NET SALES & OPERATING MARGIN

TO OUR SNAP-ON SHAREHOLDERS

Snap-on is shaped by work—work of consequence often conducted in harsh and punishing environments. Our deep understanding of this work sparks ideas—ideas for innovative productivity solutions that make the task easier. Snap-on is celebrated by the professionals who perform such work because we help them solve the critical. As a result, the Snap-on® brand conveys to them a sense of special pride and dignity, making Snap-on a name they seek to call their own.

It's been this way since 1920, when the original Snap-on interchangeable socket set was invented for the emerging vehicle repair industry of the day. Later, we pioneered mobile tool distribution, calling on automotive mechanics in their garages and, in doing so, observing them at work to better understand their challenges. From these interactions, we continued to develop new solutions to make their jobs easier.

While this remains Snap-on's principal value-creating mechanism, today we define it more broadly. Snap-on's strength lies in its unique ability to provide repeatability and reliability to serious professionals through valued productivity solutions—ranging from wrenches of the highest quality and functionality to sophisticated and content-rich diagnostics and repair information software. In addition, it's clear that our capabilities and strengths, already demonstrated in automotive repair, also create significant advantages for professionals in a range of adjacent markets, in additional geographies and in other areas—including in critical industries, where the cost and penalties for failure can be high.

The commitment to this position guides our path along our coherent runways for growth: enhance the franchise network, expand with repair shop owners and managers, extend to critical industries and build in emerging markets. At the same time, we remain dedicated to runways for improvement embodied in our Snap-on Value Creation Processes in the areas of safety, quality, customer connection, innovation and Rapid Continuous Improvement (RCI). This balanced approach again yielded encouraging results in 2014.

IN 2014, WE CELEBRATED THE GRAND RE-OPENING OF THE SNAP-ON MUSEUM, WHICH HAS BEEN PART OF OUR KENOSHA CAMPUS SINCE 2007.

The newly designed, state-of-the-art facility illustrates for associates, franchisees, retirees, customers and the community at large Snap-on's rich history of making work easier for serious professionals. Chairman and Chief Executive Officer Nick Pinchuk; K.S. Yap, Snap-on Asia-Pacific; Sara Verbsky, Snap-on Corporate-Finance; Brad Lewis, Snap-on Repair Systems & Information Group; Jay Graham, Snap-on Power Tools and Kurt Sauer, Snap-on Tools Group, discuss the evolution of Snap-on's broad range of innovative productivity solutions.

Net sales of \$3.3 billion for the year increased 7.2% from 2013, including 6.9% organic sales growth (excluding acquisition-related sales and foreign currency translation). Operating margin before financial services of 16.3% improved 120 basis points from 15.1% a year ago, reflecting both higher sales and savings from RCI initiatives. Operating earnings from financial services grew to \$149.1 million in 2014, primarily due to the growth of our financial services portfolio. Net earnings of \$421.9 million increased 20.4% over 2013 levels, and diluted earnings per share reached \$7.14.

In our Commercial & Industrial Group (C&I), where we serve a broad range of industrial and commercial customers such as professionals in critical industries and emerging markets, segment net sales of \$1.2 billion increased 7.7% from 2013 levels; excluding foreign currency translation, organic sales increased 9.5%. This increase primarily reflects gains in sales to customers in critical industries and in our European-based hand tools business. Operating margin for C&I of 13.5% in 2014 improved 90 basis points from 2013.

SNA Europe, our European-based hand tools business, has now delivered five straight quarters of positive sales growth since coming off a multi-year downturn. Solutions like the Bahco® Ergo Tool Management System, a customized and flexible suite of tool storage and control systems that can be applied to workplaces in multiple industries, helped us gain new customers and grow sales in this important region. Our military business, another significant headwind in prior years, experienced a resurgence as we progressed through 2014. While we remain cautious about the overall environment for both Europe and the military, we were encouraged by the recent positive trends.

Our critical industries business saw volume increases across multiple sectors. Many of these gains can be attributed to a growing line of innovative new products, guided by strong customer connections gleaned through observations in the workplace and specifically designed for critical applications. In Asia-Pacific, we continued to build the “physicals”—manufacturing capacity, targeted product lines and distribution capability—resulting in substantial gains in bellwether markets like China and India.

The Snap-on Tools Group, our franchised mobile van network serving primarily vehicle repair technicians, posted net sales of \$1.5 billion, up 7.1% from 2013. Excluding foreign currency translation, organic sales increased 7.6%. This represents the Group's fifth consecutive year of organic sales growth greater than 7%, which has been achieved with essentially the same number of vans over the period. Growth in 2014 reflected higher sales both in the U.S. and internationally. Operating margin of 15.3% improved 100 basis points from a year ago. We believe these results are evidence of the growing financial and strategic strength of our franchise network.

The Snap-on Tools Group's financial results are just one indicator that our investments to enhance the opportunities for our franchisees' success are paying off. Key franchisee metrics have continued to be favorable and satisfaction levels are among the best we've seen. Snap-on was once again recognized as a Top 50 Franchise by *Franchise Business Review*, which ranks companies based solely on actual franchisee satisfaction.

We're helping our franchisees extend their reach through innovative selling processes and productivity initiatives that break the traditional time and space barriers inherent in a mobile van. A few examples of these process improvements include our demonstration vans that assist in the sale of big-ticket tool storage and diagnostic products, new mobile handheld versions of the franchisees' point-of-sale system, and extended customer care call center hours, which help franchisees better focus on customers during peak selling times.

A steady stream of successful new product launches also continued to pay dividends. In 2014, Snap-on was again recognized by both *Motor Magazine* and *Professional Tool and Equipment News (PTEN)* with tool innovation awards. In addition, *PTEN* inaugurated its People's Choice Awards, which featured the top 25 innovations selected by the publication's readers—the actual users of the products. Snap-on won seven of the designations, the most by any company. Our array of innovative new products, coupled with robust financing programs through Snap-on Credit, enables our franchisees to engage even more of their technician customers and potentially capture more of their spending for productivity solutions.

ENHANCE THE FRANCHISE NETWORK

As part of our strategic initiative to further advance franchisee productivity, Snap-on has developed, with franchisee input, new mobile versions of our van point-of-sale and operating system. Untethered from the computer on their van, franchisees can transact business with their customers all over the repair shop. Todd Gaulke, Snap-on Franchisee, uses the application on his tablet to complete an extended credit contract right in his customer's repair bay. This merging of mobility and information helps our franchisees be more productive, increase their sales and be more successful in their business.

PRO-CUT
ROTOR MATCHING SYSTEMS

Challenger Lifts

EXPAND WITH REPAIR SHOP OWNERS AND MANAGERS

Since 2013, Snap-on has acquired two companies that give us more to sell to repair shop owners and managers. Challenger designs, manufactures and distributes a comprehensive line of vehicle lifts and accessories. Pro-Cut's product line includes on-car brake lathes and related equipment used in brake servicing. These acquisitions increased our existing undercar equipment product offering, broadened our established capabilities in serving vehicle repair facilities and expanded our presence with both independent and OEM dealership service and repair shops.

In the Repair Systems & Information Group (RS&I), which serves owners and managers of independent and OEM dealership service and repair shops, 2014 sales of \$1.1 billion increased 8.5% year over year. Excluding acquisition-related sales and foreign currency translation, organic sales increased 4.9% on sales gains to OEM dealerships, increased sales of diagnostic and repair information products to independent repair shop owners and managers, and higher sales of undercar equipment. Operating margin for RS&I was 22.9% for the year.

In our businesses serving OEM dealerships, new customer wins in emerging markets and in other sectors like agriculture, as well as increased capabilities in adjacent areas such as heavy duty truck repair, are examples of RS&I expanding its reach in 2014. Through its commitment to Snap-on Value Creation, RS&I made significant progress in connecting with customers and translating the resulting insights into new innovation that solves specific customer challenges. In undercar equipment, our John Bean® V-Series wheel aligners range from units that help shop owners and managers offer wheel alignment service for the first time,

to productivity-focused aligners that are valued by high volume alignment shops, to advanced OEM solutions that match the newest car technologies. The SureTrack® software feature available in our Mitchell 1® repair information product provides real and expedited solutions based on actual repair data, helping technicians fix vehicles more quickly and more accurately. The new SOLUS™ Edge is our latest full-function scanner in a continuing series of successful handheld diagnostic launches. In fact, we extended to four years an unbroken string of *Undercar Digest* Top 10 awards for Snap-on diagnostic tools with the recognition of our VERUS® PRO and ETHOS®+ as among the year's top products.

We also expanded our product lines in 2014 by acquiring Pro-Cut International, Inc., which designs and manufactures on-car brake lathes, as well as related equipment and accessories used in brake servicing by automotive repair facilities. Pro-Cut increased our existing undercar equipment product offering, broadened our established capabilities in serving vehicle repair facilities and expanded our presence with repair shop owners and managers.

EXTEND TO CRITICAL INDUSTRIES

Snap-on's capabilities in solving the critical continue to expand beyond automotive repair in other industries where tasks require precision and control, are conducted in harsh and punishing environments, and have high consequences of failure. In power generation, Snap-on offers a growing line of innovative products—from solutions that facilitate utility transformer access, to insulated tools for working safely with electricity, to spline sockets used in generator turbine maintenance. Developed through customer connection insights, these are just a few examples of products specifically designed for solving challenges experienced by professionals in this space.

Financial Services revenue of \$214.9 million in 2014 compared to \$181.0 million in 2013; originations of \$888.6 million in 2014 increased \$110.9 million, or 14.3%, from the prior year. Snap-on has steadily grown its financial services portfolio while maintaining healthy portfolio performance and credit metrics. In 2014, operating earnings from financial services of \$149.1 million increased \$23.4 million, or 18.6%, from 2013. In addition to solid financial contributions, Financial Services continues to serve a significant strategic role, creating opportunities across our organization, especially within the Snap-on Tools Group, by offering credit products and services that attract and sustain franchisees and support Snap-on's strategies for expanding market coverage and penetration.

In November 2014, representing a fifth consecutive annual increase, our Board of Directors raised our quarterly cash dividend by 20.5% to \$0.53 per share. This raise underscores

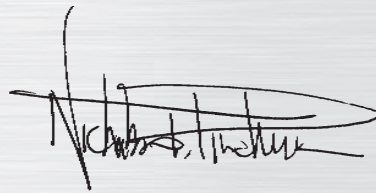

both the ongoing progress along our defined runways for coherent growth and the continuing improvements authored by our Snap-on Value Creation Processes. At the same time, it reinforces both our commitment to create long-term value for our shareholders and our belief that Snap-on is well-positioned for the future. Snap-on's dividend remains a core element of our capital allocation strategy, as demonstrated by our payment of consecutive quarterly cash dividends, without interruption or reduction, since 1939.

We were pleased to welcome Ruth Ann M. Gillis, retired executive vice president and chief administrative officer of Exelon Corporation, and Donald J. Stebbins, president and chief executive officer of Superior Industries International, Inc., to the Board of Directors in July 2014 and January 2015, respectively. Both Ruth Ann and Don bring extensive experience and capabilities to our Board and our team.

In June 2014, we bid farewell to Roxanne J. Decyk, who served as a Board member since 1993. Throughout her 21 years of service to Snap-on, Roxanne always shared her extraordinary wisdom, advice and counsel both effectively and thoughtfully. We wish her all the best and are grateful for her years of dedicated, as well as distinguished, service.

In 2014, we made considerable progress in furthering our strategic position, with our results again reinforcing the strength of Snap-on's value proposition of making work easier for serious professionals performing critical tasks in workplaces of consequence. In 2015, we will endeavor to reach more and more of these professionals by advancing further along each of our runways for coherent growth while at the same time making ongoing improvements through our Snap-on Value Creation Processes. We believe the strength of our businesses, coupled with our commitment to build upon our distinct combination of powerful capabilities, will continue to create long-term value for our shareholders as we go forward.

In 2015, Snap-on will observe its 95th anniversary. Beginning with founder Joe Johnson's first invention, Snap-on has been shaped by work, sparked by ideas and celebrated by professionals. This is an integral part of who we are, where we've been and where we're going. And it's all been made possible by the skilled hands, agile minds and committed hearts of the people of Snap-on. I thank our franchisees and associates worldwide for their dedication and contributions, our Board of Directors for its support and guidance, and our customers and shareholders for their continued confidence and commitment.

Nicholas T. Pinchuk
Chairman and Chief Executive Officer

BUILD IN EMERGING MARKETS

Snap-on has been focused on building physical presence, developing tailored products and expanding distribution for the emerging markets of Asia-Pacific as repair industries develop in these rapidly growing economies. Snap-on's Blue Point® stores in China are one example. Catering to vehicle service professionals, these stores, now located in 10 major cities in China, feature our line of solutions for China's automotive repair industry under the Blue Point® brand, which has been part of Snap-on since the 1920s. These stores, located in proximity to concentrations of automotive dealerships and service centers in urban areas, are one of our several avenues for reaching more repair shops in this increasingly important market for Snap-on.

WHO WE ARE

OUR MISSION

THE MOST VALUED PRODUCTIVITY SOLUTIONS IN THE WORLD

BELIEFS

We deeply believe in:

Non-negotiable Product and Workplace Safety
Uncompromising Quality
Passionate Customer Care
Fearless Innovation
Rapid Continuous Improvement

VALUES

Our behaviors define our success:

We demonstrate Integrity.
We tell the Truth.
We respect the Individual.
We promote Teamwork.
We Listen.

VISION

To be acknowledged as the:

Brands of Choice
Employer of Choice
Franchisor of Choice
Business Partner of Choice
Investment of Choice

SNAP-ON VALUE CREATION

PRINCIPLES AND PROCESSES WE APPLY TO CREATE VALUE

Founded on our mission and beliefs, these are strategic processes we use daily to create value across Snap-on, with the strategic partners we embrace and in the acquisitions we make.

SAFETY

Our commitment to safety is unwavering. Since 2004, we have achieved a 92% reduction in our safety incident rate and we will continue our emphasis on safety as we move forward.

QUALITY

The serious professionals who use our productivity solutions demand superior quality. For almost 95 years, Snap-on has been delivering just that. Again in 2014, automotive technicians continued to rate Snap-on as the best brand in the major tool categories.

CUSTOMER CONNECTION

Through our legions of mobile stores, direct sales forces and distributors across the globe, we make thousands of daily contacts with professionals in their workplaces. Each of these contacts represents an opportunity to understand in depth our customers' wants and needs, which we believe provides Snap-on with an important strategic advantage.

INNOVATION

We thrive on innovation. Our customer connection processes help us understand the needs of our customers and our innovation practices and processes translate these insights into productivity solutions that make work easier for professionals.

RAPID CONTINUOUS IMPROVEMENT

We apply a structured set of tools and processes to eliminate waste and to improve our operations. RCI has been critical to our operating income improvements and will continue to be an important ingredient in our progress going forward.

Safe Harbor

Statements in this document that are not historical facts, including statements that (i) are in the future tense; (ii) include the words “expects,” “plans,” “targets,” “estimates,” “believes,” “anticipates,” or similar words that reference Snap-on Incorporated (“Snap-on” or “the company”) or its management; (iii) are specifically identified as forward-looking; or (iv) describe Snap-on’s or management’s future outlook, plans, estimates, objectives or goals, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Snap-on cautions the reader that any forward-looking statements included in this document that are based upon assumptions and estimates were developed by management in good faith and are subject to risks, uncertainties or other factors that could cause (and in some cases have caused) actual results to differ materially from those described in any such statement. Accordingly, forward-looking statements should not be relied upon as a prediction of actual results or regarded as a representation by the company or its management that the projected results will be achieved. For those forward-looking statements, Snap-on cautions the reader that numerous important factors, such as those listed below, as well as those factors discussed in this Annual Report on Form 10-K, particularly those in “Item 1A: Risk Factors,” could affect the company’s actual results and could cause its actual consolidated results to differ materially from those expressed in any forward-looking statement made by, or on behalf of, Snap-on.

These risks and uncertainties include, without limitation, uncertainties related to estimates, statements, assumptions and projections generally, and the timing and progress with which Snap-on can attain value through its Snap-on Value Creation Processes, including its ability to realize efficiencies and savings from its rapid continuous improvement and other cost reduction initiatives, improve workforce productivity, achieve improvements in the company’s manufacturing footprint and greater efficiencies in its supply chain, and enhance machine maintenance, plant productivity and manufacturing line set-up and change-over practices, any or all of which could result in production inefficiencies, higher costs and/or lost revenues. These risks also include uncertainties related to Snap-on’s capability to implement future strategies with respect to its existing businesses, its ability to refine its brand and franchise strategies, retain and attract franchisees, further enhance service and value to franchisees and thereby help improve their sales and profitability, introduce successful new products, successfully pursue, complete and integrate acquisitions, as well as its ability to withstand disruption arising from natural disasters, planned facility closures or other labor interruptions, the effects of external negative factors, including adverse developments in world financial markets, weakness in certain areas of the global economy, and significant changes in the current competitive environment, inflation, interest rates and other monetary and market fluctuations, changes in tax rates and regulations, and the impact of energy and raw material supply and pricing, including steel and gasoline, the amount, rate and growth of Snap-on’s general and administrative expenses, including health care and postretirement costs (resulting from, among other matters, U.S. health care legislation and its implementation), continuing and potentially increasing required contributions to pension and postretirement plans, the impacts of non-strategic business and/or product line rationalizations, and the effects on business as a result of new legislation, regulations or government-related developments or issues, risks associated with data security and technological systems and protections, and other world or local events outside Snap-on’s control, including terrorist disruptions. Snap-on disclaims any responsibility to update any forward-looking statement provided in this document, except as required by law.

In addition, investors should be aware that generally accepted accounting principles in the United States of America (“U.S. GAAP”) prescribe when a company should reserve for particular risks, including litigation exposures. Accordingly, results for a given reporting period could be significantly affected if and when a reserve is established for a major contingency. Reported results, therefore, may appear to be volatile in certain accounting periods.

Snap-on’s fiscal year ends on the Saturday that is on or nearest to December 31. Unless otherwise indicated, references in this document to “fiscal 2014” or “2014” refer to the fiscal year ended January 3, 2015; references to “fiscal 2013” or “2013” refer to the fiscal year ended December 28, 2013; and references to “fiscal 2012” or “2012” refer to the fiscal year ended December 29, 2012. Snap-on’s 2014 fiscal year contained 53 weeks of operating results, with the extra week occurring in the fourth quarter; Snap-on’s 2013 and 2012 fiscal years each contained 52 weeks of operating results. References in this document to 2014, 2013 and 2012 year end refer to January 3, 2015, December 28, 2013, and December 29, 2012, respectively.

Item 1: Business

Snap-on was incorporated under the laws of the state of Wisconsin in 1920 and reincorporated under the laws of the state of Delaware in 1930. Snap-on is a leading global innovator, manufacturer and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks. Products and services include hand and power tools, tool storage, diagnostics software, information and management systems, shop equipment and other solutions for vehicle dealerships and repair centers, as well as for customers in industries, including aviation and aerospace, agriculture, construction, government and military, mining, natural resources, power generation and technical education. Snap-on also derives income from various financing programs designed to facilitate the sales of its products.

Snap-on markets its products and brands through multiple sales distribution channels in more than 130 countries. Snap-on's largest geographic markets include the United States, the United Kingdom, Canada, Germany, Australia, Japan, France, Italy, Sweden, Spain, China, Brazil, the Netherlands, Saudi Arabia, Mexico, Argentina, Denmark, Norway, India, the Russian Federation, Finland and Indonesia. Snap-on reaches its customers through the company's franchisee, company-direct, distributor and internet channels. Snap-on originated the mobile tool distribution channel in the automotive repair market.

The company began with the development of the original Snap-on interchangeable socket set in 1920 and subsequently pioneered mobile tool distribution in the automotive repair market, where fully stocked vans sell to professional vehicle technicians at their place of business. For many decades, the company was viewed primarily as a hand tool company selling through vans to vehicle technicians. Today, Snap-on defines its value proposition more broadly, extending its reach "beyond the garage" to deliver a broad array of unique solutions that make work easier for serious professionals performing critical tasks. Building upon capabilities already demonstrated in the automotive repair arena, the company's "coherent growth" strategy focuses on developing and expanding its professional customer base in adjacent markets, additional geographies and other areas, including in critical industries, where the cost and penalties for failure can be high. In addition to its coherent growth strategy, Snap-on is committed to its "Value Creation Processes" – a set of strategic principles and processes designed to create value and employed in the areas of (i) safety; (ii) quality; (iii) customer connection; (iv) innovation; and (v) rapid continuous improvement ("RCI").

Snap-on's primary customer segments include: (i) commercial and industrial customers, including professionals in critical industries and emerging markets; (ii) professional vehicle repair technicians who purchase products through the company's worldwide mobile tool distribution network; and (iii) other professional customers related to vehicle repair, including owners and managers of independent and original equipment manufacturer ("OEM") dealership service and repair shops ("OEM dealerships"). Snap-on's Financial Services customer segment includes: (i) franchisees' customers and Snap-on's industrial and other customers who require financing for the purchase or lease of tools and diagnostics and equipment products on an extended-term payment plan; and (ii) franchisees who require financing for business loans and vehicle leases.

Snap-on's business segments are based on the organization structure used by management for making operating and investment decisions and for assessing performance. Snap-on's reportable business segments are: (i) the Commercial & Industrial Group; (ii) the Snap-on Tools Group; (iii) the Repair Systems & Information Group; and (iv) Financial Services. The Commercial & Industrial Group consists of business operations serving a broad range of industrial and commercial customers worldwide, primarily through direct and distributor channels. The Snap-on Tools Group consists of business operations primarily serving vehicle service and repair technicians through the company's worldwide mobile tool distribution channel. The Repair Systems & Information Group consists of business operations serving other professional vehicle repair customers worldwide, primarily owners and managers of independent repair shops and OEM dealerships, through direct and distributor channels. Financial Services consists of the business operations of Snap-on Credit LLC ("SOC"), the company's financial services business in the United States, and Snap-on's other financial services subsidiaries in those international markets where Snap-on has franchise operations. See Note 18 to the Consolidated Financial Statements for information on business segments and foreign operations.

Snap-on evaluates the performance of its operating segments based on segment revenues, including both external and intersegment net sales, and segment operating earnings. Snap-on accounts for intersegment sales and transfers based primarily on standard costs with reasonable mark-ups established between the segments. Identifiable assets by segment are those assets used in the respective reportable segment's operations. Corporate assets consist of cash and cash equivalents (excluding cash held at Financial Services), deferred income taxes and certain other assets. All significant intersegment amounts are eliminated to arrive at Snap-on's consolidated financial results.

On May 28, 2014, Snap-on acquired substantially all of the assets of Pro-Cut International, Inc. ("Pro-Cut") for a cash purchase price of \$41.3 million. Pro-Cut designs, manufactures and distributes on-car brake lathes, related equipment and accessories used in brake servicing by automotive repair facilities. The acquisition of the Pro-Cut product line complemented and increased Snap-on's existing undercar equipment product offering, broadened its established capabilities in serving vehicle repair facilities and expanded the company's presence with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Pro-Cut have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Pro-Cut acquisition were neither significant nor material to Snap-on's results of operations or financial position.

On May 13, 2013, Snap-on acquired Challenger Lifts, Inc. ("Challenger") for a cash purchase price of \$38.2 million. Challenger designs, manufactures and distributes a comprehensive line of vehicle lifts and accessories to a diverse customer base in the automotive repair sector. The acquisition of the Challenger vehicle lift product line complemented and increased Snap-on's existing undercar equipment product offering, broadened its established capabilities in serving vehicle repair facilities and expanded the company's presence with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Challenger have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Challenger acquisition were neither significant nor material to Snap-on's results of operations or financial position.

Information Available on the Company's Website

Additional information regarding Snap-on and its products is available on the company's website at www.snapon.com. Snap-on is not including the information contained on its website as a part of, or incorporating it by reference into, this Annual Report on Form 10-K. Snap-on's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Proxy Statements on Schedule 14A and Current Reports on Form 8-K, as well as any amendments to those reports, are made available to the public at no charge, other than an investor's own internet access charges, through the Investor Information section of the company's website at www.snapon.com. Snap-on makes such material available on its website as soon as reasonably practicable after it electronically files such material with, or furnishes it to, the Securities and Exchange Commission ("SEC"). Copies of any materials the company files with the SEC can also be obtained free of charge through the SEC's website at www.sec.gov. The SEC's Public Reference Room can be contacted at 100 F Street, N.E., Washington, D.C. 20549, or by calling 1-800-732-0330. In addition, Snap-on's (i) charters for the Audit, Corporate Governance and Nominating, and Organization and Executive Compensation Committees of the company's Board of Directors; (ii) Corporate Governance Guidelines; and (iii) Code of Business Conduct and Ethics are available on the company's website. Snap-on will also post any amendments to these documents, or information about any waivers granted to directors or executive officers with respect to the Code of Business Conduct and Ethics, on the company's website at www.snapon.com.

Products and Services

Tools, Diagnostics and Repair Information, and Equipment

Snap-on offers a broad line of products and complementary services that are grouped into three product categories: (i) tools; (ii) diagnostics and repair information; and (iii) equipment. Further product line information is not presented as it is not practicable to do so. The following table shows the consolidated net sales of these product categories for the last three years:

(Amounts in millions)	Net Sales		
	2014	2013	2012
Product Category:			
Tools	\$ 1,868.5	\$ 1,743.3	\$ 1,729.4
Diagnostics and repair information	689.5	652.0	619.8
Equipment	719.7	661.2	588.7
	<u>\$ 3,277.7</u>	<u>\$ 3,056.5</u>	<u>\$ 2,937.9</u>

The *tools* product category includes hand tools, power tools and tool storage products. Hand tools include wrenches, sockets, ratchet wrenches, pliers, screwdrivers, punches and chisels, saws and cutting tools, pruning tools, torque measuring instruments and other similar products. Power tools include cordless (battery), pneumatic (air), hydraulic and corded (electric) tools, such as impact wrenches, ratchets, chisels, drills, sanders, grinders, polishers and similar products. Tool storage includes tool chests, roll cabinets, tool control systems and other similar products. The majority of products are manufactured by Snap-on and, in completing the product offering, other items are purchased from external manufacturers.

The *diagnostics and repair information* product category includes handheld and PC-based diagnostic products, service and repair information products, diagnostic software solutions, electronic parts catalogs, business management systems and services, point-of-sale systems, integrated systems for vehicle service shops, OEM purchasing facilitation services, and warranty management systems and analytics to help OEM dealerships manage and track performance.

The *equipment* product category includes solutions for the diagnosis and service of vehicles and industrial equipment. Products include wheel alignment equipment, wheel balancers, tire changers, vehicle lifts, test lane systems, collision repair equipment, air conditioning service equipment, brake service equipment, fluid exchange equipment, transmission troubleshooting equipment, safety testing equipment, battery chargers and hoists.

Snap-on supports the sale of its diagnostics and vehicle service shop equipment by offering training programs as well as after-sales support for its customers, primarily focusing on the technologies and the application of specific products developed and marketed by Snap-on.

Products are marketed under a number of brand names and trademarks, many of which are well known in the vehicle service and industrial markets served. Some of the major trade names and trademarks and the products and services with which they are associated include the following:

<u>Names</u>	<u>Products and Services</u>
Snap-on	Hand tools, power tools, tool storage products (including tool control software and hardware), diagnostics, certain equipment and related accessories, mobile tool stores, websites, electronic parts catalogs, warranty analytics solutions, business management systems and services, OEM specialty tools and equipment development and distribution, and OEM facilitation services
ATI	Aircraft hand tools and machine tools
BAHCO	Saw blades, cutting tools, pruning tools, hand tools, power tools and tool storage
Blackhawk	Collision repair equipment
Blue-Point	Hand tools, power tools, tool storage, diagnostics, certain equipment and related accessories
Cartec	Safety testing, brake testers, test lane equipment, dynamometers, suspension testers, emission testers and other equipment
CDI	Torque tools
Challenger	Vehicle lifts
Fish and Hook	Saw blades, cutting tools, pruning tools, hand tools, power tools and tool storage
Hofmann	Wheel balancers, vehicle lifts, tire changers, wheel aligners, brake testers and test lane equipment
Irimo	Saw blades, cutting tools, hand tools, power tools and tool storage
John Bean	Wheel balancers, vehicle lifts, tire changers, wheel aligners, brake testers and test lane equipment
Lindström	Hand tools
Mitchell1	Repair and service information, shop management systems and business services
Nexiq	Diagnostic tools, information and program distributions for fleet and heavy duty equipment
Pro-Cut	On-car brake lathes, related equipment and accessories
Sandflex	Hacksaw blades, band saws, saw blades, hole saws and reciprocating saw blades
ShopKey	Repair and service information, shop management systems and business services
Sioux	Power tools
Sun	Diagnostic tools, wheel balancers, vehicle lifts, tire changers, wheel aligners, air conditioning products and emission testers
Williams	Hand tools, tool storage, certain equipment and related accessories

Financial Services

Snap-on also generates revenue from various financing programs that include: (i) installment sales and lease contracts arising from franchisees' customers and Snap-on's industrial and other customers for the purchase or lease of tools, including tool storage, and diagnostic and equipment products on an extended-term payment plan; and (ii) business loans and vehicle leases to franchisees. The decision to finance through Snap-on or another financing entity is solely at the customer's election. When assessing customers for potential financing, Snap-on considers various factors including financial condition, collateral, debt-servicing ability, past payment experience and credit bureau information.

United States

In the United States, Snap-on offers financing through SOC and provides financing for new contracts originated by SOC. Financing revenue from contract originations owned by SOC is recognized by SOC over the life of the contracts, with interest computed on the average daily balances of the underlying contracts.

International

Snap-on also offers financing to its franchisees and customer networks through its international finance subsidiaries located in Canada, the United Kingdom, Australia and New Zealand. Snap-on offers financing to its franchisees and customer networks in Ireland, the Netherlands and Germany through its U.K. finance subsidiary. Snap-on offers financing to its franchisees and customer network in Puerto Rico through SOC. Snap-on's international finance subsidiaries own and service the receivables originated through their financing programs. Financing revenue from these contracts is recognized over the life of the contracts, with interest computed on the average daily balances of the underlying contracts.

Other

Franchise fee revenue, including nominal, non-refundable initial and ongoing monthly fees (primarily for sales and business training, and marketing and product promotion programs), is recognized as the fees are earned. Franchise fee revenue totaled \$12.1 million, \$11.9 million and \$9.9 million in fiscal 2014, 2013 and 2012, respectively.

Sales and Distribution

Snap-on markets and distributes its products and related services principally to professional tool and equipment users around the world. The two largest market sectors are the vehicle service and repair sector and the industrial sector.

Vehicle Service and Repair Sector

The vehicle service and repair sector has three main customer groups: (i) professional technicians who purchase tools and diagnostic and equipment products for themselves; (ii) other professional customers related to vehicle repair, including owners and managers of independent repair shops and OEM dealerships who purchase tools and diagnostic and equipment products for use by multiple technicians within a service or repair facility; and (iii) OEMs.

Snap-on provides innovative tool, equipment and business solutions, as well as technical sales support and training, designed to meet technicians' evolving needs. Snap-on's mobile tool distribution system offers technicians the convenience of purchasing quality tools at their place of business with minimal disruption of their work routine. Snap-on also provides owners and managers of repair shops, where technicians work, with tools, diagnostic equipment, and repair and service information, including electronic parts catalogs and shop management products. Snap-on's OEM facilitation business provides OEMs with products and services including tools, consulting and facilitation services, which include product procurement, distribution and administrative support to customers for their dealership equipment programs.

The vehicle service and repair sector is characterized by an increasing rate of technological change within motor vehicles, vehicle population growth and increasing vehicle life, and the resulting effects of these changes on the businesses of both our suppliers and customers. Snap-on believes it is a meaningful participant in the vehicle service and repair market sector.

Industrial Sector

Snap-on markets its products and services globally to a broad cross-section of commercial and industrial customers, including maintenance and repair operations; manufacturing and assembly facilities; various government agencies, facilities and operations, including military operations; vocational and technical schools; aviation and aerospace operations; OEM and service and repair customers; oil and gas developers; mining operations; energy and power generation, equipment fabricators and operators; railroad manufacturing and maintenance; customers in agriculture; infrastructure construction companies; and other customers that require instrumentation, service tools and/or equipment for their product and business needs.

The industrial sector for Snap-on focuses on providing value-added products and services to an increasingly expanding global base of customers in critical industries, particularly those in the market segments of natural resources, aerospace, government and technical education. Through its experienced and dispersed sales organization, industrial “solutioneers” develop unique and highly valued productivity solutions for customers worldwide that leverage Snap-on’s product, service and development capabilities.

The industrial sector is characterized by a highly competitive, cost-conscious environment, and a trend toward customers making many of their tool and equipment purchases through one integrated supplier. Snap-on believes it is a meaningful participant in the industrial tools and equipment market sector.

Distribution Channels

Snap-on serves customers primarily through the following channels of distribution: (i) the mobile van channel; (ii) company direct sales; (iii) distributors; and (iv) e-commerce. The following discussion summarizes Snap-on’s general approach for each channel, and is not intended to be all-inclusive.

Mobile Van Channel

In the United States, a significant portion of sales to the vehicle service and repair sector is conducted through Snap-on’s mobile franchise van channel. Snap-on’s franchisees primarily serve vehicle repair technicians and vehicle service shop owners, generally providing weekly contact at the customer’s place of business. Franchisees’ sales are concentrated in hand and power tools, tool storage products, shop equipment, and diagnostic and repair information products, which can easily be transported in a van and demonstrated during a brief sales call. Franchisees purchase Snap-on’s products at a discount from suggested list prices and resell them at prices established by the franchisee. U.S. franchisees are provided a list of calls that serves as the basis of the franchisee’s sales route.

Snap-on also provides certain franchisees the opportunity to add vans to their franchise or to add a limited number of additional franchises. Snap-on charges nominal initial and ongoing monthly franchise fees. Since 1991, written franchise agreements have been entered into with all new U.S. franchisees.

Snap-on previously offered an option termed the “Gateway Franchise Program” to certain potential U.S. franchisees, including those that did not meet the standard franchise qualification requirements. Gateway Franchise Program participants had less upfront investment and were provided an initial base level of consigned inventory from Snap-on to assist them in gaining experience and building equity toward the future purchase of a standard franchise. Snap-on ceased offering new Gateway franchises in February 2013 and anticipates not having any remaining Gateway franchises by the end of February 2015. As of 2014 year end, five of Snap-on’s U.S. franchised routes were operated as Gateway franchises.

Snap-on also has a company-owned van program in the United States that is designed to: (i) provide another pool of potential franchisees and field organization personnel; (ii) service customers in select new and/or open routes not currently serviced by franchisees; and (iii) allow Snap-on to pilot new sales and promotional ideas prior to introducing them to franchisees. As of 2014 year end, company-owned vans comprised approximately 5% of the total U.S. van population; Snap-on may elect to increase or reduce the number of company-owned vans in the future.

In addition to its mobile van channel in the United States, Snap-on has replicated its U.S. franchise distribution model in certain other countries including Australia, Canada, Germany, Japan, the United Kingdom, the Netherlands, South Africa, New Zealand, Belgium and Ireland. In many of these markets, as in the United States, purchase decisions are generally made or influenced by professional vehicle service technicians as well as repair shop owners and managers. As of 2014 year end, Snap-on's worldwide mobile van count was approximately 4,800 vans, including approximately 3,500 vans in the United States.

Through SOC, financing is available to U.S. franchisees, including financing for van leases, working capital loans and loans to help enable new franchisees to fund the purchase of the franchise. In many international markets, Snap-on offers a variety of financing options to its franchisees and/or customer networks through its international finance subsidiaries. The decision to finance through Snap-on or another financing entity is solely at the customer's election.

Snap-on supports its franchisees with a field organization of regional offices, franchise performance teams, Diagnostic Sales Developers ("DSDs"), customer care centers and distribution centers. Snap-on also provides sales and business training, and marketing and product promotion programs, as well as customer and franchisee financing programs through SOC and the company's international finance subsidiaries, all of which are designed to strengthen franchisee sales. In North America, the United States National Franchise Advisory Council and the Canadian National Franchise Advisory Council, both of which are composed primarily of franchisees that are elected by franchisees, assist Snap-on in identifying and implementing enhancements to the franchise program.

In the United States, franchisees work closely with DSDs. The DSDs train franchisees on the sale of higher-price-point diagnostics and demonstrate and sell vehicle service shop management and information systems. DSDs work independently and with franchisees to identify and generate sales among vehicle service technicians and repair shop owners and managers. DSDs are Snap-on employees who are compensated through a combination of base salary and commission; a franchisee receives a brokerage fee from certain sales made by the DSDs to the franchisee's customers. Most products sold through franchisees and DSDs are sold under the Snap-on, Blue-Point and ShopKey brand names.

Company Direct Sales

A significant proportion of shop equipment sales in North America under the John Bean, Hofmann, Blackhawk, Challenger and Pro-Cut brands, diagnostic products under the Snap-on brand and information products under the Mitchell1 brand are made by direct and independent sales forces that have responsibility for national and other accounts. As the vehicle service and repair sector consolidates (with more business conducted by national chains and franchised service centers), Snap-on believes these larger organizations can be serviced most effectively by sales people who can demonstrate and sell the full line of diagnostic and equipment products and services. Snap-on also sells these products and services directly to OEMs and their franchised dealers.

Snap-on brand tools and equipment are marketed to industrial and governmental customers in the United States through both industrial sales representatives, who are employees, and independent industrial distributors. Outside of the United States, industrial sales are also conducted through other independent distributors. Sales representatives focus on industrial customers whose main purchase criteria are quality and integrated solutions. As of 2014 year end, Snap-on had industrial sales representatives in the United States (including Puerto Rico), Australia, Canada, Japan, Mexico and various European, Asian, Latin American, Middle Eastern and African countries, with the United States representing the majority of Snap-on's total industrial sales.

Snap-on also sells software, services and solutions to the automotive, commercial, agriculture, power equipment and power sports segments. Products and services are marketed to targeted groups, including OEMs and their dealerships, fleets, and individual repair shops. To effectively reach OEMs, which frequently have a multi-national presence, Snap-on has deployed focused business teams globally.

Distributors

Sales of certain tools and equipment are made through independent distributors who purchase the items from Snap-on and resell them to end users. Hand tools under the BAHCO, Fish and Hook, Lindström and Williams brands and trade names, for example, are sold through distributors in Europe, North and South America, Asia and certain other parts of the world. Wheel service and other vehicle service equipment are sold through distributors primarily under brands including Hofmann, John Bean, Challenger, Pro-Cut, Cartec and Blackhawk. Diagnostic and equipment products are marketed through distributors in South America and Asia, and through both a direct sales force and distributors in Europe under the Snap-on, Sun, BAHCO and Blue-Point brands.

E-commerce

Snap-on's e-commerce development initiatives allow Snap-on to combine the capabilities of the internet with Snap-on's existing brand sales and distribution strengths to reach new and under-served customer segments. Snap-on offers current and prospective customers online, around-the-clock access to research and purchase products through its public internet website at www.snapon.com. The site features an online catalog of Snap-on hand tools, power tools, tool storage units and diagnostic equipment available to customers in the United States, the United Kingdom, Canada and Australia. E-commerce and certain other system enhancement initiatives are designed to improve productivity and further leverage the one-on-one relationships and service Snap-on has with its current and prospective customers. Sales through the company's e-commerce distribution channel were not significant in any of the last three years.

Competition

Snap-on competes on the basis of its product quality and performance, product line breadth and depth, service, brand awareness and imagery, technological innovation and availability of financing (through SOC or its international finance subsidiaries). While Snap-on does not believe that any single company competes with it across all of its product lines and distribution channels, various companies compete in one or more product categories and/or distribution channels.

Snap-on believes it is a leading manufacturer and distributor of professional tools, tool storage, diagnostic and equipment products, and repair software and solutions, offering a broad line of these products to both vehicle service and industrial marketplaces. Various competitors target and sell to professional technicians in the vehicle service and repair sector through the mobile tool distribution channel; Snap-on also competes with companies that sell tools and equipment to vehicle service and repair technicians through retail stores and online, vehicle parts supply outlets, and tool supply warehouses/distributorships. Within the power tools category and the industrial sector, Snap-on has various other competitors, including companies with offerings that overlap with other areas discussed herein. Major competitors selling diagnostics, shop equipment and information to vehicle dealerships and independent repair shops include OEMs and their proprietary electronic parts catalogs, as well as diagnostics and information systems, and other companies that offer products serving this sector.

Raw Materials and Purchased Product

Snap-on's supply of raw materials and purchased components are generally and readily available from numerous suppliers. Snap-on believes it has secured an ample supply of both bar and coil steel for the near future to ensure stable supply to meet material demands. The company does not currently anticipate experiencing any significant impact in 2015 from steel pricing or availability issues.

Patents, Trademarks and Other Intellectual Property

Snap-on vigorously pursues and relies on patent protection to protect its intellectual property and position in its markets. As of 2014 year end, Snap-on and its subsidiaries held approximately 700 active and pending patents in the United States and approximately 1,500 active and pending patents outside of the United States. Sales relating to any single patent did not represent a material portion of Snap-on's revenues in any of the last three years.

Examples of products that have features or designs that benefit from patent protection include wheel alignment systems, wheel balancers, tire changers, vehicle lifts, test lanes, brake lathes, sealed ratchets, electronic torque instruments, ratcheting screwdrivers, emissions-sensing devices and diagnostic equipment.

Much of the technology used in the manufacture of vehicle service tools and equipment is in the public domain. Snap-on relies primarily on trade secret protection to protect proprietary processes used in manufacturing. Methods and processes are patented when appropriate. Copyright protection is also utilized when appropriate.

Trademarks used by Snap-on are of continuing importance to Snap-on in the marketplace. Trademarks have been registered in the United States and more than 120 other countries, and additional applications for trademark registrations are pending. Snap-on vigorously polices proper use of its trademarks. Snap-on's right to manufacture and sell certain products is dependent upon licenses from others; however, these products under license do not represent a material portion of Snap-on's net sales.

Domain names have become a valuable corporate asset for companies around the world, including Snap-on. Domain names often contain a trademark or service mark or even a corporate name and are often considered intellectual property. The recognition and value of the Snap-on name, trademark and domain name are core strengths of the company.

Snap-on strategically licenses the Snap-on brand to carefully selected manufacturing and distribution companies for items such as apparel, work boots, lighting and a variety of other goods, in order to further build equity and market presence for the company's strongest brand.

Environmental

Snap-on is subject to various environmental laws, ordinances, regulations, and other requirements of government authorities in the United States and other nations. At Snap-on, these environmental liabilities are managed through the Snap-on Environmental, Health and Safety Management System ("EH & SMS"), which is applied worldwide. The system is based upon continual improvement and is certified to ISO 14001:2004 and OHSAS 18001:2007, verified through Det Norske Veritas (DNV) Certification, Inc.

Snap-on believes that it complies with applicable environmental control requirements in its operations. Expenditures on environmental matters through EH & SMS have not had, and Snap-on does not for the foreseeable future expect them to have, a material effect upon Snap-on's capital expenditures, earnings or competitive position.

Employees

Snap-on employed approximately 11,400 people at the end of January 2015; Snap-on employed approximately 11,300 people at the end of January 2014.

Approximately 2,600 employees, or 23% of Snap-on's worldwide workforce, are represented by unions and/or covered under collective bargaining agreements. The number of covered union employees whose contracts expire over the next five years approximates 1,250 employees in 2015; 400 employees in 2016; and 600 employees in 2017; there are no contracts currently scheduled to expire in 2018 or 2019. In recent years, Snap-on has not experienced any significant work slowdowns, stoppages or other labor disruptions.

There can be no assurance that these and other future contracts with Snap-on's unions will be renegotiated upon terms acceptable to Snap-on.

Working Capital

Most of Snap-on's businesses are not seasonal and their inventory needs are relatively constant. Snap-on did not have a significant backlog of orders at 2014 year end. In recent years, Snap-on has been using its working capital to fund, in part, the continued growth of the company's financial services portfolio.

Snap-on's liquidity and capital resources and use of working capital are discussed herein in "Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations."

As of 2014 year end, neither Snap-on nor any of its segments depend on any single customer, small group of customers or government for any material part of its revenues.

Item 1A: Risk Factors

In evaluating the company, careful consideration should be given to the following risk factors, in addition to the other information included in this Annual Report on Form 10-K, including the Consolidated Financial Statements and the related notes. Each of these risk factors could adversely affect the company's business, operating results, cash flows and/or financial condition, as well as adversely affect the value of an investment in the company's common stock.

Economic conditions and world events could affect our operating results.

We, our franchisees and our customers, may be adversely affected by changing economic conditions, including conditions that may particularly impact specific regions. These conditions may result in reduced consumer and investor confidence, instability in the credit and financial markets, volatile corporate profits, and reduced business and consumer spending. We, our franchisees and our customers, and the economy as a whole, also may be affected by future world or local events outside our control, such as acts of terrorism, developments in the war on terrorism, conflicts in international situations and natural disasters, as well as government-related developments or issues. These factors may affect our results of operations by reducing our sales, margins and/or net earnings as a result of a slowdown in customer orders or order cancellations, impact the availability of raw materials and/or the supply chain, and could potentially lead to future impairment of our intangible assets. In addition, political and social turmoil related to international conflicts and terrorist acts may put pressure on economic conditions abroad. Unstable political, social and economic conditions may make it difficult for our franchisees, customers, suppliers and us to accurately forecast and plan future business activities. If such conditions persist, our business, financial condition, results of operations and cash flows could be negatively affected.

Raw material and energy price fluctuations and shortages (including steel and various fuel sources) could adversely affect the ability to obtain needed manufacturing materials and could adversely affect our results of operations.

The principal raw material used in the manufacture of our products is steel, which we purchase in competitive, price-sensitive markets. To meet Snap-on's high quality standards, our steel needs range from specialized alloys, which are available only from a limited group of approved suppliers, to commodity types of alloys. These raw materials have historically exhibited price and demand cyclicity. Some of these materials have been, and in the future may be, in short supply, particularly in the event of mill shutdowns or production cut backs. As some steel alloys require specialized manufacturing procedures, we could experience inventory shortages if we were required to use an alternative manufacturer on short notice. Additionally, unexpected price increases for raw materials could result in higher prices to our customers or an erosion of the margins on our products.

We believe our ability to sell our products is also dependent on the number of vehicles on the road, the number of miles driven and the general aging of vehicles. These factors affect the frequency, type and amount of service and repair performed on vehicles by technicians, and therefore affect the demand for the number of technicians, the prosperity of technicians and, consequently, the demand technicians have for our tools, other products and services, and the value technicians place on those products and services. To the extent that the prices of gasoline and other petroleum-based fuels increase, as they have at times in recent years, consumers may turn to other methods of transportation, including more frequent use of public transportation, which could result in a decrease in the use of privately operated vehicles. A decrease in the use of privately operated vehicles may lead to fewer repairs and less demand for our products.

We use various energy sources to transport, produce and distribute products, and some of our products have components that are petroleum based. Petroleum and energy prices have periodically increased significantly over short periods of time; further volatility and changes may be caused by market fluctuations, supply and demand, currency fluctuation, production and transportation disruption, world events and changes in governmental programs. Energy price increases raise both our operating costs and the costs of our materials, and we may not be able to increase our prices enough to offset these costs. Higher prices also may reduce the level of future customer orders and our profitability.

The performance of Snap-on's mobile tool distribution business depends on the success of its franchisees.

Approximately 42% of our 2014 revenues were generated by the Snap-on Tools Group, which consists of Snap-on's business operations serving the worldwide mobile tool distribution channel. Except in limited circumstances, each of our mobile tool vans is operated by a franchisee pursuant to a franchise agreement. Snap-on's success is dependent on its relationships with franchisees, individually and collectively, as they are the primary sales and service link between the company and vehicle service and repair technicians, who are an important class of end users for Snap-on's products and services. If our franchisees are not successful, or if we do not maintain an effective relationship with our franchisees, the delivery of products, the collection of receivables and/or our relationship with end users could be adversely affected and thereby negatively impact our business, financial condition, results of operations and cash flows.

In addition, if we are unable to maintain effective relationships with franchisees, Snap-on or the franchisees may choose to terminate the relationship, which may result in (i) open routes, in which end-user customers are not provided reliable service; (ii) litigation resulting from termination; (iii) reduced collections or increased write-offs of franchisee receivables owed to Snap-on; and/or (iv) reduced collections or increased write-offs of extended credit contracts.

New and stricter legislation and regulations may affect our business, reputation, results of operations and financial condition.

Increased legislative and regulatory activity and burdens, and a more stringent manner in which they are applied, could significantly impact our business and the economy as a whole. For example, the Affordable Care Act (the “ACA”), which was adopted in 2010 and is being phased in over several years, significantly affects the provision of both health care services and benefits in the United States; the ACA may impact our cost of providing our employees and retirees with health insurance and/or benefits, and may also impact various other aspects of our business. The ACA did not have a material impact on our fiscal 2014, 2013 or 2012 financial results; however, we are continuing to assess the impact of the ACA on our health care benefit costs.

Financial services businesses of all kinds are subject to increasing regulation and enforcement. In addition to potentially increasing the costs of doing business due to compliance obligations, new laws and regulations, or changes to existing laws and regulations, as well as the enforcement thereof, may affect the relationships between creditors and debtors, inhibit the rights of creditors to collect amounts owed to them, expand liability for certain actions or inactions, or limit the types of financial products or services offered, any or all of which could have a material adverse effect on our financial condition, results of operations and cash flows. Failure to comply with any of these laws or regulations could also result in penalties and damage to our reputation, and/or the incurrence of remediation costs.

These developments, and other potential future legislation and regulations, as well as the increasingly strict regulatory environment, may also adversely affect the customers to which, and the markets into which, we sell our products, and increase our costs and otherwise negatively affect our business, reputation, results of operations and financial condition, including in ways that cannot yet be foreseen.

Exposure to credit risks of customers and resellers may make it difficult to collect receivables and could adversely affect operating results and financial condition.

A decline in industry and/or economic conditions could have the potential to weaken the financial position of some of our customers. If circumstances surrounding our customers’ ability to repay their credit obligations were to deteriorate and result in the write-down or write-off of such receivables, it would negatively affect our operating results for the period in which they occur and, if large, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our inability to provide acceptable financing alternatives to end-user customers and franchisees could adversely impact our operating results.

An integral component of our business and profitability is our ability to offer competitive financing alternatives to end-user customers and franchisees. The lack of our ability to obtain capital resources or other financing to support our receivables on terms that we believe are attractive, whether resulting from the state of the financial markets, our own operating performance, or other factors, would negatively affect our operating results and financial condition. Adverse fluctuations in interest rates and/or our ability to provide competitive financing programs could also have an adverse impact on our revenue and profitability.

Failure to achieve expected investment returns on pension plan assets, as well as changes in interest rates or plan demographics, could adversely impact our results of operations, financial condition and cash flows.

Snap-on sponsors various defined benefit pension plans (the “pension plans”). The assets of the pension plans are broadly diversified in an attempt to mitigate the risk of a large loss. The assets are invested in equity securities, debt securities, hedge funds, real estate and other real assets, insurance contracts, and cash and cash equivalents. Required funding for the company’s domestic defined benefit pension plans is determined in accordance with guidelines set forth in the federal Employee Retirement Income Security Act (“ERISA”); foreign defined benefit pension plans are funded in accordance with local statutes or practice. Additional contributions to enhance the funded status of the pension plans can be made at the company’s discretion. However, there can be no assurance that the value of the pension plan assets, or the investment returns on those plan assets, will be sufficient to meet the future benefit obligations of such plans. In addition, during periods of adverse investment market conditions and declining interest rates, the company may be required to make additional cash contributions to the pension plans that could reduce our financial flexibility. Changes in plan demographics, including an increase in the number of retirements or changes in life expectancy assumptions, may also increase the costs and funding requirements of the obligations related to the company’s pension plans.

Our pension plan obligations are affected by changes in market interest rates. Significant fluctuations in market interest rates have added, and may further add, volatility to our pension plan obligations. In periods of declining market interest rates, our pension plan obligations generally increase; in periods of increasing market interest rates, our pension plan obligations generally decrease. While our plan assets are broadly diversified, there are inherent market risks associated with investments; if adverse market conditions occur, our plan assets could incur significant or material losses. Since we may need to make additional contributions to address changes in obligations and/or a loss in plan assets, the combination of declining market interest rates, past or future plan asset investment losses, and/or changes in plan demographics could adversely impact our results of operations, financial condition and cash flows.

The company's pension plan expense is comprised of the following factors: (i) service cost; (ii) interest on projected benefit obligations; (iii) the expected return on plan assets; (iv) the amortization of prior service costs and credits; (v) the effects of actuarial gains and losses; and (vi) settlement/curtailment costs, when applicable. The accounting for pensions involves the estimation of a number of factors that are highly uncertain. Certain factors, such as the interest on projected benefit obligations and the expected return on pension plan assets, are impacted by changes in market interest rates and the value of plan assets. A significant decrease in market interest rates and a decrease in the fair value of pension plan assets would increase net pension expense and may adversely affect the company's future results of operations. See Note 11 to the Consolidated Financial Statements for further information on the company's pension plans.

Adverse developments in the credit and financial markets could negatively impact the availability of credit that we and our customers need to operate our businesses.

We depend upon the availability of credit to operate our business, including the financing of receivables from end-user customers that are originated by our financial services businesses. Our end-user customers, franchisees and suppliers also require access to credit for their businesses. At times in recent years, world financial markets have been unstable and subject to uncertainty. Adverse developments in the credit and financial markets, or unfavorable changes in Snap-on's credit rating, could negatively impact the availability of future financing and the terms on which it might be available to Snap-on, its end-user customers, franchisees and suppliers. Inability to access credit or capital markets, or a deterioration in the terms on which financing might be available, could have an adverse impact on our business, financial condition, results of operations and cash flows.

Increasing our financial leverage could affect our operations and profitability.

The maximum available credit under our multi-currency revolving credit facility is \$700 million. The company's leverage ratio may affect both our availability of additional capital resources as well as our operations in several ways, including:

- The terms on which credit may be available to us could be less attractive, both in the economic terms of the credit and the covenants stipulated by the credit terms;
- The possible lack of availability of additional credit;
- The potential for higher levels of interest expense to service or maintain our outstanding debt;
- The possibility of additional borrowings in the future to repay our indebtedness when it comes due; and
- The possible diversion of capital resources from other uses.

While we believe we will have the ability to service our debt and obtain additional resources in the future if and when needed, that will depend upon our results of operations and financial position at the time, the then-current state of the credit and financial markets, and other factors that may be beyond our control. Therefore, we cannot give assurances that credit will be available on terms that we consider attractive, or at all, if and when necessary or beneficial to us.

Data security and information technology infrastructure and security are critical to supporting business objectives; failure of our systems to operate effectively could adversely affect our business and reputation.

We depend heavily on information technology infrastructure to achieve our business objectives and to protect sensitive information, and continually invest in improving such systems. Problems that impair or compromise this infrastructure, including due to natural disasters, security breaches or malicious attacks, or during system upgrades and/or new system implementations, could impede our ability to record or process orders, manufacture and ship in a timely manner, account for and collect receivables, protect sensitive data of the company, our customers, our suppliers and business partners, or otherwise carry on business in the normal course. Any such events, if significant, could cause us to lose customers and/or revenue and could require us to incur significant expense to remediate, including as a result of legal or regulatory claims or proceedings, and could also damage our reputation.

In association with initiatives to better integrate business units, rationalize operating footprint and improve responsiveness to franchisees and customers, Snap-on is continually replacing and enhancing its global Enterprise Resource Planning (ERP) management information systems. As we integrate, implement and deploy new information technology processes and a common information infrastructure across our global operations, we could experience disruptions in our business that could have an adverse effect on our business, financial condition, results of operations and cash flows.

Failure to maintain effective distribution of products and services could adversely impact revenue, gross margin and profitability.

We use a variety of distribution methods to sell our products and services. Successfully managing the interaction of our distribution efforts to reach various potential customer segments for our products and services is a complex process. Moreover, since each distribution method has distinct risks, costs and gross margins, our failure to implement the most advantageous balance in the delivery model for our products and services could adversely affect our revenue and gross margins and therefore our profitability.

Risks associated with the disruption of manufacturing operations could adversely affect profitability or competitive position.

We manufacture a significant portion of the products we sell. Any prolonged disruption in the operations of our existing manufacturing facilities, whether due to technical or labor difficulties, facility consolidation or closure actions, lack of raw material or component availability, destruction of or damage to any facility (as a result of natural disasters, use and storage of hazardous materials or other events), or other reasons, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

The inability to continue to introduce new products that respond to customer needs and achieve market acceptance could result in lower revenues and reduced profitability.

Sales from new products represent a significant portion of our net sales and are expected to continue to represent a significant component of our future net sales. We may not be able to compete effectively unless we continue to enhance existing products or introduce new products to the marketplace in a timely manner. Product improvements and new product introductions require significant financial and other resources, including significant planning, design, development, and testing at the technological, product and manufacturing process levels. Our competitors' new products may beat our products to market, be more effective with more features, be less expensive than our products, and/or render our products obsolete. Any new products that we develop may not receive market acceptance or otherwise generate any meaningful net sales or profits for us relative to our expectations based on, among other things, existing and anticipated investments in manufacturing capacity and commitments to fund advertising, marketing, promotional programs and research and development.

The global tool, equipment, and diagnostics and repair information industries are competitive.

We face strong competition in all of our market segments. Price competition in our various industries is intense and pricing pressures from competitors and customers are increasing. In general, as a manufacturer and marketer of premium products and services, the expectations of Snap-on's customers and its franchisees are high and continue to increase. Any inability to maintain customer satisfaction could diminish Snap-on's premium image and reputation and could result in a lessening of our ability to command premium pricing. We expect that the level of competition will remain high in the future, which could limit our ability to maintain or increase market share or profitability.

Product liability claims and litigation could affect our business, reputation, financial condition, results of operations and cash flows.

The products that we design and/or manufacture, and/or the services we provide, can lead to product liability claims or other legal claims being filed against us. To the extent that plaintiffs are successful in showing either that defects in the design or manufacture of our products led to personal injury or property damage, or that our provision of services resulted in similar injury or damage, we may be subject to claims for damages. Although we are insured for damages above a certain amount, we bear the costs and expenses associated with defending claims, including frivolous lawsuits, and are responsible for damages below the insurance retention amount. As a manufacturer, we can be subject to the costs and potential negative publicity of product recalls, which could impact our results.

The recognition of impairment charges on goodwill or other intangible assets would adversely impact our future financial condition and results of operations.

We have a substantial amount of goodwill and purchased intangible assets, almost all of which are booked in the Commercial & Industrial Group and in the Repair Systems & Information Group. We are required to perform impairment tests on our goodwill and other intangibles annually or at any time when events occur that could impact the value of our business segments. Our determination of whether impairment has occurred is based on a comparison of each of our reporting units' fair market value with its carrying value. Significant and unanticipated changes in circumstances, such as significant and long-term adverse changes in business climate, adverse actions by regulators, unanticipated competition, the loss of key customers, and/or changes in technology or markets, could require a provision for impairment in a future period that could substantially impact our reported earnings and reduce our consolidated net worth and shareholders' equity. Should the economic environment in these markets deteriorate, our results of operations and financial position could be materially impacted, including as a result of the effects of potential impairment write-downs of goodwill and/or other intangible assets related to these businesses.

Failure to adequately protect intellectual property could adversely affect our business.

Intellectual property rights are an important and integral component of our business. We attempt to protect our intellectual property rights through a combination of patent, trademark, copyright and trade secret laws, as well as licensing agreements and third-party nondisclosure and assignment agreements. Adverse determinations in a judicial or administrative proceeding could prevent us from manufacturing and selling our products or prevent us from stopping others from manufacturing and selling competing products. Failure to obtain or maintain adequate protection of our intellectual property rights for any reason could have a material adverse effect on our business.

Foreign operations are subject to political, economic, currency exchange and other risks that could adversely affect our business, financial condition, results of operations and cash flows.

Approximately 34% of our revenues in 2014 were generated outside of the United States. Future growth rates and success of our business depends in large part on continued growth in our non-U.S. operations, including growth in emerging markets and critical industries. Numerous risks and uncertainties affect our non-U.S. operations. These risks and uncertainties include political, economic and social instability, such as acts of war, civil disturbance or acts of terrorism, local labor conditions, changes in government policies and regulations, including imposition or increases in withholding and other taxes on remittances and other payments by international subsidiaries, as well as the exposure to liabilities under anti-corruption laws in various countries, such as the U.S. Foreign Corrupt Practices Act, currency instability, transportation delays or interruptions, sovereign debt uncertainties and difficulties in enforcement of contract and intellectual property rights, as well as natural disasters. Should the economic environment in our non-U.S. markets deteriorate from current levels, our results of operations and financial position could be materially impacted, including as a result of the effects of potential impairment write-downs of goodwill and/or other intangible assets related to these businesses.

The reporting currency for Snap-on's consolidated financial statements is the U.S. dollar. Certain of the company's assets, liabilities, expenses and revenues are denominated in currencies other than the U.S. dollar. In preparing Snap-on's Consolidated Financial Statements, those assets, liabilities, expenses and revenues are translated into U.S. dollars at applicable exchange rates. Increases or decreases in exchange rates between the U.S. dollar and other currencies affect the U.S. dollar value of those items, as reflected in the Consolidated Financial Statements. Substantial fluctuations in the value of the U.S. dollar could have a significant impact on the company's financial condition and results of operations.

We are also affected by changes in inflation rates and interest rates. Additionally, cash generated in non-U.S. jurisdictions may be difficult to repatriate to the United States in a tax-efficient manner. Our foreign operations are also subject to other risks and challenges, such as the need to staff and manage diverse workforces, respond to the needs of multiple national and international marketplaces, and differing business climates and cultures in various countries.

Our operations expose us to the risk of environmental liabilities, costs, litigation and violations that could adversely affect our financial condition, results of operations and reputation.

Certain of our operations are subject to environmental laws and regulations in the jurisdictions in which they operate, which impose limitations on the discharge of pollutants into the ground, air and water and establish standards for the generation, treatment, use, storage and disposal of hazardous wastes. We must also comply with various health and safety regulations in the United States and abroad in connection with our operations. Failure to comply with any of these laws could result in civil and criminal, monetary and non-monetary penalties and damage to our reputation. In addition, we may incur costs related to remedial efforts or alleged environmental damage associated with past or current waste disposal practices. Legislation has been proposed, and governmental regulatory action has been both proposed and taken, that may significantly impact environmental compliance in the United States; these actions could increase our costs of production by raising the cost of energy as well as by further restricting emissions or other processes that we currently use in our operations. We cannot provide assurance that our costs of complying with current or future environmental protection and health and safety laws will not exceed our estimates.

Legal disputes could adversely affect our business, reputation, financial condition, results of operations and cash flows.

From time to time we are subject to legal disputes that are being litigated and/or settled in the ordinary course of business. Disputes or future lawsuits could result in the diversion of management's time and attention away from business operations. Additionally, negative developments with respect to legal disputes and the costs incurred in defending ourselves could have an adverse impact on the company and its reputation. Adverse outcomes or settlements could also require us to pay damages, potentially in excess of amounts reserved, or incur liability for other remedies that could have a material adverse effect on our business, reputation, financial condition, results of operations and cash flows.

The inability to successfully defend claims from taxing authorities could adversely affect our financial condition, results of operations and cash flows.

We conduct business in many countries, which requires us to interpret the income tax laws and rulings in each of those taxing jurisdictions. Due to the subjectivity of tax laws between those jurisdictions, as well as the subjectivity of factual interpretations, our estimates of income tax liabilities may differ from actual payments or assessments. Claims from taxing authorities related to these differences could have an adverse impact on our financial condition, results of operations and cash flows.

Compliance with regulations related to conflict minerals could increase costs and affect the manufacturing and sale of our products.

Public companies are required to disclose the use of tin, tantalum, tungsten and gold (collectively, "conflict minerals") mined from the Democratic Republic of the Congo and adjoining countries (the "covered countries") if a conflict mineral(s) is necessary to the functionality of a product manufactured, or contracted to be manufactured, by the company.

We may determine, as part of our compliance efforts, that certain products or components we obtain from our suppliers contain conflict minerals. If we are unable to conclude that all our products are free from conflict minerals originating from covered countries, this could have a negative impact on our business, reputation and/or results of operations. We may also encounter challenges to satisfy customers who require that our products be certified as conflict free, which could place us at a competitive disadvantage if we are unable to substantiate such a claim. Compliance with these rules could also affect the sourcing and availability of some of the minerals used in the manufacture of products or components we obtain from our suppliers, including our ability to obtain products or components in sufficient quantities and/or at competitive prices.

The accounting for certain stock-based compensation awards and stock-based deferred compensation liabilities could adversely affect our results of operations.

Certain stock-based compensation awards granted by the company are subject to mark-to-market accounting treatment, which requires us to recognize changes in the fair value of these awards each period based on the company's period-end stock price. Volatility in the company's stock price, including as a result of macro-economic conditions and other factors beyond our control, could increase or decrease this expense in future periods. While we have entered into prepaid equity forward agreements to manage a portion of the market risk associated with stock-based deferred compensation liabilities, depending on changes in the company's period-end stock price, the application of mark-to-market accounting on certain of our other stock-based compensation awards and stock-based deferred compensation liabilities could have an adverse effect, or favorable benefit, on our financial condition and results of operations in certain periods.

Failure to attract and retain qualified personnel could lead to a loss of revenue and/or profitability.

Snap-on's success depends, in part, on the efforts and abilities of its senior management team and other key employees. Their skills, experience and industry contacts significantly benefit our operations and administration. The failure to attract and retain members of our senior management team and other key employees could have a negative effect on our operating results. In addition, transitions of important responsibilities to new individuals inherently include the possibility of disruptions to our business and operations, which could negatively affect our business, financial condition, results of operations and cash flows.

The steps taken to restructure operations, rationalize operating footprint, lower operating expenses and achieve greater efficiencies in the supply chain could disrupt business.

We have taken steps in the past, and expect to take additional steps in the future, intended to improve customer service and drive further efficiencies and reduce costs, some of which could be disruptive to our business. These actions, collectively across our operating groups, are focused on the following:

- Continuing to invest in initiatives focused on building a strong sales and operating presence in emerging growth markets;
- Continuing to enhance service and value to our franchisees and customers;
- Continuing to implement efficiency and productivity initiatives throughout the company to drive further efficiencies and reduce costs;
- Continuing on the company's existing path to improve and transform global manufacturing and the supply chain into a market-demand-based replenishment system with lower costs;
- Continuing to invest in developing and marketing new, innovative, higher-value-added products and advanced technologies;
- Extending our products and services into additional and/or adjacent markets or to new customers; and
- Continuing to provide financing for, and grow our portfolio of, receivables within our financial services businesses.

A failure to succeed in the implementation of any or all of these actions could result in an inability to achieve our financial goals and could be disruptive to the business.

In addition, any future reductions to headcount and other cost reduction measures may result in the loss of technical expertise and could adversely affect our research and development efforts as well as our ability to meet product development schedules. Efforts to reduce components of expense could result in the recording of charges for inventory and technology-related write-offs, workforce reduction costs or other charges relating to the consolidation or closure of facilities. If we were to incur a substantial charge to further these efforts, our earnings per share would be adversely affected in such period. If we are unable to effectively manage our cost reduction and restructuring efforts, our business, financial condition, results of operations and cash flows could be negatively affected.

We may not successfully integrate businesses we acquire, which could have an adverse impact on our business, financial condition, results of operations and cash flows.

The pursuit of growth through acquisitions, including participation in joint ventures, involves significant risks that could have a material adverse effect on our business, financial condition, results of operations and cash flows. These risks include:

- Loss of the acquired businesses' customers;
- Inability to integrate successfully the acquired businesses' operations;
- Inability to coordinate management and integrate and retain employees of the acquired businesses;
- Difficulties in implementing and maintaining consistent standards, controls, procedures, policies and information systems;
- Failure to realize anticipated synergies, economies of scale or other anticipated benefits, or to maintain operating margins;
- Strain on our personnel, systems and resources, and diversion of attention from other priorities;
- Incurrence of additional debt and related interest expense;
- The dilutive effect of the issuance of additional equity securities;
- Unforeseen or contingent liabilities of the acquired businesses; and
- Large write-offs or write-downs, or the impairment of goodwill or other intangible assets.

Item 1B: Unresolved Staff Comments

None.

Item 2: Properties

Snap-on maintains leased and owned manufacturing (including software products), warehouse, distribution, research and development and office facilities throughout the world. Snap-on believes that its facilities currently in use are suitable and have adequate capacity to meet its present and foreseeable future demand. Snap-on's facilities in the United States occupy approximately 3.3 million square feet, of which 75% is owned, including its corporate and general office facility located in Kenosha, Wisconsin. Snap-on's facilities outside the United States occupy approximately 3.8 million square feet, of which approximately 74% is owned. Certain Snap-on facilities are leased through operating and capital lease agreements. See Note 15 to the Consolidated Financial Statements for information on the company's operating and capital leases. Snap-on management continually monitors the company's capacity needs and makes adjustments as dictated by market and other conditions.

The following table provides information about our corporate headquarters and financial services operations, and each of Snap-on's principal active manufacturing locations and distribution centers (exceeding 50,000 square feet) as of 2014 year end:

Location	Principal Property Use	Owned/Leased	Segment*

Item 3: Legal Proceedings

Snap-on is involved in various legal matters that are being litigated and/or settled in the ordinary course of business. Although it is not possible to predict the outcome of these legal matters, management believes that the results of these legal matters will not have a material impact on Snap-on's consolidated financial position, results of operations or cash flows.

Item 4: Mine Safety Disclosures

Not applicable.

PART II**Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Snap-on had 58,113,447 shares of common stock outstanding as of 2014 year end. Snap-on's stock is listed on the New York Stock Exchange under the ticker symbol "SNA." At February 6, 2015, there were 5,440 registered holders of Snap-on common stock.

The high and low closing prices of Snap-on's common stock during each quarter for the last two years were as follows:

Quarter	Common Stock High/Low Prices			
	2014		2013	
	High	Low	High	Low
First	\$ 114.18	\$ 97.23	\$ 82.70	\$ 77.06
Second	119.46	109.36	92.92	80.88
Third	127.01	117.84	100.98	90.50
Fourth	139.35	113.28	108.88	95.63

Snap-on has paid consecutive quarterly cash dividends, without interruption or reduction, since 1939. Quarterly dividends in 2014 were \$0.53 per share in the fourth quarter and \$0.44 per share in each of the first three quarters (\$1.85 per share for the year). Quarterly dividends in 2013 were \$0.44 per share in the fourth quarter and \$0.38 per share in each of the first three quarters (\$1.58 per share for the year). Quarterly dividends in 2012 were \$0.38 per share in the fourth quarter and \$0.34 per share in each of the first three quarters (\$1.40 per share for the year). Cash dividends paid in 2014, 2013 and 2012 totaled \$107.6 million, \$92.0 million and \$81.5 million, respectively. Snap-on's Board of Directors (the "Board") monitors and evaluates the company's dividend practice quarterly and the Board may elect to increase, decrease or not pay a dividend on Snap-on common stock based upon the company's financial condition, results of operations, cash requirements and future prospects of Snap-on and other factors deemed relevant by the Board.

See Note 13 to the Consolidated Financial Statements for information on securities authorized for issuance under equity compensation plans.

Issuer Purchases of Equity Securities

The following chart discloses information regarding the shares of Snap-on's common stock repurchased by the company during the fourth quarter of fiscal 2014, all of which were purchased pursuant to the Board's authorizations that the company has publicly announced. Snap-on has undertaken stock repurchases from time to time to offset dilution created by shares issued for employee and franchisee stock purchase plans, stock options and other corporate purposes, as well as to repurchase shares when the company believes market conditions are favorable. The repurchase of Snap-on common stock is at the company's discretion, subject to prevailing financial and market conditions.

Period	Shares purchased	Average price per share	Shares purchased as part of publicly announced plans or programs	Approximate value of shares that may yet be purchased under publicly announced plans or programs*
09/28/14 to 10/25/14	13,385	\$ 126.24	13,385	\$ 203.8 million
10/26/14 to 11/22/14	69,615	\$ 133.97	69,615	\$ 201.8 million
11/23/14 to 01/03/15	6,000	\$ 134.70	6,000	\$ 210.9 million
Total/Average	89,000	\$ 132.86	89,000	N/A

N/A: Not applicable

* Subject to further adjustment pursuant to the 1996 Authorization described below, as of January 3, 2015, the approximate value of shares that may yet be purchased pursuant to the three outstanding Board authorizations discussed below is \$210.9 million.

- In 1996, the Board authorized the company to repurchase shares of the company's common stock from time to time in the open market or in privately negotiated transactions ("the 1996 Authorization"). The 1996 Authorization allows the repurchase of up to the number of shares issued or delivered from treasury from time to time under the various plans the company has in place that call for the issuance of the company's common stock. Because the number of shares that are purchased pursuant to the 1996 Authorization will change from time to time as (i) the company issues shares under its various plans; and (ii) shares are repurchased pursuant to this authorization, the number of shares authorized to be repurchased will vary from time to time. The 1996 Authorization will expire when terminated by the Board. When calculating the approximate value of shares that the company may yet purchase under the 1996 Authorization, the company assumed a price of \$128.24, \$135.72 and \$136.29 per share of common stock as of the end of the fiscal 2014 months ended October 25, 2014, November 22, 2014, and January 3, 2015, respectively.
- In 1998, the Board authorized the repurchase of an aggregate of \$100 million of the company's common stock ("the 1998 Authorization"). The 1998 Authorization will expire when the aggregate repurchase price limit is met, unless terminated earlier by the Board.
- In 1999, the Board authorized the repurchase of an aggregate of \$50 million of the company's common stock ("the 1999 Authorization"). The 1999 Authorization will expire when the aggregate repurchase price limit is met, unless terminated earlier by the Board.

Other Purchases or Sales of Equity Securities

The following chart discloses information regarding shares of Snap-on's common stock that were sold by Citibank, N.A. ("Citibank") during the fourth quarter of 2014 pursuant to a prepaid equity forward agreement (the "Agreement") with Citibank that is intended to reduce the impact of market risk associated with the stock-based portion of the company's deferred compensation plans. The company's stock-based deferred compensation liabilities, which are impacted by changes in the company's stock price, increase as the company's stock price rises and decrease as the company's stock price declines. Pursuant to the Agreement, Citibank may purchase or sell shares of the company's common stock (for Citibank's account) in the market or in privately negotiated transactions. The Agreement has no stated expiration date and does not provide for Snap-on to purchase or repurchase its shares.

Citibank Sales of Snap-on Stock

<u>Period</u>	<u>Shares sold</u>	<u>Average price per share</u>
09/28/14 to 10/25/14	2,000	\$ 126.87
10/26/14 to 11/22/14	4,000	\$ 130.29
11/23/14 to 01/03/15	—	—
Total/Average	<u>6,000</u>	\$ 129.15

Five-year Stock Performance Graph

The graph below illustrates the cumulative total shareholder return on Snap-on common stock since December 31, 2009, assuming that dividends were reinvested. The graph compares Snap-on's performance to that of the Standard & Poor's 500 Stock Index ("S&P 500") and a Peer Group.

Snap-on Incorporated Total Shareholder Return ⁽¹⁾

Fiscal Year Ended ⁽²⁾	Snap-on Incorporated	Peer Group ⁽³⁾	S&P 500
December 31, 2009	\$ 100.00	\$ 100.00	\$ 100.00
December 31, 2010	137.56	133.17	115.06
December 31, 2011	126.03	130.40	117.49
December 31, 2012	200.91	153.34	136.30
December 31, 2013	283.41	208.84	180.44
December 31, 2014	359.27	218.47	205.14

(1) Assumes \$100 was invested on December 31, 2009, and that dividends were reinvested quarterly.

(2) The company's fiscal year ends on the Saturday that is on or nearest to December 31 of each year; for ease of calculation, the fiscal year end is assumed to be December 31.

(3) The Peer Group consists of: Stanley Black & Decker, Inc., Danaher Corporation, Emerson Electric Co., Genuine Parts Company, Newell Rubbermaid Inc., Pentair plc, SPX Corporation and W.W. Grainger, Inc.

Item 6: Selected Financial Data

The selected financial data presented below has been derived from, and should be read in conjunction with, the respective historical consolidated financial statements of the company, including the notes thereto, and “Part II, Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Five-year Data

(Amounts in millions, except per share data)

	2014	2013	2012	2011	2010
Results of Operations					
Net sales	\$ 3,277.7	\$ 3,056.5	\$ 2,937.9	\$ 2,854.2	\$ 2,619.2
Gross profit	1,584.3	1,472.9	1,390.0	1,337.9	1,211.1
Operating expenses	1,048.7	1,012.4	980.3	953.7	894.1
Operating earnings before financial services	535.6	460.5	409.7	384.2	317.0

- In 2011, Snap-on settled a dispute with its former financial services joint venture partner and recorded an \$18.0 million pretax arbitration settlement gain (\$11.1 million after tax or \$0.19 per diluted share).

Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations

Management Overview

We believe our broad-based organic sales growth in 2014 affirms Snap-on's unique capabilities in providing repeatability and reliability to a wide range of professional customers performing critical tasks in workplaces of consequence. Leveraging capabilities already demonstrated in the automotive repair arena, our "coherent growth" strategy focuses on developing and expanding our professional customer base, not only in automotive repair, but in adjacent markets, additional geographies and other areas, including in critical industries, where the cost and penalties for failure can be high.

We believe our 2014 operating results also provide continued evidence that Snap-on's value proposition of making work easier for serious professionals in workplaces of consequence is an ongoing strength as we move forward along our runways for coherent growth: enhancing the franchise network, expanding in the vehicle repair garage, extending to critical industries and building in emerging markets. We also believe our year-over-year improvement in operating margin further evidences the potential of our Snap-on Value Creation Processes – our suite of strategic principles and processes we employ every day designed to create value and employed in the areas of safety, quality, customer connection, innovation and rapid continuous improvement.

In 2014, we continued to invest in our most important strategic growth initiatives aimed at enhancing the franchisee network, expanding in the vehicle repair garage, extending in critical industries and building in emerging markets. Recent examples of our continued investment and expansion initiatives include the May 2014 acquisition of Pro-Cut International, Inc. ("Pro-Cut") and the May 2013 acquisition of Challenger Lifts, Inc. ("Challenger"), which are further discussed in "Results of Operations" below. The acquisitions of both the Pro-Cut and Challenger product lines complemented and increased our existing undercar equipment product offering, broadened our established capabilities in serving vehicle repair facilities and expanded our presence with repair shop owners and managers.

Our global financial services operations continue to serve a significant strategic role in providing financing options for our franchisees, for their customers, and for customers in other parts of our business. We expect that our global financial services business, which includes both Snap-on Credit LLC ("SOC") in the United States and our other international finance subsidiaries, will continue to be a meaningful contributor to our operating earnings.

Consolidated net sales of \$3,277.7 million in 2014 increased \$221.2 million, or 7.2%, from 2013 levels, including \$37.0 million of acquisition-related sales and an unfavorable \$25.3 million impact from foreign currency translation. Organic sales (excluding acquisition-related sales and foreign currency translation impacts) increased \$209.5 million or 6.9%. Operating earnings before financial services of \$535.6 million in 2014 were up \$75.1 million, or 16.3%, from 2013 levels, reflecting contributions from higher sales and improved operating margins, including contributions from ongoing efficiency and productivity initiatives, as well as benefits from restructuring actions (collectively, "Rapid Continuous Improvement" or "RCI initiatives"). Operating earnings of \$684.7 million in 2014 increased \$98.5 million, or 16.8%, from operating earnings of \$586.2 million last year. In 2014, net earnings attributable to Snap-on Incorporated were \$421.9 million or \$7.14 per diluted share. Net earnings attributable to Snap-on Incorporated in 2013 were \$350.3 million or \$5.93 per diluted share.

In the **Commercial & Industrial Group**, segment net sales of \$1,174.8 million in 2014 increased \$83.8 million, or 7.7%, from 2013 levels. Excluding \$18.2 million of unfavorable foreign currency translation, organic sales in 2014 increased \$102.0 million, or 9.5%, primarily due to higher sales to customers in critical industries and in the segment's European-based hand tools business. Operating earnings of \$158.6 million in 2014 increased \$21.3 million, or 15.5%, from 2013 levels primarily as a result of the higher sales and the savings from RCI initiatives.

The Commercial & Industrial Group intends to continue building on the following strategic priorities in 2015:

- Investing in emerging market growth initiatives, including in China, India, Eastern Europe, the Middle East and Latin America;
- Expanding our business with existing customers and reach new customers in critical industries and other market segments;
- Broadening our product offering and engineered solutions designed particularly for critical industry segments;
- Increasing our customer-connection-driven understanding of work across multiple industries;
- Investing in innovation that, guided by that understanding of work, delivers an ongoing stream of productivity-enhancing solutions; and
- Continuing to reduce structural and operating costs through RCI and restructuring initiatives.

In the **Snap-on Tools Group**, segment net sales of \$1,455.2 million in 2014 increased \$96.8 million, or 7.1%, from 2013 levels; excluding \$6.3 million of unfavorable foreign currency translation, organic sales in 2014 increased \$103.1 million, or 7.6%, reflecting higher sales in both the company's U.S. and international franchise operations. Operating earnings of \$223.1 million in 2014 increased \$28.5 million, or 14.6%, from 2013 levels, primarily as a result of the higher sales and savings from RCI initiatives.

The Snap-on Tools Group made continued progress in 2014 on its fundamental, strategic initiatives to strengthen the group and enhance franchisee profitability. In 2015, the Snap-on Tools Group intends to further build on the progress made in 2014, with specific initiatives focused on the following:

- Continuing to improve franchisee productivity, profitability, satisfaction and commercial health;
- Developing new programs and products to expand market coverage, reaching new technicians and increasing penetration with existing customers;
- Continuing to invest in new product innovation and development; and
- Increasing operational flexibility in back office support functions, manufacturing and the supply chain through RCI initiatives and investment.

By focusing on these areas, we believe that Snap-on, as well as our franchisees, will have the opportunity to continue to serve customers more effectively, more profitably and with improved satisfaction.

In the **Repair Systems & Information Group**, segment net sales of \$1,095.2 million in 2014 increased \$85.6 million, or 8.5%, from 2013 levels. Excluding \$37.0 million of acquisition-related sales and \$0.5 million of unfavorable foreign currency translation, organic sales increased \$49.1 million or 4.9%. The organic sales increase primarily reflects higher sales to original equipment manufacturer ("OEM") dealership service and repair shops ("OEM dealerships"), as well as increased sales to independent repair shop owners and managers, including higher sales of diagnostic and repair information products and increased sales of undercar equipment. Operating earnings of \$251.2 million in 2014 increased \$19.3 million, or 8.3%, from 2013 levels, primarily due to higher sales, including acquisition-related sales, and savings from RCI initiatives.

The Repair Systems & Information Group intends to focus on the following strategic priorities in 2015:

- Expanding the product offering with new products and services, thereby providing more to sell to repair shop owners and managers;
- Continuing software and hardware upgrades;
- Leveraging integration of software solutions;
- Continuing productivity advancements through RCI initiatives and leveraging of resources; and
- Increasing penetration in geographic markets, including emerging markets.

Financial Services revenue was \$214.9 million in 2014 and \$181.0 million in 2013; originations of \$888.6 million in 2014 increased \$110.9 million, or 14.3%, from 2013 levels. In recent years, Snap-on has steadily grown its financial services portfolio by providing financing for new finance and contract receivables originated by both SOC and the company's international finance subsidiaries. In 2014, operating earnings from financial services of \$149.1 million increased \$23.4 million, or 18.6%, from \$125.7 million last year.

Financial Services intends to focus on the following strategic priorities in 2015:

- Delivering financial products and services that attract and sustain profitable franchisees and support Snap-on's strategies for expanding market coverage and penetration;
- Improving productivity levels and ensuring high quality in all financial products and processes through the use of RCI initiatives; and
- Maintaining healthy portfolio performance levels.

Cash Flows

Net cash provided by operating activities of \$397.9 million in 2014 compared to \$392.6 million in 2013. The \$5.3 million increase in net cash provided by operating activities primarily reflects higher 2014 net earnings, partially offset by net changes in operating assets and liabilities, which included \$9.5 million of higher cash contributions to the company's pension plans. Snap-on made cash contributions to its pension plans totaling \$44.8 million, \$35.3 million and \$87.5 million in 2014, 2013 and 2012, respectively. Net cash provided by operating activities in 2012 was \$329.3 million.

Net cash used by investing activities of \$273.2 million in 2014 included additions to, and collections of, finance receivables of \$746.2 million and \$591.4 million, respectively, as well as a \$41.3 million use of cash for the May 2014 acquisition of Pro-Cut. Net cash used by investing activities of \$250.4 million in 2013 included additions to, and collections of, finance receivables of \$651.3 million and \$508.8 million, respectively, as well as a \$38.2 million use of cash for the May 2013 acquisition of Challenger. Net cash used by investing activities of \$173.1 million in 2012 included additions to, and collections of, finance receivables of \$569.6 million and \$445.5 million, respectively, as well as \$27.0 million of proceeds from the sale of a non-strategic equity investment at book value (i.e., no gain or loss on sale). Capital expenditures in 2014 of \$80.6 million reflect continued spending to support the company's execution of its strategic growth initiatives and Value Creation Processes, including continued investments focused on safety, quality, customer connection, innovation and RCI.

Net cash used by financing activities of \$206.9 million in 2014 included the March 2014 repayment of \$100.0 million of unsecured notes at maturity. Net cash used by financing activities in 2014 also included \$107.6 million for dividend payments to shareholders and \$79.3 million for the repurchase of 680,000 shares of Snap-on's common stock, partially offset by \$45.0 million of proceeds from a net increase in short-term borrowings and \$33.0 million of proceeds from stock purchase and option plan exercises. Net cash used by financing activities of \$137.8 million in 2013 included \$92.0 million for dividend payments to shareholders and \$82.6 million for the repurchase of 926,000 shares of Snap-on's common stock, partially offset by \$29.2 million of proceeds from stock purchase and option plan exercises. Net cash used by financing activities of \$127.0 million in 2012 included \$81.5 million for dividend payments to shareholders and \$78.1 million for the repurchase of 1,180,000 shares of Snap-on's common stock, partially offset by \$46.8 million of proceeds from stock purchase and option plan exercises.

Fiscal Year

Snap-on's fiscal year ends on the Saturday that is on or nearest to December 31. Unless otherwise indicated, references in this Management's Discussion and Analysis of Financial Condition and Results of Operations to "fiscal 2014" or "2014" refer to the fiscal year ended January 3, 2015; references to "fiscal 2013" or "2013" refer to the fiscal year ended December 28, 2013; and references to "fiscal 2012" or "2012" refer to the fiscal year ended December 29, 2012. References in this document to 2014, 2013 and 2012 year end refer to January 3, 2015, December 28, 2013, and December 29, 2012, respectively.

Results of Operations

2014 vs. 2013

Results of operations for 2014 and 2013 are as follows:

<i>(Amounts in millions)</i>	2014		2013		Change	
Net sales	\$ 3,277.7	100.0%	\$ 3,056.5	100.0%	\$ 221.2	7.2%

NM: Not meaningful

Percentage Disclosure: All income statement line item percentages below “Operating earnings from financial services” are calculated as a percentage of the sum of Net sales and Financial services revenue.

Snap-on's 2014 fiscal year contained 53 weeks of operating results, with the extra week occurring in the fourth quarter. Snap-on's 2013 fiscal year contained 52 weeks of operating results. The impact of the additional week of operations in fiscal 2014 was not material to Snap-on's full year or fourth quarter 2014 net sales or net earnings.

Net sales of \$3,277.7 million in 2014 increased \$221.2 million, or 7.2%, from 2013 levels, including \$37.0 million of acquisition-related sales and an unfavorable \$25.3 million impact from foreign currency translation. Organic sales (excluding acquisition-related sales and foreign currency translation impacts) in 2014 increased \$209.5 million, or 6.9%, from 2013 levels. Snap-on has significant international operations and is subject to risks inherent with foreign operations, including foreign currency translation fluctuations.

Gross profit of \$1,584.3 million in 2014 increased \$111.4 million from \$1,472.9 million last year. Gross margin (gross profit as a percentage of net sales) of 48.3% in 2014 increased 10 basis points (100 basis points (“bps”) equals 1.0 percent) from 48.2% last year primarily due to benefits from higher sales and savings from RCI initiatives, partially offset by increased restructuring and other costs. Restructuring costs included in gross profit were \$5.7 million and \$4.4 million in 2014 and 2013, respectively.

Operating expenses of \$1,048.7 million in 2014 increased \$36.3 million from \$1,012.4 million last year primarily due to higher volume-related and other expenses. The operating expense margin (operating expenses as a percentage of net sales) of 32.0% in 2014 improved 110 bps from 33.1% last year primarily due to sales volume leverage. Restructuring costs included in operating expenses were \$0.8 million and \$1.9 million in 2014 and 2013, respectively.

Operating earnings before financial services of \$535.6 million in 2014, including \$11.3 million of unfavorable foreign currency effects, increased \$75.1 million, or 16.3%, as compared to \$460.5 million last year. As a percentage of net sales, operating earnings before financial services of 16.3% in 2014 improved 120 bps from 15.1% in 2013.

Financial services operating earnings of \$149.1 million on revenue of \$214.9 million in 2014 compared to operating earnings of \$125.7 million on revenue of \$181.0 million last year. The year-over-year increases in both revenue and operating earnings primarily reflect continued growth of the company's financial services portfolio.

Operating earnings of \$684.7 million in 2014, including \$11.5 million of unfavorable foreign currency effects, increased \$98.5 million, or 16.8%, from \$586.2 million last year. As a percentage of revenues (net sales plus financial services revenue), operating earnings of 19.6% in 2014 improved 150 bps from 18.1% last year.

Interest expense of \$52.9 million in 2014 decreased \$3.2 million from \$56.1 million last year primarily due to lower average debt levels as a result of the March 2014 repayment of \$100.0 million of unsecured notes at maturity. See Note 9 to the Consolidated Financial Statements for information on Snap-on's debt and credit facilities.

Other income (expense) – net was expense of \$0.9 million and \$3.9 million in 2014 and 2013, respectively. Other income (expense) – net primarily reflects net losses and gains associated with hedging and currency exchange rate transactions, and interest income. See Note 16 to the Consolidated Financial Statements for information on other income (expense) – net.

Snap-on's effective income tax rate on earnings attributable to Snap-on was 32.1% in 2014 and 32.3% in 2013. See Note 8 to the Consolidated Financial Statements for information on income taxes.

On May 28, 2014, Snap-on acquired substantially all of the assets of Pro-Cut for a cash purchase price of \$41.3 million. Pro-Cut designs, manufactures and distributes on-car brake lathes, related equipment and accessories used in brake servicing by automotive repair facilities. The acquisition of the Pro-Cut product line complemented and increased Snap-on's existing undercar equipment product offering, broadened its established capabilities in serving vehicle repair facilities and expanded the company's presence with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Pro-Cut have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Pro-Cut acquisition were neither significant nor material to Snap-on's results of operations or financial position.

On May 13, 2013, Snap-on acquired Challenger for a cash purchase price of \$38.2 million. Challenger designs, manufactures and distributes a comprehensive line of vehicle lifts and accessories to a diverse customer base in the automotive repair sector. The acquisition of the Challenger vehicle lift product line complemented and increased Snap-on's existing undercar equipment product offering, broadened its established capabilities in serving vehicle repair facilities and expanded the company's presence with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Challenger have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Challenger acquisition were neither significant nor material to Snap-on's results of operations or financial position.

Net earnings attributable to Snap-on in 2014 of \$421.9 million, or \$7.14 per diluted share, increased \$71.6 million, or \$1.21 per diluted share, from 2013 levels. Net earnings attributable to Snap-on in 2013 were \$350.3 million or \$5.93 per diluted share.

Exit and Disposal Activities

Snap-on recorded costs for exit and disposal activities of \$6.5 million and \$6.4 million in 2014 and 2013, respectively. See Note 7 to the Consolidated Financial Statements for information on Snap-on's exit and disposal activities.

Segment Results

Snap-on's business segments are based on the organization structure used by management for making operating and investment decisions and for assessing performance. Snap-on's reportable business segments are: (i) the Commercial & Industrial Group; (ii) the Snap-on Tools Group; (iii) the Repair Systems & Information Group; and (iv) Financial Services. The Commercial & Industrial Group consists of business operations serving a broad range of industrial and commercial customers worldwide, primarily through direct and distributor channels. The Snap-on Tools Group consists of business operations primarily serving vehicle service and repair technicians through the company's worldwide mobile tool distribution channel. The Repair Systems & Information Group consists of business operations serving other professional vehicle repair customers worldwide, primarily owners and managers of independent repair shops and OEM dealerships, through direct and distributor channels. Financial Services consists of the business operations of Snap-on's finance subsidiaries.

Snap-on evaluates the performance of its operating segments based on segment revenues, including both external and intersegment net sales, and segment operating earnings. Snap-on accounts for intersegment sales and transfers based primarily on standard costs with reasonable mark-ups established between the segments. Identifiable assets by segment are those assets used in the respective reportable segment's operations. Corporate assets consist of cash and cash equivalents (excluding cash held at Financial Services), deferred income taxes and certain other assets. All significant intersegment amounts are eliminated to arrive at Snap-on's consolidated financial results.

Commercial & Industrial Group

<i>(Amounts in millions)</i>	2014		2013		Change	
External net sales	\$ 952.1	81.0%	\$ 903.0	82.8%	\$ 49.1	5.4%
Intersegment net sales	222.7	19.0%	188.0	17.2%	34.7	18.5%
Segment net sales	1,174.8	100.0%	1,091.0	100.0%	83.8	7.7%
Cost of goods sold	(725.1)	-61.7%	(671.5)	-61.5%	(53.6)	-8.0%
Gross profit	449.7	38.3%	419.5	38.5%	30.2	7.2%
Operating expenses	(291.1)	-24.8%	(282.2)	-25.9%	(8.9)	-3.2%
Segment operating earnings	\$ 158.6	13.5%	\$ 137.3	12.6%	\$ 21.3	15.5%

Segment net sales of \$1,174.8 million in 2014 increased \$83.8 million, or 7.7%, from 2013 levels; excluding \$18.2 million of unfavorable foreign currency translation, organic sales increased \$102.0 million or 9.5%. The organic sales increase primarily reflects a double-digit gain in sales to customers in critical industries and a mid single-digit sales increase in the segment's European-based hand tools business.

Segment gross profit of \$449.7 million in 2014 increased \$30.2 million from 2013 levels. Gross margin of 38.3% in 2014 decreased 20 bps from 38.5% last year as benefits from increased sales, savings from RCI initiatives and lower restructuring costs were more than offset by higher expenses, including \$10.9 million of unfavorable foreign currency effects. Restructuring costs included in gross profit were \$1.0 million and \$2.5 million in 2014 and 2013, respectively.

Segment operating expenses of \$291.1 million in 2014 increased \$8.9 million from 2013 levels primarily due to higher volume-related and other expenses. The operating expense margin of 24.8% in 2014 improved 110 bps from 25.9% last year primarily due to sales volume leverage. Restructuring costs included in operating expenses were \$0.4 million in both years.

As a result of these factors, segment operating earnings of \$158.6 million in 2014, including \$6.3 million of unfavorable foreign currency effects, increased \$21.3 million from 2013 levels. Operating margin (segment operating earnings as a percentage of segment net sales) for the Commercial & Industrial Group of 13.5% in 2014 improved 90 bps from 12.6% last year.

Snap-on Tools Group

<i>(Amounts in millions)</i>	2014		2013		Change	
Segment net sales	\$ 1,455.2	100.0%	\$ 1,358.4	100.0%	\$ 96.8	7.1%
Cost of goods sold	(824.9)	-56.7%	(772.6)	-56.9%	(52.3)	-6.8%
Gross profit	630.3	43.3%	585.8	43.1%	44.5	7.6%
Operating expenses	(407.2)	-28.0%	(391.2)	-28.8%	(16.0)	-4.1%
Segment operating earnings	<u>\$ 223.1</u>	15.3%	<u>\$ 194.6</u>	14.3%	<u>\$ 28.5</u>	14.6%

Segment net sales of \$1,455.2 million in 2014 increased \$96.8 million, or 7.1%, from 2013 levels. Excluding \$6.3 million of unfavorable foreign currency translation, organic sales increased \$103.1 million, or 7.6%, reflecting a high single-digit sales increase in the company's U.S. franchise operations and a mid single-digit sales gain in the company's international franchise operations.

Segment gross profit of \$630.3 million in 2014 increased \$44.5 million from 2013 levels. Gross margin of 43.3% in 2014 increased 20 bps from 43.1% last year primarily due to benefits from higher sales and savings from RCI initiatives, partially offset by \$6.6 million of unfavorable foreign currency effects. Restructuring costs included in gross profit were zero and \$0.2 million in 2014 and 2013, respectively.

Segment operating expenses of \$407.2 million in 2014 increased \$16.0 million from 2013 levels primarily due to higher volume-related and other expenses. The operating expense margin of 28.0% in 2014 improved 80 bps from 28.8% last year primarily due to sales volume leverage. Restructuring costs included in operating expenses were zero and \$0.3 million in 2014 and 2013, respectively.

As a result of these factors, segment operating earnings of \$223.1 million in 2014, including \$5.0 million of unfavorable foreign currency effects, increased \$28.5 million from 2013 levels. Operating margin for the Snap-on Tools Group of 15.3% in 2014 improved 100 bps from 14.3% last year.

Repair Systems & Information Group

<i>(Amounts in millions)</i>	2014		2013		Change	
External net sales	\$ 870.4	79.5%	\$ 795.1	78.8%	\$ 75.3	9.5%
Intersegment net sales	224.8	20.5%	214.5	21.2%	10.3	4.8%
Segment net sales	1,095.2	100.0%	1,009.6	100.0%	85.6	8.5%
Cost of goods sold	(590.9)	-54.0%	(542.0)	-53.7%	(48.9)	-9.0%
Gross profit	504.3	46.0%	467.6	46.3%	36.7	7.8%
Operating expenses	(253.1)	-23.1%	(235.7)	-23.3%	(17.4)	-7.4%
Segment operating earnings	<u>\$ 251.2</u>	22.9%	<u>\$ 231.9</u>	23.0%	<u>\$ 19.3</u>	8.3%

Segment net sales of \$1,095.2 million in 2014 increased \$85.6 million, or 8.5%, from 2013 levels. Excluding \$37.0 million of acquisition-related sales and \$0.5 million of unfavorable foreign currency translation, organic sales in 2014 increased \$49.1 million or 4.9%. The organic sales increase primarily reflects a high single-digit gain in sales to OEM dealerships, a mid single-digit gain in sales of diagnostic and repair information products to independent repair shop owners and managers, and a low single-digit increase in sales of undercar equipment.

Segment gross profit of \$504.3 million in 2014 increased \$36.7 million from 2013 levels. Gross margin of 46.0% in 2014 decreased 30 bps from 46.3% last year primarily due to a shift in sales that included higher volumes of lower gross margin products, including increased essential tool and facilitation sales to OEM dealerships, and \$3.0 million of higher restructuring costs. These decreases in gross margin were partially offset by savings from RCI initiatives. Restructuring costs included in gross profit were \$4.7 million and \$1.7 million in 2014 and 2013, respectively.

Segment operating expenses of \$253.1 million in 2014 increased \$17.4 million from 2013 levels primarily due to higher volume-related and other expenses, partially offset by savings from RCI initiatives and lower restructuring costs. The operating expense margin of 23.1% in 2014 improved 20 bps from 23.3% last year primarily due to sales volume leverage. Restructuring costs included in operating expenses were \$0.4 million and \$1.2 million in 2014 and 2013, respectively.

As a result of these factors, segment operating earnings of \$251.2 million in 2014 increased \$19.3 million from 2013 levels. Operating margin for the Repair Systems & Information Group of 22.9% in 2014 decreased 10 bps from 23.0% last year.

Financial Services

<i>(Amounts in millions)</i>	<u>2014</u>		<u>2013</u>		<u>Change</u>	
Financial services revenue	\$ 214.9	100.0%	\$ 181.0	100.0%	\$ 33.9	18.7%
Financial services expenses	<u>(65.8)</u>	-30.6%	<u>(55.3)</u>	-30.6%	<u>(10.5)</u>	-19.0%
Segment operating earnings	<u>\$ 149.1</u>	69.4%	<u>\$ 125.7</u>	69.4%	<u>\$ 23.4</u>	18.6%

Financial services operating earnings of \$149.1 million on revenue of \$214.9 million in 2014 compared to operating earnings of \$125.7 million on revenue of \$181.0 million last year. The \$33.9 million increase in financial services revenue primarily reflects \$30.6 million of higher revenue as a result of continued growth of the company's financial services portfolio and \$1.8 million of increased revenue from higher average yields. In 2014 and 2013, the average yield on finance receivables was 17.6% and 17.4%, respectively, and the average yield on contract receivables was 9.5% in both years. Originations of \$888.6 million in 2014 increased \$110.9 million, or 14.3%, from 2013 levels.

Financial services expenses primarily include personnel-related and other general and administrative costs, as well as provisions for doubtful accounts. These expenses are generally more dependent on changes in the size of the financial services portfolio than they are on the revenue of the segment. Financial services expenses of \$65.8 million in 2014 compared to \$55.3 million in 2013. As a percentage of the average financial services portfolio, financial services expenses were 5.1% and 4.7% in 2014 and 2013, respectively.

See Note 1 to the Consolidated Financial Statements for further information on financial services.

Corporate

Snap-on's general corporate expenses of \$97.3 million in 2014 decreased \$6.0 million from \$103.3 million last year primarily due to lower pension expense partially offset by higher performance-based compensation and other expenses.

Fourth Quarter

Results of operations for the fourth quarters of 2014 and 2013 are as follows:

<i>(Amounts in millions)</i>	Fourth Quarter					
	2014		2013		Change	
Net sales	\$ 857.4	100.0%	\$ 797.5	100.0%	\$ 59.9	7.5%
Cost of goods sold	(446.1)	-52.0%	(419.0)	-52.5%	(27.1)	-6.5%
Gross profit	411.3	48.0%	378.5	47.5%	32.8	8.7%

NM: Not meaningful

Percentage Disclosure: All income statement line item percentages below “Operating earnings from financial services” are calculated as a percentage of the sum of Net sales and Financial services revenue.

Snap-on’s 2014 fiscal year contained 53 weeks of operating results, with the extra week occurring in the fourth quarter; Snap-on’s 2013 fiscal year contained 52 weeks of operating results. The impact of the additional week of operations in 2014 was not material to Snap-on’s fourth quarter net sales or net earnings.

Net sales of \$857.4 million in the fourth quarter of 2014 increased \$59.9 million, or 7.5%, from 2013 levels, including \$21.5 million of unfavorable foreign currency translation and \$5.7 million of acquisition-related sales. Organic sales in the fourth quarter of 2014 increased \$75.7 million, or 9.8%, from 2013 levels. Snap-on has significant international operations and is subject to risks inherent with foreign operations, including foreign currency translation fluctuations.

Gross profit of \$411.3 million in the fourth quarter of 2014 increased \$32.8 million from \$378.5 million last year. Gross margin of 48.0% in the quarter increased 50 bps from 47.5% last year primarily due to savings from RCI initiatives and benefits from higher sales, partially offset by increased restructuring and other costs. Restructuring costs included in gross profit were \$1.0 million and zero in the fourth quarters of 2014 and 2013, respectively.

Operating expenses of \$266.1 million in the fourth quarter of 2014 increased \$11.2 million from \$254.9 million last year primarily due to higher volume-related and other expenses. The operating expense margin of 31.1% in the quarter improved 90 bps from 32.0% last year primarily due to sales volume leverage. Restructuring costs included in operating expenses were \$0.1 million and zero in the fourth quarters of 2014 and 2013, respectively.

Operating earnings before financial services of \$145.2 million in the fourth quarter of 2014, including \$1.9 million of unfavorable foreign currency effects, increased \$21.6 million, or 17.5%, as compared to \$123.6 million last year. As a percentage of net sales, operating earnings before financial services of 16.9% in the quarter improved 140 bps from 15.5% last year.

Financial services operating earnings of \$42.2 million on revenue of \$59.4 million in the fourth quarter of 2014 compared to operating earnings of \$33.0 million on revenue of \$47.4 million last year. The year-over-year increases in both revenue and operating earnings primarily reflect continued growth of the company's financial services portfolio.

Operating earnings of \$187.4 million in the fourth quarter of 2014, including \$2.1 million of unfavorable foreign currency effects, increased \$30.8 million, or 19.7%, from \$156.6 million last year. As a percentage of revenues, operating earnings of 20.4% in the quarter improved 190 bps from 18.5% last year.

Interest expense of \$13.8 million in 2014 decreased \$0.5 million from \$14.3 million last year primarily due to lower average debt levels as a result of the March 2014 repayment of \$100.0 million of unsecured notes at maturity. See Note 9 to the Consolidated Financial Statements for information on Snap-on's debt and credit facilities.

Other income (expense) – net was expense of \$0.2 million and \$0.8 million in the fourth quarters of 2014 and 2013, respectively. See Note 16 to the Consolidated Financial Statements for information on other income (expense) – net.

Snap-on's effective income tax rate on earnings attributable to Snap-on was 32.1% in both the fourth quarters of 2014 and 2013. See Note 8 to the Consolidated Financial Statements for information on income taxes.

Net earnings attributable to Snap-on in the fourth quarter of 2014 of \$116.2 million, or \$1.97 per diluted share, increased \$21.7 million, or \$0.37 per diluted share, from 2013 levels. Net earnings attributable to Snap-on in the fourth quarter of 2013 were \$94.5 million or \$1.60 per diluted share.

Segment Results

Commercial & Industrial Group

(Amounts in millions)	Fourth Quarter					
	2014		2013		Change	
External net sales	\$ 237.9	79.8%	\$ 231.6	81.8%	\$ 6.3	2.7%
Intersegment net sales	60.3	20.2%	51.6	18.2%	8.7	16.9%
Segment net sales	298.2	100.0%	283.2	100.0%	15.0	5.3%
Cost of goods sold	(184.8)	-62.0%	(172.9)	-61.1%	(11.9)	-6.9%
Gross profit	113.4	38.0%	110.3	38.9%	3.1	2.8%
Operating expenses	(72.9)	-24.4%	(73.2)	-25.8%	0.3	0.4%
Segment operating earnings	\$ 40.5	13.6%	\$ 37.1	13.1%	\$ 3.4	9.2%

Segment net sales of \$298.2 million in the fourth quarter of 2014 increased \$15.0 million, or 5.3%, from 2013 levels; excluding \$11.9 million of unfavorable foreign currency translation, organic sales increased \$26.9 million or 9.9%. The organic sales increase primarily reflects double-digit gains in sales to customers in critical industries and in the company's Asia/Pacific operations, as well as a mid single-digit sales increase in the segment's European-based hand tools business.

Segment gross profit of \$113.4 million in the fourth quarter of 2014 increased \$3.1 million from 2013 levels, including \$3.7 million of unfavorable foreign currency effects. Gross margin of 38.0% in the quarter decreased 90 bps from 38.9% last year primarily due to a shift to lower gross margin sales, which included higher sales to the military and increased sales in the company's Asia/Pacific operations, partially offset by savings from RCI initiatives. Restructuring costs included in gross profit were \$0.5 million and zero in the fourth quarters of 2014 and 2013, respectively.

Segment operating expenses of \$72.9 million in the fourth quarter of 2014 decreased \$0.3 million from 2013 levels. The operating expense margin of 24.4% in the quarter improved 140 bps from 25.8% last year primarily due to sales volume leverage, including benefits from the sales shift noted above.

As a result of these factors, segment operating earnings of \$40.5 million in the fourth quarter of 2014, including \$0.5 million of unfavorable foreign currency effects, increased \$3.4 million from 2013 levels. Operating margin for the Commercial & Industrial Group of 13.6% in the fourth quarter of 2014 improved 50 bps from 13.1% last year.

Snap-on Tools Group

<i>(Amounts in millions)</i>	Fourth Quarter					
	2014		2013		Change	
Segment net sales	\$ 387.5	100.0%	\$ 351.1	100.0%	\$ 36.4	10.4%
Cost of goods sold	(221.1)	-57.1%	(204.9)	-58.4%	(16.2)	-7.9%
Gross profit	166.4	42.9%	146.2	41.6%	20.2	13.8%
Operating expenses	(102.5)	-26.4%	(95.2)	-27.1%	(7.3)	-7.7%
Segment operating earnings	\$ 63.9	16.5%	\$ 51.0	14.5%	\$ 12.9	25.3%

Segment net sales of \$387.5 million in the fourth quarter of 2014 increased \$36.4 million, or 10.4%, from 2013 levels. Excluding \$4.5 million of unfavorable foreign currency translation, organic sales increased \$40.9 million, or 11.8%, reflecting a double-digit sales increase in the company's U.S. franchise operations and a high single-digit sales gain in the company's international franchise operations.

Segment gross profit of \$166.4 million in the fourth quarter of 2014 increased \$20.2 million from 2013 levels, including \$1.6 million of unfavorable foreign currency effects. Gross margin of 42.9% in the quarter increased 130 bps from 41.6% last year primarily due to benefits from higher sales and savings from RCI initiatives.

Segment operating expenses of \$102.5 million in the fourth quarter of 2014 increased \$7.3 million from 2013 levels primarily due to higher volume-related and other expenses. The operating expense margin of 26.4% in the quarter improved 70 bps from 27.1% last year primarily due to sales volume leverage.

As a result of these factors, segment operating earnings of \$63.9 million in the fourth quarter of 2014, including \$0.5 million of unfavorable foreign currency effects, increased \$12.9 million from 2013 levels. Operating margin for the Snap-on Tools Group of 16.5% in the fourth quarter of 2014 improved 200 bps from 14.5% last year.

Repair Systems & Information Group

<i>(Amounts in millions)</i>	Fourth Quarter					
	2014		2013		Change	
External net sales	\$ 232.0	82.0%	\$ 214.8	81.2%	\$ 17.2	8.0%
Intersegment net sales	50.8	18.0%	49.8	18.8%	1.0	2.0%
Segment net sales	282.8	100.0%	264.6	100.0%	18.2	6.9%
Cost of goods sold	(151.3)	-53.5%	(142.6)	-53.9%	(8.7)	-6.1%
Gross profit	131.5	46.5%	122.0	46.1%	9.5	7.8%
Operating expenses	(66.3)	-23.4%	(61.2)	-23.1%	(5.1)	-8.3%
Segment operating earnings	\$ 65.2	23.1%	\$ 60.8	23.0%	\$ 4.4	7.2%

Segment net sales of \$282.8 million in the fourth quarter of 2014 increased \$18.2 million, or 6.9%, from 2013 levels. Excluding \$5.7 million of acquisition-related sales and \$5.5 million of unfavorable foreign currency translation, organic sales increased \$18.0 million or 6.9%. The organic sales increase primarily reflects high single-digit gains in both sales of undercar equipment and sales to OEM dealerships, as well as a mid single-digit gain in sales of diagnostic and repair information products to independent repair shop owners and managers.

Segment gross profit of \$131.5 million in the fourth quarter of 2014 increased \$9.5 million from 2013 levels. Gross margin of 46.5% in the quarter increased 40 bps from 46.1% last year, as savings from RCI and other cost reduction initiatives were partially offset by a shift in sales that included higher volumes of lower gross margin products, including increased essential tool and facilitation sales to OEM dealerships. Restructuring costs included in gross profit were \$0.5 million and zero in the fourth quarters of 2014 and 2013, respectively.

Segment operating expenses of \$66.3 million in the fourth quarter of 2014 increased \$5.1 million from 2013 levels primarily due to higher volume-related and other expenses, including operating expenses for Pro-Cut, partially offset by savings from RCI initiatives. The operating expense margin of 23.4% in the quarter increased 30 bps from 23.1% last year primarily due to the operating expenses of Pro-Cut. Restructuring costs included in operating expenses were \$0.1 million and zero in the fourth quarters of 2014 and 2013, respectively.

As a result of these factors, segment operating earnings of \$65.2 million in the fourth quarter of 2014, including \$0.9 million of unfavorable foreign currency effects, increased \$4.4 million from 2013 levels. Operating margin for the Repair Systems & Information Group of 23.1% in the fourth quarter of 2014 improved 10 bps from 23.0% last year.

Financial Services

(Amounts in millions)	Fourth Quarter				Change	
	2014		2013			
Financial services revenue	\$ 59.4	100.0%	\$ 47.4	100.0%	\$ 12.0	25.3%
Financial services expenses	(17.2)	-29.0%	(14.4)	-30.4%	(2.8)	-19.4%
Segment operating earnings	\$ 42.2	71.0%	\$ 33.0	69.6%	\$ 9.2	27.9%

Financial services operating earnings of \$42.2 million on revenue of \$59.4 million in the fourth quarter of 2014, which included an additional week of operations in fiscal 2014, compared to operating earnings of \$33.0 million on revenue of \$47.4 million last year. The \$12.0 million increase in financial services revenue primarily reflects \$10.4 million of higher revenue as a result of continued growth of the company's financial services portfolio and \$1.2 million from higher average yields. In the fourth quarters of 2014 and 2013, the average yield on finance receivables was 17.6% and 17.4%, respectively, and the average yield on contract receivables was 9.5% in both periods. Originations of \$232.2 million in the fourth quarter of 2014 increased \$34.6 million, or 17.5%, from 2013 levels.

Financial services expenses primarily include personnel-related and other general and administrative costs, as well as provisions for doubtful accounts. These expenses are generally more dependent on changes in the size of the financial services portfolio than they are on the revenue of the segment. Financial services expenses of \$17.2 million in the fourth quarter of 2014 compared to financial services expenses of \$14.4 million in 2013. As a percentage of the average financial services portfolio, financial services expenses were 1.3% and 1.2% in the fourth quarters of 2014 and 2013, respectively.

See Note 1 to the Consolidated Financial Statements for further information on financial services.

Corporate

Snap-on's fourth quarter 2014 general corporate expenses of \$24.4 million decreased \$0.9 million from \$25.3 million last year primarily due to lower pension expense partially offset by higher performance-based compensation and other expenses.

2013 vs. 2012

Results of operations for 2013 and 2012 are as follows:

<i>(Amounts in millions)</i>	2013		2012		Change	
Net sales	\$ 3,056.5	100.0%	\$ 2,937.9	100.0%	\$ 118.6	4.0%

NM: Not meaningful

Percentage Disclosure: All income statement line item percentages below “Operating earnings from financial services” are calculated as a percentage of the sum of Net sales and Financial services revenue.

Net sales of \$3,056.5 million in 2013 increased \$118.6 million, or 4.0%, from 2012 levels, including \$39.3 million of sales from the May 2013 acquisition of Challenger and an unfavorable \$21.6 million impact from foreign currency translation. Organic sales in 2013 increased \$100.9 million, or 3.5%, from 2012 levels. Snap-on has significant international operations and is subject to risks inherent with foreign operations, including foreign currency translation fluctuations.

Gross profit of \$1,472.9 million in 2013 increased \$82.9 million as compared to \$1,390.0 million in 2012, and gross margin of 48.2% in 2013 improved 90 bps from 47.3% in 2012. The year-over-year improvement in gross margin primarily reflected benefits from ongoing RCI initiatives and a \$6.5 million decrease in restructuring costs. Gross profit in 2013 reflected \$4.4 million of restructuring costs; gross profit in 2012 reflected \$10.9 million of restructuring costs, including \$6.8 million for the settlement of a pension plan following the 2011 closure of the company’s former Newmarket, Canada, facility.

Operating expenses of \$1,012.4 million in 2013 increased \$32.1 million as compared to \$980.3 million in 2012. The operating expense margin of 33.1% in 2013 improved 30 bps from 33.4% in 2012 primarily due to benefits from sales volume leverage, savings from ongoing RCI initiatives and a \$3.7 million decrease in restructuring costs. Restructuring costs included in operating expenses were \$1.9 million and \$5.6 million in 2013 and 2012, respectively.

Operating earnings before financial services of \$460.5 million in 2013 increased \$50.8 million, or 12.4%, as compared to \$409.7 million in 2012. As a percentage of net sales, operating earnings before financial services of 15.1% improved 120 bps from 13.9% in 2012.

Financial services operating earnings of \$125.7 million on revenue of \$181.0 million in 2013 compared to operating earnings of \$106.7 million on revenue of \$161.3 million in 2012. The year-over-year increases in both revenue and operating earnings primarily reflected the growth in the company's financial services portfolio.

Operating earnings of \$586.2 million in 2013, including \$14.2 million of unfavorable foreign currency effects, increased \$69.8 million, or 13.5%, as compared to operating earnings of \$516.4 million in 2012. As a percentage of revenues, operating earnings of 18.1% in 2013 improved 140 bps from 16.7% in 2012.

Interest expense of \$56.1 million in 2013 increased \$0.3 million from \$55.8 million in 2012. See Note 9 to the Consolidated Financial Statements for information on Snap-on's debt and credit facilities.

Other income (expense) – net was expense of \$3.9 million and \$0.4 million in 2013 and 2012, respectively. See Note 16 to the Consolidated Financial Statements for information on other income (expense) – net.

Snap-on's effective income tax rate on earnings attributable to Snap-on was 32.3% in 2013 and 32.8% in 2012. See Note 8 to the Consolidated Financial Statements for information on income taxes.

Net earnings attributable to Snap-on in 2013 of \$350.3 million, or \$5.93 per diluted share, increased \$44.2 million, or \$0.73 per diluted share, from 2012 levels. Net earnings attributable to Snap-on in 2012 were \$306.1 million or \$5.20 per diluted share.

Exit and Disposal Activities

Snap-on recorded costs for exit and disposal activities of \$6.4 million and \$16.5 million in 2013 and 2012, respectively. See Note 7 to the Consolidated Financial Statements for information on Snap-on's exit and disposal activities.

Segment Results

Commercial & Industrial Group

<i>(Amounts in millions)</i>	2013		2012		Change	
External net sales	\$ 903.0	82.8%	\$ 940.6	83.5%	\$ (37.6)	-4.0%
Intersegment net sales	188.0	17.2%	185.3	16.5%	2.7	1.5%
Segment net sales	1,091.0	100.0%	1,125.9	100.0%	(34.9)	-3.1%
Cost of goods sold	(671.5)	-61.5%	(710.9)	-63.1%	39.4	5.5%
Gross profit	419.5	38.5%	415.0	36.9%	4.5	1.1%
Operating expenses	(282.2)	-25.9%	(287.7)	-25.6%	5.5	1.9%
Segment operating earnings	\$ 137.3	12.6%	\$ 127.3	11.3%	\$ 10.0	7.9%

Segment net sales of \$1,091.0 million in 2013 decreased \$34.9 million, or 3.1%, from 2012 levels; excluding \$9.8 million of unfavorable foreign currency translation, organic sales decreased \$25.1 million or 2.2%. The lower year-over-year organic sales primarily reflected a double-digit decline in sales to the military and a low single-digit sales decline in the segment's European-based hand tools business.

Segment gross profit of \$419.5 million in 2013 increased \$4.5 million from 2012 levels. Gross margin of 38.5% in 2013 improved 160 bps from 36.9% in 2012 primarily due to savings from ongoing RCI initiatives, particularly in Europe, and a \$1.1 million decrease in restructuring costs. Restructuring costs included in gross profit were \$2.5 million and \$3.6 million in 2013 and 2012, respectively.

Segment operating expenses of \$282.2 million in 2013 decreased \$5.5 million from 2012 levels. The operating expense margin of 25.9% in 2013 increased 30 bps from 25.6% in 2012 primarily as a result of the lower sales, partially offset by a \$4.9 million decrease in restructuring costs. Restructuring costs included in operating expenses were \$0.4 million and \$5.3 million in 2013 and 2012, respectively.

As a result of these factors, segment operating earnings of \$137.3 million in 2013 increased \$10.0 million, or 7.9%, from 2012 levels, including \$8.8 million of unfavorable foreign currency effects. Operating margin for the Commercial & Industrial Group of 12.6% in 2013 increased 130 bps from 11.3% in 2012.

Snap-on Tools Group

<i>(Amounts in millions)</i>	2013		2012		Change	
Segment net sales	\$ 1,358.4	100.0%	\$ 1,272.0	100.0%	\$ 86.4	6.8%
Cost of goods sold	<u>(772.6)</u>	-56.9%	<u>(728.9)</u>	-57.3%	<u>(43.7)</u>	-6.0%
Gross profit	585.5	43.1%	543.1	42.7%	42.7	7.9%
Operating expenses	<u>(391.2)</u>	-28.8%	<u>(366.7)</u>	-28.8%	<u>(24.5)</u>	-6.7%
Segment operating earnings	<u>\$ 194.6</u>	14.3%	<u>\$ 176.4</u>	13.9%	<u>\$ 18.2</u>	10.3%

Segment net sales of \$1,358.4 million in 2013 increased \$86.4 million, or 6.8%, from 2012 levels. Excluding \$9.3 million of unfavorable foreign currency translation, organic sales increased \$95.7 million, or 7.6%, reflecting similar increases in both the company's U.S. and international franchise operations.

Segment gross profit of \$585.8 million in 2013 increased \$42.7 million from 2012 levels. Gross margin of 43.1% in 2013 increased 40 bps from 42.7% in 2012 primarily due to a \$6.9 million decrease in restructuring costs. Gross profit in 2013 reflected \$0.2 million of restructuring costs; gross profit in 2012 reflected \$7.1 million of such costs, including \$6.8 million for the settlement of the Newmarket pension plan.

Segment operating expenses of \$391.2 million in 2013 increased \$24.5 million from 2012 levels primarily due to higher volume-related and other expenses, including \$2.6 million of increased stock-based and mark-to-market costs associated with the company's franchisee stock purchase plan. Restructuring costs included in operating expenses were \$0.3 million and \$0.1 million in 2013 and 2012, respectively. The operating expense margin of 28.8% in 2013 was unchanged from 2012. See Note 13 to the Consolidated Financial Statements for information on the company's franchisee stock purchase plan.

As a result of these factors, segment operating earnings of \$194.6 million in 2013, including \$2.7 million of unfavorable foreign currency effects, increased \$18.2 million, or 10.3%, from 2012 levels. Operating margin for the Snap-on Tools Group of 14.3% in 2013 improved 40 bps from 13.9% in 2012.

Repair Systems & Information Group

<i>(Amounts in millions)</i>	2013		2012		Change	
External net sales	\$ 795.1	78.8%	\$ 725.3	79.1%	\$ 69.8	9.6%
Intersegment net sales	<u>214.5</u>	21.2%	<u>191.8</u>	20.9%	<u>22.7</u>	11.8%
Segment net sales	1,009.6	100.0%	917.1	100.0%	92.5	10.1%
Cost of goods sold	<u>(542.0)</u>	-53.7%	<u>(485.2)</u>	-52.9%	<u>(56.8)</u>	-11.7%
Gross profit	467.6	46.3%	431.9	47.1%	35.7	8.3%
Operating expenses	<u>(235.7)</u>	-23.3%	<u>(226.2)</u>	-24.7%	<u>(9.5)</u>	-4.2%
Segment operating earnings	<u>\$ 231.9</u>	23.0%	<u>\$ 205.7</u>	22.4%	<u>\$ 26.2</u>	12.7%

Segment net sales of \$1,009.6 million in 2013 increased \$92.5 million, or 10.1%, from 2012 levels. Excluding \$39.3 million of sales from the May 2013 acquisition of Challenger and \$0.9 million of unfavorable foreign currency translation, organic sales in 2013 increased \$54.1 million or 5.9%. The organic sales increase primarily reflected a high single-digit gain in sales to OEM dealerships, a high single-digit gain in sales of diagnostic and repair information products to independent repair shop owners and managers, and a low single-digit increase in sales of undercar equipment.

Segment gross profit of \$467.6 million in 2013 increased \$35.7 million from 2012 levels. Gross margin of 46.3% in 2013 decreased 80 bps from 47.1% in 2012 primarily due to a shift in sales mix that included higher volumes of lower gross margin products, including sales of Challenger products. Restructuring costs included in gross profit were \$1.7 million and \$0.2 million in 2013 and 2012, respectively. These gross margin decreases were partially offset by continued savings from ongoing RCI initiatives.

Segment operating expenses of \$235.7 million in 2013 increased \$9.5 million from 2012 levels. The operating expense margin of 23.3% in 2013 improved 140 bps from 24.7% in 2012 primarily due to contributions from sales volume leverage, including the effects from the sales mix shift discussed above, and savings from ongoing RCI initiatives. Restructuring costs included in operating expenses were \$1.2 million and \$0.2 million in 2013 and 2012, respectively.

As a result of these factors, segment operating earnings of \$231.9 million in 2013, including \$2.2 million of unfavorable foreign currency effects, increased \$26.2 million, or 12.7%, from 2012 levels. Operating margin for the Repair Systems & Information Group of 23.0% in 2013 increased 60 bps from 22.4% in 2012.

Financial Services

<i>(Amounts in millions)</i>	<u>2013</u>		<u>2012</u>		<u>Change</u>	
Financial services revenue	\$ 181.0	100.0%	\$ 161.3	100.0%	\$ 19.7	12.2%
Financial services expenses	<u>(55.3)</u>	-30.6%	<u>(54.6)</u>	-33.8%	<u>(0.7)</u>	-1.3%
Segment operating earnings	<u>\$ 125.7</u>	69.4%	<u>\$ 106.7</u>	66.2%	<u>\$ 19.0</u>	17.8%

Financial services operating earnings of \$125.7 million on revenue of \$181.0 million in 2013 compared to operating earnings of \$106.7 million on revenue of \$161.3 million in 2012. The \$19.7 million, or 12.2%, increase in financial services revenue primarily reflected \$15.4 million of higher revenue as a result of continued growth of the company's financial services portfolio and \$3.2 million of increased revenue from higher average yields. In 2013 and 2012, the average yield on finance receivables was 17.4% and 17.2%, respectively, and the average yield on contract receivables was 9.5% in both years. Originations of \$777.7 million in 2013 increased \$100.6 million, or 14.9%, from 2012 levels.

Financial services expenses of \$55.3 million and \$54.6 million in 2013 and 2012, respectively, primarily included personnel-related and other general and administrative costs, as well as provisions for doubtful accounts. These expenses are generally more dependent on changes in the size of the financial services portfolio than they are on the revenue of the segment. As a percentage of the average financial services portfolio, financial services expenses were 4.7% and 5.1% in 2013 and 2012, respectively.

See Note 1 to the Consolidated Financial Statements for further information on financial services.

Corporate

Snap-on's general corporate expenses of \$103.3 million in 2013 increased \$3.6 million over 2012 levels.

Non-GAAP Supplemental Data

The supplemental data is presented for informational purposes to provide readers with insight into the information used by management for assessing the operating performance of Snap-on Incorporated's ("Snap-on") non-financial services ("Operations") and "Financial Services" businesses.

The supplemental Operations data reflects the results of operations and financial position of Snap-on's tools, diagnostic and equipment products, software and other non-financial services operations with Financial Services on the equity method. The supplemental Financial Services data reflects the results of operations and financial position of Snap-on's U.S. and international financial services operations. The financing needs of Financial Services are met through intersegment borrowings and cash generated from Operations; Financial Services is charged interest expense on intersegment borrowings at market rates. Income taxes are charged to Financial Services on the basis of the specific tax attributes generated by the U.S. and international financial services businesses. Transactions between the Operations and Financial Services businesses were eliminated to arrive at the Consolidated Financial Statements.

Supplemental Consolidating Data – Supplemental Statements of Earnings information for 2014, 2013 and 2012 is as follows:

Liquidity and Capital Resources

Snap-on's growth has historically been funded by a combination of cash provided by operating activities and debt financing. Snap-on believes that its cash from operations and collections of finance receivables, coupled with its sources of borrowings and available cash on hand, are sufficient to fund its currently anticipated requirements for payments of interest and dividends, new receivables originated by our financial services businesses, capital expenditures, working capital, restructuring activities, the funding of pension plans, and funding for share repurchases and acquisitions, as they arise. Due to Snap-on's credit rating over the years, external funds have been available at an acceptable cost. As of the close of business on February 6, 2015, Snap-on's long-term debt and commercial paper were rated, respectively, A3 and P-2 by Moody's Investors Service; A- and A-2 by Standard & Poor's; and A- and F2 by Fitch Ratings. Snap-on believes that its current credit arrangements are sound and that the strength of its balance sheet affords the company the financial flexibility to respond to both internal growth opportunities and those available through acquisitions. However, Snap-on cannot provide any assurances of the availability of future financing or the terms on which it might be available, or that its debt ratings may not decrease.

The following discussion focuses on information included in the accompanying Consolidated Balance Sheets.

As of 2014 year end, working capital (current assets less current liabilities) of \$1,139.9 million increased \$59.1 million from \$1,080.8 million as of 2013 year end.

The following represents the company's working capital position as of 2014 and 2013 year end:

<i>(Amounts in millions)</i>	2014	2013
Cash and cash equivalents	\$ 132.9	\$ 217.6
Trade and other accounts receivable – net	550.8	531.6
Finance receivables – net	402.4	374.6
Contract receivables – net	74.5	68.4
Inventories – net	475.5	434.4
Other current assets	222.5	169.6
Total current assets	<u>1,858.6</u>	<u>1,796.2</u>
Notes payable and current maturities of long-term debt	(56.6)	(113.1)
Accounts payable	(145.0)	(155.6)
Other current liabilities	<u>(517.1)</u>	<u>(446.7)</u>
Total current liabilities	<u>(718.7)</u>	<u>(715.4)</u>
Working capital	<u>\$ 1,139.9</u>	<u>\$ 1,080.8</u>

Cash and cash equivalents of \$132.9 million as of 2014 year end decreased \$84.7 million from 2013 year-end levels primarily as a result of the March 2014 repayment of \$100.0 million of 5.85% unsecured notes (the "2014 Notes") at maturity. In addition to the repayment of the 2014 Notes, the net decrease in cash and cash equivalents also includes the impacts of (i) funding \$746.2 million of new finance receivables; (ii) dividend payments to shareholders of \$107.6 million; (iii) funding \$80.6 million of capital expenditures; (iv) repurchasing 680,000 shares of the company's common stock for \$79.3 million; and (v) the acquisition of Pro-Cut for a cash purchase price of \$41.3 million. These decreases in cash and cash equivalents were partially offset by (i) \$591.4 million of cash from collections of finance receivables; (ii) \$397.9 million of cash generated from operations; (iii) \$43.5 million of cash from a net increase in notes payable, primarily due to \$37.0 million of commercial paper borrowings; and (iv) \$33.0 million of cash proceeds from stock purchase and option plan exercises.

Of the \$132.9 million of cash and cash equivalents as of 2014 year end, \$121.9 million was held outside of the United States. Snap-on maintains non-U.S. funds in its foreign operations to (i) provide adequate working capital; (ii) satisfy various regulatory requirements; and/or (iii) take advantage of business expansion opportunities as they arise. The repatriation of cash from certain foreign subsidiaries could have adverse net tax consequences on the company should Snap-on be required to pay and record U.S. income taxes and foreign withholding taxes on such funds. Alternatively, the repatriation of cash from certain other foreign subsidiaries could result in favorable net tax consequences for the company. Snap-on periodically evaluates its cash held outside the United States and may pursue opportunities to repatriate certain foreign cash amounts to the extent that it does not incur unfavorable net tax consequences.

Trade and other accounts receivable – net of \$550.8 million as of 2014 year end increased \$19.2 million from 2013 year-end levels; excluding \$24.4 million of currency translation impacts, trade and other accounts receivable – net increased \$43.6 million, largely due to higher sales, including higher sales and receivables related to Pro-Cut. Days sales outstanding (trade and other accounts receivable – net as of the respective period end, divided by the respective trailing 12 months sales, times 360 days) was 61 days at 2014 year end and 62 days at 2013 year end.

The current portions of net finance and contract receivables of \$476.9 million as of 2014 year end compared to \$443.0 million at 2013 year end. The long-term portions of net finance and contract receivables of \$892.5 million as of 2014 year end compared to \$777.7 million at 2013 year end. The combined \$148.7 million increase in net current and long-term finance and contract receivables over 2013 year-end levels is primarily due to continued growth of the company's financial services portfolio; excluding \$12.9 million of currency translation impacts, the combined increase for these receivables over 2013 year-end levels was \$161.6 million.

Inventories of \$475.5 million as of 2014 year end increased \$41.1 million from 2013 year-end levels; excluding \$23.9 million of currency translation impacts, inventories increased \$65.0 million primarily to support continued higher customer demand and new product introductions, as well as inventories related to Pro-Cut. As of 2014 and 2013 year end, inventory turns (trailing 12 months of cost of goods sold, divided by the average of the beginning and ending inventory balance for the trailing 12 months) were 3.7 turns and 3.8 turns, respectively. Inventories accounted for using the first-in, first-out (FIFO) method as of 2014 and 2013 year end approximated 58% and 60%, respectively, of total inventories. All other inventories are accounted for using the last-in, first-out ("LIFO") method. The company's LIFO reserve as of both 2014 and 2013 year end was \$72.6 million.

Notes payable of \$56.6 million as of 2014 year end included \$37.0 million of commercial paper borrowings and \$19.6 million of other notes; there were no current maturities of long-term debt as of 2014 year end. Notes payable and current maturities of long-term debt of \$113.1 million as of 2013 year end included \$100.0 million of 2014 Notes and \$13.1 million of other notes; no commercial paper was outstanding as of 2013 year end. Snap-on repaid the 2014 Notes at maturity with available cash and commercial paper borrowings.

Average notes payable outstanding were \$45.4 million in 2014 and \$13.4 million in 2013. The weighted-average interest rate on notes payable was 5.42% in 2014 and 10.85% in 2013. As of 2014 and 2013 year end, the weighted-average interest rate on outstanding notes payable was 4.86% and 12.73%, respectively. The lower weighted-average interest rates in 2014 primarily reflect the impact of lower interest rates on commercial paper borrowings; no commercial paper was outstanding during 2013. The weighted-average interest rates in both years reflect local borrowings in emerging growth markets where interest rates are generally higher.

Accounts payable of \$145.0 million as of 2014 year end decreased \$10.6 million from 2013 year-end levels; excluding \$5.7 million of currency translation impacts, accounts payable decreased \$4.9 million primarily due to the timing of payments.

Other accrued liabilities of \$298.3 million as of 2014 year end increased \$54.6 million from prior-year levels primarily due to (i) an \$18.0 million increase in income and other tax accruals, including as a result of the timing of estimated income tax payments; (ii) \$12.7 million of higher accruals for in-transit inventories; (iii) a \$9.1 million increase in accruals for foreign currency forward contracts; (iv) a \$7.5 million increase in deferred subscription revenue; and (v) a \$2.5 million increase in accruals for exit and disposal activities. Excluding \$10.0 million of currency translation impacts, other accrued liabilities increased \$64.6 million from 2013 year-end levels.

Pension liabilities of \$217.9 million as of 2014 year end increased \$82.1 million from prior-year levels; excluding \$6.8 million of currency translation impacts, pension liabilities increased \$88.9 million primarily due to changes in actuarial assumptions, including a 100 bps decline in the company's worldwide weighted-average discount rate assumption (4.1% in 2014 compared to 5.1% in 2013) and increases in life expectancy assumptions. These pension liability increases were partially offset by higher-than-anticipated investment returns in 2014 on pension plan assets. See Note 11 to the Consolidated Financial Statements for further information on pension plans.

Long-term debt of \$862.7 million as of 2014 year end consisted of (i) \$150 million of unsecured 5.50% notes that mature in 2017; (ii) \$250 million of unsecured 4.25% notes that mature in 2018; (iii) \$200 million of unsecured 6.70% notes that mature in 2019; (iv) \$250 million of unsecured 6.125% notes that mature in 2021; and (v) \$12.7 million of other long-term debt, including fair value adjustments related to interest rate swaps.

Snap-on has a five-year, \$700 million multi-currency revolving credit facility that terminates on September 27, 2018 (the "Credit Facility"); no amounts were outstanding under the Credit Facility as of 2014 year end. Borrowings under the Credit Facility bear interest at varying rates based on Snap-on's then-current, long-term debt ratings. The Credit Facility's financial covenant requires that Snap-on maintain, as of each fiscal quarter end, either (i) a ratio not greater than 0.60 to 1.00 of consolidated net debt (consolidated debt net of certain cash adjustments) to the sum of such consolidated net debt plus total equity and less accumulated other comprehensive income or loss; or (ii) a ratio not greater than 3.50 to 1.00 of such consolidated net debt to earnings before interest, taxes, depreciation, amortization and certain other adjustments for the preceding four fiscal quarters then ended. As of 2014 year end, the company's actual ratios of 0.27 and 1.15, respectively, were both within the permitted ranges set forth in this financial covenant.

Snap-on's Credit Facility and other debt agreements also contain certain usual and customary borrowing, affirmative, negative and maintenance covenants. As of 2014 year end, Snap-on was in compliance with all covenants of its Credit Facility and other debt agreements.

Snap-on believes it has sufficient available cash and access to both committed and uncommitted credit facilities to cover its expected funding needs on both a short-term and long-term basis. Snap-on manages its aggregate short-term borrowings so as not to exceed its availability under the revolving Credit Facility. If the need were to arise, Snap-on believes that it could access short-term debt markets, predominantly through commercial paper issuances and existing lines of credit, to fund its short-term requirements and to ensure near-term liquidity. Snap-on regularly monitors the credit and financial markets and, in the future, may take advantage of what it believes are favorable market conditions to issue long-term debt to further improve its liquidity and capital resources. Near term liquidity requirements for Snap-on include payments of interest and dividends, funding to support new receivables originated by our financial services businesses, capital expenditures, working capital, restructuring activities, the funding of pension plans, and funding for share repurchases and acquisitions, as they arise. Snap-on intends to make contributions of \$7.1 million to its foreign pension plans and \$2.0 million to its domestic pension plans in 2015, as required by law. Depending on market and other conditions, Snap-on may make discretionary cash contributions to its pension plans in 2015.

Snap-on's long-term financing strategy is to maintain continuous access to the debt markets to accommodate its liquidity needs, including the potential use of commercial paper, additional fixed-term debt and/or securitizations.

The following discussion focuses on information included in the accompanying Consolidated Statements of Cash Flows.

Operating Activities

Net cash provided by operating activities of \$397.9 million in 2014 compared to \$392.6 million in 2013. The \$5.3 million increase in net cash provided by operating activities primarily reflects higher 2014 net earnings, partially offset by net changes in operating assets and liabilities, which included \$9.5 million of higher cash contributions to the company's pension plans. Snap-on made cash contributions to its pensions plans totaling \$44.8 million, \$35.3 million and \$87.5 million in 2014, 2013 and 2012, respectively.

Depreciation expense was \$54.8 million in 2014, \$51.2 million in 2013 and \$50.2 million in 2012. Amortization expense was \$24.7 million in 2014, \$25.5 million in 2013 and \$26.5 million in 2012. See Note 6 to the Consolidated Financial Statements for information on goodwill and other intangible assets.

Investing Activities

Net cash used by investing activities of \$273.2 million in 2014 included additions to, and collections of, finance receivables of \$746.2 million and \$591.4 million, respectively. Net cash used by investing activities of \$250.4 million in 2013 included additions to, and collections of, finance receivables of \$651.3 million and \$508.8 million, respectively. Net cash used by investing activities of \$173.1 million in 2012 included additions to, and collections of, finance receivables of \$569.6 million and \$445.5 million, respectively, as well as \$27.0 million of proceeds from the sale of a non-strategic equity investment at book value. Finance receivables are comprised of extended-term installment payment contracts to both technicians and independent shop owners (i.e., franchisees' customers) to enable them to purchase tools and diagnostic and equipment products on an extended-term payment plan, generally with expected average payment terms of three years.

Capital expenditures in 2014, 2013 and 2012 totaled \$80.6 million, \$70.6 million and \$79.4 million, respectively. Capital expenditures in all three years included investments to support the company's execution of its Value Creation Processes and strategic growth initiatives. The company also invested in (i) new product, efficiency, safety and cost reduction initiatives to expand and improve its manufacturing capabilities worldwide; (ii) new production and machine tooling to enhance manufacturing operations, as well as ongoing replacements of manufacturing and distribution equipment, particularly in the United States; (iii) the ongoing replacement and enhancement of the company's global enterprise resource planning (ERP) management information systems; and (iv) improvements in the company's corporate headquarters and research and development facilities in Kenosha, Wisconsin. In 2012, the company also completed the construction of a fourth factory in Kunshan, China. Snap-on believes that its cash generated from operations, as well as its available cash on hand and funds available from its credit facilities will be sufficient to fund the company's capital expenditure requirements in 2015.

Net cash used by investing activities in 2014 also included \$41.3 million for the May 2014 acquisition of Pro-Cut. Net cash used by investing activities in 2013 included \$38.2 million for the May 2013 acquisition of Challenger. See Note 2 to the Consolidated Financial Statements for information on acquisitions.

Financing Activities

Net cash used by financing activities was \$206.9 million in 2014, \$137.8 million in 2013 and \$127.0 million in 2012. Net cash used by financing activities of \$206.9 million in 2014 included the \$100.0 million repayment of the 2014 Notes at maturity, partially offset by \$45.0 million of proceeds from a net increase in short-term borrowings.

Proceeds from stock purchase and option plan exercises totaled \$33.0 million in 2014, \$29.2 million in 2013 and \$46.8 million in 2012. Snap-on has undertaken stock repurchases from time to time to offset dilution created by shares issued for employee and franchisee stock purchase plans, stock options and other corporate purposes. In 2014, Snap-on repurchased 680,000 shares of its common stock for \$79.3 million under its previously announced share repurchase programs. As of 2014 year end, Snap-on had remaining availability to repurchase up to an additional \$210.9 million in common stock pursuant to its Board of Directors' (the "Board") authorizations. The purchase of Snap-on common stock is at the company's discretion, subject to prevailing financial and market conditions. Snap-on repurchased 926,000 shares of its common stock for \$82.6 million in 2013, and Snap-on repurchased 1,180,000 shares of its common stock for \$78.1 million in 2012. Snap-on believes that its cash generated from operations, available cash on hand, and funds available from its credit facilities, will be sufficient to fund the company's share repurchases, if any, in 2015.

Snap-on has paid consecutive quarterly cash dividends, without interruption or reduction, since 1939. Cash dividends paid in 2014, 2013 and 2012 totaled \$107.6 million, \$92.0 million and \$81.5 million, respectively. On November 6, 2014, the company announced that its Board increased the quarterly cash dividend by 20.5% to \$0.53 per share (\$2.12 per share per year). Quarterly dividends declared in 2014 were \$0.53 per share in the fourth quarter and \$0.44 per share in the first three quarters (\$1.85 per share for the year). Quarterly dividends declared in 2013 were \$0.44 per share in the fourth quarter and \$0.38 per share in the first three quarters (\$1.58 per share for the year). Quarterly dividends declared in 2012 were \$0.38 per share in the fourth quarter and \$0.34 per share in the first three quarters (\$1.40 per share for the year).

	2014	2013	2012
Cash dividends paid per common share	\$ 1.85	\$ 1.58	\$ 1.40
Cash dividends paid as a percent of prior-year retained earnings	4.6%	4.5%	4.4%

Snap-on believes that its cash generated from operations, available cash on hand and funds available from its credit facilities will be sufficient to pay dividends in 2015.

Off-Balance-Sheet Arrangements

Except as included below in the section labeled "Contractual Obligations and Commitments" and Note 15 to the Consolidated Financial Statements, the company had no off-balance-sheet arrangements as of 2014 year end.

Contractual Obligations and Commitments

A summary of Snap-on's future contractual obligations and commitments as of 2014 year end are as follows:

<i>(Amounts in millions)</i>	<u>Total</u>	<u>2015</u>	<u>2016 – 2017</u>	<u>2018 – 2019</u>	<u>2020 and thereafter</u>
Contractual obligations:					
Notes payable	\$ 56.6	\$ 56.6	\$ –	\$ –	\$ –
Long-term debt	862.7	–	150.0	450.0	262.7
Interest on fixed rate debt	207.1	47.6	87.2	46.6	25.7
Operating leases	76.5	22.3	28.0	15.1	11.1
Capital leases	28.3	6.3	8.6	4.7	8.7
Purchase obligations	42.7	35.7	6.4	0.6	–
Total	\$ 1,273.9	\$ 168.5	\$ 280.2	\$ 517.0	\$ 308.2

Snap-on intends to make contributions of \$7.1 million to its foreign pension plans and \$2.0 million to its domestic pension plans in 2015, as required by law. Depending on market and other conditions, Snap-on may elect to make discretionary cash contributions to its pension plans in 2015. Snap-on has not presented estimated pension and postretirement funding contributions in the table above as the funding can vary from year to year based upon changes in the fair value of the plan assets and actuarial assumptions; see Notes 11 and 12 to the Consolidated Financial Statements for information on the company's benefit plans and payments.

Due to the uncertainty of the timing of settlements with taxing authorities, Snap-on is unable to make reasonably reliable estimates of the period of cash settlement of unrecognized tax benefits for its remaining uncertain tax liabilities. As a result, \$6.4 million of unrecognized tax benefits have been excluded from the table above; see Note 8 to the Consolidated Financial Statements for information on income taxes.

Environmental Matters

Snap-on is subject to various federal, state and local government requirements regulating the discharge of materials into the environment or otherwise relating to the protection of the environment. Snap-on's policy is to comply with these requirements and the company believes that, as a general matter, its policies, practices and procedures are properly designed to prevent unreasonable risk of environmental damage, and of resulting financial liability, in connection with its business. Some risk of environmental damage is, however, inherent in some of Snap-on's operations and products, as it is with other companies engaged in similar businesses.

Snap-on is and has been engaged in the handling, manufacture, use and disposal of many substances classified as hazardous or toxic by one or more regulatory agencies. Snap-on believes that, as a general matter, its handling, manufacture, use and disposal of these substances are in accordance with environmental laws and regulations. It is possible, however, that future knowledge or other developments, such as improved capability to detect substances in the environment or increasingly strict environmental laws and standards and enforcement policies, could bring into question the company's handling, manufacture, use or disposal of these substances.

Affordable Care Act

The Affordable Care Act (the "ACA"), which was adopted in 2010 and is being phased in over several years, significantly affects the provision of both health care services and benefits in the United States; the ACA may impact our cost of providing our employees and retirees with health insurance and/or benefits, and may also impact various other aspects of our business. The ACA did not have a material impact on our fiscal 2014, 2013 or 2012 financial results.

New Accounting Standards

See Note 1 to the Consolidated Financial Statements for information on new accounting standards.

Critical Accounting Policies and Estimates

The Consolidated Financial Statements and related notes contain information that is pertinent to management's discussion and analysis. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates are generally based on historical experience, current conditions and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily available from other sources, as well as identifying and assessing our accounting treatment with respect to commitments and contingencies. Actual results could differ from those estimates.

In addition to the company's significant accounting policies described in Note 1 to the Consolidated Financial Statements, Snap-on considers the following policies and estimates to be the most critical in understanding the judgments that are involved in the preparation of the company's consolidated financial statements and the uncertainties that could impact the company's financial position, results of operations and cash flows.

Impairment of Goodwill and Other Indefinite-lived Intangible Assets: Goodwill and other indefinite-lived intangible assets are tested for impairment annually or more frequently if events or changes in circumstances indicate that the assets might be impaired. Annual impairment tests are performed by the company in the second quarter of each year.

Snap-on evaluates the recoverability of goodwill by estimating the future discounted cash flows of the businesses to which the goodwill relates. Estimated cash flows and related goodwill are grouped at the reporting unit level. The company has determined that its reporting units for testing goodwill impairment are its operating segments or components of an operating segment that constitute a business for which discrete financial information is available and for which segment management regularly reviews the operating results. Within its four reportable operating segments, the company has identified 11 reporting units.

Snap-on evaluates the recoverability of goodwill by utilizing an income approach that estimates the fair value of the future discounted cash flows of the reporting units to which the goodwill relates. The future projections, which are based on both past performance and the projections and assumptions used in the company's operating plans, are subject to change as a result of changing economic and competitive conditions. This approach reflects management's internal outlook at the reporting units, which management believes provides the best determination of value due to management's insight and experience with the reporting unit. Significant estimates used by management in the discounted cash flows methodology include estimates of future cash flows based on expected growth rates, price increases, working capital levels, expected benefits from RCI initiatives, and a weighted-average cost of capital that reflects the specific risk profile of the reporting unit being tested. The company's methodologies for valuing goodwill are applied consistently on a year-over-year basis; the assumptions used in performing the second quarter 2014 impairment calculations were evaluated in light of then-current market and business conditions. Snap-on continues to believe that the future discounted cash flow valuation model provides the most reasonable and meaningful fair value estimate based upon the reporting units' projections of future operating results and cash flows and replicates how market participants would value the company's reporting units in an orderly transaction.

In the event the fair value of a reporting unit is less than the carrying value, including goodwill, the company would then perform an additional assessment that would compare the implied fair value of goodwill with the carrying amount of goodwill. The determination of implied fair value of goodwill would require management to compare the estimated fair value of the reporting unit to the estimated fair value of the assets and liabilities of the reporting unit; if necessary, the company may consult with valuation specialists to assist with the assessment of the estimated fair value of the assets and liabilities of the reporting unit. If the implied fair value of the goodwill is less than the carrying value, an impairment loss would be recorded.

Snap-on also evaluates the recoverability of its indefinite-lived trademarks by utilizing an income approach that estimates the fair value of the future discounted cash flows of each of its trademarks. The future projections, which are based on both past performance and the projections and assumptions used in the company's operating plans, are subject to change as a result of changing economic and competitive conditions. Significant estimates used by management in the discounted cash flows methodology include estimates of future cash flows based on expected growth and royalty rates, expected synergies, and a weighted-average cost of capital that reflects the specific risk profile of the trademark being tested. The company's methodologies for valuing trademarks are applied consistently on a year-over-year basis; the assumptions used in performing the second quarter 2014 impairment calculations were evaluated in light of then-current market and business conditions. Snap-on continues to believe that the future discounted cash flow valuation model provides the most reasonable and meaningful fair value estimate based upon the trademarks' projected future cash flows and replicates how market participants would value the company's trademarks in an orderly transaction.

Inherent in fair value determinations are significant judgments and estimates, including material assumptions about future revenue, profitability and cash flows, the company's operational plans and its interpretation of current economic indicators. Should the operations of the businesses with which goodwill or other indefinite-lived intangible assets are associated incur significant declines in profitability and cash flow due to significant and long-term deterioration in macroeconomic, industry and market conditions, the loss of key customers, changes in technology or markets, significant changes in key personnel or litigation, a significant and sustained decrease in share price and/or other events, including effects from the sale or disposal of a reporting unit, some or all of the recorded goodwill or other indefinite-lived intangible assets could be subject to impairment and could result in a material adverse effect on Snap-on's financial position or results of operations.

Snap-on completed its annual impairment testing of goodwill and other indefinite-lived intangible assets in the second quarter of 2014, the results of which did not result in any impairment. As of 2014 year end, the company has no accumulated impairment losses. Although the company consistently uses the same methods in developing the assumptions and estimates underlying the fair value calculations, such estimates are uncertain by nature and can vary from actual results. In performing its annual impairment testing the company performed a sensitivity analysis on the material assumptions used in the discounted cash flow valuation models for each of its 11 reporting units. Based on the company's second quarter 2014 impairment testing and assuming a hypothetical 10% decrease in the estimated fair values of each of its 11 reporting units, the hypothetical fair value of each of the company's 11 reporting units would have been greater than its carrying value. See Note 6 to the Consolidated Financial Statements for further information about goodwill and other intangible assets.

Impairment of Long-lived and Amortized Intangible Assets: Snap-on performs impairment evaluations of its long-lived assets, including property, plant and equipment and intangible assets with finite lives, whenever business conditions or events indicate that those assets may be impaired. When the estimated future undiscounted cash flows to be generated by the assets are less than the carrying value of the long-lived assets, the assets are written down to fair market value and a charge is recorded to current operations.

Significant and unanticipated changes in circumstances, such as significant declines in profitability and cash flow due to significant and long-term deterioration in macroeconomic, industry and market conditions, the loss of key customers, changes in technology or markets and/or other events, including effects from the sale or disposal of a reporting unit, could require a provision for impairment in a future period.

Excess and Obsolete Inventory: Snap-on records allowances for excess and obsolete inventory based on historical and estimated future demand and market conditions. Allowances for raw materials are largely based on an analysis of raw material age and actual physical inspection of raw material for fitness for use. As part of evaluating the adequacy of allowances for work-in-progress and finished goods, management reviews individual product stock-keeping units (SKUs) by product category and product life cycle. Cost adjustments for each product category/product life-cycle state are generally established and maintained based on a combination of historical experience, forecasted sales and promotions, technological obsolescence, inventory age and other actual known conditions and circumstances. Should actual product marketability and raw material fitness for use be affected by conditions that are different from management estimates, further adjustments to inventory allowances may be required.

Pension Benefits: The pension benefit obligation and related pension expense are calculated in accordance with U.S. GAAP and are impacted by certain actuarial assumptions. Changes in these assumptions are primarily influenced by factors outside of Snap-on's control and can have a significant effect on the amounts reported in the financial statements.

Snap-on believes that the two most critical assumptions are (i) the expected return on plan assets; and (ii) the assumed discount rate.

Pension expense increases as the expected rate of return on plan assets decreases. Lowering the expected rate of return assumption for Snap-on's domestic pension plan assets by 50 bps would have increased Snap-on's 2014 domestic pension expense by approximately \$4.2 million. Snap-on uses a three-year, market-related value asset method of amortizing the difference between actual and expected returns on its domestic plans' assets.

The objective of Snap-on's discount rate assumption is to reflect the rate at which the pension benefits could be effectively settled. In making this determination, the company takes into account the timing and amount of benefits that would be available under the plans. The domestic discount rate as of 2014 and 2013 year end was selected based on a cash flow matching methodology developed by the company's outside actuaries and which incorporates a review of current economic conditions. This methodology matches the plans' yearly projected benefit cash flows to those of hypothetical bond portfolios using high-quality, AA rated or better, corporate bonds from either Moody's Investors Service or Standard & Poor's credit rating agencies available at the measurement date. This technique calculates bond portfolios that produce adequate cash flows to pay the plans' projected yearly benefits and then selects the portfolio with the highest yield and uses that yield as the recommended discount rate.

The selection of the 4.2% weighted-average discount rate for Snap-on's domestic pension plans as of 2014 year end represents the single rate that produces the same present value of cash flows as the estimated benefit plan payments. Lowering Snap-on's domestic discount rate assumption by 50 bps would have increased Snap-on's 2014 domestic pension expense and projected benefit obligation by approximately \$6.0 million and \$63.4 million, respectively. As of 2014 year end, Snap-on's domestic projected benefit obligation comprised approximately 82% of Snap-on's worldwide projected benefit obligation. The weighted-average discount rate for Snap-on's foreign pension plans of 3.3% represents the single rate that produces the same present value of cash flows as the estimated benefit plan payments. Lowering Snap-on's foreign discount rate assumption by 50 bps would have increased Snap-on's 2014 foreign pension expense and projected benefit obligation by approximately \$1.9 million and \$22.7 million, respectively.

Actuarial gains and losses in excess of 10 percent of the greater of the projected benefit obligation or market-related value of assets are amortized on a straight-line basis over the average remaining service period of active participants or over the average remaining life expectancy for plans with primarily inactive participants. Prior service costs and credits resulting from plan amendments are amortized in equal annual amounts over the average remaining service period of active participants or over the average remaining life expectancy for plans with primarily inactive participants. See Note 11 to the Consolidated Financial Statements for further information on pension plans.

Income Taxes: Snap-on records deferred income tax assets and liabilities for differences between the book basis and tax basis of the related net assets. Snap-on records a valuation allowance, when appropriate, to reduce its deferred tax assets if it is more-likely-than-not that some portion or all of the deferred tax assets will not be realized. While the company has considered future taxable income and ongoing prudent and feasible tax strategies in assessing the need for the valuation allowance, if these estimates and assumptions change in the future, the company may be required to adjust its valuation allowance. This could result in a charge to, or an increase in, income in the period such determination is made.

In addition, the company operates within multiple taxing jurisdictions and is subject to audit in these jurisdictions. The company records accruals for the estimated outcomes of these audits and the accruals may change in the future due to new developments in each matter. See Note 8 to the Consolidated Financial Statements for further information on income taxes.

Outlook

In 2015, Snap-on expects to make continued progress along its defined runways for coherent growth, leveraging capabilities already demonstrated in the automotive repair arena and developing and expanding its professional customer base, not only in automotive repair, but in adjacent markets, additional geographies and other areas, including in critical industries, where the cost and penalties for failure can be high. Through continued deployment of its Snap-on Value Creation Processes, Snap-on also anticipates making further progress in 2015 in the areas of safety, quality, customer connection, innovation and rapid continuous improvement. In pursuit of these initiatives, Snap-on expects that capital expenditures in 2015 will be in a range of \$80 million to \$90 million. Snap-on also anticipates that its full year 2015 effective income tax rate will be at or below its 2014 full year rate.

Item 7A: Quantitative and Qualitative Disclosures About Market Risk

Market, Credit and Economic Risks

Market risk is the potential economic loss that may result from adverse changes in the fair value of financial instruments. Snap-on is exposed to market risk from changes in foreign currency exchange rates and interest rates. Snap-on is also exposed to market risk associated with the stock-based portion of its deferred compensation plans. Snap-on monitors its exposure to these risks and attempts to manage the underlying economic exposures through the use of financial instruments such as foreign currency forward contracts, interest rate swap agreements, treasury lock agreements and prepaid equity forward agreements ("equity forwards"). Snap-on does not use derivative instruments for speculative or trading purposes. Snap-on's broad-based business activities help to reduce the impact that volatility in any particular area or related areas may have on its operating earnings as a whole. Snap-on's management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in the identification, assessment and control of various risks.

Foreign Currency Risk Management

Snap-on has significant international operations and is subject to certain risks inherent with foreign operations that include currency fluctuations. Foreign exchange risk exists to the extent that Snap-on has payment obligations or receipts denominated in currencies other than the functional currency, including intercompany loans denominated in foreign currencies. To manage these exposures, Snap-on identifies naturally offsetting positions and then purchases hedging instruments to protect the residual net exposures. See Note 10 to the Consolidated Financial Statements for information on foreign currency risk management.

Interest Rate Risk Management

Snap-on aims to control funding costs by managing the exposure created by the differing maturities and interest rate structures of Snap-on's borrowings through the use of interest rate swap agreements. Treasury lock agreements are used from time to time to manage potential changes in interest rates in anticipation of the issuance or sale of certain financial instruments. See Note 10 to the Consolidated Financial Statements for information on interest rate risk management.

Snap-on utilizes a Value-at-Risk ("VAR") model to determine the potential one-day loss in the fair value of its interest rate and foreign exchange-sensitive financial instruments from adverse changes in market factors. The VAR model estimates were made assuming normal market conditions and a 95% confidence level. Snap-on's computations are based on the inter-relationships among movements in various currencies and interest rates (variance/co-variance technique). These inter-relationships were determined by observing interest rate and foreign currency market changes over the preceding quarter.

The estimated maximum potential one-day loss in fair value, calculated using the VAR model, as of 2014 and 2013 year end was \$1.2 million and \$1.0 million, respectively, on interest rate-sensitive financial instruments, and \$0.4 million and \$0.5 million, respectively, on foreign currency-sensitive financial instruments. The VAR model is a risk management tool and does not purport to represent actual losses in fair value that will be incurred by Snap-on, nor does it consider the potential effect of favorable changes in market factors.

Stock-based Deferred Compensation Risk Management

Snap-on aims to manage market risk associated with the stock-based portion of its deferred compensation plans through the use of equity forwards. Equity forwards are used to aid in offsetting the potential mark-to-market effect on stock-based deferred compensation from changes in Snap-on's stock price. Since stock-based deferred compensation liabilities increase as the company's stock price rises and decrease as the company's stock price declines, the equity forwards are intended to mitigate the potential impact on compensation expense that may result from such mark-to-market changes. See Note 10 to the Consolidated Financial Statements for additional information on stock-based deferred compensation risk management.

Credit Risk

Credit risk is the possibility of loss from a customer's failure to make payments according to contract terms. Prior to extending credit, each customer is evaluated, taking into consideration the customer's financial condition, collateral, debt-servicing ability, past payment experience, credit bureau information, and other financial and qualitative factors that may affect the customer's ability to repay. Credit risk is also monitored regularly through the use of internal proprietary, custom scoring models used to evaluate each transaction at the time of the application for credit and by periodically updating those credit scores for ongoing monitoring purposes. Snap-on evaluates credit quality through the use of an internal proprietary measuring system that provides a framework to analyze finance and contract receivables on the basis of risk factors of the individual obligor as well as transaction specific risk. The finance and contract receivables are typically monitored through an asset quality review process that closely monitors past due accounts and initiates a progressive collection action process when appropriate.

Counterparty Risk

Snap-on is exposed to credit losses in the event of non-performance by the counterparties to its various financial agreements, including its foreign currency forward contracts, interest rate swap agreements and prepaid equity forward agreements. Snap-on does not obtain collateral or other security to support financial instruments subject to credit risk, but monitors the credit standing of the counterparties and generally enters into agreements with financial institution counterparties with a credit rating of A- or better. Snap-on does not anticipate non-performance by its counterparties, but cannot provide assurances.

Economic Risk

Economic risk is the possibility of loss resulting from economic instability in certain areas of the world. Snap-on continually monitors its exposure in these markets. Inflation has not had a significant impact on the company.

As a result of the above market, credit and economic risks, net earnings and revenues in any particular period may not be representative of full-year results and may vary significantly from year to year.

Commodity Risk

Snap-on is a purchaser of certain commodities such as steel, natural gas and electricity. The company is also a purchaser of components and parts that are integrated into the company's end products, as well as the purchaser of certain finished goods, all of which may contain various commodities including steel, aluminum and others. Snap-on's supply of raw materials and purchased components are generally and readily available from numerous suppliers.

The principal raw material used in the manufacture of the company's products is steel, which the company purchases in competitive, price-sensitive markets. To meet Snap-on's high quality standards, the company's steel needs range from specialized alloys, which are available only from a limited group of approved suppliers, to commodity types of alloys. These raw materials have historically exhibited price and demand cyclicity. Some of these materials have been, and in the future may be, in short supply, particularly in the event of a general economic recovery, mill shutdowns or production cut backs. As some steel alloys require specialized manufacturing procedures, Snap-on could experience inventory shortages if it were required to use an alternative manufacturer on short notice. Additionally, unexpected price increases for raw materials could result in higher prices to Snap-on's customers or an erosion of the margins on its products.

Snap-on believes its ability to sell product is also dependent on the number of vehicles on the road, the number of miles driven and the general aging of vehicles. These factors affect the frequency, type and amount of service and repair performed on vehicles by technicians, and therefore affect the demand for the number of technicians, the prosperity of the technicians and, subsequently, the demand technicians have for the company's tools, other products and services, and the value technicians place on those products and services. To the extent that the prices of gasoline and other petroleum-based fuels increase, as they have at times in recent years, consumers may turn to other methods of transportation, including more frequent use of public transportation, which could result in a decrease in the use of privately operated vehicles. A decrease in the use of privately operated vehicles may lead to fewer repairs and less demand for the company's products.

To the extent that commodity prices increase and the company does not have firm pricing agreements with its suppliers, the company may experience margin declines to the extent that it is not able to increase the selling prices of its products.

Item 8: Financial Statements and Supplementary Data

The financial statements and schedules are listed on page 60 and are incorporated by reference into this Item 8.

Item 9: Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A: Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

Snap-on maintains a system of disclosure controls and procedures that is designed to provide reasonable assurance that material information relating to the company and its consolidated subsidiaries is timely communicated to the officers who certify Snap-on's financial reports and to other members of senior management and the Board, as appropriate.

In accordance with Rule 13a-15(b) of the Securities Exchange Act of 1934 (the "Exchange Act"), the company's management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of the company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of January 3, 2015. Based upon their evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of January 3, 2015, to ensure that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time period specified in the Securities and Exchange Commission rules and forms, and to ensure that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control

There has not been any change in the company's internal control over financial reporting during the quarter ended January 3, 2015, that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting (as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f)).

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of our internal control over financial reporting based on the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework (2013)*. Based on this assessment, the company's management believes that, as of January 3, 2015, our internal control over financial reporting was effective at a reasonable assurance level. The company's internal control over financial reporting as of January 3, 2015, has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their attestation report, which is included herein.

Our management, including the Chief Executive Officer and Chief Financial Officer, does not expect that our internal control over financial reporting will prevent all error or fraud. Because of inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance and may not prevent or detect misstatements. Further, because of changes in conditions, the effectiveness of internal control over financial reporting may vary over time.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Snap-on Incorporated:

We have audited the internal control over financial reporting of Snap-on Incorporated and subsidiaries (the “Company”) as of January 3, 2015, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 3, 2015, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as of and for the year ended January 3, 2015, and our report dated February 12, 2015, expressed an unqualified opinion on those financial statements.

Item 9B: Other Information

None.

PART III**Item 10: Directors, Executive Officers and Corporate Governance**

Incorporated by reference to sections entitled “Item 1: Election of Directors,” “Corporate Governance Practices and Board Information” and “Other Information” in Snap-on’s 2015 Annual Meeting Proxy Statement, which is expected to be mailed to shareholders on or about March 12, 2015 (the “2015 Proxy Statement”).

The Section 16(a) filing compliance disclosure pursuant to Item 405 of Regulation S-K is contained in Snap-on’s 2015 Proxy Statement in the section entitled “Other Information – Section 16(a) Beneficial Ownership Reporting Compliance,” and is incorporated herein by reference.

Information regarding Snap-on’s executive officers, including their ages, business experience (for at least the last five years) and titles as of January 3, 2015, is presented below:

Nicholas T. Pinchuk (68) – Chairman of the Board of Directors since 2009, President and Chief Executive Officer since December 2007 and President and Chief Operating Officer from April to December 2007. Senior Vice President and President – Worldwide Commercial & Industrial Group from 2002 to 2007. Prior to joining Snap-on, Mr. Pinchuk held various positions, including President of Global Refrigeration Operations and President of Asia Pacific Operations, at Carrier Corporation, a producer of air conditioning, heating and refrigeration systems, and a subsidiary of United Technologies Corporation. Mr. Pinchuk serves on the board of directors of Columbus McKinnon Corporation.

Aldo J. Pagliari (60) – Senior Vice President – Finance and Chief Financial Officer since 2010. President – Snap-on Equipment from 2007 to 2010, and Group Controller / Director of Finance – Commercial & Industrial Group from 2002 to 2007.

Iain Boyd (52) – Vice President – Human Resources since 2007.

Constance R. Johnsen (57) – Vice President and Controller since 2003.

Thomas L. Kassouf (62) – Senior Vice President and President – Snap-on Tools Group since 2010. Senior Vice President and President – Commercial Division from 2007 to 2010.

Jeanne M. Moreno (60) – Vice President and Chief Information Officer since 2005.

Irwin M. Shur (56) – Vice President, General Counsel and Secretary since 2008.

Thomas J. Ward (62) – Senior Vice President and President – Repair Systems & Information Group since 2010. Senior Vice President and President – Snap-on Tools Group from 2007 to 2010.

There is no family relationship among the executive officers and there has been no involvement in legal proceedings during the past ten years that would be material to the evaluation of the ability or integrity of any of the executive officers. Executive officers may be elected by the Board or appointed by the Chief Executive Officer at the regular meeting of the Board that follows the Annual Shareholders’ Meeting, which is ordinarily held in April each year, and at such other times as new positions are created or vacancies must be filled.

Code of Ethics and Website Disclosure

Snap-on has adopted a written code of ethics that applies to its Chief Executive Officer, Chief Financial Officer, Vice President and Controller, and all other financial officers and executives performing similar functions. Snap-on has posted a copy of the code of ethics in the Investors/Corporate Governance section on the company's website at www.snapon.com. Snap-on will also post any amendments to these documents, or information about any waivers granted to directors or executive officers with respect to the Code of Business Conduct and Ethics, on the company's website at www.snapon.com.

Snap-on intends to satisfy the disclosure requirements under Item 10 of Form 8-K regarding amendments to, or waivers from, the code of ethics by posting such information in the "Investors" section of its corporate website at www.snapon.com.

Item 11: Executive Compensation

The information required by Item 11 is contained in Snap-on's 2015 Proxy Statement in the sections entitled "Executive Compensation," "Board Compensation," "Compensation Committee Report," and "Other Information" and is incorporated herein by reference.

Item 12: Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by Item 12 is contained in Snap-on's 2015 Proxy Statement in the sections entitled "Executive Compensation," "Security Ownership of Certain Beneficial Owners and Management," "Other Information" and "Item 3: Approval of the Amendment to, and Restatement of, the Snap-on Incorporated 2011 Incentive Stock and Awards Plan," and is incorporated herein by reference.

Item 13: Certain Relationships and Related Transactions, and Director Independence

Incorporated by reference to the sections entitled "Corporate Governance Practices and Board Information – Board Information" and "Other Information – Transactions with the Company" in Snap-on's 2015 Proxy Statement.

Item 14: Principal Accounting Fees and Services

Incorporated by reference to the section entitled "Deloitte & Touche LLP Fee Disclosure" in Snap-on's 2015 Proxy Statement.

PART IV

Item 15: Exhibits, Financial Statement Schedules

Item 15(a): Documents Filed as Part of This Report:

1. List of Financial Statements

Unless otherwise indicated, references to “fiscal 2014” or “2014” refer to the fiscal year ended January 3, 2015; references to “fiscal 2013” or “2013” refer to the fiscal year ended December 28, 2013; and references to “fiscal 2012” or “2012” refer to the fiscal year ended December 29, 2012. References to 2014, 2013 and 2012 year end refer to January 3, 2015, December 28, 2013, and December 29, 2012, respectively.

The following consolidated financial statements of Snap-on and the Report of Independent Registered Public Accounting Firm thereon, are filed as part of this report:

- Report of Independent Registered Public Accounting Firm.
- Consolidated Statements of Earnings for the 2014, 2013 and 2012 fiscal years.
- Consolidated Statements of Comprehensive Income for the 2014, 2013 and 2012 fiscal years.
- Consolidated Balance Sheets as of 2014 and 2013 year end.
- Consolidated Statements of Equity for the 2014, 2013 and 2012 fiscal years.
- Consolidated Statements of Cash Flows for the 2014, 2013 and 2012 fiscal years.
- Notes to Consolidated Financial Statements.

2. Financial Statement Schedules

All schedules are omitted because they are not applicable, or the required information is included in the consolidated financial statements or notes thereto.

3. List of Exhibits

The exhibits filed with or incorporated by reference in this report are as specified in the exhibit index included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Snap-on Incorporated:

We have audited the accompanying consolidated balance sheets of Snap-on Incorporated and subsidiaries (the “Company”) as of January 3, 2015, and December 28, 2013, and the related consolidated statements of earnings, comprehensive income, equity, and cash flows for each of the three years in the period ended January 3, 2015. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Snap-on Incorporated and subsidiaries as of January 3, 2015, and December 28, 2013, and the results of their operations and their cash flows for each of the three years in the period ended January 3, 2015, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of January 3, 2015, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 12, 2015 expressed an unqualified opinion on the Company’s internal control over financial reporting.

See Notes to Consolidated Financial Statements.

Note 1: Summary of Accounting Policies

Principles of consolidation and presentation: The Consolidated Financial Statements include the accounts of Snap-on Incorporated and its wholly-owned and majority-owned subsidiaries (collectively, “Snap-on” or “the company”).

Snap-on accounts for investments in unconsolidated affiliates where Snap-on has a greater than 20% but less than 50% ownership interest under the equity method of accounting. Investments in unconsolidated affiliates of \$13.3 million and \$14.2 million as of year-end 2014 and 2013, respectively, are included in “Other assets” on the accompanying Consolidated Balance Sheets. In 2012, Snap-on sold its equity investment in a non-strategic, unconsolidated affiliate for \$32.0 million, including \$27.0 million of cash and a five year, \$5.0 million note; there was no gain or loss on the sale. No equity investment dividends were received in any period presented. In the normal course of business, the company may purchase products or services from unconsolidated affiliates; purchases from unconsolidated affiliates were \$15.6 million, \$16.0 million and \$15.2 million in 2014, 2013 and 2012, respectively. The Consolidated Financial Statements do not include the accounts of the company’s independent franchisees. Snap-on’s Consolidated Financial Statements are prepared in conformity with generally accepted accounting principles in the United States of America (“U.S. GAAP”). All intercompany accounts and transactions have been eliminated.

Fiscal year accounting period: Snap-on’s fiscal year ends on the Saturday that is on or nearest to December 31. The 2014 fiscal year ended on January 3, 2015 (“2014”) and contained 53 weeks of operating results, with the extra week occurring in the fourth quarter. The impact of the additional week of operations was not material to Snap-on’s 2014 net sales or net earnings. The 2013 and 2012 fiscal years each contained 52 weeks of operating results and ended on December 28, 2013 (“2013”), and December 29, 2012 (“2012”), respectively.

Use of estimates: The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Financial instruments: The fair value of the company’s derivative financial instruments is generally determined using quoted prices in active markets for similar assets and liabilities. The carrying value of the company’s non-derivative financial instruments either approximates fair value, due to their short-term nature, or the amount disclosed for fair value is based upon a discounted cash flow analysis or quoted market values. See Note 10 for further information on financial instruments.

Revenue recognition: Snap-on recognizes revenue from the sale of tools and diagnostic and equipment products when contract terms are met, the price is fixed or determinable, collectability is reasonably assured and a product is shipped or risk of ownership has been transferred to and accepted by the customer. For sales contingent upon customer acceptance, revenue recognition is deferred until such obligations are fulfilled. Estimated product returns are recorded as a reduction in reported revenues at the time of sale based upon historical product return experience and gross profit margin adjusted for known trends. Provisions for customer volume rebates, discounts and allowances are also recorded as a reduction of reported revenues at the time of sale based on historical experience and known trends. Revenue related to maintenance, extended warranty and subscription agreements is recognized over the terms of the respective agreements.

Snap-on also recognizes revenue related to multiple element arrangements, including sales of hardware, software and software-related services. When a sales arrangement contains multiple elements, such as hardware and software products and/or services, Snap-on uses the relative selling price method to allocate revenues between hardware and software elements. For software elements that are not essential to the hardware’s functionality and related software post-contract customer support, vendor specific objective evidence (“VSOE”) of fair value is used to further allocate revenue to each element based on its relative fair value and, when necessary, the residual method is used to assign value to the delivered elements when VSOE only exists for the undelivered elements. The amount assigned to the products or services is recognized when the product is delivered and/or when the services are performed. In instances where the product and/or services are performed over an extended period, as is the case with subscription agreements or the providing of ongoing support, revenue is generally recognized on a straight-line basis over the term of the agreement, which generally ranges from 12 to 60 months.

Franchise fee revenue, including nominal, non-refundable initial fees, is recognized upon the granting of a franchise, which is when the company has performed substantially all initial services required by the franchise agreement. Franchise fee revenue also includes ongoing monthly fees (primarily for sales and business training as well as marketing and product promotion programs) that are recognized as the fees are earned. Franchise fee revenue totaled \$12.1 million, \$11.9 million and \$9.9 million in 2014, 2013 and 2012, respectively.

Financial services revenue: Snap-on also generates revenue from various financing programs that include (i) installment sales and lease contracts arising from franchisees' customers and Snap-on's industrial and other customers for the purchase or lease of tools and diagnostic and equipment products on an extended-term payment plan; and (ii) business loans and vehicle leases to franchisees. These financing programs are offered through Snap-on's wholly owned finance subsidiaries. Financial services revenue consists primarily of interest income on finance and contract receivables and is recognized over the life of the contracts, with interest computed on the average daily balances of the underlying contracts.

The decision to finance through Snap-on or another financing entity is solely at the election of the customer. When assessing customers for potential financing, Snap-on considers various factors regarding ability to pay including customers' financial condition, collateral, debt-servicing ability, past payment experience and credit bureau information. For finance and contract receivables, Snap-on assesses these factors through the use of credit quality indicators consisting primarily of customer credit risk scores combined with internal credit risk grades, collection experience and other internal metrics.

Financial services lease arrangements: Snap-on accounts for its financial services leases as direct financing or sales-type leases. The company determines the gross investment in the lease as the present value of the minimum lease payments using the interest rate implicit in the lease, net of amounts, if any, included therein for executor costs to be paid by Snap-on, together with any profit thereon. The difference between the gross investment in the lease and the related undiscounted minimum lease payments for the leased property is reported as unearned finance charges. Unearned finance charges are amortized to income over the life of the contract. The default covenants included in the lease arrangements are usual and customary, consistent with industry practice, and do not impact the lease classification. Except in circumstances where the company has concluded that a lessee's financial condition has deteriorated, the other default covenants under Snap-on's lease arrangements are objectively determinable.

Research and engineering: Snap-on incurred research and engineering costs of \$52.4 million, \$48.4 million and \$44.8 million in 2014, 2013 and 2012, respectively. Research and engineering costs are included in "Operating expenses" on the accompanying Consolidated Statements of Earnings.

Internally developed software: Costs incurred in the development of software that will ultimately be sold are capitalized from the time technological feasibility has been attained and capitalization ceases when the related product is ready for general release. During 2014, 2013 and 2012, Snap-on capitalized \$19.0 million, \$19.0 million and \$23.0 million, respectively, of such costs. Amortization of capitalized software development costs, which is included in "Cost of goods sold" on the accompanying Consolidated Statements of Earnings, was \$13.6 million in 2014, \$14.9 million in 2013 and \$14.3 million in 2012. Unamortized capitalized software development costs of \$50.2 million as of 2014 year end and \$45.1 million as of 2013 year end are included in "Other intangibles – net" on the accompanying Consolidated Balance Sheets.

Internal-use software: Costs that are incurred in creating software solutions and enhancements to those solutions are capitalized only during the application development stage of the project.

Shipping and handling: Amounts billed to customers for shipping and handling are included as a component of sales. Costs incurred by Snap-on for shipping and handling are included as a component of cost of goods sold when the costs relate to manufacturing activities. In 2014, 2013 and 2012, Snap-on incurred shipping and handling charges of \$40.3 million, \$37.9 million and \$37.1 million, respectively, that were recorded in "Cost of goods sold" on the accompanying Consolidated Statements of Earnings. Shipping and handling costs incurred in conjunction with selling or distribution activities are included as a component of operating expenses. In 2014, 2013 and 2012, Snap-on incurred shipping and handling charges of \$78.5 million, \$72.7 million and \$65.4 million, respectively; these charges were recorded in "Operating expenses" on the accompanying Consolidated Statements of Earnings.

Advertising and promotion: Production costs of future media advertising are deferred until the advertising occurs. All other advertising and promotion costs are expensed when incurred. For 2014, 2013 and 2012, advertising and promotion expenses totaled \$51.4 million, \$49.9 million and \$50.1 million, respectively. Advertising and promotion costs are included in “Operating expenses” on the accompanying Consolidated Statements of Earnings.

Warranties: Snap-on provides product warranties for specific product lines and accrues for estimated future warranty costs in the period in which the sale is recorded. See Note 15 for information on warranties.

Foreign currency: The financial statements of Snap-on’s foreign subsidiaries are translated into U.S. dollars. Assets and liabilities of foreign subsidiaries are translated at current rates of exchange, and income and expense items are translated at the average exchange rate for the period. The resulting translation adjustments are recorded directly into “Accumulated other comprehensive loss” on the accompanying Consolidated Balance Sheets. Foreign exchange transactions, net of foreign currency hedges, resulted in pretax losses of \$1.5 million, \$4.4 million and \$0.7 million in 2014, 2013 and 2012, respectively. Foreign exchange transaction gains and losses are reported in “Other income (expense) – net” on the accompanying Consolidated Statements of Earnings.

Income taxes: Current tax assets and liabilities are based upon an estimate of taxes refundable or payable for each of the jurisdictions in which the company is subject to tax. In the ordinary course of business, there is inherent uncertainty in quantifying income tax positions. Snap-on assesses income tax positions and records tax benefits for all years subject to examination based upon management’s evaluation of the facts, circumstances and information available at the reporting dates. For those tax positions where it is more-likely-than-not that a tax benefit will be sustained, Snap-on records the largest amount of tax benefit with a greater than 50% likelihood of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where it is not more-likely-than-not that a tax benefit will be sustained, no tax benefit is recognized in the financial statements. When applicable, associated interest and penalties are recognized as a component of income tax expense. Accrued interest and penalties are included within the related tax asset or liability on the accompanying Consolidated Balance Sheets.

Deferred income taxes are provided for temporary differences arising from differences in bases of assets and liabilities for tax and financial reporting purposes. Deferred income taxes are recorded on temporary differences using enacted tax rates in effect for the year in which the temporary differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more-likely-than-not that some portion or all of the deferred tax assets will not be realized. See Note 8 for further information on income taxes.

Per share data: Basic earnings per share calculations were computed by dividing net earnings attributable to Snap-on Incorporated by the corresponding weighted-average number of common shares outstanding for the period. The dilutive effect of the potential exercise of outstanding options and stock-settled stock appreciation rights (“SARs”) to purchase common shares is calculated using the treasury stock method. As of January 3, 2015 and December 28, 2013, there were no options or SARs outstanding that were anti-dilutive. Options to purchase 296,643 shares of Snap-on common stock as of 2012 year end were not included in the computation of diluted earnings per share as the exercise prices of the options were greater than the average market price of the common stock and, as a result, the effect on earnings per share would have been anti-dilutive. Performance-based equity awards do not affect the diluted earnings per share calculation until it is determined that the applicable performance metrics have been met. Snap-on had dilutive securities totaling 921,050 shares, 881,381 shares and 669,503 shares, as of the end of 2014, 2013 and 2012, respectively. See Note 13 for further information on equity awards.

Stock-based compensation: Snap-on recognizes the cost of employee services in exchange for awards of equity instruments based on the grant date fair value of those awards. That cost, based on the estimated number of awards that are expected to vest, is recognized on a straight-line basis over the period during which the employee is required to provide the service in exchange for the award. No compensation cost is recognized for awards for which employees do not render the requisite service. The grant date fair value of employee stock options and similar instruments is estimated using the Black-Scholes valuation model.

The Black-Scholes valuation model requires the input of subjective assumptions, including the expected life of the stock-based award and stock price volatility. The assumptions used are management’s best estimates, but the estimates involve inherent uncertainties and the application of management judgment. As a result, if other assumptions had been used, the recorded stock-based compensation expense could have been materially different from that depicted in the financial statements. See Note 13 for further information on stock-based compensation.

Derivatives: Snap-on utilizes derivative financial instruments, including foreign currency forward contracts, interest rate swap agreements, treasury lock agreements and prepaid equity forward agreements to manage its exposures to foreign currency exchange rate risks, interest rate risks, and market risk associated with the stock-based portion of its deferred compensation plans. Snap-on accounts for its derivative instruments at fair value. Snap-on does not hold or issue financial instruments for speculative or trading purposes. See Note 10 for further information on derivatives.

Cash equivalents: Snap-on considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. As of 2014 and 2013 year end, cash equivalents primarily consisted of money market funds of \$2.5 million and \$91.6 million, respectively. Cash equivalents are stated at cost, which approximates market value, and are considered to be Level 1 in the fair value hierarchy.

Receivables and allowances for doubtful accounts: All trade, finance and contract receivables are reported on the Consolidated Balance Sheets at their outstanding principal balance adjusted for any charge-offs and net of allowances for doubtful accounts. Finance and contract receivables also include accrued interest and contract acquisition costs, net of contract acquisition fees.

Snap-on maintains allowances for doubtful accounts to absorb probable losses inherent in its portfolio of receivables. The allowances for doubtful accounts represent management's estimate of the losses inherent in the company's receivables portfolio based on ongoing assessments and evaluations of collectability and historical loss experience. In estimating losses inherent in each of its receivable portfolios (trade, finance and contract receivables), Snap-on uses historical loss experience rates by portfolio and applies them to a related aging analysis. Determination of the proper level of allowances by portfolio requires management to exercise significant judgment about the timing, frequency and severity of credit losses that could materially affect the provision for credit losses and, therefore, net earnings. The allowances for doubtful accounts takes into consideration numerous quantitative and qualitative factors, by receivable type, including historical loss experience, collection experience, delinquency trends, economic conditions and credit risk quality as follows:

- Snap-on evaluates the collectability of receivables based on a combination of various financial and qualitative factors that may affect the customers' ability to pay. These factors may include customers' financial condition, collateral, debt-servicing ability, past payment experience and credit bureau information.
- For finance and contract receivables, Snap-on assesses quantitative and qualitative factors through the use of credit quality indicators consisting primarily of collection experience and other internal metrics as follows:
 - Collection experience – Snap-on conducts monthly reviews of credit and collection performance for each of its finance and contract receivable portfolios focusing on data such as delinquency trends, non-performing assets, and charge-off and recovery activity. These reviews allow for the formulation of collection strategies and potential collection policy modifications in response to changing risk profiles in the finance and contract receivable portfolios.
 - Other internal metrics – Snap-on maintains a system that aggregates credit exposure by customer, risk classification and geographical area, among other factors, to further monitor changing risk profiles.

Management performs detailed reviews of its receivables on a monthly and/or quarterly basis to assess the adequacy of the allowances based on historical and current trends and other factors affecting credit losses and to determine if any impairment has occurred. A receivable is impaired when it is probable that all amounts related to the receivable will not be collected according to the contractual terms of the agreement. Additions to the allowances for doubtful accounts are maintained through adjustments to the provision for credit losses, which are charged to current period earnings; amounts determined to be uncollectable are charged directly against the allowances, while amounts recovered on previously charged-off accounts increase the allowances. Net charge-offs include the principal amount of losses charged-off as well as charged-off interest and fees. Recovered interest and fees previously charged-off are recorded through the allowances for doubtful accounts and increase the allowances. Finance receivables are assessed for charge-off when an account becomes 120 days past due and are charged-off typically within 60 days of asset repossession. Contract receivables related to equipment leases are generally charged-off when an account becomes 150 days past due, while contract receivables related to franchise finance and van leases are generally charged-off up to 180 days past the asset return date. For finance and contract receivables, customer bankruptcies are generally charged-off upon notification that the associated debt is not being reaffirmed or, in any event, no later than 180 days past due.

Snap-on does not believe that its trade accounts, finance or contract receivables represent significant concentrations of credit risk because of the diversified portfolio of individual customers and geographical areas. See Note 3 for further information on receivables and allowances for doubtful accounts.

Other accrued liabilities: Supplemental balance sheet information for “Other accrued liabilities” as of 2014 and 2013 year end is as follows:

<i>(Amounts in millions)</i>	2014	2013
Income taxes	\$ 15.2	\$ 7.7
Accrued restructuring	6.5	4.0
Accrued warranty	17.3	17.0
Deferred subscription revenue	34.1	26.6
Accrued property, payroll and other taxes	41.8	31.3
Accrued selling and promotion expense	24.5	24.5
Other	158.9	132.6
Total other accrued liabilities	\$ 298.3	\$ 243.7

Inventories: Snap-on values its inventory at the lower of cost or market and adjusts for the value of inventory that is estimated to be excess, obsolete or otherwise unmarketable. Snap-on records allowances for excess and obsolete inventory based on historical and estimated future demand and market conditions. Allowances for raw materials are largely based on an analysis of raw material age and actual physical inspection of raw material for fitness for use. As part of evaluating the adequacy of allowances for work-in-progress and finished goods, management reviews individual product stock-keeping units (SKUs) by product category and product life cycle. Cost adjustments for each product category/product life-cycle state are generally established and maintained based on a combination of historical experience, forecasted sales and promotions, technological obsolescence, inventory age and other actual known conditions and circumstances. Should actual product marketability and raw material fitness for use be affected by conditions that are different from management estimates, further adjustments to inventory allowances may be required.

Snap-on adopted the “last-in, first-out” (“LIFO”) inventory valuation method in 1973 for its U.S. locations. Snap-on’s U.S. inventories accounted for on a LIFO basis consist of purchased product and inventory manufactured at the company’s heritage U.S. manufacturing facilities (primarily hand tools and tool storage). As Snap-on began acquiring businesses in the 1990’s, the company retained the “first-in, first-out” (“FIFO”) inventory valuation methodology used by the predecessor businesses prior to their acquisition by Snap-on; the company does not adopt the LIFO inventory valuation methodology for new acquisitions. See Note 4 for further information on inventories.

Property and equipment: Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation and amortization are provided on a straight-line basis over estimated useful lives. Major repairs that extend the useful life of an asset are capitalized, while routine maintenance and repairs are expensed as incurred. Capitalized software included in property and equipment reflects costs related to internally developed or purchased software for internal use and is amortized on a straight-line basis over their estimated useful lives. Long-lived assets are evaluated for impairment when events or circumstances indicate that the carrying amount of the long-lived asset may not be recoverable. See Note 5 for further information on property and equipment.

Goodwill and other intangible assets: Goodwill and other indefinite-lived assets are tested for impairment annually or more frequently if events or changes in circumstances indicate that the assets might be impaired. Annual impairment tests are performed by the company in the second quarter of each year. Snap-on evaluates the existence of goodwill and indefinite-lived intangible asset impairment on the basis of whether the assets are fully recoverable from projected, discounted cash flows of the related reportable unit or asset. Intangible assets with finite lives are amortized over their estimated useful lives using straight-line and accelerated methods depending on the nature of the particular asset. See Note 6 for further information on goodwill and other intangible assets.

New accounting standards*Revenue from Contracts with Customers*

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) No. 2014-09, *Revenue from Contracts with Customers*, which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The ASU is based on the principle that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Entities have the option of using either a full retrospective or a modified retrospective approach for the adoption of this standard. The ASU becomes effective for Snap-on at the beginning of its 2017 fiscal year; early adoption is not permitted. The company is currently assessing the impact that this standard will have on its consolidated financial statements.

Note 2: Acquisitions

On May 28, 2014, Snap-on acquired substantially all of the assets of Pro-Cut International, Inc. (“Pro-Cut”) for a cash purchase price of \$41.3 million. Pro-Cut designs, manufactures and distributes on-car brake lathes, related equipment and accessories used in brake servicing by automotive repair facilities. The acquisition of the Pro-Cut product line complemented and increased Snap-on’s existing undercar equipment product offering, broadened its established capabilities in serving vehicle repair facilities and expanded the company’s presence with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Pro-Cut have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Pro-Cut acquisition were neither significant nor material to Snap-on’s results of operations or financial position.

On May 13, 2013, Snap-on acquired Challenger Lifts, Inc. (“Challenger”) for a cash purchase price of \$38.2 million. Challenger designs, manufactures and distributes a comprehensive line of vehicle lifts and accessories to a diverse customer base in the automotive repair sector. The acquisition of the Challenger vehicle lift product line complemented and increased Snap-on’s existing undercar equipment product offering, broadened its established capabilities in serving vehicle repair facilities and expanded the company’s presence with repair shop owners and managers. For segment reporting purposes, the results of operations and assets of Challenger have been included in the Repair Systems & Information Group since the date of acquisition. Pro forma financial information has not been presented as the net effects of the Challenger acquisition were neither significant nor material to Snap-on’s results of operations or financial position.

Note 3: Receivables*Trade and Other Accounts Receivable*

Snap-on’s trade and other accounts receivable primarily arise from the sale of tools and diagnostic and equipment products to a broad range of industrial and commercial customers and to Snap-on’s independent franchise van channel on a non-extended-term basis with payment terms generally ranging from 30 to 120 days.

The components of Snap-on’s trade and other accounts receivable as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013
Trade and other accounts receivable	\$ 567.0	\$ 546.5
Allowances for doubtful accounts	(16.2)	(14.9)
Total trade and other accounts receivable – net	\$ 550.8	\$ 531.6

Finance and Contract Receivables

Snap-on Credit LLC (“SOC”), the company’s financial services operation in the United States, originates extended-term finance and contract receivables on sales of Snap-on’s products through the U.S. franchisee and customer network and to Snap-on’s industrial and other customers; Snap-on’s foreign finance subsidiaries provide similar financing internationally. Interest income on finance and contract receivables is included in “Financial services revenue” on the accompanying Consolidated Statements of Earnings.

Snap-on’s finance receivables are comprised of extended-term installment payment contracts to both technicians and independent shop owners (i.e., franchisees’ customers) to enable them to purchase tools and diagnostic and equipment products on an extended-term payment plan, generally with expected average payment terms of approximately three years. Contract receivables, with payment terms of up to 10 years, are comprised of extended-term installment payment contracts to a broad base of industrial and other customers worldwide, including shop owners, both independents and national chains, for their purchase of tools and diagnostic and equipment products. Contract receivables also include extended-term installment loans to franchisees to meet a number of financing needs including working capital loans, loans to enable new franchisees to fund the purchase of the franchise and van leases. Finance and contract receivables are generally secured by the underlying tools and/or diagnostic or equipment products financed and, for installment loans to franchisees, other franchisee assets.

The components of Snap-on’s current finance and contract receivables as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013
Finance receivables, net of unearned finance charges of \$15.6 million and \$14.1 million, respectively	\$ 414.6	\$ 385.3
Contract receivables, net of unearned finance charges of \$13.9 million and \$13.0 million, respectively	75.5	69.6
Total	490.1	454.9
Allowances for doubtful accounts:		
Finance receivables	(12.2)	(10.7)
Contract receivables	(1.0)	(1.2)
Total	(13.2)	(11.9)
Total current finance and contract receivables – net	\$ 476.9	\$ 443.0
Finance receivables – net	\$ 402.4	\$ 374.6
Contract receivables – net	74.5	68.4
Total current finance and contract receivables – net	\$ 476.9	\$ 443.0

The components of Snap-on’s finance and contract receivables with payment terms beyond one year as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013
Finance receivables, net of unearned finance charges of \$9.9 million and \$8.9 million, respectively	\$ 671.0	\$ 577.7
Contract receivables, net of unearned finance charges of \$19.4 million and \$17.3 million, respectively	244.5	219.2
Total	915.5	796.9
Allowances for doubtful accounts:		
Finance receivables	(20.5)	(17.1)
Contract receivables	(2.5)	(2.1)
Total	(23.0)	(19.2)
Total long-term finance and contract receivables – net	\$ 892.5	\$ 777.7
Finance receivables – net	\$ 650.5	\$ 560.6
Contract receivables – net	242.0	217.1
Total long-term finance and contract receivables – net	\$ 892.5	\$ 777.7

Long-term finance and contract receivables installments, net of unearned finance charges, as of 2014 and 2013 year end are scheduled as follows:

(Amounts in millions)	2014		2013	
	Finance Receivables	Contract Receivables	Finance Receivables	Contract Receivables
Due in Months:				
13 – 24	\$ 320.2	\$ 58.7	\$ 287.2	\$ 53.3
25 – 36	212.0	50.1	179.6	45.6
37 – 48	106.2	41.7	84.0	36.9
49 – 60	32.6	31.6	26.7	28.9
Thereafter	–	62.4	0.2	54.5
Total	<u>\$ 671.0</u>	<u>\$ 244.5</u>	<u>\$ 577.7</u>	<u>\$ 219.2</u>

Delinquency is the primary indicator of credit quality for finance and contract receivables. Receivable balances are considered delinquent when contractual payments become 30 days past due.

Finance receivables are generally placed on nonaccrual status (nonaccrual of interest and other fees) (i) when a customer is placed on repossession status; (ii) upon receipt of notification of bankruptcy; (iii) upon notification of the death of a customer; or (iv) in other instances in which management concludes collectability is not reasonably assured. Finance receivables that are considered nonperforming include receivables that are on nonaccrual status and receivables that are generally more than 90 days past due.

Contract receivables are generally placed on nonaccrual status (i) when a receivable is more than 90 days past due or at the point a customer's account is placed on terminated status regardless of its delinquency status; (ii) upon notification of the death of a customer; or (iii) in other instances in which management concludes collectability is not reasonably assured. Contract receivables that are considered nonperforming include receivables that are on nonaccrual status.

The accrual of interest and other fees is resumed when the finance or contract receivable becomes contractually current and collection of all remaining contractual amounts due is reasonably assured. Finance and contract receivables are evaluated for impairment on a collective basis. A receivable is impaired when it is probable that all amounts related to the receivable will not be collected according to the contractual terms of the applicable agreement. Impaired receivables are covered by the company's finance and contract allowances for doubtful accounts reserves and are charged-off against the reserves when appropriate. As of 2014 and 2013 year end, there were \$15.5 million and \$15.2 million, respectively, of impaired finance receivables, and there were \$1.5 million and \$1.0 million, respectively, of impaired contract receivables.

It is the general practice of Snap-on's financial services business to not engage in contract or loan modifications. In limited instances, Snap-on's financial services business may modify certain impaired receivables in troubled debt restructurings. The amount and number of restructured finance and contract receivables as of 2014 and 2013 year end were immaterial to both the financial services portfolio and the company's results of operations and financial position.

The aging of finance and contract receivables as of 2014 and 2013 year end is as follows:

(Amounts in millions)	30-59 Days Past Due	60-90 Days Past Due	Greater Than 90 Days Past Due	Total Past Due	Total Not Past Due	Total	Greater Than 90 Days Past Due and Accruing
2014 year end:							
Finance receivables	\$ 9.8	\$ 6.7	\$ 10.4	\$ 26.9	\$ 1,058.7	\$ 1,085.6	\$ 7.7
Contract receivables	0.9	0.7	1.1	2.7	317.3	320.0	0.1
2013 year end:							
Finance receivables	\$ 9.3	\$ 5.7	\$ 9.6	\$ 24.6	\$ 938.4	\$ 963.0	\$ 7.0
Contract receivables	1.2	0.8	0.7	2.7	286.1	288.8	0.1

The amount of performing and nonperforming finance and contract receivables based on payment activity as of 2014 and 2013 year end is as follows:

<i>(Amounts in millions)</i>	2014		2013	
	Finance Receivables	Contract Receivables	Finance Receivables	Contract Receivables
Performing	\$ 1,070.1	\$ 318.5	\$ 947.8	\$ 287.8
Nonperforming	15.5	1.5	15.2	1.0
Total	<u>\$ 1,085.6</u>	<u>\$ 320.0</u>	<u>\$ 963.0</u>	<u>\$ 288.8</u>

The amount of finance and contract receivables on nonaccrual status as of 2014 and 2013 year end is as follows:

<i>(Amounts in millions)</i>	2014	2013
Finance receivables	\$ 7.9	\$ 8.3
Contract receivables	1.5	1.0

The following is a rollforward of the allowances for credit losses for finance and contract receivables for 2014 and 2013:

<i>(Amounts in millions)</i>	2014		2013	
	Finance Receivables	Contract Receivables	Finance Receivables	Contract Receivables
Allowances for doubtful accounts:				
Beginning of year	\$ 27.8	\$ 3.3	\$ 26.5	\$ 3.2
Provision for bad debt expense	27.4	1.9	20.4	2.2
Charge-offs	(27.5)	(2.0)	(23.5)	(2.2)
Recoveries	5.1	0.4	4.5	0.2
Currency translation	(0.1)	(0.1)	(0.1)	(0.1)
End of year	<u>\$ 32.7</u>	<u>\$ 3.5</u>	<u>\$ 27.8</u>	<u>\$ 3.3</u>

The following is a rollforward of the combined allowances for doubtful accounts related to trade and other accounts receivable, as well as finance and contract receivables, for 2014, 2013 and 2012:

<i>(Amounts in millions)</i>	Balance at Beginning of Year	Expenses	Deductions ⁽¹⁾	Balance at End of Year
Allowances for doubtful accounts:				
2014	\$ 46.0	\$ 41.7	\$ (35.3)	\$ 52.4
2013	48.7	30.7	(33.4)	46.0
2012	50.3	31.3	(32.9)	48.7

⁽¹⁾ Represents write-offs of bad debts, net of recoveries, and the net impact of currency translation.

Note 4: Inventories

Inventories by major classification as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013
Finished goods	\$ 415.3	\$ 374.7
Work in progress	45.3	45.0
Raw materials	87.5	87.3
Total FIFO value	548.1	507.0
Excess of current cost over LIFO cost	(72.6)	(72.6)
Total inventories – net	\$ 475.5	\$ 434.4

Inventories accounted for using the FIFO method as of 2014 and 2013 year end approximated 58% and 60%, respectively, of total inventories. The company accounts for its non-U.S. inventory on the FIFO method. As of 2014 year end, approximately 31% of the company's U.S. inventory was accounted for using the FIFO method and 69% was accounted for using the LIFO method. There were no LIFO inventory liquidations in 2014, 2013 or 2012.

Note 5: Property and Equipment

Snap-on's property and equipment values (which are carried at cost) as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013
Land	\$ 18.3	\$ 19.6
Buildings and improvements	294.0	292.0
Machinery, equipment and computer software	750.8	725.4
Property and equipment – gross	1,063.1	1,037.0
Accumulated depreciation and amortization	(658.6)	(644.5)
Property and equipment – net	\$ 404.5	\$ 392.5

The estimated service lives of property and equipment are principally as follows:

Buildings and improvements	3 to 50 years
Machinery, equipment and computer software	2 to 15 years

The cost and accumulated depreciation of property and equipment under capital leases as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013
Buildings and improvements	\$ 20.2	\$ 23.5
Accumulated depreciation	(9.7)	(10.1)
Net book value	\$ 10.5	\$ 13.4

Depreciation expense was \$54.8 million, \$51.2 million and \$50.2 million in 2014, 2013 and 2012, respectively.

Note 6: Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill by segment for 2014 and 2013 are as follows:

<i>(Amounts in millions)</i>	Commercial & Industrial Group	Snap-on Tools Group	Repair Systems & Information Group	Total
Balance as of 2012 year end	\$ 306.9	\$ 12.5	\$ 488.0	\$ 807.4
Currency translation	5.6	–	1.0	6.6
Acquisition	–	–	24.8	24.8
Balance as of 2013 year end	\$ 312.5	\$ 12.5	\$ 513.8	\$ 838.8
Currency translation	(36.6)	–	(4.7)	(41.3)
Acquisition	–	–	13.2	13.2
Balance as of 2014 year end	<u>\$ 275.9</u>	<u>\$ 12.5</u>	<u>\$ 522.3</u>	<u>\$ 810.7</u>

Goodwill of \$810.7 million as of 2014 year end includes \$13.2 million of tax-deductible goodwill from the purchase accounting related to the Pro-Cut acquisition and \$24.8 million of non-tax-deductible goodwill from the purchase accounting related to the Challenger acquisition. See Note 2 for additional information on acquisitions.

Additional disclosures related to other intangible assets as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	2014		2013	
	Gross Carrying Value	Accumulated Amortization	Gross Carrying Value	Accumulated Amortization
Amortized other intangible assets:				
Customer relationships	\$ 147.1	\$ (71.2)	\$ 140.8	\$ (62.8)
Developed technology	19.2	(19.2)	19.5	(19.2)
Internally developed software	142.2	(92.0)	125.3	(80.2)
Patents	29.3	(20.6)	28.8	(20.4)
Trademarks	2.5	(1.6)	2.8	(1.6)
Other	7.6	(1.6)	7.3	(1.4)
Total	347.9	(206.2)	324.5	(185.6)
Non-amortized trademarks	61.6	–	51.6	–
Total other intangible assets	<u>\$ 409.5</u>	<u>\$ (206.2)</u>	<u>\$ 376.1</u>	<u>\$ (185.6)</u>

The gross carrying values of customer relationships and non-amortized trademarks as of 2014 year end include \$7.4 million and \$13.8 million, respectively, related to the Pro-Cut acquisition. The gross carrying values of customer relationships and non-amortized trademarks as of both 2014 and 2013 year end include \$5.2 million and \$3.2 million, respectively, related to the Challenger acquisition.

Significant and unanticipated changes in circumstances, such as declines in profitability and cash flow due to significant and long-term deterioration in macroeconomic, industry and market conditions, the loss of key customers, changes in technology or markets, significant changes in key personnel or litigation, a significant and sustained decrease in share price and/or other events, including effects from the sale or disposal of a reporting unit, could require a provision for impairment of goodwill and/or other intangible assets in a future period. As of 2014 year end, the company has no accumulated impairment losses.

The weighted-average amortization periods related to other intangible assets are as follows:

	<u>In Years</u>
Customer relationships	15
Developed technology	5
Internally developed software	3
Patents	10
Trademarks	6
Other	39

Snap-on is amortizing its customer relationships on both an accelerated and straight-line basis over a 15 year weighted-average life; the remaining intangibles are amortized on a straight-line basis. The weighted-average amortization period for all amortizable intangibles on a combined basis is 12 years.

The company's customer relationships generally have contractual terms of three to five years and are typically renewed without significant cost to the company. The weighted-average 15 year life for customer relationships is based on the company's historical renewal experience. Intangible asset renewal costs are expensed as incurred.

The aggregate amortization expense for 2014, 2013 and 2012 was \$24.7 million, \$25.5 million and \$26.5 million, respectively. Based on current levels of amortizable intangible assets and estimated weighted-average useful lives, estimated annual amortization expense is expected to be \$24.3 million in 2015, \$19.5 million in 2016, \$16.1 million in 2017, \$13.4 million in 2018, and \$12.8 million in 2019.

Note 7: Exit and Disposal Activities

Snap-on recorded costs associated with exit and disposal activities of \$6.5 million and \$6.4 million during 2014 and 2013, respectively. The 2014 and 2013 costs associated with exit and disposal activities by operating segment are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Exit and disposal costs:		
Cost of goods sold:		
Commercial & Industrial Group	\$ 1.0	\$ 2.5
Snap-on Tools Group	–	0.2
Repair Systems & Information Group	4.7	1.7
Total cost of goods sold	<u>5.7</u>	<u>4.4</u>
Operating expenses:		
Commercial & Industrial Group	0.4	0.4
Snap-on Tools Group	–	0.3
Repair Systems & Information Group	0.4	1.2
Total operating expenses	<u>0.8</u>	<u>1.9</u>
Financial Services	–	0.1
Total exit and disposal costs:		
Commercial & Industrial Group	1.4	2.9
Snap-on Tools Group	–	0.5
Repair Systems & Information Group	5.1	2.9
Financial Services	–	0.1
Total exit and disposal costs	<u>\$ 6.5</u>	<u>\$ 6.4</u>

Costs associated with exit and disposal activities in 2014 primarily related to headcount reduction and facility consolidation initiatives. Costs associated with exit and disposal activities in 2013 primarily related to headcount reductions from the ongoing optimization of the company's cost structure in Europe and various other management and realignment actions. All \$6.5 million of exit and disposal costs incurred in 2014 qualified for accrual treatment. Of the \$6.4 million of exit and disposal costs incurred in 2013, \$6.0 million qualified for accrual treatment.

Snap-on's exit and disposal accrual activity related to 2014 and 2013 actions is as follows:

<i>(Amounts in millions)</i>	Balance at 2012 Year End	Provision in 2013	Usage in 2013	Balance at 2013 Year End	Provision in 2014	Usage in 2014	Balance at 2014 Year End
Severance costs:							
Commercial & Industrial Group	\$ 6.2	\$ 2.8	\$ (7.5)	\$ 1.5	\$ 1.4	\$ (2.1)	\$ 0.8
Snap-on Tools Group	0.1	0.2	(0.1)	0.2	-	(0.2)	-
Repair Systems & Information Group	0.7	2.9	(1.3)	2.3	5.1	(1.7)	5.7
Financial Services	-	0.1	(0.1)	-	-	-	-
Facility-related costs:							
Commercial & Industrial Group	0.2	-	(0.2)	-	-	-	-
Total	<u>\$ 7.2</u>	<u>\$ 6.0</u>	<u>\$ (9.2)</u>	<u>\$ 4.0</u>	<u>\$ 6.5</u>	<u>\$ (4.0)</u>	<u>\$ 6.5</u>

Snap-on reduced headcount by approximately 80 employees in 2014 as part of its restructuring actions. The exit and disposal accrual of \$6.5 million as of 2014 year end is expected to be fully utilized in 2015.

Snap-on expects to fund the remaining cash requirements of its exit and disposal activities with available cash on hand, cash flows from operations and borrowings under the company's existing credit facilities. The estimated costs for the exit and disposal activities were based on management's best business judgment under prevailing circumstances.

Note 8: Income Taxes

The source of earnings before income taxes and equity earnings consisted of the following:

<i>(Amounts in millions)</i>	2014	2013	2012
United States	\$ 481.1	\$ 406.7	\$ 365.2
Foreign	149.8	119.5	95.0
Total	<u>\$ 630.9</u>	<u>\$ 526.2</u>	<u>\$ 460.2</u>

The provision (benefit) for income taxes consisted of the following:

<i>(Amounts in millions)</i>	2014	2013	2012
Current:			
Federal	\$ 137.6	\$ 115.5	\$ 80.3
Foreign	41.2	27.6	26.1
State	17.5	14.1	12.5
Total current	<u>196.3</u>	<u>157.2</u>	<u>118.9</u>
Deferred:			
Federal	10.0	6.9	32.7
Foreign	(8.2)	2.0	(8.2)
State	1.4	0.6	4.8
Total deferred	<u>3.2</u>	<u>9.5</u>	<u>29.3</u>
Total income tax provision	<u>\$ 199.5</u>	<u>\$ 166.7</u>	<u>\$ 148.2</u>

The following is a reconciliation of the statutory federal income tax rate to Snap-on's effective tax rate:

	2014	2013	2012
Statutory federal income tax rate	35.0%	35.0%	35.0%
Increase (decrease) in tax rate resulting from:			
State income taxes, net of federal benefit	2.2	2.1	2.5
Noncontrolling interests	(0.5)	(0.6)	(0.6)
Repatriation of foreign earnings	(0.4)	–	(1.3)
Change in valuation allowance for deferred tax assets	(0.9)	0.7	1.0
Adjustments to tax accruals and reserves	0.5	(1.3)	(1.7)
Foreign rate differences	(2.2)	(1.7)	(1.5)
Domestic production activities deduction	(2.0)	(2.7)	(1.6)
Other	(0.1)	0.2	0.4
Effective tax rate	<u>31.6%</u>	<u>31.7%</u>	<u>32.2%</u>

Snap-on's effective income tax rate on earnings attributable to Snap-on Incorporated was 32.1% in 2014, 32.3% in 2013, and 32.8% in 2012.

Temporary differences that give rise to the net deferred income tax asset (liability) as of 2014, 2013 and 2012 year end are as follows:

<i>(Amounts in millions)</i>	2014	2013	2012
Current deferred income tax assets (liabilities):			
Inventories	\$ 29.2	\$ 24.4	\$ 25.0
Accruals not currently deductible	72.7	63.2	60.4
Valuation allowance	(1.1)	(2.4)	(3.7)
Total current (included in deferred income tax assets and other accrued liabilities)	<u>100.8</u>	<u>85.2</u>	<u>81.7</u>
Long-term deferred income tax assets (liabilities):			
Employee benefits	91.5	62.5	108.1
Net operating losses	53.5	59.9	59.2
Depreciation and amortization	(191.2)	(180.8)	(161.4)
Valuation allowance	(33.7)	(43.0)	(40.2)
Equity-based compensation	19.6	17.6	17.1
Other	(5.7)	(2.9)	0.4
Total long term	<u>(66.0)</u>	<u>(86.7)</u>	<u>(16.8)</u>
Net deferred income tax asset (liability)	<u>\$ 34.8</u>	<u>\$ (1.5)</u>	<u>\$ 64.9</u>

As of 2014 year end, Snap-on had tax net operating loss carryforwards totaling \$305.3 million as follows:

<i>(Amounts in millions)</i>	<u>State</u>	<u>United States</u>	<u>Foreign</u>	<u>Total</u>
Year of expiration:				
2015 – 2019	\$ –	\$ –	\$ 32.6	\$ 32.6
2020 – 2024	0.3	–	13.7	14.0
2025 – 2029	–	–	21.1	21.1
2030 – 2034	142.8	–	14.3	157.1
Indefinite	–	–	80.5	80.5
Total net operating loss carryforwards	<u>\$ 143.1</u>	<u>\$ –</u>	<u>\$ 162.2</u>	<u>\$ 305.3</u>

A valuation allowance totaling \$34.8 million, \$45.4 million and \$43.9 million as of 2014, 2013 and 2012 year end, respectively, has been established for deferred income tax assets primarily related to certain subsidiary loss carryforwards that may not be realized. Realization of the net deferred income tax assets is dependent on generating sufficient taxable income prior to their expiration. Although realization is not assured, management believes it is more-likely-than-not that the net deferred income tax assets will be realized. The amount of the net deferred income tax assets considered realizable, however, could change in the near term if estimates of future taxable income during the carryforward period fluctuate.

The following is a reconciliation of the beginning and ending amounts of unrecognized tax benefits for 2014, 2013 and 2012:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Unrecognized tax benefits at beginning of year	\$ 4.6	\$ 6.8	\$ 11.0
Gross increases – tax positions in prior periods	2.1	1.5	0.7
Gross decreases – tax positions in prior periods	–	(1.6)	(4.9)
Gross increases – tax positions in the current period	1.8	0.5	1.2
Settlements with taxing authorities	(1.6)	(2.1)	–
Lapsing of statutes of limitations	(0.5)	(0.5)	(1.2)
Unrecognized tax benefits at end of year	<u>\$ 6.4</u>	<u>\$ 4.6</u>	<u>\$ 6.8</u>

Of the \$6.4 million, \$4.6 million and \$6.8 million of unrecognized tax benefits as of 2014, 2013 and 2012 year end, respectively, approximately \$6.4 million, \$4.6 million and \$4.1 million, respectively, would impact the effective income tax rate if recognized.

Interest and penalties related to unrecognized tax benefits are recorded in income tax expense. During 2014 and 2013, the company reversed a net \$0.4 million and \$0.6 million, respectively, of interest and penalties to income associated with unrecognized tax benefits. As of 2014, 2013 and 2012 year end, the company has provided for \$0.5 million, \$0.9 million and \$1.6 million, respectively, of accrued interest and penalties related to unrecognized tax benefits. The unrecognized tax benefits and related accrued interest and penalties are included in “Other long-term liabilities” on the accompanying Consolidated Balance Sheets.

Snap-on and its subsidiaries file income tax returns in the United States and in various state, local and foreign jurisdictions. It is reasonably possible that certain unrecognized tax benefits may either be settled with taxing authorities or the statutes of limitations for such items may lapse within the next 12 months, causing Snap-on’s gross unrecognized tax benefits to decrease by a range of zero to \$0.9 million. Over the next 12 months, Snap-on anticipates taking certain tax positions on various tax returns for which the related tax benefit does not meet the recognition threshold. Accordingly, Snap-on’s gross unrecognized tax benefits may increase by a range of zero to \$0.7 million over the next 12 months for uncertain tax positions expected to be taken in future tax filings.

With few exceptions, Snap-on is no longer subject to U.S. federal and state/local income tax examinations by tax authorities for years prior to 2009, and Snap-on is no longer subject to non-U.S. income tax examinations by tax authorities for years prior to 2007.

The undistributed earnings of all non-U.S. subsidiaries totaled \$619.1 million, \$556.0 million and \$492.2 million as of 2014, 2013 and 2012 year end, respectively. Snap-on has not provided any deferred taxes on these undistributed earnings as it considers the undistributed earnings to be permanently invested. Determination of the amount of unrecognized deferred income tax liability related to these earnings is not practicable.

Note 9: Short-term and Long-term Debt

Short-term and long-term debt as of 2014 and 2013 year end consisted of the following:

<i>(Amounts in millions)</i>	2014	2013
5.85% unsecured notes due March 2014	\$ —	\$ 100.0
5.50% unsecured notes due 2017	150.0	150.0
4.25% unsecured notes due 2018	250.0	250.0
6.70% unsecured notes due 2019	200.0	200.0
6.125% unsecured notes due 2021	250.0	250.0
Other debt*	69.3	22.0
	919.3	972.0
Less: notes payable and current maturities of long-term debt	(56.6)	(113.1)
Total long-term debt	\$ 862.7	\$ 858.9

* Includes fair value adjustments related to interest rate swaps.

Notes payable of \$56.6 million as of 2014 year end included \$37.0 million of commercial paper borrowings and \$19.6 million of other notes; there were no current maturities of long-term debt as of 2014 year end. Notes payable and current maturities of long-term debt of \$113.1 million as of 2013 year end included \$100.0 million of 5.85% unsecured notes due March 2014 (the "2014 Notes") and \$13.1 million of other notes; no commercial paper was outstanding as of 2013 year end. Snap-on repaid the 2014 Notes at maturity with available cash and commercial paper borrowings.

The annual maturities of Snap-on's long-term debt and notes payable over the next five years are \$56.6 million in 2015, no maturities in 2016, \$150.0 million in 2017, \$250.0 million in 2018 and \$200.0 million in 2019.

Average notes payable outstanding were \$45.4 million in 2014 and \$13.4 million in 2013. The weighted-average interest rate on notes payable was 5.42% in 2014 and 10.85% in 2013. As of 2014 and 2013 year end, the weighted-average interest rate on outstanding notes payable was 4.86% and 12.73%, respectively. The lower weighted-average interest rates in 2014 primarily reflect the impact of lower interest rates on commercial paper borrowings; no commercial paper was outstanding during 2013. The weighted-average interest rates in both years reflect local borrowings in emerging growth markets where interest rates are generally higher.

Snap-on has a five-year, \$700 million multi-currency revolving credit facility that terminates on September 27, 2018 (the "Credit Facility"); no amounts were outstanding under the Credit Facility as of 2014 year end. Borrowings under the Credit Facility bear interest at varying rates based on Snap-on's then-current, long-term debt ratings. The Credit Facility's financial covenant requires that Snap-on maintain, as of each fiscal quarter end, either (i) a ratio not greater than 0.60 to 1.00 of consolidated net debt (consolidated debt net of certain cash adjustments) to the sum of such consolidated net debt plus total equity and less accumulated other comprehensive income or loss; or (ii) a ratio not greater than 3.50 to 1.00 of such consolidated net debt to earnings before interest, taxes, depreciation, amortization and certain other adjustments for the preceding four fiscal quarters then ended. As of 2014 year end, the company's actual ratios of 0.27 and 1.15, respectively, were both within the permitted ranges set forth in this financial covenant.

Snap-on's Credit Facility and other debt agreements also contain certain usual and customary borrowing, affirmative, negative and maintenance covenants. As of 2014 year end, Snap-on was in compliance with all covenants of its Credit Facility and other debt agreements.

Note 10: Financial Instruments

Derivatives: All derivative instruments are reported in the Consolidated Financial Statements at fair value. Changes in the fair value of derivatives are recorded each period in earnings or on the accompanying Consolidated Balance Sheets, depending on whether the derivative is designated and effective as part of a hedged transaction. Gains or losses on derivative instruments recorded in Accumulated other comprehensive income (loss) (“Accumulated OCI”) must be reclassified to earnings in the period in which earnings are affected by the underlying hedged item and the ineffective portion of all hedges must be recognized in earnings in the period that such portion is determined to be ineffective.

The criteria used to determine if hedge accounting treatment is appropriate are (i) the designation of the hedge to an underlying exposure; (ii) whether or not overall risk is being reduced; and (iii) if there is a correlation between the value of the derivative instrument and the underlying hedged item. On the date a derivative contract is entered into, Snap-on designates the derivative as a fair value hedge, a cash flow hedge, a hedge of a net investment in a foreign operation, or a natural hedging instrument whose change in fair value is recognized as an economic hedge against changes in the value of the hedged item. Snap-on does not use derivative instruments for speculative or trading purposes.

The company is exposed to global market risks, including the effects of changes in foreign currency exchange rates, interest rates, and the company’s stock price, and therefore uses derivatives to manage financial exposures that occur in the normal course of business. The primary risks managed by using derivative instruments are foreign currency risk, interest rate risk and stock-based deferred compensation risk.

Foreign currency risk management: Snap-on has significant international operations and is subject to certain risks inherent with foreign operations that include currency fluctuations. Foreign currency exchange risk exists to the extent that Snap-on has payment obligations or receipts denominated in currencies other than the functional currency, including intercompany loans denominated in foreign currencies. To manage these exposures, Snap-on identifies naturally offsetting positions and then purchases hedging instruments to protect the residual net exposures. Snap-on manages most of these exposures on a consolidated basis, which allows for netting of certain exposures to take advantage of natural offsets. Foreign currency forward contracts (“foreign currency forwards”) are used to hedge the net exposures. Gains or losses on net foreign currency hedges are intended to offset losses or gains on the underlying net exposures in an effort to reduce the earnings volatility resulting from fluctuating foreign currency exchange rates. Snap-on’s foreign currency forwards are typically not designated as hedges. The fair value changes of these contracts are reported in earnings as foreign exchange gain or loss, which is included in “Other income (expense) – net” on the accompanying Consolidated Statements of Earnings.

As of 2014 year end, Snap-on had \$140.4 million of net foreign currency forward buy contracts outstanding comprised of buy contracts including \$81.5 million in euros, \$34.8 million in Australian dollars, \$22.1 million in Swedish kronor, \$16.3 million in British pounds, \$10.1 million in Singapore dollars, \$5.7 million in South Korean won, \$4.5 million in Mexican pesos, \$3.6 million in Hong Kong dollars, and \$0.5 million in other currencies, and sell contracts comprised of \$16.8 million in Canadian dollars, \$10.9 million in Japanese yen, \$3.3 million in Danish kroner, and \$7.7 million in other currencies. As of 2013 year end, Snap-on had \$197.1 million of net foreign currency forward buy contracts outstanding comprised of buy contracts including \$89.1 million in euros, \$64.3 million in Swedish kronor, \$33.8 million in Australian dollars, \$26.2 million in British pounds, \$12.7 million in Singapore dollars, \$7.8 million in Hong Kong dollars, \$5.5 million in South Korean won, and \$4.7 million in Mexican pesos, and sell contracts comprised of \$25.6 million in Canadian dollars, \$12.2 million in Japanese yen, \$4.8 million in Danish kroner, and \$4.4 million in other currencies.

Interest rate risk management: Snap-on aims to control funding costs by managing the exposure created by the differing maturities and interest rate structures of Snap-on’s borrowings through the use of interest rate swap agreements.

Snap-on enters into interest rate swap agreements (“interest rate swaps”) to manage risks associated with changing interest rates related to the company’s fixed rate borrowings. Interest rate swaps are accounted for as fair value hedges. The differentials paid or received on interest rate swaps are recognized as adjustments to “Interest expense” on the accompanying Consolidated Statements of Earnings. The effective portion of the change in fair value of the derivative is recorded in “Long-term debt” on the accompanying Consolidated Balance Sheets, while any ineffective portion is recorded as an adjustment to “Interest expense” on the accompanying Consolidated Statements of Earnings. The notional amount of interest rate swaps outstanding and designated as fair value hedges was \$100.0 million as of both 2014 and 2013 year end.

Snap-on enters into treasury lock agreements (“treasury locks”) from time to time to manage the potential change in interest rates in anticipation of issuing fixed rate debt. Treasury locks are accounted for as cash flow hedges. The effective differentials paid or received on treasury locks related to the anticipated issuance of fixed rate debt are recognized as adjustments to “Interest expense” on the accompanying Consolidated Statements of Earnings. There were no treasury locks outstanding as of 2014 or 2013 year end, and no treasury locks were settled in 2014 or 2013.

Stock-based deferred compensation risk management: Snap-on aims to manage market risk associated with the stock-based portion of its deferred compensation plans through the use of prepaid equity forward agreements (“equity forwards”). Equity forwards are used to aid in offsetting the potential mark-to-market effect on stock-based deferred compensation from changes in Snap-on’s stock price. Since stock-based deferred compensation liabilities increase as the company’s stock price rises and decrease as the company’s stock price declines, the equity forwards are intended to mitigate the potential impact on deferred compensation expense that may result from such mark-to-market changes. As of 2014 and 2013 year end, Snap-on had equity forwards in place intended to manage market risk with respect to 112,800 shares and 105,800 shares, respectively, of Snap-on common stock associated with its deferred compensation plans.

Fair value measurements: Snap-on has derivative assets and liabilities related to interest rate swaps, foreign currency forwards and equity forwards that are measured at Level 2 fair value on a recurring basis. The fair value of derivative instruments included within the Consolidated Balance Sheets as of 2014 and 2013 year end are as follows:

(Amounts in millions)	Balance Sheet Presentation	2014		2013	
		Asset Derivatives Fair Value	Liability Derivatives Fair Value	Asset Derivatives Fair Value	Liability Derivatives Fair Value
Derivatives designated as hedging instruments:					
Interest rate swaps	Other assets	\$ 14.0	\$ –	\$ 10.1	\$ –
Derivatives not designated as hedging instruments:					
Foreign currency forwards	Prepaid expenses and other assets	\$ 6.6	\$ –	\$ 4.1	\$ –
Foreign currency forwards	Other accrued liabilities	–	14.7	–	5.6
Equity forwards	Prepaid expenses and other assets	15.4	–	11.5	–
Total		22.0	14.7	15.6	5.6
Total derivative instruments		\$ 36.0	\$ 14.7	\$ 25.7	\$ 5.6

As of 2014 and 2013 year end, the fair value adjustment to long-term debt related to the interest rate swaps was \$14.0 million and \$10.1 million, respectively.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between participants at the measurement date. Level 2 fair value measurements for derivative assets and liabilities are measured using quoted prices in active markets for similar assets and liabilities. Interest rate swaps are valued based on the six-month LIBOR swap rate for similar instruments. Foreign currency forwards are valued based on exchange rates quoted by domestic and foreign banks for similar instruments. Equity forwards are valued using a market approach based primarily on the company’s stock price at the reporting date. The company did not have any derivative assets or liabilities measured at Level 1 or Level 3, nor did it implement any changes in its valuation techniques as of and for its 2014 and 2013 years ended.

The effect of derivative instruments designated as fair value hedges as included in the Consolidated Statements of Earnings is as follows:

(Amounts in millions)	Statement of Earnings Presentation	Effective Portion of Gain Recognized in Income		
		2014	2013	2012
Derivatives designated as fair value hedges:				
Interest rate swaps	Interest expense	\$ 4.0	\$ 4.0	\$ 3.4

The effect of derivative instruments designated as cash flow hedges as included in Accumulated OCI on the Consolidated Balance Sheets and the Consolidated Statements of Earnings is as follows:

(Amounts in millions)	Effective Portion of Gain Recognized in Accumulated OCI			Statement of Earnings Presentation	Effective Portion of Gain Reclassified from Accumulated OCI into Income		
	2014	2013	2012		2014	2013	2012
Derivatives designated as cash flow hedges:							
Treasury locks	\$ -	\$ -	\$ -	Interest expense	\$ 0.3	\$ 0.4	\$ 0.4

The effects of derivative instruments not designated as hedging instruments as included in the Consolidated Statements of Earnings are as follows:

(Amounts in millions)	Statement of Earnings Presentation	Gain (Loss) Recognized in Income		
		2014	2013	2012
Derivatives not designated as hedging instruments:				
Foreign currency forwards	Other income (expense) – net	\$ (19.3)	\$ 1.9	\$ 11.0
Equity forwards	Operating expenses	3.6	3.3	-

Snap-on's foreign currency forwards are typically not designated as hedges for financial reporting purposes. The fair value changes of foreign currency forwards not designated as hedging instruments are reported in earnings as foreign exchange gain or loss in "Other income (expense) – net" on the accompanying Consolidated Statements of Earnings. The \$19.3 million derivative loss recognized in 2014 was partially offset by transaction gains on net exposures of \$17.8 million, resulting in a net foreign exchange loss of \$1.5 million. The \$1.9 million derivative gain recognized in 2013 was more than offset by transaction losses on net exposures of \$6.3 million, resulting in a net foreign exchange loss of \$4.4 million. The \$11.0 million derivative gain recognized in 2012 was more than offset by transaction losses on net exposures of \$11.7 million, resulting in a net foreign exchange loss of \$0.7 million. The resulting net foreign exchange losses are included in "Other income (expense) – net" on the accompanying Consolidated Statements of Earnings. See Note 16 for additional information on "Other income (expense) – net."

Snap-on's equity forwards are not designated as hedges for financial reporting purposes. Fair value changes of both the equity forwards and related stock-based (mark-to-market) deferred compensation liabilities are reported in "Operating expenses" on the accompanying Consolidated Statements of Earnings. The \$3.6 million derivative gain recognized in 2014 was offset by \$3.6 million of mark-to-market deferred compensation expense. The \$3.3 million derivative gain recognized in 2013 was more than offset by \$3.7 million of mark-to-market deferred compensation expense. The company did not utilize equity forwards to manage risk associated with the stock-based portion of its deferred compensation plans prior to 2013.

As of 2014 year end, the maximum maturity date of any fair value hedge was seven years. During the next 12 months, Snap-on expects to reclassify into earnings net gains from Accumulated OCI of approximately \$0.2 million after tax at the time the underlying hedge transactions are realized.

See the accompanying Consolidated Statements of Comprehensive Income for additional information on changes in comprehensive income.

Counterparty risk: Snap-on is exposed to credit losses in the event of non-performance by the counterparties to its various financial agreements, including its foreign currency forward contracts, interest rate swap agreements and prepaid equity forward agreements. Snap-on does not obtain collateral or other security to support financial instruments subject to credit risk, but monitors the credit standing of the counterparties and generally enters into agreements with financial institution counterparties with a credit rating of A- or better. Snap-on does not anticipate non-performance by its counterparties, but cannot provide assurances.

Fair value of financial instruments: The fair values of financial instruments that do not approximate the carrying values in the financial statements as of 2014 and 2013 year end are as follows:

(Amounts in millions)	2014		2013	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Finance receivables – net	\$ 1,052.9	\$ 1,198.4	\$ 935.2	\$ 1,084.1
Contract receivables – net	316.5	348.2	285.5	326.7
Long-term debt, notes payable and current maturities of long-term debt	919.3	1,031.3	972.0	1,078.9

The following methods and assumptions were used in estimating the fair value of financial instruments:

- Finance and contract receivables include both short-term and long-term receivables. The fair value estimates of finance and contract receivables are derived utilizing discounted cash flow analyses performed on groupings of receivables that are similar in terms of loan type and characteristics. The cash flow analysis considers recent pre-payment trends where applicable. The cash flows are discounted over the average life of the receivables using a current market discount rate of a similar term adjusted for credit quality. Significant inputs to the fair value measurements of the receivables are unobservable and, as such, are classified as Level 3.
- Fair value of long-term debt and current maturities of long-term debt was estimated, using Level 2 fair value measurements, based on quoted market values of Snap-on's publicly traded senior debt. The carrying value of long-term debt and current maturities of long-term debt includes adjustments related to fair value hedges. The fair value of notes payable approximates such instruments' carrying value due to their short-term nature.
- The fair value of all other financial instruments, including cash equivalents, trade and other accounts receivable, accounts payable and other financial instruments, approximates such instruments' carrying value due to their short-term nature.

Note 11: Pension Plans

Snap-on has several non-contributory defined benefit pension plans covering most U.S. employees and certain employees in foreign countries. Snap-on also has foreign contributory defined benefit pension plans covering certain foreign employees. Retirement benefits are generally provided based on employees' years of service and average earnings or stated amounts for years of service. Normal retirement age is 65, with provisions for earlier retirement. In 2012, the company settled a Canadian pension plan following the 2011 closure of its Newmarket, Canada, facility.

The status of Snap-on's pension plans as of 2014 and 2013 year end is as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Change in projected benefit obligation:		
Benefit obligation at beginning of year	\$ 1,152.3	\$ 1,229.3
Service cost	18.0	20.3
Interest cost	57.3	51.4
Plan participants' contributions	1.2	1.2
Plan curtailments	-	(0.1)
Benefits paid	(59.2)	(59.5)
Plan amendments	-	(0.5)
Actuarial loss (gain)	177.9	(88.9)
Foreign currency impact	<u>(21.6)</u>	<u>(0.9)</u>
Benefit obligation at end of year	<u>\$ 1,325.9</u>	<u>\$ 1,152.3</u>
Change in plan assets:		
Fair value of plan assets at beginning of year	\$ 1,015.4	\$ 964.0
Actual return on plan assets	112.9	75.1
Plan participants' contributions	1.2	1.2
Employer contributions	44.8	35.3
Benefits paid	(59.2)	(59.5)
Foreign currency impact	<u>(11.7)</u>	<u>(0.7)</u>
Fair value of plan assets at end of year	<u>\$ 1,103.4</u>	<u>\$ 1,015.4</u>
Unfunded status at end of year	<u>\$ (222.5)</u>	<u>\$ (136.9)</u>

Amounts recognized in the Consolidated Balance Sheets as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Other assets	\$ -	\$ 3.7
Accrued benefits	(4.6)	(4.8)
Pension liabilities	<u>(217.9)</u>	<u>(135.8)</u>
Net liability	<u>\$ (222.5)</u>	<u>\$ (136.9)</u>

Amounts included in Accumulated OCI on the accompanying Consolidated Balance Sheets as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Net loss, net of tax of \$134.9 million and \$96.5 million, respectively	\$ (247.4)	\$ (175.4)
Prior service credit, net of tax of \$2.0 million and \$2.3 million, respectively	<u>3.5</u>	<u>4.0</u>
	<u>\$ (243.9)</u>	<u>\$ (171.4)</u>

The accumulated benefit obligation for Snap-on's pension plans as of 2014 and 2013 year end was \$1,274.3 million and \$1,101.4 million, respectively.

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for Snap-on's pension plans in which the accumulated benefit obligation exceeds the fair value of plan assets as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Projected benefit obligation	\$ 1,167.3	\$ 1,010.7
Accumulated benefit obligation	1,134.3	979.5
Fair value of plan assets	956.2	875.5

The components of net periodic benefit cost and changes recognized in "Other comprehensive income (loss)" ("OCI") are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Net periodic benefit cost:			
Service cost	\$ 18.0	\$ 20.3	\$ 21.1
Interest cost	57.3	51.4	52.0
Expected return on plan assets	(73.3)	(70.5)	(66.6)
Amortization of unrecognized loss	22.8	41.4	41.4
Amortization of prior service (credit) cost	(0.8)	(0.7)	1.2
Settlement loss recognized	—	—	6.8
Net periodic benefit cost	<u>\$ 24.0</u>	<u>\$ 41.9</u>	<u>\$ 55.9</u>
Changes in benefit obligations recognized in OCI, net of tax:			
Net loss (gain)	\$ 72.0	\$ (85.0)	\$ (7.6)
Prior service cost (credit)	0.5	—	(7.0)
Total recognized in OCI	<u>\$ 72.5</u>	<u>\$ (85.0)</u>	<u>\$ (14.6)</u>

Amounts in Accumulated OCI that are expected to be amortized as net expense into net periodic benefit cost during 2015 are as follows:

<i>(Amounts in millions)</i>	<u>Amount</u>
Amortization of unrecognized loss	\$ 35.7
Amortization of prior service credit	(0.9)
Total to be recognized in net periodic benefit cost	<u>\$ 34.8</u>

The worldwide weighted-average assumptions used to determine Snap-on's full-year pension costs are as follows:

	<u>2014</u>	<u>2013</u>	<u>2012</u>
Discount rate	5.1%	4.3%	4.5%
Expected long-term rate of return on plan assets	7.4%	7.6%	7.7%
Rate of compensation increase	3.6%	3.6%	3.6%

The worldwide weighted-average assumptions used to determine Snap-on's projected benefit obligation as of 2014 and 2013 year end are as follows:

	<u>2014</u>	<u>2013</u>
Discount rate	4.1%	5.1%
Rate of compensation increase	3.6%	3.6%

The objective of Snap-on's discount rate assumption is to reflect the rate at which the pension benefits could be effectively settled. In making this determination, the company takes into account the timing and amount of benefits that would be available under the plans. The domestic discount rate as of 2014 and 2013 year end was selected based on a cash flow matching methodology developed by the company's outside actuaries and which incorporates a review of current economic conditions. This methodology matches the plans' yearly projected benefit cash flows to those of hypothetical bond portfolios using high-quality, AA rated or better, corporate bonds from either Moody's Investors Service or Standard & Poor's credit rating agencies available at the measurement date. This technique calculates bond portfolios that produce adequate cash flows to pay the plans' projected yearly benefits and then selects the portfolio with the highest yield and uses that yield as the recommended discount rate.

The weighted-average discount rate for Snap-on's domestic pension plans of 4.2% represents the single rate that produces the same present value of cash flows as the estimated benefit plan payments. Lowering Snap-on's domestic discount rate assumption by 50 basis points (100 basis points ("bps") equals 1.0 percent) would have increased Snap-on's 2014 domestic pension expense and projected benefit obligation by approximately \$6.0 million and \$63.4 million, respectively. As of 2014 year end, Snap-on's domestic projected benefit obligation comprised approximately 82% of Snap-on's worldwide projected benefit obligation. The weighted-average discount rate for Snap-on's foreign pension plans of 3.3% represents the single rate that produces the same present value of cash flows as the estimated benefit plan payments. Lowering Snap-on's foreign discount rate assumption by 50 bps would have increased Snap-on's 2014 foreign pension expense and projected benefit obligation by approximately \$1.9 million and \$22.7 million, respectively.

Actuarial gains and losses in excess of 10 percent of the greater of the projected benefit obligation or market-related value of assets are amortized on a straight-line basis over the average remaining service period of active participants or over the average remaining life expectancy for plans with primarily inactive participants. Prior service costs and credits resulting from plan amendments are amortized in equal annual amounts over the average remaining service period of active participants or over the average remaining life expectancy for plans with primarily inactive participants.

Snap-on uses the last day of its fiscal year end as the measurement date for its plans. Snap-on funds its pension plans as required by governmental regulation and may consider discretionary contributions as conditions warrant. Snap-on intends to make contributions of \$7.1 million to its foreign pension plans and \$2.0 million to its domestic pension plans in 2015, as required by law. Depending on market and other conditions, Snap-on may elect to make discretionary cash contributions to its pension plans in 2015.

The following benefit payments, which reflect expected future service, are expected to be paid as follows:

<i>(Amounts in millions)</i>	<u>Amount</u>
Year:	
2015	\$ 67.1
2016	69.5
2017	72.4
2018	74.1
2019	76.4
2020 – 2024	406.9

Snap-on's domestic pension plans have a long-term investment horizon and a total return strategy that emphasizes a capital growth objective. The long-term investment performance objective for Snap-on's domestic plans' assets is to achieve net of expense returns that meet or exceed the 7.6% domestic long-term, rate-of-return-on-assets assumption used for reporting purposes. Snap-on uses a three-year, market-related value asset method of amortizing the difference between actual and expected returns on its domestic plans' assets.

The basis for determining the overall expected long-term, rate-of-return-on-assets assumption is a nominal returns forecasting method. For each asset class, future returns are estimated by identifying the premium of riskier asset classes over lower risk alternatives. The methodology constructs expected returns using a “building block” approach to the individual components of total return. These forecasts are stated in both nominal and real (after inflation) terms. This process first considers the long-term historical return premium based on the longest set of data available for each asset class. These premiums are then adjusted based on current relative valuation levels and macro-economic conditions.

For risk and correlation assumptions, the actual experience for each asset class is reviewed for the longest time period available. Expected relationships for a 10 to 20 year time horizon are determined based upon historical results, with adjustments made for material changes.

Investments are diversified to attempt to minimize the risk of large losses. Since asset allocation is a key determinant of expected investment returns, assets are periodically rebalanced to the targeted allocation to correct significant deviations from the asset allocation policy that are caused by market fluctuations and cash flow. Asset/liability studies are conducted periodically to determine if any revisions to the strategic asset allocation policy are necessary.

Snap-on’s domestic pension plans’ target allocation and actual weighted-average asset allocation by asset category and fair value of plan assets as of 2014 and 2013 year end are as follows:

Asset category:	Target	2014	2013
Equity securities	50%	48%	51%
Debt securities and cash	35%	39%	34%
Real estate and other real assets	5%	3%	4%
Hedge funds	10%	10%	11%
Total	100%	100%	100%
Fair value of plan assets <i>(Amounts in millions)</i>		\$ 939.4	\$ 863.4

The fair value measurement hierarchy prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority (“Level 1”) to unadjusted quoted prices in active markets for identical assets and liabilities and the lowest priority (“Level 3”) to unobservable inputs. Fair value measurements primarily based on observable market information are given a “Level 2” priority.

Shares of certain equity and debt securities valued at quoted market prices for which an official close or last trade pricing on an active exchange is available are categorized as Level 1 in the fair value hierarchy. Shares of commingled equity securities, corporate bonds, commingled multi-strategy funds and insurance contracts are valued at the net asset value (“NAV”), as reported by the fund managers, based on the value of the underlying assets less liabilities, with each NAV divided by the respective number of units outstanding. The resulting unit price is quoted on a private market and is based on the value of the underlying investment, which is primarily based on observable inputs; such investments are categorized as Level 2 in the fair value hierarchy. Private equity partnership funds, hedge funds, and real estate and other real assets, all of which have redemption restrictions, are stated at estimated fair value (based on the estimated fair market value of the underlying investments) as reported by the fund manager and are classified as Level 3 in the fair value hierarchy. The company regularly reviews fund performance directly with its investment advisor and the fund managers, and performs qualitative analysis to corroborate the reasonableness of the reported net asset values. For Level 3 funds for which the company did not receive a year-end net asset value, the company recorded an estimate of the change in fair value for the latest period based on return estimates and other fund activity obtained from the fund managers.

The following is a summary, by asset category, of the fair value and the level within the fair value hierarchy of Snap-on's domestic pension plans' assets as of 2014 year end:

<i>(Amounts in millions)</i>	Quoted Prices for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Asset category:				
Cash and cash equivalents	\$ 26.9	\$ –	\$ –	\$ 26.9
Equity securities:				
Domestic	57.5	–	–	57.5
Foreign	67.5	–	–	67.5
Commingled funds – domestic	–	171.1	–	171.1
Commingled funds – foreign	–	111.5	–	111.5
Private equity partnerships	–	–	47.4	47.4
Debt securities:				
Government	138.2	–	–	138.2
Corporate bonds	–	197.0	–	197.0
Real estate and other real assets	–	–	30.8	30.8
Hedge funds	–	–	91.5	91.5
Total	<u>\$ 290.1</u>	<u>\$ 479.6</u>	<u>\$ 169.7</u>	<u>\$ 939.4</u>

The following is a summary of the 2014 changes in fair value of the domestic plans' assets with Level 3 inputs:

<i>(Amounts in millions)</i>	Hedge Funds	Private Equity Partnerships	Real Estate and Other Real Assets	Total
Balance as of 2013 year end	\$ 90.3	\$ 49.4	\$ 35.4	\$ 175.1
Realized gains on assets sold	0.6	6.0	1.6	8.2
Unrealized gains attributable to assets held	3.4	1.1	3.2	7.7
Net purchases and settlements	(2.8)	(9.1)	(9.4)	(21.3)
Balance as of 2014 year end	<u>\$ 91.5</u>	<u>\$ 47.4</u>	<u>\$ 30.8</u>	<u>\$ 169.7</u>

The following is a summary, by asset category, of the fair value and the level within the fair value hierarchy of Snap-on's domestic pension plans' assets as of 2013 year end:

<i>(Amounts in millions)</i>	Quoted Prices for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Asset category:				
Cash and cash equivalents	\$ 18.0	\$ –	\$ –	\$ 18.0
Equity securities:				
Domestic	59.9	–	–	59.9
Foreign	65.4	–	–	65.4
Commingled funds – domestic	–	162.6	–	162.6
Commingled funds – foreign	–	105.5	–	105.5
Private equity partnerships	–	–	49.4	49.4
Debt securities:				
Government	110.8	–	–	110.8
Corporate bonds	–	166.1	–	166.1
Real estate and other real assets	–	–	35.4	35.4
Hedge funds	–	–	90.3	90.3
Total	<u>\$ 254.1</u>	<u>\$ 434.2</u>	<u>\$ 175.1</u>	<u>\$ 863.4</u>

The following is a summary of the 2013 changes in fair value of the domestic plans' assets with Level 3 inputs:

<i>(Amounts in millions)</i>	Hedge Funds	Private Equity Partnerships	Real Estate and Other Real Assets	Total
Balance as of 2012 year end	\$ 75.0	\$ 49.6	\$ 39.0	\$ 163.6
Realized gains (losses) on assets sold	(1.5)	5.4	0.1	4.0
Unrealized gains attributable to assets held	13.4	1.6	0.6	15.6
Net purchases and settlements	3.4	(7.2)	(4.3)	(8.1)
Balance as of 2013 year end	<u>\$ 90.3</u>	<u>\$ 49.4</u>	<u>\$ 35.4</u>	<u>\$ 175.1</u>

Snap-on's primary investment objective for its foreign pension plans' assets is to meet the projected obligations to the beneficiaries over a long period of time, and to do so in a manner that is consistent with the company's risk tolerance. The foreign asset allocation policies consider the company's financial strength and long-term asset class risk/return expectations, since the obligations are long term in nature. The company believes the foreign pension plans' assets, which are managed locally by professional investment firms, are well diversified.

The expected long-term rate of return on foreign plans' assets reflects management's expectations of long-term average rates of return on funds invested to provide benefits included in the projected benefit obligation. The expected return is based on the outlook for inflation, fixed income returns and equity returns, asset allocation and investment strategy. Differences between actual and expected returns on foreign pension plans' assets are recorded as an actuarial gain or loss and amortized accordingly.

Snap-on's foreign pension plans' target allocation and actual weighted-average asset allocation by asset category and fair value of plan assets as of 2014 and 2013 year end are as follows:

Asset category:	Target	2014	2013
Equity securities*	38%	39%	37%
Debt securities and cash*	36%	36%	44%
Insurance contracts and hedge funds	26%	25%	19%
Total	100%	100%	100%
Fair value of plan assets <i>(Amounts in millions)</i>		\$ 164.0	\$ 152.0

* Includes commingled funds – multi-strategy

The following is a summary, by asset category, of the fair value and the level within the fair value hierarchy of Snap-on's foreign pension plans' assets as of 2014 year end:

<i>(Amounts in millions)</i> Asset category:	Quoted Prices for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Cash and cash equivalents	\$ 0.8	\$ –	\$ –	\$ 0.8
Commingled funds – multi-strategy	–	121.7	–	121.7
Insurance contracts	–	23.4	–	23.4
Hedge funds	–	–	18.1	18.1
Total	\$ 0.8	\$ 145.1	\$ 18.1	\$ 164.0

The following is a summary of the 2014 changes in fair value of the foreign plans' assets with Level 3 inputs:

<i>(Amounts in millions)</i>	Hedge Funds
Balance as of 2013 year end	\$ 24.8
Unrealized gains attributable to assets held	0.1
Net purchases and settlements	(6.8)
Balance as of 2014 year end	\$ 18.1

The following is a summary, by asset category, of the fair value and the level within the fair value hierarchy of Snap-on's foreign pension plans' assets as of 2013 year end:

<i>(Amounts in millions)</i> Asset category:	Quoted Prices for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Cash and cash equivalents	\$ 0.8	\$ –	\$ –	\$ 0.8
Commingled funds – multi-strategy	–	122.4	–	122.4
Insurance contracts	–	4.0	–	4.0
Hedge funds	–	–	24.8	24.8
Total	\$ 0.8	\$ 126.4	\$ 24.8	\$ 152.0

The following is a summary of the 2013 changes in fair value of the foreign plans' assets with Level 3 inputs:

<i>(Amounts in millions)</i>	Hedge Funds
Balance as of 2012 year end	\$ 20.0
Unrealized gains attributable to assets held	1.5
Net purchases and settlements	3.3
Balance as of 2013 year end	\$ 24.8

Snap-on has several 401(k) plans covering certain U.S. employees. Snap-on's employer match to the 401(k) plans is made with cash contributions. For 2014, 2013 and 2012, Snap-on recognized \$6.5 million, \$5.9 million and \$5.7 million, respectively, of expense related to its 401(k) plans.

Note 12: Postretirement Plans

Snap-on provides health care benefits for certain retired U.S. employees. Employees retiring prior to 1989 were eligible for retiree medical coverage upon reaching early retirement age, with no retiree contributions required. Benefits are paid based on deductibles and percentages of covered expenses and take into consideration payments made by Medicare and other insurance coverage.

Since 1989, U.S. retirees have been eligible for comprehensive major medical plans. Benefits are paid based on deductibles and percentages of covered expenses, and plan provisions allow for benefit and coverage changes. Most retirees are required to pay the entire cost of the coverage, but Snap-on may elect to subsidize the cost of coverage under certain circumstances.

Snap-on has a Voluntary Employees Beneficiary Association ("VEBA") trust for the funding of existing postretirement health care benefits for certain non-salaried retirees in the United States; all other retiree health care plans are unfunded.

The status of Snap-on's U.S. postretirement health care plans as of 2014 and 2013 year end is as follows:

<i>(Amounts in millions)</i>	2014	2013
Change in accumulated postretirement benefit obligation:		
Benefit obligation at beginning of year	\$ 61.5	\$ 69.0
Service cost	0.1	0.1
Interest cost	2.5	2.2
Plan participants' contributions	1.2	1.2
Benefits paid	(6.0)	(6.8)
Actuarial loss (gain)	2.7	(4.2)
Benefit obligation at end of year	\$ 62.0	\$ 61.5
Change in plan assets:		
Fair value of plan assets at beginning of year	\$ 15.0	\$ 15.1
Plan participants' contributions	1.2	1.2
Employer contributions	3.6	3.0
Actual return on VEBA plan assets	0.9	2.5
Benefits paid	(6.0)	(6.8)
Fair value of plan assets at end of year	\$ 14.7	\$ 15.0
Unfunded status at end of year	\$ (47.3)	\$ (46.5)

Amounts recognized in the Consolidated Balance Sheets as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Accrued benefits	\$ (4.8)	\$ (4.8)
Retiree health care benefits	<u>(42.5)</u>	<u>(41.7)</u>
Net liability	<u>\$ (47.3)</u>	<u>\$ (46.5)</u>

Amounts included in Accumulated OCI on the accompanying Consolidated Balance Sheets as of 2014 and 2013 year end are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Net gain, net of tax of \$1.5 million and \$2.6 million, respectively	\$ 2.4	\$ 4.2

The components of net periodic benefit cost and changes recognized in OCI are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Net periodic benefit cost:			
Service cost	\$ 0.1	\$ 0.1	\$ 0.2
Interest cost	2.5	2.2	2.6
Expected return on plan assets	<u>(1.1)</u>	<u>(1.1)</u>	<u>(1.0)</u>
Net periodic benefit cost	<u>\$ 1.5</u>	<u>\$ 1.2</u>	<u>\$ 1.8</u>

Changes in benefit obligations recognized in OCI, net of tax:

Net loss (gain)	\$ 1.8	\$ (3.4)	\$ (1.2)
-----------------	--------	----------	----------

Snap-on expects to recognize \$0.3 million of prior unrecognized losses, included in Accumulated OCI on the accompanying 2014 Consolidated Balance Sheet, in net periodic benefit cost during 2015.

The weighted-average discount rate used to determine Snap-on's postretirement health care expense is as follows:

	<u>2014</u>	<u>2013</u>	<u>2012</u>
Discount rate	4.2%	3.2%	3.8%

The weighted-average discount rate used to determine Snap-on's accumulated benefit obligation is as follows:

	<u>2014</u>	<u>2013</u>
Discount rate	3.6%	4.2%

The methodology for selecting the year-end 2014 and 2013 weighted-average discount rate for the company's domestic postretirement plans was to match the plans' yearly projected cash flows to those of hypothetical bond portfolios using high-quality, AA rated or better, corporate bonds from either Moody's Investors Service or Standard & Poor's credit rating agencies available at the measurement date.

The actuarial calculation assumes a health care cost trend rate of 7.2% in 2015, decreasing gradually to 4.5% in 2028 and thereafter. As of 2014 year end, a one-percentage-point increase in the health care cost trend rate for future years would increase the accumulated postretirement benefit obligation by approximately \$0.9 million and the aggregate of the service cost and interest cost components by less than \$0.1 million. Conversely, a one-percentage-point decrease in the health care cost trend rate for future years would decrease the accumulated postretirement benefit obligation by \$0.8 million and the aggregate of the service cost and interest rate components by less than \$0.1 million.

The following benefit payments, which reflect expected future service, are expected to be paid as follows:

<i>(Amounts in millions)</i>	<u>Amount</u>
Year:	
2015	\$ 5.6
2016	5.9
2017	6.1
2018	6.4
2019	6.4
2020 – 2024	27.6

The objective of the VEBA trust is to achieve net of expense returns that meet or exceed the 6.8% long-term, rate-of-return-on-assets assumption used for reporting purposes. Investments are diversified to attempt to minimize the risk of large losses. Since asset allocation is a key determinant of expected investment returns, assets are periodically rebalanced to the targeted allocation to correct significant deviations from the asset allocation policy that are caused by market fluctuations and cash flow.

The basis for determining the overall expected long-term, rate-of-return-on-assets assumption is a nominal returns forecasting method. For each asset class, future returns are estimated by identifying the premium of riskier asset classes over lower risk alternatives. The methodology constructs expected returns using a “building block” approach to the individual components of total return. These forecasts are stated in both nominal and real (after inflation) terms. This process first considers the long-term historical return premium based on the longest set of data available for each asset class. These premiums are then adjusted based on current relative valuation levels and macro-economic conditions.

Snap-on’s VEBA plan target allocation and actual weighted-average asset allocation by asset category and fair value of plan assets as of 2014 and 2013 year end are as follows:

Asset category:	<u>Target</u>	<u>2014</u>	<u>2013</u>
Debt securities and cash	46%	45%	13%
Equity securities	29%	29%	57%
Hedge funds	25%	26%	24%
Real estate and other real assets	–	–	6%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>
Fair value of plan assets <i>(Amounts in millions)</i>		<u>\$ 14.7</u>	<u>\$ 15.0</u>

The fair value measurement hierarchy prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority (Level 1) to unadjusted quoted prices in active markets for identical assets and liabilities and the lowest priority (Level 3) to unobservable inputs. Fair value measurements primarily based on observable market information are given a Level 2 priority.

Shares of debt securities, certain equity securities and real estate and other real assets valued at quoted market prices for which an official close or last trade pricing on an active exchange is available are categorized as Level 1 in the fair value hierarchy. Certain other equity securities are valued at the net asset value (“NAV”), as reported by the fund manager, based on the value of the underlying assets less liabilities, with this NAV divided by the number of units outstanding. The resulting unit price is quoted on a private market and is based on the value of the underlying investment, which is primarily based on observable inputs; such investments are categorized as Level 2 in the fair value hierarchy. Hedge funds, which have redemption restrictions, are stated at estimated fair value (based on the estimated fair market value of the underlying investments) as reported by the fund manager and are classified as Level 3 in the fair value hierarchy. The company regularly reviews fund performance directly with its investment advisor and the fund managers, and performs qualitative analysis to corroborate the reasonableness of the reported net asset values. For Level 3 funds for which the company did not receive a year-end net asset value, the company recorded an estimate of the change in fair value for the latest period based on return estimates and other fund activity obtained from the fund managers.

The following is a summary, by asset category, of the fair value and the level within the fair value hierarchy of the VEBA assets as of 2014 year end:

<i>(Amounts in millions)</i>	Quoted Prices for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	Total
Asset category:	(Level 1)	(Level 2)	(Level 3)	Total
Cash and cash equivalents	\$ 0.1	\$ –	\$ –	\$ 0.1
Debt securities	6.5	–	–	6.5
Equity securities	–	4.2	–	4.2
Hedge funds	–	–	3.9	3.9
Total	\$ 6.6	\$ 4.2	\$ 3.9	\$ 14.7

The following is a summary of the 2014 changes in fair value of the VEBA plan assets with Level 3 inputs:

<i>(Amounts in millions)</i>	Hedge Funds
Balance as of 2013 year end	\$ 3.6
Unrealized gains attributable to assets held	0.3
Balance as of 2014 year end	\$ 3.9

The following is a summary, by asset category, of the fair value and the level within the fair value hierarchy of the VEBA assets as of 2013 year end:

<i>(Amounts in millions)</i>	Quoted Prices for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	Total
Asset category:	(Level 1)	(Level 2)	(Level 3)	Total
Cash and cash equivalents	\$ 0.1	\$ –	\$ –	\$ 0.1
Debt securities	1.9	–	–	1.9
Equity securities	8.6	–	–	8.6
Hedge funds	–	–	3.6	3.6
Real estate and other real assets	0.8	–	–	0.8
Total	\$ 11.4	\$ –	\$ 3.6	\$ 15.0

The following is a summary of the 2013 changes in fair value of the VEBA plan assets with Level 3 inputs:

<i>(Amounts in millions)</i>	Hedge Funds
Balance as of 2012 year end	\$ 3.2
Unrealized gains attributable to assets held	0.4
Balance as of 2013 year end	\$ 3.6

Note 13: Stock-based Compensation and Other Stock Plans

The 2011 Incentive Stock and Awards Plan (the “2011 Plan”) provides for the grant of stock options, performance awards, stock appreciation rights (“SARs”) and restricted stock awards (which may be designated as “restricted stock units” or “RSUs”). No further grants are being made under its predecessor, the 2001 Incentive Stock and Awards Plan (the “2001 Plan”), although outstanding awards under the 2001 Plan will continue until exercised, forfeited or expired. As of 2014 year end, the 2011 Plan had 1,884,063 shares available for future grants. The company uses treasury stock to deliver shares under both the 2001 and 2011 Plans.

Net stock-based compensation expense was \$38.1 million in 2014, \$38.5 million in 2013 and \$32.1 million in 2012. Cash received from stock purchase and option plan exercises was \$33.0 million in 2014, \$29.2 million in 2013 and \$46.8 million in 2012. The tax benefit realized from both the exercise and vesting of share-based payment arrangements was \$22.3 million in 2014, \$18.3 million in 2013 and \$15.4 million in 2012.

Stock Options

Stock options are granted with an exercise price equal to the market value of a share of Snap-on’s common stock on the date of grant and have a contractual term of ten years. Stock option grants vest ratably on the first, second and third anniversaries of the date of grant.

The fair value of each stock option award is estimated on the date of grant using the Black-Scholes valuation model. The company uses historical data regarding stock option exercise behaviors for different participating groups to estimate the period of time that options granted are expected to be outstanding. Expected volatility is based on the historical volatility of the company’s stock for the length of time corresponding to the expected term of the option. The expected dividend yield is based on the company’s historical dividend payments. The risk-free interest rate is based on the U.S. treasury yield curve on the grant date for the expected term of the option. The following weighted-average assumptions were used in calculating the fair value of stock options granted during 2014, 2013 and 2012, using the Black-Scholes valuation model:

	2014	2013	2012
Expected term of option <i>(in years)</i>	4.52	4.29	5.36
Expected volatility factor	26.76%	33.79%	36.93%
Expected dividend yield	2.40%	2.67%	2.72%
Risk-free interest rate	1.30%	0.79%	0.82%

A summary of stock option activity during 2014 is presented below:

	Shares <i>(in thousands)</i>	Exercise Price per Share*	Remaining Contractual Term* <i>(in years)</i>	Aggregate Intrinsic Value <i>(in millions)</i>
Outstanding at beginning of year	2,429	\$ 58.35		
Granted	644	109.44		
Exercised	(397)	52.89		
Forfeited or expired	(46)	90.03		
Outstanding at end of year	2,630	71.13	6.8	\$ 171.4
Exercisable at end of year	1,407	53.42	5.4	116.6

* Weighted-average

The weighted-average grant date fair value of options granted was \$20.19 in 2014, \$17.36 in 2013 and \$15.46 in 2012. The intrinsic value of options exercised was \$24.6 million in 2014, \$14.1 million in 2013 and \$23.0 million in 2012. The fair value of stock options vested was \$9.6 million in 2014, \$7.9 million in 2013 and \$5.8 million in 2012.

As of 2014 year end there was \$13.2 million of unrecognized compensation cost related to non-vested stock options that is expected to be recognized as a charge to earnings over a weighted-average period of 1.5 years.

Performance Awards

Performance awards, which are granted as performance share units and performance-based RSUs, are earned and expensed using the fair value of the award over a contractual term of three years based on the company's performance. Vesting of the performance awards is dependent upon performance relative to pre-defined goals for revenue growth and return on net assets for the applicable performance period. For performance achieved above a certain level, the recipient may earn additional shares of stock, not to exceed 100% of the number of performance awards initially granted.

The performance share units have a three-year performance period based on the results of the consolidated financial metrics of the company. The performance-based RSUs have a one-year performance period based on the results of the consolidated financial metrics of the company followed by a two-year cliff vesting schedule, assuming continued employment.

The fair value of performance awards is calculated using the market value of a share of Snap-on's common stock on the date of grant. The weighted-average grant date fair value of performance awards granted during 2014, 2013 and 2012 was \$102.11, \$77.33 and \$60.00, respectively. Vested performance share units approximated 131,000 shares as of 2014 year end, 148,000 shares as of 2013 year end and 213,000 shares as of 2012 year end. Performance share units of 146,313 shares, 213,459 shares and 53,990 shares were paid out in 2014, 2013 and 2012, respectively. Earned performance share units are generally paid out following the conclusion of the applicable performance period upon approval by the Organization and Executive Compensation Committee of the company's Board of Directors (the "Board").

Based on the company's 2014 performance, 78,585 RSUs granted in 2014 were earned; assuming continued employment, these RSUs will vest at the end of fiscal 2016. Based on the company's 2013 performance, 84,413 RSUs granted in 2013 were earned; assuming continued employment, these RSUs will vest at the end of fiscal 2015. Based on the company's 2012 performance, 95,047 RSUs granted in 2012 were earned; these RSUs vested as of fiscal 2014 year end and were paid out shortly thereafter.

The changes to the company's non-vested performance awards in 2014 are as follows:

	Shares <i>(in thousands)</i>	Fair Value Price per Share*
Non-vested performance awards at beginning of year	381	\$ 68.13
Granted	177	102.11
Vested	(225)	60.04
Cancellations and other	(6)	78.65
Non-vested performance awards at end of year	<u>327</u>	91.92

* Weighted-average

As of 2014 year end there was approximately \$15.1 million of unrecognized compensation cost related to non-vested performance awards that is expected to be recognized as a charge to earnings over a weighted-average period of 1.6 years.

Stock Appreciation Rights ("SARs")

The company also issues cash-settled and stock-settled SARs to certain key non-U.S. employees. SARs have a contractual term of ten years and vest ratably on the first, second and third anniversaries of the date of grant. SARs are granted with an exercise price equal to the market value of a share of Snap-on's common stock on the date of grant.

Cash-settled SARs provide for the cash payment of the excess of the fair market value of Snap-on's common stock price on the date of exercise over the grant price. Cash-settled SARs have no effect on dilutive shares or shares outstanding as any appreciation of Snap-on's common stock value over the grant price is paid in cash and not in common stock.

The company began issuing stock-settled SARs in 2013. Stock-settled SARs are accounted for as equity instruments and provide for the issuance of Snap-on common stock equal to the amount by which the company's stock has appreciated over the exercise price. Stock-settled SARs have an effect on dilutive shares and shares outstanding as any appreciation of Snap-on's common stock value over the exercise price will be settled in shares of common stock.

The fair value of cash-settled SARs is revalued (mark-to-market) each reporting period using the Black-Scholes valuation model based on Snap-on's period-end stock price. The fair value of stock-settled SARs is estimated on the date of grant using the Black-Scholes valuation model. The company uses historical data regarding SARs exercise behaviors for different participating groups to estimate the expected term of the SARs granted based on the period of time that similar instruments granted are expected to be outstanding. Expected volatility is based on the historical volatility of the company's stock for the length of time corresponding to the expected term of the SARs. The expected dividend yield is based on the company's historical dividend payments. The risk-free interest rate is based on the U.S. treasury yield curve in effect as of the reporting date (for cash-settled SARs) or grant date (for stock-settled SARs) for the length of time corresponding to the expected term of the SARs.

The following weighted-average assumptions were used in calculating the fair value of cash-settled SARs granted during 2014, 2013 and 2012 using the Black-Scholes valuation model:

	2014	2013	2012
Expected term of cash-settled SARs <i>(in years)</i>	3.53	3.28	4.49
Expected volatility factor	23.92%	24.54%	36.44%
Expected dividend yield	2.11%	2.57%	2.69%
Risk-free interest rate	1.07%	0.79%	0.72%

The intrinsic value of cash-settled SARs exercised was \$5.5 million in 2014, \$4.4 million in 2013 and \$5.4 million in 2012. The fair value of cash-settled SARs vested during 2014, 2013 and 2012 was \$5.9 million, \$5.7 million and \$3.5 million, respectively.

Changes to the company's non-vested cash-settled SARs in 2014 are as follows:

	Cash-settled SARs <i>(in thousands)</i>	Fair Value Price per Share*
Non-vested cash-settled SARs at beginning of year	126	\$ 43.72
Granted	4	32.86
Vested	(81)	73.25
Cancellations	(2)	-
Non-vested cash-settled SARs at end of year	<u>47</u>	68.35

* Weighted-average

As of 2014 year end there was \$3.2 million of unrecognized compensation cost related to non-vested cash-settled SARs that is expected to be recognized as a charge to earnings over a weighted-average period of 0.3 years.

The following weighted-average assumptions were used in calculating the fair value of stock-settled SARs granted during 2014 and 2013 using the Black-Scholes valuation model:

	2014	2013
Expected term of stock-settled SARs <i>(in years)</i>	4.49	4.24
Expected volatility factor	25.64%	33.92%
Expected dividend yield	2.40%	2.67%
Risk-free interest rate	1.50%	0.91%

A summary of stock-settled SARs activity in 2014 is presented below:

	Stock-settled SARs <i>(in thousands)</i>	Exercise Price per Share*	Remaining Contractual Term* <i>(in years)</i>	Aggregate Intrinsic Value <i>(in millions)</i>
Outstanding at beginning of year	122	\$ 79.29		
Granted	116	109.98		
Exercised	(3)	79.04		
Forfeited or expired	(12)	80.97		
Outstanding at end of year	<u>223</u>	94.90	8.6	\$ 9.2
Exercisable at end of year	29	79.40	8.1	1.6

* Weighted-average

The weighted-average grant date fair value of stock-settled SARs granted during 2014 and 2013 was \$19.55 and \$17.47, respectively. The intrinsic value of stock-settled SARs exercised during 2014 and 2013 was \$0.1 million and zero, respectively. The fair value of stock-settled SARs vested during 2014 and 2013 was \$0.6 million and zero, respectively.

As of 2014 year end there was \$2.4 million of unrecognized compensation cost related to non-vested stock-settled SARs that is expected to be recognized as a charge to earnings over a weighted-average period of 1.7 years.

Restricted Stock Awards – Non-employee Directors

The company awarded non-employee directors 10,398 shares and 13,437 shares of restricted stock in 2014 and 2013, respectively. The company awarded non-employee directors 17,811 shares of non-performance-based RSUs in 2012. The fair value of the restricted stock awards is expensed over the one year vesting period based on the fair value on the date of grant. All restrictions for the restricted stock generally lapse upon the earlier of the first anniversary of the grant date, the recipient's death or disability or in the event of a change in control, as defined in the 2011 Plan. If termination of the recipient's service occurs prior to the first anniversary of the grant date for any reason other than death or disability, the shares of restricted stock would be forfeited, unless otherwise determined by the Board. The fair value of the non-performance-based RSUs granted in 2012 was expensed in full on the date of grant at the grant date fair value. All restrictions on the non-performance-based RSUs will lapse upon the recipient's termination of service as a director or in the event of a change in control. At the time of grant, directors had the opportunity to elect to defer receipt of all or part of the non-performance-based RSUs upon the lapsing of restriction provisions.

Directors' Fee Plan

Under the Directors' 1993 Fee Plan, as amended, non-employee directors may elect to receive up to 100% of their fees and retainer in shares of Snap-on's common stock. Directors may elect to defer receipt of all or part of these shares. In addition, directors may elect to defer receipt of all or part of their non-performance-based RSUs into the Directors' Fee Plan upon the lapsing of restriction provisions. For 2014, 2013 and 2012, issuances under the Directors' Fee Plan totaled 21,533 shares, 2,313 shares and 11,025 shares, respectively, of which 20,483 shares, 1,021 shares and 9,278 shares, respectively, were deferred. As of 2014 year end, shares reserved for issuance to directors under this plan totaled 146,944 shares.

Employee Stock Purchase Plan

Substantially all Snap-on employees in the United States and Canada are eligible to participate in an employee stock purchase plan. The purchase price of the company's common stock to participants is the lesser of the mean of the high and low price of the stock on the beginning date (May 15) or ending date (the following May 14) of each plan year. For 2014, 2013 and 2012, issuances under this plan totaled 56,582 shares, 93,442 shares and 33,596 shares, respectively. As of 2014 year end, shares reserved for issuance under this plan totaled 865,043 shares and Snap-on held approximately \$2.5 million of participants' contributions. Participants are able to withdraw from the plan at any time prior to the ending date and receive back all contributions made during the plan year. Compensation expense for plan participants was \$1.5 million in 2014, \$2.6 million in 2013 and \$0.5 million in 2012.

Franchisee Stock Purchase Plan

All franchisees in the United States and Canada are eligible to participate in a franchisee stock purchase plan. The purchase price of the company's common stock to participants is the lesser of the mean of the high and low price of the stock on the beginning date (May 15) or ending date (the following May 14) of each plan year. For 2014, 2013 and 2012, issuances under this plan totaled 74,502 shares, 105,406 shares and 48,819 shares, respectively. As of 2014 year end, shares reserved for issuance under this plan totaled 230,337 shares and Snap-on held approximately \$3.2 million of participants' contributions. Participants are able to withdraw from the plan at any time prior to the ending date and receive back all contributions made during the plan year. Expense for plan participants was \$1.7 million in 2014, \$3.3 million in 2013 and \$0.7 million in 2012.

Note 14: Capital Stock

Snap-on has undertaken repurchases of Snap-on common stock from time to time to offset dilution created by shares issued for employee and franchisee stock purchase plans, stock awards and other corporate purposes. Snap-on repurchased 680,000 shares, 926,000 shares and 1,180,000 shares in 2014, 2013 and 2012, respectively. As of 2014 year end, Snap-on has remaining availability to repurchase up to an additional \$210.9 million in common stock pursuant to Board authorizations. The purchase of Snap-on common stock is at the company's discretion, subject to prevailing financial and market conditions.

Cash dividends paid in 2014, 2013 and 2012 totaled \$107.6 million, \$92.0 million and \$81.5 million, respectively. Cash dividends per share in 2014, 2013 and 2012 were \$1.85, \$1.58 and \$1.40, respectively. On February 12, 2015, the company's Board declared a quarterly dividend of \$0.53 per share, payable on March 10, 2015, to shareholders of record on February 24, 2015.

Note 15: Commitments and Contingencies

Snap-on leases facilities, office equipment and vehicles under non-cancelable operating and capital leases that extend for varying amounts of time. Snap-on's future minimum lease commitments under these leases, net of sub-lease rental income, are as follows:

<i>(Amounts in millions)</i>	Operating Leases	Capital Leases
Year:		
2015	\$ 22.3	\$ 6.3
2016	16.0	4.9
2017	12.0	3.7
2018	8.6	2.6
2019	6.5	2.1
2020 and thereafter	11.1	8.7
Total minimum lease payments	<u>\$ 76.5</u>	<u>\$ 28.3</u>
Less: amount representing interest		<u>(2.5)</u>
Total present value of minimum capital lease payments		<u>\$ 25.8</u>

Amounts included in the accompanying Consolidated Balance Sheets for the present value of minimum capital lease payments as of 2014 year end are as follows:

<i>(Amounts in millions)</i>	<u>2014</u>
Other accrued liabilities	\$ 5.7
Other long-term liabilities	<u>20.1</u>
Total present value of minimum capital lease payments	<u>\$ 25.8</u>

Rent expense for worldwide facilities, office equipment and vehicles, net of sub-lease rental income, was \$30.6 million, \$31.2 million and \$29.7 million in 2014, 2013 and 2012, respectively.

Snap-on provides product warranties for specific product lines and accrues for estimated future warranty cost in the period in which the sale is recorded. Snap-on calculates its accrual requirements based on historic warranty loss experience that is periodically adjusted for recent actual experience, including the timing of claims during the warranty period and actual costs incurred. Snap-on's product warranty accrual activity for 2014, 2013 and 2012 is as follows:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Warranty accrual:			
Beginning of year	\$ 17.0	\$ 18.9	\$ 18.6
Additions	14.6	9.3	10.4
Usage	<u>(14.3)</u>	<u>(11.2)</u>	<u>(10.1)</u>
End of year	<u>\$ 17.3</u>	<u>\$ 17.0</u>	<u>\$ 18.9</u>

Approximately 2,600 employees, or 23% of Snap-on's worldwide workforce, are represented by unions and/or covered under collective bargaining agreements. The number of covered union employees whose contracts expire over the next five years approximates 1,250 employees in 2015; 400 employees in 2016; and 600 employees in 2017; there are no contracts currently scheduled to expire in 2018 or 2019. In recent years, Snap-on has not experienced any significant work slowdowns, stoppages or other labor disruptions.

Snap-on is involved in various legal matters that are being litigated and/or settled in the ordinary course of business. Although it is not possible to predict the outcome of these legal matters, management believes that the results of these legal matters will not have a material impact on Snap-on's consolidated financial position, results of operations or cash flows.

Note 16: Other Income (Expense) – Net

“Other income (expense) – net” on the accompanying Consolidated Statements of Earnings consists of the following:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Interest income	\$ 0.5	\$ 0.5	\$ 0.6
Net foreign exchange loss	(1.5)	(4.4)	(0.7)
Other	<u>0.1</u>	<u>–</u>	<u>(0.3)</u>
Total other income (expense) – net	<u>\$ (0.9)</u>	<u>\$ (3.9)</u>	<u>\$ (0.4)</u>

Note 17: Accumulated Other Comprehensive Income (Loss)

The following is a summary of changes in Accumulated OCI by component and net of tax for 2014 and 2013:

<i>(Amounts in millions)</i>	Foreign Currency Translation	Cash Flow Hedges	Defined Benefit Pension and Postretirement Plans	Total
Balance as of 2012 year end	\$ 129.7	\$ 1.7	\$ (255.6)	\$ (124.2)
Other comprehensive income (loss) before reclassifications	(8.6)	–	62.9	54.3
Amounts reclassified from Accumulated OCI	–	(0.4)	25.5	25.1
Net other comprehensive income (loss)	(8.6)	(0.4)	88.4	79.4
Balance as of 2013 year end	\$ 121.1	\$ 1.3	\$ (167.2)	\$ (44.8)
Other comprehensive income (loss) before reclassifications	(128.8)	–	(88.2)	(217.0)
Amounts reclassified from Accumulated OCI	–	(0.3)	13.9	13.6
Net other comprehensive income (loss)	(128.8)	(0.3)	(74.3)	(203.4)
Balance as of 2014 year end	<u>\$ (7.7)</u>	<u>\$ 1.0</u>	<u>\$ (241.5)</u>	<u>\$ (248.2)</u>

The reclassifications out of Accumulated OCI in 2014 and 2013 are as follows:

<u>Details about Accumulated OCI Components</u>	<u>Amounts Reclassified from Accumulated OCI</u>		<u>Statement of Earnings Presentation</u>
<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	
Gains on cash flow hedges:			
Treasury locks	\$ 0.3	\$ 0.4	Interest expense
Income tax expense	–	–	Income tax expense
Net of tax	0.3	0.4	
Amortization of net unrecognized losses and prior service credits included in net periodic pension cost	(22.0)	(40.7)	See footnote below*
Income tax benefit	8.1	15.2	Income tax expense
Net of tax	(13.9)	(25.5)	
Total reclassifications for the period, net of tax	<u>\$ (13.6)</u>	<u>\$ (25.1)</u>	

* These Accumulated OCI components are included in the computation of net periodic pension cost; see Note 11 for further information.

Note 18: Segments

Snap-on's business segments are based on the organization structure used by management for making operating and investment decisions and for assessing performance. Snap-on's reportable business segments are: (i) the Commercial & Industrial Group; (ii) the Snap-on Tools Group; (iii) the Repair Systems & Information Group; and (iv) Financial Services. The Commercial & Industrial Group consists of business operations serving a broad range of industrial and commercial customers worldwide, primarily through direct and distributor channels. The Snap-on Tools Group consists of business operations primarily serving vehicle service and repair technicians through the company's worldwide mobile tool distribution channel. The Repair Systems & Information Group consists of business operations serving other professional vehicle repair customers worldwide, primarily owners and managers of independent repair shops and original equipment manufacturer ("OEM") dealership service and repair shops ("OEM dealerships"), through direct and distributor channels. Financial Services consists of the business operations of Snap-on's finance subsidiaries.

Snap-on evaluates the performance of its operating segments based on segment revenues, including both external and intersegment net sales, and segment operating earnings. Snap-on accounts for intersegment sales and transfers based primarily on standard costs with reasonable mark-ups established between the segments. Identifiable assets by segment are those assets used in the respective reportable segment's operations. Corporate assets consist of cash and cash equivalents (excluding cash held at Financial Services), deferred income taxes and certain other assets. All significant intersegment amounts are eliminated to arrive at Snap-on's consolidated financial results.

Neither Snap-on nor any of its segments depend on any single customer, small group of customers or government for more than 10% of its revenues.

Financial Data by Segment:

(Amounts in millions)

	2014	2013	2012
Net sales:			
Commercial & Industrial Group	\$ 1,174.8	\$ 1,091.0	\$ 1,125.9

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Revenues by geographic region:*			
United States	\$ 2,288.9	\$ 2,060.2	\$ 1,930.4
Europe	701.9	658.3	649.0
All other	501.8	519.0	519.8
Total revenues	<u>\$ 3,492.6</u>	<u>\$ 3,237.5</u>	<u>\$ 3,099.2</u>

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>
Long-lived assets:**		
United States	\$ 1,042.3	\$ 1,004.6
Sweden	121.4	144.3
All other	254.8	272.9
Total long-lived assets	<u>\$ 1,418.5</u>	<u>\$ 1,421.8</u>

* Revenues are attributed to countries based on the origin of the sale.

** Long-lived assets consist of Property and equipment – net, Goodwill, and Other intangibles – net.

Products and Services: Snap-on derives net sales from a broad line of products and complementary services that are grouped into three categories: (i) tools; (ii) diagnostics and repair information; and (iii) equipment. The tools category includes Snap-on's hand tools, power tools, tool storage, saws, and cutting and pruning tools product offerings. The diagnostics and repair information category includes handheld and PC-based diagnostic products, service and repair information products, diagnostic software solutions, electronic parts catalogs, and business management systems and services to help owners and managers of independent repair shops and OEM dealerships manage and track performance. The equipment category includes solutions for the diagnosis and service of vehicles and industrial equipment. Through its financial services businesses, Snap-on also derives revenue from various financing programs designed to facilitate the sales of its products. Further product line information is not presented as it is not practicable to do so.

The following table shows the consolidated net sales and revenues of these product groups in the last three years:

<i>(Amounts in millions)</i>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Net sales:			
Tools	\$ 1,868.5	\$ 1,743.3	\$ 1,729.4
Diagnostics and repair information	689.5	652.0	619.8
Equipment	<u>719.7</u>	<u>661.2</u>	<u>588.7</u>
Total net sales	\$ 3,277.7	\$ 3,056.5	\$ 2,937.9
Financial services revenue	<u>214.9</u>	<u>181.0</u>	<u>161.3</u>
Total revenues	<u>\$ 3,492.6</u>	<u>\$ 3,237.5</u>	<u>\$ 3,099.2</u>

Note 19: Quarterly Data (unaudited)

**Certification of the Chief Executive Officer pursuant to
Section 302 of the Sarbanes-Oxley Act of 2002**

I, Nicholas T. Pinchuk, certify that:

1. I have reviewed this annual report on Form 10-K of Snap-on Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION:

Statements in this Annual Report that are not historical facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements include those that are in the future tense; include the words "expect," "plan," "target," "estimate," "believe," "anticipate," or similar words; are specifically identified as forward-looking; or describe Snap-on's or management's outlook, plans, estimates, objectives or goals. These forward-looking statements are subject to uncertainties, risks and other factors that could cause actual results to differ materially from those described. Numerous important factors, such as those in the Report on Form 10-K (forming part of this report) in Part I under "Safe Harbor" or Item 1A: "Risk Factors," could affect Snap-on's actual results and could cause its actual results to differ materially from those expressed in any forward-looking statement.
