

2019

# ANNUAL REPORT

UNIVERSAL CORPORATION

## ABOUT US

---

For over 100 years, Universal Corporation has been finding innovative solutions to serve our customers and meet their leaf tobacco needs. We built a global presence, solidified long-term relationships with customers and suppliers, adapted to changing agricultural practices, embraced state of the art technology and emerged as the recognized industry leader. Today, we conduct business in over 30 countries on five continents, employ more than 20,000 permanent and seasonal workers, and are the leading global leaf supplier.

Universal Corporation has a long history of operating with integrity, honesty, and a focus on quality. We are a vital link in the leaf tobacco supply chain, providing expertise in working with large numbers of farmers, efficiently selling various qualities of leaf to a broad global customer base, adapting to meet evolving customer needs, and delivering products that meet stringent quality and regulatory specifications.

Going forward, we will build on our history by seeking opportunities to leverage both our assets and expertise. We will continue our commitment to leadership in setting industry standards, operating with transparency, providing products that are responsibly-sourced, and investing in and strengthening the communities where we operate.

## FINANCIAL HIGHLIGHTS

*in thousands, except per share data*

	Fiscal Year Ended March 31, 2019	Fiscal Year Ended March 31, 2018	Fiscal Year Ended March 31, 2017
<b>OPERATIONS</b>			
Sales and other operating revenues	\$ 2,227,153	\$ 2,033,947	\$ 2,071,218

\* Attributable to Universal Corporation common shareholders after deducting amounts attributable to noncontrolling interests in consolidated subsidiaries.

\*\* Includes a one-time reduction of earnings available to common shareholders of \$74 million, or \$2.99 per diluted share, from the conversion for cash of the remaining shares of the Company's Series B 6.75% Convertible Perpetual Preferred Stock.

## TO OUR SHAREHOLDERS

At Universal, we don't believe companies build businesses, we believe people do. Throughout our more than 100-year history, our people have been the backbone of Universal as we've built a global presence, responded to changing agricultural practices, made significant investments in the quality of life for our communities, embraced state of the art technology and emerged as the recognized industry leader. In fiscal year 2019, due to another year of hard work and dedication of our more than 20,000 employees, we advanced our goal of providing products that are responsibly-sourced and processed with transparency while delivering solid results for our shareholders.

In fiscal year 2019, we reported:

- Net income of \$104.1 million, or \$4.11 per diluted share, compared with fiscal year 2018's net income of \$105.7 million, or \$4.14 per diluted share. Those results included certain non-recurring items, which decreased diluted earnings per share by \$0.34 and increased diluted earnings per share by \$0.18 for the fiscal years ended March 31, 2019 and March 31, 2018, respectively. Excluding those non-recurring items, net income and earnings per share increased by \$11.7 million and \$0.49, respectively, for fiscal year 2019 compared to fiscal year 2018.
- Operating income of \$161.2 million, which included restructuring and impairment charges of \$20.3 million, a decrease of \$9.7 million, compared to operating income of \$170.8 million for the fiscal year ended March 31, 2018.
- Segment operating income of \$186.8 million, an increase of \$6.8 million, compared to segment operating income of \$180.0 million for the fiscal year ended March 31, 2018.
- Consolidated revenues of \$2.2 billion, an increase of \$193.2 million, compared to the same period in the prior fiscal year, primarily due to higher sales and processing volumes.

As part of our capital allocation strategy that we unveiled last year, we continued to explore growth opportunities outside of leaf tobacco in adjacent

industries and markets that we believe will utilize our assets and capabilities and deliver value to our shareholders. To support these efforts, we hired a dedicated business development officer, established an investment pipeline, and have been actively engaged in assessing numerous investment opportunities in both private and public companies across a variety of agribusiness arenas. I look forward to updating you on our progress as we work to identify opportunities to expand our business and help mitigate the impact of tobacco consumption declines.

In addition to delivering on our financial objectives and positioning the company for longer-term growth, we also continued our commitment to returning value to our shareholders by announcing our 49th annual dividend increase.

We understand there's more to business than profit, and we believe that we have been able to achieve these results and maintain our leadership position due to our strong commitment to supporting sustainable tobacco production. We only have one Earth to provide for our needs today and tomorrow. That's why it's so important to preserve and protect our natural environment and why we're committed to investing in infrastructure and social programs that improve living conditions, promote education and make grower communities stronger and healthier.

Over the years we have initiated multiple programs to help communities prosper while protecting their natural resources. One that I'd like to highlight is Project Water Guardian, a program in Brazil

where we partnered with a nonprofit organization to improve water quality. Project Water Guardian incentivizes farmers in Brazil to conserve water, prevent soil erosion and reduce the use of chemicals. By discussing good agricultural practices and conservation-oriented management with the farmers, we helped improve the water quality of crucial springs that supply drinking water. Not only did the water quality drastically improve after the implementation of this program, but the program was so successful that the local government is taking it over and will continue to fund it for the foreseeable future. We have featured some of our water projects in this annual report and in our first ever Sustainability Review which can be found on our website, and I encourage you to read more about them.

Throughout our company's rich history, our commitment to our valued stakeholders – our farmers, our customers, our employees, our communities and our shareholders – has remained strong and today is as vibrant as ever. Likewise, we'll continue to focus on maintaining our position as the leading global leaf supplier and delivering sustainable shareholder value. I am proud of what we've delivered throughout the year and look forward to what our future holds. On behalf of our Board of Directors and the employees of Universal, thank you for your continued support.

# UNIVERSAL WATER - WISE

## RAINWATER HARVESTING

Both Malawi and Brazil collect rainwater in order to reduce the water needed from municipal or groundwater sources. This practice reduces the water usage from local water sources and reduces runoff from factory roofs.

## FLOW METER INSTALLATION

At various locations around the globe, our operations are installing flow meters to better manage and monitor water withdrawal, handling, and discharge within our processing operations. Getting a better understanding of the water used can help us be more efficient and decrease waste.

## DAMS (PONDS) IN MALAWI & MOZAMBIQUE

Dams or ponds are being built in strategic locations in order to provide Malawian and Mozambiquian farming communities with a source of water throughout the year.

## BOREHOLES IN MALAWI & MOZAMBIQUE

To help provide safe and clean drinking water in the communities where we work, we have implemented projects to drill boreholes where the local community can access water closer to home.

## WATER TREATMENT & REUSE PRACTICES

Our facilities in Brazil, Malawi and Mozambique treat water used on site. Treated water is used for toilets and irrigation and any excess goes to the municipal treatment system pre-treated. This reduces our water usage at our facilities.

# Water Wise

Water is an essential natural resource, and we believe prudent management of this resource is vital to our farming communities and processing operations. Throughout our operations, we strive to reduce consumption, manage water quality, and enhance water resiliency in the locations we operate. We believe that localized water-wise practices have an additive affect, and when combined, have a significant impact. Just as streams flow into rivers and rivers into the oceans, we maximize the benefit of our water programs from the farm to the factory to delivery of our products to our customers through multiple best management practices.

## THE RIGHT WAY TO FARM

Universal has a long history of implementing practices aimed at protecting soil, water, air and forestry resources throughout the world. Examples include contour plowing, contour planting, no-till production, crop rotation and active reforestation programs. All are parts of an integrated agronomy philosophy focused on adherence to Good Agricultural Practices.

## WATER QUALITY

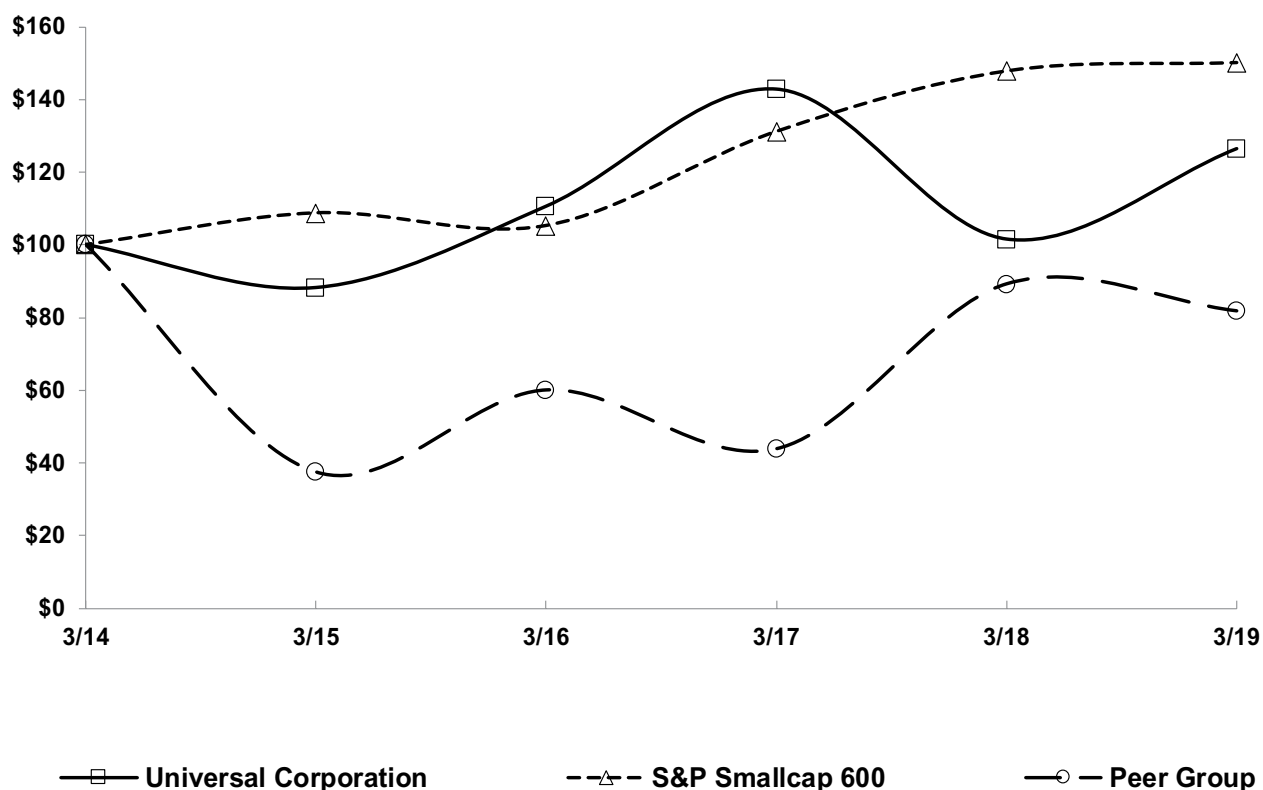

Universal promotes proactive strategies to enhance water quality through practices that conserve water, prevent soil erosion, reduce agrochemical use, and improve access to potable water.

## Forward-Looking Statements

This Annual Report on Form 10-K, which we refer to herein as our Annual Report, contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Among other things, these statements relate to Universal Corporation’s financial condition, results of operations and future business plans, operations, opportunities, and prospects. In addition, Universal Corporation and its representatives may make written or oral forward-looking statements from time to time, including statements contained in other filings with the Securities and Exchange Commission (the “SEC”) and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we “expect,” “believe,” “anticipate,” “could,” “should,” “may,” “plan,” “will,” “predict,” “estimate,” and similar expressions or words of similar import. These forward-looking statements are based upon management’s current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include, but are not limited to: anticipated levels of demand for and supply of our products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; government regulation; product taxation; industry consolidation and evolution; changes in exchange rates and interest rates; impacts of regulation and litigation on our customers; and general economic, political, market, and weather conditions. For a description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, “Risk Factors.” We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. In addition, the discussion of the impact of current trends on our business in “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Other Information Regarding Trends and Management’s Actions” in Item 7 should be read carefully in connection with evaluating our business and the forward-looking statements contained in this Annual Report.

## General

This Annual Report uses the terms “Universal,” “the Company,” “we,” “us,” and “our” to refer to Universal Corporation and its subsidiaries when it is not necessary to distinguish among Universal Corporation and its various operating subsidiaries or when any distinction is clear from the context in which it is used.

See the “Results of Operations” section in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 for a discussion of segment operating income, a non-GAAP financial measure that we refer to in this Annual Report on Form 10-K and consider useful in understanding our business results and trends.

## PART I

### Item 1. Business

#### A. The Company

##### *Overview*

We are the leading global leaf tobacco supplier. We operate in over 30 countries on five continents and procure, finance, process, pack, store and ship leaf tobacco and other agri-products. Tobacco has been our principal focus since our founding in 1918. The largest portion of our business involves procuring and processing flue-cured and burley leaf tobacco for manufacturers of consumer tobacco products. We do not manufacture any consumer products. Rather, we support consumer product manufacturers by selling them processed raw products and performing related services for them. Our reportable segments for our flue-cured and burley tobacco operations are North America and Other Regions. We also have a third reportable segment, Other Tobacco Operations, which comprises our dark tobacco business, our oriental tobacco joint venture, and certain tobacco- and agribusiness-related services. We generated approximately \$2.2 billion in consolidated revenues and earned \$161.2 million in total operating income and \$186.8 million in total segment operating income in fiscal year 2019. Universal Corporation is a holding company that operates through numerous directly and indirectly owned subsidiaries. Universal Corporation’s primary subsidiary is Universal Leaf Tobacco Company, Incorporated. See Exhibit 21, “Subsidiaries of the Registrant,” for additional subsidiary information.

### *Key Operating Principles*

We believe that by following several key operating principles we can continue to produce good financial returns and enhance shareholder value. These key operating principles are:

- **Strategic market position.** We work closely with both our customers and our suppliers to ensure that we deliver a product that meets our customers' needs while cultivating a strong, sustainable supplier base. We balance purchases of leaf tobacco against indicated customer demand and maintain global procurement and production operations to maximize supply chain efficiencies.
- **Strong local management.** Having strong local management in all of our key supply origins allows us to identify and react to constantly shifting market conditions. Empowered and experienced local management, coupled with global coordination, affords us the flexibility and knowledge necessary to adapt quickly in order to continually deliver high quality, competitively-priced products and services.
- **Compliant products.** Customers expect a sustainable supply of compliant, traceable, competitively-priced product, and we believe that we lead in delivering these products. Among other initiatives, we invest in training farmers in good agricultural practices that encompass crop quality, sustainability, environmental stewardship and agricultural labor standards.
- **Diversified sources.** Our business is reliant on a strong and resilient supply chain, which enables us to deliver a stable supply of quality tobacco to our customers. We operate in over 30 countries on five continents and maintain a presence in all major flue-cured, burley, oriental, and dark air-cured tobacco origin markets. This global presence allows us to meet our customers' diverse leaf requirements while minimizing the effects of adverse crop conditions and other localized supply disruptions.
- **Financial strength.** Financial strength is critical and enables us to fund our global operations efficiently and to facilitate investment when suitable opportunities arise. Management of liquidity, interest expense, and capital costs provides us with a competitive advantage, affords us flexibility when responding to customer requirements and market changes, and allows us to enhance shareholder value.

### *Additional Information*

Our website address is [www.universalcorp.com](http://www.universalcorp.com). We post regulatory filings on this website as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. These filings include annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements, Section 16 reports on Forms 3, 4, and 5, and any amendments to those reports filed with or furnished to the SEC. Access to these filings on our website is available free of charge. Copies are also available, without charge, from Universal Corporation Investor Relations, 9201 Forest Hill Avenue, Richmond, VA 23235. Reports filed with the SEC may be viewed at [www.sec.gov](http://www.sec.gov). We also post our press releases on our website. Information on our website is not deemed to be incorporated by reference into this Annual Report.

In addition, our Corporate Governance Guidelines, Code of Conduct, and charters for the Audit Committee, the Compensation Committee, the Executive Committee, the Finance and Pension Investment Committee, and the Nominating and Corporate Governance Committee are available free of charge to shareholders and the public through the "Corporate Governance" section of our website. Printed copies of the foregoing are available to any shareholder upon written request to our Treasurer at the address set forth on the cover of this Annual Report or may be requested through our website, [www.universalcorp.com](http://www.universalcorp.com).

## **B. Description of Business**

### *General*

Our primary business is procuring, financing, processing, packing, storing, and shipping leaf tobacco for sale to manufacturers of consumer tobacco products. Procuring leaf tobacco involves contracting with, providing agronomy support to, and financing farmers in many origins. We do not manufacture cigarettes or other consumer tobacco products. Rather, we support consumer product manufacturers by selling them processed leaf tobacco and performing related services for them. Through various operating subsidiaries and unconsolidated affiliates located in tobacco-growing origins around the world, we contract, purchase, process, and sell flue-cured and burley tobaccos, as well as dark air-cured and oriental tobaccos. Flue-cured, burley, and oriental tobaccos are used principally in the manufacture of cigarettes as well as in shisha and next generation products, and dark air-cured tobaccos are used mainly in the manufacture of cigars, natural wrapped cigars and cigarillos, smokeless, and pipe tobacco products. We also provide value-added services to our customers, including blending, chemical and physical testing of tobacco, service cutting for select manufacturers, manufacturing reconstituted leaf tobacco, and managing just-in-time inventory.

Several important operating factors characterize our company and our primary business, leaf tobacco:

- Experience dealing with large numbers of farmers,
- Expertise in delivering a sustainable supply of compliant, traceable, competitively-priced leaf tobacco,
- Capability to meet unique customer requirements for style, volume and quality,
- Longstanding customer, farmer and community relationships,
- Presence in all major leaf tobacco sourcing areas, and
- Financial strength and flexibility.

In addition to our leaf tobacco business, we are involved in other smaller-scale tobacco and agribusiness opportunities. Our wholly-owned subsidiary, AmeriNic, Inc., produces liquid nicotine for next generation tobacco products. AmeriNic's products are manufactured under stringent United States Pharmacopeia ("USP") standards. Global Laboratory Services, Inc., another wholly-owned subsidiary, provides testing for crop protection agents and tobacco constituents in seed, leaf, and finished products, including e-cigarette liquids and vapors. Analytical services include chemical compound testing in finished tobacco products and mainstream smoke. We also have a business that produces high-quality dehydrated and juiced fruit and vegetable ingredients and another business that recycles waste materials from tobacco production. Additionally, we are involved in research and development growth trials with trusted partners for agriproducts production, such as our current vanilla trial in Brazil. We also have developed an investment pipeline and continue to explore growth opportunities outside of leaf tobacco in adjacent industries and markets that we believe will utilize our assets and capabilities and deliver value to our shareholders. We consider adjacencies to be industries and markets where we can leverage our strengths such as country knowledge, agricultural expertise, and complex grower and logistic network management. A potential investment might involve high-value, non-commodity, or crop-based agricultural products requiring value-added handling or processing.

With respect to our leaf tobacco business, we generate our revenues from product sales of processed, packed tobacco that we source, from processing fees for tobacco owned by third parties, and from fees for other services. Sales to our six largest customers, with whom we have longstanding relationships, have accounted for more than two-thirds of our consolidated revenues for each of the past three fiscal years. Our sales consist primarily of flue-cured and burley tobaccos. For the fiscal year ended March 31, 2019, our flue-cured and burley operations accounted for 88% of our revenues and 93% of our segment operating income.

We conduct our business in varying degrees in a number of countries, including Bangladesh, Brazil, Canada, the Dominican Republic, Ecuador, France, Germany, Guatemala, Hungary, India, Indonesia, Italy, Malawi, Mexico, Mozambique, the Netherlands, Paraguay, the People's Republic of China, the Philippines, Poland, Russia, Singapore, South Africa, Spain, Switzerland, Tanzania, the United Arab Emirates, the United States, and Zimbabwe. In addition, our oriental tobacco joint venture, Socotab, L.L.C. has operations in Bulgaria, Greece, Macedonia, and Turkey.

Because unprocessed, or "green," leaf tobacco is a perishable product, timely processing is an essential service to our customers. Our processing of leaf tobacco includes grading in the factories, blending, removal of non-tobacco material, separation of leaf from the stems, drying, packing to precise moisture targets for proper aging, as well as temporary storage. This generally requires investments in factories and machinery in areas where the tobacco is grown. Processed tobacco that has been properly packed can be stored by customers for a number of years prior to use, but most processed tobacco is used within two to three years.

We are a major purchaser and processor in the chief exporting regions for flue-cured and burley tobacco throughout the world. Africa, Brazil, and the United States produce approximately two-thirds of the flue-cured and burley tobacco grown outside of China. We estimate that over the last five years we have handled, through leaf sales or processing, between 30% and 40% of the annual production of such tobaccos in both Africa and the United States and between 15% and 25% in Brazil. These percentages can change from year to year based on the size, price, and quality of the crops. We participate in the procurement, processing, storage, and sale of oriental tobacco through ownership of a 49% equity interest in Socotab, L.L.C., a leading supplier of oriental tobaccos. In addition, we maintain a presence, and in certain cases, a leading presence, in all other major tobacco growing regions in the world. We believe that our leading position in the leaf tobacco industry is based on our volumes handled, our operating presence in all of

the major sourcing areas, our ability to meet customer style, volume, and quality requirements, our expertise in dealing with large numbers of farmers, our long-standing relationships with customers, our development of processing equipment and technologies, and our financial position. The efficiencies that we offer our customers, due to our established network of operational expertise and infrastructure on the ground and our ability to market most styles and grades of leaf to a diverse customer base, are also key to our success.

We also have a leading position in worldwide dark tobacco markets. Our dark tobacco operations are located in most of the major producing countries and in other smaller markets. We operate in major dark tobacco producing countries, including the United States, the Dominican Republic, Ecuador, Indonesia, Paraguay, the Philippines, and Brazil. Dark tobaccos are typically used in the manufacture of cigars, pipe tobacco, and smokeless tobacco products, and as components of certain “roll-your-own” cigarette products.

Sales are made by our sales force and, to a much smaller degree, through the use of commissioned agents. Most customers are long-established tobacco product manufacturers. Customer contract arrangements vary around the world and include negotiated pricing as well as cost plus arrangements. Discussions of a customer’s longer-term needs may begin as early as one to two years in advance of a particular crop purchase. These discussions are key to our future crop production planning. Prior to planting each year, we use early customer indications for type, style, processing, and volume requirements for the upcoming season’s crop to help us determine our farmer contracting and grower input needs in our origins. We work with our farmers and customers continually throughout the crop season. As crops progress through the growing season, customers will inspect the crop, and a customer’s early indications may be refined based upon emerging crop qualities and quantities and market pricing expectations. Ultimately, purchase agreements specifying quantity, quality, grade and price are executed, leading to inventory allocations of harvested green or processed leaf that we have acquired.

In the majority of the countries where we operate, we contract directly with tobacco farmers or tobacco farmer cooperatives. In most countries outside the United States, we advance seed or seedlings, fertilizer, and other agricultural inputs to farmers. These advances are repaid by farmers with the tobacco they produce. We are dedicated to promoting a sustainable farmer base and provide our farmers with agronomy support. Our Good Agricultural Practices programs educate farmers in such matters as the reduction of non-tobacco related materials, product traceability, environmental sustainability, agricultural labor standards, and social responsibility.

Our foreign operations are subject to international business risks, including unsettled political conditions, expropriation, import and export restrictions, exchange controls, and currency fluctuations. During the tobacco season in many of the countries listed above, we advance funds, guarantee local loans, or do both, each in substantial amounts, for the eventual purchase of tobacco. The majority of these seasonal advances and loan guarantees mature in one year or less upon the farmers’ delivery of contracted tobaccos. Most advances to farmers are denominated in local currency, which is a source of foreign currency exchange rate risk. Most tobacco sales are denominated in U.S. dollars, which reduces our foreign currency exchange risk after the tobacco has been purchased. See Item 1A, “Risk Factors” for more information about our foreign currency exchange and other risks.

For a discussion of recent developments and trends in our business, along with factors that may affect our business, see Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and Item 1A, “Risk Factors.”

### *Seasonality*

Our operations are seasonal in nature. Tobacco in Brazil is usually purchased from January through July, while buying in Malawi, Mozambique, Zimbabwe, and other African countries typically begins around March and continues through November. Farmers begin to sell U.S. flue-cured tobacco in late July, and the marketing season lasts for approximately four months.

We normally operate each of our processing plants for seven to nine months of the year. During this period for each region, inventories of green tobacco, inventories of processed tobacco, and trade accounts receivable normally reach peak levels in succession. We normally finance this expansion of current assets with cash, short-term borrowings from banks, and customer advances, and these funding sources normally reach their peak usage in each region during its respective purchasing or processing period. Our balance sheet at our fiscal year end reflects seasonal expansions in working capital in South America and Central America. Our financial performance is also impacted by the seasonality of our business. Due to global tobacco growing cycles, as well as customer shipment preferences, we typically ship a larger portion of our volumes in the second half of our fiscal year. Changes in customer shipment schedules or changes in crop timing in a season can shift recognition of revenue in a given fiscal year or between fiscal years.

### *Customers*

A material part of our business is dependent upon a few customers. Our six largest customers are Altria Group Inc., British American Tobacco plc, China Tobacco International, Inc., Imperial Brands plc, Japan Tobacco, Inc., and Philip Morris International, Inc. In the aggregate, these customers have accounted for more than two-thirds of our consolidated revenues for each of the past three fiscal years. For the fiscal year ended March 31, 2019, each of British American Tobacco plc, Imperial Brands plc, and Philip Morris International, Inc., including their respective affiliates, accounted for 10% or more of our revenues. The loss of, or substantial

reduction in business from, any of these customers could have a material adverse effect on our results. We have longstanding relationships with all of these customers.

We had commitments from customers for approximately \$502 million of the tobacco in our inventories at March 31, 2019. Based upon historical experience, we expect that at least 90% of such orders will be delivered during fiscal year 2020. Most of our products require shipment via trucks and oceangoing vessels to reach customer destinations. Delays in the delivery of orders can result from such factors as truck and container availability, port access and capacity, vessel scheduling, and changing customer requirements for shipment.

As more fully described in Note 1 to the consolidated financial statements in Item 8 of this Annual Report, we recognize revenue from the sale of tobacco when we complete our contractual performance obligation for the transfer of the tobacco, which is generally when title and risk of loss is transferred to our customer. Individual shipments may be large, and since the customer typically specifies shipping dates, our financial results may vary significantly between reporting periods due to timing of sales. In some markets, including Brazil, Italy, Poland, Tanzania, and the United States, we process tobacco that is owned by our customers, and we recognize the revenue for that service when the processing is completed.

### *Competition*

Competition among leaf tobacco suppliers is based on the ability to meet customer specifications in the growing, buying, processing, and financing of tobacco, and on the prices charged for products and services. Competition varies depending on the market or country involved. The number of competitors varies from country to country, but there is competition in most areas to buy and sell the available tobacco. Our principal competitor is Pyxus International, Inc. (“Pyxus”) (formerly Alliance One International, Inc.). Pyxus operates in many of the countries where we operate. However, we are the only global leaf tobacco supplier in Hungary, Italy, Mexico, Mozambique, the Philippines, and Poland. We also have reconstituted tobacco sheet facilities and operations that handle dark air-cured tobacco. We consider ourselves and Pyxus to be the only global leaf suppliers based on our worldwide scope of operations. Most of our major customers are partially vertically integrated, and thus also compete with us for the purchase of leaf tobacco in several of the major markets.

In most major markets, smaller competitors are very active. These competitors typically have lower overhead requirements and provide less support to customers and farmers. Due to their lower cost structures, they can often offer a price on products that is lower than our price. However, we believe that we provide quality controls and farm programs that add value for our customers in an increasingly regulated world and make our products highly desirable. Our Good Agricultural Practices support an approach to farming that is focused on sustainability, employing sound field production and labor management practices that meet our customers’ needs, promote farmer profitability, and reflect environmental sensitivity. We provide comprehensive training, technical support in the field, and crop analytics through ongoing research and development. We believe that our major customers increasingly require these services and that our programs increase the quality and value of the products and services we offer. We also believe that our customers value the security of supply that we are able to provide due to our strong relationships with our farmer base and our global footprint.

### *Reportable Segments*

We evaluate the performance of our leaf tobacco business by geographic region, although the dark air-cured and oriental tobacco businesses are each evaluated on the basis of their worldwide operations. Performance of the oriental tobacco operations is evaluated based on our equity in the pretax earnings of our affiliate. Under this structure, we have the following primary operating segments: North America, South America, Africa, Europe, Asia, Dark Air-Cured, Oriental, and Special Services. North America, South America, Africa, Europe, and Asia are primarily involved in flue-cured and burley leaf tobacco operations for supply to cigarette manufacturers. Our Dark Air-Cured group supplies dark air-cured tobacco principally to manufacturers of cigars, pipe tobacco, and smokeless tobacco products, and our Oriental business supplies oriental tobacco to cigarette manufacturers. Our Special Services group provides laboratory services, including physical and chemical product testing, electronic nicotine delivery system and e-liquid testing, and smoke testing for customers. Our liquid nicotine and our fruit and vegetable ingredients businesses are also included in the Special Services group.

The five regional operating segments serving our cigarette manufacturer customers share similar characteristics in the nature of their products and services, production processes, class of customer, product distribution methods, and regulatory environment. Based on the applicable accounting guidance, four of the regions – South America, Africa, Europe, and Asia – are aggregated into a single reporting segment, Other Regions, because they have similar economic characteristics. North America is reported as an individual operating segment, because its economic characteristics differ from the other regions, generally because its operations require lower working capital investments for crop financing and inventory. The Dark Air-Cured, Oriental, and Special Services segments, which have differing characteristics in some of the categories mentioned above, are reported together as Other Tobacco Operations, because each is below the measurement threshold for separate reporting.

**C. Employees**

We employed approximately 28,000 employees throughout the world during the fiscal year ended March 31, 2019. We estimated this figure because the majority of our personnel are seasonal employees.

**D. Research and Development**

We did not expend material amounts for research and development during the fiscal years ended March 31, 2019, 2018, or 2017.

**E. Intellectual Property**

We hold no material patents, licenses, franchises, or concessions.

**F. Government Regulation, Environmental Matters, and Other Matters**

Our business is subject to general governmental regulation in the United States and in foreign jurisdictions where we conduct business. Such regulation includes, but is not limited to, matters relating to environmental protection. To date, governmental provisions regulating the discharge of material into the environment have not had a material effect upon our capital expenditures, earnings, or competitive position. See Item 1A, “Risk Factors” for a discussion of government regulations and other factors that may affect our business.

## Item 1A. Risk Factors

The risks and uncertainties described below are those that we currently believe could materially adversely affect us. Other risks and uncertainties that we do not presently consider to be material or of which we are not presently aware may become important factors that affect us in the future. If any of the risks discussed below actually occur, our business, financial condition, operating results or cash flows could be materially adversely affected. Accordingly, you should carefully consider the following risk factors, as well as other information contained in or incorporated by reference in this Annual Report.

### Operating Factors

*In areas where we purchase leaf tobacco directly from farmers, we bear the risk that the tobacco we receive will not meet quality and quantity requirements.*

When we contract directly with tobacco farmers or tobacco farmer cooperatives, which is the method we use to purchase tobacco in most countries, we bear the risk that the tobacco delivered may not meet customer quality and quantity requirements. If the tobacco does not meet such market requirements, we may not be able to fill all of our customers' orders, and such failure would have an adverse effect on profitability and results of operations. In a contract market our obligation is to purchase the entire tobacco plant, which encompasses many leaf styles, therefore, we also have a risk that not all of that production will be readily marketable at prices that support acceptable margins. In addition, in many foreign countries where we purchase tobacco directly from farmers, we provide them with financing. Unless we receive marketable tobacco that meets the quality and quantity specifications of our customers, we bear the risk that we will not be able to fully recover our crop advances or recover them in a reasonable period of time.

*The leaf tobacco industry is competitive, and we are heavily reliant on a few large customers.*

We are one of two major independent global competitors in the leaf tobacco industry, both of whom are reliant upon a few large customers. The loss of one of those large customers or a significant decrease in their demand for our products or services could significantly decrease our sales of products or services, which would have a material adverse effect on our results of operations. The competition among leaf tobacco suppliers and dealers is based on the ability to meet customer requirements in the buying, processing, and financing of tobacco, and on the price charged for products and services. We believe that we consistently meet our customers' requirements and charge competitive prices. Since we rely upon a few significant customers, the consolidation or failure of any of these large customers, or a significant increase in their vertical integration, could contribute to a significant decrease in our sales of products and services.

We compete for both the purchase and sale of leaf with smaller leaf tobacco suppliers in some of the markets where we conduct business. Some of these smaller leaf tobacco suppliers operate in more than one country. Since they typically provide little or no support to farmers, these leaf tobacco suppliers typically have lower overhead requirements than we do. Due to their lower cost structures, they often can offer prices on products and services that are lower than our prices. Our customers also directly source leaf tobacco from farmers to meet some of their raw material needs. Direct sourcing provides our customers with some qualities and quantities of leaf tobacco that they prefer not to use in their existing blends and that may be offered for sale. This competition for both the sale and purchase of leaf, both with smaller leaf tobacco suppliers and direct sourcing, could reduce the volume of the leaf we handle and could negatively impact our financial results.

*Our financial results can be significantly affected by changes in the balance of supply and demand for leaf tobacco.*

As a leaf tobacco supplier, our financial results can be significantly affected by changes in the overall balance of worldwide supply and demand for leaf tobacco. The demand for leaf tobacco, which is based upon customers' expectations of their future requirements, can change from time to time depending upon factors affecting the demand for their products. Our customers' expectations and their demand for leaf tobacco are influenced by a number of factors, including:

- trends in the global consumption of cigarettes,
- trends in consumption of cigars and other tobacco products,
- trends in consumption of alternative tobacco products, such as electronic nicotine delivery systems and non-combustible products,
- levels of competition among our customers, and
- regulatory and governmental factors.

The world supply of leaf tobacco at any given time is a function of current tobacco production, inventories held by manufacturers, and the stocks of leaf tobacco held by leaf tobacco suppliers. Production of tobacco in a given year may be significantly affected by such factors as:

- demographic shifts that change the number of farmers or the amount of land available to grow tobacco,
- decisions by farmers to grow crops other than leaf tobacco,
- volume of annual tobacco plantings and yields realized by farmers,

- availability of crop inputs,
- weather and natural disasters, including any adverse weather conditions that may result from climate change, and
- crop infestation and disease.

Any significant change in these factors could cause a material imbalance in the supply of and demand for tobacco, which would affect our results of operations.

*Our financial results will vary according to tobacco growing conditions, customer requirements, and other factors. These factors may also limit the ability to accurately forecast our future performance and increase the risk of an investment in our common stock or other securities.*

Our financial results, particularly our year-over-year quarterly comparisons, may be significantly affected by variations in tobacco growing seasons and fluctuations in crop sizes. The timing of the cultivation and delivery of tobacco is dependent upon a number of factors, including weather and other natural events, and our processing schedules and results of operations can be significantly altered by these factors. In addition, the potential impact of climate change is uncertain and may vary by geographic region. The possible effects, as described in various public accounts, could include changes in rainfall patterns, water shortages, changing storm patterns and intensities, and changing temperature levels that could adversely impact our costs and business operations and the supply and demand for leaf tobacco. Our operations also rely on dependable and efficient transportation services. A disruption in transportation services, as a result of climate change or otherwise, may also significantly impact our results of operations.

Further, the timing of customer orders and shipments may vary and may require us to keep tobacco in inventory and may also result in variations in quarterly and annual financial results. We base sales recognition on meeting our performance obligation under our contract with the customer, which generally occurs with the passage of ownership of the tobacco. Since individual shipments may represent significant amounts of revenue, our quarterly and annual financial results may vary significantly depending on the timing of needs and shipping instructions of our customers and the availability of transportation services. These fluctuations result in varying volumes and sales in given periods, which also reduce the comparability of financial results.

*Major shifts in customer requirements for tobacco supply may significantly affect our operating results.*

If our customers significantly alter their requirements for tobacco volumes from certain regions, we may have to change our production facilities and alter our fixed asset base in certain origins. Permanent or long-term reduction in demand for tobacco from origins where we have operations may trigger restructuring and impairment charges. We may also need to make significant capital investments in other regions to develop the needed infrastructure to meet customer supply requirements.

*Weather and other conditions can affect the marketability of our products.*

Tobacco crops are subject to vagaries of weather and the environment that can, in some cases, change the quality or size of the crops. If a weather event is particularly severe, such as a major drought or hurricane, the affected crop could be destroyed or damaged to an extent that it would be less desirable to manufacturers, which would result in a reduction in revenues. If such an event is also widespread, it could affect our ability to acquire the quantity of tobacco required by our customers. In addition, other factors can affect the marketability of tobacco, including, among other things, the presence of excess residues of crop protection agents or non-tobacco related materials. A significant event impacting the condition or quality of a large amount of any of the crops that we buy could make it difficult for us to sell these products or to fill customers' orders.

*Our food ingredient business is subject to industry-specific risks which could adversely affect our operating results.*

Our food ingredients business is subject to risks posed by food spoilage or food contamination; shifting consumer preferences; federal, state, and local food processing regulations; product tampering; and product liability claims. If one or more of these risks were to materialize, our revenues and operating results could be adversely affected, and our Company's reputation might be damaged.

*We may be adversely impacted if our information technology systems fail to perform adequately, including with respect to cybersecurity issues.*

The efficient operation of our business depends on our information technology systems. We rely on our information technology systems to effectively manage our business data, communications, supply chain, order entry and fulfillment, and other business processes. The failure of our information technology systems (including those provided to us by third parties) to perform as we anticipate could disrupt our business and affect our results of operations.

In addition, our information technology systems may be vulnerable to damage or interruption from circumstances beyond our control, including fire, natural disasters, systems failures, security breaches or intrusions (including theft of confidential data), and viruses. If we are unable to prevent physical and electronic break-ins, cyber-attacks and other information security breaches, we may suffer financial and reputational damage, be subject to litigation, or incur remediation costs or penalties because of the unauthorized disclosure of confidential information belonging to us or to our partners, customers, suppliers, or employees.

## Regulatory and Governmental Factors

*Government efforts to regulate the production and consumption of tobacco products could have a significant impact on the businesses of our customers, which would, in turn, affect our results of operations.*

Less than 5% of cigarettes manufactured worldwide are consumed in the United States. Nationally, the U.S. federal government and certain state and local governments have taken or proposed actions that may have the effect of reducing U.S. consumption of tobacco products and indirectly reducing demand for our products and services. These activities have included:

- restrictions on the use of tobacco products in public places and places of employment,
- legislation authorizing the U.S. Food and Drug Administration (the “FDA”) to regulate the manufacturing and marketing of all tobacco products,
- increases in the federal, state, and local excise taxes on cigarettes and other “deemed” tobacco products, and
- the policy of the U.S. government to link certain federal grants to the enforcement of state laws restricting the sale of tobacco products.

Numerous other legislative and regulatory anti-smoking measures have been proposed at the federal, state, and local levels.

Globally, a number of foreign governments and non-government organizations continue to take or propose steps to restrict or prohibit tobacco product advertising and promotion, to increase taxes on tobacco products, to indirectly limit the use of certain types of tobacco, and to discourage tobacco product consumption. A number of such measures, including plain packaging, are included in the Framework Convention on Tobacco Control (“FCTC”), which was negotiated and promoted globally under the auspices of the World Health Organization (“WHO”). We cannot predict the extent or speed at which the efforts of governments or non-governmental agencies to reduce tobacco consumption might affect the business of our primary customers. However, a significant decrease in worldwide tobacco consumption brought about by existing or future governmental laws and regulations would reduce demand for tobacco products and services and could have a material adverse effect on our results of operations.

*Government actions can have a significant effect on the sourcing of tobacco. If some of the current efforts are successful, we could have difficulty obtaining sufficient tobacco to meet our customers’ requirements, which could have an adverse effect on our performance and results of operations.*

Acting upon the advice of a working group established in 2008, the WHO, through the FCTC, issued policy options and recommendations to promote crop diversification initiatives and alternatives to growing leaf tobacco in countries whose economies depend upon tobacco production. If certain countries were to follow these policy options and recommendations and seek to eliminate or significantly reduce leaf tobacco production, we could encounter difficulty in sourcing leaf tobacco to fill customer requirements, which could have an adverse effect on our results of operations.

Certain recommendations by the WHO, through the FCTC, may cause shifts in customer usage of certain styles of tobacco. As seen in countries like Canada and Brazil and in the European Union, efforts have been taken to eliminate ingredients from the manufacturing process for tobacco products. Recently, the FCTC and the FDA have discussed formulating a nicotine strategy (limitations on the level of nicotine allowed in tobacco and tobacco smoke). Such decisions could cause a change in requirements for certain styles of tobacco in particular countries. Shifts in customer demand from one type of tobacco to another could create sourcing challenges as requirements move from one origin to another.

Trade proposals have included provisions that could effectively allow governments to regulate tobacco products differently than other products. These “carve outs” could negatively impact the industry and reduce requirements for leaf tobacco.

In addition, continued government and public emphasis on environmental issues, including climate change, conservation, and natural resource management, could result in new or more stringent forms of regulatory oversight of industry activities, which may lead to increased levels of expenditures for environmental controls, land use restrictions affecting us or our suppliers, and other conditions that could have a material adverse effect on our business, financial condition, and results of operations. For example, certain aspects of our business generate carbon emissions. Regulatory restrictions on greenhouse gas emissions have been proposed. These may include limitations on such emissions, taxes or emission allowance fees on such emissions, various restrictions on industrial operations, and other measures that could affect land-use decisions, the cost of agricultural production, and the cost and means of processing and transporting our products. These actions could adversely affect our business, financial condition, and results of operations.

*Because we conduct a significant portion of our operations internationally, political and economic uncertainties in certain countries could have an adverse effect on our performance and results of operations.*

Our international operations are subject to uncertainties and risks relating to the political stability of certain foreign governments, principally in developing countries and emerging markets, and also to the effects of changes in the trade policies and economic regulations of foreign governments. These uncertainties and risks, which include undeveloped or antiquated commercial law, the expropriation, indigenization, or nationalization of assets, and the authority to revoke or refuse to renew business licenses and work permits, may adversely impact our ability to effectively manage our operations in those countries. We have substantial capital investments in South America and Africa, and the performance of our operations in those regions can materially affect our earnings. If the political situation in any of the countries where we conduct business were to deteriorate significantly, our ability to recover assets located there could be impaired. To the extent that we do not replace any lost volumes of tobacco with tobacco from other sources, or we incur increased costs related to such replacement, our financial condition or results of operations, or both, would suffer.

In addition, the current administration has called for substantial changes to U.S. foreign trade policy, including the possibility of imposing greater restrictions on international trade and significant tariffs on goods imported into the United States. An escalation of protectionist trade measures by the United States or other countries, such as taxes, tariffs, increased customs duties or other measures, could have a materially adverse effect on our business, financial condition and results of operations. Due to broad uncertainty regarding the timing, content and extent of any regulatory changes in the United States or abroad, we cannot predict the impact, if any, that these changes could have to our business, financial condition and results of operations.

*Changes in tax laws in the countries where we do business may adversely affect our results of operations.*

Through our subsidiaries, we are subject to the tax laws of many jurisdictions. Changes in tax laws or the interpretation of tax laws can affect our earnings, as can the resolution of various pending and contested tax issues. In most jurisdictions, we regularly have audits and examinations by the designated tax authorities, and additional tax assessments are common. We believe that we comply with applicable tax laws in the jurisdictions where we operate, and we vigorously contest all significant tax assessments where we believe we are in compliance with the tax laws.

## **Financial Factors**

*Failure of our customers or suppliers to repay extensions of credit could materially impact our results of operations.*

We extend credit to both suppliers and customers. A significant bad debt provision related to amounts due could adversely affect our results of operations. In addition, crop advances to farmers are generally secured by the farmers' agreement to deliver green tobacco. In the event of crop failure, delivery failure, or permanent reductions in crop sizes, full recovery of advances may never be realized, or otherwise could be delayed until future crops are delivered. See Notes 1 and 14 to the consolidated financial statements in Item 8 for more information on these extensions of credit.

*Fluctuations in foreign currency exchange rates may affect our results of operations.*

We account for most of our tobacco operations using the U.S. dollar as the functional currency. The international tobacco trade generally is conducted in U.S. dollars, and we finance most of our tobacco operations in U.S. dollars. Although this generally limits foreign exchange risk to the economic risk that is related to leaf purchase and production costs, overhead, and income taxes in the source country, significant currency movements could materially impact our results of operations. Changes in exchange rates can make a particular crop more or less expensive in U.S. dollar terms. If a particular crop is viewed as expensive in U.S. dollar terms, it may be less attractive in the world market. This could negatively affect the profitability of that crop and our results of operations. In tobacco markets that are primarily domestic, such as Hungary, Poland, and the Philippines, the local currency is the functional currency. In addition, the local currency is the functional currency in other markets, such as Western Europe, where export sales have been denominated primarily in local currencies. In these markets, reported earnings are affected by the translation of the local currency into the U.S. dollar. See Item 7A, "Qualitative and Quantitative Disclosure About Market Risk" for additional discussion related to foreign currency exchange risk.

Our purchases of tobacco are generally made in local currency, and we also provide farmer advances that are denominated in the local currency. We account for currency remeasurement gains or losses on those advances as period costs, and they are usually accompanied by offsetting increases or decreases in the purchase cost of tobacco, which is priced in the local currency. The effect of differences in the cost of tobacco is generally not realized in our earnings until the tobacco is sold, which often occurs in a quarter or fiscal year subsequent to the recognition of the related remeasurement gains or losses. The difference in timing could affect our profitability in a given quarter or fiscal year.

We have used currency hedging strategies to reduce our foreign currency exchange rate risks in some markets. In addition, where we source tobacco in countries with illiquid or nonexistent forward foreign exchange markets, we often manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale and by minimizing our net investment in these countries. To the extent that we have net monetary assets or liabilities in local currency, and those balances are not hedged, we may have currency remeasurement gains or losses that will affect our results of operations.

*Changes in interest rates may affect our results of operations.*

We generally use both fixed and floating interest rate debt to finance our operations. Changes in market interest rates expose us to changes in cash flows for floating rate instruments and to changes in fair value for fixed rate instruments. We normally maintain a proportion of our debt in both variable and fixed interest rates to manage this exposure, and from time to time we may enter hedge agreements to swap the interest rates. In addition, our customers may pay market rates of interest for inventory purchased on order, which could mitigate a portion of the floating interest rate exposure on short-term borrowings. To the extent we are unable to match these interest rates, a decrease in interest rates could increase our net financing costs. We also periodically have large cash balances and may receive deposits from customers, both of which we use to fund seasonal purchases of tobacco, reducing our financing needs. Decreases in short-term interest rates could reduce the income we derive from those investments. Changes in interest rates also affect expense related to our defined benefit pension plan, as described below.

*Low investment performance by our defined benefit pension plan assets and changes in pension plan valuation assumptions may increase our pension expense and may require us to fund a larger portion of our pension obligations, thus diverting funds from other potential uses.*

We sponsor domestic defined benefit pension plans that cover certain eligible employees. Our results of operations may be positively or negatively affected by the amount of expense we record for these plans. U.S. generally accepted accounting principles (“GAAP”) require that we calculate expense for the plans using actuarial valuations. These valuations reflect assumptions about financial market and other economic conditions that may change based on changes in key economic indicators. The most significant year-end assumptions we used to estimate pension expense for fiscal year 2019 were the discount rate, the expected long-term rate of return on plan assets, and the mortality rates. In addition, we are required to make an annual measurement of plan assets and liabilities, which may result in a significant change to shareholders’ equity through a reduction or increase to the “Pension and other postretirement benefit plans” component of Accumulated Other Comprehensive Loss. At the end of fiscal year 2019, the projected benefit obligation of our qualified U.S. pension plan was \$233 million and plan assets were \$231 million. For a discussion regarding how our financial statements can be affected by pension plan valuation assumptions, see “Critical Accounting Estimates – Pension and Other Postretirement Benefit Plans” in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 and in Note 11 to the consolidated financial statements in Item 8. Although GAAP expense and pension funding contributions are not directly related, key economic factors that affect GAAP expense can also affect the amount of cash we are required to contribute to our pension plans under requirements of the Employee Retirement Income Security Act (“ERISA”). Failure to achieve expected returns on plan assets could also result in an increase to the amount of cash we would be required to contribute to our pension plans. In order to maintain or improve the funded status of our plans, we may also choose to contribute more cash to our plans than required by ERISA regulations.

None

## Item 2. Properties

We own the following significant properties (greater than 500,000 square feet):

<u>Location</u>	<u>Principal Use</u>	<u>Building Area</u> (Square Feet)
<b>Flue-Cured and Burley Leaf Tobacco Operations:</b>		
<b>North America:</b>		
<b>United States</b>		
Nash County, North Carolina .....	Factory and storages	1,323,000
<b>Other Regions:</b>		
<b>Brazil</b>		
Santa Cruz .....	Factory and storages	2,386,000
<b>Malawi</b>		
Lilongwe .....	Factory and storages	942,000
<b>Mozambique</b>		
Tete .....	Factory and storages	770,000
<b>Philippines</b>		
Agoo, La Union .....	Factory and storages	770,000
<b>Tanzania</b>		
Morogoro .....	Factory and storages	895,000
<b>Zimbabwe</b>		
Harare <sup>(1)</sup> .....	Factory and storages	1,445,000
<b>Other Tobacco Operations:</b>		
<b>United States</b>		
Lancaster, Pennsylvania .....	Factory and storages	793,000

(1) Owned by an unconsolidated subsidiary.

We lease headquarters office space of about 50,000 square feet at 9201 Forest Hill Avenue in Richmond, Virginia, which we believe is adequate for our current needs.

Our business involves, among other things, storing and processing green tobacco and storing processed tobacco. We operate processing facilities in major tobacco growing areas. In addition, we require tobacco storage facilities that are in close proximity to the processing facilities. We own most of the tobacco storage facilities, but we lease additional space as needs arise. We believe that the properties currently utilized in our tobacco operations are maintained in good operating condition and are suitable and adequate for our purposes at our current volumes.

In addition to our significant properties listed above, we own other processing facilities in the following countries: Germany, Guatemala, Italy, the Netherlands, Poland, and the United States. In addition, we have an ownership interest in a processing plant in Mexico and have access to processing facilities in other areas, such as India, the People's Republic of China, and South Africa. Socotab L.L.C., an oriental tobacco joint venture in which we own a noncontrolling interest, owns tobacco processing plants in Bulgaria, Macedonia, and Turkey.

Except for the Lancaster, Pennsylvania facility, the facilities described above are engaged primarily in processing tobaccos used by manufacturers in the production of cigarettes. The Lancaster facility, as well as facilities in Brazil, the Dominican Republic, Indonesia, and Paraguay, process tobaccos used in making cigar, pipe, and smokeless products, as well as components of certain "roll-your-own" products.

As discussed in Note 3 to the consolidated financial statements in Item 8, due to changes that have affected the Company's operations in Tanzania, an impairment charge was recorded during the third quarter of fiscal year 2019 to reduce the carrying values of the factory and storages in Morogoro, Tanzania to their estimated fair values.

### **Item 3. Legal Proceedings**

#### **Tanzania Fair Competition Commission Proceeding**

In June 2012, our Tanzanian subsidiary, Tanzania Leaf Tobacco Company Ltd. (“TLTC”), entered into a two crop-year supply agreement for unprocessed “green” tobacco with a newly-formed Tanzanian subsidiary of one of our major customers. The agreement involved green tobacco purchases from four of the approximately 400 grower cooperatives in Tanzania, which allowed the customer and its Tanzanian subsidiary on a small test basis to evaluate whether it would be a viable alternative for the customer to establish its own vertically integrated supply operations in that market. Prior to that time, the customer’s subsidiary did not exist, and it only purchased processed Tanzanian tobacco from tobacco dealers in specified amounts and only for certain grades and stalk positions. In contrast, the agreement with TLTC required the customer’s subsidiary to purchase green tobacco on a “run of crop” basis. “Run of crop” requires the purchase of all green tobacco produced on the tobacco plant, regardless of grade or stalk position. The agreement, therefore, enabled the customer’s subsidiary on a small test basis to evaluate the quality of green tobacco purchased on a “run of crop” basis and to assess how such tobacco would be suited to the customer's tobacco requirements. The customer unilaterally elected to establish its own vertically integrated supply operations in Tanzania after the expiration of the agreement, and its subsidiary began purchasing green tobacco directly from Tanzanian grower cooperatives during the second crop year thereafter.

Despite the pro-competitive object and effect of the agreement between TLTC and the customer’s subsidiary, in October 2016, the Tanzania Fair Competition Commission (“FCC”) notified TLTC and the customer’s subsidiary that it reviewed the agreement and provisionally concluded that it infringed Tanzania antitrust law by having the object and effect of preventing competition in the purchase of unprocessed green tobacco in the area in which the four grower cooperatives were located. The FCC also provisionally concluded that our U.S. subsidiary, Universal Leaf Tobacco Company, Inc. (“ULT”), and additional subsidiaries of the customer, were jointly and severally liable for the actions of TLTC and the customer’s Tanzanian subsidiary, respectively. TLTC and ULT submitted a written response contesting the FCC’s allegations, and on February 27, 2018, the FCC issued its decision to TLTC and ULT which confirmed its initial conclusion that the agreement infringed Tanzanian antitrust law. In its decision, the FCC concluded incorrectly that the parties to the agreement unfairly benefited in the amount of \$105 thousand. The FCC arbitrarily assessed a fine jointly against TLTC and ULT of approximately \$197 million and a fine jointly against the customer’s Tanzanian subsidiary and another subsidiary of the customer exceeding \$1 billion.

TLTC and ULT have worked closely with expert legal advisors and economists on this matter. Based on these engagements and consultations, we firmly believe the FCC’s allegations are frivolous and clearly without merit or support from the facts, law or economic analysis. We further believe the FCC’s proceedings were rife with irregularities and did not comply with applicable legal and regulatory procedures with respect to this matter, including failing to establish jurisdiction over ULT or to offer a legal justification for including ULT in the proceeding. To the contrary, we believe the facts, law and economic analysis clearly support the legality and pro-competitive nature of the agreement and support a proper conclusion that there was no infringement of Tanzania antitrust law, and the agreement had no negative impact on the Tanzania tobacco market. We further believe the FCC’s proposed fine is ludicrous, unwarranted and contrary to Tanzania law. TLTC and ULT immediately appealed the FCC findings to the Tanzania Fair Competition Tribunal, which immediately stayed the execution of any FCC fines. We are unable to predict how long the appeal process will take; however, we believe it could last several years. At this time, we believe that the likelihood of incurring any material liability in this matter is remote, and no amount has been recorded.

#### **Other Contingent Liabilities**

In addition, some of our subsidiaries are involved in other litigation or legal matters incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, we are vigorously defending the matters and do not currently expect that any of them will have a material adverse effect on our business or financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

#### **Item 4. Mine Safety Disclosures**

Not applicable.

## PART II

### Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

#### Common Equity

Our common stock is traded on the New York Stock Exchange (“NYSE”) under the symbol “UVV.” The following table sets forth the high and low sales prices per share of the common stock on the NYSE Composite Tape, based upon published financial sources, and the dividends declared on each share of common stock for the quarter indicated.

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
<b>Fiscal Year Ended March 31, 2019</b>				
Cash dividends declared .....	\$ 0.75	\$ 0.75	\$ 0.75	\$ 0.75
Market price range:				
High.....	68.25	71.60	76.98	60.67
Low .....	46.40	55.66	53.03	52.60
<b>Fiscal Year Ended March 31, 2018</b>				
Cash dividends declared .....	\$ 0.54	\$ 0.54	\$ 0.55	\$ 0.55
Market price range:				
High.....	75.70	65.90	60.45	53.85
Low .....	63.15	55.00	52.05	45.95

Our current dividend policy anticipates the payment of quarterly dividends in the future. However, the declaration and payment of dividends to holders of common stock is at the discretion of the Board of Directors and will be dependent upon our future earnings, financial condition, and capital requirements. Under certain of our credit facilities, we must meet financial covenants relating to minimum tangible net worth and maximum levels of debt. If we were not in compliance with them, these financial covenants could restrict our ability to pay dividends. We were in compliance with all such covenants at March 31, 2019. At May 20, 2019, there were 1,034 holders of record of our common stock. See Notes 6 and 12 to the consolidated financial statements in Item 8 for more information on debt covenants and equity securities.

#### Purchases of Equity Securities

As indicated in the following table, we did not repurchase shares of our common stock during the three-month period ended March 31, 2019.

Period <sup>(1)</sup>	<u>Common Stock</u>			
	<u>Total Number of Shares Repurchased</u>	<u>Average Price Paid Per Share <sup>(2)</sup></u>	<u>Total Number of Shares Repurchased as Part of Publicly Announced Plans or Programs <sup>(3)</sup></u>	<u>Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs <sup>(3)</sup></u>
January 1-31, 2019.....	—	\$ —	—	\$ 89,586,294
February 1-28, 2019.....	—	—	—	89,586,294
March 1-31, 2019.....	—	—	—	89,586,294
Total .....	—	\$ —	—	\$ 89,586,294

(1) Repurchases are based on the date the shares were traded. This presentation differs from the consolidated statement of cash flows, where the cost of share repurchases is based on the date the transactions were settled.

(2) Amounts listed for average price paid per share include broker commissions paid in the transactions.

(3) A stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 7, 2017. This stock repurchase plan authorized the purchase of up to \$100 million in common and/or preferred stock in open market or privately negotiated transactions, subject to market conditions and other factors. This stock repurchase program will expire on the earlier of November 15, 2019, or when we have exhausted the funds authorized for the program.

## Item 6. Selected Financial Data

(1) We evaluate the performance of our segments based on segment operating income, which is operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in the pretax earnings of unconsolidated affiliates. Segment operating income is a non-GAAP measure. See Note 15 to the consolidated financial statements in Item 8 of this Annual Report for information on reportable operating segments.

(2) We hold less than a 100% financial interest in certain consolidated subsidiaries, and a portion of net income is attributable to the noncontrolling interests in those subsidiaries.

(3) In December 2016 and January 2017, all outstanding shares of the Company's Series B 6.75% Convertible Perpetual Preferred Stock were converted for common stock or for cash, and none were outstanding during fiscal year 2019. See Note 12 to the consolidated financial statements in Item 8 of this Annual Report.

Significant items included in the operating results in the above table are as follows:

- Fiscal Year 2019 – \$20.3 million of restructuring and impairment costs, primarily related to our operations in Tanzania. The restructuring and impairment costs included employee termination benefits, as well as impairment charges related to certain property, plant, equipment, and goodwill. The restructuring and impairment costs reduced net income by \$16.5 million, or \$0.64 per diluted share. In addition, we benefited from a \$7.8 million reduction in income tax expense for the reversal of amounts previously recorded for dividend withholding taxes on distributed and undistributed retained earnings of a foreign subsidiary following the resolution of uncertainties with the local country taxing authorities with respect to the inclusion of the tax under a tax holiday applicable to the subsidiary. The reduction of income tax expense increased diluted earnings per share by \$0.30. On a combined basis, the net effect of these items decreased net income by \$8.7 million, or \$0.34 per diluted share.

- Fiscal Year 2018 – a \$4.5 million reduction of income tax expense from the enactment of the Tax Cuts and Jobs Act in December 2017. The reduction in income tax expense increased diluted earnings per share by \$0.18.
- Fiscal Year 2017 – \$4.4 million of restructuring and impairment costs, primarily related to our decision to close our tobacco processing facility in Hungary. We are now processing tobaccos sourced from Hungary in our facilities in Italy. The restructuring and impairment costs reduced net income by \$2.8 million, or \$0.10 per diluted share. In addition, all 218,490 outstanding shares of our Series B 6.75% Convertible Perpetual Preferred Stock were converted during the third and fourth quarters. Of the total shares converted, 107,418 shares were converted for cash, resulting in a reduction of retained earnings of approximately \$74.4 million for the excess of the conversion cost over the carrying value of the shares. The reduction in retained earnings resulted in a corresponding one-time reduction of earnings available to common shareholders for purposes of determining the amounts reported for basic and diluted earnings per share for the year. The reduction in earnings available to common shareholders decreased diluted earnings per share by \$2.99.
- Fiscal Year 2016 – a \$3.4 million pretax gain arising from the acquisition of a joint venture partner's 50% ownership interest in a tobacco processing entity in Guatemala. The transaction increased our ownership interest in the entity to 100%, requiring us to consolidate the financial statements of the entity and to remeasure our original 50% ownership interest to fair value, resulting in the gain. In addition, we recorded restructuring and impairment costs of \$2.4 million related to a decision to significantly scale back our operations in Zambia. The net effect of the gain and the restructuring and impairment costs increased pretax income by \$1.0 million and net income by \$0.7 million, or \$0.02 per diluted share.
- Fiscal Year 2015 – a \$12.7 million benefit to pretax earnings from the reversal of a valuation allowance on the remaining unused balance of the excise tax credits realized from the favorable outcome of litigation by our subsidiary in Brazil in fiscal year 2014. In addition, we recorded a consolidated income tax benefit of \$8.0 million arising from the ability of our subsidiary, Deltafina S.p.A. ("Deltafina"), to pay a significant portion of the European Commission fine and related interest charges settled during the first quarter following the unsuccessful appeal of the case related to tobacco buying practices in Italy. The effect of those items was partially offset by restructuring costs of \$4.9 million, primarily related to downsizing certain functions at our operations in Brazil and the decision to suspend our operations in Argentina. On a combined basis, the net effect of these items increased pretax income by \$7.8 million and net income by \$13.1 million, or \$0.46 per diluted share.

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

*The following discussion and analysis of financial condition and results of operations is provided to enhance the understanding of, and should be read in conjunction with, Part I, Item 1, "Business" and Item 8, "Financial Statements and Supplementary Data." For information on risks and uncertainties related to our business that may make past performance not indicative of future results, or cause actual results to differ materially from any forward-looking statements, see "General," and Part I, Item 1A, "Risk Factors."*

### OVERVIEW

We are the leading global leaf tobacco supplier. We derive most of our revenues from sales of processed tobacco to manufacturers of tobacco products throughout the world and from fees and commissions for specific services. We hold a strategic position in the world leaf markets where we work closely with both our customers and farmers to ensure that we deliver a compliant product that meets our customers' needs while promoting a strong supplier base. We adapt to meet changes in customer requirements as well as broader changes in the leaf markets, while continuing to provide the stability of supply and high level of service that distinguishes us in the marketplace. We believe that we have successfully met the needs of both our customers and suppliers while adapting to changes in leaf markets. Over the last three fiscal years, we have generated almost \$500 million in net cash flow from operations, invested over \$100 million in our businesses, settled the mandatory conversion of our Series B 6.75% Convertible Perpetual Preferred Stock for about \$178 million in cash, and returned over \$200 million to our shareholders through a combination of dividends and share repurchases.

We delivered solid results in fiscal year 2017 despite supply headwinds, most notably from the weather-reduced crop sizes in Brazil and ongoing challenging market conditions in Tanzania. Although we had anticipated ending fiscal year 2017 with slightly lower volumes, earlier shipment timing as well as attractive green prices in some origins resulting in some additional purchases by our customers boosted shipments later in our fiscal year, allowing us to improve our market share and achieve lamina sales volumes that were slightly above those of fiscal year 2016. Our segment operating income for the 2017 fiscal year was also improved, primarily attributable to a reduction in selling, general, and administrative costs and earlier receipt of distributions from unconsolidated subsidiaries.

We were pleased with our good results for fiscal year 2018 as net income remained steady at about \$106 million, despite modestly lower lamina volumes. We also continued to grow our market share and expand the services we provide our customers, including gaining new multi-year processing commitments in Brazil. In addition, we rewarded our shareholders by increasing our dividend rate and returning almost \$55 million through dividends and repurchasing about \$22 million, or 2%, of our outstanding common stock. Fiscal year 2018 was not without its challenges as fewer carryover crop sales and shipment delays in North America, African burley crop sizes that were down more than 40% over the prior year, and a \$10 million reduction in income from the timing of receipt of distributions of unconsolidated subsidiaries compared to fiscal year 2017, negatively impacted our results. However, we did benefit from a return to normal crop volumes in Brazil, and the resultant gains from higher volumes and lower factory unit costs there.

Fiscal year 2019 was another strong year for Universal. We increased our tobacco volumes handled, earned additional business with our customers by expanding the services we provide, and have continued to improve our market share. During fiscal year 2019, we benefited from the recovery of African burley production, strong carryover volumes in the first half of the year, and robust demand for wrapper tobacco. Our revenues were up about 10% on those higher volumes, compared to fiscal year 2018. Our gross margin percentage remained flat, even though our product mix was less favorable as we handled a higher percentage of by-products this year. In addition, results in our North America segment were negatively impacted by weather damage to tobacco crops in the United States, which reduced yields and third party processing volumes.

We remain committed to maintaining our position as the leading global leaf supplier and believe that opportunities exist to expand our business to help mitigate the impact of consumption declines. In fiscal year 2019, we increased leaf purchasing, processing, and grower support services we provide in the Philippines through a new leaf supply arrangement with one of our major customers, who had previously purchased and processed its own tobacco there. This arrangement not only increases our business footprint in that origin, but we believe strengthens and improves the efficiency of the supply chain there by providing procurement synergies and economies of scale.

In keeping with our capital allocation strategy announced in fiscal year 2018, we continue to explore growth opportunities outside of leaf tobacco in adjacent industries and markets that we believe will utilize our assets and capabilities and deliver value to our shareholders. During fiscal year 2019, we hired a dedicated business development officer, developed an investment pipeline, and have been actively engaged in assessing numerous private and public targeted opportunities in a variety of agribusiness arenas around the world. Our approach remains the same, and we are progressing in a thoughtful and prudent manner to ensure that we make investments that are financially sound, fit well with our organization, and will deliver value to our shareholders.

As we move into fiscal year 2020, we are forecasting larger flue-cured and burley tobacco global crop production than those grown in our fiscal year 2019, and believe that both flue-cured and burley tobacco may be in slight oversupply positions compared with anticipated market demand. It is still early in the fiscal year 2020 crop cycle, but we are expecting lower carryover crop volumes and reduced North American volumes.

We have entered fiscal year 2020 with a strong balance sheet in part from the cash flow generated in fiscal year 2019. We are well positioned financially to fund upcoming working capital needs and to take advantage of investment opportunities. We also remain committed to our industry leadership and continuing to deliver value to our shareholders as evidenced by the announcement of our 49<sup>th</sup> annual dividend increase on May 22, 2019.

## RESULTS OF OPERATIONS

*Amounts described as net income and earnings per diluted share in the following discussion are attributable to Universal Corporation and exclude earnings related to non-controlling interests in subsidiaries. The total for segment operating income referred to in the discussion below is a non-GAAP financial measure. This measure is not a financial measure calculated in accordance with GAAP and should not be considered as a substitute for net income, operating income, cash flows from operating activities or any other operating performance measure calculated in accordance with GAAP, and it may not be comparable to similarly titled measures reported by other companies. We have provided a reconciliation of the total for segment operating income to consolidated operating income in Note 15. "Operating Segments" to the consolidated financial statements in Item 8. We evaluate our segment performance excluding certain significant charges or credits. We believe this measure, which excludes these items that we believe are not indicative of our core operating results, provides investors with important information that is useful in understanding our business results and trends.*

### **Fiscal Year Ended March 31, 2019, Compared to the Fiscal Year Ended March 31, 2018**

Net income for the fiscal year ended March 31, 2019, was \$104.1 million, or \$4.11 per diluted share, compared with \$105.7 million, or \$4.14 per diluted share, for the prior fiscal year. Those results included certain non-recurring items, detailed in Other Items below, which decreased diluted earnings per share by \$0.34 and increased diluted earnings per share by \$0.18 for the fiscal years ended March 31, 2019 and March 31, 2018, respectively. Excluding those non-recurring items, net income and earnings per share increased by \$11.7 million and \$0.49, respectively, for fiscal year 2019 compared to fiscal year 2018. Operating income of \$161.2 million for the fiscal year ended March 31, 2019, which included restructuring and impairment charges of \$20.3 million detailed in Other Items below, decreased by \$9.7 million, compared to operating income of \$170.8 million for the fiscal year ended March 31, 2018. Segment operating income was \$186.8 million for the fiscal year ended March 31, 2019, an increase of \$6.8 million, compared to segment operating income of \$180.0 million for the fiscal year ended March 31, 2018. Results reflected earnings improvements in the Other Regions and Other Tobacco Operations segments and flat results for the North America segment for fiscal year 2019. Consolidated revenues increased by \$193.2 million to \$2.2 billion for the fiscal year 2019, compared to the prior fiscal year, primarily due to higher sales and processing volumes.

#### *Flue-cured and Burley Leaf Tobacco Operations*

##### *Other Regions*

Operating income for the Other Regions segment increased by \$4.8 million to \$151.5 million for the fiscal year ended March 31, 2019, compared with fiscal year 2018, on stronger sales and processing volumes partially offset by higher selling, general and administrative costs. In fiscal year 2019, volumes increased in Africa, mainly from higher burley production volumes and carryover crop sales. In South America, volumes also increased, but the product mix was less favorable. Results for Asia reflected lower sales and trading volumes for fiscal year 2019, while Europe saw improvements in processing volumes. Selling, general, and administrative costs were higher for fiscal year 2019 compared to fiscal year 2018, primarily from negative foreign currency remeasurement and exchange variances, higher compensation and incentive accruals, and higher customer claim costs, partially offset by higher net recoveries on advances to suppliers. Revenues for the Other Regions segment of \$1.6 billion for fiscal year 2019, were up \$87.6 million compared to fiscal year 2018, on higher volumes and processing revenues, offset in part by lower sales prices and a less favorable product mix.

##### *North America*

Operating income for the North America segment of \$23.1 million for year ended March 31, 2019, was flat, compared to the prior fiscal year. Results for fiscal year 2019 reflected higher carryover crop sales volumes on shipments delayed from the fourth quarter of fiscal year 2018 due to reduced transportation availability in the United States, offset by lower U.S. current crop sales and processing volumes largely due to weather-affected crops. Results for fiscal year 2019 also included higher shipment volumes from Guatemala and Mexico, compared to fiscal year 2018. Selling, general, and administrative costs for the North America segment for the fiscal year ended March 31, 2019, were modestly lower and declined as a percentage of sales, compared to the prior fiscal year. Revenues for this segment increased by \$73.9 million to \$382.6 million for the fiscal year ended March 31, 2019, compared to the fiscal year ended March 31, 2018, on the higher sales volumes, partly offset by lower processing revenues.

### *Other Tobacco Operations*

The Other Tobacco Operations segment operating income increased by \$2.1 million to \$12.2 million for the fiscal year ended March 31, 2019, compared with the prior fiscal year. Results for the dark tobacco operations reflected higher sales of wrapper tobacco and stronger processing and other revenues for fiscal year 2019, compared to fiscal year 2018. Those improvements were partly offset by declines in the oriental joint venture. Lower sales volumes in the fiscal year 2019 and the absence of gain on the sale of idle assets in the prior fiscal year for the oriental joint venture were offset in part by favorable currency remeasurement variances, compared to fiscal year 2018. Selling, general, and administrative costs for the segment were up for the fiscal year ended March 31, 2019, compared with the prior fiscal year, as higher value-added tax charges and higher compensation and incentive accruals were only partly offset by favorable currency remeasurement comparisons. Revenues for the segment increased by \$31.7 million to \$274.8 million for the fiscal year ended March 31, 2019, compared to the prior fiscal year, largely as a result of the higher wrapper tobacco sales volumes and increased processing and other revenues, partly offset by lower oriental tobacco volumes shipped into the United States.

### *Other Items*

Cost of goods sold increased by 10% to \$1.8 billion for the fiscal year ended March 31, 2019, compared with the prior fiscal year, and consistent with similar percentage changes in revenues. Selling, general, and administrative costs for fiscal year 2019, increased by \$24.0 million to \$225.1 million, mainly driven by higher compensation and incentive accruals, higher customer claims and allowance costs, negative foreign currency remeasurement and exchange variances, and higher value-added tax charges, partly offset by higher net recoveries on advances to suppliers, compared with fiscal year 2018. Selling, general, and administrative costs were flat as a percentage of sales for the fiscal year ended March 31, 2019, compared to the fiscal year ended March 31, 2018.

For the fiscal year ended March 31, 2019, the Company's consolidated effective income tax rate on pretax earnings was 27%. Income tax expense for fiscal year 2019 included a \$7.8 million (\$0.30 per diluted share) benefit from reversing a portion of a liability previously recorded for dividend withholding taxes on the cumulative retained earnings of a foreign subsidiary. Without the dividend withholding tax reversal, the consolidated effective income tax rate for fiscal year 2019 would have been 33%. The effective tax rate included the benefit of various tax planning opportunities, as well as the effects of exchange rate changes on local earnings and taxes of foreign subsidiaries. For the fiscal year ended March 31, 2018, the Company's consolidated effective income tax rate was 30%. Income tax expense for fiscal year 2018 included a one-time adjustment amounting to a reduction of \$4.5 million (\$0.18 per diluted share) for the fiscal year ended March 31, 2018, from the enactment of major changes to U.S. corporate income tax law in December 2017. Excluding those items, the effective tax rate for fiscal year 2018, would have been 33%.

Results for the fiscal year ended March 31, 2019, included restructuring and impairment charges of \$20.3 million (\$0.64 per diluted share), primarily recorded to reflect the cost of workforce reductions and impairment in the carrying value of property, plant, and equipment assets as a result of changes in the Company's business in Tanzania. For more details, see Note 5 to the consolidated financial statements in Item 8 of this Annual Report.

### **Fiscal Year Ended March 31, 2018, Compared to the Fiscal Year Ended March 31, 2017**

Net income for the fiscal year ended March 31, 2018, was \$105.7 million, or \$4.14 per diluted share, compared with \$106.3 million, or \$0.88 per diluted share for the fiscal year ended March 31, 2017. The fiscal year 2017 results included a one-time reduction of earnings available to common shareholders of \$74.4 million, or \$2.99 per diluted share, from the conversion for cash of the remaining outstanding shares of our Series B 6.75% Convertible Perpetual Preferred Stock under the mandatory conversion in January 2017. That reduction, the effect of a reduction in income tax expense from the enactment of the Tax Cuts and Jobs Act in December 2017, and certain other non-recurring items are detailed in Other Items below. Excluding those items, diluted earnings per share for fiscal year 2018 of \$3.96 decreased by \$0.01 compared to the same period of fiscal year 2017. Operating income of \$171.5 million for the year ended March 31, 2018, decreased by \$6.9 million compared to the year ended March 31, 2017. Segment operating income was \$180.6 million for the year ended March 31, 2018, a decrease of \$7.9 million, compared to the year ended March 31, 2017, as improved results in our Other Regions and Other Tobacco Operations segments were offset by declines in our North America segment. Revenues of \$2.0 billion for fiscal year 2018 were down only 1.8% compared to fiscal year 2017, as lower volumes, primarily in Africa, were largely offset by higher sales prices and processing revenues.

## *Flue-cured and Burley Leaf Tobacco Operations*

### *Other Regions*

Operating income for the Other Regions segment improved by \$3.9 million to \$147.3 million for the fiscal year ended March 31, 2018, compared to the fiscal year ended March 31, 2017. The improvement was driven by lower selling, general, and administrative expenses and higher processing revenues, largely offset by lower sales volumes and other revenues from the receipt of distributions from unconsolidated affiliates. In South America, total lamina sales volumes were up for the fiscal year ended March 31, 2018, on higher current crop sales partly offset by reduced carryover crop sales. The higher current year crop volumes also increased processing revenues and improved margins from reduced factory unit costs there. Results for the Africa region for the fiscal year ended March 31, 2018, compared to the fiscal year ended March 31, 2017, were down due to lower African burley production levels in fiscal year 2018. Earnings improved for the Asia region primarily on stronger sales and for the Europe region on stronger sales and favorable exchange rates. Selling, general, and administrative costs for the segment were lower for fiscal year 2018, mostly from net foreign currency remeasurement gains compared with losses in fiscal year 2017, partially offset by an unfavorable comparison due to the reversal of value-added tax reserves in the second quarter of fiscal year 2017. Revenues for the Other Regions segment for the fiscal year ended March 31, 2018, were up \$59.2 million to \$1.5 billion compared to the fiscal year ended March 31, 2017, as higher sales prices and processing revenues as well as a better product mix offset lower sales volumes and other revenues from the receipt of distributions from unconsolidated affiliates.

### *North America*

North America segment operating income of \$23.2 million for the fiscal year ended March 31, 2018, was down by \$11.9 million, compared with fiscal year ended March 31, 2017. The decline was driven by lower sales volumes. In the United States, volumes were down primarily due to large prior crop carryover sales in fiscal year 2017 and some delayed customer shipments in the quarter ended March 31, 2018, due to reduced transportation availability, while results for Guatemala and Mexico were affected by lower volumes and less favorable margins. Selling, general and administrative costs were lower compared with fiscal year 2017, on reduced compensation costs and lower customer claims. Segment revenues were down by \$107.7 million to \$308.7 million for the fiscal year ended March 31, 2018, compared with the fiscal year ended March 31, 2017, on the lower volumes.

### *Other Tobacco Operations*

The Other Tobacco Operations segment operating income increased by \$0.1 million to \$10.1 million for the year ended March 31, 2018, compared with the year ended March 31, 2017. For fiscal year 2018, earnings were lower for the dark tobacco operations, compared to fiscal year 2017, mostly driven by lower sales in Indonesia on the lack of wrapper tobacco availability from the weather damaged crop. Indonesian wrapper volumes and quality recovered in the subsequent crop, which was available for sale in fiscal year 2019. Earnings for the oriental joint venture increased for the fiscal year ended March 31, 2018, largely on higher sales volumes. Results for the joint venture for fiscal year 2018 also included gains on the sale of idle assets offset by higher currency remeasurement losses from the devaluation of the Turkish lira. Operating results for the Special Services group were up slightly for the fiscal year ended March 31, 2018, compared with the fiscal year ended March 31, 2017. Selling, general, and administrative costs for the segment were up modestly for fiscal year 2018 compared to fiscal year 2017 on higher currency remeasurement losses. Revenues for the Other Tobacco Operations segment increased by \$11.3 million to \$243.1 million for the year ended March 31, 2018, compared to fiscal year 2017, mainly on higher sales prices in our dark tobacco operations.

### *Other Items*

Cost of goods sold declined by about 1% to \$1.7 billion for the fiscal year ended March 31, 2018, compared with fiscal year 2017. The decrease was in line with similar percentage decline in revenues. Selling, general, and administrative costs decreased by \$11.5 million to \$200.5 million for the year ended March 31, 2018, compared to the year ended March 31, 2017. The decrease in fiscal year 2018 was largely on net foreign currency remeasurement gains compared with losses in fiscal year 2017, mainly in Africa, partly offset by an unfavorable comparison due to the reversal of value-added tax reserves in the second quarter of fiscal year 2017.

The consolidated effective income tax rate for the year ended March 31, 2018, was approximately 30%. The rate included the effect of the changes in U.S. corporate income tax law under the Tax Cuts and Jobs Act of 2017 that were recorded under the SEC's "provisional" classification upon enactment of the new law in the third fiscal quarter ended December 31, 2017, as well as adjustments made to the "provisional" accounting in the quarter ended March 31, 2018, due to the collection and analysis of additional information for certain foreign subsidiaries, as well as additional clarifying guidance issued with respect to the new law. The effect of the new law mainly represents changes to deferred tax assets and liabilities, as well as the reduction of the U.S. tax liability on undistributed foreign earnings. As a result of the adjustments to the earlier provisional accounting, our earnings for the year ended March 31, 2018, included a \$4.5 million (\$0.18 per share) net reduction of income tax expense from the new law after those adjustments. The consolidated effective income tax rate for the fiscal year ended March 31, 2017, was approximately 34%. Income taxes for that period were lower than the 35% federal statutory rate at that time, due to a combination of lower net effective tax rates on income from certain foreign subsidiaries, and effects of changes in local currency exchange rates on deferred income tax balances. For more details, see Note 5 to the consolidated financial statements in Item 8 of this Annual Report.

In December 2016, 111,072 shares of the Series B 6.75% Convertible Perpetual Preferred Stock were converted into approximately 2.5 million shares of the Company's common stock. In January 2017, the Company completed a mandatory cash conversion of the remaining 107,418 outstanding shares of the preferred stock in accordance with the original terms of the preferred shares. Although the conversions of the preferred stock did not impact the Company's net income, the cash conversions in January 2017 resulted in a one-time reduction of retained earnings of approximately \$74.4 million during the fourth quarter ended March 31, 2017, and a corresponding one-time reduction of earnings available to common shareholders for the fiscal year ending March 31, 2017 for purposes of determining the amounts reported for basic and diluted earnings per share. The effect of the conversions on diluted earnings per share for the fiscal year ended March 31, 2017, was (\$2.99).

Results for the year ended March 31, 2017, included restructuring and impairment costs of \$4.4 million (\$0.10 per diluted share).

### **Accounting Pronouncements**

See "Accounting Pronouncements" in Note 1 to the consolidated financial statements in Item 8 of this Annual Report for a discussion of recent accounting pronouncements issued by the Financial Accounting Standards Board ("FASB") that will become effective and be adopted by the Company in future reporting periods.

## LIQUIDITY AND CAPITAL RESOURCES

### Overview

Our working capital requirements during the first three quarters of fiscal year 2019 were higher than those in fiscal year 2018 mainly due to the recovery of burley production volumes in Africa and higher dark tobacco wrapper inventories. However, in the quarter ended March 31, 2019, working capital requirements declined significantly as cash balances increased and inventory balances decreased due to strong shipments compared to the quarter ended March 31, 2018, when some shipments were delayed. We ended fiscal year 2019 with lower working capital usage for the year than in fiscal year 2018. In fiscal year 2019, we also generated \$164.5 million in cash flows from our operating activities, and our liquidity was sufficient to meet our needs. We continued our conservative financial policies, maintained our discipline on using our free cash flow, and returned funds to shareholders.

Our liquidity and capital resource requirements are predominately short-term in nature and primarily relate to working capital for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements, although crop size, prices paid to farmers, shipment and delivery timing, and currency fluctuations affect requirements each year. Peak working capital requirements are generally reached during the first and second fiscal quarters. Each geographic area follows a cycle of buying, processing, and shipping tobacco, and in many regions we also provide agricultural materials to farmers during the growing season. The timing of the elements of each cycle is influenced by such factors as local weather conditions and individual customer shipping requirements, which may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a portion of our total debt as long-term to reduce liquidity risk. We also periodically have large cash balances that we utilize to meet our working capital requirements.

We believe that our financial resources are adequate to support our capital needs for at least the next twelve months. Our seasonal borrowing requirements primarily relate to purchasing crops in South America and Africa and can increase from March to September by more than \$300 million. The funding required can vary significantly depending upon such factors as crop sizes, the price of leaf, the relative strength of the U.S. dollar, and the timing of shipments and customer payments. We deal with this uncertainty by maintaining substantial credit lines and cash balances. In addition to our operating requirements for working capital, we expect to spend around \$30 to \$40 million during fiscal year 2020 for capital expenditures to maintain our facilities and invest in opportunities to grow and improve our businesses. We also expect to provide about \$2 million in funding to our pension plans. We have no long-term debt maturing until fiscal year 2024.

### Cash Flow

Our operations generated about \$164.5 million in operating cash flows in fiscal year 2019. That amount was about \$83.3 million higher than the \$81.2 million we generated in fiscal year 2018, largely due to lower working capital requirements in fiscal year 2019. During the fiscal year ended March 31, 2019, we spent \$38.8 million on capital projects and returned \$71.3 million to shareholders in the form of dividends and share repurchases. At March 31, 2019, cash balances totaled \$297.6 million.

### Working Capital

Working capital at March 31, 2019, was about \$1.3 billion, flat with last fiscal year's level. Tobacco inventories of \$629.6 million at March 31, 2019, were down \$49.8 million compared to inventory levels at the end of the prior fiscal year, largely on lower North American burley tobacco purchases this fiscal year and delayed North American shipments in fiscal year 2018. We usually finance inventory with a mix of cash, notes payable, and customer deposits, depending on our borrowing capabilities, interest rates, and exchange rates, as well as those of our customers. We generally do not purchase material quantities of tobacco on a speculative basis. However, when we contract directly with farmers, we are obligated to buy all stalk positions, which may contain less marketable leaf styles. Our uncommitted tobacco inventories increased by approximately \$20.9 million to \$128.0 million, or about 20% of tobacco inventory, at March 31, 2019. Uncommitted inventories at March 31, 2018, were \$107.2 million, which represented 16% of tobacco inventory. The level of these uncommitted inventories is influenced by timing of farmer deliveries of new crops, as well as the receipt of customer orders.

## Capital Allocation

Our capital allocation strategy focuses on four strategic priorities:

- Strengthening and investing for growth in our leaf tobacco business;
- Increasing our strong dividend;
- Exploring growth opportunities in adjacent industries and markets that utilize our assets and capabilities; and
- Returning excess capital through share repurchases.

Our mission is to remain the leading global leaf tobacco supplier. By continuing to make disciplined investments within our leaf business and taking advantage of growth opportunities in tobacco as well as in adjacent industries and markets that utilize our assets and capabilities. Through these actions, we believe that will be able to deliver enhanced value for all shareholders through earnings growth and the generation of free cash flow despite operating in a mature industry.

As we look ahead, we will continually evaluate opportunities to return capital to shareholders on an ongoing basis. At the same time, we remain committed to maintaining our investment grade credit rating and extending our 49-year history of dividend increases.

### *Share Activity*

Our Board of Directors approved our current share repurchase program in November 2017. The program expires in November 2019 and authorizes the purchase of up to \$100 million of our common stock. Under the current authorization, we may purchase shares from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. Repurchases of shares under the repurchase program may vary based on management discretion, as well as changes in cash flow generation and availability. During fiscal year 2019, we purchased 30,777 shares of common stock at an aggregate cost of \$1.4 million (average price per share of \$46.87). At March 31, 2019, our available authorization under our current share repurchase program was approximately \$90 million, and approximately 25.0 million common shares were outstanding.

### *Capital Spending*

Our capital expenditures are generally limited to those that add value, replace or maintain equipment, increase efficiency, or position us for future growth. In deciding where to invest capital resources, we look for opportunities where we believe we can earn an adequate return, leverage our assets and expertise, and enhance our farmer base. During fiscal years 2019 and 2018, we invested \$38.8 million and \$34.0 million, respectively, in our property, plant, and equipment. Depreciation expense was approximately \$37.1 million and \$34.8 million, respectively, in fiscal years 2019 and 2018. Generally, our capital spending on maintenance projects is at a level below depreciation expense in order to maintain strong cash flow. In addition, from time to time, we undertake projects that require capital expenditures when we identify opportunities to improve efficiencies, add value for our customers, and position ourselves for future growth. We currently plan to spend approximately \$30 to \$40 million in fiscal year 2020 on capital projects for maintenance of our facilities and other investments to grow and improve our businesses. We expect that about 25% of those capital expenditures will be for non-maintenance investments in our businesses.

## Outstanding Debt and Other Financing Arrangements

We consider the sum of notes payable and overdrafts, long-term debt (including any current portion), and customer advances and deposits, less cash, cash equivalents, and short-term investments on our balance sheet to be our net debt. We also consider our net debt plus shareholders' equity to be our net capitalization. Net debt decreased by \$40.8 million to \$146.6 million during the fiscal year ended March 31, 2019. The decrease primarily reflects higher cash balances. Net debt as a percentage of net capitalization was approximately 10% at March 31, 2019, down from 12% at March 31, 2018.

On December 20, 2018, we entered into a new bank credit agreement that replaced our existing bank credit agreement dated December 30, 2014. The terms of the new agreement are substantially similar to the terms of the prior agreement, and like the prior agreement, the new agreement established a five-year committed revolving credit facility of \$430 million, a funded \$150 million five-year term loan, and a funded \$220 million seven-year term loan. The new revolving credit facility replaced a \$430 million revolving credit facility that would have matured in December 2019 and a \$150 million five-year term loan and a \$220 million seven-year term loan that would have matured in December 2019 and December 2021, respectively. The financial covenants under the new revolving credit facility are substantially similar to those of the previous facility and require us to maintain certain levels of tangible net worth and leverage. Under applicable accounting guidance, a significant portion of the replacement of the term loans was accounted for as a debt modification rather than a debt extinguishment.

As of March 31, 2019, we had \$430 million available under a committed revolving credit facility that will mature in December 2023, and we, together with our consolidated affiliates, had approximately \$253 million in uncommitted lines of credit, of which approximately \$198 million were unused and available to support seasonal working capital needs. The financial covenants under our committed revolving credit facility require us to maintain certain levels of tangible net worth and observe restrictions on debt levels. As of March 31, 2019, we were in compliance with all covenants of our debt agreements. We also have an active, undenominated universal shelf registration filed with the SEC in November 2017 that provides for future issuance of additional debt or equity securities. We have no long-term debt maturing in fiscal year 2020.

## Derivatives

From time to time, we use interest rate swap agreements to manage our exposure to changes in interest rates. In February 2019, we entered into interest rate swap agreements that convert the variable benchmark LIBOR rate on the new term loans entered into in December 2018 to a fixed rate. With the swap agreements in place, the effective interest rates on the \$150 million five-year term loan and the \$220 million seven-year term loan were 3.94% and 4.26%, respectively, as of March 31, 2019. These agreements were entered into to eliminate the variability of cash flows in the interest payments on our variable rate five- and seven-year term loans and are accounted for as cash flow hedges. Under the swap agreements, we receive variable rate interest and pay fixed rate interest. At March 31, 2019, the fair value of our open interest rate hedge swaps was a net liability of approximately \$6 million. Upon issuance of the new interest rate swap agreements in February 2019, we terminated approximately \$370 million notional amount of outstanding swap agreements. The fair value of these terminated swap agreements was approximately \$5 million.

We also enter forward contracts from time to time to hedge certain foreign currency exposures, primarily related to forecast purchases of tobacco and related processing costs in Brazil, as well as our net monetary asset exposure in local currency there. We generally account for our hedges of forecast tobacco purchases as cash flow hedges. At March 31, 2019, the fair value of those open contracts was an immaterial net asset. We also had other forward contracts outstanding that were not designated as hedges, and the fair value of those contracts was an immaterial net liability at March 31, 2019. For additional information, see Note 9 to the consolidated financial statements in Item 8.

## Pension Funding

Funds supporting our ERISA-regulated U.S. defined benefit pension plan increased by \$16 million during fiscal year 2019 to \$231 million, as contributions and asset returns exceeded benefit payments. The accumulated benefit obligation (“ABO”) and the projected benefit obligation (“PBO”) were both approximately \$233 million as of March 31, 2019. The ABO and PBO are calculated on the basis of certain assumptions that are outlined in Note 11 to the consolidated financial statements in Item 8. We expect to make contributions of about \$2 million to our pension plans during the next year. It is our policy to regularly monitor the performance of the funds and to review the adequacy of our funding and plan contributions.

## Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

## Contractual Obligations

Our contractual obligations as of March 31, 2019, were as follows:

(in thousands of dollars)	Total	2020	2021-2022	2023-2024	After 2024
Notes payable and long-term debt <sup>(1)</sup>	\$ 497,819	\$ 71,778	\$ 30,556	\$ 179,080	\$ 216,405
Operating lease obligations	47,757	13,435	14,761	8,119	11,442
Inventory purchase obligations:					
Tobacco	624,936	496,798	128,138	—	—
Agricultural materials	51,093	51,093	—	—	—
Other purchase obligations	9,515	5,698	2,122	1,695	—
Total	<u>\$ 1,231,120</u>	<u>\$ 638,802</u>	<u>\$ 175,577</u>	<u>\$ 188,894</u>	<u>\$ 227,847</u>

(1) Includes interest payments. Interest payments on \$54.0 million of variable rate debt were estimated based on rates as of March 31, 2019. We have entered into interest rate swaps that effectively convert the interest payments on the \$370.0 million outstanding balance of our two bank term loans from variable to fixed. The fixed rate has been used to determine the contractual interest payments for all periods.

In addition to principal and interest payments on notes payable and long-term debt, our contractual obligations include operating lease payments, inventory purchase commitments, and capital expenditure commitments. Operating lease obligations represent minimum payments due under leases for various production, storage, distribution, and other facilities, as well as vehicles and equipment. Tobacco inventory purchase obligations primarily represent contracts to purchase tobacco from farmers. The amounts shown above are estimates since actual quantities purchased will depend on crop yield, and prices will depend on the quality of the tobacco delivered. We have partially funded our tobacco purchases in some origins with short-term advances to farmers and other suppliers, which totaled approximately \$107 million, net of allowances, at March 31, 2019. In addition, we have guaranteed bank loans to farmers in Brazil that relate to a portion of our tobacco purchase obligations there. At March 31, 2019, we were contingently liable under those guarantees for outstanding balances of approximately \$17 million (including accrued interest), and we had recorded a liability of approximately \$1 million for the fair value of those guarantees. As tobacco is purchased and the related bank loans are repaid, our contingent liability is reduced.

## CRITICAL ACCOUNTING ESTIMATES AND ASSUMPTIONS

In preparing the financial statements in accordance with GAAP, we are required to make estimates and assumptions that have an impact on the assets, liabilities, revenue, and expense amounts reported. These estimates can also affect our supplemental information disclosures, including information about contingencies, risks, and financial condition. We believe, given current facts and circumstances, that our estimates and assumptions are reasonable, adhere to GAAP, and are consistently applied. However, changes in the assumptions used could result in a material adjustment to the financial statements. Our critical accounting estimates and assumptions are in the following areas:

### **Inventories**

Inventories of tobacco are valued at the lower of cost or net realizable value with cost determined under the specific cost method. Raw materials are clearly identified at the time of purchase. We track the costs associated with raw materials in the final product lots, and maintain this identification through the time of sale. We also capitalize direct and indirect costs related to processing raw materials. This method of cost accounting is referred to as the specific cost or specific identification method. We write down inventory for changes in net realizable value based upon assumptions related to future demand and market conditions if the indicated value is below cost. Future demand assumptions can be impacted by changes in customer sales, changes in customers' inventory positions and policies, competitors' pricing policies and inventory positions, and varying crop sizes and qualities. Market conditions that differ significantly from those assumed by management could result in additional write-downs. We experience inventory write-downs routinely. Inventory write-downs in fiscal years 2019, 2018, and 2017 were \$4.0 million, \$7.7 million, and \$10.9 million, respectively.

### **Advances to Suppliers and Guarantees of Bank Loans to Suppliers**

In many sourcing origins, we provide tobacco growers with agronomy services and seasonal crop advances of, or for, seed, fertilizer, and other supplies. These advances are short term in nature and are customarily repaid upon delivery of tobacco to us. In several origins, we have also made long-term advances to tobacco farmers to finance curing barns and other farm infrastructure. In Brazil, we also guarantee bank loans made to farmers for seasonal crop financing. In some years, due to low crop yields and other factors, individual farmers may not deliver sufficient volumes of tobacco to repay maturing advances. In those cases, we may extend repayment of the advances into the following crop year or satisfy the guarantee by acquiring the loan from the bank. In either situation, we will incur losses whenever we are unable to recover the full amount of the loans and advances. At each reporting period, we must make estimates and assumptions in determining the valuation allowance for advances to farmers and the liability to accrue for our obligations under bank loan guarantees. At March 31, 2019, the gross balance of advances to suppliers totaled approximately \$129 million, and the related valuation allowance totaled approximately \$18 million. The fair value of the loan guarantees for farmers in Brazil was a liability of approximately \$1 million at March 31, 2019.

### **Recoverable Value-Added Tax Credits**

In many foreign countries, we pay significant amounts of value-added tax ("VAT") on purchases of unprocessed and processed tobacco, crop inputs, packing materials, and various other goods and services. In some countries, VAT is a national tax, and in other countries it is assessed at the state level. Items subject to VAT vary from jurisdiction to jurisdiction, as do the rates at which the tax is assessed. When we sell tobacco to customers in the country of origin, we generally collect VAT on those sales. We are normally permitted to offset our VAT payments against those collections and remit only the incremental VAT collections to the tax authorities. When tobacco is sold for export, VAT is normally not assessed. In countries where our tobacco sales are predominately for export markets, we often do not generate enough VAT collections on downstream sales to fully offset our VAT payments. In those situations, we can accumulate unused VAT credits. Some jurisdictions have procedures that allow companies to apply for refunds of unused VAT credits from the tax authorities, but the refund process often takes an extended period of time and it is not uncommon for refund applications to be challenged or rejected in part on technical grounds. Other jurisdictions may permit companies to sell or transfer unused VAT credits to third parties in private transactions, although approval for such transactions must normally be obtained from the tax authorities, limits on the amounts that can be transferred may be imposed, and the proceeds realized may be heavily discounted from the face value of the credits. Due to these factors, in some countries we can accumulate significant balances of VAT credits over time. We review these balances on a regular basis, and we record valuation allowances on the credits to reflect amounts that we do not expect to recover, as well as discounts anticipated on credits we expect to sell or transfer. In determining the appropriate valuation allowance to record in a given jurisdiction, we must make various estimates and assumptions about factors affecting the ultimate recovery of the VAT credits. At March 31, 2019, the gross balance of recoverable tax credits (primarily VAT) totaled approximately \$53 million, and the related valuation allowance totaled approximately \$17 million.

## Goodwill

We review the carrying value of goodwill for potential impairment on an annual basis and at any time that events or business conditions indicate that it may be impaired. As permitted under Accounting Standards Codification Topic 350 (“ASC 350”), at March 31, 2019 and 2018, we elected to base our initial assessment of potential impairment on qualitative factors. Those factors did not indicate any impairment of our recorded goodwill at those dates. However, during fiscal year 2019, based on business changes that have affected our operations in Tanzania, we recorded a charge of approximately \$0.9 million for the full impairment of goodwill attributable to that reporting unit. In fiscal years prior to basing our initial assessment on qualitative factors, we followed the quantitative approach in ASC 350 in assessing the fair value of our goodwill, which involved the use of discounted cash flow models (Level 3 of the fair value hierarchy under GAAP). Under our current qualitative assessment, we would also use those discounted cash flow models to measure any expected impairment indicated by the assessment. The calculations in these models are not based on observable market data from independent sources and therefore require significant management judgment with respect to operating earnings growth rates and the selection of an appropriate discount rate. Significant adverse changes in our operations or our estimates of future cash flows for a reporting unit with recorded goodwill, such as those caused by unforeseen events or changes in market conditions, could result in an impairment charge. Over 90% of our goodwill balance relates to our reporting unit in Brazil.

## Fair Value Measurements

We hold various financial assets and financial liabilities that are required to be measured and reported at fair value in our financial statements, including money market funds, trading securities associated with deferred compensation plans, interest rate swaps, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. We follow the relevant accounting guidance in determining the fair values of these financial assets and liabilities. Money market funds are valued based on net asset value (“NAV”), which is used as a practical expedient to measure the fair value of those funds (not classified within the fair value hierarchy). Quoted market prices (Level 1 of the fair value hierarchy) are used in most cases to determine the fair values of trading securities. Interest rate swaps and forward foreign currency exchange contracts are valued based on dealer quotes using discounted cash flow models matched to the contractual terms of each instrument (Level 2 of the fair value hierarchy). The fair value of the guarantees of bank loans to tobacco growers, which was approximately \$1 million at March 31, 2019, is derived using an internally-developed discounted cash flow model. The model requires various inputs, including historical loss percentages for comparable loans and a risk-adjusted interest rate. Because significant management judgment is required in determining and applying these inputs to the valuation model, our process for determining the fair value of these guarantees is classified as Level 3 of the fair value hierarchy. At March 31, 2019, a 1% increase in the expected loss percentage for all guaranteed farmer loans would not have had a material effect on the fair value of the guarantee obligation. In addition, a 1% change in the risk-adjusted interest rate would not have had a material effect on the fair value of the guarantee obligation. We incorporate credit risk in determining the fair values of our financial assets and financial liabilities, but that risk did not materially affect the fair values of any of those assets or liabilities at March 31, 2019.

## Income Taxes

Our consolidated effective income tax rate is based on our expected taxable income, tax laws and statutory tax rates, prevailing foreign currency exchange rates, and tax planning opportunities in the various jurisdictions in which we operate. Significant judgment is required in determining the effective tax rate and evaluating our tax position. We are subject to the tax laws of many jurisdictions, and could be subject to a tax audit in each of these jurisdictions, which could result in adjustments to tax expense in future periods. In the event that there is a significant, unusual, or one-time item recognized in our results, the tax attributed to that discrete item would be recorded at the same time as the item.

With the enactment of the Tax Cuts and Jobs Act in December 2017, and the corresponding move of the United States system of corporate taxation for multinational companies from the taxation of worldwide income to a system that is more territorial-based, our consolidated income tax expense and effective tax rate is more heavily dependent on the tax rates of the individual countries in which we operate, the mix of our pretax earnings from those countries, and the prevailing rates of exchange of their local currencies with the U.S. dollar. The mix of pretax earnings and local currency exchange rates in particular can change significantly between annual and quarterly reporting periods based on crop sizes, market conditions, and economic factors. We expect these changes will make our effective tax rate more volatile from year-to-year and from quarter-to-quarter than it was under the prior tax law.

We have no undistributed earnings of consolidated foreign subsidiaries that are classified as permanently or indefinitely reinvested. We assume that all undistributed earnings of our foreign subsidiaries will be repatriated back to their parent entities in the U.S. where the funds are best placed to meet our cash flow requirements. In addition, we strive to mitigate economic, political, and currency risk by following a disciplined annual approach to the distribution of excess capital back to the U.S. Based on these assumptions, in our income tax expense for each reporting period we fully provide for all applicable foreign country withholding taxes that are expected to be due on these distributions.

Our accounting for uncertain tax positions requires that we review all significant tax positions taken, or expected to be taken, in income tax returns for all jurisdictions in which we operate. In this review, we must assume that all tax positions will ultimately be audited, and either accepted or rejected based on the applicable tax regulations by the tax authorities for those jurisdictions. We must recognize in our financial statements only the tax benefits associated with tax positions that are “more likely than not” to be accepted upon audit, at the greatest amount that is considered “more likely than not” to be accepted. These determinations require significant management judgment, and changes in any given quarterly or annual reporting period could affect our consolidated income tax rate.

Tax regulations require items to be included in taxable income in the tax return at different times, and in some cases in different amounts, than the items are reflected in the financial statements. As a result, our effective tax rate reflected in the financial statements is different than that reported in our tax returns. Some of these differences are permanent, such as expenses that are not tax deductible, while others are related to timing issues, such as differences in depreciation methods. Timing differences create deferred tax assets and liabilities. Deferred tax liabilities generally represent tax expense recognized in our financial statements for which payment has been deferred or income taxes related to expenses that have not yet been recognized in the financial statements, but have been deducted in our tax return. Deferred tax assets generally represent items that can be used as a tax deduction or credit in future tax returns for which we have already recorded the tax benefit in our financial statements. We record valuation allowances for deferred tax assets when the amount of estimated future taxable income is not likely to support the use of the deduction or credit. Determining the amount of such valuation allowances requires significant management judgment, including estimates of future taxable income in multiple tax jurisdictions where we operate. Based on our periodic earnings forecasts, we project the upcoming year’s taxable income to help us evaluate our ability to realize deferred tax assets.

For additional disclosures on income taxes, see Notes 1 and 5 to the consolidated financial statements in Item 8.

### **Pension and Other Postretirement Benefit Plans**

The measurement of our pension and other postretirement benefit obligations and costs at the end of each fiscal year requires that we make various assumptions that are used by our outside actuaries in estimating the present value of projected future benefit payments to all plan participants. Those assumptions take into consideration the likelihood of potential future events such as salary increases and demographic experience. The assumptions we use may have an effect on the amount and timing of future contributions to our plans. The plan trustee conducts an independent valuation of the fair value of pension plan assets. The significant assumptions used in the calculation of our pension and other postretirement benefit obligations are:

- Discount rate – The discount rate is based on investment yields on a hypothetical portfolio of actual long-term corporate bonds rated AA that align with the cash flows for our benefit obligations.
- Salary scale – The salary scale assumption is based on our long-term actual experience for salary increases, the near-term outlook, and expected inflation.
- Expected long-term return on plan assets – The expected long-term return on plan assets reflects asset allocations and investment strategy adopted by the Finance and Pension Investment Committee of the Board of Directors.
- Retirement and mortality rates – Retirement rates are based on actual plan experience along with our near-term outlook. Early retirement assumptions are based on our actual experience. Mortality rates are based on standard industry group annuity mortality tables which are updated to reflect projected improvements in life expectancy.
- Healthcare cost trend rates – For postretirement medical plan obligations and costs, we make assumptions on future inflationary increases in medical costs. These assumptions are based on our actual experience, along with third-party forecasts of long-term medical cost trends.

From one fiscal year to the next, the rates we use for each of the above assumptions may change based on market developments and other factors. The discount rate reflects prevailing market interest rates at the end of the fiscal year when the benefit obligations are actuarially measured and will increase or decrease based on market patterns. The expected long-term return on plan assets may change based on changes in investment strategy for plan assets or changes in indicated longer-term yields on specific classes of plan assets. In addition to the changes in actuarial assumptions from year to year, actual plan experience affecting our net benefit obligations, such as actual returns on plan assets and actual mortality experience, will differ from the assumptions used to measure the obligations. The effects of these changes and differences increase or decrease the obligation we record for our pension and other postretirement benefit plans, and they also create gains and losses that are accumulated and amortized over future periods, thus affecting the expense we recognize for these plans over those periods. Changes in the discount rate from year to year generally have the largest impact on our projected benefit obligation and annual expense, and the effects may be significant, particularly over successive years where the discount rate moves in the same direction.

As of March 31, 2019, the effect of the indicated increase or decrease in the selected pension and other postretirement benefit valuation assumptions is shown below. The effect assumes no change in benefit levels.

<u>(in thousands of dollars)</u>	<u>Effect on 2019 Projected Benefit Obligation Increase (Decrease)</u>	<u>Effect on 2020 Annual Expense Increase (Decrease)</u>
<b><u>Changes in Assumptions for Pension Benefits</u></b>		
Discount Rate:		
1% increase .....	\$ (29,049)	\$ (2,385)
1% decrease .....	35,648	2,650
Expected Long-Term Return on Plan Assets:		
1% increase .....	—	(2,470)
1% decrease .....	—	2,470
<b><u>Changes in Assumptions for Other Postretirement Benefits</u></b>		
Discount Rate:		
1% increase .....	(2,680)	(207)
1% decrease .....	3,178	235
Healthcare Cost Trend Rate:		
1% increase .....	322	22
1% decrease .....	(295)	(20)

A 1% increase or decrease in the salary scale assumption would not have a material effect on the projected benefit obligation or on annual expense for the Company's pension benefits. See Note 11 to the consolidated financial statements in Item 8 for additional information on pension and other postretirement benefit plans.

**Other Estimates and Assumptions**

Other management estimates and assumptions are routinely required in preparing our financial statements, including the determination of valuation allowances on accounts receivable and the fair value of long-lived assets. Changes in market and economic conditions, local tax laws, and other related factors are considered each reporting period, and adjustments to the accounts are made based on management's best judgment.

## OTHER INFORMATION REGARDING TRENDS AND MANAGEMENT'S ACTIONS

Our financial performance depends on our ability to obtain an appropriate price for our products and services, to secure the tobacco volumes and quality desired by our customers, and to maintain efficient, competitive operations. We continually monitor issues and opportunities that may impact the supply of and demand for leaf tobacco, the volumes of leaf tobacco that we handle, and the services we provide.

We believe that a key factor to perform successfully in this industry is our ability to provide customers with the quality of leaf and the level of service they desire on a global basis at competitive prices, while maintaining stability of supply. As the leading global leaf tobacco supplier, we add significant value to the supply chain, providing expertise in dealing with large numbers of farmers, efficiently selling various qualities of leaf produced in each crop to a broad global customer base, and delivering products and services produced in a sustainable manner that meet stringent quality and regulatory specifications. We also help stabilize the tobacco markets and influence crop development at the farm level. As part of our commitment to our customers, we adapt our business model to meet their evolving needs and monitor new product developments in the industry to identify areas where we can provide additional value to them.

### **Current Industry Trends**

#### *Mature Leaf Tobacco Markets*

Leaf tobacco is sourced directly by product manufacturers, by global leaf suppliers such as ourselves, and by other smaller, mostly regional or local, leaf suppliers. We estimate that, of the flue-cured and burley tobacco grown outside of China in countries that are key export markets for tobacco, a little over a third is purchased directly by major manufacturers. Global leaf suppliers also purchase a little over a third of the tobacco, and the remainder is sourced by the smaller regional or local suppliers. Some of the tobacco purchased directly by manufacturers is processed by the global leaf suppliers. Although we operate in a mature industry, where demand for the end products has been declining at a compound annual rate of about 2% over the last five years, our mission is to remain the leading global leaf tobacco supplier. In recent years, we have been and believe that we will continue to be able to grow our business, and maintain steady performance despite declines in demand for leaf tobacco from product manufacturers. We have done this by continuing to increase our delivery of services, driving supply chain efficiencies, enhancing the range of services we provide to certain customers, including direct buying, agronomic support, and specialized processing services, and improving our market share. We intend to continue to work to expand our business while at the same time maintaining an appropriate return for the services we provide and believe that there are several longer term trends in the industry that could provide additional opportunities for us both to offer additional services to our customers and to increase our market share.

We continually explore options to capitalize on the strengths of our core competencies and seek growth opportunities related to leaf tobacco and our operations around the world. For example, we have expanded our leaf purchasing, processing, and grower support services in the Philippines, as part of a new leaf supply arrangement with one of our major customers who had previously purchased and processed its own tobacco there, which increased the efficiency of the supply chain by providing procurement synergies and economies of scale. We have increased our product offerings to meet demand for shisha (water pipe) style leaf tobacco for customers in the Middle East and North Africa (MENA) region and natural wrappers in the United States and Europe. We also continue to explore and have developed a pipeline for growth opportunities outside of leaf tobacco in adjacent industries and markets that we believe will utilize our assets and capabilities and deliver value to our shareholders. We consider adjacencies to be industries and markets where we can leverage our strengths such as country knowledge, agricultural expertise, and complex grower management and logistic network management. A potential investment might involve high-value, non-commodity, or crop-based agricultural products requiring value-added handling or processing. By making disciplined investments within our leaf tobacco business as well as in adjacent industries and markets that utilize our assets and capabilities, we are confident that we can deliver enhanced value for all shareholders through earnings growth and the generation of free cash flow. As we look to adjacent industries and explore new growth opportunities within tobacco, Universal is dedicated to remaining the leading global leaf tobacco supplier and building on our strong history.

#### *Focus on Cost Management*

Manufacturers naturally seek to mitigate raw materials cost increases, and they are placing increased emphasis on cost containment as they address declining demand. While this is not a new trend, it continues to offer opportunities to us as we bring supply chain efficiencies to the leaf markets. We believe that global leaf suppliers add efficiencies to the markets through economies of scale, as well as through the vital role played in finding buyers for all styles and qualities of leaf tobacco, which achieves overall cost reductions. To understand our business, it is important to note that tobacco is not a commodity product. Flavor and smoking characteristics of tobacco vary based on the type of tobacco, the region where the tobacco is grown, and the position of the leaf on the stalk of the plant. Many different styles and grades of tobacco may be produced in a single tobacco crop. A particular manufacturer may only want and have use for certain leaves of a plant. The leaf tobacco supplier plays a vital role in the industry by finding buyers for all of the leaf grades and styles of tobacco produced in a farmer's crop. This role helps to improve leaf utilization.

In addition to bringing supply chain efficiencies to the leaf tobacco markets, we bring operational efficiencies to the industry, which in turn help reduce costs. These efficiencies include economical utilization of processing capacity, an established and scalable global network of agronomists and technicians helping to maintain a stable, productive, and sustainable farmer base, as well as agronomic and production improvements to optimize leaf yields and qualities. In addition, we are able to offer manufacturers a complete range of services from the field to the delivery of the packed product that benefit from our efficiencies. These services include such things as buying station optimization, processing to specific customer specifications or needs, storage of green or packed leaf tobacco, and logistical services. In recent years, there has been an increase in the level of direct purchasing, processing, and other supply chain services that we provide our customers, notably in the United States, Mexico, Brazil, Poland, Guatemala, the Dominican Republic, and the Philippines. We believe this increase acknowledges the efficiencies and services that we bring to the entire supply chain.

We have also seen some reductions in sourcing from lower-volume tobacco growing origins by both global leaf suppliers and major manufacturers. Flue-cured tobacco is produced in over 70 countries around the world, and burley tobacco is grown in over 45 countries. However, over 80% of both the flue-cured tobacco grown outside of China and the worldwide burley tobacco production is sourced from the top ten growing areas for each type of tobacco. We believe that these moves to reduce sourcing areas and concentrate on major tobacco export markets are another way for the industry to increase efficiency and to reduce costs. In recent years we have contributed to cost reduction and elimination of excess capacity in the supply chain through the closure or realignment of programs in Argentina, Canada, Germany, Italy, Hungary, Nicaragua, Switzerland, Tanzania, and Zambia. We maintain a strong presence in all of the major tobacco sourcing areas and believe that any growth in these areas would favor global leaf suppliers such as ourselves. In the future, we expect that increased regulations requiring stringent monitoring and testing of leaf chemistry and compliant sourcing documentation will place greater emphasis on major sourcing areas.

#### *Importance of Compliant Leaf*

As we have said for a number of years, the production of compliant leaf for the tobacco industry continues to grow in importance. To be considered compliant, leaf tobacco must be grown in a traceable, sustainable manner utilizing Good Agricultural Practices (“GAP”). We have long invested significant resources in the programs and infrastructure needed to work with growers to produce compliant leaf and continue to enhance our ability to monitor and demonstrate this compliance for customers. Our Good Agricultural Practices focus on implementing international principles of sustainability by encouraging and training our farmers to employ sound field production and labor management practices that promote farmer profitability and minimal environmental impact. To assist farmers, Universal provides comprehensive training, technical support in the field, and crop analytics through ongoing research and development. Our commitment to compliance is reinforced through MobilLeaf™, our proprietary mobile device platform, that captures and shares data in real-time, embedding sustainability throughout our supply chain and providing monitoring of GAP efforts, compliance with labor standards, and opportunities to enhance efficiencies. We believe that compliant leaf will continue to grow in importance to our customers and, as a result, will favor the two global suppliers who are able to deliver this product.

#### *Growth of Alternative Tobacco Products*

Most of the major tobacco product manufacturers have been developing next generation and modified risk products. These include electronic nicotine delivery systems (“ENDS”), liquid vaporizers, and heated tobacco products. ENDS and liquid vaporizers use liquid nicotine, which is predominately derived from leaf tobacco, and heated tobacco products use leaf tobacco. At this time it is unclear how these new products will affect demand for leaf tobacco. However, as our customers have been developing these products, we have been working with them to make sure we are able to meet their needs for both their traditional and new products. This is consistent with our commitment to efficiently and effectively adapt our business model to meet our customers’ evolving needs. Specifically, we have expertise in tobacco seed development, crop production methods, crop sourcing, processing, and manufacturing of reconstituted sheet tobacco, which is beneficial to our customers as they continue to develop alternative tobacco products. We also are able to provide high quality liquid nicotine through our subsidiary, AmeriNic. We continue to monitor industry developments regarding next generation products, including consumer acceptance and regulation, and will adapt accordingly.

### **Supply**

#### *Production*

Flue-cured tobacco crops grown outside of China decreased in fiscal year 2019 by about 4% to 1.9 billion kilos, mainly due to smaller crops in the United States caused by adverse weather conditions and smaller crop volumes in Brazil. Global burley tobacco production increased by about 15% to about 590 million kilos in fiscal year 2019, due to larger crops in Africa. Less African burley leaf was grown in fiscal year 2018 as a result of unfavorable weather conditions. Flue-cured tobacco crops grown outside of China are projected to increase to about 2.0 billion kilos in fiscal year 2020 and total flue-cured production is expected to be in line with amounts grown in fiscal year 2018. Burley volumes are also forecast to increase slightly to about 595 million kilos in fiscal year 2020. We estimate that as of March 31, 2019, industry uncommitted flue-cured and burley inventories, excluding China, totaled about 108 million kilos, an increase of about 25% from March 31, 2018 levels. At this time, we believe that both flue-cured and burley tobacco may be in slight oversupply positions compared with anticipated demand.

We also forecast that oriental tobacco production will decrease by about 12%, and dark air-cured production will increase by about 2% in fiscal year 2020. Over the long term, we believe that global tobacco production will continue to decline slightly in line with slightly declining total demand. South America, Asia, Africa, and North America will remain key sourcing regions for flue-cured and burley tobaccos.

### *China*

China is a significant cigarette market. However, most of the cigarettes consumed in China and the leaf tobacco used in those cigarettes are produced domestically. Therefore, we normally view the Chinese market independently when evaluating worldwide leaf tobacco supply and demand. In the past few years, China's domestic leaf production has exceeded their domestic needs for the local cigarette market, and there has been a build-up of domestic leaf inventory there. China is continuing to demonstrate efforts to re-align their domestic leaf production and inventories to balance their needs, and these efforts could influence global supply/demand in the short term.

### *Pricing*

Factors that affect green tobacco prices include global supply and demand, market conditions, production costs, foreign exchange rates, and competition from other crops. We work with farmers to maintain tobacco production and to secure product at price levels that are attractive to both the farmers and our customers. Our objective is to secure compliant tobacco that is produced in a cost-effective manner under a sustainable business model with the desired quality for our customers. In some areas, tobacco competes with agricultural commodity products for farmer production. If prices for soybeans, wheat, rice, and seed oils rise in certain origins, green tobacco prices may have to rise to maintain tobacco production levels. In the past, leaf shortages in specific markets or on a worldwide basis have also led to green tobacco price increases.

### **Demand**

Industry data shows that over the past five years, total world consumption of cigarettes fell at a compound annual rate of about 2%. We believe that growth in world consumption of cigarettes peaked several years ago and is declining. As a result, we expect that near term global demand for leaf tobacco will continue to slowly decline in line with declining global cigarette consumption.

Our sales consist primarily of flue-cured and burley tobaccos. Those types of tobacco, along with oriental tobaccos, are used in American-blend cigarettes which are primarily smoked in Western Europe and the United States. English-blend cigarettes which use flue-cured tobacco are mainly smoked in the United Kingdom and Asia and other emerging markets. Industry data shows that consumption of American-blend cigarettes has declined at a compound annual rate of about 2% for the five years ended in 2018. If demand for American-blend cigarettes declines at a higher rate than reductions in demand for English-blend cigarettes, there may be less demand for burley and oriental tobaccos and more demand for flue-cured tobacco. However, demand is affected by many factors, including regulation, product taxation, illicit trade, alternative tobacco products, and Chinese imports. To the extent that domestic leaf production and inventory durations in China do not meet requirements for Chinese cigarette blends, that tobacco could be sourced from other origins where we have major market positions. On a year-to-year basis, we are also susceptible to fluctuations in leaf supply due to crop sizes and leaf demand as manufacturers adjust inventories or respond to changes in cigarette markets. We currently expect that supply of flue-cured and burley tobaccos slightly exceed anticipated demand. However, inventories held by our customers may affect their near-term demand for leaf tobacco. We also sell oriental tobacco, which is used in American-blend cigarettes, and dark tobacco, which is used in cigars and other smokeless products. While we expect demand for oriental tobacco and dark tobacco used in cigar filler to be generally in line with supply, we are seeing strong demand for wrapper tobacco used for mass-market cigars.

### *Regulation and Product Taxation*

Decreased social acceptance of smoking and increased pressure from anti-smoking groups have had an ongoing adverse effect on the percentage of the population using tobacco products, particularly in the United States and Western Europe. Many governments have additionally taken or proposed steps to restrict or prohibit tobacco product advertising and promotion, to increase taxes on such products, to prohibit smoking in public areas, and to discourage tobacco product consumption. A number of such measures are included in the Framework Convention on Tobacco Control ("FCTC"), which was negotiated under the auspices of the WHO and offers guidelines for discouraging or controlling tobacco use. The 180 countries that are signatories to the FCTC may choose how to fulfill their obligations in implementing the articles in a manner that is most suitable with their approach to tobacco control. For example, in recent years China imposed a ban on smoking in public places, while in the United Kingdom and Australia, laws have been passed mandating plain packaging, the removal of branding on cigarette packages. We cannot predict the extent to which government efforts to reduce tobacco consumption might affect the business of our primary customers. However, a significant decrease in worldwide tobacco consumption, as well as shifts to modified risk tobacco products brought about by existing or future governmental laws and regulations, could reduce demand for leaf tobacco and services and have a material adverse effect on our business.

In addition, certain recommendations by the WHO, through the FCTC, may cause shifts in customer usage of certain types and styles of tobacco. As seen in the United States, Canada, Brazil, and the European Union, efforts have been taken to eliminate flavorings from tobacco products. Additionally, discussions are intensifying about the possibility of reducing nicotine content in certain tobacco products to less than addictive levels. Such decisions could cause a change in requirements for certain leaf tobaccos in particular countries. Shifts in customer demand from one type of leaf tobacco to another could create sourcing issues as requirements move from one origin to another. Furthermore, instruction at the farm level may be required to produce the changing styles of leaf tobacco needed by tobacco product manufacturers. Given our strong global footprint and our well-developed programs and networks at the farm level worldwide, we remain particularly well positioned to meet manufacturer requirements.

In 2009, the U.S. Congress passed the Family Smoking Prevention and Tobacco Control Act (“the Act”). This legislation authorizes the FDA to regulate the manufacturing and marketing of all tobacco products. The FDA has banned flavored cigarettes, restricted youth access to tobacco products, banned advertising claims regarding certain tobacco products, established new smokeless tobacco warnings, and issued new cigarette health warnings. In addition, the FDA established the Center for Tobacco Products (“CTP”). Over the past decade, the CTP has focused on establishing the scientific foundation and regulatory framework for regulating tobacco products in the United States. On May 10, 2016, the FDA released “deeming” regulations that extend FDA oversight to all tobacco products, including electronic nicotine delivery systems, cigars, hookah tobacco, pipe tobacco, dissolvables, and “novel and future products.” The regulations require that tobacco product manufacturers register tobacco products that existed on February 15, 2007, and to seek FDA authorization to sell any products modified or introduced after such date. All such submissions require manufacturers to list ingredients in their products. On July 28, 2017, FDA Commissioner Scott Gottlieb announced a new regulatory approach for the regulation of combustible and non-combustible products focusing on nicotine reduction and the continuum of risk. The agency issued an Advanced Notice of Proposed Rule Making (“ANPRM”) with the intention of developing a nicotine product standard for cigarettes that reduces the level of nicotine to below-addictive levels. Additional ANPRMs were issued: 1) to explore the science behind exempting premium cigars from premarket authorization requirements and 2) to address menthol in cigarettes, flavors in vapor and other ENDS products, and the future ENDS and vapor product standards. Furthermore, as part of the comprehensive plan, the FDA approved the first “heat-not-burn” premarket tobacco application to permit the product’s sale in the United States.

In 2019, an uptick in youth use of ENDS products as reported in the National Youth Tobacco Study prompted the FDA to revisit its compliance policy regarding certain flavored ENDS products and flavored cigars. Public comment ended on April 30, 2019, and these products could face restrictions should FDA finalize this revised compliance policy. In March 2019, Scott Gottlieb announced his resignation as FDA Commissioner, and Ned Sharpless, the Director of the National Cancer Institute, was named Acting Commissioner. Public statements by Sharpless and HHS Secretary Azar have indicated the tobacco regulatory approach will remain consistent.

Regulations impacting our customer base that change the requirements for leaf tobacco or restrict their ability to sell their products will inherently impact our business. As discussed, we have established programs that begin at the farm level to assist our customers with raw material information to support leaf traceability and customer testing requirements, including the detection of nicotine levels. Additionally, given our global presence, we also have the ability to source different types and styles of tobacco for our customers should their needs change due to regulation. A number of governments, particularly federal and local governments in the United States and the European Union, impose excise or similar taxes on tobacco products. There has been, and will likely continue to be, new legislation proposing new or increased taxes on tobacco products. In some cases, proposed legislation seeks to significantly increase existing taxes on tobacco products, or impose new taxes on products that to date have not been subject to tax. Increases in product taxation may reduce the affordability of, and demand for, cigarettes, which will affect requirements for leaf tobacco by tobacco product manufacturers.

### *Illicit Trade*

Illicit trade is another factor which influences demand for leaf tobacco. Industry estimates of the illegal, unregulated black market for cigarettes are approximately 10% to 12% of global stick consumption, representing \$40 to \$50 billion in lost tax revenue globally. We support governmental and industry efforts to eradicate illicit trade.

## **Item 7A. Quantitative and Qualitative Disclosures about Market Risk**

### **Interest Rate Risk**

We generally use both fixed and floating interest rate debt to finance our operations. Changes in market interest rates expose us to changes in cash flows for floating rate instruments and to changes in fair value for fixed-rate instruments. We normally maintain a proportion of our debt in both variable and fixed interest rates to manage this exposure, and from time to time we may enter hedge agreements to swap the interest rates. In addition, our customers may pay market rates of interest for inventory purchased on order, which could mitigate a portion of the floating interest rate exposure. We also periodically have large cash balances and may receive deposits from customers, both of which we use to fund seasonal purchases of tobacco, reducing our financing needs. Excluding our bank term loans, which have been converted to fixed-rate borrowings with interest rate swaps, debt carried at variable interest rates was approximately \$54 million at March 31, 2019. Although a hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately \$0.5 million, that amount would be at least partially mitigated by changes in charges to customers.

In addition, changes in interest rates affect the calculation of our pension plan liabilities. As rates decrease, the liability for the present value of amounts expected to be paid under the plans increases. Rate changes also affect expense. As of the March 31, 2019 measurement date, a 1% decrease in the discount rate would have increased the projected benefit obligation (“PBO”) for pensions by \$36 million and increased annual pension expense by \$3 million. Conversely, a 1% increase in the discount rate would have reduced the PBO by \$29 million and reduced annual pension expense by \$2 million.

### **Currency Risk**

The international leaf tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to leaf purchase and production costs, overhead, and income taxes in the source country. We also provide farmer advances that are directly related to leaf purchases and are denominated in the local currency. Any currency gains or losses on those advances are usually offset by increases or decreases in the cost of tobacco, which is priced in the local currency. However, the effect of the offset may not occur until a subsequent quarter or fiscal year. Most of our tobacco operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our major countries of tobacco origin, we often manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net local currency monetary position in individual countries. We are vulnerable to currency remeasurement gains and losses to the extent that monetary assets and liabilities denominated in local currency do not offset each other. We recognized \$1.8 million in net remeasurement gains in fiscal year 2019, compared to \$0.2 million in net remeasurement losses in fiscal year 2018, and \$9.3 million in net remeasurement losses in fiscal year 2017. We recognized \$4.3 million in net foreign currency transaction losses in fiscal year 2019, compared to net transaction losses of \$0.1 million in fiscal year 2018, and net transaction losses of \$1.3 million in fiscal year 2017. In addition to foreign exchange gains and losses, we are exposed to changes in the cost of tobacco due to changes in the value of the local currency in relation to the U.S. dollar. We have entered forward currency exchange contracts to hedge against the effects of currency movements on purchases of tobacco to reduce the volatility of costs. In addition, we periodically enter into forward contracts to hedge balance sheet exposures. See Note 9 to the consolidated financial statements in Item 8 for additional information about our hedging activities.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these markets are Poland and the Philippines. In other markets, such as Western Europe, where export sales are primarily in local currencies, we also use the local currency as the functional currency. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

### **Hedging Risk**

Hedging interest rate exposure using swaps and hedging foreign currency exchange rate exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations. When we use foreign currency derivatives to mitigate our exposure to exchange rate fluctuations, we may choose not to designate them as hedges for accounting purposes, which may result in the effects of the derivatives being recognized in our earnings in periods different from the items that created the exposure.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction-specific so that a specific debt instrument, forecast purchase, contract, or invoice determines the amount, maturity, and other specifics of the hedge. We routinely review counterparty risk as part of our derivative program.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**(All dollar amounts are in thousands, except per share amounts or as otherwise noted.)**

**NOTE 1. NATURE OF OPERATIONS AND SIGNIFICANT ACCOUNTING POLICIES**

**Nature of Operations**

Universal Corporation, which together with its subsidiaries is referred to herein as “Universal” or the “Company,” is the leading global leaf tobacco supplier. The Company conducts its leaf tobacco business in over 30 countries, primarily in major tobacco-producing regions of the world. The Company also has operations in smaller-scale businesses adjacent to the leaf tobacco business, as well as a fruit and vegetable ingredients business.

**Consolidation**

The consolidated financial statements include the accounts of Universal Corporation and all domestic and foreign subsidiaries in which the Company maintains a controlling financial interest. Control is generally determined based on a voting interest of greater than 50%, such that Universal controls all significant corporate activities of the subsidiary. All significant intercompany accounts and transactions are eliminated in consolidation.

The equity method of accounting is used for investments in companies where Universal Corporation has a voting interest of 20% to 50%. These investments are accounted for under the equity method because Universal exercises significant influence over those companies, but not control. The Company received dividends totaling \$7.5 million in fiscal year 2019, \$5.5 million in fiscal year 2018, and \$5.1 million in fiscal year 2017, from companies accounted for under the equity method. Investments where Universal has a voting interest of less than 20% are not significant and do not have readily determinable fair values. As such, the Company has elected the alternate method of measuring these investments at cost, less any impairment. The Company's 49% ownership interest in Socotab L.L.C. (“Socotab”), a leading supplier of oriental tobaccos with operations located principally in Eastern Europe and Turkey, is the primary investment accounted for under the equity method. The investment in Socotab is an important part of the Company's overall product and service arrangements with its major customers. The Company reviews the carrying value of its investments in Socotab and its other unconsolidated affiliates on a regular basis and considers whether any factors exist that might indicate an impairment in value that is other than temporary. At March 31, 2019, the Company determined that no such factors existed with respect to those investments.

The Company's operations in Zimbabwe are deconsolidated under accounting requirements that apply under certain conditions to foreign subsidiaries that are subject to foreign exchange controls and other government restrictions. The investment in the Zimbabwe operations is accounted for at cost less impairment, and was zero at March 31, 2019 and 2018. The Company has a net foreign currency translation loss associated with the Zimbabwe operations of approximately \$7.2 million, which remains a component of accumulated other comprehensive loss. As a regular part of its reporting, the Company reviews the conditions that resulted in the deconsolidation of the Zimbabwe operations to confirm that such accounting treatment is still appropriate. Dividends from the Zimbabwe operations are recorded in income in the period received.

The Company holds less than a 100% financial interest in certain consolidated subsidiaries. The net income and shareholders' equity attributable to the noncontrolling interests in these subsidiaries are reported on the face of the consolidated financial statements. During fiscal year 2018, the Company purchased the noncontrolling interest of one subsidiary for \$0.6 million. Other than this transaction, there were no changes in the Company's ownership percentage in any of these subsidiaries during fiscal years 2017, 2018, or 2019.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Investments in Unconsolidated Affiliates**

The Company's investments in its unconsolidated affiliates, which include its Zimbabwe operations, are non-marketable securities. Universal reviews such investments for impairment whenever events or changes in circumstances indicate that the carrying amount of an investment may not be recovered. For example, the Company would review such an investment for impairment if the investee were to lose a significant customer, suffer a large reduction in sales margins, experience a major change in its business environment, or undergo any other significant change in its normal business. In assessing the recoverability of these investments, the Company follows the applicable accounting guidance in determining the fair value of the investments. In most cases, this involves the use of undiscounted and discounted cash flow models (Level 3 of the fair value hierarchy under the accounting guidance). If the fair value of an unconsolidated investee is determined to be lower than its carrying value, an impairment loss is recognized. The determination of fair value using discounted cash flow models is normally not based on observable market data from independent sources and therefore requires significant management judgment with respect to estimates of future operating earnings and the selection of an appropriate discount rate. The use of different assumptions could increase or decrease estimated future operating cash flows, and the discounted value of those cash flows, and therefore could increase or decrease any impairment charge related to these investments.

In its consolidated statements of income, the Company reports its proportional share of the earnings of unconsolidated affiliates accounted for on the equity method based on the pretax earnings of those affiliates, as permitted under the applicable accounting guidance. All applicable foreign and U.S. income taxes are provided on these earnings and reported as a component of consolidated income tax expense. For unconsolidated affiliates located in foreign jurisdictions, repatriation of the Company's share of the earnings through dividends is assumed in determining consolidated income tax expense.

The following table provides a reconciliation of (1) equity in the pretax earnings of unconsolidated affiliates, as reported in the consolidated statements of income to (2) equity in the net income of unconsolidated affiliates, net of dividends, as reported in the consolidated statements of cash flows for the fiscal years ended March 31, 2019, 2018, and 2017

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
Equity in pretax earnings reported in the consolidated statements of income .....	\$ 5,299	\$ 9,125	\$ 5,774
Less: Equity in income taxes .....	(1,441)	(2,063)	(1,092)
Equity in net income .....	3,858	7,062	4,682
Less: Dividends received on investments <sup>(1)</sup> .....	(7,517)	(5,541)	(5,078)
Equity in net income, net of dividends, reported in the consolidated statements of cash flows .....	<u>\$ (3,659)</u>	<u>\$ 1,521</u>	<u>\$ (396)</u>

(1) In accordance with the applicable accounting guidance, dividends received from unconsolidated affiliates accounted for on the equity method that represent a return on capital (i.e., a return of earnings on a cumulative basis) are presented as operating cash flows in the consolidated statements of cash flows.

**Earnings Per Share**

The Company calculates basic earnings per share based on earnings available to common shareholders. For fiscal years prior to 2018, dividends paid on the Company's Series B 6.75% Convertible Perpetual Preferred Stock prior to its conversion (see Note 12) were deducted in determining earnings available to common shareholders. The calculation uses the weighted average number of common shares outstanding during each period. Diluted earnings per share is computed in a similar manner using the weighted average number of common shares and dilutive potential common shares outstanding. Dilutive potential common shares include unvested restricted stock units and performance share awards that are assumed to be fully vested and paid out in shares of common stock, dilutive stock options and stock appreciation rights that were assumed to be exercised, and shares of convertible perpetual preferred stock that were assumed to be converted when the effect was dilutive (prior to their actual conversion). In periods when the effect of the convertible perpetual preferred stock was dilutive and those shares were assumed to be converted into common stock, dividends paid on the preferred stock were excluded from the calculation of diluted earnings per share.

Calculations of earnings per share for the fiscal years ended March 31, 2019, 2018, and 2017, are provided in Note 4.

**Cash and Cash Equivalents**

All highly liquid investments with a maturity of three months or less at the time of purchase are classified as cash equivalents.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Advances to Suppliers**

In many sourcing origins where the Company operates, it provides agronomy services and seasonal advances of seed, fertilizer, and other supplies to tobacco farmers for crop production, or makes seasonal cash advances to farmers for the procurement of those inputs. These advances are short term, are repaid upon delivery of tobacco to the Company, and are reported in advances to suppliers in the consolidated balance sheets. In several origins, the Company has made long-term advances to tobacco farmers to finance curing barns and other farm infrastructure. In some years, due to low crop yields and other factors, individual farmers may not deliver sufficient volumes of tobacco to fully repay their seasonal advances, and the Company may extend repayment of those advances into future crop years. The long-term portion of advances is included in other noncurrent assets in the consolidated balance sheets. Both the current and the long-term portions of advances to suppliers are reported net of allowances recorded when the Company determines that amounts outstanding are not likely to be collected. Short-term and long-term advances to suppliers totaled approximately \$129 million at March 31, 2019 and \$150 million at March 31, 2018. The related valuation allowances totaled \$18 million at March 31, 2019, and \$22 million at March 31, 2018, and were estimated based on the Company's historical loss information and crop projections. The allowances were reduced by net recoveries of approximately \$2.3 million in fiscal year 2019 and \$0.9 million in fiscal year 2017, and increased by net provisions for estimated uncollectible amounts of approximately \$3.7 million in fiscal year 2018. These net provisions and recoveries are included in selling, general, and administrative expenses in the consolidated statements of income. Interest on advances is recognized in earnings upon the farmers' delivery of tobacco in payment of principal and interest. Advances on which interest accrual had been discontinued totaled approximately \$6 million at March 31, 2019 and \$8 million at March 31, 2018.

**Inventories**

Tobacco inventories are valued at the lower of cost or net realizable value. Raw materials primarily consist of unprocessed leaf tobacco, which is clearly identified by type and grade at the time of purchase. The Company tracks the costs associated with this tobacco in the final product lots, and maintains this identification through the time of sale. This method of cost accounting is referred to as the specific cost or specific identification method. The predominant cost component of the Company's inventories is the cost of the unprocessed tobacco. Direct and indirect processing costs related to these raw materials are capitalized and allocated to inventory in a systematic manner. The Company does not capitalize any interest or sales-related costs in inventory. Freight costs are recorded in cost of goods sold. Other inventories consist primarily of seed, fertilizer, packing materials, and other supplies, and are valued principally at the lower of average cost or net realizable value.

**Recoverable Value-Added Tax Credits**

In many foreign countries, the Company's local operating subsidiaries pay significant amounts of value-added tax ("VAT") on purchases of unprocessed and processed tobacco, crop inputs, packing materials, and various other goods and services. In some countries, VAT is a national tax, and in other countries it is assessed at the state level. Items subject to VAT vary from jurisdiction to jurisdiction, as do the rates at which the tax is assessed. When tobacco is sold to customers in the country of origin, the operating subsidiaries generally collect VAT on those sales. The subsidiaries are normally permitted to offset their VAT payments against the collections and remit only the incremental VAT collections to the tax authorities. When tobacco is sold for export, VAT is normally not assessed. In countries where tobacco sales are predominately for export markets, VAT collections generated on downstream sales are often not sufficient to fully offset the subsidiaries' VAT payments. In those situations, unused VAT credits can accumulate. Some jurisdictions have procedures that allow companies to apply for refunds of unused VAT credits from the tax authorities, but the refund process often takes an extended period of time, and it is not uncommon for refund applications to be challenged or rejected in part on technical grounds. Other jurisdictions may permit companies to sell or transfer unused VAT credits to third parties in private transactions, although approval for such transactions must normally be obtained from the tax authorities, limits on the amounts that can be transferred may be imposed, and the proceeds realized may be heavily discounted from the face value of the credits. Due to these factors, local operating subsidiaries in some countries can accumulate significant balances of VAT credits over time. The Company reviews these balances on a regular basis and records valuation allowances on the credits to reflect amounts that are not expected to be recovered, as well as discounts anticipated on credits that are expected to be sold or transferred. At March 31, 2019 and 2018, the aggregate balances of recoverable tax credits held by the Company's subsidiaries totaled approximately \$53 million and \$49 million, respectively, and the related valuation allowances totaled approximately \$17 million and \$15 million, respectively. The net balances are reported in other current assets and other noncurrent assets in the consolidated balance sheets.

**Property, Plant and Equipment**

Depreciation of property, plant and equipment is based upon historical cost and the estimated useful lives of the assets. Depreciation is calculated primarily using the straight-line method. Buildings include tobacco processing and blending facilities, offices, and warehouses. Machinery and equipment consists of processing and packing machinery and transport, office, and computer equipment. Estimated useful lives range as follows: buildings - 15 to 40 years; processing and packing machinery - 3 to 11 years; transport equipment - 3 to 10 years; and office and computer equipment - 3 to 12 years. Where applicable and material in amount,

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

the Company capitalizes related interest costs during periods that property, plant and equipment are being constructed or made ready for service. No interest was capitalized in fiscal years 2019, 2018, or 2017.

**Goodwill and Other Intangibles**

Goodwill and other intangibles principally consist of the excess of the purchase price of acquired companies over the fair value of the net assets. Goodwill is carried at the lower of cost or fair value and is reviewed for potential impairment on an annual basis as of the end of the fiscal year. Accounting Standards Codification Topic 350 (“ASC 350”) permits companies to base their initial assessments of potential goodwill impairment on qualitative factors, and the Company elected to use that approach at March 31, 2019 and 2018. Those factors did not indicate any potential impairment of the Company’s recorded goodwill at those dates.

Reporting units are distinct operating subsidiaries or groups of subsidiaries that typically compose the Company’s business in a specific country or location. Goodwill is allocated to reporting units based on the country or location to which a specific acquisition relates, or by allocation based on expected future cash flows if the acquisition relates to more than one country or location. The majority of the Company’s goodwill relates to its reporting unit in Brazil. Significant adverse changes in the operations or estimated future cash flows for a reporting unit with recorded goodwill could result in an impairment charge. During fiscal year 2019, based on business changes that have affected the Company’s operations in Tanzania, a charge of approximately \$0.9 million was recorded for the full impairment of goodwill attributable to that reporting unit. No charges for goodwill impairment were recorded in fiscal years 2018 or 2017.

**Impairment of Long-Lived Assets**

The Company reviews long-lived assets for impairment whenever events, changes in business conditions, or other circumstances provide an indication that such assets may be impaired. Potential impairment is initially assessed by comparing management’s undiscounted estimates of future cash flows from the use or disposition of the assets to their carrying value. If the carrying value exceeds the undiscounted cash flows, an impairment charge is recorded to reduce the carrying value of the asset to its fair value determined in accordance with the accounting guidance. In many cases, this involves the use of discounted cash flow models that are not based on observable market data from independent sources (Level 3 of the fair value hierarchy under the accounting guidance). In the third quarter of fiscal year 2019, impairment charges of \$14.6 million were recorded on land, building, equipment, and other long-lived assets of the Company’s operations in Tanzania due to declining customer demand for tobaccos sourced from that origin, as well as other changes affecting that business (see Note 3). In fiscal year 2017, impairment charges of \$2.3 million were incurred on factory and equipment assets as a result of the Company’s decision to close its tobacco processing facility in Hungary (see Note 3). No significant charges for the impairment of long-lived assets were recorded during fiscal year 2018.

**Income Taxes**

The Company provides deferred income taxes on temporary differences between the book and tax basis of its assets and liabilities. Those differences arise principally from employee benefit accruals, depreciation, deferred compensation, undistributed earnings of unconsolidated affiliates, undistributed earnings of foreign subsidiaries, goodwill, and valuation allowances on farmer advances and value-added tax credits. Income taxes provided on pretax amounts recorded in accumulated other comprehensive income (loss) are released when the related pretax amounts are reclassified to earnings.

**Fair Values of Financial Instruments**

The fair value of the Company’s long-term debt, disclosed in Note 10, approximates the carrying amount since the variable interest rates in the underlying credit agreement reflect the market interest rates that were available to the Company at March 31, 2019. In periods when fixed-rate obligations are outstanding, fair values are estimated using market prices where they are available or discounted cash flow models based on current incremental borrowing rates for similar classes of borrowers and borrowing arrangements. The fair values of interest rate swap agreements designated as cash flow hedges and used to fix the variable benchmark rate on outstanding long-term debt are determined separately and recorded in other long-term liabilities. Except for interest rate swaps and forward foreign currency exchange contracts that are discussed below, the fair values of all other assets and liabilities that qualify as financial instruments approximate their carrying amounts.

**Derivative Financial Instruments**

The Company recognizes all derivatives on the balance sheet at fair value. Interest rate swaps and forward foreign currency exchange contracts are used from time to time to manage interest rate risk and foreign currency risk. The Company enters into such contracts only with counterparties of good standing. The credit exposure related to non-performance by the counterparties and the Company is considered in determining the fair values of the derivatives, and the effect has not been material to the financial statements or operations of the Company. Additional disclosures related to the Company’s derivatives and hedging activities are provided in Note 9.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Translation and Remeasurement of Foreign Currencies**

The financial statements of foreign subsidiaries having the local currency as the functional currency are translated into U.S. dollars using exchange rates in effect at period end for assets and liabilities and average exchange rates applicable to each reporting period for results of operations. Adjustments resulting from translation of financial statements are reflected as a separate component of other comprehensive income or loss. The financial statements of foreign subsidiaries having the U.S. dollar as the functional currency, with certain transactions denominated in a local currency, are remeasured into U.S. dollars. The remeasurement of local currency amounts into U.S. dollars creates remeasurement gains and losses that are included in earnings as a component of selling, general, and administrative expenses. The Company recognized net remeasurement losses of \$1.8 million in fiscal year 2019 and \$9.3 million in fiscal year 2017, and net remeasurement gains of \$0.2 million in fiscal year 2018.

Foreign currency transactions and forward foreign currency exchange contracts that are not designated as hedges generate gains and losses when they are settled or when they are marked to market under the prescribed accounting guidance. These transaction gains and losses are also included in earnings as a component of selling, general, and administrative expenses. The Company recognized net foreign currency transaction losses of \$4.3 million in fiscal year 2019, \$0.1 million in fiscal year 2018, and \$1.3 million in fiscal year 2017.

**Revenue Recognition**

As discussed below under "Accounting Pronouncements", the Company adopted updated comprehensive accounting guidance for revenue recognition at the beginning of fiscal year 2019 (Accounting Standards Update No. 2014-09, "Revenue from Contracts with Customers" and supplemental amendments, now codified as Section 606 of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification). Under this updated guidance, revenue is recognized when the Company completes its performance obligation for the transfer of products and services under its contractual arrangements with customers. For sales of tobacco, satisfaction of the performance obligation and recognition of the corresponding revenue is based on the transfer of the ownership and control of the product to the customer, which is substantially unchanged from the previous accounting guidance. A large percentage of the Company's sales are to major multinational manufacturers of consumer tobacco products. The Company works closely with those customers to understand and plan for their requirements for volumes, styles, and grades of leaf tobacco from its various growing regions, and extensive coordination is maintained on an ongoing basis to determine and satisfy their requirements for transfer of ownership and physical shipment of processed tobacco. The customers typically specify, in sales contracts and in shipping documents, the precise terms for transfer of title and risk of loss for the tobacco. Customer returns and rejections are not significant, and the Company's sales history indicates that customer-specific acceptance provisions are consistently met upon transfer of title and risk of loss.

While most of the Company's revenue is derived from tobacco that is purchased from farmers, processed and packed in its factories, and then sold to customers, some revenue is earned from processing tobacco owned by customers and from other value-added services. The arrangements for processing services usually exist in specific markets where the customers contract directly with farmers for leaf production, and they have accounted for less than 5% of total revenue on an annual basis through the fiscal year ended March 31, 2019. Processing and packing of leaf tobacco is a short-duration process. Under normal operating conditions, raw tobacco that is placed into the production line exits as processed and packed tobacco within one hour, and is then later transported to customer-designated storage facilities. The revenue for these services is recognized when the performance obligation is met upon the completion of processing, and the Company's operating history indicates that customer requirements for processed tobacco are consistently met upon completion of processing.

Additional disclosures related to the Company's revenue from contracts with customers are provided in Note 2.

**Stock-Based Compensation**

Share-based payments, such as grants of restricted stock units, performance share awards, restricted stock, stock appreciation rights, and stock options, are measured at fair value and reported as expense in the financial statements over the requisite service period. Additional disclosures related to stock-based compensation are included in Note 13.

**Estimates and Assumptions**

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

**Accounting Pronouncements**

*Pronouncements Adopted in Fiscal Year 2017*

In April 2015, the FASB issued Accounting Standards Update No. 2015-03, "Simplifying the Presentation of Debt Issuance Costs" ("ASU 2015-03"). ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. ASU 2015-03 was effective for fiscal years beginning after December 31, 2015. The Company adopted ASU 2015-03 effective for the quarter ended June 30, 2016, which was the first quarter of the fiscal year ended March 31, 2017. The implementation of ASU 2015-03, which required retrospective application, resulted in the reclassification of unamortized debt issuance costs totaling less than \$2 million from other noncurrent assets to long-term debt for comparative prior periods.

In April 2015, the FASB issued Accounting Standards Update 2015-05, “Intangibles - Goodwill and Other - Internal-Use Software - Customer’s Accounting for Fees Paid in a Cloud Computing Arrangement” (“ASU 2015-05”). ASU 2015-05 requires customers who enter into a cloud computing arrangement that includes a software license to account for the arrangement as an intangible asset. If the cloud computing arrangement does not include a software license, the arrangement is accounted for as a service contract. The guidance was effective for fiscal years beginning after December 31, 2015, and allowed for retrospective or prospective adoption. The Company prospectively adopted ASU 2015-05 effective as of April 1, 2016, the beginning of fiscal year 2017. The Company’s adoption of ASU 2015-05 did not have a material impact on its consolidated financial statements.

In May 2015, the FASB issued Accounting Standards Update No. 2015-07, "Fair Value Measurement, Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share or its Equivalent" ("ASU 2015-07"). ASU 2015-07 removed the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient and eliminated certain disclosures for those investments. The Company adopted ASU 2015-07 effective as of April 1, 2016, the beginning of fiscal year 2017. Disclosures for all periods presented in Note 9 - Fair Value Measurements reflect the revised category presentation.

In March 2016, the FASB issued Accounting Standards Update No. 2016-09, "Compensation - Stock Compensation (Topic 718)" ("ASU 2016-09"). ASU 2016-09 provides simplification for the accounting for employee stock-based payment transactions, including the related income tax consequences, the classification of awards as either equity or liabilities, and the classification of transactions in the statement of cash flows. The guidance was effective for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company elected to early-adopt ASU 2016-09 effective April 1, 2016, which was the beginning of its fiscal year ended March 31, 2017. As required by the guidance, employee tax withholding payments and excess tax benefits resulting from stock-based compensation are classified as financing activities and operating activities, respectively, in the consolidated statements of cash flows for all periods presented.

*Pronouncements Adopted in Fiscal Year 2018*

In July 2015, the FASB issued Accounting Standards Update No. 2015-11, “Simplifying the Measurement of Inventory” (“ASU 2015-11”). ASU 2015-11 requires that most inventory be measured at the lower of cost or net realizable value. ASU 2015-11 defines net realizable value as the "estimated selling price in the ordinary course of business, less reasonable predictable costs of completion, disposal, and transportation." ASU 2015-11 was effective for fiscal years beginning after December 31, 2016, and was adopted by the Company effective April 1, 2017, the beginning of fiscal year 2018. As required under the guidance, ASU 2015-11 has been applied prospectively after the date of adoption, and its adoption did not have a material impact on the Company's consolidated financial statements.

In August 2017, the FASB issued Accounting Standards Update No. 2017-12, "Derivatives and Hedging (Topic 815)" ("ASU 2017-12"). ASU 2017-12 expands derivative strategies that qualify for hedge accounting and amends presentation and disclosure requirements. The guidance was effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company elected to early-adopt ASU 2017-12 in the fourth quarter of fiscal year 2018. As required under the guidance, ASU 2017-12 was applied using the modified retrospective approach and its adoption did not have a material impact on the Company's consolidated financial statements.

In February 2018, the FASB issued Accounting Standards Update No. 2018-02, "Income Statement - Reporting Comprehensive Income (Topic 220) - Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income" ("ASU 2018-02") to address the disproportionate income tax effects on pretax amounts recorded in accumulated other comprehensive income (loss) resulting from the enactment of the Tax Cuts and Jobs Act in December 2017. Under the existing accounting guidance, companies were required to record the impact of changes in deferred income tax assets and liabilities from the enactment of the new law through income from continuing operations, including the impact related to pretax amounts recorded in accumulated other comprehensive income (loss). As a result, the income tax effects on amounts recorded in accumulated other comprehensive income (loss) were not reflective of the rates at which those amounts ultimately would be taxed. ASU 2018-02 permits companies to reclassify these disproportionate tax effects from accumulated other comprehensive income (loss) to retained earnings. It was effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company elected to early-adopt ASU 2018-02 in the fourth quarter of fiscal year 2018 and reclassify the disproportionate tax effects to retained earnings as allowed under the guidance. The reclassification increased accumulated other comprehensive loss and increased retained earnings by approximately \$12.4 million.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Pronouncements Adopted in Fiscal Year 2019*

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), which superseded substantially all of the current revenue recognition guidance under U.S. generally accepted accounting principles ("U.S. GAAP"), and was developed under a joint project with the International Accounting Standards Board ("IASB") to improve and converge the existing revenue recognition accounting guidance in U.S. GAAP and International Accounting Standards. Under ASU 2014-09, the central underlying principle is to recognize revenues when promised goods or services are transferred to customers at an amount determined by the consideration a company expects to receive for those goods or services. The guidance outlines a five-step process for determining the amount and timing of revenue to be recognized from those arrangements. ASU 2014-09 and various supplemental amendments were codified into the U.S. GAAP hierarchy in Section 606 of the FASB Accounting Standards Codification ("ASC 606"). The Company's implementation process for ASU 2014-09 included a comprehensive assessment of its contractual arrangements with customers that involved classifying those arrangements by specific revenue streams, documenting the relevant terms and conditions of the contracts, and determining the appropriate revenue recognition for those contracts under the new guidance. Through this process, the Company determined in all cases that revenue recognition under the new guidance based on the transfer of its goods and services to customers was substantially the same as under the prior guidance. The Company adopted ASU 2014-09 effective April 1, 2018, the beginning of fiscal year 2019. The adoption of ASU 2014-09 had no impact on the amount and timing of revenue recognized, and no adjustment for the cumulative effect of implementing the new guidance was required under the modified retrospective transition adoption method selected by the Company. The disclosures required for revenue recognition under the new guidance are provided in Note 2.

In January 2016, the FASB issued Accounting Standards Update No. 2016-01, "Financial Instruments - Recognition and Measurement of Financial Assets and Financial Liabilities" ("ASU 2016-01"). ASU 2016-01 requires all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in consolidation of the investee). The Company adopted ASU 2016-01 effective April 1, 2018, the beginning of fiscal year 2019. The adoption of ASU 2016-01 did not have a material effect on the Company's financial statements.

In August 2016, the FASB issued Accounting Standards Update No. 2016-15, "Statement of Cash Flows (Topic 230) - Classification of Certain Cash Receipts and Cash Payments" ("ASU 2016-15"). ASU 2016-15 provides guidance on the disclosure and classification of certain items within the statement of cash flows. The Company adopted ASU 2016-15 using the retrospective approach effective April 1, 2018, the beginning of fiscal year 2019. The adoption resulted in the reporting of life insurance proceeds as a cash flow from investing activities and a corresponding reclassification for the prior year period, but otherwise did not have a material effect on the Company's consolidated statement of cash flows for the years ended March 31, 2019, 2018, and 2017.

In October 2016, the FASB issued Accounting Standards Update No. 2016-16, "Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory" ("ASU 2016-16"). ASU 2016-16 requires companies to recognize the income tax effects of intercompany sales or transfers of assets other than inventory in the income statement as income tax expense in the period the sale or transfer occurs, rather than deferring those tax effects until the asset has been sold to a third-party or otherwise recognized in earnings through depreciation, amortization, or impairment. In prior fiscal reporting periods, various subsidiaries of the Company sold tobacco processing equipment to other subsidiaries, and the related income effects have been deferred as required under the previous accounting guidance. The Company adopted ASU 2016-16 effective April 1, 2018, the beginning of fiscal year 2019. Under the modified retrospective transition method required by the guidance, the Company recorded a \$1.9 million reduction to retained earnings for the year ended March 31, 2019 for the cumulative effect of recognizing the deferred income tax effects on all prior intercompany sales of equipment as of the date of adoption.

In March 2017, the FASB issued Accounting Standards Update No. 2017-07, "Compensation - Retirement Benefits (Topic 715)" ("ASU 2017-07"). ASU 2017-07 requires that an employer report the service cost component of pension or other postretirement benefits expense in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net periodic benefit cost are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations. With the adoption of ASU 2017-07, the service cost component of net periodic benefit cost continues to be reported in selling, general and administrative expenses in the consolidated statements of income, or in cost of goods sold for the portion that is recorded as a component of the cost of inventory sold or services provided to customers. The other components of net benefit cost, which include interest cost, expected return on plan assets, and the net amortization and deferral of actuarial gains and losses, are included in other non-operating income (expense) in the consolidated statements of income. The Company adopted ASU 2017-07 effective April 1, 2018, the beginning of fiscal year 2019. The financial statement presentation for comparative prior periods has been reclassified accordingly using amounts previously disclosed for net periodic benefit cost as a practical expedient. The components of net periodic benefit cost and other disclosures related to the Company's pension and other postretirement benefit plans are provided in Note 11.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Pronouncements to be Adopted in Future Periods*

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, "Leases (Topic 842)" ("ASU 2016-02"). ASU 2016-02 requires a lessee to recognize lease payment obligations as a lease liability and the corresponding right-of-use asset as a leased asset in the balance sheet for the term of the lease. This guidance supersedes Topic 840 "Leases" and is effective for fiscal years beginning after December 15, 2018. The Company will be required to adopt ASU 2016-02 effective April 1, 2019, which is the beginning of its fiscal year ending March 31, 2020. The process of cataloging the leasing arrangements for all subsidiaries and operating locations is substantially complete, including both traditional lease arrangements and other arrangements under various service and supply contracts that qualify as leases under ASU 2016-02. The Company has also made final determinations on the adoption of certain practical expedients for implementation that are provided for under the new guidance. The Company has licensed third-party software to track its leasing arrangements and account for the right-of-use assets and related lease obligations. The process of entering lease records and related details into the software platform is nearing completion.

In June 2016, the FASB issued Accounting Standards Update No. 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments" ("ASU 2016-13"). ASU 2016-13 replaces current methods for evaluating the impairment of financial instruments not measured at fair value with a model that reflects expected credit losses. Financial instruments to which ASU 2016-13 will apply for the Company include trade accounts receivable and advances to suppliers. The guidance in ASU 2016-13 is effective for fiscal years beginning after December 15, 2019. The Company will be required to adopt the new standard effective April 1, 2020, which is the beginning of its fiscal year ending March 31, 2021, and is currently evaluating the impact that the guidance will have on its consolidated financial statements.

In January 2017, the FASB issued Accounting Standards Update No. 2017-04, "Intangibles - Goodwill and Other (Topic 350)" ("ASU 2017-04"). Under current accounting guidance, the fair value of a reporting unit to which a specific goodwill balance relates is first compared to its carrying value in the financial statements (Step 1). If that comparison indicates that the goodwill is impaired, an implied fair value for the goodwill must then be calculated by deducting the individual fair values of all other assets and liabilities, including any unrecognized intangible assets, from the total fair value of the reporting unit (Step 2). ASU 2017-04 simplifies the accounting guidance by eliminating Step 2 from the goodwill impairment test and using the fair value of the reporting unit determined in Step 1 to measure the goodwill impairment loss. The updated guidance is effective for fiscal years beginning after December 15, 2019. The Company will be required to adopt ASU 2017-04 effective April 1, 2020, which is the beginning of its fiscal year ending March 31, 2021, and is currently evaluating the impact that the updated guidance will have on its consolidated financial statements.

**Reclassifications**

Certain prior year amounts have been reclassified to conform to the current year's presentation.

**NOTE 2. REVENUE FROM CONTRACTS WITH CUSTOMERS**

The majority of the Company's consolidated revenue consists of sales of processed leaf tobacco to customers. The Company also earns revenue from processing leaf tobacco owned by customers and from various other services provided to customers. Payment terms with customers vary depending on customer creditworthiness, product types, services provided, and other factors. Contract durations and payment terms for all revenue categories generally do not exceed one year. Therefore, the Company has applied a practical expedient to not adjust the transaction price for the effects of financing components, as the Company expects that the period from the time the revenue for a transaction is recognized to the time the customer pays for the related good or service transferred will be one year or less. Below is a description of the major revenue-generating categories from contracts with customers.

*Tobacco Sales*

The majority of the Company's business involves purchasing leaf tobacco from farmers in the origins where it is grown, processing and packing the tobacco in its factories, and then transferring ownership and control of the tobacco to customers. On a much smaller basis, the Company also sources processed tobacco from third-party suppliers for resale to customers. The contracts for tobacco sales with customers create a performance obligation to transfer tobacco to the customer. Transaction prices for the sale of tobaccos are primarily based on negotiated fixed prices, but the Company does have a small number of cost-plus contracts with certain customers. Cost-plus arrangements provide the Company reimbursement of the cost to purchase and process the tobacco, plus a contractually agreed-upon profit margin. The Company utilizes the most likely amount methodology under the accounting guidance to recognize revenue for cost-plus arrangements with customers. Shipping and handling costs under tobacco sales contracts with customers are treated as fulfillment costs and included in the transaction price. Taxes assessed by government authorities on the sale of leaf tobacco products are excluded from the transaction price. At the point in time that the customer obtains control over the tobacco, which is typically aligned with physical shipment under the contractual terms with the customer, the Company completes its performance obligation and recognizes the revenue for the sale.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Processing Revenue*

Processing and packing of customer-owned leaf tobacco is a short-duration process. Processing charges are primarily based on negotiated fixed prices per unit of weight processed. Under normal operating conditions, customer-owned raw tobacco that is placed into the production line exits as processed and packed tobacco within one hour and is then later transported to customer-designated storage facilities. The revenue for these services is recognized when the performance obligation is satisfied, which is generally when processing is completed. The Company's operating history and contract analyses indicate that customer requirements for processed tobacco are consistently met upon completion of processing.

*Other Revenue*

From time to time, the Company enters into various arrangements with customers to provide other value-added services that may include blending, chemical and physical testing of tobacco, and service cutting for select manufacturers. These other arrangements are a much smaller portion of the Company's business, are typically less frequent, and are separate and distinct contractual agreements from the Company's tobacco sales or processing arrangements with customers. The transaction prices and timing of revenue recognition of these items are determined by the specifics of each contract.

*Disaggregation of Revenue from Contracts with Customers*

The following table disaggregates the Company's revenue by significant revenue-generating category:

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
Tobacco sales .....	\$ 2,089,770	\$ 1,898,303	\$ 1,943,033
Processing revenue.....	85,426	78,042	63,840
Other sales and revenue from contracts with customers.....	37,930	42,579	40,509
Total revenue from contracts with customers .....	2,213,126	2,018,924	2,047,382
Other operating sales and revenues.....	14,027	15,023	23,836
Consolidated sales and other operating revenues .....	<u>\$ 2,227,153</u>	<u>\$ 2,033,947</u>	<u>\$ 2,071,218</u>

Other operating sales and revenues consists principally of interest on advances to suppliers and dividend income from unconsolidated affiliates.

**NOTE 3. RESTRUCTURING AND IMPAIRMENT COSTS**

During the fiscal years ended March 31, 2019 and 2017, Universal recorded restructuring and impairment costs related to business changes and various initiatives to adjust certain operations and reduce costs. Those costs primarily related to operations that are part of the Other Regions reportable segment of the Company's flue-cured and burley leaf tobacco operations. There were no restructuring or impairment costs recorded for the fiscal year ended March 31, 2018.

*Fiscal Year Ended March 31, 2019*

Universal began sourcing tobacco from Tanzania through third parties in the 1950's. As the country became a more significant and important origin for tobacco exports, the Company established an operating subsidiary there in 1968 to enable direct procurement and, in 1997, acquired the only leaf tobacco processing facility in the country at that time through a government privatization initiative. Significant investments were made to upgrade, expand, and modernize the processing facility over the years following that acquisition. The expansion of the Company's buying operations and the factory investments were instrumental in promoting and accommodating significant growth in Tanzanian tobacco production. Total production peaked in 2011, but has since declined more than 60%, reflecting reduced customer demand for the leaf styles grown in Tanzania, primarily due to increased costs and prices for those tobaccos in the field relative to other markets, together with declining global tobacco consumption and initiatives by major multinational cigarette manufacturers to streamline their supply chains. Given the decline in customer demand over recent crop years, as well as regulatory, tax, and other business and operating considerations, the Company undertook a formal review of the Tanzania leaf tobacco market and its operations there in the third quarter of fiscal year 2019. Based on that review, the Company's operating subsidiaries in Tanzania reduced contracted leaf purchase volumes and took specific steps to reduce operating costs going into the upcoming crop year, including actions to substantially discontinue a year-round workforce. As a result of that initiative, the subsidiaries recorded a \$4.0 million restructuring charge for termination benefits paid to employees whose permanent positions were eliminated. The subsidiaries have hired employees on a seasonal basis to handle the buying, processing, and shipment of the upcoming crop.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

In addition to the actions taken with respect to the workforce in Tanzania, based on its review, the Company determined that indicators of impairment in the carrying value of the property, plant and equipment comprising the Tanzania operations were present at December 31, 2018, due to the estimated decrease in production volumes, profitability, and net cash flows for the upcoming crop year, expected further reductions in subsequent crop years, and increased prospects for discontinuing processing operations or potentially exiting the Tanzania market entirely within the next several years. Accordingly, based on the applicable accounting guidance, the Company tested the recoverability of those long-lived assets using undiscounted estimates of the future cash flows from the use of those assets and their eventual disposition. The property, plant and equipment was evaluated for recoverability using two distinct asset groups: (1) the land, building, and equipment comprising the processing facility, and (2) all remaining assets, which are substantially devoted to buying and receiving delivery of unprocessed leaf from farmers and marketing and shipping the processed tobacco to customers. The recoverability tests indicated that both asset groups were impaired at December 31, 2018. As a result, the Company determined the fair value of each asset group based principally on a probability-weighting of the discounted cash flows expected under multiple operating and disposition scenarios. An impairment charge of approximately \$14.6 million was recorded to reduce the carrying value of the assets to their indicated fair values. All of the property, plant and equipment assets will continue to be used in buying, processing, and shipping the upcoming crop, and they remain classified as “held and used” at this time as provided for under the accounting guidance. Should the expected cash flows from the future use and/or disposition of the assets change from the estimates on which their fair values were determined, additional impairment charges could be required, or gains or losses on any disposition of the assets could be recorded. In addition to the property, plant and equipment, the Company had goodwill related to the Tanzanian operations of approximately \$0.9 million which was separately tested for recoverability and fully written off based on the results of that test.

Additional restructuring costs of approximately \$0.9 million were incurred in connection with downsizing efforts at other locations around the Company during fiscal year 2019.

*Fiscal Year Ended March 31, 2017*

In fiscal year 2017, the Company recorded restructuring and impairment costs totaling \$4.4 million, primarily related to the Company's decision to close its tobacco processing facility in Hungary. The Company now processes tobaccos sourced from Hungary in its factories in Italy. The costs incurred for the change in operations in Hungary included statutory employee termination benefits and impairment charges related to certain property and equipment. Restructuring costs were also incurred in connection with downsizing efforts at other locations around the Company.

A summary of the restructuring and impairment costs incurred during the fiscal years ended March 31, 2019 and 2017, is as follows:

	<b>Fiscal Years Ended March 31,</b>	
	<b>2019</b>	<b>2017</b>
<b>Restructuring Costs:</b>		
Employee termination benefits .....	\$ 4,608	\$ 2,083
Other restructuring costs .....	223	—
	<u>4,831</u>	<u>2,083</u>
<b>Impairment Costs:</b>		
Property, plant, and equipment and farmer loans .....	14,584	2,276
Goodwill .....	889	—
	<u>\$ 15,473</u>	<u>\$ 2,276</u>
Total restructuring and impairment costs .....	<u>\$ 20,304</u>	<u>\$ 4,359</u>

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

A reconciliation of the Company’s liability for employee termination benefits and other restructuring costs for fiscal years 2017 through 2019 is as follows:

	<b>Employee Termination Benefits</b>	<b>Other Costs</b>	<b>Total</b>
Balance at April 1, 2016.....	\$ 79	\$ 202	\$ 281
<b>Fiscal Year 2017 Activity:</b>			
Costs charged to expense .....	2,083	—	2,083
Payments .....	(1,861)	(159)	(2,020)
Balance at March 31, 2017 .....	301	43	344
<b>Fiscal Year 2018 Activity:</b>			
Payments .....	(272)	(43)	(315)
Balance at March 31, 2018 .....	29	—	29
<b>Fiscal Year 2019 Activity:</b>			
Costs charged to expense .....	4,608	223	4,831
Payments .....	(4,014)	—	(4,014)
Balance at March 31, 2019 .....	<u>\$ 623</u>	<u>\$ 223</u>	<u>\$ 846</u>

The restructuring liability at March 31, 2019 is expected to be paid during fiscal year 2020. Universal continually reviews its business for opportunities to realize efficiencies, reduce costs, and realign its operations in response to business changes. The Company may incur additional restructuring and impairment costs in future periods as business changes occur and additional cost savings initiatives are implemented.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 4. EARNINGS PER SHARE**

The following table sets forth the computation of basic and diluted earnings per share:

(in thousands, except share and per share data)	Fiscal Year Ended March 31,		
	2019	2018	2017
<b>Basic Earnings Per Share</b>			
<b>Numerator for basic earnings per share</b>			
Net income attributable to Universal Corporation .....	\$ 104,121	\$ 105,662	\$ 106,304
Less: Dividends on convertible perpetual preferred stock .....	—	—	(11,061)
Less: Cost in excess of carrying value on conversion or repurchase of convertible perpetual preferred stock .....	—	—	(74,353)
Earnings available to Universal Corporation common shareholders for calculation of basic earnings per share .....	104,121	105,662	20,890
<b>Denominator for basic earnings per share</b>			
Weighted average shares outstanding.....	25,129,192	25,274,975	23,433,860
<b>Basic earnings per share</b> .....	<u>\$ 4.14</u>	<u>\$ 4.18</u>	<u>\$ 0.89</u>
<b>Diluted Earnings Per Share</b>			
<b>Numerator for diluted earnings per share</b>			
Earnings available to Universal Corporation common shareholders .....	\$ 104,121	\$ 105,662	\$ 20,890
<b>Denominator for diluted earnings per share:</b>			
Weighted average shares outstanding.....	25,129,192	25,274,975	23,433,860
Effect of dilutive securities (if conversion or exercise assumed)			
Employee and outside director share-based awards .....	201,245	233,169	336,228
Denominator for diluted earnings per share .....	25,330,437	25,508,144	23,770,088
<b>Diluted earnings per share</b> .....	<u>\$ 4.11</u>	<u>\$ 4.14</u>	<u>\$ 0.88</u>

In December 2016, 111,072 shares of the Company's Series B 6.75% Convertible Perpetual Preferred Stock were converted into approximately 2.5 million shares of the Company's common stock. In January 2017, the Company announced a mandatory conversion of all 107,418 remaining outstanding shares of the preferred stock after meeting the requirements to initiate the mandatory conversion under the original terms of the preferred shares. The Company chose to satisfy the conversion obligation for the mandatory conversion in cash. Although the conversions of the preferred stock into common stock or for cash did not impact the Company's net income, the shares converted for cash under the mandatory conversion in January 2017 resulted in a one-time reduction of retained earnings of approximately \$74.4 million during the fourth quarter ended March 31, 2017, representing the excess of the conversion cost over the carrying value of those shares. The reduction in retained earnings resulted in a corresponding one-time reduction of earnings available to common shareholders for the fiscal year ended March 31, 2017 for purposes of determining the amounts reported for basic and diluted earnings per share. The effects of the conversions on the computation of basic and diluted earnings per share for the fiscal year ended March 31, 2017, are included in the table above. See Note 12 for additional information.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 5. INCOME TAXES**

The Company operates in the United States and many foreign countries and is subject to the tax laws of many jurisdictions. Changes in tax laws or the interpretation of tax laws can affect the Company's earnings, as can the resolution of pending and contested tax issues. The Company's consolidated effective income tax rate is affected by a number of factors, including the mix of domestic and foreign earnings and the effect of exchange rate changes on local taxable income and deferred taxes in foreign countries.

In December 2017, the Tax Cuts and Jobs Act of 2017 was passed by the United States Congress and signed into law by the President. This new law made significant changes to income taxation at the federal level for individuals, pass-through entities, and corporations. For corporations, the changes included a reduction in the statutory rate on taxable income from 35% to 21%, and a move from a worldwide tax system to a system that is more territorial-based for companies with foreign operations. To accommodate the move from the previous worldwide tax system, the new law provided for a one-time transition tax on the undistributed post-1986 earnings of foreign subsidiaries as of either November 2, 2017 or December 31, 2017, whichever undistributed earnings amount was greater. Other provisions of the new law allow for immediate expensing of investments in property, plant, and equipment, and impose limitations on the deductibility of interest, executive compensation, and meals and entertainment expense. For tax years beginning after the date of enactment, the new law requires that certain income earned by foreign subsidiaries, referred to in the law as global intangible low-taxed income ("GILTI"), be included in the U.S. taxable income of the parent company. The Company has made an accounting policy election to account for any additional tax resulting from the GILTI provisions in the year in which it is incurred and has not recorded any deferred taxes on temporary book-tax differences related to this income. For the fiscal year ended March 31, 2019, the Company's U.S. federal statutory tax rate is the 21.0% rate under the new law. For the fiscal year ended March 31, 2018, the Company's U.S. federal statutory tax rate was 31.5%, reflecting a portion of the year at the 35% rate under the old law and a portion at the 21% rate under the new law. As in prior years, the Company continues to assume repatriation of all undistributed earnings of its consolidated foreign subsidiaries and has therefore provided for expected foreign withholding taxes on the distribution of those earnings where applicable, net of any U.S. tax credit attributable to those withholding taxes. The Company has asserted permanent reinvestment of the book basis of certain foreign subsidiaries, and accordingly, no deferred income tax liability has been recorded for any potential taxable gain that may be realized on a future disposition or liquidation of any of those subsidiaries. It is not practicable for the Company to quantify any deferred income tax liability that would be attributable to those events.

Under the applicable accounting guidance, the Company accounted for the effects of the changes in the U.S. tax law in the period in which they were enacted, which was the third quarter of fiscal year 2018. Due to the complexities associated with understanding and applying various aspects of the new law and quantifying or estimating amounts upon which calculations required to account for new law were based, the U.S. Securities and Exchange Commission ("SEC") issued guidance permitting corporations to record and report specific items impacted by the new law on a provisional basis using reasonable estimates where final amounts had not been determined. The guidance allowed a measurement period of no more than one year from the date of enactment of the new law to complete all adjustments to amounts recorded on a provisional basis. The new tax law resulted in a one-time reduction of income tax expense of \$4.5 million for fiscal year 2018, reflecting provisional amounts initially recorded in the third quarter upon enactment, followed by subsequent adjustments to those provisional amounts in the fourth quarter. The reduction of income tax expense from the enactment of the new law was primarily attributable to the adjustment of recorded deferred tax assets and liabilities to the tax rates at which they are expected to reverse in the future, as well as the reduction of the liability previously recorded for U.S. income taxes on the undistributed earnings of foreign subsidiaries to the amounts to be paid under the one-time transition tax provisions of the new law. Adjustments to the amounts recorded for the enactment of the new law were not material after the fourth quarter of fiscal year 2018, and all effects that were previously accounted for on a provisional basis were designated as final during the third quarter of fiscal year 2019.

The effect of the new law in fiscal year 2018 included a \$7.8 million net increase in income tax expense from remeasuring net deferred tax assets to the new lower rates at which they are expected to reverse, generally the 21% U.S. federal statutory tax rate. That net increase included approximately \$12.4 million of net tax expense from remeasuring net deferred tax assets attributable to pension and other postretirement benefit plans, foreign currency translation adjustments, and other amounts that were recorded through other comprehensive income to the new lower rates, which initially left disproportionate tax effects recorded on the pretax amounts in accumulated other comprehensive income (loss). As discussed in Note 1, the FASB issued ASU 2018-02 "Income Statement - Reporting Comprehensive Income (Topic 220) - Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income" to address this issue by allowing companies to reclassify the disproportionate tax effects from accumulated other comprehensive income (loss) to retained earnings. The Company elected to early-adopt ASU 2018-02 in the fourth quarter of fiscal year 2018 and chose to reclassify the disproportionate tax effects. The reclassification increased accumulated other comprehensive loss and increased retained earnings by approximately \$12.4 million in fiscal year 2018.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Income Tax Expense**

Income taxes for the fiscal years ended March 31, 2019, 2018, and 2017 consisted of the following:

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
<b>Current</b>			
United States.....	\$ (2,639)	\$ 1,110	\$ 3,422
State and local .....	377	175	147
Foreign.....	39,578	60,356	36,537
	<u>37,316</u>	<u>61,641</u>	<u>40,106</u>
<b>Deferred</b>			
United States.....	5,713	(20,052)	5,434
State and local .....	(4)	68	561
Foreign.....	(1,837)	8,852	10,631
	<u>3,872</u>	<u>(11,132)</u>	<u>16,626</u>
Total .....	<u>\$ 41,188</u>	<u>\$ 50,509</u>	<u>\$ 56,732</u>

Foreign taxes include any applicable U.S. tax expense on the earnings of foreign subsidiaries.

**Consolidated Effective Income Tax Rate**

A reconciliation of the U.S. federal statutory tax rate to the Company's effective income tax rate is as follows:

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
U.S. federal statutory tax rate.....	21.0%	31.5%	35.0%
State income taxes, net of federal benefit .....	0.2	0.1	0.3
Dividends received from deconsolidated operations .....	—	(1.4)	(2.3)
Foreign earnings taxed at rates other than the U.S. federal statutory tax rate .....	7.1	2.8	—
Foreign dividend withholding taxes.....	3.7	(0.2)	—
Reversal of dividend withholding tax due to foreign subsidiary tax holiday .....	(5.1)	—	—
Effects of new tax law:			
Adjustment of deferred tax assets and liabilities to lower tax rate .....	—	4.6	—
Reduction of U.S. tax liability on undistributed foreign earnings to amounts payable under one-time transition tax .....	—	(8.3)	—
Other, including changes in liabilities recorded for uncertain tax positions.....	0.3	1.2	0.5
Effective income tax rate .....	<u>27.2%</u>	<u>30.3%</u>	<u>33.5%</u>

During fiscal year 2019, the Company reversed amounts previously recorded for dividend withholding taxes on distributed and undistributed retained earnings of a foreign subsidiary. The reversal followed the resolution of uncertainties with the local country taxing authorities with respect to the inclusion of the tax under a tax holiday applicable to the subsidiary and was attributable to cumulative retained earnings amounts previously distributed or expected to be distributed prior to the expiration of the tax holiday. The reversal reduced income tax expense for fiscal year 2019 by approximately \$7.8 million, which decreased the effective tax rate for the year by 5.1%, as noted in the above rate reconciliation.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Components of Income Before Income Taxes**

The U.S. and foreign components of income before income taxes were as follows:

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
United States .....	\$ 37,478	\$ 10,442	\$ 31,468
Foreign .....	113,844	156,235	137,770
Total .....	<u>\$ 151,322</u>	<u>\$ 166,677</u>	<u>\$ 169,238</u>

**Deferred Income Tax Liabilities and Assets**

Significant components of deferred tax liabilities and assets were as follows:

	<b>March 31,</b>	
	<b>2019</b>	<b>2018</b>
<b>Liabilities</b>		
Foreign withholding taxes .....	\$ 20,659	\$ 25,987
Undistributed earnings .....	6,579	8,636
Goodwill .....	19,529	19,529
All other .....	7,088	9,039
Total deferred tax liabilities .....	<u>\$ 53,855</u>	<u>\$ 63,191</u>
<b>Assets</b>		
Employee benefit plans .....	\$ 20,467	\$ 21,714
Reserves and accruals .....	7,898	9,673
Deferred income .....	3,829	4,878
Currency translation losses of foreign subsidiaries .....	1,993	1,993
Local currency exchange losses of foreign subsidiaries .....	1,252	843
All other .....	4,987	6,522
Total deferred tax assets .....	<u>40,426</u>	<u>45,623</u>
Valuation allowance .....	<u>(1,798)</u>	<u>(1,040)</u>
Net deferred tax assets .....	<u>\$ 38,628</u>	<u>\$ 44,583</u>

At March 31, 2019, the Company had no material net operating loss carryforwards in either its domestic or foreign operations.

**Combined Income Tax Expense (Benefit)**

The combined income tax expense (benefit) allocable to continuing operations and other comprehensive income was as follows:

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
Continuing operations .....	\$ 41,188	\$ 50,509	\$ 56,732
Other comprehensive income (loss) .....	(5,390)	23,471	1,503
Total .....	<u>\$ 35,798</u>	<u>\$ 73,980</u>	<u>\$ 58,235</u>

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Uncertain Tax Positions**

A reconciliation of the beginning and ending balance of the gross liability for uncertain tax positions for the fiscal years ended March 31, 2019, 2018, and 2017, is as follows:

	<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
Liability for uncertain tax positions, beginning of year.....	\$ 3,673	\$ 2,426	\$ 2,407
Additions:			
Related to tax positions for the current year.....	85	107	94
Related to tax positions for prior years .....	2,169	1,310	—
Reductions:			
Due to lapses of statutes of limitations.....	(90)	(104)	(112)
Related to tax positions for prior years .....	—	—	(3)
Effect of currency rate changes .....	(212)	(66)	40
Liability for uncertain tax positions, end of year .....	<u>\$ 5,625</u>	<u>\$ 3,673</u>	<u>\$ 2,426</u>

Of the total liability for uncertain tax positions at March 31, 2019, approximately \$5.5 million could have an effect on the consolidated effective tax rate if the tax benefits are recognized. The liability for uncertain tax positions includes \$0.1 million related to tax positions for which it is reasonably possible that the amounts could change significantly before March 31, 2020. This amount reflects a possible decrease in the liability for uncertain tax positions that could result from the completion and resolution of tax audits and the expiration of open tax years in various tax jurisdictions.

The Company recognizes accrued interest related to uncertain tax positions as interest expense, and it recognizes penalties as a component of income tax expense. Amounts accrued or reversed for interest and penalties were not material for any of the fiscal years 2017 through 2019, and liabilities recorded for interest and penalties at March 31, 2019 and 2018 also were not material.

Universal and its subsidiaries file a U.S. federal consolidated income tax return, as well as returns in several U.S. states and a number of foreign jurisdictions. As of March 31, 2019, the Company's earliest open tax year for U.S. federal income tax purposes was its fiscal year ended March 31, 2015. Open tax years in state and foreign jurisdictions generally range from 3 to 6 years.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 6. CREDIT FACILITIES**

**Bank Credit Agreement**

On December 20, 2018, the Company entered into a new senior unsecured bank credit agreement that includes a \$430 million five-year revolving credit facility (expiring December 20, 2023), a \$150 million five-year term loan (due December 20, 2023), and a \$220 million seven-year term loan (due December 20, 2025). The new agreement, which replaced the Company's previous bank credit agreement dated December 30, 2014, effectively extended the term of the former agreement with no other significant changes. Borrowings under the revolving credit facility bear interest at a variable rate based on either (1) LIBOR plus a margin that is based on the Company's credit measures or (2) the higher of the federal funds rate plus 0.5%, prime rate, or one-month LIBOR plus 1.0%, each plus a margin. In addition to interest, the Company pays a facility fee on the revolving credit facility. No amounts were outstanding under the revolving credit facility at March 31, 2019. The credit agreement provides for an expansion of the facility under certain conditions to allow additional borrowings of up to \$200 million. Additional information related to the term loans is provided in Note 7. The credit agreement includes financial covenants that require the Company to maintain a minimum level of tangible net worth and observe limits on debt levels. The Company was in compliance with those covenants at March 31, 2019.

**Short-Term Credit Facilities**

The Company maintains short-term uncommitted lines of credit in the United States and in a number of foreign countries. Foreign borrowings are generally in the form of overdraft facilities at rates competitive in the countries in which the Company operates. Generally, each foreign line is available only for borrowings related to operations of a specific country. As of March 31, 2019 and 2018, approximately \$54 million and \$45 million, respectively, were outstanding under these uncommitted lines of credit. The weighted-average interest rates on short-term borrowings outstanding as of March 31, 2019 and 2018, were approximately 4.6% and 3.4%, respectively. At March 31, 2019, the Company and its consolidated affiliates had unused uncommitted lines of credit totaling approximately \$198 million.

**NOTE 7. LONG-TERM DEBT**

The Company's long-term debt at March 31, 2019 and 2018 consisted of the following:

	<b>March 31,</b>	
	<b>2019</b>	<b>2018</b>
Senior bank term loans .....	\$ 370,000	\$ 370,000
Total outstanding .....	370,000	370,000
Less: current portion .....	—	—
Less: unamortized debt issuance costs .....	(1,497)	(914)
Long-term debt .....	<u>\$ 368,503</u>	<u>\$ 369,086</u>

As discussed in Note 6, on December 20, 2018, the Company entered into a new bank credit agreement that replaced its previous bank credit agreement dated December 30, 2014. Except for extending the maturity dates of the underlying components of the facility and providing for a larger expansion feature, the new agreement is substantially the same as the prior agreement, including a \$150 million five-year term loan and a \$220 million seven-year term loan. Both term loans were fully funded at closing, require no amortization, and are prepayable without penalty prior to maturity. Under the credit agreement, both term loans bear interest at variable rates plus a margin based on the Company's credit measures. The \$150 million five-year term loan matures in December 2023, and the \$220 million seven-year term loan matures in December 2025.

As discussed in Note 9, the Company had receive-floating/pay-fixed interest rate swap agreements in place with respect to the prior loans that were initially designated and carried over to hedge the variable interest payments on the new loans. Those swap agreements were subsequently terminated in February 2019 and concurrently replaced with new interest rate swap agreements that will continue to convert the variable benchmark rate to a fixed rate through December 20, 2023 for the five-year term loan and through December 20, 2025 for the seven-year term loan. The proceeds received for the fair value of the terminated interest rate swap agreements, approximately \$5.4 million, is being amortized from accumulated other comprehensive income into earnings as a reduction of interest expense through their original maturity dates. With the new swap agreements in place, the effective interest rates on the \$150 million five-year loan and the \$220 million seven-year loan were 3.94% and 4.26%, respectively, at March 31, 2019. The effective rates will change only if a change in the Company's credit measures results in adjustments to the applicable credit spreads specified in the underlying loan agreement.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

In November 2017, the Company filed an undenominated universal shelf registration statement with the U.S. Securities and Exchange Commission to provide for the future issuance of an undefined amount of additional debt or equity securities as determined by the Company and offered in one or more prospectus supplements prior to issuance.

Disclosures about the fair value of long-term debt are provided in Note 10.

**NOTE 8. LEASES**

The Company's subsidiaries lease various production, storage, distribution, and other facilities, as well as vehicles and equipment used in their operations. Some of the leases have options to extend the lease term at market rates. These arrangements are classified as operating leases for accounting purposes. Rent expense on operating leases totaled \$17.3 million in fiscal year 2019, \$16.0 million in fiscal year 2018, and \$15.3 million in fiscal year 2017. Future minimum payments under non-cancelable operating leases total \$13.4 million in 2020, \$9.0 million in 2021, \$5.8 million in 2022, \$4.6 million in 2023, \$3.6 million in 2024, and \$11.4 million after 2024.

**NOTE 9. DERIVATIVES AND HEDGING ACTIVITIES**

Universal is exposed to various risks in its worldwide operations and uses derivative financial instruments to manage two specific types of risks – interest rate risk and foreign currency exchange rate risk. Interest rate risk has been managed by entering into interest rate swap agreements, and foreign currency exchange rate risk has been managed by entering into forward foreign currency exchange contracts. However, the Company's policy also permits other types of derivative instruments. In addition, foreign currency exchange rate risk is also managed through strategies that do not involve derivative instruments, such as using local borrowings and other approaches to minimize net monetary positions in non-functional currencies. The disclosures below provide additional information about the Company's hedging strategies, the derivative instruments used, and the effects of these activities on the consolidated statements of income and comprehensive income and the consolidated balance sheets. In the consolidated statements of cash flows, the cash flows associated with all of these activities are reported in net cash provided by operating activities.

*Cash Flow Hedging Strategy for Interest Rate Risk*

In February 2019, the Company entered into receive-floating/pay-fixed interest rate swap agreements that were designated and qualify as hedges of the exposure to changes in interest payment cash flows created by fluctuations in variable interest rates on two outstanding non-amortizing bank term loans that were funded as part of a new bank credit facility in December 2018 (see Notes 6 and 7). Although no significant ineffectiveness is expected with this hedging strategy, the effectiveness of the interest rate swaps is evaluated on a quarterly basis. At March 31, 2019, the total notional amount of the interest rate swaps was \$370 million, which corresponded with the aggregate outstanding balance of the term loans.

Previously, the Company had receive-floating/pay-fixed interest rate swap agreements that were designated and qualified as cash flow hedges for two outstanding non-amortizing bank loans that were repaid concurrent with closing on the new bank credit facility. Those swap agreements, which had an aggregate notional amount of \$370 million reflecting the total principal balance outstanding on the loans, were initially designated and carried over to hedge the variable interest payments on the new loans, and then subsequently terminated in February 2019 concurrent with the inception of the new swap agreements. The fair value of the previous swap agreements, approximately \$5.4 million, was received from the counterparties upon termination and is being amortized from accumulated other comprehensive loss into earnings as a reduction of interest expense through the original maturity dates of those agreements.

*Cash Flow Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Forecast Purchases of Tobacco and Related Processing Costs*

The majority of the tobacco production in most countries outside the United States where Universal operates is sold in export markets at prices denominated in U.S. dollars. However, purchases of tobacco from farmers and most processing costs (such as labor and energy) in those countries are usually denominated in the local currency. Changes in exchange rates between the U.S. dollar and the local currencies where tobacco is grown and processed affect the ultimate U.S. dollar cost of the processed tobacco. From time to time, the Company enters into forward and option contracts to sell U.S. dollars and buy the local currency at future dates that coincide with the expected timing of a portion of the tobacco purchases and processing costs. This strategy offsets the variability of future U.S. dollar cash flows for tobacco purchases and processing costs for the foreign currency notional amount hedged. This hedging strategy has been used mainly for tobacco purchases and processing costs in Brazil, although the Company has also recently entered forward contracts to hedge exchange rate risk for a portion of the forecast tobacco purchases from the upcoming crop in Mozambique. The aggregate U.S. dollar notional amount of forward and option contracts entered for these purposes during fiscal years 2019, 2018, and 2017 was as follows:

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

(in millions)	Fiscal Year Ended March 31,		
	2019	2018	2017
Tobacco purchases .....	\$ 76.9	\$ 43.3	\$ 70.7
Processing costs .....	19.8	17.1	24.0
Total .....	\$ 96.7	\$ 60.4	\$ 94.7

Variations in exchange rates and in the amount and timing of fixed-price orders from customers for their purchases from individual crop years routinely cause variations in the U.S. dollar notional amount of forward contracts entered into from one year to the next. The increased U.S. dollar notional amounts for tobacco purchases and processing costs hedged during fiscal year 2019 reflect those variations, as well as the additional hedging of forecast tobacco purchases in Mozambique. All contracts related to tobacco purchases were designated and qualified as hedges of the future cash flows associated with the forecast purchases of tobacco. As a result, changes in fair values of the forward and option contracts have been recognized in comprehensive income as they occurred, but only recognized in earnings upon sale of the related tobacco to third-party customers. Forward and option contracts related to processing costs have not been designated as hedges, and gains and losses on those contracts have been recognized in earnings on a mark-to-market basis.

For substantially all hedge gains and losses recorded in accumulated other comprehensive loss at March 31, 2019, the Company expects to complete the sale of the tobacco and recognize the amounts in earnings during fiscal year 2020. At March 31, 2019, all hedged forecast purchases of tobacco not yet completed remained probable of occurring within the originally designated time period and, as a result, no hedges had been discontinued. Purchases of the 2019 crops in Brazil and Mozambique are expected to be completed by July 2019, and all forward contracts to hedge those purchases will mature and be settled by that time.

*Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Net Local Currency Monetary Assets and Liabilities of Foreign Subsidiaries*

Most of the Company's foreign subsidiaries transact the majority of their sales in U.S. dollars and finance the majority of their operating requirements with U.S. dollar borrowings, and therefore use the U.S. dollar as their functional currency. These subsidiaries normally have certain monetary assets and liabilities on their balance sheets that are denominated in the local currency. Those assets and liabilities can include cash and cash equivalents, accounts receivable and accounts payable, advances to farmers and suppliers, deferred income tax assets and liabilities, recoverable value-added taxes, and other items. Net monetary assets and liabilities denominated in the local currency are remeasured into U.S. dollars each reporting period, generating gains and losses that the Company records in earnings as a component of selling, general, and administrative expenses. The level of net monetary assets or liabilities denominated in the local currency normally fluctuates throughout the year based on the operating cycle, but it is most common for monetary assets to exceed monetary liabilities, sometimes by a significant amount. When this situation exists and the local currency weakens against the U.S. dollar, remeasurement losses are generated. Conversely, remeasurement gains are generated on a net monetary asset position when the local currency strengthens against the U.S. dollar. To manage a portion of its exposure to currency remeasurement gains and losses, the Company enters into forward contracts to buy or sell the local currency at future dates coinciding with expected changes in the overall net local currency monetary asset position of the subsidiary. Gains and losses on the forward contracts are recorded in earnings as a component of selling, general, and administrative expenses for each reporting period as they occur, and thus directly offset the related remeasurement losses or gains in the consolidated statements of income for the notional amount hedged. The Company does not designate these contracts as hedges for accounting purposes. The contracts are generally arranged to hedge the subsidiary's projected exposure to currency remeasurement risk for specified periods of time, and new contracts are entered as necessary throughout the year to replace previous contracts as they mature. During the fiscal years ended March 31, 2019, 2018, and 2017, the Company used forward currency contracts to manage its exposure to currency remeasurement risk in Brazil. The total notional amounts of contracts outstanding at March 31, 2019 and 2018, were approximately \$24.8 million and \$27.3 million, respectively. To further mitigate currency remeasurement exposure, the Company's foreign subsidiaries may utilize short-term local currency financing during certain periods. This strategy, while not involving the use of derivative instruments, is intended to minimize the subsidiary's net monetary position by financing a portion of the local currency monetary assets with local currency monetary liabilities and thus hedging a portion of the overall position.

Several of the Company's foreign subsidiaries transact the majority of their sales and finance the majority of their operating requirements in their local currency, and therefore use their respective local currencies as the functional currency for reporting purposes. From time to time, these subsidiaries sell tobacco to customers in transactions that are not denominated in the functional currency. In those situations, the subsidiaries routinely enter into forward exchange contracts to offset currency risk for the period of time that a fixed-price order and the related trade account receivable are outstanding with the customer. The contracts are not designated as hedges for accounting purposes.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Effect of Derivative Financial Instruments on the Consolidated Statements of Income*

The table below outlines the effects of the Company's use of derivative financial instruments on the consolidated statements of income for the fiscal years ended March 31, 2019, 2018, and 2017.

	Fiscal Year Ended March 31,		
	2019	2018	2017
<b>Cash Flow Hedges - Interest Rate Swap Agreements</b>			
Derivative			
Effective Portion of Hedge			
Gain (loss) recorded in accumulated other comprehensive loss .....	\$ (7,496)	\$ 4,869	\$ 8,999
Gain (loss) reclassified from accumulated other comprehensive loss into earnings .....	\$ 1,689	\$ (1,244)	\$ (3,916)
Gain on terminated interest rate swaps amortized from accumulated other comprehensive loss into earnings .....	\$ 260	\$ —	\$ —
Location of gain (loss) reclassified from accumulated other comprehensive loss into earnings .....	Interest expense		
Ineffective Portion of Hedge			
Gain (loss) recognized in earnings .....	\$ —	\$ —	\$ —
Location of gain (loss) recognized in earnings .....	Selling, general and administrative expenses		
Hedged Item			
Description of hedged item .....	Floating rate interest payments on term loans		
<b>Cash Flow Hedges - Forward Foreign Currency Exchange Contracts</b>			
Derivative			
Effective Portion of Hedge			
Gain (loss) recorded in accumulated other comprehensive loss .....	\$ (2,623)	\$ (1,204)	\$ 454
Gain (loss) reclassified from accumulated other comprehensive loss into earnings .....	\$ (3,034)	\$ (1,099)	\$ 945
Location of gain (loss) reclassified from accumulated other comprehensive loss into earnings .....	Cost of goods sold		
Ineffective Portion and Early De-designation of Hedges			
Gain (loss) recognized in earnings .....	\$ —	\$ (5)	\$ 246
Location of gain (loss) recognized in earnings .....	Selling, general and administrative expenses		
Hedged Item			
Description of hedged item .....	Forecast purchases of tobacco in Brazil and Mozambique		
<b>Derivatives Not Designated as Hedges - Forward Foreign Currency Exchange Contracts</b>			
Gain (loss) recognized in earnings .....	\$ (4,671)	\$ (234)	\$ (2,591)
Location of gain (loss) recognized in earnings .....	Selling, general and administrative expenses		

For the outstanding interest rate swap agreements, the effective portion of the gain or loss on the derivative is recorded in accumulated other comprehensive loss and any ineffective portion is recorded in selling, general and administrative expenses. For the terminated interest rates swaps previously designated as cash flow hedges, a \$5.1 million net realized hedge gain remained in accumulated other comprehensive loss at March 31, 2019. The Company expects to amortize \$2.7 million of this remaining unamortized gain into earnings as a reduction of interest expense in fiscal year 2020.

For the forward foreign currency exchange contracts designated as cash flow hedges of tobacco purchases in Brazil and Mozambique, a \$0.3 million net hedge gain remained in accumulated other comprehensive loss at March 31, 2019. No hedge gain or loss had been reclassified to earnings at March 31, 2019 since shipments of those tobaccos had not yet started. The majority of the balance in accumulated other comprehensive loss will be recognized in earnings as a component of cost of goods sold in fiscal year 2020 as the 2019 crops in Brazil and Mozambique are sold to customers. Based on the hedging strategy, as the gain or loss is recognized in earnings, it is expected to be offset by a change in the direct cost for the tobacco or by a change in sales prices if the strategy has been mandated by the customer. Generally, margins on the sale of the tobacco will not be significantly affected.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Effect of Derivative Financial Instruments on the Consolidated Balance Sheets*

The table below outlines the effects of the Company's derivative financial instruments on the consolidated balance sheets at March 31, 2019 and 2018:

	Derivatives in a Fair Value Asset Position			Derivatives in a Fair Value Liability Position		
	Balance Sheet Location	Fair Value as of March 31,		Balance Sheet Location	Fair Value as of March 31,	
		2019	2018		2019	2018
<b>Derivatives Designated as Hedging Instruments</b>						
Interest rate swap agreements	Other non-current assets	\$ —	\$ 8,262	Other long-term liabilities	\$ 6,351	\$ —
Forward foreign currency exchange contracts	Other current assets	307	19	Accounts payable and accrued expenses	—	123
Total		<u>\$ 307</u>	<u>\$ 8,281</u>		<u>\$ 6,351</u>	<u>\$ 123</u>
<b>Derivatives Not Designated as Hedging Instruments</b>						
Forward foreign currency exchange contracts	Other current assets	\$ 233	\$ 341	Accounts payable and accrued expenses	\$ 386	\$ 269
Total		<u>\$ 233</u>	<u>\$ 341</u>		<u>\$ 386</u>	<u>\$ 269</u>

Substantially all of the Company's forward foreign currency exchange contracts are subject to master netting arrangements, whereby the right to offset occurs in the event of default by a participating party. The Company has elected to present these contracts on a gross basis in the consolidated balance sheets.

**NOTE 10. FAIR VALUE MEASUREMENTS**

Universal measures certain financial and nonfinancial assets and liabilities at fair value based on applicable accounting guidance. The financial assets and liabilities measured at fair value include money market funds, trading securities associated with deferred compensation plans, interest rate swap agreements, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. The application of the fair value guidance to nonfinancial assets and liabilities primarily includes the determination of fair values for goodwill and long-lived assets when indicators of potential impairment are present.

Under the accounting guidance, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The framework for measuring fair value is based on a fair value hierarchy that distinguishes between observable inputs and unobservable inputs. Observable inputs are based on market data obtained from independent sources. Unobservable inputs require the Company to make its own assumptions about the value placed on an asset or liability by market participants because little or no market data exists. There are three levels within the fair value hierarchy.

Level	Description
1	quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date;
2	quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability; and
3	unobservable inputs for the asset or liability.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

As permitted under the accounting guidance, the Company uses net asset value per share ("NAV") as a practical expedient to measure the fair value of its money market funds. The fair values for those funds are presented under the heading "NAV" in the tables that follow in this disclosure. In measuring the fair value of liabilities, the Company considers the risk of non-performance in determining fair value. Universal has not elected to report at fair value any financial instruments or any other assets or liabilities that are not required to be reported at fair value under current accounting guidance.

**Recurring Fair Value Measurements**

At March 31, 2019 and 2018, the Company had certain financial assets and financial liabilities that were required to be measured and reported at fair value on a recurring basis. These assets and liabilities are listed in the tables below and are classified based on how their values were determined under the fair value hierarchy or the NAV practical expedient:

	<b>March 31, 2019</b>				
	<b>Fair Value Hierarchy</b>				
	<b>NAV</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
<b>Assets</b>

Total financial liabilities measured and reported at fair value.....	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 392</u>	<u>\$ 974</u>	<u>\$ 1,366</u>

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

Money market funds

The fair value of money market funds, which are reported in cash and cash equivalents in the consolidated balance sheets, is based on NAV, which is the amount at which the funds are redeemable and is used as a practical expedient for fair value. These funds are not classified in the fair value hierarchy, but are disclosed as part of the fair value table above.

Trading securities associated with deferred compensation plans

Trading securities represent mutual fund investments that are matched to employee deferred compensation obligations. These investments are bought and sold as employees defer compensation, receive distributions, or make changes in the funds underlying their accounts. Quoted market prices (Level 1) are used to determine the fair values of the mutual funds.

Interest rate swap agreements

The fair values of interest rate swap agreements are determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, interest rate swaps are classified within Level 2 of the fair value hierarchy.

Forward foreign currency exchange contracts

The fair values of forward foreign currency exchange contracts are also determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, forward foreign currency exchange contracts are classified within Level 2 of the fair value hierarchy.

Guarantees of bank loans to tobacco growers

The Company guarantees bank loans to tobacco growers in Brazil for crop financing. In the event that the farmers default on their payments to the banks, the Company would be required to perform under the guarantees. The Company regularly evaluates the likelihood of farmer defaults based on an expected loss analysis and records the fair value of its guarantees as an obligation in its consolidated financial statements. The fair value of the guarantees is determined using the expected loss data for all loans outstanding at each measurement date. The present value of the cash flows associated with the estimated losses is then calculated at a risk-adjusted interest rate that is aligned with the expected duration of the liability and includes an adjustment for nonperformance risk. This approach is sometimes referred to as the “contingent claims valuation method.” Although historical loss data is an observable input, significant judgment is required in applying this information to the portfolio of guaranteed loans outstanding at each measurement date and in selecting a risk-adjusted interest rate. Significant increases or decreases in the risk-adjusted interest rate may result in a significantly higher or lower fair value measurement. The guarantees of bank loans to tobacco growers are therefore classified within Level 3 of the fair value hierarchy.

A reconciliation of the change in the balance of the financial liability for guarantees of bank loans to tobacco growers (Level 3) for the fiscal years ended March 31, 2019 and 2018 is provided below.

	<b>Fiscal Year Ended March 31,</b>	
	<b>2019</b>	<b>2018</b>
Balance at beginning of year .....	\$ 974	\$ 1,177
Payments under the guarantees and transfers to allowance for loss on direct loans to farmers (removal of prior crop year loans from the portfolio) .....	(765)	(1,210)
Provision for loss or transfers from allowance for loss on direct loans to farmers (addition of current crop year loans) .....	749	1,044
Change in discount rate and estimated collection period .....	53	28
Currency remeasurement .....	(208)	(65)
Balance at end of year .....	<u>\$ 803</u>	<u>\$ 974</u>

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

Long-term Debt

The fair value of the Company's long-term debt was approximately \$370 million at each of the balance sheet dates March 31, 2019 and 2018. The Company estimates the fair value of its long-term debt using Level 2 inputs which are based upon quoted market prices for the same or similar obligations or on calculations that are based on the current interest rates available to the Company for debt of similar terms and maturities.

**Nonrecurring Fair Value Measurements**

Long-Lived Assets

As discussed in Note 3, due to business changes that have affected the leaf tobacco market in Tanzania and the Company's operations there, the long-lived assets of those operations were tested for impairment at December 31, 2018, and an impairment charge was recorded to reduce their carrying value to fair value. The long-lived assets consist principally of the Company's processing facility and equipment, storage facilities, tobacco buying and receiving stations, employee housing, and vehicles and transportation equipment. The aggregate fair value and carrying value of those assets following the impairment adjustments was approximately \$17 million. The fair values of the property, plant and equipment were determined based principally on a probability-weighting of the discounted cash flows expected under multiple operating and disposition scenarios. Significant judgment was required in estimating the amount and timing of the future cash flows associated with the use and disposition of the assets, as well as the probabilities associated with the respective operating and disposition scenarios. Accordingly, the nonrecurring measurement of the fair value of these assets is classified within Level 3 of the fair value hierarchy.

UNIVERSAL CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

NOTE 11. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

Defined Benefit Plans

Description of Plans

The Company sponsors several defined benefit pension plans covering salaried and certain hourly employees in the U.S., as well as certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. Plan assets consist primarily of equity and fixed income investments. The Company also sponsors defined benefit plans that provide postretirement health and life insurance benefits for eligible U.S. employees and retirees who have attained specific age and service levels, although postretirement life insurance benefits were discontinued several years ago for all employees who were not already retired. The health benefits are funded by the Company as the costs of those benefits are incurred. The plan design includes cost-sharing features such as deductibles and coinsurance. The life insurance benefits are funded with deposits to a reserve account held by an insurance company. The Company has the right to amend or discontinue its pension and other postretirement benefit plans at any time.

In the following disclosures, the term “accumulated benefit obligation” (“ABO”) represents the actuarial present value of estimated future benefit payments earned by participants in the Company’s defined benefit pension plans as of the balance sheet date without regard to the estimated effect of future compensation increases on those benefits. The term does not apply to other postretirement benefits. “Projected benefit obligation” refers to the projected benefit obligation (“PBO”) for pension benefits and the accumulated postretirement benefit obligation (“APBO”) for other postretirement benefits. These amounts represent the actuarial present value of estimated future benefit payments earned by participants in the benefit plans as of the balance sheet date. For pension benefits, the projected benefit obligation includes the estimated effect of future compensation increases on those benefits.

Actuarial Assumptions

Assumptions used for financial reporting purposes to compute net periodic benefit cost and benefit obligations for the Company’s primary defined benefit plans were as follows:

	Pension Benefits			Other Postretirement Benefits		
	2019	2018	2017	2019	2018	2017
Discount rates:						
Benefit cost for plan year .....	4.10%	4.10%	4.10%	3.90%	3.90%	3.80%
Benefit obligation at end of plan year .....	4.00%	4.10%	4.10%	3.80%	3.90%	3.90%
Expected long-term return on plan assets:						
Benefit cost for plan year .....	6.75%	7.00%	7.00%	3.00%	3.00%	3.00%
Salary scale:						
Benefit cost for plan year .....	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%
Benefit obligation at end of plan year .....	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%
Healthcare cost trend rate.....	N/A	N/A	N/A	7.60%	8.10%	6.70%

Changes in the discount rates in the above table reflect prevailing market interest rates at the end of each fiscal year when the benefit obligations are actuarially measured. The expected long-term return on plan assets is developed from financial models used to project future returns on the underlying assets of the funded plans and is reviewed on an annual basis. The healthcare cost trend rate used by the Company is based on a study of medical cost inflation rates that is reviewed and updated annually for continued applicability. The revised trend assumption of 7.60% in 2019 declines gradually to 4.50% in 2028. The Company has caps in place on postretirement medical benefits that limit its cost for a large segment of the retiree population. As a result, changes to the healthcare cost trend rate have a limited impact on the postretirement medical plan liability and expense.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Benefit Obligations, Plan Assets, and Funded Status*

The following table reflects the changes in benefit obligations and plan assets in fiscal years 2019 and 2018, as well as the funded status of the plans at March 31, 2019 and 2018:

	<b>Pension Benefits</b>		<b>Other Postretirement Benefits</b>	
	<b>March 31,</b>		<b>March 31,</b>	
	<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>
<b>Actuarial present value of benefit obligation:</b>				
Accumulated benefit obligation .....	\$ 273,370	\$ 270,666		
Projected benefit obligation .....	278,189	273,658	\$ 31,635	\$ 32,945
<b>Change in projected benefit obligation:</b>				
Projected benefit obligation, beginning of year .....	\$ 273,658	\$ 269,250	\$ 32,945	\$ 36,786
Service cost .....	6,008	5,177	222	229
Interest cost .....	10,810	10,801	1,371	1,471
Effect of discount rate change .....	5,177	1,209	563	612
Foreign currency exchange rate changes .....	(2,526)	1,268	(447)	(151)
Other .....	7,268	781	(126)	(3,212)
Benefit payments .....	(22,206)	(14,828)	(2,893)	(2,790)
Projected benefit obligation, end of year .....	<u>\$ 278,189</u>	<u>\$ 273,658</u>	<u>\$ 31,635</u>	<u>\$ 32,945</u>
<b>Change in plan assets:</b>				
Plan assets at fair value, beginning of year .....	\$ 229,568	\$ 220,151	\$ 3,467	\$ 3,054
Actual return on plan assets .....	9,772	15,902	150	105
Employer contributions .....	29,489	7,891	2,993	3,098
Foreign currency exchange rate changes .....	(1,654)	452	—	—
Benefit payments .....	(22,206)	(14,828)	(2,893)	(2,790)
Plan assets at fair value, end of year .....	<u>\$ 244,969</u>	<u>\$ 229,568</u>	<u>\$ 3,717</u>	<u>\$ 3,467</u>
<b>Funded status:</b>				
Funded status of the plans, end of year .....	<u>\$ (33,220)</u>	<u>\$ (44,090)</u>	<u>\$ (27,918)</u>	<u>\$ (29,478)</u>

The Company funds its non-regulated U.S. pension plan, one of its foreign pension plans, and its postretirement medical plans on a pay-as-you-go basis as the benefit payments are incurred. Those plans account for approximately 97% of the \$33.2 million unfunded pension obligation and approximately 95% of the \$27.9 million unfunded postretirement benefit obligation shown on the funded status line in the above table at March 31, 2019. The increase in employer pension contributions in fiscal year 2019 reflects higher contributions to the Company's U.S. ERISA-regulated pension plan to realize incremental income tax benefits, as well as higher contributions to the non-regulated U.S. plan to fund lump-sum benefit payments to retiring participants.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

The funded status of the Company's plans at the end of fiscal years 2019 and 2018 was reported in the consolidated balance sheets as follows:

	<b>Pension Benefits</b>		<b>Other Postretirement Benefits</b>	
	<b>March 31,</b>		<b>March 31,</b>	
	<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>
Non-current asset (included in other noncurrent assets).....	\$ 1,837	\$ 2,308	\$ —	\$ —
Current liability (included in accounts payable and accrued expenses).....	(1,490)	(8,602)	(2,228)	(2,431)
Non-current liability (reported as pensions and other postretirement benefits)	(33,567)	(37,796)	(25,690)	(27,047)
Amounts recognized in the consolidated balance sheets .....	<u>\$ (33,220)</u>	<u>\$ (44,090)</u>	<u>\$ (27,918)</u>	<u>\$ (29,478)</u>

Additional information on the funded status of the Company's plans as of the respective measurement dates for the fiscal years ended March 31, 2019 and 2018, is as follows:

	<b>Pension Benefits</b>		<b>Other Postretirement Benefits</b>	
	<b>March 31,</b>		<b>March 31,</b>	
	<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>
<b>For plans with a projected benefit obligation in excess of plan assets:</b>				
Aggregate projected benefit obligation (PBO).....	\$ 269,622	\$ 261,581	\$ 31,635	\$ 32,945
Aggregate fair value of plan assets .....	234,565	215,182	3,717	3,467
<b>For plans with an accumulated benefit obligation in excess of plan assets:</b>				
Aggregate accumulated benefit obligation (ABO).....	35,070	258,708	N/A	N/A
Aggregate fair value of plan assets .....	4,023	215,182	N/A	N/A

With the additional employer contributions noted above and the return on plan assets during fiscal year 2019, the assets of the Company's U.S. ERISA-regulated pension plan exceeded the accumulated benefit obligation (ABO) at March 31, 2019.

*Net Periodic Benefit Cost*

The components of the Company's net periodic benefit cost were as follows:

	<b>Pension Benefits</b>			<b>Other Postretirement Benefits</b>		
	<b>Fiscal Year Ended March 31,</b>			<b>Fiscal Year Ended March 31,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>	<b>2019</b>	<b>2018</b>	<b>2017</b>
<b>Components of net periodic benefit cost:</b>						
Service cost .....	\$ 6,008	\$ 5,177	\$ 5,382	\$ 222	\$ 229	\$ 247
Interest cost .....	10,810	10,801	10,441	1,371	1,471	1,535
Expected return on plan assets .....	(15,695)	(15,962)	(15,154)	(99)	(87)	(42)
Settlement gain.....	—	—	(912)	—	—	—
Net amortization and deferral .....	3,491	3,735	4,576	(710)	(620)	(394)
Net periodic benefit cost .....	<u>\$ 4,614</u>	<u>\$ 3,751</u>	<u>\$ 4,333</u>	<u>\$ 784</u>	<u>\$ 993</u>	<u>\$ 1,346</u>

A one-percentage-point increase or decrease in the assumed healthcare cost trend rate would not result in a significant change to the March 31, 2019 accumulated postretirement benefit obligation or the aggregate service and interest cost components of the net periodic postretirement benefit expense for fiscal year 2020.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Amounts Included in Accumulated Other Comprehensive Loss*

Amounts included in accumulated other comprehensive loss at the beginning of the year are amortized as a component of net periodic benefit cost during the year. The amounts recognized in other comprehensive income or loss for fiscal years 2019 and 2018 and the amounts included in accumulated other comprehensive loss at the end of those fiscal years are shown below. All amounts shown are before allocated income taxes.

	Pension Benefits		Other Postretirement Benefits	
	March 31,		March 31,	
	2019	2018	2019	2018
<b>Change in net actuarial loss (gain):</b>				
Net actuarial loss (gain), beginning of year.....	\$ 69,333	\$ 74,045	\$ (7,247)	\$ (6,286)
Losses (gains) arising during the year .....	17,884	1,390	513	(1,580)
Amortization included in net periodic benefit cost during the year .....	(5,715)	(6,102)	533	619
Net actuarial loss (gain), end of year.....	81,502	69,333	(6,201)	(7,247)
<b>Change in prior service cost (benefit):</b>				
Prior service cost (benefit), beginning of year.....	(9,703)	(12,070)	(965)	(112)
Prior service cost (benefit) arising during the year .....	—	—	—	(867)
Amortization included in net periodic benefit cost during the year .....	2,224	2,367	199	14
Prior service cost (benefit), end of year.....	(7,479)	(9,703)	(766)	(965)
Total amounts in accumulated other comprehensive loss at end of year, before income taxes .....	\$ 74,023	\$ 59,630	\$ (6,967)	\$ (8,212)

Amounts in the above table reflect the Company and its consolidated subsidiaries. The accumulated other comprehensive loss reported in the consolidated balance sheets also includes pension and other postretirement benefit amounts related to ownership interests in unconsolidated affiliates.

The Company expects to recognize approximately \$5.1 million of the March 31, 2019 net actuarial loss and \$2.2 million of the March 31, 2019 prior service benefit in net periodic benefit cost during fiscal year 2020.

*Allocation of Pension Plan Assets*

The Company has established, and periodically adjusts, target asset allocations for its investments in its U.S. ERISA-regulated defined benefit pension plan, which represents 94% of consolidated plan assets and 84% of consolidated PBO at March 31, 2019, to balance the needs of liquidity, total return, and risk control. The assets are required to be diversified across asset classes and investment styles to achieve that balance. During the year, the asset allocation is reviewed for adherence to the target policy and rebalanced to the targeted weights. The Company reviews the expected long-term returns of the asset allocation each year to help determine whether changes are needed. The return is evaluated on a weighted-average basis in relation to inflation. The assumed long-term rate of return used to calculate annual benefit expense is based on the asset allocation and expected market returns for the respective asset classes.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

The weighted-average target pension asset allocation and target ranges at the March 31, 2019 measurement date and the actual asset allocations at the March 31, 2019 and 2018 measurement dates by major asset category were as follows:

Major Asset Category	Target Allocation	Range	Actual Allocation	
			2019	2018
Equity securities.....	29.0%	19% - 39%	31.2%	27.4%
Fixed income securities <sup>(1)</sup> .....	66.0%	56% - 76%	64.8%	65.9%
Alternative investments .....	5.0%	0% - 10%	4.0%	6.7%
Total.....	100.0%		100.0%	100.0%

(1) Actual amounts include high yield securities and cash balances held for the payment of benefits.

Universal makes regular contributions to its pension and other postretirement benefit plans. As previously noted, for postretirement health benefits, contributions reflect funding of those benefits as they are incurred. Due to the additional contributions made by the Company to its U.S. ERISA-regulated defined benefit pension plan during fiscal year 2019, as well as the high funded status of that plan at March 31, 2019, no contributions to the plan are currently anticipated for fiscal year 2020. The Company expects to make contributions of approximately \$2.0 million to its non-ERISA regulated pension plans in fiscal year 2020.

Estimated future benefit payments to be made from the Company's plans are as follows:

Fiscal Year	Pension Benefits	Other Postretirement Benefits
2020.....	\$ 15,950	\$ 2,652
2021.....	17,355	2,551
2022.....	16,910	2,433
2023.....	23,639	2,349
2024.....	18,017	2,267
2025 - 2029 .....	92,458	10,315

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*Fair Values of Pension Plan Assets*

Assets held by the Company's defined benefit pension plans primarily consist of equity securities, fixed income securities, and alternative investments. Equity securities are primarily invested in actively-traded mutual funds with underlying common stock investments in U.S. and foreign companies ranging in size from small to large corporations. Fixed income securities are also held primarily through actively-traded mutual funds with the underlying investments in both U.S. and foreign securities. The methodologies for determining the fair values of the plan assets are outlined below. Where the values are based on quoted prices for the securities in an active market, they are classified as Level 1 of the fair value hierarchy. Where secondary pricing sources are used, they are classified as Level 2 of the hierarchy. Pricing models that use significant unobservable inputs are classified as Level 3.

- **Equity securities:** Investments in equity securities through actively-traded mutual funds are valued based on the net asset values of the units held in the respective funds, which are determined by obtaining quoted prices on nationally recognized securities exchanges. These securities are classified as Level 1.
- **Fixed income securities:** Fixed income investments that are held through mutual funds are valued based on the net asset values of the units held in the respective funds, which are determined by obtaining quoted prices on nationally recognized securities exchanges. These securities are classified as Level 1. Other fixed income investments are valued at an estimated price that a dealer would pay for a similar security on the valuation date using observable market inputs and are classified as Level 2. These market inputs may include yield curves for similarly rated securities. Small amounts of cash are held in common collective trusts. Fixed income securities also include insurance assets, which are valued based on an actuarial calculation. Those securities are classified as Level 3.
- **Alternative investments:** Real estate assets are valued using valuation models that incorporate income and market approaches, including external appraisals, to derive fair values. The hedge fund allocation is a fund of hedge funds and is valued by the manager based on the net asset value of each fund. These models use significant unobservable inputs and are classified as Level 3 within the fair value hierarchy.

Fair values of the assets of the Company's pension plans as of March 31, 2019 and 2018, classified based on how their values were determined under the fair value hierarchy are as follows:

	<b>March 31, 2019</b>			
	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Equity securities.....	\$ 71,561	\$ —	\$ —	\$ 71,561
Fixed income securities <sup>(1)</sup> .....	149,798	10,399	4,025	164,222
Alternative investments.....	—	—	9,186	9,186
Total investments.....	<u>\$ 221,359</u>	<u>\$ 10,399</u>	<u>\$ 13,211</u>	<u>\$ 244,969</u>

	<b>March 31, 2018</b>			
	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Equity securities.....	\$ 58,667	\$ —	\$ —	\$ 58,667
Fixed income securities <sup>(1)</sup> .....	142,329	10,836	3,550	156,715
Alternative investments.....	—	—	14,186	14,186
Total investments.....	<u>\$ 200,996</u>	<u>\$ 10,836</u>	<u>\$ 17,736</u>	<u>\$ 229,568</u>

(1) Includes high yield securities and cash and cash equivalent balances.

**Other Benefit Plans**

Universal and several subsidiaries offer employer defined contribution savings plans. Amounts charged to expense for these plans were approximately \$2.6 million for fiscal year 2019, \$2.3 million for fiscal year 2018, and \$2.6 million for fiscal year 2017.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 12. COMMON AND PREFERRED STOCK**

**Common Stock**

At March 31, 2019, the Company's shareholders had authorized 100,000,000 shares of its common stock, and 24,989,946 shares were issued and outstanding. Holders of the common stock are entitled to one vote for each share held on all matters requiring a vote. Holders of the common stock are also entitled to receive dividends when, as, and if declared by the Company's Board of Directors. The Board of Directors customarily declares and pays regular quarterly dividends on the outstanding common shares; however, such dividends are at the Board's full discretion, and there is no obligation to continue them.

**Preferred Stock**

*Authorized and Outstanding Shares*

The Company is also authorized to issue up to 5,000,000 shares of preferred stock, 500,000 shares of which are reserved for Series A Junior Participating Preferred Stock and 220,000 of which were reserved for Series B 6.75% Convertible Perpetual Preferred Stock. No Series A Junior Participating Preferred Stock has been issued. In 2006, 220,000 shares of Series B 6.75% Convertible Perpetual Preferred Stock were issued under this authorization. As discussed below, all of those shares were converted during fiscal year 2017, and none were outstanding at March 31, 2019.

*Conversion of Series B 6.75% Convertible Perpetual Preferred Stock*

In December 2016, holders of 111,072 shares of the Series B 6.75% Convertible Perpetual Preferred Stock voluntarily exercised their conversion rights under the original issuance terms of the preferred shares. The Company chose to satisfy the full conversion obligation for those preferred shares with shares of its common stock, issuing 2,487,118 common shares at the applicable conversion rate in exchange for the preferred shares tendered. The consolidated statement of changes in shareholders' equity for the fiscal year ended March 31, 2017 reflected a non-cash reclassification of \$107.6 million from preferred stock to common stock to reflect the conversion of those preferred shares.

On January 9, 2017, the Company announced a mandatory conversion of all 107,418 remaining outstanding shares of the preferred stock after meeting the requirements to initiate the mandatory conversion under the original terms of the preferred shares. The Company chose to satisfy the conversion obligation for the mandatory conversion in cash, paying approximately \$178.4 million for those preferred shares on January 31, 2017 to complete the conversion.

With the completion of the mandatory conversion in January 2017, the Company's outstanding equity securities consist only of its common stock. Dividend payments on the preferred shares, which previously totaled approximately \$15 million annually, have been discontinued. Although the conversions of the preferred stock into common stock or for cash did not impact the Company's net income, the shares converted for cash under the mandatory conversion in January 2017 resulted in a one-time reduction of retained earnings of approximately \$74.4 million during the fourth quarter ended March 31, 2017, representing the excess of the conversion cost over the carrying value of those shares. The reduction in retained earnings resulted in a corresponding one-time reduction of earnings available to common shareholders for the fiscal year ended March 31, 2017 for purposes of determining the amounts reported for basic and diluted earnings per share.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**Share Repurchase Programs**

Universal’s Board of Directors has authorized programs to repurchase outstanding shares of the Company’s capital stock (common and preferred stock). Under these programs, the Company has made and may continue to make share repurchases from time to time in the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. Programs have been in place continuously throughout fiscal years 2017 through 2019. The current program, which replaced an expiring program, was authorized and became effective on November 7, 2017. It authorizes the purchase of up to \$100 million of the Company’s outstanding common stock and expires on the earlier of November 15, 2019, or when the funds authorized for the program have been exhausted. At March 31, 2019, \$90 million of the authorization remained available for share repurchases under the current program.

There were no share repurchases for fiscal year 2017. Repurchases of common stock under the programs for fiscal years 2019 and 2018 were as follows:

	<b>Fiscal Year Ended March 31,</b>	
	<b>2019</b>	<b>2018</b>
Number of shares repurchased .....	30,777	403,624
Cost of shares repurchased (in thousands of dollars) .....	\$ 1,443	\$ 21,610
Weighted-average cost per share .....	\$ 46.87	\$ 53.54

**NOTE 13. EXECUTIVE STOCK PLANS AND STOCK-BASED COMPENSATION**

**Executive Stock Plans**

The Company’s shareholders have approved executive stock plans under which officers, directors, and employees of the Company may receive grants and awards of common stock, restricted stock, restricted stock units (“RSUs”), performance share awards (“PSAs”), stock appreciation rights (“SARs”), incentive stock options, and non-qualified stock options. Currently, grants are outstanding under the 1997 Executive Stock Plan, the 2002 Executive Stock Plan, the 2007 Stock Incentive Plan, and the 2017 Stock Incentive Plan. Together, these plans are referred to in this disclosure as the “Plans.” Up to 1,000,000 shares may be issued under the 2017 Stock Incentive Plan, with no specific share limit for any of the award types. New awards may no longer be issued under the 1997, 2002, and 2007 Plans.

The Company’s practice is to award grants of stock-based compensation to officers at the first regularly-scheduled meeting of the Compensation Committee of the Board of Directors (the “Compensation Committee”) in the fiscal year following the public release of the Company’s financial results for the prior year. In recent years, the Compensation Committee has awarded only grants of RSUs and PSAs. All stock options and SARs granted in previous years were either exercised or had expired by the end of fiscal year 2017. Outside directors automatically receive restricted stock units following each annual meeting of shareholders.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

Non-qualified stock options and SARs previously granted under the Plans had an exercise price equal to the market price of a share of common stock on the date of grant. SARs granted under the Plans vested in equal one-third tranches one, two, and three years after the grant date and expired 10 years after the grant date, except that SARs granted after fiscal year 2007 expired on the earlier of 3 years after the grantee's retirement date or 10 years after the grant date. RSUs awarded under the Plans vest 5 years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The PSAs vest 3 years from the grant date, are paid out in shares of common stock at the vesting date, and do not carry rights to dividends or dividend equivalents prior to vesting. Shares ultimately paid out under PSA grants are dependent on the achievement of predetermined performance measures established by the Compensation Committee and can range from zero to 150% of the stated award. RSUs awarded to outside directors vest 3 years after the grant date, and restricted stock vests upon the individual's retirement from service as a director.

*SARs*

The following table summarizes the Company's SAR activity for fiscal year 2017, the last year SARs were outstanding under the plans:

	<u>Shares</u>	<u>Weighted-Average Exercise Price</u>
<b>Fiscal Year Ended March 31, 2017:</b>		
Outstanding at beginning of year .....	152,201	\$ 59.96
Exercised .....	(135,334)	61.72
Cancelled/expired .....	(16,867)	45.82
Outstanding at end of year .....	<u>—</u>	<u>\$ —</u>

The intrinsic value of the awards exercised in 2017 was approximately \$0.6 million. That value is based on the difference between the market price of the underlying shares at the exercise date and the exercise price of the SARs.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

*RSUs, Restricted Stock, and PSAs*

The following table summarizes the Company's RSU, restricted stock, and PSA activity for fiscal years 2017 through 2019:

	RSUs		Restricted Stock		PSAs	
	Shares	Weighted-Average Grant Date Fair Value	Shares	Weighted-Average Grant Date Fair Value	Shares	Weighted-Average Grant Date Fair Value
<b>Fiscal Year Ended March 31, 2017:</b>						
Unvested at beginning of year .....	302,945	\$ 49.95	48,100	\$ 42.33	154,300	\$ 48.13
Granted.....	74,776	55.27	—	—	58,805	49.17
Vested.....	(51,544)	44.57	(17,900)	42.26	(52,230)	53.56
Forfeited.....	(539)	55.63	—	—	(525)	49.17
Unvested at end of year.....	325,638	52.01	30,200	42.37	160,350	46.86
<b>Fiscal Year Ended March 31, 2018:</b>						
Granted.....	72,032	64.13	—	—	39,100	60.37
Vested.....	(60,751)	45.51	—	—	(41,667)	46.41
Forfeited.....	—	—	—	—	(6,783)	46.41
Unvested at end of year.....	336,919	55.77	30,200	42.37	151,000	50.50
<b>Fiscal Year Ended March 31, 2019:</b>						
Granted.....	87,621	64.53	—	—	54,800	57.12
Vested.....	(99,549)	59.09	(8,950)	44.25	(49,092)	45.06
Forfeited.....	—	—	—	—	(9,834)	45.55
Unvested at end of year.....	324,991	\$ 57.12	21,250	\$ 41.58	146,874	\$ 55.12

Shares granted and vested in the above table include dividend equivalents on RSUs and any shares awarded above the base grant under the performance provisions of PSAs. Shares forfeited or canceled include any reductions from the base PSA grant under those same performance provisions. The fair values of RSUs, restricted stock, and PSAs are based on the market price of the common stock on the grant date.

**Stock-Based Compensation Expense**

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at the date an award is granted, the total fair value of the award is recognized as expense at the date of grant. For the fiscal years ended March 31, 2019, 2018, and 2017, total stock-based compensation expense and the related income tax benefit recognized were as follows:

	Fiscal Year Ended March 31,		
	2019	2018	2017
Total stock-based compensation expense .....	\$ 8,152	\$ 7,610	\$ 6,475
Income tax benefit recorded on stock-based compensation expense .....	\$ 1,712	\$ 2,397	\$ 2,266

At March 31, 2019, the Company had \$5.6 million of unrecognized compensation expense related to stock-based awards, which will be recognized over a weighted-average period of approximately 1.2 years.

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 14. COMMITMENTS, CONTINGENCIES, AND OTHER MATTERS**

**Commitments**

The Company enters into contracts to purchase tobacco from farmers in a number of the countries where it operates. Contracts in most countries cover one annual growing season. Primarily with the farmer contracts in Brazil, Malawi, Mozambique, the Philippines, Guatemala, and Mexico, the Company provides seasonal financing to support the farmers' production of their crops or guarantees their financing from third-party banks. At March 31, 2019, the Company had contracts to purchase approximately \$497 million of tobacco to be delivered during the coming fiscal year and \$128 million of tobacco to be delivered in subsequent years. These amounts are estimates since actual quantities purchased will depend on crop yields, and prices will depend on the quality of the tobacco delivered and other market factors. Tobacco purchase obligations have been partially funded by short-term advances to farmers and other suppliers, which totaled approximately \$107 million, net of allowances, at March 31, 2019. The Company withholds payments due to farmers on delivery of the tobacco to satisfy repayment of the financing it provided to the farmers. As noted above and discussed in more detail below, the Company also has arrangements to guarantee bank loans to farmers in Brazil, and payments are also withheld on delivery of tobacco to satisfy repayment of those loans. In addition to its contractual obligations to purchase tobacco, the Company had commitments related to agricultural materials, approved capital expenditures, and various other requirements that approximated \$61 million at March 31, 2019.

**Guarantees and Other Contingent Liabilities**

*Guarantees of Bank Loans and Other Contingent Liabilities*

Guarantees of bank loans to growers for crop financing have long been industry practice in Brazil and support the farmers' production of tobacco there. The Company's operating subsidiary in Brazil had guarantees outstanding at March 31, 2019, all of which expire within one year. As noted above, the subsidiary withholds payments due to the farmers on delivery of tobacco and forwards those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiary to cover their obligations to the third-party banks could result in a liability for the subsidiary under the related guarantees; however, in that case, the subsidiary would have recourse against the farmers. The maximum potential amount of future payments that the Company's subsidiary could be required to make at March 31, 2019, was the face amount, \$17 million including unpaid accrued interest (\$20 million as of March 31, 2018). The fair value of the guarantees was a liability of approximately \$1 million at March 31, 2019 (\$1 million at March 31, 2018). In addition to these guarantees, the Company has other contingent liabilities totaling approximately \$2 million at March 31, 2019, primarily under outstanding letters of credit.

*Value-Added Tax Assessments in Brazil*

As discussed in Note 1, the Company's local operating subsidiaries pay significant amounts of value-added tax ("VAT") in connection with their normal operations. In Brazil, VAT is assessed at the state level when green tobacco is transferred between states. The Company's operating subsidiary there pays VAT when tobaccos grown in the states of Santa Catarina and Parana are transferred to its factory in the state of Rio Grande do Sul for processing. The subsidiary has received assessments for additional VAT plus interest and penalties from the tax authorities for the states of Santa Catarina and Parana based on audits of the subsidiary's VAT filings for specified periods. In June 2011, tax authorities for the state of Santa Catarina issued assessments for tax, interest, and penalties for periods from 2006 through 2009 totaling approximately \$12 million. In September 2014, tax authorities for the state of Parana issued an assessment for tax, interest, and penalties for periods from 2009 through 2014 totaling approximately \$14 million. These amounts are based on the exchange rate for the Brazilian currency at March 31, 2019. Management of the operating subsidiary and outside counsel believe that errors were made by the tax authorities for both states in determining all or significant portions of these assessments and that various defenses support the subsidiary's positions.

With respect to the Santa Catarina assessments, the subsidiary took appropriate steps to contest the full amount of the claims. As of March 31, 2019, a portion of the subsidiary's arguments had been accepted, and the outstanding assessment had been reduced, although interest on the remaining assessment has continued to accumulate. The reduced assessment, together with the related accumulated interest through the end of the current reporting period, totaled approximately \$12 million at the March 31, 2019 exchange rate. The subsidiary is continuing to contest the full remaining amount of the assessment. While the range of reasonably possible loss is zero up to the full \$12 million remaining assessment, based on the strength of the subsidiary's defenses, no loss within that range is considered probable at this time and no liability has been recorded at March 31, 2019.

With respect to the Parana assessment, management of the subsidiary and outside counsel challenged the full amount of the claim. A significant portion of the Parana assessment was based on positions taken by the tax authorities that management and outside counsel believe deviate significantly from the underlying statutes and relevant case law. In addition, under the law, the subsidiary's tax filings for certain periods covered in the assessment were no longer open to any challenge by the tax authorities. In December 2015, the Parana tax authorities withdrew the initial claim and subsequently issued a new assessment covering the same tax periods. The new assessment totaled approximately \$6 million at the March 31, 2019 exchange rate, reflecting a substantial reduction from the original \$14 million assessment. Notwithstanding the reduction, management and outside counsel continue to

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

believe that the new assessment is not supported by the underlying statutes and relevant case law and have challenged the full amount of the claim. The range of reasonably possible loss is considered to be zero up to the full \$6 million assessment. However, based on the strength of the subsidiary's defenses, no loss within that range is considered probable at this time and no liability has been recorded at March 31, 2019.

In both states, the process for reaching a final resolution to the assessments is expected to be lengthy, and management is not currently able to predict when either case will be concluded. Should the subsidiary ultimately be required to pay any tax, interest, or penalties in either case, the portion paid for tax would generate value-added tax credits that the subsidiary may be able to recover.

*Tanzania Fair Competition Commission Proceeding*

In June 2012, the Company's Tanzanian subsidiary, Tanzania Leaf Tobacco Company Ltd. ("TLTC"), entered into a two crop-year supply agreement for unprocessed "green" tobacco with a newly-formed Tanzanian subsidiary of one of the Company's major customers. The agreement involved green tobacco purchases from four of the approximately 400 grower cooperatives in Tanzania, which allowed the customer and its Tanzanian subsidiary on a small test basis to evaluate whether it would be a viable alternative for the customer to establish its own vertically integrated supply operations in that market. Prior to that time, the customer's subsidiary did not exist, and it only purchased processed Tanzanian tobacco from tobacco dealers in specified amounts and only for certain grades and stalk positions. In contrast, the agreement with TLTC required the customer's subsidiary to purchase green tobacco on a "run of crop" basis. "Run of crop" requires the purchase of all green tobacco produced on the tobacco plant, regardless of grade or stalk position. The agreement, therefore, enabled the customer's subsidiary on a small test basis to evaluate the quality of green tobacco purchased on a "run of crop" basis and to assess how such tobacco would be suited to the customer's tobacco requirements. The customer unilaterally elected to establish its own vertically integrated supply operations in Tanzania after the expiration of the agreement, and its subsidiary began purchasing green tobacco directly from Tanzanian grower cooperatives during the second crop year thereafter.

Despite the pro-competitive object and effect of the agreement between TLTC and the customer's subsidiary, in October 2016, the Tanzania Fair Competition Commission ("FCC") notified TLTC and the customer's subsidiary that it reviewed the agreement and provisionally concluded that it infringed Tanzania antitrust law by having the object and effect of preventing competition in the purchase of unprocessed green tobacco in the area in which the four grower cooperatives were located. The FCC also provisionally concluded that the Company's U.S. subsidiary, Universal Leaf Tobacco Company, Inc. ("ULT"), and additional subsidiaries of the customer, were jointly and severally liable for the actions of TLTC and the customer's Tanzanian subsidiary, respectively. TLTC and ULT submitted a written response contesting the FCC's allegations, and on February 27, 2018, the FCC issued its decision to TLTC and ULT which ignored TLTC's and ULT's submissions and confirmed its initial conclusion that the agreement infringed Tanzanian antitrust law. In its decision, the FCC concluded incorrectly that the parties to the agreement unfairly benefited in the amount of \$105 thousand. The FCC arbitrarily assessed a fine jointly against TLTC and ULT of approximately \$197 million and a fine jointly against the customer's Tanzanian subsidiary and another subsidiary of the customer exceeding \$1 billion.

TLTC and ULT have worked closely with expert legal advisors and economists on this matter. Based on these engagements and consultations, the Company firmly believes the FCC's allegations are frivolous and clearly without merit or support from the facts, law or economic analysis. The Company further believes the FCC's proceedings were rife with irregularities and did not comply with applicable legal and regulatory procedures with respect to this matter, including failing to establish jurisdiction over ULT or to offer a legal justification for including ULT in the proceeding. To the contrary, the Company believes the facts, law and economic analysis clearly support the legality and pro-competitive nature of the agreement and support a proper conclusion that there was no infringement of Tanzania antitrust law, and the agreement had no negative impact on the Tanzania tobacco market. The Company further believes the FCC's proposed fine is ludicrous, unwarranted and contrary to Tanzania law. TLTC and ULT immediately appealed the FCC findings to the Tanzania Fair Competition Tribunal, which immediately stayed the execution of any FCC fines. The Company is unable to predict how long the appeal process will take; however, the Company believes it could last several years. At this time, the Company believes that the likelihood of incurring any material liability in this matter is remote, and no amount has been recorded.

On January 22, 2019, the FCC delivered provisional findings regarding two new allegations of antitrust violations. In those two new provisional findings, the FCC has manufactured claims against ULT and ULT's subsidiaries in Tanzania, in addition to other parties in Tanzania. ULT and its Tanzania subsidiaries have already begun working closely with expert legal advisors on these matters and will prepare and submit to the FCC proper and comprehensive responses. Although the new provisional findings have only recently been received, based on the legal consultations to date the Company firmly believes the FCC's new allegations are frivolous and clearly without merit and lack facts, law or economic analysis to support them. In one of the two new matters, based on the Company's review of the provisional findings and consultation with counsel, the Company believes the FCC is seeking an equally large, ludicrous, unwarranted, and unlawful fine as the one sought in the current matter. The FCC's motivations for initiating these additional, spurious allegations against the Company's subsidiaries are unclear. At this time, the Company is unable to predict how

**UNIVERSAL CORPORATION**  
**CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

long it will take to defend against the new matters including, if necessary, to appeal any final FCC decisions; however, the Company believes it could last several years. At this time, the Company believes that the likelihood of incurring any material liability in the new matters is remote, and no amount has been recorded for either one.

*Other Legal and Tax Matters*

Various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending the matters and does not currently expect that any of them will have a material adverse effect on the Company’s business or financial position. However, should one or more of these matters be resolved in a manner adverse to management’s current expectation, the effect on the Company’s results of operations for a particular fiscal reporting period could be material.

**Major Customers**

A material part of the Company’s business is dependent upon a few customers. The Company’s six largest customers are Altria Group, Inc, British American Tobacco plc, China Tobacco International, Inc., Imperial Brands plc, Japan Tobacco, Inc., and Philip Morris International, Inc. In the aggregate, these customers have accounted for approximately 70% of consolidated revenue for each of the past three fiscal years. For the fiscal years ended March 31, 2019, 2018, and 2017, revenue from Philip Morris International, Inc. was approximately \$650 million, \$520 million, and \$590 million, respectively. For the same periods, Imperial Brands plc accounted for revenue of approximately \$360 million, \$270 million, and \$230 million, respectively, and British American Tobacco plc accounted for revenue of approximately \$270 million, \$230 million, and \$220 million, respectively. These customers primarily do business with various affiliates in the Company’s flue-cured and burley leaf tobacco operations. The loss of, or substantial reduction in business from, any of these customers could have a material adverse effect on the Company.

**Accounts Receivable**

The Company’s operating subsidiaries perform credit evaluations of customers’ financial condition prior to the extension of credit. Generally, accounts receivable are unsecured and are due within 30 days. When collection terms are extended for longer periods, interest and carrying costs are usually recovered. Credit losses are provided for in the financial statements, and historically such amounts have not been material. The allowance for doubtful accounts was approximately \$3 million and \$2 million at March 31, 2019 and 2018, respectively. At March 31, 2019 and 2018, net accounts receivable by reportable operating segment were as follows:

	<b>March 31,</b>	
	<b>2019</b>	<b>2018</b>
Flue-Cured and Burley Leaf Tobacco Operations:		
North America.....	\$ 31,939	\$ 44,726
Other Regions.....	295,442	296,213
Subtotal .....	<u>327,381</u>	<u>340,939</u>
Other Tobacco Operations.....	40,729	36,180
Consolidated accounts receivable, net .....	<u>\$ 368,110</u>	<u>\$ 377,119</u>

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 15. OPERATING SEGMENTS**

Universal's operations involve selecting, procuring, processing, packing, storing, shipping, and financing leaf tobacco for sale to, or for the account of, manufacturers of consumer tobacco products throughout the world. Through various operating subsidiaries located in tobacco-growing countries around the world and significant ownership interests in unconsolidated affiliates, the Company processes and/or sells flue-cured and burley tobaccos, dark air-cured tobaccos, and oriental tobaccos. Flue-cured, burley, and oriental tobaccos are used principally in the manufacture of cigarettes, and dark air-cured tobaccos are used mainly in the manufacture of cigars, pipe tobacco, and smokeless tobacco products. Some of these tobacco types are also increasingly used in the manufacture of non-combustible tobacco products that are intended to provide consumers with an alternative to traditional combustible products. A substantial portion of the Company's revenues are derived from sales to a limited number of large, multinational cigarette manufacturers.

The principal approach used by management to evaluate the Company's performance is by geographic region, although the dark air-cured and oriental tobacco businesses are each evaluated on the basis of their worldwide operations. Oriental tobacco operations consist principally of a 49% interest in an affiliate, and the performance of those operations is evaluated based on the Company's equity in the pretax earnings of that affiliate. Under this structure, the Company has the following primary operating segments: North America, South America, Africa, Europe, Asia, Dark Air-Cured, Oriental, and Special Services. North America, South America, Africa, Europe, and Asia are primarily involved in flue-cured and/or burley leaf tobacco operations for supply to cigarette manufacturers. The Dark Air-Cured group supplies dark air-cured tobacco principally to manufacturers of cigars, pipe tobacco, and smokeless tobacco products, and the Oriental business supplies oriental tobacco to cigarette manufacturers. From time to time, the segments may trade in tobaccos that differ from their main varieties, but those activities are not significant to their overall results. Special Services includes the Company's laboratory services business, which provides physical and chemical product testing and smoke testing for customers, its food ingredients business, and its liquid nicotine business.

The five regional operating segments serving the Company's cigarette manufacturer customer base share similar characteristics in the nature of their products and services, production processes, class of customer, product distribution methods, and regulatory environment. Based on the applicable accounting guidance, four of the regions – South America, Africa, Europe, and Asia – are aggregated into a single reporting segment, "Other Regions", because they also have similar economic characteristics. North America is reported as an individual operating segment because its economic characteristics differ from the other regions, generally because its operations require lower working capital investments for crop financing and inventory. The Dark Air-Cured, Oriental and Special Services segments, which have dissimilar characteristics in some of the categories mentioned above, are reported together as "Other Tobacco Operations" because each is below the measurement threshold for separate reporting.

Universal incurs overhead expenses related to senior management, sales, finance, legal, and other functions that are centralized at its corporate headquarters, as well as functions performed at several sales and administrative offices around the world. These overhead expenses are allocated to the various operating segments, generally on the basis of tobacco volumes planned to be purchased and/or processed. Management believes this method of allocation is representative of the value of the related services provided to the operating segments. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses, plus equity in the pretax earnings of unconsolidated affiliates.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

Reportable segment data as of, or for, the fiscal years ended March 31, 2019, 2018, and 2017, is as follows:

	Sales and Other Operating Revenues			Operating Income

- (1) Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.
- (2) Includes Dark Air-Cured, Oriental, and Special Services, as well as intercompany eliminations. Sales and other operating revenues, goodwill, depreciation and amortization, and capital expenditures include limited amounts or no amounts for Oriental because the business is accounted for on the equity method and its financial results consist principally of equity in the pretax earnings of the unconsolidated affiliate. The investment in the unconsolidated affiliate is included in segment assets and was approximately \$79.2 million, \$89.3 million, and \$78.1 million, at March 31, 2019, 2018, and 2017, respectively.
- (3) Equity in pretax earnings of unconsolidated affiliates is included in segment operating income (Other Tobacco Operations segment), but is reported below consolidated operating income and excluded from that total in the consolidated statements of income.
- (4) Restructuring and impairment costs are excluded from segment operating income, but are included in consolidated operating income in the consolidated statements of income (see Note 3).

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

- (1) Gain (loss) on foreign currency cash flow hedges related to forecast purchases of tobacco is reclassified from accumulated other comprehensive income (loss) to cost of goods sold when the tobacco is sold to customers. See Note 9 for additional information.
- (2) Gain (loss) on interest rate cash flow hedges is reclassified from accumulated other comprehensive income (loss) to interest expense when the related interest payments are made on the debt for open interest rate swap agreements, or as amortized to interest expense over the period to original maturity for terminated swap agreements. See Note 9 for additional information.
- (3) These items arise from the remeasurement of the assets and liabilities of the Company's defined benefit pension and other postretirement benefit plans. Those remeasurements are made on an annual basis at the end of the fiscal year. See Note 11 for additional information.
- (4) This accumulated other comprehensive income (loss) component is included in the computation of net periodic benefit cost. See Note 11 for additional information.
- (5) In the fourth quarter of fiscal year 2018, the Company adopted FASB Accounting Standards Update 2018-02, which addressed the disproportionate income tax effects on pretax amounts recorded in accumulated other comprehensive income (loss) arising from the enactment of the Tax Cuts and Jobs Act of 2017. With the adoption of ASU 2018-02, the disproportionate tax effects were reclassified to retained earnings, and the resulting tax effects remaining in accumulated other comprehensive income (loss) are reflective of the rates which those amounts will ultimately be taxed.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

**NOTE 17. UNAUDITED QUARTERLY FINANCIAL DATA**

Unaudited quarterly financial data for the fiscal years ended March 31, 2019 and 2018 is provided in the table below. Due to the seasonal nature of the Company's business, management believes it is generally more meaningful to focus on cumulative rather than quarterly results.

	<b>First Quarter</b>	<b>Second Quarter</b>	<b>Third Quarter</b>	<b>Fourth Quarter</b>
<b>Fiscal Year Ended March 31, 2019</b>				
Operating Results:				
Sales and other operating revenues .....	\$ 379,719	\$ 539,604	\$ 636,107	\$ 671,723
Gross profit .....	72,221	99,460	115,430	119,480
Net income .....	11,060	34,293	31,089	33,692
Net income attributable to Universal Corporation .....	13,179	31,446	28,135	31,361
Earnings per common share:				
Basic .....	0.53	1.25	1.12	1.25
Diluted .....	0.52	1.24	1.11	1.24
Cash Dividends Declared:				
Per share of common stock .....	0.75	0.75	0.75	0.75
Market Price Range of Common Stock:				
High .....	68.25	71.60	76.98	60.67
Low .....	46.40	55.66	53.03	52.60
<b>Fiscal Year Ended March 31, 2018</b>				
Operating Results:				
Sales and other operating revenues .....	\$ 284,622	\$ 488,248	\$ 653,581	\$ 607,496
Gross profit .....	53,857	93,076	108,518	116,497
Net income .....	3,321	28,306	50,219	34,322
Net income attributable to Universal Corporation .....	3,577	26,167	45,400	30,518
Earnings per common share:				
Basic .....	0.14	1.03	1.80	1.21
Diluted .....	0.14	1.02	1.78	1.20
Cash Dividends Declared:				
Per share of common stock .....	0.54	0.54	0.55	0.55
Market Price Range of Common Stock:				
High .....	75.70	65.90	60.45	53.85
Low .....	63.15	55.00	52.05	45.95

Note: Earnings per share amounts for each fiscal year may not equal the total of the four quarterly amounts due to differences in weighted-average outstanding shares for the respective periods.

**UNIVERSAL CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**

Significant items included in the quarterly results were as follows:

**Fiscal Year Ended March 31, 2019**

- First Quarter – Net income attributable to Universal Corporation included a \$6.9 million reduction of income tax expense for the reversal of amounts previously recorded for dividend withholding taxes on distributed and undistributed retained earnings of a foreign subsidiary following the resolution of uncertainties with the local country taxing authorities with respect to the inclusion of the tax under a tax holiday applicable to the subsidiary. The reduction of income tax expense increased diluted earnings per share for the quarter by \$0.27.
- Second Quarter – Net income attributable to Universal Corporation included a \$0.9 million additional reduction of income tax expense for amounts previously recorded for dividend withholding taxes on distributed and undistributed retained earnings of a foreign subsidiary due to the above-mentioned tax holiday. The reduction of income tax expense increased diluted earnings per share for the quarter by \$0.03.
- Third Quarter – Results included restructuring and impairment costs totaling \$19.4 million, related to the Company's operations in Tanzania (see Note 3). The restructuring and impairment costs included employee termination benefits, as well as impairment charges related to certain property, plant, equipment, and goodwill. Those costs reduced net income attributable to Universal Corporation by \$15.8 million and diluted earnings per share by \$0.62.
- Fourth Quarter – Results included restructuring costs of approximately \$0.9 million related to smaller operations, which reduced net income attributable to Universal Corporation by approximately \$0.6 million and diluted earnings per share by \$0.02.

**Fiscal Year Ended March 31, 2018**

- Third Quarter – Net income attributable to Universal Corporation included a \$10.5 million reduction of income tax expense from the initial provisional accounting for the enactment of the Tax Cuts and Jobs Act in December 2017, which increased diluted earnings per share for the quarter by \$0.41.
- Fourth Quarter – Net income attributable to Universal Corporation included a \$6.0 million adjustment to the initial provisional accounting for the enactment of the Tax Cuts and Jobs Act, which lowered the net reduction in income tax expense recorded in the third quarter from \$10.5 million to \$4.5 million and reduced diluted earnings per share for the quarter by \$0.24.

## **Report of Ernst & Young LLP, Independent Registered Public Accounting Firm**

To the Shareholders and the Board of Directors of Universal Corporation

### **Opinion on the Financial Statements**

We have audited the accompanying consolidated balance sheets of Universal Corporation (the Company) as of March 31, 2019 and 2018, the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended March 31, 2019, and the related notes and financial statement schedule listed in the Index at Item 15(a)2 (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at March 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended March 31, 2019, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of March 31, 2019, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated May 24, 2019 expressed an unqualified opinion thereon.

### **Basis for Opinion**

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 1971.

Richmond, Virginia

May 24, 2019

**Report of Ernst & Young LLP, Independent Registered Public Accounting Firm,  
on Internal Control Over Financial Reporting**

To the Shareholders and the Board of Directors of Universal Corporation

**Opinion on Internal Control over Financial Reporting**

We have audited Universal Corporation's internal control over financial reporting as of March 31, 2019, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Universal Corporation, (the Company) maintained, in all material respects, effective internal control over financial reporting as of March 31, 2019, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of March 31, 2019 and 2018, and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended March 31, 2019, and the related notes and financial statement schedule listed in the Index at Item 15(a)2 report dated May 24, 2019 expressed an unqualified opinion thereon.

**Basis for Opinion**

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

**Definitions and Limitations of Internal Control Over Financial Reporting**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Richmond, Virginia  
May 24, 2019

## **Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure**

For the three years ended March 31, 2019, there were no changes in independent auditors, nor were there any disagreements between the Company and its independent auditors on any matter of accounting principles, practices, or financial disclosures.

### **Item 9A. Controls and Procedures**

#### **Disclosure Controls and Procedures**

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports filed by the Company under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. The Company's Chief Executive Officer and Chief Financial Officer evaluated, with the participation of the Company's management, the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Annual Report. Based on this evaluation, the Company's management, including its Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective.

#### **Management's Report on Internal Control Over Financial Reporting**

The Company's management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance to management and the Board of Directors regarding the preparation and fair presentation of the consolidated financial statements. Due to inherent limitations, internal control over financial reporting may not prevent or detect all errors or misstatements in the financial statements, and even control procedures that are determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions.

As required by Exchange Act Rule 13a-15(c), the Company's Chief Executive Officer and Chief Financial Officer, with the participation of other members of management, assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2019. The evaluation was based on the criteria set forth in "Internal Control – Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) ("the COSO criteria"). Based on this assessment, the Company's management concluded that the Company's internal control over financial reporting was effective at the reasonable assurance level as of March 31, 2019.

The Company's independent registered public accounting firm, Ernst & Young LLP, has audited the Company's internal control over financial reporting as of March 31, 2019. Their report on this audit appears on page 90 of this Annual Report.

#### **Changes in Internal Control Over Financial Reporting**

There were no changes in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

### **Item 9B. Other Information**

None.

### PART III

#### Item 10. Directors, Executive Officers, and Corporate Governance

Except as to the matters set forth below, information required by this Item is incorporated herein by reference to the Company's 2019 Proxy Statement.

The following are executive officers of the Company as of May 24, 2019:

Name and Age	Position	Business Experience During Past The Five Years
G. C. Freeman, III (55)	Chairman, President, and Chief Executive Officer	Mr. Freeman was elected Chairman of the Board in August 2008, Chief Executive Officer effective April 2008, President in December 2006, and Vice President in November 2005. Mr. Freeman served as General Counsel and Secretary from February 2001 until November 2005 and has been employed with the Company since 1997.
A. L. Hentschke (49)	Senior Vice President and Chief Operating Officer	Mr. Hentschke was elected Senior Vice President and Chief Operating Officer in April 2015. From January 2013 to April 2015, he served as Executive Vice President of Universal Leaf Tobacco Company, Incorporated ("Universal Leaf"). From November 2009 to January 2013, Mr. Hentschke served as President and Chief Executive Officer of Universal Leaf Tabacos, Limitada, the Company's operating subsidiary in Brazil. He has been employed with the Company and its affiliates since 1991.
J. C. Kroner (51)	Senior Vice President and Chief Financial Officer	Mr. Kroner was elected Senior Vice President and Chief Financial Officer effective September 2018. Mr. Kroner was elected Senior Vice President in February 2018. He served as Senior Vice President of Universal Leaf from September 2014 to September 2018. He served as Vice President from October 2011 to September 2014. He has been employed with the Company since July 1993.
T. G. Broome (65)	Executive Vice President and Sales Director, Universal Leaf Tobacco Company, Inc.	Mr. Broome was elected Executive Vice President and Sales Director, Universal Leaf, in October 2012. From April 2011 through October 2012, Mr. Broome served as Executive Vice President. From September 1998 through March 2011, Mr. Broome served as Senior Vice President-Sales. He has been employed with the Company since 1994.
P. D. Wigner (50)	Vice President, General Counsel and Secretary	Mr. Wigner was elected Vice President in August 2007, and General Counsel and Secretary in November 2005 and also served as Chief Compliance Officer from November 2007 until September 2012. Mr. Wigner served as Senior Counsel of Universal Leaf from November 2004 until November 2005. He has been employed with the Company since 2003.
J. A. Huffman (57)	Senior Vice President, Information and Planning, Universal Leaf Tobacco Company, Inc.	Mr. Huffman was elected Senior Vice President, Information and Planning, Universal Leaf, in August 2007. From September 2003 to August 2007, Mr. Huffman served as Senior Vice President. From September 2002 to September 2003, Mr. Huffman served as Vice President and Controller. He has been employed with the Company since 1996.
C. H. Claiborne (58)	Vice President and Assistant Secretary	Mrs. Claiborne was elected Vice President and Assistant Secretary effective February 2018. She served as Assistant Secretary from 2001 to February 2018. From October 2004 to February 2018, Mrs. Claiborne served as Vice President, Associate General Counsel, and Secretary of Universal Leaf. She has been employed with the Company since December 1999.

<b>Name and Age</b>	<b>Position</b>	<b>Business Experience During Past The Five Years</b>
C. C. Formacek (59)	Vice President and Treasurer	Ms. Formacek was elected Vice President and Treasurer effective April 2012. Ms. Formacek served as Treasurer of Universal Leaf from April 2011 through March 2012. She joined the Company in September 2009 and served as Assistant Treasurer of Universal Leaf from that time through March 2011.
R. M. Peebles (61)	Vice President and Controller	Mr. Peebles was elected Vice President and Controller in April 2011. Mr. Peebles joined the Company in September 2003 and served as Controller from that time through March 2011.

There are no family relationships between any of the above officers.

The Company has a Code of Conduct that includes the NYSE requirements for a “Code of Business Conduct and Ethics” and the SEC requirements for a “Code of Ethics for Senior Financial Officers.” The Code of Conduct is applicable to all officers, employees, and outside directors of the Company, including the principal executive officer, principal financial officer, and principal accounting officer. A copy of the Code of Conduct is available through the “Corporate Governance-Overview” section of the Company’s website at [www.universalcorp.com](http://www.universalcorp.com). If the Company amends a provision of the Code of Conduct, or grants a waiver from any such provision to a director or executive officer, the Company will disclose such amendments and the details of such waivers on the Company’s website [www.universalcorp.com](http://www.universalcorp.com) to the extent required by the SEC or the NYSE.

The information required by Items 407(c)(3), (d)(4) and (d)(5) of Regulation S-K is contained under the captions “Corporate Governance and Committees—Committees of the Board—Compensation Committee,” “Corporate Governance and Committees—Committees of the Board—Audit Committee” of the Company’s 2019 Proxy Statement and such information is incorporated by reference herein.

#### **Item 11. Executive Compensation**

Refer to the captions “Executive Compensation” and “Directors’ Compensation” in the Company’s 2019 Proxy Statement, which information is incorporated herein by reference.

#### **Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**

Refer to the caption “Stock Ownership” in the Company’s 2019 Proxy Statement, which information is incorporated herein by reference.

#### **Item 13. Certain Relationships and Related Transactions, and Director Independence**

Refer to the caption “Certain Transactions” in the Company’s 2019 Proxy Statement, which information is incorporated herein by reference. The information required by Item 407(a) of Regulation S-K is contained under the caption “Corporate Governance and Committees—Director Independence” of the Company’s 2019 Proxy Statement and such information is incorporated by reference herein.

#### **Item 14. Principal Accounting Fees and Services**

Refer to the captions “Audit Information – Fees of Independent Auditors” and “Audit Information – Pre-Approval Policies and Procedures” in the Company’s 2019 Proxy Statement, which information is incorporated herein by reference.

## PART IV

### Item 15. Exhibits, Financial Statement Schedules
