

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: September 30, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 1-34033

DIGI INTERNATIONAL INC.

(Exact name of registrant as specified in its charter)

Delaware

41-1532464

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification Number)

11001 Bren Road East

Minnetonka, Minnesota

55343

(Address of principal executive offices)

(Zip Code)

(952) 912-3444

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Common Stock, par value \$.01 per share

The NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.) Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of voting stock held by non-affiliates of the Registrant as of the last business day of the Registrant's most recently completed second fiscal quarter was \$310,320,069 based on a closing price of \$11.90 per common share as reported on the NASDAQ Global Select Market. (For purposes of this calculation all of the registrant's directors and executive officers are deemed affiliates of the registrant.)

Shares of common stock outstanding as of November 17, 2017: 26,664,418

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's Proxy Statement for its 2018 Annual Meeting of Stockholders are incorporated by reference into Part III hereto.

PART I.

ITEM 1. BUSINESS

General Background and Product Offerings

Digi International Inc. ("Digi," "we," "our," or "us") was incorporated in 1985 as a Minnesota corporation. We were reorganized as a Delaware corporation in 1989 in conjunction with our initial public offering. Our common stock is traded on the NASDAQ Global Select Market under the symbol DGII. Our World Headquarters is located at 11001 Bren Road East, Minnetonka, Minnesota 55343. The telephone number at our World Headquarters is (952) 912-3444.

We are a leading global provider of business and mission-critical and Internet of Things (IoT) connectivity products and services. We help our customers create next-generation connected products and deploy and manage critical communications infrastructures in demanding environments with high levels of security and reliability. As of the fiscal quarter ended June 30, 2017, we determined that we have two reportable operating segments for purposes of ASC 280-10-50 "Segments Reporting": (i) machine-to-machine (M2M), and (ii) Solutions.

Our M2M segment consists primarily of distinct communications products and communication product development services. Among other things, these products and services help our customers create next generation connected products and deploy and manage critical communications infrastructures in demanding environments with high levels of security and reliability. This segment creates secure, easy to implement embedded solutions and services to help customers build IoT connectivity. It also deploys ready to use, complete box solutions to connect remote equipment. The M2M segment also offers dedicated professional services for the design of specialized wireless communications products for customers. Finally, this segment offers managed cloud services that enable customers to capture and manage data from devices they connect to networks. M2M products and services are used by a wide range of businesses and institutions.

Our Solutions segment offers wireless temperature and other environmental condition monitoring services as well as employee task management services. These products and services are provided to food service, transportation, education, healthcare and pharma, and industrial markets and are marketed as Digi Smart Solutions™. We have formed and expanded the Solutions segment primarily through four acquisitions: the October 2015 acquisition of Bluenica Corporation (Bluenica), the November 2016 acquisition of FreshTemp, LLC (FreshTemp), the January 2017 acquisition of SMART Temps, LLC (SMART Temps) and the October 2017 acquisition of TempAlert, LLC (TempAlert). Because the acquisition of TempAlert was subsequent to September 30, 2017, its results are not included in our Consolidated Financial Statements (see Note 19 to our Consolidated Financial Statements).

For more in-depth descriptions of our primary products and services, please refer to the heading "Listing of Principal Products and Services" at the end of Part I, Item 1 of this Form 10-K.

In October 2015, we sold our Etherios, Inc. customer relationship management (CRM) consulting services business (Etherios), which focused on integration and configuration of enterprise resource management (ERM) systems, including CRM systems. This part of our business principally provided integration and configuration of salesforce.com products. As a result of the sale of Etherios, we have accounted for it as a discontinued operation. Accordingly, amounts in the Consolidated Statement of Operations, the Consolidated Balance Sheets and notes thereto, for all periods affected, have been reclassified to reflect discontinued operations accounting for that business. For more information on this divestiture see Note 3 to the Consolidated Financial Statements.

Our M2M revenue represented 95.9%, 99.6% and 100.0% of our total revenue during the fiscal years ended September 30, 2017, 2016 and 2015, respectively. Solutions revenue represented 4.1% and 0.4% of our total revenue in fiscal 2017 and 2016, respectively. We had no Solutions revenue in fiscal 2015.

Our corporate website address is www.digi.com. In the "Company - Investor Relations" section of our website, we make our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, our proxy statement and any amendments to these reports available free of charge as soon as reasonably practicable after these reports are filed with or furnished to the United States Securities and Exchange Commission (SEC). Each of these documents can also be obtained free of charge (except for a reasonable charge for duplicating exhibits to our reports on Form 10-K, 10-Q or 8-K) in print by any stockholder who requests them from our investor relations personnel. The Investor Relations email address is ir@digi.com and its mailing address is: Investor Relations Administrator, Digi International Inc., 11001 Bren Road East, Minnetonka, Minnesota 55343. These reports can also be accessed via the SEC website, www.sec.gov, or via the SEC's Public Reference Room located at 100 F Street, N.E., Washington, D.C. 20549. Information concerning the operation of the SEC's Public Reference Room can be obtained by calling 1-800-SEC-0330.

Information on our website is not incorporated by reference into this report or any other report we file with or furnish to the SEC.

Industry and Marketplace Conditions

Current Market Conditions and Status of Our Business

We believe the marketplace for IoT products and services will continue to expand generally.

Despite this expected expansion, our M2M segment contracted in fiscal 2017. Our M2M segment sells both wired and wireless products that are either embedded into the products of original equipment manufacturers (OEMs) or stand-alone to provide connectivity to stand-alone assets of customers. Certain of these products have been sold for many years, are in the mature phase of their life cycle and have been experiencing declining sales for several years. In fiscal 2017, sales of these legacy products experienced larger than expected declines largely because a long-term customer of certain of these products significantly curtailed its purchase of our products in fiscal 2017. These declines were not offset by increases in sales of other products, which, among other issues, were hampered by delays in the release of new products. While we generally expect the trend of marketplace growth to continue, it is susceptible to downturns either because of general economic conditions, the continued development of technology and uncertainty or changes in the regulatory environments. Relative to our own M2M segment business, sales of many of our products are subject to large project-based customer deployments. As such, if we are unable to identify and commence new deployments with equal or greater significance than completed projects, our growth from period to period may be inconsistent and our M2M segment may in any given period contract.

While the performance of our M2M segment, which is the significant majority of our sales, was less than anticipated in fiscal 2017, our Solutions segment experienced significant growth as we completed the acquisitions of FreshTemp and SMART Temps in our first and second fiscal quarters, respectively. We continue to see steadily growing demand for our Solutions products and services and presently expect this trend to continue.

Strategy

We continue to take significant steps to transform Digi into a company that can deliver consistent long-term growth with higher levels of profitability. This transformation began when we appointed Ronald E. Konezny as our Chief Executive Officer in December 2014 and today is centered on managing each of our operating segments towards different primary objectives.

M2M Segment

Our M2M segment, which represents the significant majority of our revenues is being managed for modest revenue growth and higher levels of profitability through greater operating expense leverage. A significant part of this business remains based in legacy networking products that are in the mature phase of their product life cycles. For many years these products have been experiencing year over year revenue declines that create a natural headwind to driving significant growth in this operating segment as a whole. In addition, sales of many of our products throughout this segment are based on significant one time projects. As a result, for many years Digi has experienced inconsistent revenue growth as project based revenues have fluctuated.

In this operating environment we have taken the following steps to meet our aims:

- We sold our Etherios CRM consulting business in 2015. This business initially was acquired with the expectation it would drive engagements with companies that utilize the salesforce.com platform and were looking to deploy solutions within their businesses. We were not, however, rewarded in the marketplace as we had expected. As a result, we disposed of a consulting business that was losing money and not fully tied to our core hardware expertise.
- We significantly reduced the number of hardware product stock keeping units (SKUs) we produce in order to simplify our operations, improve our ability to manage inventory effectively, improve channel stocking strategies and control costs. At present, SKUs have been reduced from close to 5,000 at the beginning of fiscal 2016 to approximately 1,400.
- We consolidated and relocated office locations to improve efficiencies and provide costs savings. In the first quarter of fiscal 2016, we moved our Digi Wireless Design Services team from an office in downtown Minneapolis to our World Headquarters in suburban Minnetonka. In the third quarter of fiscal 2016, we closed our office in Dortmund, Germany and moved the corresponding positions to our existing office in Munich, Germany. In the third quarter of fiscal 2017, we announced the closure of our Paris, France office to further consolidate European operations in

[Table of Contents](#)

Munich, Germany. These moves improved our operating expenses and better position our employees to drive positive results in our operations through increased collaboration.

- In October 2017, we have added new leadership to our M2M team in the areas of product management and research and development to drive greater alignment around the products we bring to market to meet the needs and desires of potential customers in key markets in a timely manner. We believe this increased alignment can greater lever our technical capabilities to drive more consistent growth.

Solutions Segment

Our Solutions segment, which has grown from no revenue during fiscal 2015 to almost 5% of our total revenue in fiscal 2017, is being managed primarily for revenue growth. The segment was formed and has been grown primarily through our acquisitions of Bluenica in October 2015, FreshTemp in November 2016, SMART Temps in January 2017 and, most recently, TempAlert in October 2017. Following our acquisition of TempAlert we believe in fiscal 2018 this business will deliver between 10-15% of our revenues.

This business helps businesses track the completion of employee tasks and monitor environmental conditions (most notably, temperature) of perishable or sensitive inventories. Our efforts have created a market-leading, high-growth hardware enabled service business with significant recurring revenue potential. Following our recent TempAlert acquisition we now serve over 35,000 customer sites for many leading brands in the foodservice, transportation, education, healthcare and pharma and industrial marketplaces.

We have chosen to enter this marketplace aggressively for several reasons. First, it provides us with the opportunity to develop a recurring revenue business that is focused on a large addressable market that has not been penetrated significantly. Restaurants, pharmacies, hospitals and other businesses that maintain significant inventories of perishable or other sensitive goods are a large part of the market. These businesses by and large presently rely primarily on employees to log the temperature or other environmental conditions of these goods as well as the completion of other tasks using pencil and paper. This is not as cost effective or secure as using wireless communications sensors to track conditions automatically and provide real time alerts if established parameters are breached. It also is not as effective for tracking the completion of other tasks as using an application enabled smart phone or other wireless communications device. Second, at present this marketplace primarily is served by smaller companies that lack the infrastructure to provide hardware enabled service to customers in as effective and efficient a manner as we are able to do because of our long-standing history as an IoT hardware provider. Third, we believe customers in this marketplace will not require significant customization or development of existing products before they will commit to purchase the solution. This differs from many of our hardware customers who often ask us to create a highly customized product that cannot be easily sold to other parties. This potential for repeatable sales of an established product suite appeals to us. Fourth, by protecting valuable goods that impact health and safety, the solution provides a clear return on investment for potential customers whose business and reputation is highly reliant on maintaining safe operations that will not harm customers.

We believe this marketplace represents an opportunity for significant revenue growth for Digi that is both recurring and high-margin in nature. To that end at present our primary aim with this business is to manage it for customer acquisition and revenue growth while assuring we do not negatively impact the overall profitability of the Company in any material way.

In summary, we intend to continue to take steps to simplify our operations, improve operating expenses to increase our profit leverage and expand our business in ways that we believe can drive long-term profitable growth. We will continue to seek and evaluate acquisitions that will further enhance our Solutions segment as we believe this marketplace offers a path to a significant base of recurring revenue that can provide both stability and significant growth for us. We may also seek to acquire hardware or other businesses that we believe can improve our market position in our M2M segment.

Acquisitions and Dispositions

Acquisitions

Since fiscal 2015 we have acquired four businesses that form the basis of our Solutions segment.

In October 2015, we acquired Ontario based Bluenica, a company focused on temperature monitoring of perishable goods in the food industry by using wireless sensors which are installed in grocery and convenience stores, restaurants, and in products during shipment and storage to ensure that quality, freshness and public health requirements are met (see Note 2 to our Consolidated Financial Statements).

[Table of Contents](#)

In November 2016, we acquired Pittsburgh based FreshTemp. FreshTemp offered restaurants, convenience stores and other retailers the ability to monitor the temperature of food products automatically through the use of wireless sensors. The company also enabled these businesses to track the completion of operational tasks by their employees that could impact human health and safety in real time - a capability that we believe significantly enhanced our product offering (see Note 2 to our Consolidated Financial Statements).

In January 2017, we acquired Indiana based SMART Temps. SMART Temps provided real-time foodservice temperature management for restaurant, grocery, education and hospital settings as well as real-time temperature management for pharmacy, blood bank and laboratory environments. The acquisition significantly expanded our customer base, especially in the pharmacy and education marketplaces (see Note 2 to our Consolidated Financial Statements).

On October 20, 2017, subsequent to the end of fiscal 2017, we acquired TempAlert, a provider of automated, real-time temperature monitoring and task management solutions for the healthcare, industrial and foodservice industries. This acquisition more than doubled the number of customer sites we monitor while enhancing our ability to analyze data collected from our services. Because the acquisition of TempAlert was subsequent to September 30, 2017, TempAlert is not included in our Consolidated Financial Statements (see Note 19 to our Consolidated Financial Statements).

Disposition

On October 23, 2015, we entered into a stock purchase agreement with West Monroe Partners, LLC, pursuant to which they acquired our Etherios CRM consulting services business. We sold Etherios as part of a strategy to focus on providing highly reliable machine connectivity solutions for business and mission-critical application environments (see Note 3 to our Consolidated Financial Statements).

These are the only acquisitions and dispositions we have completed in the past five years. We will continue to evaluate strategic opportunities to acquire businesses as they arise and may seek to divest businesses or assets we no longer consider appropriate to our long-term strategy.

Sales Channels

We sell our products through a global network of distributors, systems integrators and value added resellers (VARs) which accounted for 61.5%, 66.1% and 61.8% of our total revenue in fiscal 2017, 2016 and 2015, respectively. We also complete sales through our own dedicated sales organization to OEMs and other customers which accounted for 38.5%, 33.9% and 38.2% of our total revenue in fiscal 2017, 2016 and 2015, respectively.

Distributors

Our larger distributors, based on sales we make to them, include Anewtech Systems Pte Ltd., Arrow Electronics, Inc., Astone Technologies, Atlantik Elektronik GmbH, Avnet, Digi-Key Corporation, Express Systems & Peripherals, Future Electronics, Ingram Micro, Mouser Electronics, Novotech, Sapply Pty. Ltd., Solid State Supplies, Ltd., Sphinx Computer Vertriebs GmbH, Synnex, Tech Data Corporation and Tokyo Electron Device Ltd. We also maintain relationships with many other distributors in the U.S., Canada, Europe, Asia Pacific and Latin America.

Strategic Sales Relationships

We maintain alliances with other industry leaders to develop and market technology solutions. These include many major communications hardware and software vendors, operating system suppliers, computer hardware manufacturers, enterprise application providers and cellular carriers. Among others, partners include: AT&T, Bell Mobility, NXP, Telit, Rogers, Silicon Laboratories, Sprint, Telus, Verizon and several other cellular carriers worldwide. Furthermore, we maintain a worldwide network of authorized developers that extends our reach into certain other technology applications and geographical regions.

We have established relationships with equipment vendors in a range of industries such as energy, industrial, retail, transportation, medical, and government that allow the vendors to ship our products and services as component parts of their overall solutions. Our products are used by many of the world's leading telecommunications companies and Internet service providers, including AT&T Inc., Sprint Corporation and Verizon Communications Inc.

No single customer comprised more than 10% of our consolidated revenue for any of the years ended September 30, 2017, 2016 or 2015.

Competition

We compete primarily in the communications technology industry, which is characterized by rapid technological advances and evolving industry standards. The market can be affected significantly by new product introductions and marketing activities of industry participants. In addition, we may compete with other companies to acquire new businesses or technologies and the competition to secure such assets may be intense. We compete for customers on the basis of existing and planned product features, service and software application capabilities, company reputation, brand recognition, technical support, alliance relationships, quality and reliability, product development capabilities, price and availability. While no competitor offers a comparable range of products and services, various companies do compete with us with respect to one or more of our products or solutions. With respect to many of our product and service offerings, we face competition from companies who dedicate more resources and attention to that particular offering than we are able to do given the breadth of our business. As the marketplace for IoT connectivity products and solutions continues to grow, we expect to encounter increased competition. Some of these competitors may have access to significantly more financial and technical resources than we possess.

Manufacturing Operations

Our manufacturing operations are conducted through a combination of internal manufacturing and external subcontractors specializing in various parts of the manufacturing process. We rely on third party foundries for our semiconductor devices that are Application Specific Integrated Circuits (ASICs) and we outsource printed circuit board production. This approach allows us to reduce our fixed costs, maintain production flexibility and optimize our profits.

Our products are manufactured to our designs with standard and custom components. Most of the components are available from multiple vendors. We have several single-sourced supplier relationships, either because alternative sources are not available or because the relationship is advantageous to us. If these suppliers are unable to provide a timely and reliable supply of components, we could experience manufacturing delays that could adversely affect our consolidated results of operations in a material way.

Seasonality

In general, our business is not considered to be highly seasonal, although our first fiscal quarter revenue is often less than other quarters due to holidays and fewer shipping days.

Working Capital

We fund our business operations through a combination of cash and cash equivalents, marketable securities and cash generated from operations. We believe that our current financial resources, cash generated from operations, and our capacity for debt and/or equity financing will be sufficient to fund our business operations for the next twelve months and beyond.

Research & Development and Intellectual Property Rights

During fiscal 2017, 2016 and 2015, our research and development expenditures were \$28.6 million, \$31.0 million and \$29.9 million, respectively.

Due to rapidly changing technology in the communications technology industry, we believe a large part of our success depends upon the product and service development skills of our personnel as well as our ability to integrate any acquired technologies with organically developed technologies. While we dedicate significant resources to research and development, many of our competitors are focused on a smaller set of products than us and are likely able to dedicate more resources than us toward the portions of the market in which we compete.

Our proprietary rights and technology are protected by a combination of copyrights, patents, trade secrets and trademarks.

We have established common law and registered trademark rights on a family of marks for a number of our products. Our products and services primarily are sold under the Digi, Rabbit® and Xbee® brands. We believe that the Digi and Rabbit® brands have established strong identities with our targeted customer base and our customers associate the Digi brand with "reliability" and the Rabbit® brand with "ease of integration." We believe that our customers associate Xbee® with "ease of use." Many of our customers choose us because they are building a very complex system solution and they want the highest level in product reliability and ease of integration and use. Our Etherios® brand was sold in connection with the sale of Etherios in October 2015.

Our patents are applicable to specific technologies and are valid for varying periods of time based on the date of patent application or patent grant in the U.S. and the legal term of patents in the various foreign countries where patent protection is

obtained. We believe our intellectual property has significant value and is an important factor in the marketing of our company and products.

Backlog

Backlog as of both September 30, 2017 and 2016 was \$25.3 million. The majority of the backlog at September 30, 2017 is expected to be shipped in fiscal 2018. Backlog as of any particular date is not necessarily indicative of our future sales trends.

Employees

We had 514 employees on September 30, 2017. We consider our relations with our employees to be good.

Geographic Areas and Currency Risks

Our customers are located throughout North America, Europe, Middle East & Africa (EMEA), Asia Pacific and Latin America. We are exposed to foreign currency transaction risk associated with certain sales being denominated in Euros, British Pounds, Japanese Yen and Canadian Dollar and foreign currency translation risk as the financial position and operating results of our foreign subsidiaries are translated into U.S. Dollars for consolidation. We manage our net asset or net liability position for U.S. dollar accounts in our foreign locations to reduce our foreign currency risk. We have not implemented a formal hedging strategy to reduce foreign currency risk.

During 2017, we had approximately \$63.9 million of revenue related to foreign customers including export sales, of which \$18.2 million was denominated in foreign currency, predominantly the Euro and British Pound. During fiscal 2016 and 2015, we had approximately \$71.5 million and \$76.2 million, respectively of revenue to foreign customers including export sales, of which \$22.9 million and \$21.3 million, respectively, were denominated in foreign currency, predominantly the Euro and British Pound. In future periods, we expect that the majority of our sales will be in U.S. Dollar.

Financial information about geographic areas appears in Note 5 to our Consolidated Financial Statements in this Form 10-K.

PRINCIPAL PRODUCTS AND SERVICES

Our primary products and services for each operating segment are as follows:

M2M Segment

Hardware Products

Cellular routers and gateways - Cellular routers provide connectivity for devices over a cellular data network. They can be used as a cost effective alternative to landlines for primary or backup connectivity for remote locations and devices. These products have been certified by the major wireless providers in North America and abroad, including, among others, AT&T®, Verizon Wireless®, Sprint®, Bell Mobility, Rogers and Vodafone. Cellular gateway products enable devices or groups of devices to be networked in locations where there is no existing network or where access to a network is prohibited. All of our cellular products include a unique remote management platform that provides secure management of devices across remote networks and can all use the Digi Remote Manager® for remote management. In addition, application connectivity, management and customization are enabled via the Digi Remote Manager® platform for many of these products.

Radio Frequency (RF) - Our RF products are small box or module products that utilize a variety of wireless protocols for PC-to-device or device-to-device connectivity, often in locations where deploying a wired network is not possible either because of cost, disruption or impracticality. By supporting ZigBee®, Wi-Fi® and other radio frequency (RF) technologies, we can meet most customer application requirements. In conjunction with one of our gateways, RF products can be connected into the Digi Remote Manager® for remote management, application connectivity and customization.

Embedded - Our Connect, Rabbit® and ARM-based embedded systems on module, and single board computers are designed and developed with small footprints, low power consumption and software, making them ideal for medical, transportation and industrial device manufacturers. A number of these modules can be connected directly to the Digi Remote Manager® or other similar platforms, enabling remote management and remote application connectivity. Also included in our embedded grouping are our chips (or microprocessors) that provides the "brains" and processing power of an intelligent electronic device or communication sub-system. Some of our higher volume customers choose to purchase chips and build their own products. Chips are low cost but require the highest level of development expertise. Chip development is not part of our strategy; instead we use commercial-off-the-shelf technology from companies such as Freescale and Ember for our products.

Network - Our network product category consists of:

- Console servers - Our console servers provide a secure remote graphical access to computer systems and network equipment that can communicate with virtually any server or device.
- Serial servers - Our serial servers (also known as device servers and terminal servers) provide secure, reliable and flexible serial-to-Ethernet integration of most devices into wired Ethernet networks. They are used for a variety of applications such as automation, robotics control, centralized device monitoring and management, data acquisition and point-of-sale applications.
- USB - Our Universal Serial Bus (USB) solutions include USB-to-serial converters that offer instant Input/Output (I/O) expansion for peripheral device connectivity. We also offer USB over Internet Protocol (IP) products that connect USB and serial devices on a wired or wireless Local Area Network (LAN), while eliminating the need for locally-attached host PCs. In addition, we also offer multiport USB hubs that offer a simple solution for adding switched USB ports to a PC, server or thin client.

Services

Digi Wireless Design Services - Our Digi Wireless Design Services provide customers turn-key wireless networking product designs, testing, and certification for a wide range of wireless technology platforms and applications.

Digi Support Services - Our Digi Support Services provide various levels of technical support to customers with programming and implementation challenges related to Digi products. We offer base support up to our highest level of professional support, which includes implementation planning, application development, on-site support, installation and customer training. These support services help minimize design risk and ensure optimal performance.

Digi Remote Manager® - Digi Remote Manager® is a complete centralized remote device management solution, which extends Digi's platform as-a-service (PaaS) offering previously known as Digi Device Cloud™. Digi Remote Manager® provides a secure environment for customers to aggregate their interaction with a large number of disparate devices and connect them to enterprise applications. It allows customers to meet service level commitments and stay compliant with Payment Card Industry (PCI) standards and also allows customers to monitor, diagnose and fix remote devices without sending a technician on site. While Digi Remote Manager® is marketed toward Digi devices, it supports non-Digi hardware as with the previous Device Cloud brand.

SOLUTIONS SEGMENT

Digi Smart Solutions™ - Our Digi Smart Solutions™ is an end-to-end, cost-effective system that uses sensors, gateways and cloud based applications to enable customers such as restaurants, groceries, convenience stores, pharmacies, schools, hospitals and industrial sites to (i) monitor wirelessly the temperature of food and other perishable or sensitive goods, and (ii) track the completion of operating tasks by employees. Our Digi Smart Solutions™ was introduced as a result of our acquisition of Bluenica on October 5, 2015. Our acquisitions of FreshTemp in November 2016 and SMART Temps in January 2017 further expanded our product suite and customer base in this space (see Note 2 to our Consolidated Financial Statements). In addition, subsequent to the end of fiscal 2017, we acquired TempAlert in October 2017 (see Note 19 to our Consolidated Financial Statements).

ITEM 1A. RISK FACTORS

Multiple risk factors exist which could have a material effect on our operations, results of operations, financial position, liquidity, capital resources and common stock.

Risks Relating to Our Business

We face intense competition from established companies that may have significant advantages over us and our products.

The market for our products is intensely competitive. Certain of our competitors and potential competitors have or may develop greater financial, technological, manufacturing, marketing, and personnel resources than us either generally or relative to the product sets they sell in competition to us. Further, there are numerous companies competing with us in various segments of the market for our products, and their products may have advantages over our products in areas such as conformity to existing and emerging industry standards, interoperability with other products, management and security capabilities, performance, price, ease of use, scalability, reliability, flexibility, product features and technical support.

[Table of Contents](#)

Our current and potential competitors have or may develop one or more of the following significant advantages over us in the product areas where they compete with us:

- tighter focus on an individual product or product category;
- greater financial, technical and marketing resources;
- barriers to transition to our products;
- higher brand recognition across larger geographic regions;
- more comprehensive functionality;
- longer-standing cooperative relationships with OEM and end-user customers;
- superior customer service capacity and quality;
- longer operating history; and
- larger customer base.

We cannot provide assurance that we will be able to compete successfully with our current and potential competitors. Such competitors may be able to more quickly develop or adapt to new or emerging technologies and changes in customer requirements, or devote greater resources to the development, promotion and sale of their products. Additionally, it is probable that new competitors or new alliances among existing competitors could emerge and rapidly acquire significant market share.

Our dependence on new product development and the rapid technological change that characterizes our industry makes us susceptible to loss of market share resulting from competitors' product introductions and enhancements, service capabilities and similar risks.

Our industry is characterized by rapidly changing technologies, evolving industry standards, frequent new product introductions, short product life cycles in certain instances and rapidly changing customer requirements. The introduction of products and enhancements embodying new technologies and the emergence of new industry standards can render existing products obsolete and unmarketable.

Our future success will depend on our ability to enhance our existing products, to introduce new products to meet changing customer requirements and emerging technologies, and to demonstrate the performance advantages and cost-effectiveness of our products over competing products. Failure by us to modify our products to support new alternative technologies or failure to achieve widespread customer acceptance of such modified products could cause us to lose market share and cause our revenue to decline. Further, if competitors offer better service capabilities associated with the implementation and use of products in communication networks, our business could be impacted negatively.

We may experience delays in developing and marketing product enhancements or new products that respond to technological change, evolving industry standards and changing customer requirements. For instance, we experienced delays in the introduction of certain new products in fiscal 2017 that impacted our financial results for the year. There can be no assurance that we will not experience difficulties that could delay or prevent the successful development, introduction, and marketing of these products or product enhancements, or that our new products and product enhancements will meet the requirements of the marketplace adequately and achieve any significant or sustainable degree of market acceptance in existing or additional markets. In addition, the future introductions or announcements of products by us or one of our competitors embodying new technologies or changes in industry standards or customer requirements could render our then-existing products obsolete or unmarketable. This risk may become more pronounced as new competitors enter the marketplace, especially if these competitors have more resources than us to develop and market new products and technologies and provide related services. There can be no assurance that the introduction or announcement of new product offerings by us or one or more of our competitors will not cause customers to defer their purchase of our existing products, which could cause our revenue to decline.

We intend to continue to devote significant resources to our research and development, which, if not successful, could cause a decline in our revenue and harm our business.

We intend to continue to devote significant resources to research and development in the coming years to enhance and develop additional products. For fiscal 2017, 2016, and 2015, respectively, our research and development expenses were 15.7%, 15.2% and 14.7% of our revenue. If we are unable to develop new products, applications and services as a result of our research and

[Table of Contents](#)

development efforts, if we encounter delays in deploying these new products, applications and services, or if the products, applications and services we develop are not successful, our business could be harmed. Even if we develop new products, applications and services that are accepted by our target markets, the net revenue from these products, applications and services may not be sufficient to justify our investment in research and development.

Many of our products, applications and services have been developed through a combination of internally developed technologies and acquired technologies. Our ability to continue to develop new products, applications and services could be partially dependent on finding and acquiring new technologies in the marketplace. Even if we identify new technologies that we believe would be complementary to our internally developed technologies, we may not be successful in obtaining those technologies or we may not be able to acquire the technologies at a price that is acceptable to us.

A substantial portion of our development efforts have been directed toward the development of new products targeted to manufacturers of intelligent, network-enabled devices and other embedded systems in various markets, including markets in which networking solutions for embedded systems have not historically been sold, such as markets for industrial automation equipment and medical equipment.

Our participation in a services and solutions model, using hardware and cloud-based services, presents execution and competitive risks.

We are deploying a services and solutions model. Our Digi Smart Solutions™ offerings deploy hardware, software and cloud-based hosting. In other parts of our business we also offer our own internally developed hosted services and cloud-based platform, software applications, and supporting products and services. We are employing significant human and financial resources to develop and deploy these offerings. As we work to grow and scale these offerings, these investments have impacted our gross margins and profitability adversely in the past and may continue to do so in the future. While we believe we have a strong foundation to compete, it is uncertain whether our strategies will attract the users or generate the revenue required to be successful. We have and will encounter competition from other solutions providers, many of whom may have more significant resources than us with which to compete. Whether we are successful in this business model depends on a number of factors, including:

- our ability to put in place the infrastructure to deploy and evolve our solutions effectively and continuously;
- the features and functionality of our offerings relative to competing offerings as well as our ability to market effectively;
- our ability to engage in successful strategic relationships with third parties such as telecommunications carriers, component makers and systems integrators;
- competing effectively for market share; and
- deploying complete end-to-end solutions that meet the needs of the marketplace generally as well as the particular requirements of our customers more effectively and efficiently than competitive solutions.

Our ability to sustain and grow our business depends in large part on the success of our channel partner distributors and resellers.

A substantial part of our revenue is generated through sales by channel partner distributors and resellers. Sales through our channel partners accounted for 61.5%, 66.1% and 61.8% of our total revenue in fiscal 2017, 2016 and 2015, respectively. Further, in recent years we have been taking steps to expand our relationship with certain distributors who have global reach, an effort that may increase the percent of our revenue driven through channel partners or our reliance on certain channel partners to drive sales. To the extent our channel partners are unsuccessful in selling our products or if we are unable to obtain and retain a sufficient number of high-quality channel partners, our operating results could be materially and adversely affected. In addition, our channel partners may also market, sell and support products and services that are competitive with ours, and may devote more resources to the marketing, sales and support of such products. They also may have incentives to promote our competitors' products in lieu of our products, particularly for our competitors with larger volumes of orders, more diverse product offerings and a longer relationship with our distributors and resellers. In these cases, one or more of our important channel partners may stop selling our products completely. Our channel partner sales structure also could subject us to lawsuits, potential liability and reputational harm if, for example, any of our channel partners misrepresents the functionality of our products or services to customers, or violates laws or our corporate policies. If we fail to manage our existing or future sales channel partners effectively, our business and operating results could be materially and adversely affected.

Our gross margins may be subject to decline.

Our gross margins may be subject to decline which could decrease our overall profitability and impact our financial performance adversely. Many of the hardware products we sell are approaching the end of their product life cycles. These mature hardware products typically sell at higher gross margins than our other product and service offerings. In fiscal 2017, sales of mature hardware products represented about 35.7% of our overall revenue. While these products experienced decreased year over year sales in excess of 20% in fiscal 2017, in general, revenues from the sale of these mature hardware products have been declining for several years at a rate of between 1% and 10%. We expect this trend to continue and it is uncertain whether fiscal 2017 represented an ongoing acceleration in the decline of these products. In addition, ongoing cost pressures in our industry create downward pressure on the prices at which we and other manufacturers can sell hardware products. We also have indicated that we would be willing to realize lower levels of gross margins from customers in return for long-term, binding purchase commitments, a strategy that, if successful, could also put downward pressure on our gross margins. While part of our longer term strategy is to sell software applications and IoT solutions such as Digi Smart Solutions™ which can provide recurring revenues at relatively high gross margin, these types of offerings are at early stages of adoption by customers and their sales growth is not necessarily predictable or assured. As such, our gross margins may be subject to decline unless we can implement cost reduction initiatives effectively to offset the impact of these factors.

Our revenue may be subject to fluctuations based on the level of significant one time purchases.

No single customer has represented more than 10% of our revenue in any of the last three fiscal years. However, many of our customers make significant one-time hardware purchases for large projects that are not repeated. As a result, our revenue may be subject to significant fluctuations based on whether we are able to close significant sales opportunities. Our failure to complete one or a series of significant sales opportunities in a particular fiscal period could have a material adverse effect on our revenue for that period.

Certain of our products are sold into mature markets, which could limit our ability to continue to generate revenue from these products.

Many of our hardware products are sold into mature markets that are characterized by a trend of declining demand. As the overall market for these mature hardware products decreases due to the adoption of new technologies, we expect that our revenue from these products will continue to decline. As a result, our future prospects depend in part on our ability to acquire or develop and successfully market additional products that address growth markets.

Our ability to grow our business is dependent in part on strategic relationships we develop and maintain with third parties as well as our ability to integrate and assure use of our products and services in coordination with the products and services of certain strategic partners in a commercially acceptable manner.

We believe that our ability to increase our sales depends in part on maintaining and strengthening relationships with parties such as telecommunications carriers, systems integrators, enterprise application providers, component providers and other strategic technology companies. Once a relationship is established, we likely will dedicate significant time and resources to it in an effort to advance our business interests and there is no assurance any strategic relationship will generate enough revenue to offset the significant resources we use to advance the relationship. Parties with whom we establish strategic relationships may also work with companies that compete with us. We also have limited, if any, control as to whether these parties devote adequate resources to promoting, selling, and implementing our products. Further, new or emerging technologies, technological trends or changes in customer requirements may result in certain companies with whom we maintain strategic relationships de-emphasizing their dealings with us or becoming potential competitors in the future. We also have limited, if any, control as to other business activities of these parties and we could experience reputational harm because of our association with such parties if they fail to execute on business initiatives, are accused of breaking the law or otherwise suffer reputational harm for other reasons. All of these factors could materially and adversely impact our business and results of operations.

In some cases we expect the establishment of a strategic relationship with a third party to result in integrations of our products or services with those of other parties. Identifying appropriate parties for these relationships as well as negotiating and documenting business agreements with them requires significant time and resources. We expect these agreements typically to be non-exclusive and not to prohibit the other party from working with our competitors or offering competing services. Once the relationship is established we may also encounter difficulties in combining our products and services in a commercially acceptable manner. We expect this type of dynamic, whereby our ability to realize sales opportunities is dependent on how our products and services interact with those sold by third parties, may become more common as the marketplace in our industry evolves. There can be no guarantee in any particular instance that we will be successful in making our products interact with those of other parties in a commercially acceptable manner and, even if we do, we cannot guaranty the resulting products and services will be marketed or sold effectively via the relationship.

Our failure to compete successfully in our highly competitive market could result in reduced prices and loss of market share.

The market in which we operate is characterized by rapid technological advances and evolving industry standards. The market can be affected significantly by new product introductions and marketing activities of industry participants. In addition, the amount of competition we face in the marketplace may change and grow as the market for our industry grows and new entrants enter the marketplace. Present and future competitors may be able to identify new markets and develop products more quickly, which are superior to those developed by us. They may also adapt new technologies faster, devote greater resources to research and development, promote products more aggressively, and price products more competitively than us. Competition may also intensify or we may no longer be able to compete effectively in the markets in which we compete.

Our failure to anticipate or manage product transitions effectively could have a material adverse effect on our revenue and profitability.

From time to time, we or our competitors may announce new products, capabilities, or technologies that may replace or shorten the life cycles of our existing products. Announcements of currently planned or other new products may cause customers to defer or stop purchasing our products until new products become available. Furthermore, the introduction of new or enhanced products requires us to manage the transition from older product inventories and ensure that adequate supplies of new products can be delivered to meet customer demand. Our failure to anticipate the revenue declines associated with older products or manage transitions from older products effectively could result in inventory obsolescence and also have a material adverse effect on our revenue and profitability.

Acquisitions could disrupt our business and seriously harm our financial condition.

We will continue to consider acquisitions of complementary businesses, products or technologies. In the event of any future acquisitions, we could issue stock that would dilute our current stockholders' percentage ownership, incur debt, assume liabilities, or incur large and immediate write-offs.

Our operation of any acquired business also involves numerous risks, including but not limited to:

- problems combining the purchased operations, technologies, or products;
- unanticipated costs;
- diversion of management's attention from our core business;
- difficulties integrating businesses in different countries and cultures;
- adverse effects on existing business relationships with suppliers and customers;
- risks associated with entering markets in which we have no or limited prior experience; and
- potential loss of key employees, particularly those of the purchased organization.

We cannot assure that we will be able to successfully integrate any businesses, products, technologies, or personnel that we have acquired or that we might acquire in the future and any failure to do so could disrupt our business and have a material adverse effect on our consolidated financial condition and results of operations. Moreover, from time to time, we may enter into negotiations for a proposed acquisition, but be unable or unwilling to consummate the acquisition under consideration. This could cause significant diversion of management's attention and out-of-pocket expenses for us. We could also be exposed to litigation as a result of any consummated or unconsummated acquisition.

We are subject to various cybersecurity risks, which are particularly acute in the cloud-based technologies operated by us and other third parties that form a part of our solutions. These risks may increase our costs and could damage our brand and reputation.

As we continue to direct a substantial portion of our sales and development efforts toward broader based solutions, such as Digi Smart Solutions™ and the Digi Remote Manager®, we expect to store, convey and potentially process significant amounts of data produced by devices. This data may include confidential or proprietary information, intellectual property or personally identifiable information of our customers or other third parties with whom they do business. It is important for us to maintain solutions and related infrastructure that are perceived by our customers and other parties with whom we do business to provide a reasonable level of reliability and security. Despite available security measures and other precautions, the infrastructure and transmission methods used by our products and services may be vulnerable to interception, attack or other disruptive problems.

[Table of Contents](#)

Continued high-profile data breaches at other companies evidence an external environment that is becoming increasingly hostile to information security. Improper disclosure of data or perception that our data security is insufficient could harm our reputation, give rise to legal proceedings, or subject our company to liability under laws that protect data, any of which could result in increased costs and loss of revenue.

If a cyberattack or other security incident were to allow unauthorized access to or modification of our customers' data or our own data, whether due to a failure with our systems or related systems operated by third parties, we could suffer damage to our brand and reputation. The costs we would incur to address and fix these incidents could significantly increase our expenses. These types of security incidents could also lead to lawsuits, regulatory investigations and increased legal liability, including in some cases contractual costs related to customer notification and fraud monitoring. Further, as regulatory focus on privacy and data security issues continues to increase and worldwide laws and regulations concerning the protection of information become more complex, the potential risks and costs of compliance to our business will intensify.

Digi Smart Solutions™ is a new business line for us and is subject to the risks faced by a new business.

Digi Smart Solutions™ was formed through acquisitions of various businesses and represents a new business line for our company. Our management has limited experience in this marketplace. The operation of Digi Smart Solutions™ will be subject to significant additional risks that are not necessarily related to our legacy products and services.

Additional risks that relate to Digi Smart Solutions™, include, but are not limited to:

- We have not traditionally sold products or services to restaurants, pharmacies, hospitals and other similar businesses, which are a focus for Digi Smart Solutions™.
- Digi Smart Solutions™ offerings are deployed in part to help assure perishable goods are safely preserved. This presents a risk of loss in the event of a malfunction or failure of our offerings.
- Although we have retained several key employees with extensive experience in operating companies we have acquired to date, Digi Smart Solutions™ represents a new line of business in a marketplace that is nascent in its development and has numerous competitors. We cannot provide assurances we will be successful in operating and growing this business.
- Our ability to succeed with the Digi Smart Solutions™ offerings will depend in large part on our ability to provide customers with hardware and software products that are easy to deploy and offer features and functionality that address the needs of particular businesses. We may face challenges and delays in the development of this business as the marketplace for products and services evolves to meet the needs and desires of customers.

In light of these risks and uncertainties, we may not be able to establish or maintain Digi Smart Solutions™' market share, integrate it successfully into our other operations or take full advantage of businesses we have acquired or may acquire in the future. There can be no assurance that we will recover our investments in this new business, that we will realize a profit from this new business or that diverting our management's attention to this new business will not have a material adverse effect on our existing businesses, any of which may have a material adverse effect on our results of operations, financial condition and prospects.

Our consolidated operating results and financial condition may be adversely impacted by worldwide economic conditions and credit tightening.

If worldwide economic conditions experience a significant downturn, these conditions may make it difficult or impossible for our customers and suppliers to accurately forecast and plan future business activities, which may cause them to slow or suspend spending on products and services. Our customers may find it difficult to gain sufficient credit in a timely manner, which could result in an impairment of their ability to place orders with us or to make timely payments to us for previous purchases. If this occurs, our revenue may be reduced, thereby having a negative impact on our results of operations. In addition, we may be forced to increase our allowance for doubtful accounts and our days sales outstanding may increase, which would have a negative impact on our cash position, liquidity and financial condition. We cannot predict either the timing or duration of an economic downturn in the economy, should one occur.

The long and variable sales cycle for certain of our products makes it more difficult for us to predict our operating results and manage our business.

The sale of our products and services can involve a significant technical evaluation and commitment of capital and other resources by potential customers and end users, as well as delays frequently associated with end users' internal procedures to deploy new technologies within their products and to test and accept new technologies. For these and other reasons, the sales

[Table of Contents](#)

cycle associated with certain of our products is typically lengthy and is subject to a number of significant risks, such as end users' internal purchasing reviews, that are beyond our control. Because of the lengthy sales cycle and the large size of certain customer orders, if orders forecasted for a specific customer are not realized or delayed, our operating results could be materially adversely affected.

We depend on manufacturing relationships and on limited-source suppliers, and any disruptions in these relationships may cause damage to our customer relationships.

We procure all parts and certain services involved in the production of our products and subcontract most of our product manufacturing to outside firms that specialize in such services. Although most of the components of our products are available from multiple vendors, we have several single-source supplier relationships, either because alternative sources are not available or because the relationship is advantageous to us. There can be no assurance that our suppliers will be able to meet our future requirements for products and components in a timely fashion. In addition, the availability of many of these components to us is dependent in part on our ability to provide our suppliers with accurate forecasts of our future requirements. Delays or lost revenue could be caused by other factors beyond our control, including late deliveries by vendors of components, or force majeure events. For instance, a fire in November 2014 disrupted the operations at one of our contract manufacturers in Thailand. If we are required to identify alternative suppliers for any of our required components, qualification and pre-production periods could be lengthy and may cause an increase in component costs and delays in providing products to customers. Any extended interruption in the supply of any of the key components currently obtained from limited sources could disrupt our operations and have a material adverse effect on our customer relationships and profitability.

Our inability to obtain the appropriate telecommunications carrier certifications or approvals from governmental regulatory bodies could impede our ability to grow revenue in our wireless products.

The sale of our wireless products in certain geographical markets is sometimes dependent on the ability to gain telecommunications carrier certifications and/or approvals by certain governmental bodies. Failure to obtain these approvals, or delays in receiving the approvals, could impact our ability to enter our targeted markets or to compete effectively or at all in these markets and could have an adverse impact on our revenue.

We are dependent on wireless communication networks owned and controlled by others.

Our revenue could decline if we are unable to deliver continued access to digital cellular wireless carriers that we depend on to provide sufficient network capacity, reliability and security to our customers. Our financial condition could be impacted if our wireless carriers were to increase the prices of their services, or to suffer operational or technical failures.

The impact of natural disasters could negatively impact our supply chain and customers resulting in an adverse impact to our revenue and profitability.

Certain of our components and other materials used in producing our products are from regions susceptible to natural disasters. If we are unable to procure necessary materials, we could experience a disruption to our supply chain that would hinder our ability to produce our products in a timely manner, or cause us to seek other sources of supply, which may be more costly or which we may not be able to procure on a timely basis. We also risk damage to any tooling, equipment or inventory at the supplier's facilities. For instance, flooding in October 2011 and a fire in November 2014 disrupted the operations at one of our contract manufacturers in Thailand. In addition, our customers may not follow their normal purchasing patterns or temporarily cease purchasing from us due to impacts to their businesses in the region, creating unexpected fluctuations or decreases in our revenue and profitability. Natural disasters in other parts of the world on which our operations are reliant also could have material adverse impacts on our business.

Our use of suppliers in other parts of the world involves risks that could negatively impact us.

We purchase a number of components from suppliers in other parts of the world. Product delivery times may be extended due to the distances involved, requiring more lead time in ordering. In addition, ocean freight delays may occur as a result of labor problems, weather delays or expediting and customs issues. Any extended delay in receipt of the component parts could eliminate anticipated cost savings and have a material adverse effect on our customer relationships and profitability.

Our ability to compete could be jeopardized if we are unable to protect our intellectual property rights.

Our ability to compete depends in part on our proprietary rights and technology. Our proprietary rights and technology are protected by a combination of copyrights, patents, trade secrets and trademarks. We enter into confidentiality agreements with our employees, and sometimes with our customers, potential customers and other third parties, and limit access to the distribution of our proprietary information. There can be no assurance that the steps taken by us in this regard will be adequate

[Table of Contents](#)

to prevent the misappropriation of our technology. Our pending patent applications may be denied and any patents, once issued, may be circumvented by our competitors. Furthermore, there can be no assurance that others will not develop technologies that are superior to our technologies. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. In addition, the laws of some foreign countries do not protect our proprietary rights as fully as do the laws of the United States. There can be no assurance that our means of protecting our proprietary rights in the United States or abroad will be adequate or that competing companies will not independently develop similar technologies. Our failure to adequately protect our proprietary rights could have a material adverse effect on our competitive position and result in loss of revenue.

From time to time, we are subject to claims and litigation regarding intellectual property rights or other claims, which could seriously harm us and require us to incur significant costs.

The communications technology industry is characterized by frequent litigation regarding patent and other intellectual property rights. From time to time, we receive notification of a third-party claim that our products infringe other intellectual property rights. Any litigation to determine the validity of third-party infringement claims, whether or not determined in our favor or settled by us, may be costly and divert the efforts and attention of our management and technical personnel from productive tasks, which could have a material adverse effect on our ability to operate our business and service the needs of our customers. There can be no assurance that any infringement claims by third parties, regardless if they have merit, will not materially adversely affect our business, operating results or financial condition. In the event of an adverse ruling in any such matter, we may be required to pay substantial damages, cease the manufacture, use and sale of infringing products, discontinue the use of certain processes or be required to obtain a license under the intellectual property rights of the third party claiming infringement. There can be no assurance that a license would be available on reasonable terms or at all. Any limitations on our ability to market our products, or delays and costs associated with redesigning our products or payments of license fees to third parties, or any failure by us to develop or license a substitute technology on commercially reasonable terms could have a material adverse effect on our business, operating results and financial condition.

We face risks associated with our international operations and expansion that could impair our ability to grow our revenue abroad as well as our overall financial condition.

We believe that our future growth is dependent in part upon our ability to increase sales in international markets. These sales are subject to a variety of risks, including fluctuations in currency exchange rates, tariffs, import restrictions and other trade barriers, unexpected changes in regulatory requirements, longer accounts receivable payment cycles, potentially adverse tax consequences, and export license requirements. In addition, we are subject to the risks inherent in conducting business internationally, including political and economic instability and unexpected changes in diplomatic and trade relationships. In many markets where we operate business and cultural norms are different than those in the United States and practices that may violate laws and regulations applicable to us like the Foreign Corrupt Practices Act (FCPA) and the UK Anti-Bribery Act (UKBA) are more commonplace. Although we have implemented policies and procedures with the intention of ensuring compliance with these laws and regulations, our employees, contractors and agents, as well as channel partners involved in our international sales, may take actions in violation of our policies. Many of our vendors and strategic business allies also have international operations and are subject to the risks described above. Even if we are able to successfully manage the risks of international operations, our business may be adversely affected if one or more of our business partners are not able to successfully manage these risks. There can be no assurance that one or more of these factors will not have a material adverse effect on our business strategy and financial condition.

Our failure to comply effectively with regulatory laws pertaining to our foreign operations could have a material adverse effect on our revenue and profitability.

We are required to comply with U.S. government export regulations in the sale of our products to foreign customers, including requirements to properly classify and screen our products against a denied parties list prior to shipment. We are also required to comply with the provisions of the FCPA and all other anti-corruption laws, such as UKBA, of all other countries in which we do business, directly or indirectly, including compliance with the anti-bribery prohibitions and the accounting and recordkeeping requirements of this law. Violations of the FCPA or other similar laws could trigger sanctions, including ineligibility for U.S. government insurance and financing, as well as large fines. Failure to comply with the aforementioned regulations could also deter us from selling our products in international jurisdictions, which could have a material adverse effect on our revenue and profitability.

Foreign currency exchange rates may adversely affect our operating results.

We are exposed to a variety of market risks, including the effects of changes in foreign currency exchange rates on transactions that are denominated in foreign currencies. Because our financial statements are denominated in U.S. Dollars and

[Table of Contents](#)

approximately 11% of our revenue is denominated in a currency other than U.S. Dollars, such as Euros, British Pounds, Yen and Canadian Dollars, our revenues and earnings may be adversely impacted if the U.S. dollar strengthens significantly against these foreign currencies.

The loss of key personnel could prevent us from executing our business strategy.

Our business and prospects depend to a significant degree upon the continuing contributions of our executive officers and key technical and other personnel. Competition for such personnel is intense, and there can be no assurance that we will be successful in attracting and retaining qualified personnel. Failure to attract and retain key personnel could result in our failure to execute our business strategy.

Our failure to comply effectively with the requirements of applicable environmental legislation and regulation could have a material adverse effect on our revenue and profitability.

Production and marketing of products in certain states and countries may subject us to environmental and other regulations. In addition, certain states and countries may pass new regulations requiring our products to meet certain requirements to use environmentally friendly components. The European Union has issued two directives relating to chemical substances in electronic products. The Waste Electrical and Electronic Equipment Directive (WEEE) makes producers of certain electrical and electronic equipment financially responsible for collection, reuse, recycling, treatment and disposal of equipment placed in the European Union market. The Restrictions of Hazardous Substances Directive (RoHS) bans the use of certain hazardous materials in electric and electrical equipment which are put on the market in the European Union. In the future, China and other countries including the United States may adopt further environmental compliance programs. If we fail to comply with these regulations, we may not be able to sell our products in jurisdictions where these regulations apply, which could have a material adverse effect on our revenue and profitability.

Negative conditions in the global credit markets may impair a portion of our investment portfolio.

Our investment portfolio consists of certificates of deposit, commercial paper, money market funds, corporate bonds and government municipal bonds. These marketable securities are classified as available-for-sale and are carried at fair market value. Some of our investments could experience reduced liquidity and could result in an impairment charge should the impairment be considered as other-than-temporary. This loss would be recorded in our consolidated statement of operations, which could materially adversely impact our consolidated results of operations and financial condition.

Unanticipated changes in our tax rates could affect our future results.

Our future effective tax rates could be favorably or unfavorably affected by unanticipated changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of our deferred tax assets and liabilities, or by changes in tax laws or our interpretation of such laws. In addition, we may be subject to the examination of our income tax returns by the Internal Revenue Service and other U.S. and international tax authorities. We regularly assess the potential outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these examinations will not have an adverse effect on our consolidated operating results and financial condition.

We may have additional tax liabilities.

We are subject to income taxes in the United States and many foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes, including our reserves for uncertain tax positions. In the ordinary course of business, there are many transactions and calculations where the ultimate tax determination is uncertain. We regularly are under audit by tax authorities. Although we believe our tax estimates are reasonable, the final determination of tax audits could be materially different from our historical income tax provisions and accruals. The results of an audit could have a material effect on our consolidated financial position, results of operations, or cash flows in the period or periods for which that determination is made.

Risks Related to Our Common Stock

Unsolicited takeover proposals, governance change proposals, proxy contests and resulting litigation may adversely impact our operations, create uncertainty and affect the market price and volatility of our securities.

In fiscal 2017, we received an unsolicited takeover proposal and other companies in our industry have been the target of unsolicited takeover proposals in the past. In the event that a third party, such as a competitor, private equity firm or activist investor makes an unsolicited takeover proposal, or proposes to change our governance policies or board of directors, or makes

other proposals concerning our ownership structure or operations, our review and consideration of such proposals may be a significant distraction for our management and employees, and could require us to expend significant time and resources. Such proposals may create uncertainty for our employees and this uncertainty may adversely affect our ability to retain key employees, to hire new talent or to complete acquisitions we may desire to make. Similar uncertainty among our customers, suppliers and other business partners could cause them to terminate, or not to renew or enter into, arrangements with us. Certain proposals may result in costly proxy contests or litigation that can disrupt our business operations or result in an adverse effect on our operating results. Management and employee distraction related to any such proposals also may adversely impact our ability to conduct our business optimally and pursue our strategic objectives. Such proposals, or their withdrawal, could create uncertainty among investors and potential investors as to our future direction and affect the market price of our common stock without regard to our operational or financial performance.

Certain provisions of the Delaware General Corporation Law and our charter documents have an anti-takeover effect.

There exist certain mechanisms under the Delaware General Corporation Law and our charter documents that may delay, defer or prevent a change of control. For instance, under Delaware law, we are prohibited from engaging in certain business combinations with interested stockholders for a period of three years after the date of the transaction in which the person became an interested stockholder unless certain requirements are met, and majority stockholder approval is required for certain business combination transactions with interested parties.

Our Certificate of Incorporation contains a "fair price" provision requiring majority stockholder approval for certain business combination transactions with interested parties, and this provision may not be changed without the vote of at least 80% of the outstanding shares of our voting stock. Other mechanisms in our charter documents may also delay, defer or prevent a change of control. For instance, our Certificate of Incorporation provides that our Board of Directors has authority to issue series of our preferred stock with such voting rights and other powers as the Board of Directors may determine. Furthermore, we have a classified board of directors, which means that our directors are divided into three classes that are elected to three-year terms on a staggered basis. Since the three-year terms of each class overlap the terms of the other classes of directors, the entire board of directors cannot be replaced in any one year. Under Delaware law, directors serving on a classified board may not be removed by shareholders except for cause. Also, pursuant to the terms of our shareholder rights plan, each outstanding share of common stock has one attached right. The rights will cause substantial dilution of the ownership of a person or group that attempts to acquire us on terms not approved by the Board of Directors and may have the effect of deterring hostile takeover attempts. The effect of these anti-takeover provisions may deter business combination transactions not approved by our Board of Directors, including acquisitions that may offer a premium over the market price to some or all stockholders.

The price of our common stock has been volatile and could continue to fluctuate in the future.

The market price of our common stock, like that of many other high-technology companies, has fluctuated significantly and is likely to continue to fluctuate in the future. During fiscal 2017, the closing price of our common stock on the NASDAQ Global Select Market ranged from \$8.60 to \$14.10 per share. Our closing sale price on November 20, 2017 was \$10.15 per share. Announcements by us or others regarding the receipt of customer orders, quarterly variations in operating results, departures of key personnel, acquisitions or divestitures, additional equity or debt financings, results of customer field trials, scientific discoveries, technological innovations, litigation, product developments, patent or proprietary rights, government regulation and general market conditions and risks may, for example, have a significant impact on the market price of our common stock.

If our stock price declines over a sustained period of time or our profits significantly decrease, we may need to recognize an impairment of our goodwill.

The price of our common stock could decline. If such a decline continued over a sustained period of time, we could have an impairment of our goodwill. Our market value is dependent upon certain factors, including continued future growth of our products and solutions. If such growth does not materialize or our forecasts are not met, our profits could be significantly reduced and our market value may decline, which could result in an impairment of our goodwill. Goodwill is tested for impairment on an annual basis as of June 30, or more frequently if events or circumstances occur which could indicate impairment.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table contains a listing of our significant property locations as of September 30, 2017:

<u>Location of Property</u>	<u>Use of Facility</u>	<u>Approximate Square Footage</u>	<u>Ownership or Lease Expiration Date</u>
Minnetonka, MN (Corporate headquarters)	Research & development, sales, sales support, marketing and administration	130,000	Owned
Eden Prairie, MN	Manufacturing and warehousing	58,000	Owned
Mishawaka, IN	Sales, technical support and administration	12,412	April, 2023
Waltham, MA	Research & development, sales and sales support	4,249	October 2020
Rochester, MN	Engineering services	3,090	September 2018
Lindon, UT	Sales, technical support, research & development and administration	11,986	December 2020
St. Catharines, Ontario, Canada	Sales and technical support	1,179	June 2019
Hong Kong, China	Sales, marketing and administration	1,656	April 2019
Beijing, China	Sales, marketing and administration	1,617	October 2019
Shanghai, China	Sales, marketing and administration	1,991	May 2019
Ismaning, Germany	Sales, sales support and administration	6,878	September 2019
Logrono, Spain	Sales, research & development and administration	3,229	January 2020
Tokyo, Japan	Sales	1,371	Perpetual
Singapore	Sales, marketing and administration	3,498	April 2019

In addition to the above locations, we perform sales activities in various other locations in Europe that are not deemed to be principal locations and are not listed above.

ITEM 3. LEGAL PROCEEDINGS

On June 19, 2017, Weatherproof Wireless, LLC filed a complaint against Digi International Inc. in federal court in the District of Delaware. The complaint includes allegations against us pertaining to the infringement of Weatherproof Wireless, LLC patents by our access gateway and wireless router pods for public safety communications structures, including the Digi Utility Communication Hub with 4G LTE. On September 26, 2017 we signed a settlement and license agreement for an immaterial amount.

In addition to the matters discussed above, in the normal course of business, we are subject to various claims and litigation, which may include, but are not limited to, patent infringement and intellectual property claims. While we are unable to predict the outcome of any potential claims or litigation due to the inherent unpredictability of these matters, we believe that it is possible that we could, in the future, incur judgments or enter into settlements of claims that could have a material adverse effect on our operations in any particular period.

ITEM 4. MINE SAFETY DISCLOSURES

None.

PART II.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Stock Listing

Our common stock trades under the symbol DGII on the NASDAQ Global Select Market tier of The NASDAQ Stock Market LLC. On November 17, 2017 there were 118 stockholders of record.

The high and low sale prices for our common stock for each quarter during the years ended September 30, 2017 and 2016, as reported by The NASDAQ Stock Market, were:

Stock Prices

<u>2017</u>	<u>First</u>	<u>Second</u>	<u>Third</u>	<u>Fourth</u>
High	\$ 14.15	\$ 14.00	\$ 12.53	\$ 11.05
Low	\$ 9.00	\$ 11.60	\$ 9.00	\$ 8.50
<u>2016</u>	<u>First</u>	<u>Second</u>	<u>Third</u>	<u>Fourth</u>
High	\$ 13.53	\$ 12.23	\$ 11.69	\$ 12.49
Low	\$ 11.14	\$ 7.70	\$ 8.37	\$ 9.79

On November 13, 2016 Digi confirmed that it received an unsolicited, conditional and non-binding proposal from Belden Inc. to acquire the Company for \$13.82 per share in cash. Our Board of Directors unanimously rejected the proposal on November 8, 2016 and again on November 11, 2016. This proposal was rescinded by Belden, Inc. on May 5, 2017.

Dividend Policy

We have never paid cash dividends on our common stock. Our Board of Directors presently intends to retain all earnings for use in our business, except for periodic stock repurchases, and does not anticipate paying cash dividends in the foreseeable future.

Issuer Repurchases of Equity Securities

On May 2, 2017, our Board of Directors authorized a program to repurchase up to \$20.0 million of our common stock primarily to return capital to shareholders. This repurchase authorization expires on May 1, 2018. Shares repurchased under this program will be made through open market and privately negotiated transactions from time to time and in amounts that management deems appropriate. The amount and timing of share repurchases depends upon market conditions and other corporate considerations.

The following table presents the information with respect to purchases made by or on behalf of Digi International Inc. or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of our common stock during the fourth quarter of fiscal 2017:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Program
July 1, 2017 - July 31, 2017	292	\$9.90	—	\$19,725,797.42
August 1, 2017 - August 31, 2017	1,316	\$9.95	—	\$19,725,797.42
September 1, 2017 - September 30, 2017	—	—	—	\$19,725,797.42
Total	1,608	\$9.94	—	\$19,725,797.42

(1) All shares reported were forfeited by employees in connection with the satisfaction of tax withholding obligations related to the vesting of restricted stock units.

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES (CONTINUED)

Performance Evaluation

The graph below compares the total cumulative stockholders’ return on our Common Stock for the period from the close of the NASDAQ Stock Market - U.S. Companies on September 28, 2012 to September 29, 2017, the last day of fiscal 2017, with the total cumulative return for the NASDAQ U.S. Benchmark TR Index (the U.S. Benchmark Index) and the NASDAQ Telecommunications Index (the Peer Index) over the same period. We have determined that our line of business is mostly comparable to those companies in the Peer Index. The index level for the graph and table was set to \$100 on September 28, 2012, for our Common Stock, the U.S. Benchmark Index and the Peer Index and assumes the reinvestment of all dividends.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN

	<u>FY12</u>	<u>FY13</u>	<u>FY14</u>	<u>FY15</u>	<u>FY16</u>	<u>FY17</u>
Digi International Inc.	\$ 100.00	\$ 98.33	\$ 73.82	\$ 116.04	\$ 112.20	\$ 104.33
NASDAQ U.S. Benchmark TR Index	\$ 100.00	\$ 121.50	\$ 143.19	\$ 142.18	\$ 163.83	\$ 194.50
NASDAQ Telecommunications Index	\$ 100.00	\$ 101.70	\$ 115.28	\$ 107.06	\$ 134.94	\$ 136.52

- (1) Included in general and administrative expense in fiscal 2013 is \$1.5 million (\$1.0 million after tax) related to the patent infringement lawsuit settlement with U.S. Ethemet Innovations.
- (2) Included in total other income (expense), net for fiscal 2015 is a \$1.4 million gain from the settlement of a property and casualty insurance claim related to the replacement of our capital equipment destroyed in the fire at our subcontract manufacturer's location in Thailand.
- (3) In fiscal 2017, 2016 and 2015, we recorded net tax benefits of \$1.0 million, \$1.5 million and \$0.8 million, respectively (see Note 11 to our Consolidated Financial Statements). In fiscal 2014 we recorded \$1.5 million related to the re-measurement and reversal of certain income tax reserves as a result of a federal income tax audit of fiscal 2012, the reassessment of state research and development tax credits and the release of income tax reserves due to the expiration of statute of limitations from U.S. and foreign tax jurisdictions. In fiscal 2013 we recorded net tax benefits of \$0.8 related to the January 2, 2013 enactment of the American Taxpayers Relief Act of 2012 extending the research and development tax credit for the last three quarters of fiscal 2012 and the release of income tax reserves due to the expiration of the statute of limitations from various U.S. and foreign tax jurisdictions.
- (4) Earnings per share are calculated by line item and may not add due to the use of rounded amounts.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our management's discussion and analysis should be read in conjunction with our consolidated financial statements and other information in this Annual Report on Form 10-K for the fiscal year ended September 30, 2017.

FORWARD-LOOKING STATEMENTS

This Annual Report contains certain statements that are "forward-looking statements" as that term is defined under the Private Securities Litigation Reform Act of 1995, and within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

Words such as "assume," "believe," "anticipate," "intend," "estimate," "target," "may," "will," "expect," "plan," "project," "should," or "continue" or the negative thereof or other expressions, which are predictions of or indicate future events and trends and which do not relate to historical matters, identify forward-looking statements. Among other items, these statements relate to expectations of the business environment in which the company operates, projections of future performance, perceived marketplace opportunities and statements regarding our mission and vision. Such statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, including risks related to the highly competitive market in which our company operates, rapid changes in technologies that may displace products sold by us, declining demand for and prices of networking products, our reliance on distributors and other third parties to sell our products, delays in product development efforts, uncertainty in user acceptance of our products, the ability to integrate our products and services with those of other parties in a commercially accepted manner, potential liabilities that can arise if any of our products have design or manufacturing defects, our ability to defend or settle satisfactorily any litigation, uncertainty in global economic conditions and economic conditions within particular regions of the world which could negatively affect product demand and the financial solvency of customers and suppliers, the impact of natural disasters and other events beyond our control that could negatively impact our supply chain and customers, potential unintended consequences associated with restructuring or other similar business initiatives that may impact our ability to retain important employees, the ability to achieve the anticipated benefits and synergies associated with acquisitions or divestitures, and changes in our level of revenue or profitability which can fluctuate for many reasons beyond our control.

These and other risks, uncertainties and assumptions identified from time to time in our filings with the United States Securities and Exchange Commission, including without limitation, those described in Item 1A, Risk Factors, of this Form 10-K and subsequent quarterly reports of Form 10-Q and other filings, could cause our future results to differ materially from those expressed in any forward-looking statements made by us or on our behalf. Many of such factors are beyond our ability to control or predict. These forward-looking statements speak only as of the date for which they are made. We disclaim any intent or obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

PRESENTATION OF NON-GAAP FINANCIAL MEASURES

This report includes EBITDA from continuing operations, which is a non-GAAP financial measure. Non-GAAP financial measures are not substitutes for GAAP financial measures, such as net income, for the purpose of analyzing financial performance. The disclosure of these measures does not reflect all charges and gains that were actually recognized by the company. Non-GAAP financial measures are not prepared in accordance with, or an alternative for measures prepared in accordance with, generally accepted accounting principles and may be different from non-GAAP financial measures used by other companies. In addition, non-GAAP financial measures are not based on any comprehensive set of accounting rules or principles. We believe that non-GAAP financial measures have limitations in that they do not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP and that these measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP financial measures. Additionally, we understand that EBITDA from continuing operations does not reflect our cash expenditures, the cash requirements for the replacement of depreciated and amortized assets, or changes in or cash requirements for our working capital needs.

We believe that the presentation of EBITDA from continuing operations as a percentage of revenue is useful because it provides a reliable and consistent approach to measuring our performance from year to year and in assessing our performance against that of other companies. We believe this information helps compare operating results and corporate performance exclusive of the impact of our capital structure and the method by which assets were acquired. EBITDA from continuing operations is used as an internal metric for executive compensation, as well as incentive compensation for the rest of the employee base, and it is monitored quarterly for these purposes.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

OVERVIEW

We are a leading global provider of business and mission-critical machine-to-machine (M2M) and Internet-of-Things (IoT) connectivity products and services. As of the fiscal quarter ended June 30, 2017, we determined that we have two reportable operating segments for purposes of ASC 280-10-50 "Segments Reporting":

- M2M segment; and
- Solutions segment.

Our M2M segment consists primarily of distinct communications products and communication product development services. Among other things, these products and services help our customers create next generation connected products and deploy and manage critical communications infrastructures in demanding environments with high levels of security and reliability. We create secure, easy to implement embedded solutions and services to help customers build IoT connectivity. We also deploy ready to use, complete box solutions to connect remote machinery. We also offer dedicated professional services for the design of specialized wireless communications products for customers. Finally, through this segment we offer managed cloud services that enable customers to capture and manage data from devices they connect to networks. The products and services of this segment are used by a wide range of businesses and institutions.

All of the revenue we report in our consolidated financial statements as hardware product revenue is derived from products included in this segment. These products include our cellular routers and gateways, radio frequency (RF), embedded and network products. Our cellular product category includes our cellular routers and gateways. Our RF product category includes our XBee® modules as well as other RF Solutions. Our Embedded product category includes Digi Connect® and Rabbit® embedded systems on module and single board computers. Our network product category, which has the highest concentration of mature products, includes console and serial servers and USB connected products. Revenues we report as services and solutions revenue in our consolidated financial statements from this segment include Digi Wireless Design Services, Digi Remote Manager® and support services we provide for our hardware products.

Our Solutions segment offers wireless temperature and other environmental condition monitoring services as well as employee task management services. These products and services are provided to food service, transportation, education, healthcare and pharma, and industrial markets and are marketed as Digi Smart Solutions™. We have formed the Solutions segment primarily through a series of acquisitions including the October 2015 acquisition of Bluenica Corporation (Bluenica), the November 2016 acquisition of FreshTemp, LLC (FreshTemp) and the January 2017 acquisition of SMART Temps, LLC (SMART Temps) to enhance and expand the capabilities of the Solutions segment. All revenues from this segment are reported in our consolidated financial statements as services and solutions revenue as customers subscribe for ongoing monitoring services that are enabled by the deployment of hardware and related software. For further detail on segment performance, see Segment Results of Operations section of the management discussion and analysis.

We utilize many financial, operational, and other metrics to evaluate our financial condition and financial performance. Below we highlight the fiscal 2017 metrics that we feel are most important in these evaluations:

- *Revenue was \$181.6 Million.* Our revenue decreased by \$21.4 million, or 10.5%, compared to fiscal 2016. This decrease was due to a decrease in product revenue of \$29.6 million, offset by an increase in services and solutions revenue of \$8.2 million.
- *Gross Margin was 48.0%.* Our gross margin decreased as a percentage of revenue to 48.0% in fiscal 2017 from 49.1% in fiscal 2016. Hardware product gross margin, excluding amortization, was 48.7% in fiscal 2017, compared to 50.1% in the prior fiscal year. Service gross margin, excluding amortization, for fiscal 2017 was 49.5% compared to 32.5% in the prior fiscal year.
- *Income from Continuing Operations was \$9.4 Million and Earnings Per Diluted Share from Continuing Operations were \$0.35.* Our income from continuing operations decreased by \$4.1 million, or 30.5%, compared to fiscal 2016. Earnings per diluted share from continuing operations were \$0.35 in fiscal 2017, compared to \$0.51 in fiscal 2016. The decline in income from continuing operations due primarily to a decline in gross profit of \$12.5 million driven by a decline in the network product category, which includes traditionally higher margin products compared to our other products, partially offset by an increase in services and solutions gross profit. This was partially offset by a decrease in operating expenses of \$4.2 million, primarily due to lower incentive-based compensation expense, and benefits due to adjustments to our contingent consideration liability accruals, offset by incremental expenses related to the SMART

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Temps acquisition, merger and acquisition costs and restructuring charges.

- *Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) from Continuing Operations was \$14.4 Million.* Our EBITDA from continuing operations was \$14.4 million, or 7.9% of revenue, in fiscal 2017, compared to \$21.0 million, or 10.4% of revenue, in fiscal 2016. Below is a table reconciling income from continuing operations to EBITDA from continuing operations (in thousands):

	Year ended September 30,			
	2017		2016	
		% of total revenue		% of total revenue
Total revenue	\$ 181,634	100.0 %	\$ 203,005	100.0 %
Income from continuing operations	\$ 9,366	5.1 %	\$ 13,478	6.6 %
Interest income, net	(608)	(0.3)	(254)	(0.1)
Income tax provision	125	0.1	3,212	1.6
Depreciation and amortization	5,497	3.0	4,584	2.3
Earnings from continuing operations before interest, taxes, depreciation and amortization	\$ 14,380	7.9 %	\$ 21,020	10.4 %

- *Our Balance Sheet Position Improved.* Our current ratio was 9.7 to 1 at September 30, 2017, compared to 8.2 to 1 at September 30, 2016.

We accomplished a number of key initiatives in fiscal 2017 and also face challenges relative to our business.

Accomplishments

- Our service and solutions revenue increased 119.5% during fiscal 2017 compared to fiscal 2016. The increase was primarily driven by the growth of our Digi Smart Solutions™ business. Services and solutions revenue includes \$6.1 million of incremental revenue from the acquisition of SMART Temps and FreshTemp in fiscal 2017. We also had increases to our Digi Wireless Design Services, Digi Remote Manager® platform and support services.
- Our total cash and cash equivalents and marketable securities including long-term marketable securities, amounted to \$115.0 million at September 30, 2017, a decrease of \$22.7 million from September 30, 2016. We completed two acquisitions in fiscal 2017, for a total cash expenditure of \$30.1 million (net of cash acquired of \$0.5 million).
- During fiscal 2017, we have continued to reduce the number of product stock keeping units (SKUs) we produce, which we believe will have significant implications on our ability to manage inventory effectively, improve channel stocking strategies and control costs.
- We continued to simplify and scale our business. We reduced the number of office locations by consolidating our France operations into our EMEA Headquarters in Munich, Germany office and closed our France office location.
- In October 2017, subsequent to the end of our fiscal year, we acquired TempAlert, LLC, a Boston-based provider of automated, real-time temperature monitoring and task management solutions. TempAlert will join Digi Smart Solutions™.

Challenges

- Our network products decreased by 26.0% in fiscal 2017 compared to fiscal 2016, which is a more rapid decline than expected. Demand for these products has been declining for several years and we expect revenues for these products will continue to decline in the future at a rate of approximately 10% to 15% annually.
- Our embedded products and RF products revenue declined of 15.0% and 14.6%, respectively, in fiscal 2017 as compared to fiscal 2016. The decline in both product categories is primarily due to significant sales to large customers in the prior fiscal year, which were not repeated.
- Revenue for new product introductions in fiscal 2017 were not met.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

- Revenue expectations for Digi Smart Solutions™ were not met. Although we found the sales cycles to be longer than expected, the segment still has a growing pipeline.

CONSOLIDATED RESULTS OF OPERATIONS

The following table sets forth selected information derived from our Consolidated Statements of Operations, expressed in dollars and as a percentage of revenue and as a percentage of change from year-to-year for the years indicated.

(\$ in thousands)	Year ended September 30,						% Increase (decrease)	
	2017		2016		2015		2017 compared to 2016	2016 compared to 2015
Revenue:

REVENUE
Hardware Products

Our cellular product category includes our cellular routers and gateways. Our RF product category includes our XBee® modules as well as other RF Solutions. Our Embedded product category includes Digi Connect® and Rabbit® embedded systems on module and single board computers. Our network product category, which has the highest concentration of mature products, includes console and serial servers and USB connected products.

The following summarizes our product revenue by product categories:

(\$ in millions)	Product Revenue			% of Product Revenue		
	2017	2016	2015	2017	2016	2015
Cellular routers and gateways	\$ 47.1	\$ 48.4	\$ 58.7	28.3%	24.7%	30.0%
RF	29.0	33.9	34.4	17.4%	17.3%	17.6%
Embedded	48.0	56.5	51.0	28.8%	28.8%	26.1%
Network	42.4	57.3	51.4	25.5%	29.2%	26.3%
Total product revenue	\$ 166.5	\$ 196.1	\$ 195.5	100.0%	100.0%	100.0%

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

2017 Compared to 2016

Cellular routers and gateway product revenue decreased \$1.3 million, or 2.6%, in fiscal 2017 as compared to fiscal 2016. These decreases primarily were due to a decrease in our transport revenue. Cellular router and gateway revenue is substantially driven by large awards-based customer projects and is subject to revenue fluctuations from quarter to quarter, based on when the awarded projects are deployed.

RF product revenue decreased \$4.9 million, or 14.6%, in fiscal 2017 as compared to fiscal 2016 primarily due to larger sales to certain customers in the prior fiscal year in our Latin America and North America regions in fiscal 2016. RF products can fluctuate from period to period because of large customer projects. We are encouraged by the design wins and building pipeline for our new cellular XBee, first released in March 2017. We are continuing to design additional features and functionality into this product. The product is an embedded module that speeds product introduction and lowers development and certification costs for our customers. We anticipate design wins to begin converting to revenues when production volumes contribute in fiscal 2018.

Embedded product revenue decreased by \$8.5 million, or 15.0%, in fiscal 2017 as compared to fiscal 2016 particularly in the North American and EMEA regions, as there were significant customers moving their products to production in the prior fiscal year. We expect mature products, like Rabbit®, to face ongoing challenges. In April 2017, we released our new ConnectCore 6UL product. The ConnectCore 6UL is a power efficient, low cost and small industrial System-on-Module (SOM). We are encouraged by the design wins and building pipeline and expect this product to begin converting to revenues when production volumes contribute in fiscal 2018.

Network product revenue decreased \$14.9 million, or 26.0%, in fiscal 2017 as compared to fiscal 2016. The decrease was mostly due to a decrease in sales of terminal servers as we had significant sales to a large customer that bought numerous products in fiscal 2016. We also experienced a decline in device servers, partially offset by an increase in USB connected products. As we discussed in the past, because these products are in the mature portion of their product life cycle, this category is generally down. Absent the significant decline from another large customer, we expect that network product revenue will decline in the future at a rate of approximately 10% to 15% annually.

2016 Compared to 2015

Cellular routers and gateways product revenue decreased \$10.3 million, or 17.5%, in fiscal 2016 as compared to fiscal 2015. This decrease primarily was due to lower purchases by significant customers, across all regions. In addition, there were delays of certain product introductions. Cellular router and gateway revenue is substantially driven by large awards-based customer projects and is subject to revenue fluctuations from quarter to quarter, based on when the awarded projects are deployed.

RF product revenue decreased \$0.5 million, or 1.3%, in fiscal 2016 as compared to the prior fiscal year due to slower sales to energy-related customers.

Embedded product revenue increased \$5.5 million, or 10.6%, in fiscal 2016 as compared to fiscal 2015 as significant customers moved new initiatives to production in the North America and EMEA regions.

Network product revenue increased \$5.9 million, or 11.5%, in fiscal 2016 as compared to fiscal 2015 primarily related to large terminal server sales to significant customers. Most of our network products are in the mature phase of their product life cycle.

Services and Solutions

2017 Compared to 2016

Services and solutions revenue for fiscal 2017 was \$15.2 million compared to \$6.9 in the prior fiscal year, an increase of \$8.3 million, or 119.5%. The increase was primarily driven by the growth of our Digi Smart Solutions™ business. Services and solutions revenue includes \$6.1 million of incremental revenue from the acquisitions of SMART Temps and FreshTemp in fiscal 2017. We acquired SMART Temps on January 9, 2017 and FreshTemp on November 1, 2016. In addition, Digi Wireless Design Services revenue increased \$0.9 million. Revenue with our Digi Smart Solutions™ group increased \$0.6 million. Revenue from the Digi Remote Manager® platform and support services increased by \$0.6 million. We expect that revenue from Digi Smart Solutions™ group will continue to increase as we focus on expanding this business, which includes a component of recurring revenue. In October 2017, subsequent to the end of our fiscal year, we acquired TempAlert, LLC, which is part of Digi Smart Solutions™.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)*2016 Compared to 2015*

Service revenue for fiscal 2016 was \$6.9 million compared to \$8.3 in the prior fiscal year, a decrease of \$1.4 million, or 17.3%. The decrease was primarily due to a \$1.5 million decline in revenue for our Digi Wireless Design Services as we struggled to generate sufficient demand while we were transitioning this business to our World Headquarters location as well as identifying new senior leadership. Revenue from the Digi Remote Manager® platform and support services decreased by \$0.6 million. We received incremental revenue from Digi Smart Solutions™ of \$0.7 million which was acquired during the first quarter of fiscal 2016.

Revenue by Geographic Location

Our revenue by geographic location of our customers was as follows:

(\$ in millions)	Revenue			% of Revenue		
	2017	2016	2015	2017	2016	2015
North America, primarily United States	\$ 117.7	\$ 131.5	\$ 127.6	64.8%	64.8%	62.6%
Europe, Middle East & Africa	39.4	44.9	47.5	21.7%	22.1%	23.3%
Asia	19.9	20.4	22.9	11.0%	10.0%	11.2%
Latin America	4.6	6.2	5.8	2.5%	3.1%	2.9%
Total revenue	\$ 181.6	\$ 203.0	\$ 203.8	100.0%	100.0%	100.0%

2017 Compared to 2016

North America revenue in fiscal 2017 decreased \$13.8 million, or 10.4%, compared to fiscal 2016, primarily related to a decrease in sales of terminal servers as we had significant sales to a large customer that bought numerous products in fiscal 2016. In addition, sales of Rabbit® modules decreased. We expect mature products, like Rabbit, to face ongoing challenges. This was partially offset by an increase of \$6.7 million related to Digi Smart Solutions™ group, which included \$6.1 of incremental revenue from the acquisitions of SMART Temps and FreshTemp in fiscal 2017.

EMEA revenue decreased \$5.5 million, or 12.3%, in fiscal 2017 as compared to fiscal 2016. The decrease primarily was due to a decrease of product revenue from embedded modules, terminal servers and cellular gateway products. In addition, we experienced fluctuations of foreign currency rates, which had an unfavorable impact on total revenue of \$0.4 million for fiscal 2017 as compared to fiscal 2016 due to the weakening of the Euro and British Pound compared to the U.S. Dollar.

Asian countries revenue decreased \$0.5 million, or 2.4%, in fiscal 2017 as compared to fiscal 2016.

Latin America revenue decreased \$1.6 million, or 26.3% in fiscal 2017 as compared to fiscal 2016, primarily due to a decrease of RF product revenue as there were larger sales to certain customers in the prior fiscal year.

2016 Compared to 2015

North America revenue in fiscal 2016 increased \$3.9 million, or 3.0%, compared to fiscal 2015. This was primarily due to a \$5.3 million increase in product revenue mostly related to higher sales of network and embedded products. This was partially offset by a decrease in cellular gateway products and a decrease in service revenue mostly related to Digi Wireless Design Services.

EMEA revenue decreased \$2.6 million, or 5.5%, in fiscal 2016 from fiscal 2015. The British Pound and Euro weakened compared to the U.S. Dollar during fiscal 2016, which contributed to the decrease in revenue. In addition revenue decreased for cellular-related and RF products, partially offset by an increase in revenue from embedded products compared to the same periods in the prior year.

Revenue in Asian countries decreased by \$2.5 million, or 11.0%, in fiscal 2016 compared to fiscal 2015 mostly related to decreased volume of network products.

Latin America revenue increased by \$0.4 million, or 6.9%, in fiscal 2016 from fiscal 2015, primarily due to increased RF product sales in fiscal 2016.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Foreign currency rates compared to the prior year's rates had an unfavorable impact on revenue of \$0.4 million, \$1.1 million and \$3.4 million for fiscal 2017, 2016 and 2015, respectively.

Revenue by Distribution Channel

The following table presents our revenue by distribution channel:

(\$ in millions)	Revenue			% of Revenue		
	2017	2016	2015	2017	2016	2015
Direct/OEM channel	\$ 70.0	\$ 68.8	\$ 77.9	38.5%	33.9%	38.2%
Distributors channel	111.6	134.2	125.9	61.5%	66.1%	61.8%
Total revenue	\$ 181.6	\$ 203.0	\$ 203.8	100.0%	100.0%	100.0%

2017 Compared to 2016

Revenue in fiscal 2017 in our Direct/OEM channel increased by \$1.2 million, or 1.7%, compared to the prior fiscal year primarily resulting from increased revenues from our service offerings that are almost exclusively sold through direct channels. During fiscal 2017, revenue from our distributors decreased by \$22.6 million, or 16.8%, compared to fiscal 2016. As described above, we experienced lower sales in fiscal 2017 particularly in network, embedded and RF products compared to fiscal 2016.

2016 Compared to 2015

Revenue in fiscal 2016 in our Direct/OEM channel decreased by \$9.1 million, or 11.7%, compared to the prior fiscal year primarily resulting from lower sales of cellular and RF products and from our service offerings. During fiscal 2016, revenue from our distributors increased by \$8.3 million, or 6.6%, compared to fiscal 2015. We experienced significant sales of terminal servers to a large customer in fiscal 2016. In addition we had significant customers sales of embedded products as they moved their new initiatives to production.

GROSS PROFIT*2017 Compared to 2016*

Gross profit was \$87.2 million and \$99.7 million in fiscal 2017 and 2016, respectively, a decrease of \$12.5 million, or 12.5%. The gross margin for fiscal 2017 was 48.0% compared to 49.1% in fiscal 2016.

Hardware product gross profit was \$81.1 million and \$98.3 million in fiscal 2017 and 2016, respectively, a decrease of \$17.2 million, or 17.5%. The hardware product gross margin for fiscal 2017 was 48.7% compared to 50.1% in fiscal 2016. Gross margin was impacted negatively by lower hardware product revenue and product mix during fiscal 2017 compared to the prior fiscal year. This was driven primarily by the decline of the network category, which includes traditionally higher margin products compared to our other products.

Service gross profit was \$7.5 million and \$2.2 million in fiscal 2017 and 2016, respectively, an increase of \$5.3 million, or 234.8%. The service gross margin for fiscal 2017 was 49.5% compared to 32.5% in fiscal 2014. The increase in gross margin is primarily due to the increase in service and solutions revenue mostly related to Digi Smart Solutions™ during fiscal 2017 compared to the prior fiscal year.

Gross profit was negatively impacted by amortization of \$1.4 million and \$0.9 million in fiscal 2017 and 2016, respectively, resulting in a decrease in gross profit by \$0.5 million.

2016 Compared to 2015

Gross profit was \$99.7 million and \$97.1 million in fiscal 2016 and 2015, respectively, an increase of \$2.6 million, or 2.6%. The gross margin for fiscal 2016 was 49.1% compared to 47.6% in fiscal 2015.

Hardware product gross profit was \$98.3 million and \$95.6 million in fiscal 2016 and 2015, respectively, an increase of \$2.7 million, or 2.8%. The hardware product gross margin for fiscal 2016 was 50.1% compared to 48.9% in fiscal 2015. The increase was driven primarily by strong revenue performance in our network category which traditionally has higher margin products. In addition, we realized manufacturing cost reductions across many of our product lines in fiscal 2016.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Service gross profit was \$2.2 million and \$2.8 million in fiscal 2016 and 2015, respectively, a decrease of \$0.6 million, or 19.3%. The service gross margin for fiscal 2016 was 32.5% compared to 33.3% in fiscal 2015. This primarily was a result of lower revenue from Digi Wireless Design Services.

Gross profit was positively impacted by amortization of \$0.9 million in fiscal 2016 compared to \$1.3 million in fiscal 2015, resulting in an increase in gross profit by \$0.4 million.

OPERATING EXPENSES

2017 Compared to 2016

Operating expenses were \$78.4 million in fiscal 2017, a decrease of \$4.2 million, or 5.1%, compared to \$82.6 million in fiscal 2016. Below is a summary of our operating expenses by function:

Sales and marketing expenses were \$34.0 million and \$33.8 million in fiscal 2017 and 2016, respectively, an increase of \$0.2 million or 0.3%. The increase was primarily due to incremental expenses for SMART Temps of \$1.9 million, partially offset by a reduction in compensation-related expenses of \$1.8 million mostly related to lower incentive compensation expense.

Research and development expenses were \$28.6 million and \$31.0 million in fiscal 2017 and 2016, respectively, a decrease of \$2.4 million or 7.7%. The decrease was due primarily to lower compensation-related expenses of \$3.5 million mostly related to lower incentive compensation expenses increased due to decreased company performance in fiscal 2017. This was partially offset by an increase of \$0.7 million in incremental expenses for SMART Temps.

General and administrative expenses were \$13.3 million and \$17.0 million in fiscal 2017 and 2016, respectively, a decrease of \$3.7 million or 21.7%. This was primarily due to a net decrease of \$3.7 million for adjustments to our contingent consideration liability accruals. In addition we realized lower compensation and employee-related expenses of \$2.6 million mostly related to increased incentive compensation expenses due to decreased company performance in fiscal 2017. This was partially offset by an increase in acquisition expenses of \$1.1 million and incremental expenses for SMART Temps of \$1.5 million.

Restructuring expenses were \$2.5 million and \$0.7 million in fiscal 2017 and fiscal 2016, respectively, an increase of \$1.8 million. For further information on restructuring, see Note 10 to our Consolidated Financial Statements.

2016 Compared to 2015

Operating expenses were \$82.6 million in fiscal 2016, a decrease of \$3.6 million, or 4.2%, compared to \$86.2 million in fiscal 2015. Below is a summary of our operating expenses by function:

Sales and marketing expenses were \$33.8 million and \$37.6 million in fiscal 2016 and 2015, respectively, a decrease of \$3.8 million or 9.9%. This decrease was due primarily to decreased compensation and employee-related expenses of \$3.0 million as a result of reduced headcount. Travel and entertainment expenses also decreased by \$0.3 million.

Research and development expenses were \$31.0 million and \$29.9 million in fiscal 2016 and 2015, respectively, an increase of \$1.1 million or 3.4%. Compensation and employee-related expenses increased by \$1.5 million as a result of underutilization of billable research and development resources as well as increased contract labor costs. Outside services for testing and certifications increased by \$0.3 million. This was partially offset by decreases of \$0.8 million in travel and entertainment, occupancy and other miscellaneous research and development costs.

General and administrative expenses were \$17.0 million and \$18.3 million in fiscal 2016 and 2015, respectively, a decrease of \$1.3 million or 7.0%. The decrease is primarily related to compensation-related expenses of \$0.7 million, of which \$0.3 million related to Chief Executive Officer transition expenses incurred in fiscal 2015. In addition there was a decrease in expenses of \$0.7 million as we reduced the fair value of the contingent consideration associated with our acquisition of Bluenica (see Note 2 to our Consolidated Financial Statements).

Restructuring expenses were \$0.7 million in fiscal 2016 and \$0.4 million in fiscal 2015. For further information on restructuring expenses, see Note 10 to our Consolidated Financial Statements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

OTHER INCOME (EXPENSE), NET

2017 Compared to 2016

We recorded other income, net of \$0.7 million in fiscal 2017 compared to other expense, net of \$0.4 million in fiscal 2016. In fiscal 2017 we recorded foreign currency net transaction gains of \$0.1 million compared to fiscal 2016 in which we recorded \$0.7 million of foreign currency net transaction losses. Our interest income on marketable securities and cash and cash equivalents increased in fiscal 2017 from fiscal 2016. Our average investment balance decreased from \$102.3 million in fiscal 2016 to \$94.6 million in fiscal 2017, however, we earned an average interest rate of 0.7% and 0.4% in fiscal 2017 and 2016, respectively.

2016 Compared to 2015

Total other income (expense), net was comprised of other expense, net of \$0.4 million in fiscal 2016 compared to other income, net of \$2.2 million in fiscal 2015. In fiscal 2016, we recorded \$0.7 million of foreign currency net transaction losses compared to fiscal 2015 in which we recorded \$0.6 million of foreign currency net transaction gains and a \$1.4 million of gain from the settlement of a property and casualty insurance claim related to the replacement of our capital equipment destroyed in the fire at our subcontract manufacturer's location. Our interest income on marketable securities and cash and cash equivalents increased from fiscal 2015 to fiscal 2016 as our average investment balance increased from \$74.0 million in fiscal 2015 to \$102.3 million in fiscal 2016. We earned an average interest rate of 0.4% and 0.3% in fiscal 2016 and 2015, respectively.

INCOME TAXES

Our effective income tax rates were 1.3%, 19.2% and 28.1% for fiscal 2017, 2016 and 2015, respectively. Our effective tax rate will vary based on a variety of factors, including overall profitability, the geographical mix of income before taxes and related statutory tax rate in each jurisdiction, and discrete events, such as settlements of audits (see Note 11 to our Consolidated Financial Statements).

During fiscal 2017, we recorded net tax benefits of \$1.0 million, primarily from the reversal of tax reserves due to the expiration of statutes of limitation from U.S. and foreign tax jurisdictions.

During fiscal 2016, we recorded net tax benefits of \$1.5 million, primarily from the reinstatement of the federal research and development tax credit for calendar year 2015 and the reversal of tax reserves due to the expiration of statutes of limitation from U.S. and foreign tax jurisdictions. In addition, we filed amended income tax returns resulting in an additional domestic refund related to qualified manufacturing activities.

During fiscal 2015, we recorded net tax benefits of \$0.8 million, resulting from the reinstatement of the research and development tax credit for calendar year 2014, reversal of tax reserves due to the expiration of statute of limitations from U.S. and foreign tax jurisdictions and reversal of tax reserves due to the resolution of tax audits.

INFLATION

Management believes that during fiscal 2017, 2016 and 2015, inflation has not had a material effect on our consolidated statement of operations or financial position.

M2M REVENUE
2017 Compared to 2016

M2M segment revenue was \$174.2 million in fiscal 2017 compared to \$202.3 million in fiscal 2016, a decrease of \$28.1 million, or 13.9%. Hardware product revenue decreased \$29.6 million, or 15.1%, in fiscal 2017 as compared to fiscal 2016 as performance decreased in all product categories. This was partially offset by an increase in services revenue from this segment of \$1.5 million, or 25.3%, in fiscal 2017 as compared to fiscal 2016 as revenue for Digi Wireless Design Services, Digi Remote Manager® and support services all increased. Revenue for this segment was unfavorably impacted by \$0.4 million for the year ended September 30, 2017 primarily due to the weakening of the British Pound and Euro compared to the U.S. Dollar.

2016 Compared to 2015

M2M segment revenue was \$202.3 million in fiscal 2016 compared to \$203.8 million in fiscal 2015, a decrease of \$1.5 million, or 0.8%. Services revenue from this segment decreased \$2.2 million, or 25.8%, in fiscal 2016 as compared to fiscal 2015 as revenue for Digi Wireless Design Services, Digi Remote Manager® and support services all decreased. This was partially offset by an increase in hardware product revenue of \$0.6 million, or 0.3%, in fiscal 2017 as compared to fiscal 2016 due to increases in network and embedded products increased, partially offset by decreases in cellular routers and gateways and RF products. Revenue for this segment was unfavorably impacted by \$1.1 million for the year ended September 30, 2016 primarily due to the weakening of the British Pound and Euro compared to the U.S. Dollar.

M2M OPERATING INCOME
2017 Compared to 2016

Operating income was \$12.8 million in fiscal 2017 compared to \$18.8 million in fiscal 2016, a decrease of \$6.0 million, or 32.0%. The decrease was primarily due to a reduction in our gross profit of \$16.0 million, or 16.0%, offset by a decrease in operating expenses of \$10.0 million, or 12.3%. The decrease in operating expenses was due primarily to a reduction in employee-related expenses of \$9.4 million related to a reduction in incentive plan compensation as thresholds were not met. In addition we realized a net decrease of \$3.7 million for adjustment to our contingent consideration liability accruals. This partially offset by an increase of \$1.8 million for restructuring charges (see Note 10 to our Consolidated Financial Statements). In addition there was an increase of \$1.7 million in outside services and professional fees of which \$1.1 million related to acquisition costs.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)*2016 Compared to 2015*

Operating income was \$18.8 million in fiscal 2016 compared to \$10.9 million in fiscal 2015, an increase of \$7.9 million, or 72.9%. The increase was primarily due to an increase in our gross profit of \$2.7 million, or 2.8% and a decrease in operating expenses of \$5.2 million, or 6.1%. The decrease in operating expenses was due primarily to a reduction in employee-related expenses of \$3.3 million mostly related to a reduction in incentive plan compensation as thresholds were not met. In addition, we had decreases of \$0.9 million for travel and entertainment expense, \$0.7 million for occupancy expenses, and a decrease of \$0.7 million for earn-out adjustment made in fiscal 2016. This was partially offset by an increase in professional fees of \$0.6 million and additional restructuring charges of \$0.3 million.

(\$ in thousands)	Year ended September 30,				% Increase (decrease) 2017 compared to 2016
	2017		2016		
Solutions revenue	\$ 7,397	100.0 %	\$ 711	100.0 %	940.4
Cost of sales:					
Cost of solutions	2,954	40.0	446	62.7	562.3
Amortization of intangibles	1,074	14.5	398	56.0	169.8
Total cost of sales	4,028	54.5	844	118.7	377.3
Gross profit	3,369	45.5	(133)	(18.7)	2,633.1
Total operating expenses	7,366	99.5	1,584	222.8	365.0
Operating loss	\$ (3,997)	(54.0)%	\$ (1,717)	(241.5)%	132.8

SOLUTIONS REVENUE*2017 Compared to 2016*

Solutions segment revenue was \$7.4 million in fiscal 2017 compared to \$0.7 million in fiscal 2016, an increase of \$6.7 million, or 940.4%. The increase was driven primarily by the continued growth and expansion of the Solutions segment, which included incremental revenue from our recent acquisitions of SMART Temps and FreshTemp of \$6.1 million in fiscal 2017 as compared to fiscal 2016 (see Note 2 to our Consolidated Financial Statements). As of September 30, 2017, we are now servicing nearly 14,000 customer sites and our recurring revenue from this segment continues to grow.

SOLUTIONS OPERATING LOSS*2017 Compared to 2016*

Operating loss was \$4.0 million in fiscal 2017 compared to \$1.7 million in fiscal 2016, an increase of \$2.3 million, or 132.8%. The increase in operating loss was primarily due to an increase in operating expenses of \$5.8 million, or 365.0%. This was primarily driven by the recent acquisitions of SMART Temps and FreshTemp. This was partially offset by an increase in our gross profit of \$3.5 million, or 2,633.1%. We expect our Solutions gross margin to increase in future periods as recurring revenue from this segment increases.

LIQUIDITY AND CAPITAL RESOURCES

We have financed our operations principally with funds generated from operations. We held cash, cash equivalents and short-term marketable securities of \$110.2 million, \$134.1 million and \$92.2 million at September 30, 2017, 2016 and 2015, respectively. Our working capital was \$156.4 million, \$171.8 million and \$137.0 million at September 30, 2017, 2016 and 2015, respectively. The decrease of cash, cash equivalents and short-term marketable securities and working capital during fiscal 2017 was attributable primarily to the acquisitions of FreshTemp in November 2016 and SMART Temps in January 2017.

In October 2017 we purchased all the outstanding interest of TempAlert. The purchase price was \$45 million in cash adjusted for certain net working capital adjustments. Cash of \$40.7 million was paid at the time of closing. For more information on the acquisition of TempAlert (see Note 19 to the Consolidated Financial Statements).

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

Consolidated Statements of Cash Flows Highlights:

(\$ in thousands)	Year ended September 30,		
	2017	2016	2015
Operating activities	\$ 2,475	\$ 27,089	\$ 14,074
Investing activities	(3,743)	(3,780)	(19,454)
Financing activities	3,057	7,749	5,145
Effect of exchange rate changes on cash and cash equivalents	706	(349)	(2,237)
Net increase (decrease) in cash and cash equivalents	\$ 2,495	\$ 30,709	\$ (2,472)

2017 Compared to 2016

Net cash provided by operating activities was \$2.5 million during fiscal 2017 compared to \$27.1 million in fiscal 2016, a net decrease of \$24.6 million. This net decrease was primarily due to a decrease of \$7.8 million of net income adjusted for non-cash items and a net decrease in cash flows resulting from changes in operating assets and liabilities of \$16.8 million. The net decrease in cash flows resulting from changes in operating assets and liabilities of \$16.8 million primarily due to a decrease of \$8.5 million resulting from an increase in inventory in fiscal 2017 compared to fiscal 2016, a \$5.2 million decrease in cash flows related to accounts payable and a \$6.7 million decrease in accrued liabilities primarily resulting from payouts of incentive compensation accruals on fiscal 2016 incentive compensation. This was partially offset by an increase of \$2.0 million increase in cash flows as our accounts receivable increased by a smaller amount in fiscal 2017 compared to fiscal 2016 and \$1.6 million related to income taxes payable.

Net cash used in investing activities was \$3.7 million in fiscal 2017 compared \$3.8 million in fiscal 2016, an increase of \$0.1 million. There were net maturities of marketable securities in fiscal 2017 compared to net purchases of marketable securities in fiscal 2016 which accounted for a \$26.2 million increase. In addition, there was an increase of \$0.9 million related to fewer capital expenditures and \$0.2 million of additional proceeds from the sale of Etherios. This was partially offset by a decrease of \$27.3 million related to additional expenditures for acquisitions (see Note 2 to the Consolidated Financial Statements).

Net cash provided by financing activities was \$3.1 million in fiscal 2017 compared to \$7.7 million in fiscal 2016. There were \$3.8 million fewer proceeds from exercises of stock options and employee stock purchase plan transactions in fiscal 2017 compared to fiscal 2016. We also had \$0.5 million acquisition earn-out payments in fiscal 2017 and \$0.4 million fewer repurchases of common stock in fiscal 2017 compared to fiscal 2016.

2016 Compared to 2015

Net cash provided by operating activities was \$27.1 million during fiscal 2016 compared to \$14.1 million during fiscal 2015, a net increase of \$13.0 million. This net increase is due to an increase of \$8.4 million in net income adjusted for non-cash items and a net increase in cash flows resulting from operating assets and liabilities of \$4.6 million. The increase in cash flows related to changes in operating assets and liabilities was primarily due to an increase of \$5.9 million resulting from a reduction in inventory, an increase in accounts payable of \$5.4 million, and an increase of \$1.0 million resulting from a reduction of accounts receivable, prepaids and other assets. This was partially offset by a reduction of accrued liabilities of \$5.7 million and a reduction of \$2.0 million of taxes payable.

Net cash used by investing activities was \$3.8 million in fiscal 2016 compared to \$19.5 million in fiscal 2015, a net decrease of \$15.7 million. We purchased \$15.3 million fewer marketable securities in fiscal 2016 as compared to fiscal 2015. We received \$2.8 million in proceeds from the sale of Etherios, net of cash sold, in fiscal 2016 and spent \$1.8 million less for capital expenditures in fiscal 2016 compared to fiscal 2015. This was partially offset by cash used for the acquisition of Bluenica of \$2.9 million and proceeds from an insurance settlement in fiscal 2015 of \$1.4 million.

Net cash provided by financing activities was \$7.7 million in fiscal 2016 compared to \$5.1 million in fiscal 2015, an increase of \$2.6 million. We repurchased \$1.8 million less of our common stock in fiscal 2016 compared to fiscal 2015, and received \$0.8 million of additional proceeds related to exercises of stock options and employee stock purchase plan transactions.

We expect positive cash flows from operations and believe that our current cash, cash equivalents and marketable securities balances, cash generated from operations and our ability to secure debt and/or equity financing will be sufficient to fund our business operations and capital expenditures for the next twelve months and beyond.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

At September 30, 2017, our total cash and cash equivalents and marketable securities balance, including long-term marketable securities was \$115.0 million. Approximately \$31.7 million of cash and cash equivalents was being held by our controlled foreign subsidiaries at September 30, 2017. At September 30, 2017, we had \$34.6 million of accumulated undistributed foreign earnings that are indefinitely reinvested in non-U.S. subsidiaries, resulting in slightly more than half of our cash and cash equivalents being held by non-U.S. subsidiaries. Although we have no current need to repatriate historical earnings in the form of cash in the United States, if we change our assertion from indefinitely reinvesting undistributed foreign earnings, we would have to accrue applicable taxes. The amount of any taxes and the application of any tax credits would be determined based on the income tax laws at the time of such repatriation. Under current tax laws, we estimate the unrecognized deferred tax liability to be up to \$0.6 million.

CONTRACTUAL OBLIGATIONS

The following summarizes our contractual obligations at September 30, 2017:

(\$ in thousands)	Payments due by fiscal period				
	Total	Less than 1 year	1-3 years	3-5 years	Thereafter
Operating leases	\$ 3,761	\$ 1,398	\$ 1,757	\$ 485	\$ 121

The operating lease agreements included above primarily relate to office space. The table above does not include possible payments for uncertain tax positions. Our reserve for uncertain tax positions, including accrued interest and penalties, was \$1.5 million as of September 30, 2017. Due to the nature of the underlying liabilities and the extended time often needed to resolve income tax uncertainties, we cannot make reliable estimates of the amount or timing of future cash payments that may be required to settle these liabilities.

The above table also does not include those obligations for royalties under license agreements as these royalties are calculated based on future sales of licensed products and we cannot make reliable estimates of the amount of cash payments.

FOREIGN CURRENCY

We are exposed to foreign currency transaction risk associated with certain sales being denominated in Euros, British Pounds, Japanese Yen and Canadian Dollar and foreign currency translation risk as the financial position and operating results of our foreign subsidiaries are translated into U.S. Dollars for consolidation. We manage our net asset or net liability position for U.S. dollar accounts in our foreign locations to reduce our foreign currency risk. We have not implemented a formal hedging strategy to reduce foreign currency risk.

During 2017, we had approximately \$63.9 million of revenue related to foreign customers including export sales, of which \$18.2 million was denominated in foreign currency, predominantly the Euro and British Pound. During fiscal 2016 and 2015, we had approximately \$71.5 million and \$76.2 million, respectively, of revenue to foreign customers including export sales, of which \$22.9 million and \$21.3 million, respectively, were denominated in foreign currency, predominantly the Euro and British Pound. In future periods, we expect that the majority of our sales will be in U.S. Dollar.

In June 2016, the U.K. held a referendum in which voters approved Brexit. The announcement of Brexit caused significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against the British pound. Brexit could cause disruptions to and create uncertainty surrounding our business, including continued increased volatility in exchange rates, as the future terms of the U.K.'s relationship with the E.U. are determined.

RECENT ACCOUNTING DEVELOPMENTS

For information on new accounting pronouncement, see Note 1 to our Consolidated Financial Statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, the disclosure of contingent assets and liabilities and the values of purchased assets and assumed liabilities in acquisitions. We base our estimates on historical experience and various

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We believe the following critical accounting policies impact our more significant judgments and estimates used in the preparation of our consolidated financial statements.

REVENUE RECOGNITION

Our revenue is derived primarily from the sale of wired and wireless hardware products to our distributors and Direct/OEM customers. We recognize hardware product revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, collectability is reasonably assured and there are no post-delivery obligations, other than warranty. Under these criteria, product revenue generally is recognized upon shipment of product to customers. Sales to authorized domestic distributors and Direct / OEMs are made with certain rights of return and price adjustment provisions. Estimated reserves for future returns and pricing adjustments are established by us based on an analysis of historical patterns of returns and price adjustments as well as an analysis of authorized returns compared to received returns and distribution sales for the current period. Estimated reserves for future returns and price adjustments are charged against revenue in the same period as the corresponding sales are recorded. Material differences between the historical trends used to determine estimated reserves and actual returns and pricing adjustments could result in a material change to our consolidated results of operations or financial position. We have applied consistent methodologies for estimating reserves for future returns and pricing adjustments for all years presented. The reserve for future returns and pricing adjustments was \$2.2 million at September 30, 2017 and \$2.0 million at September 30, 2016.

Revenue recognized for service revenue as a percentage of total revenue represented 8.3%, 3.4% and 4.1% in fiscal 2017, 2016 and 2015, respectively. Our service revenue is derived primarily from our Digi Wireless Design Services and our Digi Smart Solutions™. Our equipment and implementation fees are recorded as a sale up-front due to these items having stand-alone value to the customer because the customer can utilize our equipment with other monitoring services or use our monitoring services with hardware purchased from other vendors. Our installation charges are recorded when the product is installed. Our subscription revenue is recorded on a monthly basis. These subscriptions are generally for one year, but can be as long as three years, and may contain an evergreen renewal provision. Generally, our subscription renewal charges per month are the same as the original contract term. We also have some service revenue that is derived from our Digi Remote Manager®, which is a platform-as-a-service (PaaS) offering in which customers pay for services consumed in terms of devices being managed and monitored, or as a monthly service fee for access to information. In addition, we have small amounts of revenue from our support services. We recognize service revenue from our Digi Wireless Design Services, Digi Smart Solutions™ and Digi Remote Manager® based upon performance, including final product delivery and customer acceptance. In addition, we recognize small amounts of revenue from support services which is recognized over the life of the contract, and training as the services are performed.

MARKETABLE SECURITIES

We regularly monitor and evaluate the realizable value of our marketable securities. When assessing marketable securities for other-than-temporary declines in value, we consider several factors. These factors include: how significant the decline in value is as a percentage of the original cost, how long the market value of the investment has been less than its original cost, the underlying factors contributing to a decline in the prices of securities in a single asset class, the performance of the issuer's stock price in relation to the stock price of its competitors within the industry, expected market volatility, analyst recommendations, the views of external investment managers, any news or financial information that has been released specific to the investee and the outlook for the overall industry in which the issuer operates. If events and circumstances indicate that a decline in the value of these securities has occurred and is other-than-temporary, we would record a charge to other income (expense).

ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS

We maintain an allowance for doubtful accounts, which reflects the estimate of losses that may result from the inability of some of our customers to make required payments. The estimate for the allowance for doubtful accounts is based on known circumstances regarding collectability of customer accounts and historical collections experience. If the financial condition of one or more of our customers were to deteriorate, resulting in an inability to make payments, additional allowances may be required. Material differences between the historical trends used to estimate the allowance for doubtful accounts and actual

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

collection experience could result in a material change to our consolidated results of operations or financial position. The allowance for doubtful accounts was \$0.3 million at September 30, 2017 and \$0.2 million at September 30, 2016.

INVENTORIES

Inventories are stated at the lower of cost or fair market value, with cost determined using the first-in, first-out method. We reduce the carrying value of our inventories for estimated excess and obsolete inventories equal to the difference between the cost of inventory and its estimated realizable value based upon assumptions about future product demand and market conditions. Once the new cost basis is established, the value is not increased with any changes in circumstances that would indicate an increase in value after the re-measurement. If actual product demand or market conditions are less favorable than those projected by management, additional inventory write-downs may be required that could result in a material change to our consolidated results of operations or financial position. We have applied consistent methodologies for the net realizable value of inventories.

GOODWILL

Goodwill represents the excess of cost over the fair value of identifiable assets acquired. In a business combination, goodwill is capitalized at the acquisition date. It is measured at fair value, which is the excess of the acquisition price for shares in a company over the acquired net assets. The net assets include the fair values of the acquired identifiable assets less the assumed liabilities and contingent liabilities.

Goodwill is tested for impairment on an annual basis as of June 30, or more frequently if events or circumstances occur which could indicate impairment. The calculation of goodwill impairment requires us to make assumptions about the fair value of our reporting unit(s), which historically has been approximated by using our market capitalization plus a control premium for our one reporting unit. Control premium assumptions require judgment and actual results may differ from assumed or estimated amounts.

As of the third quarter of fiscal 2017, we determined that we have two reportable operating segments, our Solutions segment and our M2M segment (see Note 5 to the Condensed Consolidated Financial Statements). As a result, we concluded that the Solutions segment and the M2M segment constitute separate reporting units for purposes of the ASC 350-20-35 "Goodwill Measurement of Impairment" assessment and both units were tested individually for impairment.

Our test for potential goodwill impairment is a two-step approach. First, we estimate the fair values for each reporting unit by comparing the fair value to the carrying value. If the carrying value of the reporting unit exceeds its estimated fair value, then we conduct the second step, which requires us to measure the amount of the impairment loss. The impairment loss, if any, is calculated by comparing the implied fair value of the goodwill to its carrying amount. To calculate the implied fair value of goodwill, the fair value of the reporting unit's assets and liabilities, excluding goodwill, is estimated. The excess of the fair value of the reporting unit over the amount assigned to its assets and liabilities, excluding goodwill, is the implied fair value of the reporting unit's goodwill.

At June 30, 2017, we had a total of \$98.6 million of goodwill on our Condensed Consolidated Balance Sheet for the M2M reporting unit and the implied fair value of this reporting unit exceeded its carrying value by approximately 7%. At June 30, 2017, we had a total of \$32.5 million of goodwill on our Condensed Consolidated Balance Sheet for the Solutions reporting unit and the implied fair value of this reporting unit exceeded its carrying value by approximately 8%. Based on that data, we concluded that no impairment was indicated for either reporting unit and we were not required to complete the second step of the goodwill impairment analysis. No goodwill impairment charges were recorded. During the fourth quarter of fiscal 2017, we assessed various qualitative factors to determine whether or not an additional goodwill impairment assessment was required as of September 20, 2017, and we concluded that no additional impairment assessment was required.

Implied fair values, for both reporting units were each calculated on a standalone basis using a weighted combination of the income approach and market approach.

The income approach indicates the fair value of a business based on the value of the cash flows the business or asset can be expected to generate in the future. A commonly used variation of the income approach used to value a business is the discounted cash flow (DCF) method. The DCF method is a valuation technique in which the value of a business is estimated on the earnings capacity, or available cash flow, of that business. Earnings capacity represents the earnings available for distribution to capital holders after consideration of the reinvestment required for future growth. Significant judgment is

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED)

required to estimate the amount and timing of future cash flows for each reporting unit and the relative risk of achieving those cash flows.

The market approach indicates the fair value of a business or asset based on a comparison of the business or asset to comparable publicly traded companies or assets and transactions in its industry as well as prior company or asset transactions. This approach can be estimated through the guideline company method. This method indicates fair value of a business by comparing it to publicly traded companies in similar lines of business. After identifying and selecting the guideline companies, we make judgments about the comparability of the companies based on size, growth rates, profitability, risk, and return on investment in order to estimate market multiples. These multiples are then applied to the reporting units to estimate a fair value.

In addition, the implied fair values of each reporting unit were added together to get an indicated value of total equity to which a range of indicated value of total equity was derived. This range was compared to the total market capitalization of \$269.4 million as of June 30, 2017, which implied a range of control premiums of 16.6% to 24.4%. This range of control premiums falls below the control premiums observed in the last five years in the communications equipment industry. As a result, the market capitalization reconciliation analysis proved support for the reasonableness of the fair values estimated for each individual reporting unit.

Should the facts and circumstances surrounding our assumptions change, the first step of our goodwill impairment analysis may fail. Assumptions and estimates to determine fair values are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. For example, if our future operating results do not meet current forecasts or if we experience a sustained decline in our market capitalization that is determined to be indicated of a reduction in fair value of one or more of our reporting units, we may be required to record future impairment charges for goodwill.

CONTINGENT CONSIDERATION

We measure our contingent consideration liabilities recognized in connection with business combinations at fair value on a recurring basis using significant unobservable inputs classified within Level 3 of the fair value hierarchy as defined in ASC 820 "Fair Value Measurement". We used a probability-weighted discounted cash flow approach as a valuation technique to determine the fair value of the contingent consideration on the acquisition date. At each subsequent reporting period, the fair value is re-measured with the change in fair value recognized in general and administrative expense and interest expense in our Condensed Consolidated Statements of Operations. Amounts, if any, paid to the seller in excess of the amount recorded on the acquisition date will be classified as cash flows used in operating activities. Payments to the seller not exceeding the acquisition-date fair value of the contingent consideration will be classified as cash flows used in financing activities. At September 30, 2017 and 2016, the fair value of our contingent consideration was \$6.4 million and \$10.0 million, respectively.

INCOME TAXES

We operate in multiple tax jurisdictions both in the U.S. and outside of the U.S. Accordingly, we must determine the appropriate allocation of income to each of these jurisdictions. This determination requires us to make several estimates and assumptions. Tax audits associated with the allocation of this income, and other complex issues, may require an extended period of time to resolve and could result in adjustments to our income tax balances that are material to our consolidated financial position and results of operations and could result in potential cash outflows.

We have unrecognized tax benefits of \$1.3 million at September 30, 2017. We expect that it is reasonably possible that the total amounts of unrecognized tax benefits will decrease approximately \$0.1 million over the next 12 months due to the expiration of various statutes of limitations. The total amount of unrecognized tax benefits that if recognized would affect our effective tax rate is \$1.2 million. We recognize interest and penalties related to income tax matters in income tax expense.

WARRANTIES

In general, we warrant our products to be free from defects in material and workmanship under normal use and service. The warranty periods generally range from one to five years. We typically have the option to repair or replace products we deem defective due to material or workmanship. Estimated warranty costs are accrued in the period that the related revenue is recognized based upon an estimated average per unit repair or replacement cost applied to the estimated number of units under warranty. These estimates are based upon historical warranty incidents and are evaluated on an ongoing basis to ensure the adequacy of the warranty accrual. The product warranty accrual was \$1.0 million at both September 30, 2017 and 2016.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**INTEREST RATE RISK**

Our exposure to interest rate risk relates primarily to our investment portfolio. We do not use derivative financial instruments to hedge against interest rate risk.

FOREIGN CURRENCY RISK

We are exposed to foreign currency transaction risk associated with certain sales being denominated in Euros, British Pounds, Japanese Yen or Canadian Dollar and foreign currency translation risk as the financial position and operating results of our foreign subsidiaries are translated into U.S. Dollars for consolidation. We manage our net asset or net liability position for non-functional currency accounts, primarily the U.S. dollar accounts in our foreign locations to reduce our foreign currency risk. We have not implemented a formal hedging strategy.

The table below compares the average monthly exchange rates of the Euro, British Pound, Japanese Yen and Canadian Dollar:

	Fiscal year ended September 30,		% increase (decrease)
	2017	2016	
Euro	1.1047	1.1112	(0.6)%
British Pound	1.2673	1.4261	(11.1)%
Japanese Yen	0.0090	0.0090	— %
Canadian Dollar	0.7615	0.7552	0.8 %

A 10.0% change from the 2017 average exchange rate for the Euro, British Pound, Yen and Canadian Dollar to the U.S. Dollar would have resulted in a 1.0% increase or decrease in fiscal 2017 annual revenue and a 2.2% increase or decrease in stockholders' equity at September 30, 2017. The above analysis does not take into consideration any pricing adjustments we may make in response to changes in the exchange rate.

CREDIT RISK

We have some exposure to credit risk related to our accounts receivable portfolio. Exposure to credit risk is controlled through regular monitoring of customer financial status, credit limits and collaboration with sales management on customer contacts to facilitate payment.

Investments are made in accordance with our investment policy and consist of certificates of deposit, money market funds, corporate bonds and government municipal bonds. We may have some credit exposure related to the fair value of our securities, which could change based on changes in market conditions. If market conditions deteriorate or, if these securities experience credit rating downgrades, we may incur impairment charges for securities in our investment portfolio.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Digi International Inc.

We have audited the accompanying consolidated balance sheet of Digi International Inc. (a Delaware corporation) and subsidiaries (the "Company") as of September 30, 2017, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended. Our audit of the basic consolidated financial statements included the financial statement schedule listed in the index appearing under Item 15. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Digi International Inc. and subsidiaries as of September 30, 2017, and the results of their operations and their cash flows for year then ended in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of September 30, 2017, based on criteria established in the 2013 *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated November 22, 2017 expressed an unqualified opinion thereon.

/s/ GRANT THORNTON LLP
Minneapolis, Minnesota
November 22, 2017

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Digi International Inc.

In our opinion, the consolidated balance sheet as of September 30, 2016 and the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for each of the two years in the period ended September 30, 2016 present fairly, in all material respects, the financial position of Digi International Inc. and its subsidiaries as of September 30, 2016, and the results of their operations and their cash flows for each of the two years in the period ended September 30, 2016, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule for each of the two years in the period ended September 30, 2016 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP

Minneapolis, Minnesota

December 13, 2016, except for the change in composition of reportable segments discussed in Note 5 to the consolidated financial statements, as to which the date is November 22, 2017

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business Description

We are a leading global provider of business and mission-critical and Internet of Things (IoT) connectivity products and services. We help our customers create next-generation connected products and deploy and manage critical communications infrastructures in demanding environments with high levels of security and reliability. As of the fiscal quarter ended June 30, 2017, we determined that we have two reportable operating segments for purposes of ASC 280-10-50 "Segments Reporting": (i) machine-to-machine (M2M), and (ii) Solutions.

Our M2M segment consists primarily of distinct communications products and communication product development services. Among other things, these products and services help our customers create next generation connected products and deploy and manage critical communications infrastructures in demanding environments with high levels of security and reliability. We create secure, easy to implement embedded solutions and services to help customers build IoT connectivity. We also deploy ready to use, complete box solutions to connect remote equipment. We also offer dedicated professional services for the design of specialized wireless communications products for customers. Finally, through this segment we offer managed cloud services that enable customers to capture and manage data from devices they connect to networks. The products and services of this segment are used by a wide range of businesses and institutions.

Our Solutions segment offers wireless temperature and other environmental condition monitoring services as well as employee task management services. These products and services are provided to food service, transportation, education, healthcare and pharma, and industrial markets which are marketed as Digi Smart Solutions™.

Discontinued Operations

On October 23, 2015, we sold all of the outstanding stock of our wholly owned subsidiary, Etherios Inc. (Etherios) to West Monroe Partners, LLC. Because the sale of Etherios represented a strategic shift that will have a major effect on our operations and financial results, we have classified our Etherios business as discontinued operations, which requires retrospective application to financial information for all periods presented. Since the cost of segregating the consolidated statement of cash flows outweighed the benefits, we elected not to segregate our consolidated statement of cash flows as the material items in the operating and investing sections are disclosed in Note 3 to our Consolidated Financial Statements.

Principles of Consolidation

The consolidated financial statements include our accounts and the accounts of our wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Reclassifications

Certain prior year amounts have been reclassified to conform to our fiscal 2017 presentation. On the Consolidated Balance Sheet for the period ended September 30, 2016, unearned revenue has been reclassified from other current liabilities to its own respective line item. We have reclassified current income taxes payable to other current liabilities.

Beginning in the third fiscal quarter of 2017, we renamed our service revenue and cost of sales to be more descriptive to services and solutions revenue and services and solutions cost of sales. Beginning with this annual report on Form 10-K, we will also report the amortization within cost of sales on its own respective line item. On the Consolidated Statement of Operations for the year ended September 30, 2016 and 2015, we have reclassified the cost of sales sections to conform to this presentation. Total revenue and cost of sales remain unchanged.

These reclassifications had no impact on our consolidated net sales or our consolidated net income.

Cash Equivalents

Cash equivalents consist of money market accounts and other highly liquid investments purchased with an original maturity of three months or less. The carrying amounts approximate fair value due to the short maturities of these investments. We maintain our cash and cash equivalents in bank accounts which, at times, may exceed federally insured limits. We have not experience any losses in such accounts.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)***Marketable Securities*

Marketable securities consist of certificates of deposit, commercial paper, corporate bonds and government municipal bonds. All marketable securities are accounted for as available-for-sale and are carried at fair value on our consolidated balance sheets with unrealized gains and losses recorded in accumulated other comprehensive loss within stockholders' equity. In order to estimate the fair value for each security in our investment portfolio, we obtain quoted market prices and trading activity for each security where available. We obtain relevant information from our investment advisor and, if warranted, also may review the financial solvency of certain security issuers.

We regularly monitor and evaluate the value of our marketable securities. When assessing marketable securities for other-than-temporary declines in value, we consider several factors. These factors include: how significant the decline in value is as a percentage of the original cost, how long the market value of the investment has been less than its original cost, the underlying factors contributing to a decline in the prices of securities in a single asset class, the performance of the issuer's stock price in relation to the stock price of its competitors within the industry, expected market volatility, analyst recommendations, the views of external investment managers, any news or financial information that has been released specific to the investee and the outlook for the overall industry in which the issuer operates. If events and circumstances indicate that a decline in the value of a security has occurred and is other-than-temporary, we would record a charge to other (expense) income.

Accounts Receivable

Accounts receivable are stated at the amount we expect to collect, which is net of an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. The following factors are considered when determining the collectability of specific customer accounts: customer creditworthiness, past transaction history with the customer, and changes in customer payment terms or practices. In addition, overall historical collection experience, current economic industry trends, and a review of the current status of trade accounts receivable are considered when determining the required allowance for doubtful accounts. Based on our assessment, we provide for estimated uncollectible amounts through a charge to earnings and a credit to our allowance for doubtful accounts. Balances that remain outstanding after we have used reasonable collection efforts are written off through a charge to the allowance for doubtful accounts and a credit to accounts receivable.

Inventories

Inventories are stated at the lower of cost or fair market value, with cost determined using the first-in, first-out method. Appropriate consideration is given to deterioration, obsolescence and other factors in evaluating fair market value.

Property, Equipment and Improvements, Net

Property, equipment and improvements are carried at cost, net of accumulated depreciation. Depreciation is provided by charges to operations using the straight-line method over the estimated asset useful lives. Furniture and fixtures, purchased software and other equipment are depreciated over a period of three to seven years. Building improvements and buildings are depreciated over ten and thirty-nine years, respectively.

Expenditures for maintenance and repairs are charged to operations as incurred, while major renewals and betterments are capitalized. The assets and related accumulated depreciation accounts are adjusted for asset retirements and disposals with the resulting gain or loss included in operations.

Identifiable Intangible Assets

Purchased proven technology, license agreements, covenants not to compete and other identifiable intangible assets are recorded at fair value when acquired in a business acquisition, or at cost when not purchased in a business acquisition. All other identifiable intangible assets are amortized on either a straight-line basis over their estimated useful lives of three to thirteen years or based on the pattern in which the asset is consumed. Useful lives for identifiable intangible assets are estimated at the time of acquisition based on the periods of time from which we expect to derive benefits from the identifiable intangible assets. Amortization of purchased and core technology is included in cost of sales in the Consolidated Statements of Operations. Amortization of all other acquired identifiable intangible assets is charged to operating expenses as a component of general and administrative expense.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

Identifiable intangible assets are reviewed for impairment annually or whenever events or circumstances indicate that undiscounted expected future cash flows are not sufficient to recover the carrying value amount. We measure impairment loss by utilizing an undiscounted cash flow valuation technique using fair values indicated by the income approach. Impairment losses, if any, would be recorded in the period the impairment is identified. There were no material impairments identified in fiscal 2017, 2016 or 2015.

Goodwill

Goodwill represents the excess of cost over the fair value of identifiable assets acquired. Goodwill is tested for impairment on an annual basis as of June 30, or more frequently if events or circumstances occur which could indicate impairment. The calculation of goodwill impairment requires us to make assumptions about the fair value of our reporting unit(s), which historically has been approximated by using our market capitalization plus a control premium for our reporting unit(s). Control premium assumptions require judgment and actual results may differ from assumed or estimated amounts.

As of the third quarter of fiscal 2017, we determined that we have two reportable operating segments, our Solutions segment and our M2M segment (see Note 5 to the Condensed Consolidated Financial Statements). As a result, we concluded that the Solutions segment and the M2M segment constitute separate reporting units for purposes of the ASC 350-20-35 "Goodwill Measurement of Impairment" assessment and both units were tested individually for impairment.

Our test for potential goodwill impairment is a two-step approach. First, we estimate the fair values for each reporting unit by comparing the fair value to the carrying value. If the carrying value of the reporting unit exceeds its estimated fair value, then we conduct the second step, which requires us to measure the amount of the impairment loss. The impairment loss, if any, is calculated by comparing the implied fair value of the goodwill to its carrying amount. To calculate the implied fair value of goodwill, the fair value of the reporting unit's assets and liabilities, excluding goodwill, is estimated. The excess of the fair value of the reporting unit over the amount assigned to its assets and liabilities, excluding goodwill, is the implied fair value of the reporting unit's goodwill.

At June 30, 2017, we had a total of \$98.6 million of goodwill on our Condensed Consolidated Balance Sheet for the M2M reporting unit and the implied fair value of this reporting unit exceeded its carrying value by approximately 7%. At June 30, 2017, we had a total of \$32.5 million of goodwill on our Condensed Consolidated Balance Sheet for the Solutions reporting unit and the implied fair value of this reporting unit exceeded its carrying value by approximately 8%. Based on that data, we concluded that no impairment was indicated for either reporting unit and we were not required to complete the second step of the goodwill impairment analysis. No goodwill impairment charges were recorded. During the fourth quarter of fiscal 2017, we assessed various qualitative factors to determine whether or not an additional goodwill impairment assessment was required as of September 30, 2017, and we concluded that no additional impairment assessment was required.

Implied fair values, for both reporting units were each calculated on a standalone basis using a weighted combination of the income approach and market approach.

The income approach indicates the fair value of a business based on the value of the cash flows the business or asset can be expected to generate in the future. A commonly used variation of the income approach used to value a business is the discounted cash flow (DCF) method. The DCF method is a valuation technique in which the value of a business is estimated on the earnings capacity, or available cash flow, of that business. Earnings capacity represents the earnings available for distribution to capital holders after consideration of the reinvestment required for future growth. Significant judgment is required to estimate the amount and timing of future cash flows for each reporting unit and the relative risk of achieving those cash flows.

The market approach indicates the fair value of a business or asset based on a comparison of the business or asset to comparable publicly traded companies or assets and transactions in its industry as well as prior company or asset transactions. This approach can be estimated through the guideline company method. This method indicates fair value of a business by comparing it to publicly traded companies in similar lines of business. After identifying and selecting the guideline companies, we make judgments about the comparability of the companies based on size, growth rates, profitability, risk, and return on investment in order to estimate market multiples. These multiples are then applied to the reporting units to estimate a fair value.

In addition, the implied fair values of each reporting unit were added together to get an indicated value of total equity to which a range of indicated value of total equity was derived. This range was compared to the total market capitalization of

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

\$269.4 million as of June 30, 2017, which implied a range of control premiums of 16.6% to 24.4%. This range of control premiums falls below the control premiums observed in the last five years in the communications equipment industry. As a result, the market capitalization reconciliation analysis proved support for the reasonableness of the fair values estimated for each individual reporting unit.

Should the facts and circumstances surrounding our assumptions change, the first step of our goodwill impairment analysis may fail. Assumptions and estimates to determine fair values are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. For example, if our future operating results do not meet current forecasts or if we experience a sustained decline in our market capitalization that is determined to be indicated of a reduction in fair value of one or more of our reporting units, we may be required to record future impairment charges for goodwill. An impairment could have a material effect on our consolidated balance sheet and results of operations. We have had no goodwill impairment losses since the adoption of Accounting Standards Codification (ASC) 350, Intangibles-Goodwill and Others, in fiscal 2003.

Contingent Consideration

We measure our contingent consideration liabilities recognized in connection with business combinations at fair value on a recurring basis using significant unobservable inputs classified within Level 3 of the fair value hierarchy as defined in ASC 820 "Fair Value Measurement". We used a probability-weighted discounted cash flow approach as a valuation technique to determine the fair value of the contingent consideration on the acquisition date. At each subsequent reporting period, the fair value is re-measured with the change in fair value recognized in general and administrative expense and interest expense in our Condensed Consolidated Statements of Operations. Amounts, if any, paid to the seller in excess of the amount recorded on the acquisition date will be classified as cash flows used in operating activities. Payments to the seller not exceeding the acquisition-date fair value of the contingent consideration will be classified as cash flows used in financing activities.

Warranties

In general, we warrant our hardware products to be free from defects in material and workmanship under normal use and service. The warranty periods generally range from one to five years. We typically have the option to either repair or replace hardware products we deem defective with regard to material or workmanship. Estimated warranty costs are accrued in the period that the related revenue is recognized based upon an estimated average per unit repair or replacement cost applied to the estimated number of units under warranty. These estimates are based upon historical warranty incidents and are evaluated on an ongoing basis to ensure the adequacy of the warranty accrual.

Treasury Stock

We record treasury stock at cost. Treasury stock includes shares purchased from employees for tax withholding purposes related to vesting of restricted stock awards.

Revenue Recognition

We recognize revenue in accordance with authoritative guidance issued by Financial Accounting Standards Board (FASB) related to revenue recognition.

Hardware product revenue as a percentage of total revenue was 91.7%, 96.6% and 95.9% in fiscal 2017, 2016 and 2015, respectively. We recognize hardware product revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, collectability is reasonably assured and there are no post-delivery obligations, other than warranty. Under these criteria, product revenue generally is recognized upon shipment of product to customers.

Sales to authorized domestic and foreign distributors and Direct / OEMs are made with certain rights of return and price adjustment provisions. Estimated reserves for future returns and pricing adjustments are established by us based on an analysis of historical patterns of returns and price adjustments as well as an analysis of authorized returns compared to received returns and distribution sales for the current period. Estimated reserves for future returns and price adjustments are charged against revenue in the same period as the corresponding revenue is recorded.

Service revenue as a percentage of total revenue represented 8.3%, 3.4% and 4.1% in fiscal 2017, 2016 and 2015, respectively. Our service revenue is derived primarily from our Digi Wireless Design Services and our Digi Smart Solutions™. Our Digi Smart Solutions™ revenue includes subscription revenue, support and equipment. Our equipment and implementation fees are

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

recorded as a sale up-front due to these items having stand-alone value to the customer because the customer can utilize our equipment with other monitoring services or use our monitoring services with hardware purchased from other vendors. Our installation charges are recorded when the product is installed. Our subscription revenue is recorded on a monthly basis. These subscriptions are generally for one year, but can be as long as three years, and may contain an evergreen renewal provision. Generally, our subscription renewal charges per month are the same as the original contract term. We also have some service revenue that is derived from our Digi Remote Manager[®], which is a platform-as-a-service (PaaS) offering in which customers pay for services consumed in terms of devices being managed and monitored, or as a monthly service fee for access to information. In addition, we recognize small amounts of revenue from our support services which is recognized over the life of the contract, and training as the services are performed. We recognize service revenue from our Digi Wireless Design Services, Digi Smart Solutions[™] and Digi Remote Manager[®] based upon performance, including final product delivery and customer acceptance.

Research and Development

Research and development costs are expensed when incurred. Research and development costs include compensation, allocation of corporate costs, depreciation, utilities, professional services and prototypes. Software development costs are expensed as incurred until the point that technological feasibility and proven marketability of the product are established. To date, the time period between the establishment of technological feasibility and completion of software development has been short, and no significant development costs have been incurred during that period. Accordingly, we have not capitalized any software development costs to date.

Income Taxes

Deferred income taxes are recognized for the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year end based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Income tax expense is equal to the tax payable for the period and the change during the period in deferred tax assets and liabilities and also changes in income tax reserves.

Stock-Based Compensation

Stock-based compensation expense represents the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. This cost must be recognized over the period during which an employee is required to provide the service (usually the vesting period).

Foreign Currency Translation

Financial position and results of operations of our international subsidiaries are measured using local currencies as the functional currency, except for our Singapore location which uses the U.S. Dollar as its functional currency. Assets and liabilities of these operations are translated at the exchange rates in effect at the end of each reporting period. For our larger international subsidiaries, statements of operations accounts are translated at the daily rate. For all other international subsidiaries, our statements of operations accounts are translated at the weighted average rates of exchange prevailing during each reporting period. Translation adjustments arising from the use of differing currency exchange rates from period to period are included in accumulated other comprehensive loss in stockholders' equity. Gains and losses on foreign currency exchange transactions, as well as translation gains or losses on transactions denominated in currencies other than an entity's functional currency, are reflected in the statement of operations. During fiscal 2017, 2016 and 2015, there were net transaction gains (losses) of \$0.1 million, \$(0.7) million and \$0.6 million, respectively, that were recorded in other income (expense), net. We manage our net asset or net liability position for U.S. dollar accounts in our foreign locations to reduce our foreign currency risk. We have not implemented a formal hedging strategy.

Use of Estimates and Risks and Uncertainties

The preparation of consolidated financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the reporting period. Actual results could differ from those estimates. Estimates that could significantly affect our results of operations or financial condition involve the assignment of fair values upon acquisition of goodwill and other intangible assets and testing for impairment; the determination of our allowance for doubtful accounts and reserve for future

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

returns and pricing adjustments; the estimation of our inventory obsolescence, warranty reserve, income tax reserves, contingent consideration and other contingencies.

Comprehensive Income

Our comprehensive income is comprised of net income, foreign currency translation adjustments and unrealized gains and losses on available-for-sale marketable securities, which are charged or credited to the accumulated other comprehensive loss account in stockholders' equity.

Net Income Per Common Share

Basic net income per common share is calculated based on the weighted average number of common shares outstanding during the period. Diluted net income per common share is computed by dividing net income by the weighted average number of common and potentially dilutive common shares outstanding during the period. Potentially dilutive common shares of our stock result from dilutive common stock options and restricted stock units. We use the treasury stock method to calculate the weighted-average shares used in the diluted earnings per share computation. Under the treasury stock method, the proceeds from exercise of an option, the amount of compensation cost, if any, for future service that we have not yet recognized, and the amount of estimated tax benefits that would be recorded in paid-in capital, if any, when the option is exercised are assumed to be used to repurchase shares in the current period.

The following table is a reconciliation of the numerators and denominators in the net income per common share calculations (in thousands, except per common share data):

	Fiscal years ended September 30,		
	2017	2016	2015
Numerator:			
Income from continuing operations	\$ 9,366	\$ 13,478	\$ 9,433
Income (loss) from discontinued operations, after income taxes	\$ —	\$ 3,230	\$ (2,845)
Net income	<u>\$ 9,366</u>	<u>\$ 16,708</u>	<u>\$ 6,588</u>
Denominator:			
Denominator for basic net income per common share — weighted average shares outstanding	26,432	25,760	24,645
Effect of dilutive securities:			
Stock options and restricted stock units	667	551	582
Denominator for diluted net income per common share — adjusted weighted average shares	<u>27,099</u>	<u>26,311</u>	<u>25,227</u>
Basic net income (loss) per common share:			
Continuing operations	\$ 0.35	\$ 0.52	\$ 0.38
Discontinued operations	\$ —	\$ 0.13	\$ (0.12)
Net income (1)	<u>\$ 0.35</u>	<u>\$ 0.65</u>	<u>\$ 0.27</u>
Diluted net income (loss) per common share:			
Continuing operations	\$ 0.35	\$ 0.51	\$ 0.37
Discontinued operations	\$ —	\$ 0.12	\$ (0.11)
Net income (1)	<u>\$ 0.35</u>	<u>\$ 0.64</u>	<u>\$ 0.26</u>

(1) Earnings per share presented are calculated by line item and may not add due to the use of rounded amounts.

Because their effect would be anti-dilutive at period end, certain potentially dilutive shares related to stock options to purchase common shares were excluded in the above computation of diluted earnings per share because the options' exercise prices were greater than the average market price of our common shares. At September 30, 2017, 2016 and 2015, such excluded stock options were 1,142,322, 1,519,691 and 3,016,911, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)***Recent Accounting Developments**Adopted*

In April 2015, FASB issued Accounting Standards Update (ASU) 2015-05, "Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40) - Customer's Accounting for Fees Paid in a Cloud Computing Arrangement." The new standard provides guidance to customers about whether a cloud computing arrangement includes a software license. If the arrangement does include a software license, the software license element of the arrangement should be accounted for in the same manner as the acquisition of other software licenses. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2015, with early adoption permitted. We adopted this guidance prospectively beginning with our fiscal quarter ended December 31, 2016. The adoption of this standard did not have a material impact on our consolidated financial statements.

In August 2014, FASB issued ASU 2014-15, "Presentation of Financial Statements - Going Concern." This guidance requires management to evaluate whether there is substantial doubt about a company's ability to continue as a going concern and to provide related footnote disclosures. These amendments are effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. We adopted this guidance for our fiscal year ended September 30, 2017. The adoption of this standard did not have a material impact on our consolidated financial statements.

Not Yet Adopted

In May 2017, the Financial Accounting Standards Board (FASB) issued ASU 2017-09, "Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting." ASU 2017-09 provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. The amendments in this update should be applied prospectively to an award modified on or after the adoption date. This ASU is effective for annual periods and interim periods within those annual periods beginning after December 15, 2017, which for us is the first quarter ending December 31, 2018. Early adoption is permitted. We do not expect the adoption of this guidance to have a material impact to our consolidated financial statements.

In March 2017, FASB issued ASU 2017-08, "Receivables-Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities." The amendments in this update shorten the amortization period for certain callable debt securities that are held at a premium. The amendments require the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount, which would be amortized to maturity. This ASU is effective for fiscal years and interim periods within those fiscal years, beginning after December 15, 2018, which for us is the first quarter ending December 31, 2019. Early adoption is permitted. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In January 2017, FASB issued ASU 2017-04, "Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment." ASU 2017-04 eliminates the second step in the goodwill impairment test which requires an entity to determine the implied fair value of the reporting unit's goodwill. Instead, an entity should perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying value and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit. The standard, which should be applied prospectively, is effective for fiscal years beginning after December 15, 2019, which for us is our fiscal year ending September 30, 2021. Early adoption is permitted. We are currently evaluating the impact of the adoption of ASU 2017-04 on our consolidated financial statements.

In August 2016, FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230), Classification of Certain Cash Receipts and Cash Payments." The amendments in this update provide guidance on eight specific cash flow issues, thereby reducing the diversity in practice in how certain transaction are classified in the statement of cash flows. This ASU is effective for annual periods and interim periods for those annual periods beginning after December 15, 2017, which for us is the first quarter ending December 31, 2018. Early adoption is permitted. We are currently evaluating the impact of the adoption of ASU 2016-15 on our consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

In June 2016, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments." The amendments in this update replace the incurred loss impairment methodology in current U.S. GAAP with a methodology that reflects expected credit losses. This update is intended to provide financial statement users with more decision-useful information about the expected credit losses. This ASU is effective for annual periods and interim periods for those annual periods beginning after December 15, 2019, which for us is the first quarter ending December 31, 2020. Entities may early adopt beginning after December 15, 2018. We are currently evaluating the impact of the adoption of ASU 2016-13 on our consolidated financial statements.

In March 2016, FASB issued ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting." This update includes provisions intended to simplify various aspects related to how share-based payments are accounted for and presented in the financial statements. This ASU is effective for annual periods and interim periods within those annual periods beginning after December 15, 2016, which for us is the first fiscal quarter ending December 31, 2017. Early adoption is permitted. We adopted ASU 2016-09 on October 1, 2017. Upon adoption, there was no material impact on our consolidated financial statements. Prospectively, beginning October 1, 2017, excess tax benefits and tax deficiencies will be reflected as income tax benefit or expense in our Consolidated Statement of Operations and could result in a material impact. The extent of the excess tax benefits or tax deficiencies are subject to variation in our stock price and the timing of restricted stock unit (RSU) vestings and employee stock option exercises.

In February, 2016, FASB issued ASU 2016-02, "Leases (Topic 842)", which amends the existing guidance to require lessees to recognize lease assets and lease liabilities from operating leases on the balance sheet. This ASU is effective using the modified retrospective approach for annual periods and interim periods within those annual periods beginning after December 15, 2018, which for us is the first fiscal quarter ending December 31, 2019. Early adoption is permitted. We are currently evaluating the impact of the adoption of ASU 2016-02 on our consolidated financial statements.

In January 2016, FASB issued ASU 2016-01, "Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Financial Liabilities." ASU 2016-01 will require equity investments in unconsolidated entities (other than those accounted for using the equity method of accounting) to be measured at fair value with changes in fair value recognized in net income. The amendments in this update will also simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment, eliminate the requirement for public business entities to disclose the method and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet and require these entities to use the exit price notion when measuring fair value of financial instruments for disclosure purposes. This ASU would also change the presentation and disclosure requirements for financial instruments. In addition, this ASU clarifies the guidance related to valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The amendments in this ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years, which for us is the first fiscal quarter ending December 31, 2018. Early adoption is permitted for financial statements of fiscal years and interim periods that have not been issued. We are currently evaluating the impact of the adoption of ASU 2016-01.

In July 2015, FASB issued ASU 2015-11, "Simplifying the Measurement of Inventory." This provision would require inventory that was previously recorded using first-in, first-out (FIFO) to be recorded at lower of cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. This guidance is effective for fiscal years beginning after December 15, 2016 and interim periods within those years. We adopted this guidance beginning with our fiscal quarter ending December 31, 2017. The amendments in this guidance should be applied prospectively with earlier application permitted as of the beginning of an interim or annual period. We do not expect the adoption of ASU 2015-11 to have a material impact on our consolidated financial statements.

In May 2014, FASB issued ASU 2014-09, "Revenue from Contracts with Customers." This guidance provides a five-step analysis in determining when and how revenue is recognized so that an entity will recognize revenue when it transfers promised goods or services to customers in an amount that reflects what it expects in exchange for the goods and services. It also requires more detailed disclosures to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. In August 2015, the FASB issued ASU 2015-14 "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date" which approved a one-year deferral of the effective date of ASU 2014-09. As a result of this deferral, ASU 2014-09 is effective for our fiscal year ending September 30, 2019, including interim periods within that reporting period. In addition, the FASB issued ASU 2016-08, ASU 2016-10 and ASU 2016-12 in March 2016, April 2016 and May 2016, respectively, to provide interpretive clarifications on the new guidance in ASC Topic 606. We are currently working through an adoption plan and have identified our revenue streams and completed

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

a preliminary analysis of how we currently account for revenue transactions compared to the revenue accounting required under the new standard. We intend to complete our adoption plan by December 31, 2017. This plan includes a review of transactions supporting each revenue stream to determine the impact of accounting treatment under ASC 606, evaluation of the method of adoption, and completing a rollout plan for implementation of the new standard with affected functions in our organization. Because of the nature of the work that remains, at this time we are unable to reasonably estimate the impact of adoption on our consolidated financial statements. We plan to adopt the new guidance beginning with our fiscal quarter ending December 31, 2018.

2. ACQUISITIONS

On May 4, 2017, we announced the rebranding of our Digi Cold Chain Solutions to Digi Smart Solutions™.

Acquisition of SMART Temps, LLC

On January 9, 2017, we purchased all of the outstanding interests of SMART Temps, LLC (SMART Temps), an Indiana-based provider of real-time temperature management for pharmacies, education, and hospital settings as well as real-time temperature management for blood bank, laboratory environments, restaurants, and grocery. We believe this is a complementary acquisition for us as the acquired technology will continue to be supported to further enhance our portfolio of products for the Solutions segment (see Note 5 to our Consolidated Financial Statements).

The terms of the acquisition included an upfront cash payment together with future earn-out payments. Cash of \$28.8 million (excluding cash acquired of \$0.5 million) was paid at time of closing. The earn-out payments are scheduled to be paid after December 31, 2017 which is the end of the earn-out period. The cumulative amount of these earn-out payments will not exceed \$7.2 million. We determined that the earn-out would be considered as part of the purchase price consideration because there was no continuing employment requirements associated with the earn-out. The fair value of this contingent consideration was \$10,000 at the date of acquisition and zero at September 30, 2017 (see Note 8 to the Consolidated Financial Statements).

The purchase price was allocated to the estimated fair value of assets acquired and liabilities assumed. The final purchase price allocation resulted in the recognition of \$18.8 million of goodwill. For tax purposes, this acquisition is treated as an asset acquisition, therefore the goodwill is deductible. We believe that the acquisition resulted in the recognition of goodwill because this is a complementary acquisition for us and will provide a source of recurring revenue in a new vertically focused Solutions segment.

The SMART Temps acquisition has been accounted for using the acquisition method of accounting which requires, among other things, that assets acquired and liabilities assumed pursuant to the purchase agreement be recognized at fair value as of the acquisition date.

The following table summarizes the final values of SMART Temps assets acquired and liabilities assumed as of the acquisition date (in thousands):

Cash	\$	28,754
Fair value of contingent consideration on acquired business		10
Working capital adjustment		124
Total purchase price consideration	\$	<u>28,888</u>
Fair value of net tangible assets acquired	\$	761
Fair value of identifiable intangible assets acquired:		
Purchased and core technology		4,000
Customer relationships		4,000
Trade name and trademarks		711
Non-compete agreements		600
Goodwill		18,816
Total	\$	<u>28,888</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. ACQUISITIONS (CONTINUED)

Operating results for SMART Temps from January 9, 2017 forward are included in our Consolidated Statements of Operations. The Consolidated Balance Sheet as of September 30, 2017 reflects the final allocation of the purchase price to the assets acquired and liabilities assumed based on their estimated fair values at the date of acquisition.

As of the date of acquisition, the weighted average useful life for all the identifiable intangibles listed above was 5.9 years. For purposes of determining fair value, the purchased and core technology identified above is assumed to have a useful life of five years, the customer relationships are assumed to have useful lives of seven years, the trade name and trademarks are assumed to have useful lives of five years and the non-compete agreements are assumed to have useful lives of five years. Useful lives for identifiable intangible assets are estimated at the time of acquisition based on the periods of time from which we expect to derive benefits from the identifiable intangible assets.

The amounts of revenue and net loss included in the Consolidated Statements of Operations from the acquisition date of January 9, 2017 were \$5.5 million and \$(1.2) million, respectively. Costs directly related to the acquisition, including legal, accounting and valuation fees of approximately \$0.8 million have been charged directly to operations and are included in general and administrative expense in our Consolidated Statements of Operations.

The following consolidated pro forma information is as if the acquisition had occurred on October 1, 2015 (in thousands):

	Fiscal year ended September 30,	
	2017	2016
Revenue	\$ 182,568	\$ 207,494
Income from continuing operations	\$ 8,675	\$ 11,370
Net income	\$ 8,675	\$ 14,600

Pro forma income from continuing operations and net income were both adjusted to exclude interest expense related to debt that was paid off prior to acquisition, adjust amortization to the fair value of the intangibles acquired and remove any costs that SMART Temps incurred associated with the sale transaction.

Acquisition of FreshTemp, LLC

On November 1, 2016, we purchased all of the outstanding interests of FreshTemp, LLC (FreshTemp), a Pittsburgh-based provider of temperature monitoring and automated task management solutions for the food industry. We believe this is a complementary acquisition for us as the acquired technology will continue to be supported to create an advanced portfolio of products for the Solutions segment.

The terms of the acquisition included an upfront cash payment together with future earn-out payments and a holdback amount. Cash of \$1.7 million was paid at time of closing. The earn-out payments are based on revenue related to certain customer contracts entered into by June 30, 2017. The fair value of this contingent consideration was \$1.3 million at the date of acquisition and \$0.4 million at September 30, 2017 (see Note 8 to the Consolidated Financial Statements). The final calculation date will be on June 30, 2018. The cumulative amount of these earn-out payments will not exceed \$2.3 million. We determined that the earn-out would be considered as part of the purchase price consideration as there was no continuing employment requirements associated with the earn-out. Costs directly related to the acquisition, including legal, accounting and valuation fees, of approximately \$60,000 have been charged directly to operations and are included in general and administrative expense in our Condensed Consolidated Statements of Operations.

The purchase price was allocated to the estimated fair value of assets acquired and liabilities assumed. The purchase price allocation resulted in the recognition of \$2.7 million of goodwill. For tax purposes, this acquisition is treated as an asset acquisition, therefore the goodwill is deductible. We believe that the acquisition resulted in the recognition of goodwill because this is a complementary acquisition for us and will provide a source of recurring revenue in a new vertically focused solutions business. The FreshTemp acquisition has been accounted for using the acquisition method of accounting which requires, among other things, that assets acquired and liabilities assumed pursuant to the purchase agreement be recognized at fair value as of the acquisition date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. ACQUISITIONS (CONTINUED)

The following table summarizes the final values of FreshTemp assets acquired and liabilities assumed as of the acquisition date (in thousands):

Cash	\$	1,697
Purchase price payable upon completion of diligence matters		303
Fair value of contingent consideration on acquired business		1,300
Working capital adjustment		(37)
Total purchase price consideration	\$	<u>3,263</u>
Fair value of net tangible assets acquired	\$	(37)
Fair value of identifiable intangible assets acquired:		
Purchased and core technology		400
Customer relationships		250
Goodwill		2,650
Total	\$	<u>3,263</u>

Operating results for FreshTemp from November 2, 2016 forward are included in our Consolidated Statements of Operations. The Consolidated Balance Sheet as of September 30, 2017 reflects the final allocation of the purchase price to the assets acquired and liabilities assumed based on their estimated fair values at the date of acquisition. The identifiable intangibles values and net working capital values were finalized in the second fiscal quarter of 2017.

The weighted average useful life for all the identifiable intangibles listed above is 5.8 years. For purposes of determining fair value, the purchased and core technology identified above is assumed to have a useful life of five years and the customer relationships are assumed to have useful lives of seven years. Useful lives for identifiable intangible assets are estimated at the time of acquisition based on the periods of time from which we expect to derive benefits from the identifiable intangible assets.

Since the FreshTemp acquisition occurred close to the beginning of our fiscal 2017, the pro forma amounts were not materially different from actual amounts. Revenue for the year ended September 30, 2017 related to the FreshTemp acquisition was \$0.5 million. As our operating costs related to the FreshTemp acquisition are integrated into the Company's operating income and related earnings per share, the separate FreshTemp amounts are not determinable for fiscal 2017. Pro forma information for fiscal 2016 was not materially different from actual amounts.

Acquisition of Bluenica Corporation

On October 5, 2015, we purchased all of the outstanding stock of Bluenica Corporation (Bluenica), a company focused on temperature monitoring of perishable goods in the food industry by using wireless sensors, which are installed in grocery and convenience stores, restaurants, and in products during shipment and storage to ensure that quality, freshness and public health requirements are met. This acquisition formed the basis for our Solutions segment.

The terms of the acquisition included an upfront cash payment together with earn-out payments. Cash of \$2.9 million was paid at time of closing. The earn-out payments are scheduled to be paid in installments over a four-year period based on revenue achievement of the acquired business. Each of the earn-out payments will be calculated based on the revenue performance of the Solutions segment for each respective earn-out period. The cumulative amount of these earn-out payments will not exceed \$11.6 million. An additional payment, not to exceed \$3.5 million, may also be due depending on revenue performance.

The fair value of this contingent consideration was \$10.4 million at the date of acquisition and \$6.0 million at September 30, 2017 (see Note 8 to the Consolidated Financial Statements). We determined that the earn-out would be considered as part of the purchase price consideration as there was no continuing employment requirements associated with the earn-out.

The purchase price was allocated to the estimated fair value of assets acquired and liabilities assumed. The purchase price allocation resulted in the recognition of \$11.0 million of goodwill. We believe that the acquisition resulted in the recognition of goodwill because this is a complementary acquisition for us and will provide a source of recurring revenue in a new vertically focused solutions business. Operating results for Bluenica are included in our Consolidated Statements of Operations from October 6, 2015.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

3. DISCONTINUED OPERATIONS

On October 23, 2015, we sold all the outstanding stock of our wholly owned subsidiary, Etherios to West Monroe Partners, LLC. We sold Etherios as part of a strategy to focus on providing highly reliable machine connectivity solutions for business and mission-critical application environments. Etherios was included in our single operating segment prior to fiscal 2017. The terms of the sale agreement provide that West Monroe Partners LLC will pay us \$3.0 million on October 23, 2016 and \$2.0 million on October 23, 2017. The present value of these amounts was included within the total fair value of consideration received. These receivable amounts are unsecured and non-interest bearing. We received \$3.0 million in October 2016. The carrying value of the remaining receivable of \$2.0 million presented on our Condensed Consolidated Balance Sheet at September 30, 2017 approximates its fair value, which was determined using Level 3 cash flow fair value measurement techniques. We received the second installment of \$2.0 million in October 2017.

Goodwill was included in the net assets of Etherios based on the relative fair value of Etherios compared to the fair value of the Company, as the Company consisted of a single reporting unit for goodwill impairment testing purposes at the time of disposal.

As a condition to the sale agreement, we retained the operating leases in the Dallas and Chicago locations. Digi ceased using these facilities in October 2015 and has sublet the Dallas location to West Monroe Partners, LLC through December 31, 2018. In January 2017, we signed an early-termination agreement along with an immaterial payment to exit our Chicago lease. Also in connection with the sale, we assigned our San Francisco lease to West Monroe Partners, LLC.

Income (loss) from discontinued operations, after income taxes, as presented in the Consolidated Statements of Operations for the twelve months ended September 30, 2016 and 2015 is as follows (in thousands):

	Fiscal year ended September 30,	
	2016	2015
Service revenue	\$ 891	\$ 9,011
Cost of service	713	8,101
Gross profit	178	910
Operating expenses:		
Sales and marketing	148	1,970
Research and development	103	2,098
General and administrative	43	1,208
Restructuring	—	106
Total operating expenses	294	5,382
Loss from discontinued operations, before income taxes	(116)	(4,472)
Gain on sale of discontinued operations, before income taxes	2,870	—
Income (loss) from discontinued operations, before income taxes	2,754	(4,472)
Income tax benefit on discontinued operations	(476)	(1,627)
Income (loss) from discontinued operations, after income taxes	\$ 3,230	\$ (2,845)

Income tax benefit on discontinued operations for the twelve months ended September 30, 2016 was \$0.5 million, which primarily represented income tax benefits for deductible transaction costs, partially offset by a tax expense for equity awards for which we will not receive a tax deduction. For tax purposes, this transaction resulted in a capital loss, as the tax basis of the Etherios stock was higher than the book basis of the assets that were sold. Since we do not expect to be able to utilize this capital loss in the five year carryforward period, a deferred tax asset offset by a full valuation allowance was recorded in the third quarter of fiscal 2016 upon completion of the capital loss calculation.

The following table presents amortization, depreciation and purchases of property, equipment, improvements and certain other intangible assets of the discontinued operations related to Etherios (in thousands):

	Fiscal year ended September 30,	
	2016	2015
Amortization of identifiable intangible assets	\$ 30	\$ 483
Depreciation of property, equipment and improvements	\$ —	\$ 29
Purchases of property, equipment, improvements and certain other intangible assets	\$ —	\$ (11)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

4. GOODWILL AND OTHER IDENTIFIABLE INTANGIBLE ASSETS, NET

Identifiable Intangible Assets, Net

Amortizable identifiable intangible assets, net as of September 30, 2017 and 2016 were comprised of the following (in thousands):

	September 30, 2017			September 30, 2016		
	Gross carrying amount	Accum. amort.	Net	Gross carrying amount	Accum. amort.	Net
Purchased and core technology	\$ 51,292	\$ (46,304)	\$ 4,988	\$ 46,594	\$ (44,999)	\$ 1,595
License agreements	18	(17)	1	18	(10)	8

Customer relationships	21,914	(16,817)	5,097	17,463	(15,773)	1,690
Non-compete agreements	600	(90)	510	—	—	—
Total	\$ 86,308	\$ (74,508)	\$ 11,800	\$ 75,694	\$ (71,653)	\$ 4,041

Amortization expense is include in our consolidated statement of operations in cost of sales and general and administrative expense. Amortization expense in cost of sales includes amortization for purchased and core technology and certain patents and trademarks. Amortization expense for fiscal years 2017, 2016 and 2015 was as follows (in thousands):

<u>Fiscal year</u>	<u>Total</u>
2017	\$ 2,597
2016	\$ 1,842
2015	\$ 2,427

Estimated amortization expense for the next five years is as follows (in thousands):

<u>Fiscal year</u>	<u>Total</u>
2018	\$ 2,708
2019	\$ 2,341
2020	\$ 1,841
2021	\$ 1,484
2022	\$ 1,215

Goodwill

The changes in the carrying amount of goodwill were (in thousands):

	Fiscal years ended September 30,	
	2017	2016
Beginning balance, October 1	\$ 109,448	\$ 100,183
Acquisitions	21,465	10,985
Foreign currency translation adjustment	1,082	(1,720)
Ending balance, September 30	\$ 131,995	\$ 109,448

5. SEGMENT INFORMATION AND MAJOR CUSTOMERS

As of the fiscal quarter ended June 30, 2017, we determined that we now have two reportable operating segments for purposes of ASC 280-10-50 "Segment Reporting": (1) M2M, and (2) Solutions.

This determination was made by considering both qualitative and quantitative information. The qualitative information considered during the quarter ended June 30, 2017 included, but was not limited to, the following: the nature of the products

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
5. SEGMENT INFORMATION AND MAJOR CUSTOMERS (CONTINUED)

and services and customers differ between the two segments, the Chief Operating Decision Maker (CODM) started reviewing both segments' operating results separately and now makes decisions about the allocation of resources, and discrete financial information is available through operating income (loss) for both segments. During the third quarter of fiscal 2017, the recently acquired Solutions entities financial systems were integrated allowing for the review of discrete financial information for the Solutions segment. In addition, based on current expectations, we now expect the Solutions segment to meet the quantitative thresholds for a separate reporting segment. The financial results of the Solutions entities were previously considered not to meet the quantitative thresholds for a separate reporting segment. Our segments are described below:

M2M

Our M2M segment is composed of the following communications products and development services:

- Cellular routers and gateways;
- Radio frequency (RF) which include our XBee® modules as well as other RF solutions;
- Embedded products include Digi Connect® and Rabbit® embedded systems on module and single board computers;
- Network products, which has the highest concentration of mature products, including console and serial servers and USB connected products;
- Digi Wireless Design Services;
- Digi Remote Manager®; and
- Support services which offers various levels of technical services for development assistance, consulting and training.

Solutions

We have formed the Solutions segment primarily through four acquisitions: the October 2015 acquisition of Bluenica, the November 2016 acquisition of FreshTemp, the January 2017 acquisition of SMART Temps and the October 2017 acquisition of TempAlert, LLC (TempAlert). Because the acquisition of TempAlert was subsequent to September 30, 2017, it's results are not included in our Consolidated Financial Statements (see Note 19 to our Consolidated Financial Statements). Our Solutions segment offers wireless temperature and other environmental condition monitoring services as well as employee task management services. These products and services are provided to food service, transportation, education, healthcare and pharma, and industrial markets and are marketed as Digi Smart Solutions™.

We measure our segment results primarily by reference to revenue and operating income (loss). Solutions revenue includes both product and service revenue. Certain costs incurred at the corporate level are allocated to our segments. These costs include information technology, employee benefits and shared facility services. The information technology and shared facility costs are allocated based on headcount and the employee benefits costs are allocated based on compensation costs.

Summary operating results for each of our segments were as follows (in thousands):

	Fiscal year ended September 30,		
	2017	2016	2015
Revenue			
M2M	\$ 174,237	\$ 202,294	\$ 203,847
Solutions	7,397	711	—

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
5. SEGMENT INFORMATION AND MAJOR CUSTOMERS (CONTINUED)

Total expended for property, plant and equipment was as follows (in thousand):

	Fiscal year ended September 30,		
	2017	2016	2015
M2M	\$ 1,738	\$ 2,641	\$ 4,500
Solutions	35	88	—
Total expended for property, plant and equipment	\$ 1,773	\$ 2,729	\$ 4,500

Total assets for each of our segments were as follows (in thousands):

	As of September 30,	
	2017	2016
M2M	\$ 182,555	\$ 184,917
Solutions	47,644	13,599
Unallocated*	114,990	137,650
Total assets	\$ 345,189	\$ 336,166

*Unallocated consists of cash and cash equivalents, current marketable securities and long-term marketable securities.

Total goodwill for each of our segments were as follows (in thousands):

	As of September 30,	
	2017	2016
M2M	\$ 98,981	\$ 98,496
Solutions	33,014	10,952
Total goodwill	\$ 131,995	\$ 109,448

Net property, equipment and improvements by geographic location were as follows (in thousands):

	As of September 30,	
	2017	2016
United States	\$ 12,648	\$ 13,861
International, primarily Europe	153	180
Total net property, equipment and improvements	\$ 12,801	\$ 14,041

The information in the following table provides total consolidated revenue by the geographic location of the customer (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
North America, primarily United States	\$ 117,749	\$ 131,457	\$ 127,592
Europe, Middle East & Africa	39,403	44,932	47,523
Asia	19,892	20,390	22,907
Latin America	4,590	6,226	5,825
Total revenue	\$ 181,634	\$ 203,005	\$ 203,847

Our U.S. export sales represented 37.1%, 38.7% and 39.4% of revenue for the fiscal years ended September 30, 2017, 2016 and 2015. No single customer exceeded 10% of revenue for any of the periods presented. No single customer exceeded 10% of total accounts receivable at September 30, 2017 and 2016. At September 30, 2015, we had two customers, whose accounts receivable balance represented 11.6% and 10.7% of total accounts receivable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
7. MARKETABLE SECURITIES

Our marketable securities consist of certificates of deposit, commercial paper, corporate bonds and government municipal bonds. We analyze our available-for-sale marketable securities for impairment on an ongoing basis. When we perform this analysis, we consider factors such as the length of time and extent to which the securities have been in an unrealized loss position and the trend of any unrealized losses. We also consider whether an unrealized loss is a temporary loss or an other-than-temporary loss such as: (a) whether we have the intent to sell the security, or (b) whether it is more likely than not that we will be required to sell the security before its anticipated recovery, or (c) permanent impairment due to bankruptcy or insolvency.

In order to estimate the fair value for each security in our investment portfolio, we obtain quoted market prices and trading activity for each security where available. We obtain relevant information from our investment advisor and, if warranted, also may review the financial solvency of certain security issuers. As of September 30, 2017, 25 of our 44 securities that we held were trading below our amortized cost basis. We determined each decline in value to be temporary based upon the above described factors. We expect to realize the fair value of these securities, plus accrued interest, either at the time of maturity or when the security is sold. All of our current holdings are classified as available-for-sale marketable securities and are recorded at fair value on our consolidated balance sheet with the unrealized gains and losses recorded in accumulated other comprehensive loss. All of our current marketable securities are scheduled to mature in less than one year and our non-current marketable securities are scheduled to mature in less than two years. We received proceeds from the sale of our available-for-sale marketable securities of \$87.1 million, \$73.7 million and \$38.0 million for fiscal 2017, 2016 and 2015, respectively.

At September 30, 2017 our marketable securities consisted of (in thousands):

	Amortized Cost (1)	Unrealized Gains	Unrealized Losses	Fair Value (1)
Current marketable securities:				
Corporate bonds	\$ 28,275	\$ —	\$ (20)	\$ 28,255
Certificates of deposit	3,756	4	—	3,760
Current marketable securities	32,031	4	(20)	32,015
Non-current marketable securities:				
Certificates of deposit	4,757	—	(4)	4,753
Total marketable securities	\$ 36,788	\$ 4	\$ (24)	\$ 36,768

(1) Included in amortized cost and fair value is purchased and accrued interest of \$211.

At September 30, 2016 our marketable securities consisted of (in thousands):

	Amortized Cost (1)	Unrealized Gains	Unrealized Losses	Fair Value (1)
Current marketable securities:				
Corporate bonds	\$ 28,801	\$ —	\$ (34)	\$ 28,767
Commercial paper	23,963	—	(20)	23,943
Certificates of deposit	3,755	13	—	3,768
Government municipal bonds	1,904	—	—	1,904
Current marketable securities	58,423	13	(54)	58,382
Non-current marketable securities:				
Certificates of deposit	3,505	36	—	3,541
Total marketable securities	\$ 61,928	\$ 49	\$ (54)	\$ 61,923

(1) Included in amortized cost and fair value is purchased and accrued interest of \$271.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

7. MARKETABLE SECURITIES (CONTINUED)

The following tables show the fair values and gross unrealized losses of our available-for-sale securities that have been in a continuous unrealized loss position deemed to be temporary, aggregated by investment category (in thousands):

Corporate bonds	\$ 24,454	\$ (33)	\$ 4,102	\$ (1)
Commercial paper	23,943	(20)	—	—
Total	\$ 48,397	\$ (53)	\$ 4,102	\$ (1)

8. FAIR VALUE MEASUREMENTS

Fair value is defined as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. This standard also establishes a hierarchy for inputs used in measuring fair value. This standard maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability based on market data obtained from independent sources. Unobservable inputs are inputs that reflect our assumptions about the factors market participants would use in valuing the asset or liability based upon the best information available in the circumstances.

The categorization of financial assets and liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable for the asset or liability and their fair values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 may also include certain investment securities for which there is limited market activity or a decrease in the observability of market pricing for the investments, such that the determination of fair value requires significant judgment or estimation.

Fair value is applied to financial assets such as our marketable securities, which are classified and accounted for as available-for-sale and to financial liabilities for contingent consideration. These items are stated at fair value at each reporting period using the above guidance.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
8. FAIR VALUE MEASUREMENTS (CONTINUED)

The following tables provide information by level for financial assets and liabilities that are measured at fair value on a recurring basis (in thousands):

	Total carrying value at September 30, 2017	Fair Value Measurements at September 30, 2017 using:		
		Quoted price in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets:				
Money market	\$ 39,524	\$ 39,524	\$ —	\$ —
Corporate bonds	28,255	—	28,255	—
Certificates of deposit	8,513	—	8,513	—
Total assets measured at fair value	<u>\$ 76,292</u>	<u>\$ 39,524</u>	<u>\$ 36,768</u>	<u>\$ —</u>
Liabilities:				
Contingent consideration on acquired business	\$ 6,388	\$ —	\$ —	\$ 6,388
Total liabilities measured at fair value	<u>\$ 6,388</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 6,388</u>

	Total carrying value at September 30, 2016	Fair Value Measurements at September 30, 2016 using:		
		Quoted price in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets:				
Money market	\$ 44,319	\$ 44,319	\$ —	\$ —
Corporate bonds	28,767	—	28,767	—
Commercial paper	23,943	—	23,943	—
Certificates of deposit	7,309	—	7,309	—
Government municipal bonds	1,904	—	1,904	—
Total assets measured at fair value	<u>\$ 106,242</u>	<u>\$ 44,319</u>	<u>\$ 61,923</u>	<u>\$ —</u>
Liabilities:				
Contingent consideration on acquired business	\$ 9,960	\$ —	\$ —	\$ 9,960
Total liabilities measured at fair value	<u>\$ 9,960</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 9,960</u>

Our money market funds, which have been determined to be cash equivalents, are measured at fair value using quoted market prices in active markets for identical assets and are therefore classified as Level 1 assets. We value our Level 2 assets using inputs that are based on market indices of similar assets within an active market. There were no transfers into or out of our Level 2 financial assets during the twelve months ended September 30, 2017.

The use of different assumptions, applying different judgment to matters that are inherently subjective and changes in future market conditions could result in different estimates of fair value of our securities or contingent consideration, currently and in the future. If market conditions deteriorate, we may incur impairment charges for securities in our investment portfolio. We may also incur changes to our contingent consideration liability as discussed below.

As discussed in Note 2, we are required to make contingent payments for our acquisitions. In connection with the Bluenica acquisition, we are required to make contingent payments over a period of up to four years, subject to the Solutions segment achieving specified revenue thresholds. The fair value of the liability for contingent payments recognized upon acquisition was \$10.4 million. In connection with the FreshTemp acquisition, we are required to make a contingent payment after June 30, 2018, for revenue related to specific customer contracts signed by June 30, 2017. The fair value of the liability recognized upon acquisition was \$1.3 million. For the SMART Temps acquisition, we are required to make a contingent payment after December 31, 2017 based on achieving specified revenue thresholds. The fair value of the liability for contingent payments recognized upon acquisition was \$10,000. The fair values of these contingent payments was estimated by discounting to

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

8. FAIR VALUE MEASUREMENTS (CONTINUED)

present value the probability-weighted contingent payments expected to be made. Assumptions used in these calculations include the discount rate and various probability factors. This liability is considered to be a Level 3 financial liability that is re-measured each reporting period as a charge or credit to general and administrative expense within the Consolidated Statements of Operations.

The following table presents a reconciliation of the contingent consideration liability measured at fair value on a recurring basis using significant unobservable inputs (Level 3) (in thousands):

	Fiscal years ended September 30,	
	2017	2016
Fair value at beginning of period	\$ 9,960	\$ —
Purchase price contingent consideration	1,310	10,400
Contingent consideration payments	(518)	—
Change in fair value of contingent consideration	(4,364)	(440)
Fair value at end of period	\$ 6,388	\$ 9,960

The change in fair value of contingent consideration relates to the acquisitions of Bluenica, FreshTemp and SMART Temps and is included in general and administrative expense. The change in fair value of contingent consideration reflects our estimate of the probability of achieving the relevant targets and is discounted based on our estimated discount rate. We have estimated the fair value of the contingent consideration based on the probability of achieving the specified revenue thresholds at 93.5% to 98.5% for Bluenica, between 25% and 100% for FreshTemp and 0% for SMART Temp. A significant increase (decrease) in our estimates of achieving the relevant targets could materially increase (decrease) the fair value of the contingent consideration liability.

9. PRODUCT WARRANTY OBLIGATION

The following table summarizes the activity associated with the product warranty accrual (in thousands) and is listed on our Consolidated Balance Sheets under Current Liabilities:

Fiscal year	Balance at October 1	Warranties issued	Settlements made	Balance at September 30
2017	\$ 1,033	\$ 679	\$ (725)	\$ 987
2016	\$ 1,014	\$ 771	\$ (752)	\$ 1,033
2015	\$ 862	\$ 967	\$ (815)	\$ 1,014

We are not responsible for, and do not warrant that, custom software versions, created by original equipment manufacturer (OEM) customers based upon our software source code, will function in a particular way, will conform to any specifications or are fit for any particular purpose. Further, we do not indemnify these customers from any third-party liability as it relates to or arises from any customization or modifications made by the OEM customer.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
10. RESTRUCTURING

Below is a summary of the restructuring charges and other activity within the restructuring accrual all of which is included in our M2M segment (in thousands):

	2017 Restructuring		2016 Restructuring		2015 Restructuring

2017 Restructuring

In May 2017, we approved a restructuring plan primarily impacting our France location. We also eliminated certain employee costs in the U.S. The restructuring is a result of a decision to consolidate our France operations to our Europe, Middle East and Africa (EMEA) headquarters in Munich. The total restructuring charges amounted to \$2.5 million that included \$2.3 million of employee costs and \$0.2 million of contract termination costs during the third quarter of fiscal 2017. These actions resulted in an elimination of 10 positions in the U.S. and 8 positions in France. The payments associated with these charges are expected to be completed by the fourth quarter ending September 30, 2018.

2016 Restructuring

On January 19, 2016, we approved a restructuring plan for our Digi Wireless Design Services group. This plan resulted in an elimination of 5 positions. We recorded a restructuring charge of \$0.1 million related to severance during the second quarter of fiscal 2016 and paid the majority of the severance during that same quarter.

On November 19, 2015, we approved a restructuring plan impacting our corporate staff. The plan closed our Dortmund, Germany office and relocated certain employees to our Munich office. We also recorded a contract termination charge as we relocated employees in our Minneapolis, Minnesota office to our World Headquarters in Minnetonka, Minnesota in December 2015. We recorded a restructuring charge of \$0.7 million that included \$0.5 million of severance and \$0.2 million of contract termination costs during the first quarter of fiscal 2016. This restructuring resulted in an elimination of 10 positions. The payments associated with these charges were completed in the third quarter of fiscal 2016.

2015 Restructuring

On January 22, 2015, we announced the closure of our India location. The March closure resulted in the elimination of approximately 38 employees from engineering, sales and administration. We recorded a restructuring charge of \$0.4 million related to severance during the second quarter of fiscal 2015. The payments associated with this charge were completed during the third quarter of fiscal 2015.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
11. INCOME TAXES

The components of income from continuing operations, before income taxes are as follows (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
United States	\$ 5,170	\$ 9,841	\$ 6,934
International	4,321	6,849	6,183
Income from continuing operations, before income taxes	\$ 9,491	\$ 16,690	\$ 13,117

The components of the income tax provision are as follows (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
Current:			
Federal	\$ 312	\$ (141)	\$ 1,452
State	165	139	453
Foreign	1,756	2,099	2,279
Deferred:

Foreign	(654)	(145)	(203)
Income tax provision	\$ 125	\$ 3,212	\$ 3,684

The net deferred tax asset consists of the following (in thousands):

	As of September 30,	
	2017	2016
Current deferred tax asset	\$ —	\$ —
Non-current deferred tax asset	9,211	7,295
Current deferred tax liability	—	—
Non-current deferred tax liability	(534)	(616)
Net deferred tax asset	\$ 8,677	\$ 6,679
Uncollectible accounts and other reserves	\$ 1,063	\$ 915
Depreciation and amortization	(673)	421
Inventories	824	683
Compensation costs	5,863	4,925
Tax carryforwards	7,514	6,263
Valuation allowance	(5,952)	(5,970)
Identifiable intangible assets	(581)	(558)
Other	619	—
Net deferred tax asset	\$ 8,677	\$ 6,679

As of September 30, 2017, we have estimated carryforwards for tax purposes as follows: We have \$2.0 million of tax carryforwards (net of reserves) related to federal and state research and development tax credits. We also have \$5.5 million of carryforwards (net, tax effected) consisting of U.S. capital loss of \$5.1 million and non-U.S. net operating losses of \$0.4 million. The majority of our federal research and development tax credits have a 20 year carryforward period. The state research and development tax credits have a 15 year carryforward period. The majority of our non-U.S. net operating losses have an unlimited carryforward period. Our non-U.S. tax credit carryforwards will expire in 2032. Our U.S. capital loss carryforward will expire in 2020.

Our valuation allowance for certain U.S. and foreign locations remained consistent and was \$6.0 million at both September 30, 2017 and September 30, 2016. The amount of the deferred tax assets realized could vary if there are differences in the timing

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
11. INCOME TAXES (CONTINUED)

or amount of future reversals of existing deferred tax liabilities or changes in the amounts of future taxable income. If our future taxable income projections are not realized, an additional valuation allowance may be required, and would be reflected as income tax expense at the time that any such change in future taxable income is determined.

The reconciliation of the statutory federal income tax amount to our income tax provision is as follows (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
Statutory income tax amount	\$ 2,917	\$ 5,548	\$ 4,491
Increase (decrease) resulting from:			
State taxes, net of federal benefits	(125)	204	(190)
Utilization of tax credits	(1,168)	(1,116)	(250)
Manufacturing deduction	(150)	(450)	(285)
Discrete tax benefits	(954)	(1,461)	(818)
Foreign operations	218	276	181
Valuation reserve	159	(43)	297
Adjustment of tax contingency reserves	257	202	71
Meals and entertainment	63	55	64
Employee stock purchase plan	79	83	76
Contingent consideration	(1,172)	(154)	—
Other, net	1	68	47
Income tax provision	<u>\$ 125</u>	<u>\$ 3,212</u>	<u>\$ 3,684</u>

During fiscal 2017, we recorded net tax benefits of \$1.0 million, primarily from the reversal of tax reserves due to the expiration of statutes of limitation from U.S. and foreign tax jurisdictions. These benefits are included within the discrete tax benefits in the above table.

During fiscal 2016, we recorded net tax benefits of \$1.5 million, primarily from the reinstatement of the federal research and development tax credit for calendar year 2015 and the reversal of tax reserves due to the expiration of statutes of limitation from U.S. and foreign tax jurisdictions. In addition, we filed amended income tax returns resulting in an additional domestic refund related to qualified manufacturing activities. These benefits are included within the discrete tax benefits in the above table.

During fiscal 2015, we recorded net tax benefits of \$0.8 million, resulting from the reinstatement of the research and development tax credit for calendar year 2014, reversal of tax reserves due to the expiration of statute of limitations from U.S. and foreign tax jurisdictions and reversal of tax reserves due to the resolution of tax audits. These benefits are included within the discrete tax benefits in the above table.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
Unrecognized tax benefits at beginning of fiscal year	\$ 1,708	\$ 1,618	\$ 2,301
Increases related to:			
Prior year income tax positions	21	107	110
Current year income tax positions	257	240	144
Decreases related to:			
Prior year income tax positions	—	(71)	(255)
Settlements	—	(30)	(74)
Expiration of statute of limitations	(651)	(156)	(608)
Unrecognized tax benefits at end of fiscal year	<u>\$ 1,335</u>	<u>\$ 1,708</u>	<u>\$ 1,618</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**11. INCOME TAXES (CONTINUED)**

The total amount of unrecognized tax benefits at September 30, 2017 that, if recognized, would affect our effective tax rate is \$1.2 million. We expect that it is reasonably possible that the total amounts of unrecognized tax benefits will decrease approximately \$0.1 million over the next 12 months due to the expiration of various statutes of limitations.

Of the \$1.3 million of unrecognized tax benefits, \$0.7 million is included in non-current income taxes payable and \$0.6 million is included with non-current deferred tax assets on the consolidated balance sheet at September 30, 2017.

We recognize interest and penalties related to income tax matters in income tax expense. During fiscal 2017 and 2016, there were insignificant amounts of interest and penalties related to income tax matters in income tax expense. We had accrued interest and penalties related to unrecognized tax benefits of \$0.1 million at September 30, 2017 and \$0.2 million at September 30, 2016. These accrued interest and penalties are included in our non-current income taxes payable on our consolidated balance sheets.

We file a U.S. federal income tax return and income tax returns in various states and foreign jurisdictions. With few exceptions, we are no longer subject to state and local or non-U.S. income tax examinations by tax authorities for years before fiscal year 2013.

At September 30, 2017, we had approximately \$34.6 million of un-taxed accumulated undistributed foreign earnings, for which we have not accrued additional U.S. tax. Our policy is to reinvest earnings of our foreign subsidiaries indefinitely to fund current operations and provide for future international expansion opportunities, and only repatriate earnings to the extent that U.S. taxes have already been recorded. Although we have no current need to repatriate historical earnings in the form of cash to the United States, if we change our assertion from indefinitely reinvesting undistributed foreign earnings, we would have to accrue applicable taxes. The amount of any taxes and the application of any tax credits would be determined based on the income tax laws at the time of such repatriation. Under current tax laws, we estimate the unrecognized deferred tax liability to be up to \$0.6 million.

12. STOCK-BASED COMPENSATION

Stock-based awards were granted under the 2017 Omnibus Incentive Plan (the "2017 Plan") beginning January 30, 2017 and, prior to that, were granted under the 2016 Omnibus Incentive Plan (the "2016 Plan"). Upon stockholder approval of the 2017 Plan, we ceased granting awards under any prior plan. Shares remaining in the 2016 Plan were moved into the 2017 Plan. The authority to grant options under the 2017 Plan and to set other terms and conditions rests with the Compensation Committee of the Board of Directors. We also have awards outstanding under our 2014 Omnibus Plan (the "2014 Plan"), the 2013 Omnibus Incentive Plan (the "2013 Plan") and the 2000 Omnibus Stock Plan, as amended and restated as of December 4, 2009 (the "2000 Plan").

The 2017 Plan authorizes the issuance of up to 1,500,000 common shares in connection with awards of stock options, stock appreciation rights, restricted stock, restricted stock units, performance-based full value awards or other stock-based awards. Eligible participants include our employees, our affiliates, non-employee directors of our Company and any consultant or advisor who is a natural person and provides services to us or our affiliates. Options that have been granted under the 2017 Plan typically vest over a four-year period and will expire if unexercised after seven years from the date of grant. Restricted stock unit awards (RSUs) that have been granted to directors typically vest in one year. RSUs that have been granted to executives and employees typically vest in January over a four-year period. Awards may be granted under the 2017 Plan until January 29, 2027. Options under the 2017 Plan can be granted as either incentive stock options (ISOs) or non-statutory stock options (NSOs). The exercise price of options and the grant date price of restricted stock units is determined by our Compensation Committee but may not be less than the fair market value of our common stock based on the closing price on the date of grant. Upon exercise, we issue new shares of stock. As of September 30, 2017, there were approximately 1,583,578 shares available for future grants under the 2017 Plan.

The 2016 Plan, under which grants ceased upon approval of the 2017 Plan, initially authorized the issuance of up to 1,500,000 common shares in connection with awards of stock options, stock appreciation rights, restricted stock, restricted stock units, performance-based full value awards or other stock-based awards. Eligible participants included our employees, our affiliates, non-employee directors of our Company and any consultant or advisor who is a natural person and provided services to us or our affiliates. Options that were granted under the 2016 Plan typically vested over a four-year period and expired if unexercised after seven years from the date of grant. RSUs that were granted to directors typically vested in one year. RSUs that were granted to executives and employees typically vested in November or January over a four-year period. Options under the 2016 Plan could be granted as either ISOs or NSOs. The exercise price of options and the grant date price of restricted

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

12. STOCK-BASED COMPENSATION (CONTINUED)

stock was determined by our Compensation Committee but were not less than the fair market value of our common stock based on the closing price on the date of grant.

The 2014 Plan initially authorized the issuance of up to 2,250,000 common shares in connection with awards of stock options, stock appreciation rights, restricted stock, restricted stock units, performance-based full value awards or other stock-based awards. Eligible participants included our employees, our affiliates, non-employee directors of our Company and any consultant or advisor who is a natural person and provides services to us or our affiliates. Options granted under this plan generally vested over a four year service period and expired if unexercised after eight years from the date of grant. RSUs that were granted to Directors typically vested in one year. RSUs that were granted to executives and employees typically vested in November over a four-year period. Options under the 2014 Plan were granted as either ISOs or NSOs. Awards may no longer be granted under the 2014 Plan as grants ceased upon approval of the 2016 Plan effective February 1, 2016 at the Annual Meeting of Stockholders. The exercise price of options and the grant date price of restricted stock was determined by our Compensation Committee but could not be less than the fair market value of our common stock based on the closing price on the date of grant.

The 2013 Plan initially authorized the issuance of up to 1,750,000 common shares in connection with awards of stock options, stock appreciation rights, restricted stock, restricted stock units, performance-based full value awards or stock awards. Eligible participants included our employees, non-employee directors, consultants and advisors. Options granted under this plan generally vested over a four year service period and expired if unexercised after eight years from the date of grant. RSUs that were granted to Directors typically vested in one year. Awards may no longer be granted under the 2013 Plan as grants ceased upon approval of the 2014 Plan effective January 27, 2014 at the Annual Meeting of Stockholders. Options under the 2013 Plan were granted as either ISOs or NSOs. The exercise price was determined by our Compensation Committee but could not be less than the fair market value of our common stock based on the closing price on the date of grant.

The 2000 Plan initially authorized the issuance of up to 5,750,000 common shares in connection with awards of stock options, stock appreciation rights, restricted stock, performance units or stock awards. Eligible participants included our employees, non-employee directors, consultants and advisors. An authorization to issue an additional 2,500,000 common shares was ratified on January 25, 2010 at the Annual Meeting of Stockholders. Awards may no longer be granted under the 2000 Plan as the plan was terminated as to future awards on January 28, 2013 at the Annual Meeting of Stockholders. Options under the 2000 Plan were granted as either ISOs or non-statutory stock options NSOs. The exercise price was determined by our Compensation Committee but could not be less than the fair market value of our common stock based on the closing price on the date of grant.

Our equity plans and corresponding forms of award agreements generally have provisions allowing employees to elect to satisfy tax withholding obligations through the delivery of shares, having us retain a portion of shares issuable under the award or paying cash to us for the withholding. During fiscal 2017, 2016 and 2015 our employees forfeited 49,684, 47,464 and 9,371 shares, respectively in order to satisfy \$0.7 million, \$0.6 million and \$0.1 million, respectively, of withholding tax obligations related to stock-based compensation, pursuant to terms of awards under our board and shareholder-approved compensation plans.

We recorded cash received from the exercise of stock options of \$3.5 million, \$7.2 million and \$6.6 million during fiscal years 2017, 2016 and 2015, respectively. During fiscal 2017 and fiscal 2016, there were \$0.3 million and \$0.2 million, respectively of excess tax benefits from stock-based compensation. There were no excess tax benefits during fiscal 2015.

We sponsor an Employee Stock Purchase Plan, as amended and restated as of October 29, 2013, December 4, 2009 and November 27, 2006 (the "Purchase Plan"), covering all domestic employees with at least 90 days of continuous service and who are customarily employed at least 20 hours per week. The Purchase Plan allows eligible participants the right to purchase common stock on a quarterly basis at the lower of 85% of the market price at the beginning or end of each three-month offering period. The most recent amendments to the Purchase Plan, ratified by our stockholders on January 27, 2014, increased the total number of shares to 2,800,000 that may be purchased under the plan. Employee contributions to the Purchase Plan were \$0.7 million in fiscal 2017, and \$0.9 million in each of fiscal 2016 and 2015. Pursuant to the Purchase Plan, 72,594, 103,915, and 123,847 shares of common stock were issued to employees during fiscal 2017, 2016 and 2015, respectively. Shares are issued under the Purchase Plan from treasury stock. As of September 30, 2017, 441,022 shares of common stock were available for future issuances under the Purchase Plan.

Stock-based compensation cost capitalized as part of inventory was immaterial as of September 30, 2017, 2016 and 2015.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
12. STOCK-BASED COMPENSATION (CONTINUED)

Stock-based compensation expense is included in the consolidated results of operations as follows (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
Cost of sales	\$ 213	\$ 215	\$ 221
Sales and marketing	1,348	921	1,158
Research and development	656	590	561
General and administrative	2,442	1,923	1,941
Stock-based compensation before income taxes	4,659	3,649	3,881
Income tax benefit	(1,536)	(1,185)	(1,343)
Stock-based compensation after income taxes	\$ 3,123	\$ 2,464	\$ 2,538

Stock Options

The following table summarizes our stock option activity (in thousands, except per common share amounts):

	Options Outstanding	Weighted Average Exercised Price	Weighted Average Contractual Term (in years)	Aggregate Intrinsic Value (1)
Balance at September 30, 2016	3,963	\$10.36		
Granted	601	12.86		
Exercised	(335)	10.45		
Forfeited / Canceled	(327)	12.68		
Balance at September 30, 2017	3,902	\$10.54	4.2	\$ 3,593
Exercisable at September 30, 2017	2,746	\$10.18	3.5	\$ 2,769

(1) The aggregate intrinsic value represents the total pre-tax intrinsic value, based on our closing stock price of \$10.60 as of September 30, 2017, which would have been received by the option holders had all option holders exercised their options as of that date.

The intrinsic value of an option is the amount by which the fair value of the underlying stock exceeds its exercise price. The total intrinsic value of all options exercised during each of the twelve months ended September 30, 2017, 2016 and 2015 was \$0.9 million, \$1.9 million and \$0.9 million, respectively.

The table below shows the weighted average fair value, which was determined based upon the fair value of each option on the grant date utilizing the Black-Scholes option-pricing model and the related assumptions:

	Fiscal years ended September 30,		
	2017	2016	2015
Weighted average per option grant date fair value	\$ 4.63	\$ 3.90	\$ 2.98
Assumptions used for option grants:			
Risk free interest rate	1.46% - 1.96%	1.22% - 1.85%	1.57% - 1.85%
Expected term	6.00 years	6.00 years	6.00 years
Expected volatility	33% - 34%	32% - 33%	32% - 36%
Weighted average volatility	34%	32%	35%
Expected dividend yield	0%	0%	0%

The fair value of each option award granted during the periods presented was estimated using the Black-Scholes option valuation model that uses the assumptions noted in the table above. Expected volatilities are based on the historical volatility of our stock. We use historical data to estimate option exercise and employee termination information within the valuation model. The expected term of options granted is derived from the vesting period and historical information and represents the period of time that options granted are expected to be outstanding. The risk-free rate used is the zero-coupon U.S. Treasury bond rate in effect at the time of the grant whose maturity equals the expected term of the option.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

12. STOCK-BASED COMPENSATION (CONTINUED)

We use historical data to estimate pre-vesting forfeiture rates. The pre-vesting forfeiture rate used in fiscal 2017 was 10.0%. As of September 30, 2017, the total unrecognized compensation cost related to non-vested stock-based compensation arrangements, net of expected forfeitures, was \$3.4 million and the related weighted average period over which it is expected to be recognized was approximately 2.9 years.

At September 30, 2017, the weighted average exercise price and remaining life of the stock options are as follows (in thousands, except remaining life and exercise price):

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Options Outstanding	Weighted Average Contractual Life (In Years)	Weighted Average Exercise Price	Number of Shares Vested	Weighted Average Exercise Price
\$7.40 - \$8.30	858	4.01	\$ 7.95	623	\$ 7.92
\$8.31 - \$9.59	623	3.98	\$ 9.14	551	\$ 9.16
\$9.60 - \$10.52	554	4.02	\$ 9.86	405	\$ 9.84
\$10.53 - \$10.81	567	3.91	\$ 10.73	556	\$ 10.72
\$10.82 - \$12.63	604	4.82	\$ 12.11	394	\$ 11.96
\$12.64 - \$14.75	490	6.09	\$ 13.53	11	\$ 14.75
\$14.76 - \$15.23	206	0.16	\$ 15.23	206	\$ 15.23
\$7.40 - \$15.23	<u>3,902</u>	4.18	\$ 10.54	<u>2,746</u>	\$ 10.18

The total grant date fair value of shares vested was \$2.4 million in fiscal 2017 and \$2.9 million in each of fiscal 2016 and 2015.

Non-vested Restricted Stock Units

A summary of our non-vested restricted stock units as of September 30, 2017 and changes during the twelve months then ended is presented below (in thousands, except per common share amounts):

	Number of Awards	Weighted Average Grant Date Fair Value
Nonvested at September 30, 2016	505	\$ 9.67
Granted	285	\$ 12.77
Vested	(202)	\$ 9.42
Canceled	(22)	\$ 10.59
Nonvested at September 30, 2017	<u>566</u>	\$ 11.28

As of September 30, 2017, the total unrecognized compensation cost related to non-vested restricted stock units was \$3.8 million and the related weighted average period over which it is expected to be recognized was approximately 1.2 years.

13. COMMON STOCK REPURCHASE

Common Stock Repurchase Program

On October 29, 2013, our Board of Directors authorized a program to repurchase up to \$20.0 million of our common stock, primarily to support our employee stock purchase program and to return capital to shareholders. During the first quarter of fiscal 2015, we repurchased 287,787 shares for \$2.2 million under this plan, which expired on October 31, 2014.

On October 28, 2014, our Board of Directors authorized a program to repurchase up to \$15.0 million of our common stock primarily to return capital to shareholders and to support our employee stock purchase program. This authorization began on November 1, 2014 and expired on October 31, 2015. There were no shares repurchased under this program.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

13. COMMON STOCK REPURCHASE (CONTINUED)

On April 26, 2016, our Board of Directors authorized a program to repurchase up to \$15.0 million of our common stock primarily to return capital to shareholders. This authorization expired on May 1, 2017. There were no shares repurchased under this program.

On May 2, 2017, our Board of Directors authorized a new program to repurchase up to \$20.0 million of our common stock primarily to return capital to shareholders. This repurchase authorization expires on May 1, 2018. Shares repurchased under the new program will be made through open market and privately negotiated transactions from time to time and in amounts that management deems appropriate. The amount and timing of share repurchases depends upon market conditions and other corporate considerations. During fiscal 2017, we repurchased 28,691 shares for \$0.3 million. As of September 30, 2017, \$19.7 million remains available for repurchase.

14. SHARE RIGHTS PLAN

Under our share rights plan, each right entitles its holder to buy one one-hundredth of a share of a Series A Junior Participating Preferred Stock at an exercise price of \$60, subject to adjustment. The rights are not exercisable until a specified distribution date as defined in the Share Rights Agreement. The Rights will expire on June 30, 2018, unless extended or earlier redeemed or exchanged by us as defined in the Share Rights Agreement.

15. EMPLOYEE BENEFIT PLANS

We currently have a savings and profit sharing plan pursuant to Section 401(k) of the Internal Revenue Code (the Code), whereby eligible employees may contribute up to 25% of their pre-tax earnings, not to exceed amounts allowed under the Code.

We provide a match of 100% on the first 3% of each employee's bi-weekly contribution and a 50% match on the next 2% of each employee's bi-weekly contribution. In addition, we may make contributions to the plan at the discretion of the Board of Directors. We provided matching contributions of \$1.4 million for fiscal 2017, \$1.4 million for fiscal 2016 and \$1.7 million for fiscal 2015.

16. COMMITMENTS

We have entered into various operating lease agreements for office facilities and equipment, the last of which expires in fiscal 2023. The office facility leases generally require us to pay a pro-rata share of the lessor's operating expenses. Certain operating leases contain escalation clauses and are being amortized on a straight-line basis over the term of the lease.

The following schedule reflects future minimum rental commitments under noncancelable operating leases (in thousands):

Fiscal year	Amount
2018	\$ 1,398
2019	1,148
2020	609
2021	277
2022	208
Thereafter	121
Total minimum payments required	\$ 3,761

The following schedule shows the composition of total rental expense for all operating leases for the years ended September 30 (in thousands):

	Fiscal years ended September 30,		
	2017	2016	2015
Rentals	\$ 1,342	\$ 1,613	\$ 2,076
Less: sublease rentals	—	(46)	(56)
Total rental expense	\$ 1,342	\$ 1,567	\$ 2,020

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

17. CONTINGENCIES

Patent Infringement Lawsuit

On June 19, 2017, Weatherproof Wireless, LLC filed a complaint against us in federal court in the District of Delaware. The complaint includes allegations against us pertaining to the infringement of Weatherproof Wireless, LLC patents by our access gateway and wireless router pods for public safety communications structures, including the Digi Utility Communication Hub with 4G LTE. On September 26, 2017 we signed a settlement and license agreement for an immaterial amount.

In addition to the matters discussed above, in the normal course of business, we are subject to various claims and litigation, which may include, but are not limited to, patent infringement and intellectual property claims. While we are unable to predict the outcome of any potential claims or litigation due to the inherent unpredictability of these matters, we believe that it is possible that we could, in the future, incur judgments or enter into settlements of claims that could have a material adverse effect on our operations in any particular period.

(1) During fiscal 2017 and 2016, we recorded net tax benefits of \$1.0 million and \$1.5 million, respectively. We recorded a benefit of \$0.1 million in the first quarter of fiscal 2017 resulting from the reversal of income tax reserves due to the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**18. QUARTERLY FINANCIAL DATA (UNAUDITED)(CONTINUED)**

expiration of the statutes of limitation from various U.S. and foreign tax jurisdictions. In the third quarter of fiscal 2017, we recorded a tax benefit of \$0.7 million from the reversal of income tax reserves due to the expiration of the statutes of limitation from various U.S. and foreign tax jurisdictions. In the fourth quarter of fiscal 2017, we recorded a net tax benefit of \$0.2 million, primarily from the reversal of income tax reserves due to the expiration of the statutes of limitation from various U.S. and foreign tax jurisdictions and state and foreign prior year true-up provision to return. We recorded a benefit of \$0.7 million in the first quarter of fiscal 2016 resulting from the reinstatement of the research and development tax credit for calendar year 2015, reversal of income tax reserves due to the expiration of the statutes of limitation from various U.S. and foreign tax jurisdictions and reversal of tax reserves due to the resolution of tax audits. In the third quarter of fiscal 2016, we recorded a tax benefit of \$0.5 million primarily due to the filing of an amended income tax return resulting in a domestic refund related to qualified manufacturing activities. In the fourth quarter of fiscal 2016, we recorded a net tax benefit of \$0.2 million, primarily due to the filing of an additional amended income tax return resulting in an additional domestic refund related to qualified manufacturing activities, partially offset by an adjustment of the state rate on net deferred tax assets.

- (2) For continuing operations, we recorded business restructuring charges of \$2.5 million (\$1.6 million after tax) in the third quarter of fiscal 2017, \$0.7 million (\$0.4 million after tax) in the first quarter of fiscal 2016 and \$0.1 million (\$0.1 million after tax) in the second quarter of fiscal 2016.

19. SUBSEQUENT EVENT*Acquisition of TempAlert*

On October 20, 2017, we purchased all the outstanding interests of TempAlert, a Boston-based provider of automated, real-time temperature monitoring and task management solutions. TempAlert will join the Digi Smart Solutions™.

The purchase price was \$45 million in cash adjusted for certain net working capital adjustments. The terms of the acquisition included an upfront cash payment together with future earn-out payments and a holdback amount. Cash of \$40.7 million was paid at the time of closing. The earn-out payments are scheduled to be paid after December 31, 2018 and December 31, 2019 which is the end of the earn-out periods. The cumulative amount of these earn-outs for the periods ended December 31, 2018 and 2019, will not exceed \$35.0 million and \$45.0 million, respectively. A preliminary purchase price allocation, estimated acquisition costs and proforma financial information are not available due to the timing of the acquisition.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

This Annual Report on Form 10-K includes the certifications attached as Exhibits 31.1 and 31.2 of our Chief Executive Officer and Chief Financial Officer required by Rule 13a-14 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). This Item 9A includes information concerning the controls and control evaluations referred to in those certifications.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act that are designed to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management of the Company, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the design and operation of our disclosure controls and procedures as of September 30, 2017. Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2017, our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Security Exchange Act of 1934, as amended) were effective and provide reasonable assurance on the reliability of the Company's financial reporting and the preparation of its financial statements for external purposes in accordance with generally accepted accounting principles.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our consolidated financial statements for external purposes in accordance with generally accepted accounting principles. Management, with the participation of our Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of September 30, 2017.

In making this assessment, management used the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework* (2013). Based on this assessment, management concluded that the Company's internal control over financial reporting was effective as of September 30, 2017 based on *Internal Control - Integrated Framework* (2013) issued by the COSO.

The effectiveness of our internal control over financial reporting as of September 30, 2017 has been audited by Grant Thornton LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

Remediation Efforts on the Material Weakness in Internal Control Over Financial Reporting

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our interim or annual financial statements will not be prevented or detected on a timely basis.

As disclosed in the Company's 2016 Annual Report on Form 10-K, management concluded that our internal control over financial reporting was previously not effective based on the material weakness in internal control over financial reporting as we did not maintain effective controls to identify and maintain segregation of duties between the ability to create and post manual journal entries to the general ledger system for a key accounting individual as we moved locations at one of our subsidiaries, impacting the accuracy and completeness of all key accounts and disclosures at our German subsidiary. Specifically, the individual was assigned system access to both prepare and post journal entries, while holding responsibility for review of certain monthly account reconciliations, without his entries being subject to an independent review. Management has remediated this material weakness in fiscal 2017. Specifically, during the year ended September 30, 2017 we removed access to create and post journal entries from the member of the accounting team with incompatible duties as of September 30, 2016. In addition, a thorough review of all journal entries made by the individual revealed no irregularities or errors. Although this was an isolated case, we enhanced our access review controls for our financial system to include a review of all employee

status changes. We also have automated the approval process for manual journal entries to ensure that all journal entries are properly approved.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Digi International Inc.

We have audited the internal control over financial reporting of Digi International Inc. (a Delaware corporation) and subsidiaries (the "Company") as of September 30, 2017, based on criteria established in the 2013 *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2017, based on criteria established in the 2013 *Internal Control-Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as of and for the year ended September 30, 2017, and our report dated November 22, 2017 expressed an unqualified opinion on those consolidated financial statements.

/s/ GRANT THORNTON LLP
Minneapolis, Minnesota
November 22, 2017

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarterly period ended September 30, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Incorporated into this item by reference is the information appearing under the headings "Proposal No. 1 - Election of Directors" and "Security Ownership of Principal Stockholders and Management" in our Proxy Statement for our 2018 Annual Meeting of Stockholders we intend to file with the SEC (the "Proxy Statement").

Executive Officers of the Registrant

As of the date of filing this Form 10-K, the following individuals were executive officers of the Registrant:

<u>Name</u>	<u>Age</u>	<u>Position</u>
Ronald E. Konezny	49	President and Chief Executive Officer
Michael C. Goergen	50	Senior Vice President, Chief Financial Officer and Treasurer
Jon A. Nyland	54	Vice President Manufacturing Operations
Kevin C. Riley	56	Chief Operating Officer
Tracy L. Roberts	55	Vice President of Technology Services
David H. Sampsell	49	Vice President of Corporate Development, General Counsel and Corporate Secretary

Ronald E. Konezny has served as a member of our Board of Directors and as our President and Chief Executive Officer since December 2014. From September 2013 to December 2014, he served as Vice President, Global Transportation and Logistics at Trimble Navigation Limited, a global provider of navigation and range-finding equipment and related solutions. From August 2011 to September 2013, he served as General Manager of Trimble's Global Transportation and Logistics division. From 2007 to September 2013, he served as Chief Executive Officer of PeopleNet, Inc., a provider of telematics solutions for the transportation industry, which was acquired by Trimble in 2011. Mr. Konezny founded PeopleNet in 1996 and served in various other roles, including Chief Technology Officer, Chief Financial Officer and Chief Operating Officer, before serving as its Chief Executive Officer. Mr. Konezny also serves on the board of directors of I.D. Systems, Inc.

Mr. Konezny has extensive experience in the wireless M2M industry working with solutions comprised of hardware and cloud-based applications. He brings extensive leadership experience in corporate strategy, manufacturing, operations, technology, finance and business development to the Board

Michael C. Goergen has served as Senior Vice President, Chief Financial Officer and Treasurer since April 2015. He previously served as Senior Vice President - Finance of the Transport - Logistics division of Trimble Navigation Limited from April 2013 to March, 2015. From June 2007 to April, 2013, Mr. Goergen served as Chief Financial Officer of PeopleNet Communications, which was acquired by Trimble in 2011. He had served in various financial roles at PeopleNet since 1997.

Jon A. Nyland has served as Vice President of Manufacturing Operations since April 1999. He joined our company in 1993 as Manager of Manufacturing and Test Engineering and served in roles of increasing responsibility until reaching his current position. Prior to joining us, from 1985 to 1993, Mr. Nyland held engineering and consulting positions with ITT Corporation, Minnesota Technology, and Turtle Mountain Corporation.

Kevin C. Riley has served as Senior Vice President and Chief Operating Officer since January 2016 and previously served as Senior Vice President of Global Sales between January 2013 and January 2016. Prior to joining us, Mr. Riley served as Senior Vice President - Global Markets for Infor Global Solutions, an enterprise software solutions company, where he led four global business units to profitable growth from January 2010 to November 2011. He served as Vice President and General Manager at Oracle, an enterprise software company, from 2008 to 2010, and President of Global Knowledge Software from 2002 until Global Knowledge Software's acquisition by Oracle in 2008. He also served as President and Chief Operating Officer for Learn2 Corporation from 1999 to 2002.

Tracy L. Roberts has served as Vice President of Information Technology since March 2005 and Vice President of Technology Services since July 2013. She also previously served as Vice President of Human Resources from March 2005 until May 2016. Prior to joining us, Ms. Roberts served as Director of Human Resources at Novartis Nutrition Corporation where she was responsible for the medical nutritional business unit. Ms. Roberts held various human resource and marketing positions at Cray Research (now known as Silicon Graphics) from 1983 to 1996.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE (CONTINUED)

David H. Sampsell has served as Vice President of Corporate Development, General Counsel and Corporate Secretary since January 2015. He had previously served as Vice President, General Counsel and Corporate Secretary since April 2011. Prior to joining us, Mr. Sampsell worked as corporate counsel at ADC Telecommunications, Inc., a supplier of network infrastructure products and services, from December 1999 until March 2011. ADC Telecommunications, Inc. was acquired by TE Connectivity in December 2010. His most recent role at ADC was as Associate General Counsel overseeing corporate transactions and securities law compliance. Prior to joining ADC, Mr. Sampsell was an attorney in private practice with Leonard, Street and Deinard, P.A. from 1996 to 1999 and Moore & Van Allen, PLLC from 1993 to 1996.

Code of Ethics/Code of Conduct

We have in place a "code of ethics" within the meaning of Rule 406 of Regulation S-K, which is applicable to our senior financial management, including specifically our principal executive officer, principal financial officer and controller. A copy of this financial code of ethics is available on our website (www.digi.com) under the "Company - Investor Relations - Corporate Governance" caption. We intend to satisfy our disclosure obligations regarding any amendment to, or a waiver from, a provision of this code of ethics by posting such information on the same website. We also have a "code of conduct" that applies to all directors, officers and employees, a copy of which is available through our website (www.digi.com) under the "Company - Investor Relations - Corporate Governance" caption.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated into this item by reference is the information appearing under the heading "Compensation of Directors," "Executive Compensation," and the information regarding compensation committee interlocks and insider participation under the heading "Proposal No. 1 - Election of Directors" in our Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Incorporated into this item by reference is the information appearing under the headings "Security Ownership of Principal Stockholders and Management" and "Equity Compensation Plan Information" in our Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Incorporated into this item by reference is the information regarding director independence under the heading "Proposal No. 1 - Election of Directors" and the information regarding related person transactions under the heading "Related Person Transaction Approval Policy" on our Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Incorporated into this item by reference is the information under "Proposal No. 5 - Ratification of Independent Registered Public Accounting Firm" in our Proxy Statement.

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Ronald E. Konezny, certify that:

1. I have reviewed this annual report on Form 10-K of Digi International Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;

4. The Registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and

5. The Registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's Board of Directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.
