businesses of all sizes covering a wide range of economic activities. First BanCorp has a \$1.0 billion portfolio of residential mortgages. The institution also has \$1.15 billion in consumer loans, concentrated in auto loans and leases, personal loans and credit cards. Its \$3.7 billion investment portfolio consists mostly of U.S. Treasury and agency securities and mortgage backed securities. A strategic alliance with a major national brokerage firm allows FirstBank to offer brokerage

First BanCorp distinguished itself by providing innovative marketing strategies and novel products to attract

clients.

services in its largest branches, and the FirstBank Insurance Agency sells insurance from some FirstBank branches as well. Approximately 1,700 professionals and a sophisticated computer system support the business activities of the Corporation.

First chartered in 1948, First BanCorp was the first savings bank established in Puerto Rico, under the name of "First Federal Savings and Loan Association". It has been a stockholder owned institution since 1987. In October, 1994 it became a Puerto Rico chartered commercial bank and assumed the name of "FirstBank". Effective October 1, 1998 the Bank reorganized, making FirstBank a subsidiary of the holding company First BanCorp.

The Corporation, which is a well-capitalized institution under federal standards, operates 48 full service branches including four offices in the U.S. Virgin Islands. The Corporation also has two auto loan centers and seven mortgage loan centers in Puerto Rico. In addition, the FirstBank Insurance Agency operates five sales offices. A second tier subsidiary of First BanCorp, Money Express, operates 27 small loan offices throughout Puerto Rico. First BanCorp also includes a second tier subsidiary known as First Leasing and Rental Corp. which rents and leases motor vehicles from its seven offices in Puerto Rico.

First BanCorp has distinguished itself by providing innovative marketing strategies and novel products to attract clients. Besides its main branches and specialized lending offices, the Corporation has offered a telephone information service called "Telebanco" since 1983. This was the first telebanking service offered in Puerto Rico. First BanCorp clients have access to an extensive ATM network with access to the U.S. Virgin Islands, the U.S. mainland and all over the world. The Corporation was also the first in Puerto Rico to open on weekends and the first to offer in-store branches to its clients. First BanCorp was also the first banking institution in Puerto Rico with a presence on the internet. The Corporation now offers a wide menu of internet banking services to its clients.

First BanCorp and its subsidiaries are subject to supervision, examination and regulation by the Federal Reserve Board, the Federal Deposit Insurance Corporation and the Commissioner of Financial Institutions of Puerto Rico. The FirstBank Insurance Agency is regulated by the Puerto Rico Insurance Commissioner. The Virgin Islands operations of FirstBank are regulated by the Virgin Islands Banking Board.

First BanCorp is committed to providing the most efficient and cost effective banking services possible. Management's goal is to be the premier financial institution in Puerto Rico and the Virgin Islands, recognized for consistently exceeding the expectations of its clients, employees and stockholders.

for these
achievements.

# One 1 Message

# >. To our stockholders:

On behalf of the Board of Directors and staff of First BanCorp I am pleased to submit our annual report for 2001, another record year. In 2001 First BanCorp earned \$86.0 million, representing \$2.61 per common share (basic) or \$2.60 per common share (diluted). These earnings compare favorably with 2000, when the Corporation earned \$67.3 million, which came to \$2.22 per common share (basic) or \$2.21 per common share (diluted).

Net income increased 27.8% and diluted earnings per share rose 17.6% in 2001. The Corporation achieved a 22.13% return on common equity in 2001, while the return on average assets was 1.28%. The efficiency ratio improved to an outstanding 41.81%. Growth, diversification, cost control and service have laid the foundations for these achievements. I will emphasize those four themes in this letter.

### > New Initiatives and Growth

Our business grew substantially last year. Assets rose 38.5% from \$5.9 billion at year-end 2000 to \$8.2 billion at the end of 2001. Loans increased 23.2% to \$4.3 billion, due mainly to an \$822 million increase in residential mortgage and commercial lending. Deposits increased 22.5% to \$4.1 billion.

During 2001 First BanCorp created a new subsidiary, the FirstBank Insurance Agency. The Gramm Leach Bliley Act and related changes in local laws now permit Financial Holding Companies to enter the insurance business. The FirstBank Insurance Agency will not underwrite insurance or cover risks. It will sell third party insurance from FirstBank branches using its own licensed representatives. The new company will initiate operations in five branches during 2002 and we expect it to grow steadily in coming years. The FirstBank Insurance Agency moves us one step closer to "one stop shopping" for financial services.

At the beginning of 2002 we announced plans to acquire the operations of JP Morgan Chase & Co. in the Virgin Islands. This transaction is subject to regulatory approval and to a formal agreement concerning its details. Chase's Virgin Islands operations include over \$500 million of assets, including eight branches and 14 ATM locations on four islands. This acquisition also includes an insurance agency, Chase Agency Services, Inc. and an export service company, Chase Trade, Inc. This acquisition shows our commitment to the Virgin Islands, where we currently have four offices. FirstBank has been serving the U.S. Virgin Islands since 1962.

### >. Strategic Relationships with Other Firms

FirstBank has an agreement with a major national brokerage house to provide financial and investment services in our branches. They have opened offices in twelve FirstBank facilities, while serving our remaining branches by telephone. On December 31 that firm had accounts totaling approximately \$115 million in the Corporation's offices. During 2001 FirstBank also provided consulting services to Goldman Sachs for seven Puerto Rico bond issues totaling \$6.3 billion.

During 2001 FirstBank also entered new relationships with other firms. The Bank began providing a credit card for clients of a local furniture chain, with approximately 35 outlets and 900 employees, which is currently expanding its operations on the Island. The Bank already offers credit cards for Texaco and Western Auto in Puerto Rico.

Second, First BanCorp purchased an eight percent share of Southern Security Bank, a small Florida institution that is changing its name to Pan American Bank. First BanCorp also owns approximately two percent share in a new Florida banking institution, American Premier Bank. Both institutions are small, community banks that emphasize service. Management remains interested in the Florida banking market. Expansion there remains a possibility, depending on business opportunities and market conditions.

In coming years we will continue working to develop strategic arrangements with established firms. Such alliances allow both

parties to contribute their own specialized knowledge, experience and customer relationships to each specific venture.

### > Funding and Liability Management

We have also been adding new sources of funding. In March 2001 the Corporation opened a new branch in Plaza Guaynabo, a local shopping center in a high income area. This branch has drive-through facilities. During 2002 the Corporation plans to open another office in a new shopping center in the San Juan metropolitan area. These expansions are part of a long-term effort to improve and modernize the Corporation's branch network.

First BanCorp also introduced a CD whose yield is indexed to the S&P 500 stock index. This product complements the existing Dow Jones indexed CD. Both will help the Corporation compete for savings and retirement funds by offering higher long term returns than conventional savings accounts and CD's.

During 2001 First BanCorp also issued \$103.5 million of preferred stock, successfully completing the largest Puerto Rico preferred stock offering ever. At the end of 2001 the Corporation's core capital ratio was 7.49% and the risk-based ratio was 14.50%. We closed an additional \$92 million preferred stock issue at the beginning of 2002, ensuring a comfortable margin for future growth. In addition, the Corporation has restructured its balance sheet to reduce interest rate risk.

### >, Client Service and Corporate Image

First Bancorp has traditionally had a special place in the minds of consumers in Puerto Rico. Our institution began operations in 1948 as "First Federal Savings Bank" and for many years was the leading Savings and Loan institution on the island. Even after converting to a commercial bank in 1994 the Corporation specialized in consumer lending for many years. While we have diversified into commercial lending during the past four years, our base of 600,000 to 700,000 local clients remains, along with our roots in the Puerto Rican community.

As a community service project we have been running a series of advertising campaigns to promote awareness and encourage membership in the Puerto Rico Conservation Trust, a foundation which conserves historic landmarks on the Island. The program featured an "Isla Viva" bank account for children, which included a membership in the same organization. In addition, the program introduced an "Isla Viva" credit card which contributes to the Conservation Trust. This program won the 2001 Excel prize, an award given by the Association of Public Relations Professionals of Puerto Rico for the best public relations program of the year.

# First BanCorp has traditionally had a special place in the minds of consumers...

In response to the economic slowdown on the Island, Management also began a campaign to encourage Puerto Ricans to visit local stores and restaurants, to travel throughout the Island, and to invest in Puerto Rico. The local business community reacted favorably.

Finally, Management launched a three-year effort to further improve service in all areas of our operations. Our continuing efforts to automate branch operations will form part of this process. Beyond this, quality teams composed of bank officers and employees will evaluate, design and implement improved procedures throughout the organization. The goal of this effort is to fully satisfy the banking needs of all our consumer and corporate clients.

### >. Enhancing Shareholder Value

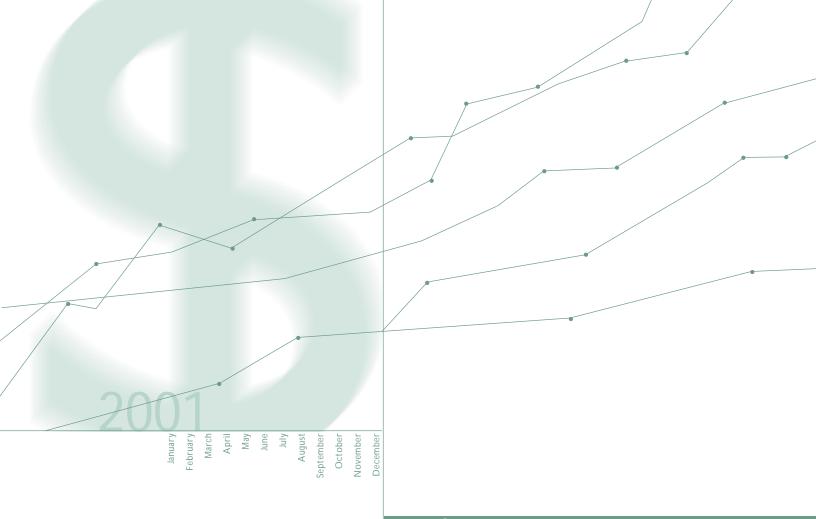

The efforts of our Management and employees have paid off in strong earnings growth in 2001. The Corporation experienced a return on common equity of 22.13% compared with 27.81% last year. Our stock price has reflected these strong results, and our shareholders experienced a return of 22.86% on their investment during 2001. Investors who held First BanCorp stock over the ten year period from year-end 1991 to year-end 2001 received a cumulative total return of 3,397%. Officers and directors of First BanCorp own approximately 16 percent of its shares. This shows their confidence in First BanCorp's future and their commitment to keep its fundamentals sound.

As First BanCorp begins another year of growth and service to the Puerto Rican and Virgin Islands community, we are confident that our Corporation is stronger and better positioned than ever. We have a truly outstanding group of employees, officers and directors. I am confident that we can meet the challenges ahead, and that we will provide better service than ever to our clients, while benefiting employees and stockholders in the years to come.

Angel Alvarez-Pérez '

Chairman President

Chief Executive Officer

# One 1 Set of Numbers - Achievements in 2001

Record profits made 2001 a successful year as First BanCorp earned \$86.0 million, which comes to \$2.61 per common share (basic) or \$2.60 per common share (diluted). In 2000 the Corporation earned \$67.3 million, the equivalent of \$2.22 (basic) or \$2.21 (diluted) per common share. Net income increased by 27.8% in 2001, or 17.6% per share on a diluted basis. Net interest income was the key factor in this outstanding performance, and it grew 23.7% to \$236.1 million during 2001.

Loans increased by \$810.6 million or 23.2% for the year, as residential mortgage and commercial loans grew \$822 million. The investment portfolio grew by \$1.5 billion. During 2001 deposits grew from \$3.3 billion to \$4.1 billion, an increase of \$1.0 billion, or 22.5%.

### >. Diversification of the Balance Sheet

Management has been pursuing a consistent strategy of shifting the lending portfolio towards commercial lending without sacrificing the consumer area. During the latter part of the 1990's Management supported this expansion by recruiting experienced executives and other personnel, by adding new

computer programs and capacity, and by offering new products tailored to commercial clients.

During 2001 the Corporation continued this transition as commercial loans grew \$557 million to \$2.1 billion while consumer lending remained roughly constant at \$1.15 billion. In the five years between the end of 1996 and the end of 2001 consumer loans declined from 61.0% to 26.7% of the Corporation's loan portfolio, while commercial loans increased from 23.3% to 49.8%. Residential mortgage loans increased from 15.7% to 23.5%. In absolute terms, commercial loans grew from \$0.4 billion in 1996 to \$2.1 billion in 2001.

The inauguration of the FirstBank Insurance Agency in 2001 will lead to further diversification. It will lay the groundwork for greater fee income in the future, and complement the First Securities operation in providing a greater variety of services for clients. These changes are transforming First BanCorp into a full service financial holding company which emphasizes both commercial and consumer lending.

### >. Cost Control and Restructuring

During 2001 First BanCorp continued its outstanding record in cost control. The Corporation had an efficiency ratio of 41.81%, considerably better than the 46.95% of 2000. These results compare favorably with others in the industry. Operating expenses rose by 6.9% in 2001, from \$113.0 million to \$120.9 million.

Improvements in data processing technology continued to move forward in 2001. Having introduced internet banking in 2000, the Corporation will be advancing the process of branch automation by mechanizing clerical functions such as opening accounts and handling documents. Teller functions were previously streamlined in 2000. During 2002 the Corporation will also add a larger, more modern mainframe computer which will triple previous computing capacity. These changes will allow the Corporation to continue growing and improving customer service.

The Corporation opened one strategically important branch in 2001 and plans another opening during 2002. Both these branches are located in shopping centers in the San Juan metropolitan area. In addition, First BanCorp is beginning a three year total quality campaign to improve service quality in all areas of the institution. These changes will make the branch network more efficient and serve clients better.

### >. Asset Quality

Despite economic growth on the island slowing, Management has mostly maintained the hard-won gains in asset quality

achieved since 1998, when the Corporation improved its underwriting, introduced tighter approval procedures and improved computer systems. The quality of the Corporation's assets contributed importantly to the record profits last year.

During 2001 First BanCorp wrote off \$47.0 million of loans on a net basis, compared with \$42.0 million in 2000, \$44.6 million in 1999 and \$66.2 million in 1998. The amounts provided for loan losses have followed a similar trend. They were \$61.0 million in 2001, \$45.7 million in 2000, \$48.0 million in 1999 and \$76.0 million in 1998. On December 31, 2001 non-performing loans totaled \$73.0 million, compared to \$67.7 million on the same date in 2000, and \$53.8 million at the end of 1999.

These trends took place as the overall loan portfolio more than doubled to \$4.3 billion at the end of 2001 from \$2.1 billion at the end of 1998. The Corporation has built its loan loss reserves in line with this growth. Loan loss reserves reached \$91.1 million at the end of 2001, compared with \$76.9 million for 2000, \$71.8 million for 1999 and \$67.9 million for 1998. As a result, the reserve coverage ratio (allowance for loan losses as a percentage of non-performing loans) has remained above100% in the recent past. It was 124.7% at the end of 2001, 113.6% at the end of 2000, 133.4% at year-end 1999 and 119.1% at the end of 1998.

Overall, loan quality has been improving even as the size of the loan portfolio has grown. At the end of 2001 the ratio of non-performing loans to total loans had fallen to 1.69%, compared with 1.94% at the end of 2000, 1.96% at the end of 1999 and 2.69% at year-end 1998. Maintaining good asset quality has been an achievement, in view of the recessionary environment which prevailed during 2001.

### >. Restructuring Liabilities and Capital

Management also restructured the Corporation's liabilities during 2001, adding fixed rate borrowings and deposits with terms ranging from two to five years. These changes have reduced the Corporation's exposure to interest rate risk in the future.

During 2001 Management also strengthened the capital structure of First BanCorp by issuing \$103.5 million in preferred stock, the largest issue of its type ever undertaken in Puerto Rico. Management closed an additional \$92 million issue of preferred stock in early 2002. Although assets grew substantially during 2001 these transactions helped the Corporation to maintain a solid and prudent capital structure. As of December 31, 2001 the core capital ratio was 7.49% and the risk based capital ratio was 14.50%.

Maintaining ood asset uality has been an achievement, in view of the recessionary environment which prevailed during 2001.

### >. Increasing Shareholder Value

The financial results reported here continue a pattern of growth and improving asset quality that has been consistent for several years. The results have been very beneficial to shareholders. First BanCorp's return on common equity was 22.13% in 2001, while the return on average assets was 1.28%. Dividends were increased in 2001, but the payout ratio remained a conservative 19.91% compared with 19.72% in 2000.

First BanCorp shareholders experienced a total return of 22.86% on their investment during 2001. Investors who held First BanCorp stock over the ten year period from year-end 1991 to year-end 2001 received a cumulative total return of 3,397%.

Management is optimistic about the future of First BanCorp. The range of services it offers, its effective network of offices and branches supplemented by new sales methods, its dedicated staff and its reputation with clients will all contribute to future earnings growth. Management will continue its efforts to improve First BanCorp's excellent performance in 2002 and in the years to come.

# One 1 Economy

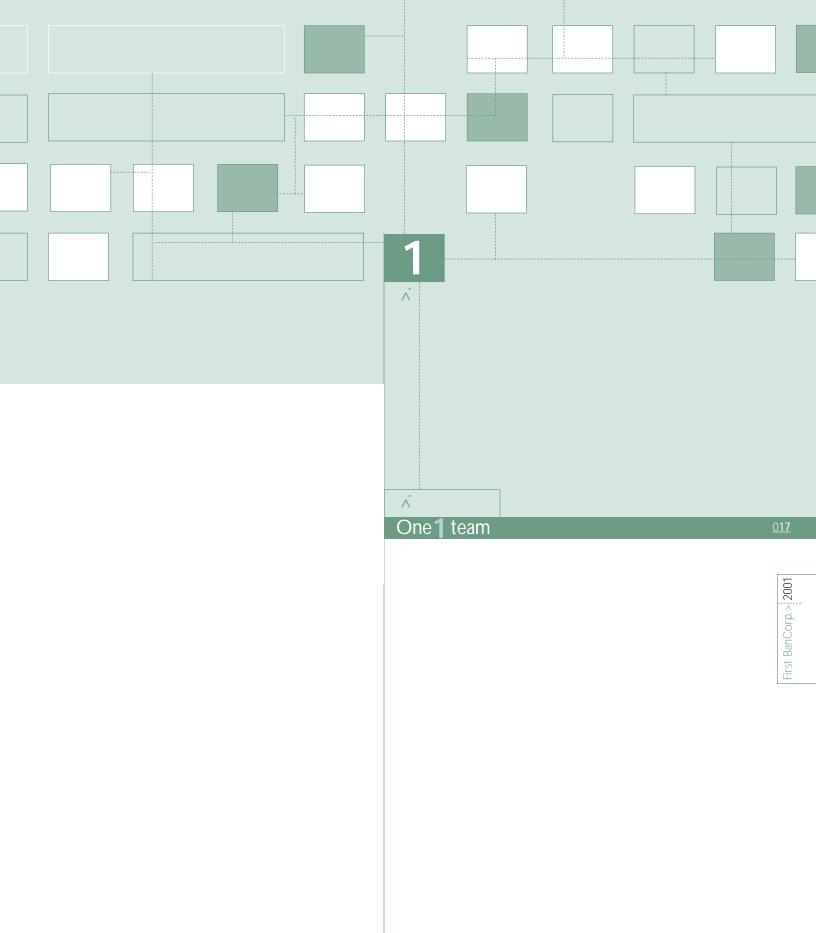

The Island of Puerto Rico is a U.S. Commonwealth with a population of 3.8 million, located in the Caribbean approximately 1,600 miles southeast of New York. Puerto Rico enjoyed solid economic growth over most of the 1990's. Real GNP grew by 3.1% in the 2000 fiscal year, according to the most recent official data available. Economists project a slowdown to less than 2% during fiscal 2001 and a small decline in fiscal 2002 due to the U.S. recession.

Puerto Rico's economic performance is a natural result of its increasing integration into the U.S. economy. Puerto Ricans are U.S. citizens and serve in the United States armed forces, and the Island has several large U.S. military bases. The Island uses U.S. currency and forms part of the U.S. financial system. Federal courts enforce U.S. laws here. Since Puerto Rico falls within the U.S. for purposes of customs and migration, there is full mobility of funds, people and goods between Puerto Rico and the U.S. mainland. Puerto Rico banks are subject to the same Federal laws, regulations and supervision as other financial institutions in the rest of the U.S. The Federal Deposit Insurance Corporation insures the deposits of Puerto Rico chartered commercial banks, including FirstBank, the banking subsidiary of First BanCorp.

Puerto Rico made a rapid transition from poverty in the immediate postwar period to prosperity today. Throughout this process the Island has attracted industry using tax exemption. Many multinational corporations have substantial operations here. During 1996 Congress repealed Section 936 of the Internal Revenue Code, which provided Federal tax exemption for companies operating in Puerto Rico. However, Congress also provided a ten year grandfather clause for companies already operating here. The reduction of tax incentives has combined with intense wage competition in other areas and the U.S. recession to reduce manufacturing employment.

Still, Puerto Rico is becoming somewhat less dependent on manufacturing than it was in the early postwar period. While manufacturing is still an important part of its economy, Puerto Rico has been diversifying to include tourism, services and transportation.

During the recent slowdown construction activity has held up well, but manufacturing and consumption have weakened somewhat. Tourism has been affected along with the rest of the Caribbean region, though new hotels have mitigated this effect. Economists expect a decrease of less than 1% in real GNP during fiscal 2002 followed by recovery and growth in future years.

Financial Review

>. The table on the following pages shows the Corporation's history in numbers. From 1991 to 2001, the Corporation reported consistent growth without restating earnings. Over this period, asset size increased more than fourfold from \$1.9 billion to \$8.2 billion, while book value per common share grew ninefold from \$1.35 to \$12.59. Earnings also increased as net income grew more than eight times from \$10 million to \$86 million. The efficiency ratio improved dramatically from 63.69% to 41.81%, and diluted per share earnings grew tenfold from \$0.22 to \$2.60. Since 1991 First BanCorp has transformed itself from First Federal Savings Bank, a small Savings and Loan Institution, into First BanCorp, a diversified financial services organization.

## > FINANCIAL REVIEW SUMMARY

For the year 2001, First BanCorp (the Corporation) recorded earnings of \$86,001,444 or \$2.61 per common share basic and \$2.60 per common share diluted, compared to \$67,275,609 or \$2.22 per common share basic and \$2.21 per common share diluted for 2000, and \$62,074,949 or \$2.00 per common share basic and \$1.98 per common share diluted for 1999.

The increase in the Corporation's earnings is attributed to the net interest income earned on the growing portfolio of average earning assets, net of increases in operating expenses, a higher provision for loan losses and income taxes. For 2001 as compared to 2000, net income increased by \$18,725,835 or \$0.39 per common share diluted, and for 2000 as compared to 1999, by \$5,200,660 or \$0.23 per common share diluted.

Return on average assets was 1.28% for 2001 and 2000 and 1.49% for 1999. Return on average equity was 16.20% for 2001, 21.21% for 2000 and 21.06% for 1999. Return on average common equity was 22.13% for 2001, 27.81% for 2000 and 24.68% for 1999.

### > RESULTS OF OPERATIONS

The Corporation's results of operations depend primarily on its net interest income, which is the difference between the interest income earned on interest earning assets, including investment securities and loans, and the interest expense paid on interest bearing liabilities, including deposits and borrowings. Also, the results of operations depend on the provision for loan losses, operating expenses (such as personnel, occupancy and other costs), other income (mainly service charges and fees on loans), gains on sale of investments and income taxes.

### >, Net Interest Income

Net interest income increased to \$236 million for 2001 from \$191 million in 2000 and \$186 million in 1999. The increase in net interest income for the year 2001 is the result of volume increases of \$1,307 million in the Corporation's average loan and investment portfolios, and the improvement in the net interest margin.

The following table includes a detailed analysis of net interest income, excluding dividend income on equity securities. Part I presents average volumes and rates on a tax equivalent basis and Part II presents the extent to which changes in interest rates and changes in volume of interest related assets and liabilities have affected the Corporation's net interest income. For each category of earning assets and interest bearing liabilities, information is provided on changes attributable to changes in volume (changes in volume multiplied by old rates), and changes in rate (changes in rate multiplied by old volumes). Rate-volume variances (changes in rate multiplied by changes in volume) have been allocated to the changes in volume and changes in rate based upon their respective percentage of the combined totals.

| Part I                        | /           | Average volur | ne          | Interest  | income (1)   | / expense | Ave    | erage rate | e <b>(1)</b> |

<sup>(1)</sup> On a tax equivalent basis. The tax equivalent yield was computed dividing the interest rate spread on exempt assets by (1- statutory tax rate) and adding to it the cost of interest bearing liabilities. When adjusted to a tax equivalent basis, yields on taxable and exempt assets are comparative.

<sup>(2)</sup> Non-accruing loans are included in the average balances.

Total interest income includes tax equivalent adjustments of \$27 million, \$11 million and \$14 million for 2001, 2000, and 1999, respectively. On a tax equivalent basis, net interest income increased to \$263 million for 2001 from \$201 million for 2000, and \$200 million for 1999. The interest rate spread and net interest margin amounted to 3.64% and 4.08%, respectively, for 2001, as compared to 3.38% and 3.91%, respectively, for 2000 and to 4.29% and 4.85%, respectively, for 1999.

### 2001 compared to 2000

On a tax equivalent basis interest income increased by \$70 million for 2001 as compared to 2000. On a tax equivalent basis the yield on earning assets was 8.42% for 2001 as compared to 9.21% for 2000. The increase in interest income results from the growth in the average volume of interest earning assets of \$1,307 million in 2001, partially offset by a lower yield due to lower market rates. On a rate/volume basis, the increase of \$62 million in net interest income (on a tax equivalent basis) is the result of a positive volume variance of \$42 million, plus a positive rate variance of \$20 million. During the year 2001 short term rates fell 475 basis points due to repeated interest rate cuts by the Federal Reserve Bank. Long term rates fell by less than 50 basis points, increasing the spread between short and long yields and increasing the Corporation's interest rate spread and net interest margin.

For the loan portfolio, the growth in 2001 of \$374 million in the average volume of commercial loans (including commercial real estate loans) represented an increase of \$31 million in interest income due to volume, and a decrease of \$22 million in interest income due to rate. The average portfolio of construction loans increased by \$51 million for 2001, representing a positive volume variance of \$5 million and a negative rate variance of \$6 million. The average portfolio of residential mortgage loans increased by \$296 million for 2001, representing a positive volume variance of \$24 million and a negative rate variance of \$7 million. The average finance lease portfolio (mostly composed of consumer loans) increased by \$25 million in 2001, representing a positive volume variance of \$3 million. The increase of \$11 million in the average volume of consumer loans in 2001, represented a positive variance in interest income due to volume of \$2 million

and a negative rate variance of \$2 million. The increase in the commercial and construction loans portfolio resulted from the Corporation's strategy to diversify its asset base.

For the investment portfolio, the average volume of mortgage backed securities increased by \$255 million in 2001. The tax equivalent yield on mortgage backed securities was 7.37% in 2001 and 6.89% in 2000. The portfolio of mortgage backed securities contributed \$18 million in interest income due to volume and \$7 million in interest income due to rate. The average volume of corporate bonds increased by \$196 million for 2001 as compared to 2000, causing an increase in interest income of \$17 million totally due to volume.

Interest expense increased by \$8 million for 2001 as compared to 2000. This was the result of the increase in the average volume of interest bearing liabilities of \$1,191 million for 2001 as compared to 2000 which generated a negative volume variance of \$63 million, partially offset by the decrease in the cost of interest bearing liabilities due to lower market rates, causing a positive rate variance of \$55 million. The cost of interest bearing liabilities decreased from 5.83% for 2000 to 4.78% for 2001.

### 2000 compared to 1999

On a tax equivalent basis interest income increased by \$91 million for 2000 as compared to 1999. On a tax equivalent basis the yield on earning assets was 9.21% for 2000 as compared to 9.29% for 1999. The increase in interest income results from the growth in the average volume of interest earning assets of \$1,023 million in 2000. On a rate/volume basis, the increase of \$1 million in net interest income (on a tax equivalent basis) is the result of a positive volume variance of \$36 million, net of a negative rate variance of \$35 million. During 2000 the Federal Reserve Bank tightened the monetary policy, raising the federal fund rate by approximately 100 basis points. At the same time, long term rates fell during the latter part of the year as markets began to anticipate a slowdown (the ten year note fell 104 basis points from December, 1999 to December, 2000). These trends inverted the yield curve during the latter part of 2000, reducing the Corporation's interest rate spread and net interest margin.

For the loan portfolio, the growth in 2000 of \$363 million in the average volume of commercial loans (including commercial real estate loans) represented an increase of \$33 million in interest income due to volume, and an increase of \$2 million in interest income due to rate. The average portfolio of construction loans increased by \$74 million for 2000, representing a positive volume variance of \$8 million and a positive rate variance of \$1 million. The average portfolio of residential mortgage loans increased by \$246 million for 2000, representing a positive volume variance of \$22 million. The average finance lease portfolio (mostly composed of consumer loans) increased by \$35 million in 2000, representing a positive volume variance of \$4 million. The increase of \$12 million in the average volume of consumer loans in 2000, represented a positive variance in interest income due to volume of \$2 million. The increase in the commercial real estate, construction and commercial loans portfolio resulted from the Corporation's strategy to diversify its asset base, which was concentrated in higher risk consumer loans.

For the investment portfolio, the average volume of mortgage backed securities increased by \$163 million in 2000. The tax equivalent yield on mortgage backed securities was 6.89% in 2000 and 7.12% in 1999. The portfolio of mortgage backed securities contributed \$11 million in interest income due to volume net of \$3 million decrease in interest income due to rate. The average volume of government obligations increased by \$113 million for 2000 as compared to 1999, causing a total increase in interest income of \$11 million.

Interest expense increased by \$89 million for 2000 as compared to 1999. This was the result of the increase in the average volume of interest bear-

ing liabilities of \$1,007 million for 2000 as compared to 1999 which generated a volume variance of \$54 million, together with an increase in the cost of interest bearing liabilities from 5.00% for 1999 to 5.83% for 2000 which caused a rate variance of \$35 million for 2000 as compared to 1999.

### >. Provision for Loan Losses

During 2001, the Corporation provided \$61 million for loan losses, as compared to \$46 million in 2000 and \$48 million in 1999. The increase in the provision for loan losses was due to the growth of the total loan portfolio, to the increase in net charge offs of \$5 million, and to current economic conditions. Net charge offs for 2001 amounted to \$47 million, as compared to net charge offs for 2000 of \$42 million, and of \$45 million for 1999. The absolute dollar increase is attributable to a commercial loan written off during the first quarter of 2001. Net charge offs to average loans outstanding has improved to 1.22% as compared to 1.36% and 1.90% for 2000 and 1999, respectively.

The allowance activity for 2001, and previous four years was as follows:

| Year ended December 31,                      | 2001     | 2000     | 1999             | 1998     | 1997     |
|--|----------|----------|------------------|----------|----------|
|  |          | (D       | ollars in thousa | ınds)    |          |
| Allowance for loan losses, beginning of year | \$76,919 | \$71,784 | \$67,854         | \$57,712 | \$55,254 |
| Provision for loan losses                    | 61,030   | 45,719   | 47,960           | 76,000   | 55,675   |
| Loans charged off:                           |          |          |                  |          |          |

| outstanding during the period                | 1.22%    | 1.36%    | 1.90%            | 3.31%    | 2.79%    |

The Corporation maintains the allowance for loan losses at a level that Management considers adequate to absorb losses inherent in the loan portfolio. The adequacy of the allowance for loan losses is reviewed on a quarterly basis as part of the continuing evaluation of the quality of the assets. This evaluation is based upon a number of factors, including the following: historical loan loss experience, projected loan losses, loan portfolio composition, current economic conditions, fair value of the underlying collateral, financial condition of the borrowers, and, as such, includes amounts based on judgments and estimates made by Management.

The allowance for loan losses on commercial and real estate loans over \$1 million is determined based on the present value of expected future cash flows or the fair value of the collateral, if the loan is collateral dependent.

### > Other Income

The following table presents the composition of other income.

| Year ended December 31,             | 2001     | 2000           | 1999      |
|-------------------------------------|----------|----------------|-----------|
|                                     |          | (In thousands) |           |
| Other fees on loans                 | \$19,632 | \$19,913       | \$ 12,887 |
| Service charges on deposit accounts | 9,213    | 8,898          | 8,540     |
| Mortgage banking activities         | 1,585    | 521            | 870       |
| Rental income                       | 2,293    | 2,434          | 2,610     |
| Other commissions                   | 1,511    | 1,340          |           |
| Other operating income              | 8,471    | 7,959          | 6,584     |
| Other income before gain on         |          |                |           |
| sale of investments, trading and    |          |                |           |
| dividend on equity securities       | 42,705   | 41,065         | 31,491    |
| Gain on sale of investments         | 9,606    | 7,850          | 1,377     |
| Trading income (loss)               |          | 419            | (8)       |
| Dividend on equity securities       | 669      | 698            | 2         |
| Total                               | \$52,980 | \$50,032       | \$32,862  |

Other income primarily consists of fees on loans, service charges on deposit accounts, commissions derived from various banking activities, and gains on sale of investments.

Other fees on loans consist mainly of credit card fees and late charges collected on loans. The increase in this source of income to \$20 million in 2001 and 2000, from \$13 million in 1999 was mainly due to fees generated on the increased portfolio of loans, and to the elimination on the prohibition of late charges on credit card fees in Puerto Rico during 2000.

Service charges on deposit accounts represent an important and stable source of other income for the Corporation. This source of income has averaged \$9 million for the last three years.

Mortgage banking activities income reflect the servicing fees on residential mortgage loans originated by the Corporation and subsequently securitized or sold, and gain on sale of loans. The increase for 2001 results from the gain of \$1.3 million on the sale of \$42.3 million of mortgage loans to Fannie Mae, with servicing retained. There were no sales of loans in 2000, and only \$1.3 million sold in 1999.

The Corporation's subsidiary, First Leasing and Rental Corporation, generates income on the rental of various types of motor vehicles. This source of income has averaged approximately \$2 million in the past three years.

As a result of an agreement with Goldman, Sachs, to participate in bond issues by the Government of Puerto Rico, and an agreement with a national brokerage house in Puerto Rico to offer brokerage services in selected branches, the Corporation earned \$1.5 million and \$1.3 million in other commissions in 2001 and 2000, respectively.

The other operating income category is composed of various types of service fee such as check fees and rental of safe deposit boxes. Other operating income also includes earned discounts on tax credits purchased and utilized against income tax payments, and other fees generated on the increased portfolio of commercial loans. In addition, other income includes the commissions earned by the new subsidiary FirstBank Insurance Agency, Inc., during 2001, which accounted for the increase in this caption from 2000 to 2001.

Gains on sale of investment securities amounted to \$9.6 million in 2001, \$7.9 million in 2000, and \$1.4 million in 1999. These gains reflect market opportunities that arose and that are in consonance to the Corporation's investment policies.

### > Other Operating Expense

Other operating expenses amounted to \$121 million for 2001 as compared to \$113 million for 2000 and \$101 million for 1999. The following table presents the components of other operating expenses.

| Year ended December 31,                  | 2001      | 2000           | 1999      |
|--|-----------|----------------|-----------|
|  |           | (In thousands) |           |
| Salaries and benefits                    | \$54,703  | \$ 50,014      | \$ 48,546 |
| Occupancy and equipment                  | 24,992    | 22,792         | 20,137    |

Management's goal is to limit expenditures to those that directly contribute to increase the efficiency and profitability of the Corporation. This control over other operating expenses has been an important factor contributing to the increase in earnings in recent years. The Corporation's efficiency ratio, which is the ratio of other operating expenses to the sum of net interest income and other income, improved to 41.81% for 2001 as compared to 46.95% and 46.33% for 2000 and 1999, respectively.

The increase in operating expenses for 2001 is mainly the result of the investments made in new technology and infrastructure to provide the latest in delivery channels for its commercial and consumer lending business, and to support the significant growth in earning assets. The occupancy and equipment category consists of expenses associated with premises, office and computer equipment, and other automated banking equipment. The increase in the past three years results also from the enhancement of hardware and software through system conversions, which have enabled the Corporation to offer new products, and improve customer service and portfolio servicing.

The salary and benefits category was affected by annual increases in salary and fringe benefits and an increase of 3% in the number of employees.

### > Income Tax Expense

The provision for income tax amounted to \$20 million (or 19% of pre-tax earnings) for 2001 as compared to \$15 million (or 18% of pre-tax earnings) in 2000, and \$7 million (or 11% of pre-tax earnings) in 1999. The increase in the effective tax rate results from the growth in the residential real estate and commercial line of business. The Corporation has maintained an effective tax rate lower than the statutory rate of 39% mainly by investing in obligations exempt from federal and Puerto Rico income tax. For additional information relating to income taxes, see Note 25 of the Corporation's financial statements - "Income Taxes."

| Total              | \$4,308,779 | 100   | \$3,498,198 | 100   | \$2,745,368 | 100      | \$2,120,054 | 100   | \$1,959,301 | 100   |

Total loans receivable increased by \$811 million in 2001 when compared with 2000. During 2001 the Corporation continued its strategy of diversifying its loan portfolio composition through the origination and purchase of commercial loans and residential real estate loans, while maintaining its investment in consumer loans at approximately \$1.0 billion. This resulted in a significant increase of \$557 million in the commercial loan portfolio and of \$265 million in residential real estate loans. Finance leases, which are mostly composed of loans to individuals to finance the acquisition of an auto, increased by \$5 million, and consumer loans decreased by \$16 million in 2001.

The Corporation's investment portfolio at December 31, 2001 amounted to \$3,716 million, an increase of \$1,483 million when compared with the investment portfolio of \$2,233 million at December 31, 2000.

The composition and estimated tax equivalent weighted average interest and dividend yields of the Corporation's earning assets at December 31, 2001 were as follows:

|  | Amount (In thousands) | Weighted<br>Average Rate |
|--|-----------------------|--------------------------|
| Manager and the first transfer and the second secon | ф 24.Г/Г              |                          |

## >. Non-performing Assets

Total non-performing assets are the sum of non-accruing loans, other real estate owned and other repossessed properties. Non-accruing loans are loans as to which interest is no longer being recognized. When loans fall into non-accruing status, all previously accrued and uncollected interest is charged against interest income.

At December 31, 2001, total non-performing assets amounted to \$79 million (0.96% of total assets) as compared to \$74 million (1.25% of total assets) at December 31, 2000 and \$57 million (1.22% of total assets) at December 31, 1999. The Corporation's allowance for loan losses to non-performing loans was 124.7% at December 31, 2001 as compared to 113.6% and 133.4% at December 31, 2000 and 1999, respectively.

The following table presents non-performing assets at the dates indicated.

| December 31,                            | 2001     | 2000     | 1999             | 1998     | 1997     |

## **Non-accruing Loans**

Residential Real Estate Loans - The Corporation classifies all real estate loans delinquent 90 days or more in non-accruing status. Even though these loans are in non-accruing status, Management considers based on the value of the underlying collateral and the loan to value ratios, that no material losses will be incurred in this portfolio. Management's estimate is based on the historical experience of the Corporation. Non-accruing real estate loans amounted to \$19 million (1.83% of total residential real estate loans) at December 31, 2001, as compared to \$16 million (2.14% of total residential real estate loans) and \$9 million (1.82% of total residential real estate loans) at December 31, 2000 and 1999, respectively.

Commercial Loans - The Corporation places all commercial loans (including commercial real estate and construction loans) 90 days delinquent as to principal and interest in non-accruing status. The risk exposure of this portfolio is diversified. Non-accruing commercial loans amounted to \$29 million (1.37% of total commercial loans) at December 31, 2001 as compared to \$32 million (2.01% of total commercial loans) and \$18 million (1.55% of total commercial loans) at December 31, 2000 and 1999, respectively. At December 31, 2001, there was only one non-accruing commercial loan of over \$1 million (of \$3.6 million).

<u>Finance Leases</u> - Finance leases are classified as non-accruing when they are delinquent 90 days or more. Non-accruing finance leases amounted to \$2 million (1.93% of total finance leases) at December 31, 2001, compared to \$2 million (1.65% of total finance leases) at December 31, 2000, and \$2 million (2.90% of total finance leases) at December 31, 1999.

<u>Consumer Loans</u> - Consumer loans are classified as non-accruing when they are delinquent 90 days in auto, boat and home equity reserve loans, 120 days in personal loans (including small loans) and 180 days in credit cards and personal lines of credit.

Non-accruing consumer loans amounted to \$23 million (2.21% of the total consumer loan portfolio) at December 31, 2001, \$18 million (or 1.71% of the total consumer loan portfolio) at December 31, 2000 and \$25 million (or 2.41% of the total consumer loan portfolio) at December 31, 1999.

#### Other Real Estate Owned

Other real estate owned acquired in settlement of loans is carried at the lower of cost (carrying value of the loan) or fair value less estimated cost to sell off the real estate at the date of acquisition.

#### Repossessed Property

The Repossessed Property category includes repossessed boats and autos acquired in settlement of loans. Repossessed boats are recorded at the lower of cost or estimated fair value. Repossessed autos are recorded at the principal balance of the loans less an estimated loss on the disposition.

## Past Due Loans

Past due loans are accruing commercial and consumer loans, which are contractually delinquent 90 days or more. Past due commercial loans are current as to interest but delinquent in the payment of principal. Past due consumer loans include personal lines of credit and credit card loans delinquent 90 days up to 179 days and personal loans (including small loans) delinquent 90 days up to 119 days.

## >. Sources of Funds

The Corporation's principal funding sources are branch-based deposits, retail brokered deposits, institutional deposit, federal funds purchased, securities sold under agreements to repurchase, and FHLB advances.

## > Deposits

Total deposits amounted to \$4,099 million at December 31, 2001, as compared to \$3,346 million and \$2,565 million at December 31, 2000 and 1999, respectively.

The following table presents the composition of total deposits.

| December 31,   | 2001        | 2000                   | 1999        |
|--|-------------|------------------------|-------------|
|  |             | (Dollars in thousands) |             |
| Savings accounts   | \$ 469,452  | \$ 430,298             | \$ 447,946  |
| Interest bearing checking accounts   | 205,760     | 170,631                | 162,601     |
| Certificates of deposit  | 3,183,491   | 2,512,891              | 1,742,978   |
| Interest bearing deposits  | 3,858,703   | 3,113,820              | 2,353,525   |
| Non-interest bearing deposits  | 239,851     | 232,164                | 211,896     |
| Total  | \$4,098,554 | \$3,345,984            | \$2,565,421 |
| Weighted average rate during the period on interest bearing deposit Interest bearing deposits: | 4.62%       | 5.53%                  | 4.69%       |
| Average balance outstanding Non-interest bearing deposits:                                     | \$3,481,887 | \$2,769,637            | \$1,927,614 |
| Average balance outstanding  | 233,254     | 213,728                | 179,478     |

Total deposits are composed of branch-based deposits, brokered deposits and to a lesser extent of institutional deposits. Institutional deposits include certificates issued to agencies of the Government of Puerto Rico.

Total interest bearing deposits increased by \$745 million at December 31, 2001 when compared to December 31, 2000. This fluctuation was mainly due to: (1) an increase in branch-based deposits of \$92 million; (2) an increase of \$691 million in brokered certificates of deposits; net of (3) a decrease of \$38 million in certificates issued to the agencies of the Government of Puerto Rico. Non-interest bearing deposits increased by \$8 million in 2001.

### >. Borrowings

At December 31, 2001 total borrowings amounted to \$3,425 million as compared to \$2,069 million and \$1,804 million at December 31, 2000 and 1999, respectively. The increase in borrowings of \$1,356 million was necessary to finance the growth in the investment portfolio of \$1,483 million. The following table presents the composition of borrowings.

| December 31,                            | 2001        | 2000                   | 1999        |
|---|-------------|------------------------|-------------|
|   |             | (Dollars in thousands) |             |
| Federal funds purchased and securities  |             |                        |             |
| sold under agreements to repurchase     | \$2,997,174 | \$1,856,436            | \$1,452,151 |
| Advances from FHLB                      | 343,700     | 67,000                 | 50,000      |
| Subordinated notes                      | 84,362      | 90,548                 | 93,594      |
| Notes payable                           |             | 55,500                 | 55,500      |
| Other short term borrowings             |             |                        | 152,484     |
| Total                                   | \$3,425,236 | \$2,069,484            | \$1,803,729 |
| Weighted average rate during the period | 5.02%       | 6.27%                  | 5.34%       |

The Corporation uses federal funds purchased, repurchase agreements, advances from FHLB and notes payable as additional funding sources. The borrowings of the Corporation consist primarily of federal funds purchased and securities sold under agreements to repurchase (repurchase agreements) which at December 31, 2001 amounted to \$2,997 million or 88% of total borrowings. Repurchase agreements had a total weighted average cost of 4.90% during the year ended December 31, 2001. For more information on borrowings please refer to Notes 19 through 21 of the Corporation's financial statements.

The composition and estimated weighted average interest rates of interest bearing liabilities at December 31, 2001, were as follows:

|   | Amount<br>(In thousands)                  | Weighted<br>Average rate |  |
|---|---|--------------------------|--|
| Interest bearing deposits<br>Borrowed funds | \$ 3,858,703<br>3,425,236<br>\$ 7,283,939 | 3.82%<br>4.23%<br>4.01%  |  |

## > Contractual Obligations and Commitments

The following table presents a detail of the maturities of contractual debt obligations, operational leases and commitments to extend credit:

|                                    | Payments Due/Commitments Expiration by Period |                  |           |           |               |  |  |
|------------------------------------|---|------------------|-----------|-----------|---------------|--|--|
|                                    | (In thousands)                                |                  |           |           |               |  |  |
|                                    | Total   | Less than 1 year | 1-3 years | 4-5 years | After 5 years |  |  |
| Contractual Obligations:           |   |                  |           |           |               |  |  |
| Federal funds purchased and        |   |                  |           |           |               |  |  |
| securities sold under              |   |                  |           |           |               |  |  |
| agreements to repurchase           | \$2,986,174                                   | \$1,011,214      | \$156,500 | \$550,000 | \$1,268,460   |  |  |
| Advances from FHLB                 | 343,700                                       | 20,700           | 50,000    |           | 273,000       |  |  |
| Subordinated Notes                 | 84,362  |                  | 84,362    |           |               |  |  |
| Operational Leases                 | 19,069  | 4,414            | 7,999     | 2,804     | 3,852         |  |  |
| Total Contractual Cash Obligations | \$3,433,305                                   | \$1,036,328      | \$298,861 | \$552,804 | \$1,545,312   |  |  |
| _                                  |   |                  |           |           |               |  |  |
| Other Commitments:                 |   |                  |           |           |               |  |  |
| Lines of Credit                    | \$304,600                                     | \$304,600        |           |           |               |  |  |
| Standby Letters of Credit          | 24,172  | 24,172           |           |           |               |  |  |
| Other Commercial Commitments       | 436,251                                       | 436,251          |           |           |               |  |  |
| Total Commercial Commitments       | \$765,023                                     | \$765,023        |           |           |               |  |  |
|                                    |   |                  |           |           |               |  |  |

The Corporation has obligations and commitments to make future payments under contracts, such as debt and lease agreements, and under other commitments to extend credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Since certain commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. In the case of credit cards and personal lines of credit, the Corporation can at any time and without cause, cancel the unused credit facility.

## > Capital

During 2001, the Corporation increased its total capital from \$435 million at December 31, 2000 to \$603 million at December 31, 2001. Total capital increased by \$168 million due to earnings of \$86 million, the issuance of 4,140,000 shares of preferred stock at \$100 million, the issuance of 234,000 shares of common stock through the exercise of stock options with proceeds of \$1 million, a positive fluctuation in the valuation of securities available for sale of \$13 million, reduced by the repurchased shares of common stock at a total cost of \$2 million, and cash dividends of \$30 million.

The Corporation's objective is to maintain a solid capital position above the "well capitalized" classification under the federal banking regulations. The Corporation continues to exceed the well capitalized guidelines. To be in a "well capitalized" position, an institution should have: (i) a leverage ratio of 5% or greater; (ii) a total risk based capital ratio of 10% or greater; and (iii) a Tier 1 risk-based capital ratio of 6% or greater. At December 31, 2001 the Corporation had a leverage ratio of 7.49%; a total risk based capital ratio of 14.50%; and a Tier 1 risk-based capital ratio of 12.16%.

#### > Dividends

In 2001, 2000 and 1999 the Corporation declared four quarterly cash dividends of \$0.13, \$0.11 and \$0.09 per common share, respectively, for an annual dividend of \$0.52, \$0.44 and \$0.36, respectively. Total cash dividends paid on common shares amounted to \$14 million for 2001 (or a 19.91% dividend payout ratio), \$12 million for 2000 (or a 19.72% dividend payout ratio) and \$10 million for 1999 (or a 17.96% dividend payout ratio). Dividends declared on preferred stock amounted to \$17 million in 2001 and \$7 million in 2000, and \$4 million in 1999.

## >. Quantitative and Qualitative Disclosures about Market Risk

First BanCorp manages its asset/liability position in order to limit the effects of changes in interest rates on net interest income, subject to other goals of Management and within guidelines set forth by the Board of Directors.

The day-to-day management of interest rate risk, as well as liquidity management and other related matters, is assigned to the Asset Liability Management and Investment Committee of FirstBank (ALCO). The ALCO is composed of the following officers: President and CEO, the Senior Executive Vice President and Chief Financial Officer, the Senior Executive Vice President and Chief Lending Officer, the Executive Vice Presidents, the Senior Vice President of Investments and Treasury, and the Economist. The ALCO meets on a weekly basis. The Economist also acts as secretary, keeping minutes of all meetings. An Investment Committee for First BanCorp also monitors the investment portfolio of the Holding Company, including a stock portfolio which amounted to \$34 million at December 31, 2001. This Committee meets weekly and has the same membership as the ALCO Committee described previously.

Committee meetings focus on, among other things, current and expected conditions in world financial markets, competition and prevailing rates in the local deposit market, reviews of liquidity, unrealized gains and losses in securities, recent or proposed changes to the investment portfolio, alternative funding sources and their costs, hedging and the possible purchase of derivatives such as swaps and caps, and any tax or regulatory issues which may be pertinent to these areas. The ALCO approves funding decisions in the light of the Corporation's overall growth strategies and objectives. On a quarterly basis the ALCO performs a comprehensive asset/liability review, examining the measures of interest rate risk described below together with other matters such as liquidity and capital.

The Corporation uses simulations to measure the effects of changing interest rates on net interest income. These measures are carried out over a

two year time horizon, assuming gradual upward and downward interest rate movements of 200 basis points in the first year, followed by constant rates (at the new higher or lower levels) in the second year. Simulations are carried out in two ways:

- (1) using a balance sheet which is assumed to be at the same levels existing on the simulation date, and
- (2) using a balance sheet which has growth patterns and strategies similar to those which have occurred in the recent past.

Assuming a no growth balance sheet as of December 31, 2001, tax equivalent net interest income for 2002, the first year of the projection, would decline by \$6.2 million (1.7%) under a rising rate scenario and would increase by \$1.9 million (0.5%) under falling rates. For 2003, the second year of the projection, the no growth balance sheet simulations showed that tax equivalent net interest income would have declined by \$24.5 million (6.4%) under a rising rate scenario and would have increased by \$6.2 million (1.6%) under falling rates, compared to a similar simulation with no change in rates.

The same simulations were also carried out assuming that the Corporation would grow. As of December 31, 2001 the growing balance sheet simulations indicate that tax equivalent net interest income for 2002, the first year of the projection, would fall by \$8.8 million (2.4%) under a rising rate scenario and would increase by \$3.8 million (1.0%) with falling rates. For 2003, the second year of the projection, the growing balance sheet simulations showed that tax equivalent net interest income would have declined by \$20.6 million (5.1%) assuming rising rates and would have increased by \$1.9 million (0.5%) with falling rates, compared to a similar simulation with no change in rates.

These simulations assume gradual upward or downward movements of interest rates over the first year, with the change totaling 200 basis points at the end of the twelve month period. Rates are then assumed to remain constant at their new year-end levels during the second year of the projection. The balance sheet is divided into groups of similar assets and liabilities in order to simplify the process of carrying out these projections. As interest rates rise or fall, these simulations incorporate expected future lending rates, current and expected future funding sources and cost, the possible exercise of options, changes in prepayment rates, and other factors which may be important in determining the future growth of net interest income. All computations are done on a tax equivalent basis, including the effects of the changing cost of funds on the tax-exempt spreads of certain investments. The projections are carried out for First BanCorp on a fully consolidated basis.

These simulations are highly complex, and they use many simplifying assumptions which are intended to reflect the general behavior of the Corporation over the period in question, but there can be no assurance that actual events will parallel these assumptions in all cases. For this reason, the results of these simulations are only approximations of the true sensitivity of net interest income to changes in market interest rates.

Management also uses one year GAP analysis as a secondary technique for evaluating interest rate risk. The Corporation's one year GAP fluctuated between a negative 16% and a positive 16% of assets during 2001. Management considers that the ranges of the GAP ratio achieved during 2001 are adequate, considering the Corporation's net interest margin and capital ratios.

#### **Use of Derivatives**

As of December 31, 2001 the Corporation had borrowings totaling \$2.5 billion which included embedded call options. The primary purpose of these transactions was to reduce the Corporation's exposure to interest rate risk by lengthening the maturities of its liabilities, while keeping its funding costs low.

In addition, the Corporation had, at year ended 2001, \$600 million of interest rate caps. The Corporation also held \$1,553 million of interest rate swap contracts, of which \$1,495 million are used to convert wholesale funds obtained at fixed rates to low cost variable rate funding tied to LIBOR. This funding has repricing characteristics similar to various parts of the Corporation's loan portfolio, and therefore, tends to provide a closer match between the repricing of assets and liabilities.

## > Critical Accounting Policies and Practices

The accounting and reporting policies of the Corporation and its subsidiaries conform with generally accepted accounting principles. A summary of accounting policies and recently issued accounting pronouncements is included in Note 2 of the Corporation's financial statements - "Summary of Significant Accounting Policies". The reported amounts are based on judgments, estimates and assumptions made by Management that affect the recorded assets and liabilities and contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates, if different assumptions or conditions prevail.

The Corporation classifies its investments in debt and equity securities into trading, held to maturity and available for sale securities. The available for sale securities are carried at fair value. The fair values of these securities were calculated based on quoted market prices and dealer quotes. Changes in the assumptions used in calculating the fair values, could affect the reported valuations.

The Corporation maintains the allowance for loan losses at a level that Management considers adequate to absorb losses inherent in the loan portfolio. The adequacy of the allowance for loan losses is reviewed on a quarterly basis as part of the continuing evaluation of the quality of the assets. Groups of small balance, homogeneous loans are collectively evaluated for impairment. The portfolios of consumer loans, auto loans and finance leases are considered homogeneous and are evaluated collectively for impairment. In determining probable losses for each category of homogeneous pools of loans, Management uses historical information about loan losses over several periods of time that reflect varying economic conditions and adjusts such historical data based on the current conditions, considering information and trends on charge-offs, non-accrual loans and delinquencies. The Corporation measures impairment individually for those commercial and real estate loans with a principal balance exceeding \$1 million. An allowance is established based on the present value of expected future cash flows or the fair value of the collateral, if the loan is collateral dependent. Accordingly, the measurement of impairment for loans evaluated individually involves assumptions by Management as to the amount and timing of cash flows to be recovered and of appropriate discount rates. Where the loans are collateral dependent, Management generally obtains an independent appraisal. Those appraisals also involve estimates of future cash flows and appropriate discount rates or adjustments to comparable properties in determining fair values.

The assumptions, judgments and estimates made by Management affect the reported amounts in the Corporation's financial statements. Different amounts may result if reported under different conditions or using different assumptions.

#### > Liquidity

Liquidity refers to the level of cash and eligible investments to meet loan and investment commitments, potential deposit outflows and debt repayments. The Asset Liability Management and Investment Committee, using measures of liquidity developed by Management, reviews the Corporation's liquidity position on a weekly basis.

The principal sources of short-term funds are loan repayments, deposits, securities sold under agreements to repurchase, and lines of credit with the FHLB and other financial institutions. The Investment Committee reviews credit availability on a regular basis. In the past, the Corporation has securitized and sold auto and mortgage loans as supplementary sources of funding. Commercial paper had also provided additional funding. The Corporation has obtained long-term funding through the issuance of notes and long-term institutional certificates of deposit. The Corporation's principal uses of funds are the origination of loans and the repayment of maturing deposit accounts and borrowings.

## > Impact of Inflation and Changing Prices

The financial statements and related data presented herein have been prepared in conformity with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering changes in the relative purchasing power of money over time due to inflation.

Unlike most industrial companies, substantially all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a greater impact on a financial institution's performance than the effects of general levels of inflation. Interest rate movements are not necessarily correlated with changes in the prices of goods and services.

## > Market Prices and Stock Data

The Corporation's common stock is traded in the New York Stock Exchange (NYSE) under the symbol FBP. On December 31, 2001, there were 683 holders of record of the Corporation's common stock.

The following table sets forth the high and low prices of the Corporation's common stock for the periods indicated as reported by the NYSE.

| Quarter ended                  | High             | Low              |
|--------------------------------|------------------|------------------|

## Report of Independent Accountants

To the Board of Directors and Stockholders of First BanCorp:

In our opinion, the accompanying consolidated statements of financial condition and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows present fairly, in all material respects, the financial position of First BanCorp and its subsidiaries at December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2001 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Notes 2, 9 and 29 to the accompanying consolidated financial statements, in 2001 the Company adopted the Statement of Financial Accounting Standards No. 133, "Accounting for Certain Derivative Instruments and Certain Hedging Activities," as amended, which effect was accounted for as a cumulative effect of a change in accounting principle.

Coopers LLP

#### > Note 1 - Nature of Business

First BanCorp (the Corporation) is a financial holding company offering a full range of financial services. First BanCorp is subject to the Federal Bank Holding Company Act and to the regulations, supervision, and examination of the Federal Reserve Board.

FirstBank Puerto Rico (FirstBank), the Corporation's wholly owned bank subsidiary, is a commercial bank chartered under the laws of the Commonwealth of Puerto Rico. Its main office is located in San Juan, Puerto Rico, and it has 44 full-service banking branches in Puerto Rico and four in the U.S. Virgin Islands. It also has loan origination offices in Puerto Rico focusing on consumer loans and residential mortgage loans. In addition, through its wholly-owned subsidiaries, FirstBank operates other offices in Puerto Rico specializing in small personal loans, finance leases and vehicle rental. Early in the year 2000, the Bank began offering brokerage services in selected branches through an alliance with a national brokerage house in Puerto Rico. The Bank is subject to the supervision, examination and regulation of the Office of the Commissioner of Financial Institutions of Puerto Rico and the Federal Deposit Insurance Corporation (FDIC), which insures its deposits through the Savings Association Insurance Fund (SAIF).

Effective August 2001, the Corporation entered into the insurance business through a wholly owned subsidiary, FirstBank Insurance Agency. This subsidiary is subject to the supervision, examination and regulation of the Office of the Commissioner of Insurance of Puerto Rico.

## >. Note 2 - Summary of Significant Accounting Policies

The accounting and reporting policies of the Corporation and its subsidiaries conform with generally accepted accounting principles, and, as such, include amounts based on judgments, estimates and assumptions made by Management that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Following is a description of the more significant accounting policies followed by the Corporation:

## Principles of consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

#### Statement of cash flows

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks and short-term money market instruments with original maturities of 90 days or less.

## **Investment securities**

The Corporation classifies its investments in debt and equity securities into one of three categories:

Held to maturity - Securities which the entity has the positive intent and ability to hold to maturity. These securities are carried at amortized cost.

Trading - Securities that are bought and held principally for the purpose of selling them in the near term. These securities are carried at fair value, with unrealized gains and losses reported in earnings.

Available for sale - Securities not classified as trading or as held to maturity. These securities are carried at fair value, with unrealized holding gains and losses, net of deferred tax effects, reported in other comprehensive income as a separate component of stockholders' equity.

Premiums and discounts are amortized as an adjustment to interest income over the life of the related securities using a method that approximates the interest method. Realized gains or losses on securities are reported in earnings. When computing realized gains or losses, the cost of securities is determined on the specific identification method.

#### Loans held for sale

Loans held for sale are stated at the lower of cost or market. The amount by which cost exceeds market value in the aggregate portfolio of loans held for sale, if any, is accounted for as a valuation allowance with changes included in the determination of net income.

#### Loans and allowance for loan losses

Loans are stated at their outstanding balance less unearned interest and net deferred loan origination fees and costs. Unearned interest on installment loans (i.e., personal and auto) is recognized as income under a method which approximates the interest method.

Loans on which the recognition of interest income has been discontinued are designated as non-accruing. When loans are placed on non-accruing status, any accrued but uncollected interest income is reversed and charged against interest income. Consumer loans are classified as non-accruing when they are delinquent: 90 days or more for auto, boat and home equity reserve loans, 120 days or more for personal loans, and 180 days or more for credit cards and personal lines of credit. Commercial and mortgage loans are classified as non-accruing when they are delinquent 90 days or more. This policy is also applied to all impaired loans based upon an evaluation of the risk characteristics of said loans, loss experience, economic conditions and other pertinent factors. Loan losses are charged and recoveries are credited to the allowance for loan losses.

The Corporation has defined impaired loans as loans with interest and/or principal past due 90 days or more and other specific loans for which, based on current information and events, it is probable that the debtor will be unable to pay all amounts due according to the contractual terms of the loan agreement. The Corporation measures impairment individually for those commercial and real estate loans with a principal balance exceeding \$1 million. Groups of small balance, homogeneous loans are collectively evaluated for impairment. The portfolios of consumer loans, auto loans and finance leases are considered homogeneous and are evaluated collectively for impairment. An allowance is established based on the present value of expected future cash flows or the fair value of the collateral, if the loan is collateral dependent.

#### Loan fees and costs

Loan fees and costs incurred in the origination of loans are deferred and amortized using the interest method or under a method that approximates the interest method over the life of the loans as an adjustment to interest income. When a loan is paid off or sold, any unamortized net deferred fee (cost) is credited (charged) to income.

#### Servicing assets

The Corporation recognizes as separate assets the rights to service loans for others, whether those servicing assets are originated or purchased. The total cost of the loans to be sold with servicing assets retained is allocated to the servicing assets and the loans (without the servicing asset), based

on their relative fair values. Servicing assets are amortized in proportion to and over the period of estimated net servicing income. Loan servicing fees, which are based on a percentage of the principal balances of the loans serviced, are credited to income as loan payments are collected.

To estimate the fair value of servicing assets the Corporation considers the present value of expected future cash flows associated with the servicing assets. For purposes of measuring impairment of servicing assets, the Corporation stratifies such assets based on predominant risk characteristics of underlying loans. The amount of impairment recognized, if any, is the amount by which the servicing asset exceeds its estimated fair value. Impairment, if any, is charged against servicing income.

#### Other real estate owned

Other real estate owned, acquired in settlement of loans, is recorded at the lower of cost (carrying value of the loan) or fair value minus estimated cost to sell the real estate. Gains or losses resulting from the sale of these properties and losses recognized on the periodic reevaluations of these properties are credited or charged to net cost (gain) of operations and disposition of other real estate owned. The cost of maintaining and operating these properties is expensed as incurred.

#### Premises and equipment

Premises and equipment are carried at cost less accumulated depreciation. Depreciation is provided on the straight-line method over the estimated useful lives of the individual assets. Depreciation of leasehold improvements is computed on the straight-line method over the terms of the leases or estimated useful lives of the improvements, whichever is shorter. Costs of maintenance and repairs which do not improve or extend the life of the respective assets are expensed as incurred. Costs of renewals and betterments are capitalized. When assets are sold or disposed of, their cost and related accumulated depreciation are removed from the accounts and any gain or loss is reflected in earnings.

#### Securities sold under agreements to repurchase

The Corporation sells securities under agreements to repurchase the same or similar securities. Generally, similar securities are securities from the same issuer, with identical form and type, similar maturity, identical contractual interest rates, similar assets as collateral and the same aggregate unpaid principal amount. The Corporation retains control over the securities sold under these agreements, accordingly, these agreements are considered financing transactions and the securities underlying the agreements remain in the asset accounts. The counterparty to certain agreements may have the right to repledge the collateral by contract or custom. Such assets are presented separately in the statements of financial condition as securities pledged to creditors that can be repledged.

#### Accounting for income taxes

Deferred taxes arise because certain transactions affect the determination of taxable income for financial reporting purposes in periods different from the period in which the transactions affect taxable income. Deferred taxes have been recorded based upon the Puerto Rico enacted tax rates. Current tax expense has been provided based upon the estimated tax liability to be incurred for tax return purposes. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

#### Amortization of debt issuance costs

Costs related to the issuance of debt are amortized under a method which approximates the interest method.

#### Treasury stock

The Corporation accounts for treasury stock at par value. Under this method, the treasury stock account is increased by the par value of each share of common stock reacquired. Any excess paid per share over the par

value is debited to additional paid-in capital for the amount per share that it was originally credited. Any remaining excess is charged to retained earnings.

## Stock option plan

The cost associated with the stock option plan under which certain employees receive options to buy shares of stock of the Corporation must be recognized either by the fair value method or the intrinsic value method. The Corporation uses the intrinsic value method of accounting. Under the intrinsic value method, compensation cost is the excess, if any, of the quoted market price of the stock at grant date or other measurement date over the amount an employee must pay to acquire the stock. Entities using the intrinsic value method on awards granted to employees must make pro forma disclosures of net income and earnings per share, as if the fair value method of accounting had been applied. Under the fair value method, compensation cost is measured at the grant date based on the fair value of the award and is recognized over the service period, which is usually the vesting period.

#### Earnings per common share

Earnings per share-basic is calculated by dividing income available to common stockholders by the weighted average number of outstanding common shares. The computation of earnings per share-diluted is similar to the computation of earnings per share-basic except that the weighted average common shares are increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. Stock options outstanding under the Corporation's stock option plan are considered in the earnings per share-diluted by application of the treasury stock method, which assumes that proceeds for the exercise of options are used to repurchase common stock in the open market. Any stock splits or stock dividends are retroactively recognized in all periods presented in financial statements.

#### Comprehensive income

Comprehensive income includes net income and several other items that current accounting standards require to be recognized outside of net income, primarily the unrealized gain (loss) on securities available for sale and the change in fair value attributable to credit risk on securities hedged with interest rate swaps, net of taxes.

## Recently issued accounting pronouncements

On January 1, 2001, the Corporation adopted the Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities." This statement establishes accounting and reporting standards for derivative instruments, including derivative instruments that are embedded in other contracts, and for hedging activities. SFAS No. 138, "Accounting for Certain Derivative Instruments and Certain Hedging Activities", amended SFAS No. 133.

SFAS No. 133, as amended, standardizes accounting for derivative instruments by requiring the recognition of all derivatives (both assets and liabilities) in the statement of financial position at fair value. Under SFAS No. 133, changes in the fair value of derivative instruments are accounted for as current income or other comprehensive income, depending on their intended use and designation. For transactions that qualify for hedge accounting, SFAS No. 133 provides for a matching of the timing of gain or loss recognition on the hedging instrument with the recognition in earnings of (a) the changes in the fair value of the hedged asset, liability, or a firm commitment that are attributable to the hedged risk or (b) the effect of the exposure to the variability of cash flows from the hedged asset, liability, or forecasted transaction. SFAS No. 133 also provided that at the date of the initial application, a corporation may transfer any held to maturity security into the available for sale category or the trading category.

The Corporation also adopted SFAS No. 140, "Accounting for Transfer and Servicing of Financial Assets and Liabilities - A Replacement of SFAS 125" which revises the standards of accounting for securitizations and other transfers of financial assets and collateral and requires certain disclosures, but it carries over most of the provisions of SFAS 125 without reconsideration. This statement provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings. It was effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after March 31, 2001. This statement also required recognition and reclassification of collateral and disclosures relating to securitization transactions and collateral at December 31, 2000. The Corporation fully adopted this statement effective April 1, 2001. Effective December 31, 2000 the required disclosures for collateral and securitization transactions were incorporated in the financial statements.

During 2001 the Financial Accounting Standards Board issued the following statements:

SFAS No. 141, "Business Combinations" - This statement addresses financial accounting and reporting for goodwill and other intangible assets acquired in a business combination at acquisition. This statement requires all business combinations to be accounted for using the purchase method of accounting. The provisions of this statement apply to all business combinations initiated after June 30, 2001. There have been no business combinations since that date.

SFAS No. 142, "Goodwill and Other Intangible Assets" - This statement addresses financial accounting and reporting for intangible assets acquired individually or with a group of other assets (but not those acquired in a business combination) at acquisition or subsequent to their acquisition. Specifically, under this statement, goodwill and other indefinite life intangibles will no longer be amortized but will be periodically evaluated for impairment. The standard also provides a methodology for evaluating impairment of goodwill and other intangibles based on the fair value. The provisions of this statement apply to fiscal years beginning after December 15, 2001. Retroactive application is not permitted. Management has reviewed the core deposit intangible assets in order to recognize any impairment loss and/or changes in the useful lives. As of January 1, 2002, no impairment of the intangible assets is necessary and the useful life of ten years used to amortize them is the best estimate of the economic benefit period.

SFAS No. 143, "Accounting for Obligations Associated with the Retirement of Long-Lived Assets" - The objectives of this statement are to establish accounting standards for the recognition and measurement of an asset retirement obligation and its associated asset retirement cost. The provisions of this statement will be effective for financial statements issued for fiscal years beginning after June 15, 2002. Earlier application is encouraged. Management expects that the adoption of SFAS No. 143 will not have a significant impact on the Corporation's financial position and the results of operations.

SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets". The scope of this statement is to develop a single accounting model for long-lived assets that are to be disposed of by sale, whether previously held and used or newly acquired. The provisions of this statement will be effective for financial statements issued for fiscal years beginning after December 15, 2001. Management expects that the adoption of SFAS No. 144 will not have a significant impact on the Corporation's financial position and the results of operations.

## Note 3 - Stockholders' Equity Common stock

The Corporation has 250,000,000 shares of authorized common stock with a par value of \$1 per share. At December 31, 2001, there were

29,852,552 (2000 - 29,618,552) shares issued and 26,571,952 (2000 - 26,424,152) shares outstanding.

The Corporation issued 234,000, 6,000 and 13,000 shares of common stock during 2001, 2000 and 1999, respectively, as part of the exercise of stock options under the Corporation's stock option plan. During the year, the Corporation declared cash dividends on its common stock outstanding of \$0.52 per share (2000 - \$0.44; 1999 - \$0.36) amounting to \$13,835,100 (2000 - \$11,804,599; 1999 - \$10,382,797).

#### Stock repurchase plan and treasury stock

In 1996 a stock repurchase program was established (the 1996 Program) where the Corporation is authorized to repurchase in the open market, and retire from circulation or hold as treasury stock, up to ten percent of the 31,083,502 issued and outstanding shares of common stock at the time the program was approved by the stockholders. In 1997 an additional stock repurchase program was established whereby the Corporation may repurchase in the open market shares of common stock, which amount represents 10% of the 28,067,652 issued and outstanding shares after all shares authorized under the 1996 Program were repurchased. Under these programs, the Corporation repurchased a total of 86,200 shares of common stock at a cost of \$1,929,685 during 2001, 1,642,400 shares of common stock at a cost of \$30,086,592 during 2000, and 1,452,000 shares of common stock at a cost of \$32,510,611 during 1999. From the total amount of common stock repurchased, 3,280,600 shares were held as treasury stock at December 31, 2001 (2000 - 3,194,400 shares) and were available for general corporate purposes.

#### **Preferred stock**

The Corporation has 50,000,000 shares of authorized non-cumulative and non-convertible preferred stock with a par value of \$1, redeemable at the Corporation's option subject to certain terms. This stock may be issued in series and the shares of each series shall have such rights and preferences as shall be fixed by the Board of Directors when authorizing the issuance of that particular series. During 2001, the Corporation issued 4,140,000 shares of preferred stock (3,000,000 shares-2000; 3,600,000 shares-1999). The liquidation value per share is \$25. Annual dividends of \$1.85 per share (issuance of 2001), \$2.0875 per share (issuance of 2000) and of \$1.78125 per share (issuance of 1999), are payable monthly, if declared by the Board of Directors. During the year, dividends declared on preferred stock amounted to \$16,508,198 (2000 - \$7,407,542; 1999 - \$4,275,000).

### Capital reserve

The capital reserve account was established to comply with certain regulatory requirements of the Office of the Commissioner of Financial Institutions of Puerto Rico related to the issuance of subordinated notes by FirstBank in 1995. An amount equal to 10% of the principal of the notes is set aside each year from retained earnings until the reserve equals the total principal amount. At the notes repayment date the balance in capital reserve is to be transferred to the legal surplus account or retained earnings after the approval of the Commissioner of Financial Institutions of Puerto Rico.

#### Legal surplus

The Banking Act of the Commonwealth of Puerto Rico requires that a minimum of 10% of FirstBank's net income for the year be transferred to legal surplus, until such surplus equals the total of paid in capital on common and preferred stock. Amounts transferred to the legal surplus account from the retained earnings account are not available for distribution to the stockholders.

#### **Dividend restrictions**

The Corporation is subject to certain restrictions generally imposed on Puerto Rico corporations (i.e., that dividends may be paid out only from the Corporation's net assets in excess of capital or in the absence of such

excess, from the Corporation's net earnings for such fiscal year and/or the preceding fiscal year). The Federal Reserve Board has also issued a policy statement that provides that bank holding companies should generally pay dividends only out of current operating earnings.

## > Note 4 - Regulatory Capital Requirements

The Corporation is subject to various regulatory capital requirements imposed by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Corporation's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation must meet specific capital guidelines that involve quantitative measures of the Corporation's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Corporation's capital amounts and classification are also subject to qualitative judgment by the regulators about components, risk weightings and other factors.

Capital standards established by regulations require the Corporation to maintain minimum amounts and ratios of Tier 1 capital to total average assets (leverage ratio) and ratios of Tier 1 and total capital to risk-weighted assets, as defined in the regulations. The total amount of risk-weighted assets is computed by applying risk weighting factors to the Corporation's assets, which vary from 0% to 100% depending on the nature of the asset.

At December 31, 2001 and 2000, the most recent notification from FDIC, categorized the Corporation as a well capitalized institution under the regulatory framework for prompt corrective action. To be categorized as well capitalized the Corporation must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios as set forth in the following table. Management believes that there are no conditions or events since that date that have changed that classification.

The Corporation's and its banking subsidiary's regulatory capital positions were as follows:

|   |           |        | F                                      | Regulatory re | equirements    |       |
|---|-----------|--------|--|---------------|----------------|-------|
|   | Act       | ual    | For ca                                 |               | To be capitali |       |
|   | Amount    | Ratio  | Amount                                 | Ratio         | Amount         | Ratio |

## > Note 5 - Stock Option Plan

The Corporation has a stock option plan covering certain employees. The options granted under the plan cannot exceed 20% of the number of common shares outstanding. Each option provides for the purchase of one share of common stock at a price not less than the fair market value of the stock on the date the option is granted. Stock options are fully vested upon issuance. The maximum term to exercise the options is ten years. The stock option plan provides for a proportionate adjustment in the exercise price and the number of shares that can be purchased in the event of a stock dividend, stock split, reclassification of stock, merger or reorganization and certain other issuance and distributions.

Following is a summary of the activity related to stock options:

|                      | Number of Options | Weighted Average<br>Exercise Price per Option |
|----------------------|-------------------|---|
| At December 31, 1998 | 756,500           | \$16.16                                       |
| Granted              | 223,000           | \$19.99                                       |
| Exercised            | (13,000)          | \$13.56                                       |
| At December 31, 1999 | 966,500           | \$17.07                                       |
| Granted              | 318,000           | \$22.31                                       |
| Exercised            | (6,000)           | \$15.63                                       |
| Canceled             | (7,000)           | \$26.00                                       |
| At December 31, 2000 | 1,271,500         | \$18.36                                       |
| Exercised            | (234,000)         | \$ 5.79                                       |
| Canceled             | (2,000)           | \$28.38                                       |
| At December 31, 2001 | 1,035,500         | \$21.18                                       |

The options outstanding at December 31, 2001 have an original expiration term of ten years and all of them are exercisable. The exercise price of the options outstanding at December 31, 2001 ranges from \$15.63 to \$28.38 and the weighted average remaining contractual life is approximately seven years.

Following is additional information concerning the stock options outstanding at December 31, 2001.

| 207,500         \$15.63         November 2007           60,000         \$19.19         February 2008           5,000         \$28.38         April 2008           40,000         \$27.09         May 2008           12,000         \$26.56         June 2008           175,000         \$26.00         November 2008           2,000         \$25.94         February 2009           3,500         \$26.44         April 2009           10,000         \$22.56         August 2009           202,500         \$19.63         November 2009 | Number of<br>Options   | Exercise Price per Option   | Contractual<br>Maturity  |

| \$ 2.21  | \$ 1.98                                  |
|  | \$59,868<br>\$26,943<br>202<br>27,145    |

Had compensation cost for the stock options granted during 2000 and 1999 been determined based on the fair value at the grant date (as a result of the requirement explained in Note 2 - Stock option plan), the Corporation's net income and earnings per common share would have been reduced to the pro forma amounts indicated, as follow:

|   | Year ended De         | cember 31,      |
|---|-----------------------|-----------------|
| Pro forma information:                      | 2000                  | 1999            |
|   | (In thousands, except | per share data) |
| Employees' compensation and benefits        | \$51,763              | \$50,005        |
| Net income-available to common stockholders | \$58,119              | \$56,341        |
| Earnings per common share-basic             | \$ 2.16               | \$ 1.95         |
| Earnings per common share-diluted           | \$ 2.14               | \$ 1.93         |

Management uses the binomial model for the computation of the fair value of each option granted to buy shares of the Corporation's common stock. The fair value of each option granted during 2000 and 1999 was estimated using the following assumptions: weighted dividend growth of 0% (2000) and 22.38% (1999); expected life of 3.11 years (2000) and 10 years (1999); weighted expected volatility of 31.74% (2000) and 29.46% (1999); and weighted risk-free interest rate of 5.36% (2000) and 6.04% (1999). The weighted estimated fair value of the options granted was \$5.50 (2000) and \$6.54 (1999) per option.

## > Note 7 - Cash and Due from Banks

The Corporation is required by law to maintain minimum average reserve balances. The amount of those reserve average balances was approximately \$46,078,200 at December 31, 2001 (2000 - \$45,107,600).

#### > Note 8 - Investment Securities Held For Trading

At December 31, 2001 and 2000, there were no securities held for trading purposes or options on such securities.

All trading instruments are subject to market risk, the risk that future changes in market conditions, such as fluctuations in market prices or interest rates, may make an instrument less valuable or more onerous. The instruments are accounted for at market value, and their changes are reported directly in earnings. The Corporation may write options on trading securities as part of its trading activities. Also the Corporation may enter in transactions of securities sold not yet purchased for trading purposes. These transactions are carried at market value. Net gains and losses resulting from these transactions are recorded in the trading income or loss account. The net gain from the sale of trading securities amounted to \$419,367 for the year ended December 31, 2000 (a loss of \$7,946 for 1999), and were included in earnings as trading income. No net revenue from the sale of trading securities was recorded during the year 2001.

## > Note 9 - Investment Securities Held To Maturity

The amortized cost, gross unrealized gains and losses, approximate market value, weighted average yield and maturities of investment securities held to maturity at December 31, 2001 and 2000 were as follows:

|  |                  | Dece        | mber 31,         | 2001              |             |                     | Decem         | ber 31, 20         | 000                |          |

Expected maturities of mortgage backed securities and certain other securities might differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. At January 1, 2001, in connection with the adoption of SFAS No. 133, the Corporation transferred a portfolio of \$207 million of GNMA certificates held to maturity into the available for sale category. The unrealized gain of \$994,500, net of taxes, was reflected in other comprehensive income as a cumulative effect of the change in accounting principle. The Corporation does not expect reclassification of the transition adjustment included in other comprehensive income within the next twelve months.

## >. Note 10 - Investment Securities Available For Sale

The amortized cost, gross unrealized gains and losses, approximate market value, weighted average yield and maturities of investment securities held for sale at December 31, 2001 and 2000 were as follows:

Maturities for mortgage backed securities are based upon contractual terms assuming no repayments. The weighted average yield on investment securities held for sale is based on amortized cost, therefore it does not give effect to changes in fair value.

At December 31, 2001, the net unrealized loss of \$6,293,354 (2000 - net unrealized loss of \$19,598,785) on securities available for sale, net of the deferred income tax of \$2,097,785 (2000 - \$6,532,928), was reported in accumulated other comprehensive income. For 2001, the change in the net unrealized holding gain on the available for sale securities amounted to \$17,740,575 (2000 - a gain of \$65,400,232) before deferred income taxes.

For 2001, proceeds from the sale of securities amounted to \$847.7 million (2000 - \$58.5 million, 1999 - \$9.6 million) resulting in gross realized gains of \$13.6 million (2000 - \$7.9 million, 1999 -\$1.4 million), and gross realized losses of \$4.0 million (1999-\$46,000). No losses were realized during 2000.

## > Note 11 - Federal Home Loan Bank (FHLB) Stock

At December 31, 2001 and 2000, there were investments in FHLB stock with book value of \$22,890,600 and \$18,536,500 respectively. The estimated market value of such investments is its redemption value.

|   |                      |                      |

The Corporation's primary lending area is Puerto Rico. At December 31, 2001 and 2000 there is no significant concentration of credit risk in any specific industry on the loan portfolio.

At December 31, 2001, loans in which the accrual of interest income had been discontinued amounted to \$72,998,000 (2000 - \$67,716,000; 1999 -\$53,816,000). If these loans had been accruing interest, the additional interest income realized would have been approximately \$5,735,000 (2000 - \$5,937,000; 1999 - \$4,544,000). There are no material commitments to lend additional funds to borrowers whose loans were in non-accruing status at these dates.

At December 31, 2001 mortgage loans held for sale amounted to \$4.6 million. All mortgage loans were sold at market values, which exceeded the carrying value of the loans.

At December 31, 2001, the Corporation was servicing mortgage loans owned by others aggregating approximately \$160,583,000 (2000 -\$144,805,000; 1999 - \$134,348,000).

Various loans secured by first mortgages were assigned as collateral for term notes, certificates of deposit, advances from the Federal Home Loan Bank, and unused lines of credit. The mortgage loans pledged as collateral amounted to \$195,267,091 and \$104,739,882 at December 31, 2001 and 2000, respectively.

## Note 14 - Allowance for Loan Losses

The changes in the allowance for loan losses were as follows:

|                                      | Year ended December 31, |          |          |  |  |
|--------------------------------------|-------------------------|----------|----------|--|--|
|                                      | 2001 2000 199           |          |          |  |  |
|                                      | (In thousands)          |          |          |  |  |
| Balance at beginning of period       | \$76,919                | \$71,784 | \$67,854 |  |  |
| Provision charged to income          | 61,030                  | 45,719   | 47,961   |  |  |
| Losses charged against the allowance | (54,380)                | (51,831) | (53,665) |  |  |
| Recoveries credited to the allowance | 7,391                   | 9,807    | 9,048    |  |  |
| Other adjustments                    | 100                     | 1,440    | 586      |  |  |
| Balance at end of period             | \$91,060                | \$76,919 | \$71,784 |  |  |

At December 31, 2001, \$10.7 million (\$13.1 million at December 31, 2000) in commercial and real estate loans over \$1,000,000 was considered impaired with an allowance of \$3.7 million (\$7.8 million at December 31, 2000), of which \$2 million was established based on the fair value of the collateral (2000-\$392,000) and \$1.7 million was established based on the present value of expected future cash flows (2000-\$7.4 million). There were no consumer loans over \$1,000,000 considered impaired at December 31, 2001 and 2000. The average recorded investment in impaired loans amounted to \$11.9 million for 2001 (2000 - \$8.8 million). Interest income in the amount of approximately \$376,900 was recognized on impaired loans in 2001 (2000 - approximately \$227,000; 1999 - approximately \$428,000).

## >. Note 15 - Related Party Transactions

The Corporation granted loans to its directors, executive officers and to certain related individuals or entities in the ordinary course of business. The movement and balance of these loans were as follows:

|                              | Amount         |
|------------------------------|----------------|
|                              | (In thousands) |
| Balance at December 31, 1999 | \$ 23,093      |
| New loans                    | 279            |
| Payments                     | (3,198)        |
| Balance at December 31, 2000 | 20,174         |
| New loans                    | 14,659         |
| Payments                     | (170)          |
| Balance at December 31, 2001 | \$ 34,663      |

## >. Note 16 - Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation as follows:

|                             | Useful life | Decen    | nber 31,  |
|-----------------------------|-------------|----------|-----------|
|                             | in years    | 2001     | 2000      |
|                             |             | (In the  | ousands)  |
| Land                        |             | \$ 7,357 | \$ 7,378  |
| Buildings and improvements  | 10-40       | 39,809   | 35,038    |
| Leasehold improvements      | 1-15        | 14,753   | 12,344    |
| Furniture and equipment     | 3-10        | 62,466   | 55,654    |
|                             |             | 124,385  | 110,414   |
| Accumulated depreciation    |             | (55,001) | _(52,086) |
|                             |             | 69,384   | 58,328    |
| Projects in progress        |             | 6,772    | 13,759    |
| Total premises and equipmen | \$76,156    | \$72,087 |           |

## >. Note 17 - Other Assets

Following is a detail of other assets:

|                          | Decem    | ber 31,  |
|--------------------------|----------|----------|
|                          | 2001     | 2000     |
|                          | (In tho  | usands)  |
| Deferred tax asset       | \$43,618 | \$42,651 |
| Accounts receivable      | 4,844    | 9,531    |
| Prepaid expenses         | 12,242   | 9,293    |
| Revenue earning vehicles | 6,526    | 6,572    |
| Other                    | _21,167  | 28,527   |
| Total                    | \$88,397 | \$96,574 |

## > Note 18 - Deposits and Related Interest

Deposits and related interest consist of the following:

|  | December 31, |             |  |
|--|--------------|-------------|--|
|  | 2001         | 2000        |  |
|  | (In          | thousands)  |  |
| Type of account and interest rate:     |              |             |  |
| Savings accounts - 2.25% to 3.50%      |              |             |  |
| (2000 - 2.75% to 4.00%)                | \$ 469,452   | \$ 430,298  |  |
| Interest bearing checking accounts -   |              |             |  |
| 2.25% to 3.05% (2000 -                 |              |             |  |
| 2.75% to 4.50%)                        | 205,760      | 170,631     |  |
| Non-interest bearing checking accounts | 239,851      | 232,164     |  |
| Certificate accounts - 2.00% to 7.50%  |              |             |  |
| (2000 - 4.15% to 7.60%)                | 3,183,491    | 2,512,891   |  |
|  | \$4,098,554  | \$3,345,984 |  |

The weighted average interest rate on total deposits at December 31, 2001 and 2000 was 3.82% and 5.83%, respectively.

At December 31, 2001, the aggregate amount of overdraft in demand deposits that were reclassified as loans amounted to \$7,807,724 (2000 - \$4,106,412).

The following table presents a summary of certificates of deposits with remaining term of more than one year at December 31, 2001:

| Total          |
|----------------|
| (In thousands) |
| \$207,402      |
| 211,183        |
| 128,122        |
| 356,040        |
| _1,431,373     |
| \$2,334,120    |
|                |

At December 31, 2001 certificates of deposit (CD's) in denominations of \$100,000 or higher amounted to \$2,669,536,603 (2000 - \$1,995,730,680) including brokered certificates of deposit of \$2,189,687,222 (2000 - \$1,499,104,222) at a weighted average rate of 4.0% (2000 - 6.60%).

At December 31, 2001, deposit accounts issued to government agencies with a carrying value of \$63,639,152 (2000 - \$101,661,753) were collateralized by securities with a carrying value of \$75,126,925 (2000 - \$106,917,690) and estimated market value of \$71,979,923 (2000 - \$104,868,113) and by specific mortgage loans with a carrying value of \$2,895,723 (2000 - \$3,539,882) and estimated market value of \$3,370,043 (2000 - \$3,882,189).

A table showing interest expense on deposits follows:

|                                    | Year ended December 31, |                |          |  |  |
|------------------------------------|-------------------------|----------------|----------|--|--|
|                                    | 2001                    | 2001 2000 1999 |          |  |  |
|                                    | (In thousands)          |                |          |  |  |
| Savings                            | \$ 12,954               | \$ 12,792      | \$12,381 |  |  |
| Interest bearing checking accounts | 5,296                   | 5,546          | 4,931    |  |  |
| Certificates of deposit            | _142,508                | 134,945        | _73,177  |  |  |
| Total                              | <u>\$160,758</u>        | \$153,283      | \$90,489 |  |  |

## >. Note 19 - Federal Funds Purchased and Securities Sold Under Agreements to Repurchase

Federal funds purchased and securities sold under agreements to repurchase (repurchase agreements) consist of the following:

|                                 | Dec         | ember 31,   |
|---------------------------------|-------------|-------------|
|                                 | 2001        | 2000        |
|                                 | (In t       | housands)   |
| Federal funds purchased,        |             |             |
| interest rate 1.80%             | \$ 10,000   |             |
| Repurchase agreements, interest |             |             |
| ranging from 1.25% to 6.09%     |             |             |
| (2000 - 4.97% to 6.63%)         | 2,976,174   | \$1,851,286 |
| Accrued interest payable        | 11,000      | 5,150       |
| Total                           | \$2,997,174 | \$1,856,436 |

Federal funds purchased and repurchase agreements mature as follows:

|                              | Decer       | mber 31,    |
|------------------------------|-------------|-------------|
|                              | 2001        | 2000        |
|                              | (In the     | ousands)    |
| One to thirty days           | \$ 723,010  | \$1,368,944 |
| Over thirty to ninety days   | 14,062      |             |
| Over ninety days to one year | 274,142     | 208,200     |
| Over one year                | 1,974,960   | 274,142     |
| Total                        | \$2,986,174 | \$1,851,286 |

The following securities were sold under agreements to repurchase:

| December 31, 2001            |   |  |   |
|------------------------------|---|--|---|
| Amortized cost of underlying | Balance of  | Approximate<br>market value<br>of underlying | Weighted<br>average<br>interest   |
| securities                   | borrowing   | securities                                   | rate  |

| Total                                    | \$1,903,208                                      | \$1,851,286             | \$1,886,069  |   |  |
|  |  |                         |  |   |  |
| Accrued interest receivable              | \$ 4,124   |                         |  |   |  |

The weighted average interest rates of federal funds purchased and repurchase agreements at December 31, 2001 and 2000 was 4.05% and 6.32%, respectively.

At December 31, 2001 and 2000, the securities underlying such agreements were delivered to, and are being held by the dealers with which the repurchase agreements were transacted, except for transactions where the Corporation has agreed to repurchase similar but not identical securities. The maximum aggregate balance outstanding at any month-end during 2001 was \$2,986,174,065 (2000 - \$1,851,285,585). The average balance during 2001 was approximately \$1,997,705,000 (2000 - \$1,687,880,000).

# >. Note 20 - Advances From The Federal Home Loan Bank (FHLB) Following is a detail of the advances from the FHLB:

|                   |               | Decen     | nber 31, |
|-------------------|---------------|-----------|----------|
| Maturity          | Interest rate | 2001      | 2000     |
|                   |               | (In the   | ousands) |
| January 2, 2001   | 6.35%         |           | \$ 1,000 |
| January 5, 2001   | 6.41%         |           | 16,000   |
| January 2, 2002   | 1.85%         | \$ 20,700 |          |
| August 16, 2005   | 6.30%         | 50,000    | 50,000   |
| October 9, 2008   | 5.10%         | 14,000    |          |
| October 16, 2008  | 5.09%         | 15,000    |          |
| February 28, 2011 | 4.50%         | 79,000    |          |
| March 21, 2011    | 4.42%         | 165,000   |          |
|                   |               | \$343,700 | \$67,000 |

Advances are received from the FHLB under an Advances, Collateral Pledge and Security Agreement (the Collateral Agreement). Under the Collateral Agreement, the Corporation is required to maintain a minimum amount of qualifying mortgage collateral with a market value at least 110% of the outstanding advances. At December 31, 2001, specific mortgage loans with an estimated market value of \$197,506,039 (2000 - \$76,485,860) were pledged to the FHLB as part of the Collateral Agreement. The carrying value of such loans at December 31, 2001 amounted to \$192,371,368 (2000 - \$73,700,000). In addition, securities with an approximated market value of \$145,140,574 (2000 - \$5,704,606) and a carrying value of \$158,117,351 (2000 - \$5,675,689) were pledged to the FHLB.

#### > Note 21- Subordinated Notes

On December 20, 1995, the Corporation issued 7.63% subordinated capital notes in the amount of \$100,000,000 maturing in 2005. The notes were issued at a discount. At December 31, 2001 the outstanding balance net of the unamortized discount and notes repurchased was \$84,361,525 (2000 - \$90,548,314). Interest on the notes is payable semiannually and at maturity. The notes represent unsecured obligations of the Corporation ranking subordinate in right of payment to all existing and future senior debt including the claims of depositors and other general creditors. The notes may not be redeemed prior to their maturity. At December 31, 2001, the Corporation has transferred to capital reserves from the retained earnings account \$60,000,000, as a result of the requirement explained in Note 3 - "Stockholders' Equity."

## >, Note 22 - Unused Lines Of Credit

The Corporation maintains unsecured standby lines of credit with other banks. At December 31, 2001, the Corporation's total unused lines of credit with these banks amounted to approximately \$180,000,000 (2000 - \$133,500,000). At December 31, 2000, the Corporation has an available line of credit with the FHLB guaranteed with excess collateral, in the amount of \$66,841,562.

## > Note 23- Employees' Benefit Plan

FirstBank has a defined contribution retirement plan (the Plan) qualified under the provisions of the Puerto Rico Internal Revenue Code Section 1165(e). All employees are eligible to participate in the Plan after one year of service. Under the provisions of the Plan, the Bank contributes a quarter of the first 4% of each participant's compensation. Participants are permitted to contribute up to 10% of their annual compensation, limited to \$8,000 per year. Additional contributions to the Plan are voluntarily made by the Bank as determined by its Board of Directors. The Bank made a total contribution of \$845,227, \$699,060 and \$625,375 during 2001, 2000 and 1999, respectively, to the Plan.

## >. Note 24 - Other Expenses

A detail of other expenses follows:

|                                    | Yea      | Year ended December 31, |          |  |  |
|------------------------------------|----------|-------------------------|----------|--|--|
|                                    | 2001     | 2000                    | 1999     |  |  |
|                                    |          | (In thousands)          |          |  |  |
| Professional and service fees      | \$ 7,931 | \$ 8,740                | \$ 6,672 |  |  |
| Advertising and business promotion | 7,506    | 8,468                   | 5,896    |  |  |
| Communications                     | 5,395    | 5,573                   | 4,667    |  |  |
| Revenue earning equipment          | 1,578    | 1,525                   | 1,479    |  |  |
| Supplies and printing              | 1,282    | 1,214                   | 1,361    |  |  |
| Other                              | 8,559    | 7,423                   | 5,426    |  |  |
| Total                              | \$32,251 | \$32,943                | \$25,501 |  |  |

## > Note 25 - Income Taxes

The Corporation is subject to Puerto Rico income tax on its income from all sources. For United States income tax purposes, the Corporation is treated as a foreign corporation. Accordingly, it is generally subject to United States income tax only on its income from sources within the United States or income effectively connected with the conduct of a trade or business within the United States. Any United States income tax paid by the Corporation is creditable, within certain conditions and limitations, as a foreign tax credit against its Puerto Rico tax liability.

The provision for income taxes was as follows:

|          | Year     | Year ended December 31, |          |  |  |
|----------|----------|-------------------------|----------|--|--|
|          | 2001     | 2001 2000 1999          |          |  |  |
|          | '        | (In thousands)          |          |  |  |
| Current  | \$25,536 | \$19,117                | \$13,991 |  |  |
| Deferred | (5,402)  | _(4,356)                | (6,703)  |  |  |
| Total    | \$20,134 | \$14,761                | \$ 7,288 |  |  |

Income tax expense applicable to income before provision for income tax differs from the amount computed by applying the Puerto Rico statutory rate of 39% as follows:

|                                       |          | \       | Year ended Dec  | ember 31, |          |         |
|---------------------------------------|----------|---------|-----------------|-----------|----------|---------|
|                                       | 20       | 2001    |                 | 00        | 199      | 99      |
|                                       |          | % of    |                 | % of      |          | % of    |
|                                       |          | pre-tax |                 | pre-tax   |          | pre-tax |
|                                       | Amount   | income  | Amount          | income    | Amount   | income  |
|                                       |          |         | (Dollars in the | ousands)  |          |         |
| Computed income tax at statutory rate | \$41,789 | 39      | \$31,994        | 39        | \$27,052 | 39      |
| Benefit of net exempt income          | (24,442) | (23)    | (12,707)        | (15)      | (13,959) | (20)    |
| Other-net                             | 2,787    | 3       | (4,526)         | (6)       | (5,805)  | (8)     |
| Total income tax provision            | \$20,134 | 19      | \$14,761        | 18        | \$ 7,288 | 11      |

The components of the deferred tax asset and liability were as follows:

|                              | December 31, |          |  |
|------------------------------|--------------|----------|--|
|                              | 2001 20      |          |  |
|                              | (In tho      | usands)  |  |
| Deferred tax asset:          |              |          |  |
| Allowance for loan losses    | \$34,732     | \$29,998 |  |
| Unrealized loss on available |              |          |  |
| for sale securities          | 2,098        | 6,533    |  |
| Other                        | 7,110        | 6,445    |  |
| Deferred tax asset           | \$43,940     | \$42,976 |  |
|                              |              |          |  |
| Deferred tax liability       | \$ (322)     | \$ (325) |  |

No valuation allowance was considered necessary for the deferred tax asset.

The tax effect of the unrealized holding gain or loss for securities available for sale was computed based on a 25% capital gain tax rate, and is included in accumulated other comprehensive income as a part of stockholders' equity.

## >, Note 26 - Commitments

At December 31, 2001 certain premises are leased with terms expiring through the year 2021. The Corporation has the option to renew or extend certain leases from two to ten years beyond the original term. Some of these leases require the payment of insurance, increases in property taxes and other incidental costs. At December 31, 2001, the obligation under various leases follows:

| Amount         |
|----------------|
| (In thousands) |
| \$ 4,414       |
| 3,391          |
| 2,645          |
| 1,963          |
| 1,539          |
| 5,117          |
| \$19,069       |
|                |

Rental expense included in occupancy and equipment expense was \$4,240,437 in 2001 (2000 - \$4,042,069; 1999 - \$3,390,786).

## > Note 27 - Fair Value of Financial Instruments

The information about the estimated fair values of financial instruments as required by generally accepted accounting principles, is presented hereunder. The disclosure requirements exclude certain financial instruments and all non financial instruments. Accordingly, the aggregate fair value amounts presented do not represent Management's estimate of the underlying value of the Corporation. A summary table of estimated fair values and carrying values of financial instruments at December 31, 2001 and 2000 follows:

|                                      |            | Decer     | nber 31,   |           |
|--------------------------------------|------------|-----------|------------|-----------|
|                                      | 2001       |           | 20         | 000       |
|                                      | Estimated  | Carrying  | Estimated  | Carrying  |
|                                      | fair value | value     | fair value | value     |
|                                      |            | (In tho   | usands)    |           |
| Assets:                              |            |           |            |           |
| Cash and due from banks and          |            |           |            |           |
| money market instruments             | \$ 94,463  | \$ 94,463 | \$ 65,393  | \$ 65,393 |
| Investment securities                | 3,652,031  | 3,658,544 | 2,210,138  | 2,212,659 |
| FHLB stock                           | 22,891     | 22,891    | 18,537     | 18,537    |
| Loans receivable, including loans    |            |           |            |           |
| held for sale - net                  | 4,226,033  | 4,217,719 | 3,396,324  | 3,421,279 |
| <u>Liabilities:</u>                  |            |           |            |           |
| Deposits                             | 4,121,145  | 4,098,554 | 3,351,069  | 3,345,984 |
| Federal funds, securities sold       |            |           |            |           |
| under agreements to repurchase       | 3,005,466  | 2,997,174 | 1,857,651  | 1,856,436 |
| Advances from FHLB                   | 348,733    | 343,700   | 68,607     | 67,000    |
| Notes payable and subordinated notes | 83,729     | 84,362    | 144,853    | 146,048   |
| Interest rate swaps                  | 15,053     | 15,053    |            |           |

The estimated fair values are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in the underlying assumptions used in calculating the fair values could significantly affect the results. In addition, the fair value estimates are based on outstanding balances without attempting to estimate the value of anticipated future business. Therefore, the estimated fair values may materially differ from the values that could actually be realized on a sale.

The estimated fair values were calculated using certain facts and assumptions which vary depending on the specific financial instrument, as follows:

## Cash and due from banks and money market instruments

The carrying amounts of cash and due from banks and money market instruments are reasonable estimates of their fair values.

#### Investment securities

The fair values of investment securities are the market values based on quoted market prices and dealer quotes.

#### FHLB stock

Investments in FHLB stock are valued at their redemption values.

## Loans receivable, including loans held for sale - net

The fair value of all loans was estimated by the discounted present values of loans with similar financial characteristics. Loans were classified by type such as commercial, residential mortgage, credit card and automobile. These asset categories were further segmented into fixed and adjustable rate categories and by accruing and non-accruing groups. Performing floating rate loans were valued at book if they reprice at least once every three months. The fair value of fixed rate performing loans was calculated by discounting expected cash flows through the estimated maturity date. Recent prepayment experience was assumed to continue for mortgage loans, cred-

it cards, auto loans and personal loans. Other loans assumed little or no prepayment. Prepayment estimates were based on the Corporation's historical data for similar loans. Discount rates were based on the Treasury Yield Curve at the date of the analysis, with an adjustment which reflects the risk and other costs inherent in the loan category. In certain cases, where recent experience was available regarding the sale of loans, this information was also incorporated into the fair value estimates.

Non-accruing loans covered by a specific loan loss allowance were viewed as immediate losses and were valued at zero. Other non-accruing loans were arbitrarily assumed to be repaid after one year. Presumably this would occur either because loan is repaid, collateral has been sold to satisfy the loan or because general reserves are applied to it. The principal of non-accruing loans not covered by specific reserves was discounted for one year at the going rate for similar new loans.

### **Deposits**

The estimated fair values of demand deposits and savings accounts, which are the deposits with no defined maturities, equal the amount payable on demand at the reporting date. For deposits with stated maturities, but that reprice at least quarterly, the fair values are also estimated to be the amount payable at the reporting date.

The fair values of fixed rate deposits with stated maturities, are based on the present value of the future cash flows expected to be paid on deposits. The cash flows are based on contractual maturities; no early repayments are assumed. Discount rates are based on the LIBOR yield curve. The estimated fair values of total deposits exclude the fair value of core deposits intangible, which represent the value of the customer relationship measured by the values of demand deposits and savings deposits that bear a low or zero rate of interest and do not fluctuate in response to changes in interest rates.

Substantially all swaps currently held by the Corporation form part of structured broker CD's. In these instruments a fixed rate CD is matched with a swap of the same rate and maturity, thereby converting the fixed rate broker CD to a floating rate instrument which reprices quarterly based on a fixed differential to three month LIBOR. The swaps are recorded at fair value with a corresponding adjustment to CD's, therefore, for purposes of fair value analysis, these structured broker CD's are valued at book.

## <u>Federal funds, securities sold under agreements to repurchase</u> and other short-term borrowings

Federal funds purchased, repurchase agreements and other short-term borrowings are mostly borrowed funds, which reprice at least quarterly, and their outstanding balances are estimated to be their fair values. Where longer commitments are involved, fair values are estimated in the same way as fixed terms deposits.

## Advances from FHLB, notes payable and subordinated notes

The fair value of notes payable and subordinated notes with fixed maturities was determined using discounted cash flow analysis over the full term of the borrowings. The cash flows assumed no early repayment of the borrowings. Discount rates were based on the LIBOR yield curve. Variable rate debt securities reprice at intervals of three months or less, therefore, their outstanding balances are estimated to be their fair values.

#### Interest rate swaps

The fair value of the interest rate swaps were provided by the brokers who created them.

|  | Year ended December 31, |           |           |
|--|-------------------------|-----------|-----------|
|  | 2001                    | 2000      | 1999      |

|  |                         |           |           |

## Note 29 - Financial Instruments With Off-Balance Sheet Risk, Commitments to Extend Credit and Standby Letters of Credit

The following table presents a detail of commitments to extend credit and standby letters of credit:

|                                      | Dec            | ember 31, |  |
|--------------------------------------|----------------|-----------|--|
|                                      | 2001           | 2000      |  |
|                                      | (In thousands) |           |  |
| Financial instruments whose contract |                |           |  |
| amounts represent credit risk:       |                |           |  |
| Commitments to extend credit:        |                |           |  |
| To originate loans                   | \$194,363      | \$281,030 |  |
| Unused credit card lines             | 291,120        | 267,104   |  |
| Unused personal lines of cre         | edit 13,480    | 14,467    |  |
| Commercial lines of credit           | 222,821        | 331,785   |  |
| Commercial letters of credit         | 19,067         | 12,387    |  |
| Standby letters of credit            | 24,172         | 22,914    |  |

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instrument on commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. Management uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. These commitments generally expire within one year. Since certain commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. In the case of credit cards and personal lines of credit, the Corporation can at any time and without cause, cancel the unused credit facility. The amount of collateral, obtained if deemed necessary by the Corporation upon extension of credit, is based on Management's credit evaluation of the borrower. Rates charged on the loans that are finally disbursed is the rate being offered at the time the loans are closed, therefore, no fee is charged on these commitments. The fee is the amount which is used as the estimate of the fair value of commitments.

In general, commercial and standby letters of credit are issued to facilitate foreign and domestic trade transactions. Normally, commercial and standby letters of credit are short-term commitments used to finance commercial contracts for the shipment of goods. The collateral for these letters of credit include cash or available commercial lines of credit. The fair value of commercial and standby letters of credit is based on the fees currently charged for such agreements, which at December 31, 2001 is not significant.

## Interest rate risk management

The operations of the Corporation are subject to interest rate fluctuations to the extent that interest-earning assets and interest-bearing liabilities mature or reprice at different times or in different amounts. As part of the interest rate risk management, the Corporation has entered into a series of interest rate swap agreements. Under the interest rate swaps, the Corporation agrees with other parties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed notional principal amount. Net interest settlements on interest rate swaps are recorded as an adjustment to interest expense on deposit accounts or interest income on investment accounts.

The following table indicates the types of swaps used:

|  | Notional amount<br>(In thousands) |
|--|-----------------------------------|
| Day fixed swaps:                               | (III triousarius)                 |
| Pay-fixed swaps:  Balance at December 31, 1999 | \$ 50,000                         |
| Expired contracts                              | (50,000)                          |
| Balance at December 31, 2000                   | (30,000)                          |
| New contracts                                  | 58,165                            |
| Balance at December 31, 2001                   | \$ 58,165                         |
| Receive-fixed swaps:                           | <b>*</b> 105.000                  |
| Balance at December 31, 1999                   | \$ 185,000                        |
| Expired contracts                              | (25,000)                          |
| New contracts                                  | 991,000                           |
| Balance at December 31, 2000                   | 1,151,000                         |
| Expired contracts                              | (1,116,000)                       |
| New contracts                                  | _1,460,000                        |
| Balance at December 31, 2001                   | \$1,495,000                       |

Interest rate swap agreements under which the Corporation agrees to pay variable-rates of interest are considered to be a hedge against changes in the fair value of the Corporation fixed-rate certificates of deposit. The interest rate swap agreements are reflected at fair value in the Corporation's consolidated statement of financial condition and the related portion of fixed-rate debt being hedged is reflected at an amount equal to the sum of its carrying value plus an adjustment representing the change in fair value of the debt obligations attributable to the interest rate risk being hedged. The hedge relationship is estimated to be 100 percent effective; therefore, there is no impact on the statement of income nor on comprehensive income, because the gain or loss on the swap agreements will completely offset the loss or gain on the certificates of deposit. The net effect of this accounting is that the interest expense on the hedged certificates of deposit generally reflects variable interest rates.

Interest rate swap agreements under which the Corporation agrees to pay fixed-rates of interest are considered to be a hedge against changes in the fair value attributable to market interest rates of fixed rate available for sale corporate bonds. Accordingly, the interest rate swap agreements and the securities being hedged are reflected at fair value in the Corporation's consolidated statement of financial condition. The adjustment of the hedged item's carrying amount attributable to the hedged risk is recorded in earnings in order to offset the gain or loss on the hedging instrument. The change in the fair value of the security attributable to credit risk is recorded in other comprehensive income. The hedge relationship is estimated to be 100 percent effective; therefore, there is no impact on the statement of income, because the gain or loss on the interest rate swap reflects the full amount of the gain or loss on the hedged item attributable to the hedged risk. The net effect of this accounting is that the interest of the fixed-rate securities being hedged generally reflects variable interest rates.

Interest rate swaps with an aggregate notional principal balance of \$1,553,665,000 (\$58,165,000 fixed to floating and \$1,495,000,000 floating to fixed), had an unrealized loss of approximately \$15,053,000 at December 31, 2001.

Pay-fixed swaps at December 31, 2001 had a fixed weighted average rate payment of 7.14% and a floating weighted average rate receiving of 4.20%. At December 31, 2000, there are no pay-fixed swaps outstanding. Receive-fixed swaps at December 31, 2001, have a floating weighted average rate payment of 2.16% (2000 - 6.64%) and a fixed weighted average rate receiving of 6.32% (2000 - 7.54%). Floating rates are based on a 83% to 100% of the average of the last three months LIBOR rate.

For swap transactions, the amounts potentially subject to credit loss are the net streams of payments under the agreements and not the notional principal amounts used to express the volume of the swaps. At December 31, 2001, the Corporation had total net receivable of \$12,755,949 (2000 - \$5,527,697) related to the swap transactions. The Corporation controls the credit risk of its interest rate swap agreements through approvals, limits, and monitoring procedures. The Corporation does not anticipate nonperformance by the counterparties. As part of the swap transactions, the Corporation is required to pledge collateral in the form of deposits in banks or securities. The book value and aggregate market value of securities pledged as collateral for interest rate swaps at December 31, 2001 was approximately \$48.1 million and \$47.9 million, respectively (2000 - \$15.8 million and \$15.9 million, respectively). The period to maturity of the swaps at December 31, 2001 ranged from one year through twenty years (2000 - from one year through fifteen years).

## Interest rate protection agreements (Caps)

The Corporation also issues interest rate protection agreements (Caps) to limit its exposure to rising interest rates on its deposits. Under these agreements, the Corporation pays an up front premium or fee for the right to receive cash flow payments in excess of the predetermined cap rate; thus, effectively capping its interest rate cost for the duration of the agreement. The following table indicates the agreements outstanding at December 31, 2001 (dollars in thousands):

| Cap agreements notional amount | Cap Rate | Current 90 day LIBOR | Maturity        |
|--------------------------------|----------|----------------------|-----------------|
| (In thousands)                 |          |                      |                 |
| \$200,000                      | 7.50%    | 1.88%                | August 17, 2002 |
| 200,000                        | 7.25%    | 1.88%                | August 17, 2002 |
| 200,000                        | 7.00%    | 1.88%                | August 17, 2002 |
|                                |          |                      | · ·             |

Management designated these caps as cash-flow hedges. For a qualifying cash flow hedge, an interest rate cap is carried on the statement of financial condition at fair value with the time value change reflected through the current statement of income. Any intrinsic value is reflected through comprehensive income and will be reflected in future statements of income when payments are received from the counter party. On January 1, 2001 a loss of approximately \$1.3 million was recognized in the statement of income as a cumulative effect of the adoption of SFAS No. 133, as a result of unamortized premium paid for caps of \$1.5 million less an estimated fair market value of \$200,000. Prior to the implementation of SFAS No. 133, the premium was amortized as an adjustment to interest expense on borrowings. The amortization of premium in 2000 and 1999 amounted to approximately \$352,000, and \$252,000, respectively. The fair value of these caps at December 31, 2001 is zero.

## > Note 30 - Segment Information

The Corporation has three reportable segments: Retail business, Treasury and Investments, and Commercial Corporate business. Management determined the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. Other factors such as the Corporation's organizational chart, nature of the products, distribution channels and the economic characteristics of the products were also considered in the determination of the reportable segments.

The Retail business segment is composed of the Corporation's branches and loan centers together with the retail products of deposits and consumer loans. Consumer loans include loans such as personal, residential real estate, auto, credit card and small loans. Finance leases are also included in Retail business. The Commercial Corporate segment is composed of commercial loans including commercial real estate and construction loans. Certain small commercial loans originated by the branches are included in the Retail business for the years 1999 and 2000. The Treasury and Investment segment is responsible for the Corporation investment portfolio and treasury functions.

The accounting policies of the segments are the same as those described in Note 2 - "Summary of Significant Accounting Policies."

The Corporation evaluates the performance of the segments based on net interest income after the estimated provision for loan losses. The segments are also evaluated based on the average volume of its earning assets less the allowance for loan losses.

The only intersegment transaction is the net transfer of funds between the Treasury and Investment segment and other segments. The Treasury and Investment segment sells funds to the Retail and Commercial Corporate segments to finance their lending activities and purchases funds gathered by those segments. The interest rates charged or credited by Investment and Treasury is based on market rates.

## > Note 31 - Litigation

The Corporation is a defendant in a number of legal proceedings arising in the normal course of business. Management believes, based on the opinion of legal counsel, that the final disposition of these matters will not have a material adverse effect on the Corporation's financial position or results of operations.

## > Note 32 - Selected Quarterly Financial Data (Unaudited)

Financial data showing results of the 2001 and 2000 quarters is presented below. These results are unaudited. In the opinion of Management, all adjustments necessary for a fair presentation have been included:
