

INVESTAR[®]
HOLDING CORPORATION

2017 Annual Report

Dear Shareholders:

Two thousand seventeen was an exciting year for Investar. With a continued commitment to long-term shareholder value throughout 2017, our team: completed two acquisitions which expanded our south Louisiana footprint into Evangeline and East and West Feliciana Parishes; increased our capital through a common stock offering and subordinated debt issuance; and reinvested in our facilities by opening two de novo branches in our Baton Rouge and New Orleans markets to better service existing and potential customers and position us for further growth within our markets. We now service our customers through 20 branch locations, compared to 10 branch locations in 2016. In addition, in June 2017, Investar was added to the Russell 3000[®] Index, a capitalization-weighted stock market index that seeks to be a benchmark of the entire United States stock market. Inclusion in the Russell 3000[®] Index has benefited the company by increasing the trading volume, and therefore liquidity, of its common stock. During 2017, the company's common stock experienced tremendous growth, closing the year at a price of \$24.10 per share, a 29% increase from \$18.65 per share at the end of 2016. An investment in the company's common stock at the time of the initial public offering in July 2014 has generated a shareholder return of approximately 72% as of December 31, 2017.

Two thousand seventeen was a strong year in which our Company's net income increased by 4% to \$8.2 million compared to the prior year. Total assets grew 40% to \$1.6 billion and our total loan portfolio increased 41% to \$1.3 billion compared to the prior year. We ended the year with deposits of \$1.2 billion, a 35% increase compared to 2016. Noninterest-bearing deposits increased by 100% compared to 2016. Tangible book value increased by 4% to \$16.06. While some growth is attributable to our acquisitions completed in 2017, we continue to experience quality organic loan growth and strong earnings. We remain committed to growing organically while seeking out advantageous opportunities to grow through acquisition.

While enjoying the growth we have experienced, we have not reduced our focus on asset quality. Our loan portfolio's risk profile remained very strong and we experienced minimal loss throughout the year. Net charge-offs were an impressive 0.07% of average loans for the year, compared to 0.14% in 2016, and nonperforming loans to total loans were 0.29% at the end of the year. We will continue to remain diligent and focus our growth on loans with good credit quality.

Due to continued strong financial performance, the company paid quarterly cash dividends to stockholders throughout 2017, a total of \$0.1035 for the year, a 146% increase from total quarterly dividends in 2016. Our company has an uninterrupted history of paying quarterly dividends to common shareholders since 2011.

To our loyal customers and dedicated employees – thank you for making 2017 another successful year. We are proud of the reputation we have built and believe our customers choose our company for their banking needs because of our focus on relationships and creating value and opportunities for them. We remain committed to this mission and look forward to sharing our commitment to service excellence across our existing footprint and into new markets in 2018 and beyond.

Sincerely,

A handwritten signature in black ink that reads "John". The signature is written in a cursive style with a large, sweeping initial "J" and a horizontal line extending to the right.

John J. D'Angelo

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Stock; \$1.00 par value per share

Name of each exchange on which registered
The Nasdaq Global Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input checked="" type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
	(Do not check if a smaller reporting company)	Emerging growth company	<input checked="" type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting stock held by non-affiliates of the registrant, computed by reference to the closing price of the common stock as of June 30, 2017, was approximately \$201,866,225.

The number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date, is as follows: Common stock, \$1.00 par value, 9,514,193 shares outstanding as of March 16, 2018.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Definitive Proxy Statement relating to the 2018 Annual Meeting of Shareholders of Investar Holding Corporation are incorporated by reference into Part III of the Form 10-K. Such Definitive Proxy Statement will be filed with the Securities and Exchange Commission within 120 days after the end of the registrant's fiscal year ended December 31, 2017.

PART I

Item 1. Business

General

Investar Holding Corporation (the “Company”), a Louisiana corporation incorporated in 2009, is a financial holding company headquartered in Baton Rouge, Louisiana that conducts its operations primarily through its wholly-owned subsidiary, Investar Bank (the “Bank”), a Louisiana commercial bank, chartered in 2006. Through the Bank, the Company offers a wide range of commercial banking products tailored to meet the needs of individuals and small to medium-sized businesses. The primary markets served are Baton Rouge, New Orleans, Hammond and Lafayette, Louisiana, and their surrounding metropolitan areas. These markets are served from our main office located in Baton Rouge and from nineteen additional full service branches located throughout our market areas. We have experienced significant growth since the Bank was chartered, completing acquisitions in 2011, 2013, and 2017, as described below in more detail, and establishing additional branches in our market areas. As of December 31, 2017, on a consolidated basis, the Company had total assets of \$1.6 billion, net loans of \$1.3 billion, total deposits of \$1.2 billion, and stockholders’ equity of \$172.7 million.

Management believes that the current markets present a significant opportunity for growth and franchise expansion, both organically and through strategic acquisitions. Although the financial services industry is rapidly changing and intensely competitive, and likely to remain so, we believe that the Bank competes effectively as a local community bank and possesses the consistency of local leadership, the availability of local access and responsive customer service, coupled with competitively-priced products and services, necessary to successfully compete with other financial institutions for individual and small to medium-sized business customers.

The information set forth in this Annual Report on Form 10-K is as of March 16, 2018, unless otherwise indicated herein.

Operations

General. We offer a full range of commercial and retail lending products throughout our market areas, including business loans to small to medium-sized businesses as well as loans to individuals. Our business lending products include owner-occupied commercial real estate loans, construction loans and commercial and industrial loans, such as term loans, equipment financing and lines of credit, while our loans to individuals include first and second mortgage loans, installment loans, and lines of credit. For business customers, we target small to medium-sized businesses and professional organizations such as law firms, accounting firms and medical practices.

Management considers all of our operations to be aggregated in one reportable operating segment, and accordingly, no separate segment disclosures are presented in this report. Please refer to our audited consolidated financial statements and the notes thereto in *Item 8, Financial Statements and Supplementary Data*, for information with respect to our revenues from external customers, profit or loss for the last three years, and total assets for the last two years. Neither we nor the Bank have any foreign operations.

Lending Activities. Income generated by our lending activities represents a substantial portion of our total revenue. For the years ended December 31, 2017, 2016 and 2015, income from our lending activities comprised 84%, 81% and 77%, respectively, of our total revenue.

Lending to Businesses. Our lending to small to medium-sized businesses falls into three general categories:

- **Commercial real estate loans.** Approximately 49% of our total loans at December 31, 2017 were commercial real estate loans, which include multifamily, farmland and commercial real estate loans, with owner-occupied loans comprising approximately 44% of the commercial real estate loan portfolio. Commercial real estate loan terms generally are ten years or less, although payments may be structured on a longer amortization basis. Interest rates may be fixed or adjustable, although rates typically will not be fixed for a period exceeding 120 months, and we generally charge an origination fee. We do not offer non-recourse loans. Risks associated with commercial real estate loans include, among other things, fluctuations in the value of real estate, new job creation trends, tenant vacancy rates and the quality of the borrower’s management. We attempt to limit risk by analyzing a borrower’s cash flow and collateral value on an ongoing basis. Also, we typically require personal guarantees from the principal owners of the property, supported by a review of their personal financial statements, as an additional means of mitigating our risk.

- *Construction and development loans.* Construction and development loans, which consist of loans for the construction of commercial projects, single family residential properties and multifamily properties, accounted for approximately 13% of our total loans at December 31, 2017. Our construction and development loans are made on both a “pre-sold” basis and on a “speculative” basis. Construction and development loans are generally made with a term of 6 to 18 months, with interest accruing at either a fixed or floating rate and paid monthly. These loans are secured by the underlying project being built. For construction loans, loan to value ratios range from 70% to 80% of the developed/completed value, while for development loans our loan to value ratios typically will not exceed 70% to 75% of such value. Speculative loans are based on the borrower’s financial strength and cash flow position, and we disburse funds in installments based on the percentage of completion and only after the project has been inspected by an experienced construction lender or third-party inspector.

Construction lending entails significant additional risks compared to commercial real estate or residential real estate lending. One such risk is that loan funds are advanced upon the security of the property under construction, which is of uncertain value prior to the completion of construction. Thus, it is more difficult to evaluate accurately the total loan funds required to complete a project and to calculate related loan-to-value ratios. We attempt to minimize the risks associated with construction lending by limiting loan-to-value ratios as described above. In addition, as to speculative development loans, we generally make such loans only to borrowers that have a positive pre-existing relationship with us.

- *Commercial and industrial loans.* Commercial and industrial loans primarily consist of working capital lines of credit and equipment loans. We often make commercial loans to borrowers with whom we have previously made a commercial real estate loan. The terms of these loans vary by purpose and by type of underlying collateral. We make equipment loans for a term of five years or less at fixed or variable rates, with the loan fully amortized over the term and secured by the relevant piece of equipment. Loans to support working capital typically have terms not exceeding one year, and such loans are secured by accounts receivable or inventory. Fixed rate loans are priced based on collateral, term and amortization. The interest rate for floating rate loans is typically tied to the prime rate published in The Wall Street Journal. Commercial and industrial loans accounted for approximately 11% of our total loans at December 31, 2017.

Commercial lending generally involves different risks from those associated with commercial real estate lending or construction lending. Although commercial loans may be collateralized by equipment or other business assets (including real estate, if available as collateral), the repayment of these types of loans depends primarily on the creditworthiness and projected cash flow of the borrower (and any guarantors). Thus, the general business conditions of the local economy and the borrower’s ability to sell its products and services, thereby generating sufficient operating revenue to repay us under the agreed upon terms and conditions, are the chief considerations when assessing the risk of a commercial loan. The liquidation of collateral is considered a secondary source of repayment because equipment and other business assets may, among other things, be obsolete or of limited resale value. We actively monitor certain financial measures of the borrower, including advance rate, cash flow, collateral value and other appropriate credit factors.

Lending to Individuals. We make the following types of loans to our individual customers:

- *Consumer loans.* Consumer loans represented 6% of our total loans at December 31, 2017. We make these loans (which are normally fixed-rate loans) to individuals for a variety of personal, family and household purposes, secured and unsecured installment and term loans, second mortgages, home equity loans and home equity lines of credit. Because many consumer loans are secured by depreciable assets such as cars, boats and trailers, the loans are amortized over the useful life of the asset. The amortization of second mortgages generally does not exceed 15 years and the rates generally are not fixed for more than 60 months. As a general matter, in underwriting these loans, our credit analysts review a borrower’s past credit history, past income level, debt history and, when applicable, cash flow, and determine the impact of all these factors on the ability of the borrower to make future payments as agreed. A comparison of the value of the collateral, if any, to the proposed loan amount, is also a consideration in the underwriting process. Repayment of consumer loans depends upon the borrower’s financial stability and is more likely to be adversely affected by divorce, job loss, illness and personal hardships than repayment of other loans. A shortfall in the value of any collateral also may pose a risk of loss to us for these types of loans.

Auto loans comprised the largest component of our consumer loans and third largest component of our overall loan portfolio, representing 73% of our total consumer loans and 4% of our total loans as of December 31, 2017. We have been an indirect lender for our auto loans, meaning that the loans have been originated by automobile dealerships and then assigned to us. These dealerships were selected based on our review of their operating history and the dealership’s reputation in the marketplace, which we believe helps to mitigate the risks of fraud or negligence by the dealership. At all times, the decision whether or not to provide financing resided with us.

In November 2015, the Bank announced that it was exiting the indirect auto loan origination business. The Bank discontinued accepting indirect auto loan applications December 31, 2015, but continued to process and fund applications that were accepted on or before that date. The Bank will continue to service the current auto loan portfolio for its duration but expects this portfolio to decrease over time.

- *Residential real estate.* One-to-four family residential real estate loans, including second mortgage loans, comprised approximately 22% of our total loans at December 31, 2017. Second mortgage loans in this category include only loans we make to cover the gap between the purchase price of a residence and the amount of the first mortgage; all other second mortgage loans are considered consumer loans. Loan to value ratios do not typically exceed 80%, although some of the mortgage loans that we retain in our portfolio may have higher loan to value ratios. We use an independent appraiser to establish collateral values. We generate residential real estate mortgage loans through Bank referrals and contacts with real estate agents in our markets. We do not originate subprime residential real estate loans.

Deposits. We offer a broad base of deposit products and services to our individual and business clients, including savings, checking, money market and NOW accounts, debit cards and mobile banking with smartphone deposit capability, as well as a variety of certificates of deposit and individual retirement accounts. For our business clients, we offer a competitive suite of cash management products which include, but are not limited to, remote deposit capture, electronic statements, positive pay, ACH origination and wire transfer, investment sweep accounts and enhanced business internet banking.

Other Banking Services. Investar Bank's other banking services include cashiers' checks, direct deposit of payroll and Social Security checks, night depository, bank-by-mail, automated teller machines with deposit automation and debit cards. We have also associated with nationwide networks of automated teller machines, enabling the Bank's customers to use ATMs throughout Louisiana and other regions. We offer merchant card services through a third-party vendor and a business credit card product. The Bank does not offer trust services or insurance products.

Acquisition Activity

General. To complement our organic growth strategy, from time to time, we evaluate potential acquisition opportunities. We believe there are many banking institutions that continue to face credit challenges, capital constraints and liquidity issues and that lack the scale and management expertise to manage the increasing regulatory burden. Our management team has a long history of identifying targets, assessing and pricing risk and executing acquisitions in a creative, yet disciplined, manner. We seek acquisitions that provide meaningful financial benefits, long-term organic growth opportunities and expense reductions, without compromising our risk profile. Additionally, we seek banking markets with favorable competitive dynamics and potential consolidation opportunities. All of our acquisition activity is evaluated and overseen by a standing Merger and Acquisition Committee of our board of directors.

Acquisition of Citizens Bancshares, Inc. On July 1, 2017, the Company completed its acquisition of Citizens Bancshares, Inc. ("Citizens") and its wholly-owned subsidiary, Citizens Bank, headquartered in Ville Platte, Louisiana, with two additional branch locations in Mamou and Pine Prairie, Louisiana. The Company acquired all of the outstanding common stock of the former Citizens shareholders for a total cash consideration of \$45.8 million. The Company acquired assets with a fair value of approximately \$251 million, including \$129 million in loans, assumed \$212 million in deposits, and recognized \$9.0 million in goodwill.

Acquisition of BOJ Bancshares, Inc. On December 1, 2017, the Company completed its acquisition of BOJ Bancshares, Inc. ("BOJ") and its wholly-owned subsidiary, The Highlands Bank, headquartered in Jackson, Louisiana, with four additional branch locations in Baton Rouge, Slaughter, St. Francisville, and Zachary, Louisiana. The Company acquired all of the outstanding common stock of the former BOJ shareholders for a total consideration of \$22.7 million, \$3.95 million of which was cash with the remaining in the form of 799,559 shares of the Company's common stock. The Company acquired assets with a fair value of approximately \$152 million, including \$103 million in loans, assumed \$126 million in deposits, and recognized \$5.4 million in goodwill.

Segments

While our chief decision makers monitor the revenue streams of the various banking products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Accordingly, all of the Company's banking operations are considered by management to be aggregated in one reportable operating segment. Because the overall banking operations comprise substantially all of the consolidated operations, no separate segment disclosures are presented in the accompanying consolidated financial statements.

Competition

We face competition in all major product and geographic areas in which we conduct our operations. Through the Bank, we compete for available loans and deposits with state, regional and national banks, as well as savings and loan associations, credit unions, finance companies, mortgage companies, insurance companies, brokerage firms and investment companies. All of these institutions compete in the delivery of services and products through availability, quality and pricing, both with respect to interest rates on loans and deposits and fees charged for banking services. Many of our competitors are larger and have substantially greater resources than we do, including higher total assets and capitalization, greater access to capital markets and a broader offering of financial services. As larger institutions, many of our competitors can offer more attractive pricing than we can offer and have more extensive branch networks from which they can offer their financial services products.

While we continually strive to offer competitive pricing for our banking products, we believe that our community bank approach to customers, focusing on quality customer service and maintaining strong customer relationships affords us the best opportunity to successfully compete with other institutions. In addition, as a smaller institution, we think we can be flexible in developing and implementing new products and services. Further, in recent years there has been consolidation activity involving banks with a presence in our markets. In our view, mergers and other business combinations within our markets provide us with growth opportunities. Many acquisitions, especially when local institutions are acquired by institutions based outside our markets, result not only in customer disruption but also in a loss of market knowledge and relationships that we believe provide us the opportunity to acquire customers seeking a personalized approach to banking. Furthermore, acquisition activity typically creates opportunities to hire talented personnel from the combining institutions.

The following table sets forth certain information about our total deposits and our market share and is shown proforma, including the total deposits for Citizens Bank and The Highlands Bank, as of June 30, 2017, which is the latest date for which such information is available.

Market (MSA)	Investar Total Deposits	Investar Market Share
	<i>(in millions)</i>	
Baton Rouge	\$ 731	3.6%
New Orleans	118	0.3
Hammond	56	3.0
Lafayette	117	1.1
Evangeline Parish ⁽¹⁾	212	34.0

⁽¹⁾ Evangeline Parish is not included in a Louisiana Metropolitan Statistical Area but is included in this table to reflect the deposit balances of Citizens Bank, which was acquired by the Company on July 1, 2017.

Supervision and Regulation

General. Banking is highly regulated under federal and state law. We are a financial holding company registered under the Bank Holding Company Act of 1956, as amended, and are subject to supervision, regulation and examination by the Federal Reserve. Investar Bank is a commercial bank chartered under the laws of the State of Louisiana. The Bank is not a member of the Federal Reserve System and is subject to supervision, regulation and examination by the Louisiana Office of Financial Institutions, or OFI, and the Federal Deposit Insurance Corporation, or FDIC. This system of supervision and regulation establishes a comprehensive framework for our operations and, consequently, can have a material impact on our growth and earnings performance.

The primary goals of the bank regulatory scheme are to maintain a safe and sound banking system and to facilitate the conduct of sound monetary policy. This system is intended primarily for the protection of the FDIC's deposit insurance funds, bank depositors and the public, rather than our shareholders and creditors. The banking agencies have broad enforcement power over bank holding companies and banks, including the authority, among other things, to enjoin "unsafe or unsound" practices, require affirmative action to correct any violation or practice, issue administrative orders that can be judicially enforced, direct increases in capital, direct the sale of subsidiaries or other assets, limit dividends and distributions, restrict growth, assess civil monetary penalties, remove officers and directors, and, with respect to banks, terminate deposit insurance or place the bank into conservatorship or receivership. In general, these enforcement actions may be initiated for violations of laws and regulations or unsafe or unsound practices.

The Dodd-Frank Act. The Dodd-Frank Act, enacted on July 21, 2010, aims to restore responsibility and accountability to the financial system by significantly altering the regulation of financial institutions and the financial services industry. Full implementation of the Dodd-Frank Act has required and will continue to require many new rules to be issued by federal regulatory agencies over the next several years, which will profoundly affect how financial institutions will be regulated in the future. The ultimate effect of the Dodd-Frank Act and its implementing regulations on the financial services industry in general, and on us in particular, is uncertain at this time.

The Dodd-Frank Act, among other things:

- established the Consumer Financial Protection Bureau, an independent organization within the Federal Reserve with centralized responsibility for promulgating and enforcing federal consumer protection laws applicable to all entities offering consumer financial products or services;
- established the Financial Stability Oversight Council, tasked with the authority to identify and monitor institutions and systems that pose a systemic risk to the financial system;
- changed the assessment base for federal deposit insurance from the amount of insured deposits held by the depository institution to the institution's average total consolidated assets less tangible equity;
- increased the minimum reserve ratio for the Deposit Insurance Fund from 1.15% to 1.35%;
- permanently increased the deposit insurance coverage amount from \$100,000 to \$250,000;
- required the FDIC to make its capital requirements for insured depository institutions countercyclical, so that capital requirements increase in times of economic expansion and decrease in times of economic contraction;
- required bank holding companies and banks to be "well capitalized" and "well managed" in order to acquire banks located outside of their home state and requires any bank holding company electing to be treated as a financial holding company to be "well capitalized" and "well managed";
- directed the Federal Reserve to establish interchange fees for debit cards under a restrictive "reasonable and proportional cost" per transaction standard;
- limited the ability of banking organizations to sponsor or invest in private equity and hedge funds and to engage in proprietary trading;
- increased regulation of consumer protections regarding mortgage originations, including originator compensation, minimum repayment standards and prepayment consideration;
- restricted the preemption of select state laws by federal banking law applicable to national banks and disallowed subsidiaries and affiliates of national banks from availing themselves of such preemption;
- authorized national and state banks to establish de novo branches in any state that would permit a bank chartered in that state to open a branch at that location; and
- repealed the federal prohibition on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts.

Some of these provisions may have the consequence of increasing our expenses, decreasing our revenues, and changing the activities in which we choose to engage. The environment in which banking organizations will operate after the financial crisis, including legislative and regulatory changes affecting capital, liquidity, supervision, permissible activities, corporate governance and compensation, changes in fiscal policy and steps to eliminate government support for banking organizations, may have long-term effects on the business model and profitability of banking organizations that cannot currently be foreseen. The specific impact on our current activities or new financial activities we may consider in the future, our financial performance and the markets in which we operate will depend on the manner in which the relevant agencies develop and implement the required rules and the reaction of market participants to these regulatory developments. Many aspects of the Dodd-Frank Act are subject to further rule making and will take effect over several years. While we cannot predict what effect any presently contemplated or future changes in the laws or regulations or their interpretations would have on us, these changes could be materially adverse to our financial condition and results of operations.

The Volcker Rule. On December 10, 2013, the Federal Reserve and the other federal banking regulators as well as the SEC each adopted a final rule implementing Section 619 of the Dodd-Frank Act, commonly referred to as the “Volcker Rule.” Generally speaking, the final rule prohibits a bank and its affiliates from engaging in proprietary trading and from sponsoring certain “covered funds” or from acquiring or retaining any ownership interest in such covered funds. Most private equity, venture capital and hedge funds are considered “covered funds” as are bank trust preferred collateralized debt obligations. The final rule requires banking entities to divest disallowed securities by July 21, 2015, subject to extension upon application. The Volcker Rule does not impact any of our current activities nor do we hold any securities that we would be required to sell under the Rule, but it does limit the scope of permissible activities in which we might engage in the future.

Regulatory Capital Requirements

Capital Adequacy. The Federal Reserve Board monitors the capital adequacy of the Company, on a consolidated basis, and the FDIC and the OFI monitor the capital adequacy of the Bank. The regulatory agencies use a combination of risk-based guidelines and a leverage ratio to evaluate capital adequacy and consider these capital levels when taking action on various types of applications and when conducting supervisory activities related to safety and soundness. The risk-based capital standards are designed to make regulatory capital requirements more sensitive to differences in risk profiles among financial institutions and their holding companies, to account for off-balance sheet exposure, and to minimize disincentives for holding liquid assets. A financial institution’s assets and off-balance sheet items, such as letters of credit and unfunded loan commitments, are assigned to broad risk categories, each with appropriate risk weights. Regulatory capital, in turn, is classified in one of two tiers. “Tier 1” capital includes two components: (1) common equity Tier 1 capital and (2) additional Tier 1 capital. Common equity Tier 1 capital consists solely of common stock (plus related surplus), retained earnings, accumulated other comprehensive income, and limited amounts of minority interests that are in the form of common stock. Additional Tier 1 capital includes other perpetual instruments historically included in Tier 1 capital, such as non-cumulative perpetual preferred stock. “Tier 2” capital includes, among other things, qualifying subordinated debt and allowances for loan and lease losses, subject to limitations. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items.

Effective January 1, 2015, the minimum capital standards under Basel III, as well as the prompt corrective action standards discussed below, increased from previous requirements as a result of changes adopted by the federal banking agencies, which are described in greater detail below under “Basel III.”

Prompt Corrective Action Regulations. Under the prompt corrective action regulations, the FDIC is required and authorized to take supervisory actions against undercapitalized financial institutions. For this purpose, a bank is placed in one of the following five categories based on its capital: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. Under the prompt corrective action regulations, as currently in effect, to be well capitalized, a bank must have a leverage capital ratio of at least 5%, a common equity Tier 1 capital ratio of at least 6.5%, a Tier 1 risk-based capital ratio of at least 8%, and a total risk-based capital ratio of at least 10% and must not be subject to any order or written agreement or directive by a federal banking agency to meet and maintain a specific capital level for any capital measure. As discussed below under “Basel III,” the federal banking agencies have adopted changes to the capital thresholds applicable to each of the five categories under the prompt corrective action regulations.

Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, banking regulators must appoint a receiver or conservator for an institution that is critically undercapitalized. The federal banking agencies have specified by regulation the relevant capital level for each category. An institution that is categorized as undercapitalized, significantly undercapitalized, or critically undercapitalized is required to submit an acceptable capital restoration plan to its appropriate federal banking agency. An undercapitalized institution also is generally prohibited from increasing its average total assets, making acquisitions, establishing any branches or engaging in any new line of business, except under an accepted capital restoration plan or with FDIC approval. The regulations also establish procedures for downgrading an institution to a lower capital category based on supervisory factors other than capital.

Furthermore, a bank holding company must guarantee that a subsidiary depository institution meets its capital restoration plan, subject to various limitations. The controlling holding company’s obligation to fund a capital restoration plan is limited to the lesser of 5% of an undercapitalized subsidiary’s assets at the time it became undercapitalized or the amount required to meet regulatory capital requirements.

The capital classification of a bank affects the frequency of regulatory examinations, the bank’s ability to engage in certain activities and the deposit insurance premiums paid by the bank. As of December 31, 2017, Investar Bank met the requirements to be categorized as well capitalized under the prompt corrective action framework as currently in effect.

Basel III. On July 2, 2013, the federal banking agencies adopted a final rule revising the regulatory capital framework applicable to all top tier bank holding companies with consolidated assets of \$500 million or more and all banks, regardless of size. The Basel III framework became effective on January 1, 2015, although the capital conservation buffer, which is discussed in greater detail below, will be phased in over a three year period, beginning January 1, 2016.

Under the Basel III framework, we are required to maintain the following minimum regulatory capital ratios:

- A new ratio of common equity Tier 1 capital to total risk-weighted assets of not less than 4.5%;
- A Tier 1 risk-based capital ratio of 6.0% (an increase from 4.0%);
- A total risk-based capital ratio of 8.0%; and
- A leverage ratio of 4.0%.

The Basel III framework also changes the regulatory capital requirements for purposes of the prompt corrective action regulations. Accordingly, as of January 1, 2015, to be categorized as well capitalized, the Bank must have a minimum common equity Tier 1 capital ratio of at least 6.5%, a Tier 1 risk-based capital ratio of at least 8.0%, a total risk-based capital ratio of at least 10.0%, and a leverage capital ratio of at least 5.0%.

Under the Basel III framework, Tier 1 capital is redefined to include two components: (1) common equity Tier 1 capital and (2) additional Tier 1 capital. Common equity Tier 1 capital consists solely of common stock (plus related surplus), retained earnings, accumulated other comprehensive income, and limited amounts of minority interests that are in the form of common stock. Additional Tier 1 capital includes other perpetual instruments historically included in Tier 1 capital, such as non-cumulative perpetual preferred stock. With limited exceptions, trust preferred securities and cumulative perpetual preferred stock will no longer qualify as Tier 1 capital. Tier 2 capital consists of instruments that currently qualify as Tier 2 capital plus instruments that the rule has disqualified from Tier 1 capital treatment. In addition, the Basel III framework establishes certain deductions from and adjustments to the regulatory capital ratios.

The Basel III framework also implements a requirement for all banking organizations to maintain a capital conservation buffer above the minimum capital requirements to avoid certain restrictions on capital distributions and discretionary bonus payments to executive officers. The capital conservation buffer must be composed of common equity Tier 1 capital. The capital conservation buffer requirement, when fully phased in, will effectively require banking organizations to maintain regulatory capital ratios at least 50 basis points higher than well capitalized levels under prompt corrective action standards to avoid the restrictions on capital distributions and discretionary bonus payments to executive officers.

The Basel III framework alters the method under which banking organizations must calculate risk-weighted assets in an effort to make the calculation of risk-weighted assets more risk sensitive, to better account for risk mitigation techniques, and to create substitutes for credit ratings (in accordance with the Dodd-Frank Act). The standardized approach, which will apply to us, includes additional exposure categories as compared with current standards including a new high volatility commercial real estate category that is risk-weighted at 150%. Although a number of asset classes will be risk-weighted differently, the Basel III framework does not change standardized risk weightings for certain assets, including residential mortgages.

Although management is continuing to evaluate the impact the Basel III framework will have on the Company and the Bank, we were in compliance with all applicable minimum regulatory capital requirements as of December 31, 2017, and management believes that at December 31, 2017, the Company and the Bank would have met all new capital adequacy requirements under the new Basel III framework on a fully phased-in basis if such requirements were then effective.

The Basel III framework also requires banks and bank holding companies to measure their liquidity against specific liquidity tests. However, the final rules adopted by the federal banking agencies in September 2014 implementing the Basel III liquidity framework apply only to banking organizations with \$250 billion or more in consolidated assets or \$10 billion or more in foreign exposures. As a result, unless modified, the Basel III liquidity framework does not apply to us.

Acquisitions by Bank Holding Companies

Federal and state laws, including the Bank Holding Company Act and the Change in Bank Control Act, impose additional prior notice or approval requirements and ongoing regulatory requirements on any investor that seeks to acquire direct or indirect “control” of an FDIC-insured depository institution or bank holding company. We must obtain the prior approval of the Federal Reserve before (1) acquiring more than 5% of the voting stock of any bank or other bank holding company, (2) acquiring all or substantially all of the assets of any bank or bank holding company, or (3) merging or consolidating with any other bank holding company. The Federal Reserve may determine not to approve any of these transactions if it would result in or tend to create a monopoly or substantially lessen competition or otherwise function as a restraint of trade, unless the anti-competitive effects of the proposed transaction are clearly outweighed by the public interest in meeting the convenience and needs of the community to be served. The Federal Reserve is also required to consider the financial and managerial resources and future prospects of the bank holding companies and banks concerned, the convenience and needs of the community to be served, and the record of a bank holding company and its subsidiary bank(s) in combating money laundering activities. In addition, a failure to implement and maintain adequate compliance programs could cause the Federal Reserve or other banking regulators not to approve an acquisition when regulatory approval is required or to prohibit an acquisition even if approval is not required.

Scope of Permissible Bank Holding Company Activities

In general, the Bank Holding Company Act limits the activities permissible for bank holding companies to the business of banking, managing or controlling banks and such other activities as the Federal Reserve has determined to be so closely related to banking as to be properly incident thereto.

A bank holding company may elect to be treated as a financial holding company and receive expanded powers if it and its depository institution subsidiaries are “well capitalized” and “well managed,” and its subsidiary banks controlled by it have at least a “satisfactory” Community Reinvestment Act rating. We have elected for the Company to be treated as a financial holding company. As a financial holding company, we may engage in a range of activities that are (1) financial in nature or incidental to such financial activity or (2) complementary to a financial activity and which do not pose a substantial risk to the safety and soundness of a depository institution or to the financial system generally. These activities include securities dealing, underwriting and market making, insurance underwriting and agency activities, merchant banking and insurance company portfolio investments. Expanded financial activities of financial holding companies generally will be regulated according to the type of such financial activity: banking activities by banking regulators; securities activities by securities regulators; and insurance activities by insurance regulators.

The Bank Holding Company Act does not place territorial limitations on permissible non-banking activities of bank holding companies. The Federal Reserve has the power to order any bank holding company or its subsidiaries to terminate any activity or to terminate its ownership or control of any subsidiary when the Federal Reserve has reasonable grounds to believe that continuation of such activity or such ownership or control constitutes a serious risk to the financial soundness, safety or stability of any bank subsidiary of the bank holding company.

Source of Strength Doctrine for Bank Holding Companies

Under longstanding Federal Reserve policy which has been codified by the Dodd-Frank Act, we are expected to act as a source of financial strength to, and to commit resources to support, Investar Bank. This support may be required at times when we may not be inclined to provide it. In addition, any capital loans that we make to Investar Bank are subordinate in right of payment to deposits and to certain other indebtedness of the Bank. In the event of our bankruptcy, any commitment by us to a federal bank regulatory agency to maintain the capital of the Bank will be assumed by the bankruptcy trustee and entitled to a priority of payment.

Dividends

As a bank holding company, we are subject to certain restrictions on dividends under applicable banking laws and regulations. The Federal Reserve has issued a policy statement that provides that a bank holding company should not pay dividends unless: (1) its net income over the last four quarters (net of dividends paid) has been sufficient to fully fund the dividends; (2) the prospective rate of earnings retention appears to be consistent with the capital needs, asset quality and overall financial condition of the bank holding company and its subsidiaries; and (3) the bank holding company will continue to meet minimum required capital adequacy ratios. Accordingly, a bank holding company should not pay cash dividends that exceed its net income or that can only be funded in ways that weaken the bank holding company's financial health, such as by borrowing. The Dodd-Frank Act imposes, and Basel III effected, additional restrictions on the ability of banking institutions to pay dividends. In addition, in the current financial and economic environment, the Federal Reserve Board has indicated that bank holding companies should carefully review their dividend policy and has discouraged payment ratios that are at maximum allowable levels unless both asset quality and capital are very strong.

The Bank is also subject to certain restrictions on dividends under federal and state laws, regulations and policies. In general, under Louisiana law, the Bank may pay dividends to us without the approval of the OFI only so long as the amount of the dividend does not exceed the Bank's net profits earned during the current year combined with its retained net profits of the immediately preceding year. The Bank must obtain the approval of the OFI for any amount in excess of this threshold. In addition, under federal law, the Bank may not pay any dividend to us if it is undercapitalized or the payment of the dividend would cause it to become undercapitalized. The FDIC may further restrict the payment of dividends by requiring the Bank to maintain a higher level of capital than would otherwise be required to be adequately capitalized for regulatory purposes. Moreover, if, in the opinion of the FDIC, the Bank is engaged in an unsound practice (which could include the payment of dividends even within the legal requirements noted above), the FDIC may require, generally after notice and hearing, the Bank to cease such practice. The FDIC has indicated that paying dividends that deplete a depository institution's capital base to an inadequate level would be an unsafe banking practice. The FDIC has also issued policy statements providing that insured depository institutions generally should pay dividends only out of current operating earnings.

Restrictions on Transactions with Affiliates and Loans to Insiders

Federal law strictly limits the ability of banks to engage in transactions with their affiliates, including their bank holding companies. Sections 23A and 23B of the Federal Reserve Act, and Federal Reserve Regulation W, impose quantitative limits, qualitative standards, and collateral requirements on certain transactions by a bank with, or for the benefit of, its affiliates, and generally require those transactions to be on terms at least as favorable to the bank as transactions with non-affiliates and to be consistent with safe and sound practices. The Dodd-Frank Act significantly expands the coverage and scope of the limitations on affiliate transactions within a banking organization, including an expansion of the types of transactions that are covered transactions to include credit exposures related to derivatives, repurchase agreements and securities lending arrangements and an increase in the amount of time for which collateral requirements regarding covered transactions must be satisfied.

Federal law also limits a bank's authority to extend credit to its directors, executive officers and 10% shareholders, as well as to entities controlled by such persons. Among other things, extensions of credit to insiders are required to be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons. Also, the terms of such extensions of credit may not involve more than the normal risk of repayment or present other unfavorable features and may not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of the bank's capital.

Incentive Compensation Guidance

The federal banking agencies have issued comprehensive guidance on incentive compensation policies. This guidance is designed to ensure that a financial institution's incentive compensation structure does not encourage imprudent risk taking, which may undermine the safety and soundness of the institution. The guidance, which applies to all employees that have the ability to materially affect an institution's risk profile, either individually or as part of a group, is based upon three primary principles: (1) balanced risk taking incentives; (2) compatibility with effective controls and risk management; and (3) strong corporate governance.

An institution's supervisory ratings will incorporate any identified deficiencies in an institution's compensation practices, and it may be subject to an enforcement action if the incentive compensation arrangements pose a risk to the safety and soundness of the institution. Further, a provision of the Basel III proposals described above would limit discretionary bonus payments to bank executives if the institution's regulatory capital ratios fail to exceed certain thresholds.

Deposit Insurance Assessments

FDIC insured banks are required to pay deposit insurance assessments to the FDIC. The amount of the assessment is based on the size of the bank's assessment base, which is equal to its average consolidated total assets less its average tangible equity, and its risk classification under an FDIC risk-based assessment system. Institutions assigned to higher risk classifications (that is, institutions that pose a higher risk of loss to the Deposit Insurance Fund) pay assessments at higher rates than institutions that pose a lower risk. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern that the institution poses to the regulators. In addition, the FDIC can impose special assessments in certain instances. As noted above, the Dodd-Frank Act changed the way that deposit insurance premiums are calculated. Continued action by the FDIC to replenish the Deposit Insurance Fund, as well as the changes contained in the Dodd-Frank Act, may result in higher assessment rates, which could reduce our profitability or otherwise negatively impact our operations.

Branching and Interstate Banking

Under Louisiana law, Investar Bank is permitted to establish additional branch offices within Louisiana, subject to the approval of the OFI. As a result of the Dodd-Frank Act, the Bank may also establish additional branch offices outside of Louisiana, subject to prior regulatory approval, so long as the laws of the state where the branch is to be located would permit a state bank chartered in that state to establish a branch. We currently do not have any branches outside the state of Louisiana. The Bank may also establish offices in other states by merging with banks or by purchasing branches of other banks in other states, subject to certain restrictions.

Community Reinvestment Act

Investar Bank is required under the Community Reinvestment Act, or CRA, and related FDIC regulations to help meet the credit needs of its communities, including low and moderate-income borrowers. In connection with its examination of the Bank, the FDIC assesses our record of compliance with the CRA. The Bank's failure to comply with the provisions of the CRA could, at a minimum, result in denial of certain corporate applications, such as branches or mergers, or in restrictions on its or the Company's activities. The Bank received a "satisfactory" CRA rating on its most recent CRA examination. The CRA requires all FDIC insured institutions to publicly disclose their rating.

Concentrated Commercial Real Estate Lending Regulations

The federal banking regulatory agencies have promulgated guidance governing financial institutions with concentrations in commercial real estate lending. The guidance provides that a bank has a concentration in commercial real estate lending if (i) total reported loans for construction, land development, and other land represent 100% or more of total capital or (ii) total reported loans secured by multifamily and nonfarm residential properties and loans for construction, land development, and other land represent 300% or more of total capital and the bank's commercial real estate loan portfolio has increased 50% or more during the prior 36 months. Owner occupied loans are excluded from this second category. If a concentration is present, management must employ heightened risk management practices that address, among other things, board and management oversight and strategic planning, portfolio management, development of underwriting standards, risk assessment and monitoring through market analysis and stress testing, and maintenance of increased capital levels as needed to support the level of commercial real estate lending. At December 31, 2017, the Company did not have a concentration in commercial real estate as defined by the regulatory guidance.

Financial Privacy Requirements

Federal law and regulations limit a financial institution's ability to share consumer financial information with unaffiliated third parties. Specifically, these provisions require all financial institutions offering financial products or services to retail customers to provide such customers with the financial institution's privacy policy and provide such customers the opportunity to "opt out" of the sharing of personal financial information with unaffiliated third parties. The sharing of information for marketing purposes is also subject to limitations. The Bank currently has a privacy protection policy in place.

Consumer Laws and Regulations

The Bank is subject to numerous laws and regulations intended to protect consumers in transactions with the Bank, including, among others, laws regarding unfair, deceptive and abusive acts and practices, usury laws, and other federal consumer protection statutes. These federal laws include the ECOA, the Electronic Fund Transfer Act, the Fair Credit Reporting Act, the Fair Debt Collection Practices Act, the Real Estate Procedures Act of 1974, the S.A.F.E. Mortgage Licensing Act of 2008, the Truth in Lending Act and the Truth in Savings Act, among others. Many states and local jurisdictions have consumer protection laws analogous, and in addition, to those enacted under federal law. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans and conducting other types of transactions. Failure to comply with these laws and regulations could give rise to regulatory sanctions, customer rescission rights, action by state and local attorneys general and civil or criminal liability.

In addition, the Dodd-Frank Act created the Consumer Financial Protection Bureau that has broad authority to regulate and supervise retail financial services activities of banks and various non-bank providers. The Bureau has authority to promulgate regulations, issue orders, guidance and policy statements, conduct examinations and bring enforcement actions with regard to consumer financial products and services. In general, however, banks with assets of \$10 billion or less, such as Investar Bank, will continue to be examined for consumer compliance by their primary federal bank regulator.

Mortgage Lending Rules

The Dodd-Frank Act authorized the Consumer Financial Protection Bureau to establish certain minimum standards for the origination of residential mortgages, including a determination of the borrower's ability to repay. Under the Dodd-Frank Act, financial institutions may not make a residential mortgage loan unless they make a "reasonable and good faith determination" that the consumer has a "reasonable ability" to repay the loan. The Dodd-Frank Act allows borrowers to raise certain defenses to foreclosure but provides a full or partial safe harbor from such defenses for loans that are "qualified mortgages." On January 10, 2013, the Bureau published final rules to, among other things, specify the types of income and assets that may be considered in the ability-to-repay determination, the permissible sources for verification, and the required methods of calculating the loan's monthly payments. Since then, the Bureau has made certain modifications to these rules. The rules extend the requirement that creditors verify and document a borrower's income and assets to include all information that creditors rely on in determining repayment ability. The rules also provide further examples of third-party documents that may be relied on for such verification, such as government records and check cashing or funds transfer service receipts. The current rules became effective on January 10, 2014. The rules also define "qualified mortgages," imposing both underwriting standards, for example, a borrower's debt-to-income ratio may not exceed 43%, and limits on the terms of their loans. Points and fees are subject to a relatively stringent cap, and the terms include a wide array of payments that may be made in the course of closing a loan. Certain loans, including interest-only loans and negative amortization loans, cannot be qualified mortgages.

Anti-Money Laundering and OFAC

Under federal law, financial institutions must maintain anti-money laundering programs that include: established internal policies, procedures and controls; a designated compliance officer; an ongoing employee training program; and testing of the program by an independent audit function. Financial institutions are also prohibited from entering into specified financial transactions and account relationships and must meet enhanced standards for due diligence and customer identification in their dealings with foreign financial institutions and foreign customers. Financial institutions must take reasonable steps to conduct enhanced scrutiny of account relationships to guard against money laundering and to report any suspicious transactions, and law enforcement authorities have been granted increased access to financial information maintained by financial institutions.

The Office of Foreign Assets Control, or OFAC, is responsible for helping to insure that U.S. entities do not engage in transactions with certain prohibited parties, as defined by various Executive Orders and Acts of Congress. OFAC publishes lists of persons and organizations suspected of aiding, harboring or engaging in terrorist acts, known as Specially Designated Nationals and Blocked Persons. Generally, if the Bank identifies a transaction, account or wire transfer relating to a person or entity on an OFAC list, it must freeze the account or block the transaction, file a suspicious activity report and notify the appropriate authorities.

Bank regulators routinely examine institutions for compliance with these obligations and they must consider an institution's compliance in connection with the regulatory review of applications, including applications for banking mergers and acquisitions. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing and comply with OFAC sanctions, or to comply with relevant laws and regulations, could have serious legal, reputational and financial consequences for the institution.

Safety and Soundness Standards

Federal bank regulatory agencies have adopted guidelines that establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth and compensation, fees and benefits. Additionally, the agencies have adopted regulations that provide the authority to order an institution that has been given notice by an agency that it is not satisfying any of these safety and soundness standards to submit a compliance plan. If, after being so notified, an institution fails to submit an acceptable compliance plan or fails in any material respect to implement an acceptable compliance plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions of the types to which an undercapitalized institution is subject under the “prompt corrective action” provisions of the Federal Deposit Insurance Act. If an institution fails to comply with such an order, the agency may seek to enforce such order in judicial proceedings and to impose civil money penalties.

Bank holding companies are also not permitted to engage in unsound banking practices. For example, the Federal Reserve’s Regulation Y requires a holding company to give the Federal Reserve prior notice of any redemption or repurchase of its own equity securities, if the consideration to be paid, together with the consideration paid for any repurchases in the preceding year, is equal to 10% or more of the company’s consolidated net worth. The Federal Reserve may oppose the transaction if it believes that the transaction would constitute an unsafe or unsound practice or would violate any law or regulation. As another example, a holding company could not impair its subsidiary bank’s soundness by causing it to make funds available to non-banking subsidiaries or their customers if the Federal Reserve believed it not prudent to do so. The Federal Reserve has broad authority to prohibit activities of bank holding companies and their nonbanking subsidiaries that represent unsafe and unsound banking practices or that constitute violations of laws or regulations.

Effect of Governmental Monetary Policies

The commercial banking business is affected not only by general economic conditions but also by U.S. fiscal policy and the monetary policies of the Federal Reserve. Some of the instruments of monetary policy available to the Federal Reserve include changes in the discount rate on member bank borrowings, the fluctuating availability of borrowings at the “discount window,” open market operations, the imposition of and changes in reserve requirements against member banks’ deposits and assets of foreign branches, and the imposition of and changes in reserve requirements against certain borrowings by banks and their affiliates. These policies influence to a significant extent the overall growth of bank loans, investments, and deposits and the interest rates charged on loans or paid on deposits. We cannot predict the nature of future fiscal and monetary policies and the effect of these policies on our future business and earnings.

Future Legislation and Regulatory Reform

As a result of the recent economic downturn and its effect on financial institutions, regulators have increased their focus on the regulation of financial institutions. New laws, regulations and policies are regularly proposed that contain wide-ranging proposals for altering the structures, regulations and competitive relationships of financial institutions operating in the United States. In addition, existing laws, regulations and policies are continually subject to modification or changes in interpretation. We cannot predict whether or in what form any law, regulation or policy will be adopted or modified or the extent to which our operations and activities, financial condition, results of operations, growth plans or future prospects may be affected by its adoption or modification.

The cumulative effect of these laws and regulations add significantly to the cost of our operations and thus have a negative impact on profitability. There has also been a tremendous expansion in recent years of financial service providers that are not subject to the same level of regulation, examination and oversight as we are. Those providers, because they are not so highly regulated, may have a competitive advantage over us and may continue to draw large amounts of funds away from traditional banking institutions, with a continuing adverse effect on the banking industry in general.

Employees

As of December 31, 2017, we had 258 full-time equivalent employees. None of our employees are represented by any collective bargaining unit or are parties to a collective bargaining agreement. We believe that our relations with our employees are good.

Dependence upon a Single Customer

No material portion of our loans has been made to, nor have our deposits been obtained from, a single or small group of customers; the loss of any single customer or small group of customers would not have a materially adverse effect on our business. A discussion of concentrations of credit in our loan portfolio is set forth under the heading *Loan Concentrations* in “Discussion and Analysis of Financial Condition—Loans” in *Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations*.

Available Information

Our filings with the Securities and Exchange Commission (the “SEC”), including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments thereto, are available on our website as soon as reasonably practicable after the reports are filed with or furnished to the SEC. Copies can be obtained free of charge in the “Investor Relations” section of our website at www.investarbank.com. Our SEC filings are also available through the SEC’s website www.sec.gov. Copies of these filings are also available by writing to us at the following address:

Investar Holding Corporation
P.O. Box 84207
Baton Rouge, Louisiana 70884-4207

Item 1A. Risk Factors

Our business is subject to risk. In addition to the other information contained in this Annual Report on Form 10-K, including management's discussion and analysis of financial condition and results of operations and our financial statements and the notes thereto, investors should consider the following risks when evaluating whether to invest in our common stock. If any of the following risks occur, whether alone or in combination, our business, financial condition, results of operations, cash flows and growth prospects could be materially and adversely affected. Additional risks that we do not presently know of or currently deem immaterial may also adversely affect our business, financial condition, results of operations cash flows and growth prospects.

Risks Related to our Business

As a business operating in the financial services industry, our business and operations may be adversely affected by current economic conditions.

Our financial performance generally, and in particular the ability of borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services we offer, is highly dependent upon the business environment in the primary markets where we operate and in the U.S. as a whole. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity or investor or business confidence, limitations on the availability or increases in the cost of credit and capital, increases in inflation or interest rates, high unemployment, natural disasters, or a combination of these or other factors. While economic conditions in our primary markets of south Louisiana have improved since the end of the economic recession, economic growth has been slow and uneven, and concerns still exist over the federal deficit, government spending, and economic risks. A return of recessionary conditions and/or negative developments in the domestic and international credit markets may significantly affect the markets in which we do business, the value of our loans and investments, and our ongoing operations, costs and profitability. Declines in real estate value and sales volumes and high unemployment levels may result in higher than expected loan delinquencies and a decline in demand for our products and services. These negative events may cause us to incur losses and may adversely affect our capital, liquidity and financial condition.

Furthermore, the Federal Reserve, in an attempt to help the overall economy, has among other things, kept interest rates low through its targeted federal funds rate and the purchase of U.S. Treasury and mortgage-backed securities. The Federal Reserve increased the target range for the federal funds rate by 25 basis points in December 2016 and by a total of 75 basis points during 2017 and has indicated the potential for further gradual increases in the target rate depending on the economic outlook. As the federal funds rate increases, market interest rates will likely rise, which may negatively impact the housing markets and the U.S. economic recovery.

In addition, geopolitical matters, including international political unrest and slow growth in the global economy, as well as acts of terrorism, war and other violence could result in further disruptions in the financial markets. These negative events could have a material adverse effect on our results of operations and financial condition, including our liquidity position, and may affect our ability to access capital.

Our business strategy includes the continuation of growth plans, and our financial condition and results of operations could be negatively affected if we fail to grow or fail to manage our growth effectively.

We have grown our business primarily through de novo branching and through the acquisition of other financial institutions. Since June 14, 2006, we have opened nine de novo branches and acquired South Louisiana Business Bank ("SLBB") in 2011, First Community Bank ("FCB") in 2013, and Citizens Bancshares, Inc. ("Citizens") and BOJ Bancshares, Inc. ("BOJ") in 2017. We intend to continue pursuing a growth strategy for our business through de novo branching and to evaluate attractive acquisition opportunities that are presented to us. Our growth prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies when expanding their franchise, including the following:

- ***Management of Growth.*** We may be unable to successfully maintain loan quality in the context of significant loan growth or maintain adequate management personnel and systems to oversee such growth, including internal audit, loan review and compliance personnel. Our growth may require that we implement additional policies, procedures and operating systems, and we may encounter difficulties in doing so at all or in a timely manner.
- ***Operating Results.*** There is no assurance that existing offices or future offices will maintain or achieve deposit levels, loan balances or other operating results necessary to avoid losses or produce profits. Our growth and de novo branching strategy necessarily entails growth in overhead expenses as we routinely add new offices and staff. Our historical results may not be indicative of future results or results that may be achieved as we continue to increase the number and concentration of our branch offices. Should any new location be unprofitable or marginally profitable, or should any existing location experience a decline in profitability or incur losses, the adverse effect on our results of operations and financial condition could be more significant than would be the case for a larger company.

- ***De Novo Branching.*** There are considerable costs involved in opening branches, and new branches generally do not generate sufficient revenues to offset their costs until they have been in operation for at least a year or more. Accordingly, our de novo branches can be expected to negatively impact our earnings for some period of time until the branches reach certain economies of scale. Our expenses could be further increased if we encounter delays in opening any of our de novo branches. We may be unable to accomplish future branch expansion plans due to a lack of available satisfactory sites, difficulties in acquiring such sites, increased expenses or loss of potential sites due to complexities associated with zoning and permitting processes, higher than anticipated merger and acquisition costs or other factors. Finally, we have no assurance our de novo branches or branches that we may acquire will be successful even after they have been established or acquired, as the case may be.
- ***Expansion into New Markets.*** As we grow into new markets in Louisiana and in other states, we are likely to encounter customer demographics and financial services offerings unlike those found in our current markets. In these markets we are likely to face competition from a wide array of financial institutions, including much larger, better-established financial institutions.

Failure to successfully address these issues could have a material adverse effect on our financial condition and results of operations, and could adversely affect our ability to successfully implement our business strategy. Also, if our growth occurs more slowly than anticipated or declines, our operating results could be materially adversely affected.

Our success depends significantly on our management team, and the loss of our senior executive officers or other key employees and our inability to recruit or retain suitable replacements could adversely affect our business, results of operations and growth prospects.

Our success depends significantly on the continued service and skills of our existing executive management team. The implementation of our business and growth strategies also depends significantly on our ability to retain employees with experience and business relationships within their respective market areas, as well as on our ability to attract, motivate and retain highly qualified senior and middle management. We do not have employment agreements with any of our executive officers, and our officers may terminate their employment with us at any time. Competition for employees is intense, and we could have difficulty replacing such officers with personnel with the combination of skills and attributes required to execute our business and growth strategies and who have ties to the communities within our market areas. The loss of any of our key personnel could therefore have a material adverse effect on our business, financial condition, results of operations and growth prospects.

As a community bank, our ability to maintain our reputation is critical to the growth of our business.

We are a community bank and our reputation is one of the most valuable components of our business. Much of our growth over the past several years has depended on attracting new customers from competing financial institutions and increasing our market share, primarily through the involvement of our employees in the communities that we serve. Also, our ability to attract and retain highly-skilled management and employees is impacted by our reputation. A negative public opinion of our business can result from any number of activities, including our lending practices, corporate governance, and regulatory compliance, acquisitions, and actions taken by our regulators or by community organizations in response to these activities. Significant harm to our reputation could also arise as a result of regulatory or governmental actions, litigation, employee misconduct, or the activities of our customers, other participants in the financial services industry or our contractual counterparties, such as our service providers and vendors. Damage to our reputation could also adversely affect our credit ratings and access to capital markets.

Our business is concentrated in southern Louisiana, and a regional or local economic downturn affecting southern Louisiana may magnify the adverse effects and consequences to us.

We conduct our operations almost exclusively in southern Louisiana, and more specifically, in the Baton Rouge, New Orleans, Lafayette and Hammond metropolitan areas. At December 31, 2017, approximately 96% of the secured loans in our total loan portfolio were secured by properties and other collateral located in Louisiana, while approximately 68% of the loans in our loan portfolio (measured by dollar amount) were made to borrowers who live or work in either the Baton Rouge or New Orleans metropolitan area. This geographic concentration imposes a greater risk to us than to our competitors in the area who maintain significant operations outside of southern Louisiana. Accordingly, any regional or local economic downturn, or natural or man-made disaster, that affects southern Louisiana or existing or prospective property or borrowers in such area may affect us and our profitability more significantly and more adversely than our more geographically diversified competitors.

More particularly, much of our business development and marketing strategy is directed toward fulfilling the banking and financial services needs of small to medium-sized businesses. Such businesses generally have fewer financial resources in terms of capital or borrowing capacity than larger entities. If general economic conditions negatively impact our markets or the Louisiana market generally and these businesses are adversely affected, our financial condition and results of operations may be negatively affected.

Adverse economic factors affecting particular industries could have a negative effect on our customers and their ability to make payments to us.

In addition to the geographic concentration of our markets, certain industry-specific economic factors also affect us. For example, a downturn in segments of the commercial and residential real estate industries in our markets due to adverse economic factors affecting particular industries could have an adverse effect on our customers. In addition, the energy sector, which is historically cyclical, has recently experienced significant volatility and a decline in oil and gas prices. While we consider our exposure to the energy sector to not be significant, comprising approximately 1% of total loans as of December 31, 2017, should the price of oil and gas decline further and/or remain at the current low price for an extended period, the general economic conditions in our south Louisiana markets could be negatively affected, which could have a material adverse effect on our business, financial condition, and results of operations.

We have a significant number of loans secured by real estate, and a downturn in the real estate market could result in losses and negatively impact our profitability.

At December 31, 2017, approximately 83% of our total loan portfolio had real estate as a primary or secondary component of the collateral securing the loan. The real estate provides an alternate source of repayment in the event of a default by the borrower and may deteriorate in value during the time the credit is extended. Declines in real estate values in our southern Louisiana markets could significantly impair the value of the particular collateral securing our loans and our ability to sell the collateral upon foreclosure for an amount necessary to satisfy the borrower's obligations to us. Furthermore, in a declining real estate market, we often will need to further increase our allowance for loan losses to address the deterioration in the value of the real estate securing our loans. Any of the foregoing could have a material adverse effect on our business, financial condition, results of operations, cash flows and growth prospects.

Commercial real estate loans may expose us to greater risks than our other real estate loans.

Our loan portfolio includes nonowner-occupied commercial real estate loans for individuals and businesses for various purposes, which are secured by commercial properties, as well as real estate construction and development loans. As of December 31, 2017, our nonowner-occupied commercial real estate loans totaled \$264.9 million, or 21% of our total loan portfolio.

Commercial real estate loans typically depend on cash flows from the property to service the debt. Cash flows, either in the form of rental income or the proceeds from sales of commercial real estate, may be affected significantly by general economic conditions. These loans expose a lender to greater credit risk than loans secured by residential real estate because the collateral securing these loans typically cannot be liquidated as easily as residential real estate. If we foreclose on these loans, our holding period for the collateral typically is longer than for a one-to-four family residential property because there are fewer potential purchasers of the collateral. Additionally, nonowner-occupied commercial real estate loans generally involve relatively large balances to single borrowers or related groups of borrowers. Accordingly, charge-offs on nonowner-occupied commercial real estate loans may be larger on a per loan basis than those incurred with our residential or consumer loan portfolios. Unexpected deterioration in the credit quality of our commercial real estate loan portfolio would require us to increase our provision for loan losses, which would reduce our profitability and could materially adversely affect our business, financial condition, results of operations, cash flows and growth prospects.

We are exposed to consumer credit risk.

Historically, we have originated a significant number of consumer installment loans, particularly with respect to automobile finance. We are subject to credit risk resulting from defaults in payment or performance by customers for our loans, as well as loans that we sell to third parties but retain servicing rights. A weak economic environment and high unemployment rates could exert pressure on our auto loan customers resulting in higher delinquencies, repossessions and losses. There can be no assurances that our monitoring of our credit risk as it affects the value of these loans and the underlying collateral will be sufficient to prevent an effect on our profitability and financial condition.

There are also risks with respect to our auto lending in particular. First, as an indirect auto lender, all of our auto loans were originated by dealerships with which we have relationships. As a result, we do not have relationships directly with the borrowers and are dependent on the relationships these dealerships have with their customers to make a determination on whether or not there are factors that would cause an otherwise qualified customer to not repay the loan. In addition, federal and state laws may prohibit, limit or delay our repossession and sale of vehicles on defaulted automobile loan contracts, which will impair our ability to recover losses on these loans. Additional factors that may affect our ability to recoup the full amount due on an indirect auto loan include, among other things, our failure to perfect our security interest in the relevant vehicle, depreciation, obsolescence, damage or loss to the vehicle and the impact of federal and state bankruptcy and insolvency laws. Furthermore, proceeds from the sale of repossessed vehicles can fluctuate significantly based upon market conditions. A deterioration in general economic conditions could result in a greater loss in the sale of repossessed vehicles than we have historically experienced.

In November 2015, the Bank announced that it was exiting the indirect auto loan origination business. The Bank discontinued accepting indirect auto loan applications December 31, 2015, but continued to process and fund applications that were accepted on or before that date. The Bank will continue to service the current auto loan portfolio for its duration, which bears the risks discussed above.

Our allowance for loan losses may prove to be insufficient to absorb losses inherent in our loan portfolio, and we may be required to further increase our provision for loan losses.

Although we endeavor to diversify our loan portfolio in order to minimize the effect of economic conditions within a particular industry, management also maintains an allowance for loan losses, which is a reserve established through a provision for loan losses charged to expense, to absorb probable credit losses inherent in the entire loan portfolio. We maintain our allowance for loan losses at a level considered adequate by management to absorb probable loan losses, including collateral impairment, based on our analysis of our portfolio and market environment, using relevant information available to us. Among other considerations in establishing the allowance for loan losses, management considers economic conditions reflected within industry segments, the unemployment rate in our markets, loan segmentation and historical losses that are inherent in the loan portfolio.

As of December 31, 2017, our allowance for loan losses as percentages of total loans and nonperforming loans was 0.63% and 214%, respectively. The determination of the appropriate level of the allowance is inherently subjective and requires us to make significant estimates of current credit risks and future trends, all of which are subject to material changes. In addition, loans acquired in connection with business combination transactions are measured at fair value, based on management's estimates related to expected prepayments and the amount and timing of undiscounted expected principal, interest and other cash flows. Because fair value measurements incorporate assumptions regarding credit risk, no allowance for loan losses related to the acquired loans is recorded on the acquisition date.

Inaccurate management assumptions, including with respect to the fair value of acquired loans, continuing deterioration of economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans and other factors, both within and outside of our control, may require us to increase our allowance for loan losses. In addition, bank regulatory agencies periodically review the allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further loan charge-offs, based on judgments different than those of management. Finally, if actual charge-offs in future periods exceed the allowance for loan losses, we will need additional provisions to increase the allowance for loan losses. Any increases in the allowance for loan losses will result in a decrease in net income and, possibly, capital and may have a material adverse effect on our business, financial condition, results of operations and growth prospects.

Lack of seasoning of our loan portfolio could increase the risk of future credit defaults.

As a result of our growth over the past three years, a large portion of loans in our loan portfolio and of our lending relationships are of relatively recent origin. In general, loans do not begin to show signs of credit deterioration or default until they have been outstanding for some period of time, a process referred to as "seasoning." As a result, a portfolio of older loans will usually behave more predictably than a newer portfolio. Because a large portion of our portfolio is relatively new, the current level of delinquencies and defaults may not represent the level that may prevail as the portfolio becomes more seasoned. If delinquencies and defaults increase, we may be required to increase our provision for loan losses, which could materially adversely affect our business, financial condition, results of operations and growth prospects.

New lines of business or new products and services may subject the Company to additional risks.

From time to time, the Company may implement or may acquire new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, the Company may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. External factors, such as compliance with regulations, competitive alternatives and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of the Company's system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on the Company's business, financial condition, and results of operations.

We are subject to interest rate risk.

The majority of our assets and liabilities are monetary in nature and, as a result, we are subject to significant risk from changes in interest rates. Changes in interest rates may affect our net interest income as well as the valuation of our assets and liabilities. Our earnings depend significantly on our net interest income, which is the difference between interest income on interest-earning assets, such as loans and securities, and interest expense on interest-bearing liabilities, such as deposits and borrowings. We expect to periodically experience "gaps" in the interest rate sensitivities of our assets and liabilities, meaning that either our interest-bearing liabilities will be more sensitive to changes in market interest rates than our interest-earning assets, or vice versa. In either event, if market interest rates move contrary to our position, this "gap" may work against us, and our earnings may be adversely affected.

When interest-bearing liabilities mature or reprice more quickly, or to a greater degree than interest-earning assets in a period, an increase in interest rates could reduce net interest income. Similarly, when interest-earning assets mature or reprice more quickly, or to a greater degree than interest-bearing liabilities, falling interest rates could reduce net interest income. Additionally, an increase in the general level of interest rates may also, among other things, adversely affect our current borrowers' ability to repay variable rate loans, the demand for loans and our ability to originate loans and decrease loan prepayment rates. Conversely, a decrease in the general level of interest rates, among other things, may lead to prepayments on our loan and mortgage-backed securities portfolios and increased competition for deposits. Accordingly, changes in the general level of market interest rates may adversely affect our net yield on interest-earning assets, loan origination volume and our overall results.

Although our asset-liability management strategy is designed to control and mitigate exposure to the risks related to changes in the general level of market interest rates, those rates are affected by many factors outside of our control, including inflation, recession, unemployment, money supply, international disorder, instability in domestic and foreign financial markets and policies of various governmental and regulatory agencies, particularly the Board of Governors of the Federal Reserve. Adverse changes in the U.S. monetary policy or in economic conditions could materially and adversely affect us. We may not be able to accurately predict the likelihood, nature and magnitude of those changes or how and to what extent they may affect our business. We also may not be able to adequately prepare for or compensate for the consequences of such changes. Any failure to predict and prepare for changes in interest rates or adjust for the consequences of these changes may adversely affect our earnings and capital levels and overall results.

In addition, as interest rates increase, the ability of borrowers to repay their current loan obligations could be negatively impacted, which would adversely affect our results of operations. These circumstances could not only result in increased loan defaults, foreclosures and charge-offs but also necessitate further increases to the allowance for loan losses. At the same time, the marketability of the property securing a loan may be adversely affected by any reduced demand resulting from higher interest rates. Further, when we place a loan on nonaccrual status, we reverse any accrued but unpaid interest receivable, which decreases interest income, but we continue to have a cost to fund the loan, which is reflected as interest expense, without any interest income to offset the associated funding expense. Thus, an increase in the amount of nonperforming assets would have an adverse impact on net interest income. On the other hand, in a declining interest rate environment, there may be an increase in prepayments on loans as borrowers refinance their loans at lower rates.

By engaging in derivative transactions, we are exposed to credit and market risk, which could adversely affect our profitability and financial condition.

We manage interest rate risk by utilizing derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Hedging interest rate risk is a complex process, requiring sophisticated models and constant monitoring. The effect of this unrealized appreciation or depreciation will generally be offset by income or loss on the derivative instruments that are linked to the hedged assets and liabilities. By engaging in derivative transactions, we are exposed to credit and market risk. If the counterparty fails to perform, credit risk exists to the extent of the fair value gain in the derivative instrument. Market risk exists to the extent that interest rates change in ways that are significantly different from what was expected when we entered into the derivative agreement. The existence of credit and market risk associated with our derivative instruments could adversely affect our profitability and financial condition.

Breakdowns in our internal controls and procedures could have an adverse effect on us.

Management regularly reviews and updates our internal controls over financial reporting, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, financial condition, and results of operations. See *Item 9A, Controls and Procedures* for additional information.

Hurricanes or other adverse weather conditions, as well as man-made disasters, could negatively affect our local markets or disrupt our operations, which may adversely affect our business and results of operations.

Our business is concentrated in southern Louisiana, and in the Baton Rouge, New Orleans, Lafayette, and Hammond metropolitan areas in particular. Southern Louisiana is susceptible to major hurricanes, floods, tropical storms and other natural disasters and adverse weather. These natural disasters can disrupt our operations, cause widespread property damage and severely depress the local economies in which we operate. For example, Hurricane Gustav in 2008 severely impacted our headquarters city of Baton Rouge, with power in many areas of the city not being restored for nearly three weeks after the hurricane. In addition, Hurricane Katrina in August 2005 and the historic flooding of Baton Rouge and surrounding areas in August 2016 had significant impacts in several markets in which we conduct business. The 2010 Deepwater Horizon oil spill in the Gulf of Mexico illustrated that man-made disasters can also adversely affect economic activity in the markets in which we operate. Any economic decline as a result of a natural disaster, adverse weather, oil spill or other man-made disaster can reduce the demand for loans and our other products and services.

Such events could also affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans (resulting in increased delinquencies, foreclosures and loan losses), impair the value of collateral securing such loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. The occurrence of any such event could, therefore, result in decreased revenue and loan losses that have a material adverse effect on our business, financial condition, results of operations and growth prospects.

We are subject to a variety of risks in connection with any sale of loans we may conduct.

As discussed elsewhere in this document, we sell certain mortgage loans that we originate as well as pools of our consumer loans. In connection with these sales, we are typically required to make representations and warranties to the purchaser about the loans sold and the procedures under which those loans have been originated. If these representations and warranties are incorrect, we may be required to indemnify the purchaser for its losses or we may be required to repurchase part or all of the affected loans. Borrower fraud may also cause us to have to repurchase loans that we have sold. If we are required to make any indemnity payments or repurchases and do not have a remedy available to us against a solvent counterparty, we may not be able to recover our losses resulting from these indemnity payments and repurchases. Consequently, our results of operations may be adversely affected.

We may need to raise additional capital in the future to execute our business strategy.

In addition to the liquidity that we require to conduct our day-to-day operations, the Company, on a consolidated basis, and Investar Bank, on a stand-alone basis, must meet certain regulatory capital requirements. With the implementation of certain new regulatory requirements, such as the Basel III accord and the capital requirements enacted under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, or the Dodd-Frank Act, financial institutions will be required to establish higher tangible capital requirements. Also, we may need capital to finance acquisitions.

Our ability to raise additional capital depends on conditions in the capital markets, economic conditions and a number of other factors, including investor perceptions regarding the banking industry, market conditions and governmental activities, and on our financial condition and performance. Accordingly, there can be no assurances that we will be able to raise additional capital if needed or on terms acceptable to us. If we fail to maintain capital to meet regulatory requirements, our business, financial condition, results of operations and growth prospects could be materially and adversely affected.

Competition in our industry is intense, which could adversely affect our growth and profitability.

We face substantial competition in all areas of our operations from a variety of different competitors, many of which are larger and have substantially greater resources than we have, including higher total assets and capitalization, a more extensive and established branch network, greater access to capital markets and a broader offering of financial services. Such competitors primarily include national, regional and community banks within the various markets in which we operate. Because of their scale, many of these competitors can be more aggressive than we can on loan and deposit pricing. We also face competition from many other types of financial institutions, including savings and loans, credit unions, finance companies, brokerage firms, insurance companies, factoring companies and other financial intermediaries. Many of these entities have fewer regulatory constraints and may have lower cost structures than we do.

Our industry could become even more competitive as a result of legislative and regulatory changes as well as continued consolidation. The increased regulatory requirements imposed on financial institutions as well as the economic downturn in the United States in the 2007-2009 time frame, and generally slow recovery thereafter, have already resulted in the consolidation of a number of financial institutions, in addition to acquisitions of failed institutions. We expect additional consolidation to occur. Finally, technology has lowered barriers to entry and made it possible for non-banks to offer products and services traditionally provided by banks, such as automatic transfer and automatic payment systems. If we are unable to successfully compete, our business, financial condition, results of operations and growth prospects will be materially adversely affected.

We may face risks with respect to future acquisitions.

When we attempt to expand our business in Louisiana and other states through mergers and acquisitions, we seek targets that are culturally similar to us, have experienced management and possess either significant market presence or have potential for improved profitability through economies of scale or expanded services. In addition to the general risks associated with our growth plans highlighted above, acquiring other banks, businesses or branches involves various risks commonly associated with acquisitions, including, among other things:

- the time and costs associated with identifying and evaluating potential acquisition and merger targets;
- inaccuracies in the estimates and judgments used to evaluate credit, operations, management and market risks with respect to the target institution;
- the time and costs of evaluating new markets, hiring experienced local management and opening new bank locations, and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;
- our ability to finance an acquisition and possible dilution to our existing shareholders;
- the diversion of our management's attention to the negotiation of a transaction;
- the incurrence of an impairment of goodwill associated with an acquisition and adverse effects on our results of operations;
- entry into new markets where we lack experience; and
- risks associated with integrating the operations and personnel of the acquired business in a manner that permits growth opportunities and does not materially disrupt existing customer relationships or result in decreased revenues resulting from any loss of customers.

With respect to the risks particularly associated with the integration of an acquired business, we may encounter a number of difficulties, such as:

- customer loss and revenue loss;
- the loss of key employees;
- the disruption of our operations and business;
- our inability to maintain and increase competitive presence;
- possible inconsistencies in standards, control procedures and policies; and/or

- unexpected problems with costs, operations, personnel, technology and credit.

In addition to the risks posed by the integration process itself, the focus of management's attention and effort on integration may result in a lack of sufficient management attention to other important issues, causing harm to our business. Also, general market and economic conditions or governmental actions affecting the financial industry generally may inhibit our successful integration of an acquired business.

We expect to continue to evaluate merger and acquisition opportunities that are presented to us and conduct due diligence activities related to possible transactions with other financial institutions. As a result, merger or acquisition discussions and, in some cases, negotiations may take place and future mergers or acquisitions involving cash, debt or equity securities may occur at any time. Historically, acquisitions of non-failed financial institutions involve the payment of a premium over book and market values, and, therefore, some dilution of our book value and net income per common share may occur in connection with any future transaction. Failure to realize the expected revenue increases, cost savings, increases in geographic or product presence and/or other projected benefits from an acquisition could have a material adverse effect on our business, financial condition, results of operations and growth prospects.

If the goodwill that we recorded in connection with a business acquisition becomes impaired, it could require charges to earnings, which would have a negative impact on our financial condition and results of operations.

Goodwill represents the amount by which the cost of an acquisition exceeded the fair value of net assets we acquired in connection with the purchase of another financial institution. We review goodwill for impairment at least annually, or more frequently if events or changes in circumstances indicate that the carrying value of the asset might be impaired.

We determine impairment by comparing the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. Any such adjustments are reflected in our results of operations in the periods in which they become known. As of December 31, 2017, our goodwill totaled \$17.1 million, \$14.4 million of which was recognized in 2017 in connection with two acquisitions. While we have not recorded any such impairment charges since we initially recorded the goodwill, there can be no assurance that our future evaluations of goodwill will not result in findings of impairment and related write-downs, which may have a material adverse effect on our financial condition and results of operations.

Factors outside our control could result in impairment of or losses with respect to our investment securities.

Under applicable accounting standards, we are required to review our securities portfolio periodically for the presence of other-than-temporary impairment, taking into consideration current market conditions, the extent and nature of changes in fair value, issuer rating changes and trends, volatility of earnings, current analysts' evaluations, our ability and intent to hold securities until a recovery of fair value, as well as other factors. Adverse developments with respect to one or more of the foregoing factors may require us to deem particular securities to be other-than-temporarily impaired, with the credit related portion of the reduction in the value recognized as a charge to the results of operations in the period in which the impairment occurs. Market volatility may make it difficult to value certain securities. Subsequent valuations, in light of factors prevailing at that time, may result in significant changes in the values of these securities in future periods.

Any of these factors could require us to recognize further impairments in the value of our securities portfolio, which may have an adverse effect on our results of operations in future periods.

A lack of liquidity could adversely affect our ability to fund operations and meet our obligations as they become due.

Liquidity is essential to our business. Liquidity risk is the potential that we will be unable to meet our obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The primary source of the Bank's funds are customer deposits and loan repayments, while borrowings are a secondary source of liquidity. Our access to deposits and other funding sources in adequate amounts and on acceptable terms is affected by a number of factors, including rates paid by competitors, returns available to customers on alternative investments and general economic conditions. Any decline in available funding could adversely impact our ability to originate loans, invest in securities, meet our expenses, pay dividends to our shareholders, or to fulfill obligations such as repaying our borrowings or meeting deposit withdrawal demands, any of which could have a material adverse impact on our business, financial condition, results of operations and growth prospects.

The Company may be materially and adversely affected by the creditworthiness and liquidity of other financial institutions.

Financial services institutions are interrelated as a result of trading, clearing, counterparty and other relationships. Our Bank has exposure to many different industries and counterparties, and routinely executes transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, and other institutional clients. Many of these transactions expose our Bank to credit risk in the event of a default by a counterparty or client. In addition, our Bank's credit risk may be increased when the collateral to which it is entitled cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of its credit or derivative exposure. Any such losses could have a material adverse effect on our business, financial condition, and results of operations.

We rely on information technology and telecommunications systems and third-party vendors, and our failure to effectively implement new technology or disruption of service could adversely affect our operations and financial condition.

Our industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services. We believe that improved technology allows us to serve our customers in a more efficient and less costly manner. Our ability to compete successfully to some extent depends on whether we can implement new technologies to provide products and services to our customers while avoiding significant operational challenges that increase our costs or delay full implementation of technology enhancements or new products, especially relative to our peers (many of which have greater resources to devote to technological improvements).

Although new technologies enable us to enhance the products and services we offer our customers, this technology exposes us to certain risks. First, the successful and uninterrupted functioning of our information technology and telecommunications systems is critical to our business. We outsource many of our major systems, such as data processing, loan servicing and deposit processing. If one of these third-party service providers terminates their relationship with us or fails to provide services to us for any reason or provides such services poorly, our business will be negatively affected. In addition, we may be forced to replace such vendor, which could interrupt our operations and result in a higher cost to us.

Cyber-attacks or other security breaches could adversely affect our operations, net income or reputation.

As part of our banking business, we collect, use and hold sensitive data concerning individuals and businesses with whom we have a banking relationship. Threats to data security, including unauthorized access and cyber-attacks, rapidly emerge and change, exposing us to additional costs for protection or remediation and competing time constraints to secure our data in accordance with customer expectations and statutory and regulatory requirements. The increasing sophistication of cyber-criminals makes it extremely difficult to keep up with new threats and could result in a breach of our data security. Patching and other measures to protect existing systems and servers could be inadequate, especially on systems that are being retired. Controls employed by our information technology department and third-party vendors could prove inadequate. We could also experience a breach by intentional or negligent conduct on the part of our employees or other internal sources or by merchants using our customers' debit and credit cards, software bugs or other technical malfunctions, or other causes. As a result of any of these threats, our customer accounts could become vulnerable to account takeover schemes or cyber-fraud. Our systems and those of our third-party vendors may become vulnerable to damage or disruption due to circumstances beyond our or their control, such as from catastrophic events, power anomalies or outages, natural disasters, network failures, and viruses and malware.

A breach of our security that results in unauthorized access to our data could expose us to a disruption or challenges relating to our daily operations as well as to data loss, litigation, damages, fines and penalties, customer notification requirements, significant increases in compliance and insurance costs, and reputational damage, any of which could individually or in the aggregate have a material adverse effect on our business, results of operations, financial condition, prospects, and shareholder value.

We have attempted to address these concerns by backing up our systems as well as retaining qualified third-party vendors to test and audit our network. However, there can be no guarantees that our efforts will be successful in avoiding material problems with our information technology and telecommunications systems.

We are subject to environmental liability risk associated with our lending activities.

A significant portion of our loan portfolio is secured by real property. Also, in the ordinary course of business, we may foreclose on and take title to properties securing certain loans or purchase real estate to expand our facilities. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, we may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require us to incur substantial expenses and may materially reduce the affected property's value or limit our ability to use or sell the affected property. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on our business, financial condition, results of operations and growth prospects. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability. Although management has policies and procedures to perform an environmental review before the loan is recorded and before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards.

Risks Related to Our Industry

We operate in a highly regulated environment, which could restrain our growth and profitability.

We are subject to extensive regulation and supervision that governs almost all aspects of our operations, including, among other things, our lending practices, capital structure, investment practices, dividend policy, operations and growth. These laws and regulations, and the supervisory framework that oversees the administration of these laws and regulations, are primarily intended to protect consumers, depositors, the Deposit Insurance Fund and the banking system as a whole, and not shareholders and counterparties. Furthermore, new proposals for legislation continue to be introduced in the U.S. Congress that could further substantially increase regulation of the financial services industry, impose restrictions on our operations and our ability to conduct business consistent with historical practices, including in the areas of compensation, interest rates, financial product offerings and disclosures, and have an effect on bankruptcy proceedings with respect to consumer residential real estate mortgages, among other things.

Our efforts to comply with these additional laws, regulations and standards are likely to result in increased expenses and a diversion of management time and attention. The information under the heading "Supervision and Regulation" in *Item 1, Business*, provides more information regarding the regulatory environment in which we and the Bank operate.

Financial reform legislation enacted by Congress will, among other things, tighten capital standards and result in new laws and regulations that likely will increase our costs of operations.

The Dodd-Frank Act was signed into law on July 21, 2010. This law significantly changed the then-existing bank regulatory structure and affected the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act changes the regulatory structure to which we are subject in numerous ways, including, but not limited to, the following:

- The base for FDIC insurance assessments has been changed to a bank's average consolidated total assets minus average tangible equity, rather than upon its deposit base, while the FDIC's authority to raise insurance premiums has been expanded.
- The current standard deposit insurance limit has been permanently raised to \$250,000.
- The FDIC must raise the ratio of reserves to deposits from 1.15% to 1.35% for deposit insurance purposes by September 30, 2020 and "offset the effect" of increased assessments on insured depository institutions with assets of less than \$10.0 billion.
- The interchange fees payable on debit card transactions have been limited.
- There are multiple new provisions affecting corporate governance and executive compensation at all publicly traded companies.
- All federal prohibitions on the ability of financial institutions to pay interest on commercial demand deposit accounts have been repealed.

Our management continues to assess the impact on our operations of the Dodd-Frank Act and its regulations, many of which have yet to be proposed or adopted or are to be phased-in over the next several months and years. Because the impact of many of the regulations adopted pursuant to the Dodd-Frank Act may not be known for some time, it is difficult to predict at this time the full impact that Dodd-Frank Act will have on us. However, it is expected that at a minimum our operating and compliance costs will increase, and our interest expense could also increase.

In addition to the foregoing, the Dodd-Frank Act established the Bureau of Consumer Financial Protection (the “CFPB”) as an independent entity within the Federal Reserve. The CFPB has broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards, as well as with respect to certain mortgage-related matters, such as steering incentives, determinations as to a borrower’s ability to repay and prepayment penalties.

Federal and state regulators periodically examine our business, and we may be required to remediate adverse examination findings.

The Federal Reserve, the FDIC and the OFI, periodically examine our business, including our compliance with laws and regulations. If, as a result of an examination, a federal banking agency were to determine that our financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of any of our operations had become unsatisfactory, or that we were in violation of any law or regulation, it may take a number of different remedial actions as it deems appropriate. These actions include the power to enjoin “unsafe or unsound” practices, to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in our capital, to restrict our growth, to assess civil monetary penalties against our officers or directors, to remove officers and directors and, if it is concluded that such conditions cannot be corrected or there is an imminent risk of loss to depositors, to terminate our deposit insurance and place us into receivership or conservatorship. If we become subject to any regulatory actions, it could have a material adverse effect on our business, results of operations, financial condition and growth prospects.

We may be required to pay significantly higher FDIC deposit insurance premiums in the future.

The deposits of Investar Bank are insured by the FDIC up to legal limits and, accordingly, subject it to the payment of FDIC deposit insurance assessments. A bank’s regular assessments are determined by its risk classification, which is based on its regulatory capital levels and the level of supervisory concern that it poses. The most recent economic recession, insured depository institution failures, general deterioration in banking and economic conditions, and significantly increased losses of the FDIC resulted in a decline in the designated reserve ratio of the FDIC to historical lows. To restore this reserve ratio and bolster its funding position, the FDIC imposed a special assessment on depository institutions and also increased deposit insurance assessment rates. Further increases in assessment rates are possible in the future, especially if there are additional bank failures. Any increase in deposit insurance assessment rates, or any future special assessment, could materially and adversely affect our business, results of operations, financial condition and growth prospects.

The short-term and long-term impact of the new regulatory capital rules is uncertain.

In July 2013, each of the U.S. federal banking agencies adopted final rules implementing the recommendations of the International Basel Committee on Bank Supervision to strengthen the regulatory capital requirements of all banking organizations in the United States. The new capital framework, referred to as Basel III, replaces the existing regulatory capital rules for all banks, savings associations and U.S. bank holding companies with greater than \$500 million in total assets, and all savings and loan holding companies. The final Basel III rules became effective with respect to the Company and the Bank on January 1, 2015, although the rules will not be fully phased in until January 1, 2019.

The new rules establish a new regulatory capital standard based on Tier 1 common equity, increase the minimum Tier 1 capital risk-based capital ratio, and impose a capital conservation buffer of at least 2.5% of common equity Tier 1 capital above the new minimum regulatory capital ratios, when fully phased in during 2019. Failure to meet the capital conservation buffer will result in certain limitations on dividends, capital repurchases, and discretionary bonus payments to executive officers. The rules also change the manner in which a number of our regulatory capital components are calculated and the risk weights applicable to certain asset categories. Although there remains some uncertainty associated with the implementation and regulatory interpretation of the newly adopted standards, we expect that the new rules will generally require us to maintain greater amounts of regulatory capital. The new rules may also limit or restrict how we utilize our capital. A significant increase in our capital requirements could have a material adverse effect on our business, financial condition, results of operations or prospects.

We are subject to numerous laws designed to protect consumers, including the Community Reinvestment Act and fair lending laws, and failure to comply with these laws could lead to a wide variety of sanctions.

The Community Reinvestment Act, or CRA, the ECOA, the Fair Housing Act and other fair lending laws and regulations impose nondiscriminatory lending requirements on financial institutions. The Department of Justice and other federal agencies enforce these laws and regulations, but private parties may also have the ability to challenge an institution's performance under fair lending laws in private class action litigation. If an institution's performance under the Community Reinvestment Act or fair lending laws and regulations is found to be deficient, the institution could be subject to damages and civil money penalties, injunctive relief, restrictions on mergers and acquisitions activity, restrictions on expansion and restrictions on entering new business lines, among other sanctions. In addition, the FDIC's assessment of our compliance with CRA provisions is taken into account when evaluating any application we submit for, among other things, approval of the acquisition or establishment of a branch or other deposit facility, an office relocation, a merger or the acquisition of another financial institution. Our failure to satisfy our CRA obligations could, at a minimum, result in the denial of such applications and limit our growth.

We face a risk of noncompliance and enforcement action with the Bank Secrecy Act and other anti-money laundering statutes and regulations.

The Bank Secrecy Act, the USA PATRIOT Act of 2001, and other laws and regulations require financial institutions, among other duties, to institute and maintain an effective anti-money laundering program and file suspicious activity and currency transaction reports as appropriate. The federal Financial Crimes Enforcement Network is authorized to impose significant civil money penalties for violations of those requirements and has recently engaged in coordinated enforcement efforts with the individual federal banking regulators, as well as the U.S. Department of Justice, Drug Enforcement Administration and Internal Revenue Service. We are also subject to increased scrutiny of compliance with the rules enforced by the Office of Foreign Assets Control. If our policies, procedures and systems are deemed deficient, we would be subject to liability, including fines and regulatory actions, which may include restrictions on our ability to pay dividends and the necessity to obtain regulatory approvals to proceed with certain aspects of our business plan, including our acquisition plans. Failure to maintain and implement adequate programs to combat money laundering and terrorist financing could also have serious reputational consequences for us. Any of these results could materially and adversely affect our business, financial condition, results of operations and growth prospects.

Risks Related to Changes in Accounting Standards and Tax Laws

Changes in accounting standards are difficult to predict and can materially impact our financial statements.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. From time to time, the Financial Accounting Standards Board or regulatory authorities change the financial accounting and reporting standards that govern the preparation of our financial statements. Such changes are expected to continue and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements. Additionally, significant changes to GAAP may require costly technology changes, additional training and personnel, and other expenses that will negatively impact our results of operations.

Changes in tax laws and regulations and differences in interpretation of tax laws and regulations may adversely impact our financial statements.

From time to time, local, state or federal tax authorities change tax laws and regulations, which may result in a decrease or increase to our net deferred tax assets. Additionally, our net deferred tax assets are measured using enacted tax rates expected to apply to taxable income in the year in which the temporary differences are expected to be recovered or settled. On December 22, 2017, the Tax Cuts and Jobs Act ("TCJA") was enacted by Congress. The enactment of the TCJA required us to revalue and reassess our net deferred tax assets reflecting the new federal income tax rate. As a result, in December 2017 we recognized a write-down of \$0.3 million in our net deferred tax assets, with a corresponding increase to income tax expense. The majority of the provisions of the TCJA will take effect on January 1, 2018. The provisions that impact the Company include the reduction of the corporate income tax rate from 35% to 21%, changes to the deductibility of certain meals and entertainment expenses, and changes to the deductibility of executive compensation. The TCJA also accelerates expensing of certain depreciable property for assets placed in service after September 27, 2017 and before January 1, 2023.

Local, state or federal tax authorities may interpret tax laws and regulations differently than we do and challenge tax positions that we have taken on tax returns. This may result in differences in the treatment of revenues, deductions, credits and/or differences in the timing of these items. The differences in treatment may result in payment of additional taxes, interest, penalties, or litigation costs that could have a material adverse effect on our results.

Risks Related to an Investment in our Common Stock

The market price of our common stock may be volatile, which may make it difficult for investors to sell their shares at the volume, prices and times desired.

The market price of our common stock may fluctuate substantially due to a variety of factors, many of which are beyond our control, including, without limitation:

- actual or anticipated variations in our quarterly and annual operating results, financial condition or asset quality;
- changes in general economic or business conditions, both domestically and internationally;
- the effects of, and changes in, trade, monetary and fiscal policies, including the interest rate policies of the Federal Reserve, or in laws and regulations affecting us;
- the number of securities analysts covering us;
- publication of research reports about us, our competitors, or the financial services industry generally, or changes in, or failure to meet, securities analysts' estimates of our financial and operating performance, or lack of research reports by industry analysts or ceasing of coverage;
- changes in market valuations or earnings of companies that investors deemed comparable to us;
- the average daily trading volume of our common stock;
- future issuances of our common stock or other securities;
- additions or departures of key personnel;
- perceptions in the marketplace regarding our competitors and/or us;
- significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving our competitors or us; and
- other news, announcements or disclosures (whether by us or others) related to us, our competitors, our core market or the financial services industry.

The stock market and, in particular, the market for financial institution stocks have experienced significant fluctuations in recent years. In many cases, these changes have been unrelated to the operating performance and prospects of particular companies. In addition, significant fluctuations in the trading volume in our common stock may cause significant price variations to occur. Increased market volatility may materially and adversely affect the market price of our common stock, which may make it difficult for investors to sell their shares at the volume, prices and times desired.

We are an “emerging growth company,” and the reduced reporting requirements applicable to emerging growth companies may make our common stock less attractive to investors.

We are an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act. While we retain this status, we intend to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not emerging growth companies, including reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved. We will continue to be an emerging growth company until the earliest to occur of the following: (1) December 31, 2019; (2) the last day of the fiscal year in which we have more than \$1.0 billion in annual revenues; (3) the date on which we have more than \$700 million in market value of our common stock held by non-affiliates; or (4) the date on which we have issued more than \$1.0 billion in non-convertible debt over a three-year period. We cannot predict if investors will find our common stock less attractive because we may rely on these exemptions, or if we choose to rely on additional exemptions in the future. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile.

Shares eligible for future sale could adversely affect market prices of our common stock.

Shares of our common stock eligible for future sale, including those that may be issued in any private or public offering of our common stock, as consideration in acquisition transactions, or as incentives under incentive plans, could adversely affect market prices for our common stock. As of December 31, 2017, we had 9,514,926 shares outstanding, 322,917 shares subject to options granted under our incentive plan, and warrants outstanding to purchase 64,425 shares of our common stock. Because our outstanding shares of common stock either were issued in an offering registered under the Securities Act of 1933, as amended (the “Securities Act”) or have been held for more than one year, such shares are freely tradable, except for shares held by our affiliates (approximately 8% of shares outstanding as of December 31, 2017) and 112,688 shares that represent unvested restricted shares under our incentive plan. Shares issued under our incentive plan will be available for sale into the public market, except for shares held by our affiliates. Shares held by our affiliates may be resold subject to the restrictions in Rule 144 of the Securities Act. In the future, we may issue additional shares of common stock to raise capital for growth or as consideration in acquisition transactions or for other purposes, and such shares may be registered under the Securities Act and freely tradable.

Our dividend policy may change without notice, and our future ability to pay dividends is subject to restrictions.

Holders of our common stock are entitled to receive only such cash dividends as our board of directors may declare out of funds legally available for the payment of dividends. We have no obligation to continue paying dividends, and we may change our dividend policy at any time without notice to our shareholders.

Since the Company’s primary asset is its stock of Investar Bank, we are dependent upon dividends from the Bank to pay our operating expenses, satisfy our obligations and to pay dividends on the Company’s common stock. Accordingly, any declaration and payment of dividends on common stock will substantially depend upon the Bank’s earnings and financial condition, liquidity and capital requirements, the general economic and regulatory climate and other factors deemed relevant by our board of directors. Furthermore, consistent with our strategic plans, growth initiatives, capital availability, projected liquidity needs, and other factors, we have made, and will continue to make, capital management decisions and policies that could adversely impact the amount of dividends, if any, paid to our common shareholders.

In addition, there are numerous laws and banking regulations that limit our and Investar Bank’s ability to pay dividends. For Investar Bank, federal and state statutes and regulations require, among other things, that the Bank maintain certain levels of capital in order to pay a dividend. Further, state and federal banking authorities have the ability to restrict the payment of dividends by supervisory action. At the holding company level, the Federal Reserve Board has indicated that bank holding companies should carefully review their dividend policy in relation to the organization’s overall asset quality, level of current and prospective earnings and level, composition and quality of capital. The guidance requires that a company inform and consult with the Federal Reserve Board prior to declaring and paying a dividend that exceeds earnings for the period for which the dividend is being paid or that could result in an adverse change to its capital structure.

Our Restated Articles of Incorporation and By-laws, and certain banking laws applicable to us, could have an anti-takeover effect that decreases our chances of being acquired, even if our acquisition is in our shareholders’ best interests.

Certain provisions of our restated articles of incorporation and our by-laws, as amended, and federal banking laws, including regulatory approval requirements, could make it more difficult for a third party to acquire control of our organization or conduct a proxy contest, even if those events were perceived by many of our shareholders as beneficial to their interests. These provisions, and the corporate and banking laws and regulations applicable to us:

- enable our board of directors to issue additional shares of authorized, but unissued capital stock. In particular, our board may issue “blank check” preferred stock with such designations, rights and preferences as may be determined from time to time by the board;
- enable our board of directors to increase the size of the board and fill the vacancies created by the increase;
- enable our board of directors to amend our by-laws without shareholder approval;
- require advance notice for director nominations and other shareholder proposals; and
- require prior regulatory application and approval of any transaction involving control of our organization.

These provisions may discourage potential acquisition proposals and could delay or prevent a change in control, including circumstances in which our shareholders might otherwise receive a premium over the market price of our shares.

Our issuance of preferred stock could adversely affect holders of our common stock and discourage a takeover.

Our shareholders authorized our board of directors to issue up to 5,000,000 shares of preferred stock without any further action on the part of our shareholders. The board also has the power, without shareholder approval, to set the terms of any series of preferred stock that may be issued, including voting rights, dividend rights, preferences over our common stock with respect to dividends or in the event of a dissolution, liquidation or winding up and other terms. In the event that we issue preferred stock in the future that has preference over our common stock with respect to payment of dividends or upon our liquidation, dissolution or winding up, or if we issue preferred stock with voting rights that dilute the voting power of our common stock, the rights of the holders of our common stock or the market price of our common stock could be adversely affected. In addition, the ability of our board of directors to issue shares of preferred stock without any action on the part of our shareholders may impede a takeover of us and prevent a transaction perceived to be favorable to our shareholders.

Holders of the junior subordinated debentures have rights that are senior to those of our common shareholders.

In connection with the acquisitions of FCB and BOJ, we assumed junior subordinated debentures issued by FCB and BOJ and the obligations of related trust preferred securities issued by trusts established by FCB and BOJ. At December 31, 2017, we had trust preferred securities and accompanying junior subordinated debentures with a carrying value of \$5.8 million. Payments of the principal and interest on the trust preferred securities of these trusts are conditionally guaranteed by us. Further, the junior subordinated debentures we issued to the trusts are senior to our shares of common stock. As a result, we must make payments on the junior subordinated debentures before any dividends can be paid on our common stock and, in the event of our bankruptcy, dissolution or liquidation, the holders of the junior subordinated debentures must be satisfied before any distributions can be made on our common stock. We have the right to defer distributions on our junior subordinated debentures (and the related trust preferred securities) for up to five years, during which time no dividends may be paid on our common stock.

An investment in our common stock is not an insured deposit and is subject to risk of loss.

Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any deposit insurance fund or by any other public or private entity. Investment in our common stock is inherently risky for the reasons described in this “Risk Factors” section and elsewhere in this Annual Report on Form 10-K and is subject to the same market forces that affect the price of common stock in any company. As a result, an investor may lose some or all of his or her investment in our common stock.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

Our main office is located at 7244 Perkins Road in Baton Rouge, Louisiana, in an approximately 4,900 square foot building built in May 2008. In addition to our main office, we operate 19 branch offices located in Ascension (2), East Baton Rouge (4), Jefferson (2), Lafayette (1), Livingston (1), St. Tammany (1), Tangipahoa (1) West Baton Rouge (1), East Feliciana (2), West Feliciana (1) and Evangeline (3) Parishes, Louisiana, as well as a separate executive and operations center and a loan production office in Baton Rouge. We also have five stand-alone automated teller machines in Baton Rouge.

We own our main office, all of our branch offices, and our executive and operations center, and we lease our loan production office. Each branch facility is a stand-alone building, equipped with an automatic teller machine and on-site parking as well as providing for drive-up access. We believe that our facilities are in good condition and are adequate to meet our operating needs for the foreseeable future.

We also own one tract of land in St. Mary Parish, one in Calcasieu Parish, one in Lafayette Parish, and one in East Baton Rouge Parish, each of which has been designated as a future branch location, although the timing of the development of these tracts is uncertain.

Item 3. Legal Proceedings

From time to time we are party to ordinary routine litigation matters incidental to the conduct of our business. We are not presently party to, and none of our property is the subject of, any legal proceedings, the resolution of which we believe would have a material adverse effect on our business, financial condition, results of operations, cash flows, growth prospects or capital levels, nor were any such proceedings terminated during the fourth quarter of 2017.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Market Prices

Our common stock is listed on the Nasdaq Global Market (the “Nasdaq”) under the symbol “ISTR.” As of March 13, 2018, there were approximately 875 holders of record of our common stock, and the closing sales price of our common stock on that date was \$25.35.

The following tables set forth the reported high and low intra-day sales prices for the Company’s common stock as reported by Nasdaq for the periods indicated.

<u>2017</u>		<u>High</u>		<u>Low</u>
4th quarter	\$	24.60	\$	20.35
3rd quarter		24.15		20.25
2nd quarter		23.75		21.28
1st quarter		22.50		18.31
<u>2016</u>				
4th quarter	\$	19.70	\$	15.40
3rd quarter		16.47		15.00
2nd quarter		16.48		14.61
1st quarter		17.63		13.63

Dividends

The following table sets forth the amounts of dividends declared on the Company’s common stock during each quarterly period for the years ended December 31, 2017 and 2016.

<u>2017</u>		<u>Amount Per Share</u>
4th quarter	\$	0.0315
3rd quarter		0.0300
2nd quarter		0.0220
1st quarter		0.0200
<u>2016</u>		
4th quarter	\$	0.0121
3rd quarter		0.0110
2nd quarter		0.0100
1st quarter		0.0090

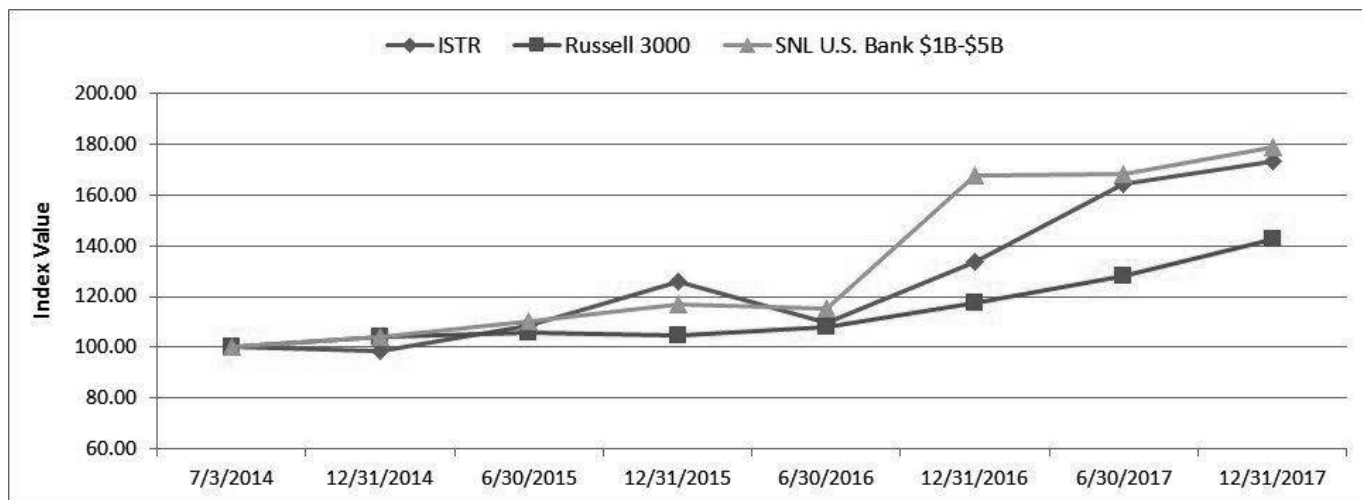

Dividend Policy

The Company intends to declare dividends on a quarterly basis. Since we are a holding company with no material business activities, our ability to pay dividends is substantially dependent upon the ability of Investar Bank to transfer funds to us in the form of dividends, loans and advances. The Bank’s ability to pay dividends and make other distributions and payments to us depends upon the Bank’s earnings, financial condition, general economic conditions, compliance with regulatory requirements and other factors. In addition, the Bank’s ability to pay dividends to us is itself subject to various legal, regulatory and other restrictions. See “Supervision and Regulation—Dividends” in *Item 1, Business*, above for a discussion of the restrictions on dividends under federal banking laws and regulations. In addition, as a Louisiana corporation, we are subject to certain restrictions on dividends under the Louisiana Business Corporation Act. Generally, a Louisiana corporation may pay dividends to its shareholders unless, after giving effect to the dividend, either (1) the corporation would not be able to pay its debts as they come due in the usual course of business or (2) the corporations’ total assets are less than the sum of its total liabilities and the amount that would be needed, if the corporation were to be dissolved at the time of the payment of the dividend, to satisfy the preferential rights of shareholders whose preferential rights are superior to those receiving the dividend. Finally, our ability to pay dividends may be limited on account of the junior subordinated debentures that we assumed in the FCB and BOJ acquisitions. We must make payments on the junior subordinated debentures before any dividends can be paid on our common stock.

These restrictions do not, and are not expected in the future to, materially limit the Company's ability to pay dividends to its shareholders in an amount consistent with the Company's history of paying dividends.

Stock Performance Graph

The following graph compares the cumulative total shareholder return on the Company's common stock over a measurement period beginning July 3, 2014 with (i) the cumulative total return on the stocks included in the Russell 3000 Index and (ii) the cumulative total return on the stocks included in the SNL Index of Banks with assets between \$1 billion and \$5 billion. The performance graph assumes that the value of the investment in our common stock, the Russell 3000 Index and the SNL Index of Banks was \$100 at July 3, 2014, the date our common stock began publicly trading on the Nasdaq, and that all dividends were reinvested.

Index	7/3/2014	12/31/2014	6/30/2015	12/31/2015
Investar Holding Corporation	\$ 100.00	\$ 98.68	\$ 108.40	\$ 125.64
Russell 3000	100.00	103.97	105.99	104.47
SNL U.S. Bank \$1B-\$5B	100.00	104.25	110.32	116.70
Index	6/30/2016	12/31/2016	6/30/2017	12/31/2017
Investar Holding Corporation	\$ 109.93	\$ 133.49	\$ 164.21	\$ 173.03
Russell 3000	108.25	117.77	128.29	142.66
SNL U.S. Bank \$1B-\$5B	115.19	167.89	168.23	178.99

There can be no assurance that our common stock performance will continue in the future with the same or similar trends depicted in the performance graph above. We will not make or endorse any predictions as to future stock performance.

The information provided under the heading "Stock Performance Graph" shall not be deemed to be "soliciting material" or to be "filed" with the SEC or subject to its proxy regulations or to the liabilities of Section 18 of the Securities Exchange Act of 1934, as amended, other than as provided in Item 201 of Regulation S-K. The information provided in this section shall not be deemed to be incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended.

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares (or Units) Purchased ⁽¹⁾	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Be Purchased Under the Plans or Programs ⁽²⁾
October 1, 2017 to October 31, 2017	96	\$ 24.10	—	229,187
November 1, 2017 to November 30, 2017	10,463	23.08	10,463	218,724

- (1) Includes 117 shares surrendered to cover the payroll taxes due upon the vesting of restricted stock.
- (2) On February 19, 2015, the Company announced that its board of directors authorized the repurchase of up to 250,000 shares of the Company's common stock in open market transactions from time to time or through privately negotiated transactions in accordance with federal securities laws. In addition, on October 19, 2016, the Company announced that its board of directors authorized the repurchase of an additional 250,000 shares of the Company's common stock under its stock repurchase plan.

Unregistered Sales of Equity Securities

None.

Securities Authorized for Issuance under Equity Compensation Plans

Please refer to the information under the heading "Securities Authorized for Issuance under Equity Compensation Plans" in *Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*, for a discussion of the securities authorized for issuance under the Company's equity compensation plans.

Item 6. Selected Financial Data

The following table sets forth selected historical financial information and other data as of and for the years ended December 31, 2017, 2016, 2015, 2014, and 2013. The selected financial data is derived from our audited historical consolidated financial statements. The information below should be read in conjunction with other information contained in this report, including the information contained in *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*, and the consolidated financial statements and related notes in *Item 8, Financial Statements and Supplementary Data*. Our historical results for any prior period are not necessarily indicative of results to be expected in any future period.

(1) Selected consolidated financial data includes the effect of mergers from the date of each merger. On May 1, 2013, the Bank acquired FCB, a Louisiana state bank, by merger of FCB with and into the Bank. On July 1, 2017, the Company acquired Citizens Bancshares, Inc. and its wholly-owned subsidiary, Citizens Bank, by merger with and into the Company and Bank, respectively. On December 1, 2017, the Company acquired BOJ Bancshares, Inc. and its wholly-owned subsidiary, The Highlands Bank, by merger with and into the Company and Bank, respectively. References in this document to assets purchased and liabilities assumed in acquisition transactions reflect the fair value of such assets and liabilities on the date of acquisition, unless the context indicates otherwise.

(2) Tangible book value per common share is a non-GAAP financial measure. Tangible book value per common share is calculated as total stockholders' equity less goodwill and other intangible assets, divided by the number of common shares outstanding as of the balance sheet date. We believe that the most directly comparable GAAP financial measure is book value per share. For more information regarding our use of non-GAAP financial measures, including a reconciliation of tangible book value per common share to book value per share, please refer to the information under the heading "Non-GAAP Financial Measures" in *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*.

(3) Efficiency ratio represents noninterest expenses divided by the sum of net interest income (before provision for loan losses) and noninterest income. For more information regarding our use of non-GAAP financial measures, including our calculation of the efficiency ratio, please refer to the information under the heading "Non-GAAP Financial Measures" in *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*.

(4) Beginning January 1, 2015, the capital ratios are calculated using the Basel III framework. Capital ratios for prior periods were calculated using the Basel I framework. The Common Equity Tier 1 capital ratio is a new ratio introduced under the Basel III framework. Please refer to the discussion of Basel III framework under the heading "Regulatory Capital Requirements" in *Item 1, Business*.

(5) Tangible equity to tangible assets is a non-GAAP financial measure. Tangible equity is calculated as total stockholders' equity less goodwill and other intangible assets, and tangible assets is calculated as total assets less goodwill and other intangible assets. We believe that the most directly comparable GAAP financial measure is total equity to total assets. For more information regarding our use of non-GAAP financial measures, including a reconciliation of the ratio of tangible equity to tangible assets to the ratio of total equity to total assets, please refer to the information under the heading "Non-GAAP Financial Measures" in *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

This section presents management’s perspective on the financial condition and results of operations of Investar Holding Corporation (the “Company,” “we,” “our,” or “us”) and its wholly-owned subsidiary, Investar Bank (the “Bank”). The following discussion and analysis should be read in conjunction with the Company’s consolidated financial statements and related notes and other supplemental information included herein. Certain risks, uncertainties and other factors, including those set forth under *Item 1A, Risk Factors* in Part I, and elsewhere in this Annual Report on Form 10-K, may cause actual results to differ materially from those projected results discussed in the forward-looking statement appearing in this discussion and analysis.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K, both in Management’s Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere, contains forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). These forward-looking statements include statements relating to our projected growth, anticipated future financial performance, financial condition, credit quality and performance goals, as well as statements relating to the anticipated effects on our business, financial condition and results of operations from expected developments, our growth, and potential acquisitions. These statements can typically be identified through the use of words or phrases such as “may,” “should,” “could,” “predict,” “potential,” “believe,” “think,” “will likely result,” “expect,” “continue,” “will,” “anticipate,” “seek,” “estimate,” “intend,” “plan,” “projection,” “would” and “outlook,” or the negative version of those words or other comparable words or phrases of a future or forward-looking nature.

Our forward-looking statements contained herein are based on assumptions and estimates that management believes to be reasonable in light of the information available at this time. However, many of these statements are inherently uncertain and beyond our control and could be affected by many factors. Factors that could have a material effect on our business, financial condition, results of operations, cash flows and future growth prospects can be found in *Item 1A, Risk Factors*. These factors include, but are not limited to, the following, any one or more of which could materially affect the outcome of future events:

- business and economic conditions generally and in the financial services industry in particular, whether nationally, regionally or in the markets in which we operate;
- our ability to achieve organic loan and deposit growth, and the composition of that growth;
- changes (or the lack of changes) in interest rates, yield curves and interest rate spread relationships that affect our loan and deposit pricing;
- the extent of continuing client demand for the high level of personalized service that is a key element of our banking approach as well as our ability to execute our strategy generally;
- our dependence on our management team and our ability to attract and retain qualified personnel;
- changes in the quality or composition of our loan or investment portfolios, including adverse developments in borrower industries or in the repayment ability of individual borrowers;
- inaccuracy of the assumptions and estimates we make in establishing reserves for probable loan losses and other estimates;
- the concentration of our business within our geographic areas of operation in Louisiana;
- concentration of credit exposure;
- deteriorating asset quality and higher loan charge-offs, and the time and effort necessary to resolve problem assets;
- a lack of liquidity, including as a result of a reduction in the amount of deposits we hold or other sources of liquidity;
- our potential growth, including our entrance or expansion into new markets, and the need for sufficient capital to support that growth;
- difficulties in identifying attractive acquisition opportunities and strategic partners that will complement our relationship banking approach;
- our ability to efficiently integrate acquisitions into our operations, retain the customers of acquired businesses and grow the acquired operations;
- the impact of litigation and other legal proceedings to which we become subject;
- data processing system failures and errors;
- cyber attacks and other security breaches;

- competitive pressures in the consumer finance, commercial finance, retail banking, mortgage lending and auto lending industries, as well as the financial resources of, and products offered by, competitors;
- the impact of changes in laws and regulations applicable to us, including banking, securities and tax laws and regulations and accounting standards, as well as changes in the interpretation of such laws and regulations by our regulators;
- changes in the scope and costs of FDIC insurance and other coverages;
- governmental monetary and fiscal policies;
- hurricanes, floods, other natural disasters and adverse weather; oil spills and other man-made disasters; acts of terrorism, an outbreak of hostilities or other international or domestic calamities, acts of God and other matters beyond our control; and
- other circumstances, many of which are beyond our control.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included herein. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Accordingly, you should not place undue reliance on any such forward-looking statements.

Any forward-looking statement speaks only as of the date on which it is made, and we do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New factors emerge from time to time, and it is not possible for us to predict which will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We qualify all of our forward-looking statements by these cautionary statements.

Overview

Through our wholly-owned subsidiary Investar Bank, we provide full banking services, excluding trust services, tailored primarily to meet the needs of individuals and small to medium-sized businesses in our primary areas of operation in South Louisiana: Baton Rouge, New Orleans, Lafayette, Hammond and their surrounding metropolitan areas. Our Bank commenced operations in 2006 and we completed our initial public offering in July 2014. Our strategy includes organic growth through high quality loans and growth through acquisitions. We currently operate 20 full service branches. We completed acquisitions in 2011, 2013, and 2017 and regularly review acquisition opportunities.

Our principal business is lending to and accepting deposits from individuals and small to medium-sized businesses in our areas of operation. We generate our income principally from interest on loans and, to a lesser extent, our securities investments, as well as from fees charged in connection with our various loan and deposit services and gains on the sale of loans and securities. Our principal expenses are interest expense on interest-bearing customer deposits and borrowings, salaries, employee benefits, occupancy costs, data processing and operating expenses. We measure our performance through our net interest margin, return on average assets, and return on average equity, among other metrics, while seeking to maintain appropriate regulatory leverage and risk-based capital ratios.

During the first quarter of 2017, we completed both a common stock offering and a subordinated debt issuance. The common stock offering generated net proceeds of \$32.5 million through the issuance of 1.6 million common shares at a price of \$21.25 per share. The proceeds from the common stock offering were raised for general corporate purposes and potential strategic acquisitions. We also issued and sold \$18.6 million in fixed-to-floating rate subordinated notes due in 2027. We used the net proceeds from the debt issuance to fund a portion of the acquisition of Citizens, discussed below in *Acquisitions*.

On December 22, 2017, the Tax Cuts and Jobs Act (“TCJA”) was signed into law. The TCJA makes broad and complex changes to the U.S. tax code that affected the Company’s income tax rate in 2017, including requiring the revaluation of the Company’s deferred tax assets and liabilities as of December 31, 2017 as a result of the lower corporate tax rates to be realized beginning January 1, 2018. The TCJA reduces the U.S. federal corporate income tax rate from 35% to 21% and establishes new tax laws that will affect 2018.

ASC 740, Income Taxes, requires a company to record the effects of a tax law change in the period of enactment; however, shortly after the enactment of the TCJA, the SEC staff issued SAB 118, which allows a company to record a provisional amount when it does not have the necessary information available, prepared, or analyzed in reasonable detail to complete its accounting for the change in the tax law. The measurement period ends when the company has obtained, prepared and analyzed the information necessary to finalize its accounting, but cannot extend beyond one year. The Company has recorded a revaluation of its deferred tax assets and liabilities based on the information currently available to management, resulting in a \$0.3 million charge to income tax expense in the year ended December 31, 2017. The Company's final analysis and write-down will be based on a number of factors, including completion of the Company's 2017 consolidated tax return.

Non-GAAP Financial Measures

Our accounting and reporting policies conform to accounting principles generally accepted in the United States, or GAAP, and the prevailing practices in the banking industry. However, we also evaluate our performance based on certain additional metrics. The efficiency ratio, tangible book value per share and the ratio of tangible equity to tangible assets are not financial measures recognized under GAAP and, therefore, are considered non-GAAP financial measures.

Our management, banking regulators, many financial analysts and other investors use these non-GAAP financial measures to compare the capital adequacy of banking organizations with significant amounts of preferred equity and/or goodwill or other intangible assets, which typically stem from the use of the purchase accounting method of accounting for mergers and acquisitions. Tangible equity, tangible assets, tangible book value per share or related measures should not be considered in isolation or as a substitute for total stockholders' equity, total assets, book value per share or any other measure calculated in accordance with GAAP. Moreover, the manner in which we calculate tangible equity, tangible assets, tangible book value per share and any other related measures may differ from that of other companies reporting measures with similar names. The following table reconciles, as of the dates set forth below, stockholders' equity (on a GAAP basis) to tangible equity and total assets (on a GAAP basis) to tangible assets and calculates both our tangible book value per share and efficiency ratio (dollars in thousands).

	As of and for the year ended December 31,				
	2017	2016	2015	2014	2013
Total stockholders' equity - GAAP	\$ 172,729	\$ 112,757	\$ 109,350	\$ 103,384	\$ 55,483
Adjustments:

Efficiency ratio	69.80%	66.25%	68.72%	74.90%	78.07%

(1) Calculated as noninterest expense divided by the sum of net interest income (before provision for loan losses) and noninterest income.

Critical Accounting Policies

The preparation of our consolidated financial statements in accordance with GAAP requires us to make estimates and judgments that affect our reported amounts of assets, liabilities, income and expenses and related disclosure of contingent assets and liabilities. Wherever feasible, we utilize third-party information to provide management with these estimates. Although independent third parties are engaged to assist us in the estimation process, management evaluates the results, challenges assumptions used and considers other factors which could impact these estimates. Actual results may differ from these estimates under different assumptions or conditions.

For more detailed information about our accounting policies, please refer to Note 1, Summary of Significant Accounting Policies, in the Notes to Consolidated Financial Statements contained in *Item 8, Financial Statements and Supplementary Data*. The following discussion presents an overview of some of our accounting policies and estimates that require us to make difficult, subjective or complex judgments about inherently uncertain matters when preparing our financial statements. We believe that the judgments, estimates and assumptions that we use in the preparation of our consolidated financial statements are appropriate.

Allowance for Loan Losses. One of the accounting policies most important to the presentation of our financial statements relates to the allowance for loan losses and the related provision for loan losses. The allowance for loan losses is established as losses are estimated through a provision for loan losses charged to earnings. The allowance for loan losses is based on the amount that management believes will be adequate to absorb probable losses inherent in the loan portfolio based on, among other things, evaluations of the collectability of loans and prior loan loss experience. The evaluations take into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans and current economic conditions that may affect borrowers' ability to pay. Another component of the allowance is losses on loans assessed as impaired under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 310, *Receivables* ("ASC 310"). The balance of the loans determined to be impaired under ASC 310 and the related allowance is included in management's estimation and analysis of the allowance for loan losses. Allowances for impaired loans are generally determined based on collateral values or the present value of estimated cash flows.

The determination of the appropriate level of the allowance is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. We have an established methodology to determine the adequacy of the allowance for loan losses that assesses the risks and losses inherent in our portfolio and portfolio segments. We have an internally developed model that requires significant judgment to determine the estimation method that fits the credit risk characteristics of the loans in our portfolio and portfolio segments. Qualitative and environmental factors that may not be directly reflected in quantitative estimates include: asset quality trends, changes in loan concentrations, new products and process changes, changes and pressures from competition, changes in lending policies and underwriting practices, trends in the nature and volume of the loan portfolio, and national and regional economic trends. Changes in these factors are considered in determining changes in the allowance for loan losses. The impact of these factors on our qualitative assessment of the allowance for loan losses can change from period to period based on management's assessment of the extent to which these factors are already reflected in historic loss rates. The uncertainty inherent in the estimation process is also considered in evaluating the allowance for loan losses.

Acquisition Accounting. We account for our acquisitions under ASC Topic 805, *Business Combinations* ("ASC 805"), which requires the use of the purchase method of accounting. All identifiable assets acquired, including loans, are recorded at fair value (which is discussed below). The excess purchase price over the fair value of net assets acquired is recorded as goodwill. If the fair value of the net assets acquired exceeds the purchase price, a bargain purchase gain is recognized.

Because the fair value measurements incorporate assumptions regarding credit risk, no allowance for loan losses related to the acquired loans is recorded on the acquisition date. The fair value measurements of acquired loans are based on estimates related to expected prepayments and the amount and timing of undiscounted expected principal, interest and other cash flows. The fair value adjustment is amortized over the life of the loan using the effective interest method.

The Company accounts for acquired impaired loans under ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("ASC 310-30"). An acquired loan is considered impaired when there is evidence of credit deterioration since origination and it is probable at the date of acquisition that we will be unable to collect all contractually required payments. ASC 310-30 prohibits the carryover of an allowance for loan losses for acquired impaired loans. Over the life of the acquired loans, we continually estimate the cash flows expected to be collected on individual loans or on pools of loans sharing common risk characteristics. As of the end of each fiscal quarter, we evaluate the present value of the acquired loans using the effective interest rates. For any increases in cash flows expected to be collected, we adjust the amount of accretable yield recognized on a prospective basis over the loan's or pool's remaining life, while we recognize a provision for loan loss in the consolidated statement of operations if the cash flows expected to be collected have decreased.

Intangible Assets. Our intangible assets consist of goodwill, core deposit intangibles, and a trademark intangible. Goodwill represents the excess of the purchase price over the fair value of the net identifiable assets acquired in a business combination. Goodwill and other intangible assets deemed to have an indefinite useful life are not amortized but instead are subject to review for impairment annually, or more frequently if deemed necessary, in accordance with ASC Topic 350, *Intangibles – Goodwill and Other*. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives and reviewed for impairment in accordance with ASC Topic 360, *Property, Plant, and Equipment*. If impaired, the asset is written down to its estimated fair value. Core deposit intangibles representing the value of the acquired core deposit base are generally recorded in connection with business combinations involving banks and branch locations. Our policy is to amortize core deposit intangibles over the estimated useful life of the deposit base, either on a straight line basis not exceeding 15 years or an accelerated basis over 10 years. The remaining useful lives of core deposit intangibles are evaluated periodically to determine whether events and circumstances warrant revision of the remaining period of amortization.

Fair Value Measurement. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, using assumptions market participants would use when pricing an asset or liability. Fair value is best determined based upon quoted market prices. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows, and the fair value estimates may not be realized in an immediate settlement of the instruments. Accordingly, the aggregate fair value amounts presented do not necessarily represent our underlying value.

The definition of fair value focuses on exit price in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

In accordance with fair value guidance, we group our financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

- *Level 1* – Valuation is based on quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 assets and liabilities generally include debt and equity securities that are traded in an active exchange market. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.
- *Level 2*—Valuation is based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The valuation may be based on quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.
- *Level 3*—Valuation is based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which determination of fair value requires significant management judgment or estimation.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Other-Than-Temporary-Impairment on Investment Securities. On a quarterly basis, we evaluate our investment portfolio for other-than-temporary-impairment (“OTTI”) in accordance with ASC Topic 320, *Investments – Debt and Equity Securities*. An investment security is considered impaired if the fair value of the security is less than its cost or amortized cost basis. When impairment of an equity security is considered to be other-than-temporary, the security is written down to its fair value and an impairment loss is recorded in earnings. When impairment of a debt security is considered to be other-than-temporary, the security is written down to its fair value. The amount of OTTI recorded as a loss in earnings depends on whether we intend to sell the debt security and whether it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis. If we intend to sell the debt security or more likely than not will be required to sell the security before recovery of its amortized cost basis, the entire difference between the security's amortized cost basis and its fair value is recorded as an impairment loss in earnings. If we do not intend to sell the debt security and it is not more likely than not that we will be required to sell the security before recovery of its amortized cost basis, OTTI is separated into the amount representing credit loss and the amount related to all other market factors. The amount related to credit loss is recognized in earnings. The amount related to other market factors is recognized in other comprehensive income, net of applicable taxes.

Stock-Based Compensation. We recognize compensation expense for all stock-based payments to employees in accordance with ASC Topic 718, *Compensation – Stock Compensation*. Under this accounting guidance, such payments are measured at fair value. Determining the fair value of, and ultimately the expense we recognize related to, our stock-based payments, particularly stock options, requires us to make assumptions regarding dividend yields, expected stock price volatility, and the expected life of the option. Changes in these assumptions and estimates can materially affect the calculated fair value of stock-based compensation and the related expense to be recognized.

Income Taxes. Accrued taxes represent the estimated amount payable to or receivable from taxing jurisdictions, either currently or in the future, and are reported in our consolidated statement of operations after exclusion of non-taxable income such as interest on state and municipal securities. Also, certain items of income and expenses are recognized in different time periods for financial statement purposes than for income tax purposes. Thus, provisions for deferred taxes are recorded in recognition of such temporary differences. The calculation of our income tax expense is complex and requires the use of many estimates and judgments in its determination.

Deferred taxes are determined utilizing a liability method whereby we recognize deferred tax assets for deductible temporary differences and deferred tax liabilities for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. We adjust deferred tax assets and liabilities for the effects of changes in tax laws and rates on the date of enactment.

The Company has adopted accounting guidance related to accounting for uncertainty in income taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions. We recognize deferred tax assets if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term “more likely than not” means a likelihood of more than 50%. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management’s judgment. Deferred tax assets are reduced by a valuation allowance when, if based on the weight of evidence available, it is more likely than not that some portion or all of deferred tax asset will not be realized.

We recognize interest and penalties on income taxes as a component of income tax expense.

Implications of and Elections under the JOBS Act. Pursuant to the JOBS Act, an emerging growth company such as the Company can choose to not adopt new or revised accounting standards that may be issued by the FASB until they would apply to private companies. We have elected not to opt in to such extended transition period, which election is irrevocable. As a result of this election, our financial statements may not be comparable to the financial statements of emerging growth companies that have opted in to this extended transition period, but they will be comparable to those of other public companies that are neither emerging growth companies nor emerging growth companies that have opted in to using the extended transition period. In addition, we have elected to take advantage of the reduced disclosure requirements relating to executive compensation arrangements that is available to us so long as we remain an emerging growth company.

Overview of Financial Condition and Results of Operations

Net income for the year ended December 31, 2017 totaled \$8.2 million, or \$0.96 per diluted share, compared to \$7.9 million, or \$1.10 per diluted share, for the year ended December 31, 2016. This represents a \$0.3 million, or a 4%, increase in net income. The increase can mainly be attributed to the Company’s year over year interest-earning asset growth, both organically and through acquisition.

Key components of the Company’s performance during the year ended December 31, 2017 are summarized below.

- Total assets grew to \$1.6 billion at December 31, 2017, an increase of 40% from \$1.2 billion at December 31, 2016.
- Total loans, excluding loans held for sale, net of allowance for loan losses at December 31, 2017 were \$1.3 billion, an increase of \$364.5 million, or 41% compared to \$886.4 million at December 31, 2016.
- Total deposits were \$1.2 billion at December 31, 2017, an increase of \$317.5 million, or 35%, compared to deposits of \$907.8 million at December 31, 2016. Noninterest-bearing deposits increased \$108.2 million, or 100%, to \$216.6 million compared to \$108.4 million at December 31, 2016.
- Net interest income for the year ended December 31, 2017 was \$42.5 million, an increase of \$7.8 million, or 22%, compared to \$34.7 million for the year ended December 31, 2016. This increase was mainly driven by growth in interest-earning assets with an increase in interest income of \$8.2 million and \$2.0 million due to an increase in volume and rate, respectively, compared to the year ended December 31, 2016. The increase in interest income was partially offset by an increase in interest-bearing liabilities resulting in an increase in interest expense of \$1.2 million and \$1.2 million due to an increase in volume and rate, respectively, compared to the year ended December 31, 2016.
- Two de novo branches, one in each of the Baton Rouge and New Orleans markets, opened at the end of the second quarter of 2017, creating additional banking opportunities for our existing and potential customers.

- The Company completed both a common stock offering and a subordinated debt issuance during the year ended December 31, 2017. The common stock offering generated net proceeds of \$32.5 million through the issuance of approximately 1.6 million common shares at a price of \$21.25 per share. The Company issued \$18.6 million in fixed-to-floating rate subordinated notes due in 2027.
- The Company completed two acquisitions during the year ended December 31, 2017. The Company's balance sheet and statement of income as of and for the year ended December 31, 2017 include the impact of the Company's acquisition of BOJ Bancshares, Inc. and its wholly-owned subsidiary, The Highlands Bank (together "BOJ"), which was completed on December 1, 2017, and the acquisition of Citizens Bancshares, Inc. and its wholly-owned subsidiary, Citizens Bank (together "Citizens"), which was completed on July 1, 2017.

Acquisitions

Citizens Bancshares, Inc.

On July 1, 2017, the Company completed the acquisition of Citizens Bancshares, Inc. ("Citizens") and its wholly-owned subsidiary, Citizens Bank, located in Evangeline Parish, Louisiana. The Company acquired 100% of Citizens' outstanding common shares for an aggregate amount of cash consideration equal to \$45.8 million, or approximately \$419.20 per share. The acquisition of Citizens expands the Company's branch footprint in Louisiana and increases the core deposit base to help position the Company to continue to grow. On the date of acquisition, Citizens had total assets with a fair value of \$251 million, \$129 million in loans, \$212 million in deposits, and \$36 million in stockholders' equity, and served the residents of Evangeline Parish through its three branch locations. The Company recorded a core deposit intangible and goodwill of \$1.5 million and \$9.0 million, respectively, related to the acquisition of Citizens.

BOJ Bancshares, Inc.

On December 1, 2017, the Company completed the acquisition of BOJ Bancshares, Inc. ("BOJ") and its wholly-owned subsidiary, The Highlands Bank, located in Feliciana Parish, Louisiana. The Company acquired 100% of BOJ's outstanding common shares for an aggregate merger consideration consisting of \$3.95 million in cash, and an aggregate of 799,559 shares of Investar common stock. Like Citizens, the acquisition of BOJ expands the Company's branch footprint in Louisiana, allowing us to serve more customers in our surrounding market areas. On the date of acquisition, BOJ had total assets with a fair value of \$152 million, \$103 million in loans, \$126 million in deposits, and \$16 million in stockholders' equity, and served the residents of East Baton Rouge and East and West Feliciana Parishes through its five branch locations. The Company recorded a core deposit intangible and goodwill of \$1.0 million and \$5.4 million, respectively, related to the acquisition of BOJ.

Discussion and Analysis of Financial Condition

Total assets were \$1.6 billion at December 31, 2017, an increase of 40% from total assets of \$1.2 billion at December 31, 2016. Our total assets of \$1.2 billion at December 31, 2016 represents a 12% increase from total assets of \$1.0 billion at December 31, 2015. The growth experienced since December 31, 2015 can be attributed to organic growth of the Company through the hiring of a number of key bankers, including experienced commercial lenders, two de novo branch openings, as well as two acquisitions completed in 2017 which added assets with a fair value of \$403 million.

Loans

General. Loans, excluding loans held for sale, constitute our most significant asset, comprising 78%, 77%, and 72% of our total assets at December 31, 2017, 2016 and 2015, respectively. Loans, excluding loans held for sale, increased \$365.4 million, or 41%, to \$1.3 billion at December 31, 2017 from \$893.4 million at December 31, 2016. Loans, excluding loans held for sale, increased \$148.0 million, or 20%, to \$893.4 million at December 31, 2016 from \$745.4 million at December 31, 2015.

The table below sets forth the balance of loans, excluding loans held for sale, outstanding by loan type as of the dates presented, and the percentage of each loan type to total loans (dollars in thousands).

December 31,										
2017		2016		2015		2014		2013

Total loans										
	<u>\$ 1,258,779</u>	<u>100%</u>	<u>\$ 893,426</u>	<u>100%</u>	<u>\$ 745,441</u>	<u>100%</u>	<u>\$ 622,790</u>	<u>100%</u>	<u>\$ 504,095</u>	<u>100%</u>

As the table above indicates, we have experienced significant growth in all loan categories, with the exception of consumer, from 2015 to 2017. Our focus on a relationship-driven banking strategy and the hiring of experienced commercial lenders are the primary reasons for our loan growth from 2015 to 2017. The decrease in the consumer loan portfolio from 2015 to 2017 is primarily a result of pay-downs of portfolio loans. In addition, the Company announced in November 2015 that the Bank would be exiting the indirect auto loan origination business based on the operating performance of the business, in order to focus the Bank's resources on relationship banking. The Bank discontinued accepting indirect auto loan applications on December 31, 2015, but continued to process and fund applications that were accepted on or before that date. Indirect auto loans represented approximately 73% of our total consumer loans at December 31, 2017. As a result, the Company expects its consumer loan portfolio as a percentage of the total loan portfolio to decrease over time.

At December 31, 2017, the Company's total business lending portfolio, which consists of loans secured by owner-occupied commercial real estate properties and commercial and industrial loans, was \$407.8 million, an increase of \$142.0 million, or 53%, compared to the business lending portfolio of \$265.8 million at December 31, 2016. The business lending portfolio at December 31, 2016 increased \$58.1 million, or 28%, compared to \$207.7 million at December 31, 2015.

The following table sets forth loans outstanding at December 31, 2017, which, based on remaining scheduled repayments of principal, are due in the periods indicated, as well as the amount of loans with fixed and variable rates in each maturity range. Loans with balloon payments and longer amortizations are often repriced and extended beyond the initial maturity when credit conditions remain satisfactory. Demand loans, loans having no stated schedule of repayments and no stated maturity, and overdrafts are reported below as due in one year or less.

<i>(dollars in thousands)</i>	One Year or Less	After One Year Through Five Years	After Five Years Through Ten Years	After Ten Years Through Fifteen Years	After Fifteen Years	Total

Loans Held for Sale. There were no loans held for sale at December 31, 2017. Loans held for sale, consisting of both consumer and mortgage loans, decreased \$80.5 million, or 100%, to \$0 at December 31, 2016 compared to December 31, 2015. This decrease is mainly attributable to the reclassification of approximately \$35.0 million of consumer loans from held for sale to the consumer portfolio during the fourth quarter of 2016. In addition, during the year ended December 31, 2016, the Company sold approximately \$26.9 million of the consumer loans and \$0.6 million of the mortgage loans that were held for sale at December 31, 2015.

There were no consumer loans originated for sale during the years ended December 31, 2017 and 2016. In the year ended December 31, 2015, we originated \$303.1 million in consumer loans for sale.

In the year ended December 31, 2017, we did not sell or recognize any gains from the sales of pools of our consumer loans. In the years ended December 31, 2016 and 2015, the gains from the sales of pools of our consumer loans were \$0.4 million and \$3.1 million, respectively. The decrease in gains on sales of consumer loans was driven by the Company's exit from the indirect auto loan origination business as of December 31, 2015, discussed above.

There were no mortgage loans originated for sale during the year ended December 31, 2017. In the years ended December 31, 2016 and 2015, we originated \$0.5 million and \$46.6 million, respectively, in mortgage loans for sale, and recognized \$13,000 and \$1.3 million, respectively, in gain on the sale of mortgage loans. Mortgage loans held for sale decreased \$0.6 million, or 100%, to \$0 at December 31, 2016 from \$0.6 million at December 31, 2015. The decrease is due to our decreased mortgage operations, and we do not anticipate originating mortgage loans for sale in the future.

Loan Concentrations. Loan concentrations are considered to exist when there are amounts loaned to multiple borrowers engaged in similar activities that would cause them to be similarly impacted by economic or other conditions. At December 31, 2017 and December 31, 2016, we had no concentrations of loans exceeding 10% of total loans other than loans in the categories listed in the table above.

Investment Securities

We purchase investment securities primarily to provide a source for meeting liquidity needs, with return on investment as a secondary consideration. We also use investment securities as collateral for certain deposits and other types of borrowing. Investment securities represented 15% of our total assets at December 31, 2017 and totaled \$235.6 million at December 31, 2017, an increase of \$52.5 million, or 29%, from \$183.1 million at December 31, 2016. The investment securities balance at December 31, 2016 represents a \$43.3 million, or 31%, increase from \$139.8 million at December 31, 2015. The increase in investment securities at December 31, 2017 compared to December 31, 2016 and 2015 resulted from purchases of multiple investment types in our current portfolio.

The table below shows the carrying value of our investment securities portfolio by investment type and the percentage that such investment type comprises of our entire portfolio as of the dates indicated (dollars in thousands).

	December 31,					
	2017		2016		2015	
	Balance	Percentage of Portfolio	Balance	Percentage of Portfolio	Balance	Percentage of Portfolio
Obligations of U.S. government agencies and corporations	\$ 52,216	22.2%	\$ 29,490	16.1%	\$ 30,460	21.8%
Obligations of state and political subdivisions	47,098	20.0	40,831	22.3	35,515	25.4
Corporate bonds	16,210	6.9	14,968	8.2	14,824	10.6
Residential mortgage-backed securities	115,614	49.0	94,703	51.7	55,899	40.0
Commercial mortgage-backed securities	3,581	1.5	2,444	1.3	1,989	1.4
Equity securities	842	0.4	706	0.4	1,092	0.8
Total investment securities	<u>\$ 235,561</u>	<u>100%</u>	<u>\$ 183,142</u>	<u>100%</u>	<u>\$ 139,779</u>	<u>100%</u>

The investment portfolio consists of available for sale and held to maturity securities. We do not hold any investments classified as trading. We classify debt securities as held to maturity if management has the positive intent and ability to hold the securities to maturity. Held to maturity securities are stated at amortized cost. Securities not classified as held to maturity are classified as available for sale. The carrying values of the Company's available for sale securities are adjusted for unrealized gains or losses as valuation allowances, and any gains or losses are reported on an after-tax basis as a component of other comprehensive income. Any expected credit loss due to the inability to collect all amounts due according to the security's contractual terms is recognized as a charge against earnings. Any remaining unrealized loss related to other factors would be recognized in other comprehensive income, net of taxes.

In the year ended December 31, 2017, exclusive of investments acquired in acquisitions, we purchased \$104.2 million of investment securities, compared to purchases of \$87.3 million and \$88.6 million of investment securities during the years ended December 31, 2016 and 2015, respectively. We increased our purchases of securities in 2017 primarily to increase the amount of liquidity on our balance sheet and also to reposition the portfolio to take advantage of an anticipated rising interest rate environment. Mortgage-backed securities represented 61%, 65%, and 42% of the available for sale securities we purchased in 2017, 2016 and 2015, respectively. Of the remaining securities purchased in 2017, 2016 and 2015, 33%, 20% and 29%, respectively, were U.S. government agency securities, while 3%, 2%, and 16%, respectively, were municipal securities. We only purchase corporate bonds that are investment grade securities issued by seasoned corporations.

Typically, our investment securities are available for sale. There were no purchases of held to maturity securities during the years ended December 31, 2017 and 2016. Our purchases of held to maturity securities comprised only 6% of our total investment purchases in the year ended December 31, 2015 and consisted only of mortgage-backed securities.

The table below sets forth the stated maturities and weighted average yields of our investment debt securities based on the amortized cost of our investment portfolio as of December 31, 2017 (dollars in thousands).

	One Year or Less		After One Year Through Five Years		After Five Years Through Ten Years		After Ten Years	
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
Held to maturity:								
Obligations of states and political subdivisions	\$ 720	7.17%	\$ 3,245	7.17%	\$ 1,875	7.17%	\$ 6,021	4.38%
Residential mortgage-backed securities	—	—	—	—	—	—	6,136	2.77
Available for sale:								
Obligations of U.S. government agencies and corporations	—	—	1,656	2.17	5,926	2.22	45,307	2.45
Obligations of states and political subdivisions	600	1.99	8,492	2.29	6,297	2.84	20,183	4.10
Corporate bonds	719	2.04	3,775	2.69	11,934	3.54	—	—
Residential mortgage-backed securities	—	—	—	—	1,890	2.20	108,800	2.20
Commercial mortgage-backed securities	—	—	1,456	1.92	2,195	2.50	—	—
	<u>\$ 2,039</u>		<u>\$ 18,624</u>		<u>\$ 30,117</u>		<u>\$ 186,447</u>	

The maturity of mortgage-backed securities reflects scheduled repayments based upon the contractual maturities of the securities. Weighted average yields on tax-exempt obligations have been computed on a fully tax equivalent basis assuming a federal tax rate of 35%.

Premises and Equipment

Bank premises and equipment increased \$5.8 million, or 18.3%, to \$37.5 million at December 31, 2017 from \$31.7 million at December 31, 2016. The increase was primarily due to acquired bank premises and equipment with a fair value of approximately \$7.1 million from Citizens and BOJ. Bank premises and equipment increased \$1.1 million, or 3.6%, to \$31.7 million at December 31, 2016 from \$30.6 million at December 31, 2015. In September 2016, the Bank purchased the second floor of the building in which its executive and operations center is located, which is the primary reason for the increase in bank premises and equipment from 2015 to 2016.

Deferred Tax Asset

At December 31, 2017, the net deferred tax asset was \$1.3 million, compared to \$2.9 million and \$1.9 million, respectively, at December 31, 2016 and 2015. The decrease at December 31, 2017 compared to December 31, 2016 is mainly attributable to tax basis differences in acquired assets and the revaluation of deferred tax assets and liabilities as required by the enactment of the TCJA on December 22, 2017. The increase at December 31, 2016 compared to December 31, 2015 is mainly attributable to the \$0.8 million increase in the deferred tax asset related to the increase in unrealized loss in the available for sale securities portfolio resulting from an increase in interest rates, and the \$0.6 million increase related to the provision for loan losses.

The Bank acquired net operating loss carryforwards as a result of acquisitions. At December 31, 2017, we held approximately \$0.7 million in net operating loss carryforwards that expire in 2033. U.S. tax law imposes annual limitations under Internal Revenue Code Section 382 on the amount of net operating loss carryforwards that may be used to offset federal taxable income. Under these laws, we may apply up to approximately \$0.1 million to offset our taxable income each year through 2023. In addition to this limitation, our ability to utilize net operating loss carryforwards depends upon the Company generating taxable income. Given the substantial amount of time before our net operating loss carryforwards begin to expire, we currently expect to utilize these net operating loss carryforwards in full before their expiration.

Deposits

The following table sets forth the composition of our deposits and the percentage of each deposit type to total deposits at December 31, 2017, 2016 and 2015 (dollars in thousands).

	December 31,					
	2017		2016		2015	
	Amount	Percentage of Total Deposits	Amount	Percentage of Total Deposits	Amount	Percentage of Total Deposits
Noninterest-bearing demand deposits	\$ 216,599	17.7%	\$ 108,404	11.9%	\$ 90,447	12.3%
NOW accounts	208,683	17.0	171,556	18.9	140,503	19.0
Money market deposit accounts	146,140	11.9	123,079	13.6	96,113	13.0
Savings accounts	117,372	9.6	52,860	5.8	53,735	7.3
Time deposits	536,443	43.8	451,888	49.8	356,608	48.4
Total deposits	\$ 1,225,237	100.0%	\$ 907,787	100.0%	\$ 737,406	100.0%

Total deposits were \$1.2 billion at December 31, 2017, an increase of \$317.5 million, or 35.0%, from total deposits of \$907.8 million at December 31, 2016. Exclusive of acquired deposits, total deposits decreased \$11.2 million, or 1.2%, primarily due to a \$62.3 million decrease in time deposits resulting from the Bank's strategy to decrease its dependence on non-retail certificates of deposits. This decrease in time deposits, exclusive of acquired deposits, was partially offset by increases of \$30.7 million and \$21.0 million in noninterest-bearing demand deposits and money market deposit accounts, respectively. Total deposits at December 31, 2016 increased \$170.4 million, or 23%, from total deposits of \$737.4 million at December 31, 2015. The increase in deposits at December 31, 2016 compared to December 31, 2015 resulted from organic growth in all of our markets as the Bank continues to focus on relationship banking.

The following table shows the contractual maturities of certificates of deposit and other time deposits greater than \$100,000 at December 31, 2017 and 2016 (dollars in thousands).

	December 31,			
	2017		2016	
	Certificates of Deposit	Other Time Deposits	Certificates of Deposit	Other Time Deposits
Time remaining until maturity:				
Three months or less	\$ 79,662	\$ 2,182	\$ 59,639	\$ 100

Over six months through twelve months	61,371	1,812	20,327	660
Over one year through three years	78,270	1,890	65,865	1,388
Over three years	2,722	487	8,684	297
	\$ 275,727	\$ 8,080	\$ 180,210	\$ 2,803

Borrowings

Total borrowings include securities sold under agreements to repurchase, advances from the Federal Home Loan Bank ("FHLB"), unsecured lines of credit with First National Bankers Bankshares, Inc. ("FNBB") and The Independent Bankers Bank ("TIB"), junior subordinated debentures, and a secured revolving line of credit with TIB. In addition, in connection with its definitive agreement to acquire Citizens, on March 24, 2017, the Company issued and sold \$18.6 million in aggregate principal amount of its 6.00% Fixed-to-Floating Rate Subordinated Notes (the "Notes") due March 30, 2027. Beginning on March 30, 2022, the Company may redeem the Notes, in whole or in part, at their principal amount plus any accrued and unpaid interest. The Notes bear an interest rate of 6.00% per annum until March 30, 2022, on which date the interest rate will reset quarterly to an annual interest rate equal to the then-current LIBOR plus 394.5 basis points. The Company used the net proceeds of the Notes sale to fund a portion of its acquisition of Citizens, which closed on July 1, 2017.

Securities sold under agreements to repurchase decreased \$17.2 million to \$21.9 million at December 31, 2017 from \$39.1 million at December 31, 2016. Our advances from the FHLB were \$166.7 million at December 31, 2017, an increase of \$83.9 million from FHLB advances of \$82.8 million at December 31, 2016. FHLB advances are used to fund increased loan and investment activity that is not funded by deposits or other borrowings.

There were no funds drawn on the unsecured lines of credit at December 31, 2017 or 2016. Other borrowings on the consolidated balance sheets consist of the balance on our secured revolving line of credit with TIB. There was no balance on our secured revolving line of credit at December 31, 2017, a decrease of \$1.0 million compared to December 31, 2016. Junior subordinated debt of \$5.8 million at December 31, 2017 represents the junior subordinated debentures that we assumed in connection with our acquisitions of BOJ in 2017 and First Community Bank (“FCB”) in 2013.

The average balances and cost of funds of short-term borrowings at December 31, 2017, 2016 and 2015 are summarized in the table below (dollars in thousands).

	Average Balances			Cost of Funds		
	December 31,			December 31,		
	2017	2016	2015	2017	2016	2015
Federal funds purchased and other short-term borrowings	\$ 96,774	\$ 80,638	\$ 41,906	1.37%	1.12%	0.62%
Securities sold under agreements to repurchase	32,335	27,701	19,064	0.33	0.20	0.20
Total short-term borrowings	\$ 129,109	\$ 108,339	\$ 60,970	1.11%	0.88%	0.49%

Results of Operations

Performance Summary

2017 vs. 2016. For the year ended December 31, 2017, net income was \$8.2 million, or \$0.96 per basic and diluted common share, compared to net income of \$7.9 million, or \$1.11 per basic common share and \$1.10 per diluted common share, for the year ended December 31, 2016. The decrease in basic and diluted earnings per common share is mainly attributable to the increase in the weighted average number of common shares outstanding, which is primarily a result of the 1.6 million shares issued in a public offering in March 2017, and, to a lesser extent, the issuance of 0.8 million shares issued in the BOJ acquisition. The increase in our net income was primarily driven by higher levels of net interest income resulting from both organic loan growth and acquired loans as well as an increase in the yields on interest-earning assets, offset, in part, by an increase in the cost of funds. The increase in net interest income was partially offset by decreases in noninterest income, increases in noninterest expenses, and an increase in income tax expense related to the TCJA enacted on December 22, 2017. Noninterest expense for the year ended December 31, 2017 includes \$1.9 million in acquisition expense, which was not included in the year ended December 31, 2016.

Return on average assets decreased to 0.62% for the year ended December 31, 2017 from 0.71% for the year ended December 31, 2016. The decrease in return on average assets is attributable to the \$230.0 million increase in average assets, partially resulting from the Company’s acquisitions of Citizens and BOJ, as well as the \$1.9 million in acquisition expense recognized during the year ended December 31, 2017. Return on average equity was 5.65% for the year ended December 31, 2017 compared to 7.0% for the year ended December 31, 2016. The decrease in return on average equity was primarily due to the \$32.6 million increase in average equity, which mainly resulted from a public offering of common stock in the first quarter of 2017, generating net proceeds of \$32.5 million.

2016 vs. 2015. For the year ended December 31, 2016, net income was \$7.9 million, or \$1.11 per basic share and \$1.10 per diluted share, compared to net income of \$7.1 million, or \$0.98 per basic share and \$0.97 per diluted share, for the year ended December 31, 2015. The increase in our net income was primarily driven by higher levels of net interest income resulting from strong organic loan growth, offset, in part, by a decrease in yields on interest-earning assets and an increase in the cost of funds.

Return on average assets decreased to 0.71% for the year ended December 31, 2016 from 0.77% for the year ended December 31, 2015, mainly as a result of a decrease in noninterest income, lower yields on interest-earning assets, and an increased cost of funds. Return on average equity was 7.0% for the year ended December 31, 2016 compared to 6.6% for the year ended December 31, 2015.

Net Interest Income and Net Interest Margin

Net interest income, our principal source of earnings, is the difference between the interest income generated by earning assets and the total interest cost of the deposits and borrowings obtained to fund those assets. Factors affecting the level of net interest income include the volume of earning assets and interest-bearing liabilities, yields earned on loans and investments and rates paid on deposits and other borrowings, the level of non-performing loans and the amount of non-interest-bearing liabilities supporting earning assets.

The primary factors affecting net interest margin are changes in interest rates, competition and the shape of the interest rate yield curve. The Federal Reserve Board sets various benchmark rates, including the Federal Funds rate, and thereby influences the general market rates of interest, including the deposit and loan rates offered by financial institutions. The Federal Funds target rate, which is the cost to banks of immediately available overnight funds, was lowered on December 16, 2008 to a historic low of 0.25% to 0%, where it remained until December 16, 2015, when the target rate was increased slightly to 0.50% to 0.25%. Since December 31, 2016, the Federal Funds target rate has increased 100 basis points and is currently at 1.50% to 1.25%.

2017 vs. 2016. Net interest income increased 22.4% to \$42.5 million for the year ended December 31, 2017 from \$34.7 million for the same period in 2016. Net interest margin was 3.39% for the year ended December 31, 2017, up seven basis points from 3.32% for the year ended December 31, 2016. The increase in net interest income resulted from increases in both the volume of interest-earning assets and the yield earned on those assets, partially offset by an increase in both the volume of and rate paid on interest-bearing liabilities. These changes were driven both by organic loan growth and growth due to acquisitions, acquired deposits, issuance of subordinated debt, and the current interest rate environment. For the year ended December 31, 2017, average loans and average investment securities increased approximately \$151.2 million and \$56.8 million, respectively, compared to the same period in 2016, while average interest-bearing deposits and average short- and long-term borrowings increased approximately \$102.8 million and \$45.6 million, respectively.

Interest income was \$53.3 million for the year ended December 31, 2017 compared to \$43.2 million for the same period in 2016. Loan interest income made up substantially all of our interest income for the years ended December 31, 2017 and 2016. Interest on our commercial real estate loans, one-to-four family residential real estate loans and construction and development loans constituted the three largest components of our loan interest income for the year ended December 31, 2017 at 76% of total interest income on loans. Interest on our commercial real estate loans, one-to-four family residential real estate loans and consumer loans constituted the three largest components of our loan interest income for the year ended December 31, 2016 at 75% of total interest income on loans. The overall yield on interest-earning assets increased 13 basis points to 4.25% for the year ended December 31, 2017 compared to 4.12% for the same period in 2016. The loan portfolio yielded 4.72% for the year ended December 31, 2017 compared to 4.55% for the year ended December 31, 2016, while the yield on the investment portfolio was 2.37% for the year ended December 31, 2017 compared to 2.27% for the year ended December 31, 2016.

Interest expense was \$10.8 million for the year ended December 31, 2017, an increase of \$2.4 million compared to interest expense of \$8.4 million for the year ended December 31, 2016. While there was an increase in the volume of interest-bearing liabilities of \$148.4 million for the year ended December 31, 2017 compared to December 31, 2016, the increase in interest expense is mainly attributable to the increase in the cost of these liabilities. As mentioned above, the Federal Funds target rate increased 100 basis points during the year ended December 31, 2017, which affects the rate the Company pays for immediately available overnight funds. In addition, the Company issued \$18.6 million in fixed-to-floating rate subordinated notes in March 2017 that currently have a rate of 6.00% per annum, affecting the cost of our long-term debt. While the cost of interest-bearing deposits decreased one basis point to 0.94% for the year ended December 31, 2017 compared to the same period in 2016, the cost of interest-bearing liabilities increased 10 basis points to 1.05% from 0.95% compared to the same period in 2016.

2016 vs. 2015. Net interest income increased 10.4% to \$34.7 million for the year ended December 31, 2016 from \$31.5 million for the same period in 2015. Net interest margin was 3.32% for the year ended December 31, 2016, down 29 basis points from 3.61% for the year ended December 31, 2015. The increase in net interest income resulted from increases in the volume of interest-earning assets, offset by declines in the rate earned on interest-earning assets and an increase in the volume of interest-bearing liabilities, as well as an increase in the rate paid on such liabilities. These changes were driven by organic loan and deposit growth and the current interest rate environment. For the year ended December 31, 2016, average loans and average investment securities increased approximately \$108.3 million and \$57.8 million, respectively, compared to the same period in 2015, while average interest-bearing deposits and average short- and long-term borrowings increased approximately \$129.5 million and \$33.7 million, respectively.

Interest income was \$43.2 million for the year ended December 31, 2016 compared to \$37.3 million for the same period in 2015. Loan interest income made up substantially all of our interest income for the years ended December 31, 2016 and 2015. Interest on our commercial real estate loans, one-to-four family residential real estate loans and consumer loans constituted the three largest components of our loan interest income for the years ended December 31, 2016 and 2015 at 75% and 77%, respectively, for such periods. The prolonged low interest rate environment contributed to a lower yield on earning assets, offset by the increases in interest-earning assets, described above. The overall yield on interest-earning assets decreased 17 basis points to 4.12% for the year ended December 31, 2016 as compared to 4.29% for the same period in 2015. The loan portfolio yielded 4.55% for the year ended December 31, 2016 as compared to 4.65% for the year ended December 31, 2015, while the yield on the investment portfolio was 2.27% for the year ended December 31, 2016 compared to 2.22% for the year ended December 31, 2015.

Interest expense was \$8.4 million for the year ended December 31, 2016, an increase of \$2.5 million compared to interest expense of \$5.9 million for the year ended December 31, 2015, as a result of an increase in volume of interest-bearing liabilities and a slight increase in cost. Average interest-bearing liabilities increased approximately \$163.2 million for the year ended December 31, 2016 compared to the same period in 2015 as a result of our organic deposit growth as well as increased borrowings. The cost of interest-bearing liabilities increased 13 basis points to 0.95% for the year ended December 31, 2016 compared to the same period in 2015, primarily as a result of an increase in the cost of short-term borrowings.

Average Balances and Yields. The following table sets forth average balance sheet data, including all major categories of interest-earning assets and interest-bearing liabilities, together with the interest earned or paid and the average yield or rate paid on each such category as of and for the years ended December 31, 2017, 2016 and 2015. Averages presented below are daily averages (dollars in thousands).

	As of and for the year ended December 31,								
	2017			2016			2015

(1) Interest income and net interest margin are expressed as a percentage of average interest-earning assets outstanding for the indicated periods. Interest expense is expressed as a percentage of average interest-bearing liabilities for the indicated periods.

Nonaccrual loans were included in the computation of average loan balances but carry a zero yield. The yields include the effect of loan fees of \$1.4 million, \$1.7 million and \$1.5 million for the years ended December 31, 2017, 2016 and 2015, respectively, and discounts and premiums that are amortized or accreted to interest income or expense.

Volume/Rate Analysis. The following table sets forth a summary of the changes in interest earned and interest paid resulting from changes in volume and rates for the year ended December 31, 2017 compared to the year ended December 31, 2016 (dollars in thousands):

	Year ended December 31, 2017 vs. Year ended December 31, 2016		
	Volume	Rate	Net ⁽¹⁾
Interest income:			
Loans	\$ 6,902	\$ 1,581	\$ 8,483
Securities:			
Taxable	1,147	240	1,387
Tax-exempt	133	(30)	103
Interest-earning balances with banks	18	203	221
Total interest-earning assets	8,200	1,994	10,194
Interest expense:			
Interest-bearing demand deposits	392	141	533
Savings deposits	171	(78)	93
Time deposits	204	38	242
Short-term borrowings	183	291	474
Long-term debt	296	778	1,074
Total interest-bearing liabilities	1,246	1,170	2,416
Change in net interest income	\$ 6,954	\$ 824	\$ 7,778

⁽¹⁾ Changes in interest due to both volume and rate have been allocated on a pro-rata basis using the absolute ratio value of amounts calculated.

Noninterest Income

Noninterest income includes, among other things, fees generated from our deposit services, gains on the sales of consumer and mortgage loans, fixed assets and securities, and servicing fees and fee income on serviced loans. We expect to continue to develop new products that generate noninterest income, and enhance our existing products, in order to diversify our revenue sources.

2017 vs. 2016. Total noninterest income decreased \$1.7 million, or 30.2%, to \$3.8 million for the year ended December 31, 2017 compared to \$5.5 million for the year ended December 31, 2016. The decrease is primarily due to the \$1.1 million decrease in the gain on sale of fixed assets and the \$0.6 million decrease in servicing fees and fee income on serviced loans.

Servicing fees and fee income on serviced loans is the largest component of our noninterest income for the year ended December 31, 2017. Servicing fees and fee income on serviced loans decreased \$0.6 million, or 29.0%, to \$1.5 million, for the year ended December 31, 2017. This decrease is a result of the Bank exiting the indirect auto loan origination business at the end of 2015. Since the Bank did not originate auto loans for sale during the year ended December 31, 2017, the servicing portfolio, which experienced regularly scheduled paydowns, was not replaced with new loans. We expect servicing fees and fee income on serviced loans to decrease over time until all serviced loans are paid off.

Gain on sale of fixed assets was \$127,000 for the year ended December 31, 2017 compared to \$1.3 million for the year ended December 31, 2016. The \$1.3 million gain on sale of fixed assets was recognized for the sale of the land and building of one of the Bank's branch locations to a healthcare company during the second quarter of 2016.

Gain on sale of loans decreased \$0.4 million, or 100%, for the year ended December 31, 2017 from \$0.4 million for the year ended December 31, 2016. Since exiting the indirect auto loan origination business at the end of 2015, the Bank has experienced decreased loan sales and has ceased originations of consumer loans held for sale.

Service charges on deposit accounts include maintenance fees on accounts, account enhancement charges for additional deposit account features, per item charges, overdraft fees, and treasury management charges. Service charges on deposits increased 123.6% to \$0.8 million for the year ended December 31, 2017 compared to \$0.3 million for the same period in 2016 primarily as a result of the \$152.7 million increase in average deposit balances during the year ended December 31, 2017.

Gains on the sale of investment securities for the year ended December 31, 2017 decreased 34.1%, to \$0.3 million from \$0.4 million for the same period in 2016. We sold approximately \$106.4 million in securities for the year ended December 31, 2017 compared to sales of \$15.5 million for the year ended December 31, 2016. The increase in sales is primarily the result of approximately \$86.0 million of sales of acquired investment securities.

Gains on the sale of other real estate owned for the year ended December 31, 2017 increased \$14,000, or 107.7%, to \$27,000 from \$13,000 for the same period in 2016. We sold approximately \$0.6 million of other real estate owned for the year ended December 31, 2017, compared to sales of \$0.5 million for the year ended December 31, 2016.

Other operating income, which, among other items, consists of ATM fees, wire fees, debit and credit card fees, including interchange fees, and changes in the cash surrender value of bank-owned life insurance policies, was \$1.1 million for the year ended December 31, 2017 compared to \$0.9 million for the same period in 2016. The increase is mainly attributable to a \$0.2 million increase in debit and credit card fees, particularly interchange fees, which resulted from the increase in the volume of debit and credit card transactions following the Company's acquisitions in 2017.

2016 vs. 2015. Total noninterest income decreased \$2.9 million, or 34.5%, to \$5.5 million for the year ended December 31, 2016 compared from \$8.3 million for the year ended December 31, 2015. The decrease is primarily due to the \$4.0 million decrease in the gain on sale of loans, offset by a \$1.3 million increase in gain on sale of fixed assets.

Servicing fees and fee income on serviced loans is the largest component of our noninterest income for the year ended December 31, 2016. Servicing fees and fee income on serviced loans decreased \$0.4 million, or 17.9%, to \$2.1 million, for the year ended December 31, 2016. This decrease is a result of the Bank exiting the indirect auto loan origination business at the end of 2015, as discussed above. Since the Bank did not originate auto loans for sale during the year ended December 31, 2016, the servicing portfolio, which experienced regularly scheduled paydowns, was not replaced with new loans. We expect servicing fees and fee income on serviced loans to decrease over time until all serviced loans are paid off.

Gain on sale of fixed assets was \$1.3 million for the year ended December 31, 2016 compared to \$15,000 for the year ended December 31, 2015. The \$1.3 million gain on sale of fixed assets was recognized for the sale of the land and building of one of the Bank's branch locations to a healthcare company during the second quarter of 2016.

Gain on sale of loans decreased \$4.0 million, or 90%, to \$0.4 million for the year ended December 31, 2016 from \$4.4 million for the year ended December 31, 2015. Since exiting the indirect auto loan origination business at the end of 2015, the Bank has experienced decreased loan sales and has ceased originations of consumer loans held for sale. Therefore, we expect the gain on sale of loans to diminish over time.

Service charges on deposit accounts include maintenance fees on accounts, account enhancement charges for additional deposit account features, per item fees, overdraft fees, and treasury management charges. Service charges on deposits decreased 9.7% to \$343,000 for the year ended December 31, 2016 compared to \$380,000 for the same period in 2015 as a result of decreases in NSF and treasury management activity.

Gains on the sale of investment securities for the year ended December 31, 2016 decreased 9.4% to \$443,000 from \$489,000 for the same period in 2015. We sold approximately \$15.5 million in securities for the year ended December 31, 2016 compared to sales of \$27.2 million for the year ended December 31, 2015.

Gains on the sale of other real estate owned for the year ended December 31, 2016 increased \$0.1 million, or 112.4%, to \$13,000 from a loss of \$0.1 million for the same period in 2015. We sold approximately \$0.5 million of other real estate owned for the year ended December 31, 2016, compared to sales of \$2.9 million for the year ended December 31, 2015.

Other operating income, which consists of ATM fees, wire fees, debit and credit card fees, including interchange fees, and changes in the cash surrender value of bank-owned life insurance policies, among other things, was \$0.9 million for the year ended December 31, 2016 compared to \$0.7 million for the same period in 2015. The increase is mainly attributable to a \$0.2 million increase in the cash surrender value of bank-owned life insurance policies.

Noninterest Expense

Noninterest expense includes salaries and benefits and other costs associated with the conduct of our operations. We are committed to managing our costs within the framework of our operating strategy. However, since we are focused on growth both organically and through acquisition, we expect our expenses to continue to increase as we add employees and physical locations to accommodate our growing franchise. We do focus on creating synergies promptly after completing an acquisition, as this is important to our earnings success.

2017 vs. 2016. Total noninterest expense was \$32.3 million for the year ended December 31, 2017, an increase of \$5.7 million, or 21.4%, from \$26.6 million for the year ended December 31, 2016. This increase is mainly attributable to the increases in both salaries and employee benefits and acquisition expense. The \$3.1 million increase in salaries and employee benefits is a result of the increase in employees following the acquisitions of Citizens and BOJ, the additional staff needed for the two de novo branches opened in June 2017, as well as the addition of commercial lenders and other officers during the year ended December 31, 2017. The \$1.9 million increase in acquisition expense is a result of the Citizens and BOJ acquisitions, both of which were announced and completed in the year ended December 31, 2017.

Salaries and employee benefits increased \$3.1 million, or 19.7%, to \$18.7 million for the year ended December 31, 2017, compared to \$15.6 million for the year ended December 31, 2016. Staff levels increased to 258 full-time equivalent employees at December 31, 2017 compared to 152 full-time equivalent employees at December 31, 2016, primarily as a result of the acquisitions of Citizens and BOJ.

Occupancy expense increased \$0.2 million, or 15.6% to \$1.2 million for the year ended December 31, 2017 from \$1.0 million for the year ended December 31, 2016. This increase is primarily attributable to repair and maintenance costs and utilities for existing Bank premises, including the eight branch locations acquired during the year.

Professional fees decreased \$0.3 million, or 24.7%, to \$1.0 million for the year ended December 31, 2017 from \$1.3 million for the year ended December 31, 2016. The decrease is attributable to decreased legal and consulting fees incurred during the year.

Other operating expenses include security, business development, FDIC and OFI assessments, bank shares and property taxes, charitable contributions, personnel training and development, filing fees, and other costs related to the operation of our business. Other operating expenses increased \$0.9 million, or 18.5%, to \$5.7 million for the year ended December 31, 2017 from \$4.8 million for the same period in 2016. The increase in other operating expenses is directly related to increased Bank properties resulting from the completion of two acquisitions during the year.

2016 vs. 2015. Total noninterest expense was \$26.6 million for the year ended December 31, 2016, a decrease of \$0.7 million, or 2.6%, from \$27.4 million for the year ended December 31, 2015. This decrease was mainly the result of a \$0.9 million decrease in other operating expenses and a \$0.8 million decrease in salaries and employee benefits, offset by increases in professional fees and customer reimbursements that were paid to certain customers during the year. The decrease in both other operating expenses and salaries and benefits is directly related to the Bank's exit of the indirect auto loan origination business at the end of 2015.

Salaries and employee benefits decreased \$0.8 million, or 4.8%, to \$15.6 million for the year ended December 31, 2016, compared to \$16.4 million for the year ended December 31, 2015. Staff levels decreased to 152 full-time equivalent employees at December 31, 2016 compared to 168 full-time equivalent employees at December 31, 2015, primarily as a result of the Bank's exit from the auto loan origination business.

Occupancy expense increased 4.6% to \$995,000 for the year ended December 31, 2016 from \$951,000 for the year ended December 31, 2015. This increase is primarily attributable to repair and maintenance costs for existing Bank premises.

Professional fees increased \$0.2 million, or 17%, to \$1.3 million for the year ended December 31, 2016 from \$1.1 million for the year ended December 31, 2015. This increase is attributable to fees incurred as a result of transferring a commercial real estate loan to other real estate during the fourth quarter of 2016.

Other operating expenses include security, business development, FDIC and OFI assessments, bank shares tax, charitable contributions, personnel training and development, filing fees, and other costs related to the operation of our business. Other operating expenses decreased \$0.9 million, or 16%, to \$4.8 million for the year ended December 31, 2016 from \$5.7 million for the same period in 2015. The decrease is directly related to the Bank's exit from the indirect auto loan origination business at the end of 2015.

Income Tax Expense

2017 vs. 2016. Income tax expense for the year ended December 31, 2017 was \$4.2 million compared to \$3.6 million at December 31, 2016. The effective tax rate for the years ended December 31, 2017 and 2016 was 34.1% and 31.4%, respectively. The increase in the Company's effective tax rate for the year ended December 31, 2017 is a result of the TCJA, which required the revaluation of the Company's deferred tax assets and liabilities, resulting in a \$0.3 million charge to income tax expense. Management expects the Company's effective tax rate to approximate 20% beginning in 2018, mainly as a result of the TCJA. Refer to Note 17 to the Consolidated Financial Statements for further discussion of the TCJA.

2016 vs. 2015. Income tax expense for the year ended December 31, 2016 was \$3.6 million compared to \$3.5 million at December 31, 2015. The effective tax rate for the years ended December 31, 2016 and 2015 was 31.4% and 33.2%, respectively. The Company recorded a \$0.1 million tax benefit during the third quarter of 2016 related to the filing of its 2015 tax return which contributed to the lower effective tax rate for the year ended December 31, 2016.

Risk Management

The primary risks associated with our operations are credit, interest rate and liquidity risk. Credit and interest rate risk are discussed below, while liquidity risk is discussed in this section under the heading *Liquidity and Capital Resources* below.

Credit Risk and the Allowance for Loan Losses

General. The risk of loss should a borrower default on a loan is inherent in any lending activity. Our portfolio and related credit risk are monitored and managed on an ongoing basis by our risk management department, the board of directors' loan committee and the full board of directors. We utilize a ten point risk-rating system, which assigns a risk grade to each borrower based on a number of quantitative and qualitative factors associated with a loan transaction. The risk grade categorizes the loan into one of five risk categories, based on information about the ability of borrowers to service the debt. The information includes, among other factors, current financial information about the borrower, historical payment experience, credit documentation, public information and current economic trends. These categories assist management in monitoring our credit quality. The following describes each of the risk categories, which are consistent with the definitions used in guidance promulgated by federal banking regulators:

- *Pass (Loan grades 1-6)*—Loans not meeting the criteria below are considered pass. These loans have high credit characteristics and financial strength. The borrowers at least generate profits and cash flow that are in line with peer and industry standards and have debt service coverage ratios above loan covenants and our policy guidelines. For some of these loans, a guaranty from a financially capable party mitigates characteristics of the borrower that might otherwise result in a lower grade.
- *Special Mention (grade 7)*—Loans classified as special mention possess some credit deficiencies that need to be corrected to avoid a greater risk of default in the future. For example, financial ratios relating to the borrower may have deteriorated. Often, a special mention categorization is temporary while certain factors are analyzed or matters addressed before the loan is re-categorized as either pass or substandard.
- *Substandard (grade 8)*—Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the borrower or the liquidation value of any collateral. If deficiencies are not addressed, it is likely that this category of loan will result in the Bank incurring a loss. Where a borrower has been unable to adjust to industry or general economic conditions, the borrower's loan is often categorized as substandard.
- *Doubtful (grade 9)*—Doubtful loans are substandard loans with one or more additional negative factors that makes full collection of amounts outstanding, either through repayment or liquidation of collateral, highly questionable and improbable.
- *Loss (grade 10)*—Loans classified as loss have deteriorated to such a point that it is not practicable to defer writing off the loan. For these loans, all efforts to remediate the loan's negative characteristics have failed and the value of the collateral, if any, has severely deteriorated relative to the amount outstanding. Although some value may be recovered on such a loan, it is not significant in relation to the amount borrowed.

At December 31, 2017 and December 31, 2016, there were no loans classified as doubtful or loss, while there were \$5.7 million and \$3.7 million, respectively, of loans classified as substandard, and \$3.1 million and \$0.6 million, respectively, of loans classified as special mention as of such dates. Of our substandard and special mention loans at December 31, 2017 and December 31, 2016, \$5.8 million and \$0.6 million, respectively, were acquired and marked to fair value at the time of their acquisition. At December 31, 2015, we had no doubtful or loss loans, and we had substandard and special mention loans of \$6.7 million and \$1.4 million, respectively.

An external loan review consultant is engaged annually by the risk management department to review commercial loans, utilizing a risk-based approach designed to maximize the effectiveness of the review. In addition, credit analysts periodically review smaller dollar commercial loans to identify negative financial trends related to any one borrower, any related groups of borrowers or an industry. All loans not categorized as pass are put on an internal watch list, with quarterly reports to the board of directors. In addition, a written status report is maintained by our special assets division for all commercial loans categorized as substandard or worse. We use this information in connection with our collection efforts.

If our collection efforts are unsuccessful, collateral securing loans may be repossessed and sold or, for loans secured by real estate, foreclosure proceedings initiated. The collateral is sold at public auction for fair market value (based upon recent appraisals), with fees associated with the foreclosure being deducted from the sales price. The purchase price is applied to the outstanding loan balance. If the loan balance is greater than the sales proceeds, the deficient balance is charged-off.

Allowance for Loan Losses. The allowance for loan losses is an amount that management believes will be adequate to absorb probable losses inherent in the entire loan portfolio. The appropriate level of the allowance is based on an ongoing analysis of the loan portfolio and represents an amount that management deems adequate to provide for inherent losses, including collective impairment as recognized under ASC Topic 450, *Contingencies*. Collective impairment is calculated based on loans grouped by grade. Another component of the allowance is losses on loans assessed as impaired under ASC Topic 310, *Receivables*. The balance of these loans and their related allowance is included in management's estimation and analysis of the allowance for loan losses. Other considerations in establishing the allowance for loan losses include the nature and volume of the loan portfolio, overall portfolio quality, historical loan loss, review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay, as well as trends within each of these factors. The allowance for loan losses is established after input from management as well as our risk management department and our special assets committee. We evaluate the adequacy of the allowance for loan losses on a quarterly basis. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. The allowance for loan losses was \$7.9 million at December 31, 2017, up from \$7.1 million at December 31, 2016 and \$6.1 million at December 31, 2015, as we increased our loan loss provisioning to reflect our organic loan growth.

A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Determination of impairment is treated the same across all classes of loans. Impairment is measured on a loan-by-loan basis for, among others, all loans of \$500,000 or greater, nonaccrual loans and a sample of loans between \$250,000 and \$500,000. When we identify a loan as impaired, we measure the extent of the impairment based on the present value of expected future cash flows, discounted at the loan's effective interest rate, except when the sole (remaining) source of repayment for the loans is the operation or liquidation of the collateral. In these cases when foreclosure is probable, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. For real estate collateral, the fair value of the collateral is based upon a recent appraisal by a qualified and licensed appraiser. If we determine that the value of the impaired loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), we recognize impairment through an allowance estimate or a charge-off recorded against the allowance. When the ultimate collectability of the total principal of an impaired loan is in doubt and the loan is on nonaccrual, all payments are applied to principal, under the cost recovery method. When the ultimate collectability of the total principal of an impaired loan is not in doubt and the loan is on nonaccrual, contractual interest is credited to interest income when received, under the cash basis method.

Impaired loans at December 31, 2017, which include all TDRs and nonaccrual loans individually evaluated for impairment for purposes of determining the allowance for loan losses, were \$3.0 million compared to \$4.4 million at December 31, 2016, and \$4.0 million at December 31, 2015. At December 31, 2017 and December 31, 2016, \$0.3 million and \$0.4 million, respectively, of the allowance for loan losses were specifically allocated to impaired loans, while \$0.2 million of the allowance was specifically allocated to such loans at December 31, 2015.

The provision for loan losses is a charge to income in an amount that management believes is necessary to maintain an adequate allowance for loan losses. The provision is based on management's regular evaluation of current economic conditions in our specific markets as well as regionally and nationally, changes in the character and size of the loan portfolio, underlying collateral values securing loans, and other factors which deserve recognition in estimating loan losses. For the years ended December 31, 2017, 2016 and 2015, the provision for loan losses was \$1.5 million, \$2.1 million, and \$1.9 million, respectively. The provision recorded in each year is due primarily to the overall organic growth in our loan portfolio.

Total loans acquired from Citizens and BOJ had carrying values of \$129.9 million and \$103.4 million, respectively, and fair values of \$129.2 and \$102.8 million, respectively, on the acquisition date. Acquired loans that are accounted for under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("ASC 310-30"), were marked to market on the date we acquired the loans to values which, in management's opinion, reflected the estimated future cash flows, based on the facts and circumstances surrounding each respective loan at the date of acquisition. If future cash flows are not reasonably estimable, the Company accounts for the acquired loans using the cash basis method. We continually monitor these loans as part of our normal credit review and monitoring procedures for changes in the estimated future cash flows. Because ASC 310-30 does not permit carry over or recognition of an allowance for loan losses, we may be required to reserve for these loans in the allowance for loan losses through future provision for loan losses if future cash flows deteriorate below initial projections. We did not increase the allowance for loan losses for loans accounted for under ASC 310-30 during 2017, 2016 or 2015. There was no provision for loan losses charged to operating expense attributable to loans accounted for under ASC 310-30 for the years ended December 31, 2017, 2016 and 2015.

The following table presents the allocation of the allowance for loan losses by loan category as of the dates indicated (dollars in thousands).

	December 31,				
	2017	2016	2015	2014	2013
Mortgage loans on real estate:					
Construction and development	\$ 945	\$ 579	\$ 644	\$ 526	\$ 420
1-4 Family	1,287	1,377	1,213	909	567
Multifamily	332	355	246	137	101
Farmland	60	60	22	18	4
Commercial real estate	3,599	2,499	2,156	1,571	992
Commercial and industrial	693	759	513	390	397
Consumer	975	1,422	1,334	1,079	899
Total	<u>\$ 7,891</u>	<u>\$ 7,051</u>	<u>\$ 6,128</u>	<u>\$ 4,630</u>	<u>\$ 3,380</u>

The following table presents the amount of the allowance for loan losses allocated to each loan category as a percentage of total loans as of the dates indicated (dollars in thousands).

	December 31,				
	2017	2016	2015	2014	2013
Mortgage loans on real estate:					
Construction and development	0.07%	0.06%	0.09%	0.09%	0.08%
1-4 Family	0.10	0.15	0.16	0.15	0.11
Multifamily	0.03	0.04	0.03	0.02	0.02
Farmland	—	0.01	—	—	—
Commercial real estate	0.29	0.28	0.29	0.25	0.20
Commercial and industrial	0.06	0.09	0.07	0.06	0.08
Consumer	0.08	0.16	0.18	0.17	0.18
Total	<u>0.63%</u>	<u>0.79%</u>	<u>0.82%</u>	<u>0.74%</u>	<u>0.67%</u>

As discussed above, the balance in the allowance for loan losses is principally influenced by the provision for loan losses and by net loan loss experience. Additions to the allowance are charged to the provision for loan losses. Losses are charged to the allowance as incurred and recoveries on losses previously charged to the allowance are credited to the allowance at the time recovery is collected.

The table below reflects the activity in the allowance for loan losses for the periods indicated (dollars in thousands).

	Year ended December 31,				
	2017	2016	2015	2014	2013
Allowance at beginning of period	\$ 7,051	\$ 6,128	\$ 4,630	\$ 3,380	\$ 2,722
Provision for loan losses	1,540	2,079	1,865	1,628	1,026
Charge-offs:					
Mortgage loans on real estate:					
Construction and development	—	(27)	(17)	—	—
1-4 Family	—	(57)	(78)	(123)	—
Commercial real estate	—	(526)	—	(3)	—
Commercial and industrial	(270)	—	(58)	(16)	(118)
Consumer	(495)	(618)	(477)	(317)	(271)
Total charge-offs	(765)	(1,228)	(630)	(459)	(389)
Recoveries					
Mortgage loans on real estate:					
Construction and development	34	14	25	1	—
1-4 Family	7	13	12	4	—
Commercial real estate	—	1	1	1	—
Commercial and industrial	—	20	197	17	—
Consumer	24	24	28	58	21
Total recoveries	65	72	263	81	21
Net charge-offs	(700)	(1,156)	(367)	(378)	(368)
Balance at end of period	\$ 7,891	\$ 7,051	\$ 6,128	\$ 4,630	\$ 3,380
Net charge-offs to:					
Loans - average	0.07%	0.14%	0.05%	0.07%	0.09%
Allowance for loan losses	8.87%	16.39%	5.99%	8.16%	10.89%
Allowance for loan losses to:					
Total loans	0.63%	0.79%	0.82%	0.74%	0.67%
Nonperforming loans	214%	356%	254%	139%	227%

The allowance for loan losses to total loans ratio decreased to 0.63% at December 31, 2017 compared to 0.79% at December 31, 2016. The allowance for loan losses to nonperforming loans ratio decreased to 214% at December 31, 2017 from 356% at December 31, 2016. The decrease in the ratio of the allowance for loan losses to both total and nonperforming loans at December 31, 2017 compared to December 31, 2016 is primarily the result of acquired loans. As a result of the Citizens and BOJ acquisitions, the Company is holding acquired loans, including \$2.4 million in nonperforming loans, that are carried net of a fair value adjustment for credit and interest rate marks and are only included in the allowance calculation to the extent that the reserve requirement calculated when using management's model used to reserve for its legacy loans exceeds the fair value adjustment. No loans acquired from Citizens and BOJ were included in the allowance calculation for the year ended December 31, 2017.

Charge-offs reflect the realization of losses in the portfolio that were recognized previously through the provision for loan losses. Net charge-offs for the year ended December 31, 2017 were \$0.7 million, or 0.07% of the average loan balance. Net charge-offs for the years ended December 31, 2016 and 2015 were \$1.2 million and \$0.4 million, respectively, equal to 0.14% and 0.05%, respectively, of the average loan balance for the respective periods. For the years ended December 31, 2017, 2016 and 2015, the majority of our charge-offs were indirect consumer loans. Net charge-offs of our indirect consumer loans as a percentage of average indirect consumer loans for the years ended December 31, 2017, 2016 and 2015 were 0.6%, 0.4% and 0.3%, respectively.

Management believes the allowance for loan losses at December 31, 2017 is sufficient to provide adequate protection against losses in our portfolio. Although the allowance for loan losses is considered adequate by management, there can be no assurance that this allowance will prove to be adequate over time to cover ultimate losses in connection with our loans. This allowance may prove to be inadequate due to unanticipated adverse changes in the economy or discrete events adversely affecting specific customers or industries. Our results of operations and financial condition could be materially adversely affected to the extent that the allowance is insufficient to cover such changes or events.

Nonperforming assets and restructured loans. Nonperforming assets consist of nonperforming loans and other real estate owned. Nonperforming loans are those on which the accrual of interest has stopped or loans which are contractually 90 days past due on which interest continues to accrue. Loans are ordinarily placed on nonaccrual when a loan is specifically determined to be impaired or when principal and interest is delinquent for 90 days or more. However, management may elect to continue the accrual when the estimated net available value of collateral is sufficient to cover the principal balance and accrued interest. It is our policy to discontinue the accrual of interest income on any loan for which we have reasonable doubt as to the payment of interest or principal. Nonaccrual loans are returned to an accrual status when the financial position of the borrower indicates there is no longer any reasonable doubt as to the payment of principal or interest.

Another category of assets which contribute to our credit risk is troubled debt restructurings, or restructured loans (“TDR”). A TDR is a loan for which a concession that is not insignificant has been granted to the borrower due to a deterioration of the borrower’s financial condition and subsequently performs in accordance with the new terms. Such concessions may include reduction in interest rates, deferral of interest or principal payments, principal forgiveness and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. We strive to identify borrowers in financial difficulty early and work with them to modify their loans to more affordable terms before such loans reach nonaccrual status. In evaluating whether to restructure a loan, management analyzes the long-term financial condition of the borrower, including guarantor and collateral support, to determine whether the proposed concessions will increase the likelihood of repayment of principal and interest. TDRs that are not performing in accordance with their restructured terms that are either contractually 90 days past due or placed on nonaccrual status are reported as nonperforming loans.

There were eighteen loans, or credits, classified as TDRs at December 31, 2017 that totaled approximately \$1.6 million compared to eighteen credits totaling \$2.4 million at December 31, 2016. Eight of the TDRs had a modification of terms through adjustments to maturity, nine were restructured through a reduction in the interest rate to a rate lower than the current market rate, and one TDR had a modification of terms through principal payment forbearance, paying interest only for a specified period of time. As of December 31, 2017 and 2016, all TDRs were performing under their modified terms. The Company individually evaluates each TDR for allowance purposes, primarily based on collateral value, and excludes these loans from the loan population that is evaluated by applying qualitative factors.

The following table shows the principal amounts of nonperforming and restructured loans as of the dates indicated. All loans for which information exists about possible credit problems that would cause us to have serious doubts about the borrower’s ability to comply with the current repayment terms of the loan have been reflected in the table below (dollars in thousands).

	December 31,				
	2017	2016	2015	2014	2013
Nonaccrual loans	\$ 3,547	\$ 1,978	\$ 2,411	\$ 3,340	\$ 1,489
Accruing loans past due 90 days or more	134	1	—	—	—
Total nonperforming loans	3,681	1,979	2,411	3,340	1,489
Restructured loans	1,621	2,399	1,629	226	815
Total nonperforming and restructured loans	<u>\$ 5,302</u>	<u>\$ 4,378</u>	<u>\$ 4,040</u>	<u>\$ 3,566</u>	<u>\$ 2,304</u>
Interest income recognized on nonperforming and restructured loans	<u>\$ 185</u>	<u>\$ 169</u>	<u>\$ 174</u>	<u>\$ 105</u>	<u>\$ 100</u>
Interest income foregone on nonperforming and restructured loans	<u>\$ 104</u>	<u>\$ 159</u>	<u>\$ 252</u>	<u>\$ 169</u>	<u>\$ 281</u>

Of the total nonaccrual loans at December 31, 2017 and 2016, \$2.4 million, and \$0.5 million, respectively, were acquired. We had \$1.1 million in nonaccrual loans acquired through acquisition at December 31, 2015. Nonperforming loans are comprised of accruing loans past due 90 days or more and nonaccrual loans. Nonperforming loans outstanding represented 0.29%, 0.22%, and 0.32% of total loans at December 31, 2017, 2016 and 2015, respectively.

Other Real Estate Owned. Other real estate owned consists of properties acquired through foreclosure or acceptance of a deed in lieu of foreclosure. These properties are carried at the lower of cost or fair market value based on appraised value less estimated selling costs. Losses arising at the time of foreclosure of properties are charged against the allowance for loan losses. Other real estate owned with a cost basis of \$0.6 million and \$0.5 million was sold during the years ended December 31, 2017 and 2016, respectively, resulting in a net gain of \$27,000 and \$13,000 for the respective period, compared to a cost basis of \$2.9 million and a net loss of \$0.1 million at December 31, 2015.

The following table provides details of our other real estate owned as of the dates indicated (dollars in thousands).

	December 31, 2017	December 31, 2016
Construction and development	\$ 183	\$ 270
1-4 Family	42	—
Commercial real estate	3,612	3,795
Total other real estate owned	<u>\$ 3,837</u>	<u>\$ 4,065</u>

Changes in our other real estate owned are summarized in the table below for the periods indicated (dollars in thousands).

	Year ended December 31, 2017	Year ended December 31, 2016
Balance, beginning of period	\$ 4,065	\$ 725
Transfers from loans	42	3,875
Acquired other real estate owned	477	—
Sales of other real estate owned	(564)	(528)
Write-downs	(183)	(7)
Balance, end of period	<u>\$ 3,837</u>	<u>\$ 4,065</u>

Interest Rate Risk

Market risk is the risk of loss from adverse changes in market prices and rates. Since the majority of our assets and liabilities are monetary in nature, our market risk arises primarily from interest rate risk inherent in our lending and deposit activities. A sudden and substantial change in interest rates may adversely impact our earnings and profitability because the interest rates borne by assets and liabilities do not change at the same speed, to the same extent, or on the same basis. Accordingly, our ability to proactively structure the volume and mix of our assets and liabilities to address anticipated changes in interest rates, as well as to react quickly to such fluctuations, can significantly impact our financial results. To that end, management actively monitors and manages our interest rate risk exposure.

The Asset/Liability Committee (“ALCO”) has been authorized by the board of directors to implement our asset/liability management policy, which establishes guidelines with respect to our exposure to interest rate fluctuations, liquidity, loan limits as a percentage of funding sources, exposure to correspondent banks and brokers and reliance on non-core deposits. The goal of the policy is to enable us to maximize our interest income and maintain our net interest margin without exposing the Bank to excessive interest rate risk, credit risk and liquidity risk. Within that framework, the ALCO monitors our interest rate sensitivity and makes decisions relating to our asset/liability composition.

We monitor the impact of changes in interest rates on our net interest income using gap analysis. The gap represents the net position of our assets and liabilities subject to repricing in specified time periods. During any given time period, if the amount of rate-sensitive liabilities exceeds the amount of rate-sensitive assets, a financial institution would generally be considered to have a negative gap position and would benefit from falling rates over that period of time. Conversely, a financial institution with a positive gap position would generally benefit from rising rates.

Within the gap position that management directs, we attempt to structure our assets and liabilities to minimize the risk of either a rising or falling interest rate environment. We manage our gap position for time horizons of one month, two months, three months, four to six months, seven to twelve months, 13-24 months, 25-36 months, 37-60 months and more than 60 months. The goal of our asset/liability management is for the Bank to maintain a net interest income at risk in an up or down 100 basis point environment at less than (5)%. At December 31, 2017, the Bank was within the policy guidelines for asset/liability management.

The following table depicts the estimated impact on net interest income of immediate changes in interest rates at the specified levels for the periods presented.

As of December 31, 2017	
Changes in Interest Rates (in basis points)	Estimated Increase/Decrease in Net Interest Income ⁽¹⁾
+300	(5.40)%
+200	(3.50)%
+100	(1.80)%
-100	4.60%
-200	2.20%
-300	1.80%

⁽¹⁾ The percentage change in this column represents the projected net interest income for 12 months on a flat balance sheet in a stable interest rate environment versus the projected net interest income in the various rate scenarios.

The computation of the prospective effects of hypothetical interest rate changes requires numerous assumptions regarding characteristics of new business and the behavior of existing positions. These business assumptions are based upon our experience, business plans and published industry experience. Key assumptions include asset prepayment speeds, competitive factors, the relative price sensitivity of certain assets and liabilities, and the expected life of non-maturity deposits. However, there are a number of factors that influence the effect of interest rate fluctuations on us which are difficult to measure and predict. For example, a rapid drop in interest rates might cause our loans to repay at a more rapid pace and certain mortgage-related investments to prepay more quickly than projected. This could mitigate some of the benefits of falling rates as are expected when we are in a negatively-gapped position. Conversely, a rapid rise in rates could give us an opportunity to increase our margins and stifle the rate of repayment on our mortgage-related loans which would increase our returns. As a result, because these assumptions are inherently uncertain, actual results will differ from simulated results.

Liquidity and Capital Resources

Liquidity. Liquidity is a measure of the ability to fund loan commitments and meet deposit maturities and withdrawals in a timely and cost-effective way. Cash flow requirements can be met by generating net income, attracting new deposits, converting assets to cash or borrowing funds. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit outflows, loan prepayments, loan sales and borrowings are greatly influenced by general interest rates, economic conditions, and the competitive environment in which we operate. To minimize funding risks, we closely monitor our liquidity position through periodic reviews of maturity profiles, yield and rate behaviors, and loan and deposit forecasts. Excess short-term liquidity is usually invested in overnight federal funds sold.

Our core deposits, which are deposits excluding time deposits greater than \$250,000 and deposits of municipalities and other political entities, are our most stable source of liquidity to meet our cash flow needs due to the nature of the long-term relationships generally established with our customers. Maintaining the ability to acquire these funds as needed in a variety of markets, and within ALCO compliance targets, is essential to ensuring our liquidity. At December 31, 2017 and 2016, 66% and 76% of our total assets, respectively, were funded by core deposits.

Our investment portfolio is another alternative for meeting our cash flow requirements. Investment securities generate cash flow through principal payments and maturities, and they generally have readily available markets that allow for their conversion to cash. Some securities are pledged to secure certain deposit types or short-term borrowings (such as FHLB advances), which impacts their liquidity. At December 31, 2017, securities with a carrying value of \$90.8 million were pledged to secure deposits or borrowings, compared to \$77.5 million in pledged securities at December 31, 2016.

Other sources available for meeting liquidity needs include advances from the FHLB, repurchase agreements and other borrowings. FHLB advances are primarily used to match-fund fixed rate loans in order to minimize interest rate risk and also may be used to meet day to day liquidity needs, particularly if the prevailing interest rate on an FHLB advance compares favorably to the rates that we would be required to pay to attract deposits. At December 31, 2017, the balance of our outstanding advances with the FHLB was \$166.7 million, an increase from \$82.8 million at December 31, 2016. The total amount of the remaining credit available to us from the FHLB at December 31, 2017 was \$401.0 million. Repurchase agreements are contracts for the sale of securities which we own with a corresponding agreement to repurchase those securities at an agreed upon price and date. Our policies limit the use of repurchase agreements collateralized by U.S. Treasury and agency securities. We had \$21.9 million of repurchase agreements outstanding at December 31, 2017, compared to \$39.1 million at December 31, 2016. We maintain unsecured lines of credit with FNBB and TIB totaling \$55.0 million. These lines of credit are Fed Funds lines of credit and are used for overnight borrowing only. There were no outstanding balances on our unsecured lines of credit at December 31, 2017 or 2016. We also maintain a secured \$20.0 million revolving line of credit with TIB. There was no outstanding balance on our secured line of credit at December 31, 2017, compared to \$1.0 million at December 31, 2016. In addition, in connection with its definitive agreement to acquire Citizens, on March 24, 2017, the Company issued and sold \$18.6 million in aggregate principal amount of its 6.00% Fixed-to-Floating Rate Subordinated Notes (the “Notes”) due March 30, 2027. The Company used the net proceeds of the Notes sale to fund a portion of its acquisition of Citizens, which closed on July 1, 2017.

Our liquidity strategy is focused on using the least costly funds available to us in the context of our balance sheet composition and interest rate risk position. Accordingly, we target growth of noninterest-bearing deposits. Although we cannot directly control the types of deposit instruments our customers choose, we can influence those choices with the interest rates and deposit specials we offer. We do not hold any brokered deposits, as defined for federal regulatory purposes, although we do hold QwikRate® deposits, included in our time deposit balances, to address liquidity needs when rates on such deposits compare favorably with deposit rates in our markets. At December 31, 2017, we held \$70.5 million of QwikRate® deposits, a decrease compared to \$123.2 million at December 31, 2016.

The following table presents, by type, our funding sources, which consist of total average deposits and borrowed funds, as a percentage of total funds and the total cost of each funding source for the years ended December 31, 2017 and 2016.

	Percentage of Total Average Deposits and Borrowed Funds		Cost of Funds	
	Year ended December 31,		Year ended December 31,	
	2017	2016	2017	2016
Noninterest-bearing demand	12%	10%	—%	—%
Interest-bearing demand	27	26	0.70	0.65
Savings	7	6	0.57	0.67
Time deposits	39	45	1.18	1.17
Short-term borrowings	11	11	1.11	0.88
Borrowed funds	4	2	2.81	1.19
Total deposits and borrowed funds	100%	100%	0.92%	0.86%

We are subject to certain restrictions on dividends under applicable banking laws and regulations. Please refer to the discussion under the heading “Supervision and Regulation – Dividends” in *Item 1, Business*, for more information regarding the restrictions on dividends applicable to the Company and the Bank.

Capital Management. Our primary sources of capital include retained earnings, capital obtained through acquisitions and proceeds from the sale of our capital stock. We are subject to various regulatory capital requirements administered by the Federal Reserve and the FDIC. These requirements are described in greater detail under the heading “Supervision and Regulation – Regulatory Capital Requirements” of *Item 1, Business*. Those guidelines specify capital tiers, which include the following classifications:

Capital Tiers	Tier 1 Leverage Ratio	Common Equity Tier 1 Capital Ratio	Tier 1 Capital Ratio	Total Capital Ratio
Well capitalized	5% or above	6.5% of above	8% or above	10% or above
Adequately capitalized	4% or above	4.5% or above	6% or above	8% or above
Undercapitalized	Less than 4%	Less than 4.5%	Less than 6%	Less than 8%
Significantly undercapitalized	Less than 3%	Less than 3%	Less than 4%	Less than 6%
Critically undercapitalized			2% or less	

The Company and the Bank each were in compliance with all regulatory capital requirements as of December 31, 2017, 2016 and 2015. The Bank also was considered “well-capitalized” under the FDIC’s prompt corrective action regulations as of these dates.

The following table presents the actual capital amounts and regulatory capital ratios for the Company and the Bank as of the dates presented (dollars in thousands).

	Actual		Minimum Capital Requirement to be Well Capitalized	
	Amount	Ratio	Amount	Ratio
December 31, 2017				
Investar Holding Corporation:				
Tier 1 capital to average assets (leverage)	\$ 161,438	10.66%	\$ —	—%
Tier 1 common equity to risk-weighted assets	154,938	11.75	—	—
Tier 1 capital to risk-weighted assets	161,438	12.24	—	—
Total capital to risk-weighted assets	187,530	14.22	—	—
Investar Bank:				
Tier 1 capital to average assets (leverage)	175,943	11.63	75,668	5.00

Tier 1 common equity to risk-weighted assets	111,812	11.40	—	—
Tier 1 capital to risk-weighted assets	115,312	11.75	—	—
Total capital to risk-weighted assets	122,363	12.47	—	—
Investar Bank:				
Tier 1 capital to average assets (leverage)	114,417	10.03	57,063	5.00
Tier 1 common equity to risk-weighted assets	114,417	11.67	63,706	6.50
Tier 1 capital to risk-weighted assets	114,417	11.67	78,408	8.00
Total capital to risk-weighted assets	121,468	12.39	98,010	10.00

Off-Balance Sheet Transactions

The Bank entered into forward starting interest rate swap contracts to manage exposure against the variability in the expected future cash flows (future interest payments) attributable to changes in the 1-month LIBOR associated with the forecasted issuances of 1-month fixed rate debt arising from a rollover strategy. An interest rate swap is an agreement whereby one party agrees to pay a fixed rate of interest on a notional principal amount in exchange for receiving a floating rate of interest on the same notional amount for a predetermined period of time, from a second party. The maximum length of time over which the Bank is currently hedging its exposure to the variability in future cash flows for forecasted transactions is approximately 2.6 years. The total notional amount of the derivative contracts is \$50.0 million.

For the years ended December 31, 2017 and 2016, a gain of \$0.4 million, net of a \$0.1 million tax expense, and a gain of \$0.4 million, net of a \$0.2 million tax expense, respectively, was recognized in “Other comprehensive income (loss)” in the accompanying consolidated statement of other comprehensive income for the change in fair value of the interest rate swap. The swap contracts had a fair value of \$0.5 million and \$8,000 as of December 31, 2017 and 2016, respectively, and have been recorded in “Other assets” in the accompanying consolidated balance sheets. The Bank expects the hedge to remain fully effective during the remaining term of the swap contract.

The Bank enters into loan commitments and standby letters of credit in the normal course of its business. Loan commitments are made to meet the financing needs of our customers, while standby letters of credit commit the Bank to make payments on behalf of customers when certain specified future events occur. The credit risks associated with loan commitments and standby letters of credit are essentially the same as those involved in making loans to our customers. Accordingly, our normal credit policies apply to these arrangements. Collateral (e.g., securities, receivables, inventory, equipment, etc.) is obtained based on management's credit assessment of the customer.

Loan commitments and standby letters of credit do not necessarily represent future cash requirements, in that while the customer typically has the ability to draw upon these commitments at any time, these commitments often expire without being drawn upon in full or at all. Virtually all of our standby letters of credit expire within one year. Our unfunded loan commitments and standby letters of credit outstanding are summarized below as of the dates indicated (dollars in thousands).

	December 31, 2017	December 31, 2016
Commitments to extend credit:		
Loan commitments	\$ 174,278	\$ 142,891
Standby letters of credit	3,832	1,008

The Company closely monitors the amount of remaining future commitments to borrowers in light of prevailing economic conditions and adjusts these commitments as necessary. The Company will continue this process as new commitments are entered into or existing commitments are renewed.

Additionally, at December 31, 2017, the Company had unfunded commitments of \$0.3 million for its investment in Small Business Investment Company qualified funds.

For each of the years ended December 31, 2017 and 2016, we engaged in no off-balance sheet transactions reasonably likely to have a material effect on our financial condition, results of operations or cash flows currently or in the future.

Contractual Obligations

The following table presents, as of December 31, 2017, significant fixed and determinable contractual obligations to third parties by payment date (dollars in thousands).

	Payments Due In:				Total
	Less Than One Year	One to Three Years	Three to Five Years	Over Five Years	
Deposits without a stated maturity ⁽¹⁾	\$ 688,794	\$ —	\$ —	\$ —	\$ 688,794
Time deposits ⁽¹⁾	351,996	179,273	5,174	—	536,443

Total contractual obligations	\$ 1,189,325	\$ 191,273	\$ 8,274	\$ 50,302	\$ 1,439,174

⁽¹⁾ Excludes interest.

⁽²⁾ Excludes unamortized premiums and discounts.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The information contained in the section captioned “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Risk Management” in *Item 7* hereof is incorporated herein by reference.

Item 8. Financial Statements and Supplementary Data

Management's Report on Internal Control over Financial Reporting

To the Stockholders and Board of Directors
Investar Holding Corporation
Baton Rouge, Louisiana

Investar Holding Corporation (the "Company") is responsible for the preparation, integrity and fair presentation of the consolidated financial statements included in this annual report. The consolidated financial statements and notes included in this annual report have been prepared in conformity with accounting principles generally accepted in the United States of America and necessarily include some amounts that are based on management's best estimates and judgments.

Management of the Company is responsible for establishing and maintaining effective internal control over financial reporting designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. The Company's internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

The system of internal control over financial reporting as it relates to the financial statements is evaluated for effectiveness by management and tested for reliability through a program of internal audits. Actions are taken to correct potential deficiencies as they are identified. Any system of internal control, no matter how well designed, has inherent limitations, including the possibility that a control can be circumvented or overridden, and misstatements due to error or fraud may occur and not be detected. Also, because of changes in conditions, internal control effectiveness may vary over time. Accordingly, even an effective system of internal control will provide only reasonable assurance with respect to financial statement preparation.

Management, with the participation of the Company's principal executive officer and principal financial officer, conducted an assessment of the effectiveness of the Company's system of internal control over financial reporting as of December 31, 2017, based on criteria for effective internal control over financial reporting described in the "Internal Control - Integrated Framework," (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has concluded that, as of December 31, 2017, the Company's system of internal control over financial reporting is effective and meets the criteria of the "Internal Control - Integrated Framework."

As permitted, management excluded from its assessment the operations of The Highlands Bank, acquired on December 1, 2017 in the acquisition of BOJ Bancshares, Inc. As described in Note 2 to the Consolidated Financial Statements, assets acquired and excluded from management's assessment of internal control over financial reporting comprised approximately 9% of consolidated assets at December 31, 2017.

Ernst & Young LLP, the Company's independent registered public accounting firm that has audited the Company's financial statements included in this annual report, has issued an attestation report on the Company's internal control over financial reporting which is included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Investar Holding Corporation

Opinion on Internal Control over Financial Reporting

We have audited Investar Holding Corporation's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Investar Holding Corporation (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on the COSO criteria.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of BOJ Bancshares, Inc., which is included in the 2017 consolidated financial statements of the Company and constituted 9% of consolidated assets as of December 31, 2017. Our audit of internal control over financial reporting of the Company also did not include an evaluation of the internal control over financial reporting of BOJ Bancshares, Inc.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheet of Investar Holding Corporation as of December 31, 2017, the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for the year ended December 31, 2017, and the related notes and our report dated March 16, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

New Orleans, Louisiana
March 16, 2018

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
Investar Holding Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheet of Investar Holding Corporation (the Company) as of December 31, 2017, the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for the year ended December 31, 2017, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2017, and the results of its operations and its cash flows for the year ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 16, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2017.
New Orleans, Louisiana
March 16, 2018

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors
Investar Holding Corporation
Baton Rouge, Louisiana

We have audited the accompanying consolidated balance sheet of Investar Holding Corporation (the Company) as of December 31, 2016, and the related consolidated statements of operations, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2016. These financial statements are the responsibility of Investar Holding Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Investar Holding Corporation as of December 31, 2016, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

⁽¹⁾ Effective January 1, 2015, companies incorporated in Louisiana became subject to the Louisiana Business Corporation Act (“LBCA”), which eliminates the concept of treasury stock and provides that shares reacquired by a company are to be treated as authorized but unissued. Refer to Note 1 to the Consolidated Financial Statements for further discussion.

⁽²⁾ The Tax Cuts and Jobs Act, enacted on December 22, 2017, required the revaluation of the Company’s deferred tax assets and liabilities as of December 31, 2017 as a result of the lower corporate tax rates to be realized beginning January 1, 2018. The \$0.3 million adjustment to retained earnings represents the reclassification of the tax effects, or “stranded OCI” remaining in accumulated other comprehensive income after the revaluation of the Company’s deferred tax assets and liabilities.

See accompanying notes to the consolidated financial statements.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Investar Holding Corporation (the “Company”) is a financial holding company headquartered in Baton Rouge, Louisiana, that provides, through its wholly-owned subsidiary, Investar Bank (the “Bank”), full banking services, excluding trust services, tailored primarily to meet the needs of individuals and small to medium-sized businesses throughout its Louisiana markets of Baton Rouge, New Orleans, Hammond, and Lafayette and their greater surrounding areas.

Basis of Presentation

The consolidated financial statements of Investar Holding Corporation and its wholly-owned subsidiary, the Bank, have been prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”) and to generally accepted practices within the banking industry.

Segments

While our chief decision makers monitor the revenue streams of the various banking products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Accordingly, all of the Company’s banking operations are considered by management to be aggregated in one reportable operating segment. Because the overall banking operations comprise substantially all of the consolidated operations, no separate segment disclosures are presented in the accompanying consolidated financial statements.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates, and such differences could be material.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company’s allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination. Because of these factors, it is reasonably possible that the allowance for loan losses may change materially in the near term. However, the amount of the change that is reasonably possible cannot be estimated.

Other estimates that are susceptible to significant change in the near term relate to the allowance for off-balance sheet credit losses, the fair value of stock-based compensation awards, the determination of other-than-temporary impairments of securities, and the fair value of financial instruments.

Investment Securities

The Company’s investments in securities are accounted for in accordance with applicable guidance contained in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”), which requires the classification of securities into one of the following categories:

- Securities to be held to maturity (“HTM”): bonds, notes, and debentures for which the Company has the positive intent and ability to hold to maturity are reported at cost, adjusted for premiums and discounts that are recognized in interest income using the interest method over the period to maturity.
- Securities available for sale (“AFS”): available for sale securities consist of bonds, notes, and debentures that are available to meet the Company’s operating needs. These securities are reported at fair value.

Unrealized holding gains and losses, net of tax, on available for sale securities are reported as a net amount in other comprehensive income. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Realized gains and losses on the sale of debt and equity securities are determined using the specific-identification method and average price method, respectively.

The Company follows FASB guidance related to the recognition and presentation of other-than-temporary impairment. The guidance specifies that if an entity does not have the intent to sell a debt security prior to recovery, the security would not be considered other-than-temporarily impaired unless there is a credit loss. When an entity does not intend to sell the security, and it is more likely than not that the entity will not have to sell the security before recovery of its cost basis, it will recognize the credit component of an other-than-temporary impairment of a debt security in earnings and the remaining portion in other comprehensive income.

Other Equity Securities

The Company is a member of the FHLB system. Members of the FHLB are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, is restricted as to redemption, and is periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

Other equity securities also include investments in Independent Bankers Financial Corporation (“IBFC”) and First National Bankers Bankshares (“FNBB”) stock. These investments are carried at cost which approximates fair value.

Loans

The Company’s loan portfolio categories include real estate, commercial and consumer loans. Real estate loans are further categorized into construction and development, one-to-four family residential, multifamily, farmland and commercial real estate loans. The consumer loan category includes loans originated through indirect lending. Indirect lending, which is lending initiated through third-party business partners, is largely comprised of loans made through automotive dealerships.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are stated at the unpaid principal balance outstanding, net of purchase premiums or discounts, deferred income (net of costs), any direct principal charge-offs, and an allowance for loan losses. Interest on loans is calculated by using the effective interest method on daily balances of the principal amount outstanding. Loan origination fees, net of direct loan origination costs, and commitment fees, are deferred and amortized as an adjustment to yield over the life of the loan, or over the commitment period, as applicable.

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are ordinarily placed on nonaccrual when a loan is specifically determined to be impaired or when principal or interest is delinquent for 90 days or more; however, management may elect to continue the accrual when the estimated net realizable value of collateral is sufficient to cover the principal balance and the accrued interest. Any unpaid interest previously accrued on nonaccrual loans is reversed from income. Interest income, generally, is not recognized on specific impaired loans unless the likelihood of further loss is remote. Interest payments received on such loans are applied as a reduction of the loan principal balance. Interest income on other nonaccrual loans is recognized only to the extent of interest payments received. A loan may be returned to accrual status when all the principal and interest amounts contractually due are brought current and future principal and interest amounts contractually due are reasonably assured, which is typically evidenced by a sustained period of repayment performance by the borrower.

The Company considers a loan to be impaired when, based upon current information and events, it believes it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. The Company’s impaired loans include troubled debt restructurings and performing and non-performing loans for which full payment of principal or interest is not expected. Large groups of smaller balance homogenous loans are collectively evaluated for impairment. The Company calculates an allowance required for impaired loans based on the present value of expected future cash flows discounted at the loan’s effective interest rate, the loan’s observable market price or the fair value of its collateral. If the recorded investment in the impaired loan exceeds the measure of fair value, a valuation allowance is required as a component of the allowance for loan losses. Changes to the valuation allowance are recorded as a component of the provision for loan losses.

The Company follows the FASB accounting guidance on sales of financial assets, which includes participating interests in loans. For loan participations that are structured in accordance with this guidance, the sold portions are recorded as a reduction of the loan portfolio. Loan participations that do not meet the criteria are accounted for as secured borrowings.

See *Acquisition Accounting* and *Acquired Impaired Loans* below for accounting treatment of loans acquired through business acquisitions.

Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at the lower of cost or fair value. For loans carried at the lower of cost or fair value, gains and losses on loan sales (sales proceeds minus carrying value) are recorded in noninterest income, and direct loan origination costs and fees are deferred at origination of the loan and are recognized in noninterest income upon sale of the loan. At December 31, 2017 and 2016, the Company did not have any loans held for sale.

Allowance for Loan Losses

The adequacy of the allowance for loan losses is determined in accordance with U.S. GAAP. The allowance for loan losses is estimated through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the loan balance is uncollectable. Subsequent recoveries, if any, are credited to the allowance.

The allowance is an amount that management believes will be adequate to absorb probable losses inherent in the loan portfolio as of the balance sheet date based on evaluations of the collectability of loans and prior loan loss experience. The evaluations take into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. Allowances for impaired loans are generally determined based on collateral values or the present value of estimated cash flows. Credits deemed uncollectible are charged to the allowance. Provisions for loan losses and recoveries on loans previously charged off are adjusted to the allowance. Past due status is determined based on contractual terms.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. Based on management's review and observations made through qualitative review, management may apply qualitative adjustments to determine loss estimates at a group and/or portfolio segment level as deemed appropriate. Management has an established methodology to determine the adequacy of the allowance for loan losses that assesses the risks and losses inherent in its portfolio and portfolio segments. The Company utilizes an internally developed model that requires judgment to determine the estimation method that fits the credit risk characteristics of the loans in its portfolio and portfolio segments. Qualitative and environmental factors that may not be directly reflected in quantitative estimates include: asset quality trends, changes in loan concentrations, new products and process changes, changes and pressures from competition, changes in lending policies and underwriting practices, trends in the nature and volume of the loan portfolio, changes in experience and depth of lending staff and management and national and regional economic trends. Changes in these factors are considered in determining changes in the allowance for loan losses. The impact of these factors on the Company's qualitative assessment of the allowance for loan losses can change from period to period based on management's assessment of the extent to which these factors are already reflected in historic loss rates. The uncertainty inherent in the estimation process is also considered in evaluating the allowance for loan losses.

In the ordinary course of business, the Bank enters into commitments to extend credit and standby letters of credit. Such financial instruments are recorded in the financial statements when they become payable. The credit risk associated with these commitments is evaluated in a manner similar to the allowance for loan losses. The reserve for unfunded lending commitments is included in other liabilities in the balance sheet. At December 31, 2017 the reserve for unfunded loan commitments was \$32,000.

Troubled Debt Restructurings

The Company periodically grants concessions to its customers in an attempt to protect as much of its investment as possible and minimize the risk of loss. These concessions may include restructuring the terms of a customer loan, thereby adjusting the customer's payment requirements. In accordance with the FASB's Accounting Standards Update ("ASU") 2011-2, *Receivables (Topic 310): A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring*, in order to be considered a troubled debt restructuring (a "TDR"), the Company must conclude that the restructuring constitutes a concession and the customer is experiencing financial difficulties. The Company defines a concession to a customer as a modification of existing loan terms for economic or legal reasons that it would otherwise not consider. Concessions are typically granted through an agreement with the customer or are imposed by a court of law. Concessions include modifying original loan terms to reduce or defer cash payments required as part of the loan agreement, including but not limited to a reduction of the stated interest rate for the remaining original life of the debt, an extension of the maturity date or dates at a stated interest rate lower than the current market rate for new debt with similar risk characteristics, a reduction of the face amount or maturity amount of the debt, or a reduction of accrued interest receivable on a debt. In its determination of whether the customer is experiencing financial difficulties, the Company considers numerous indicators, including but not limited to, whether the customer has declared or is in the process of declaring bankruptcy, whether there is substantial doubt about the customer's ability to continue as a going concern, whether the Company believes the customer's future cash flows will be insufficient to service the debt in accordance with the contractual terms of the existing agreement for the foreseeable future, and whether without modification the customer cannot obtain sufficient funds from other sources at an effective interest rate equal to the current market rate for similar debt for a non-troubled debtor.

If the Company concludes that both a concession has been granted and the concession was granted to a customer experiencing financial difficulties, the Company identifies the loan as a TDR. For purposes of the determination of an allowance for loan losses on these TDRs, the loan is reviewed for specific impairment in accordance with the Company's allowance for loan loss methodology. If it is determined that losses are probable on such TDRs, either because of delinquency or other credit quality indicators, the Company establishes specific reserves for these loans.

Servicing Rights

Primary servicing rights represent the Company's right to service consumer automobile loans for third-party whole-loan sales and loans sold as participations. Primary servicing involves the collection of payments from individual borrowers and the distribution of these payments to the investors.

The Company capitalizes the value expected to be realized from performing specified automobile servicing activities for others as automobile servicing rights ("ASRs") when the expected future cash flows from servicing are projected to be more than adequate compensation for such activities. These capitalized servicing rights are purchased or retained upon sale of consumer automobile loans.

The Company measures all consumer automobile servicing assets and liabilities at fair value. The Company defines servicing rights based on both the availability of market inputs and the manner in which the Company manages the risks of servicing assets and liabilities. The Company leverages all available relevant market data to determine the fair value of recognized servicing assets and liabilities.

The Company calculates the fair value of ASRs using various assumptions including future cash flows, market discount rates, expected prepayments, servicing costs and other factors. A significant change in prepayments of loans in the servicing portfolio could result in significant changes in the valuation adjustments, thus creating potential volatility in the carrying amount of ASRs.

For the years ended December 31, 2016 and 2015, expected future cash flows from ASRs approximated adequate compensation for such activities. Accordingly, the Company has not recorded an asset or liability. There were no loan sales during the year ended December 31, 2017. Total income earned from servicing activities was approximately \$1.0 million for the year ended December 31, 2017, and \$1.6 million for both the years ended December 31, 2016, and 2015, respectively.

Other Real Estate Owned

Real estate acquired through, or in lieu of, foreclosure, or other real estate owned on the consolidated balance sheets, is initially recorded at fair value at the time of foreclosure, less estimated selling cost, and any related write down is charged to the allowance for loan losses. Valuations are periodically performed by management and provisions for estimated losses on other real estate owned are charged to expense when fair value is determined to be less than the carrying value.

Costs relative to the development and improvement of properties are capitalized to the extent realizable, whereas ordinary upkeep disbursements are charged to expense. The ability of the Company to recover the carrying value of real estate is based upon future sales of the other real estate owned. The ability to affect such sales is subject to market conditions and other factors, many of which are beyond the Company's control. Operating income and expense of such properties is included in other operating income or expense, respectively, on the accompanying consolidated statements of income. Gain or loss on the disposition of such properties is included in noninterest income on the consolidated statements of income.

Bank Premises and Equipment

Land is carried at cost. Buildings and equipment are stated at cost, less accumulated depreciation. Depreciation expense is computed by the straight-line method and is charged to expense over the estimated useful lives of the assets, which range from 1 to 39 years. Costs of major additions and improvements are capitalized. Expenditures for maintenance and repairs are expensed as incurred. Gains or losses on the disposition of land, buildings, and equipment are included in noninterest income on the consolidated statements of income.

Bank Owned Life Insurance

The Company invests in bank owned life insurance ("BOLI") policies that provide earnings to help cover the cost of employee benefit plans. The Company is the owner and beneficiary of the life insurance policies it purchased directly on a chosen group of employees. The policies are carried on the Company's consolidated balance sheet at their cash surrender value and are subject to regulatory capital requirements. The determination of the cash surrender value includes a full evaluation of the contractual terms of each policy and assumes the surrender of policies on an individual-life by individual-life basis. Additionally, the Company periodically reviews the creditworthiness of the insurance companies that have underwritten the policies. Earnings accruing to the Company are derived from the general account investments of the insurance companies. Increases in the net cash surrender value of BOLI policies and insurance proceeds received are not taxable and are recorded in noninterest income in the consolidated statements of income.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of the net identifiable assets acquired in a business combination. Goodwill and other intangible assets deemed to have an indefinite useful life are not amortized but instead are subject to review for impairment annually, or more frequently if deemed necessary, in accordance with the provisions of FASB ASC Topic 350, *Intangibles – Goodwill and Other*.

Intangible assets with estimable useful lives are amortized over their respective estimated useful lives and reviewed for impairment in accordance with FASB ASC Topic 360, *Property, Plant, and Equipment*. If impaired, the asset is written down to its estimated fair value. No impairment charges have been recognized through December 31, 2017. Core deposit intangibles representing the value of the acquired core deposit base are generally recorded in connection with business combinations involving banks and branch locations. The Company's policy is to amortize core deposit intangibles over the estimated useful life of the deposit base. The remaining useful lives of core deposit intangibles are evaluated periodically to determine whether events and circumstances warrant revision of the remaining period of amortization. The Company's core deposit intangibles are currently amortized using the sum-of-the-years-digits basis over 10 to 15 years. See Note 8, Goodwill and Other Intangible Assets, for additional information.

Repurchase Agreements

Securities sold under agreements to repurchase are secured borrowings treated as financing activities and are carried at the amounts at which the securities will be subsequently reacquired as specified in the respective agreements.

Stock-Based Compensation

The Company accounts for stock-based compensation under the provisions of ASC Topic 718, *Compensation - Stock Compensation*. Under this accounting guidance, fair value is established as the measurement objective in accounting for share-based payment awards and requires the application of a fair value based measurement method in accounting for compensation costs, which is recognized over the requisite service period. The impact of forfeitures of share-based payment awards on compensation expense is recognized as forfeitures occur. See Note 15, Stock-Based Compensation, for further disclosures regarding stock-based compensation.

Off-Balance Sheet Credit-Related Financial Instruments

The Company accounts for its guarantees in accordance with the provisions of ASC Topic 460, *Guarantees*. In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under credit card agreements, commercial letters of credit and standby letters of credit. Such financial instruments are recorded when they are funded.

Derivative Financial Instruments

ASC Topic 815, *Derivatives and Hedging*, requires that all derivatives be recognized as assets or liabilities in the balance sheet at fair value. Derivatives executed with the same counterparty are generally subject to master netting arrangements, however, fair value amounts recognized for derivative financial instruments and fair value amounts recognized for the right/obligation to reclaim/return cash collateral are not offset for financial reporting purposes.

In the course of its business operations, the Company is exposed to certain risks, including interest rate, liquidity and credit risk. The Company manages its risks through the use of derivative financial instruments, primarily through management of exposure due to the receipt or payment of future cash amounts based on interest rates. The Company's derivative financial instruments manage the differences in the timing, amount and duration of expected cash receipts and payments.

Derivatives which are designated and qualify as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. The effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings when the forecasted transaction affects earnings or when the hedge is terminated. The ineffective portion of the gain or loss is reported in earnings immediately.

In applying hedge accounting for derivatives, the Company establishes a method for assessing the effectiveness of the hedging derivative and a measurement approach for determining the ineffective aspect of the hedge upon the inception of the hedge. These methods are consistent with the Company's approach to managing risk. Note 13, Derivative Financial Instruments, describes the derivative instruments currently used by the Company and discloses how these derivatives impact the Company's financial position and results of operations.

Income Taxes

The provision for income taxes is based on amounts reported in the consolidated statements of income after exclusion of nontaxable income such as interest on state and municipal securities. Also, certain items of income and expenses are recognized in different time periods for financial statement purposes than for income tax purposes. Thus, provisions for deferred taxes are recorded in recognition of such temporary differences.

Deferred taxes are determined utilizing a liability method whereby deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

The Company has adopted accounting guidance related to accounting for uncertainty in income taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

Revenue Recognition

The Company recognizes revenue in the consolidated statements of income as it is earned and when collectability is reasonably assured. The primary source of revenue is interest income from interest-earning assets, which is recognized on the accrual basis of accounting using the effective interest method. The recognition of revenues from interest-earning assets is based upon formulas from underlying loan agreements, securities contracts, or other similar contracts. Noninterest income is recognized on the accrual basis of accounting as services are provided or as transactions occur. Noninterest income includes fees from deposit accounts, merchant services, ATM and debit card fees, servicing fees, and other miscellaneous services and transactions.

Earnings Per Share

Basic earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share separately for common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings distributed and undistributed, are allocated to participating securities and common shares based on their respective rights to receive dividends. Unvested share-based payment awards that contain nonforfeitable rights to dividends are considered participating securities (i.e. unvested time-vested restricted stock), not subject to performance based measures.

Basic earnings per share is calculated by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is calculated in a manner similar to that of basic earnings per share except that the weighted average number of common shares outstanding is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares (such as those resulting from the exercise of stock options and warrants) were issued during the period, computed using the treasury stock method.

Statements of Cash Flows

For purposes of the statements of cash flows, cash and cash equivalents include cash and amounts due from banks and federal funds sold due to the short-term nature of these items.

Comprehensive Income

Comprehensive income includes net income and other comprehensive income or loss, which in the case of the Company includes unrealized gains and losses on securities and changes in the fair value of interest rate swaps, net of related income taxes.

Acquisition Accounting

Acquisitions are accounted for under the purchase method of accounting. Purchased assets and assumed liabilities are recorded at their respective acquisition date fair values, and identifiable intangible assets are recorded at fair value. If the consideration given exceeds the fair value of the net assets received, goodwill is recognized. If the fair value of the net assets received exceeds the consideration given, a bargain purchase gain is recognized. Fair values are subject to refinement for up to one year after the closing date of an acquisition as information relative to closing date fair values becomes available.

Purchased loans acquired in a business combination are recorded at their estimated fair value as of the acquisition date. The fair value of loans acquired is determined using a discounted cash flow model based on assumptions regarding the amount and timing of principal and interest prepayments, estimated payments, estimated default rates, estimated loss severity in the event of defaults, and current market rates. The fair value adjustment for performing acquired loans is amortized over the life of the loan using the effective interest method. Estimated credit losses are included in the determination of fair value; therefore, an allowance for loan losses is not recorded on the acquisition date. Subsequent to acquisition, acquired performing loans are evaluated using a similar allowance methodology as the legacy portfolio. An allowance for credit losses is only recorded to the extent that the required reserves exceed the unamortized fair value adjustment.

Acquired Impaired Loans

The Company accounts for acquired impaired loans under FASB ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (“ASC 310-30”). An acquired loan is considered impaired when there is evidence of credit deterioration since origination and it is probable at the date of acquisition that the Company will be unable to collect all contractually required payments. For acquired impaired loans, the Company (a) calculates the contractual amount and timing of undiscounted principal and interest payments (the “undiscounted contractual cash flows”) and (b) estimates the amount and timing of undiscounted expected principal and interest payments (the “undiscounted expected cash flows”). Under ASC 310-30, the difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents an estimate of the loss exposure of principal and interest related to the acquired impaired loan portfolio, and such amount is subject to change over time based on the performance of such loans.

The excess of expected cash flows at acquisition over the initial fair value of acquired impaired loans is referred to as the “accretable yield” and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. As required by ASC 310-30, the Company periodically re-estimates the expected cash flows to be collected over the life of the acquired impaired loans. Improvements in expected cash flows over those originally estimated increase the accretable yield and are recognized as interest income prospectively. Decreases in the amount and changes in the timing of expected cash flows compared to those originally estimated decrease the accretable yield and usually result in a provision for loan losses and the establishment of an allowance for loan losses with respect to the acquired impaired loan. The carrying value of acquired impaired loans is reduced by payments received, both principal and interest, and increased by the portion of the accretable yield recognized as interest income. If future cash flows are not reasonably estimable, the Company accounts for the acquired loans using the cash basis method.

Share Repurchases

Effective January 1, 2015, companies incorporated under Louisiana law became subject to the Louisiana Business Corporation Act. Provisions of the Louisiana Business Corporation Act eliminate the concept of treasury stock. Rather, shares purchased by the Company constitute authorized but unissued shares. Accounting principles generally accepted in the United States of America state that accounting for treasury stock shall conform to state law. The Company's consolidated financial statements as of December 31, 2017 and 2016 reflect this change. The cost of shares purchased by the Company has been allocated to common stock and surplus balances.

Reclassifications

Certain reclassifications have been made to the 2016 and 2015 financial statements to confirm to the 2017 presentation. In that regard, ASU 2016-09, "*Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*" ("ASU 2016-09"), became effective for us on January 1, 2017. ASU 2016-09 requires that excess tax benefits and deficiencies be recognized as a component of income taxes within the income statement. Additionally, ASU 2016-09 requires that all income tax-related cash flows resulting from share-based payments be reported as operating activities in the statement of cash flows. Previously, income tax benefits at award settlement were reported as a reduction to operating cash flows and an increase to financing cash flows to the extent that those benefits exceeded the income tax benefits reported in earnings during the award's vesting period. We have elected to apply that change in cash flow presentation on a prospective basis. ASU 2016-09 also requires that companies make an accounting policy election regarding forfeitures, to either estimate the number of awards that are expected to vest or account for them when they occur. We have elected to recognize forfeitures as they occur. The impact of this change and that of the remaining provisions of ASU 2016-09 did not have a significant impact on our financial statements.

Impact of New Accounting Pronouncements

Accounting Standards Update ("ASU") 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting was effective for the Company on January 1, 2017. ASU 2016-09 requires that all income tax effects related to vestings of share-based payment awards be reported in earnings as an increase (or decrease) to income tax expense. Previously, excess income tax benefits of a vested award were reported as an increase (or decrease) to additional paid-in capital to the extent that those benefits were greater than (or less than) the income tax benefits recognized in earnings during the award's vesting period. The requirement to report those income tax effects in earnings has been applied to vestings occurring on or after January 1, 2017 and resulted in recording a \$0.1 million tax benefit for the year ended December 31, 2017. ASU 2016-09 also requires that all income tax-related cash flows resulting from share-based payments be reported as operating activities in the statement of cash flows. We have elected to apply that change in cash flow classification on a prospective basis, and prior periods have not been adjusted. The impact of this change and that of the remaining provisions of ASU 2016-09 did not have a significant impact on our financial statements.

The Company early adopted ASU 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income in the fourth quarter of 2017. ASU 2018-02, issued in February 2018, provides for the reclassification of the effect of remeasuring deferred tax balances related to items within accumulated other comprehensive income (AOCI) to retained earnings resulting from the Tax Cuts and Jobs Act of 2017. As a result, the Company reclassified \$0.3 million from AOCI to retained earnings.

Recent Accounting Pronouncements

This section briefly describes accounting standards that have been issued, but are not yet adopted, that could impact the Company's financial statements.

FASB ASC Topic 815 "Derivatives and Hedging" ASU No. 2017-12. The Financial Accounting Standards Board ("FASB") issued ASU No. 2017-12 in August 2017. The ASU amends the hedge accounting model in Topic 815 to enable entities to better portray the economics of their risk management activities in the financial statements and enhance the transparency and understandability of hedge results. The amendments expand an entity's ability to hedge nonfinancial and financial risk components and reduce complexity in fair value hedges of interest rate risk. The guidance eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires the entire change in the fair value of a hedging instrument to be presented in the same income statement line as the hedged item. The guidance also eases certain documentation and assessment requirements and modifies the accounting for components excluded from the assessment of hedge effectiveness. This amended guidance is effective for the Company on January 1, 2019, and, given the current level of derivatives designated as hedges, is not expected to have a material impact on our consolidated operating results or financial condition.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

FASB ASC Topic 718 “Compensation – Stock Compensation: Scope of Modification Accounting” ASU No. 2017-09. The FASB issued ASU No. 2017-09 in May 2017. The ASU clarifies when changes to terms or conditions of a share-based payment award must be accounted for as a modification. Under the new guidance, an entity will not apply modification accounting to a share-based payment award if all of the following are the same immediately before and after the change: (i) the fair value of the award, (ii) the vesting conditions of the award, and (iii) the classification of the award as either an equity or liability instrument.

ASU 2017-09 will be effective for the Company beginning January 1, 2018. Early adoption is permitted. The guidance requires companies to apply the requirements prospectively to awards modified on or after the adoption date. ASU 2017-09 is not expected to have a significant impact on the Company’s consolidated financial statements.

FASB ASC Subtopic 310-20 “Receivables – Nonrefundable Fees and Other Costs, Premium Amortization on Purchased Callable Debt Securities” ASU No. 2017-08. The FASB issued ASU No. 2017-08 in March 2017. The amendments in the ASU shorten the amortization period for certain callable debt securities held at a premium. Specifically, the amendments require the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity.

ASU 2017-08 will be effective for the Company beginning January 1, 2019. Early adoption is permitted, including adoption in an interim period. If an entity early adopts in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The amendments should be applied on a modified retrospective basis, with a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The Company is assessing the impact of ASU 2017-08 on its accounting and disclosures.

FASB ASC Topic 805 “Business Combinations: Clarifying the Definition of a Business” ASU No. 2017-01. The FASB issued ASU No. 2017-01 in January 2017. The amendments in the ASU are intended to clarify the definition and the current interpretation of a business to assist companies and other reporting organizations with evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses.

The ASU will be effective for the Company beginning January 1, 2018. The amendments will be applied prospectively on or after the effective date. Early application of the amendments in this ASU is allowed for transactions, including when a subsidiary or group of assets is deconsolidated/derecognized, in which the acquisition date occurs before the issuance date or effective date of the amendments, only when the transaction has not been reported in financial statements that have been issued or made available for issuance. The adoption of this standard is not expected to have a material impact on the Company’s financial statements.

FASB ASC Topic 350 “Intangibles-Goodwill and Other: Simplifying the Test for Goodwill Impairment” ASU No. 2017-04. The FASB issued ASU No. 2017-04 in January 2017. This ASU simplifies how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Therefore, any carrying amount which exceeds the reporting unit’s fair value, up to the amount of goodwill recorded, will be recognized as an impairment loss.

ASU 2017-04 will be effective for the Company on January 1, 2020. The amendments will be applied prospectively on or after the effective date. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. Based on recent goodwill impairments tests, which did not require the application of Step 2, the Company does not expect the adoption of this ASU to have a material impact.

FASB ASC Topic 230 “Statement of Cash Flows – Classification of Certain Cash Receipts and Cash Payments” ASU No. 2016-15. The FASB issued ASU No. 2016-15 in August 2016. The amendments in the ASU address eight specific cash flow issues with the objective of reducing the existing diversity in practice, as the issues are either unclear or do not have specific guidance under current GAAP.

ASU 2016-15 will be effective for the Company on January 1, 2018. The adoption of this standard is not expected to have a material impact on the Company’s consolidated statement of cash flows.

FASB ASC Topic 326 “Financial Instruments – Credit Losses: Measurement of Credit Losses on Financial Instruments” ASU No. 2016-13. The FASB issued ASU No. 2016-13 in June 2016. The ASU requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts and requires enhanced disclosures related to the significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization’s portfolio. In addition, ASU 2016-13 amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. ASU 2016-13 will be effective for the Company on January 1, 2020. We are currently evaluating the potential impact of ASU 2016-13 on our financial statements. In that regard, we have formed a cross-functional working group, under the direction of our Chief Financial Officer and our Chief Risk Officer. The working group is comprised of individuals from various functional areas including credit, risk management, finance and information technology. We are currently developing an implementation plan to include assessment of processes, portfolio segmentation, model development, system requirements and the identification of data and resource needs, among other things. We are also currently evaluating selected third-party vendor solutions to assist us in the application of the ASU 2016-13. The adoption of ASU 2016-13 is likely to result in an increase in the allowance for loan losses as a result of changing from an “incurred loss” model, which encompasses allowances for current known and inherent losses within the portfolio, to an “expected loss” model, which encompasses allowances for losses expected to be incurred over the life of the portfolio. Furthermore, ASU 2016-13 will necessitate that we establish an allowance for expected credit losses on debt securities. While we are currently unable to reasonably estimate the impact of adopting ASU 2016-13, we expect that the impact of adoption will be significantly influenced by the composition, characteristics and quality of our loan and securities portfolios as well as the prevailing economic conditions and forecasts as of the adoption date.

FASB ASC Topic 842 “Leases” ASU No. 2016-02. The FASB issued ASU No. 2016-02 in February 2016 to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet by lessees for those leases classified as operating leases under current U.S. GAAP and disclosing key information about leasing arrangements.

The amendments in this ASU are effective for the Company beginning January 1, 2018. Adoption of ASU 2016-02 is not expected to have a material impact on the Company’s consolidated financial statements. The Company leases certain properties under operating leases that will result in the recognition of lease assets and lease liabilities on the Company’s balance sheet under the ASU; however, the majority of the Company’s properties and all of the Company’s equipment are owned, not leased.

FASB ASC Topic 825 “Financial Instruments – Overall” ASU No. 2016-01. The FASB issued ASU No. 2016-01 in January 2016 to address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The ASU will not change the guidance for classifying and measuring investments in debt securities or loans; however, it will impact how entities measure certain equity investments, recognize changes in the fair value of financial liabilities measured under the fair value option that are attributable to instrument-specific credit risk, and disclose and present financial assets and liabilities in financial statements. The main provisions require investments in equity securities to be measured at fair value through net income, unless they qualify for a new practicability exception, the equity method of accounting, or consolidation, and require fair value changes arising from changes in instrument-specific credit risk for financial liabilities that are measured under the fair value option to be recognized in other comprehensive income. The amendments will also require entities to present financial assets and financial liabilities separately, grouped by measurement category and form of financial asset in the statement of financial position or in the accompanying notes to the financial statements. Entities will also no longer have to disclose the methods and significant assumptions for financial instruments measured at amortized cost, but will be required to measure such instruments under the “exit price” notion for disclosure purposes.

The amendments in this ASU are effective for the Company beginning January 1, 2018. The Company will record a cumulative-effect adjustment to beginning retained earnings as of the beginning of the first reporting period in which the guidance is adopted, with two exceptions. The amendments related to equity investments without readily determinable fair values will be effective prospectively. The requirement to use the exit price notion to measure fair value of financial instruments for disclosure purposes will also be applied prospectively.

The Company does not expect a significant cumulative-effect adjustment to be recorded at adoption or any significant impact to the consolidated financial statements associated with the accounting for its current equity investments. The Company does anticipate financial statement disclosures to be impacted, specifically related to financial instruments measured at amortized cost whose fair values are disclosed under the “entry price” notion, but is currently still in the process of determining the impact.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

FASB ASC Topic 606 “Revenue from Contracts with Customers” ASU No. 2014-09. ASU 2014-09 implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract and (v) recognize revenue when (or as) the entity satisfies a performance obligation. Our revenue is comprised of net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and noninterest income. ASU 2014-09 will impact certain recurring revenue streams within noninterest income such as service charges on deposit accounts; however, these changes will not have a significant impact on our financial statements. ASU 2014-09 will be effective for us on January 1, 2018 using a modified retrospective transition approach and will not have a significant impact on our financial statements.

NOTE 2. BUSINESS COMBINATIONS

Citizens Bancshares, Inc.

On July 1, 2017, the Company completed the acquisition of Citizens Bancshares, Inc. (“Citizens”) and its wholly-owned subsidiary, Citizens Bank, located in Evangeline Parish, Louisiana. The Company acquired 100% of Citizens’ outstanding common shares for an aggregate amount of cash consideration equal to \$45.8 million, or approximately \$419.20 per share. The acquisition of Citizens expands the Company’s branch footprint in Louisiana and increases the core deposit base to help position the Company to continue to grow. After fair value adjustments, the acquisition added \$251 million in total assets, \$129 million in loans, and \$212 million in deposits. As consideration paid was in excess of the net fair value of acquired assets, the Company recorded \$9.0 million of goodwill.

The table below shows the allocation of the consideration paid for Citizens’ common equity to the acquired identifiable assets and liabilities assumed and the goodwill generated from the transaction (dollars in thousands). The fair values listed below, primarily related to loans and deferred tax assets and liabilities, are subject to refinement for up to one year after the closing date of the acquisition as additional information becomes available.

Purchase price:	
Cash paid	\$ 45,800
Fair value of assets acquired:	
Cash and cash equivalents	44,565
Investment securities	69,912
Loans	129,181
Bank premises and equipment	3,337
Core deposit intangible asset	1,462
Other assets	2,202
Total assets acquired	250,659
Fair value of liabilities acquired:	
Deposits	212,228
Other liabilities	1,652
Total liabilities assumed	213,880
Fair value of net assets acquired	36,779
Goodwill	\$ 9,021

Fair value adjustments to assets acquired and liabilities assumed are generally amortized using the effective yield method over periods consistent with the average life, useful life and/or contractual term of the related assets and liabilities.

The fair value of net assets acquired includes a fair value adjustment to loans as of the acquisition date. The adjustment for the acquired loan portfolio is based on current market interest rates, and the Company’s evaluation of credit losses identified.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The tables below present information about the loans acquired as of the date of acquisition (dollars in thousands).

	Purchase Credit Impaired
Contractually required principal	\$ 5,123
Non-accretable difference	(700)
Cash flows expected to be collected	4,423
Accretable yield	—
Fair value of acquired loans	<u>\$ 4,423</u>

	Non-Credit Impaired
Contractually required principal	\$ 127,479
Cash flows expected to be collected	126,737
Accretable yield	(1,979)
Fair value of acquired loans	<u>\$ 124,758</u>

BOJ Bancshares, Inc.

On December 1, 2017, the Company completed the acquisition of BOJ Bancshares, Inc. (“BOJ”) and its wholly-owned subsidiary, The Highlands Bank, located in Feliciana Parish, Louisiana. The Company acquired 100% of BOJ’s outstanding common shares for an aggregate merger consideration consisting of \$3.95 million in cash, and an aggregate of 799,559 shares of Investar common stock, for a total of approximately \$22.7 million. As with the Citizens acquisition, the acquisition of BOJ expands the Company’s branch footprint in Louisiana, allowing us to serve more customers in our surrounding market areas. After fair value adjustments, the acquisition added \$152 million in total assets, \$103 million in loans, and \$126 million in deposits. As consideration paid was in excess of the net fair value of acquired assets, the Company recorded \$5.4 million of goodwill.

The table below shows the allocation of the consideration paid for BOJ’s common equity to the acquired identifiable assets and liabilities assumed and the goodwill generated from the transaction (dollars in thousands). The fair values listed below, primarily related to loans and deferred tax assets and liabilities, are subject to refinement for up to one year after the closing date of the acquisition as additional information becomes available.

Purchase price:	
Cash paid	\$ 3,950
Common stock	18,749
Fair value of assets acquired:	
Cash and cash equivalents	26,438
Investment securities	16,194
Loans	102,810
Bank premises and equipment	3,753
Core deposit intangible asset	1,018
Other assets	2,237
Total assets acquired	<u>152,450</u>
Fair value of liabilities acquired:	
Deposits	125,789
FHLB advances	5,956
Trust preferred	2,178
Other liabilities	1,209
Total liabilities assumed	<u>135,132</u>
Fair value of net assets acquired	<u>17,318</u>
Goodwill	<u>\$ 5,381</u>

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

Fair value adjustments to assets acquired and liabilities assumed are generally amortized using the effective yield method over periods consistent with the average life, useful life and/or contractual term of the related assets and liabilities.

The fair value of net assets acquired includes a fair value adjustment to loans as of the acquisition date. The adjustment for the acquired loan portfolio is based on current market interest rates, and the Company's initial evaluation of credit losses identified.

The tables below present information about the loans acquired as of the date of acquisition (dollars in thousands).

	Purchase Credit Impaired
Contractually required principal	\$ 4,557
Non-accretable difference	(162)
Cash flows expected to be collected	4,395
Accretable yield	—
Fair value of acquired loans	<u>\$ 4,395</u>

	Non-Credit Impaired
Contractually required principal	\$ 106,324
Cash flows expected to be collected	99,745
Accretable yield	(1,330)
Fair value of acquired loans	<u>\$ 98,415</u>

Supplemental Unaudited Pro Forma Information

The following unaudited supplemental pro forma information is presented to show estimated results assuming Citizens and BOJ were acquired as of January 1, 2016. These unaudited pro forma results are not necessarily indicative of the operating results that the Company would have achieved had it completed the acquisitions as of January 1, 2016 and should not be considered representative of future operating results. The pro forma net income for the year ended December 31, 2017 excludes the tax-affected amount of \$2.2 million of acquisition expenses recorded in noninterest expense by the Company, Citizens, and BOJ.

<i>(dollars in thousands)</i>	Unaudited Pro Forma Information for the years ended December 31,	
	2017	2016
Interest income	\$ 64,222	\$ 58,996
Noninterest income	5,248	7,392
Net income	10,641	11,979

In the year ended December 31, 2017, since the acquisition dates of July 1, 2017 for Citizens and December 1, 2017 for BOJ, the acquired companies have added approximately \$4.4 million, \$0.6 million, and \$1.1 million to interest income, noninterest income, and net income, respectively.

Acquisition Expense

Acquisition related costs of \$1.9 million are included in acquisition expenses in the accompanying consolidated statements of income, for the twelve month period ended December 31, 2017. These costs include system conversion and integrating operations charges as well as legal and consulting expenses.

NOTE 3. INVESTMENT SECURITIES

The amortized cost and approximate fair value of investment securities classified as available for sale are summarized below as of the dates presented (dollars in thousands).

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The unrealized losses in the Bank's investment portfolio, caused by interest rate increases, are not credit issues. The Bank does not intend to sell the securities and it is not more likely than not that the Bank will be required to sell the investments before recovery of their amortized cost bases. The Bank does not consider these securities to be other-than-temporarily impaired at December 31, 2017 or December 31, 2016.

The amortized cost and approximate fair value of investment debt securities, by contractual maturity (including mortgage-backed securities), are shown below as of the dates presented (dollars in thousands). Actual maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

NOTE 4. LOANS

The Company's loan portfolio consists of the following categories of loans as of the dates presented (dollars in thousands). There were no loans held for sale as of the dates presented.

	December 31,	
	2017	2016
Construction and development	\$ 157,667	\$ 90,737
1-4 Family	276,922	177,205
Multifamily	51,283	42,759
Farmland	23,838	8,207
Commercial real estate	537,364	380,716
Total mortgage loans on real estate	<u>1,047,074</u>	<u>699,624</u>
Commercial and industrial	135,392	85,377
Consumer	76,313	108,425
Total loans	<u>\$ 1,258,779</u>	<u>\$ 893,426</u>

Unamortized premiums and discounts on loans, included in the total loans balances above, were \$2.6 million and \$1.2 million at December 31, 2017 and 2016, respectively.

Nonaccrual and Past Due Loans

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on nonaccrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. In determining whether or not a borrower may be unable to meet payment obligations for each class of loans, we consider the borrower's debt service capacity through the analysis of current financial information, if available, and/or current information with regards to our collateral position. Regulatory provisions would typically require the placement of a loan on nonaccrual status if (i) principal or interest has been in default for a period of 90 days or more unless the loan is both well secured and in the process of collection or (ii) full payment of principal and interest is not expected. Loans may be placed on nonaccrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income on nonaccrual loans is recognized only to the extent that cash payments are received in excess of principal due. A loan may be returned to accrual status when all the principal and interest amounts contractually due are brought current and future principal and interest amounts contractually due are reasonably assured, which is typically evidenced by a sustained period (at least six months) of repayment performance by the borrower.

The total December 31, 2017 balance in the table above includes approximately \$217.5 million of loans acquired in 2017 that were recorded at fair value as of the acquisition dates.

Credit Quality Indicators

Loans are categorized into risk categories based on relevant information about the ability of borrowers to service their debt, such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The following definitions are utilized for risk ratings, which are consistent with the definitions used in supervisory guidance.

Pass – Loans not meeting the criteria below are considered pass. These loans have high credit characteristics and financial strength. The borrowers at least generate profits and cash flow that are in line with peer and industry standards and have debt service coverage ratios above loan covenants and our policy guidelines. For some of these loans, a guaranty from a financially capable party mitigates characteristics of the borrower that might otherwise result in a lower grade.

Special Mention – Loans classified as special mention possess some credit deficiencies that need to be corrected to avoid a greater risk of default in the future. For example, financial ratios relating to the borrower may have deteriorated. Often, a special mention categorization is temporary while certain factors are analyzed or matters addressed before the loan is re-categorized as either pass or substandard.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

Substandard – Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the borrower or the liquidation value of any collateral. If deficiencies are not addressed, it is likely that this category of loan will result in the Bank incurring a loss. Where a borrower has been unable to adjust to industry or general economic conditions, the borrower’s loan is often categorized as substandard.

Doubtful – Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss – Loans classified as loss are considered uncollectible and of such little value that their continuance as recorded assets is not warranted. This classification does not mean that the assets have absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off these assets.

The tables below present a summary of the Company’s loan portfolio by credit quality indicator as of the dates presented (dollars in thousands).

	December 31, 2017			
	Pass	Special Mention	Substandard	Total
Construction and development	\$ 157,385	\$ —	\$ 282	\$ 157,667

Commercial and industrial	83,215	59	2,103	85,377
Consumer	106,916	501	1,008	108,425
Total loans	<u>\$ 889,142</u>	<u>\$ 580</u>	<u>\$ 3,704</u>	<u>\$ 893,426</u>

The Company had no loans that were classified as doubtful or loss as of December 31, 2017 or 2016.

Loan participations and whole loans sold to and serviced for others are not included in the accompanying consolidated balance sheets. The balances of the participations and whole loans sold were \$204.2 million and \$274.9 million as of December 31, 2017 and 2016, respectively. The unpaid principal balances of these loans were approximately \$237.3 million and \$319.6 million at December 31, 2017 and 2016, respectively.

In the ordinary course of business, the Company makes loans to its executive officers, principal shareholders, directors and to companies in which these borrowers are principal owners. Loans outstanding to such borrowers (including companies in which they are principal owners) amounted to approximately \$31.2 million and \$20.0 million as of December 31, 2017 and December 31, 2016, respectively.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The table below shows the aggregate amount of loans to such related parties for the years ended December 31, 2017 and 2016 (dollars in thousands).

	December 31,	
	2017	2016
Balance, beginning of period	\$ 19,957	\$ 17,992

Impaired Loans

The Company considers a loan to be impaired when, based on current information and events, the Company determines that it will not be able to collect all amounts due according to the loan agreement, including scheduled interest payments. Determination of impairment is treated the same across all classes of loans. When the Company identifies a loan as impaired, it measures the impairment based on the present value of expected future cash flows, discounted at the loan's effective interest rate, except when the sole (remaining) source of repayment for the loans is the operation or liquidation of the collateral. In these cases when foreclosure is probable, the Company uses the current fair value of the collateral, less selling costs, instead of discounted cash flows. If the Company determines that the value of the impaired loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs, and unamortized premium or discount), the Company recognizes impairment through an allowance estimate or a charge-off to the allowance.

When the ultimate collectability of the total principal of an impaired loan is in doubt and the loan is on nonaccrual, all payments are applied to principal, under the cost recovery method. When the ultimate collectability of the total principal of an impaired loan is not in doubt and the loan is on nonaccrual, contractual interest is credited to interest income when received, under the cash basis method.

The following tables contain information on the Company's impaired loans, which include all TDRs and nonaccrual loans individually evaluated for impairment for purposes of determining the allowance for loan losses. The average balances are calculated based on the month-end balances of the loans during the period reported (dollars in thousands).

Troubled Debt Restructurings

In situations where, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession for other than an insignificant period of time to the borrower that the Company would not otherwise consider, the related loan is classified as a troubled debt restructuring ("TDR"). The Company strives to identify borrowers in financial difficulty early and work with them to modify their loans to more affordable terms before such loans reach nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where the Company grants the borrower new terms that provide for a reduction of either interest or principal, the Company measures any impairment on the restructuring as previously noted for impaired loans.

Loans classified as TDRs, consisting of eighteen credits, totaled approximately \$1.6 million at December 31, 2017, compared to eighteen credits totaling \$2.4 million at December 31, 2016. Eight of the restructured loans were considered TDRs due to modification of terms through adjustments to maturity, nine of the restructured loans were considered TDRs due to a reduction in the interest rate to a rate lower than the current market rate, and one restructured loan was considered a TDR due to modification of terms through principal payment forbearance, paying interest only for a specified period of time. As of December 31, 2017, and December 31, 2016 all restructured loans were performing under their modified terms. The Company individually evaluates each TDR for allowance purposes, primarily based on collateral value. TDRs are excluded from the loans collectively evaluated for impairment (ASC 450).

At December 31, 2017 and 2016, there were no available balances on loans classified as TDRs that the Company was committed to lend.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The table below presents the TDR pre- and post-modification outstanding recorded investments by loan categories for loans modified during the years ended December 31, 2017 and 2016 (dollars in thousands).

	December 31, 2017			December 31, 2016

Total	\$ 1,834	\$ 80

NOTE 6. OTHER REAL ESTATE OWNED

The table below shows the activity in other real estate owned for the periods presented (dollars in thousands).

	December 31,	
	2017	2016
Balance, beginning of period	\$ 4,065	\$ 725
Transfers from loans	42	3,875
Acquired other real estate owned	477	—
Sales of other real estate owned	(564)	(528)
Write-downs	(183)	(7)
Balance, end of period	\$ 3,837	\$ 4,065

As of December 31, 2017 and December 31, 2016, other real estate owned related to acquisitions totaled approximately \$0.2 million and \$0.3 million, respectively.

NOTE 7. BANK PREMISES AND EQUIPMENT

Bank premises and equipment consisted of the following as of the dates indicated (dollars in thousands).

	December 31,	
	2017	2016
Land	\$ 10,476	\$ 9,668
Buildings and improvements	25,750	18,641
Furniture and equipment	7,419	6,567
Software	812	684
Construction-in-progress	908	2,913
Less: Accumulated depreciation and amortization	(7,825)	(6,751)
Bank premises and equipment, net	\$ 37,540	\$ 31,722

Depreciation and amortization related to bank premises and equipment charged to noninterest expense was approximately \$1.9 million, \$1.5 million and \$1.4 million for the years ended December 31, 2017, 2016 and 2015, respectively.

NOTE 8. GOODWILL AND OTHER INTANGIBLE ASSETS

At December 31, 2017, goodwill and intangible assets totaled \$19.9 million and included no accumulated impairment losses. The Company's intangible assets consist of goodwill and core deposit intangible assets arising from acquisitions. Also included in intangible assets is a trademark intangible that was acquired during the year ended December 31, 2016. The Company has determined that the core deposit intangible assets have finite lives and amortizes them over the estimated useful lives of the assets.

Goodwill was recorded during the year ended December 31, 2017 as a result of the acquisitions of Citizens and BOJ, discussed in Note 2. The carrying amount of goodwill acquired from Citizens and BOJ as of December 31, 2017 was \$9.0 million and \$5.4 million, respectively. The trademark intangible had a carrying value of \$0.1 million at December 31, 2017 and 2016.

In accordance with ASC 350, Intangibles-Goodwill and Other, the Company reviews the carrying value of indefinite-lived intangible assets at least annually, or more frequently if certain impairment indicators exist. The Company performed its annual impairment testing in the fourth quarter of 2017 and determined that there was no impairment to its goodwill or trademark intangible asset.

The table below shows a summary of the core deposit intangible assets as of the dates presented (dollars in thousands).

	December 31,	
	2017	2016
Gross carrying amount	\$ 3,097	\$ 617
Accumulated amortization	(357)	(167)
Net carrying amount	\$ 2,740	\$ 450

The Company acquired core deposit intangibles of \$1.5 million and \$1.0 million in the Citizens and BOJ acquisitions, respectively, during the year ended December 31, 2017.

Core deposit intangibles are being amortized over their estimated useful lives, which range from 10 to 15 years. Amortization expense on the core deposit intangible assets recorded in depreciation and amortization totaled approximately \$190,000, \$41,000, and \$41,000 for the years ended December 31, 2017, 2016 and 2015, respectively. The future amortization schedule for the Company's core deposit intangible assets is as follows in the table below. The weighted average amortization period remaining for core deposit intangibles is 9.7 years.

(dollars in thousands)

2018	\$	477
2019		432
2020		387
2021		342
2022		297
Thereafter		805
	<u>\$</u>	<u>2,740</u>

NOTE 9. DEPOSITS

Deposits consisted of the following as of the dates presented (dollars in thousands).

	December 31,	
	2017	2016
Noninterest-bearing demand deposits	\$ 216,599	\$ 108,404
NOW accounts	208,683	171,556
Money market deposit accounts	146,140	123,079

Time deposits	536,443	451,888
Total deposits	<u>\$ 1,225,237</u>	<u>\$ 907,787</u>

The table below summarizes outstanding time deposits as of the dates indicated (dollars in thousands).

	December 31,	
	2017	2016
\$0 to \$99,999	\$ 252,636	\$ 268,875
\$100,000 to \$249,999	203,966	134,920
\$250,000 and above	79,841	48,093
	<u>\$ 536,443</u>	<u>\$ 451,888</u>

The contractual maturities of time deposits of \$100,000 or more outstanding are summarized in the table below as of the dates presented (dollars in thousands).

	December 31,	
	2017	2016
Time remaining until maturity:		
Three months or less	\$ 81,844	\$ 59,739
Over three through six months	55,411	26,053
Over six through twelve months	63,183	20,987
Over one year through three years	80,160	67,253
Over three years	3,209	8,981
	<u>\$ 283,807</u>	<u>\$ 183,013</u>

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The approximate scheduled maturities of time deposits for each of the next five years are shown below (dollars in thousands).

2018	\$	351,996
2019		147,465
2020		20,860
2021		10,948
2022		5,174
	<u>\$</u>	<u>536,443</u>

Public fund deposits as of December 31, 2017 and 2016 totaled approximately \$78.3 million and \$29.8 million, respectively. The funds were secured by U.S. government securities with a fair value of approximately \$67.5 million and \$28.1 million as of December 31, 2017 and 2016, respectively.

As of December 31, 2017 and 2016, total deposits outstanding to executive officers, principal shareholders, directors and to companies in which they are principal owners amounted to approximately \$40.4 million and \$29.4 million, respectively.

NOTE 10. SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Securities sold under agreements for repurchase (“repurchase agreements”) are secured borrowings that mature on a daily basis. The balances of repurchase agreements were \$21.9 million and \$39.1 million as of December 31, 2017 and December 31, 2016, respectively. These funds were secured by investment securities with fair values of approximately \$23.3 million and \$49.3 million as of December 31, 2017 and December 31, 2016, respectively. The interest rate paid for repurchase agreements is tiered, based on balance, and is indexed to the Federal Funds Rate. The weighted average interest rate on repurchase agreements was 0.66% and 0.20% at December 31, 2017 and December 31, 2016, respectively. The weighted-average rate paid for repurchase agreements during the year ended December 31, 2017 was 0.33% and the weighted average rate for both years ended December 31, 2016 and 2015 was 0.20%.

NOTE 11. SUBORDINATED DEBT SECURITIES

On March 24, 2017, the Company issued and sold \$18.6 million in aggregate principal amount of its 6.00% Fixed-to-Floating Rate Subordinated Notes (the “Notes”) due March 30, 2027. Beginning on March 30, 2022, the Company may redeem the Notes, in whole or in part, at their principal amount plus any accrued and unpaid interest. The Notes bear an interest rate of 6.00% per annum until March 30, 2022, on which date the interest rate will reset quarterly to an annual interest rate equal to the then-current LIBOR plus 394.5 basis points.

The carrying value of subordinated debt was \$18.2 million at December 31, 2017. The subordinated debt securities are recorded net of issuance costs of \$0.4 million, which are being amortized using the straight-line method over the life of the Notes.

NOTE 12. OTHER BORROWED FUNDS

Federal Home Loan Bank Advances

Federal Home Loan Bank (“FHLB”) advances and weighted average interest rates at the end of the period by contractual maturity are summarized as of the dates presented (dollars in thousands).

	Amount		Weighted Average Rate	
	December 31, 2017	December 31, 2016	December 31, 2017	December 31, 2016
Fixed rate advances maturing:				
2017	\$ —	\$ 73,603	—%	0.79%
2018	126,600	6,100	1.42	0.91
2019	12,000	—	1.46	—
2020	3,100	3,100	1.52	1.52
2027	25,000	—	1.06	—
ASC 805 Fair Value Adjustment	(42)	—	—	—
	<u>\$ 166,658</u>	<u>\$ 82,803</u>	<u>1.37%</u>	<u>0.82%</u>

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

As of December 31, 2017, these advances are collateralized by approximately \$499.0 million of the Company's loan portfolio and \$72.6 million of the Company's investment securities in accordance with the Advance Security and Collateral Agreement with the FHLB. As of December 31, 2017, the Company had an additional \$401.0 million available under its line of credit with the FHLB.

Lines of Credit

In addition, the Company has outstanding unsecured lines of credit with its correspondent banks available to assist in the management of short-term liquidity. Any balances drawn on these lines of credit mature daily. At December 31, 2017, the available balance on the unsecured lines of credit totaled approximately \$55.0 million, with no outstanding balance reflected on the consolidated balance sheet.

In addition to the unsecured lines of credit mentioned above, the Company has a secured line of credit with The Independent Bankers Bank ("TIB") providing for a \$20.0 million revolving line of credit maturing June 27, 2018. The revolving line of credit is secured by a first priority security interest in all of the capital stock of Investar Bank and a security interest in all property of Investar Bank held by the lender. At December 31, 2017, we had no outstanding balance on the secured line of credit, compared to \$1.0 million at December 31, 2016. The Company was in compliance with all covenants related to its line of credit with TIB at December 31, 2017 and 2016.

Junior Subordinated Debt

The following table provides a summary of the Company's junior subordinated debentures (dollars in thousands).

	Face Value	Carrying Value	Maturity Date	Variable Interest Rate	Interest Rate at December 31, 2017
First Community Louisiana Statutory Trust I	\$ 3,609	\$ 3,609	June 2036	3-month LIBOR + 1.77%	3.36%
BOJ Bancshares Statutory Trust I	3,093	2,183	December 2034	3-month LIBOR + 1.90%	3.49%
	<u>\$ 6,702</u>	<u>\$ 5,792</u>			

These debentures are unsecured obligations due to trusts that are unconsolidated subsidiaries. The debentures were issued in conjunction with the trusts' issuances of obligated capital securities. The trusts used the proceeds from the issuances of their capital securities to buy floating rate junior subordinated deferrable interest debentures that bear the same interest rate and terms as the capital securities. These debentures are the trusts' only assets and the interest payments from the debentures finance the distributions paid on the capital securities. These debentures rank junior and are subordinate in the right of payment to all other debt of the Company.

As part of the purchase accounting adjustments made with the BOJ acquisition on December 31, 2017, the Company adjusted the carrying value of the junior subordinated debentures to fair value as of the acquisition date. The discount on the debentures will continue to be amortized through maturity and recognized as a component of interest expense.

The debentures may be called by the Company at par plus any accrued interest. Interest on the debentures is calculated quarterly. The distribution rate payable on the capital securities is cumulative and payable quarterly in arrears. The Company has the right to defer payments of interest on the debentures at any time by extending the interest payment period for a period not exceeding 20 consecutive quarters with respect to each deferral period, provided that no extension period may extend beyond the redemption or maturity date of the debentures.

The debentures are included on the consolidated balance sheet as liabilities; however, for regulatory purposes, the carrying value of these obligations are eligible for inclusion in Tier I regulatory capital, subject to certain limitations. All of the carrying value of \$5.8 million and \$3.6 million was allowed in the calculation of Tier I regulatory capital as of December 31, 2017 and 2016, respectively.

NOTE 13. DERIVATIVE FINANCIAL INSTRUMENTS

The Company currently holds interest rate swap contracts to manage exposure against the variability in the expected future cash flows (future interest payments) attributable to changes in the 1-month LIBOR associated with the forecasted issuances of 1-month fixed rate debt arising from a rollover strategy. The maximum length of time over which the Company is currently hedging its exposure to the variability in future cash flows for forecasted transactions is approximately 2.6 years. The total notional amount of the derivative contracts is \$50.0 million. These derivative contracts are currently between the Company and a single counterparty. To mitigate credit risk, securities are pledged to the Company by the counterparty in an amount greater than or equal to the gain position of the derivative contracts.

For the year ended December 31, 2017, a gain of \$0.4 million, net of a \$0.1 million tax expense, was recognized in “Other comprehensive income (loss)” (“OCI”) in the accompanying consolidated statements of other comprehensive income for the change in fair value of the interest rate swap contracts. For the years ended December 31, 2016 and December 31, 2015, a gain of \$0.4 million, net of a \$0.2 million tax expense, and a loss of \$0.2 million, net of a \$0.1 million tax benefit, respectively, was recognized in OCI in the accompanying consolidated statements of other comprehensive income for the change in fair value of the interest rate swap contracts.

The swap contracts had a fair value of \$0.5 million and \$8,000 at December 31, 2017 and 2016, respectively, and have been recorded in “Other assets” in the accompanying consolidated balance sheets. The accumulated gain of \$0.4 million included in “Accumulated other comprehensive loss” in the accompanying consolidated balance sheets would be reclassified to current earnings if the hedge transaction becomes probable of not occurring. The Company expects the hedge to remain fully effective during the remaining term of the swap contract.

NOTE 14. STOCKHOLDERS' EQUITY

Preferred Stock

The Company's Articles of Incorporation give the Company's board of directors the authority to issue up to 5,000,000 shares of preferred stock. At December 31, 2017, there were no preferred shares outstanding. The preferred shares are considered “blank check” preferred stock. This type of preferred stock allows the board of directors to fix the designations, preferences and relative, participating, optional or other special rights, and qualifications and limitations or restrictions of any series of preferred stock without further shareholder approval.

Common Stock

The Company's Articles of Incorporation give the Company's board of directors the authority to issue up to 40,000,000 shares of common stock. At December 31, 2017, there were 9,514,926 common shares outstanding.

On March 22, 2017, the Company completed a common stock offering of 1.6 million shares of its common stock at a price of \$21.25 per share. The common stock offering generated net proceeds of \$32.5 million. On December 1, 2017, the Company issued 799,559 million shares of its common stock as consideration for the acquisition of BOJ. Total stockholders' equity was \$172.7 million at December 31, 2017, compared to \$112.8 million at December 31, 2016.

Dividend Restrictions. In the ordinary course of business, the Company is dependent upon dividends from the Bank to provide funds for the payment of dividends to shareholders and to provide for other cash requirements. Banking regulations may limit the amount of dividends that may be paid. Approval by regulatory authorities is required if the effect of dividends declared would cause the regulatory capital of the Bank to fall below specified minimum levels. Approval is also required if dividends declared exceed the net profits for that year combined with the retained net profits for the preceding two years. Under the foregoing dividend restrictions and while maintaining its “well capitalized” status, at December 31, 2017, the Bank could pay aggregate dividends of up to \$23.2 million to the Company without prior regulatory approval.

Under the terms of the junior subordinated debentures, assumed through acquisition, the Company has the right at any time during the term of the debentures to defer the payment of interest. In the event that the Company elects to defer interest on the debentures, it may not, with certain exceptions, declare or pay any dividends or distributions on its common stock or purchase or acquire any of its common stock.

These restrictions do not, and are not expected in the future to, materially limit the Company's ability to pay dividends to its shareholders in an amount consistent with the Company's history of paying dividends.

NOTE 15. STOCK-BASED COMPENSATION

Warrants

On October 1, 2011, in connection with the acquisition of South Louisiana Bankers Bank, the Bank issued 130,875 stock warrants with an exercise price of \$13.33 per share. The warrants were later exchanged for a like amount of warrants to acquire shares of Company common stock at the same exercise price. These warrants, which are currently exercisable, expire on July 1, 2018. All other warrants to acquire shares of Company common stock expired on or before December 31, 2014.

The following table summarizes the Company's warrant activity for the periods indicated.

	December 31,		
	2017	2016	2015
<u>\$13.33 Per Share</u>

Equity Incentive Plan. The Company previously granted equity awards to its employees and non-employee directors under its 2014 Long-Term Incentive Compensation Plan (the "2014 Plan"). Effective May 24, 2017, the Company's shareholders approved its 2017 Long-Term Incentive Compensation Plan (the "Plan") and ceased using the 2014 Plan. The Plan authorizes the grant of various types of equity grants and awards, such as restricted stock, stock options and stock appreciation rights to eligible participants, which include all of the Company's employees, non-employee directors, and consultants. The Plan has reserved 600,000 shares of common stock for grant, award or issuance to eligible participants, including shares underlying granted options. The Plan is administered by the Compensation Committee of the Company's Board of Directors, which determines, within the provisions of the Plan, those eligible employees to whom, and the times at which, grants and awards will be made. The Compensation Committee, in its discretion, may delegate its authority and duties under the Plan to specified officers; however, only the Compensation Committee may approve the terms of grants and awards to the Company's executive officers and directors. At December 31, 2017 and 2016, no stock appreciation rights had been granted. At December 31, 2017, approximately 597,783 shares remain available for grant.

Stock Options

During the years ended December 31, 2017, 2016 and 2015, the Company issued 36,177, 46,512 and 64,333 stock options, respectively, to key personnel that vest at one-fifth increments on the grant date anniversary of each of the following five years.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The table below summarizes the Company's stock option activity for the periods indicated.

Stock Options

	Shares	Weighted Average Price	Weighted Average Remaining Contractual Term (Years)
Outstanding at December 31, 2014	238,811	\$ 13.94	8.96
Issued	64,333	15.74	
Forfeited	(14,667)	14.00	
Exercised	(10,125)	13.33	
Outstanding at December 31, 2015	278,352	14.37	8.42
Issued	46,512	14.28	
Forfeited	—	—	
Exercised	(5,500)	14.00	
Outstanding at December 31, 2016	319,364	14.36	7.67
Issued	36,177	20.25	
Forfeited	(5,334)	14.00	
Exercised	(27,290)	13.70	
Outstanding at December 31, 2017	322,917	15.09	7.19
Exercisable at December 31, 2017	114,927	14.41	6.79

At December 31, 2017, the shares underlying total outstanding stock options had an intrinsic value of \$2.9 million. The shares underlying exercisable stock options had an intrinsic value of approximately \$1.1 million.

The Company uses a Black-Scholes option pricing model to estimate the fair value of stock-based awards. The Black-Scholes option pricing model incorporates various subjective assumptions, including expected term and expected volatility. Stock option expense in the accompanying consolidated statements of income for the years ended December 31, 2017, 2016, and 2015 was \$223,000, \$183,000 and \$152,000, respectively. At December 31, 2017, there was \$0.6 million of unrecognized compensation cost related to stock options that is expected to be recognized over a weighted average period of 2.7 years.

The table below shows the assumptions used for the stock options granted during the years ended December 31, 2017 and 2016.

	2017	2016
Dividend yield	0.22%	0.22%
Expected volatility	20.46%	19.55%
Risk-free interest rate	2.19%	1.62%
Expected term (in years)	7	7
Weighted-average grant date fair value	\$ 5.39	\$ 3.44

Time Vested Restricted Stock Awards. The Company has issued shares of time vested restricted stock with vesting terms ranging from two to six years. The total stock-based compensation expense for these awards is determined based on the market price of the Company's common stock at the grant date applied to the total number of shares granted and is amortized over the vesting period. Restricted stock shares participate in voting rights and dividends declared by the Company.

The Company issued a total of 54,724 shares of restricted stock to employees and directors for the year ended December 31, 2017. Of the restricted stock granted in 2017, 48,288 shares will vest over five years and 6,436 shares will vest over two years.

The Company issued a total of 54,837 shares of restricted stock to employees and directors for the year ended December 31, 2016. Of the restricted stock granted in 2016, 49,139 shares will vest over five years and 5,698 shares will vest over two years.

The Company issued a total of 36,434 shares of restricted stock to employees for the year ended December 31, 2015. Of the restricted stock granted in 2015, 30,305 shares will vest over five years and 6,129 shares will vest over two years.

No shares of restricted stock may be sold, assigned, transferred or pledged until vested. The holders of the restricted stock receive dividends and have the right to vote the shares. The unearned compensation related to these awards is amortized to compensation expense over the vesting period.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

As of December 31, 2017, 2016 and 2015, unearned stock-based compensation associated with these awards totaled approximately \$1.5 million, \$1.1 million and \$0.8 million, respectively. The \$1.5 million of unrecognized compensation cost related to time vested restricted stock at December 31, 2017 is expected to be recognized over a weighted average period of 3.1 years.

The following table summarizes the unvested restricted stock award activity for the years ended December 31, 2017 and December 31, 2016.

	December 31,			
	2017		2016	
	Shares	Weighted Avg Grant Date Fair Value	Shares	Weighted Avg Grant Date Fair Value
Balance, beginning of period	93,366	\$ 14.75	60,592	\$ 14.85
Granted	54,724	20.18	54,837	14.67
Forfeited	(8,802)	15.97	(3,238)	15.71
Earned and issued	(26,600)	14.78	(18,825)	14.72
Balance, end of period	112,688	\$ 17.28	93,366	\$ 14.75

NOTE 16. EMPLOYEE BENEFIT PLANS

The Company maintains a 401(k) defined contribution plan (the “401(k) Plan”) which covers employees over the age of twenty-one who have completed 90 days of credited service, as defined by the 401(k) Plan. The 401(k) Plan allows employees to defer a percentage of their salaries subject to certain limits based on federal tax laws. The Company makes matching contributions up to 4% of the employee’s annual salary (subject to certain maximum compensation amounts as prescribed in Internal Revenue Service guidance). Contributions by the Company and participants are immediately vested. The 401(k) Plan also allows for a discretionary Company contribution. Although no such contribution has been made as of December 31, 2017, the discretionary component vests in increments of 20% annually over a period of five years based on the employees’ years of service.

Employer matching contributions to the 401(k) Plan for the year ended December 31, 2017 were approximately \$0.5 million. For each of the years ended December 31, 2016 and 2015, employer matching contributions were approximately \$0.4 million.

The Company maintains a deferred compensation plan for a former employee of First Community Bank (“FCB”). A single premium immediate annuity policy was purchased in which the former employee is the beneficiary. Under this policy, the beneficiary will receive monthly payments of \$2,000 through 2020.

The Company also maintains a deferred compensation plan for a former Citizens employee, a liability for which was assumed in the Citizens acquisition. Under the deferred compensation agreement, the former employee will receive monthly payments of \$5,500 through May of 2030.

At December 31, 2017 and 2016, the Company had a liability of \$0.7 million and \$0.1 million, respectively, in Accrued taxes and other liabilities on the consolidated balance sheets related to these deferred compensation plans.

NOTE 17. INCOME TAXES

On December 22, 2017, the Tax Cuts and Jobs Act (“TCJA”) was signed into law. The TCJA makes broad and complex changes to the U.S. tax code that affected the Company’s income tax rate in 2017, including requiring the revaluation of the Company’s deferred tax assets and liabilities as of December 31, 2017 as a result of the lower corporate tax rates to be realized beginning January 1, 2018. The TCJA reduces the U.S. federal corporate income tax rate from 35% to 21% and establishes new tax laws that will affect 2018.

ASC 740 requires a company to record the effects of a tax law change in the period of enactment, however, shortly after the enactment of the TCJA, the SEC staff issued SAB 118, which allows a company to record a provisional amount when it does not have the necessary information available, prepared, or analyzed in reasonable detail to complete its accounting for the change in the tax law. The measurement period ends when the company has obtained, prepared and analyzed the information necessary to finalize its accounting, but cannot extend beyond one year. The Company is in the process of analyzing certain aspects of the TCJA, obtaining additional information, and refining its calculations, which could potentially affect the measurement of these balances.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The income tax expense included in the consolidated statements of income is displayed in the table below for the years ended December 31, 2017, 2016 and 2015 (dollars in thousands).

	December 31,		
	2017	2016	2015
Current	\$ 4,003	\$ 3,816	\$ 3,897
Deferred	245	(207)	(386)
Total income tax expense	<u>\$ 4,248</u>	<u>\$ 3,609</u>	<u>\$ 3,511</u>

The Company's current income tax expense includes a \$0.3 million charge directly related to the revaluation of its deferred tax assets and liabilities as a result of the TCJA.

The provision for federal income taxes differs from that computed by applying the federal statutory rate of 35% in 2017, 2016 and 2015, as indicated in the following analysis for the years ended December 31, 2017, 2016 and 2015 (dollars in thousands).

	December 31,		
	2017	2016	2015
Tax based on statutory rate	\$ 4,258	\$ 3,921	\$ 3,704
Increase (decrease) resulting from:			
Effect of tax-exempt income	(422)	(273)	(142)
Acquisition costs	174	—	—
Historical tax credits	10	10	(62)
Effect of tax rate change	292	—	—
Other	(64)	(49)	11
Total income tax expense	<u>\$ 4,248</u>	<u>\$ 3,609</u>	<u>\$ 3,511</u>
Effective rate	34.1%	31.4%	33.2%

The Company records deferred income tax on the tax effect of changes in timing differences.

The net deferred tax asset was comprised of the following items as of the dates indicated (dollars in thousands).

	December 31,		
	2017	2016	2015
Deferred tax liabilities:			
Depreciation	\$ (1,652)	\$ (1,650)	\$ (1,402)
FHLB stock dividend	(28)	(20)	(5)
Basis difference in acquired assets and liabilities	(900)	(276)	(291)
Basis difference in MFS, LLC	(20)	—	—
Gross deferred tax liability	<u>(2,600)</u>	<u>(1,946)</u>	<u>(1,698)</u>
Deferred tax assets:			
Allowance for loan losses	1,549	2,150	1,588
Provision for other real estate losses	155	266	328
Unrealized loss on available for sale securities	418	1,115	357
Net operating loss carryforward	154	299	412
Deferred compensation	302	25	34
Basis difference in acquired assets and liabilities	839	253	265
Historical tax credit	144	243	247
Other	333	463	382
Gross deferred tax assets	<u>3,894</u>	<u>4,814</u>	<u>3,613</u>
Net deferred tax asset	<u>\$ 1,294</u>	<u>\$ 2,868</u>	<u>\$ 1,915</u>

The Company acquired net operating loss (“NOL”) carryforwards through tax free acquisitions. As of December 31, 2017 and December 31, 2016, the Company’s NOL carryforwards were approximately \$0.7 million and \$0.9 million, respectively, and expire in 2033.

The Company files income tax returns under U.S. federal jurisdiction and the state of Louisiana, although the state of Louisiana does not assess an income tax on income resulting from banking operations. The Company is open to examination in the U.S. and the state of Louisiana for tax years ended December 31, 2014 through December 31, 2017.

NOTE 18. FAIR VALUES OF FINANCIAL INSTRUMENTS

In accordance with FASB ASC Topic 820, *Fair Value Measurement and Disclosure* (“ASC 820”), disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, is required. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. Fair value is best determined based upon quoted market prices. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows, and the fair value estimates may not be realized in an immediate settlement of the instruments. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

Fair Value Hierarchy

In accordance with ASC 820, the Company groups its financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

Level 1 – Valuation is based upon quoted prices for identical assets or liabilities traded in active markets.

Level 2 – Valuation is based upon observable inputs other than quoted prices included in level 1, such as quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Valuation is based upon unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies, and similar techniques that use significant unobservable inputs.

A financial instrument’s categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following methods and assumptions were used by the Company in estimating fair value disclosures for financial instruments:

Cash and Due from Banks – For these short-term instruments, fair value is the carrying value. Cash and due from banks is classified in level 1 of the fair value hierarchy.

Federal Funds Sold – The fair value is the carrying value. The Company classifies these assets in level 1 of the fair value hierarchy.

Investment Securities and Other Equity Securities – Where quoted prices are available in an active market, the Company classifies the securities within level 1 of the valuation hierarchy. Securities are defined as both long and short positions. Level 1 securities include exchange-traded equities at both December 31, 2017 and 2016.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

If quoted market prices are not available, the Company estimates fair values using pricing models and discounted cash flows that consider standard input factors such as observable market data, benchmark yields, interest rate volatilities, broker/dealer quotes, and credit spreads. Examples of such instruments, which would generally be classified within level 2 of the valuation hierarchy if observable inputs are available, include obligations of U.S. government agencies and corporations, obligations of state and political subdivisions, corporate bonds, residential mortgage-backed securities, commercial mortgage-backed securities, and other equity securities. In certain cases where there is limited activity or less transparency around inputs to the valuation, the Company classifies those securities in level 3.

Loans – For variable-rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for certain mortgage loans (for example, one-to-four family residential), credit card loans, and other consumer loans are based on quoted market prices of similar instruments sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. Fair values for other loans (for example, commercial real estate and investment property mortgage loans, commercial and industrial loans) are estimated using discounted cash flow analyses, using market interest rates for comparable loans. Fair values for nonperforming loans, which are loans for which the accrual of interest has stopped or loans that are contractually 90 past due on which interest continues to accrue, are estimated using discounted cash flow analyses or underlying collateral values, where applicable. The Company classifies loans in level 3 of the fair value hierarchy.

Deposit Liabilities – The fair values disclosed for noninterest-bearing demand deposits are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). These noninterest-bearing deposits are classified in level 2 of the fair value hierarchy. All interest-bearing deposits are classified in level 3 of the fair value hierarchy. The carrying amounts of variable-rate (for example interest-bearing checking, savings, and money market accounts), fixed-term money market accounts, and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies market interest rates on comparable instruments to a schedule of aggregated expected monthly maturities on time deposits.

Short-Term Borrowings—The carrying amounts of federal funds purchased, borrowings under repurchase agreements, and other short-term borrowings approximate their fair values. The Company classifies these borrowings in level 2 of the fair value hierarchy.

Long-Term Borrowings – The fair values of long-term borrowings are estimated using discounted cash flows analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. The fair value of the Company's long-term debt is therefore classified in level 3 in the fair value hierarchy.

Subordinated Debt Securities - The fair value of subordinated debt is estimated based on current market rates on similar debt in the market. The Company classifies this debt in level 2 of the fair value hierarchy.

Derivative Instruments – The fair value for interest rate swap agreements are based upon the amounts required to settle the contracts. These derivative instruments are classified in level 2 of the fair value hierarchy.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

Fair Value of Assets and Liabilities Measured on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis are summarized below as of the dates indicated (dollars in thousands).

	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The Company reviews fair value hierarchy classifications on a quarterly basis. Changes in the Company's ability to observe inputs to the valuation may cause reclassification of certain assets or liabilities within the fair value hierarchy. The table below provides a reconciliation for assets measured at fair value on a recurring basis using significant unobservable inputs, or level 3 inputs (dollars in thousands).

	Obligations of State and Political Subdivisions	Corporate Bonds	Total
Balance at December 31, 2015	\$ 10,395	\$ 1,136	\$ 11,531
Realized gains (losses) included in net income	—	—	—
Unrealized losses included in other comprehensive income	(1,684)	(27)	(1,711)

Unrealized gains included in other comprehensive income	1,265	1	1,266
Purchases	—	700	700
Acquired from Citizens	622	—	622
Sales	—	—	—
Paydowns	—	—	—
Transfers into Level 3	—	—	—
Transfers out of Level 3	—	—	—
Balance at December 31, 2017	\$ 19,543	\$ 1,325	\$ 20,868

There were no liabilities measured at fair value on a recurring basis using level 3 inputs at December 31, 2017, 2016 and 2015. For the year ended December 31, 2017 and 2016, there were no gains or losses included in earnings related to the change in fair value of the assets measured on a recurring basis using significant unobservable inputs held at the end of the period.

Fair Value of Assets Measured on a Nonrecurring Basis

Quantitative information about assets measured at fair value on a nonrecurring basis based on significant unobservable inputs (level 3) are summarized below as of the dates indicated; there were no liabilities measured on a nonrecurring basis at December 31, 2017 or 2016 (dollars in thousands).

	Estimated Fair Value	Valuation Technique	Unobservable Inputs	Range of Discounts	Weighted Average Discount
December 31, 2017					
Impaired loans	\$ 380	Discounted cash flows, Underlying collateral value	Collateral discounts and estimated costs to sell	0% - 100%	32%
Other real estate owned	3,612	Underlying collateral value, Third party appraisals	Collateral discounts and discount rates	5%	5%
December 31, 2016					
Impaired loans	\$ 801	Discounted cash flows, Underlying collateral value	Collateral discounts and estimated costs to sell	1% - 100%	32%

NOTE 19. REGULATORY MATTERS

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements. Under capital adequacy guidelines, the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and to average assets (as defined).

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

As of December 31, 2017 and 2016, the Bank was considered well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized the Bank must maintain minimum total risk-based, Tier 1 leverage capital ratios as set forth in the table below. There are no conditions or events since those notifications that management believes have changed the Bank's category.

The Company's and the Bank's actual capital amounts and ratios as of December 31, 2017 and December 31, 2016 are presented in the tables below (dollars in thousands).

	Actual		Capital Adequacy		Well Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio

Investar Bank	121,468	12.39	78,408	8.00	98,010	10.00

Applicable Federal and State statutes and regulations impose restrictions on the amounts of dividends that may be declared by the Company. In addition to the formal statutes and regulations, regulatory authorities also consider the adequacy of the Company's total capital in relation to its assets, deposits and other such items and, as a result, capital adequacy considerations could further limit the availability of dividends from the Company. In the event the Company is in default or has deferred interest payments on subordinated debentures, the Company would be restricted from paying dividends.

In July 2013, the federal banking regulatory agencies issued a final rule which revises the regulatory capital framework for financial institutions. The final rule (also known as the Basel III capital rules) covers a number of aspects pertaining to capital requirements.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

These include:

- Prompt Corrective Action Capital Category Thresholds - The following thresholds have been established for an institution to be deemed adequately capitalized:

Total Risk-Based Capital Ratio	8.0%
Tier 1 Risk-Based Capital Ratio	6.0%
Common Equity Tier 1 Capital Ratio	4.5%
Tier 1 Leverage Ratio	4.0%

- Establishment of a Capital Conservation Buffer - The Capital Conservation Buffer is phased in through 2019.
- Changes in risk-weighting of assets.
- Opt-out Election of Accumulated Other Comprehensive Income from Common Equity Tier 1 Capital.

Financial institutions became subject to the final rule on January 1, 2015, although the rules will not be fully phased in until January 1, 2019.

Management is currently evaluating the provisions of the final rule and its expected impact on the Company and the Bank. Management believes that at December 31, 2017, the Company and the Bank would have met all capital adequacy requirements on a fully phased-in basis if such requirements were then effective. There can be no assurances that the Basel III capital rules will not be revised before the effective date and expiration of the phase-in periods.

NOTE 20. COMMITMENTS AND CONTINGENCIES

Unfunded Commitments

The Company is a party to financial instruments with off-balance sheet risk entered into in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit consisting of loan commitments and standby letters of credit, which are not included in the accompanying financial statements. Such financial instruments are recorded in the financial statements when they become payable. The credit risk associated with these commitments is evaluated in a manner similar to the allowance for loan losses. The reserve for unfunded lending commitments is included in other liabilities in the balance sheet. At December 31, 2017 the reserve for unfunded loan commitments was \$32,000.

Commitments to extend credit are agreements to lend money with fixed expiration dates or termination clauses. The Company applies the same credit standards used in the lending process when extending these commitments, and periodically reassesses the customer's creditworthiness through ongoing credit reviews. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Collateral is obtained based on the Company's assessment of the transaction. Essentially all standby letters of credit issued have expiration dates within one year.

The table below shows the approximate amounts of the Company's commitments to extend credit as of the dates presented (dollars in thousands).

	December 31, 2017	December 31, 2016
Loan commitments	\$ 174,278	\$ 142,891
Standby letters of credit	3,832	1,008

Additionally, at December 31, 2017, the Company had unfunded commitments of \$0.3 million for its investment in Small Business Investment Company qualified funds.

Insurance

The Company is obligated for certain costs associated with its insurance program for employee health. The Company is self-insured for a substantial portion of its potential claims. The Company recognizes its obligation associated with these costs, up to specified deductible limits in the period in which a claim is incurred, including with respect to both reported claims and claims incurred but not reported. The claims costs are estimated based on historical claims experience. The reserves for insurance claims are reviewed and updated by management on a quarterly basis.

Legal Proceedings

The nature of the business of the Company's banking and other subsidiaries ordinarily results in a certain amount of claims, litigation, investigations, and legal and administrative cases and proceedings, which are considered incidental to the normal conduct of business. Some of these claims are against entities which the Company acquired in business acquisitions. The Company has asserted defenses to these claims and, with respect to such legal proceedings, intends to continue to defend itself, litigating or settling cases according to management's judgment as to what is in the best interest of the Company and its shareholders.

The Company assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. Where it is probable that the Company will incur a loss and the amount of the loss can be reasonably estimated, the Company records a liability in its consolidated financial statements. These legal reserves may be increased or decreased to reflect any relevant developments on a quarterly basis. Where a loss is not probable or the amount of loss is not estimable, the Company does not accrue legal reserves. While the outcome of legal proceedings is inherently uncertain, based on information currently available and available insurance coverage, the Company's management believes that it has established appropriate legal reserves. Any incremental liabilities arising from pending legal proceedings are not expected to have a material adverse effect on the Company's consolidated financial position, consolidated results of operations, or consolidated cash flows. However, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Company's consolidated financial position, consolidated results of operations, or consolidated cash flows.

As of the date of this filing, the Company believes the amount of losses associated with legal proceedings that it is reasonably possible to incur is not material.

Investment in Tax Credit Entity

In December 2014, the Company acquired a limited partner interest in a tax-advantaged limited partnership whose purpose was to invest in an approved Federal Historic Rehabilitation tax credit project. This investment is accounted for using the cost method of accounting and is included in "Other assets" in the accompanying consolidated balance sheets. At December 31, 2017 and 2016, the recorded investment was \$0.2 million. The limited partnership is considered to be a variable interest entity ("VIE"). The VIE has not been consolidated because the Company is not considered the primary beneficiary. The Company's investment in the limited partnership was evaluated for impairment at the end of the reporting period and determined there was no impairment for the year ended December 31, 2017. The Company recorded impairment expense of \$11,000 and \$100,000 for the years ended December 31, 2016, and 2015, respectively. At December 31, 2017 and 2016, the Company had \$0.9 million invested in this partnership. The investment generated historic tax credits of \$1.0 million, all of which were recognized in the year ended December 31, 2014. The Company did not make any loans related to this real estate project. Based on the structure of this transaction, the Company expects to recover its investment solely through use of the tax credits that were generated by the investment.

NOTE 21. CONCENTRATIONS OF CREDIT

Substantially all of the Company's loans and commitments have been granted to customers in the Company's market area. The concentrations of credit by type of loan are set forth in Note 4, Loans. The distribution of commitments to extend credit approximates the distribution of loans outstanding.

The Company maintains deposit accounts and federal funds sold with correspondent banks which may, periodically, exceed the federally insured amount.

NOTE 22. TRANSACTIONS WITH RELATED PARTIES

The Bank has made, and expects in the future to continue to make in the ordinary course of business, loans to directors and executive officers of the Company, the Bank, and their affiliates. In management's opinion, these loans were made in the ordinary course of business at normal credit terms, including interest rate and collateral requirements, and do not represent more than normal credit risk. See Note 4, Loans, for more information regarding lending transactions between the Company and these related parties.

During 2017 and 2016, certain executive officers and directors of the Company and the Bank, including companies with which they are affiliated, were deposit customers of the Bank. See Note 9, Deposits, regarding total deposits outstanding to these related parties.

The Company has transactions with related parties for which the Company believes the terms and conditions are comparable to terms that would have been available from a third party that was unaffiliated with the Company. The following describes transactions since January 1, 2015, in addition to the ordinary banking relationships described above, in which the Company has participated in which one or more of its directors, executive officers or other related persons had or will have a direct or indirect material interest.

INVESTAR HOLDING CORPORATION
Notes to Consolidated Financial Statements

The Company has engaged in a number of transactions with Joffrion Commercial Division, LLC, a commercial construction company owned and managed by Gordon H. Joffrion, one of the Company's directors.

Joffrion Commercial Division, LLC was awarded the bid in the amount of \$0.9 million for the construction of the new location for the Prairieville branch. The Company paid Joffrion Commercial Division, LLC \$0.9 million related to the construction of the new branch location, which was completed in February 2015.

In August 2014, the Company selected Joffrion Commercial Division, LLC's bid to construct a building in Gonzales, Louisiana, which was completed in 2015. The Company paid approximately \$1.1 million for the construction of this branch.

In January 2016, the Company selected Joffrion Commercial Division, LLC's bid in the amount of \$0.6 million to renovate an existing branch location in Mandeville, Louisiana. The Company paid approximately \$0.7 million for the branch renovation which was completed in May 2016.

In February 2016, the Company selected Joffrion Commercial Division, LLC's bid in the amount of \$0.7 million to renovate a building that was purchased in the Company's New Orleans market as a potential branch location. The Company paid approximately \$0.8 million for the building renovation which was completed in July 2016.

In August 2016, the Company selected Joffrion Commercial Division, LLC's bid in the amount of \$0.2 million for construction of a freestanding ATM on a tract of land in the Company's Baton Rouge market. The Company paid approximately \$0.2 million for the construction, which was completed in 2017.

In July 2017, the Company selected Joffrion Commercial Division, LLC's bid in the amount of \$0.5 million for the renovation of the second floor of the building used as the Company's Operations Center, which the Company purchased in 2016. Construction began in the fourth quarter of 2017. As of December 31, 2017, the Company paid approximately \$0.1 million for the renovation project, which is expected to be completed in 2018.

NOTE 26. SUBSEQUENT EVENTS

Management has evaluated all subsequent events and transactions that occurred after December 31, 2017 up through the date that the financial statements were available to be issued and determined that there were no additional events that require disclosure. No events or changes in circumstances were identified that would have an adverse impact on the financial statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures***Evaluation of Disclosure Controls and Procedures***

As of the end of the period covered by this Annual Report on Form 10-K, the Company carried out an evaluation under the supervision and with the participation of its management, including the Chief Executive Officer and Chief Financial Officer (the Company's principal executive and financial officers), of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective for ensuring that information the Company is required to disclose in reports that it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control over Financial Reporting

There were no changes to internal control over financial reporting during the fourth quarter of 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Management's annual report on internal control over financial reporting and the report thereon of Ernst & Young LLP are included herein under *Item 8, Financial Statements and Supplementary Data*.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Except as provided below, the information required by Item 10 is incorporated by reference to the Company's Definitive Proxy Statement for its 2018 Annual Meeting of Shareholders (the "2018 Proxy Statement").

Code of Conduct and Ethics

The Company has adopted a Code of Ethics for the Chief Executive Officer and Senior Financial Officers that applies to its chief executive officer, chief financial officer, chief accounting officer and any other senior financial officers, and the Company has also adopted a Code of Conduct that applies to all of the Company's directors, officers and employees. The full text of the Code of Ethics for the Chief Executive Officer and Senior Financial Officers and the Code of Conduct can be found by clicking on "Corporate Governance" under the "Investor Relations" tab on the Company's website, www.investarbank.com, and then by clicking on "Code of Ethics for the Chief Executive Officer and Senior Financial Officers" or "Code of Conduct," as applicable. The Company intends to satisfy the disclosure requirement under Item 5.05(c) of Form 8-K regarding an amendment to, or waiver from, a provision of the Company's Code of Ethics for the Chief Executive Officer and Senior Financial Officers by posting such information on its website, at the address specified above.

Item 11. Executive Compensation

The information required by Item 11 is incorporated by reference to the 2018 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Stock Ownership

Except as provided below, the information required by Item 12 is incorporated by reference to the 2018 Proxy Statement.

Securities Authorized for Issuance under Equity Compensation Plans

The following table presents certain information regarding our equity compensation plan as of December 31, 2017.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders ⁽¹⁾	—	—	597,783
Equity compensation plans not approved by security holders ⁽²⁾	322,917	\$ 15.09	—
Total	322,917	\$ 15.09	597,783

(1) Effective May 24, 2017, the Company's shareholders approved its 2017 Long-Term Incentive Compensation Plan (the "Plan") and ceased using the 2014 Long -Term Incentive Plan, discussed below. The Plan authorizes the grant of various types of equity grants and awards, such as restricted stock, stock options and stock appreciation rights to eligible participants, which include all of the Company's employees, non-employee directors, and consultants. The Plan has reserved 600,000 shares of common stock for grant, award or issuance to eligible participants, including shares underlying granted options. No awards may be granted under the Plan after May 24, 2027.

(2) The Investar Holding Corporation 2014 Long-Term Incentive Compensation Plan (the "Equity Incentive Plan") was adopted by the Company's board of directors on January 15, 2014 and was amended on March 13, 2014. Because the Company was a private corporation at the time of the adoption of the Equity Incentive Plan, shareholder approval of the plan was not required, nor was such approval obtained. A total of 600,000 shares of common stock was reserved for grant, award or issuance in the form of stock options and restricted stock under the Equity Incentive Plan. Effective May 24, 2017, no future awards will be granted under the Equity Incentive Plan, although the terms and conditions of the Equity Incentive Plan will continue to govern any outstanding awards thereunder.

Item 13. Certain Relationships and Related Transactions, and Directors Independence

The information required by Item 13 is incorporated by reference to the 2018 Proxy Statement.

Item 14. Principal Accounting Fees and Services

The information required by Item 14 is incorporated by reference to the 2018 Proxy Statement.

PART IV

Item 15. Exhibits and Financial Statement Schedules
