COMPANY PROFILE

Columbus McKinnon Corporation (NASDAQ: CMCO) is a leading designer, manufacturer and marketer of material handling products, systems and services which lift, secure, position and move material ergonomically, safely, precisely and efficiently. Headquartered in Amherst, New York, Columbus McKinnon's major products include hoists, cranes, chain and forged attachments. The Company's products serve a wide variety of commercial and industrial applications that require the safety and quality provided by Columbus McKinnon's superior product design and engineering know-how.

STRATEGY AND FOCUS

Our strategy is to leverage our superior material handling design and engineering know-how to provide differentiated products, systems and services to lift, secure, position and move material ergonomically, safely, precisely, and efficiently. Our focus is on industrial and commercial applications with the highest potential for growing market share in countries that offer the greatest volume and profit potential.

^{**} Excludes unusual items and uses the 16.6 million average diluted shares outstanding in FY 2006 for both periods.

Stock Price +98%

Dear Fellow Shareholders:

Fiscal 2006 was a very rewarding year for Columbus McKinnon and our shareholders. The substantial operating leverage gained from our lean manufacturing and facility rationalization initiatives, combined with growing sales and lower debt produced a significant improvement in our performance and profitability. Strong market conditions in industrial markets worldwide contributed to consolidated net sales reaching the highest level in the last five years. Our progress over the last year in de-levering the balance sheet and paying down debt was outstanding as our net debt was reduced by over \$97 million with \$56 million coming from our November 2005 equity offering and \$41 million from cash flow generated by operations. As a result, we achieved our near-term goal of 50% funded debt to total capitalization on March 31st, compared with 77% a year ago. Subsequent to year-end, \$32.1 million of available cash was used to further reduce this key ratio to 46%.

Fiscal 2006 net sales were \$556.0 million, a \$41.2 million or 8.0% increase from \$514.8 million in fiscal 2005. Net income for fiscal 2006 was \$59.8 million, a \$43.1 million improvement from net income of \$16.7 million in fiscal 2005. On a per share basis, Columbus McKinnon's net income for fiscal 2006 was \$3.60 per diluted share on 16.6 million average shares outstanding, an improvement of \$2.47 per diluted share (219% improvement) from \$1.13 per diluted share on 14.8 million average shares outstanding in fiscal 2005. Net income in fiscal 2006 and 2005 included several unusual items with a total net favorable effect of \$33.1 million in fiscal 2006 and \$2.8 million in fiscal 2005. Excluding unusual items from both years, pro forma net income for fiscal 2006 would have been \$26.7 million, a 92.1% improvement from \$13.9 million pro forma net income in fiscal 2005. On a per share basis, pro forma net income using the 16.6 million average diluted shares outstanding in fiscal 2006 would have been \$1.60 per diluted share in fiscal 2006 and \$0.84 per diluted share on a pro forma basis in fiscal 2005, a 90.5% improvement.

A reconciliation of the unusual items affecting net income in both years is provided in our fiscal 2006 fourth quarter and full year earnings release which is available on our web site at www.cmworks.com. The most significant unusual item was the reversal of a \$38.6 million deferred tax asset valuation allowance in the fiscal 2006 fourth quarter which resulted in a corresponding \$38.6 million tax benefit on the income statement. The Company continues to have significant U.S federal net operating loss carryforwards (\$83.1 million at 2006 fiscal year end) to be utilized against future U.S. taxable income. This will benefit future cash flow as income tax expense related to U.S.-generated taxable income will be recorded as a non-cash expense.

Higher volumes and a lower cost base again produced significant improvement in virtually every major performance metric for the year. Operating leverage was 42% in fiscal 2006, compared with 15% in fiscal 2005. Our consolidated gross margin for fiscal 2006 increased to 26.6%, up 210 basis points from last year. Similarly, consolidated operating margin improved 250 basis points to 10.4% for the fiscal 2006 year, with gross and operating margins improving in both business segments. Working capital as a percent of revenue improved to 17.4% at 2006 fiscal year-end from 20.2% and 22.0% at year-end fiscal 2005 and 2004, respectively.

During the past year, we not only substantially reduced debt through our very successful equity offering and our strong operating cash flow, we also completed several additional refinancing initiatives to reduce more costly and restrictive debt, as well as to extend the maturity of our debt. The combined effect of our fiscal 2006 and subsequent refinancing activities is expected to produce future annual savings of \$8.0 million in cash and pre-tax interest expense. In addition to reducing debt and interest expense, our refinancing activities improved Columbus McKinnon's capital structure, lowered our cost of capital and provided the financial flexibility to execute our strategic growth plans.

Our significantly improved operating results and financial position, combined with growing demand from industrial markets we serve, all helped Columbus McKinnon successfully complete the transition from recovery to growth in fiscal 2006. Our primary focus going forward is to accelerate our top line growth while making continued improvements in our profitability and financial position. Our current organic bookings growth is in the mid-to-high single digits, and a key near-term objective is to step up our growth pace to enhance both earnings and our global market position. While we will again consider acquisitions to support growth now that our financial condition is much stronger, we are likely to make smaller acquisitions that complement existing product lines or enhance our market position in international markets. While doing so, we will continue to be very mindful of maintaining a prudent capital structure. Based on that thinking, we are looking for the bulk of our growth over the next few years to continue to be driven by organic growth. The focus of our organic growth initiatives targets two key strategies: new market development and new products and services.

Results

2006 Operating Leverage	42% vs. 15% in 2005
2006 Pro forma EPS	\$1.60 + 90.5%
2006 Gross Margin	26.6% +210 basis points
2006 Operating Margin	10.4% +250 basis points
Working Capital/Sales	17.4% -280 basis points

Global markets remain a major focus for Columbus McKinnon. The demand for our types of products is high in developing economies such as Latin America, Eastern Europe and the Far East. We are also looking to expand in higher growth markets like construction and energy around the world. There is a greater opportunity to sell more products in North American markets by identifying market shifts and penetrating the industries that are moving into a growth mode. As we look to accelerate sales growth, we are investing more in sales and marketing activities in all markets to ensure that we cover them effectively. Besides expanding our sales force, we are also adding product and market specialists to support our human resources in the field.

On the new product front, developing products that will make us more competitive globally continues to be a major focus. In March 2006, we launched our FEM-rated (Federation of European Manufacturers) 5-10 ton wire rope hoist to the North American cranebuilder channel. It has been very well received with orders to date exceeding our initial forecasts. We believe the features that this unit provides users truly set our FEM product apart from our competition. Marketed under our strong brand names, Yale and Shaw Box, this product differentiates us in the marketplace and reflects focus on engineering, innovation and quality. Our plan is to expand this product line further with 15-20 ton and 1-3 ton capacities being launched later in the year.

The Yale Global King, Columbus McKinnon's first FEM-rated hoist, is targeted to the global market.

Strength

2006 FYE Funded Debt	\$209.8 million -22.6%
2006 FYE Net Debt	\$164.2 million -37.2%
Large and diverse customer base	Over 20,000 distributors and end user customers
2006 #1 U.S. Market Positions	Hoists (57%)
	Lifting and sling chain (59%)
	Forged attachments (46%)

With well-established and expanding manufacturing, sales and service operations in major global markets, Columbus McKinnon has a strong platform for future growth of international sales. At fiscal 2006 year end, we operated 26 manufacturing facilities in nine countries, 26 sales and service offices in 12 countries and nine warehouse facilities in five countries. China, Latin America and both western

and Eastern Europe remain our major focus areas of global presence and expansion. In fiscal 2006, international sales increased to \$198.3 million representing 36% of total sales. Since becoming a public company ten years ago, international sales have grown at a 16.9% compound annual growth rate.

We are also successfully maintaining a strong domestic market presence with number one U.S. market positions in hoists, lifting and sling chain, and forged attachments for this past year. Columbus McKinnon continues to have a large and diverse North American customer base numbering over 20,000 distributors and end user customers.

As we continue to grow sales, we remain focused on further improving operating profitability. A key point we make in communicating Columbus McKinnon's underlying profitability potential to investors is the 11% to 12% operating margins achieved when sales were at the \$600 million level in fiscal 2000. As we return Columbus McKinnon's sales closer to that level, we are targeting operating profit in that range. We are also focused on making further improvements in working capital utilization through better asset management.

Strategy

Increase domestic organic sales through new products and enhanced market coverage

Increase international sales by further expanding global presence and offering new products designed for global markets

Enhance operating margins and leverage through continued sales growth and cost reduction

Continue lean manufacturing and facility rationalizations to further improve working capital and capacity utilization

Continue debt reduction to reduce interest expense and enhance strategic and financial flexibility

Support incremental external growth through strategic acquisitions and alliances

Operational Excellence in everything we do

To support these goals, we launched Operational Excellence in fiscal 2006, a major strategic initiative being led by Chief Operating Officer Derwin Gilbreath. Derwin and his team are identifying the barriers that hinder excellence in execution in all aspects of our business. Given our improved financial strength and performance, we are now in a better position to make greater capital improvements to support better work flow in our operations. In many locations, we are investing in equipment that is more oriented toward the production flow of lean manufacturing than the batch mode of production. We also plan to invest in our people for greater flexibility so that we are better able to shift resources to meet customer needs and exceed their expectations. To help Columbus McKinnon Associates achieve their best, we are investing in training and organizational development to support individual growth, identification and development of skill sets and stronger employee engagement. Ultimately, our Associates are the major driver of our success. The 3,100 Associates of the Columbus McKinnon team were instrumental in delivering strong operating performance in fiscal 2006 and we are making the investments to ensure they deliver even better results in the years ahead.

Columbus McKinnon is the largest producer of higher grade chain in North America.

Columbus McKinnon is a major producer and servicer of overhead cranes.

We also want to thank the members of your Board of Directors, who bring outstanding knowledge and judgment to our strategic planning and corporate governance activities. In particular, we would like to recognize Herbert P. Ladds, Jr. who will now retire as a Director of the Company at our 2006 annual meeting, capping 35 years of outstanding service to Columbus McKinnon. Throughout his three decades of leadership, Herb was a driving force behind Columbus McKinnon's growth and prosperity. He joined the Company in 1971 as Vice President - Sales & Marketing and became Executive Vice President in 1981 before being named President in 1982. Herb served as Chief Executive Officer from 1986 until his retirement as CEO in July 1998 when he was named Chairman. As Vice President – Sales & Marketing, Herb traveled all over the world visiting plants and customers and became an international ambassador of goodwill for Columbus McKinnon. As Chief Executive Officer from 1986 to 1998, Herb guided us through a dramatic period of growth that secured Columbus McKinnon's leading position in North America. On behalf of the Board and the entire Columbus McKinnon family, we thank Herb for his many contributions to the Company's success and wish him continued health and happiness in his retirement.

As fiscal 2007 begins, the future looks bright for Columbus McKinnon. Bookings are very strong as we enter the new fiscal year and on every major front, we are operating from a position of strength with a sound course for the future. We are making prudent investments in the business and remain focused on executing well. We are steadfastly committed to our successful strategy of further cost and debt reduction, global growth and expanding our market leadership in North America. All of this will be accomplished through our greatest resource, our people, who realize that the best is yet to come. We are very pleased with the significant progress made over the last few years, but know we have yet to reach Columbus McKinnon's full potential. As we work toward achieving that goal, we are raising the bar and setting our sights even higher for Columbus McKinnon and our shareholders. We look forward to reporting on our continued progress and greatly appreciate your confidence and support.

With over one million units sold since its introduction in 1955, the Lodestar is the world's leading electric chain hoist.

Timothy T. Tevens

President and Chief Executive Officer

Ernest R. Verebelyi
Chairman of the Board of Directors

Major Products: 82 Percent of Fiscal 2006 Sales

HOISTS

Products: Electric chain hoists, electric wire rope hoists, hand-operated hoists, lever tools, hoist trolleys, air balancers and air-powered hoists. Custom-designed, below-the-hook tooling, clamps, pallet trucks and textile strappings.

Brands: Yale, CM, Coffing, Shaw-Box, Budgit, Chester, Little Mule, Camlok, Tugit, Tigrip, Cady

Distribution and Service: Over 20,000 distributors in commercial and consumer channels for both domestic and international markets. A leading supplier to industrial catalog houses. Service for hoist products is provided through over 350 hoist parts, product, service and repair centers. Columbus McKinnon's CraneMart program supports over 50 independent crane builders covering 89 markets with best pricing, parts distribution rights, dedicated technical support, shared resources and its TechLink automated crane and hoist inspection service.

HOIST PRODUCT LINE KEY METRICS

Metric	FYE 2006	FYE 2005
Sales	\$258.1 million	\$227.8 million
Percentage of Total Sales	46%	44%
U.S. #1 Market Share*	57%	61%
Inventories	\$39.3 million	\$39.5 million

^{*} Powered hoists, manual hoists and trolleys representing 53% and 52% of fiscal 2006 and fiscal 2005 hoist sales, respectively.

End-user Markets: General manufacturing, production industries, marine, power generation and distribution, automotive parts manufacturing, entertainment, construction, mining, crane building, logging, oil and gas production, pulp and paper, metals production, steel processing, warehousing and distribution.

CHAIN & FORGED ATTACHMENTS

Products: Alloy chain (used in overhead lifting, pulling and restraining applications), carbon steel welded-link chain (used for load securement and other non-overhead lifting applications). Rigging accessories, including a complete line of alloy and carbon steel closed-die forged attachments used in virtually all

types of chain, synthetic and wire rope rigging applications in a variety of industries. Columbus McKinnon also produces custom application forgings for a number of OEM customers.

Brands: CM, Big Orange, Hammerlok, Herc-Alloy, Dixie Industries, Midland Forge, Durbin Durco, AgWorks, ColorLinks

Distribution and Service: Industrial distributors, hardware distributors and mass merchandiser outlets. Aftermarket service is provided to product end-users through a network of independent distributors, including 13 chain service centers.

CHAIN AND FORGED ATTACHMENTS PRODUCT LINE KEY METRICS

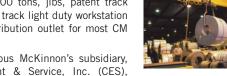

Metric	FYE 2006	FYE 2005

COLUMBUS McKINNON CORPORATION 2006 Annual Report on Form 10-K

This annual report contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to differ materially from the results expressed or implied by such statements, including general economic and business conditions, conditions affecting the industries served by us and our subsidiaries, conditions affecting our customers and suppliers, competitor responses to our products and services, the overall market acceptance of such products and services, the integration of acquisitions and other factors set forth herein under "Management's Discussion and Analysis of Results of Operations and Financial Condition – Factors Affecting Our Operating Results." We use words like "will," "may," "should," "plan," "believe," "expect," "anticipate," "intend," "future" and other similar expressions to identify forward looking statements. These forward looking statements speak only as of their respective dates and we do not undertake and specifically decline any obligation to publicly release the results of any revisions to these forward-looking statements that may be made to reflect any future events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated changes. Our actual operating results could differ materially from those predicted in these forward-looking statements, and any other events anticipated in the forward-looking statements may not actually occur.

PART I

Item 1. Business

General

We are a leading manufacturer and marketer of hoists, cranes, chain, conveyors, material handling systems, lift tables and component parts serving a wide variety of commercial and industrial end-user markets. Our products are used to efficiently and ergonomically move, lift, position or secure objects and loads. We are the domestic market leader in hoists, our principal line of products, which we believe provides us with a strategic advantage in selling our other products. We have achieved this leadership position through strategic acquisitions, our extensive and well-established distribution channels and our commitment to product innovation and quality. We have one of the most comprehensive product offerings in the industry and we believe we have more overhead hoists in use in North America than all of our competitors combined. Our brand names, including CM, Coffing, Duff-Norton, Shaw-Box and Yale, are among the most recognized and well-respected in our marketplace.

The Building of Our Business

Founded in 1875, we have grown to our current size and leadership position largely as the result of the 14 businesses we acquired since February 1994. These acquisitions have significantly broadened our product lines and services and expanded our geographic, end-user markets and our customer base. Our senior management has substantial experience in the acquisition and integration of businesses, aggressive cost management, efficient manufacturing techniques and global operations, all of which are critical to our long-term growth strategy. We have a proven track record of acquiring complementary businesses and product lines, integrating their activities into our organization, and aggressively managing their cost structures to improve operating efficiencies. The history of our Products and Solutions acquisitions since 1994 is outlined below (purchase price in millions):

Purchase						
Date of Acquisition	Acquired Company	<u>Price</u>	Products/Services			
April 1999	Washington Equipment	\$ 6.4	Overhead cranes			
	Company					
March 1999	GL International (1)	20.6	Overhead cranes			
January 1999	Camlok/Tigrip	10.6	Plate clamps, crane weighers			
December 1998	Gautier	2.9	Rotary unions, swivel joints			
August 1998	Abell-Howe Crane	7.0	Overhead cranes			
March 1998	ASI (2)	155.0	Design and manufacture of custom conveyor systems			
January 1998	Univeyor	15.0	Design and manufacture of powered roller conveyor systems			
December 1996	Lister (3)	7.0	Cement kiln, anchor and buoy chain			
October 1996	Yale (4)	270.0	Hoists, scissor lift tables, actuators, jacks and rotary unions			
November 1995	Lift-Tech	63.0	Hoists			
October 1995	Endor	2.0	Hoists			
January 1995	Cady Lifters	0.8	Below-the-hook lifters			
December 1994	Conco	0.8	Operator controlled manipulators			
February 1994	Durbin-Durco	2.4	Load securing equipment and attachments			

D..... 1.

Our Position in the Industry

The \$60 billion U.S. material handling industry is generally divided into the following sectors:

- · overhead material handling and lifting devices;
- continuous materials movement;
- · wheeled handling devices;
- pallets, containers and packaging;
- storage equipment and shop furniture;
- automation systems and robots; and
- services and unbundled software.

The breadth of our products and services enables us to participate in each of these sectors, except for pallets, containers and packaging and storage equipment and shop furniture. This diversification, together with our extensive and varied distribution channels, minimizes our dependence on any particular product, market or customer. We believe that none of our competitors offers the variety of products or services in the markets we serve.

We believe that the demand for our products and services has increased during the last twelve months and we believe the demand will continue to increase in the future as a result of several favorable trends. These trends include:

Favorable Industry Trends. The U.S. industrial economy has improved since 2003, as U.S. industrial capacity utilization rates have increased from cyclical lows. Our business performance is influenced by the state of the U.S. industrial economy.

Productivity Enhancement. In recent years, employers have responded to competitive pressures by seeking to maximize productivity and efficiency. Our hoists and other lifting and positioning products allow loads to be lifted and placed quickly, precisely, with little effort and fewer people, thereby increasing productivity and reducing cycle time.

⁽¹⁾ In January 2002, we sold Handling Systems & Conveyors, Inc., a subsidiary of GL International.

⁽²⁾ In May 2002, we sold substantially all of the assets of Automatic Systems, Inc. ("ASI") and in March 2003, we sold LICO Steel, Inc., a subsidiary of Audubon West, formerly ASI.

⁽³⁾ In February 2004, we sold the assets of the Lister Chain & Forge division.

⁽⁴⁾ In August 1998, we sold the Mechanical Products division of Yale.

Safety Regulations and Concerns. Driven by federal and state workplace safety regulations such as the Occupational Safety and Health Act and the Americans with Disabilities Act, and by the general competitive need to reduce costs such as health insurance premiums and workers' compensation expenses, employers seek safer ways to lift and position loads. Our lifting and positioning products enable these tasks to be performed with reduced risk of personal injury.

Consolidation of Suppliers. In an effort to reduce costs and increase productivity, our customers and end-users are increasingly consolidating their suppliers. We believe that our competitive strengths will enable us to benefit from this consolidation and enhance our market share.

Our Competitive Strengths

Leading Market Positions. We are a leading manufacturer of hoists and alloy and high strength carbon steel chain in North America. We have developed our leading market positions over our 131-year history by emphasizing technological innovation, manufacturing excellence and superior after-sale service. Approximately 74% of our domestic net sales for the year ended March 31, 2006 were from product categories in which we believe we hold the number one market share. We believe that the strength of our established products and brands and our leading market positions provide us with significant competitive advantages, including preferred supplier status with a majority of our largest customers. Our large installed base of products also provides us with a significant competitive advantage in selling our products to existing customers as well as providing repair and replacement parts.

The following table summarizes the product categories where we believe we are the market leader:

			Percentage of
Product Category	U.S. Market Share	U.S. Market Position	Domestic Net Sales
Powered Hoists (1)	53%	#1	27%
Manual Hoists & Trolleys (1)	66%	#1	14%
Forged Attachments (1)	46%	#1	10%
Lifting and Sling Chains (1)	59%	#1	6%
Hoist Parts (2)	60%	#1	9%
Mechanical Actuators (3)	40%	#1	5%
Tire Shredders (4)	80%	#1	2%
Jib Cranes (5)	45%	#1	<u>1%</u>
			74%

⁽¹⁾ Market share and market position data are internal estimates derived from survey information collected and provided by our trade associations.

Comprehensive Product Lines and Strong Brand Name Recognition. We believe we offer the most comprehensive product lines in the markets we serve. We are the only major supplier of material handling equipment offering full lines of hoists, chain and attachments. Our capability as a full-line supplier has allowed us to (i) provide our customers with "one-stop shopping" for material handling equipment, which meets some customers' desires to reduce the number of their supply relationships in order to lower their costs, (ii) leverage our engineering, research and development and marketing costs over a larger sales base and (iii) achieve purchasing efficiencies on common materials used across our product lines.

⁽²⁾ Market share and market position data are internal estimates based on our market shares of Powered Hoists and Manual Hoists & Trolleys, which we believe are good proxies for our Hoist Parts market share because we believe most end-users purchase Hoist Parts from the original equipment supplier.

⁽³⁾ Market share and market position data are internal estimates derived by comparison of our net sales to net sales of one of our competitors based on discussions with that competitor, and to estimates of total market sales from a trade association.

⁽⁴⁾ Market share and market position data are internal estimates derived by comparing the number of our tire shredders in use and their capacity to estimates of the total number of tires shredded published by a trade association.

⁽⁵⁾ Market share and market position are internal estimates derived from both the number of bids we win as a percentage of the total projects for which we submit bids and from estimates of our competitors' net sales based on their relative position in distributor catalogues.

In addition, our brand names, including Budgit, Chester, CM, Coffing, Duff-Norton, Little Mule, Shaw-Box and Yale, are among the most recognized and respected in the industry. The CM name has been synonymous with overhead hoists since manual hoists were first developed and marketed under the name in the early 1900s. We believe that our strong brand name recognition has created customer loyalty and helps us maintain existing business, as well as capture additional business. No single product comprises more than 1% of our sales, a testament to our broad and diversified product offering.

Distribution Channel Diversity and Strength. Our products are sold to over 20,000 general and specialty distributors and OEMs. We enjoy long-standing relationships with, and are a preferred provider to, the majority of our largest distributors and industrial buying groups. Over the past decade, there has been significant consolidation among distributors of material handling equipment. We have benefited from this consolidation and have maintained and enhanced our relationships with our leading distributors, as well as formed new relationships. We believe our extensive North American distribution channels provide a significant competitive advantage and allow us to effectively market new product line extensions and promote cross-selling.

Expanding International Markets. We have significantly grown our international sales since becoming a public company in 1996. Our international sales have grown from \$34.3 million (representing 16% of total sales) in fiscal 1996 to \$198.3 million (representing 36% of our total sales) during the year ended March 31, 2006. This growth has occurred primarily in Europe, South America and Asia-Pacific where we have recently opened additional sales offices. Our international business has provided us, and we believe will continue to provide us, with significant growth opportunities and new markets for our products.

Low-Cost Manufacturing with Significant Operating Leverage. We believe we are a low-cost manufacturer and we will continue to consolidate our manufacturing operations and reduce our manufacturing costs through the initiatives summarized below. Our low-cost manufacturing capability continues to positively impact our operating performance as volumes increase.

- *Rationalization and Consolidation.* From fiscal 2002 through fiscal 2004, we closed 10 manufacturing plants and three warehouses, as more fully described in "Our Strategy" below.
- Lean Manufacturing. In fiscal 2002, we initiated Lean Manufacturing techniques, facilitating substantial inventory reductions, a significant decline in required manufacturing floor area, a decrease in product lead time and improved productivity and on-time deliveries.
- *Purchasing Council*. We continue to leverage our company-wide purchasing power through our Purchasing Council to reduce our costs.
- Selective Vertical Integration. We manufacture many of the critical parts and components used in the manufacture of our hoists and cranes, resulting in reduced costs.
- International Expansion. Our continued expansion of our manufacturing facilities in China and Mexico provides us with another cost efficient platform to manufacture and distribute certain of our products. We now operate 26 manufacturing facilities in nine countries, with 26 stand alone sales and service offices in 12 countries, and nine stand alone warehouse facilities in five countries.

Strong After-Market Sales and Support. We believe that we retain customers and attract new customers due to our ongoing commitment to customer service and satisfaction. We have a large installed base of hoists and chain that drives our after-market sales for components and repair parts and is a stable source of higher margin business. We maintain strong relationships with our customers and provide prompt aftermarket service to end-users of our products through our authorized network of 13 chain repair stations and over 350 hoist service and repair stations.

Long History of Free Cash Flow Generation and Significant Debt Reduction. We have consistently generated positive free cash flow (which we define as net cash provided by operating activities less capital expenditures) by continually reducing our costs, increasing our inventory turnover and reducing the capital intensity of our manufacturing operations. From the beginning of fiscal 2004 through fiscal 2006, we have reduced total debt by \$106.5 million, from \$316.3 million to \$209.8 million, which includes application of \$47.6 million of net proceeds from our November 2005 secondary offering.

Experienced Management Team with Significant Equity Ownership. Our senior management team provides a depth and continuity of experience in the material handling industry. Our management has experience in aggressive cost management, balance sheet management, efficient manufacturing techniques, acquiring and integrating businesses and global operations, all of which are critical to our long-term growth. Our directors and executive officers, as a group, own an aggregate of approximately 7% of our outstanding common stock.

Our Strategy

Increase our Domestic Organic Growth. We intend to leverage our strong competitive advantages to increase our domestic market share across all of our product lines by:

- Leveraging Our Strong Competitive Position. Our large diversified customer base, our extensive distribution channels and our close relationship with our distributors provide us with insights into customer preferences and product requirements that allow us to anticipate and address the future needs of end-users.
- Introducing New and Cross-Branded Products. We continue to expand our business by developing new material handling products and services and expanding the breadth of our product lines to address customer needs. Over the past three years, we have developed over 100 new or cross-branded products, representing approximately \$27.5 million in fiscal 2006 revenues. During fiscal 2004, we established a dedicated hoist product development team. The majority of the hoist products under development are guided by the Federation of European Manufacturing, or FEM, standard. We believe these FEM hoist products will facilitate our global sales expansion strategy as well as improve our cost competitiveness against internationally made products imported into the U.S.

Recent new product introductions include:

- global wire rope hoists used in overhead cranes;
- Hand hoists and lever tools manufactured at our Chinese plants;
- a variety of new forged lifting attachments;
- pallet layer picking systems;
- high-speed, light-weight, mini-load cranes, used in warehouse applications; and
- Techlink crane and hoist maintenance and inspection software.
- Leveraging Our Brand Portfolio to Maximize Market Coverage. Most industrial distributors carry one or two lines of material handling products on a semi-exclusive basis. Unlike many of our competitors, we have developed and acquired multiple well-recognized brands that are viewed by both distributors and end-users as discrete product lines. As a result, we are able to sell our products to multiple distributors in the same geographic area. This strategy maximizes our market coverage and provides the largest number of end-users with access to our products.

Continue to Grow in International Markets. Our international sales of \$198.3 million comprised 36% of our net sales for the year ended March 31, 2006, as compared to \$34.3 million, or 16% of our net sales, in fiscal 1996, the year we became a public company. We sell to distributors in over 50 countries and have our primary international facilities in Canada, Mexico, Germany, the United Kingdom, Denmark, France and China. In addition to new product introductions, we continue to expand our sales and service presence in the major market areas of Europe, Asia-Pacific and South America through our sales offices and warehouse facilities in Europe, Thailand, Brazil, Uruguay and Mexico. We intend to increase our sales by manufacturing and exporting a broader array of high quality, low-cost products and components from our facilities in Mexico and China for distribution in Europe and Asia-Pacific. We have developed and are continuing to expand upon new hoist products in compliance with FEM standards to enhance our global distribution.

Further Reduce Our Operating Costs and Increase Manufacturing Productivity. Our objective is to remain a low-cost producer. We continually seek ways to reduce our operating costs and increase our manufacturing productivity including through our on-going expansion of our manufacturing capacity in low-cost regions, including Mexico and China. In furtherance of this objective, we have undertaken the following:

- Rationalization of Facilities. From fiscal 2002 through fiscal 2004, we closed 10 manufacturing plants and three warehouses, consolidated a number of similar product lines and standardized certain component parts resulting in an aggregate cost savings of approximately \$14 million. We have sufficient capacity to meet current and future demand. We are currently investigating opportunities for further facility rationalization.
- Implementation of Lean Manufacturing. We expect to continue to identify potential efficiencies in our operations through Lean Manufacturing initiated in fiscal 2002. Through fiscal 2006, we have instituted Lean Manufacturing at 16 of our major facilities resulting in the recapture of approximately 164,000 square feet of manufacturing floor area and the consolidation of an additional 920,000 square feet from closed facilities. Additionally, we have reduced inventories by approximately \$34.1 million, or 31.3%, improved productivity and achieved significant reductions in product lead times. Specifically, in fiscal 2006 and 2005, we improved inventory turns by 7.5% to 5.7x for the fourth quarter of fiscal 2004. Our Lean Manufacturing initiative has complemented our strategy of rationalizing our manufacturing facilities.
- Leverage Our Purchasing Power. Our Purchasing Council was formed in fiscal 1998 to centralize and leverage our overall purchasing power, which has grown through acquisitions and has resulted in significant savings for our company.

Reduce Our Debt. We intend to continue our focus on cash generation for debt reduction through the following initiatives:

- Increase Operating Cash Flow. As a result of the execution of our strategies to reduce our operating costs, increase our domestic organic growth and increase our penetration of international markets, we believe that we will continue to realize favorable operating leverage. We further believe that such operating leverage will result in increased operating cash flow available for debt reduction, as well as investment into new products and new markets.
- Reduce Working Capital. As described above, we believe that our Lean Manufacturing activities are facilitating inventory reduction, improving product lead times and increasing our productivity. We believe our improved working capital management and increased productivity will further result in increased free cash flow available for debt reduction.
- Sale of Excess Real Estate. As a result of our Lean Manufacturing and plant rationalization initiatives, we have identified excess real estate to be sold. During fiscal 2006, we generated \$2.1 million from such real estate sales. The proceeds of such sales have been, and will continue to be, used to repay our outstanding debt.

Our Segments

We currently report our operations in two business segments, Products and Solutions.

Our Products segment designs, manufactures and distributes a broad range of material handling products for various industrial applications and for consumer use. Products in this segment include a wide variety of electric, lever, hand and airpowered hoists; hoist trolleys; industrial crane systems such as bridge, gantry and jib cranes; alloy, carbon steel and kiln chain; closed-die forged attachments, such as hooks, shackles, logging tools and loadbinders; industrial components, such as mechanical and electromechanical actuators, mechanical jacks and rotary unions; and below-the-hook special purpose lifters. These products are typically manufactured for stock or assembled to order from standard components and are sold through a variety of commercial distributors and to end-users. The end-users of our products are in manufacturing plants, power utility facilities and warehouses. Some of our products have farming, mining and logging applications, and we serve a niche market for the entertainment industry. We also sell some of our products to the consumer market through a variety of retailers and wholesalers.

Our Solutions segment is engaged primarily in the design, fabrication and installation of integrated workstation and facility-wide material handling systems and in the design and manufacture of tire shredders. This segment also included our Positech manipulator business which was divested in February 2004. The products and services of this segment are highly engineered, are typically built to order and are primarily sold directly to end-users for specific applications in a variety of industries.

Note 20 to our consolidated financial statements included elsewhere herein provides information related to our business segments in accordance with U.S. generally accepted accounting principles. Summary information concerning our business segments for fiscal 2006, 2005 and 2004 is set forth below.

			Fis	cal Years End	ed March 31,			
	2006	5		20	05		20	004

Products Segment

Products

Our Products segment primarily designs, manufactures and distributes a broad range of material handling, lifting and positioning products for various applications in industry and for consumer use and has total assets of approximately \$530.6 million as of March 31, 2006. These products are typically manufactured for stock or assembled to order from standard components and are sold through a variety of distributors. Approximately 75% of our Products segment net sales is derived from the sale of products that we sell at a unit price of less than \$5,000. In fiscal 2006, net sales of the Products segment were approximately \$493.9 million or approximately 88.8% of our net sales, of which approximately \$342.5 million, or 69.4% were domestic and \$151.4 million, or 30.6% were international. The following table sets forth certain sales data for the products of our Products segment, expressed as a percentage of net sales of this segment for fiscal 2006 and 2005:

	Fiscal Years Ended March 31,		
	2006	2005	
Hoists	52%	50%	
Chain	15	16	
Forged attachments	12	12	
Industrial cranes	13	14	
Industrial components	8	8	
	100%	100%	

Hoists. We manufacture a variety of electric chain hoists, electric wire rope hoists, hand-operated hoists, lever tools and air-powered balancers and hoists. Load capacities for our hoist product lines range from one-eighth of a ton to 100 tons. These products are sold under our Budgit, Chester, CM, Coffing, Little Mule, Shaw-Box, Yale and other recognized trademarks. Our hoists are sold for use in a variety of general industrial applications, as well as for use in the entertainment, consumer, rental and other markets. We also supply hoist trolleys, driven manually or by electric motors, for the industrial, consumer and OEM markets.

We offer a line of custom-designed, below-the-hook tooling, clamps, pallet trucks and textile strappings. Below-the-hook tooling and clamps are specialized lifting apparatus used in a variety of lifting activities performed in conjunction with hoist and chain applications. Textile strappings are below-the-hook attachments, frequently used in conjunction with hoists.

Chain. We manufacture alloy and carbon steel chain for various industrial and consumer applications. Federal regulations require the use of alloy chain, which we first developed, for overhead lifting applications because of its strength and wear characteristics. A line of our alloy chain is sold under the Herc-Alloy brand name for use in overhead lifting, pulling and restraining applications. In addition, we also sell specialized load chain for use in hoists, as well as three grades and multiple sizes of carbon steel welded-link chain for various load securing and other non-overhead lifting applications. We also manufacture kiln chain sold primarily to the cement manufacturing market. In addition, we previously sold anchor and buoy chain to the U.S. and Canadian governments through our Lister Chain & Forge division which was sold in February 2004.

Forged Attachments. We also produce a complete line of alloy and carbon steel closed-die forged attachments, including hooks, shackles, hitch pins and master links. These forged attachments are used in chain, wire rope and textile rigging applications in a variety of industries, including transportation, mining, construction, marine, logging, petrochemical and agriculture.

In addition, we manufacture carbon steel forged and stamped products, such as loadbinders, logging tools and other securing devices, for sale to the industrial, consumer and logging markets through industrial distributors, hardware distributors, mass merchandiser outlets and OEMs.

Industrial Cranes. We entered the crane manufacturing market through our August 1998 acquisition of Abell-Howe, a Chicago-based regional manufacturer of jib and overhead bridge cranes. Our March 1999 acquisition of GL International, which included the Gaffey and Larco brands, and our April 1999 acquisition of Washington Equipment Company established us as a significant participant in the crane building and servicing markets. Crane builders represent a specialized distribution channel for electric wire rope hoists, chain hoists and other crane components.

Industrial Components. Through our Duff-Norton division, we design and manufacture industrial components such as mechanical and electromechanical actuators, mechanical jacks and rotary unions for sale domestically and abroad. Actuators are linear motion devices used in a variety of industries, including the paper, steel and aerospace industries. Mechanical jacks are heavy duty lifting devices used in the repair and maintenance of railroad equipment, locomotives and industrial machinery. Rotary unions are devices that transfer a liquid or gas from a fixed pipe or hose to a rotating drum, cylinder or other device. These unions are unique in that they connect a moving or rotating component of a machine to fixed plumbing without major spillage or leakage. Rotary unions are used in a variety of industries including pulp and paper, printing, textile and fabric manufacturing, rubber and plastic.

Sales and Marketing

Our sales and marketing efforts in support of our Products segment consist of the following programs:

Factory-Direct Field Sales and Customer Service. We sell our products through our direct sales forces of more than 125 salespersons and through independent sales agents worldwide. Our sales are further supported by our more than 230 company-trained customer service correspondents and sales application engineers. We compensate our sales force through a combination of base salary and a commission plan based on top line sales and a pre-established sales quota.

Product Advertising. We promote our products by regular advertising in leading trade journals as well as producing and distributing high quality information catalogs. We support our product distribution by running cooperative "pull-through" advertising in over 15 vertical trade magazines and directories aimed toward theatrical, international, consumer and crane builder markets. We run targeted advertisements for chain, hoists, forged attachments, scissor lift tables, actuators, hydraulic jacks, hardware programs, cranes and light-rail systems.

Trade Show Participation. Trade shows are central to the promotion of our products, and we participate in more than 30 regional, national and international trade shows each year. Shows in which we participate range from global events held in Germany to local "markets" and "open houses" organized by individual hardware and industrial distributors. We also attend specialty shows for the entertainment, rental and safety markets, as well as general purpose industrial and consumer hardware shows. In fiscal 2006, we participated in trade shows in the U.S., Canada, Mexico, Germany, the United Kingdom, France, China and Brazil.

Industry Association Membership and Participation. As a recognized industry leader, we have a long history of work and participation in a variety of industry associations. Our management is directly involved at the officer and director levels of numerous industry associations including the following: ISA (Industrial Supply Association), AWRF (Associated Wire Rope Fabricators), PTDA (Power Transmission and Distributors Association), SCRA (Specialty Carriers and Riggers Association), WSTDA (Web Sling and Tie Down Association), MHI (Material Handling Institute), HMI (Hoist Manufacturers Institute), CMAA (Crane Manufacturers Association of America), ESTA (Entertainment Services and Technology Association), NACM (National Association of Chain Manufacturers) and ARA (American Rental Association).

Product Standards and Safety Training Classes. We conduct on-site training programs worldwide for distributors and end-users to promote and reinforce the attributes of our products and their safe use and operation in various material handling applications.

Web Sites. In addition to our main corporate web site at www.cmworks.com, we currently sponsor an additional 25 brand specific web sites and sell hand pallet trucks on one of these sites. Our web site at www.cmindustrial.com currently includes electronic catalogs of CM brand hoist and chain products and list prices. Current and potential customers can browse through our diverse product offering or search for specific products by name or classification code and obtain technical product specifications. We continue to add additional product catalogs, maintenance manuals, advertisements and customer service information on our various web sites. Many of the web sites allow distributors to search for personalized pricing information, order status and product serial number data and to enter sales orders.

Distribution and Markets

The distribution channels for the Products segment include a variety of commercial distributors. In addition, the Products segment sells overhead bridge, jib and gantry cranes directly to end-users. We also sell to the consumer market through wholesalers. Our products are sold through the following distribution channels:

General Distribution Channels. Our general distribution channels consist of:

- Industrial distributors that serve local or regional industrial markets and sell a variety of products for maintenance, repair, operating and production, or MROP, applications through their own direct sales force.
- Rigging shops that are distributors with expertise in rigging, lifting, positioning and load securing. Most rigging shops assemble and distribute chain, wire rope and synthetic slings and distribute off-the-shelf hoists and attachments, chain slings and other off-the-shelf products.
- Independent crane builders that design, build, install and service overhead crane and light-rail systems for general industry and also sell a wide variety of hoists and lifting attachments. We sell electric wire rope hoists and chain hoists as well as crane components, such as end trucks, trolleys, drives and electrification systems to crane builders.

Crane End-Users. We sell overhead bridge, jib and gantry cranes, parts and services to end-users through our wholly owned crane builders (Abell-Howe, Gaffey, Larco and Washington Equipment) within the CraneMart[™] network. Our wholly owned crane builders design, manufacture, install and service a variety of cranes with capacities up to 100 tons.

Specialty Distribution Channels. Our specialty distribution channels consist of:

- Catalog houses that market a variety of MROP supplies, including material handling products, either exclusively through large, nationally distributed catalogs, or through a combination of catalog and internet sales and a field sales force. More recently, catalog houses, particularly W.W. Grainger, Inc., are pursuing e-commerce through their web sites. The customer base served by catalog houses, which traditionally included smaller industrial companies and consumers, has grown to include large industrial accounts and integrated suppliers.
- Material handling specialists and integrators that design and assemble systems incorporating hoists, overhead
 rail systems, trolleys, scissor lift tables, manipulators, air balancers, jib arms and other material handling
 products to provide end-users with solutions to their material handling problems.

— Entertainment equipment distributors that design, supply and install a variety of material handling and rigging equipment for concerts, theaters, ice shows, sports arenas, convention centers and night clubs.

Service-After-Sale Distribution Channel. Service-after-sale distributors include our authorized network of 13 chain repair service stations and over 350 hoist service and repair stations. This service network is designed for easy parts and service access for our large installed base of hoists and related equipment in North America.

OEM/Government Distribution Channels. This channel consists of:

- OEMs that supply various component parts directly to other industrial manufacturers as well as private branding and packaging of our traditional products for material handling, lifting, positioning and special purpose applications.
- Government agencies, including the U.S. and Canadian Navies and Coast Guards, that purchase primarily load securing chain and forged attachments.

Consumer Distribution. Consumer sales, consisting primarily of carbon steel chain and assemblies, forged attachments and hand powered hoists, are made through five distribution channels: two-step wholesale hardware distribution; one-step distribution direct to retail outlets; trucking and transportation distributors; farm hardware distributors; and rental outlets.

International Distribution. We distribute virtually all of our products in over 50 countries on six continents through a variety of distribution channels.

Customer Service and Training

We maintain customer service departments staffed by trained personnel for all of our Products segment sales divisions, and regularly schedule product and service training schools for all customer service representatives and field sales personnel. Training programs for distribution and service station personnel, as well as for end-users, are scheduled on a regular basis at most of our facilities and in the field. We have more than 350 service and repair stations worldwide that provide local and regional repair, warranty and general service work for distributors and end-users. End-user trainees attending our various programs include representatives of General Motors, DuPont, 3M, GTE, Cummins Engine, General Electric and many other industrial and entertainment organizations.

We also provide, in multiple languages, a variety of collateral material in video, cassette, CD-ROM, slide and print format addressing relevant material handling topics such as the care, use and inspection of chains and hoists, and overhead lifting and positioning safety. In addition, we sponsor advisory boards made up of representatives of our primary distributors and service-after-sale network members who are invited to participate in discussions focused on improving products and service. These boards enable us and our primary distributors to exchange product and market information relevant to industry trends.

Backlog

Our Products segment backlog of orders at March 31, 2006 was approximately \$53.6 million compared to approximately \$42.3 million at March 31, 2005. Our orders for standard products are generally shipped within one week. Orders for products that are manufactured to customers' specifications are generally shipped within four to twelve weeks. Given the short product lead times, we do not believe that the amount of our Products segment backlog of orders is a reliable indication of our future sales.

Competition

Despite recent consolidation, the material handling industry remains highly fragmented. We face competition from a wide range of regional, national and international manufacturers in both domestic and international markets. In addition, we often compete with individual operating units of larger, highly diversified companies.

The principal competitive factors affecting our Products segment include product performance, functionality, price, brand, reputation, reliability and availability, as well as customer service and support. Other important factors include distributor relationships, territory coverage and the ability to service the distributor with on-time delivery and repair services.

Major competitors with our Products segment for hoists are Demag, Kito-Harrington, Ingersoll-Rand, KCI Konecranes and Morris Material Handling; for chain are Campbell Chain, Peerless Chain Company and American Chain and Cable Company; for forged attachments are The Crosby Group and Brewer Tichner Company; for crane building are Demag, KCI Konecranes, Morris Material Handling and a variety of independent crane builders; and for industrial components are Deublin, Joyce-Dayton and Nook Industries.

Solutions Segment

The Solutions segment is engaged primarily in the design, fabrication and installation of integrated work station and facility-wide material handling systems and in the manufacture and distribution of lift tables and tire shredders and has total assets of \$35.4 million as of March 31, 2006. Net sales of the Solutions segment in fiscal 2006 were \$62.1 million, or 11.2% of our total net sales, of which \$15.1 million, or 24.4% were domestic and \$47.0 million, or 75.6% were international. The following table sets forth certain sales data for the products and services of our Solutions segment, expressed as a percentage of this segment's net sales for fiscal 2006 and 2005:

	Fiscal Years Ended March 31,		
_	2006	2005	
Integrated material handling conveyor systems	69%	70%	
Lift tables	12	13	
Light-rail systems	4	4	
Other	15	13	
_	100%	100%	

Products and Services

Integrated Material Handling Conveyor Systems. Conveyors are an important component of many material handling systems, reflecting their high functionality for transporting material throughout manufacturing and warehouse facilities. We specialize in designing computer-controlled and automated powered roller conveyors for use in warehouse operations and distribution systems. Since fiscal 2003, we have been executing a revenue growth strategy by developing our capabilities to function as a turnkey integrator of material handling systems, while continuing to provide the conveyors required for the systems.

Lift Tables. Our American Lifts division manufactures powered lift tables. These products enhance workplace ergonomics and are sold primarily to customers in the manufacturing, construction, general industrial and air cargo industries.

Light-Rail Systems. Introduced in fiscal 2001, light-rail systems are portable steel overhead beam configurations used at workstations, from which hoists are frequently suspended.

Sales and Marketing

The products and services of the Solutions segment are sold primarily to large sophisticated corporate end-users, including Federal Express, UPS, United Biscuits, Lego, John Deere, Lowe's and other industrial companies, systems integrators and distributors. In the sale of our integrated material handling conveyor systems, we act as a prime contractor with turnkey responsibility or as a supplier working closely with the customer's general contractor. Sales are generated by internal sales personnel and rely heavily on engineer-to-engineer interactions with the customer. The process of generating client contract awards for integrated conveyor systems generally entails receiving a request-for-quotation from customers and undergoing a competitive bidding process. The Solutions segment also sells light-rail systems and scissor lift tables through its internal sales force and through specialized independent distributors and manufacturers representatives.

Customer Service and Training

The Solutions segment offers a wide range of value-added services to customers including: an engineering review of the customer's processes; an engineering solution for identified material handling problems; project management; and custom design, manufacturing and installation services. We also offer after-sales services including operator training, maintenance and hot-line support. The typical length of after-sales service varies depending on customer requirements and supplemental training courses are offered as needed.

Backlog

Revenues from our Solutions segment are generally recognized within one to six months. Our backlog of orders at March 31, 2006 was approximately \$13.0 million compared to approximately \$9.6 million at March 31, 2005.

Competition

The principal competitive factors affecting the market for the products and services of our Solutions segment include application solutions, performance and price. The process of generating client contract awards for these businesses generally entails receiving a request-for-quotation from end-users and undergoing a competitive bidding process. Our Solutions segment competes primarily with Crisplant, Diafuku, Swisslog, Gorbel and Southworth.

Employees

At March 31, 2006, our continuing operations had 3,081 employees; 1,957 in the U.S., 122 in Canada, 159 in Mexico/South America and 843 in Europe and Asia. Approximately 698 of our employees are represented under seven separate U.S. or Canadian collective bargaining agreements which terminate at various times between August 2006 and May 2009. The contract which expires in August 2006 currently covers 137 employees. Preliminary informal negotiations for an extension of this agreement have begun. There is another contract which expires in March 2007 and currently covers 156 employees. We believe that our relationship with our employees is good.

Raw Materials and Components

Our principal raw materials and components are steel, consisting of structural steel, processed steel bar, forging bar steel, steel rod and wire, steel pipe and tubing and tool steel; electric motors; bearings; gear reducers; castings; and electro-mechanical components. These commodities are all available from multiple sources. We purchase most of these raw materials and components from a limited number of strategic and preferred suppliers under long-term agreements which are negotiated on a company-wide basis through our Purchasing Council to take advantage of volume discounts. As the steel industry is cyclical and steel prices can fluctuate significantly, beginning in approximately January 2004 we saw significant cost increases in certain types of steel in certain markets. We generally seek to pass on materials price increases to our distribution channel partners and enduser customers, although a lag period often exists. We believe we have been successful in instituting surcharges and price increases to pass on these material cost increases. We will continue to monitor our costs and reevaluate our pricing policies. Our ability to pass on these increases is determined by market conditions.

Manufacturing

We manufacture approximately 90% of the products we sell. Additionally, we outsource components and finished goods from an established global network of suppliers. We regularly upgrade our manufacturing facilities and invest in tooling, equipment and technology. We have implemented Lean Manufacturing in our plants which has resulted in inventory reductions, reductions in required manufacturing floor area, shorter product lead time and increased productivity.

Our manufacturing operations are highly integrated. Although raw materials and some components such as motors, bearings, gear reducers, castings and electro-mechanical components, are purchased, our vertical integration enables us to produce many of the components used in the manufacturing of our products. We manufacture hoist lifting chain, steel forged gear blanks, lift wheels, trolley wheels, and hooks and other attachments for incorporation into our hoist products. These products are also sold as spare parts for hoist repair. Additionally, our hoists are used as components in the manufacture of crane systems by us and by our crane-builder customers. We believe this vertical integration results in lower production costs, greater manufacturing flexibility and higher product quality, and reduces our reliance on outside suppliers.

Environmental and Other Governmental Regulation

Like most manufacturing companies, we are subject to various federal, state and local laws relating to the protection of the environment. To address the requirements of such laws, we have adopted a corporate environmental protection policy which provides that all of our owned or leased facilities shall, and all of our employees have the duty to, comply with all applicable environmental regulatory standards, and we have initiated an environmental auditing program for our facilities to ensure compliance with such regulatory standards. We have also established managerial responsibilities and internal communication channels for dealing with environmental compliance issues that may arise in the course of our business. We have made and could be required to continue to make significant expenditures to comply with environmental requirements. Because of the complexity and changing nature of environmental regulatory standards, it is possible that situations will arise from time to time requiring us to incur additional expenditures in order to ensure environmental regulatory compliance. However, we are not aware of any environmental condition or any operation at any of our facilities, either individually or in the aggregate, which would cause expenditures having a material adverse effect on our results of operations, financial condition or cash flows and, accordingly, have not budgeted any material capital expenditures for environmental compliance for fiscal 2007.

Certain environmental laws, such as the U.S. federal Superfund laws and similar state statutes, can impose liability on current or former owners or operators of a site, or on parties who disposed of waste at a site, for the entire cost of cleaning up a site contaminated by hazardous substances. These costs may be assessed regardless of whether the party owned or operated the site at the time of the releases or the lawfulness of the original disposal activity. The required remedial activities are usually performed in the context of administrative or judicial enforcement proceedings brought by regulatory authorities, or in the context of voluntary cleanup agreements entered into with such regulatory authorities. We could incur substantial costs, including cleanup costs and third-party claims, as a result of liabilities under such environmental laws. For example, we have been identified by the New York State Department of Environmental Conservation, or NYSDEC, along with other companies, as a potentially responsible party, or PRP, at the Frontier Chemical Site in Pendleton, New York, a site listed on NYSDEC's Registry of Inactive Hazardous Waste Disposal sites. From 1958 to 1977, the Pendleton Site had been operated as a commercial waste treatment and disposal facility. We sent waste pickling liquor generated at our facility in Tonawanda, New York, to the Pendleton Site during the period from approximately 1969 to 1977, and we participated with other PRPs in conducting the remediation of the Pendleton Site under a consent order with NYSDEC. Construction in connection with the remediation has been completed and this project is currently in its operations and maintenance phase. As a result of a negotiated cost allocation among the participating PRPs, we have paid our pro rata share of the remediation construction costs and accrued our share of the ongoing operations and maintenance costs. As of March 31, 2006, we have paid approximately \$1.0 million in remediation and ongoing operations and maintenance costs associated with the Pendleton Site. The participating PRPs have identified and commenced a cost recovery action against a number of other parties who sent hazardous substances to the Pendleton Site. Full settlements have been reached with all defendants in the cost recovery action. All settlement payments in connection with the Pendleton Site litigation have been made, and we have received \$0.2 million as our share of the settlement proceeds. We have also entered into a settlement agreement with one of our insurance carriers in the amount of \$0.7 million in connection with the Pendleton Site and have received payment in full of the settlement amount.

We are investigating past waste disposal activities at a facility in Cleveland, Texas, operated by our subsidiary, Crane Equipment and Service, Inc., and we have entered into a voluntary agreement with the Texas Commission on Environmental Quality to investigate and, as appropriate, remediate environmental conditions at this site. At this time site investigation activities are ongoing and it is not possible to determine the costs of site remediation, if any, but we believe any such costs will not have a material adverse effect on our operating results or financial condition. We have filed a lawsuit in federal district court against the persons we believe are responsible for the past waste disposal activities. The purpose of the lawsuit is to recover our costs of investigating and remediating site conditions caused by such activities.

For all of the currently known environmental matters, we have accrued a total of \$0.8 million as of March 31, 2006, which, in our opinion, is sufficient to deal with such matters. Further, our management believes that the environmental matters known to, or anticipated by, us should not, individually or in the aggregate, have a material adverse effect on our operating results or financial condition. However, there can be no assurance that potential liabilities and expenditures associated with unknown environmental matters, unanticipated events, or future compliance with environmental laws and regulations will not have a material adverse effect on us.

Our operations are also governed by many other laws and regulations, including those relating to workplace safety and worker health, principally OSHA and regulations thereunder. We believe that we are in material compliance with these laws and regulations and do not believe that future compliance with such laws and regulations will have a material adverse effect on our operating results or financial condition.

Available Information

Our internet address is <u>www.cmworks.com</u>. We make available free of charge through our website our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after such documents are electronically filed with, or furnished to, the Securities and Exchange Commission.

Item 1A. Risk Factors

Columbus McKinnon is subject to a number of risk factors that could negatively affect our results from business operations or cause actual results to differ materially from those projected or indicated in any forward looking statement. Such factors include, but are not limited to, the following:

Our business is cyclical and is affected by industrial economic conditions, and over the past several years we experienced substantially reduced demand for our products.

Many of the end-users of our products are in highly cyclical industries, such as general manufacturing and construction, that are sensitive to changes in general economic conditions. Their demand for our products, and thus our results of operations, is directly related to the level of production in their facilities, which changes as a result of changes in general economic conditions and other factors beyond our control. In fiscal 2003 and 2004, for example, we experienced significantly reduced demand for our products, generally as a result of the global economic slowdown, and more specifically as a result of the dramatic decline in capital goods spending in the industries in which our end-users operate. These lower levels of demand resulted in a 24.2% decline in net sales from fiscal 2001 to fiscal 2004, from \$586.2 million to \$444.6 million. This decline in net sales resulted in a 54.6% decrease in our income from operations during the same period. We have seen a significant improvement in demand for our products in fiscal 2005 and 2006. Our net sales for fiscal 2006 were \$556.0 million, up \$111.4 million or 25.1% from fiscal 2004 sales.

If the current upturn does not continue or if there is deterioration in the general economy or in the industries we serve, our business, results of operations and financial condition could be materially adversely affected. In addition, the cyclical nature of our business could at times also adversely affect our liquidity and ability to borrow under our revolving credit facility.

We rely in large part on independent distributors for sales of our products.

We depend on independent distributors to sell our products and provide service and aftermarket support to our end-user customers. Distributors play a significant role in determining which of our products are stocked at the branch locations, and hence are most readily accessible to aftermarket buyers, and the price at which these products are sold. Almost all of the distributors with whom we transact business offer competitive products and services to our end-user customers. We do not have written agreements with our distributors located in the United States. The loss of a substantial number of these distributors or an increase in the distributors' sales of our competitors' products to our ultimate customers could materially reduce our sales and profits.

We are subject to currency fluctuations from our international sales.

Our products are sold in many countries around the world. Thus, a portion of our revenues (approximately \$161.4 million in fiscal year 2006) is generated in foreign currencies, including principally the euro and the Canadian dollar, while a portion of the costs incurred to generate those revenues are incurred in other currencies. Since our financial statements are denominated in U.S. dollars, changes in currency exchange rates between the U.S. dollar and other currencies have had, and will continue to have, an impact on our earnings. We currently do not have exchange rate hedges in place to reduce the risk of an adverse currency exchange movement. Currency fluctuations may impact our financial performance in the future.

Our international operations pose certain risks that may adversely impact sales and earnings.

We have operations and assets located outside of the United States, primarily in Canada, Mexico, Germany, the United Kingdom, Denmark, France and China. In addition, we import a portion of our hoist product line from Asia, and sell our products to distributors located in approximately 50 countries. In fiscal year 2006, approximately 36% of our net sales were derived from non-U.S. markets. These international operations are subject to a number of special risks, in addition to the risks of our domestic business, including currency exchange rate fluctuations, differing protections of intellectual property, trade barriers, labor unrest, exchange controls, regional economic uncertainty, differing (and possibly more stringent) labor regulation, risk of governmental expropriation, domestic and foreign customs and tariffs, current and changing regulatory environments, difficulty in obtaining distribution support, difficulty in staffing and managing widespread operations, differences in the availability and terms of financing, political instability and risks of increases in taxes. Also, in some foreign jurisdictions we may be subject to laws limiting the right and ability of entities organized or operating therein to pay dividends or remit earnings to affiliated companies unless specified conditions are met. These factors may adversely affect our future profits.

Part of our strategy is to expand our worldwide market share and reduce costs by strengthening our international distribution capabilities and sourcing basic components in foreign countries, in particular in Mexico and China. Implementation of this strategy may increase the impact of the risks described above, and we cannot assure you that such risks will not have an adverse effect on our business, results of operations or financial condition.

Our business is highly competitive and increased competition could reduce our sales, earnings and profitability.

The principal markets that we serve within the material handling industry are fragmented and highly competitive. Competition is based primarily on performance, functionality, price, brand recognition, customer service and support, and product availability. Our competition in the markets in which we participate comes from companies of various sizes, some of which have greater financial and other resources than we do. Increased competition could force us to lower our prices or to offer additional services at a higher cost to us, which could reduce our gross margins and net income.

The greater financial resources or the lower amount of debt of certain of our competitors may enable them to commit larger amounts of capital in response to changing market conditions. Certain competitors may also have the ability to develop product or service innovations that could put us at a disadvantage. In addition, some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, including crane building. If we are unable to compete successfully against other manufacturers of material handling equipment, we could lose customers and our revenues may decline. There can also be no assurance that customers will continue to regard our products favorably, that we will be able to develop new products that appeal to customers, that we will be able to improve or maintain our profit margins on sales to our customers or that we will be able to continue to compete successfully in our core markets.

Our products involve risks of personal injury and property damage, which exposes us to potential liability.

Our business exposes us to possible claims for personal injury or death and property damage resulting from the products that we sell. We maintain insurance through a combination of self-insurance retentions and excess insurance coverage. We monitor claims and potential claims of which we become aware and establish accrued liability reserves for the self-insurance amounts based on our liability estimates for such claims. We cannot give any assurance that existing or future claims will not exceed our estimates for self-insurance or the amount of our excess insurance coverage. In addition, we cannot give any assurance that insurance will continue to be available to us on economically reasonable terms or that our insurers would not require us to increase our self-insurance amounts. Claims brought against us that are not covered by insurance or that result in recoveries in excess of insurance coverage could have a material adverse effect on our results and financial condition.

Our future operating results may be affected by fluctuations in steel prices. We may not be able to pass on increases in raw material costs to our customers.

The principal raw material used in our chain, forging and crane building operations is steel. The steel industry as a whole is highly cyclical, and at times pricing can be volatile due to a number of factors beyond our control, including general economic conditions, labor costs, competition, import duties, tariffs and currency exchange rates. During 2004, the market price of steel increased significantly but has stabilized, or even decreased in some steel categories during 2005 and 2006. This volatility can significantly affect our raw material costs. In an environment of increasing raw material prices, competitive conditions will determine how much of the steel price increases we can pass on to our customers. During 2004 through 2006, we were successful in adding and maintaining a surcharge to the prices of our high steel content products or incorporating them as price increases, reflecting the increased cost of steel. In the future, to the extent we are unable to pass on any steel price increases to our customers, our profitability could be adversely affected.

We depend on our senior management team and the loss of any member could adversely affect our operations.

Our success is dependent on the management and leadership skills of our senior management team. The loss of any of these individuals or an inability to attract, retain and maintain additional personnel could prevent us from implementing our business strategy. We cannot assure you that we will be able to retain our existing senior management personnel or to attract additional qualified personnel when needed. Effective August 4, 2005, our former Chief Financial Officer, Robert R. Friedl, resigned as an employee of the company. We have not entered into employment agreements with any of our senior management personnel.

We are subject to various environmental laws which may require us to expend significant capital and incur substantial cost.

Our operations and facilities are subject to various federal, state, local and foreign requirements relating to the protection of the environment, including those governing the discharges of pollutants in the air and water, the generation, management and disposal of hazardous substances and wastes and the cleanup of contaminated sites. We have made, and will continue to make, expenditures to comply with such requirements. Violations of, or liabilities under, environmental laws and regulations, or changes in such laws and regulations (such as the imposition of more stringent standards for discharges into the environment), could result in substantial costs to us, including operating costs and capital expenditures, fines and civil and criminal sanctions, third party claims for property damage or personal injury, clean-up costs or costs relating to the temporary or permanent discontinuance of operations. Certain of our facilities have been in operation for many years, and we have remediated contamination at some of our facilities. Over time, we and other predecessor operators of such facilities have generated, used, handled and disposed of hazardous and other regulated wastes. Additional environmental liabilities could exist, including clean-up obligations at these locations or other sites at which materials from our operations were disposed, which could result in substantial future expenditures that cannot be currently quantified and which could reduce our profits or have an adverse effect on our financial condition.

Unresolved Staff Comments None.

Item 1B.

Item 2. Properties

We maintain our corporate headquarters in Amherst, New York and, as of March 31, 2006, conducted our principal manufacturing at the following facilities:

		Square	Owned or	Business
Location	Products/Operations	Footage	Leased	Segment
United States:				
Muskegon, MI	Hoists	441,225	Owned	Products
Charlotte, NC	Industrial components	243.750	Owned	Products
Wadesboro, NC	Hoists	186,057	Owned	Products
Lexington, TN	Chain	175,700	Owned	Products
Cedar Rapids, IA	Forged attachments	100,000	Owned	Products
Eureka, IL	Cranes	91,300	Owned	Products
Damascus, VA	Hoists	90,338	Owned	Products
Chattanooga, TN	Forged attachments	77,000	Owned	Products
Greensburg, IN	Scissor lifts	70,000	Owned	Solutions
Lisbon, OH	Hoists	36,600	Owned	Products
Cleveland, TX	Cranes	35,000	Owned	Products
Tonawanda, NY	Light-rail crane systems	35,000	Owned	Solutions
Chattanooga, TN	Forged attachments	33,000	Owned	Products
Sarasota, FL	Tire shredders	24,954	Owned	Solutions
International:				
Santiago, Tianguistenco, Mexico	Hoists and chain	85,000	Owned	Products
Velbert, Germany	Hoists	72,200	Leased	Products
Arden, Denmark	Project design and conveyors	71,500	Owned	Solutions
Hangzhou, China	Hoists and hand pallet trucks	50,000	Leased	Products
Stoney Creek, Ontario, Canada	Cranes	44,255	Owned	Products
Hangzhou, China	Metal fabrication, textiles and textile strappings	37,000	Leased	Products
Hangzhou, China	Textile strappings	30,000	Leased	Products
Chester, United Kingdom	Plate clamps	28,100	Leased	Products
Romeny-sur-Marne, France	Rotary unions	21,550	Owned	Products
Arden, Denmark	Project construction	19,500	Leased	Solutions
Velbert, Germany	Hoists	12,800	Leased	Products
Szekesfeher, Hungary	Textiles and textile strappings	10,000	Leased	Products

In addition, we have a total of 35 sales offices, distribution centers and warehouses. We believe that our properties have been adequately maintained, are in generally good condition and are suitable for our business as presently conducted. We also believe our existing facilities provide sufficient production capacity for our present needs and for our anticipated needs in the foreseeable future. Upon the expiration of our current leases, we believe that either we will be able to secure renewal terms or enter into leases for alternative locations at market terms.

Item 3. <u>Legal Proceedings</u>

From time to time, we are named a defendant in legal actions arising out of the normal course of business. We are not a party to any pending legal proceeding other than ordinary, routine litigation incidental to our business. We do not believe that any of our pending litigation will have a material impact on our business. We maintain comprehensive general liability insurance against risks arising out of the normal course of business through our wholly-owned insurance subsidiary of which we are the sole policy holder. The limits of this coverage are currently \$3.0 million per occurrence (\$2.0 million through March 31, 2003) and \$6.0 million aggregate (\$5.0 million through March 31, 2003) per year. We obtain additional insurance coverage from independent insurers to cover potential losses in excess of these limits.

Item 4. Submission of Matters to a Vote of Security Holders

None.

PART II

Item 5. Market for the Company's Common Stock and Related Security Holder Matters

Our common stock is traded on the Nasdaq Stock Market under the symbol "CMCO." As of May 31, 2006, there were 488 holders of record of our common stock.

We paid quarterly cash dividends on our common stock from 1988 through the second quarter of fiscal 2002. In January 2002, we announced that we were indefinitely suspending the payment of cash dividends on our common stock in order to dedicate our cash resources to the repayment of outstanding indebtedness. Our current credit agreement allows, but limits our ability to pay dividends. We may reconsider or revise this policy from time to time based upon conditions then existing, including, without limitation, our earnings, financial condition, capital requirements, restrictions under credit agreements or other conditions our Board of Directors may deem relevant.

The following table sets forth, for the fiscal periods indicated, the high and low sale prices per share for our common stock as reported on the Nasdaq Stock Market.

	Price Range of			
	Common Stock			
	<u>High</u>	Low		
Year Ended March 31, 2004				
First Quarter\$	2.72	\$	1.30	
Second Quarter	4.84		2.31	
Third Quarter	7.80		4.58	
Fourth Quarter	11.72		6.35	
Year Ended March 31, 2005				
First Quarter\$	8.62	\$	4.87	
Second Quarter	9.81		6.69	
Third Quarter	9.38		6.80	
Fourth Quarter	14.31		8.20	
Year Ended March 31, 2006				
First Quarter\$	13.82	\$	8.35	
Second Quarter	25.15		10.70	
Third Quarter	26.00		18.64	
Fourth Quarter	28.64		20.86	

On May 31, 2006, the closing price of our common stock on the Nasdaq Stock Market was \$26.30 per share.

Item 6. Selected Financial Data

The consolidated balance sheets as of March 31, 2006 and 2005 and the related statements of operations, cash flows and shareholders' equity for the three years ended March 31, 2006 and notes thereto appear elsewhere in this annual report. The selected consolidated financial data presented below should be read in conjunction with, and are qualified in their entirety by "Management's Discussion and Analysis of Results of Operations and Financial Condition," our consolidated financial statements and the notes thereto and other financial information included elsewhere in this annual report.

- (1) Statement of Operations data represents our continuing operations for all periods presented and has been restated to remove ASI results from the continuing operations data. In May 2002, the Company sold substantially all of the assets of ASI. The Company received \$20,600,000 in cash and an 8% subordinated note in the principal amount of \$6,800,000 which is payable over 10 years beginning in August 2004. The full amount of this note has been reserved due to the uncertainty of collection. Principal payments received on the note are recorded as income from discontinued operations at the time of receipt. All interest and principal payments required under the note have been made to date. The Company recorded an after-tax loss of \$121,475,000 or \$8.43 per diluted share and reflected ASI as a discontinued operation in the fourth quarter of fiscal 2002. The loss included closing costs from the transaction and estimated operating losses of the discontinued operation through the date of the sale, May 10, 2002. The loss was due primarily to the write-off of \$104,000,000 of goodwill and a \$17,475,000 loss related to the write-off of the remaining net assets in excess of the selling price. Refer to Note 3 to our consolidated financial statements for additional information on Discontinued Operations.
- (2) Refer to "Results of Operations" in "Item 7. Management's Discussion and Analysis of Results of Operation and Financial Condition" for a discussion of the restructuring charges related to fiscal 2006, 2005, and 2004. Restructuring charges for fiscal 2003 related to the closure, merging, or significant reorganization of five facilities. These costs included \$1.8 million of severance relating to approximately 215 employees, \$1.0 million of lease termination, facility wind-down, preparation for sale and maintenance of non-operating facilities prior to disposal and \$0.9 million for facility closure costs on projects begun in 2002. Restructuring charges for 2002 include exit costs of \$2.4 million for severance relating to approximately 250 employees and \$7.2 million of lease termination, facility wind-down, and maintenance of non-operating facilities prior to disposal. Included in the restructuring charges was approximately \$8.3 million to terminate a facility lease, resulting in the purchase of the property with an estimated fair value of approximately \$2.3 million which was recorded as an offset to the restructuring charges.
- (3) As a result of our adoption of SFAS 142 effective April 1, 2002, goodwill is no longer amortized. The charge in fiscal 2003 represents a \$4.0 million impairment write-off. In addition, the cumulative effect of change in accounting principle represents the impact of adopting SFAS 142.
- (4) Total assets include net assets of discontinued operations of \$21.5 million as of March 31, 2002.
- (5) Total debt includes long-term debt, including the current portion, notes payable and subordinated debt.

Item 7. Management's Discussion And Analysis Of Results Of Operations And Financial Condition

This section should be read in conjunction with our consolidated financial statements included elsewhere in this annual report. Comments on the results of operations and financial condition below refer to our continuing operations, except in the section entitled "Discontinued Operations."

EXECUTIVE OVERVIEW

We are a leading manufacturer and marketer of hoists, cranes, chain, conveyors, material handling systems, lift tables and component parts serving a wide variety of commercial and industrial end-user markets. Our products are used to efficiently and ergonomically move, lift, position or secure objects and loads. Our Products segment sells a wide variety of powered and manually operated wire rope and chain hoists, industrial crane systems, chain, hooks and attachments, actuators and rotary unions. Our Solutions segment designs, manufactures, and installs application-specific material handling systems and solutions for end-users to improve workstation and facility-wide work flow.

Founded in 1875, we have grown to our current leadership position through organic growth and also as the result of the 14 businesses we acquired between February 1994 and April 1999. We have developed our leading market position over our 131-year history by emphasizing technological innovation, manufacturing excellence and superior after-sale service. In addition, the acquisitions significantly broadened our product lines and services and expanded our geographic reach, end-user markets and customer base. Integration of the operations of the acquired businesses with our previously existing businesses is substantially complete. Ongoing integration of these businesses includes improving our productivity, further reducing our excess manufacturing capacity and extending our sales activities to the European and Asian marketplaces. We are executing those initiatives through our Lean Manufacturing efforts, facility rationalization program, new product development and expanded sales activities. Shareholder value will be enhanced through continued emphasis on the improvement of the fundamentals including manufacturing efficiency, cost containment, efficient capital investment, market expansion and renewed customer focus.

We maintain a strong domestic market share with significant leading North American market positions in hoists, lifting and sling chain, and forged attachments. To broaden our product offering in markets where we have a strong competitive position as well as to facilitate penetration into new geographic markets, we have heightened our new product development activities. This includes development of hoist lines in accordance with international standards, to complement our current offering of hoist products designed in accordance with U.S. standards. To further expand our global sales, we are introducing certain of our products that historically have been distributed only in North America and also introducing new products through our existing European distribution network. Furthermore, we are working to build a distribution network in China to capture an anticipated growing demand for material handling products as that economy continues to industrialize. These investments in international markets and new products are part of our focus on our greatest opportunities for growth. International sales increased 3.7% from approximately \$191,300 to \$198,300 during fiscal 2006 and overall sales increased 8.0% over the same period last year. Management believes that the growth rate of total sales may moderate in future periods due to more difficult comparisons with our fiscal 2006 periods. We monitor such indicators as U.S. Industrial Capacity Utilization, which has been increasing since July 2003. In addition, we continue to monitor the potential impact of global and domestic trends, including rising energy costs, steel price fluctuations, rising interest rates and uncertainty in some end-user markets around the globe.

Our Lean Manufacturing efforts are fundamentally changing our manufacturing processes to be more responsive to customer demand and improving on-time delivery and productivity. From 2001 to 2004 under our facility rationalization program, we closed 13 facilities and consolidated several product lines. During fiscal 2006, certain families within our mechanical jack line were eliminated and several smaller sales offices were closed with potential opportunity for further rationalization. We also continue to undergo assessments for possible divestiture of several less-strategic businesses. Our manipulator and specialty marine chain businesses were sold in fiscal 2004 and two others remain as possible divestiture candidates, our conveyor business which comprises a majority of our Solutions segment and a specialty crane business within our Products segment. During fiscal 2006, we completed the sale and partial leaseback of warehouse in Ontario, Canada at a \$0.6 million gain as well as the sale of an unused parcel of land in Charlotte, North Carolina. Fiscal 2005 saw the completion of the sale of a Chicago-area property resulting in a \$2.7 million gain and the sale and partial leaseback of our corporate headquarters building in Amherst, New York at a \$2.2 million gain, of which \$1.0 million was recorded in fiscal 2005 and the remainder is being recognized pro-rata over the life of the 10-year leaseback period. Additionally during 2005, we sold a small parcel of land in Virginia. We will continue to sell surplus real estate resulting from our facility rationalization projects and those sales may result in gains or losses.

Consistent with most companies, over the past several years we have been facing significantly increased costs for fringe benefits such as health insurance, workers compensation insurance and pension. Combined, those benefits cost us over \$35 million in fiscal 2006 and we work diligently to balance cost control with the need to provide competitive employee benefits packages for our associates. Another cost area of focus is steel. We utilize approximately \$35 million to \$40 million of steel annually in a variety of forms including rod, wire, bar, structural and others. With increases in worldwide demand for steel and fluctuating scrap steel prices, we experienced fluctuations in our costs that we reflected as price increases and surcharges to our customers. We believe we have been successful in instituting surcharges and price increases to pass on these material cost increases. We will continue to monitor our costs and reevaluate our pricing policies.

RESULTS OF OPERATIONS

Net sales of our Products and Solutions segments, in millions of dollars and with percentage changes for each segment, were as follows:

	Fiscal Years Ended March 31,			Chan 2006 vs.	0		Char 2005 vs.	0
	2006	<u>2005</u>	2004	Amount	<u>%</u>	An	nount	<u>%</u>
Products segment	\$ 493.9	\$ 453.1	\$ 394.2	\$40.8	9.0	\$	58.9	14.9
Solutions segment	62.1	61.7	50.4	0.4	0.6		11.3	22.4
Total net sales	\$ 556.0	\$ 514.8	\$ 444.6	\$ 41.2	8.0	\$	70.2	15.8

Fiscal 2006 saw continued improvement in the industrial sector of North America and Europe which began in fiscal 2005 compared to the downturn in the general North American and European economies and the industrial sectors in particular that had been occurring through fiscal 2004. In addition, sales growth was fostered by the expansion of international selling efforts. Net sales for fiscal 2006 of \$556.0 increased by \$41.2 million or 8.0% from fiscal 2005, and net sales for fiscal 2005 of \$514.8 million increased by \$70.2 million, or 15.8%, from fiscal 2004. The Products segment for fiscal 2006 experienced a net sales increase of 9.0% over the prior year. The increase was due to a combination of increased volume on the continued growth of the North American industrial economy as well as price increases (\$17.8 million). The Products segment for fiscal 2005 experienced a net sales increase of 14.9% over the prior year. The increase was due to a combination of higher volume as the North American industrial economy recovered as well as price increases (\$19.7 million) including surcharges specifically in response to rising steel costs. Fiscal 2005 was impacted by the weakening U.S. dollar relative to other currencies, particularly the euro, and reported Products segment sales were favorably affected by \$6.2 million. For fiscal 2006, our Solutions segment net sales were flat as increased volume was offset by the strengthening U.S. dollar relative to the Danish Krone resulting in an unfavorable impact of \$0.9 million. For fiscal 2005, our Solutions segment net sales increased volume in Europe at our conveyor business.

Gross profit of the Products and Solutions segments, in millions of dollars and as a percentage of total segment net sales, was as follows:

_	Fiscal Years Ended March 31,								
	<u>2006</u>		<u>2005</u>		<u>2004</u>				
	Amount	<u>%</u>	Amount	<u>%</u>	Amount	<u>%</u>			
Products segment	\$ 138.1	28.0	\$ 117.1	25.8	\$ 99.2	25.2			
Solutions segment	9.5	<u>15.3</u>	8.8	14.3	5.6	<u>11.1</u>			
Total gross profit	<u>\$ 147.6</u>	26.5	<u>\$ 125.9</u>	24.5	<u>\$104.8</u>	23.6			

Our gross profit margins were approximately 26.5%, 24.5% and 23.6% in fiscal 2006, 2005 and 2004, respectively. The Products segment for fiscal 2006 and fiscal 2005 continues to see improved gross margins as a result of operational leverage at increased volumes from the prior years and the impact of previous facility rationalization projects and lean manufacturing activities. The Solutions segment's gross profit margins increased in Fiscal 2006 as a result of a shift in product mix at our European conveyor business to more internally developed product costs from resale products, increased volume at certain facilities, and some rationalization cost savings. The Solutions segment's gross profit margins increased in Fiscal 2005 as a result of the recovery of European markets which led to increased volume for one division, as well as the divestiture of a poor performing, non-strategic business at the end of fiscal 2004.

Selling expenses were \$54.3 million, \$52.3 million and \$48.3 million in fiscal 2006, 2005 and 2004, respectively. As a percentage of net sales, selling expenses were 9.8%, 10.2% and 10.9% in fiscal 2006, 2005 and 2004, respectively. The fiscal 2006 increase includes additional salaries (\$1.2 million), increased advertising, marketing, warehousing and travel (\$1.3 million), and new market costs (\$0.4 million) offset by a decrease in foreign pension costs (\$0.4 million) and lower commission expense (\$0.8 million). Fiscal 2005 includes a \$1.2 million increase resulting from the weakening of the U.S. dollar relative to foreign currencies, particularly the euro, upon translation of foreign operating results into U.S. dollars for reporting purposes. Fiscal 2005 also includes increases related to variable costs associated with the increase sales volume, mainly commissions (\$1.3 million), increased foreign pension costs (\$0.5 million) and increased investments in international markets (\$0.5 million).

General and administrative expenses were \$33.6 million, \$31.7 million and \$25.0 million in fiscal 2006, 2005 and 2004, respectively. As a percentage of net sales, general and administrative expenses were 6.1%, 6.2% and 5.6% in fiscal 2006, 2005 and 2004, respectively. The Fiscal 2006 increase includes increases in salaries/personnel including variable compensation (\$3.0 million), employee development/professional fees (\$0.7 million), offset by lower foreign pension costs (\$1.0 million), decreased external Sarbanes-Oxley Section 404 savings (\$0.9 million) and currency translation (\$0.2 million). Fiscal 2005 increases include variable compensation (\$2.3 million), compliance costs associated with Sarbanes-Oxley Section 404 implementation (\$1.4 million), increasing foreign pension costs (\$1.2 million), translation of foreign currencies into the weaker U.S. dollar for reporting purposes (\$0.7 million) and increases in bad debt reserves based on increased accounts receivable levels (\$0.5 million).

Restructuring charges of \$1.6 million, \$0.9 million and \$1.2 million, or 0.3%, 0.2% and 0.3% of net sales in fiscal 2006, 2005 and 2004, respectively, were primarily attributable to the ongoing organizational rationalizations occurring at the company. The fiscal 2006 charges consist of the cost of removal of certain environmentally hazardous materials (\$0.6 million), inventory

disposal costs related to the rationalization of certain product families within our mechanical jack lines (\$0.4 million), the ongoing maintenance costs of a non-operating facility accrued based on anticipated sale date (\$0.3 million) and other facility rationalization projects (\$0.3 million). The fiscal 2005 restructuring charges consist of \$0.5 million of costs related to facility rationalizations being expensed on an as incurred basis as a result of the project timing being subsequent to the adoption of SFAS No. 144. Fiscal 2005 also included \$0.3 million of write-down on the net realizable value of a facility based on changes in market conditions and a reassessment of its net realizable value. During fiscal 2004, we recorded restructuring charges of \$1.2 million related to various employee termination benefits and facility costs as a result of our continued closure, merging and reorganization and completion of two open projects from fiscal 2003. The remaining liability of as of March 31, 2006 relates to the accrued costs for the removal of the environmentally hazardous materials (\$0.5 million) and the ongoing maintenance costs of a non-operating facility (\$0.3 million).

Write-off/amortization of intangibles was \$0.2 million, \$0.3 million and \$0.4 million in fiscal 2006, 2005 and 2004, respectively.

Interest and debt expense was \$24.7 million, \$27.6 million and \$28.9 million in fiscal 2006, 2005 and 2004, respectively. As a percentage of net sales, interest and debt expense was 4.4%, 5.4% and 6.5% in fiscal 2006, 2005 and 2004, respectively. The fiscal 2006 and 2005 decreases primarily resulted from lower debt levels as we continue to execute our strategy of debt reduction and increasing our financial flexibility.

Other (income) and expense, net was \$5.0 million, (\$5.2) million and (\$4.2) million in fiscal 2006, 2005 and 2004, respectively. Fiscal 2006 includes \$9.2 million of redemption costs associated with the repurchase of outstanding senior secured and senior subordinated notes, offset by \$3.1 million from investment and interest income and \$0.8 million of gains from sales of real estate. Fiscal 2005 includes \$3.7 million in gains from sales of real estate, \$2.1 million from investment and interest income, offset by \$0.3 million of additional losses from 2004 business divestitures. The income in fiscal 2004 included \$5.7 million from asset sales and \$1.9 million from an interest rate swap partially offset by \$3.9 million of losses upon business divestitures.

Income taxes as a percentage of income before income taxes were not reflective of U.S statutory rates in fiscal 2006, 2005 or 2004. A valuation allowance of \$50.5 million existed at March 31, 2005 due to the uncertainly of whether our U.S. federal net operating loss carryforwards ("NOLs"), deferred tax assets and capital loss carryforwards might ultimately be realized. We utilized \$14.9 million of the U.S. federal NOLs in fiscal 2006 reducing the valuation allowance by \$5.2 million. As a result of our increased operating performance over the past several years, we reevaluated the certainty as to whether our remaining U.S. federal NOLs and other deferred tax assets may ultimately be realized. As a result of the determination that it is more likely than not that nearly all of the remaining deferred tax assets will be realized, \$38.6 million of the remaining valuation allowance was reversed as of March 31, 2006. The fiscal 2005 effective tax rate varies due to the benefit received from the utilization of the domestic net operating loss carry-forwards that had fully reserved and jurisdictional mix. Income tax expense primarily results from non-U.S. taxable income and state taxes on U.S. taxable income. The fiscal 2004 effective tax rate varies due to jurisdictional mix and the existence of losses at certain subsidiaries for which no benefit was recorded.

LIQUIDITY AND CAPITAL RESOURCES

In March 2006, we amended and expanded our revolving credit facility. The Revolving Credit Facility currently provides availability up to a maximum of \$75 million with an opportunity for expansion up to \$125 million. At March 31, 2006, the unused Revolving Credit Facility totaled \$64.8 million, net of outstanding borrowings of \$0.0 million and outstanding letters of credit of \$10.2 million. Interest on the revolver is payable at varying Eurodollar rates based on LIBOR or prime plus a spread determined by our leverage ratio amounting to 100 or 0 basis points, respectively, at March 31, 2006. The Revolving Credit Facility is secured by all domestic inventory, receivables, equipment, real property, subsidiary stock (limited to 65% for foreign subsidiaries) and intellectual property.

In November 2005, we registered an additional 3,350,000 shares of our common stock which were sold at \$20.00 per share. The number of shares offered by us was 3,000,000 and 350,000 were offered by a selling shareholder. We did not receive any proceeds from the sale of shares by the selling shareholder. This stock offering increased our weighted average common stock outstanding by 1.8 million for the year ended March 31, 2006. A portion of the proceeds received by us were used to redeem \$47.6 million of 10% Senior Secured Notes (10% Notes). The repurchase of the 10% Notes occurred at a premium resulting in a pre-tax loss on early extinguishment of debt of \$4.8 million. As a result of the repurchase of the 10% Notes, \$1.1 million of pre-tax deferred financing costs were written-off. The net effect of these items, a \$5.9 million pre-tax loss in fiscal 2006, is shown as part of other (income) and expense, net. The balance of the proceeds is available for other general corporate purposes to advance our strategy of global growth, including additional debt repayment, investments and acquisitions.

In September 2005, we issued \$136 million of 8 7/8% Senior Subordinated Notes (8 7/8% Notes) due November 1, 2013. Proceeds from the 8 7/8% Notes and cash on hand were used to repurchase all of the outstanding 8 ½% Senior Subordinated Notes (8 ½% Notes). The repurchase of the 8 ½% Notes occurred at a premium resulting in a pre-tax loss on early extinguishment of debt of \$2.3 million. As a result of the repurchase of the 8 ½% Notes, \$0.9 million of pre-tax deferred financing costs and \$0.1 million of the original issue discount were written-off. The net effect of these items, a \$3.3 million pre-tax loss in fiscal 2006, is shown as part of other (income) and expense, net. Provisions of the 8 7/8% Notes include, without limitation, restrictions on indebtedness, asset sales, and dividends and other restricted payments. Until November 1, 2008, we may redeem up to 35% of the outstanding notes at a redemption price of 108.875% with the proceeds of equity offerings, subject to certain restrictions. The 8 7/8% Notes are redeemable at the option of us, in whole or in part, at prices declining annually from the Make-Whole Price (as defined in the 8 7/8% Notes agreement) to 100% on and after November 1, 2011. In the event of a Change of Control (as defined in the indenture for such notes), each holder of the 8 7/8% Notes may require us to repurchase all or a portion of such holder's 8 7/8% Notes at a purchase price equal to 101% of the principal amount thereof. The 8 7/8% Notes are guaranteed by certain existing and future domestic subsidiaries and are not subject to any sinking fund requirements.

In July 2003, we issued \$115.0 million of 10% Senior Secured Notes due August 1, 2010 of which \$67.8 million remain outstanding at March 31, 2006. During April and May of 2006, the Company repurchased an additional \$32.1 million of the outstanding 10% Senior Secured Notes, resulting in a remaining balance of \$35.7 million. The proceeds from the 10% Notes offering were used for the repayment in full of a then outstanding Senior Second Secured Term Loan (\$66.8 million), the repurchase of \$35.7 million of Senior Subordinated 8½% Notes at a discount (\$30.1 million), the repayment of a portion of the outstanding Revolving Credit Facility (\$10.0 million), the repayment of a portion of the Term Loan (\$3.9 million), the payment of financing costs (\$2.8 million) and the payment of accrued interest (\$1.4 million). Provisions of the 10% Notes include, without limitation, restrictions on liens, indebtedness, asset sales, and dividends and other restricted payments. The 10% Notes are redeemable at our option, in whole or in part, at prices declining annually from the Make-Whole Price (as defined in the Indenture for the Notes). In the event of a Change of Control (as defined), each holder of the 10% Notes may require us to repurchase all or a portion of such holder's 10% Notes at a purchase price equal to 101% of the principal amount thereof. The 10% Notes are guaranteed by certain existing and future domestic subsidiaries and are not subject to any sinking fund requirements. The 10% Notes are also secured, in a second lien position, by all domestic inventory, receivables, equipment, real property, subsidiary stock (limited to 65% for foreign subsidiaries) and intellectual property.

The redemption in fiscal 2004 of the 8½% Senior Subordinated Notes occurred at a discount resulting in a \$5.6 million pretax gain on early extinguishment of debt. As a result of the repayment of the Senior Second Secured Term Loan and a portion of the Term Loan and 8½% Senior Subordinated Notes, \$4.9 million of pre-tax deferred financing costs were written-off in fiscal 2004. The net effect of these two items, a \$0.7 million pre-tax gain, is shown as part of other (income) and expense, net.

The corresponding credit agreement associated with the Revolving Credit Facility places certain debt covenant restrictions on us, including certain financial requirements and a restriction on dividend payments, with which we were in compliance as of March 31, 2006.

From time to time, we manage our debt portfolio by using interest rate swaps to achieve an overall desired position of fixed and floating rates. In June 2001, we entered into an interest rate swap agreement to effectively convert \$40 million of variable-rate debt to fixed-rate debt, which matured in June 2003. That cash flow hedge was considered effective and the gain or loss on the change in fair value was reported in other comprehensive income, net of tax. In August 2003, we entered into an interest rate swap agreement to convert \$93.5 million of fixed-rate debt (10%) to variable-rate debt (LIBOR plus 578.2 basis points) through August 2008 and \$57.5 million from August 2008 through August 2010 at the same rate. That interest rate swap was considered an ineffective hedge and therefore the change in fair value was recognized in income as a gain. The swap was terminated in January 2004 and a pre-tax gain of \$1.9 million was recognized in fiscal 2004 as other income, net as a result of changes in the fair value of the swap.

We believe that our cash on hand, cash flows, and borrowing capacity under our Revolving Credit Facility will be sufficient to fund our ongoing operations and budgeted capital expenditures for at least the next twelve months. This belief is dependent upon a steady economy and successful execution of our current business plan which includes cash generation for debt repayment. The business plan focuses on continued implementation of lean manufacturing, possible facility rationalization projects, divestiture of excess facilities, improving working capital components, including inventory reductions, and new market and new product development.

Net cash provided by operating activities was \$48.5 million, \$17.2 million and \$26.4 million in fiscal 2006, 2005 and 2004, respectively. The \$31.3 million increase in fiscal 2006 relative to fiscal 2005 was primarily due to stronger operating

performance in fiscal 2006 (\$19.9 million) and improved working capital components (\$11.4 million). The working capital changes come from favorable changes in inventory (\$9.3 million), accounts payable and accrued liabilities (\$9.9 million), offset by unfavorable changes in prepaids (\$3.8 million) and accounts receivables (\$4.1 million). The \$9.2 million decrease in fiscal 2005 relative to fiscal 2004 was primarily due to stronger operating performance in fiscal 2005 (\$4.0 million) offset by changes in working capital components (\$13.2 million). The working capital changes come from favorable changes in prepaids/other (\$3.3 million), accounts payable and accrued liabilities (\$6.7 million), offset by unfavorable changes in and accounts receivables (\$8.0 million) and inventory (\$15.2 million).

Net cash (used) provided by investing activities was (\$6.4) million, \$3.1 million and \$4.3 million in fiscal 2006, 2005 and 2004, respectively. The fiscal 2006 change in cash (used) provided by investing activities is the result of increased capital expenditures and lower proceeds from asset sales. The fiscal 2005 change in cash (used) provided by investing activities is primarily the result of increased capital expenditures. The fiscal 2006, 2005 and 2004 amounts included \$2.1 million, \$7.1 million and \$7.8 million, respectively, from business and property divestitures.

Net cash used in financing activities was \$6.4 million, \$21.9 million and \$21.5 million in fiscal 2006, 2005 and 2004, respectively. The decrease for fiscal 2006 was the result of \$56.6 million of proceeds from the November 2005 stock offering and \$7.0 million from the exercise of employee stock options. The fiscal 2006, 2005 and 2004 amounts included \$67.8 million, \$22.9 million and \$17.7 million of debt repayment, respectively. We also paid \$2.8 million and \$4.4 million of financing costs in fiscal 2006 and 2004, respectively, to effect the capital transactions previously described.

CONTRACTUAL OBLIGATIONS

The following table reflects a summary of our contractual obligations in millions of dollars as of March 31, 2006, by period of estimated payments due:

		Fiscal	Fiscal 2008-	Fiscal 2010-	More Than
	<u>Total</u>	<u>2007</u>	<u>Fiscal 2009</u>	<u>Fiscal 2011</u>	Five Years
Long-term debt obligations (a)	\$ 204.0	\$ 0.1	\$ 0.2	\$ 67.4	\$ 136.3
Operating lease obligations (b)	13.3	3.4	5.6	3.5	0.8
Purchase obligations (c)					
Interest obligations (d)	119.8	18.8	37.6	32.2	31.2
Letter of credit obligations	10.2	10.2			
Other long-term liabilities					
reflected on the Company's					
balance sheet under GAAP (e)	50.7	0.0	29.0	20.0	1.7
Total	<u>\$ 398.0</u>	<u>\$ 32.5</u>	<u>\$ 72.4</u>	<u>\$ 123.1</u>	<u>\$ 170.0</u>

- (a) As described in note 10 to our consolidated financial statements.
- (b) As described in note 18 to our consolidated financial statements.
- (c) We have no purchase obligations specifying fixed or minimum quantities to be purchased. We estimate that, at any given point in time, our open purchase orders to be executed in the normal course of business approximate \$40 million.
- (d) Estimated for our Senior Secured Notes due 8/1/10 and Senior Subordinated Notes due 11/1/13.
- (e) As described in note 9 to our consolidated financial statements.

We have no additional off-balance sheet obligations that are not reflected above.

CAPITAL EXPENDITURES

In addition to keeping our current equipment and plants properly maintained, we are committed to replacing, enhancing and upgrading our property, plant and equipment to support new product development, reduce production costs, increase flexibility to respond effectively to market fluctuations and changes, meet environmental requirements, enhance safety and promote ergonomically correct work stations. Further, our facility rationalization program underway between fiscal 2002-2004 reduced our annual capital expenditure requirements and also provided for transfers of equipment from the rationalized facilities to other operating facilities. Our capital expenditures for fiscal 2006, 2005 and 2004 were \$8.4 million, \$5.9 million and \$3.6 million, respectively. Higher capital expenditures in fiscal 2006 and 2005 were the result of new product development and productivity enhancing equipment along with normal maintenance items. We expect capital expenditure spending in fiscal 2007 to be in the range of \$8-\$10 million.

INFLATION AND OTHER MARKET CONDITIONS

Our costs are affected by inflation in the U.S. economy and, to a lesser extent, in foreign economies including those of Europe, Canada, Mexico and the Pacific Rim. We do not believe that general inflation has had a material effect on our results of operations over the periods presented primarily due to overall low inflation levels over such periods and our ability to generally pass on rising costs through annual price increases and surcharges. However, employee benefits costs such as health insurance, workers compensation insurance, pensions as well as energy and business insurance have exceeded general inflation levels. In the future, we may be further affected by inflation that we may not be able to pass on as price increases. With changes in worldwide demand for steel and fluctuating scrap steel prices over the past several years, we experienced fluctuations in our costs that we have reflected as price increases and surcharges to our customers. We believe we have been successful in instituting surcharges and price increases to pass on these material cost increases. We will continue to monitor our costs and reevaluate our pricing policies.

SEASONALITY AND QUARTERLY RESULTS

Our quarterly results may be materially affected by the timing of large customer orders, periods of high vacation and holiday concentrations, restructuring charges and other costs attributable to our facility rationalization program, divestitures, acquisitions and the magnitude of rationalization integration costs. Therefore, our operating results for any particular fiscal quarter are not necessarily indicative of results for any subsequent fiscal quarter or for the full fiscal year.

DISCONTINUED OPERATIONS

In May 2002, we completed the divestiture of substantially all of the assets of ASI which comprised the principal business unit in our former Solutions - Automotive segment. Proceeds from this sale included cash of \$15.9 million and an 8% subordinated note in the principal amount of \$6.8 million payable over 10 years. Due to the uncertainty surrounding the financial viability of the new organization, the note has been recorded at the estimated net realizable value of \$0. Principal payments received on the note are recorded as income from discontinued operations at the time of receipt. Accordingly, \$0.7 million of income from discontinued operations was recorded in fiscal 2006. All interest and principal payments required under the note have been made to date.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes. We continually evaluate the estimates and their underlying assumptions, which form the basis for making judgments about the carrying value of our assets and liabilities. Actual results inevitably will differ from those estimates. We have identified below the accounting policies involving estimates that are critical to our financial statements. Other accounting policies are more fully described in note 2 of notes to our consolidated financial statements.

Pension and Other Postretirement Benefits. The determination of the obligations and expense for pension and postretirement benefits is dependent on our selection of certain assumptions that are used by actuaries in calculating such amounts. Those assumptions are disclosed in Notes 11 and 13, respectively, to our fiscal 2006 consolidated financial statements and include the discount rates, expected long-term rate of return on plan assets and rates of future increases in compensation and healthcare costs.

The pension discount rate assumptions of 534%, 6%, 64/8% as of March 31, 2006, 2005 and 2004, respectively, are based on long-term bond rates. The decrease in discount rates for fiscal 2006 and 2005 resulted in \$3.9 million and \$3.0 million increases in the projected benefit obligations as of March 31, 2006 and 2005, respectively. The rate of return on plan assets assumptions of 7½%, 8½% and 8.4% for the years ended March 31, 2006, 2005 and 2004, respectively, are based on the composition of the asset portfolios (approximately 56% equities and 44% fixed income at March 31, 2006) and their long-term historical returns. The actual assets realized gains of \$6.8 and \$5.5 million in fiscal 2006 and 2005. Our funded status as of March 31, 2006 and 2005 was negative by \$33.9 million and \$29.3 million, or 25.3% and 24.3%, respectively. Our pension contributions during fiscal 2006 and 2005 were approximately \$7.8 and \$9.7 million, respectively. The negative funded status may result in future pension expense increases. Pension expense for the March 31, 2007 fiscal year is expected to approximate \$7.8 million, which is up from the fiscal 2006 amount of \$7.0 million. The factors outlined above will result in increases in funding requirements over time, unless there is continued significant market appreciation in the asset values. However, pension funding contributions for the March 31, 2007 fiscal year are expected to decrease by approximately \$1.8 million compared to fiscal 2006. The compensation increase assumption of 4% as of March 31, 2006, 2005 and 2004 is based on historical trends.

The healthcare inflation assumptions of 93/4%, 101/2% and 12% for fiscal 2006, 2005 and 2004, respectively are based on anticipated trends. Healthcare costs in the United States have increased substantially over the last several years. If this trend continues, the cost of postretirement healthcare will increase in future years.

Insurance Reserves. Our accrued general and product liability reserves as described in Note 15 to our consolidated financial statements involve actuarial techniques including the methods selected to estimate ultimate claims, and assumptions including emergence patterns, payment patterns, initial expected losses and increased limit factors. Other insurance reserves such as workers compensation and group health insurance are based on actual historical and current claim data provided by third party administrators or internally maintained.

Inventory and Accounts Receivable Reserves. Slow-moving and obsolete inventory reserves are judgmentally determined based on historical and expected future usage within a reasonable timeframe. We reassess trends and usage on a regular basis and if we identify changes, we revise our estimated allowances. Allowances for doubtful accounts and credit memo reserves are also judgmentally determined based on historical bad debt write-offs and credit memos issued, assessing potentially uncollectible customer accounts and analyzing the accounts receivable agings.

Long-Lived Assets. Property, plant and equipment and certain intangibles are depreciated or amortized over their assigned lives. These assets as well as goodwill are also periodically measured for impairment. The assigned lives and the projected cash flows used to test impairment are subjective. If actual lives are shorter than anticipated or if future cash flows are less than anticipated, we could incur a future impairment charge or a loss on disposal relating to these assets.

Marketable Securities. On a quarterly basis, we review our marketable securities for declines in market value that may be considered other than temporary. We consider market value declines to be other than temporary if they are declines for a period longer than six months and in excess of 20% of original cost.

Deferred Tax Asset Valuation Allowance. As of March 31, 2006, we had \$56.7 million of total net deferred tax assets before valuation allowances. As described in Note 17 to the consolidated financial statements, \$29.1 million of the assets pertain to U.S. federal net operating loss carryforwards ("NOLs") and the remainder relate principally to liabilities including employee benefit plans, insurance reserves, accrued vacation and incentive costs and also to asset valuation reserves such as inventory obsolescence reserves and bad debt reserves. The U.S. federal NOLs expire in 2023. We reduced the deferred tax assets by \$5.2 million as a result of utilizing U.S. federal NOLs in fiscal 2006. As a result of our increased operating performance over the past several years, we reevaluated the certainty as to whether our remaining NOLs and other deferred tax assets may ultimately be realized. As a result of the determination that it is more likely than not that nearly all of the remaining deferred tax assets will be realized, a significant portion of the remaining valuation allowance was reversed in fiscal 2006. Our ability to realize our deferred tax assets is primarily dependent on generating sufficient future taxable income. If we do not generate sufficient taxable income, we could be required to record a valuation allowance.

Revenue Recognition. Sales are recorded when title passes to the customer, which is generally at the time of shipment to the customer, except for long-term construction-type contracts. For long-term construction-type contracts, we recognize contract revenues under the percentage of completion method, measured by comparing direct costs incurred to total estimated direct costs. Changes in job performance, job conditions and estimated profitability, including those arising from final contract settlements, may result in revisions to costs and income and are recognized in the period in which the revisions are determined. In the event that a loss is anticipated on an uncompleted contract, a provision for the estimated loss is made at the time it is determined. Billings on contracts may precede or lag revenues earned, and such differences are reported in the balance sheet as current liabilities (accrued liabilities) and current assets (unbilled revenues), respectively. Customers do not routinely return product. However, sales returns are permitted in specific situations and typically include a restocking charge or the purchase of additional product. We have established an allowance for returns based upon historical trends.

EFFECTS OF NEW ACCOUNTING PRONOUNCEMENTS

In November 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 151, "Inventory Costs," as an amendment to ARB No. 43, Chapter 4, "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted materials (spoilage). This Statement requires that these items be recognized as current-period charges and requires the allocation of fixed production overheads to inventory based on the normal capacity of the production facilities. This Statement becomes effective for inventory costs incurred during fiscal years beginning after June 15, 2005. We do not expect the adoption of SFAS No. 151 to have a material impact on our consolidated financial statements.

In December 2004, the FASB issued SFAS No. 123(R) (revised 2004), Share-Based Payment, which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation. Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees, and amends FASB Statement No. 95, Statement of Cash Flows. Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative.

Statement 123(R) was to be adopted for interim or annual periods beginning after June 15, 2005. On April 14th, 2005, the SEC announced that it would provide for a phased-in implementation process for FASB statement No. 123(R). The SEC is requiring that registrants adopt statement 123(R)'s fair value method of accounting for share-based payments to employees no later than the beginning of the first fiscal year beginning after June 15, 2005. We expect to adopt 123(R) in the first quarter of Fiscal 2007. Statement 123(R) permits public companies to adopt its requirements using one of two methods:

- 1. A "modified prospective" method in which compensation cost is recognized beginning with the effective date (a) based on the requirements of Statement 123(R) for all share-based payments granted after the effective date and (b) based on the requirements of Statement 123(R) for all share-based payments granted to employees prior to the effective date of Statement 123(R) that remain unvested on the effective date.
- 2. A "modified retrospective" method which includes the requirements of the modified prospective method described above, but also permits entities to restate based on amounts previously recognized under Statement 123 for purposes of pro forma disclosures either (a) all prior periods presented or (b) prior interim periods of the year of adoption.

We are still evaluating the method we plan to use when we adopt statement 123(R).

As permitted by Statement 123, we currently account for share-based payments to employees using Opinion 25's intrinsic value method and, as such, recognize no compensation cost for employee stock options. Accordingly, adoption of Statement 123(R)'s fair value method will have an impact on our results of operations, although it will have no impact on our overall financial position. The impact of adoption of 123(R) cannot be predicted at this time because it will depend on levels of share based payments granted in the future. However, had we adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of statement 123 as described in the disclosure of pro forma net income and earnings per share in Note 2 to our consolidated financial statements.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections" which replaces APB Opinion No. 20, "Accounting Changes," and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." SFAS No. 154 changes the requirements for and reporting of a change in accounting principle. This Statement becomes effective for changes in accounting methods during fiscal years beginning after December 15, 2005. We do not expect the adoption of SFAS No. 154 will have a material impact on our consolidated results of operations and financial condition.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential loss arising from adverse changes in market rates and prices, such as interest rates. We are exposed to various market risks, including commodity prices for raw materials, foreign currency exchange rates and changes in interest rates. We may enter into financial instrument transactions, which attempt to manage and reduce the impact of such changes. We do not enter into derivatives or other financial instruments for trading or speculative purposes.

Our primary commodity risk is related to changes in the price of steel. We control this risk through negotiating purchase contracts on a consolidated basis and by attempting to build changes in raw material costs into the selling prices of our products. We also evaluate our steel cost increases and assess the need for price increases and surcharges to our customers. We have not entered into financial instrument transactions related to raw material costs.

In fiscal 2006, 29% of our net sales were from manufacturing plants and sales offices in foreign jurisdictions. We manufacture our products in the United States, Mexico, China, Denmark, the United Kingdom, France and Germany and sell our products and solutions in over 50 countries. Our results of operations could be affected by factors such as changes in foreign currency rates or weak economic conditions in foreign markets. Our operating results are exposed to fluctuations between the U.S. dollar and the Canadian dollar, European currencies and the Mexican peso. For example, when the U.S. dollar strengthens against the Canadian dollar, the value of our net sales and net income denominated in Canadian dollars decreases when translated into U.S. dollars for inclusion in our consolidated results. We are also exposed to foreign currency fluctuations in relation to

purchases denominated in foreign currencies. Our foreign currency risk is mitigated since the majority of our foreign operations' net sales and the related expense transactions are denominated in the same currency so therefore a significant change in foreign exchange rates would likely have a very minor impact on net income. For example, a 10% decline in the rate of exchange between the euro and the U.S. dollar impacts net income by approximately \$0.5 million. In addition, the majority of our export sale transactions are denominated in U.S. dollars. Accordingly, we currently have not invested in derivative instruments, such as foreign exchange contracts, to hedge foreign currency transactions.

We control risk related to changes in interest rates by structuring our debt instruments with a combination of fixed and variable interest rates and by periodically entering into financial instrument transactions as appropriate. At March 31, 2006, we do not have any material swap agreements or similar financial instruments in place. At March 31, 2006 and 2005, approximately 97% and 96%, respectively, of our outstanding debt had fixed interest rates. At those dates, we had approximately \$6.4 million and \$11.4 million, respectively, of outstanding variable rate debt. A 1% fluctuation in interest rates in fiscal 2006 and 2005 would have changed interest expense on that outstanding variable rate debt by approximately \$0.1 million for both years.

Like many industrial manufacturers, we are involved in asbestos-related litigation. In continually evaluating costs relating to its estimated asbestos-related liability, we review, among other things, the incidence of past and recent claims, the historical case dismissal rate, the mix of the claimed illnesses and occupations of the plaintiffs, its recent and historical resolution of the cases, the number of cases pending against it, the status and results of broad-based settlement discussions, and the number of years such activity might continue. Based on this review, we have estimated its share of liability to defend and resolve probable asbestos-related personal injury claims. This estimate is highly uncertain due to the limitations of the available data and the difficulty of forecasting with any certainty the numerous variables that can affect the range of the liability. We will continue to study the variables in light of additional information in order to identify trends that may become evident and to assess their impact on the range of liability that is probable and estimable.

Based on actuarial information, we have estimated our asbestos-related aggregate liability through March 31, 2031 and March 31, 2082 to range between \$5.5 million and \$19.0 million using actuarial parameters of continued claims for a period of 25 to 76 years. Our estimation of our asbestos-related aggregate liability that is probable and estimable, in accordance with U.S. generally accepted accounting principles, is through March 31, 2031 and ranges from \$5.5 million to \$6.5 million as of March 31, 2006. The range of probable and estimable liability reflects uncertainty in the number of future claims that will be filed and the cost to resolve those claims, which may be influenced by a number of factors, including the outcome of the ongoing broad-based settlement negotiations, defensive strategies, and the cost to resolve claims outside the broad-based settlement program. Based on the underlying actuarial information, we have reflected \$6.3 million as a liability in the consolidated financial statements in accordance with U.S. generally accepted accounting principles. The increase in the recorded liability from the amount of \$4.8 million at March 31, 2005 is due to a change in actuarial parameters used to calculate required asbestos liability reserve levels. The recorded liability does not consider the impact of any potential favorable federal legislation such as the "FAIR Act". Of this amount, management expects to incur asbestos liability payments of approximately \$0.5 million over the next 12 months. Because payment of the liability is likely to extend over many years, management believes that the potential additional costs for claims will not have a material after-tax effect on our financial condition or our liquidity, although the net after-tax effect of any future liabilities recorded could be material to earnings in a future period.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Columbus McKinnon Corporation

We have audited the accompanying consolidated balance sheets of Columbus McKinnon Corporation and subsidiaries as of March 31, 2006 and 2005, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended March 31, 2006. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Columbus McKinnon Corporation and subsidiaries at March 31, 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended March 31, 2006, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Columbus McKinnon Corporation's internal control over financial reporting as of March 31, 2006, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 1, 2006 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

June 1, 2006 Buffalo, New York

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands, except share data)

1. Description of Business

Columbus McKinnon Corporation (the Company) is a leading U.S. designer and manufacturer of material handling products, systems and services which efficiently and ergonomically move, lift, position and secure material. Key products include hoists, cranes, chain and forged attachments. The Company's material handling products are sold, domestically and internationally, principally to third party distributors through diverse distribution channels, and to a lesser extent directly to end-users. The Company's integrated material handling solutions businesses deal primarily with end users and sales are concentrated, domestically and internationally (primarily Europe), in the consumer products, manufacturing, warehousing and, to a lesser extent, the steel, construction, automotive and other industrial markets. During fiscal 2006, approximately 64% of sales were to customers in the United States.

2. Accounting Principles and Practices

Advertising

Costs associated with advertising are expensed in the year incurred and are included in selling expense in the statement of operations. Advertising expenses were \$3,343,000, \$2,521,000, and \$2,406,000 in fiscal 2006, 2005, and 2004, respectively.

Cash and Cash Equivalents

The Company considers as cash equivalents all highly liquid investments with an original maturity of three months or less.

Concentrations of Labor

Approximately 23% of the Company's employees are represented by seven separate domestic and Canadian collective bargaining agreements which terminate at various times between August 2006 and May 2009. Approximately 10% of the labor force is covered by collective bargaining agreements that will expire within one year.

Consolidation

These consolidated financial statements include the accounts of the Company and its domestic and foreign subsidiaries; all significant intercompany accounts and transactions have been eliminated.

Derivatives and Financial Instruments

Derivative instruments held by the Company that have high correlation with the underlying exposure and are highly effective in offsetting underlying price movements are designated as hedges. Accordingly, gains and losses from changes in derivatives fair values are deferred until the underlying transaction occurs at which point they are then recognized in the statement of operations. When derivatives are not designated as hedges, the gains and losses from changes in fair value are recorded currently in the statement of operations. All derivates are carried at fair value in the balance sheet. The fair values of derivatives are determined by reference to quoted market prices. The Company's use of derivative instruments has historically been limited to cash flow hedges of certain interest rate risks.

The carrying value of the Company's current assets and current liabilities approximate their fair values based upon the relatively short maturity of those instruments. For the fair value of the Company's marketable securities and debt instruments, see Notes 6 and 10, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Foreign Currency Translations

The Company translates foreign currency financial statements as described in Financial Accounting Standards (FAS) No. 52. Under this method, all items of income and expense are translated to U.S. dollars at average exchange rates for the year. All assets and liabilities are translated to U.S. dollars at the year-end exchange rate. Gains or losses on translations are recorded in accumulated other comprehensive loss in the shareholders' equity section of the balance sheet. The functional currency is the foreign currency in which the foreign subsidiaries conduct their business. Gains and losses from foreign currency transactions are reported in other income and expense, net. There was an approximate \$100,000 loss, \$200,000 gain and \$600,000 loss on transactions with foreign subsidiaries in fiscal 2006, 2005 and fiscal 2004, respectively.

Goodwill

Goodwill is not amortized but is periodically tested for impairment, in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, "Goodwill and Other Intangible Assets." Goodwill impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. The fair value of a reporting unit is determined using a discounted cash flow methodology. The Company's reporting units are determined based upon whether discrete financial information is available and regularly reviewed, whether those units constitute a business, and the extent of economic similarities between those reporting units for purposes of aggregation. As a result of this analysis, the reporting units identified under SFAS No. 142 were at the component level, or one level below the reporting segment level as defined under SFAS No. 131. The Products segment was subdivided into three reporting units and the Solutions segment was subdivided into two reporting units. Identifiable intangible assets acquired in a business combination are amortized over their useful lives unless their useful lives are indefinite, in which case those intangible assets are tested for impairment annually and not amortized until their lives are determined to be finite. See Note 8 for further discussion of goodwill and intangible assets.

Inventories

Inventories are valued at the lower of cost or market. Cost of approximately 58% of inventories at March 31, 2006 (57% in 2005) has been determined using the LIFO (last-in, first-out) method. Costs of other inventories have been determined using the FIFO (first-in, first-out) or average cost method. FIFO cost approximates replacement cost

Marketable Securities

All of the Company's marketable securities, which consist of equity securities and corporate and governmental obligations, have been classified as available-for-sale securities and are therefore recorded at their fair values with the unrealized gains and losses, net of tax, reported in accumulated other comprehensive loss within shareholders' equity unless unrealized losses are deemed to be other than temporary. In such instance, the unrealized losses are reported in the statement of operations within other (income) and expense, net. Estimated fair value is based on published trading values at the balance sheet dates. The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. The cost of securities sold is based on the specific identification method. Interest and dividend income are included in other (income) and expense, net in the consolidated statements of operations.

The marketable securities are carried as long-term assets since they are held for the settlement of the Company's general and products liability insurance claims filed through CM Insurance Company, Inc., a wholly owned captive insurance subsidiary.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Property, Plant, and Equipment

Property, plant, and equipment are stated at cost and depreciated principally using the straight-line method over their respective estimated useful lives (buildings and building equipment—15 to 40 years; machinery and equipment—3 to 18 years). When depreciable assets are retired, or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in operating results.

Reclassification/Revisions

Certain prior year amounts have been reclassified to conform to the current year presentation.

In 2006, the Company has disclosed the investing portions of the cash flows attributable to its discontinued operations within the investing section of the consolidated statements of cash flows, whereas in prior years they were reported as a separate component on the consolidated statements of cash flows.

Research and Development

Research and development costs as defined in FAS No. 2, for the years ended March 31, 2006, 2005 and 2004 were \$1,614,000, \$1,289,000 and \$1,625,000, respectively and are classified as general and administrative expense in the consolidated statements of operations.

Revenue Recognition and Concentration of Credit Risk

Sales are recorded when title passes to the customer which is generally at time of shipment to the customer, except for long-term construction contracts as described below. The Company performs ongoing credit evaluations of its customers' financial condition, but generally does not require collateral to support customer receivables. The credit risk is controlled through credit approvals, limits and monitoring procedures. Accounts receivable are reported at net realizable value and do not accrue interest. The Company establishes an allowance for doubtful accounts based upon factors surrounding the credit risk of specific customers, historical trends and other factors. Accounts receivable are charged against the allowance for doubtful accounts once all collection efforts have been exhausted. The Company does not routinely permit customers to return product. However, sales returns are permitted in specific situations and typically include a restocking charge or the purchase of additional product. The Company has established an allowance for returns based upon historical trends.

The Company recognizes contract revenues under the percentage of completion method, measured by comparing direct costs incurred to total estimated direct costs. Changes in job performance, job conditions and estimated profitability, including those arising from final contract settlements, may result in revisions to costs and income and are recognized in the period in which the revisions are determined. In the event that a loss is anticipated on an uncompleted contract, a provision for the estimated loss is made at the time it is determined. Billings on contracts may precede or lag revenues earned, and such differences are reported in the balance sheet as current liabilities (accrued liabilities) and current assets (unbilled revenues), respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Sale-Leaseback Transactions

On January 28, 2005, the Company sold its corporate headquarters property and entered into a leaseback for a portion of the facility under a 10-year lease agreement. Net proceeds to the Company for the sale of the property were approximately \$2.7 million and the gain on the transaction was \$2.2 million. Of the total gain, \$1.0 million was recognized in 2005 under the caption other income, and \$1.2 million was deferred and will be recognized as income over the 10-year leaseback period. Additionally, \$0.5 million of non-cash value (rent abatement) will be recognized on a straight-line basis as lower operating expenses over the 10-year leaseback period.

Shipping and Handling Costs

Shipping and handling costs are a component of cost of products sold.

Stock-Based Compensation

At March 31, 2006, the Company has two stock-based employee compensation plans in effect, which are described more fully in Note 14. The Company accounts for these plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" (APB 25) and related Interpretations. No stock based employee compensation cost is reflected in net income, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant and the number of options granted was fixed. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition of SFAS No. 123 "Accounting for Stock-Based Compensation", to stock-based employee compensation:

	Year Ended March 31,						
		2006		2005		2004	
Net income, as reported Deduct: Total stock based employee compensation expenses determined under fair value based method	\$	59,796	\$	16,710	\$	1,193	
for all awards, net of related tax effects		(577)		(1,135)		(504)	
Net income, pro forma	\$	59,219	\$	15,575	\$	689	
Basic income per share:							
As reported	\$	3.73	\$	1.14	\$	0.08	
Pro forma	\$	3.69	\$	1.07	\$	0.05	
Diluted income per share:							
As reported	\$	3.60	\$	1.13	\$	0.08	
Pro forma	\$	3.56	\$	1.05	\$	0.05	

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Warranties

The Company offers warranties for certain of the products it sells. The specific terms and conditions of those warranties vary depending upon the product sold and the country in which the Company sold the product. The Company generally provides a basic limited warranty, including parts and labor for any product deemed to be defective for a period of one year. The Company estimates the costs that may be incurred under its basic limited warranty, based largely upon actual warranty repair costs history, and records a liability in the amount of such costs in the month that the product revenue is recognized. The resulting accrual balance is reviewed during the year. Factors that affect the Company's warranty liability include the number of units sold, historical and anticipated rate of warranty claims, and cost per claim.

Changes in the Company's product warranty accrual are as follows:

		Marc	h 31,	
	2	2006	2	2005
Balance at beginning of year	\$	832	\$	889
Accrual for warranties issued		4,658		2,475
Warranties settled		(3,358)		(2,532)
Balance at end of year	\$	2,132	\$	832

3. Discontinued Operations

In May 2002, the Company sold substantially all of the assets of Automatic Systems, Inc. (ASI). The ASI business was the principal business unit in the Company's former Solutions – Automotive segment. The Company received \$20,600,000 in cash and an 8% subordinated note in the principal amount of \$6,800,000 which is payable at a rate of \$214,000 per quarter over eight years beginning August 2004. Due to the uncertainty surrounding the financial viability of the new organization, the note has been recorded at the estimated net realizable value of \$0. Principal payments received on the note are recorded as income from discontinued operations at the time of receipt. All interest and principal payments required under the note have been made to date. The gross value of the note as of March 31, 2006 is approximately \$5,100,000.

4. Unbilled Revenues and Excess Billings

	Mar		
	2006		2005
Costs incurred on uncompleted contracts	\$ 52,615	\$	34,154
Estimated earnings.	15,361		11,498
Revenues earned to date	67,976		45,652
Less billings to date	56,331		37,133
	\$ 11,645	\$	8,519

The net amounts above are included in the consolidated balance sheets under the following captions:

		Marc	h 31,	
		2006		2005
Unbilled revenues	. \$	12,061	\$	8,848
Accrued liabilities		(416)		(329)
	\$	11,645	\$	8,519

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

5. Inventories

Inventories consisted of the following:

	March 31,					
	2006		2005			
At cost—FIFO basis:						
Raw materials	\$ 41,134	\$	42,283			
Work-in-process	12,199		10,238			
Finished goods	33,424		35,800			
	86,757		88,321			
LIFO cost less than FIFO cost	(11,912)		(10,695)			
Net inventories	\$ 74,845	\$	77,626			

6. Marketable Securities

Marketable securities are held for the settlement of the Company's general and products liability insurance claims filed through the Company's subsidiary, CM Insurance Company, Inc. (see Notes 2 and 15). On a quarterly basis, the Company reviews its marketable securities for declines in market value that may be considered other than temporary. The Company considers market value declines to be other than temporary if they are declines for a period longer than six months and in excess of 20% of original cost.

The following is a summary of available-for-sale securities at March 31, 2006:

		G	Fross	Gr	oss	Es	timated
		Unr	ealized	Unre	alized		Fair
	Cost	G	lains	Los	sses	,	Value
Government securities	\$ 10,859	\$	150	\$	25	\$	10,984
Equity securities	13,828		3,013		229		16,612
	\$ 24,687	\$	3,163	\$	254	\$	27,596

As of March 31, 2006, in accordance with FAS No. 115, the Company reduced the cost bases of certain equity securities since it was determined that the unrealized losses on those securities were other than temporary in nature. This determination resulted in the recognition of a pre-tax charge to earnings of \$78,000 for the year ended March 31, 2006, classified within other (income) and expense, net. The above schedule reflects the reduced cost bases.

The aggregate fair value of investments and unrealized losses on available-for-sale securities in an unrealized loss position at March 31, 2006 are as follows:

	ggregate ir Value	_	realized Losses
Equity securities in a loss position for less than 12 months Equity securities in a loss position for more than 12 months	\$ 1,012 1,553	\$	75 154
	\$ 2,565	\$	229

The net gain related to sales of marketable securities totaled \$1,436,000, \$706,000 and \$1,861,000 in fiscal 2006, 2005 and 2004, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following is a summary of available-for-sale securities at March 31, 2005:

		Gross		Gross		Gross Gross		Es	timated
		Unrealized		Unre	alized	Fair			
	Cost	G	Gains		sses	Value			
Government securities	\$ 7,967	\$	251	\$	-	\$	8,218		
Equity securities	 14,751		2,076		430		16,397		
	\$ 22,718	\$	2,327	\$	430	\$	24,615		

As of March 31, 2005, in accordance with FAS No. 115, the Company reduced the cost bases of certain equity securities since it was determined that the unrealized losses on those securities were other than temporary in nature. This determination resulted in the recognition of a pre-tax charge to earnings of \$280,000 and \$110,000 for the years ended March 31, 2005 and 2004, respectively, classified within other (income) and expense, net. The above schedule reflects the reduced cost bases.

The amortized cost and estimated fair value of debt and equity securities at March 31, 2006, by contractual maturity, are shown below:

	C	Cost	Estimated Fair Value		
Due in one year or less	\$	5,064	\$	5,068	
Due in one to five years		2,008		2,015	
Due in five to ten years		3,787		3,901	
		10,859		10,984	
Equity securities		13,828		16,612	
	\$	24,687	\$	27,596	

Net unrealized gain included in the balance sheet amounted to \$2,909,000 at March 31, 2006 and \$1,897,000 at March 31, 2005. The amounts, net of related income taxes of \$1,018,000 and \$664,000 at March 31, 2006 and 2005, respectively, are reflected as a component of accumulated other comprehensive loss within shareholders' equity.

7. Property, Plant, and Equipment

Consolidated property, plant, and equipment of the Company consisted of the following:

	Mar	ch 31,
	2006	<u>2005</u>
Land and land improvements	\$ 4,564	\$ 5,183
Buildings	33,755	33,991
Machinery, equipment, and leasehold improvements	102,485	99,147
Construction in progress.	1,736	2,089
	142,540	140,410
Less accumulated depreciation	87,408	83,173
Net property, plant, and equipment	\$ 55,132	\$ 57,237

Depreciation expense was \$8,575,000, \$8,859,000, and \$9,743,000 for the years ended March 31, 2006, 2005 and 2004, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

8. Goodwill and Intangible Assets

As discussed in Note 2, goodwill is not amortized but is periodically tested for impairment, in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, "Goodwill and Other Intangible Assets." Goodwill impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. The fair value of a reporting unit is determined using a discounted cash flow methodology. The Company's reporting units are determined based upon whether discrete financial information is available and regularly reviewed, whether those units constitute a business, and the extent of economic similarities between those reporting units for purposes of aggregation. As a result of this analysis, the reporting units identified under SFAS No. 142 were at the component level, or one level below the reporting segment level as defined under SFAS No. 131. The Products segment was subdivided into three reporting units and the Solutions segment was subdivided into two reporting units.

Identifiable intangible assets acquired in a business combination are amortized over their useful lives unless their useful lives are indefinite, in which case those intangible assets are tested for impairment annually and not amortized until their lives are determined to be finite.

No impairment charges were recorded during fiscal 2006, 2005 or 2004.

A summary of changes in goodwill during the years ended March 31, 2006 and 2005 by business segment is as follows:

	Ī	Products	Solut	<u>ions</u>	<u>Total</u>		
Balance at March 31, 2004	\$	184,994	\$	-	\$	184,994	
Currency translation		449		-		449	
Balance at March 31, 2005	\$	185,443	\$	-	\$	185,443	
Currency translation		(526)		-		(526)	
Balance at March 31, 2006	\$	184,917	\$	-	\$	184,917	

Other intangibles, net consists of the following:

		Mar	March 31,				
·	2006						
Intangible pension assets	\$	2,148	\$	1,537			
Patents and other, net		262		305			
Other intangibles, net		2,410	\$	1,842			

Only the patents and other, net is subject to amortization. Based on the current amount of patents and other, net, the estimated amortization expense for each of the succeeding five years is expected to be \$100,000, \$75,000, \$50,000, \$28,000, and 9,000, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

9. Accrued Liabilities and Other Non-current Liabilities

Consolidated accrued liabilities of the Company consisted of the following:

	March 31,			
		2006	2	2005
Accrued payroll	\$	18,736	\$	15,895
Accrued pension cost		5,987		4,325
Interest payable		6,199		8,097
Accrued workers compensation		2,959		2,959
Accrued income taxes payable		6,493		4,237
Accrued postretirement benefit obligation		1,620		2,100
Accrued health insurance		2,891		2,550
Accrued general and product liability costs		4,000		3,500
Other accrued liabilities		12,379		8,665
	\$	61,264	\$	52,328

Consolidated other non-current liabilities of the Company consisted of the following:

		2006	2	005
Accumulated postretirement benefit obligation	\$	4,856	\$	5,273
Accrued general and product liability costs		16,969		12,594
Accrued pension cost		20,285		18,637
Accrued workers compensation		5,383		3,134
Other non-current liabilities		2,996		2,365
	\$	50,489	\$	42,003

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

10. Debt

Consolidated debt of the Company consisted of the following:

consolitated debt of the company consisted of the following.				
	March 31,			
		2006		2005
Revolving Credit Facility due February 22, 2010	\$	-	\$	
Previous Term Loan repaid and retired April 2005		-		5,819
10% Senior Secured Notes due August 1, 2010 with interest				
payable in semi-annual installments		67,384		115,000
Other senior debt		584		735
Total senior debt		67,968		121,554
8 7/8% Senior Subordinated Notes due November 1, 2013 with interest				
payable in semi-annual installments		136,000		-
8½% Senior Subordinated Notes repaid and retired in October 2005		-		144,548
Total		203,968		266,102
Less current portion		127		5,819
-	\$	203,841	\$	260,283

On March 16, 2006, the Company amended and expanded its revolving credit facility. The Revolving Credit Facility provides availability up to a maximum of \$75,000,000. Provided there is no default, the Company may on a one-time basis, request an increase in the availability of the Revolving Credit Facility by an amount not exceeding \$50,000,000 if all Senior Secured Notes have been repaid in full or will be repaid in full contemporaneously with such increase, or \$25,000,000 in the event that any Senior Secured Notes remain outstanding. The unused Revolving Credit Facility totaled \$64,800,000, net of outstanding borrowings of \$0 and outstanding letters of credit of \$10,200,000. Interest on the revolver is payable at varying Eurodollar rates based on LIBOR or prime plus a spread determined by our leverage ratio amounting to 100 or 0 basis points, respectively, at March 31, 2006. The Revolving Credit Facility is secured by all domestic inventory, receivables, equipment, real property, subsidiary stock (limited to 65% for foreign subsidiaries) and intellectual property.

On September 2, 2005, the Company issued \$136,000,000 of 8 7/8% Senior Subordinated Notes (8 7/8% Notes) due November 1, 2013. Proceeds from the 8 7/8% Notes and cash on hand were used to repurchase all of the outstanding 8 ½% Senior Subordinated Notes (8 ½% Notes). The repurchase of the 8 ½% Notes occurred at a premium resulting in a pre-tax loss on early extinguishment of debt of \$2,298,000. As a result of the repurchase of the 8 ½% Notes, \$922,000 of pre-tax deferred financing costs and \$110,000 of the original issue discount were written-off. The net effect of these items, a \$3,330,000 pre-tax loss in fiscal 2006, is shown as part of other (income) and expense, net.

On July 22, 2003, the Company issued \$115,000,000 of 10% Senior Secured Notes (10% Notes) due August 1, 2010. Proceeds from this offering were used for the repayment of various outstanding debt instruments including the repurchase of \$35,700,000 of the 8 ½% Notes at a discount (\$30,060,000). The redemption in fiscal 2004 of the 8½% Notes occurred at a discount resulting in a \$5,640,000 pre-tax gain on early extinguishment of debt. As a result of the repayment of the various outstanding debt instruments including the 8½% Notes, \$4,925,000 of pre-tax deferred financing costs were written-off in fiscal 2004. The net effect of these two items, a \$715,000 pre-tax gain, is shown as part of other (income) and expense, net.

During fiscal 2006, the Company used a portion of the proceeds from its stock offering (see Note 14) to repurchase \$47,616,000 of the outstanding 10% Notes. The repurchase of the 10% Notes occurred at a premium resulting in a pre-tax loss on early extinguishment of debt of \$4,786,000. As a result of the repurchase of the 10% Notes, \$1,085,000 of pre-tax deferred financing costs was written-off. The net effect of these items, a \$5,871,000 pre-tax loss in fiscal 2006, is shown as part of other (income) and expense, net.

During April and May of 2006, the Company repurchased an additional \$32,128,000 of the outstanding 10% Notes (see Note 24).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The corresponding credit agreement associated with the Revolving Credit Facility places certain debt covenant restrictions on the Company, including certain financial requirements and a restriction on dividend payments, with which the Company was in compliance as of March 31, 2006.

From time to time, the Company manages its debt portfolio by using interest rate swaps to achieve an overall desired position of fixed and floating rates. In June 2001, the Company entered into an interest rate swap agreement to effectively convert \$40,000,000 of variable-rate debt to fixed-rate debt, which matured in June 2003. This cash flow hedge was considered effective and the gain or loss on the change in fair value was reported in other comprehensive income, net of tax.

In August 2003, the Company entered into an interest rate swap agreement to convert \$93,500,000 of fixed-rate debt (10%) to variable-rate debt (LIBOR plus 578.2 basis points) through August 2008 and \$57,500,000 from August 2008 through August 2010. This interest rate swap was considered an ineffective hedge and therefore the change in fair value was recognized in income as a gain. The swap was terminated in January 2004 and a pre-tax gain of \$1,900,000 was recognized as other income as a result of changes in the fair value of the swap.

Provisions of the 8 7/8% Notes include, without limitation, restrictions on indebtedness, asset sales, and dividends and other restricted payments. Until November 1, 2008, the Company may redeem up to 35% of the outstanding notes at a redemption price of 108.875% with the proceeds of equity offerings, subject to certain restrictions. The 8 7/8% Notes are redeemable at the option of the Company, in whole or in part, at prices declining annually from the Make-Whole Price (as defined in the 8 7/8% Notes agreement) to 100% on and after November 1, 2011. In the event of a Change of Control (as defined in the indenture for such notes), each holder of the 8 7/8% Notes may require us to repurchase all or a portion of such holder's 8 7/8% Notes at a purchase price equal to 101% of the principal amount thereof. The 8 7/8% Notes are guaranteed by certain existing and future domestic subsidiaries and are not subject to any sinking fund requirements.

Provisions of the 10% Notes include, without limitation, restrictions on liens, indebtedness, asset sales, and dividends and other restricted payments. The 10% Notes are redeemable at the option of the Company, in whole or in part, at prices declining annually from the Make-Whole Price (as defined in the 10% Notes agreement) to 100% on and after August 1, 2009. In the event of a Change of Control (as defined in the indenture for such notes), each holder of the 10% Notes may require the Company to repurchase all or a portion of such holder's 10% Notes at a purchase price equal to 101% of the principal amount thereof. The 10% Notes are guaranteed by certain existing and future domestic subsidiaries and are not subject to any sinking fund requirements. The 10% Notes are also secured, in a second lien position, by all domestic inventory, receivables, equipment, real property, subsidiary stock (limited to 65% for foreign subsidiaries) and intellectual property.

The carrying amount of the Company's revolving credit facility approximates the fair value based on current market rates. The Company's Senior Secured Notes and Senior Subordinated Notes have an approximate fair market value of \$74,207,000 and \$142,800,000, respectively, based on quoted market prices, the total of which is more than their aggregate carrying amount of \$203,384,000.

The principal payments scheduled to be made as of March 31, 2006 on the above debt, for the next five annual periods subsequent thereto, are as follows (in thousands):

2007	\$ 127
2008	117
2009	53
2010	33
2011	67,411

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

11. Retirement Plans

The Company provides defined benefit pension plans to certain employees. The Company uses December 31 as the measurement date for all of its pension plans. The following provides a reconciliation of benefit obligation, plan assets, and funded status of the plans:

	March 31,			
		2006		2005
Change in benefit obligation:				
Benefit obligation at beginning of year	\$	120,634	\$	110,865
Service cost		4,004		4,285
Interest cost		7,213		6,718
Actuarial loss		7,003		2,888
Benefits paid		(4,860)		(4,410)
Foreign exchange rate changes		154		288
Benefit obligation at end of year	\$	134,148	\$	120,634
Change in plan assets: Fair value of plan assets at beginning of year Actual gain on plan assets		91,323 5,795	\$	80,564 5,250
Employer contribution		7,816		9,673
Benefits paid		(4,860)		(4,410)
Foreign exchange rate changes		132		246
Fair value of plan assets at end of year	\$	100,206	\$	91,323
Funded status		(33,942) 35,282 2,148	\$	(29,311) 29,744 1,537
Net amount recognized	\$	3,488	\$	1,970

Amounts recognized in the consolidated balance sheets are as follows:

		,		
		2006		2005
Intangible asset	\$	2,148	\$	1,537
Accrued liabilities		(5,987)		(4,325)
Other non-current liabilities		(20,284)		(18,637)

Expected return on plan assets		(6,753)		(6,666)		(5,404)	
Net amortization		2,518		4,033		1,978	
Net periodic pension cost	\$	6,982	\$	8,371	\$	7,206	

The fiscal 2005 pension expense includes a one-time, non-cash charge of \$2,037,000 relating to a defined benefit plan at one of our foreign operations.

The accumulated benefit obligation for all defined benefit plans was \$126,196,000 and \$113,486,000 as of March 31, 2006 and 2005, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Information for pension plans with a projected benefit obligation in excess of plan assets is as follows:

	March 31,			_
	<u>2006</u>		<u>2005</u>	-
Projected benefit obligation	\$ 134,148	\$	120,634	
Fair value of plan assets	100,206		91,323	

Information for pension plans with an accumulated benefit obligation in excess of plan assets is as follows:

_	March 31,			••	
		<u>2006</u>		2005	
Accumulated benefit obligation	\$	126,196	\$	113,486	
Fair value of plan assets		100,206		91,323	

Unrecognized gains and losses are amortized on a straight-line basis over the average remaining service period of active participants.

The weighted-average assumptions in the following table represent the rates used to develop the actuarial present value of the projected benefit obligation for the year listed and also net periodic pension cost for the following year:

_	March 31,			
	2006	2005	2004	2003
Discount rate	5.75%	6.00%	6.25%	6.75%
Expected long-term rate of return on plan assets	7.50	8.25	8.40	8.50
Rate of compensation increase	4.00	4.00	4.00	4.00

The expected rate of return on plan asset assumptions are determined considering historical averages and real returns on each asset class.

The Company's retirement plan target and actual asset allocations are as follows:

		March 3	1,	
	Target		Act	ual
	2007		2006	2005
Equity securities	70%		56%	55%
Fixed income	30		44	45
Total plan assets	100%		100%	100%

The Company has an investment objective for domestic pension plans to adequately provide for both the growth and liquidity needed to support all current and future benefit payment obligations. The investment strategy is to invest in a diversified portfolio of assets which are expected to satisfy the aforementioned objective and produce both absolute and risk adjusted returns competitive with a benchmark that is a blend of the S&P 500 and an aggregate bond fund. The shift to the targeted allocation is the result of management's re-evaluation of its investment allocation. The targeted allocation will be accomplished as some plan assets governed by collective bargaining contracts will be transferred from fixed income into equity securities, as well as reallocation of remaining assets to achieve the desired balance during fiscal 2007.

The Company's funding policy with respect to the defined benefit pension plans is to contribute annually at least the minimum amount required by the Employee Retirement Income Security Act of 1974 (ERISA). Additional contributions may be made to minimize PBGC premiums. The Company expects to contribute \$5,987,000 to its pension plans in fiscal 2007.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Information about the expected benefit payments for the Company's defined benefit plans is as follows:

2007	\$ 5,079
2008	6,174
2009	5,888
2010	6,487
2011	7,084
2012-2016	46,221

The Company also sponsors defined contribution plans covering substantially all domestic employees. Participants may elect to contribute basic contributions. These plans provide for employer contributions based primarily on employee participation. The Company recorded a charge for such contributions of approximately \$1,476,000, \$673,000 and \$635,000 for the years ended March 31, 2006, 2005 and 2004, respectively.

12. Employee Stock Ownership Plan (ESOP)

The AICPA Statement of Position 93-6, "Employers' Accounting for Employee Stock Ownership Plans" requires that compensation expense for ESOP shares be measured based on the fair value of those shares when committed to be released to employees, rather than based on their original cost. Also, dividends on those ESOP shares that have not been allocated or committed to be released to ESOP participants are not reflected as a reduction of retained earnings. Rather, since those dividends are used for debt service, a charge to compensation expense is recorded. Furthermore, ESOP shares that have not been allocated or committed to be released are not considered outstanding for purposes of calculating earnings per share.

The obligation of the ESOP to repay borrowings incurred to purchase shares of the Company's common stock is guaranteed by the Company; the unpaid balance of such borrowings, if any, would be reflected in the consolidated balance sheet as a liability. An amount equivalent to the cost of the collateralized common stock and representing deferred employee benefits has been recorded as a deduction from shareholders' equity.

Substantially all of the Company's domestic non-union employees are participants in the ESOP. Contributions to the plan result from the release of collateralized shares as debt service payments are made. Compensation expense amounting to \$653,000, \$296,000 and \$200,000 in fiscal 2006, 2005 and 2004, respectively, is recorded based on the guaranteed release of the ESOP shares at their fair market value. Dividends on allocated ESOP shares, if any, are recorded as a reduction of retained earnings and are applied toward debt service.

At March 31, 2006 and 2005, 723,618 and 795,791 of ESOP shares, respectively, were allocated or available to be allocated to participants' accounts. At March 31, 2006 and 2005, 249,821 and 284,695 of ESOP shares were pledged as collateral to guarantee the ESOP term loans.

The fair market value of unearned ESOP shares at March 31, 2006 amounted to \$6,728,000.

13. Postretirement Benefit Obligation

The Company sponsors defined benefit postretirement health care plans that provide medical and life insurance coverage to certain domestic retirees and their dependents of one of its subsidiaries. Prior to the acquisition of this subsidiary, the Company did not sponsor any postretirement benefit plans. The Company pays the majority of the medical costs for certain retirees and their spouses who are under age 65. For retirees and dependents of retirees who retired prior to January 1, 1989, and are age 65 or over, the Company contributes 100% toward the American Association of Retired Persons ("AARP") premium frozen at the 1992 level. For retirees and dependents of retirees who retired after January 1, 1989, the Company contributes \$35 per month toward the AARP premium. The life insurance plan is noncontributory.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

On December 8, 2003, Congress passed the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 ("Medicare Act"). In March 2004, the FASB issued Staff Position No FAS 106-2 "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug Improvement and Modernization Act of 2003 ("FSP No 106-2")," which provides accounting guidance on how to account for the effects of the Medicare Act on postretirement plans that provide prescription drug benefits. The Medicare Act also requires certain disclosures regarding the effect of the subsidy provided by the Medicare Act. Additionally, FSP 106-2 provides two transition methods – retroactive to the date of enactment or prospective from the date of adoption. The Company elected to adopt FAS 106-2 and apply the prospective transition method in the second quarter of fiscal 2005. The accumulated post retirement benefit obligation decreased \$2,339,000 as of July 4, 2004 and net periodic postretirement benefit cost decreased by \$225,000 for fiscal 2005. As a result of delays in filing the required paperwork to receive the prescription drug benefits under the Medicare Act, the benefit obligation has been adjusted at March 31, 2006 to reflect an increase in the liability that will be charged to net periodic postretirement benefit cost over the average remaining service period of the participants. The Company still expects to file the required paperwork at some point in the future to receive the benefit. The impact of the delayed filing was not material to the benefit obligation at March 31, 2006 or net periodic postretirement benefit cost for the year end March 31, 2006.

The Company's postretirement health benefit plans are not funded. In accordance with FAS No. 132 "Employers' Disclosures about Pensions and Other Postretirement Benefits," the following sets forth a reconciliation of benefit obligation and the funded status of the plan:

_	March 31,			·
		2006		2005
Change in benefit obligation:				
Benefit obligation at beginning of year	\$	12,927	\$	15,984
Service cost		6		17
Interest cost		751		834
Amendment		-		(2,339)
Actuarial loss		601		460
Benefits paid		(2,064)		(2,029)
Benefit obligation at end of year	\$	12,221	\$	12,927
Funded status	\$	(12,221) 5.745	\$	(12,927) 5,554
Net amount recognized in accrued and other non-current liabilities		(6.476)	\$	(7,373)
The amount recognized in accrace and other non-current natimics	Ψ	(0, 170)	Ψ	(1,515)

Net periodic postretirement benefit cost included the following:

	Year Ended March 31,			
	<u>2006</u>	2005	2004	
Service cost—benefits attributed to service during the period	\$ 6	\$ 17	\$ 11	
Interest cost	751	834	869	
Amortization of prior service gain	-	-	(153)	
Amortization of plan net losses	411	460	643	
Net periodic postretirement benefit cost	\$1,168	\$1,311	\$1,370	

For measurement purposes, healthcare costs were assumed to increase 9% in fiscal 2007, grading down over time to 5% in seven years. The discount rate used in determining the accumulated postretirement benefit obligation was 5.75% and 6.00% as of March 31, 2006 and 2005, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Information about the expected benefit payments for the Company's postretirement health benefit plans is as follows:

2007	\$ 1,620
2008	1,529
2009	1,441
2010	1,323
2011	1,315
2012-2016	5,250

Assumed medical claims cost trend rates have an effect on the amounts reported for the health care plans. A one-percentage point change in assumed health care cost trend rates would have the following effects:

	One Percentage	One Percentage
_	Point Increase	Point Decrease
Effect on total of service and interest cost components	\$ 40	\$ (36)
Effect on postretirement obligation	724	(656)

14. Earnings per Share and Stock Plans

Earnings per Share

The Company calculates earnings per share in accordance with Statement of Financial Accounting Standards No. 128, "Earnings per Share" (FAS No. 128). Basic earnings per share excludes any dilutive effects of options, warrants, and convertible securities. Diluted earnings per share includes any dilutive effects of stock options.

The following table sets forth the computation of basic and diluted earnings per share:

•	Year Ended March 31,					
·		2006		2005		2004
Numerator for basic and diluted earnings per share:						
Income from continuing operations	\$	59,100	\$	16,067	\$	1,193
Income from discontinued operations		696		643		-
Net income	\$	59,796	\$	16,710	\$	1,193
Denominators: Weighted-average common stock outstanding— denominator for basic EPS Effect of dilutive employee stock options		16,052 576		14,594 209		14,553 1
Adjusted weighted-average common stock outstanding and assumed conversions— denominator for diluted EPS		16,628		14,803		14,554

The weighted-average common stock outstanding shown above is net of unallocated ESOP shares (see Note 12).

During fiscal 2006, the Company registered an additional 3,350,000 shares of its common stock which were sold at \$20.00 per share. The number of shares offered by the Company was 3,000,000 and 350,000 were offered by a selling shareholder. The Company did not receive any proceeds from the sale of shares by the selling shareholder. This stock offering increased the Company's weighted average common stock outstanding by 1,134,000 shares for fiscal 2006. A portion of the proceeds received by the Company were used to redeem \$47,616,000 principal amount of the Company's outstanding 10% Senior Secured Notes. The balance of the proceeds is available for other general corporate purposes to advance the Company's strategy of global growth, additional debt repayment, investments and acquisitions.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Stock Plans

The Company maintains two stock option plans, a Non-Qualified Stock Option Plan (Non-Qualified Plan) and an Incentive Stock Option Plan (Incentive Plan). Under the Non-Qualified Plan, options may be granted to officers and other key employees of the Company as well as to non-employee directors and advisors. As of March 31, 2006, no options have been granted to non-employees. Options granted under the Non-Qualified and Incentive Plans become exercisable over a four-year period at the rate of 25% per year commencing one year from the date of grant at an exercise price of not less than 100% of the fair market value of the common stock on the date of grant. Any option granted under the Non-Qualified plan may be exercised not earlier than one year from the date such option is granted. Any option granted under the Incentive Plan may be exercised not earlier than one year and not later than 10 years from the date such option is granted.

A summary of option transactions during each of the three fiscal years in the period ended March 31, 2006 is as follows:

		Weighte	ed-average
	Shares	Exerc	ise Price
Balance at March 31, 2003	1,311,750	\$	14.05
Granted	45,000		6.92
Cancelled	(126,900)		14.28
Balance at March 31, 2004	1,229,850	\$	13.77
Granted	741,500		6.41
Exercised	(52,000)		8.25
Cancelled	(116,550)		13.82
Balance at March 31, 2005	1,802,800	\$	10.89
Granted	45,000		21.61
Exercised	(626,282)		11.41
Cancelled	(89,400)		7.76
Balance at March 31, 2006	1,132,118	\$	11.28

A summary of exercisable and available for grant options is as follows:

_	Year Ended March 31,			
	<u>2006</u>	<u>2005</u>	<u>2004</u>	
Exercisable at end of year	605,243	926,050	851,425	
Available for grant at end of year	172,100	127,700	752,650	

Exercise prices for options outstanding as of March 31, 2006, ranged from \$5.46 to \$29.00. The following table provides certain information with respect to stock options outstanding at March 31, 2006:

Range of Exercise Prices	Stock Options Outstanding	Weighted-average <u>Exercise Price</u>	Weighted-average Remaining <u>Contractual Life</u>
Up to \$10.00	702,000	\$ 6.91	7.3
\$10.01 to \$20.00	175,568	14.32	4.9
\$20.01 to \$30.00	254,550	21.25	4.1
_	1,132,118	\$ 11.28	6.2

The following table provides certain information with respect to stock options exercisable at March 31, 2006:

Range of Exercise Prices	Stock Options Outstanding	Weighted-average Exercise Price
Up to \$10.00	276,375	\$ 8.95
\$10.01 to \$20.00	119,318	14.51
\$20.01 to \$30.00	209,550	21.18
	605,243	<u>\$ 14.28</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company has elected to follow Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" (APB 25) in accounting for its employee stock options because, as discussed below, the alternative fair value accounting provided for under FAS No. 123, "Accounting for Stock-Based Compensation," requires use of option valuation models that were not developed for use in valuing employee stock options. Under APB 25, because the exercise price of the Company's employee stock options equals the market price of the underlying stock on the grant date and the number of options granted is fixed, no compensation expense is recognized.

Pro forma information regarding net income and earnings per share is required by FAS No. 123, and has been determined as if the Company had accounted for its employee stock options under the fair value method of that Statement. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options.

For purposes of pro forma disclosures, the estimated fair value of the options is amortized to expense over the options' vesting period. The fair value for issued options in fiscal 2006, 2005 and 2004 was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions:

	Year Ended	Year Ended	Year Ended
	March 31, 2006	March 31, 2005	March 31, 2004
Assumptions:			
Risk-free interest rate	4.5 %	4.9 %	4.5 %
Dividend yield—Incentive Plan	0.0 %	0.0 %	0.0 %
Volatility factor	0.615	0.569	0.567
Expected life—Incentive Plan	5 years	5 years	5 years

The weighted-average fair value of options granted in 2006, 2005 and 2004 was \$12.13, \$3.45 and \$3.68 per share, respectively.

The Company maintains a Restricted Stock Plan, under which the Company had 48,000 and 49,000 shares reserved for issuance at March 31, 2006 and 2005, respectively. The Company charges unearned compensation, a component of shareholders' equity, for the market value of shares, as they are issued. It is then ratably amortized over the restricted period. Grantees that remain continuously employed with the Company become vested in their shares five years after the date of the grant. 1,000 shares were issued during the year ended March 31, 2006. No shares were issued during the years ended March 31, 2005 or 2004.

15. Loss Contingencies

From time to time, the Company is named a defendant in legal actions arising out of the normal course of business. The Company is not a party to any pending legal proceeding other than ordinary, routine litigation incidental to our business. The Company does not believe that any of our pending litigation will have a material impact on its business.

General and Product Liability— During the fourth quarter of fiscal 2006, the Company reevaluated the predictability of future cash flows associated with its self-insured product liability and asbestos reserves and concluded that future cash payments related to reserves for nonasbestos claims could no longer be discounted due to their underlying uncertainty. Reserves for asbestos claims continue to be discounted at a risk free rate. This change in estimate resulted in a reduction in the discount recorded by the company of approximately \$1,578,000 (\$0.09 diluted EPS impact for fiscal 2006). The gross reserves as of March 31, 2006 and 2005 were \$23,329,000 and \$19,653,000, respectively. This liability is funded by investments in marketable securities (see Notes 2 and 6).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table provides a reconciliation of the beginning and ending balances for accrued general and product liability:

_	Ye	ar Ended Marc	h 31,
	2006	<u>2005</u>	2004
Accrued general and product liability, beginning of year	\$ 16,094	\$ 15,930	\$14,439
Add impact of change in discount estimate	1,578	-	-
Add provision for claims	6,342	5,780	5,398
Deduct payments for claims	(3,045)	(5,616)	(3,907)
Accrued general and product liability, end of year	\$ 20,969	\$ 16,094	\$ 15,930

The per occurrence limits on our self-insurance for general and product liability coverage to Columbus McKinnon were \$2,000,000 from inception through fiscal 2003 and \$3,000,000 for fiscal 2004 and thereafter. In addition to the per occurrence limits, the Company's coverage is also subject to an annual aggregate limit, applicable to losses only. These limits range from \$2,000,000 to \$6,000,000 for each policy year from inception through fiscal 2006.

Along with other manufacturing companies, the Company is subject to various federal, state and local laws relating to the protection of the environment. To address the requirements of such laws, the Company has adopted a corporate environmental protection policy which provides that all of its owned or leased facilities shall, and all of its employees have the duty to, comply with all applicable environmental regulatory standards, and the Company has initiated an environmental auditing program for our facilities to ensure compliance with such regulatory standards. The Company has also established managerial responsibilities and internal communication channels for dealing with environmental compliance issues that may arise in the course of our business. Because of the complexity and changing nature of environmental regulatory standards, it is possible that situations will arise from time to time requiring the Company to incur expenditures in order to ensure environmental regulatory compliance. However, the Company is not aware of any environmental condition or any operation at any of its facilities, either individually or in the aggregate, which would cause expenditures having a material adverse effect on its results of operations, financial condition or cash flows and, accordingly, has not budgeted any material capital expenditures for environmental compliance for fiscal 2007.

Like many industrial manufacturers, the Company is involved in asbestos-related litigation. In continually evaluating costs relating to its estimated asbestos-related liability, the Company reviews, among other things, the incidence of past and recent claims, the historical case dismissal rate, the mix of the claimed illnesses and occupations of the plaintiffs, its recent and historical resolution of the cases, the number of cases pending against it, the status and results of broad-based settlement discussions, and the number of years such activity might continue. Based on this review, the Company has estimated its share of liability to defend and resolve probable asbestos-related personal injury claims. This estimate is highly uncertain due to the limitations of the available data and the difficulty of forecasting with any certainty the numerous variables that can affect the range of the liability. The Company will continue to study the variables in light of additional information in order to identify trends that may become evident and to assess their impact on the range of liability that is probable and estimable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Based on actuarial information, the Company has estimated its asbestos-related aggregate liability through March 31, 2031 and March 31, 2082 to range between \$5,500,000 and \$19,000,000 using actuarial parameters of continued claims for a period of 25 to 76 years. The Company's estimation of its asbestos-related aggregate liability that is probable and estimable, in accordance with U.S. generally accepted accounting principles, is through March 31, 2031 and ranges from \$5,500,000 to \$6,500,000 as of March 31, 2006. The range of probable and estimable liability reflects uncertainty in the number of future claims that will be filed and the cost to resolve those claims, which may be influenced by a number of factors, including the outcome of the ongoing broad-based settlement negotiations, defensive strategies, and the cost to resolve claims outside the broad-based settlement program. Based on the underlying actuarial information, the Company has reflected \$6,300,000 as a liability in the consolidated financial statements in accordance with U.S. generally accepted accounting principles. The increase in the recorded liability from the amount of \$4,800,000 at March 31, 2005 is due to a change in actuarial parameters used to calculate required asbestos liability reserve levels. The recorded liability does not consider the impact of any potential favorable federal legislation such as the "FAIR Act." Of this amount, management expects to incur asbestos liability payments of approximately \$500,000 over the next 12 months. Because payment of the liability is likely to extend over many years, management believes that the potential additional costs for claims will not have a material after-tax effect on the financial condition of the Company or its liquidity, although the net after-tax effect of any future liabilities recorded could be material to earnings in a future period.

16. Restructuring Charges

The Company has analyzed its global capacity requirements and, as a result, began a series of facility rationalization projects in early fiscal 2002. The decision to close or significantly reorganize the facilities identified was based upon the cost structure of those facilities relative to others within the Company. Production operations were transferred to other facilities within the same reporting segment, to better utilize their available capacity.

During fiscal 2006, the Company recorded restructuring costs of \$1,609,000 related to environmental remediation charges, inventory disposal costs, and facility costs as a result of the continued closure, merging and reorganization of the Company. \$1,000,000 and \$600,000 of these costs are related to the Products and Solutions segments, respectively. The charges primarily relate to the cost of removal of certain environmentally hazardous materials in accordance with SFAS No. 143 "Accounting for Asset Retirement Obligations" and FIN 47 (\$600,000) and inventory disposal related to the rationalization of certain product families within our mechanical jacks line (\$400,000). In addition, we have accrued additional costs of maintenance of a non-operating facility based on anticipated sale date (\$300,000). The costs associated with the disposal of this facility were originally accrued as a result of the restructuring occurring prior to the adoption of SFAS No. 146 SFAS No. 146 "Accounting for the Costs Associated with Exit or Disposal Activities." As of March 31, 2006, the liability primarily consists of costs associated with the preparation and maintenance of a non-operating facility and environmental remediation costs which were accrued in accordance with SFAS No. 143. The Company has one facility that is completely closed and prepared for disposal.

During fiscal 2005, the Company recorded restructuring costs of \$910,000 related to various employee termination benefits and facility costs as a result of the continued closure, merging and reorganization of the Company. \$600,000 and \$300,000 of these costs are related to the Products and Solutions segments, respectively. The charges primarily relate to the maintenance of facilities being expensed on an as incurred basis in accordance with SFAS No. 146. As of March 31, 2005, the liability primarily consisted of costs associated with the preparation and maintenance of a non-operating facility prior to disposal which were accrued prior to the adoption of SFAS No. 146. Due to changes in the real estate market and a reassessment of the fair value of the property, the asset was written-down by \$300,000 during fiscal 2005.

During fiscal 2004, the Company recorded restructuring costs of \$1,239,000 related to various employee termination benefits and facility costs as a result of the continued closure, merging and reorganization of the Company and completion of the two open projects from fiscal 2003. \$800,000 and \$400,000 of these costs are related to the Products and Solutions segments, respectively. Approximately 130 employees were terminated at the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

various facilities. As of March 31, 2004, the liability consisted of severance payments and costs associated with the preparation and maintenance of non-operating facilities prior to disposal which were accrued prior to the adoption of SFAS No. 146 "Accounting for Costs Associated with Exit or Disposal Activities."

The following provides a reconciliation of the activity related to restructuring reserves:

	<u>Em</u>	ployee	Fa	cility	1	otal
Reserve at March 31, 2003	\$	922	\$	1,409	\$	2,331

17. Income Taxes

The provision for income taxes differs from the amount computed by applying the statutory federal income tax rate to income from continuing operations before income tax expense. The sources and tax effects of the difference were as follows:

	Yea	r En	ded Marcl	n 31	,
-	2006		2005		2004
Expected tax at 35%	\$ 9,854	\$	6,617	\$	1,821
State income taxes net of federal benefit	705		363		614
Foreign taxes greater (less) than statutory provision	41		(579)		905
Permanent items	370		-		-
Benefit of worthless stock deduction	-		-		(44,815)
Research and development credit	-		-		(1,058)
Valuation allowance	(44,237)		(4,435)		46,974
Other	2,321		230		(432)
Actual tax (benefit) provision	\$ (30,946)	\$	2,196	\$	4,009

The provision for income tax (benefit) expense consisted of the following:

		Yea	Year Ended March 31, 2006 2005 856 \$ (426) 1,084 559				
	-	2006		2005		2004

State taxes		1,084		559		928	
Foreign		4,082		3,034		2,779	
Deferred income tax (benefit) expense:							
United States		(37,099)		-		880	
Foreign		131		(971)		(725)	
-	\$	(30,946)	\$	2,196	\$	4,009	

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company applies the liability method of accounting for income taxes as required by FAS Statement No. 109, "Accounting for Income Taxes." The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are as follows:

	Marcl	ı 31,	
	2006		2005
Deferred tax assets:			
Federal net operating loss carryforwards	\$ 29,075	\$	34,292
State net operating loss carryforwards	6,301		6,750
Employee benefit plans	9,518		7,929
Asset reserves	2,384		2,596
Insurance reserves	7,283		6,558
Accrued vacation and incentive costs	1,980		2,077
Capital loss carryforwards	-		708
Other	6,337		6,543
Valuation allowance	(6,301)		(50,538)
Gross deferred tax assets	56,577		16,915
Deferred tax liabilities:			
Inventory reserves	(3,398)		(3,050)
Property, plant, and equipment	(2,822)		(4,321)
Gross deferred tax liabilities	(6,220)		(7,371)
Net deferred tax assets	\$ 50,357	\$	9,544

As of March 31, 2006, the Company had U.S. federal net operating loss carryforwards of approximately \$83,070,000. The net operating loss carryforwards arose in fiscal 2004 primarily as a result of a worthless stock deduction taken on the Company's March 31, 2003 federal income tax return relating to the sale of substantially all of the assets of a domestic subsidiary. If not utilized, these carryforwards will expire in fiscal years 2023 and 2024.

A valuation allowance of \$50,538,000 existed at March 31, 2005 due to the uncertainly of whether the Company's operating loss carryforwards, deferred tax assets and capital loss carryforwards might ultimately be realized. We were able to utilize \$14,906,000 of the federal operating loss carryforwards in fiscal 2006 which reduced the valuation allowance by \$5,217,000. As a result of the increased operating performance of the Company over the past several years, the Company reevaluated the certainty as to whether the Company's remaining net operating loss carryforwards and other deferred tax assets may ultimately be realized. As a result of the determination that it is more likely than not that all of the remaining deferred tax assets will be realized with the exception of state net operating loss carryforwards, a significant portion of the remaining valuation allowance was reversed in fiscal 2006.

Deferred income taxes are classified within the consolidated balance sheets based on the following breakdown:

-	Marc	ch 31,
	<u>2006</u>	2005
Net current deferred tax asset	\$ 6,513	\$ 4,977
Net non-current deferred tax asset	46,065	6,122
Net current deferred tax liability	(1,189)	(816)
Net non-current deferred tax liability	(1,032)	(739)
Net deferred tax asset	\$ 50,357	\$ 9,544

The net current deferred tax asset, net current deferred tax liability, and net non-current deferred tax liability are included in prepaid expenses, accrued liabilities, and other non-current liabilities, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Income from continuing operations before income tax (benefit) expense includes foreign subsidiary income of \$13,034,000, \$8,588,000 and \$3,687,000 for the years ended March 31, 2006, 2005, and 2004, respectively. As of March 31, 2006, the Company had unrecognized deferred tax liabilities related to approximately \$24 million of cumulative undistributed earnings of foreign subsidiaries. These earnings are considered to be permanently invested in operations outside the United States. Determination of the amount of unrecognized deferred U.S. income tax liability with respect to such earnings is not practicable.

In the year ended March 31, 2006, 581,064 shares of common stock were issued through the exercise of non-qualified stock options or through the disqualifying disposition of incentive stock options. The total tax benefit to the Company from these transactions, which is credited to additional paid-in capital rather than recognized as a reduction of income tax expense, was \$2,154,000 in 2006. This tax benefit has also been recognized in the consolidated balance sheet as a reduction of deferred income taxes payable.

The Company reviewed the provisions of the American Jobs Creation Act of 2004. The American Jobs Creation Act had no material impact on the operations of the Company for fiscal year 2006.

18. Rental Expense and Lease Commitments

Rental expense for the years ended March 31, 2006, 2005 and 2004 was \$3,914,000, \$3,718,000, and \$3,594,000, respectively. The following amounts represent future minimum payment commitments as of March 31, 2006 under non-cancelable operating leases extending beyond one year:

			Veh	icles and		
Year Ended March 31,	Real l	Property	Eq	<u>uipment</u>	<u>"</u>	<u> Cotal</u>
2007	\$	1,279	\$	2,156	\$	3,435
2008		1,333		1,645		2,978
2009		1,267		1,305		2,572
2010		1,108		975		2,083
2011		704		676		1,380

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

19. Summary Financial Information

The following information sets forth the condensed consolidating summary financial information of the parent and guarantors, which guarantee the 10% Senior Secured Notes and the 8 7/8% Senior Subordinated Notes, and the nonguarantors. The guarantors are wholly owned and the guarantees are full, unconditional, joint and several.

20. Business Segment Information

As a result of the way the Company manages the business, its reportable segments are strategic business units that offer products with different characteristics. The most defining characteristic is the extent of customized engineering required on a per-order basis. In addition, the segments serve different customer bases through differing methods of distribution. The Company has two reportable segments: Products and Solutions. The Company's Products segment sells hoists, industrial cranes, chain, attachments, and other material handling products principally to third party distributors through diverse distribution channels, and to a lesser extent directly to end-users. The Solutions segment sells engineered material handling systems such as conveyors and lift tables primarily to end-users in the consumer products, manufacturing, warehousing, and, to a lesser extent, the steel, construction, automotive, and other industrial markets. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Intersegment sales are not significant. The Company evaluates performance based on the operating earnings of the respective business units.

Segment information as of and for the years ended March 31, 2006, 2005 and 2004 is as follows:

beginent information as of and for the years ended March 31, 2000,	2005	una 2004 is	, u b 10	110 11 5.

21. Selected Quarterly Financial Data (Unaudited)

Below is selected quarterly financial data for fiscal 2006 and 2005:

	Three Months Ended							
	July 3,		О	ctober 2,	Ja	anuary 1,	March 31,	
	2005		<u>2005</u>			<u>2006</u>	<u> 2006</u>	
Net sales	\$	140,877	\$	134,712	\$	133,322	\$	147,096
Gross profit		36,543		35,158		34,931		40,990
Income from operations		14,622		13,267		13,114		16,866
Net income	\$	7,322	\$	3,263	\$	1,413	\$	47,798
Net income per share – basic	\$	0.50	\$	0.22	\$	0.09	\$	2.63
Net income per share – diluted	\$	0.49	\$	0.21	\$	0.08	\$	2.53

Results include pre-tax losses on early extinguishment of debt of \$3,341,000, \$4,950,000 and \$920,000 for the quarters ended October 2, 2005, January 1, 2006 and March 31, 2006 respectively.

Net income includes tax benefit due to the reversal of a valuation allowance of \$38,571,000 for the quarter ended March 31, 2006.

	Three Months Ended							
	July 4,		О	ctober 3,	Ja	nuary 2,	March 31,	
	<u>2004</u>		<u>2004</u>			<u>2005</u>	<u>2005</u>	
Net sales	\$	121,658	\$	122,711	\$	125,913	\$	144,470
Gross profit		31,451		29,943		29,999		34,515
Income from operations		11,156		9,896		9,456		10,157
Net income	\$	3,362	\$	2,594	\$	2,405	\$	8,349
Net income per share – basic	\$	0.23	\$	0.18	\$	0.16	\$	0.57
Net income per share – diluted	\$	0.23	\$	0.18	\$	0.16	\$	0.56

Results for the quarter ended March 31, 2005 include a one-time, non-cash charge of \$2,037,000 (\$1,170,000 net of tax) relating to a defined benefit plan at one of our foreign operations and \$3,919,000 of gains from the sale of surplus real estate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

22. Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss are as follows:

	March 31,			
	2006 2005			2005
Net unrealized investment gains – net of tax	\$	1,891	\$	1,233
Minimum pension liability adjustment – net of tax		(17,107)		(14,572)
Foreign currency translation adjustment		2,237		4,083
Accumulated other comprehensive loss	\$	(12,979)	\$	(9,256)

The deferred taxes associated with the items included in accumulated other comprehensive loss were \$9,486,000 and \$8,159,000 for 2006 and 2005, respectively. As a result of the recording of a deferred tax asset valuation allowance in fiscal 2005, the Company recorded as an offsetting entry a \$534,000 charge in the minimum pension liability component of other comprehensive income. With the reversal of that valuation allowance in fiscal 2006 (see Note 17), the Company recorded the reversal of the valuation allowance as a reduction of income taxes in the statement of operations. This is in accordance with FASB Statement No. 109, "Accounting for Income Taxes," even though the valuation allowance was initially established by a charge against comprehensive income. This amount will remain indefinitely as a component of minimum pension liability adjustment.

The activity by year related to investments, including reclassification adjustments for activity included in earnings is as follows (all items shown net of tax):

	Year Ended March 31,					
		2006 2005		2004		
Net unrealized investment gains (losses) at beginning of year	\$	1,233	\$	1,364	\$	(342)
Unrealized holdings gains arising during the period		1,591		328		2,916
Reclassification adjustments for (gains)						
included in earnings		(933)		(459)		(1,210)
Net change in unrealized gains (losses) on investments		658		(131)		1,706
Net unrealized investment gains at end of year	\$	1,891	\$	1,233	\$	1,364

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

23. Effects of New Accounting Pronouncements

In November 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 151, "Inventory Costs," as an amendment to ARB No. 43, Chapter 4, "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted materials (spoilage). This Statement requires that these items be recognized as current-period charges and requires the allocation of fixed production overheads to inventory based on the normal capacity of the production facilities. This Statement becomes effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company does not expect the adoption of SFAS No. 151 to have a material impact on the Company's consolidated financial statements.

In December 2004, the FASB issued SFAS No. 123 (revised 2004), Share-Based Payment, which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation. Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees, and amends FASB Statement No. 95, Statement of Cash Flows. Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative.

Statement 123(R) was to be adopted for interim or annual periods beginning after June 15, 2005. On April 14th, 2005, the SEC announced that it would provide for a phased-in implementation process for FASB statement No. 123(R). The SEC is requiring that registrants adopt statement 123(R)'s fair value method of accounting for share-based payments to employees no later than the beginning of the first fiscal year beginning after June 15, 2005. We expect to adopt 123(R) in the first quarter of Fiscal 2007. Statement 123(R) permits public companies to adopt its requirements using one of two methods:

- 1. A "modified prospective" method in which compensation cost is recognized beginning with the effective date (a) based on the requirements of Statement 123(R) for all share-based payments granted after the effective date and (b) based on the requirements of Statement 123(R) for all share-based payments granted to employees prior to the effective date of Statement 123(R) that remain unvested on the effective date.
- 2. A "modified retrospective" method which includes the requirements of the modified prospective method described above, but also permits entities to restate based on amounts previously recognized under Statement 123 for purposes of pro forma disclosures either (a) all prior periods presented or (b) prior interim periods of the year of adoption.

The Company is still evaluating the method it plans to use when it adopts statement 123(R).

As permitted by Statement 123, the Company currently accounts for share-based payments to employees using Opinion 25's intrinsic value method and, as such, recognizes no compensation cost for employee stock options. Accordingly, adoption of Statement 123(R)'s fair value method will have an impact on our results of operations, although it will have no impact on our overall financial position. The impact of adoption of 123(R) cannot be predicted at this time because it will depend on levels of share based payments granted in the future. However, had we adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of statement 123 as described in the disclosure of pro forma net income and earnings per share in Note 2 to the Company's consolidated financial statements.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections" which replaces APB Opinion No. 20, "Accounting Changes," and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." SFAS No. 154 changes the requirements for and reporting of a change in accounting principle. This Statement becomes effective for changes in accounting methods during fiscal years beginning after December 15, 2005. The Company does not expect the adoption of SFAS No. 154 will have a material impact on the Company's consolidated results of operations and financial condition.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

24. Subsequent Events

During April and May of 2006, the Company repurchased \$32,128,000 of the outstanding 10% Senior Secured Notes. The repurchase of the 10% Notes occurred at a premium resulting in a pre-tax loss on early extinguishment of debt of \$3,194,000. As a result of the repurchase of the 10% Notes, approximately \$671,000 of pre-tax deferred financing costs was written-off. The net effect of these items, a \$3,865,000 pre-tax loss will be shown as part of other (income) and expense, net for the first quarter of fiscal 2007.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

As of March 31, 2006, an evaluation was performed under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of March 31, 2006. There were no changes in our internal controls or in other factors during our fourth quarter ended March 31, 2006.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of March 31, 2006 based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that evaluation, our management concluded that our internal control over financial reporting was effective as of March 31, 2006.

Management's assessment of the effectiveness of our internal control over financial reporting as of March 31, 2006 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Columbus McKinnon Corporation

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that Columbus McKinnon Corporation and subsidiaries maintained effective internal control over financial reporting as of March 31, 2006, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Columbus McKinnon Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment the Columbus McKinnon Corporation maintained effective internal control over financial reporting as of March 31, 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, Columbus McKinnon Corporation maintained, in all material respects, effective internal control over financial reporting as of March 31, 2006, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Columbus McKinnon Corporation and subsidiaries as of March 31, 2006 and 2005, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended March 31, 2006 of Columbus McKinnon Corporation and subsidiaries, and our report dated June 1, 2006 expressed an unqualified opinion thereon.

CERTIFICATION

- I, Timothy T. Tevens, Chief Executive Officer, certify that:
- 1. I have reviewed this annual report on Form 10-K of Columbus McKinnon Corporation;
- 2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report.
- 3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchanged Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this annual report based on such evaluation; and
 - c. disclosed in this annual report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - d. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - e. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

- 1. I have reviewed this annual report on Form 10-K of Columbus McKinnon Corporation;
- 2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report.
- 3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchanged Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this annual report based on such evaluation; and
 - c. disclosed in this annual report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - d. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - e. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: June 7, 2006

/s/ KAREN L. HOWARD Karen L. Howard Chief Financial Officer

CERTIFICATION

Each of the undersigned hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that the Annual Report of Columbus McKinnon Corporation (the "Company") on Form 10-K for the year ended March 31, 2006, fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 and that information contained in the such Annual Report on Form 10-K fairly presents, in all material respects, the financial condition and result of operations of the Company.

A signed original of this written statement required by Section 906 has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

Dated: June 7, 2006

Forward-looking Information

The Columbus McKinnon annual report contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements include, but are not limited to, statements concerning future revenue and earnings, involve known and unknown risks, uncertainties and other factors that could cause the actual results of the Company to differ materially from the results expressed or implied by such statements, including general economic and business conditions, conditions affecting the industries served by the Company and its subsidiaries, conditions affecting the Company's customers and suppliers, competitor responses to the Company's products and services, the overall market acceptance of such products and services and other factors disclosed in the Company's periodic reports filed with the Securities and Exchange Commission. The Company assumes no obligation to update the forward-looking information contained in this report.

Board of Directors/Corporate Officers

Board of Directors

Ernest R. Verebelyi was elected Chairman of Columbus McKinnon's Board of Directors in August 2005 and has served as a Director of the Company since January 2003. He is a member of the Audit Committee. Mr. Verebelyi retired from Terex Corporation, a global diversified equipment manufacturer, in October 2002 where he held the position of Group President. Prior to joining Terex in 1998, he held executive, general management and operating positions at General Signal Corporation, Emerson, Hussmann Corporation and General Electric. Mr. Verebelyi also serves as a director of CH Energy Group, Inc.

Timothy T. Tevens was elected President and a Director of the Company in January 1998 and assumed the duties of Chief Executive Officer in July 1998. From May 1991 to January 1998 he served as Vice President - Information Services and was also elected Chief Operating Officer of the Company in October 1996. From 1980 to 1991, Mr. Tevens was employed by Ernst & Young LLP in various management consulting capacities.

Herbert P. Ladds, Jr. has served as a Director of the Company since 1973 and was Chairman of the Board of Directors from January 1998 to August 2005. Mr. Ladds serves on the Compensation and Succession Committee and on the Corporate Governance and Nomination Committee. He will retire as a Director of the Company at the July 2006 Annual Meeting of Shareholders. Mr. Ladds served as Chief Executive Officer of the Company from 1986 until his retirement in July 1998. Mr. Ladds was President of the Company from 1982 until January 1998, and Executive Vice President from 1981 to 1982 and Vice President - Sales & Marketing from 1971 to 1980. Mr. Ladds is also a director of Utica Mutual Insurance Company and Utica Life Insurance Company.

Carlos Pascual has been a Director of the Company since 1998. He is Chairman of the Compensation and Succession Committee and is also a member of the Corporate Governance and Nomination Committee. Mr. Pascual currently serves as Chairman of the Board of Directors of Xerox de Espana S.A. (Spain). From January 2000 through December 2003, Mr. Pascual was Executive Vice President and President of Developing Markets Operations for Xerox. From January 1999 to January 2000, Mr. Pascual served as Deputy Executive Officer of Xerox's Industry Solutions Operations. From August 1995 to January 1999, Mr. Pascual served as President of Xerox Corporation's United States Customer Operations. Prior thereto, he has served in various capacities with Xerox Corporation.

Richard H. Fleming was appointed a Director of the Company in March 1999. He is the Chairman of the Audit Committee and is also a member of the Compensation and Succession Committee. In February 1999, Mr. Fleming was appointed Executive Vice President and Chief Financial Officer of USG Corporation. Prior thereto, Mr. Fleming served USG Corporation in various executive financial capacities, including Senior Vice President and Chief Financial Officer from January 1999 and Vice President and Chief Financial Officer from January 1994 to January 1995. Mr. Fleming also serves as a member of the Board of Directors for several not-for-profit entities including UCAN, the Child Welfare League of America, and Chicago United.

Wallace W. Creek was appointed a Director of the Company in January 2003. He is Chairman of the Corporate Governance and Nomination Committee and also serves on the Audit Committee. From December 2002 through June 2004, Mr. Creek served as Senior Vice President of Finance for Collins & Aikman, a leading manufacturer of automotive interior components. Prior to that, Mr. Creek served as Controller of the General Motors Corporation from 1992 to 2002 and held several executive positions in finance at General Motors over a 43-year career. Mr. Creek is also a director of CF Industries Holdings, Inc.

Linda A. Goodspeed became a Director of the Company in October 2004. She serves on the Audit Committee and the Corporate Governance and Nomination Committee. In 2001, she joined Lennox International, Inc., a global supplier of climate control solutions, and currently serves as Executive Vice President and Chief Technology Officer of that company. Prior to that, Ms. Goodspeed served as President and Chief Operating Officer of PartMiner, Inc., a global supplier of electronic components. She has also held management positions in product management and development, research and development and design engineering at General Electric Appliances, Nissan North America, Inc. and the Ford Motor Company. Ms. Goodspeed also serves as a director of American Electric Power Co., Inc. and is a member of the Development Board of the University of Texas at Dallas.

Stephen Rabinowitz became a Director of the Company in October 2004. He serves on the Audit Committee and the Compensation and Succession Committee. He retired in 2001 from his position as Chairman and Chief Executive Officer of General Cable Corporation, a leading manufacturer of electrical, communications and utility cable. Prior to joining General Cable as President and Chief Executive Officer in 1994, he served as President and CEO of AlliedSignal Braking Systems, and before that as President and CEO of General Electric's Electrical Distribution and Control business. He also held management positions in manufacturing operations and technology at the General Electric Company and the Ford Motor Company. Mr. Rabinowitz is also a Director of Energy Conversion Devices, Inc. and JLG Industries, Inc.
