnings in the current period.

Stock-based Compensation We generally measure compensation expense for grants of restricted stock units using the value of a share of our stock on the date of grant. We estimate the value of stock option grants using a Black-Scholes valuation model. Stock compensation is recognized straight line over the vesting period. Our stock compensation expense is recorded in selling, general and administrative (SG&A) expenses and cost of sales in the Consolidated Statements of Earnings and allocated to each reportable segment in our segment results.

Certain equity-based compensation plans contain provisions that accelerate vesting of awards upon retirement, termination or death of eligible employees and directors. We consider a stock-based award to be vested when the employee's retention of the award is no longer contingent on providing subsequent service. Accordingly, the related compensation cost is recognized immediately for awards granted to retirement-eligible individuals or over the period from the grant date to the date retirement eligibility is achieved, if less than the stated vesting period.

We report the benefits of tax deductions in excess of recognized compensation cost as a financing cash flow, thereby reducing net operating cash flows and increasing net financing cash flows.

Defined Benefit Pension, Other Postretirement, and Postemployment Benefit Plans We sponsor several domestic and foreign defined benefit plans to provide pension, health care, and other welfare benefits to retired employees. Under certain circumstances, we also provide accruable benefits to former or inactive employees in the United States and Canada and members of our Board of Directors, including severance and certain other benefits payable upon death. We recognize an obligation for any of these benefits that vest or accumulate with service. Postemployment benefits that do not vest or accumulate with service (such as severance based solely on annual pay rather than years of service) are charged to expense when incurred. Our postemployment benefit plans are unfunded.

We recognize the underfunded or overfunded status of a defined benefit postretirement plan as an asset or liability and recognize changes in the funded status in the year in which the changes occur through AOCI.

Use of Estimates Preparing our Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates include our accounting for promotional expenditures, valuation of long-lived assets, intangible assets, redeemable interest, stock-based compensation, income taxes, and defined benefit pension, post-retirement and post-employment benefits. Actual results could differ from our estimates.

Other New Accounting Standards In fiscal 2012, we adopted new accounting guidance for fair value measurements providing common fair value measurement and disclosure requirements. The adoption of the guidance did not have an impact on our results of operations or financial condition.

In fiscal 2012, we adopted new accounting guidance on employer's disclosures about participation in multi-employer benefit plans. The adoption of the guidance did not have an impact on our results of operations or financial condition. Please refer to Note 13 to the Consolidated Financial Statements.

In fiscal 2012, we adopted new accounting guidance intended to simplify goodwill impairment testing. Entities are allowed to perform a qualitative assessment of goodwill impairment to determine whether a quantitative assessment is necessary. We adopted this guidance for our annual goodwill impairment test for fiscal 2012, which was conducted in the third quarter. The adoption of this guidance did not have an impact on our results of operations or financial position.

In fiscal 2011, we adopted new accounting guidance on the consolidation model for VIEs. The guidance requires companies to qualitatively assess the determination of the primary beneficiary of a VIE based on whether the company (1) has the power to direct matters that most significantly impact the VIE's economic performance, and (2) has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be

significant to the VIE. The adoption of the guidance did not have an impact on our results of operations or financial condition.

In fiscal 2010, we adopted new accounting guidance on employer's disclosures for post-retirement benefit plan assets. The guidance requires an employer to disclose information on the investment policies and strategies and the significant concentrations of risk in plan assets. An employer must also disclose the fair value of each major category of plan assets as of each annual reporting date together with the information on the inputs and valuation techniques used to develop such fair value measurements. The adoption of the guidance did not have an impact on our results of operations or financial condition.

In fiscal 2010, we adopted new accounting guidance on accounting for equity method investments. The guidance addresses the impact of the issuance of the noncontrolling interests and business combination guidance on accounting for equity method investments. The adoption of the guidance did not have a material impact on our results of operations or financial condition.

In fiscal 2010, we adopted new accounting guidance issued to assist in determining whether instruments granted in share-based payment transactions are participating securities. The guidance provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share (EPS) pursuant to the two-class method. The adoption of the guidance did not have a material impact on our basic or diluted EPS.

In fiscal 2010, we adopted new accounting guidance on convertible debt instruments. The guidance requires issuers to account separately for the liability and equity components of convertible debt instruments that may be settled in cash or other assets. The adoption of the guidance did not have a material impact on our results of operations or financial condition.

NOTE 3. ACQUISITIONS

On July 1, 2011, we acquired a 51 percent controlling interest in Yoplait S.A.S. and a 50 percent interest in Yoplait Marques S.A.S. from PAI Partners and Sodial for an aggregate purchase price of \$1.2 billion, including \$261.3 million of non-cash consideration for debt assumed. Yoplait S.A.S. operates yogurt businesses in

several countries, including France, Canada, and the United Kingdom, and oversees franchise relationships around the world. Yoplait Marques S.A.S. holds the worldwide rights to *Yoplait* and related trademarks. We consolidated both entities into our Consolidated Balance Sheets and recorded goodwill of \$1.5 billion. Indefinite lived intangible assets acquired primarily include brands of \$476.0 million. Finite lived intangible assets acquired primarily include franchise agreements of \$440.2 million and customer relationships of \$107.3 million. In addition, we purchased a zero coupon exchangeable note due in 2016 from Sodial with a notional amount of \$131.6 million and a fair value of \$110.9 million. As of the date of the acquisition, the pro forma effects of this acquisition were not material.

During the fourth quarter of fiscal 2012, we entered into a purchase agreement with Yoki Alimentos S.A. (Yoki), a privately held food company headquartered in Sao Bernardo do Campo, Brazil, for an aggregate purchase price of approximately 1.97 billion Brazilian reais (approximately \$990 million as of May 27, 2012) including the assumption of approximately 220 million Brazilian reais (approximately \$110 million as of May 27, 2012) of outstanding debt. The purchase price is subject to an adjustment based on the net asset value of the business at the closing date. Yoki operates in several food categories, including snacks, convenient meals, basic foods, and seasonings. We expect the transaction to be completed in the first half of fiscal 2013. We expect to fund this transaction using cash available in our foreign subsidiaries and commercial paper.

NOTE 4. RESTRUCTURING, IMPAIRMENT, AND OTHER EXIT COSTS

We view our restructuring activities as actions that help us meet our long-term growth targets. Activities we undertake must meet internal rate of return and net present value targets. Each restructuring action normally takes one to two years to complete. At completion (or as each major stage is completed in the case of multi-year programs), the project begins to deliver cash savings and/or reduced depreciation. These activities result in various restructuring costs, including asset write-offs, exit charges including severance, contract termination fees, and decommissioning and other costs. Depreciation associated with restructured assets, as used in the context of our disclosures regarding restructuring activity, refers to the increase in depreciation expense caused by

shortening the useful life or updating the salvage value of depreciable fixed assets to coincide with the end of production under an approved restructuring plan. Any impairment of the asset is recognized immediately in the period the plan is approved.

Expense, in Millions	
Productivity and cost savings plan	\$100.6
Charges associated with restructuring actions previously announced	1.0
Total	\$101.6

In fiscal 2012, we approved a major productivity and cost savings plan designed to improve organizational effectiveness and focus on key growth strategies. The plan includes organizational changes that strengthen business alignment, and actions to accelerate administrative efficiencies across all of our operating segments and support functions. In connection with this initiative, we expect to eliminate approximately 850 positions globally and recorded a \$100.6 million restructuring charge, consisting of \$87.6 million of employee severance expense and a non-cash charge of \$13.0 million related to the write-off of certain long-lived assets in our U.S. Retail segment. All of our operating segments and support functions were affected by these actions including \$69.9 million related to our U.S. Retail segment, \$12.2 million related to our Bakeries and Foodservice segment, \$9.5 million related to our International segment, and \$9.0 million related to our administrative functions. We expect to record approximately \$19 million of restructuring charges as a result of these actions in fiscal 2013. These restructuring actions are expected to be completed by the end of fiscal 2014. In fiscal 2012, we paid \$3.8 million in cash related to restructuring actions taken in fiscal 2012 and previous years.

In fiscal 2011, we recorded restructuring, impairment, and other exit costs pursuant to approved plans as follows:

Expense, in Millions	
Discontinuation of fruit-flavored snack product line	\$1.7
Charges associated with restructuring actions previously announced	2.7
Total	\$4.4

In fiscal 2010, we recorded restructuring, impairment, and other exit costs pursuant to approved plans as follows:

Expense, in Millions	
Discontinuation of kids' refrigerated yogurt beverage and microwave soup product lines	\$24.1
Discontinuation of breadcrumbs product line at Federalsburg, Maryland plant	6.2
Sales of Contagem, Brazil bread and pasta plant	(0.6)
Charges associated with restructuring actions previously announced	1.7
Total	\$31.4

The roll forward of our restructuring and other exit cost reserves, included in other current liabilities, is as follows:

In Millions	Severance	Contract Termination	Other Exit Costs	Total
Reserve balance as of				
May 31, 2009	\$ 8.4	\$ 10.3	\$ 0.1	\$ 18.8
2010 charges, including				
foreign currency translation	0.2	0.8	—	1.0
Utilized in 2010	(6.0)	(3.0)	—	(9.0)
Reserve balance as of				
May 30, 2010	2.6	8.1	0.1	10.8
2011 charges, including				
foreign currency translation	—	—	—	—
Utilized in 2011	(0.9)	(2.6)	(0.1)	(3.6)
Reserve balance as of				
May 29, 2011	1.7	5.5	—	7.2
2012 charges, including				
foreign currency translation	82.4	—	—	82.4
Utilized in 2012	(1.0)	(2.8)	0.1	(3.7)
Reserve balance as of				
May 27, 2012	\$ 83.1	\$ 2.7	\$ 0.1	\$ 85.9

The charges recognized in the roll forward of our reserves for restructuring and other exit costs do not include items charged directly to expense (e.g., asset impairment charges, the gain or loss on the sale of restructured assets, and the write-off of spare parts) and other periodic exit costs recognized as incurred, as those items are not reflected in our restructuring and other exit cost reserves on our Consolidated Balance Sheets.

NOTE 5. INVESTMENTS IN JOINT VENTURES

We have a 50 percent equity interest in Cereal Partners Worldwide (CPW), which manufactures and markets ready-to-eat cereal products in more than 130 countries and republics outside the United States and Canada. CPW also markets cereal bars in several European countries and manufactures private label cereals for customers in the United Kingdom. We have guaranteed a portion of CPW's debt and its pension obligation in the United Kingdom.

We also have a 50 percent equity interest in Häagen-Dazs Japan, Inc. (HDJ). This joint venture manufactures, distributes, and markets *Häagen-Dazs* ice cream products and frozen novelties.

Results from our CPW and HDJ joint ventures are reported for the 12 months ended March 31.

Joint venture related balance sheet activity follows:

In Millions	May 27, 2012	May 29, 2011
Cumulative investments	\$529.0	\$519.1
Goodwill and other intangibles	522.1	597.1
Aggregate advances	268.1	293.3

Joint venture earnings and cash flow activity follows:

In Millions	Fiscal Year		
	2012	2011	2010
Sales to joint ventures	\$10.4	\$10.2	\$ 10.7
Net advances	22.2	1.8	128.1
Dividends received	68.0	72.7	88.0

Summary combined financial information for the joint ventures on a 100 percent basis follows:

In Millions	Fiscal Year		
	2012	2011	2010
Net sales:			
CPW	\$2,152.6	\$2,067.2	\$1,997.4
HDJ	420.8	377.7	362.6
Total net sales	2,573.4	2,444.9	2,360.0
Gross margin	1,076.0	1,066.3	1,053.2
Earnings before income taxes	250.3	233.4	251.2
Earnings after income taxes	189.0	164.2	202.3

In Millions	May 27, 2012	May 29, 2011
Current assets	\$ 934.8	\$ 904.7
Noncurrent assets	1,078.0	1,138.0
Current liabilities	1,671.0	1,690.1
Noncurrent liabilities	91.0	103.3

NOTE 6. GOODWILL AND OTHER INTANGIBLE ASSETS

The components of goodwill and other intangible assets are as follows:

In Millions	May 27, 2012	May 29, 2011
Goodwill	\$ 8,182.5	\$ 6,750.8
Other intangible assets:		
Intangible assets not subject to amortization:		
Brands and other indefinite-lived intangibles	4,217.1	3,771.7
Intangible assets subject to amortization:		
Franchise agreements, customer relationships, and other finite-lived intangibles	544.7	69.2
Less accumulated amortization	(56.9)	(27.6)
Intangible assets subject to amortization	487.8	41.6
Other intangible assets	4,704.9	3,813.3
Total	\$12,887.4	\$10,564.1

Based on the carrying value of finite-lived intangible assets as of May 27, 2012, amortization expense for each of the next five fiscal years is estimated to be approximately \$26 million.

The changes in the carrying amount of goodwill for fiscal 2010, 2011, and 2012 are as follows:

In Millions	U.S. Retail	International	Bakeries and Foodservice	Joint Ventures	Total
Balance as of

NOTE 7. FINANCIAL INSTRUMENTS, RISK MANAGEMENT ACTIVITIES, AND FAIR VALUES

Financial Instruments

The carrying values of cash and cash equivalents, receivables, accounts payable, other current liabilities, and notes payable approximate fair value. Marketable securities are carried at fair value. As of May 27, 2012, and May 29, 2011, a comparison of cost and market values of our marketable debt and equity securities is as follows:

In Millions	Cost		Market Value		Gross Gains		Gross Losses	
	Fiscal Year		Fiscal Year		Fiscal Year		Fiscal Year	
	2012	2011	2012	2011	2012	2011	2012	2011
Available for sale:								
Debt securities	\$52.2	\$8.9	\$52.3	\$9.0	\$0.1	\$0.1	\$—	\$—
Equity securities	1.8	2.0	5.3	6.0	3.5	4.0	—	—
Total	\$54.0	\$10.9	\$57.6	\$15.0	\$3.6	\$4.1	\$—	\$—

Earnings include less than \$1 million of realized gains from sales of available-for-sale marketable securities. Gains and losses are determined by specific identification. Classification of marketable securities as current or noncurrent is dependent upon our intended holding period, the security's maturity date, or both. The aggregate unrealized gains and losses on available-for-sale securities, net of tax effects, are classified in AOCI within stockholders' equity.

Scheduled maturities of our marketable securities are as follows:

In Millions	Available for Sale	
	Cost	Market Value
Under 1 year (current)	\$46.6	\$46.6
From 1 to 3 years	0.5	0.5
From 4 to 7 years	5.1	5.2
Over 7 years	—	—
Equity securities	1.8	5.3
Total	\$54.0	\$57.6

Cash, cash equivalents, and marketable securities totaling \$6.6 million as of May 27, 2012, were pledged as collateral for derivative contracts.

The fair value and carrying amount of long-term debt, including the current portion, were \$7,664.5 million and \$6,903.1 million, respectively, as of May 27, 2012. The fair value of long-term debt was estimated using market quotations and discounted cash flows based on our current incremental borrowing rates for similar types of

instruments. Long-term debt would be a Level 2 liability in the fair value hierarchy.

Risk Management Activities

As a part of our ongoing operations, we are exposed to market risks such as changes in interest rates, foreign currency exchange rates, commodity prices, and equity prices. To manage these risks, we may enter into various derivative transactions (e.g., futures, options, and swaps) pursuant to our established policies.

Commodity Price Risk

Many commodities we use in the production and distribution of our products are exposed to market price risks. We utilize derivatives to manage price risk for our principal ingredients and energy costs, including grains (oats, wheat, and corn), oils (principally soybean), non-fat dry milk, natural gas, and diesel fuel. Our primary objective when entering into these derivative contracts is to achieve certainty with regard to the future price of commodities purchased for use in our supply chain. We manage our exposures through a combination of purchase orders, long-term contracts with suppliers, exchange-traded futures and options, and over-the-counter options and swaps. We offset our exposures based on current and projected market conditions and generally seek to acquire the inputs at as close to our planned cost as possible.

We use derivatives to manage our exposure to changes in commodity prices. We do not perform the assessments required to achieve hedge accounting for commodity derivative positions. Accordingly, the changes in the values of these derivatives are recorded currently in cost of sales in our Consolidated Statements of Earnings.

Although we do not meet the criteria for cash flow hedge accounting, we nonetheless believe that these instruments are effective in achieving our objective of providing certainty in the future price of commodities purchased for use in our supply chain. Accordingly, for purposes of measuring segment operating performance these gains and losses are reported in unallocated corporate items outside of segment operating results until such time that the exposure we are managing affects earnings. At that time we reclassify the gain or loss from unallocated corporate items to segment operating profit, allowing our operating segments to realize the economic effects of the derivative without experiencing any resulting mark-to-market volatility, which remains in unallocated corporate items.

Unallocated corporate items for fiscal 2012 and fiscal 2011 included:

In Millions	Fiscal Year		
	2012	2011	2010
Net gain (loss) on mark-to-market valuation of commodity positions	\$(122.5)	\$160.3	\$(54.7)
Net loss (gain) on commodity positions reclassified from unallocated corporate items to segment operating profit	35.7	(93.6)	55.7
Net mark-to-market revaluation of certain grain inventories	(17.4)	28.5	(8.1)
Net mark-to-market valuation of certain commodity positions recognized in unallocated corporate items	\$(104.2)	\$ 95.2	\$ (7.1)

As of May 27, 2012, the net notional value of commodity derivatives was \$307.4 million, of which \$126.9 million related to agricultural inputs and \$180.5 million related to energy inputs. These contracts relate to inputs that generally will be utilized within the next 12 months.

Interest Rate Risk

We are exposed to interest rate volatility with regard to future issuances of fixed-rate debt, and existing and future issuances of floating-rate debt. Primary exposures include U.S. Treasury rates, LIBOR, Euribor, and commercial paper rates in the United States and Europe. We use interest rate swaps and forward-starting interest rate swaps to hedge our exposure to interest rate changes, to reduce the volatility of our financing costs, and to achieve a desired proportion of fixed versus floating-rate debt, based on current and projected market conditions. Generally under these swaps, we agree with a counterparty to exchange the difference between fixed-rate and floating-rate interest amounts based on an agreed upon notional principal amount.

Floating Interest Rate Exposures — Floating-to-fixed interest rate swaps are accounted for as cash flow hedges, as are all hedges of forecasted issuances of debt. Effectiveness is assessed based on either the perfectly effective hypothetical derivative method or changes in the present value of interest payments on the underlying debt. Effective gains and losses deferred to AOCI are reclassified into earnings over the life of the associated debt. Ineffective gains and losses are recorded as net

interest. The amount of hedge ineffectiveness was less than \$1 million in each of fiscal 2012, 2011, and 2010.

Fixed Interest Rate Exposures — Fixed-to-floating interest rate swaps are accounted for as fair value hedges with effectiveness assessed based on changes in the fair value of the underlying debt and derivatives, using incremental borrowing rates currently available on loans with similar terms and maturities. Ineffective gains and losses on these derivatives and the underlying hedged items are recorded as net interest. The amount of hedge ineffectiveness was less than \$1 million in each of fiscal 2012, 2011, and 2010.

During the fourth quarter of fiscal 2011, first quarter of fiscal 2012 and second quarter of fiscal 2012, we entered into \$500.0 million, \$300.0 million, and \$200.0 million of forward starting swaps with average fixed rates of 3.9 percent, 2.7 percent, and 2.4 percent, respectively, in advance of a planned debt financing. All of these forward starting swaps were cash settled for \$100.4 million coincident with the issuance of our \$1.0 billion 10-year fixed rate notes in November 2011. As of May 27, 2012, there was a \$94.6 million pre-tax loss in AOCI, which will be reclassified to earnings over the term of the underlying debt.

During the fourth quarter of fiscal 2011, we entered into swaps to convert \$300.0 million of 1.55 percent fixed-rate notes due May 16, 2014, to floating rates.

During the fourth quarter of fiscal 2010, in advance of a planned debt financing, we entered into \$500.0 million of treasury lock derivatives with an average fixed rate of 4.3 percent. All of these treasury locks were cash settled for \$17.1 million during the first quarter of fiscal 2011, coincident with the issuance of our \$500.0 million 30-year fixed-rate notes. As of May 27, 2012, a \$15.7 million pre-tax loss remained in AOCI, which will be reclassified to earnings over the term of the underlying debt.

During the second quarter of fiscal 2010, we entered into \$700.0 million of interest rate swaps to convert \$700.0 million of 5.65 percent fixed-rate notes to floating rates. In May 2010, we repurchased \$179.2 million of our 5.65 percent notes. We received \$2.7 million to settle a portion of these swaps that related to the repurchased debt.

As of May 27, 2012, a \$10.5 million pre-tax loss on cash settled interest rate swaps for our \$1.0 billion 10-year note issued January 24, 2007 remained in AOCI, which will be reclassified to earnings over the term of the underlying debt.

The following table summarizes the notional amounts and weighted-average interest rates of our interest rate swaps. Average floating rates are based on rates as of the end of the reporting period.

In Millions	May 27, 2012	May 29, 2011
Pay-floating swaps - notional amount	\$834.6	\$838.0
Average receive rate	1.7%	1.8%
Average pay rate	0.3 %	0.2%
Pay-fixed forward starting swaps - notional amount	\$ —	\$500.0

The swap contracts mature at various dates from fiscal 2013 to 2014 as follows:

In Millions	Pay Floating
2013	\$534.6
2014	300.0
Total	\$834.6

Foreign Exchange Risk

Foreign currency fluctuations affect our net investments in foreign subsidiaries and foreign currency cash flows related to third party purchases, intercompany loans, product shipments, and foreign-denominated commercial paper. We are also exposed to the translation of foreign currency earnings to the U.S. dollar. Our principal exposures are to the Australian dollar, Brazilian real, British pound sterling, Canadian dollar, Chinese renminbi, euro, Japanese yen, Swiss franc, and Mexican peso. We mainly use foreign currency forward contracts to selectively hedge our foreign currency cash flow exposures. We also generally swap our foreign-denominated commercial paper borrowings and nonfunctional currency intercompany loans back to U.S. dollars or the functional currency; the gains or losses on these derivatives offset the foreign currency revaluation gains or losses recorded in earnings on the associated borrowings. We generally do not hedge more than 18 months forward.

As of May 27, 2012, the notional value of foreign exchange derivatives was \$930.2 million. The amount of hedge ineffectiveness was less than \$1 million in each of fiscal 2012, 2011, and 2010.

We also have many net investments in foreign subsidiaries that are denominated in euros. We previously hedged a portion of these net investments by issuing euro-denominated commercial paper and foreign

exchange forward contracts. As of May 27, 2012, we had deferred net foreign currency transaction losses of \$95.7 million in AOCI associated with hedging activity.

Equity Instruments

Equity price movements affect our compensation expense as certain investments made by our employees in our deferred compensation plan are revalued. We use equity swaps to manage this risk. As of May 27, 2012, the net notional amount of our equity swaps was \$48.1 million. These swap contracts mature in fiscal 2013.

Fair Value Measurements And Financial Statement Presentation

The fair values of our assets, liabilities, and derivative positions recorded at fair value and their respective levels in the fair value hierarchy as of May 27, 2012 and May 29, 2011, were as follows:

Derivatives Not Designated as Hedging Instruments:										
Amount of gain (loss) recognized in earnings ^(d)	—	1.0	(1.3)	23.7	(1.0)	—	(122.5)	160.3	(124.8)	185.0

(a) Effective portion.

(b) Loss reclassified from AOCI into earnings is reported in interest, net for interest rate swaps and in cost of sales and SG&A expenses for foreign exchange contracts.

(c) All gain (loss) recognized in earnings is related to the ineffective portion of the hedging relationship, including SG&A expenses for foreign exchange contracts. No amounts were reported as a result of being excluded from the assessment of hedge effectiveness.

(d) Gain (loss) recognized in earnings is reported in interest, net for interest rate contracts, in cost of sales for commodity contracts, and in SG&A expenses for equity contracts and foreign exchange contracts.

Amounts Recorded In Accumulated Other Comprehensive Loss

Unrealized losses from interest rate cash flow hedges recorded in AOCI as of May 27, 2012, totaled \$73.6 million after tax. These deferred losses are primarily related to interest rate swaps that we entered into in contemplation of future borrowings and other financing requirements and that are being reclassified into net interest over the lives of the hedged forecasted transactions. Unrealized losses from foreign currency cash flow hedges recorded in AOCI as of May 27, 2012, were \$1.7 million after-tax. The net amount of pre-tax gains and losses in AOCI as of May 27, 2012, that we expect to be reclassified into net earnings within the next 12 months is \$14.0 million of expense.

Credit-Risk-Related Contingent Features

Certain of our derivative instruments contain provisions that require us to maintain an investment grade credit rating on our debt from each of the major credit rating agencies. If our debt were to fall below investment grade, the counterparties to the derivative instruments could request full collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position on May 27, 2012, was \$19.9 million. We have posted collateral of \$4.3 million in the normal course of business associated with these contracts. If the credit-risk-related contingent features underlying these agreements had been triggered on May 27, 2012, we would have been required to post an additional \$15.6 million of collateral to counterparties.

Concentrations Of Credit And Counterparty Credit Risk

During fiscal 2012, Wal-Mart Stores, Inc. and its affiliates (Wal-Mart) accounted for 22 percent of our consolidated net sales and 30 percent of our net sales in the U.S. Retail segment. No other customer accounted for 10 percent or more of our consolidated net sales. Wal-Mart also represented 6 percent of our net sales in the International segment and 7 percent of our net sales in the Bakeries and Foodservice segment. As of May 27, 2012, Wal-Mart accounted for 26 percent of our U.S. Retail receivables, 5 percent of our International receivables, and 9 percent of our Bakeries and Foodservice receivables. The five largest customers in our U.S. Retail segment accounted for 54 percent of its fiscal 2012 net

sales, the five largest customers in our International segment accounted for 26 percent of its fiscal 2012 net sales, and the five largest customers in our Bakeries and Foodservice segment accounted for 46 percent of its fiscal 2012 net sales.

We enter into interest rate, foreign exchange, and certain commodity and equity derivatives, primarily with a diversified group of highly rated counterparties. We continually monitor our positions and the credit ratings of the counterparties involved and, by policy, limit the amount of credit exposure to any one party. These transactions may expose us to potential losses due to the risk of nonperformance by these counterparties; however, we have not incurred a material loss. We also enter into commodity futures transactions through various regulated exchanges.

The amount of loss due to the credit risk of the counterparties, should the counterparties fail to perform according to the terms of the contracts, is \$19.5 million against which we do not hold collateral. Under the terms of master swap agreements, some of our transactions require collateral or other security to support financial instruments subject to threshold levels of exposure and counterparty credit risk. Collateral assets are either cash or U.S. Treasury instruments and are held in a trust account that we may access if the counterparty defaults.

NOTE 8. DEBT

Notes Payable The components of notes payable and their respective weighted-average interest rates at the end of the periods were as follows:

In Millions	May 27, 2012		May 29, 2011	
	Notes Payable	Weighted-average Interest Rate	Notes Payable	Weighted-average Interest Rate
U.S. commercial paper	\$412.0	0.2%	\$192.5	0.2%
Financial institutions	114.5	10.0	118.8	11.5
Total	\$526.5	2.4%	\$311.3	4.5%

To ensure availability of funds, we maintain bank credit lines sufficient to cover our outstanding short-term borrowings. Commercial paper is a continuing source of short-term financing. We have commercial paper programs available to us in the United States and Europe. In April 2012, we entered into fee-paid committed credit lines, consisting of a \$1.0 billion facility scheduled to expire in April 2015 and a \$1.7 billion facility

scheduled to expire in April 2017. Concurrent with the execution of the credit agreements, we terminated our credit facilities which provided \$1.8 billion and \$1.1 billion of revolving credit lines which were set to expire October 2012 and October 2013, respectively. We also have \$393.8 million in uncommitted credit lines that support our foreign operations. As of May 27, 2012, there were no amounts outstanding on the fee-paid committed credit lines and \$114.5 million was drawn on the uncommitted lines. The credit facilities contain several covenants, including a requirement to maintain a fixed charge coverage ratio of at least 2.5 times. We were in compliance with all credit facility covenants as of May 27, 2012.

Long-term Debt In February 2012, we repaid \$1.0 billion of 6.0 percent notes. In November 2011, we issued \$1.0 billion aggregate principal amount of 3.15 percent notes due December 15, 2021. The net proceeds were used to repay a portion of our notes due February 2012, reduce our commercial paper borrowings, and for general corporate purposes. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time prior to September 15, 2021 for a specified make whole amount and any time on or after that date at par. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

As part of our acquisition of Yoplait S.A.S., we consolidated \$457.9 million of primarily euro-denominated Euribor-based floating-rate bank debt. In December 2011, we refinanced this debt with \$390.5 million of euro-denominated Euribor-based floating-rate bank debt due at various dates through December 15, 2014.

In May 2011, we issued \$300.0 million aggregate principal amount of 1.55 percent fixed-rate notes and \$400.0 million aggregate principal amount of floating-rate notes, both due May 16, 2014. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. The floating-rate notes bear interest equal to three-month LIBOR plus 35 basis points, subject to quarterly reset. Interest on the floating-rate notes is payable quarterly in arrears. Interest on the fixed-rate notes is payable semi-annually in arrears. The fixed-rate notes may be redeemed at our option at any time for a specified make whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

In June 2010, we issued \$500.0 million aggregate principal amount of 5.4 percent notes due June 15, 2040. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time for a specified make whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

In May 2010, we paid \$437.0 million to repurchase in a cash tender offer \$400.0 million of our previously issued debt. We repurchased \$220.8 million of our 6.0 percent notes due 2012 and \$179.2 million of our 5.65 percent notes due 2012. We issued commercial paper to fund the repurchase.

Certain of our long-term debt agreements contain restrictive covenants. As of May 27, 2012, we were in compliance with all of these covenants.

As of May 27, 2012, the \$118.8 million pre-tax loss recorded in AOCI associated with our previously designated interest rate swaps will be reclassified to net interest over the remaining lives of the hedged transactions. The amount expected to be reclassified from AOCI to net interest in fiscal 2013 is \$12.7 million pre-tax.

A summary of our long-term debt is as follows:

In Millions	May 27, 2012	May 29, 2011
5.65% notes due February 15, 2019	\$1,150.0	\$1,150.0
5.7% notes due February 15, 2017	1,000.0	1,000.0
3.15% notes due December 15, 2021	1,000.0	—
5.2% notes due March 17, 2015	750.0	750.0
5.25% notes due August 15, 2013	700.0	700.0
5.65% notes due September 10, 2012	520.8	520.8
5.4% notes due June 15, 2040	500.0	500.0
Floating-rate notes due May 16, 2014	400.0	400.0
Euribor-based floating-rate note due December 15, 2014	375.5	—
1.55% notes due May 16, 2014	300.0	300.0
Medium-term notes, 0.3% to 8.0%, due fiscal 2013 or later	204.2	204.4
Debt of consolidated contract manufacturer	—	15.0
6% notes due February 15, 2012	—	1,019.5
Other, including capital leases	2.6	14.1
	6,903.1	6,573.8
Less amount due within one year	(741.2)	(1,031.3)
Total long-term debt	\$6,161.9	\$5,542.5

Principal payments due on long-term debt in the next five years based on stated contractual maturities, our intent to redeem, or put rights of certain note holders are \$741.2 million in fiscal 2013, \$1,445.8 million in fiscal 2014, \$1,066.7 million in fiscal 2015, \$0.3 million in fiscal 2016, and \$1,000.0 million in fiscal 2017.

NOTE 9. REDEEMABLE AND NONCONTROLLING INTERESTS

Our principal redeemable and noncontrolling interests relate to our Yoplait S.A.S., Yoplait Marques S.A.S., and General Mills Cereals, LLC (GMC) subsidiaries. In addition, we have seven foreign subsidiaries that have noncontrolling interests totaling \$5.9 million as of May 27, 2012.

We have a 51 percent controlling interest in Yoplait S.A.S. and a 50 percent interest in Yoplait Marques S.A.S. Sodiaal holds the remaining interests in each of the entities. On the acquisition date, we recorded the \$904.4 million fair value of Sodiaal's 49 percent euro-denominated interest in Yoplait S.A.S. as a redeemable interest on our Consolidated Balance Sheets. Sodiaal has the ability to put a limited portion of its redeemable interest to us once per year at fair value up to a maximum of 9 years. We adjust the value of the redeemable interest through additional paid-in capital on our Consolidated Balance Sheets quarterly to the redeemable interest's redemption value, which approximates its fair value. Yoplait S.A.S. pays dividends annually if it meets certain financial metrics set forth in its shareholders agreement. As of May 27, 2012, the redemption value of the euro-denominated redeemable interest was \$847.8 million.

In addition, a subsidiary of Yoplait S.A.S. has entered into an exclusive milk supply agreement for its European operations with Sodiaal at market-determined prices through July 1, 2021. Net purchases totaled \$235.7 million for fiscal 2012.

On the acquisition date, we recorded the \$263.8 million fair value of Sodiaal's 50 percent euro-denominated interest in Yoplait Marques S.A.S. as a noncontrolling interest on our Consolidated Balance Sheets. Yoplait Marques S.A.S. earns a royalty stream through a licensing agreement with Yoplait S.A.S. for the rights to *Yoplait* and related trademarks. Yoplait Marques S.A.S. pays dividends annually based on its available cash as of its fiscal year end.

As of May 27, 2012, we also had a noncontrolling interest related to our subsidiary GMC. We hold the entire managing membership interest, and therefore direct the operations of GMC. We hold all interests in GMC other than Class A Limited Membership Interests (Class A Interests) which were held by an unrelated third-party investor. As of May 27, 2012, the carrying value of all outstanding Class A Interests was \$242.3 million, classified as noncontrolling interests on our Consolidated Balance Sheets.

On June 1, 2012, subsequent to our year end, we restructured GMC through the distribution of its manufacturing assets, stock, inventory, cash and certain intellectual property to a wholly owned subsidiary. GMC retained the remaining intellectual property. Immediately following the restructuring, the Class A Interests were sold by the then current holder to another unrelated third-party investor.

The holder of the Class A Interests receives quarterly preferred distributions from available net income based on the application of a floating preferred return rate, currently equal to the sum of three-month LIBOR plus 110 basis points, to the holder's capital account balance established in the most recent mark-to-market valuation (currently \$251.5 million). The preferred return rate is adjusted every three years through a negotiated agreement with the Class A Interest holder or through a remarketing auction.

For financial reporting purposes, the assets, liabilities, results of operations, and cash flows of our non-wholly owned subsidiaries are included in our Consolidated Financial Statements. The third-party investor's share of the net earnings of these subsidiaries is reflected in net earnings attributable to noncontrolling interests in the Consolidated Statements of Earnings.

Our noncontrolling interests contain restrictive covenants. As of May 27, 2012, we were in compliance with all of these covenants.

Fiscal 2010

In Millions	General Mills		Net	Noncontrolling	Redeemable
	Pretax	Tax		Interests	Interest
				Net	Net
Net earnings, including earnings attributable to redeemable and noncontrolling interests			\$1,530.5	\$ 4.5	\$ —
Other comprehensive income (loss):					
Foreign currency translation	\$(163.3)	\$ —	\$ (163.3)	0.2	—
Net actuarial loss	(786.3)	314.8	(471.5)	—	—
Other fair value changes:

Prior service costs	(7.2)	(20.7)
Accumulated other comprehensive loss	\$(1,743.7)	\$(1,010.8)

NOTE 11. STOCK PLANS

We use broad-based stock plans to help ensure that management's interests are aligned with those of our stockholders. As of May 27, 2012, a total of 41,173,306 shares were available for grant in the form of stock options, restricted stock, restricted stock units, and shares of unrestricted stock under the 2011 Stock Compensation Plan (2011 Plan) and the 2011 Compensation Plan for Non-Employee Directors. The 2011 Plan also provides for the issuance of cash-settled share-based units, stock appreciation rights, and performance awards. Stock-based awards now outstanding include some granted

under the 1998 (senior management), 1998 (employee), 2001, 2003, 2005, 2006, 2007, and 2009 stock plans and the Executive Incentive Plan (EIP), under which no further awards may be granted. The stock plans provide for accelerated vesting of awards upon retirement, termination, or death of eligible employees and directors.

Stock Options The estimated fair values of stock options granted and the assumptions used for the Black-Scholes option-pricing model were as follows:

	Fiscal Year		
	2012	2011	2010
Estimated fair values of stock options granted	\$ 5.88	\$ 4.12	\$3.20
Assumptions:			
Risk-free interest rate	2.9%	2.9%	3.7%
Expected term	8.5 years	8.5 years	8.5 years
Expected volatility	17.6%	18.5%	18.9%
Dividend yield	3.3%	3.0%	3.4%

The valuation of stock options is a significant accounting estimate that requires us to use judgments and assumptions that are likely to have a material impact on our financial statements. Annually, we make predictive assumptions regarding future stock price volatility, employee exercise behavior, dividend yield, and the forfeiture rate.

We estimate the fair value of each option on the grant date using a Black-Scholes option-pricing model, which requires us to make predictive assumptions regarding future stock price volatility, employee exercise behavior, and dividend yield. We estimate our future stock price volatility using the historical volatility over the expected term of the option, excluding time periods of volatility we believe a marketplace participant would exclude in estimating our stock price volatility. We also have considered, but did not use, implied volatility in our estimate, because trading activity in options on our stock, especially those with tenors of greater than 6 months, is insufficient to provide a reliable measure of expected volatility.

Our expected term represents the period of time that options granted are expected to be outstanding based on historical data to estimate option exercises and employee terminations within the valuation model. Separate groups of employees have similar historical exercise behavior and therefore were aggregated into a single pool for valuation purposes. The weighted-average expected term for all employee groups is presented in the table above. The risk-free interest rate for periods during the expected term of the options is based on the U.S. Treasury zero-coupon yield curve in effect at the time of grant.

Any corporate income tax benefit realized upon exercise or vesting of an award in excess of that previously recognized in earnings (referred to as a windfall tax benefit) is presented in the Consolidated Statements of Cash Flows as a financing cash flow.

Realized windfall tax benefits are credited to additional paid-in capital within the Consolidated Balance Sheets. Realized shortfall tax benefits (amounts which are less than that previously recognized in earnings) are first offset against the cumulative balance of windfall tax benefits, if any, and then charged directly to income tax expense, potentially resulting in volatility in our consolidated effective income tax rate. We calculated a cumulative memo balance of windfall tax benefits from post-1995 fiscal years for the purpose of accounting for future shortfall tax benefits.

Options may be priced at 100 percent or more of the fair market value on the date of grant, and generally vest four years after the date of grant. Options generally expire within 10 years and one month after the date of grant.

Information on stock option activity follows:

	Options Exercisable (Thousands)	Weighted- average Exercise Price Per Share	Options Outstanding (Thousands)	Weighted- average Exercise Price Per Share
Balance as of				
May 31, 2009	67,619.2	\$21.96	94,607.0	\$23.84
Granted			6,779.4	27.99
Exercised			(20,013.6)	19.87
Forfeited or expired			(268.2)	24.82
Balance as of				
May 30, 2010	47,726.6	22.89	81,104.6	25.17
Granted			5,234.3	37.38
Exercised			(18,665.4)	22.59
Forfeited or expired			(126.2)	31.26
Balance as of				
May 29, 2011	39,221.7	23.78	67,547.3	26.82
Granted			4,069.0	37.29
Exercised			(10,279.3)	24.12
Forfeited or expired			(394.3)	27.88
Balance as of				
May 27, 2012	39,564.9	\$25.27	60,942.7	\$27.96

Stock-based compensation expense related to stock option awards was \$23.9 million in fiscal 2012, \$26.8 million in fiscal 2011, and \$34.4 million in fiscal 2010.

Net cash proceeds from the exercise of stock options less shares used for withholding taxes and the intrinsic value of options exercised were as follows:

In Millions	Fiscal Year		
	2012	2011	2010
Net cash proceeds	\$233.5	\$410.4	\$388.5
Intrinsic value of options exercised	\$156.7	\$275.6	\$271.8

Restricted Stock, Restricted Stock Units, and Cash-settled Share-based Units Stock and units settled in stock subject to a restricted period and a purchase price, if any (as determined by the Compensation Committee of the Board of Directors), may be granted to key employees under the 2011 Plan. Certain restricted stock and restricted stock unit awards require the employee to deposit personally owned shares (on a one-for-one basis) during the restricted period. Restricted stock and

restricted stock units generally vest and become unrestricted four years after the date of grant. Participants are entitled to dividends on such awarded shares and units, but only receive those amounts if the shares or units vest. The sale or transfer of these shares and units is restricted during the vesting period. Participants holding restricted stock, but not restricted stock units, are entitled to vote on matters submitted to holders of common stock for a vote.

Information on restricted stock unit and cash-settled share-based units activity follows:

	Equity Classified		Liability Classified			
	Share-settled Units (Thousands)	Weighted-average Grant-date Fair Value	Share-settled Units (Thousands)	Weighted-average Grant-date Fair Value	Cash-settled Share-based Units (Thousands)	Weighted-average Grant-date Fair Value
Non-vested as of May 29, 2011	9,169.9	\$30.92	437.2	\$31.01	4,515.1	\$31.58
Granted	2,697.8	37.29	87.9	37.21	—	—
Vested	(3,187.0)	29.85	(81.7)	28.99	(269.3)	31.39
Forfeited or expired	(128.9)	34.89	(46.3)	32.06	(254.3)	31.88
Non-vested as of May 27, 2012	8,551.8	\$33.79	397.1	\$32.68	3,991.5	\$31.58

	Fiscal Year		
	2012	2011	2010
Number of units granted (thousands)	2,785.7	3,751.6	4,745.7
Weighted average price per unit	\$37.29	\$36.16	\$28.03

The total grant-date fair value of restricted stock unit awards that vested during fiscal 2012 was \$106.0 million, and \$93.6 million vested during fiscal 2011.

As of May 27, 2012, unrecognized compensation expense related to non-vested stock options and restricted stock units was \$150.0 million. This expense will be recognized over 17 months, on average.

Stock-based compensation expense related to restricted stock units and cash-settled share-based payment awards was \$124.3 million for fiscal 2012, \$141.2 million for fiscal 2011, and \$131.0 million for fiscal 2010.

NOTE 12. EARNINGS PER SHARE

Basic and diluted EPS were calculated using the following:

In Millions, Except per Share Data	Fiscal Year		
	2012	2011	2010
Net earnings attributable to General Mills	\$1,567.3	\$1,798.3	\$1,530.5
Average number of common shares - basic EPS	648.1	642.7	659.6
Incremental share effect from: ^(a)			
Stock options	13.9	16.6	17.7
Restricted stock, restricted stock units, and other	4.7	5.5	6.0
Average number of common shares - diluted EPS	666.7	664.8	683.3
Earnings per share - basic	\$2.42	\$2.80	\$2.32
Earnings per share - diluted	\$2.35	\$2.70	\$2.24

(a) Incremental shares from stock options and restricted stock units are computed by the treasury stock method. Stock options and restricted stock units excluded from our computation of diluted EPS because they were not dilutive were as follows:

In Millions	Fiscal Year		
	2012	2011	2010
Anti-dilutive stock options and restricted stock units	5.8	4.8	6.3

NOTE 13. RETIREMENT BENEFITS AND POSTEMPLOYMENT BENEFITS

Defined Benefit Pension Plans We have defined benefit pension plans covering most employees in the United States, Canada, France, and the United Kingdom. Benefits for salaried employees are based on length of service and final average compensation. Benefits for hourly employees include various monthly amounts for each year of credited service. Our funding policy is consistent with the requirements of applicable laws. We made \$200.0 million of voluntary contributions to our principal U.S. plans in each of fiscal 2012 and fiscal 2011. We do not expect to be required to make any contributions in fiscal 2013. Our principal domestic retirement plan covering salaried employees has a provision that any excess pension assets would be allocated to active participants if the plan is terminated within five years of a change in control. In fiscal 2012, we announced changes to our U.S. defined benefit pension plans. All new salaried employees hired on or after June 1, 2013 will be eligible for a new retirement program that does not include a defined benefit pension plan. Current salaried employees will remain in the existing defined benefit pension plan with adjustments to benefits.

Other Postretirement Benefit Plans We also sponsor plans that provide health care benefits to the majority of our retirees in the United States and Canada. The salaried health care benefit plan is contributory, with retiree contributions based on years of service. We make decisions to fund related trusts for certain employees and retirees on an annual basis. We did not make voluntary contributions to these plans in fiscal 2012 or fiscal 2011.

Health Care Cost Trend Rates Assumed health care cost trends are as follows:

	Fiscal Year	
	2012	2011
Health care cost trend rate for next year	8.5%	8.5%
Rate to which the cost trend rate is assumed to decline (ultimate rate)	5.2%	5.2%
Year that the rate reaches the ultimate trend rate	2019	2019

We review our health care cost trend rates annually. Our review is based on data we collect about our health care claims experience and information provided by our actuaries. This information includes recent plan experience, plan design, overall industry experience and projections, and assumptions used by other similar organizations. Our initial health care cost trend rate is adjusted as necessary to remain consistent with this review, recent experiences, and short-term expectations. Our initial health care cost trend rate assumption is 8.5 percent for all retirees. Rates are graded down annually until the ultimate trend rate of 5.2 percent is reached in 2019 for all retirees. The trend rates are applicable for calculations only if the retirees' benefits increase as a result of health care inflation. The ultimate trend rate is adjusted annually, as necessary, to approximate the current economic view on the rate of long-term inflation plus an appropriate health care cost premium. Assumed trend rates for health care costs have an important effect on the amounts reported for the other postretirement benefit plans.

A one percentage point change in the health care cost trend rate would have the following effects:

In Millions	One Percentage Point Increase	One Percentage Point Decrease
Effect on the aggregate of the service and interest cost components in fiscal 2013	\$ 5.7	\$ (4.7)
Effect on the other postretirement accumulated benefit obligation as of May 27, 2012	96.7	(85.4)

The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the Act) was signed into law in March 2010. The Act codifies health care reforms with staggered effective dates from 2010 to 2018. Estimates of the future impacts of several of the Act's provisions are incorporated into our postretirement benefit liability including the elimination of lifetime maximums and the imposition of an excise tax on high cost health plans. These changes resulted in a \$24.0 million increase in our postretirement benefit liability in fiscal 2010.

Postemployment Benefit Plans Under certain circumstances, we also provide accruable benefits to former or inactive employees in the United States, Canada, and Mexico, and members of our Board of Directors, including severance and certain other benefits payable upon death. We recognize an obligation for any of these benefits that vest or accumulate with service. Postemployment benefits that do not vest or accumulate with service (such as severance based solely on annual pay rather than years of service) are charged to expense when incurred. Our postemployment benefit plans are unfunded.

We use our fiscal year end as the measurement date for our defined benefit pension and other postretirement benefit plans.

Summarized financial information about defined benefit pension, other postretirement, and postemployment benefit plans is presented below:

In Millions	Defined Benefit Pension Plans		Other Postretirement Benefit Plans		Postemployment Benefit Plans	
	Fiscal Year		Fiscal Year		Fiscal Year	
	2012	2011	2012	2011	2012	2011
Change in Plan Assets:						
Fair value at beginning of year	\$4,264.0	\$3,529.8	\$ 353.8	\$ 284.3

We expect to recognize the following amounts in net periodic benefit expense (income) in fiscal 2013:

In Millions	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Postemployment Benefit Plans
Amortization of losses	\$136.0	\$17.3	\$2.2
Amortization of prior service costs (credits)	6.2	(3.4)	1.9

Assumptions Weighted-average assumptions used to determine fiscal year-end benefit obligations are as follows:

	Defined Benefit Pension Plans		Other Postretirement Benefit Plans		Postemployment Benefit Plans	
	Fiscal Year		Fiscal Year		Fiscal Year	
	2012	2011	2012	2011	2012	2011
Discount rate	4.85%	5.45%	4.70%	5.35%	3.86%	4.77%
Rate of salary increases	4.44	4.92	—	—	4.45	4.92

Weighted-average assumptions used to determine fiscal year net periodic benefit expense (income) are as follows:

	Defined Benefit Pension Plans			Other Postretirement Benefit Plans			Postemployment Benefit Plans		
	Fiscal Year			Fiscal Year			Fiscal Year		
	2012	2011	2010	2012	2011	2010	2012	2011	2010
Discount rate	5.45%	5.85%	7.49%	5.35%	5.80%	7.45%	4.77%	5.12%	7.06%
Rate of salary increases	4.92	4.93	4.92	—	—	—	4.92	4.93	4.93
Expected long-term rate of return on plan assets	9.52	9.53	9.55	9.32	9.33	9.33	—	—	—

Discount Rates Our discount rate assumptions are determined annually as of the last day of our fiscal year for our defined benefit pension, other postretirement, and postemployment benefit plan obligations. We also use the same discount rates to determine defined benefit pension, other postretirement, and postemployment benefit plan income and expense for the following fiscal year. We work with our actuaries to determine the timing and amount of expected future cash outflows to plan participants and, using the top quartile of AA-rated corporate bond yields, to develop a forward interest rate curve, including a margin to that

index based on our credit risk. This forward interest rate curve is applied to our expected future cash outflows to determine our discount rate assumptions.

Fair Value of Plan Assets The fair values of our pension and postretirement benefit plans' assets and their respective levels in the fair value hierarchy at May 27, 2012 and May 29, 2011, by asset category were as follows:

In Millions	May 27, 2012			
	Level 1	Level 2	Level 3	Total Assets

Cash and accruals	20.4	—	—	20.4
Fair value measurement of postretirement benefit plan assets	\$ 35.7	\$ 278.0	\$ 40.1	\$ 353.8

a) Primarily publicly traded common stock and private equity partnerships for purposes of total return and to maintain equity exposure consistent with policy allocations. Investments include: i) United States and international equity securities, mutual funds, and equity futures valued at closing prices from national exchanges; and ii) commingled funds, privately held securities, and private equity partnerships valued at unit values or net asset values provided by the investment managers, which are based on the fair value of the underlying investments. Various methods are used to determine fair values and may include the cost of the investment, most recent financing, and expected cash flows. For some of these investments, realization of the estimated fair value is dependent upon transactions between willing sellers and buyers.

(b) Primarily government and corporate debt securities for purposes of total return and managing fixed income exposure to policy allocations. Investments include: i) fixed income securities and bond futures generally valued at closing prices from national exchanges, fixed income pricing models, and/or independent financial analysts; and ii) fixed commingled funds valued at unit values provided by the investment managers, which are based on the fair value of the underlying investments.

(c) Publicly traded common stock and limited partnerships in the energy and real estate sectors for purposes of total return. Investments include: i) energy and real estate securities generally valued at closing prices from national exchanges; and ii) commingled funds, private securities, and limited partnerships valued at unit values or net asset values provided by the investment managers, which are generally based on the fair value of the underlying investments.

(d) Global balanced fund of equity, fixed income, and real estate securities for purposes of meeting Canadian pension plan asset allocation policies, and insurance and annuity contracts for purposes of providing a stable stream of income for retirees and to fund postretirement medical benefits. Fair values are derived from unit values provided by the investment managers, which are generally based on the fair value of the underlying investments and contract fair values from the providers.

The following table is a roll forward of the Level 3 investments of our pension and postretirement benefit plans' assets during the years ended May 27, 2012, and May 29, 2011:

In Millions	Fiscal 2012				
	Balance as of May 29, 2011	Transfers In/(Out)	Purchases, Sales Issuances, and Settlements (Net)	Net Gain (Loss)	Balance as of May 27, 2012
Pension benefit plan assets:					
Equity	\$568.5	\$ (1.2)	\$(28.4)	\$ 36.5	\$575.4
Fixed income	0.2	—	(0.2)	—	—
Real asset investments	356.9	(48.9)	32.8	20.4	361.2
Other investments	0.3	—	—	—	0.3
Fair value activity of pension level 3 plan assets	\$925.9	\$(50.1)	\$ 4.2	\$ 56.9	\$936.9
Postretirement benefit plan assets:					
Equity	\$ 26.3	\$ —	\$ (4.1)	\$ (0.2)	\$ 22.0
Fixed income	0.2	—	—	(0.2)	—
Real asset investments	13.6	(4.0)	(1.1)	(0.1)	8.4
Fair value activity of postretirement benefit level 3 plan assets	\$ 40.1	\$ (4.0)	\$ (5.2)	\$ (0.5)	\$ 30.4

In Millions	Fiscal 2011				
	Balance as of May 30, 2010	Transfers In/(Out)	Purchases, Sales Issuances, and Settlements (Net)	Net Gain	Balance as of May 29, 2011
Pension benefit plan assets:					
Equity	\$512.8	\$ 2.4	\$(48.1)	\$ 101.4	\$568.5
Fixed income	3.9	(0.9)	(4.3)	1.5	0.2
Real asset investments	298.7	—	16.0	42.2	356.9
Other investments	0.3	—	—	—	0.3
Fair value activity of pension level 3 plan assets	\$815.7	\$ 1.5	\$(36.4)	\$ 145.1	\$925.9
Postretirement benefit plan assets:					
Equity	\$ 25.7	\$ —	\$ (3.7)	\$ 4.3	\$ 26.3
Fixed income	1.7	—	(1.5)	—	0.2
Real asset investments	14.6	—	(2.2)	1.2	13.6
Fair value activity of postretirement benefit level 3 plan assets	\$ 42.0	\$ —	\$ (7.4)	\$ 5.5	\$ 40.1

The net change in Level 3 assets attributable to unrealized losses at May 27, 2012, was \$32.1 million for our pension plan assets, and \$5.2 million for our postretirement plan assets.

Expected Rate of Return on Plan Assets Our expected rate of return on plan assets is determined by our asset allocation, our historical long-term investment

performance, our estimate of future long-term returns by asset class (using input from our actuaries, investment services, and investment managers), and long-term inflation assumptions. We review this assumption annually for each plan, however, our annual investment performance for one particular year does not, by itself, significantly influence our evaluation.

Weighted-average asset allocations for the past two fiscal years for our defined benefit pension and other postretirement benefit plans are as follows:

Asset category:	Defined Benefit Pension Plans		Other Postretirement Benefit Plans	
	Fiscal Year		Fiscal Year	
	2012	2011	2012	2011
United States equities	28.7%	30.1%	38.4%	37.6%
International equities	15.7	18.9	19.9	18.7
Private equities	13.3	13.5	6.2	7.3
Fixed income	28.6	23.9	30.3	30.1
Real assets	13.7	13.6	5.2	6.3
Total	100.0%	100.0%	100.0%	100.0%

The investment objective for our defined benefit pension and other postretirement benefit plans is to secure the benefit obligations to participants at a reasonable cost to us. Our goal is to optimize the long-term return on plan assets at a moderate level of risk. The defined benefit pension and other postretirement portfolios are broadly diversified across asset classes. Within asset classes, the portfolios are further diversified across investment styles and investment organizations. For the defined benefit pension plans, the long-term investment policy allocation is: 25 percent to equities in the United States; 15 percent to international equities; 10 percent to private equities; 35 percent to fixed income; and 15 percent to real assets (real estate, energy, and timber). For other postretirement benefit plans, the long-term investment policy allocations are: 30 percent to equities in the United States; 20 percent to international equities; 10 percent to private equities; 30 percent to fixed income; and 10 percent to real assets (real estate, energy, and timber). The actual allocations to these asset classes may vary tactically around the long-term policy allocations based on relative market valuations.

Contributions and Future Benefit Payments We do not expect to be required to make contributions to our defined benefit, other postretirement, and postemployment benefit plans in fiscal 2013. Actual fiscal 2013 contributions could exceed our current projections, as influenced by our decision to undertake discretionary funding of our benefit trusts and future changes in regulatory requirements. Estimated benefit payments, which reflect expected future service, as appropriate, are expected to be paid from fiscal 2013 to 2022 as follows:

In Millions	Defined Benefit Pension Plans	Other Postretirement Benefit Plans Gross Payments	Medicare Subsidy Receipts	Postemployment Benefit Plans
2013	\$ 217.5	\$ 58.6	\$ 5.3	\$19.3
2014	226.5	62.1	5.8	17.6
2015	236.0	64.6	6.3	16.3
2016	245.8	66.2	6.9	15.3
2017	256.9	68.9	7.5	14.6
2018-2022	1,470.4	382.2	34.5	66.7

Defined Contribution Plans The General Mills Savings Plan is a defined contribution plan that covers domestic salaried, hourly, nonunion, and certain union employees. This plan is a 401(k) savings plan that includes a number of investment funds, including a Company stock fund and an Employee Stock Ownership Plan (ESOP). We sponsor another money purchase plan for certain domestic hourly employees with net assets of \$18.7 million as of May 27, 2012, and \$18.1 million as of May 29, 2011. We also sponsor defined contribution plans in many of our foreign locations. Our total recognized expense related to defined contribution plans was \$41.8 million in fiscal 2012, \$41.8 million in fiscal 2011, and \$64.5 million in fiscal 2010.

We matched a percentage of employee contributions to the General Mills Savings Plan with a base match plus a variable year-end match that depended on annual results. Effective April 1, 2010, the company match is directed to investment options of the participant's choosing. Prior to April 1, 2010, the company match was invested in Company stock in the ESOP. The number of shares of our common stock allocated to participants in the ESOP was 10.6 million as of May 27, 2012, and 11.2 million as of May 29, 2011.

The ESOP's only assets are our common stock and temporary cash balances. The ESOP's share of the total defined contribution expense was \$53.7 million in fiscal 2010. The ESOP's expense was calculated by the "shares allocated" method.

The Company stock fund and the ESOP held \$638.6 million and \$648.1 million of Company common stock as of May 27, 2012, and May 29, 2011.

Multiemployer Benefit Plan We participate in the Western Conference of Teamsters Pension Plan (WCTPP) (EIN: 91-6145047; Plan Number: 001), a trustee-managed multiemployer defined benefit pension plan. We currently have approximately 20 employees participating in the WCTPP and contributions were less than \$1.0

million in each of the last three years, which represent less than 5 percent of total contributions to the plan each year. The Plan reported a "Green Zone" status for the 2011 and 2010 plan years as defined by the Pension Protection Act. For the plan year ending December 31, 2011, we had an estimated withdrawal liability of less than \$1.0 million. If other employers withdrew from the plan, our share of the unvested liability could increase.

NOTE 14. INCOME TAXES

The components of earnings before income taxes and after-tax earnings from joint ventures and the corresponding income taxes thereon are as follows:

In Millions	Fiscal Year		
	2012	2011	2010
Earnings before income taxes and after-tax earnings from joint ventures:			
United States	\$1,816.5	\$2,144.8	\$2,060.4
Foreign	394.0	283.4	144.1
Total earnings before income taxes and after-tax earnings from joint ventures	\$2,210.5	\$2,428.2	\$2,204.5
Income taxes:			
Currently payable:			
Federal	\$ 399.1	\$ 370.0	\$ 616.0
State and local	52.0	76.9	87.4
Foreign	109.1	68.9	45.5
Total current	560.2	515.8	748.9
Deferred:			
Federal	167.9	178.9	38.5
State and local	(1.3)	30.8	(4.9)
Foreign	(17.2)	(4.4)	(11.3)
Total deferred	149.4	205.3	22.3
Total income taxes	\$ 709.6	\$ 721.1	\$ 771.2

The following table reconciles the United States statutory income tax rate with our effective income tax rate:

	Fiscal Year		
	2012	2011	2010
United States statutory rate	35.0%	35.0%	35.0%
State and local income taxes, net of federal tax benefits	1.4	2.7	2.5
Foreign rate differences	(2.0)	(2.0)	(1.8)
Enactment date effect of health care reform	—	—	1.3
Court decisions and audit settlements	—	(3.7)	—
Domestic manufacturing deduction	(1.8)	(1.6)	(1.8)
Other, net	(0.5)	(0.7)	(0.2)
Effective income tax rate	32.1%	29.7%	35.0%

The tax effects of temporary differences that give rise to deferred tax assets and liabilities are as follows:

In Millions	May 27, 2012	May 29, 2011
Accrued liabilities	\$ 86.9	\$ 129.5
Compensation and employee benefits	635.4	582.9
Unrealized hedge losses	26.4	—
Pension liability	240.1	74.1
Tax credit carryforwards	86.5	62.0
Stock, partnership, and miscellaneous investments	534.3	500.6
Capital losses	90.7	92.1
Net operating losses	130.6	140.9
Other	151.9	123.7
Gross deferred tax assets	1,982.8	1,705.8
Valuation allowance	384.4	404.5
Net deferred tax assets	1,598.4	1,301.3
Brands	1,292.8	1,289.1
Fixed assets	500.1	394.6
Intangible assets	289.1	122.3
Tax lease transactions	56.5	63.0
Inventories	55.9	53.0
Stock, partnership, and miscellaneous investments	468.2	424.5
Unrealized hedges	—	34.9
Other	47.5	20.0
Gross deferred tax liabilities	2,710.1	2,401.4
Net deferred tax liability	\$ 1,111.7	\$ 1,100.1

We have established a valuation allowance against certain of the categories of deferred tax assets described above as current evidence does not suggest we will realize sufficient taxable income of the appropriate character (e.g., ordinary income versus capital gain income) within

the carry forward period to allow us to realize these deferred tax benefits.

Of the total valuation allowance of \$384.4 million, \$168.3 million relates to a deferred tax asset for losses recorded as part of the Pillsbury acquisition. Of the remaining valuation allowance, \$90.7 million relates to capital loss carryforwards and \$122.1 million relates to state and foreign operating loss carryforwards. We have approximately \$78.9 million of U.S. foreign tax credit carryforwards for which no valuation allowance has been recorded. As of May 27, 2012, we believe it is more-likely-than-not that the remainder of our deferred tax assets are realizable.

The carryforward periods on our foreign loss carryforwards are as follows: \$86.8 million do not expire; \$4.4 million expire in fiscal 2013 and 2014; and \$23.0 million expire in fiscal 2015 and beyond.

We have not recognized a deferred tax liability for unremitted earnings of \$2.8 billion from our foreign operations because our subsidiaries have invested or will invest the undistributed earnings indefinitely, or the earnings will be remitted in a tax-neutral transaction. It is not practicable for us to determine the amount of unrecognized deferred tax liabilities on these indefinitely reinvested earnings. Deferred taxes are recorded for earnings of our foreign operations when we determine that such earnings are no longer indefinitely reinvested.

We are subject to federal income taxes in the United States as well as various state, local, and foreign jurisdictions. A number of years may elapse before an uncertain tax position is audited and finally resolved. While it is often difficult to predict the final outcome or the timing of resolution of any particular uncertain tax position, we believe that our liabilities for income taxes reflect the most likely outcome. We adjust these liabilities, as well as the related interest, in light of changing facts and circumstances. Settlement of any particular position would usually require the use of cash.

The number of years with open tax audits varies depending on the tax jurisdiction. Our major taxing jurisdictions include the United States (federal and state) and Canada. The IRS initiated its audit of our fiscal 2009 and fiscal 2010 tax years during fiscal 2012.

During fiscal 2012, we reached a settlement with the IRS concerning research and development tax credits claimed for fiscal years 2002 to 2008. This settlement did not have a material impact on our results of operations or financial position. As of the end of fiscal 2012,

we have effectively settled all issues with the IRS for fiscal years 2008 and prior.

During fiscal 2011, we reached a settlement with the IRS concerning certain corporate income tax adjustments for fiscal years 2002 to 2008. The adjustments primarily relate to the amount of capital loss, depreciation, and amortization we reported as a result of the sale of noncontrolling interests in our GMC subsidiary. As a result, we recorded a \$108.1 million reduction in our total liabilities for uncertain tax positions in fiscal 2011. We made payments totaling \$385.3 million in fiscal 2011 related to this settlement.

During 2011, the Superior Court of the State of California issued an adverse decision concerning our state income tax apportionment calculations. As a result, we recorded an \$11.5 million increase in our total liabilities for uncertain tax positions in fiscal 2011. We believe our positions are supported by substantial technical authority and have appealed this decision. We do not expect to make a payment related to this matter until it is definitively resolved.

Various tax examinations by United States state taxing authorities could be conducted for any open tax year, which vary by jurisdiction, but are generally from 3 to 5 years. Currently, several state examinations are in progress. The Canada Revenue Agency (CRA) has completed its review of our income tax returns in Canada for fiscal years 2003 to 2005. The CRA has raised assessments for these years to which we have objected or otherwise addressed through the Mutual Agreement procedures of the Canada-US tax treaty. We believe our positions are supported by substantial technical authority and are vigorously defending our positions. We do not anticipate that any United States or Canadian tax adjustments will have a significant impact on our financial position or results of operations.

We apply a more-likely-than-not threshold to the recognition and derecognition of uncertain tax positions. Accordingly we recognize the amount of tax benefit that has a greater than 50 percent likelihood of being ultimately realized upon settlement. Future changes in judgment related to the expected ultimate resolution of uncertain tax positions will affect earnings in the quarter of such change.

The following table sets forth changes in our total gross unrecognized tax benefit liabilities, excluding accrued interest, for fiscal 2012. Approximately \$148.3 million of this total represents the amount that, if recognized, would affect our effective income tax rate in future

periods. This amount differs from the gross unrecognized tax benefits presented in the table because certain of the liabilities below would impact deferred taxes if recognized or are the result of stock compensation items impacting additional paid-in capital. We also would record a decrease in U.S. federal income taxes upon recognition of the state tax benefits included therein.

In Millions	Fiscal Year	
	2012	2011
Balance, beginning of year	\$226.2	\$552.9
Tax positions related to current year:		
Additions	23.8	25.0
Tax positions related to prior years:		
Additions	24.3	75.6
Reductions	(13.4)	(131.2)
Settlements	(6.6)	(287.9)
Lapses in statutes of limitations	(23.0)	(8.2)
Balance, end of year	\$231.3	\$226.2

As of May 27, 2012, we do not expect to pay any unrecognized tax benefit liabilities within the next 12 months. We are not able to reasonably estimate the timing of future cash flows beyond 12 months due to uncertainties in the timing of tax audit outcomes. The remaining amount of our unrecognized tax liability was classified in other liabilities.

We report accrued interest and penalties related to unrecognized tax benefit liabilities in income tax expense. For fiscal 2012, we recognized \$0.2 million of tax-related net interest and penalties, and had \$49.3 million of accrued interest and penalties as of May 27, 2012. For fiscal 2011, we recognized a net benefit of \$10.5 million associated with tax-related interest and penalties, and had \$53.4 million of accrued interest and penalties as of May 29, 2011.

NOTE 15. LEASES, OTHER COMMITMENTS, AND CONTINGENCIES

An analysis of rent expense by type of property for operating leases follows:

In Millions	Fiscal Year		
	2012	2011	2010
Warehouse space	\$ 72.6	\$ 63.4	\$ 55.7
Equipment	34.8	32.1	30.6
Other	68.1	56.9	51.6
Total rent expense	\$ 175.5	\$ 152.4	\$ 137.9

Some operating leases require payment of property taxes, insurance, and maintenance costs in addition to the rent payments. Contingent and escalation rent in excess of minimum rent payments and sublease income netted in rent expense were insignificant.

Noncancelable future lease commitments are:

In Millions	Operating Leases	Capital Leases
2013	\$ 86.8	\$ 1.8
2014	69.5	1.0
2015	54.7	0.7
2016	45.6	0.3
2017	32.5	—
After 2017	48.6	—
Total noncancelable future lease commitments	\$ 337.7	\$ 3.8
Less: interest		(0.3)
Present value of obligations under capital leases		\$ 3.5

These future lease commitments will be partially offset by estimated future sublease receipts of approximately \$13.1 million. Depreciation on capital leases is recorded as depreciation expense in our results of operations.

As of May 27, 2012, we have issued guarantees and comfort letters of \$397.8 million for the debt and other obligations of consolidated subsidiaries, and guarantees and comfort letters of \$335.4 million for the debt and other obligations of non-consolidated affiliates, mainly CPW. In addition, off-balance sheet arrangements are generally limited to the future payments under non-cancelable operating leases, which totaled \$337.7 million as of May 27, 2012.

Contingencies We are party to various pending or threatened legal actions in the ordinary course of our business. In our opinion, there were no claims or litigation pending as of May 27, 2012, that were reasonably likely to have a material adverse effect on our consolidated financial position or results of operations. These matters include a class action lawsuit filed on January 14, 2010, in the United States District Court, Central District of California, alleging that we made false and misleading claims about the digestive health benefits of our *YoPlus* yogurt product. The *YoPlus* matter is scheduled to go to trial in fiscal 2013. We believe that we have meritorious defenses against these allegations and will vigorously defend our position. As of May 27, 2012, we have not recorded a loss contingency for this matter.

NOTE 16. BUSINESS SEGMENT AND GEOGRAPHIC INFORMATION

We operate in the consumer foods industry. We have three operating segments by type of customer and geographic region as follows: U.S. Retail, 62.9 percent of our fiscal 2012 consolidated net sales; International, 25.2 percent of our fiscal 2012 consolidated net sales; and Bakeries and Foodservice, 11.9 percent of our fiscal 2012 consolidated net sales.

Our U.S. Retail segment reflects business with a wide variety of grocery stores, mass merchandisers, membership stores, natural food chains, and drug, dollar and discount chains operating throughout the United States. Our major product categories in this business segment are ready-to-eat cereals, refrigerated yogurt, ready-to-serve soup, dry dinners, shelf stable and frozen vegetables, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza and pizza snacks, grain, fruit and savory snacks, and a wide variety of organic products including granola bars, cereal, and soup.

Our International segment consists of retail and foodservice businesses outside of the United States. In Canada, our major product categories are ready-to-eat cereals, shelf stable and frozen vegetables, dry dinners, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza snacks, refrigerated yogurt, and grain and fruit snacks. In markets outside North America, our product categories include super-premium ice cream and frozen desserts, refrigerated yogurt, grain snacks, shelf stable and frozen vegetables, refrigerated and frozen dough products, and dry dinners. Our International segment also includes products manufactured in the United States for export, mainly to Caribbean and Latin American markets, as well as products we manufacture for sale to our international joint ventures. Revenues from export activities and franchise fees are reported in the region or country where the end customer is located.

In our Bakeries and Foodservice segment our major product categories are ready-to-eat cereals, snacks, refrigerated yogurt, frozen dough products, baking mixes, and flour. Many products we sell are branded to the consumer and nearly all are branded to our customers. We sell to distributors and operators in many customer channels including foodservice, convenience stores, vending, and supermarket bakeries. Substantially all of this segment's operations are located in the United States.

Operating profit for these segments excludes unallocated corporate items, restructuring, impairment, and other exit costs, and divestiture gains and losses. Unallocated corporate items include corporate overhead expenses, variances to planned domestic employee benefits and incentives, contributions to the General Mills Foundation, and other items that are not part of our measurement of segment operating performance. These include gains and losses arising from the revaluation of certain grain inventories and gains and losses from mark-to-market valuation of certain commodity positions until passed back to our operating segments. These items affecting operating profit are centrally managed at the corporate level and are excluded from the measure of segment profitability reviewed by executive management. Under our supply chain organization, our manufacturing, warehouse, and distribution activities are substantially integrated across our operations in order to maximize efficiency and productivity. As a result, fixed assets and depreciation and amortization expenses are neither maintained nor available by operating segment.

Our operating segment results were as follows:

In Millions	Fiscal Year		
	2012	2011	2010
Net sales:			
U.S. Retail	\$10,480.2	\$10,163.9	\$10,209.8
International	4,194.3	2,875.5	2,684.9
Bakeries and Foodservice	1,983.4	1,840.8	1,740.9
Total	\$16,657.9	\$14,880.2	\$14,635.6
Operating profit:			
U.S. Retail	\$ 2,295.3	\$ 2,347.9	\$ 2,385.2
International	429.6	291.4	192.1
Bakeries and Foodservice	286.7	306.3	263.2
Total segment operating profit	3,011.6	2,945.6	2,840.5
Unallocated corporate items	347.6	184.1	203.0
Divestitures (gain)	—	(17.4)	—
Restructuring, impairment, and other exit costs	101.6	4.4	31.4
Operating profit	\$ 2,562.4	\$ 2,774.5	\$ 2,606.1

The following table provides financial information by geographic area:

In Millions	Fiscal Year		
	2012	2011	2010
Net sales:			
United States	\$12,462.1	\$11,987.8	\$11,934.4
Non-United States	4,195.8	2,892.4	2,701.2
Total	\$16,657.9	\$14,880.2	\$14,635.6

In Millions	May 27, 2012	May 29, 2011
Cash and cash equivalents:		
United States	\$ 25.7	\$ 123.7
Non-United States	445.5	495.9
Total	\$ 471.2	\$ 619.6

In Millions	May 27, 2012	May 29, 2011
Land, buildings, and equipment:		
United States	\$2,804.9	\$2,752.1
Non-United States	847.8	593.8
Total	\$3,652.7	\$3,345.9

Generally, our products can be classified into categories of similar products, such as cereal, yogurt, whole-some snacks, convenient meals, and super-premium ice cream, among others. However, it is currently impracticable for us to provide revenue information on this basis.

NOTE 17. SUPPLEMENTAL INFORMATION

The components of certain Consolidated Balance Sheet accounts are as follows:

In Millions	May 27, 2012	May 29, 2011
Receivables:		
From customers	\$1,345.3	\$1,178.6
Less allowance for doubtful accounts	(21.7)	(16.3)
Total	\$1,323.6	\$1,162.3

In Millions	May 27, 2012	May 29, 2011
Inventories:		
Raw materials and packaging	\$ 334.4	\$ 286.2
Finished goods	1,211.8	1,273.6
Grain	155.3	218.0
Excess of FIFO over LIFO cost ^(a)	(222.7)	(168.5)
Total	\$1,478.8	\$1,609.3

(a) Inventories of \$930.2 million as of May 27, 2012, and \$1,034.1 million as of May 29, 2011, were valued at LIFO. During fiscal 2012, LIFO inventory layers were reduced. Results of operations were not materially affected by a liquidation of LIFO inventory. The difference between replacement cost and the stated LIFO inventory value is not materially different from the reserve for the LIFO valuation method.

In Millions	May 27, 2012	May 29, 2011
Prepaid expenses and other current assets:		
Prepaid expenses	\$178.3	\$161.0
Accrued interest receivable, including interest rate swaps	15.0	29.0

High	\$ 39.77	\$ 38.93	\$ 39.92	\$ 37.54	\$ 41.05	\$ 37.20	\$ 39.69	\$ 39.95
Low	\$ 34.95	\$ 33.57	\$ 36.89	\$ 34.99	\$ 38.15	\$ 34.60	\$ 38.04	\$ 35.99

During the fourth quarter of fiscal 2012, we finalized the purchase accounting for certain assets and liabilities related to the acquisitions of Yoplait S.A.S. and Yoplait Marques S.A.S. We recorded final adjustments that resulted in a \$38.7 million decrease in goodwill.

The components of interest, net are as follows:

Expense (Income), in Millions	Fiscal Year		
	2012	2011	2010
Interest expense	\$370.7	\$360.9	\$374.5
Capitalized interest	(8.9)	(7.2)	(6.2)
Interest income	(9.9)	(7.4)	(6.8)
Gain on debt repurchase	—	—	40.1
Interest, net	\$351.9	\$346.3	\$401.6

Certain Consolidated Statements of Cash Flows amounts are as follows:

In Millions	Fiscal Year		
	2012	2011	2010
Cash interest payments	\$344.3	\$333.1	\$384.1
Cash paid for income taxes	590.6	699.3	672.5

Glossary

AOCI. Accumulated other comprehensive income (loss).

Average total capital. Notes payable, long-term debt including current portion, redeemable interest, noncontrolling interests, and stockholders' equity excluding AOCI, and certain after-tax earnings adjustments are used to calculate return on average total capital. The average is calculated using the average of the beginning of fiscal year and end of fiscal year Consolidated Balance Sheet amounts for these line items.

Core working capital. Accounts receivable plus inventories less accounts payable, all as of the last day of our fiscal year.

Depreciation associated with restructured assets. The increase in depreciation expense caused by updating the salvage value and shortening the useful life of depreciable fixed assets to coincide with the end of production under an approved restructuring plan, but only if impairment is not present.

Derivatives. Financial instruments such as futures, swaps, options, and forward contracts that we use to manage our risk arising from changes in commodity prices, interest rates, foreign exchange rates, and equity prices.

Fair value hierarchy. For purposes of fair value measurement, we categorize assets and liabilities into one of three levels based on the assumptions (inputs) used in valuing the asset or liability. Level 1 provides the most reliable measure of fair value, while Level 3 generally requires significant management judgment. The three levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.

Level 3: Unobservable inputs reflecting management's assumptions about the inputs used in pricing the asset or liability.

Fixed charge coverage ratio. The sum of earnings before income taxes and fixed charges (before tax), divided by the sum of the fixed charges (before tax) and interest.

Generally Accepted Accounting Principles (GAAP). Guidelines, procedures, and practices that we are required to use in recording and reporting accounting information in our financial statements.

Goodwill. The difference between the purchase price of acquired companies and the related fair values of net assets acquired.

Hedge accounting. Accounting for qualifying hedges that allows changes in a hedging instrument's fair value to offset corresponding changes in the hedged item in the same reporting period. Hedge accounting is permitted for certain hedging instruments and hedged items only if the hedging relationship is highly effective, and only prospectively from the date a hedging relationship is formally documented.

Interest bearing instruments. Notes payable, long-term debt, including current portion, cash and cash equivalents, and certain interest bearing investments classified within prepaid expenses and other current assets and other assets.

LIBOR. London Interbank Offered Rate.

Mark-to-market. The act of determining a value for financial instruments, commodity contracts, and related assets or liabilities based on the current market price for that item.

Net mark-to-market valuation of certain commodity positions. Realized and unrealized gains and losses on derivative contracts that will be allocated to segment operating profit when the exposure we are hedging affects earnings.

Net price realization. The impact of list and promoted price changes, net of trade and other price promotion costs.

Noncontrolling interests. Interests of subsidiaries held by third parties.

Notional principal amount. The principal amount on which fixed-rate or floating-rate interest payments are calculated.

OCI. Other comprehensive income (loss).

Operating cash flow to debt ratio. Net cash provided by operating activities, divided by the sum of notes payable and long-term debt, including current portion.

Redeemable interest. Interest of subsidiaries held by a third party that can be redeemed outside of our control and therefore cannot be classified as a noncontrolling interest in equity.

Reporting unit. An operating segment or a business one level below an operating segment.

Return on average total capital. Net earnings attributable to General Mills, excluding after-tax net interest, and adjusted for certain items affecting year-over-year comparability, divided by average total capital.

Segment operating profit margin. Segment operating profit divided by net sales for the segment.

Supply chain input costs. Costs incurred to produce and deliver product, including costs for ingredients and conversion, inventory management, logistics, and warehousing.

Total debt. Notes payable and long-term debt, including current portion.

Transaction gains and losses. The impact on our Consolidated Financial Statements of foreign exchange rate changes arising from specific transactions.

Translation adjustments. The impact of the conversion of our foreign affiliates' financial statements to U.S. dollars for the purpose of consolidating our financial statements.

Variable interest entities (VIEs). A legal structure that is used for business purposes that either (1) does not have equity investors that have voting rights and share in all the entity's profits and losses or (2) has equity investors that do not provide sufficient financial resources to support the entity's activities.

Working capital. Current assets and current liabilities, all as of the last day of our fiscal year.

Non-GAAP Measures

This report includes measures of financial performance that are not defined by generally accepted accounting principles (GAAP). For each of these non-GAAP financial measures, we are providing below a reconciliation of the differences between the non-GAAP measure and the most directly comparable GAAP measure. These non-GAAP measures are used in reporting to our executive

management and/or as a component of the board of director's measurement of our performance for incentive compensation purposes. Management and the board of directors believe that these measures provide useful information to investors. These non-GAAP measures should be viewed in addition to, and not in lieu of, the comparable GAAP measure.

TOTAL SEGMENT OPERATING PROFIT

In Millions	Fiscal Year				
	2012	2011	2010	2009	2008

(a) Sum of current year and previous year after-tax adjustments.

INTERNATIONAL SEGMENT AND REGION SALES GROWTH RATES EXCLUDING IMPACT OF FOREIGN EXCHANGE

The reconciliation of International segment and region sales growth rates as reported to growth rates excluding the impact of foreign currency exchange below demonstrates the effect of foreign currency exchange rate fluctuations from year to year. To present this information,

current-period results for entities reporting in currencies other than U.S. dollars are converted into U.S. dollars at the average exchange rates in effect during the corresponding period of the prior fiscal year, rather than the actual average exchange rates in effect during the current fiscal year. Therefore, the foreign currency impact is equal to current-year results in local currencies multiplied by the change in the average foreign currency exchange rates between the current fiscal period and the corresponding period of the prior fiscal year.

	Fiscal Year 2012		Percentage Change in Net Sales on Constant Currency Basis
	Percentage Change in Net Sales as Reported	Impact of Foreign Currency Exchange

Asia/Pacific	21	4	17
Canada	29	1	28
Latin America	11	(3)	14
Total International	46%	1 pt	45%

	Fiscal Year 2011		Percentage Change in Net Sales on Constant Currency Basis
	Percentage Change in Net Sales as Reported	Impact of Foreign Currency Exchange	
Europe	5%	(2) pts	7%
Asia/Pacific	14	5	9
Canada	8	5	3
Latin America	(5)	(16)	11
Total International	7%	Flat	7%

Total Return to Stockholders

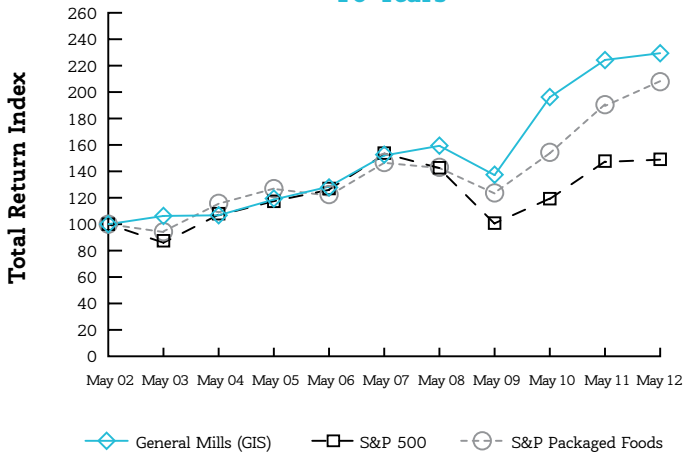

These line graphs compare the cumulative total return for holders of our common stock with the cumulative total return of the Standard & Poor's 500 Stock Index and Standard & Poor's 500 Packaged Foods Index for the last five-year and ten-year fiscal periods. The graphs assume the investment of \$100 in each of General Mills' common stock and the specified indexes at the beginning of the applicable period, and assume the reinvestment of all dividends.

On July 6, 2012, there were approximately 33,400 record holders of our common stock.

Total Return to Stockholders 5 Years

Total Return to Stockholders 10 Years
