

icetana ltd
ABN 90 140 449 725

Annual Report

YEAR ENDING
30 JUNE 2020

Chairman's message

Dear Shareholder,

It gives me great pleasure to welcome you to the 2020 Annual Report for icetana Limited (ASX: ICE), our first since listing on the Australian Securities Exchange in December 2019 following our successful IPO (Initial Public Offer).

icetana formed in 2009 to commercialise technology developed by researchers at Curtin University, in the form of artificial intelligence (AI) driven analytics software. This software analyses very large data sets to identify anomalous activity and movements outside normal patterns, providing a dramatic improvement in active monitoring of security surveillance networks. The software integrates with existing video surveillance systems or can be deployed to directly interface with surveillance camera feeds and thereafter reports anomalous or unusual movement patterns and activity in real-time.

icetana completed its IPO to provide funding to accelerate our penetration into the rapidly growing global market for video analytics solutions using AI and machine learning. Since the IPO icetana's has also transitioned to a Software as a Service (SaaS) operation, allowing the Company to build recurring revenue streams. The Company has gained significant traction in securing enterprise-grade customers, and currently provides support to 29 customers with more than 13,000 cameras in 46 locations around the globe.

Since listing, in March 2020, we have deployed our solutions to key new verticals and geographies, including a Netherlands based global bank, representing icetana's first European deployment, in the financial services sector. The contract followed an extensive trial with the client in 2018 and it has a total order value of A\$110,000 for the first year of support and maintenance, with potential to extend camera coverage over time. The banking and financial sectors operate some of the largest surveillance networks in the world, which are estimated to account for up to 25% of the IP video surveillance market, according to a 2019 Allied Market Research report.

Domestically we also secured new clients including, the South Bank cultural, social, educational and recreational precinct in Brisbane, which will cover up to 100 cameras in the first 12 months across a range of dining facilities, playgrounds, walkways, bike paths and parklands, showing the growing need and use for video analytics solutions within Australia and Asia Pacific.

Deployments and renewals in core verticals also continued including renewals with an Australian casino precinct, three universities (North America and Australia) and new orders for a number of retail shopping malls in Australia. In June, Mount Royal University in Canada also renewed its subscription for a further four years through value added reseller Delco Security. Mount Royal deployed the icetana system over a year ago, monitoring more than 200 cameras across its campus in Calgary, and providing real-time notifications to campus staff about motion anomalies and unusual events. The contract extension was particularly relevant as it highlighted icetana's expanding market opportunity within North America as a key geography for growth.

Unfortunately the impacts of COVID-19, specifically in the second half of the year, did impact our growth and revenue, however icetana still posted modest growth to its customer base and annualized recurring revenue (ARR) during the March and June quarters. In parallel, the company implemented several measures to conserve cash including cuts to Directors' remuneration and executive team salaries, as well as full-time staff reducing their hours. We made a smooth transition to working from home, limiting the disruption of travel restrictions and we realigned sales and product development efforts towards industry verticals less impacted by COVID restrictions.

From a product development perspective, we delivered more updates to our solutions in the June quarter than in the previous nine months, demonstrating the quality and efficiency of our research and development team and the goal to achieve market leading product status.

We finished the year in a strong financial position, with \$2.67 million cash at bank and a strong base of receivables that settled shortly after year end. The Company will continue to seek new opportunities to build scale and to broaden its customer base, product offering and technological advantage in the year ahead.

I would like to thank our Shareholders for their support during our first 6 months on the ASX, and look forward to that support continuing as we work to scale the business in FY2021. Thanks also go to our Management team and staff, particularly those who were instrumental in our successful IPO and ASX listing, and for their performance during the challenging operating environment over the past six months. Finally, I would like to thank my fellow Board members for their guidance and support throughout the year.

Mark Potts
Non-Executive Chairman

CEO's message

Dear fellow shareholders,

While operating conditions since icetana listed late last year have presented several challenges, it has been pleasing to see the progress our Company has made in building a high performing team and continuing to secure new customers and contract renewals. Our transition to a Software as a Service (SaaS) operation is complemented by a non-SaaS direct-licensing model, which includes recurring maintenance fees where customers or markets have a strong preference for an upfront payment arrangement. Recurring revenues by way of SaaS and maintenance fees increased as a proportion of total revenue for the financial year to approximately 60%, up from 53% the previous year.

In light of COVID-19, customer decision making processes were affected during the financial year and continue to be challenging post year-end. However, rather than lost opportunities, these actions are largely manifesting as delays and deferrals to deals the Company had been planning to close in the near term. Some of icetana's key vertical markets, including retail malls, casinos and universities have been very directly impacted by COVID-19 restrictions. Whilst there has been no impact thus far on renewals of existing customers in these verticals, there have been some deferrals of tenders, deployments and implementations caused by the uncertainty within customers' own business operations, and these delays have impacted our own revenues for the financial year.

We implemented numerous cost savings measures, particularly during the final quarter of the financial year to help preserve our strong cash position. The Company accessed Australian Federal Government programs such as the JobKeeper allowance where possible to further support our cash retention objective. The savings and allowance claims implemented resulted in a substantial reduction in net cash expenditure during the final quarter which is flowing through to Q1 FY21. The Company will continue to review and reduce its expenditure where appropriate and access Government support programs where it is entitled to do so.

icetana reported sales revenue of \$1,181,096, which was down 16% on the corresponding year of \$1,407,405. The Company also had \$948,553 in unearned revenue as at 30 June 2020, representing pre-payments received from customers who typically pay for annual subscriptions 12 months in advance. After providing for income tax, icetana posted a loss of \$3,157,649, a 6% improvement on the FY2019 loss of \$3,383,186. icetana's financial position remains strong, with net current assets of \$2.674 million and nil debt as at 30 June 2020.

I am proud of the way the team has rallied around our cost savings measures and made additional customer implementations with only remote access. We also rolled out some significant product enhancements and pivoted our marketing towards clearer line of sight revenue opportunities.

Our deal pipeline remains positive, and as corporate sentiment improves we expect revenues to grow in a more predictable manner. The market for video analytics continue to grow with the understanding of artificial intelligence and this is driving increasing demand. We continue to secure enterprise-grade customers, and in the year ahead we will be targeting additional industry verticals as part of the product development roadmap. These additional industry vertical markets include prisons, healthcare, financial services and remote guarding services organisations. I look forward to keeping you updated of our progress on executing our strategy in FY21.

icetana Limited
Directors' report
30 June 2020

The directors present their report, together with the financial statements, on the Consolidated Entity (referred to hereafter as the 'Consolidated Entity') consisting of icetana Limited (referred to hereafter as the 'Company' or 'Parent Entity') and the entities it controlled for the year ended 30 June 2020.

Directors

The following persons were directors of icetana Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Mark Potts
Matthew Macfarlane
Geoff Pritchard
Justin Mannolini (appointed 18 December 2019)
Rohan McDougall (resigned on 18 December 2019)
James Williams (resigned on 1 October 2019)

Principal activities

During the financial year the principal continuing activity of the Consolidated Entity consisted of the development and sale of an AI assisted video surveillance software using technology based on machine learning to provide automatic real-time anomalous event detection.

Review of operations

Founded in 2009, icetana was formed to commercialise technology developed by researchers at Curtin University that allows for the efficient analysis of very large data sets to identify anomalous activity and events outside normal patterns.

icetana has commercialised the technology by developing Artificial Intelligence (AI) assisted video surveillance software using machine learning techniques to provide automated real-time anomalous event detection (icetana Solution) for use cases including security, loss prevention, theft and health and safety. The icetana Solution integrates with existing video surveillance systems or can be deployed to directly interface with surveillance camera feeds. The software 'learns' activity patterns (not object or facial recognition) for fixed-field-of-view cameras and creates a model of 'normal' movement patterns and activity. After the learning phase, the software then reports anomalous or unusual movement patterns and activity in real-time, through a user interface that highlights those anomalous events. Security operators, typically based in operations centres responsible for monitoring hundreds to thousands of cameras, can review the unusual events and determine appropriate response.

To date, significant traction has been made in securing enterprise grade customers and the Company currently has over 25 active customers across a number of core industry verticals with installed sites in over 40 locations supporting in excess of 12,000 video surveillance cameras globally. The product has application to multiple customer segments and use-cases and will be targeting additional industry verticals as part of the product development roadmap (e.g. prisons, healthcare and financial services).

icetana's business is transitioning swiftly to a Software as a Service (SaaS) operation, allowing the Company to build recurring revenue streams. This is complemented by a non-SaaS direct-licensing model which includes recurring maintenance fees where customers or markets have a strong preference for such upfront arrangement.

Customer decision making processes have been affected by COVID-19 during the financial year and continue to be challenged post year-end. This has typically manifested as delays and deferrals to deals the Company had been planning to close in the near term, rather than lost opportunities. Some of icetana's key vertical markets, including retail malls, casinos and universities have been very directly impacted by COVID-19 restrictions. Whilst there has been no impact thus far on renewals of existing customers in these verticals, there have been some deferrals of tenders, deployments and implementations caused by the uncertainty within customers' own business operations and these delays have impacted revenues for the financial year.

The Company implemented numerous cost savings measures in the final quarter of the financial year to help preserve our strong cash position. The Company assessed and where appropriate accessed Government programs such as the JobKeeper allowance to further support our cash retention objective. The savings and allowance claims that were implemented have resulted in a substantial reduction in net cash expenditure during the final quarter and this has flowed through to the post year end period. The Company will continue to review and reduce its expenditure where appropriate and access Government support programs where it is entitled to do so.

Review of operations (cont.)

The loss for the Consolidated Entity after providing for income tax amounted to \$3,157,649 (30 June 2019 \$3,383,186).

For the year ended 30 June 2020 the Consolidated Entity reported sales revenue of \$1,181,096, down 16% on the corresponding year of \$1,407,405. However recurring revenues by way of SaaS and maintenance fees increased as a proportion of total revenue for the financial year to approximately 60% (53% in 2019). The Company also had \$948,553 in unearned revenue as at 30 June 2020 representing pre-payments received from customers who typically pay for annual subscriptions 12 months in advance.

The financial position of the Consolidated Entity remains strong with net current assets of \$2.674 million and nil debt.

Dividends

No dividends were paid or declared since the start of the financial period. No recommendation for payment of dividends has been made.

Significant changes in the state of affairs

During the year ended 30 June 2020, icetana successfully closed its \$5 million initial public offering ("IPO") and was admitted to the official list of the Australian Securities Exchange ("ASX"), commencing trading on 23 December 2019.

There were no other significant changes in the state of affairs of the Consolidated Entity during the financial year.

Matters subsequent to the end of the financial year

The impact of the Coronavirus (COVID-19) pandemic is ongoing and while it has not been financially positive for the Consolidated Entity up to 30 June 2020, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

No matter or circumstance has arisen since 30 June 2020 that has significantly affected, or may significantly affect the Consolidated Entity's operations, the results of those operations, or the Consolidated Entity's state of affairs in future financial years.

Likely developments and expected results of operations

icetana will continue to implement the business strategies put in place to drive the Company towards a growth trajectory in the foreseeable future, subject to a stable macro-economic environment. The Company will continue to seek new opportunities to build scale and to broaden its customer base, product offering and technological advantage.

In reliance on s299A(3) of the Corporations Act 2001, we have not disclosed further information on business strategies and prospects, because disclosure of that information is likely to result in unreasonable prejudice to the Group.

Environmental regulation

The current activities of the Company are not subject to any significant environmental regulation. However, the Board believes that the Company has adequate systems in place to manage its environmental obligations and is not aware of any breach of any environmental requirements during the period covered by this report as they apply to the Company.

Information on directors

Name:	Mark Potts
Title:	Non-Executive Chairman
Qualifications:	B.Sc
Experience and expertise:	Mark has 30-plus years' experience in senior executive and board positions, in start-ups and large corporates. Most recently he was the worldwide CTO and VP for Corporate Strategy at Hewlett Packard Enterprise. Prior to Hewlett Packard, Mark was the founder of several successful venture backed start-ups that have driven technology disruption and business innovation in varied industries.
Other current ASX directorships:	Non-executive director of Resolute Mining Limited (ASX:RSG) (appointed 29 June 2017)
Former ASX directorships (last 3 years):	Non-executive chairman of Decimal Software Limited (ASX: DSX) (resigned 24 December 2018)
Special responsibilities:	Chairman

Company secretary

Shane Cranswick (B.Com, CA, FFin, FGIA, MAICD) has held the role of Company Secretary since 8 November 2017. He is an accomplished finance executive with over 20 years' experience in senior management roles in predominantly listed companies both in Australia and overseas. Mr Cranswick has gained a Bachelor of Commerce degree from the University of Western Australia then commenced his career with an international Chartered Accounting firm.

Meeting of directors

The number of meetings of the Consolidated Entity's Board of Directors ('the Board') during the year ended 30 June 2020, and the number of meetings attended by each director were:

Director	Attended	Held
Mark Potts	8	8
Matthew Macfarlane	8	8
Geoff Pritchard	8	8
Justin Mannolini	6	6
Rohan McDougall	2	2
James Williams	1	1

Held: represents the number of meetings held during the time that the director held office.

Remuneration report (Audited)

The remuneration report details the key management personnel remuneration arrangements for the Consolidated Entity, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The remuneration report is set out under the following main headings:

- Principles used to determine the nature and amount of remuneration
- Details of remuneration
- Service agreements
- Share-based compensation
- Additional information
- Additional disclosures relating to key management personnel

Principles used to determine the nature and amount of remuneration

The objective of the Consolidated Entity's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with the achievement of strategic objectives and the creation of value for shareholders, and it is considered to conform to the market best practice for the delivery of reward. The Board of Directors ('the Board') ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency

The Board is responsible for determining and reviewing remuneration arrangements for its directors and executives. The performance of the Consolidated Entity depends on the quality of its directors and executives. The remuneration philosophy is to attract, motivate and retain high performance and high quality personnel.

The Board has structured an executive remuneration framework that is market competitive and complementary to the reward strategy of the Consolidated Entity.

The reward framework is designed to align executive reward to shareholders' interests. The Board have considered that it should seek to enhance shareholders' interests by:

- having economic profit as a core component of plan design
- focusing on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant or increasing return on assets as well as focusing the executive on key non-financial drivers of value
- attracting and retaining high calibre executives

Additionally, the reward framework should seek to enhance executives' interests by:

- rewarding capability and experience
- reflecting competitive reward for contribution to growth in shareholder wealth
- providing a clear structure for earning rewards

In accordance with best practice corporate governance, the structure of non-executive director and executive director remuneration is separate.

Non-executive directors remuneration

Fees and payments to non-executive directors reflect the demands and responsibilities of their role. Non-executive directors' fees and payments are reviewed annually by the Board. The Board may, from time to time, receive advice from independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market. The chairman's fees are determined independently to the fees of other non-executive directors based on comparative roles in the external market. The chairman is not present at any discussions relating to the determination of his own remuneration. Non-executive directors do not receive share options or other incentives.

ASX listing rules require the aggregate non-executive directors' remuneration be determined periodically by a general meeting. The existing approved maximum annual aggregate remuneration is \$300,000.

Executive remuneration

The Consolidated Entity aims to reward executives based on their position and responsibility, with a level and mix of remuneration which has both fixed and variable components.

The executive remuneration and reward framework has four components:

- base pay and non-monetary benefits
- short-term performance incentives
- share-based payments
- other remuneration such as superannuation and long service leave

The combination of these comprises the executive's total remuneration.

icetana Limited
Directors' report
30 June 2020

Fixed remuneration, consisting of base salary, superannuation and non-monetary benefits, are reviewed annually by the Board based on individual and business unit performance, the overall performance of the Consolidated Entity and comparable market remunerations.

Executives may receive their fixed remuneration in the form of cash or other fringe benefits where it does not create any additional costs to the Consolidated Entity and provides additional value to the executive.

The short-term incentives ('STI') program is designed to align the targets of the business units with the performance hurdles of executives. STI payments are granted to executives based on specific annual targets and key performance indicators ('KPI's') being achieved. KPI's include profit contribution, customer satisfaction, leadership contribution and product management.

The long-term incentives ('LTI') include long service leave and share-based payments. Options awarded to executives vest over a period of three years. The Board reviewed the long-term equity-linked performance incentives specifically for executives during the year ended 30 June 2020.

Consolidated entity performance and link to remuneration

From 1 July 2020, remuneration for certain individuals will be directly linked to the performance of the Consolidated Entity. A portion of cash bonus and incentive payments are dependent on defined earnings per share targets being met. The remaining portion of the cash bonus and incentive payments are at the discretion of the Board. Refer to the section 'Additional information' below for details of the earnings and total shareholders return for the last five years.

The Board is of the opinion that the continued improved results can be attributed in part to the adoption of performance based compensation and is satisfied that this improvement will continue to increase shareholder wealth if maintained over the coming years.

Use of remuneration consultants

The Consolidated Entity did not engage external consultants to review existing remuneration policies during the year ended 30 June 2020.

Details of remuneration

Amounts of remuneration

Details of the remuneration of key management personnel of the Consolidated Entity are set out in the following tables.

The key management personnel of the Consolidated Entity consisted of the following directors of icetana Limited:

- Mark Potts - Non-Executive Chairman
- Geoff Pritchard - Non-Executive Director
- Justin Mannolini - Non-Executive Director (appointed 18 December 2019)
- Matthew Macfarlane - Managing Director and Chief Executive Officer
- Rohan McDougall – Non-Executive Director (resigned on 18 December 2019)
- James Williams – Non-Executive Director (resigned on 1 October 2019)

And the following persons:

- Shane Cranswick - Company Secretary and Chief Financial Officer
- Kevin Brown – Chief Operating Officer
- Damon Watkins – Chief Revenue Officer

Changes since the end of the reporting period:

- Damon Watkins ceased employment with the Company on 24 July 2020

K. Brown	100%	N/a	-	N/a	-	N/a
D. Watkins	89%	N/a	11%	N/a	-	N/a

Cash bonuses are dependent on meeting defined performance measures. The amount of the bonus is determined having regard to the satisfaction of performance measures and weightings as described above in the section 'Consolidated entity performance and link to remuneration'. The maximum bonus values are established at the start of each financial year and amounts payable are determined in the final month of the financial year by the Board.

The proportion of the cash bonus paid/payable or forfeited is as follows:

Name	Cash bonus paid/payable		Cash bonus forfeited	
	2020	2019	2020	2019
<i>Executive Directors:</i>				
M. Macfarlane	45%	N/a	55%	N/a

Service agreements

Remuneration and other terms of employment for key management personnel are formalised in service agreements. Details of these agreements are as follows:

Name: Matthew Macfarlane
Title: Managing Director and Chief Executive Officer
Agreement commenced: 1 May 2019
Term of agreement: Ongoing
Details: Base salary for the year ending 30 June 2020 of \$192,000 plus superannuation, to be reviewed annually by the Board. 2 month termination notice by either party, revenue bonus of up to 40% of salary subject to achievement of revenue targets to be agreed with the Board annually, capital raise bonus of between \$50,000-\$150,000 (for the year ended 30 June 2020 only) for successful completion of capital raising, eligible to participate in Employee Stock Investment Plan (ESIP) subject to a Performance Review and Board approval, non-solicitation and non-compete clauses. Effective 1 May 2020, Mr Macfarlane and the Company agreed to reduce base salary by 20% until such time as the parties agree otherwise.

Name: Shane Cranswick
Title: Chief Financial Officer and Company Secretary
Agreement commenced: 26 June 2017
Term of agreement: Ongoing
Details: Base salary for the year ending 30 June 2020 of \$190,000 plus superannuation, to be reviewed annually by the Board. 3 month termination notice by either party, capital raise bonus of \$50,000 (for the year ended 30 June 2020 only) for successful completion of capital raising, non-solicitation and non-compete clauses. Effective 1 May 2020, Mr Cranswick and the Company agreed to reduce base salary by 20% until such time as the parties agree otherwise.

Name: Kevin Brown
Title: Chief Operating Officer
Agreement commenced: 7 October 2019
Term of agreement: Ongoing
Details: Base salary for the year ending 30 June 2020 of \$180,000 plus superannuation, to be reviewed annually by the Board. 3 month termination notice by either party, eligible to participate in Employee Stock Investment Plan (ESIP) subject to a Performance Review and Board approval, non-solicitation and non-compete clauses. Effective 1 May 2020, Mr Brown and the Company agreed to reduce base salary by 20% until such time as the parties agree otherwise.

Name: Damon Watkins
Title: Chief Revenue Officer
Agreement commenced: 7 October 2019 (ceased employment on 24 July 2020)
Term of agreement: Ongoing
Details: Base salary for the year ending 30 June 2020 of \$185,000 plus superannuation, to be reviewed annually by the Board. 3 month termination notice by either party, 3 month termination notice by either party, eligible to participate in Employee Stock Investment Plan (ESIP) subject to a Performance Review and Board approval, revenue bonus potential of up to \$100,000 for 'on target' performance measured against KPI achievements (\$40,000 guaranteed) as agreed with the CEO annually, non-solicitation and non-compete clauses. Effective 1 May 2020, Mr Watkins and the Company agreed to reduce base salary and cash bonus by 20% until such time as the parties agree otherwise.

Share-based compensation

Options

The terms and conditions of each grant of options over ordinary shares affecting remuneration of directors and other key management personnel in this financial year or future reporting years are as follows:

Name	Number of options granted	Grant date	Vesting date and exercisable date	Expiry date	Exercise price	Fair value per option at grant date
M Potts	937,739	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
M Macfarlane	2,344,348	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
G Pritchard	468,870	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
J Mannolini	468,870	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
K Brown	1,758,261	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
D Watkins	937,739	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
S Cranswick	1,406,609	18 Dec 2019	Note 1	30 Nov 2023	\$0.30	\$0.125
M Macfarlane	5,642,702	Note 2	Note 3	31 Mar 2024	\$0.25	\$0.093
K Brown	4,232,026	1 May 2020	Note 3	31 Mar 2024	\$0.25	\$0.093
D Watkins	3,854,491	1 May 2020	Note 3	31 Mar 2024	\$0.25	\$0.093
S Cranswick	2,586,916	1 May 2020	Note 3	31 Mar 2024	\$0.25	\$0.093

Notes.

¹ Options vest on a quarterly basis over the 3 year period after the issue date with a further vesting condition of a twelve month "cliff" from the commencement of employment, engagement or office with the Company. There is no entitlement to retain any options (partially vested or otherwise) until 12 months of employment, engagement or office is completed. If employment is ceased during the vesting period, any unvested options held are forfeited by director/KMP.

² Granted 1 May 2020 subject to shareholder approval at the 2020 Annual General Meeting.

³ Options vest $\frac{1}{3}$ in 12 months and quarterly thereafter over a total three year period commencing 1 May 2020. If employment is ceased during the vesting period, any unvested options held are forfeited by director/KMP.

Options granted carry no dividend or voting rights.

All options were granted over unissued fully paid ordinary shares in the company. The number of options granted was determined having regard to the satisfaction of performance measures and weightings as described above in the section 'Consolidated entity performance and link to remuneration'. Options vest based on the provision of service over the vesting period whereby the executive becomes beneficially entitled to the option on vesting date. Options are exercisable by the holder as from the vesting date. There has not been any alteration to the terms or conditions of the grant since the grant date. There are no amounts paid or payable by the recipient in relation to the granting of such options other than on their potential exercise.

Icetana Limited
Directors' report
30 June 2020

Values of options over ordinary shares granted, exercised and lapsed for directors and other key management personnel as part of compensation during the year ended 30 June 2020 are set out below (note – value of options provided below is value of options vested as at 30 June 2020):

Name	Vested and exercisable as at 30 June 2020 number	Value of options vested during the year \$	Value of options exercised during the year \$	Value of options lapsed during the year \$	Remuneration consisting of options for the year %
M Potts	156,290	19,536	-	-	25.6%
M Macfarlane	390,725	48,841	-	-	13.8%
G Pritchard	78,145	9,768	-	-	5.1%
J Mannolini	-	-	-	-	0%
K Brown	-	-	-	-	0%
D Watkins	-	-	-	-	0%
S Cranswick	234,435	23,304	-	-	12.0%

This concludes the remuneration report, which has been audited.

Shares under option

All unissued ordinary shares of icetana Ltd under option (relating to key management personnel and other personnel) at the date of this report are as follows:

Grant date	Expiry date	Exercise price	Number under option
18 Dec 2019	30 Nov 2023	\$0.30	7,931,321
1 May 2020	31 Mar 2024	\$0.25	9,432,667
1 May 2020 ¹	31 Mar 2024	\$0.25	5,642,702

^{1.} Grant subject to shareholder approval at the 2020 Annual General Meeting

No person entitled to exercise the options had or has any right by virtue of the option to participate in any share issue of the company or of any other body corporate.

Shares issued on the exercise of options

The following ordinary shares of icetana Ltd were issued during the year ended 30 June 2020 and up to the date of this report on the exercise of options granted:

Date options granted	Exercise price	Number of shares issued
11 May 2018	\$0.068	1,760,954

Indemnity and insurance of officers

The company has indemnified the directors and executives of the company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the company paid a premium in respect of a contract to insure the directors and executives of the company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

Indemnity and insurance of auditor

The company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the company or any related entity against a liability incurred by the auditor.

During the financial year, the company has not paid a premium in respect of a contract to insure the auditor of the company or any related entity.

Proceedings on behalf of the company`

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the company, or to intervene in any proceedings to which the company is a party for the purpose of taking responsibility on behalf of the company for all or part of those proceedings.

Non-audit services

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 52 to the financial statements.

The directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor's behalf), is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001.

The directors are of the opinion that the services as disclosed in note 52 to the financial statements do not compromise the external auditor's independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the company, acting as advocate for the company or jointly sharing economic risks and rewards.

Officers of the company who are former partners of Butler Settineri (Audit) Pty Ltd

There are no officers of the company who are former partners of Butler Settineri (Audit) Pty Ltd.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report.

Auditor

Butler Settineri (Audit) Pty Ltd continues in office in accordance with section 327 of the Corporations Act 2001.

This report is made in accordance with a resolution of directors, pursuant to section 306(3)(a) of the Corporations Act 2001.

On behalf of the directors

Mark Potts
Non-Executive Chairman

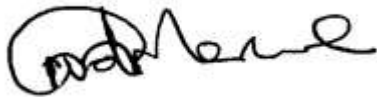

28 August 2020
Perth, Western Australia

AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the audit of icetana Ltd and its controlled entities for the year ended 30 June 2020, I declare that, to the best of my knowledge and belief, there have been:

- a) No contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- b) No contraventions of any applicable code of professional conduct in relation to the audit.

BUTLER SETTINERI (AUDIT) PTY LTD

MARIUS VAN DER MERWE CA
Director

Note 1. Significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted

The Consolidated Entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

The following Accounting Standards and Interpretations are most relevant to the Consolidated Entity:

AASB 16 Leases

The Consolidated Entity has adopted AASB 16 from 1 July 2019. The standard replaces AASB 117 'Leases' and for lessees eliminates the classifications of operating leases and finance leases. Except for short-term leases and leases of low-value assets, right-of-use assets and corresponding lease liabilities are recognised in the statement of financial position. Straight-line operating lease expense recognition is replaced with a depreciation charge for the right-of-use assets (included in operating costs) and an interest expense on the recognised lease liabilities (included in finance costs). In the earlier periods of the lease, the expenses associated with the lease under AASB 16 will be higher when compared to lease expenses under AASB 117. However, EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation) results improve as the operating expense is now replaced by interest expense and depreciation in profit or loss. For classification within the statement of cash flows, the interest portion is disclosed in operating activities and the principal portion of the lease payments are separately disclosed in financing activities. For lessor accounting, the standard does not substantially change how a lessor accounts for leases.

The impact on the financial performance and position of the Consolidated Entity from the adoption of this Accounting Standard is detailed in note 3.

Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

Going Concern

During the year the Consolidated Entity continued to incur losses although reduced from the prior year as a result of lower operating expenses. For the year ended 30 June 2020, the Consolidated Entity incurred a loss from continuing operations after tax of \$3,157,649 (30 June 2019: \$3,383,186). In the same period the consolidated entity had operating cash outflows of \$2,939,584 (year ended 30 June 2019: \$2,841,570).

Notwithstanding these matters, the consolidated financial statements have been prepared on a going concern basis. The Directors consider this to be appropriate for the following reasons:

- the projected cash flow through the renewal of existing customers and the addition of new customer orders;
- the ability to reduce operating cash outflows dependent on the addition of new customer orders;
- access to capital markets, should funding be required, for the Consolidated Entity to continue to execute against its business plan in the medium term.

The Directors have a reasonable expectation that; existing cash, additional inflows from sales to existing customers and the R&D rebate recognised at year end will be sufficient to sustain operations for a period of not less than 12 months from the date of signing the financial report. Furthermore, the Consolidated Entity has the ability to adjust its cash flows to ensure that it can pay its debts as and when they fall due.

Historical cost convention

The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of financial assets and liabilities at fair value through profit or loss, financial assets at fair value through other

icetana Limited
Notes to the financial statements

Note 1. Significant accounting policies (continued)

comprehensive income, investment properties, certain classes of property, plant and equipment and derivative financial instruments.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Consolidated Entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

Parent entity information

In accordance with the Corporations Act 2001, these financial statements present the results of the Consolidated Entity only. Supplementary information about the parent entity is disclosed in note 31.

Principles of consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of icetana Limited ('company' or 'parent entity') as at 30 June 2020 and the results of all subsidiaries for the year then ended. icetana Limited and its subsidiaries together are referred to in these financial statements as the 'Consolidated Entity'.

Subsidiaries are all those entities over which the Consolidated Entity has control. The Consolidated Entity controls an entity when the Consolidated Entity is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Consolidated Entity. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the Consolidated Entity are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Consolidated Entity.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of profit or loss and other comprehensive income, statement of financial position and statement of changes in equity of the Consolidated Entity. Losses incurred by the Consolidated Entity are attributed to the non-controlling interest in full, even if that results in a deficit balance.

Where the Consolidated Entity loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Consolidated Entity recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

Operating segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports to the Board. The Board is responsible for the allocation of resources to operating segments and assessing their performance.

Foreign currency translation

The financial statements are presented in Australian dollars, which is icetana Limited's functional and presentation currency.

Foreign currency transactions

Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation

icetana Limited
Notes to the financial statements
For the year ended 30 June 2020

Note 1. Significant accounting policies (continued)

at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign operations

The assets and liabilities of foreign operations are translated into Australian dollars using the exchange rates at the reporting date. The revenues and expenses of foreign operations are translated into Australian dollars using the average exchange rates, which approximate the rates at the dates of the transactions, for the period. All resulting foreign exchange differences are recognised in other comprehensive income through the foreign currency reserve in equity.

The foreign currency reserve is recognised in profit or loss when the foreign operation or net investment is disposed of.

Revenue recognition

The Consolidated Entity recognises revenue as follows:

Revenue from contracts with customers

Revenue is recognised at an amount that reflects the consideration to which the Consolidated Entity is expected to be entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the Consolidated Entity: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognises revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

Variable consideration within the transaction price, if any, reflects concessions provided to the customer such as discounts, rebates and refunds, any potential bonuses receivable from the customer and any other contingent events. Such estimates are determined using either the 'expected value' or 'most likely amount' method. The measurement of variable consideration is subject to a constraining principle whereby revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The measurement constraint continues until the uncertainty associated with the variable consideration is subsequently resolved. Amounts received that are subject to the constraining principle are recognised as a refund liability.

Sale of goods

Revenue from the sale of goods is recognised at the point in time when the customer obtains control of the goods, which is generally at the time of delivery.

Rendering of services

Revenue from a contract to provide services is recognised over time as the services are rendered based on either a fixed price or an hourly rate.

Interest

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

Government grants

Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

Government grants are netted off against the expenditure to which they relate.

Note 1. Significant accounting policies (continued)

Income tax

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

icetana Limited does not have any wholly-owned Australian subsidiaries and has not formed an income tax consolidated group under the tax consolidation regime.

Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the Consolidated Entity's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the Consolidated Entity's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows presentation purposes, cash and cash equivalents also includes bank overdrafts, which are shown within borrowings in current liabilities on the statement of financial position.

Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 30 days.

Note 1. Significant accounting policies (continued)

The Consolidated Entity has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue.

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

Contract assets

Contract assets are recognised when the Consolidated Entity has transferred goods or services to the customer but where the Consolidated Entity is yet to establish an unconditional right to consideration. Contract assets are treated as financial assets for impairment purposes.

Customer acquisition costs

Customer acquisition costs are capitalised as an asset where such costs are incremental to obtaining a contract with a customer and are expected to be recovered. Customer acquisition costs are amortised on a straight-line basis over the term of the contract.

Costs to obtain a contract that would have been incurred regardless of whether the contract was obtained or which are not otherwise recoverable from a customer are expensed as incurred to profit or loss. Incremental costs of obtaining a contract where the contract term is less than one year is immediately expensed to profit or loss.

Customer fulfilment costs

Customer fulfilment costs are capitalised as an asset when all the following are met: (i) the costs relate directly to the contract or specifically identifiable proposed contract; (ii) the costs generate or enhance resources of the Consolidated Entity that will be used to satisfy future performance obligations; and (iii) the costs are expected to be recovered. Customer fulfilment costs are amortised on a straight-line basis over the term of the contract.

Right of return assets

Right of return assets represents the right to recover inventory sold to customers and is based on an estimate of customers who may exercise their right to return the goods and claim a refund. Such rights are measured at the value at which the inventory was previously carried prior to sale, less expected recovery costs and any impairment.

Inventories

Raw materials, work in progress and finished goods are stated at the lower of cost and net realisable value on a 'first in first out' basis. Cost comprises of direct materials and delivery costs, direct labour, import duties and other taxes, an appropriate proportion of variable and fixed overhead expenditure based on normal operating capacity, and, where applicable, transfers from cash flow hedging reserves in equity. Costs of purchased inventory are determined after deducting rebates and discounts received or receivable.

Stock in transit is stated at the lower of cost and net realisable value. Cost comprises of purchase and delivery costs, net of rebates and discounts received or receivable.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Derivative financial instruments

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

Cash flow hedges

Cash flow hedges are used to cover the Consolidated Entity's exposure to variability in cash flows that is attributable to particular risks associated with a recognised asset or liability or a firm commitment which could affect profit or loss. The effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income through the cash flow hedges reserve in equity, whilst the ineffective portion is recognised in profit or loss. Amounts taken to equity are transferred out of equity and included in the measurement of the hedged transaction when the forecast transaction occurs.

Note 1. Significant accounting policies (continued)

Cash flow hedges are tested for effectiveness on a regular basis both retrospectively and prospectively to ensure that each hedge is highly effective and continues to be designated as a cash flow hedge. If the forecast transaction is no longer expected to occur, the amounts recognised in equity are transferred to profit or loss.

If the hedging instrument is sold, terminated, expires, exercised without replacement or rollover, or if the hedge becomes ineffective and is no longer a designated hedge, the amounts previously recognised in equity remain in equity until the forecast transaction occurs.

Non-current assets or disposal groups classified as held for sale

Non-current assets and assets of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continued use. They are measured at the lower of their carrying amount and fair value less costs of disposal. For non-current assets or assets of disposal groups to be classified as held for sale, they must be available for immediate sale in their present condition and their sale must be highly probable.

An impairment loss is recognised for any initial or subsequent write down of the non-current assets and assets of disposal groups to fair value less costs of disposal. A gain is recognised for any subsequent increases in fair value less costs of disposal of a non-current assets and assets of disposal groups, but not in excess of any cumulative impairment loss previously recognised.

Non-current assets are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of assets held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current assets. The liabilities of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current liabilities.

Associates

Associates are entities over which the Consolidated Entity has significant influence but not control or joint control. Investments in associates are accounted for using the equity method. Under the equity method, the share of the profits or losses of the associate is recognised in profit or loss and the share of the movements in equity is recognised in other comprehensive income. Investments in associates are carried in the statement of financial position at cost plus post-acquisition changes in the Consolidated Entity's share of net assets of the associate. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment. Dividends received or receivable from associates reduce the carrying amount of the investment.

When the Consolidated Entity's share of losses in an associate equals or exceeds its interest in the associate, including any unsecured long-term receivables, the Consolidated Entity does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

The Consolidated Entity discontinues the use of the equity method upon the loss of significant influence over the associate and recognises any retained investment at its fair value. Any difference between the associate's carrying amount, fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

Investments and other financial assets

Investments and other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement, except for financial assets at fair value through profit or loss. Such assets are subsequently measured at either amortised cost or fair value depending on their classification. Classification is determined based on both the business model within which such assets are held and the contractual cash flow characteristics of the financial asset unless an accounting mismatch is being avoided.

Financial assets are derecognised when the rights to receive cash flows have expired or have been transferred and the Consolidated Entity has transferred substantially all the risks and rewards of ownership. When there is no reasonable expectation of recovering part or all of a financial asset, its carrying value is written off.

Note 1. Significant accounting policies (continued)

Financial assets at fair value through profit or loss

Financial assets not measured at amortised cost or at fair value through other comprehensive income are classified as financial assets at fair value through profit or loss. Typically, such financial assets will be either: (i) held for trading, where they are acquired for the purpose of selling in the short-term with an intention of making a profit, or a derivative; or (ii) designated as such upon initial recognition where permitted. Fair value movements are recognised in profit or loss.

Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income include equity investments which the Consolidated Entity intends to hold for the foreseeable future and has irrevocably elected to classify them as such upon initial recognition.

Impairment of financial assets

The Consolidated Entity recognises a loss allowance for expected credit losses on financial assets which are either measured at amortised cost or fair value through other comprehensive income. The measurement of the loss allowance depends upon the Consolidated Entity's assessment at the end of each reporting period as to whether the financial instrument's credit risk has increased significantly since initial recognition, based on reasonable and supportable information that is available, without undue cost or effort to obtain.

Where there has not been a significant increase in exposure to credit risk since initial recognition, a 12-month expected credit loss allowance is estimated. This represents a portion of the asset's lifetime expected credit losses that is attributable to a default event that is possible within the next 12 months. Where a financial asset has become credit impaired or where it is determined that credit risk has increased significantly, the loss allowance is based on the asset's lifetime expected credit losses. The amount of expected credit loss recognised is measured on the basis of the probability weighted present value of anticipated cash shortfalls over the life of the instrument discounted at the original effective interest rate.

For financial assets mandatorily measured at fair value through other comprehensive income, the loss allowance is recognised in other comprehensive income with a corresponding expense through profit or loss. In all other cases, the loss allowance reduces the asset's carrying value with a corresponding expense through profit or loss.

Property, plant and equipment

Land and buildings are shown at fair value, based on periodic, at least every 3 years, valuations by external independent valuers, less subsequent depreciation and impairment for buildings. The valuations are undertaken more frequently if there is a material change in the fair value relative to the carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Increases in the carrying amounts arising on revaluation of land and buildings are credited in other comprehensive income through to the revaluation surplus reserve in equity. Any revaluation decrements are initially taken in other comprehensive income through to the revaluation surplus reserve to the extent of any previous revaluation surplus of the same asset. Thereafter the decrements are taken to profit or loss.

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Buildings	40 years
Leasehold improvements	3-10 years
Plant and equipment	3-7 years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of property, plant and equipment is derecognised upon disposal or when there is no future economic benefit to the Consolidated Entity. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss. Any revaluation surplus reserve relating to the item disposed of is transferred directly to retained profits.

Note 1. Significant accounting policies (continued)

Right-of-use assets

A right-of-use asset is recognised at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the Consolidated Entity expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of-use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The Consolidated Entity has elected not to recognise a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets. Lease payments on these assets are expensed to profit or loss as incurred.

Intangible assets

Intangible assets acquired as part of a business combination, other than goodwill, are initially measured at their fair value at the date of the acquisition. Intangible assets acquired separately are initially recognised at cost. Indefinite life intangible assets are not amortised and are subsequently measured at cost less any impairment. Finite life intangible assets are subsequently measured at cost less amortisation and any impairment. The gains or losses recognised in profit or loss arising from the derecognition of intangible assets are measured as the difference between net disposal proceeds and the carrying amount of the intangible asset. The method and useful lives of finite life intangible assets are reviewed annually. Changes in the expected pattern of consumption or useful life are accounted for prospectively by changing the amortisation method or period.

Goodwill

Goodwill arises on the acquisition of a business. Goodwill is not amortised. Instead, goodwill is tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Impairment losses on goodwill are taken to profit or loss and are not subsequently reversed.

Research and development

Research costs are expensed in the period in which they are incurred. Development costs are capitalised when it is probable that the project will be a success considering its commercial and technical feasibility; the Consolidated Entity is able to use or sell the asset; the Consolidated Entity has sufficient resources and intent to complete the development; and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis over the period of their expected benefit, being their finite life of 10 years.

Patents and trademarks

Significant costs associated with patents and trademarks are deferred and amortised on a straight-line basis over the period of their expected benefit, being their finite life of 10 years.

Customer contracts

Customer contracts acquired in a business combination are amortised on a straight-line basis over the period of their expected benefit, being their finite life of 5 years.

Software

Significant costs associated with software are deferred and amortised on a straight-line basis over the period of their expected benefit, being their finite life of 5 years.

Impairment of non-financial assets

Goodwill and other intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Note 1. Significant accounting policies (continued)

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

Trade and other payables

These amounts represent liabilities for goods and services provided to the Consolidated Entity prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

Contract liabilities

Contract liabilities represent the Consolidated Entity's obligation to transfer goods or services to a customer and are recognised when a customer pays consideration, or when the Consolidated Entity recognises a receivable to reflect its unconditional right to consideration (whichever is earlier) before the Consolidated Entity has transferred the goods or services to the customer.

Refund liabilities

Refund liabilities are recognised where the Consolidated Entity receives consideration from a customer and expects to refund some, or all, of that consideration to the customer. A refund liability is measured at the amount of consideration received or receivable for which the Consolidated Entity does not expect to be entitled and is updated at the end of each reporting period for changes in circumstances. Historical data is used across product lines to estimate such returns at the time of sale based on an expected value methodology.

Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

The component of the convertible notes that exhibits characteristics of a liability is recognised as a liability in the statement of financial position, net of transaction costs.

On the issue of the convertible notes the fair value of the liability component is determined using a market rate for an equivalent non-convertible bond and this amount is carried as a non-current liability on the amortised cost basis until extinguished on conversion or redemption. The increase in the liability due to the passage of time is recognised as a finance cost. The remainder of the proceeds are allocated to the conversion option that is recognised and included in shareholders equity as a convertible note reserve, net of transaction costs. The carrying amount of the conversion option is not remeasured in the subsequent years. The corresponding interest on convertible notes is expensed to profit or loss.

Lease liabilities

A lease liability is recognised at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Consolidated Entity's incremental borrowing rate. Lease payments comprise of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or a rate are expensed in the period in which they are incurred.

Lease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right-of-use asset, or to profit or loss if the carrying amount of the right-of-use asset is fully written down.

Finance costs

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

Note 1. Significant accounting policies (continued)

Provisions

Provisions are recognised when the Consolidated Entity has a present (legal or constructive) obligation as a result of a past event, it is probable the Consolidated Entity will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate specific to the liability. The increase in the provision resulting from the passage of time is recognised as a finance cost.

Employee benefits

Short-term employee benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

Other long-term employee benefits

The liability for annual leave and long service leave not expected to be settled within 12 months of the reporting date are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Share-based payments

Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the Consolidated Entity receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying either the Binomial or Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

- during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Note 1. Significant accounting policies (continued)

Market conditions are taken into consideration in determining fair value. Therefore any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the Consolidated Entity or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Consolidated Entity or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

Fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

Issued capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Dividends

Dividends are recognised when declared during the financial year and no longer at the discretion of the company.

Earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of Icetana Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Note 1. Significant accounting policies (continued)

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

New Accounting Standards and Interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Consolidated Entity for the annual reporting period ended 30 June 2020. The Consolidated Entity's assessment of the impact of these new or amended Accounting Standards and Interpretations, most relevant to the Consolidated Entity, are set out below.

Conceptual Framework for Financial Reporting (Conceptual Framework)

The revised Conceptual Framework is applicable to annual reporting periods beginning on or after 1 January 2020 and early adoption is permitted. The Conceptual Framework contains new definition and recognition criteria as well as new guidance on measurement that affects several Accounting Standards. Where the Consolidated Entity has relied on the existing framework in determining its accounting policies for transactions, events or conditions that are not otherwise dealt with under the Australian Accounting Standards, the Consolidated Entity may need to review such policies under the revised framework. At this time, the application of the Conceptual Framework is not expected to have a material impact on the Consolidated Entity's financial statements.

Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Coronavirus (COVID-19) pandemic

Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the Consolidated Entity based on known information. This consideration extends to the nature of the products and services offered, customers, supply chain, staffing and geographic regions in which the Consolidated Entity operates. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the Consolidated Entity unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19) pandemic.

Note 2. Critical accounting judgements, estimates and assumptions (continued)

Share-based payment transactions

The Consolidated Entity measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity. Refer to note 22 for further information.

Revenue from contracts with customers involving sale of goods

When recognising revenue in relation to the sale of goods to customers, the key performance obligation of the Consolidated Entity is considered to be the point of delivery of the goods to the customer, as this is deemed to be the time that the customer obtains control of the promised goods and therefore the benefits of unimpeded access.

Determination of variable consideration

Judgement is exercised in estimating variable consideration which is determined having regard to past experience with respect to the goods returned to the Consolidated Entity where the customer maintains a right of return pursuant to the customer contract or where goods or services have a variable component. Revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised under the contract will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

Provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

Fair value measurement hierarchy

The Consolidated Entity is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date; Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

The fair value of assets and liabilities classified as level 3 is determined by the use of valuation models. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs. Refer to note 50 for further information.

Estimation of useful lives of assets

The Consolidated Entity determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

Goodwill and other indefinite life intangible assets

The Consolidated Entity tests annually, or more frequently if events or changes in circumstances indicate impairment, whether goodwill and other indefinite life intangible assets have suffered any impairment, in accordance with the accounting policy stated in note 1. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions, including estimated discount rates based on the current cost of capital and growth rates of the estimated future cash flows. Refer to note 27 for further information.

Impairment of non-financial assets other than goodwill and other indefinite life intangible assets

The Consolidated Entity assesses impairment of non-financial assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the Consolidated Entity and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

Note 2. Critical accounting judgements, estimates and assumptions (continued)

Income tax

The Consolidated Entity is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Consolidated Entity recognises liabilities for anticipated tax audit issues based on the Consolidated Entity's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the Consolidated Entity considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Lease term

The lease term is a significant component in the measurement of both the right-of-use asset and lease liability. Judgement is exercised in determining whether there is reasonable certainty that an option to extend the lease or purchase the underlying asset will be exercised, or an option to terminate the lease will not be exercised, when ascertaining the periods to be included in the lease term. In determining the lease term, all facts and circumstances that create an economical incentive to exercise an extension option, or not to exercise a termination option, are considered at the lease commencement date. Factors considered may include the importance of the asset to the Consolidated Entity's operations; comparison of terms and conditions to prevailing market rates; incurrence of significant penalties; existence of significant leasehold improvements; and the costs and disruption to replace the asset. The Consolidated Entity reassesses whether it is reasonably certain to exercise an extension option, or not exercise a termination option, if there is a significant event or significant change in circumstances.

Incremental borrowing rate

Where the interest rate implicit in a lease cannot be readily determined, an incremental borrowing rate is estimated to discount future lease payments to measure the present value of the lease liability at the lease commencement date. Such a rate is based on what the Consolidated Entity estimates it would have to pay a third party to borrow the funds necessary to obtain an asset of a similar value to the right-of-use asset, with similar terms, security and economic environment.

Employee benefits provision

As discussed in note 1, the liability for employee benefits expected to be settled more than 12 months from the reporting date are recognised and measured at the present value of the estimated future cash flows to be made in respect of all employees at the reporting date. In determining the present value of the liability, estimates of attrition rates and pay increases through promotion and inflation have been taken into account.

Lease make good provision

A provision has been made for the present value of anticipated costs for future restoration of leased premises. The provision includes future cost estimates associated with closure of the premises. The calculation of this provision requires assumptions such as application of closure dates and cost estimates. The provision recognised for each site is periodically reviewed and updated based on the facts and circumstances available at the time. Changes to the estimated future costs for sites are recognised in the statement of financial position by adjusting the asset and the provision. Reductions in the provision that exceed the carrying amount of the asset will be recognised in profit or loss.

Warranty provision

In determining the level of provision required for warranties the Consolidated Entity has made judgements in respect of the expected performance of the products, the number of customers who will actually claim under the warranty and how often, and the costs of fulfilling the conditions of the warranty. The provision is based on estimates made from historical warranty data associated with similar products and services.

Business combinations

As discussed in note 1, business combinations are initially accounted for on a provisional basis. The fair value of assets acquired, liabilities and contingent liabilities assumed are initially estimated by the Consolidated Entity taking into consideration all available information at the reporting date. Fair value adjustments on the finalisation of the business combination accounting is retrospective, where applicable, to the period the combination occurred and may have an impact on the assets and liabilities, depreciation and amortisation reported.

Note 3. AASB 16 Leases

Change in Accounting Policy

AASB 16 Leases supersedes AASB 117 Leases. The Consolidated Entity has adopted AASB 16 from 1 July 2019 which has resulted in changes in the classification, measurement and recognition of leases. The new standard requires recognition of a right-of-use asset (the leased item) and a financial liability (to pay rentals). The exceptions are short-term leases and leases of low value assets.

The Consolidated Entity has adopted AASB 16 using the modified retrospective approach under which the reclassifications and the adjustments arising from the new leasing rules are recognised in the opening Condensed Statement of Financial Position on 1 July 2019. Under this approach, there is no initial impact on accumulated losses under this approach, and comparatives have not been restated.

The Consolidated Entity leases various premises. Prior to 1 July 2019, leases were classified as operating leases. Payments made under operating leases were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 July 2019, where a group company is a lessee, the Consolidated Entity recognises a right-of-use asset and a corresponding liability at the date which the lease asset is available for use by the Consolidated Entity (i.e. commencement date). Each lease payment is allocated between the liability and the finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a consistent period rate of interest on the remaining balance of the liability for each period.

The lease liability is initially measured at the present value of the lease payments that are not paid at commencement date, discounted using the rate implied in the lease (if applicable). If this rate is not readily determinable, the Group uses its incremental borrowing rate.

Lease payments included in the initial measurement of the lease liability consist of:

- Fixed lease payments less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at commencement date;
- Any amounts expected to be payable by the Consolidated Entity under residual value guarantees;
- The exercise price of purchase options, if the Consolidated Entity is reasonably certain to exercise the options; and
- Termination penalties of the lease term reflects the exercise of an option to terminate the lease.

An extension option is included within the property lease held by the Company. In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option. Extension options are only included in the lease term if, at commencement date, it is reasonably certain that the options will be exercised.

Subsequent to initial recognition, the lease liability is measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. The lease liability is remeasured (with a corresponding adjustment to the right-of-use asset) whenever there is a change in the lease term (including assessments relating to extension and termination options), lease payments due to changes in an index or rate, or expected payments under guaranteed residual values.

Right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before commencement date, less any lease incentives received and any initial direct costs. These right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Where the terms of a lease require the Consolidated Entity to restore the underlying asset, or the Consolidated Entity has an obligation to dismantle and remove a leased asset, a provision is recognised and measured in accordance with AASB 137. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset.

Right-of-use assets are depreciated on a straight-line basis over the term of the lease (or the useful life of the leased asset if this is shorter). Depreciation starts on commencement date of the lease.

Where leases have a term of less than 12 months or relate to low value assets, the Consolidated Entity has applied the optional exemptions to not capitalise these leases and instead account for the lease expense on a straight-line basis over the lease term.

Note 3. AASB 16 Leases (continued)

Impact on adoption of AASB 16

On adoption of AASB 16, the Consolidated Entity recognised lease liabilities in relation to leases which had previously been classified as operating leases under the principles of AASB 117. These liabilities were measured at the present value of the remaining lease payments. Payments are discounted where the time period covered is more than 12 months.

On initial application right-of-use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the Statement of Financial Position as at 30 June 2019.

In the Condensed Statement of Cash Flows, the Consolidated Entity has recognised cash payments for the principal portion of the lease liability within financing activities, cash payments for the interest portion of the lease liability as interest paid within operating activities and short-term lease payments and payments for lease of low-value assets within operating activities.

The adoption of AASB 16 resulted in the recognition of right-of-use assets of \$83,152 and lease liabilities of \$83,152 in respect of all operating leases, other than short-term leases and leases of low-value assets.

The net impact on retained earnings on 1 July 2019 was \$nil.

Practical expedients applied

In applying AASB 16 for the first time, the Consolidated Entity has used the following practical expedients permitted by the standard:

- For existing contracts as at 1 July 2019, the Consolidated Entity has elected to apply the definition of lease contained in AASB 117 and Interpretation 4 and has not applied AASB 16 to contracts that were previously not identified as leases under AASB 117 and Interpretation 4;
- Using hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

Below is a reconciliation of total operating lease commitments as at 30 June 2019, as disclosed in the annual financial statements for the year ended 30 June 2019, and the lease liabilities recognised on 1 July 2019:

	2019
	\$
Operating lease commitments disclosed as at 30 June 2019	83,152
Discounted using the lessee's incremental borrowing rate as at the date of initial application	83,152
Less: Short term leases recognised on a straight-line basis as an expense	-
Less: Low value leases recognised on a straight-line basis as an expense	-
Less: Contracts reassessed as service agreements	-
Add: Adjustment as a result of a different treatment of extension and termination options	-
Lease liabilities as at 1 July 2019	<u>83,152</u>

icetana Limited
Notes to the financial statements
For the year ended 30 June 2020

Note 4. Operating segments

Identification of reportable operating segments

The Board assess the Consolidated Entity's performance based on geographical areas of operation. Accordingly, the Consolidated Entity has identified 3 reportable segments, which are presented below:

Segment	Information
Asia Pacific (APAC)	Responsible for all sales, marketing and product development efforts in Australia and the broader Asia Pacific region
North America (NA)	Responsible for all sales and marketing efforts in the United States and Canada
Europe, Middle East & Africa (EMEA)	Responsible for all sales and marketing efforts in Europe, the Middle East and Africa

Cost of revenue (included in EBITDA) are all the costs directly attributable to the ongoing delivery of the product. Sales and marketing costs include direct in-country costs. A portion of general and administration costs, representing general operating and product development expenses, remain unallocated in determining the segment contribution presented by the Board.

The assets and liabilities of the Consolidated Entity are reported and reviewed by the Board in total and are not allocated by operating segment. Operating segment assets and liabilities are therefore not disclosed.

Sundry debtors	46,166	74,583
	<u>522,332</u>	<u>550,201</u>

The aging of receivables is as follows:

Not overdue	73,188	196,527
0 to 3 months overdue	101,640	142,550
3 to 6 months overdue	301,338	-
Over 6 months overdue	-	136,541
	<u>476,166</u>	<u>475,618</u>

The Consolidated Entity has increased its monitoring of debt recovery as there is an increased probability of customers delaying payment or being unable to pay, due the Coronavirus (COVID-19) pandemic. A total of \$8,055 (USD \$5,400) has been written off during the year for matters unrelated to COVID-19.

There is no allowance for expected credit losses due to the nature of revenue transactions and current limited number of customers meaning that all customers can individually be reviewed for potential debt issues.

Non-current liabilities	<u>-</u>	-
Total lease liabilities	<u><u>15,836</u></u>	-

AASB 16 has been adopted during the period, refer note 2 for details.

The Consolidated Entity leases its operating premises. The lease for the Australian premises expired in February 2020 and was leased on a month on month basis until 20th August 2020. On 3rd August 2020 icetana Ltd entered into an agreement for a new lease at a different location for a 6 month period. This lease, given its short term nature, is not represented above.

A lease was renewed for the office in Dubai (for EMEA operations) during the year. This lease expires in February 2021 and is represented by the lease liability above.

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Share buy-back

There is no current on-market share buy-back.

Capital risk management

The Consolidated Entity's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the Consolidated Entity may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Note 21. Equity – Issued Capital (continued)

The Consolidated Entity would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current company's share price at the time of the investment. The Consolidated Entity is not actively pursuing additional investments in the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

The Consolidated Entity is subject to certain financing arrangements covenants and meeting these is given priority in all capital risk management decisions. There have been no events of default on the financing arrangements during the financial year.

The Board manages the capital requirements of the Consolidated Entity on an ongoing basis.

Balance	30 June 2020	<u>61,164,610</u>	<u>726,354</u>

icetana Limited
Notes to the financial statements
For the year ended 30 June 2020

Note 22. Reserves (continued)

In December 2019 the Company granted a total of 9,377,393 options (series 1) and 3,000,000 performance rights to employees, consultants and directors of the Consolidated Entity. The ESIP options vest quarterly from the date of grant over a three year period. The Company expenses any valuation of the share options as they accrue over time. As at 30 June 2020, the Company has recognised an employee share-based payment expense of \$118,699 in relation to these options.

During the year, 325,000 options (series 1) were forfeited under the leaver provisions of the ESIP.

In May 2020 the Company granted a total of 13,862,158 options (series 2) to employees and consultants of the Consolidated Entity. One third of the options granted will vest on 30 April 2021 (being 12 months after the issue date). The balance of options (two thirds) will vest on a quarterly basis from 1 May 2021 to 31 March 2024 (being over the two year period after the end of Year 1). As 12 months has not passed between the date of grant and the 30 June 2020, no options had vested as at that date. The Company will expense the ESIP options as they accrue over time.

A further 5,642,702 options (series 2) will be granted, subject to shareholder approval at the 2020 Annual General Meeting, to Matthew Macfarlane.

Vesting conditions of performance rights as follows:

Number	Vesting Conditions	Expiry Date
750,000	\$4m Revenue in the 12-month audited period ending 30 June 2021	23 December 2024
750,000	\$6m Revenue in the 12-month audited period ending 31 December 2021	23 December 2024
750,000	\$10m Revenue in the 12-month audited period ending 31 December 2022	23 December 2024
750,000	\$12m Revenue in the 12-month audited period ending 31 December 2024	23 December 2024

The fair value of the equity settled options/performance rights as at the date of grant using the Black-Scholes model taking into account the terms and conditions upon which the options were granted:

Note 26. Dividends

There were no dividends declared or paid during the year.

Note 27. Financial instruments

Financial risk management objectives

The Consolidated Entity's objective is to manage working capital so as to safeguard the Consolidated Entity's ability to continue as a going concern so that the Consolidated Entity can provide returns for shareholders.

The Consolidated Entity's activities expose it to a variety of financial risks which may include market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The Consolidated Entity's risk management program seeks to minimise potential adverse effects on the financial performance of the Consolidated Entity.

Market risk

Foreign currency risk

The Consolidated Entity undertakes certain transactions denominated in foreign currencies, hence exposure to exchange rate fluctuations.

The significant exposures are United States Dollar (USD), United Arab Emirates Dirham (AED) and British Pound (GBP) currency fluctuations.

Foreign exchange risk arises from future commercial transactions and recognised financial assets and financial liabilities denominated in a currency that is not the entity's functional currency. The risk is managed using sensitivity analysis and cash flow forecasting.

Interest rate risk

The Consolidated Entity's exposure to interest rate risk is limited to fluctuations in the rate of interest earned or payable in respect of cash balances as all other interest rates are fixed. Fluctuating interest rates are not expected to have a significant impact on earnings or equity.

Price risk

The Consolidated Entity is not exposed to any significant price risk.

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Consolidated Entity. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements. The Consolidated Entity does not hold any collateral.

As disclosed in note 10, due to the Coronavirus (COVID-19) pandemic, the Consolidated Entity has increased its monitoring of debt recovery as there is an increased probability of customers delaying payment or being unable to pay. The Consolidated Entity does not have an allowance for expected loss due to the nature and small size of its customer base. Customer renewals occurred when due during the year and material renewal receivables as at 30 June 2020 have been received post year end.

Generally, trade receivables are written off when there is no reasonable explanation of recovery. Indicators of this include the failure of a debtor to engage in a repayment plan, no active enforcement activity and a failure to make contractual payments for a period greater than 1 year.

Liquidity risk

Vigilant liquidity risk management requires the Consolidated Entity to maintain sufficient liquid assets (mainly cash and cash equivalents) to be able to pay debts as and when they become due and payable. There are no arranged available borrowing facilities at reporting date due to the strong cash position.

icetana Limited
Notes to the financial statements
For the year ended 30 June 2020

Note 27. Financial instruments (continued)

The Consolidated Entity manages liquidity risk by maintaining adequate cash reserves (and would obtain available borrowing facilities if deemed necessary) by continuously monitoring actual and forecast cash flows and matching maturity profiles of financial assets and liabilities.

Financing arrangements

There are no borrowing facilities as at the reporting date.

Remaining contractual maturities

The following tables detail the Consolidated Entity's remaining contractual maturity for its financial instrument liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the financial liabilities are required to be paid. The tables include both interest and principal cash flows disclosed as remaining contractual maturities and therefore these totals may differ from their carrying amount in the statement of financial position.

Consolidated – 2020	Weighted average interest rate %	1 year or less \$	1 to 2 years \$	Over 2 years \$	Remaining contractual maturities \$
Trade payables		128,515	-	-	128,515
Insurance funding		-	-	-	-

Unearned revenue		804,745	143,808	-	948,553
Lease liability		15,836	-	-	15,836
Total		1,053,871	143,808	-	1,197,679

Consolidated – 2019	Weighted average interest rate %	1 year or less \$	1 to 2 years \$	Over 2 years \$	Remaining contractual maturities \$
Trade payables		243,406	-	-	243,406
Insurance funding		-	60,253	-	60,253
Accrued expenses		218,754	-	-	218,754
R&D advance		490,168	-	-	490,168
Sundry creditors		58,548	-	-	58,548
Unearned revenue		524,069	-	-	524,069
Total		1,534,945	60,253	-	1,595,198

The cash flows in the maturity analysis above are not expected to occur significantly earlier than contractually disclosed above.

Fair value of financial instruments

Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value.

Note 28. Contingent liabilities and contingent assets

The Consolidated Entity has given a bank guarantee as at 30 June 2020 of \$37,974 (2019: \$37,974) to the landlord for the head office for icetana Ltd. Following the year ended 30 June 2020, the landlord was given notice for termination of the lease on 20 August 2020, following which the bank guarantee will be released. There are no other contingent assets or liabilities as at the reporting date.

Note 29. Related party transactions

Parent entity

icetana Ltd is the parent entity.

icetana Limited
Notes to the financial statements
For the year ended 30 June 2020

Note 29. Related party transactions (continued)

Subsidiaries

Interests in subsidiaries are set out in note 32.

Associates

There are no associates.

Key management personnel (KMP)

Any person(s) having authority and responsibility for planning, directing and controlling the activities of the Consolidated Entity, directly or indirectly, including any elected member, are considered KMP. KMP are employed by the Consolidated Entity under normal employment terms and conditions.

The aggregate compensation made to directors and other members of KMP of the Consolidated Entity is set out below:

	30 Jun 2020	30 Jun 2019
	\$	\$
Short-term employee benefits	990,065	563,000
Post-employment benefits	78,579	22,990
Long-term benefits	6,593	27,987
Share-based payments	107,449-	-
	<u>1,182,686</u>	<u>613,977</u>

Short-term employee benefits

These amounts include salary, fringe benefits and cash bonuses awarded to KMP.

Post-employment benefits

These amounts are the current year's estimated cost of providing for the Consolidated Entity's superannuation contributions made during the year.

Long-term benefits

These amounts represent annual leave and long service leave benefits accruing during the year.

Disclosures relating to key management personnel are also set out in remuneration report included in the directors' report.

Transactions with related parties

There were no transactions with related parties during the current year.

The Consolidated Entity's main related parties are as follows:

- KMP - as defined above
- Other related parties – Any entity that is controlled by or over which KMP, or close family members of KMP, have authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, are considered related parties in relation to the Consolidated Entity.
- Entities subject to significant influence by the Consolidated Entity – An entity that has the power to participate in the financial and operating policy decisions of an entity, but does not have control over those policies, is an entity which holds significant influence. Significant influence may be gained by share ownership, statute or agreement.

Terms and conditions

All transactions were made on normal commercial terms and conditions and at market rates.

Note 30. Remuneration of auditors

During the financial year the following fees were paid or payable for services rendered by Butler Settineri (Audit) Pty Ltd, the auditor of the Consolidated Entity, its network firms and unrelated firms:

Note 32. Interests in subsidiaries

The consolidated financial statements incorporate the assets, liabilities and results of the following wholly-owned subsidiaries in accordance with the accounting policy described in note 1:

icetana Limited
Notes to the financial statements
For the year ended 30 June 2020

Note 32. Interest in subsidiaries (continued)

Name	Principal place of business / Country of incorporation	Ownership Interest	
		2020 %	2019 %
icetana Inc	United States of America	100%	100%
icetana Ltd	United Kingdom	100%	100%

The consolidated financial statements incorporate the assets, liabilities and results of the following subsidiary with non-controlling interests in accordance with the accounting policy described in note 1:

Name	Principal place of business / Country of incorporation	Ownership Interest	
		2020 %	2019 %
Icetana Systems Software Trading LLC	United Arab Emirates (UAE)	49%	49%

The corporate regulations in the UAE require a local company to be a minimum 51% owned by a local UAE individual or company. This is a common structure for foreign companies establishing UAE subsidiaries for trading purposes. Under the structure, the Company's local UAE representative, via a Management Agreement, provides control of corporate decisions to the Company. LLC has no rights or ownership of the Company's core intellectual property assets.

All subsidiaries have the same principal activities as the parent entity.

Note 33. Events after the reporting period

The impact of the Coronavirus (COVID-19) pandemic is ongoing and while it has not been financially positive for the Consolidated Entity up to 30 June 2020, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

No other matter or circumstance has arisen since 30 June 2020 that has significantly affected, or may significantly affect the Consolidated Entity's operations, the results of those operations, or the Consolidated Entity's state of affairs in future financial years.

Note 34. Reconciliation of profit after income tax to net cash from operating activities

icetana Limited
Directors' declaration
30 June 2020

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, Australian Accounting Standard AASB 134 'Interim Financial Reporting' and the Corporations Regulations 2001;
- the attached financial statements and notes give a true and fair view of the Consolidated Entity's financial position as at 30 June 2020 and of its performance for the financial year ended on that date; and
- there are reasonable grounds to believe that the Consolidated Entity will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of directors made pursuant to section 303(5)(a) of the Corporations Act 2001.

On behalf of the directors

Mark Potts
Non-Executive Chairman

28 August 2020
Perth, Western Australia

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ICETANA LIMITED

Report on the Financial Report

Opinion

We have audited the financial report of icetana Limited ("the Company") and its controlled entities ("the Group"), which comprises the consolidated statement of financial position as at 30 June 2020, the consolidated statement of profit and loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion,

- (a) the accompanying financial report of the Group is in accordance with the Corporations Act 2001, including:
 - i) giving a true and fair view of the Group's financial position as at 30 June 2020 and of its financial performance for the year then ended; and
 - ii) complying with Australian Accounting Standards and the Corporations Regulations 2001; and

Basis for Opinion

We have conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards) (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our ethical requirements in accordance with the Code.

We confirm that the independence declaration required by the Corporations Act 2001, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the date of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significant in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How we addressed the Key Audit Matter
<p>Revenue <i>Refer note 5</i></p> <p>The Group recognises revenue when the performance obligation under the sales contract is achieved. This performance obligation is achieved upon delivery of the services.</p>	<p>We have reviewed the Group’s revenue recognition policy for compliance with the accounting standard AASB 15: Revenue from Contracts with Customers (“AASB 15”).</p> <p>We performed tests of control over management’s internal control system as it relates to revenue.</p> <p>We performed detailed analytical and substantive procedures to obtain evidence as to the accuracy, completeness and occurrence of revenue.</p>
<p>Equity and Capital Structure <i>Refer note 21</i></p> <p>During the year, the Group successfully issued fully paid ordinary shares as well as various options of which some have been exercised.</p>	<p>Our audit procedures included an examination of each issue of, fully paid ordinary shares during the year as shown in note 20. We also assessed whether or not share-based payments should have been recognised in relation to the Employee Share Incentive Plan. Further, we reconciled the third party share registry to information announced to the public.</p>
<p>Research and Development Tax Incentive <i>Refer notes 8</i></p> <p>Management utilise key assumptions, judgements and estimates in determining the R&D Tax Incentive disclosed in note 8 and 10 which is material to the financial statements.</p>	<p>Our audit procedures included an evaluation of the assumptions, methodologies and conclusions used by the Group in preparing the R&D Tax Incentive application. We also focused on the adequacy of financial report disclosures regarding these assumptions as disclosed at note 1.</p>
<p>Deferred Taxation <i>Refer note 8</i></p> <p>Management utilise key assumptions, judgements and estimates in calculating the deferred tax disclosed in note 1 which are material to the financial statements.</p>	<p>Our audit procedures included an evaluation of the assumptions, methodologies and conclusions used by the Group in preparing their estimate of deferred taxes. We also focused on the adequacy of financial report disclosures regarding these assumptions as disclosed at note 1.</p>

Other information

The directors are responsible for the other information. The other information comprises the information in the Group's annual report for the year ended 30 June 2020, but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with the Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial report. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh public interest benefits of such communication.

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included on pages 6 to 14 of the directors' report for the year ended 30 June 2020.

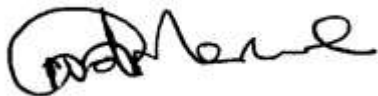

In our opinion, the Remuneration Report of icetana Limited and its controlled entities, for the year ended 30 June 2020, complies with section 300A of the Corporations Act 2001.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the Corporations Act 2001.

Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Corporate Governance

The Company believes corporate governance is a critical pillar on which business objectives and, in turn, shareholder value must be built. The Board of icetana Limited has adopted a suite of charters and key corporate governance documents which articulate the policies and procedures followed by the Company.

These documents are available in the Corporate Governance section of the Company's website, <https://icetana.com/corporate-governance/>. These documents are reviewed to address any changes in governance practices and the law.

The Company's 2020 Corporate Governance Statement, which is current as at 30 June 2020 and has been approved by the Company's Board, explains how icetana complies with the ASX Corporate Governance Council's 'Corporate Governance Principles and Recommendations – 3rd Edition' in relation to the year ended 30 June 2020. The Corporate Governance Statement is available in the Corporate Governance section of the Company's website, <https://icetana.com/corporate-governance/> and will be lodged with ASX together with an Appendix 4G at the same time that this Annual Report is lodged.

In addition to the ASX Corporate Governance Council's 'Corporate Governance Principles and Recommendations – 3rd Edition' the Board has taken into account a number of important factors in determining its corporate governance policies and procedures; including the:

- Relatively simple operations of the Company, which currently provides video analytics solutions designed to automatically identify anomalous actions in real-time for large scale surveillance networks
- Cost verses benefit of additional corporate governance requirements or processes;
- Size of the Board;
- Board's experience in the technology sector;
- Organisational reporting structure and number of reporting functions, operational divisions and employees;
- Relatively simple financial affairs with limited complexity and quantum;
- Relatively moderate market capitalisation and economic value of the entity; and
- Direct shareholder feedback.

ASX Additional Information
