Affiliated Managers Group, Inc.

Affiliated Managers Group, Inc. (NYSE: AMG) is an asset management company which operates through a diverse group of high quality boutique asset management firms (its "Affiliates"). AMG's unique partnership approach with its Affiliates preserves the entrepreneurial orientation that distinguishes the most successful investment management firms. AMG promotes the continued growth and strong performance of its Affiliates by:

- Maintaining and enhancing Affiliate managers' equity incentives in their firms;
- Preserving each Affiliate's distinct culture and investment focus; and
- Leveraging AMG's scale to expand the product offerings and distribution capabilities of its Affiliates, and to provide its Affiliates access to the highest quality operations, compliance and technology resources.

AMG seeks to achieve earnings growth through the internal growth of its Affiliates, growth and development initiatives designed to enhance its Affiliates' businesses, and investments in new Affiliates. AMG's Affiliates collectively manage approximately \$250 billion (as of March 31, 2007) in more than 300 investment products across the institutional, mutual fund and high net worth distribution channels. AMG has achieved strong long-term growth in earnings, with compound annual growth in Cash Earnings Per Share of over 21 percent since its initial public offering in 1997.

To Our Shareholders

AMG had an excellent year in 2006, with record organic growth from outstanding investment performance and strong net client cash flows. We also grew our business by making an accretive investment in Chicago Equity Partners, a quantitative investment firm with an excellent performance record. The successful execution of our growth strategy has generated outstanding results for our shareholders. Since our initial public offering in 1997, our stock price has increased at a compound annual rate of 23 percent, for a total increase of 591 percent through March 31, 2007.

We've reached an important milestone in the Company's history — in 2007, AMG will celebrate its 10th anniversary as a public company. Over the past decade, we have established a strong track record of earnings growth and shareholder value creation. During periods of both challenging and favorable market environments, our Affiliates' broad exposure across distribution channels and asset classes has provided consistency to our earnings growth.

AMG has successfully implemented a clear and defined strategy of partnering with managers of top-performing asset management firms using direct equity ownership in a framework that closely aligns our interests with those of our Affiliate partners. In addition, we leveraged the scale of AMG to enhance the growth and capabilities of our existing Affiliates' businesses without interfering with their autonomy or entrepreneurial culture. Through the disciplined execution of this strategy, AMG has built a diversified asset management company that includes some of the highest quality investment boutiques in the world. AMG's earnings growth has significantly outpaced equity market returns — since our IPO, Cash Earnings Per Share have grown at a compound annual rate of 21 percent, compared to four percent compounded annual appreciation in the S&P 500 Index over the same period.

AMG's Affiliates, which are recognized for their outstanding long-term performance records and high quality investment products, maintained strong momentum in 2006.

Organic growth among our Affiliates added \$46 billion to AMG's assets under management, which increased to over \$240 billion by year end. Most importantly, strong net client cash flows contributed a record \$19.4 billion to AMG's internal growth and added over \$26 million to our Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA).

John Kingston, IIIExecutive Vice President
and General Counsel

Jay C. Horgen Executive Vice President, New Investments

Sean M. Healey President and Chief Executive Officer

Our Affiliates' outstanding performance was evident across several investment product categories, with excellent returns in growth and value equities, international equities and alternative products. In a year of solid growth in most equity market indices, AMG was well-positioned for strong results, particularly in some of the fastest-growing areas of the industry, such as international and alternative investments.

Our international equity products demonstrated exceptional growth and contributed approximately 35 percent of our EBITDA during the year. AMG's Affiliates, particularly Tweedy, Browne Company, Third Avenue Management, First Quadrant, Genesis Investment Management and AQR Capital Management, are widely recognized for their experience investing in equity markets outside the United States. We believe that strong secular trends favor the continued growth and outperformance of international equities and with our Affiliates' outstanding products, AMG is in an excellent position to participate in this growing market.

The strong internal growth of our Affiliates drove excellent earnings results during the year, as we generated EBITDA of \$342 million, a 28 percent increase over last year, and Cash Earnings Per Share of \$5.68, a 17 percent increase.

AMG also achieved outstanding growth in alternative investments, which contributed over 15 percent of our EBITDA. Our Affiliates' product offerings in this category are broad-based, with high quality products across a number of different investment strategies. AQR and First Quadrant, two of the industry's most highly regarded quantitative asset managers, offer alternative investment products which are increasingly sought after by sophisticated institutional investors. These investment strategies are exceptionally adaptable and provide our Affiliates with substantial growth opportunities going forward.

Given the strong results of our Affiliates' alternative products, we have meaningfully increased the potential contribution of performance fees to our earnings growth. A number of our Affiliates, including AQR, First Quadrant, Third Avenue and Genesis, offer performance fee-based products that are in significant demand from institutional and high net worth clients. The breadth and relative performance of our Affiliates' products is excellent, and we expect performance fees will continue to make a substantial contribution to our earnings in the periods ahead.

Domestic equities, which contributed approximately 45 percent of our EBITDA, represented a significant area of growth in the mutual fund, institutional and high net worth channels. Our Affiliates' U.S. equity products generated strong performance across a wide range of investment styles and asset classes. In this segment, growth products offered by Affiliates such as Friess Associates, TimesSquare Capital Management and Frontier Capital Management had

particularly strong results, while value-oriented Affiliates such as Tweedy, Browne, Third Avenue and Systematic Financial Management, recorded solid performance and attracted positive net client cash flows during the year.

In 2006, AMG made excellent progress in broadening the array of strategic support services we offer to our Affiliates. We have successfully used the scale and resources of the holding company to bring the advantages of a larger business to our Affiliates, including a number of initiatives designed to broaden our Affiliates' product offerings and distribution capabilities. More than half of our Affiliates, including our largest Affiliates, now use AMG as part of their product distribution strategy.

Our domestic retail distribution platform, Managers Investment Group, offers our Affiliates the opportunity to cost-effectively distribute their investment products in intermediary-driven channels. Managers had a successful year in 2006, attracting over \$2.5 billion in incremental net flows for our Affiliates in its second year of operations.

We continue to identify distribution opportunities that allow us to capitalize on the world-class investment capabilities of our Affiliates. As a first step in building an international platform, we recently opened a sales and client service office in Australia, which enables our Affiliates to efficiently distribute to institutional investors in one of the world's fastest-growing markets. The office provides investors with excellent client service and access to our Affiliates' broad and diverse array of outstanding products.

AMG's centralized legal and compliance initiative offers our Affiliates access to a team of experienced professionals with the leading-edge legal and compliance capabilities necessary to navigate today's challenging regulatory environment. Over half of AMG's Affiliates rely on our legal and compliance support in this important aspect of the asset management industry. In addition to providing cost-effective legal and compliance services, AMG's commitment allows our Affiliates to draw on the strength of our deep pool of resources and broad industry expertise.

The resources AMG provides directly benefit our Affiliates through increased revenue, more efficient operations and a broader set of strategic relationships and shared opportunities. The progress we have made in building our growth and development initiatives has significantly enhanced AMG's attractiveness to prospective Affiliates. We remain focused on this key component of our business strategy and will continue to expand the range of support services we offer to our Affiliates.

With more investments in boutique asset management firms over the past decade than any other entity, AMG has a long and successful track record of partnering with top-performing firms. In 2006, AMG welcomed Chicago Equity Partners to our Affiliate group. Chicago Equity Partners is a leading manager of quantitative equity and fixed income

products with over \$12 billion in assets under management. The firm is widely recognized for strong investment performance and superior client service, generating compound annual growth in assets under management of 27 percent since 2002.

As our business has grown, so has the scope and breadth of our new investment opportunities. With an established reputation as the institutional partner of choice for boutique asset management firms, our prospects for continued growth through new investments are excellent. We have enhanced our resources within the Company to execute a broader range of investment prospects. While we continue to pursue attractive investments in traditional boutique asset management firms, the success of our business has expanded the set of investment opportunities we are exploring.

We believe that AMG's outstanding results in 2006 reflect the strength of our business model and the success of our growth strategy. Through the record organic growth among our Affiliates, our expanded distribution capabilities and our broad range of investment opportunities, we are confident about our prospects going forward.

In closing, we would like to thank those responsible for our continued success: the management and employees of our Affiliates; the employees of AMG and our service providers; our Board of Directors; and our shareholders for their ongoing support.

Affiliated Managers Group, Inc. Annual Report 2006

AMG follows a proven, disciplined strategy for growing its business:

invest in excellent boutique asset management businesses; allow management to retain equity in their firm as a powerful incentive for growth through a partnership structure that preserves the unique culture and investment approach that has led to their success; and then provide these Affiliates with a range of growth and development initiatives designed to enhance their businesses.

AMG's success in executing its growth strategy has established a strong foundation for continued growth. With the diversity and strong performance of AMG's Affiliates, a proven ability and capacity to execute its growth initiatives and AMG's established position as a leading institutional partner for growing boutique asset management firms, AMG is well-positioned to continue to generate shareholder value in the future.

Investment Products

AMG's Affiliates include some of the best boutique investment management firms in the industry. As a group, AMG Affiliates manage more than 300 investment products across a broad array of categories. AMG's Affiliates are leading investors in their disciplines, with years of successful application of their investment processes demonstrated in their outstanding long-term performance records.

AMG's Affiliates predominantly offer active portfolio management of domestic and international equities, which, combined with a growing emphasis on alternative investments, gives AMG a significant presence in the most dynamic and fastest growing areas of the investment management industry. Approximately 35 percent of AMG's EBITDA is derived from global, international and emerging markets equity products, 15 percent from alternative products and 45 percent from domestic equity products, including both growth and value styles. The remaining five percent is derived from fixed income and balanced products. This diverse array of products enables AMG to participate broadly in the most attractive segments of the investment management industry, while generating incremental growth by introducing Affiliate products into additional distribution channels.

Global, International and Emerging Markets Equities

AMG's Affiliates include leading boutique firms which manage global, international and emerging markets equities across a wide variety of products with distinct styles. Tweedy, Browne Company, Third Avenue Management, Genesis Investment Management, AQR Capital Management, First Quadrant, and Foyston, Gordon & Payne are well-known for their experience investing in international markets, and have outstanding near- and long-term performance records.

Tweedy, Browne's Global Value product is among the largest and most distinguished global value equity products, and follows a diversified, Graham and Dodd approach to global investing. The Global Value fund has an excellent long-term track record and continues to generate strong results for its investors. In 2006, Tweedy, Browne launched a new global high dividend product that focuses on combining a strict valuation discipline with a concentration on companies with significant dividend yields.

Third Avenue also applies a disciplined value philosophy to investing in international equities. The firm has generated outstanding recent and longer-term results utilizing its "safe and cheap" investment approach. Third Avenue's international value equity portfolios seek long-term capital appreciation by

investing in the securities of well-financed, well-managed foreign companies believed to be priced below their intrinsic values.

Genesis is a specialist manager of emerging markets equities for institutional clients. The firm aims to achieve capital growth over the medium- to long-term by adding value to conventional international equity investments through a process of stock selection, while mitigating country risk through extensive geographical diversification.

AQR employs a disciplined and systematic global research process through its Enhanced Value International Equity products to develop diversified portfolios that are overweight on cheap (and, in turn, underweight on expensive) international securities, countries and currencies to achieve long-term success in both investment performance and risk management. AQR manages international products on behalf of a wide range of leading global institutional investors through collective investment vehicles and separate accounts, and has generated outstanding near- and long-term results in this area.

First Quadrant employs its highly regarded quantitative investment strategies to identify stocks with shared fundamental characteristics that are likely to have a similar impact upon the equity markets. The firm's diversified equity portfolios include European and Japanese marketneutral products, both of which have excellent long-term performance records.

Foyston, Gordon & Payne, one of AMG's Canadian Affiliates, is a rapidly growing manager of value equity products for institutional and private clients. Foyston's investment approaches — Canadian equities, U.S. equities and international equities — have each generated strong long-term investment results, significantly outperforming their respective peers and benchmarks.

Alternative Products

AMG is well-positioned with strong participation in alternative products through leading firms such as AQR, First Quadrant, Third Avenue and Genesis. Alternative products are among the most rapidly growing segments of the asset management industry, with many products designed to generate strong returns with low correlation to traditional asset classes and the potential to earn incremental fees based upon their performance. AMG's Affiliates offer innovative alternative investment strategies across a wide range of areas, including domestic and international equities, real estate, distressed securities and other special situations.

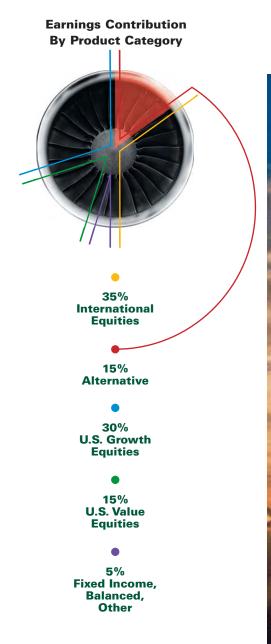

With 10 Affiliates offering approximately 30 alternative investment products with performance fee components, AMG realized a material contribution to its earnings from performance fees in 2006. The strength of AMG's results in this area reflects its Affiliates' broad expertise in their respective investment disciplines, and the Company expects that performance fees will continue to provide a meaningful contribution to its earnings.

AMG's larger Affiliates in the alternative area, including AQR, First Quadrant, Third Avenue and Genesis, have outstanding near- and long-term investment performance records and continue to generate strong growth in assets through excellent investment performance and substantial net client cash flows.

AQR employs a disciplined, multi-asset, global research process. The firm employs more than 20 distinct investment strategies in managing its portfolios, and

offers products ranging from aggressive high volatility, market-neutral hedge funds to low volatility, benchmark-driven traditional portfolios.

First Quadrant offers investment management strategies in two main areas, equities and global macro, while paying close attention to risk management. In addition, First Quadrant's Global Alternatives mutual fund offers retail investors access to the firm's proven global asset allocation strategies focused on uncorrelated alpha sources across the globe.

Third Avenue applies its disciplined value approach to products investing in real estate securities, as well as distressed securities and other special situations. For example, the highly rated Third Avenue Real Estate Value Fund invests primarily in equity and debt securities of companies in the real estate industry or related industries, using bottom-up, fundamental analysis to identify undervalued securities. Third Avenue also has a long history of including investments in distressed debt securities within its equity mutual funds and has extended this expertise to

investing in distressed and other special situations through private investment partnerships.

Genesis, a leading investment firm in emerging markets equities, introduced the Genesis Smaller Companies Fund in 2006. The fund invests primarily in equity securities of firms that operate in emerging markets and have market capitalizations of less than \$1 billion.

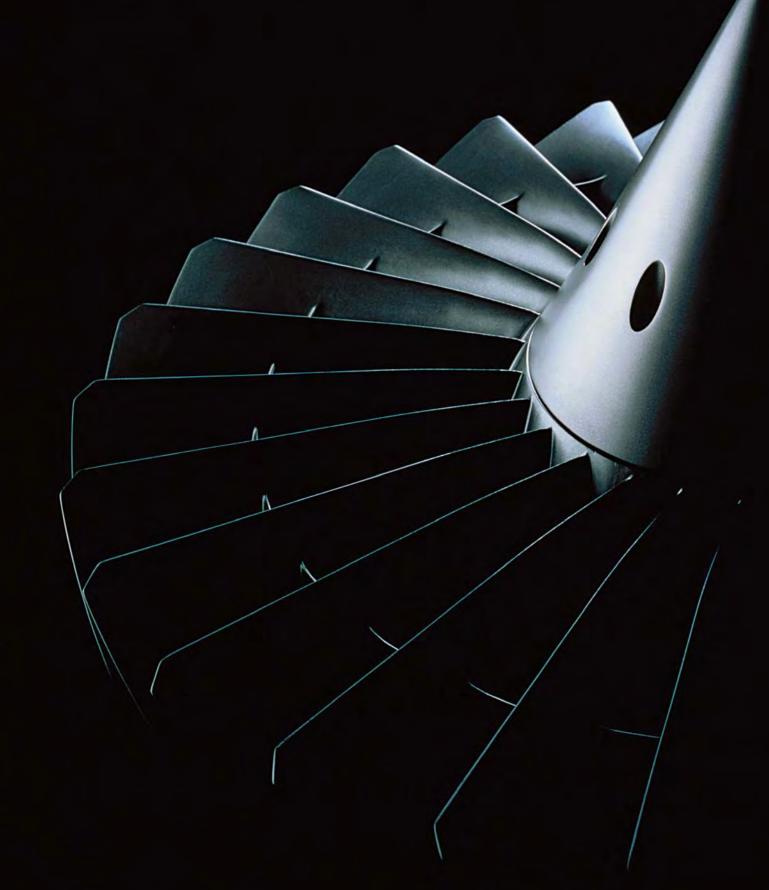

U.S. Growth Equity

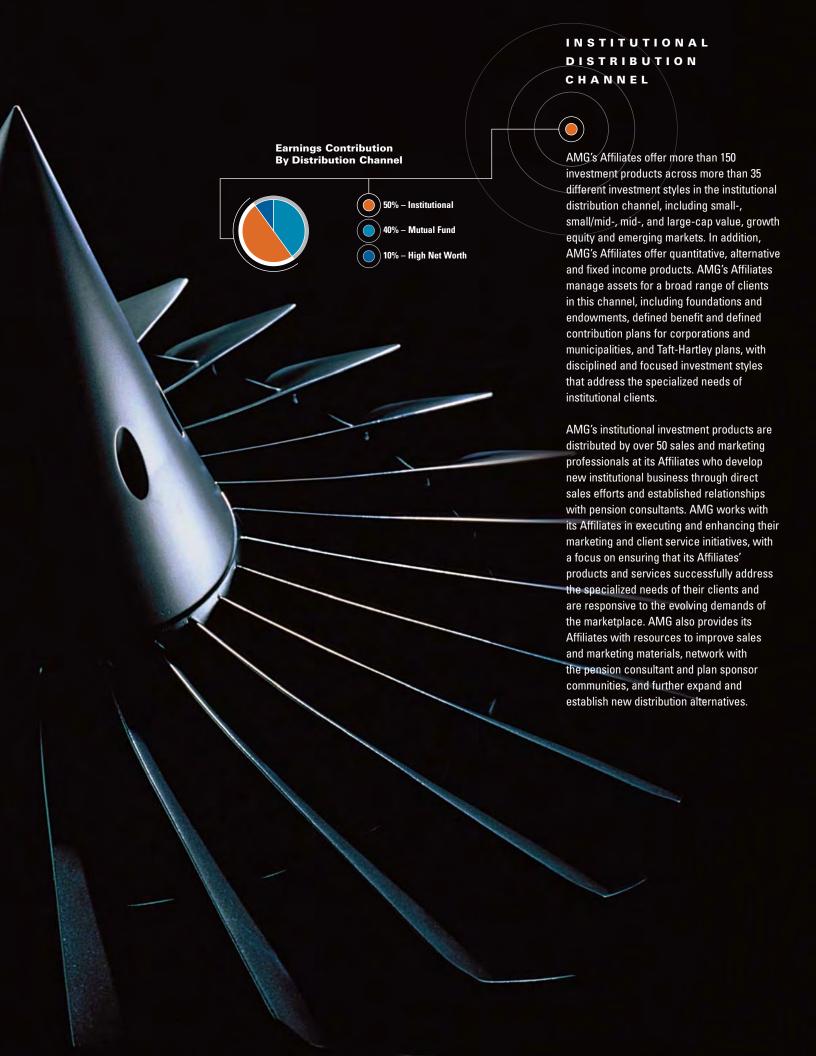

AMG's Affiliates are among the leading boutique managers in the active management of U.S. equities. Among the Company's larger Affiliates providing growth equity expertise, Friess Associates, TimesSquare Capital Management and Frontier Capital Management have strong market positions and are well-respected as leading growth investors.

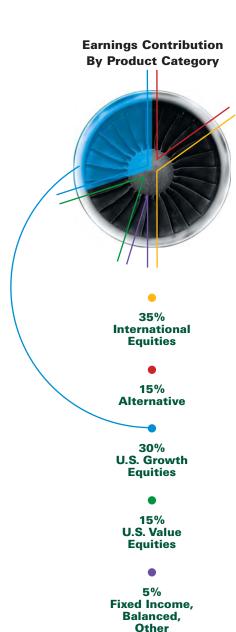

Friess uses a time-tested investment strategy that relies on exhaustive, company-by-company research to identify

AMG's Affiliates are among the leading investors in their disciplines, with years of successful application of their investment processes demonstrated in their outstanding long-term performance records.

companies with promising earnings growth potential that have yet to be recognized by the broader investment community. Friess' highly rated Brandywine mutual fund family is one of the most well-respected and best performing families of mutual funds, and it continues to generate superior results. Friess also has expanded its institutional and high net worth businesses, with significant growth resulting from the outstanding performance of its products, several of which are now sold in the intermediary channels through AMG's Managers Investment Group platform. Friess' investment products were previously unavailable in this segment of the market, and Managers has had broad success in expanding Friess' client base and generating substantial new business in the intermediary channels.

TimesSquare is among the industry's leading growth equity managers, specializing in small-, small/mid-, and mid-cap strategies, and the firm has achieved excellent returns for its investors through its proprietary research driven,

bottom-up process of selecting companies that meet its definition of superior growth businesses.

Frontier offers a wide range of high quality investment products, including strategies focused on small-, small/mid-, mid-, and large-cap growth equities. The firm uses a highly disciplined stock selection process driven by intensive internal research to generate excellent returns for its clients.

U.S. Value Equity

AMG's Affiliates also include some of the industry's most experienced and respected practitioners of value investing, such as Tweedy, Browne, Third Avenue and Systematic Financial Management. AMG's value equity products span a wide range of market capitalizations and include many of the industry's most highly rated investment products.

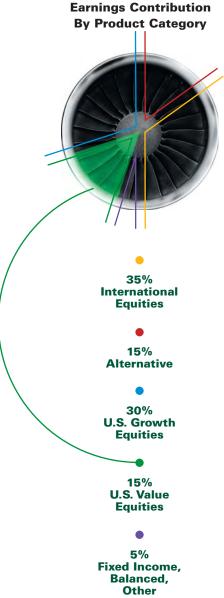

Tweedy, Browne, a renowned practitioner of deep value investing, manages U.S. equity products including the Tweedy, Browne Value Fund, as well as individual accounts for institutional and high net worth investors. Tweedy, Browne's research seeks to appraise the intrinsic value of a company, and uses a disciplined buy and sell process to guide its investment decisions.

Third Avenue is among the leading value managers in the investment management industry, with strong-performing products including the Third Avenue Value and Third Avenue Small-Cap Value mutual funds. The firm seeks to invest in securities and companies at a deep discount to the intrinsic value of their assets, and has created superior returns for its investors over the long-term.

Systematic specializes in the management of value equity portfolios across the

market capitalization spectrum. The firm's investment philosophy focuses on identifying companies that exhibit a combination of attractive valuation and a positive earnings catalyst. This strategy has produced superior near- and long-term results for its clients.

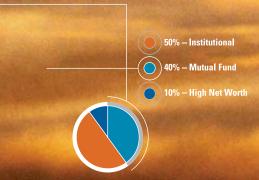

MUTUAL FUND DISTRIBUTION CHANNEL

Earnings Contribution By Distribution Channel

AMG has a strong presence in the mutual fund channel, with Affiliates providing advisory or sub-advisory services to more than 100 mutual funds. These funds are distributed to retail and institutional clients directly and through intermediaries, including independent investment advisors, retirement plan sponsors, broker-dealers, major fund marketplaces and bank trust departments.

By utilizing the distribution, sales and client service capabilities of Managers Investment Group, AMG offers its Affiliates access to the mutual fund distribution channel. For an Affiliate with a predominantly institutional or high net worth clientele, a presence in the mutual fund channel can be established by leveraging Managers' operational infrastructure and marketing capabilities. Managers also offers those Affiliates with an existing presence in the mutual fund channel the opportunity to expand their distribution, by operating as a single point of contact for retail intermediaries such as banks, brokerage firms and other sponsored platforms.

AMG's growth and development strategy is focused on offering Affiliates the advantages of scale where such opportunities exist. While Affiliates maintain the flexibility and freedom to determine the initiatives in which they participate, nearly all have elected to participate in one or more of these initiatives.

Fixed Income, Balanced and Other Products

In addition to their specialized expertise in equity and alternative products, a number of AMG's Affiliates, such as Foyston and Managers Investment Group, offer fixed income and other products to their institutional, mutual fund and high net worth clients.

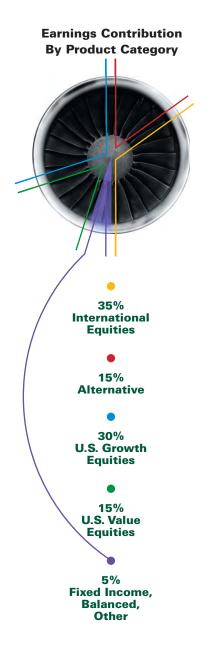

Together, these products account for approximately five percent of AMG's

Growth and Development Initiatives

EBITDA.

AMG's growth and development strategy is focused on preserving each Affiliate's distinct operating and investment culture while offering Affiliates the advantages of scale.

While the internal growth of AMG's Affiliates does not depend on AMG's involvement, AMG has implemented a number of strategic initiatives to further enhance the growth and profitability of its Affiliates' businesses. AMG makes available to its Affiliates a broad array of opportunities and services, including initiatives designed to expand an Affiliate's product offerings and distribution capabilities, as well as cross-Affiliate initiatives that enable Affiliates to streamline operations and obtain high quality services at cost-effective rates. While Affiliates maintain the flexibility and freedom to determine their participation, nearly all have elected to participate in one or more of these initiatives.

AMG has successfully built industry-leading platforms for Affiliates to expand the distribution of their investment products through cost-effective access to a broader marketplace. More than half of AMG's Affiliates, including its largest Affiliates, use AMG as part of their product distribution strategy.

AMG's Managers distribution platform provides its Affiliates with the opportunity to meaningfully expand their product offerings and distribution capabilities in the U.S. retail marketplace, where scale and quality of execution in sales, client service, support and back-office requirements are essential for success. With a team of experienced sales professionals, the Managers platform services and distributes single- and multi-manager Affiliate mutual fund and separate account products to broker-dealers, banks and independent advisors.

AMG opened an office in Australia in February 2007: the first step in building an international platform to provide its Affiliates with the opportunity to sell their product offerings to institutional investors in international markets. In many of these markets, including Australia, a local presence is an important aspect of providing high quality execution in sales, client services and support. For investors seeking leading boutique firms with excellent long-term performance, AMG's Affiliates offer a broad and diverse array of outstanding products, including global and U.S. equities, real estate, currency and global asset allocation products. By providing its Affiliates with efficient and superior distribution capabilities for international investors, AMG will generate significant incremental client cash flows over time.

With a proven track record of value creation, a disciplined investment strategy, and a strong, flexible balance sheet to support further growth, AMG is well-positioned for continued success in executing accretive investments in new Affiliates.

AMG has also leveraged the benefits of scale to offer Affiliates cost-effective access to high quality resources in areas such as compliance and technology. As the regulatory climate in the investment management industry has grown more complex, AMG has significantly expanded the centralized resources it offers to Affiliates. By bringing the knowledge and experience of senior AMG attorneys and compliance professionals to the Affiliate level, AMG provides industry expertise and robust, leading-edge compliance capabilities at a level well beyond that which would be typically available to mid-sized firms.

Most importantly, AMG works closely with its Affiliates to maintain and enhance the equity incentives that are critical to each Affiliate's continued growth. AMG engages in an ongoing process with its Affiliates to manage each firm's succession and transition process, with a focus on ensuring that equity incentives are properly allocated and aligned among key members of each firm.

Investments in New Affiliates

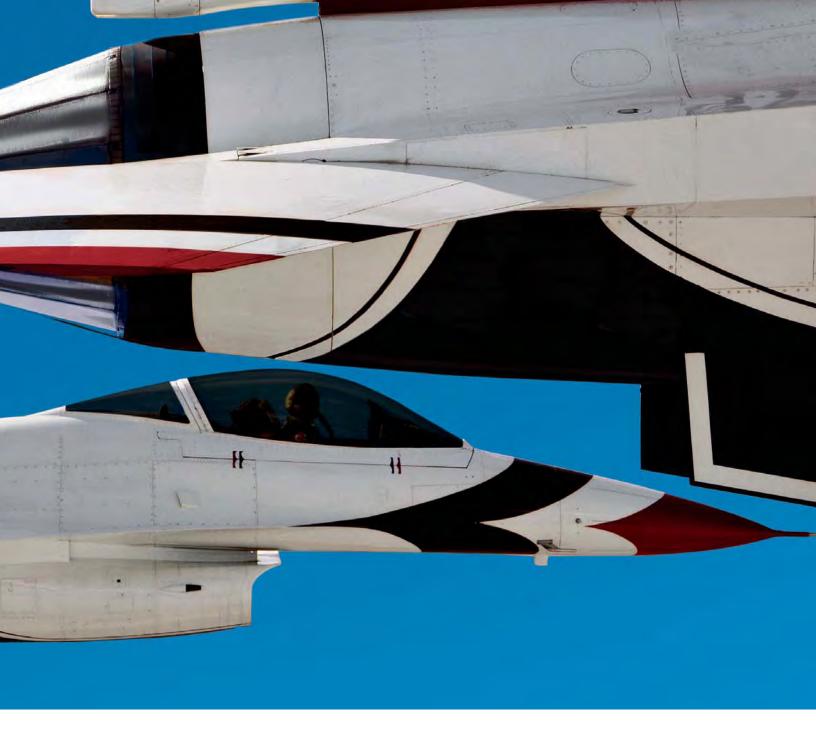

In addition to the strong organic growth generated by AMG's existing Affiliates, AMG has generated significant growth through accretive investments in new Affiliates.

AMG's investment strategy provides
Affiliate managers with direct equity
ownership in their firm, creating a
powerful incentive for long-term growth
and investment performance. This
approach preserves the entrepreneurial
culture that characterizes the best
boutique asset management firms, while
also providing access to the resources and
distribution capabilities of a larger asset
management company. It also attracts
new Affiliates that value their autonomy
and continued participation in their firm's
future growth.

AMG continues to identify and develop relationships with high quality domestic and international boutique firms, and is well-positioned to execute new investments, having established relationships with many of the best firms in the industry. Within its target universe, AMG is widely recognized as the preeminent succession planning alternative for owners, clients and employees of firms that seek to facilitate ownership transitions, while maintaining their unique culture and approach and providing next generation of management with key growth incentives through direct equity ownership.

With a proven track record of value creation, a disciplined investment strategy, and a strong, flexible balance sheet to support further growth, AMG is well-positioned for continued success in executing accretive investments in new Affiliates. In addition, AMG has enhanced its resources to identify and capitalize on an expanded set of investment opportunities that are beyond the Company's traditional approach to investing in boutique asset management firms.

Financial Strength

AMG's operations generate strong and recurring free cash flow, and the Company's broad exposure across various investment styles and distribution channels provides balance and stability to this cash flow. AMG takes a disciplined approach to investing its free cash flow,

and adheres to well-defined return objectives in making investments in growth initiatives for existing Affiliates, as well as in executing acquisitions of interests in new Affiliates.

AMG supports its growth strategy by maintaining a strong balance sheet and diverse sources of long-term capital. The Company maintains an investment grade rating, and strives to maintain substantial liquidity and financial

flexibility. AMG manages its capital resources and cash flow to achieve superior long-term results for shareholders by financing new investments, repaying existing indebtedness and repurchasing its stock, when appropriate.

Forward-Looking Statements

When used in this Annual Report and in our other filings with the United States Securities and Exchange Commission, in our press releases and in oral statements made with the approval of an executive officer, the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "may," "intends," "believes," "estimate," "project" or similar expressions are intended to identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties, including, among others, the following:

- our performance is directly affected by changing conditions in global financial markets generally and in the equity markets particularly, and a decline or a lack of sustained growth in these markets may result in decreased advisory fees or performance fees and a corresponding decline (or lack of growth) in our operating results and in the cash flow distributable to us from our Affiliates;
- we cannot be certain that we will be successful in finding or investing in additional investment management firms on favorable terms, that we will be able to consummate announced investments in new investment management firms, or that existing and new Affiliates will have favorable operating results;
- we may need to raise capital by making long-term or shortterm borrowings or by selling shares of our common stock or other securities in order to finance investments in additional investment management firms or additional investments in our existing Affiliates, and we cannot be sure that such capital will be available to us on acceptable terms, if at all; and
- those certain other factors discussed under the caption "Risk Factors," which are set forth in our 2006 Annual Report on Form 10-K.

These factors (as well as those discussed under "Risk Factors") could affect our financial performance and cause actual results to differ materially from historical earnings

and those presently anticipated and projected. We will not undertake and we specifically disclaim any obligation to release publicly the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of events, whether or not anticipated. In that respect, we wish to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made.

Overview

We are an asset management company with equity investments in a diverse group of mid-sized investment management firms (our "Affiliates"). We pursue a growth strategy designed to generate shareholder value through the internal growth of our existing business, additional investments in mid-sized investment management firms and strategic transactions and relationships designed to enhance our Affiliates' businesses and growth prospects.

Through our Affiliates, we manage approximately \$241.1 billion in assets (as of December 31, 2006) in more than 300 investment products across a broad range of asset classes and investment styles in three principal distribution channels: Mutual Fund, Institutional and High Net Worth. We believe that our diversification across asset classes, investment styles and distribution channels helps to mitigate our exposure to the risks created by changing market environments. The following summarizes our operations in our three principal distribution channels.

- Our Affiliates provide advisory or sub-advisory services to more than 100 mutual funds. These funds are distributed to retail and institutional clients directly and through intermediaries, including independent investment advisors, retirement plan sponsors, broker/dealers, major fund marketplaces and bank trust departments.
- In the Institutional distribution channel, our Affiliates offer more than 150 investment products across more than 35 different investment styles, including small, small/mid, mid and large capitalization value, growth

equity and emerging markets. In addition, our Affiliates offer quantitative, alternative and fixed income products. Through this distribution channel, our Affiliates manage assets for foundations and endowments, defined benefit and defined contribution plans for corporations and municipalities, and Taft-Hartley plans, with disciplined and focused investment styles that address the specialized needs of institutional clients.

The High Net Worth distribution channel is comprised broadly of two principal client groups. The first group consists principally of direct relationships with high net worth individuals and families and charitable foundations. For these clients, our Affiliates provide investment management or customized investment counseling and fiduciary services. The second group consists of individual managed account client relationships established through intermediaries, generally brokerage firms or other sponsors. Our Affiliates provide investment management services through more than 90 managed account and wrap programs.

In December 2006, we acquired a majority equity interest in Chicago Equity Partners, a firm that manages a wide range of U.S. equity and fixed income products across multiple capitalization sectors and investment styles. Chicago Equity Partners' client base includes over 120 institutional investors, including public funds, corporations, endowments and foundations, Taft-Hartley plan sponsors and certain mutual fund advisors.

We operate our business through our Affiliates in our three principal distribution channels, maintaining each Affiliate's distinct entrepreneurial culture and independence through our investment structure. In each case, our Affiliates are organized as separate firms, and their operating or shareholder agreements are tailored to provide appropriate incentives for our Affiliate management owners and to address the particular characteristics of that Affiliate while enabling us to protect our interests.

We have revenue sharing arrangements with most of our Affiliates. Under these arrangements, a percentage of revenue is generally allocated for use by management of that Affiliate in paying operating expenses of the Affiliate, including salaries and bonuses. We call this the "Operating Allocation." The portion of the Affiliate's revenue that is allocated to the owners of that Affiliate (including us) is called the "Owners' Allocation." Each Affiliate allocates its Owners' Allocation to its managers and to us generally in proportion to their and our respective ownership interests in that Affiliate. Where we hold a minority equity interest, our revenue sharing arrangement generally allocates a percentage of the revenue to us, with the balance to be used to pay operating expenses and profit distributions to the Affiliate management owners.

One of the purposes of our revenue sharing arrangements is to provide ongoing incentives for Affiliate managers by allowing them to:

- participate in the growth of their firm's revenue, which may increase their compensation from the Operating Allocation and their distributions from the Owners' Allocation; and
- control operating expenses, thereby increasing the portion of the Operating Allocation that is available for growth initiatives and compensation.

An Affiliate's managers therefore have incentives to increase revenue (thereby increasing the Operating Allocation and their share of the Owners' Allocation) and to control expenses (thereby increasing the amount of Operating Allocation available for their compensation). If actual operating expenses are less than an Affiliate's Operating Allocation, the profits allocated to the managers will increase. These profits are referred to as "Minority interest" on our Consolidated Statements of Income.

An Affiliate's Operating Allocation is structured to cover its operating expenses. However, should actual operating expenses exceed the Operating Allocation, our contractual share of cash under the Owners' Allocation generally has priority over the allocations and distributions to the Affiliate's managers. As a result, the excess expenses first reduce the portion of the Owners' Allocation allocated to the Affiliate's managers until that portion is eliminated, before reducing the portion allocated to us. Any such reduction in our portion of the Owners' Allocation is required to be paid back to us out of the portion of future Owners' Allocation allocated to the Affiliate's managers. Nevertheless, we may agree to adjustments to revenue sharing arrangements to accommodate our business needs or those of our Affiliates if we believe that doing so will maximize the long-term benefits to us. In addition, a revenue sharing arrangement may be modified to a profitbased arrangement (as described below) to better accommodate our business needs or those of our Affiliates.

Certain of our Affiliates operate under profit-based arrangements through which we receive a share of profits as cash flow. As a result, we participate fully in any increase or decrease in the revenue or expenses of such firms. In these cases, we participate in a budgeting process and generally provide incentives to management through compensation arrangements based on the performance of the Affiliate. In recent periods, approximately 15% of our earnings has been generated through our profit-based arrangements.

For the year ended December 31, 2006, approximately \$266.5 million was reported as compensation to our Affiliate managers under these revenue sharing arrangements. Additionally, during this period we allocated approximately \$212.5 million of our Affiliates' profits to their managers (referred to in our Consolidated Statements of Income as "Minority interest").

Our Net Income reflects the revenue of our consolidated Affiliates and our share of income from Affiliates which we account for under the equity method, reduced by:

- the operating expenses of our consolidated Affiliates;
- our operating expenses (i.e., our holding company expenses, including interest, depreciation and amortization, income taxes and compensation for our employees); and
- the profits allocated to managers of our consolidated Affiliates (i.e., minority interest).

As discussed above, for consolidated Affiliates with revenue sharing arrangements, the operating expenses of the Affiliate as well as its managers' minority interest generally increase (or decrease) as the Affiliate's revenue increases (or decreases) because of the direct relationship established in many of our agreements between the Affiliate's revenue and its Operating Allocation and Owners' Allocation. At our consolidated profit-based Affiliates, expenses may or may not correspond to increases or decreases in the Affiliates' revenues.

Our level of profitability will depend on a variety of factors, including:

- those affecting the global financial markets generally and the equity markets particularly, which could potentially result in considerable increases or decreases in the assets under management at our Affiliates;
- the level of Affiliate revenue, which is dependent on the ability of our existing and future Affiliates to maintain or increase assets under management by maintaining their existing investment advisory relationships and fee structures, marketing their services successfully to new clients and obtaining favorable investment results;

- our receipt of Owners' Allocation from Affiliates with revenue sharing arrangements, which depends on the ability of our existing and future Affiliates to maintain certain levels of operating profit margins;
- the increases or decreases in the revenue and expenses of Affiliates that operate on a profit-based model;
- the availability and cost of the capital with which we finance our existing and new investments;
- our success in making new investments and the terms upon which such transactions are completed;
- the level of intangible assets and the associated amortization expense resulting from our investments;
- the level of expenses incurred for holding company operations, including compensation for our employees;
 and
- the level of taxation to which we are subject.

Through our affiliated investment management firms, we derive most of our revenue from the provision of investment management services. Investment management fees ("asset-based fees") are usually determined as a percentage fee charged on periodic values of a client's assets under management; most asset-based advisory fees are billed by our Affiliates quarterly. Certain clients are billed for all or a portion of their accounts based upon assets under management valued at the beginning of a billing period ("in advance"). Other clients are billed for all or a portion of their accounts based upon assets under management valued at the end of the billing period ("in arrears"). Most client accounts in the High Net Worth distribution channel are billed in advance, and most client accounts in the Institutional distribution channel are billed in arrears.

Clients in the Mutual Fund distribution channel are billed based upon average daily assets under management. Advisory fees billed in advance will not reflect subsequent changes in the market value of assets under management for that period but may reflect changes due to client withdrawals. Conversely, advisory fees billed in arrears will reflect changes in the market value of assets under management for that period. In addition to generating asset-based fees, over 30 Affiliate products, representing approximately \$28 billion of assets under management, also bill on the basis of absolute or relative investment performance ("performance fees"). These products, which are primarily in the Institutional distribution channel, are generally structured to have returns that are not directly correlated to changes in broader equity indices and, if earned, the performance fee component is typically billed less frequently than an asset-based fee. Although performance fees inherently depend on investment results and will vary from period to period, we anticipate performance fees to be a recurring component of our revenue. We also anticipate that, within any calendar year, the majority of performance fees will typically be realized in the fourth quarter.

For certain of our Affiliates, generally where we own a minority interest, we are required to use the equity method of accounting. Consistent with this method, we have not consolidated the operating results of these firms (including their revenue) in our Consolidated Statements of Income. Our share of these firms' profits (net of intangible amortization) is reported in "Income from equity method investments," and is therefore reflected in our Net Income and EBITDA. As a consequence, increases or decreases in these firms' assets under management (which totaled \$46.1 billion as of December 31, 2006) will not affect reported revenue in the same manner as changes in assets under management at our other Affiliates.

Results of Operations

The following tables present our Affiliates' reported assets under management by operating segment (which are also referred to as distribution channels in this Annual Report).

Assets under Management

Statement of Changes

	Mutual		High Net	
(in billions)	Fund	Institutional	Worth	Total

- (1) In 2004, we completed new Affiliate investments in Genesis Fund Managers, LLP; TimesSquare Capital Management, LLC and AQR Capital Management, LLC. Additionally, in 2004, we acquired the retail mutual fund business of Conseco Capital Management, Inc. through Managers Investment Group LLC. In 2005, we acquired the mutual fund business of Fremont Investment Advisors Inc. through Managers Investment Group LLC and completed new Affiliate investments in Foyston, Gordon & Payne Inc.; Beutel, Goodman & Company Ltd.; Montrusco Bolton Investments Inc.; Deans Knight Capital Management Ltd.; Triax Capital Corporation; and Covington Capital Corporation. In December 2006, we completed a new Affiliate investment in Chicago Equity Partners.
- (2) In 2005 and 2006, we transferred our interests in certain affiliated investment management firms. These transactions were not material to our financial position or results of operations.

The operating segment analysis presented in the following table is based on average assets under management. For the Mutual Fund distribution channel, average assets under management represents an average of the daily net assets under management. For the Institutional and High Net Worth distribution channels, average assets under management represents an average of the assets at the beginning and end of each calendar quarter during the applicable period. We believe that this analysis more closely correlates to the billing cycle of each distribution channel and, as such, provides a more meaningful relationship to revenue.

(in millions, except as noted)	2004	2005	% Change	2006	% Change
Average Assets under Management (in billions)(1)					
Mutual Fund	\$ 27.8	\$ 43.0	55%	\$ 54.4	27%

Total	\$ 186.4	\$ 267.5	44%	\$ 342.1	28%

- (1) Assets under management attributable to investments that were completed during the relevant periods are included on a weighted average basis for the period from the closing date of the respective investment. Average assets under management includes assets managed by affiliated investment management firms that we do not consolidate for financial reporting purposes of \$1.6 billion, \$20.6 billion and \$39.1 billion for 2004, 2005 and 2006, respectively.
- (2) Note 23 to the Consolidated Financial Statements describes the basis of presentation of the financial results of our three operating segments. As discussed in Note 1 to the Consolidated Financial Statements, we are required to use the equity method of accounting for certain investments and as such do not consolidate their revenue for financial reporting purposes. Our share of profits from these investments is reported in "Income from equity method investments" and is therefore reflected in Net Income and EBITDA.
- (3) EBITDA represents earnings before interest expense, income taxes, depreciation and amortization. As a measure of liquidity, we believe that EBITDA is useful as an indicator of our ability to service debt, make new investments and meet working capital requirements. EBITDA is not a measure of liquidity under generally accepted accounting principles and should not be considered an alternative to cash flow from operations. EBITDA, as calculated by us, may not be consistent with computations of EBITDA by other companies. Our use of EBITDA, including a reconciliation to cash flow from operations, is discussed in greater detail in "Liquidity and Capital Resources." For purposes of our distribution channel operating results, holding company expenses have been allocated based on the proportion of aggregate cash flow distributions reported by each Affiliate in the particular distribution channel.

Revenue

Our revenue is generally determined by the level of our assets under management, the portion of our assets across our products and three operating segments, which realize different fee rates, and the recognition of any performance fees.

Our revenue increased \$253.9 million (or 28%) in 2006 from 2005, primarily as a result of a 35% increase in average assets under management. The increase in assets under management resulted principally from positive investment performance and net client cash flows and, to a lesser extent, our 2005 investments in new Affiliates. The increase in revenue was proportionately less than the growth in assets under management primarily as a result of our equity method investments, as we do not consolidate the revenue or expenses of these Affiliates.

The increase in revenue of \$256.5 million (or 39%) in 2005 from 2004 resulted principally from a 51% increase in average assets under management. The increase in average assets under management was primarily attributable to our investments in new Affiliates in 2004 and 2005 and, to a lesser extent, positive investment performance and cash flows. The increase in revenue was proportionately less than the growth in assets under management primarily as a result of our equity method investments, as we do not consolidate the revenue or expenses of these Affiliates. Unrelated to the change in assets under management, the increase in revenue was also a result of higher performance fees in 2005 as compared to 2004.

The following discusses the changes in our revenue by operating segments.

Mutual Fund Distribution Channel

The increase in revenue of \$100.8 million (or 25%) in the Mutual Fund distribution channel in 2006 from 2005 resulted principally from a 27% increase in average assets under management. The increase in average assets under management resulted principally from positive investment performance, our 2005 investments in new Affiliates, and positive net client cash flows.

The increase in revenue of \$139.0 million (or 53%) in 2005 from 2004 resulted principally from a 55% increase in average assets under management. The increase in average assets under management was primarily attributable to positive investment performance and net client cash flows, and, to a lesser extent, from investments in new Affiliates.

Institutional Distribution Channel

The increase in revenue of \$129.1 million (or 33%) in the Institutional distribution channel in 2006 from 2005 resulted principally from a 41% increase in average assets under management. The increase in average assets under management resulted principally from positive investment performance and net client cash flows and, to a lesser extent, our 2005 investments in new Affiliates. The increase in revenue was proportionately less than the increase in assets under management primarily as a result of our equity method investments, as we do not consolidate revenue or expenses of such Affiliates.

Our revenue increased \$123.4 million (or 47%) in 2005 from 2004, primarily as a result of a 71% increase in average assets under management. The increase in assets under management resulted principally from our investments in new Affiliates in 2004 and 2005, and to a lesser extent, from positive investment performance and net client cash flows. The increase in revenue was proportionately less than the growth in assets under management primarily as a result of our equity method investments, as we do not consolidate the revenue or expenses of these Affiliates. Unrelated to the change in assets under management, the increase in revenue was also a result of higher performance fees in 2005 as compared to 2004.

High Net Worth Distribution Channel

The increase in revenue of \$24.0 million (or 18%) in the High Net Worth distribution channel in 2006 from 2005 resulted principally from a 28% increase in average assets under management. The increase in average assets under management resulted principally from our 2005 investments in new Affiliates and positive investment

performance. The increase in revenue was proportionately less than the increase in assets under management primarily as a result of our equity method investments, as we do not consolidate the revenue or expenses of these Affiliates, and increases in assets under management that realize a comparatively lower fee rate.

Revenue decreased \$5.9 million (or 4%) in 2005 from 2004 in the High Net Worth distribution channel, principally from a 2% decline in average assets under

management. The decline in average assets under management was primarily attributable to net client cash outflows at Rorer Asset Management, LLC and was substantially offset by investments in new Affiliates and positive investment performance. The change in revenue was proportionately less than the change in assets under management primarily as a result of our equity method investments, as we do not consolidate the revenue or expenses of these Affiliates.

Operating Expenses

The following table summarizes our consolidated operating expenses:

(in millions)	2004	2005	% Change	2006	% Change
Compensation and related expenses	\$ 241.6	\$ 365.9	51%	\$ 472.4	29%
Selling, general and administrative	109.1	162.1	49%	184.0	14%
Amortization of intangible assets	18.3	24.9	36%	27.4	10%
Depreciation and other amortization	6.4	7.0	9%	8.7	24%
Other operating expenses	16.7	21.5	29%	23.9	11%
Total operating expenses	\$ 392.1	\$ 581.4	48%	\$ 716.4	23%

The substantial portion of our operating expenses is incurred by our Affiliates, the majority of which is incurred by Affiliates with revenue sharing arrangements. For Affiliates with revenue sharing arrangements, an Affiliate's Operating Allocation percentage generally determines its operating expenses. Accordingly, our compensation expense is generally impacted by increases or decreases in each Affiliate's revenue and the corresponding increases or decreases in their respective Operating Allocations. During 2006, approximately \$266.5 million, or about 56% of our consolidated compensation expense, was attributable to our Affiliate managers. The percentage of revenue allocated to operating expenses varies from one Affiliate to another and may vary within an Affiliate depending on the source or amount of revenue. As a result, changes in our aggregate revenue may not impact our consolidated operating expenses to the same degree.

Compensation and related expenses increased 29% in 2006, following a 51% increase in 2005. The increase in 2006 was primarily a result of the relationship between revenue and operating expenses at our Affiliates with revenue sharing arrangements, which experienced aggregate increases in revenue and accordingly, reported higher compensation expenses, including \$12.8 million of additional compensation expense from our new investments in 2005 (and the inclusion of the compensation expense for those Affiliates). The increase in 2005 was also primarily a result of the relationship between revenue and operating expenses at our Affiliates with revenue sharing arrangements, which experienced aggregate increases in revenue, and accordingly, reported higher compensation expenses, including \$52.0 million in additional compensation expenses from our new investments in 2004 and 2005 (and the inclusion of the compensation expense for those Affiliates). This increase was also related to a \$16.9 million increase in holding company compensation (relating to equity based and incentive compensation, as well as increases in the number of holding company personnel), with the remainder associated with our formation of Managers.

Selling, general and administrative expenses increased 14% in 2006. The increase was principally attributable to the growth in assets under management at our Affiliates in the Mutual Fund distribution channel, including the \$6.9 billion of assets under management from our 2005 investments in new Affiliates. Selling, general and administrative expenses increased 49% in 2005. The increase was principally attributable to increases in expenses that resulted from the growth in assets under management at our Affiliates in the Mutual Fund distribution channel, and the \$20.1 million increase in additional Affiliate expenses from our new investments in 2004 and 2005 (and the inclusion of the additional expenses for those Affiliates).

Amortization of intangible assets increased 10% in 2006 and 36% in 2005, principally from an increase in definite-lived intangible assets resulting from our investments in new and existing Affiliates during 2005.

Depreciation and other amortization expenses increased 24% in 2006 and 9% in 2005. The increase in 2006 was principally attributable to our 2005 investments in new Affiliates and other spending on depreciable assets during 2005 and 2006. In 2005, the increase was principally attributable to new investments.

Other operating expenses increased 11% in 2006 principally as a result of a \$1.1 million increase in operating expenses from our new investments in 2005 and expenses related to other Affiliate transactions. Other operating expenses increased 29% in 2005, principally as a result of a \$2.7 million increase in operating expenses from our new investments in 2004 and 2005 (and the inclusion of the additional expenses for those Affiliates).

Other Income Statement Data

The following table summarizes non-operating income and expense data:

(in millions)	2004	2005	% Change	2006	% Change
Income from equity method investments	\$ 1.3	\$ 27.0	1,977%	\$ 38.3	42%
Investment and other income	6.9	8.9	29%	16.9	90%
Investment income from					
Affiliate investments in partnerships	0.3	0.4	33%	3.4	750%
Minority interest in					
Affiliate investments in partnerships	_	_	_	3.4	
Minority interest	115.5	144.3	25%	212.5	47%
Interest expense	31.7	37.4	18%	58.8	57%
Income tax expense	51.9	70.6	36%	86.6	23%

Income from equity method investments consists of our share of income from Affiliates that are accounted for under the equity method of accounting, net of any related intangible amortization. Income from equity method investments increased 42% in 2006 as a result of an

increase in assets under management, including our 2005 investments in new Affiliates (\$5.7 million increase in income in 2006). The increase in 2005 was attributable to new investments in Affiliates that are accounted for under the equity method of accounting.

Investment and other income primarily consists of earnings on cash and cash equivalent balances and earnings that Affiliates realize on investments in marketable securities. Investment and other income increased 90% in 2006 primarily as a result of an increase in Affiliate investment earnings of \$6.4 million, and earnings of \$1.6 million on investments held by new Affiliates. Our agreements generally allocate Affiliate earnings on marketable securities to our management partners. The increase in 2005 was attributable to a \$1.5 million increase in aggregate Affiliate investment income from our new investments in 2004 and 2005 (and the inclusion of the investment income for those Affiliates). In 2005, the increase in investment and other income resulting from the non-recurrence of a \$2.5 million loss in 2004 on our repurchase of \$154.3 million of the senior notes component of our 2001 PRIDES was partially offset by a \$1.7 million decrease in interest income.

In 2006 we adopted EITF 04-05, which requires us to consolidate certain Affiliate investment partnerships in our financial statements. Investment income from Affiliate investments in partnerships and Minority interest in Affiliate investments in partnerships results from the consolidation of these partnerships. For 2006, the income from Affiliate investments in partnerships was \$3.4 million, which was principally attributable to investors who are unrelated to us and is reported as Minority interest in Affiliate investments in partnerships.

Minority interest increased 47% in 2006, principally as a result of the previously discussed increase in revenue. This increase was proportionately greater than the increase in revenue because certain Affiliates reported expenses that were less than their Operating Allocation. Minority interest increased 25% in 2005, principally as a result of the previously discussed increase in revenue. The percentage increase in minority interest was proportionately less than the percentage increase in revenue because of \$9.0 million in investment spending by certain Affiliates in 2005 and our November 2004 purchase of an additional 19% interest in Friess Associates, which decreased minority interest by \$9.4 million.

Interest expense increased 57% in 2006, principally attributable to the April 2006 issuance of \$300 million of junior convertible trust preferred securities (\$11.4 million in 2006) and increases in borrowings under our senior revolving credit facility (\$7.2 million in 2006). The increase in 2005 was principally attributable to our floating rate convertible securities (\$5.6 million), borrowings under our credit facility (\$5.0 million) and our 2004 PRIDES (\$1.4 million).

Income taxes increased 23% in 2006 principally as a result of the 25% increase in net income before taxes. The increase was partially offset by a \$1.4 million reduction in income taxes from a decrease in Canadian federal income tax rates. The 36% increase in income tax expense in 2005 was principally attributable to an increase in income before taxes and was partially offset by a decrease in the effective tax rate from 40.2% to 37.2%.

Net Income

The following table summarizes Net Income for the past three years:

(in millions)	2004	2005	% Change	2006	% Change
Net Income	\$77.1	\$ 119.1	54%	\$ 151.3	27%

Net Income increased 27% in 2006 and 54% in 2005, principally as a result of increases in revenue and income from equity method investments, partially offset by increases in reported operating, interest, minority interest and tax expenses, as described above.

Supplemental Performance Measure

As supplemental information, we provide a non-GAAP performance measure that we refer to as Cash Net Income. This measure is provided in addition to, but not as a substitute for, Net Income. Cash Net Income is defined as Net Income plus amortization and deferred taxes related to intangible assets plus Affiliate depreciation. We consider Cash Net Income an important measure of our financial performance, as we believe it best represents operating performance before non-cash expenses relating to our acquisition of interests in

our Affiliates. Cash Net Income is used by our management and Board of Directors as a principal performance benchmark, including as a measure for aligning executive compensation with stockholder value.

Since our acquired assets do not generally depreciate or require replacement by us, and since they generate deferred tax expenses that are unlikely to reverse, we add back these non-cash expenses to Net Income to measure operating performance. We add back amortization attributable to acquired client relationships because this expense does not correspond to the changes in value of these assets, which do not diminish predictably over time. The portion of deferred taxes generally attributable to intangible assets (including goodwill) that we no longer amortize but which continues to generate tax deductions is added back, because these accruals would be used only in the event of a future sale of an Affiliate or an impairment charge, which we consider unlikely. We add back the portion of consolidated depreciation expense incurred by our Affiliates because under our Affiliates' operating agreements we are generally not required to replenish these depreciating assets. Conversely, we do not add back the deferred taxes relating to our floating rate senior convertible securities or other depreciation expenses.

The following table provides a reconciliation of Net Income to Cash Net Income:

(in millions)	2004	2005	2006
Net Income	\$ 77.1	\$ 119.1	\$ 151.3
Intangible amortization	18.3	24.9	27.4
Intangible amortization-			
equity method			
investments ⁽¹⁾	0.9	8.5	9.3
Intangible-related			
deferred taxes	25.8	28.8	28.8
Affiliate depreciation	4.4	4.8	5.7
Cash Net Income	\$ 126.5	\$ 186.1	\$ 222.5

(1) As discussed in Note 1 to the Consolidated Financial Statements, we are required to use the equity method of accounting for our investments in AQR, Beutel and Deans Knight and, as such, do not consolidate their revenue or expenses (including intangible amortization expenses) in our income statement. Our share of these investments' amortization is reported in "Investment and other income." Cash Net Income increased 20% in 2006 and 47% in 2005, primarily as a result of the previously described factors affecting Net Income.

Liquidity and Capital Resources

The following table summarizes certain key financial data relating to our liquidity and capital resources:

		December 31,	
(in millions)	2004	2005	2006
Balance Sheet Data			
Cash and			
cash equivalents	\$ 140.3	\$ 140.4	\$ 201.7
Short-term investments	21.2	_	_

Zero coupon			
convertible notes	124.0	124.2	113.4
Floating rate			
convertible securities	300.0	300.0	300.0
Mandatory			
convertible securities	300.0	300.0	300.0
Junior convertible trust			
preferred securities	_		300.0
Cash Flow Data			
Operating cash flows	\$ 177.9	\$ 204.1	\$ 301.0
Investing cash flows	(478.3)	(82.0)	(165.1)
Financing cash flows	215.2	(122.3)	(75.1)
EBITDA ⁽¹⁾	186.4	267.5	342.1

(1) The definition of EBITDA is presented in Note 3 on page 39.

We view our ratio of debt to EBITDA (our "leverage ratio") as an important gauge of our ability to service debt, make new investments and access capital. Consistent with industry practice, we do not consider our mandatory convertible securities or our junior convertible trust preferred securities as debt for the purpose of determining our leverage ratio. We also view our leverage on a "net debt" basis by deducting our cash and cash equivalents from our debt balance. The leverage covenant of our senior revolving credit facility is generally consistent with our treatment of our mandatory convertible securities and our junior convertible trust preferred securities and our net debt approach. As of December 31, 2006, our leverage ratio was 1.7:1.

Supplemental Liquidity Measure

As supplemental information, we provide information regarding our EBITDA, a non-GAAP liquidity measure. This measure is provided in addition to, but not as a substitute for, cash flow from operations. EBITDA represents earnings before interest expense, income taxes, depreciation and amortization. EBITDA, as calculated by us, may not be consistent with computations of EBITDA by other companies. As a measure of liquidity, we believe that EBITDA is useful as an indicator of our ability to service debt, make new investments and meet working capital requirements. We further believe that many investors use this information when analyzing the financial position of companies in the investment management industry.

The following table provides a reconciliation of cash flow from operations to EBITDA:

(in millions)	2004	2005	2006
Cash Flow			
from Operations	\$ 177.9	\$ 204.1	\$ 301.0
Interest expense,			
net of non-cash items(1)	26.9	32.5	53.6
Current tax provision	20.3	38.9	55.2
Income from equity			
method investments,			
net of distributions(2)	2.2	18.9	1.6
Changes in assets and			
liabilities and other			
adjustments	(40.9)	(26.9)	(69.3)
EBITDA ⁽³⁾	\$ 186.4	\$ 267.5	\$ 342.1

- (1) Non-cash items represent amortization of issuance costs and interest accretion (\$4.8, \$4.9 and \$5.2 million in 2004, 2005 and 2006, respectively).
- (2) Distributions from equity method investments were \$0, \$16.6 and \$46.0 million for 2004, 2005 and 2006, respectively.
- (3) The definition of EBITDA is presented in Note 3 on page 39.

In 2006, we met our cash requirements primarily through cash generated by operating activities, the issuance of convertible securities and borrowings of senior debt. Our principal uses of cash were to repurchase shares of our common stock, make investments in new and existing Affiliates, repay senior debt and make distributions to Affiliate managers. We expect that our principal uses of cash for the foreseeable future will be for investments in new and existing Affiliates, distributions to Affiliate managers, payment of principal and interest on outstanding debt, the repurchase of debt securities, the repurchase of shares of our common stock and for working capital purposes.

Senior Revolving Credit Facility

We entered into an amended and restated senior revolving credit facility (the "Facility") in February 2007, which allows us to borrow up to \$650 million at rates of interest (based either on the Eurodollar rate or the prime rate as in effect from time to time) that vary depending on our credit ratings. Subject to the agreement of the lenders (or prospective lenders) to increase their commitments, we have the option to borrow up to an aggregate of \$800 million under this Facility. The Facility will mature in February 2012, and contains financial covenants with respect to leverage and interest coverage. The Facility also contains customary affirmative and negative covenants, including limitations on indebtedness, liens, cash dividends and fundamental corporate changes. Borrowings under the Facility are collateralized by pledges of the substantial majority of our capital stock or other equity interests owned by us. As of December 31, 2006, we had \$365.5 million outstanding under our prior Facility.

Zero Coupon Senior Convertible Notes

In May 2001, we issued \$251 million principal amount at maturity of zero coupon senior convertible notes due 2021 ("zero coupon convertible notes"), with each note issued at 90.50% of such principal amount and accreting at a rate of 0.50% per year. Following the repurchase and conversion of \$129.2 million principal amount of such notes, \$121.8 million principal amount at maturity of zero coupon convertible notes remains outstanding. Each security is

convertible into 17.429 shares of our common stock (at a current base conversion price of \$53.34) upon the occurrence of certain events, including the following: (i) if the closing price of a share of our common stock is more than a specified price over certain periods (initially \$62.36 and increasing incrementally at the end of each calendar quarter to \$63.08 in April 2021); (ii) if the credit rating assigned by Standard & Poor's to the securities is below BB-; or (iii) if we call the securities for redemption. The holders may require us to repurchase the securities at their accreted value in May, 2011 and 2016. If the holders exercise this option in the future, we may elect to repurchase the securities with cash, shares of our common stock or some combination thereof. We have the option to redeem the securities for cash at their accreted value. Under the terms of the indenture governing the zero coupon convertible notes, a holder may convert such security into common stock by following the conversion procedures in the indenture; subject to changes in the price of our common stock, the zero coupon convertible notes may not be convertible in certain future periods.

In February 2006, we amended the zero coupon convertible notes. Under the terms of this amendment, we will pay interest through May 7, 2008 at a rate of 0.375% per year on the principal amount at maturity of the notes in addition to the accrual of the original issue discount.

Floating Rate Senior Convertible Securities

In February 2003, we issued \$300 million of floating rate senior convertible securities due 2033 ("floating rate convertible securities"). The floating rate convertible securities bear interest at a rate equal to 3-month LIBOR minus 0.50%, payable in cash quarterly. Each security is convertible into shares of our common stock (at a base conversion price of \$54.17) upon the occurrence of certain events, including the following: (i) if the closing price of a share of our common stock exceeds \$65.00 over certain periods; (ii) if the credit rating assigned by Standard & Poor's is below BB-; or (iii) if we call the securities for redemption. Upon conversion, holders of the securities will receive 18.462 shares of our common stock for each convertible security. In addition, if the market price of our common stock

exceeds the base conversion price at the time of conversion, holders will receive additional shares of common stock based on the stock price at that time. Based on the trading price of our common stock as of December 31, 2006, upon conversion a holder of each security would receive an additional 5.453 shares. The holders of the floating rate convertible securities may require us to repurchase such securities in February 2008, 2013, 2018, 2023 and 2028, at their principal amount. We may choose to pay the purchase price for such repurchases with cash, shares of our common stock or some combination thereof. We may redeem the convertible securities for cash at any time on or after February 25, 2008, at their principal amount. Under the terms of the indenture governing the floating rate convertible securities, a holder may convert such security into common stock by following the conversion procedures in the indenture; subject to changes in the price of our common stock, the floating rate convertible securities may not be convertible in certain future periods.

As further described in Note 11 to the Consolidated Financial Statements, we have entered into interest rate swap contracts that effectively exchange the variable interest rate for a fixed interest rate on \$150 million of the floating rate convertible securities. Through February 2008, we will pay a weighted average fixed rate of 3.28% on that notional amount.

The floating rate senior convertible securities are considered contingent payment debt instruments under federal income tax regulations. These regulations require us to deduct interest in an amount greater than our reported interest expense, and results in annual deferred tax liabilities of \$3.9 million. These deferred tax liabilities will not reverse if our common stock is trading above certain thresholds at the time of the securities' conversion. For example, if the securities converted on February 22, 2007, all of the related deferred taxes would have been reclassified to equity if our common stock was trading at, or above, \$60.90. As of February 22, 2007, the closing price of our common stock was \$117.41 per share.

2004 Mandatory Convertible Securities

In February 2004, we issued \$300 million of mandatory convertible securities ("2004 PRIDES"). As described below, these securities are structured to provide \$300 million of additional proceeds to us following a successful remarketing and the exercise of forward purchase contracts in February 2008.

Each unit of the 2004 PRIDES consists of (i) a senior note due February 2010 with a principal amount of \$1,000 per note, on which we pay interest quarterly at the annual rate of 4.125%, and (ii) a forward purchase contract pursuant to which the holder has agreed to purchase shares of our common stock in February 2008. Holders of the purchase contracts receive a quarterly contract adjustment payment at the annual rate of 2.525% per \$1,000 purchase contract. The current portion of the contract adjustment payments, approximately \$6.0 million, is recorded in current liabilities. The number of shares to be issued in February 2008 will be determined based upon the average trading price of our common stock for a period preceding that date. Depending on the average trading price in that period, the settlement rate will range from 11.785 to 18.031 shares per \$1,000 purchase contract. Based on the trading price of our common stock as of December 31, 2006, the purchase contracts would have a settlement rate of 12.990.

Each of the senior notes is pledged to us to collateralize the holder's obligations under the forward purchase contracts. Under the terms of the 2004 PRIDES, the senior notes are expected to be remarketed to new investors. A successful remarketing will generate \$300 million of gross proceeds to be used by the original holders of the 2004 PRIDES to fulfill their obligations on the forward purchase contracts. In exchange for the additional \$300 million payment on the forward purchase contracts, we will issue shares of our common stock to the original holders of the senior notes. As referenced above, the number of shares of common stock to be issued will be determined by the market price of our common stock at that time. Assuming a successful remarketing, the senior notes will remain outstanding until at least February 2010.

Junior Convertible Trust Preferred Securities

In April 2006, we issued \$300 million of junior subordinated convertible debentures due 2036 to a wholly-owned trust simultaneous with the issuance, by the trust, of \$291 million of convertible trust preferred securities to investors. Under FASB Interpretation No. 46 (revised), "Consolidation of Variable Interest Entities," the trust is not consolidated in our financial statements. The junior subordinated convertible debentures and convertible trust preferred securities (together, the "junior convertible trust preferred securities") have substantially the same terms.

The junior convertible trust preferred securities bear interest at 5.1% per annum, payable in cash quarterly. Each \$50 security is convertible, at any time, into 0.333 shares of our common stock, which represents a conversion price of \$150 per share. Upon conversion, investors will receive cash or shares of our common stock (or a combination of cash and common stock) at our election. The junior convertible trust preferred securities may not be redeemed by us prior to April 15, 2011. On or after April 15, 2011, the junior convertible trust preferred securities may be redeemed if the closing price of our common stock exceeds \$195 for a specified period of time. The trust's only assets are the junior convertible subordinated debentures. To the extent the trust has available funds, we are obligated to ensure that holders of the convertible trust preferred securities receive all payments due from the trust.

The junior convertible trust preferred securities are considered contingent payment debt instruments under the federal income tax regulations. As with our floating rate convertible securities, we are required to deduct interest in an amount greater than our reported interest expense. These deductions generate deferred taxes of approximately \$2.6 million per year.

Call Spread Option Agreements

In March 2006, we entered into a series of call spread option agreements with a major securities firm. The agreements provide us the option, but not the obligation, to repurchase up to 917,000 shares of our common stock,

beginning in June 2007 and ending in December 2007, at a weighted-average price of \$99.59 per share. If our prevailing share price exceeds \$132.74, on a weighted-average basis during this period, the net number of shares available for repurchase under the agreements will be less than 917,000.

In the event we elect to exercise our option, we may elect to receive cash proceeds rather than shares of common stock. In connection with this arrangement, we made payments of approximately \$13.3 million, which were recorded as a reduction of stockholders' equity.

Purchases of Affiliate Equity

Many of our Affiliate operating agreements provide our Affiliate managers the conditional right to require us to purchase their retained equity interests at certain intervals. These agreements also provide us a conditional right to require Affiliate managers to sell their retained equity interests to us upon their death, permanent incapacity or termination of employment and provide Affiliate managers a conditional right to require us to purchase such retained equity interests upon the occurrence of specified events. These purchases may occur in varying amounts over a period of approximately 15 years (or longer), and the actual timing and amounts of such purchases (or the actual occurrence of such purchases) generally cannot be predicted with any certainty. These purchases are generally calculated based upon a multiple of the Affiliate's cash flow distributions at the time the right is exercised, which is intended to represent fair value. As one measure of the potential magnitude of such purchases, in the event that a triggering event and resulting purchase occurred with respect to all such retained equity interests as of December 31, 2006, the aggregate amount of these payments would have totaled approximately \$1,324.8 million. In the event that all such transactions were consummated, we would own the cash flow distributions attributable to the additional equity interests purchased from our Affiliate managers. As of December 31, 2006, this amount would represent approximately \$170.4 million on an annualized basis. We may pay for these purchases in cash, shares of our common stock or

other forms of consideration. Affiliate management partners are also permitted to sell their equity interests to other individuals or entities in certain cases, subject to our approval or other restrictions. These potential purchases, combined with our other cash needs, may require more cash than is available from operations, and therefore, we may need to raise capital by making borrowings under our Facility, by selling shares of our common stock or other equity or debt securities, or to otherwise refinance a portion of these purchases.

Operating Cash Flow

Cash flow from operations generally represents net income plus non-cash charges and changes from our consolidated working capital. The increase in cash flow from operations in 2006 and 2005 resulted principally from increases in net income and distributions from our equity method affiliates.

In 2006, in accordance with EITF 04-05, we consolidated \$108.4 million of client assets held in partnerships controlled by our Affiliates. Purchases and sales of these client assets generated \$7.7 million of operating cash flow in 2006. This operating cash flow was offset by a corresponding financing cash flow to the minority partners.

Investing Cash Flow

Changes in net cash flow from investing activities result primarily from our investments in new and existing Affiliates. Net cash flow used to make investments was \$474.1 million, \$85.2 million and \$123.3 million for 2004, 2005 and 2006, respectively. In 2004, we acquired interests in Genesis, TimesSquare and AQR, and additional interests in existing Affiliates. In 2005, we acquired interests in a group of Canadian Affiliates, as well as additional equity interests in existing Affiliates. In 2006, we acquired an interest in Chicago Equity Partners, LLC, as well as additional equity interests in existing Affiliates.

In conjunction with certain acquisitions, we have entered into agreements and are contingently liable, upon achievement of specified financial targets, to make additional purchase payments of up to \$165 million through 2011.

The specified financial targets for certain agreements will be measured beginning December 31, 2007. In the event the first financial target is achieved, we will make a payment of up to \$50 million in 2008.

Financing Cash Flow

Net cash flows used in financing activities decreased \$47.2 million in 2006 from 2005, primarily as a result of \$536.5 million of repurchases of our common stock, a use of cash that was financed by our \$300 million issuance of junior convertible trust preferred securities and a net increase of borrowings under our facility.

In accordance with Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" ("FAS 123R"), beginning in 2006, certain tax benefits associated with stock options (\$23.0 million) have been reported as financing cash flows.

The change in net cash flow from financing activities in 2005 from 2004 was primarily attributable to the repayment of \$150.8 million of debt at AMG Canada in connection with our 2005 investment, as well as the net effect of higher common stock repurchases relative to issuances of common stock. This increase was partially offset by \$124.5 million of net borrowings under our Facility.

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2006:

		Payments Due									
(in millions)	Total	2007	2008-2009	2010-2011	Thereafter						
Senior debt(1)	\$ 365.5	\$ —	\$ —	\$ 365.5	\$ —						
Senior convertible debt(1)	428.1	5.4	0.9	_	421.8						
Mandatory convertible securities(1)(2)	347.5	20.0	25.8	301.7	_						
Junior convertible trust preferred securities(1)(2)	748.2	15.3	30.6	30.6	671.7						
Purchases of Affiliate equity(3)	1,324.8	121.6	529.4	259.2	414.6						
Leases	114.5	18.7	35.6	27.0	33.2						
Other liabilities ⁽⁴⁾	42.4	41.1	1.3	_							
Total	\$ 3,371.0	\$ 222.1	\$ 623.6	\$ 984.0	\$1,541.3						

- (1) The timing of debt payments assumes that outstanding debt is settled for cash or common stock at the applicable maturity dates. The amounts include the cash payment of fixed interest.
- (2) As more fully discussed on page 44, consistent with industry practice, we do not consider our mandatory convertible securities or our junior convertible trust preferred securities as debt for the purpose of determining our leverage ratio.
- (3) Purchases of Affiliate equity reflect our estimates of conditional purchases of additional equity in our Affiliates and assume that all conditions to such purchases are met and that such purchases will all be effected on the date that they are first exercisable. As described previously, these purchases may occur in varying amounts over the next 15 years (or longer), and the actual timing and amounts of such purchases (or the actual occurrence of such purchases) generally cannot be predicted with any certainty. Additionally, in many instances we have the discretion to settle these purchases with our common stock and in all cases can consent to the transfer of these interests to other individuals or entities. As one measure of the potential magnitude of such purchases, assuming that all such purchases had been effected as of December 31, 2006, the aggregate purchase amount would have totaled approximately \$1,324.8 million. Assuming the closing of such additional purchases, we would own the prospective cash flow distributions associated with all additional equity so purchased, estimated to be approximately \$170.4 million on an annualized basis as of December 31, 2006.
- (4) Other liabilities reflect amounts payable to Affiliate managers related to our purchase of additional Affiliate equity interests.

Interest Rate Sensitivity

Our revenue is derived primarily from fees which are based on the values of assets managed. Such values are affected by changes in the broader financial markets which are, in part, affected by changing interest rates. We cannot predict the effects that interest rates or changes in interest rates may have on either the broader financial markets or our Affiliates' assets under management and associated fees.

We pay a variable rate of interest on our senior revolving credit facility (\$365.5 million outstanding as of December 31, 2006) and on \$150 million of our floating rate senior convertible securities. Based on these variable rate borrowings, we estimate that a 100 basis point (1%) change in interest rates would result in a net annual change to interest expense of approximately \$5.2 million.

We have fixed rates of interest on the senior notes component of our 2004 PRIDES, our zero coupon senior convertible notes and our junior convertible trust preferred securities. While a change in market interest rates would not affect the interest expense incurred on these securities, such a change may affect the fair value of these securities. We estimate that a 100 basis point (1%) change in interest rates as of December 31, 2006 would result in a net change in the fair value of our securities of approximately \$6.0 million at December 31, 2006.

Market Risk

Our revenue is based on the market value of assets under management. Declines in the financial markets will negatively impact our revenue and net income.

From time to time, we seek to offset our exposure to changing interest rates under our debt financing arrangements by entering into interest rate hedging contracts. As of December 31, 2006, we were a party, with three major commercial banks as counterparties, to \$150 million notional amount interest rate swap contracts which fix the interest rate on a portion of our floating rate senior convertible securities to a weighted average interest rate of approximately 3.28% for the period from February 2005 to

February 2008. The unrealized gain on these interest rate swap contracts as of December 31, 2006 was \$2.4 million. We estimate that a 100 basis point (1%) change in interest rates as of December 31, 2006 would result in a net change in the unrealized value of approximately \$1.8 million. There can be no assurance that our hedging contracts will meet their overall objective of reducing our interest expense or that we will be successful in obtaining hedging contracts in the future on our existing or any new indebtedness.

We operate primarily in the United States, and accordingly most of our consolidated revenue and associated expenses are denominated in U.S. dollars. We also provide services and earn revenue outside of the United States; therefore, the portion of our revenue and expenses denominated in foreign currencies may be impacted by movements in currency exchange rates. The valuations of our foreign Affiliates are impacted by fluctuations in foreign exchange rates, which could be recorded as a component of Stockholders' equity. To illustrate the effect of possible changes in currency exchange rates, as of December 31, 2006, we estimate that a 1% change in the Canadian dollar to U.S. dollar exchange rate would result in a change to Stockholders' equity of approximately \$3.0 million.

Recent Accounting Developments

In July 2006, the Financial Accounting Standards Board ("FASB") released FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" ("FIN 48"), which will become effective in the first quarter of 2007. FIN 48 provides a comprehensive model for the accounting and disclosure of uncertain income tax return positions. We have completed our initial evaluation of the impact of FIN 48 and believe that it will not have a material impact on our financial position or results of operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"), which will become effective in the first quarter

of 2008. FAS 157 establishes a framework for measuring fair value. We are in the process of evaluating the potential future effect of FAS 157 on our financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of FASB Statement No. 115" ("FAS 159"). FAS 159 permits companies to measure many financial instruments and certain other items at fair value. We can elect to adopt the provisions of FAS 159 either in the first quarter of 2007 or the first quarter of 2008. We are in the process of evaluating the potential future effect of FAS 159 on our financial statements.

Critical Accounting Estimates and Judgments

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires us to make judgments, assumptions, and estimates that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Note 1 to the Consolidated Financial Statements describes the significant accounting policies and methods used in the preparation of the Consolidated Financial Statements. We consider the accounting policies described below to be our critical accounting estimates and judgments. These policies are affected significantly by judgments, assumptions, and estimates used in the preparation of the Consolidated Financial Statements and actual results could differ materially from the amounts reported based on these policies.

Valuation

In allocating the purchase price of our investments and testing our assets for impairment, we make estimates and assumptions to determine the value of our acquired client relationships, operating segments, and equity method investments. We also assess the value of minority interests held by our Affiliate managers in establishing the terms for their transfer.

In these valuations, we make assumptions of the growth rates and useful lives of existing and prospective client accounts. Additionally, we make assumptions of, among other factors, projected future earnings and cash flow, valuation multiples, tax benefits and discount rates. In certain instances, we engage third-party consultants to perform independent evaluations. The impact of many of these assumptions are material to our financial condition and operating performance and, at times, are subjective. If we used different assumptions, the carrying value of our equity method investments, our intangible assets and the related amortization could be stated differently and our impairment conclusions could be modified. Additionally, the use of different assumptions to value our minority interests could change the amount of compensation expense, if any, we report upon their transfer.

Intangible Assets

At December 31, 2006, the carrying amounts of our intangible asset balances are as follows:

(in millions)

Definite-lived acquired client relationships	\$	243.3
Indefinite-lived acquired client relationships		258.8
Goodwill	1	,177.2

These amounts exclude \$86.3 million of definite-lived acquired client relationships, and \$185.3 million of goodwill that are reported within Equity investments in Affiliates.

We amortize our definite-lived acquired client relationships over their expected useful lives. We reassess these lives each quarter based on historical and projected attrition rates and other events and circumstances that may influence the expected future economic benefit we will derive from the relationships. Significant judgment is required to estimate the period that these assets will contribute to our cash flows and the pattern over which these assets will be consumed. A change in the remaining useful life of any of these assets could have a significant impact on the amount of our amortization expense. For example, if we reduced the weighted average remaining life of our definite-lived acquired client

relationships by one year, our amortization expense would increase by approximately \$2.4 million per year. We assess each of our definite-lived acquired client relationship for impairment at least annually by comparing their carrying value to their projected undiscounted cash flows. In the fourth quarter of 2006, we performed our most recent annual impairment test, and no impairments were identified.

We do not amortize our indefinite-lived acquired client relationships because we expect these contracts will contribute to our cash flows indefinitely. Each quarter, we assess whether events and circumstances have occurred that indicate these relationships might have a definite life. We test the carrying amount of each of our indefinite-lived acquired client relationships at least annually, or at such time that we conclude the assets no longer have an indefinite life by comparing the carrying amount of each asset to its fair value. We derive the fair value of each of our indefinite-lived acquired client relationships primarily based on discounted cash flow analysis. Our valuation analysis reflects assumptions of the growth of the assets, discount rates and other factors. Changes in the estimates used in these valuations could materially affect the impairment conclusion. In the fourth quarter of 2006, we performed our most recent annual impairment test and no impairments were identified.

We test the carrying amount of the goodwill in each of our three operating segments at least annually by comparing their carrying amount to an estimate of fair value. We establish the fair value of each of our operating segments primarily based on price-earnings multiples. Changes in the estimates used in this test could materially affect our impairment conclusion. In the third quarter of 2006, we performed our most recent annual impairment test and no impairment was identified.

Equity Method Investments

We account for certain of our Affiliate investments under the equity method of accounting. Accordingly, we evaluate these investments for impairment by assessing whether the fair value of the investment has declined below its carrying value for a period considered to be other than temporary. Additionally, we would consider the magnitude of any decline in market value and the expected holding period of the investment.

If we determine that a decline in market value below our carrying value is other than temporary, an impairment charge would be recognized in the Consolidated Statements of Income to write down the carrying value of the investment to its fair value. In the fourth quarter of 2006, we completed our evaluation of investments accounted for under the equity method and no impairment was identified.

Deferred Taxes

Our deferred tax liabilities are generated primarily from tax-deductible intangible assets and from our convertible securities. As more fully described below, we generally believe that our intangible-related deferred taxes are unlikely to reverse, and believe that the deferred tax liabilities for our floating rate convertible securities and the junior convertible trust preferred securities may not reverse. As such, we currently believe the economic benefit we realize from these sources will be permanent.

Most of our intangible assets are tax-deductible because we generally structure our Affiliate investments as cash transactions that are taxable to the sellers. Intangible assets associated with our 2005 investment in AMG Canada, however, are not deductible for tax purposes. We record deferred taxes because a substantial majority of our intangible assets do not amortize for financial statement purposes, but do amortize for tax purposes, thereby creating tax deductions that reduce our current cash taxes. These liabilities will reverse only in the event of a sale of an Affiliate or an impairment charge, events we consider unlikely to occur. Under current accounting rules, we are required to accrue the estimated cost of such a reversal as a deferred tax liability. As of December 31, 2006, our estimate of the tax liability associated with such a sale or impairment charge was approximately \$170.2 million.

As discussed above, our floating rate convertible securities and our junior convertible trust preferred securities generate deferred tax liabilities (\$6.5 million annually) because our interest deductions for tax purposes are greater than our reported interest expense. We believe that some or all of these deferred tax liabilities will be reclassified to equity as the securities are likely to convert to common stock when our stock price exceeds specified levels. If the floating rate convertible securities had converted on February 22, 2007, all of the deferred liabilities (\$13.7 million as of December 31, 2006) would be reclassified to equity if our stock price was at, or above, \$60.90 per share. As of February 22, 2007, the closing price of our common stock was \$117.41 per share.

In addition, we also regularly assess our deferred tax assets, which consist primarily of state tax loss carryforwards, in order to determine the need for valuation allowances. In our assessment we make assumptions about future taxable income that may be generated to utilize these assets, which have limited lives. If we determine that we are unlikely to realize the benefit of a deferred tax asset, we would establish a valuation allowance that would increase our tax expense in the period of such determination. As of December 31, 2006, we had a valuation allowance for all state tax loss carryforwards.

Changes in our tax position could have a material impact on our earnings. For example, a 1% increase to our statutory tax rate attributable to our deferred tax liabilities would result in an increase of approximately \$5.9 million in our tax expense in the period of such determination.

Share-Based Compensation

We have share-based compensation plans covering senior management, employees and directors. Prior to 2006, we accounted for stock-based compensation using the intrinsic value method described in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25") and related Interpretations. Accordingly, no compensation expense was recognized during this period from share-based compensation plans as

the exercise price of all stock options granted equaled the market price of the underlying stock on the grant date of the award.

In 2006, we adopted the fair value recognition provisions of FAS 123R using the modified prospective transition method. FAS 123R requires a company to recognize share-based compensation, based on the fair value of the awards on the grant date. Under the modified prospective method, compensation is recognized in the financial statements for all share-based payments granted after that date, and for all awards that are unvested upon adoption of FAS 123R.

Under FAS 123R, we estimate the fair value of stock option awards using the Black-Scholes option pricing model. The Black-Scholes model requires us to make assumptions about the volatility of our common stock and the expected life of our stock options based on past experience and anticipated future trends. As an example, we considered both the historical volatility of our common stock and the implied volatility from traded options in determining expected volatility.

Our options typically vest and become fully exercisable over three to four years of continued employment and do not include performance-based or market-based vesting conditions. For grants that are subject to graded vesting over a service period, we recognize expense, net of expected forfeitures, on a straight-line basis over the requisite service period for the entire award.

As of December 31, 2006, we had \$28.2 million in remaining unrecognized compensation cost related to stock option grants, which will be recognized over a weighted-average period of approximately three years (assuming no forfeitures).

Revenue Recognition

The majority of our consolidated revenue represents advisory fees (asset-based and performance-based). Our Affiliates recognize asset-based advisory fees quarterly as they render services to their clients. In addition to generating asset-based fees, over 30 Affiliate products, representing approximately \$28 billion of assets under management, also bill on the basis of absolute investment performance ("performance fees"). These products, which are primarily in the Institutional distribution channel, are generally structured to have returns that are not directly correlated to changes in broader equity indices and, if earned, the performance fee component is typically billed less frequently than the asset-based fee. Our Affiliates recognize performance fees only when the fee becomes billable. Although performance fees inherently depend on investment results and will vary from period to period, we anticipate performance fees to be a recurring component of our revenue.

Economic and Market Conditions

Global Asset Management Industry

The asset management industry has been a key driver of growth in financial services over the last decade. According to the most recent available data, assets under management across all distribution channels globally total approximately \$49.6 trillion, of which \$24.7 trillion is managed in the United States. We believe prospects for overall industry growth (which have compounded at an annual rate of 9% globally over the past five years) remain strong. We expect that this growth will be driven by market-related increases in assets under management, broad demographic trends and wealth creation related to growth in gross domestic product, and will be experienced in varying degrees across each of the principal distribution channels for our Affiliates' products.

U.S. Asset Management Industry

In the Mutual Fund distribution channel, according to a 2006 industry report, more than 96 million individuals in almost 55 million households in the United States are invested in mutual funds. In 2006, net cash flows to equity mutual funds totaled over \$232 billion, and aggregate mutual fund assets totaled \$9.9 trillion at the end of 2006. We anticipate that inflows to mutual funds will continue

and that aggregate mutual fund assets, particularly those in equity mutual funds, will continue to increase in line with long-term market growth.

Assets in the Institutional distribution channel in the United States are primarily in retirement plans, including both defined benefit and defined contribution plans, endowments and foundations, and totaled approximately \$8.9 trillion as of June 30, 2006. Although the majority of Institutional assets are in equities (estimated to be 60% in 2005), allocations to alternative investments have continued to increase. According to a recent study of institutional investors, allocations of institutional assets to hedge funds (a core component of alternative investments) have grown from 2.5% of assets in 2001 to 7.7% in 2005, and are expected to increase to 9.1% by 2007. We anticipate that the combination of an aging work force and long-term market growth should contribute to the ongoing strength of this distribution channel.

The High Net Worth distribution channel is comprised broadly of high net worth and affluent individuals, family trusts and managed accounts. Within this channel, high net worth families and individuals (those having at least \$1 million in investable assets) in the United States had aggregate assets of \$10.2 trillion at the end of 2005; industry experts expect assets in this segment of the channel to grow to \$14.5 trillion by the end of 2010. We believe that affluent individuals (those having between \$250,000 and \$1 million in investable assets) represent an important source of asset growth within the High Net Worth channel, as the number of such individuals and the amount of investable assets increases, and the popularity of separately managed account investment products for affluent individuals continues to grow. According to a recent industry report, assets in separately managed accounts totaled approximately \$805.8 billion at the end of 2006 (a nearly 25% increase over year end 2005) and are expected to reach \$1.5 trillion by 2011.

International Operations

We have international operations through Affiliates who provide some or a significant part of their investment management services to non-U.S. clients. In February 2007, we established a subsidiary, AMG Pty Ltd ("AMG Australia") and opened an office in Sydney, Australia. Through AMG Australia, we provide client and marketing services to participating Affiliates with respect to their business interests in Australia and New Zealand. In the future, we may invest in other investment management firms which conduct a significant part of their operations outside of the United States. There are certain risks inherent in doing business internationally, such as changes in applicable laws and regulatory requirements, difficulties in staffing and managing foreign operations, longer payment cycles, difficulties in collecting investment advisory fees receivable, different and in some cases, less stringent, regulatory and accounting regimes, political instability, fluctuations in currency exchange rates, expatriation controls, expropriation risks and potential adverse tax consequences. There can be no assurance that one or more of such factors will not have a material adverse effect on our affiliated investment management firms that have international operations or on other investment management firms in which we may invest in the future and, consequently, on our business, financial condition and results of operations.

Inflation

We do not believe that inflation or changing prices have had a material impact on our results of operations. See "Market Risk".

Quantitative and Qualitative Disclosures About Market Risk

For quantitative and qualitative disclosures about how we are affected by market risk, see "Market Risk."

Selected Financial Data

Set forth below are selected financial data for the last five years. This data should be read in conjunction with, and is qualified in its entirety by reference to, the Consolidated Financial Statements and accompanying notes included elsewhere in this Annual Report.

	For the Years Ended December 31,

- (1) The definition of EBITDA is presented in Note 3 on page 39. Our use of EBITDA, including a reconciliation to cash flow from operations, is discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations."
- (2) Cash Net Income is defined as Net Income plus amortization and deferred taxes related to intangible assets plus Affiliate depreciation. We consider Cash Net Income an important measure of our financial performance, as we believe it best represents operating performance before non-cash expenses relating to the acquisition of interests in our affiliated investment management firms. Cash Net Income is not a measure of financial performance under generally accepted accounting principles and, as calculated by us, may not be consistent with computations of Cash Net Income by other companies. Our use of Cash Net Income, including a reconciliation of Cash Net Income to Net Income, is discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations." In 2003, in connection with our issuance of convertible securities, we modified this definition to clarify that deferred taxes relating to convertible securities and certain depreciation are not added back for the calculation of Cash Net Income. If we had used our current definition for 2002, Cash Net Income would have been \$97.6 million.
- (3) Intangible and total assets have increased as we have made new or additional investments in affiliated investment management firms.
- (4) In 2004 and 2005, we acquired minority interests in certain Affiliates that are accounted for under the equity method of accounting. This balance consists primarily of intangible assets associated with these investments.
- (5) In 2006, we implemented Emerging Issues Task Force Issue 04-05, "EITF 04-05" (see Note 1 to the Consolidated Financial Statements). In accordance with EITF 04-05, we have consolidated \$108,350 of client assets held in partnerships controlled by its Affiliates. These assets are reported as "Affiliate investments in partnerships;" substantially all of these assets, \$104,096, are held by investors that are unrelated to us, and are reported as "Minority interest in Affiliate investments in partnerships."
- (6) Senior debt consists of outstanding borrowings under our senior revolving credit facility and, until November 2006, our Senior Notes due 2006. As further discussed in Note 24 to the Consolidated Financial Statements, we entered into an amended and restated credit facility in February 2007.
- (7) Senior convertible debt consists of our zero coupon senior convertible notes, and beginning in 2003, our floating rate senior convertible securities.
- (8) Other long-term obligations consist principally of deferred income taxes, payables to related parties and the contract adjustment payment liability of our 2004 mandatory convertible securities.

Management's Report on Internal Control Over Financial Reporting

Management of Affiliated Managers Group, Inc. (the "Company"), is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting processes are designed under the supervision of the Company's chief executive and chief financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on our financial statements.

As of December 31, 2006, management conducted an assessment of the effectiveness of the Company's internal control over financial reporting based on the framework established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this assessment, management has determined that the Company's internal control over financial reporting as of December 31, 2006 was effective.

As permitted by the Sarbanes-Oxley Act of 2002, the Company has excluded Chicago Equity Partners, LLC from its assessment of internal control over financial reporting because the Company acquired its interest in this Affiliate in December 2006. The total assets and revenue of Chicago Equity Partners, LLC represent 4% and 0.1%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2006.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2006 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report beginning on page 58 of this Annual Report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Affiliated Managers Group, Inc.:

We have completed integrated audits of Affiliated Managers Group, Inc.'s consolidated financial statements and of its internal control over financial reporting as of December 31, 2006, in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Consolidated financial statements

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, changes in stockholders' equity and cash flows present fairly, in all material respects, the financial position of Affiliated Managers Group, Inc. (the "Company") at December 31, 2006 and December 31, 2005, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2006 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and

significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Internal control over financial reporting

Also, in our opinion, management's assessment, included in Management's Report on Internal Control Over Financial Reporting appearing on page 57 of this Annual Report, that the Company maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control—Integrated Framework issued by the COSO. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about

whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As described in Management's Report on Internal Control Over Financial Reporting, management has excluded Chicago Equity Partners, LLC from its assessment of internal control over financial reporting as of December 31, 2006 because the Company acquired the affiliate in a purchase business combination during 2006. We have also excluded Chicago Equity Partners, LLC from our audit of internal control over financial reporting. Chicago Equity Partners, LLC is a consolidated affiliate whose total assets and total revenues represent 4% and 0.1%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2006.

As discussed in Note 1 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment, effective January 1, 2006.

Notes to Consolidated Financial Statements

Business and Summary of Significant Accounting Policies

(a) Organization and Nature of Operations

Affiliated Managers Group, Inc. ("AMG" or the "Company") is an asset management company with equity investments in a diverse group of mid-sized investment management firms ("Affiliates"). AMG's Affiliates currently provide investment management services in the United States and internationally to mutual funds, institutional clients and high net worth individuals. Fees for services are largely asset-based and, as a result, the Company's revenue may fluctuate based on the performance of financial markets.

Affiliates are either organized as limited partnerships, limited liability partnerships, limited liability companies, or corporations. AMG generally has contractual arrangements with its Affiliates whereby a percentage of revenue is customarily allocable to fund Affiliate operating expenses, including compensation (the "Operating Allocation"), while the remaining portion of revenue (the "Owners' Allocation") is allocable to AMG and the other partners or members, generally with a priority to AMG. In certain other cases, the Affiliate is not subject to a revenue sharing arrangement, but instead operates on a profit-based model. In these cases, AMG participates fully in any increase or decrease in the revenue or expenses of such firms. In situations where AMG holds a minority equity interest, the revenue sharing arrangement generally allocates a percentage of the Affiliate's revenue with the balance to be used to pay operating expenses and profit distributions to the other owners.

The financial statements are prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"). All dollar amounts except per share data in the text and tables herein are stated in thousands unless otherwise indicated. Certain reclassifications have been made to prior years' financial statements to conform to the current year's presentation.

(b) Principles of Consolidation

The Company evaluates the risk, rewards, and significant terms of each of its Affiliate and other investments to deterthe appropriate method of accounting. Majority-owned or otherwise controlled investments are consolidated. In many of its Affiliate investments, AMG is, directly or indirectly, the sole general partner (in the case of Affiliates which are limited partnerships), managing partner (in the case of Affiliates which are limited liability partnerships), sole manager member (in the case of Affiliates which are limited liability companies) or principal shareholder (in the case of Affiliates which are corporations). As a result, the Company generally consolidates its Affiliate investments. Investments that are determined to be Variable Interest Entities as defined by FASB Interpretation No. 46 (revised), "Consolidation of Variable Interest Entities" ("FIN46R"), are consolidated if AMG or a consolidated Affiliate is the primary beneficiary of the investment.

For Affiliate operations consolidated into these financial statements, the portion of the income allocated to owners other than AMG is included in Minority interest in the Consolidated Statements of Income. As Affiliates are generally structured as pass-through entities for tax purposes, minority interest has been presented before income taxes in the Consolidated Statements of Income. Minority interest on the Consolidated Balance Sheets includes capital and undistributed income owned by the managers of the consolidated Affiliates. All material intercompany balances and transactions have been eliminated.

AMG applies the equity method of accounting to investments where AMG or an Affiliate does not hold a majority equity interest but has the ability to exercise significant influence (generally at least a 20% interest or a general partner interest) over operating and financial matters. AMG or an Affiliate also applies the equity method when their minority shareholders or partners have certain rights to remove their ability to control the entity or rights to participate in substantive operating decisions (e.g. approval of annual operating budgets, major financings, selection of senior management, etc.). For equity method investments, AMG's or the

Affiliate's portion of income before taxes is included in Income from equity method investments. Other investments in which AMG or an Affiliate own less than a 20% interest and does not exercise significant influence are accounted for under the cost method. Under the cost method, income is recognized as dividends when, and if, declared.

Effective January 1, 2006, the Company implemented Emerging Issues Task Force Issue 04-05, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights" ("EITF 04-05"). Under EITF 04-05, a general partner is required to consolidate any partnership that it controls, including those interests in the partnerships in which the Company does not have ownership rights. A general partner is presumed to control a partnership unless the limited partners have certain rights to remove the general partner or other substantive rights to participate in partnership operations.

The effect of any changes in the Company's equity interests in its Affiliates resulting from the issuance of an Affiliate's equity by the Company or one of its Affiliates is included as a component of stockholders' equity, net of the related income tax effect in the period of the change.

(c) Cash and Cash Equivalents

The Company considers all highly liquid investments, including money market mutual funds, with original maturities of three months or less to be cash equivalents. Cash equivalents are stated at cost, which approximates market value due to the short-term maturity of these investments.

(d) Affiliate Investments

Affiliate investments in marketable securities are classified as either trading or available-for-sale securities and carried at fair value. Unrealized holding gains or losses on investments classified as available-for-sale are reported net of deferred tax as a separate component of accumulated other comprehensive income in stockholders' equity until realized. If a decline in the fair value of these investments is determined to be other than temporary, the carrying amount of the asset is

reduced to its fair value, and the difference is charged to income in the period incurred. The cost of Affiliate investments in marketable securities was \$5,403 and \$14,342 as of December 31, 2005 and 2006, respectively. Gross unrealized gains on these investments were \$608 and \$1,379 as of December 31, 2005 and 2006, respectively.

In accordance with EITF 04-05, the Company has consolidated \$108,350 of client assets held in partnerships controlled by its Affiliates. These assets are classified as trading securities and reported as "Affiliate investments in partnerships" in the consolidated balance sheet. Substantially all of these assets, \$104,096, are held by investors that are unrelated to the Company, and reported as "Minority interest in Affiliate investments in partnerships." For the year ended December 31, 2006, these partnerships reported income of \$3,400, which is presented as "Investment income from Affiliate investments in partnerships" in the consolidated statements of income. The portion of this income that is attributable to investors that are unrelated to the Company, \$3,364, is reported as a "Minority interest in Affiliate investments in partnerships." Management fees earned by the Company on these assets were \$1,148 for the year ended December 31, 2006, and are reported within "Investment and other income." During the year ended December 31, 2006, the partnerships purchased investments (principally equity securities) totaling \$158,311 and sold investments totaling \$167,246, and had gross subscriptions and redemptions of client assets totaling \$498 and \$8,205, respectively.

(e) Equity Investments in Affiliates

Under the equity method of accounting, the Company records its proportionate share of income or loss currently in earnings within a single row on the income statement, Income from equity method investments. As is consistent with the equity method of accounting, for one of its equity method Affiliates based outside the United States, the Company has elected to record financial results one quarter in arrears to allow for the receipt of financial information. The Company converts the financial information of foreign investments to U.S. GAAP.

The Company's share of income taxes incurred directly by Affiliates accounted for under the equity method are recorded within Income taxes—current in the Consolidated Statements of Income because these taxes generally represent the Company's share of the taxes incurred by the Affiliate. Deferred income taxes incurred as a direct result of the Company's investment in Affiliates accounted for under the equity method have been included in Income taxes—deferred in the Consolidated Statements of Income. The associated deferred tax liabilities have been classified as a component of Deferred income taxes in the Consolidated Balance Sheet.

The Company periodically evaluates its equity method investments for impairment. In such impairment evaluations, the Company assesses if the value of the investment has declined below its book value for a period considered to be other than temporary. If the Company determines that a decline in value below the book value of the investment is other than temporary, then a charge would be recognized in the Consolidated Statements of Income.

(f) Fixed Assets

Fixed assets are recorded at cost and depreciated using the straight-line method over their estimated useful lives. The estimated useful lives of office equipment and furniture and fixtures range from three to ten years. Computer software developed or obtained for internal use is amortized using the straight-line method over the estimated useful life of the software, generally three years or less. Leasehold improvements are amortized over the shorter of their estimated useful lives or the term of the lease, and the building is amortized over 39 years. The costs of improvements that extend the life of a fixed asset are capitalized, while the cost of repairs and maintenance are expensed as incurred. Land is not depreciated.

(g) Leases

The Company and its Affiliates currently lease office space and equipment under various leasing arrangements. As these leases expire, it can be expected that in the normal course of business they will be renewed or replaced. All leases and subleases are accounted for under Statement of Financial Accounting Standard ("FAS") No. 13, "Accounting for Leases." These leases are classified as either capital leases or operating leases, as appropriate. Most lease agreements classified as operating leases contain renewal options, rent escalation clauses or other inducements provided by the landlord. Rent expense is accrued to recognize lease escalation provisions and inducements provided by the landlord, if any, on a straight-line basis over the lease term.

(h) Acquired Client Relationships and Goodwill

The purchase price for the acquisition of interests in Affiliates is allocated based on the fair value of net assets acquired, primarily acquired client relationships. In determining the allocation of the purchase price to acquired client relationships, the Company analyzes the net present value of each acquired Affiliate's existing client relationships based on a number of factors including: the Affiliate's historical and potential future operating performance; the Affiliate's historical and potential future rates of attrition among existing clients; the stability and longevity of existing client relationships; the Affiliate's recent, as well as long-term, investment performance; the characteristics of the firm's products and investment styles; the stability and depth of the Affiliate's management team and the Affiliate's history and perceived franchise or brand value.

The Company has determined that certain of its mutual fund acquired client relationships meet the indefinite life criteria outlined in FAS No. 142, "Goodwill and Other Intangible Assets" ("FAS 142"), because the Company expects both the renewal of these contracts and the cash flows generated by these assets to continue indefinitely. Accordingly, the Company does not amortize these intangible assets, but instead reviews these assets at least annually for impairment. Each reporting period, the Company assesses whether events or circumstances have occurred which indicate that the indefinite life criteria are no longer met. If the indefinite life criteria are no longer met, the Company assesses whether the carrying value of the assets exceeds its fair value, and an impairment loss would be recorded in an amount equal to any such excess.

As of December 31, 2006, the cost assigned to all other acquired client relationships was being amortized over a weighted average life of approximately 12 years. The expected useful lives of acquired client relationships are analyzed each period and determined based on an analysis of the historical and projected attrition rates of each Affiliate's existing clients, and other factors that may influence the expected future economic benefit the Company will derive from the relationships. The Company tests for the possible impairment of definite-lived intangible assets annually or more frequently whenever events or changes in circumstances indicate that the carrying amount of the asset is not recoverable. If such indicators exist, the Company compares the undiscounted cash flows related to the asset to the carrying value of the asset. If the carrying value is greater than the undiscounted cash flow amount, an impairment charge is recorded in the Consolidated Statements of Income for amounts necessary to reduce the carrying value of the asset to fair value.

The excess of purchase price for the acquisition of interests in Affiliates over the fair value of net assets acquired, including acquired client relationships, is reported as good-will within the operating segments in which the Affiliate operates. Goodwill is not amortized, but is instead reviewed for impairment. The Company assesses goodwill for impairment at least annually, or more frequently whenever events or circumstances occur indicating that the recorded goodwill may be impaired. Fair value is determined for each operating segment primarily based on price-earnings multiples. If the carrying amount of goodwill exceeds the fair value, an impairment loss would be recorded in an amount equal to that excess.

As further described in Note 14, the Company periodically purchases additional equity interests in Affiliates from minority interest owners. Resulting payments made to such owners are generally considered purchase price for these acquired interests.

(i) Revenue Recognition

The Company's consolidated revenue represents advisory fees billed monthly, quarterly and annually by Affiliates for managing the assets of clients. Asset-based advisory fees are recognized monthly as services are rendered and are based upon a percentage of the market value of client assets managed. Any fees collected in advance are deferred and recognized as income over the period earned. Performance based advisory fees are generally assessed as a percentage of the investment performance realized on a client's account, generally over an annual period. Performance-based advisory fees are recognized when they are earned (i.e. when they become billable to customers) based on the contractual terms of agreements and when collection is reasonably assured. Also included in revenue are commissions earned by broker dealers, recorded on a trade date basis, and other service fees recorded as earned.

(j) Issuance Costs

Issuance costs incurred in securing credit facility financing are amortized over the remaining term of the credit facility. Costs incurred to issue the zero coupon senior convertible securities, the floating rate senior convertible securities and junior convertible trust preferred securities are amortized over the earlier of the period to the first investor put date or the stated term of the security. Costs incurred to issue the Company's mandatory convertible securities are allocated between the senior notes and the purchase contracts based upon the relative cost to issue each instrument separately. Costs allocated to the senior notes are recognized as interest expense over the period of the forward purchase contract component of such securities. Costs allocated to the forward purchase contract and call spread option agreements are charged directly to additional paid-in capital and not amortized.

(k) Derivative Financial Instruments

The Company is exposed to interest rate risk inherent in its variable rate debt obligations. The Company's risk management strategy may utilize financial instruments, specifically

interest rate swap contracts, to hedge certain interest rate exposures. For example, the Company may agree with a counter party (typically a major commercial bank) to exchange the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed notional principal amount. In entering into these contracts, the Company intends to offset cash flow gains and losses that occur on its existing debt obligations with cash flow gains and losses on the contracts hedging these obligations.

The Company records all derivatives on the balance sheet at fair value. If the Company's derivatives qualify as cash flow hedges, the effective portion of the unrealized gain or loss is recorded in accumulated other comprehensive income as a separate component of stockholders' equity and reclassified into earnings when periodic settlement of variable rate liabilities are recorded in earnings. For interest rate swaps, hedge effectiveness is measured by comparing the present value of the cumulative change in the expected future variable cash flows of the hedged contract with the present value of the cumulative change in the expected future variable cash flows of the hedged item. To the extent that the critical terms of the hedged item and the derivative are not identical, hedge ineffectiveness would be reported in earnings as interest expense. Hedge ineffectiveness was not material in 2004, 2005 or 2006.

(I) Deferred Taxes

Deferred taxes reflect the expected future tax consequences of temporary differences between the book carrying amounts and tax bases of the Company's assets and liabilities. Historically, deferred taxes have been comprised primarily of deferred tax liabilities attributable to intangible assets and convertible securities and deferred tax assets from state credits and loss carryforwards.

In measuring the amount of deferred taxes each period, the Company must project the impact on its future tax payments of any reversal of deferred tax liabilities (which would increase the Company's tax payments), and any use of its state credits and carryforwards (which would decrease its tax payments). In forming these estimates, the Company makes assumptions about future federal and state income tax rates and the apportionment of future taxable income to states in which the Company has operations. An increase or decrease in federal or state income tax rates could have a material impact on the Company's deferred income tax liabilities and assets and would result in a current income tax charge or benefit.

In the case of the Company's deferred tax assets, the Company regularly assesses the need for valuation allowances, which would reduce these assets to their recoverable amounts. In forming these estimates, the Company makes assumptions of future taxable income that may be generated to utilize these assets, which have limited lives. If the Company determines that these assets will be realized, the Company records an adjustment to the valuation allowance, which would decrease tax expense in the period such determination was made. Likewise, should the Company determine that it would be unable to realize additional amounts of deferred tax assets, an adjustment to the valuation allowance would be charged to tax expense in the period such determination was made. For example, if the Company was to make an investment in a new Affiliate located in a state where it has operating loss carryforwards, the projected taxable income from the new Affiliate could be offset by these operating loss carryforwards, justifying a reduction to the valuation allowance.

(m) Foreign Currency Translation

The assets and liabilities of Affiliates that are not based in the United States are translated into U.S. dollars using exchange rates in effect as of the balance sheet date. The revenue and expenses of these Affiliates are translated into U.S. dollars using average exchange rates for the relevant period. Because of the permanent nature of the Company's investments, net translation exchange gains and losses are excluded from net income but are recorded in other comprehensive income. Foreign currency transaction gains and losses are reflected in Investment and other income.

(n) Equity Based Compensation Plans

Effective January 1, 2006, the Company adopted the fair value recognition provisions of FAS No. 123 (revised 2004), "Share-Based Payment" ("FAS 123R"). FAS 123R revises FAS No. 123, "Accounting for Stock-Based Compensation" ("FAS 123") and supersedes Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB No. 25"). FAS 123R requires as an expense the cost of all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values over the requisite service period. In addition, FAS 123R requires unrecognized costs related to options vesting after the date of initial adoption to be recognized as an expense in the financial statements over the remaining requisite service period.

The Company adopted FAS 123R using the modified prospective transition method. Under this method, compensation expense includes: (i) an expense for all unvested options outstanding on January 1, 2006, and (ii) an expense for all options granted subsequent to January 1, 2006. Compensation expense recognized under FAS 123R, net of tax, was \$1,042 for the year ended December 31, 2006. This additional compensation expense decreased basic and diluted earnings per share by \$0.03 and \$0.02, respectively, for the year ended December 31, 2006.

The following table presents net income and earnings per share as if the Company had applied the fair value recognition provisions of FAS 123 to stock-based employee compensation for the years ended December 31, 2005 and 2004.

	Year Ended December 31,		
	2004		2005
Net Income—as reported	\$ 77,147	\$ 1	19,069
Add: Total stock-based employee			
compensation expense included			
in reported net income, net of tax	_		_
Less: Stock-based compensation			
expense determined under fair			
value method net of tax	14,326		709
Net Income—FAS 123 pro forma	\$ 62,821	\$1	18,360
Earnings per share—			
basic—as reported	\$ 2.57	\$	3.54
Earnings per share—			
basic—FAS 123 pro forma	2.09		3.52
Earnings per share—			
diluted—as reported	2.02		2.81
Earnings per share—			
diluted—FAS 123 pro forma	1.66		2.80

FAS 123R also requires the Company to report any tax benefits realized upon the exercise of stock options that are in excess of the expense recognized for reporting purposes as a financing activity in the Company's consolidated statement of cash flows. Prior to the adoption of FAS 123R, these tax benefits were presented as operating cash flows in the consolidated statements of cash flows. If the tax benefit realized is less than the expense, the tax shortfall is recognized in stockholders' equity. To the extent the expense exceeds available windfall tax benefits, it is recognized in the Consolidated Statements of Income. Under FAS 123R, the Company was permitted to calculate its cumulative windfall tax benefits for the purposes of accounting for future tax shortfalls. The Company has elected to apply the long-form method for determining the pool of windfall tax benefits.

(o) Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts included in the financial statements and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

(p) Recent Accounting Developments

In July 2006, the Financial Accounting Standards Board ("FASB") released FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" ("FIN 48"). FIN 48 is effective in the first quarter of 2007 and provides a comprehensive model for the accounting and disclosure of uncertain income tax return positions. The Company has completed its initial evaluation of the impact of FIN 48 and believes that it will not have a material impact on its financial position or results of operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"). FAS 157 is effective in the first quarter of 2008 and establishes a framework for measuring fair value. The Company is in the process of evaluating the effect of FAS 157 on its financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115" ("FAS 159"). FAS 159 permits companies to measure many financial instruments and certain other items at fair value. The Company can elect to adopt the provisions of FAS 159 either in the first quarter of 2007 or the first quarter of 2008. The Company is in the process of evaluating the potential future effect of FAS 159 on its financial statements.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash investments. The Company maintains cash and cash equivalents, investments and, at times, certain financial instruments with various financial

institutions. These financial institutions are typically located in cities in which AMG and its Affiliates operate. For AMG and certain Affiliates, cash deposits at a financial institution may exceed Federal Deposit Insurance Corporation insurance limits.

3 Fixed Assets and Lease Commitments

Fixed assets consisted of the following:

	At December 31,		
	2005	2006	
Building and leasehold improvements	\$ 31,830	\$ 44,495	
Office equipment	23,867	22,786	
Furniture and fixtures	15,161	13,345	
Land and improvements	12,607	13,403	
Computer software	5,613	8,965	
Fixed assets, at cost	89,078	102,994	
Accumulated depreciation			
and amortization	(38,486)	(39,010)	
Fixed assets, net	\$ 50,592	\$ 63,984	

The Company and its Affiliates lease office space and computer equipment for their operations. At December 31, 2006, the Company's aggregate future minimum payments for operating leases having initial or noncancelable lease terms greater than one year are payable as follows:

	Required Minimum
Year Ending December 31,	Payments
2007	\$ 18,696
2008	18,117
2009	17,424
2010	14,910
2011	12,100
Thereafter	33,219

Consolidated rent expense for 2004, 2005 and 2006 was \$16,708, \$21,497 and \$23,880, respectively.

4 Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities consisted of the following:

	At 1	December 31,
	2005	2006
Accrued compensation	\$ 80,510	\$151,788
Accrued income taxes	19,542	29,550
Accounts payable	8,800	9,359
Accrued share repurchases	8,215	9,518
Deferred acquisition purchase price	7,849	_
Contract adjustment payments	6,588	6,025
Accrued professional services	4,666	7,287
Accrued interest	3,336	6,402
Deferred revenue	886	953
Other	36,319	25,845
	\$176,711	\$246,727

Benefit Plans

The Company has three defined contribution plans consisting of a qualified employee profit-sharing plan covering substantially all of its full-time employees and several of its Affiliates, and non-qualified plans for certain senior employees. AMG's other Affiliates generally have separate defined contribution retirement plans. Under each of the qualified plans, AMG and each participating Affiliate, as the case may be, are able to make discretionary contributions for the benefit of qualified plan participants up to IRS limits.

The Company's non-qualified Executive Retention Plan (the "ERP") is designed to work in concert with the Company's stockholder-approved Long-Term Executive Incentive Plan, providing a trust vehicle for long-term compensation awards based upon the Company's performance and growth. The ERP permits the Compensation Committee to make awards that may be invested by the recipient in the Company's common stock, in Affiliate investment products, and in cash accounts, in each case subject to vesting and forfeiture provisions. The Company's contributions to the ERP are irrevocable. In addition, the Company has established a

Deferred Compensation Plan that provides officers and directors of the Company the opportunity to voluntarily defer base salary, bonus payments and director fees, as applicable, on a pre-tax basis, and invest such deferred amounts in one or more specified measurement funds. While the Company has no obligation to do so, the Deferred Compensation Plan also provides the Company the opportunity to make discretionary contributions; in the event any such contributions are made, contributed amounts will be subject to vesting and forfeiture provisions.

Consolidated expenses related to the Company's benefit plans in 2004, 2005 and 2006 were \$9,055, \$20,864 and \$10,336, respectively.

6 Senior Debt

The components of senior debt are as follows:

	At December 31,	
	2005	2006
Senior revolving credit facility	\$ 175,500	\$365,500
Senior notes due 2006	65,750	_
	\$241,250	\$365,500

Senior Revolving Credit Facility

The Company entered into an amended and restated senior revolving credit facility (the "Facility") in December 2005, which allows for borrowings of up to \$550 million at rates of interest (based either on the Eurodollar rate or the prime rate as in effect from time to time) that vary depending on the Company's credit ratings. Subject to the agreement of the lenders (or prospective lenders) to increase their commitments, the Company has the option to borrow up to an aggregate of \$650 million under this Facility. Following the successful remarketing of the Company's 2004 PRIDES (as described in Note 8), the Facility will mature in December 2010. The Facility contains financial covenants with respect to net worth, leverage and interest coverage. The Facility also contains customary affirmative and negative covenants, including limitations on indebtedness, liens, cash dividends and fundamental corporate

changes. Borrowings under the Facility are collateralized by pledges of all capital stock or other equity interests owned by the Company. The Company pays a quarterly commitment fee on the daily unused portion of the Facility, which fee amounted to \$717, \$676 and \$602 for the years ended December 31, 2004, 2005 and 2006, respectively (see Note 24—Subsequent Events).

Senior Notes due 2006

In December 2001, the Company issued \$230,000 of mandatory convertible securities ("2001 PRIDES"). Each unit of the 2001 PRIDES initially consisted of (i) a senior note due November 2006 with a principal amount of \$25 per note, and (ii) a forward purchase contract pursuant to which the holder agreed to purchase shares of the Company's common stock in November 2004. The Company repurchased \$154,250 in aggregate principal amount of the senior notes component of the 2001 PRIDES ("Senior Notes due 2006") and settled the forward purchase contracts in 2004. The Company reported a loss of \$2,493 on its repurchase of these notes, which was recorded in Investment and other income, and the Company realized a gain of \$3,719 relating to the settlement of the forward purchase contracts, which was recorded directly to stockholders' equity. Also in 2004, the Company issued 3.4 million shares of common stock and received proceeds of \$190,750. In 2005, the Company repurchased \$10,000 of the Senior Notes due 2006; the remaining \$65,750 matured and was repaid in November 2006.

7 Senior Convertible Debt

The components of senior convertible debt are as follows:

	At December 31,		
	2005	2006	
Zero coupon			
senior convertible notes	\$124,232	\$113,358	
Floating rate			
senior convertible securities	300,000	300,000	
	\$424,232	\$413,358	

Zero Coupon Senior Convertible Notes

In May 2001, the Company issued \$251,000 of principal amount at maturity of zero coupon senior convertible notes due 2021 ("zero coupon convertible notes"), with each note issued at 90.50% of such principal amount and accreting at a rate of 0.50% per year. Following the repurchase and conversion of \$129,231 principal amount of such notes, \$121,769 principal amount at maturity of zero coupon convertible notes remains outstanding. Each security is convertible into 17.429 shares of the Company's common stock (at a current base conversion price of \$53.34) upon the occurrence of certain events, including the following: (i) if the closing price of a share of its common stock is more than a specified price over certain periods (initially \$62.36 and increasing incrementally at the end of each calendar quarter to \$63.08 in April 2021); (ii) if the credit rating assigned by Standard & Poor's to the securities is below BB-; or (iii) if the Company calls the securities for redemption. The holders may require the Company to repurchase the securities at their accreted value in May 2011 and 2016. If the holders exercise this option in the future, the Company may elect to repurchase the securities with cash, shares of its common stock or some combination thereof. The Company has the option to redeem the securities for cash at their accreted value. Under the terms of the indenture governing the zero coupon convertible notes, a holder may convert such security into common stock by following the conversion procedures in the indenture. Subject to changes in the price of the Company's common stock, the zero coupon convertible notes may not be convertible in certain future periods.

In February 2006, the Company amended the zero coupon convertible notes. Under the terms of this amendment, the Company will pay interest through May 7, 2008 at a rate of 0.375% per year on the principal amount at maturity of the notes in addition to the accrual of the original issue discount.

Floating Rate Senior Convertible Securities

In February 2003, the Company issued \$300,000 of floating rate senior convertible securities due 2033 ("floating rate convertible securities"). The floating rate

convertible securities bear interest at a rate equal to 3-month LIBOR minus 0.50%, payable in cash quarterly. Each security is convertible into shares of the Company's common stock (at a base conversion price of \$54.17) upon the occurrence of certain events, including the following: (i) if the closing price of a share of the Company's common stock exceeds \$65.00 over certain periods; (ii) if the credit rating assigned by Standard & Poor's is below BB-; or (iii) if the Company calls the securities for redemption. Upon conversion, holders of the securities will receive 18.462 shares of the Company's common stock for each convertible security. In addition, if the market price of the Company's common stock exceeds the base conversion price at the time of conversion, holders will receive additional shares of common stock based on the stock price at that time. Based on the trading price of the Company's common stock as of December 31, 2006, upon conversion a holder of each security would receive an additional 5.453 shares. The holders of the floating rate convertible securities may require the Company to repurchase such securities in February 2008, 2013, 2018, 2023 and 2028, at their principal amount. The Company may choose to pay the purchase price for such repurchases with cash, shares of its common stock or some combination thereof. The Company may redeem the convertible securities for cash at any time on or after February 25, 2008, at their principal amount. Under the terms of the indenture governing the floating rate convertible securities, a holder may convert such security into common stock by following the conversion procedures in the indenture. Subject to changes in the price of the Company's common stock, the floating rate convertible securities may not be convertible in certain future periods.

As further described in Note 11, the Company has entered into interest rate swap contracts that effectively exchange the variable interest rate for a fixed interest rate on \$150,000 of the floating rate convertible securities. Through February 2008, the Company will pay a weighted average fixed rate of 3.28% on that notional amount.

Mandatory Convertible Securities

In February 2004, the Company issued \$300,000 of mandatory convertible securities ("2004 PRIDES"). As described below, these securities are structured to provide \$300,000 of additional proceeds to the Company following a successful remarketing and the exercise of forward purchase contracts in February 2008.

Each unit of the 2004 PRIDES consists of (i) a senior note due February 2010 with a principal amount of \$1,000 per note, on which the Company pays interest quarterly at the annual rate of 4.125%, and (ii) a forward purchase contract pursuant to which the holder has agreed to purchase shares of the Company's common stock in February 2008. Holders of the purchase contracts receive a quarterly contract adjustment payment at the annual rate of 2.525% per \$1,000 purchase contract. The current portion of the contract adjustment payments, approximately \$6,025, is recorded in current liabilities. The number of shares to be issued in February 2008 will be determined based upon the average trading price of the Company's common stock for a period preceding that date. Depending on the average trading price in that period, the settlement rate will range from 11.785 to 18.031 shares per \$1,000 purchase contract. Based on the trading price of the Company's common stock as of December 31, 2006, the purchase contracts would have a settlement rate of 12.990.

Each of the senior notes is pledged to the Company to collateralize the holder's obligations under the forward purchase contracts. Beginning in August 2007, under the terms of the 2004 PRIDES, the senior notes are expected to be remarketed to new investors. A successful remarketing will generate \$300,000 of gross proceeds to be used by the original holders of the 2004 PRIDES to fulfill their obligations on the forward purchase contracts. In exchange for the additional \$300,000 payment on the forward purchase contracts, the Company will issue shares of its common stock to the original holders of the senior notes. As referenced above, the number of shares of common stock to be

issued will be determined by the market price of the Company's common stock at that time. Assuming a successful remarketing, the senior notes will remain outstanding until at least February 2010.

Junior Convertible Trust Preferred Securities

In April 2006, the Company issued \$300,000 of junior subordinated convertible debentures due 2036 to a wholly-owned trust simultaneous with the issuance, by the trust, of \$291,000 of convertible trust preferred securities to investors. Under FIN 46R, the trust is not consolidated in the Company's financial statements. The junior subordinated convertible debentures and convertible trust preferred securities (together, the "junior convertible trust preferred securities") have substantially the same terms.

The junior convertible trust preferred securities bear interest at 5.1% per annum, payable quarterly in cash. Each \$50 security is convertible, at any time, into 0.333 shares of the Company's common stock, which represents a conversion price of \$150 per share. Upon conversion, investors will receive cash or shares of the Company's common stock (or a combination of cash and common stock) at the election of the Company. The junior convertible trust preferred securities may not be redeemed by the Company prior to April 15, 2011. On or after April 15, 2011, the junior convertible trust preferred securities may be redeemed if the closing price of the Company's common stock exceeds \$195 for a specified period of time. The trust's only assets are the junior convertible subordinated debentures. To the extent that the trust has available funds, the Company is obligated to ensure that holders of the convertible trust preferred securities receive all payments due from the trust.

10 Income Taxes

A summary of the provision for income taxes is as follows:

	Year Ended December 31,			
	2004	2005	2006	
Current:				
Federal	\$ 17,791	\$ 31,399	\$ 38,971	
State	2,539	2,005	6,344	
Foreign	_	5,491	9,952	
Deferred:				
Federal	28,283	30,424	33,261	
State	3,333	2,158	1,900	
Foreign	_	(894)	(3,818)	
	\$ 51,946	\$ 70,583	\$ 86,610	

The components of income before income taxes consisted of the following:

		Year Ended December 31,			
	2004	2005	2006		
Domestic	\$123,722	\$163,912	\$186,249		
Foreign	5,371	25,740	51,638		
	\$129,093	\$189,652	\$237,887		

The Company's effective income tax rate differs from the amount computed by using income before income taxes and applying the U.S. federal income tax rate to such amount because of the effect of the following items:

	Year Ended December 31,			
	2004	2005	2006	
Tax at U.S. federal income tax rate	35.0%	35.0%	35.0%	
State income taxes, net of federal benefit	1.6	1.4	2.2	
Non-deductible expenses	0.7	0.2		
Valuation allowance	2.9	0.6	0.8	
Foreign taxes	0.5	2.9	2.6	
Foreign tax credits	(0.5)	(2.9)	(4.2)	
	40.2%	37.2%	36.4%	

The components of deferred tax assets and liabilities are as follows:

	At December 31,	
	2005	2006
Deferred assets (liabilities):		
State net operating loss and credit carryforwards	\$ 12,097	\$ 14,126
Intangible asset amortization	(139,866)	(170,216)
Non-deductible intangible amortization	(27,727)	(26,946)
Deferred compensation	1,712	_
Convertible securities interest	(12,854)	(19,807)
Fixed asset depreciation	(1,806)	(1,956)
Deferred income	(2,271)	(398)
Accrued expenses	189	739
	(170,526)	(204,458)
Valuation allowance	(12,097)	(14,126)
Net deferred income taxes	\$ (182,623)	\$ (218,584)

Deferred tax liabilities are primarily the result of tax deductions for the Company's intangible assets and convertible securities. The Company amortizes most of its intangible assets for tax purposes only, reducing its tax basis below its carrying value for financial statement purposes and generating deferred taxes each reporting period. In contrast, the intangible assets associated with the Company's recent investment in its Canadian Affiliates are not deductible for tax purposes, but certain of these assets are amortized for book purposes. As such, at the time of its investment, the Company recorded a deferred tax liability that represents the tax effect of the future book amortization of these assets. The Company's floating rate senior convertible securities, mandatory convertible securities and junior convertible trust preferred securities also currently generate tax deductions that are higher than the interest expense recorded for financial statement purposes.

At December 31, 2006, the Company had state net operating loss carryforwards that will expire over a 15-year period beginning in 2006. The valuation allowance at December 31, 2005 and 2006 is related to the uncertainty of the realization of most of these loss carryforwards, which realization depends upon the Company's generation of sufficient taxable income prior to their expiration. The change in the valuation allowance for the year ended December 31, 2006 is attributable to state net operating losses during this period and a provision for loss carryforwards that the Company does not expect to realize.

In 2006, the Company reduced its deferred tax liabilities for non-deductible intangible amortization by \$1,408 to reflect a reduction in Canadian federal income tax rates that was enacted in June 2006 and will become effective beginning in 2008. The reduction of these deferred tax liabilities was recorded as a benefit in the 2006 income tax provision.

11 Derivative Financial Instruments

The Company periodically uses interest rate derivative contracts to manage market exposures associated with its variable interest rate debt by creating offsetting fixed rate market exposures. As of December 31, 2006, the Company had \$150 million notional amount of interest rate swap contracts that fix the interest rate on the floating rate senior convertible securities to a weighted average interest rate of approximately 3.28% through February 2008.

The Company records all derivatives on the balance sheet at fair value. As cash flow hedges, the effective portion of the unrealized gain or loss on the derivative instruments is recorded in accumulated other comprehensive income as a separate component of stockholders' equity. At December 31, 2005 and 2006, the unrealized gain, before taxes, on the derivative instruments was \$2,962 and \$2,392, respectively. The Company expects no portion of the unrealized gain to be reclassified from accumulated other comprehensive income to net income over the next 12 months.

12 Comprehensive Income

A summary of comprehensive income, net of applicable taxes, is as follows:

	For the year ended December 31,			ecember 31,
		2004	2005	2006
Net Income	\$	77,147	\$119,069	\$151,277
Foreign currency translation adjustment		1,132	13,781	(1,832)
Change in net unrealized gain (loss) on derivative instruments		(232)	2,098	(358)
Change in unrealized gain (loss) on investment securities		11	(50)	100
Reclassification of unrealized gain on investment securities		(210)	((10)	
to realized gain		(318)	(610)	
Comprehensive income	\$	77,740	\$ 134,288	\$ 149,187

The components of accumulated other comprehensive income, net of taxes, were as follows:

	At December 31,	
	2005	2006
Foreign currency translation adjustment	\$ 14,913	\$ 13,081
Unrealized gain (loss) on investment securities	(23)	77
Unrealized gain on derivative instruments	1,866	1,508
Accumulated other comprehensive income	\$ 16,756	\$ 14,666

13 Commitments and Contingencies

The Company and its Affiliates are subject to claims, legal proceedings and other contingencies in the ordinary course of their business activities. Each of these matters is subject to various uncertainties, and it is possible that some of these matters may be resolved in a manner unfavorable to the Company or its Affiliates. The Company and its Affiliates establish accruals for matters for which the outcome is

probable and can be reasonably estimated. Management believes that any liability in excess of these accruals upon the ultimate resolution of these matters will not have a material adverse effect on the consolidated financial condition or results of operations of the Company.

Federal and state regulators have ongoing investigations of the mutual fund industry that focus on a number of issues, including late trading and market timing, and have sent requests for information to a number of mutual fund companies, broker/dealers and mutual fund distributors, including Affiliates of the Company. The Company believes there will be no material adverse effects resulting from these investigations on the financial condition of the Company.

Certain Affiliates operate under regulatory authorities which require they maintain minimum financial or capital requirements. Management is not aware of any violations of such financial requirements occurring during the year.

14 Business Combinations

The Company's Affiliate investments in the years ended December 31, 2004, 2005 and 2006 totaled \$508,781, \$267,169 and \$144,580, respectively. These investments were made pursuant to the Company's growth strategy designed to generate shareholder value by making investments in mid-sized investment management firms and other strategic transactions designed to expand the Company's participation in its three principal distribution channels.

In December 2006, the Company expanded its product offerings in the Institutional distribution channel through the acquisition of a majority equity interest in Chicago Equity Partners, LLC, which manages a wide range of U.S. equity and fixed income products across multiple capitalization sectors and investment styles. The firm's client base includes over 120 institutional investors, including public funds, corporations, endowments and foundations, Taft-Hartley plan sponsors and certain mutual fund advisers. The transaction was financed through borrowings under the Company's senior revolving credit facility.

In 2005, the Company completed the acquisition of a group of Canadian asset management firms. These firms manage approximately 100 investment products, including Canadian, U.S. and international value and growth equity products, as well as balanced, fixed income, venture capital and structured products. The transaction was financed through borrowings under the Company's senior revolving credit facility, the issuance of common stock, and available cash.

In 2005, through Managers Investment Group LLC, the Company completed the acquisition of approximately \$3.0 billion of assets under management from Fremont Investment Advisors, Inc. ("FIA"). The acquisition included the Fremont Funds, a diversified family of no load mutual funds managed by independent sub advisors and professionals at FIA, as well as FIA assets in separate accounts and 401(k) plans. The transaction was financed through available cash.

In 2004, the Company acquired a minority equity interest in AQR Capital Management, LLC ("AQR"). Based in Greenwich, Connecticut, AQR offers quantitatively managed hedge funds and long-only international equity products provided through collective investment vehicles and separate accounts. This transaction is accounted for under the equity method of accounting. The transaction was financed through the Company's available cash and borrowings under its senior revolving credit facility.

In 2004, the Company acquired a controlling interest in the growth equity business of TimesSquare Capital Management, LLC ("TimesSquare"). TimesSquare manages growth-oriented small and mid-cap investment products in the Institutional and Mutual Fund distribution channels. TimesSquare's management team holds the remaining interest. The transaction was financed through the Company's available cash.

The Company purchased an additional interest in its Affiliate, Friess Associates, LLC ("Friess") in 2004 pursuant to the terms of the Company's original investment in Friess in 2001. The transaction was financed through the

Company's available cash. Friess is the advisor to the Brandywine family of no-load mutual funds and also advises separate portfolios for charitable foundations, major corporations and high net worth individuals.

In 2004, the Company acquired a controlling interest in Genesis Fund Managers, LLP ("Genesis"). Genesis manages emerging markets equity investment products, primarily for institutional clients in the United States, United Kingdom, Europe and Australia. Genesis' management team holds the remaining interest. The transaction was financed through the Company's available cash.

The assets and liabilities of the investments in acquired businesses are accounted for under the purchase method of accounting and recorded at their fair values at the dates of acquisition. The excess of the purchase price over the estimated fair values of the net assets acquired is recorded as an increase in goodwill. The results of operations of acquired businesses have been included in the Consolidated Financial Statements beginning as of the date of acquisition. The following table summarizes the net assets acquired as of the respective acquisition dates during the years ended December 31, 2005 and 2006:

	2005(1)	2006(2)
Current assets, net	\$ 7,679	\$ 11,488
Fixed assets	2,145	2,045
Definite-lived acquired client relationships	54,069	43,481
Indefinite-lived acquired client relationships	11,200	2,611
Equity investments in Affiliates	36,199	_
Deferred income taxes	(27,086)	_
Deferred purchase price	(10,015)	_
Goodwill	193,796	87,040
Net assets acquired	\$ 267,987	\$ 146,665

- (1) In connection with the Company's investment in equity method Affiliates in 2005, approximately \$22,000 of acquired client relationships and \$14,200 of goodwill have been classified within Equity investments in Affiliates.
- (2) The Company's purchase price allocation of Chicago Equity Partners is subject to the finalization of the valuation of acquired client relationships. As a result, these preliminary amounts may be revised in future periods.

Unaudited pro forma financial results are set forth below, giving consideration to the investments and acquisitions in 2005 and 2006, as if such transactions occurred as of the beginning of 2005, assuming revenue sharing arrangements had been in effect for the entire period and after making certain other pro forma adjustments.

	Year Ended December 3			ember 31,
		2005		2006
Revenue	\$	976,751	\$1,2	201,686
Net Income		123,153	1	52,460
Earnings per share—basic	\$	3.64	\$	4.87
Earnings per share—diluted		2.93		3.77

In conjunction with certain acquisitions, the Company has entered into agreements and is contingently liable, upon achievement of specified financial targets, to make additional purchase payments of up to \$165,000 through 2011. The specified financial targets for certain agreements will be measured beginning December 31, 2007. In the event the first financial target is achieved, the Company will make a payment of up to \$50 million in 2008.

In addition to the investments described above, in the years ended December 31, 2004, 2005, and 2006, the Company completed additional investments in existing Affiliates and transferred interests in certain affiliated investment management firms. The financial effect of these transactions was not material to the Company's results.

Many of the Company's operating agreements provide Affiliate managers a conditional right to require AMG to purchase their retained equity interests at certain intervals. Certain agreements also provide AMG a conditional right to require Affiliate managers to sell their retained equity interests to the Company at certain intervals and upon their death, permanent incapacity or termination of employment and provide Affiliate managers a conditional right to require the Company to purchase such retained equity interests upon the occurrence of specified events. The purchase price of these conditional purchases are generally calculated based upon a multiple of the Affiliate's cash flow distributions, which is intended to represent fair value. As one measure of the potential magnitude of such purchases, in the event that a triggering event and resulting purchase occurred with respect to all such retained equity interests as of December 31, 2006, the aggregate amount of these payments would have totaled approximately \$1,324,800. In the event that all such transactions were closed, AMG would own the prospective cash flow distributions of all equity interests that would be purchased from the Affiliate managers. As of December 31, 2006, this amount would represent approximately \$170,400 on an annualized basis.

15 Goodwill and Acquired Client Relationships

In 2005 and 2006, the Company completed new investments, acquired additional interests in existing Affiliates and transferred certain interests to Affiliate management. The goodwill resulting from the acquisition of a group of Canadian firms is not deductible for tax purposes. The other goodwill generated during this period is deductible for tax purposes. The increase in goodwill associated with transactions with consolidated investments, net of the cost of transferred interests, the carrying amounts of goodwill, as well as the impact of foreign currency translation, are reflected in the following table for each of the Company's operating segments, which are discussed in greater detail in Note 23:

	Mutual Fund	Institutional	High Net Worth	Total
Balance, as of December 31, 2004	\$ 345,731	\$ 356,849	\$ 185,987	\$ 888,567
Goodwill acquired, net	86,897	84,188	22,711	193,796
Foreign currency translation	4,681	4,572	1,633	10,886
Balance, as of December 31, 2005	437,309	445,609	210,331	1,093,249
Goodwill acquired, net	17,490	58,692	8,350	84,532
Foreign currency translation	(238)	(233)	(83)	(554)
Balance, as of December 31, 2006	\$ 454,561	\$ 504,068	\$ 218,598	\$ 1,177,227

In connection with the Company's equity method investments, approximately \$186,600 and \$185,300 of goodwill have been classified within Equity investments in Affiliates as of December 31, 2005 and 2006, respectively.

The following table reflects the components of intangible assets of consolidated investments as of December 31, 2005 and 2006:

	2005		2006	
	Carrying Amount	Accumulated Amortization	Carrying Amount	Accumulated Amortization
Amortized intangible assets: Acquired client relationships	\$ 336,549	\$ 109,108	\$ 379,703	\$ 136,486
Non-amortized intangible assets:	φ 330,347	φ 107,100	φ 3/7,/03	φ 130,400
Acquired client relationships—mutual fund management contracts	256,251	_	258,849	_
Goodwill	1,093,249	_	1,177,227	<u> </u>

For the Company's consolidated investments, definite-lived acquired client relationships are amortized over their expected useful lives. As of December 31, 2006, these relationships were being amortized over a weighted average life of approximately 12 years. Amortization expense was \$18,339, \$24,873 and \$27,378 for the years ended December 31, 2004, 2005 and 2006, respectively. The Company estimates that amortization expense will be approximately \$32,000 per year from 2007 through 2011, assuming no additional investments in new or existing Affiliates.

In connection with the Company's equity method investments, approximately \$93,800 and \$86,300 of amortizable acquired client relationships have been classified within Equity investments in Affiliates, as of December 31, 2005 and 2006, respectively. These acquired client relationships are amortized over their expected useful lives. As of December 31, 2006, these relationships were being amortized over a weighted average life of approximately 11 years. Amortization expense of \$8,483 and \$9,290 was recorded relating to these acquired client relationships in 2005 and 2006, respectively. The Company estimates that amortization expense will be approximately \$9,300 per year from 2007 through 2011, assuming no additional investment in equity method affiliates.

As a result of the sale of Affiliate equity interests to certain employees, the Company's Affiliate ownership percentage in those Affiliates varies. Accordingly, the Company reported an increase in its stockholders' equity and the carrying value of its investments (primarily goodwill and acquired client relationships) of approximately \$2,200 in 2005, and a decrease in stockholders' equity and the carrying value of its investments of approximately \$11,569 in 2006.

16 Minority Interest

Minority interest in the Consolidated Statements of Income includes the income allocated to owners of consolidated Affiliates, other than AMG. For the years ended December 31, 2004, 2005 and 2006, this income was \$115,524, \$144,263 and \$212,523, respectively. Minority interest on the Consolidated Balance Sheets includes capital and undistributed profits owned by the managers of the consolidated Affiliates (including profits allocated to managers from the Owners' Allocation and Operating Allocation). For the years ended December 31, 2004, 2005 and 2006, profit distributions to management owners were \$121,714, \$185,732 and \$287,899, respectively.

17 Stockholders' Equity

Preferred Stock

The Company is authorized to issue up to 5,000,000 shares of Preferred Stock in classes or series and to fix the designations, powers, preferences and the relative, participating, optional or other special rights of the shares of each series and any qualifications, limitations and restrictions thereon as set forth in the stock certificate. Any such Preferred Stock issued by the Company may rank prior to common stock as to dividend rights, liquidation preference or both, may have full or limited voting rights and may be convertible into shares of common stock.

Common Stock

The Company's Board of Directors has authorized the issuance of up to 150,000,000 shares of Voting Common Stock and 3,000,000 shares of Class B Non-Voting Common Stock. In 2004, the Company's Board of Directors authorized share repurchase programs in connection with the issuance of the Company's 2004 PRIDES, pursuant to which the Company was authorized to repurchase (i) up to 3.0 million shares of common stock at the time of the closing of the Company's 2004 PRIDES and (ii) an additional 1.5 million shares in 2005. The Company's Board of Directors established share repurchase programs permitting the repurchase of up to an additional 4 million shares of common stock in March 2006, and a share repurchase program permitting for the repurchase of up to an additional 1.6 million shares of common stock in July 2006. The timing and amount of purchases are determined at the discretion of AMG's management. In the year ended December 31, 2005, the Company repurchased 1.2 million shares of common stock at an average price of \$76.10 per share. In the year ended December 31, 2006, the Company repurchased 5.5 million shares of common stock at an average price of \$98.10 per share. As of December 31, 2006, the Company had the ability to acquire up to 0.8 million shares of common stock under its authorized share repurchase program (see Note 24— Subsequent Events).

In 2005, the Company net settled a forward equity sale agreement for approximately \$14,000 in cash, which was recorded as a reduction to stockholders' equity.

In March 2006, the Company entered into a series of call spread option agreements with a major securities firm. The agreements provide the Company the option, but not the obligation, to repurchase up to 0.9 million shares of its common stock, beginning in June 2007 and ending in December 2007, at a weighted-average price of \$99.59 per share. If the Company's prevailing share price exceeds \$132.74, on a weighted-average basis during this period, the net number of shares available for repurchase under the agreements will be reduced. In the event the Company elects to exercise its option, the Company may elect to receive cash proceeds rather than shares of common stock. In connection with these agreements, the Company made payments of \$13,290, which were recorded as a reduction of stockholders' equity.

Convertible Securities

The Company's 2004 PRIDES contain freestanding forward contracts that require holders to purchase shares of the Company's common stock at a certain date in the future. Additionally, the Company's zero coupon and floating rate convertible securities both contain an embedded right for holders to receive shares of the Company's common stock under certain conditions. All of these arrangements, the forward equity sale agreement and call spread option agreements (described above) meet the definition of equity under FASB Emerging Issues Task Force Issue No. 00-19, "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock" and are not considered derivative instruments under FAS 133 or required to be accounted for separately.

Stock Option and Incentive Plans

The Company established the 1997 Stock Option and Incentive Plan (as amended and restated, the "1997 Plan"), under which it is authorized to grant options to employees

and directors. In 2002, stockholders approved an amendment to increase the number of shares of common stock authorized for issuance under this plan to 7,875,000.

In 2002, the Company's Board of Directors established the 2002 Stock Option and Incentive Plan (as amended and restated, the "2002 Plan"), under which the Company is authorized to grant non-qualified stock options and certain other awards to employees and directors. This plan requires that the majority of grants under the plan in any three-year period must be issued to employees of the Company who are not executive officers or directors of the Company. This plan was approved by the Company's Board of Directors. There are 3,375,000 shares of the Company's common stock authorized for issuance under this plan.

In December 2003, the Board of Directors approved an amendment to each of the 1997 Plan and 2002 Plan to accelerate the vesting of the then-outstanding unvested options (other than options granted to directors). The shares issuable upon the exercise of the accelerated options remain subject to restrictions on transfer which lapse according to specified schedules, for so long as the option holder remains employed by the Company. In the event the option holder ceases to be employed by the Company, the transfer restrictions will remain outstanding until the later of December 2010, or seven years after the date of grant. All shares received upon exercise remain the property of the holder under any circumstance subject to transfer restrictions.

In May 2006, the stockholders of the Company approved the 2006 Stock Option and Incentive Plan (the "2006 Plan"), under which the Company is authorized to grant stock options and stock appreciation rights to senior management, employees and directors. There are 3,000,000 shares of the Company's common stock authorized for issuance under this plan.

The plans are administered by a committee of the Board of Directors. Under the plans, options generally vest over a period of three to four years and expire seven to ten years after the grant date. All options have been granted with exercise prices equal to the fair market value of the Company's common stock on the date of grant.

The following table summarizes the transactions of the Company's stock option and incentive plans:

	Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (years)
Unexercised options			
outstanding— January 1, 2006	7,808,389	\$ 41.26	
Options granted	967,094	101.89	
Options exercised	(1,287,781)	33.00	
Options forfeited	(82,880)	52.13	
Unexercised options outstanding—			
December 31, 2006	7,404,822	50.49	5.1
Exercisable at December 31, 2006	6,387,093	42.51	4.8
Exercisable and free			
from restrictions on transfer at			
December 31, 2006	5,196,266	39.59	4.2

The Company generally uses treasury stock to settle stock option exercises. The total intrinsic value of options exercised during the years ended December 31, 2004, 2005 and 2006 was \$23,640, \$41,442 and \$78,371. As of December 31, 2006, the intrinsic value of options that were vested and free from restrictions on transfer was \$340,563. As of that date, the total intrinsic value of all vested options (including those subject to restrictions on transfer) was \$399,960, and the intrinsic value of unvested options was \$4,640.

During the year ended December 31, 2006, the cash received and the actual tax benefit recognized for options exercised were \$41,886 and \$28,529, respectively. During the year ended December 31, 2006, the excess tax benefit classified as a financing cash flow was \$23,047.

The Company's Net Income for the year ended December 31, 2006 includes \$1,042 of compensation expense and \$612 of income tax benefits, related to our equity-based compensation arrangements. As of December 31, 2006, there was \$28,247 of deferred compensation expense related to stock options which will be recognized over a weighted average period of approximately three years (assuming no forfeitures).

The Company periodically issues Affiliate equity interests to certain Affiliate employees. The estimated fair value of equity granted in these awards, net of estimated forfeitures, is recorded as compensation expense over the service period as equity based compensation.

The fair value of options granted is estimated using the Black-Scholes option pricing model. The weighted average fair value of options granted during the years ended December 31, 2004, 2005 and 2006 was \$12.77, \$20.95 and \$28.66 per option, respectively, based on the assumptions stated below.

	Year Ended December 31,				
	2004	2005	2006		
Dividend yield	0.0%	0.0%	0.0%		
Expected volatility(1)	20.4%	19.9%	22.6%		
Risk-free interest rate(2)	3.3%	4.4%	4.9%		
Expected life of					
options (in years)(3)	4.4	5.0	4.4		
Forfeiture rate ⁽³⁾	0.0%	0.0%	5.0%		

- (1) Based on the implied volatility of the Company's common stock.
- (2) Based on the U.S. Treasury yield curve in effect at the date of grant.
- (3) Based on historical data.

18 Earnings Per Share

The calculation of basic earnings per share is based on the weighted average number of shares of the Company's common stock outstanding during the period. Diluted earnings per share is similar to basic earnings per share, but adjusts for the effect of the potential issuance of incremental shares of the Company's common stock. The

following is a reconciliation of the numerator and denominator used in the calculation of basic and diluted earnings per share available to common stockholders. Unlike all other dollar amounts in these Notes, the amounts in the numerator reconciliation are not presented in thousands.

	Year Ended December 31,					
	2004	2005	2006			
Numerator:						
Net Income	\$ 77,147,000	\$119,069,000	\$151,277,000			
Interest expense on contingently convertible securities,						
net of taxes	3,016,000	6,693,000	17,618,000			
Net income, as adjusted	\$ 80,163,000	\$125,762,000	\$168,895,000			

	Year Ended December 31,				
	2004	2005	2006		
Denominator:					
Average shares					
outstanding—basic	29,994,560	33,667,542	31,289,005		
Effect of dilutive instruments:					
Stock options	1,552,613	2,244,874	2,542,878		
Forward equity agreement	41,550	88,654	_		
Contingently convertible securities	8,055,953	8,688,585	10,727,266		
Mandatory convertible securities	_	_	599,853		
Average shares outstanding—					
diluted	39,644,676	44,689,655	45,159,002		

The calculation of diluted earnings per share in the years ended December 31, 2004, 2005, and 2006 excludes the effect of the call spread option agreements and the potential exercise of options to purchase approximately 0.9, 0.1 and 0.9 million common shares, respectively, because the effect would be anti-dilutive. This calculation also excludes the effect of any potential exercise of the forward purchase contract component of the 2004 PRIDES and the 2001

PRIDES (prior to the August 2004 exercise) because the effect would have been anti-dilutive.

In 2005, the Company net settled its forward equity sale agreement for approximately \$14,000 in cash, which was recorded as a reduction to stockholders' equity. Prior to the settlement of the forward equity sale agreement, the Company was required to use the treasury stock method to measure potentially issuable shares.

As more fully discussed in Notes 7, 8, and 9, the Company had convertible securities outstanding during the years ended December 31, 2004, 2005 and 2006. The aggregate number of shares of common stock that could be issued in the future to settle these securities are deemed outstanding for the purposes of the calculation of diluted earnings per share. This approach, referred to as the if-converted method, requires that such shares be deemed outstanding regardless of whether the notes are then contractually convertible into the Company's common stock. For this if-converted calculation, the interest expense (net of tax) attributable to these securities is added back to Net Income, reflecting the assumption that the securities have been converted.

For the years ended December 31, 2004, 2005 and 2006, the Company repurchased approximately 3.5, 1.2 and 5.5 million shares of common stock, respectively, under various stock repurchase programs.

19 Financial Instruments and Risk Management

The Company is exposed to market risks brought on by changes in interest and currency exchange rates. The Company does not enter into foreign currency transactions or derivative financial instruments to reduce risks associated with changes in currency exchange rates. The Company uses derivative financial instruments to reduce risks associated with changes in interest rates.

Notional amounts and credit exposures of derivatives

The notional amount of derivatives does not represent amounts that are exchanged by the parties, and thus are not a measure of the Company's exposure. The amounts exchanged are calculated on the basis of the notional or contract amounts, as well as on other terms of the interest rate swap derivatives and the volatility of these rates and prices.

The Company would be exposed to credit-related losses in the event of nonperformance by the counter parties that issued the financial instruments, although the Company does not expect that the counter parties to interest rate swaps will fail to meet their obligations, given their typically high credit ratings. The credit exposure of derivative contracts is represented by the positive fair value of contracts at the reporting date, reduced by the effects of master netting agreements. The Company generally does not give or receive collateral on interest rate swaps because of its own credit rating and that of its counter parties.

Interest Rate Risk Management

From time to time, the Company enters into interest rate swaps to reduce exposure to interest rate risk connected to existing liabilities. The Company does not hold or issue derivative financial instruments for trading purposes. Interest rate swaps are intended to enable the Company to achieve a level of variable-rate and fixed-rate debt that is acceptable to management and to limit interest rate exposure. The Company agrees with another party to exchange the difference between fixed-rate and floating rate interest amounts calculated by reference to an agreed notional principal amount.

Fair Value

Financial Accounting Standard No. 107 ("FAS 107"), "Disclosures about Fair Value of Financial Instruments," requires the Company to disclose the estimated fair values for certain of its financial instruments. Financial instruments include items such as loans, interest rate contracts, notes payable and other items as defined in FAS 107.

Fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Quoted market prices are used when available; otherwise, management estimates fair value based on prices of financial instruments with similar characteristics or by using valuation techniques such as discounted cash flow models. Valuation techniques involve uncertainties and require assumptions and judgments regarding prepayments, credit risk and discount rates. Changes in these assumptions will result in different valuation estimates. The fair value presented would not necessarily be realized in an immediate sale nor are there typically plans to settle liabilities prior to contractual maturity. Additionally, FAS 107 allows companies to use a wide range of valuation techniques; therefore, it may be difficult to compare the Company's fair value information to other companies' fair value information.

The carrying amount of cash, cash equivalents and short-term investments approximates fair value because of the short-term nature of these instruments. The carrying value of notes receivable approximate fair value because interest rates and other terms are at market rates. The carrying value of notes payable approximates fair value principally because of the short-term nature of the notes. The carrying value of senior bank debt approximates fair value because the debt is a revolving credit facility with variable interest based on selected short-term rates. The fair market value of the zero coupon senior convertible debt, the floating rate senior convertible securities, the 2004 mandatory convertible debt, and the junior convertible trust preferred securities at December 31, 2006 was \$223,446, \$777,750, \$450,267 and \$321,900, respectively.

20 Selected Quarterly Financial Data (Unaudited)

The following is a summary of the quarterly results of operations of the Company for the years ended December 31, 2005 and 2006.

_	2005					
	First	Second	Third	Fourth		
	Quarter	Quarter	Quarter	Quarter		
Revenue \$	201,612	\$ 208,257	\$ 234,126	\$ 272,497		
Operating income	74,492	75,783	80,769	104,011		
Income before						
income taxes	41,215	41,653	45,254	61,530		
Net Income	25,553	26,241	28,510	38,764		
Earnings per						
share—diluted \$	0.61	\$ 0.63	\$ 0.67	\$ 0.90		

	2006					
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter		
Revenue	\$ 278,042	\$ 283,108	\$ 280,440	\$ 328,763		
Operating income	103,706	104,474	102,059	143,674		
Income before						
income taxes	55,937	51,632	52,613	77,705		
Net Income	35,240	33,936	33,146	48,955		
Earnings per						
share—diluted	0.81	\$ 0.86	\$ 0.87	\$ 1.21		

In each of the quarters in 2006, the Company experienced an increase in revenue (and consequently operating income, income before income taxes, Net Income and Earnings per share) from the same period in 2005, primarily as a result of the growth in assets under management resulting from positive investment performance and cash flows and, to a lesser extent, from the Company's investments in new Affiliates in 2005.

21 Related Party Transactions

The Company recorded amounts payable to Affiliate partners of \$4,567 and \$36,736 in connection with the purchase of additional Affiliate equity interests in 2005 and 2006, respectively. The total amount due to Affiliate partners as of December 31, 2006 was \$42,364, of which \$41,086 is due in 2007 and is included as a current liability.

The Company recorded recourse notes receivable from Affiliate partners of \$12,060 in connection with the transfer of Affiliate equity interests in 2006. The total amount due from Affiliate partners as of December 31, 2006 was \$18,365.

In certain cases, Affiliate management owners and Company officers may serve as trustees or directors of certain mutual funds from which the Affiliate earns advisory fee revenue.

22 Summarized Financial Information of Equity Affiliates

The following table presents summarized financial information for the years ended December 31, 2005 and 2006 on a combined 100 percent basis of the Affiliate investments accounted for under the equity method. Investments accounted for under the equity method were not significant in years prior to 2005.

	2005	2006
Current assets	\$158,676	\$ 154,755
Noncurrent assets	108,028	115,361
Current liabilities	23,612	41,175
Noncurrent liabilities	1,741	1,221
Revenue	269,004	345,852
Net Income	211,985	240,371

The Company's share of undistributed earnings from equity method investments totaled \$22,638 as of December 31, 2006.

23 Segment Information

Financial Accounting Standard No. 131, "Disclosures about Segments of an Enterprise and Related Information" ("FAS 131") establishes disclosure requirements relating to operating segments in annual and interim financial statements. Management has assessed the requirements of FAS 131 and determined that the Company operates in three business segments representing the Company's three principal distribution channels: Mutual Fund, Institutional and High Net Worth, each of which has different client relationships.

Revenue in the Mutual Fund distribution channel is earned from advisory and sub-advisory relationships with all domestically registered investment products as well as non-institutional investment products that are registered abroad. Revenue in the Institutional distribution channel is earned from relationships with foundations and endowments, defined benefit and defined contribution plans and Taft-Hartley plans. Revenue in the High Net Worth distribution channel is earned from relationships with wealthy individuals, family trusts and managed account programs.

Revenue earned from client relationships managed by Affiliates accounted for under the equity method is not consolidated with the Company's reported revenue but instead is included (net of operating expenses, including amortization) in "Income from equity method investments", and reported in the distribution channel in which the Affiliate operates. Income tax attributable to the profits of the Company's equity method Affiliates is reported within the Company's consolidated income tax provision.

In firms with revenue sharing arrangements, a certain percentage of revenue is allocated for use by management of an Affiliate in paying operating expenses of that Affiliate, including salaries and bonuses, and is called an "Operating Allocation." In reporting segment operating expenses, Affiliate expenses are allocated to a particular segment on a pro rata basis with respect to the revenue generated by that Affiliate in such segment. Generally, as revenue increases, additional compensation is typically paid to Affiliate management partners from the Operating Allocation. As a result, the contractual expense allocation pursuant to a revenue sharing arrangement may result in the characterization of any growth in profit margin beyond the Company's Owners' Allocation as an operating expense. All other operating expenses (excluding intangible amortization) and interest expense have been allocated to segments based on the proportion of cash flow distributions reported by Affiliates in each segment.

	,	,		. ,,==,

As of December 31, 2004, an equity method investment of \$252,597 is included in the total assets of the Institutional segment. As of December 31, 2005, equity method investments of \$8,717, \$282,189 and \$10,570 are included in the total assets of the Mutual Fund, Institutional and High Net Worth segments, respectively. As of December 31, 2006, equity method investments of \$6,451, \$273,170 and \$13,819 are included in the total assets of the Mutual Fund, Institutional and High Net Worth segments, respectively.

24 Subsequent Events

The Company entered into an amended and restated senior revolving credit facility (the "Facility") in February 2007, which allows for borrowings of up to \$650 million at rates of interest (based either on the Eurodollar rate or the prime rate as in effect from time to time) that vary depending on our credit ratings. Subject to the agreement of the lenders (or prospective lenders) to increase their commitments, the Company has the option to borrow up to an aggregate of \$800 million under this Facility. The Facility will mature in February 2012, and contains financial covenants with respect to leverage and interest coverage. The Facility also contains customary affirmative and negative covenants, including limitations on indebtedness, liens, cash dividends and fundamental corporate changes. Borrowings under the Facility are collateralized by pledges of the substantial majority of capital stock or other equity interests owned by the Company.

On February 23, 2007, the Board of Directors approved a share repurchase program permitting the Company to repurchase 3.0 million shares of common stock, in addition to those shares that may be purchased pursuant to the Company's previously authorized share repurchase programs. Purchases may be made from time to time, at management's discretion, in the open market or in privately negotiated transactions, including through the use of derivative instruments. As of February 23, 2007, there were 3.2 million shares that could be purchased under the Company's share repurchase programs.

Common Stock and Corporate Organization Information

Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded on the New York Stock Exchange (symbol: AMG). The following table sets forth the high and low prices as reported on the New York Stock Exchange composite tape since January 1, 2005 for the periods indicated.

2005	High	Low
First Quarter	\$ 68.09	\$ 59.82
Second Quarter	69.30	57.08
Third Quarter	74.84	68.40
Fourth Quarter	83.20	68.60
2006		
First Quarter	\$ 108.58	\$ 79.58
Second Quarter	107.46	81.56
Third Quarter	101.81	84.00
Fourth Quarter	105.97	92.09

The closing price for a share of our common stock as reported on the New York Stock Exchange composite tape on February 22, 2007 was \$117.41. As of February 22, 2007, there were 35 stockholders of record.

We have not declared a cash dividend with respect to the periods presented. Since we intend to retain earnings to finance investments in new Affiliates, repay indebtedness, pay interest and income taxes, repurchase debt securities and shares of our common stock when appropriate, and develop our existing business, and since our credit facility prohibits us from making cash dividend payments to our stockholders, we do not anticipate paying cash dividends on our common stock in the foreseeable future.

Issuer Purchases of Equity Securities

	Total Number of Shares	Average Price Paid	Number of Shares Purchased as Part of Publicly Announced Plans or	Maximum Number of Shares that May Yet Be Purchased Under the Plans or
Period	Purchased	Per Share	Programs ⁽¹⁾	Programs ⁽²⁾
October 1-31, 2006	_	\$ _	_	1,610,311
November 1-30, 2006	570,400	\$ 101.04	570,400	1,039,911
December 1-31, 2006	244,500	\$ 104.05	814,900	795,411
Total	814,900	\$ 101.94	814,900	795,411

- (1) Notes 17 and 24 to the Consolidated Financial Statements provide additional detail with respect to our share repurchase programs.
- (2) On February 23, 2007, our Board of Directors authorized a new share repurchase program permitting us to repurchase 3.0 million shares of our common stock. As of February 23, 2007, there were 3.2 million shares that could be purchased under our share repurchase programs.

Employees and Corporate Organization

As of December 31, 2006, we employed approximately 75 persons and our Affiliates employed approximately 1,200 persons, the substantial majority of which were full-time employees. Neither we nor any of our Affiliates is subject to any collective bargaining agreements, and we believe that our labor relations are good. We were formed in 1993 as a corporation under the laws of the State of Delaware.

Endnotes

Notes to Financial Highlights

- (1) Cash Net Income is defined as Net Income plus amortization and deferred taxes related to intangible assets plus Affiliate depreciation. AMG's use of Cash Net Income, including a reconciliation to Net Income, is discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations."
- (2) Earnings before interest expense, income taxes, depreciation and amortization.
- (3) Cash Net Income (as described in Note 1, above) divided by the adjusted diluted average shares outstanding (see Note 4).
- (4) In the calculation of adjusted diluted average shares outstanding, the potential share issuance in connection with the Company's convertible securities measures net shares using a "treasury stock" method. Under this method, only the net number of shares of common stock equal to the value of the contingently convertible securities and the junior convertible trust preferred securities in excess of par, if any, are deemed to be outstanding. The Company believes the inclusion of net shares under a treasury stock method best reflects the benefit of the increase in available capital resources (which could be used to repurchase shares of common stock) that occurs when these securities are converted and the Company is relieved of its debt obligation. This method does not take into account any increase or decrease in the Company's cost of capital in an assumed conversion.

Other Notes

- Unless otherwise noted, data presented is as of December 31, 2006.
- Investment product and performance information has been provided by each Affiliate to AMG, and is provided in this Annual Report for reference purposes only and not for investment or solicitation purposes. The investment performance of Affiliate products is compared to benchmarks deemed by the Affiliates and AMG to be the appropriate benchmarks for such products.
