MID PENN BANCORP INC.

2013 Annual Report to Shareholders

I am pleased to present to you a summary of Mid Penn Bancorp Inc.'s 2013 year-end results, which I believe represent another year of steady progress. The year was defined by healthy loan growth, improved asset quality, improved net interest margin, controlled noninterest expenses and a continuing commitment to the community. The execution of our strategic plan allowed us to offset the challenges of a flat economy and increased regulation, and in doing so, post a solid year in growth and income.

Loan growth was significant and meaningful in 2013. Loans outstanding grew 12.9% year-over-year. We benefited from having an experienced and talented loan team in place for the entire year that followed a structured and consistent calling plan for customers and prospects. Those calling efforts led to more opportunities to generate high quality loans and affordable deposits to fund those loans. It is because of this success that we not only were able to increase loans outstanding, but were also able to increase our net interest margin from 3.6% to 3.8% throughout the year.

As the loan portfolio grew, the quality of the portfolio improved. When we began the year, our asset quality index, which is an aggregate ratio of asset quality metrics, stood at 4.5%. By the end of the year, it was down to 3.0% – a dramatic improvement.

While we generated additional income through loan growth and margin improvement, we also bolstered earnings by controlling expenses. Noninterest expenses in 2013 were 1.5% lower than they were in 2012. Our policy of "mission critical expenses only" paid off in 2013.

While we worked hard to control expenses, we did not forget to give back to the communities we serve. We again sponsored the 4th of July Fireworks celebration in Northern Dauphin County for the fifth consecutive year. We also supported several local community organizations such as the Salvation Army, the Central Pennsylvania Food Bank, Special Olympics, Ned Smith Center for Nature and Art, United Way, the Central Pennsylvania Blood Bank and the Capital Area School for the Arts. Additionally, we awarded over $6,000 in academic and need-based scholarships throughout our footprint.

Through income improvement and expense control, we reported an increase of 4.0% on net income available to common shareholders, while also marking our 13th consecutive quarter of paying a cash dividend. In the fourth quarter of 2013, we declared a special dividend of $0.10 per common share in recognition of our overall financial performance for the year.

For the second year in a row, we were named to the list of Best Places to Work in Pennsylvania. Considering this award is a reflection of employee morale, it gives us confidence that employees who are charged with delivering the highest quality customer service experience appear to be highly motivated to do just that.

The year 2014 will present a new host of challenges and the continuation of some old ones. We take great pride in our 2013 results and have great confidence in meeting the challenges of the coming year. I thank you for your continued commitment to Mid Penn Bank as we work to further improve our performance and continue on our path to success.

Rory G. Ritrievi

ITEM 1. BUSINESS

The disclosures set forth in this Item are qualified by the section captioned "Special Cautionary Notice Regarding Forward-Looking Statements" contained in Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this report and other cautionary statements set forth elsewhere in this report.

Mid Penn Bancorp, Inc.

Mid Penn Bancorp, Inc. is a one-bank holding company, incorporated in the Commonwealth of Pennsylvania in August 1991. Mid Penn Bancorp, Inc. and its wholly owned subsidiaries are collectively referred to herein as "Mid Penn" or the "Corporation." On December 31, 1991, Mid Penn acquired, as part of the holding company formation, all of the outstanding common stock of Mid Penn Bank, and the Bank became a wholly owned subsidiary of Mid Penn. Mid Penn's other wholly owned subsidiary is Mid Penn Insurance Services, LLC. Mid Penn's primary business is to supervise and coordinate the business of its subsidiaries and to provide them with capital and resources.

Mid Penn Insurance Services, LLC is a wholly-owned subsidiary of Mid Penn Bank that provides a wide range of personal and commercial insurance products.

Mid Penn's consolidated financial condition and results of operations consist almost entirely of that of Mid Penn Bank, which is managed as a single business segment. At December 31, 2013, Mid Penn had total consolidated assets of $713,125,000, total deposits of $608,130,000, and total shareholders' equity of $52,916,000.

As of December 31, 2013, Mid Penn Bancorp, Inc. did not own or lease any properties. Mid Penn Bank owns or leases the banking offices as identified in Part I, Item 2.

All Mid Penn employees are employed by Mid Penn Bank. At December 31, 2013, the Bank had 178 full-time and 20 part-time employees. The Bank and its employees are not subject to a collective bargaining agreement, and the Bank believes it enjoys good relations with its personnel.

Mid Penn Bank

Millersburg Bank, the predecessor to Mid Penn Bank (the "Bank"), was organized in 1868, and became a state chartered bank in 1931, obtaining trust powers in 1935, at which time its name was changed to Millersburg Trust Company. In 1971, Millersburg Trust Company adopted the name "Mid Penn Bank." The Pennsylvania Department of Banking and Securities and the Federal Deposit Insurance Corporation supervise the Bank. Mid Penn's and the Bank's legal headquarters are located at 349 Union Street, Millersburg, Pennsylvania 17061. The Bank presently has 14 offices located in Dauphin, Northumberland, Schuylkill, and Cumberland Counties, Pennsylvania.

Mid Penn's primary business consists of attracting deposits and loans from its network of community banking offices operated by the Bank. The Bank engages in full-service commercial banking and trust business, making available to the community a wide range of financial services, including, but not limited to, installment loans, personal loans, mortgage and home equity loans, secured and unsecured commercial and consumer loans, lines of credit, construction financing, farm loans, community development and local government loans and various types of time and demand deposits. Deposits of the Bank are insured by the Deposit Insurance Fund of the FDIC to the maximum extent provided by law. In addition, the Bank provides a full range of trust and retail investment services. The Bank also offers other services such as Internet banking, telephone banking, cash management services, automated teller services and safe deposit boxes.

Business Strategy

The Bank engages in a full-service commercial banking and trust business, making available to the community a wide range of financial services. These services are provided to small and middle-market businesses, high net worth individuals, and retail consumers through 14 full service banking facilities. Mid Penn's market currently, and historically, has lower unemployment than the U.S. as a whole. This is due in part to a diversified manufacturing and services base and the presence of state government offices, which help shield the local area from national trends. At December 31, 2013, the unadjusted unemployment rate for the Harrisburg/Carlisle area was 5.3% versus the seasonally adjusted national unemployment rate of 6.7%

The Bank seeks to develop long-term customer relationships, maintain high quality service and provide quick responses to customer needs. Mid Penn believes that an emphasis on local relationship building and its conservative approach to lending are important factors in the success and growth of Mid Penn.

The Bank seeks credit opportunities of good quality within its target market that exhibit positive historical trends, stable cash flows and secondary sources of repayment from tangible collateral. The Bank extends credit for the purpose of obtaining and continuing long-term

relationships. Lenders are provided with detailed underwriting policies for all types of credit risks accepted by the Bank and must obtain appropriate approvals for credit extensions in excess of conservatively assigned lending limits. The Bank also maintains strict documentation requirements and extensive credit quality assurance practices in order to identify credit portfolio weaknesses as early as possible so any exposures that are discovered might be reduced.

Lending Activities

The Bank offers a variety of loan products to its customers, including loans secured by real estate, commercial and consumer loans. The Bank's lending objectives are as follows:

- to establish a diversified commercial loan portfolio; and
- to provide a satisfactory return to Mid Penn's shareholders by properly pricing loans to include the cost of funds, administrative costs, bad debts, local economic conditions, competition, customer relationships, the term of the loan, credit risk, collateral quality and a reasonable profit margin.

Credit risk is managed through portfolio diversification, underwriting policies and procedures and loan monitoring practices. The Bank generally secures its loans with real estate with such collateral values dependent and subject to change based on real estate market conditions within its market area. As of December 31, 2013, the Bank's highest concentration of credit is in Commercial Real Estate. Most of the Bank's business activity with customers is located in Central Pennsylvania, specifically in Dauphin, lower Northumberland, western Schuylkill, and eastern Cumberland Counties.

Investment Activities

Mid Penn's investment portfolio is used to improve earnings through investments of funds in higher-yielding assets than overnight funding alternatives, while maintaining asset quality, which provides the necessary balance sheet liquidity for Mid Penn. Mid Penn does not have any significant concentrations within investment securities.

Mid Penn's entire portfolio of investment securities is considered available for sale. As such, the investments are recorded on the balance sheet at fair value. Mid Penn's investments include US Treasury, agency and municipal securities that derive fair values relative to investments of the same type with similar maturity dates. As the interest rate environment changes, Mid Penn's fair value of existing securities will change. This difference in value, or unrealized loss, amounted to $1,132,000, as of December 31, 2013. A majority of the investments are high quality United States and municipal securities that, if held to maturity, are expected to result in no loss to the Bank.

For additional information with respect to Mid Penn's business activities, see Part II, Item 7 of this report, which is incorporated herein by reference.

Sources of Funds

The Bank primarily uses deposits and borrowings to finance lending and investment activities. Borrowing sources include advances from the Federal Home Loan Bank of Pittsburgh and overnight borrowings from the Bank's customers and correspondent banks. All borrowings, except for lines of credit with the Bank's correspondent banks, require collateral in the form of loans or securities. Collateral levels, therefore, limit borrowings and the available lines of credit extended by the Bank's creditors. As a result, deposits remain critical to the future funding and growth of the business. Deposit growth within the banking industry has been subject to strong competition from a variety of financial services companies. This competition may require financial institutions to adjust their product offerings and pricing to adequately grow deposits.

Competition

The banking business is highly competitive, and the profitability of Mid Penn depends principally upon the Bank's ability to compete in its market area. The Bank actively competes with other financial services companies for deposit, loan, and trust business. Competitors include other commercial banks, credit unions, savings banks, savings and loan associations, insurance companies, securities brokerage firms, finance companies, mutual funds, and service alternatives via the Internet. Financial institutions compete primarily on the quality of services rendered, interest rates on loans and deposits, service charges, the convenience of banking facilities, location and hours of operation and, in the case of loans to larger commercial borrowers, relative lending limits.

Many competitors are significantly larger than the Bank and have significantly greater financial resources, personnel and locations from which to conduct business. In addition, the Bank is subject to banking regulations while certain competitors may not be. There are relatively few barriers for companies wanting to enter into the financial services industry. For more information, see the "Supervision and Regulation" section below.

Mid Penn has been able to compete effectively with other financial institutions by emphasizing customer service. Mid Penn's customer service model is based on convenient hours, efficient and friendly employees, local decision making, and quality products. The Gramm-Leach-Bliley

Act (see discussion below), which breaks down many barriers between the banking, securities and insurance industries, may significantly affect the competitive environment in which Mid Penn operates.

The flow of cash into mutual funds, much of which is made through tax deferred investment vehicles such as 401(k) plans, and a generally strong economy, have, until recently, fueled high returns for these investments, in particular, certain equity funds. The recent economic turmoil has negatively impacted the returns on many of these investments and impacted the manner in which investors distribute their funds across investment alternatives. The safety of traditional bank products has again become an attractive option during this period of market volatility. Mid Penn's ability to attract funds in the future will be impacted by the public's appetite for the safety of insured or local investments versus the returns offered by alternative choices as part of their personal investment mix.

Supervision and Regulation

General

Bank holding companies and banks are extensively regulated under both Federal and state laws. The regulation and supervision of Mid Penn and the Bank are designed primarily for the protection of depositors, the Deposit Insurance Fund, and the monetary system, and not Mid Penn or its shareholders. Enforcement actions may include the imposition of a conservator or receiver, cease-and-desist orders and written agreements, the termination of insurance on deposits, the imposition of civil money penalties, and removal and prohibition orders. If a banking regulator takes any enforcement action, the value of an equity investment in Mid Penn could be substantially reduced or eliminated.

Federal and state banking laws contain numerous provisions affecting various aspects of the business and operations of Mid Penn and the Bank. Mid Penn is subject to, among others, the regulations of the Securities and Exchange Commission and the Federal Reserve Board, and the Bank is subject to, among others, the regulations of the Pennsylvania Department of Banking and Securities and the Federal Deposit Insurance Corporation ("FDIC"). The following descriptions of and references to applicable statutes and regulations are not intended to be complete descriptions of these provisions or their effects on Mid Penn or the Bank. They are summaries only and are qualified in their entirety by reference to such statutes and regulations.

Holding Company Regulation

Mid Penn is a registered bank holding company subject to supervision and regulation by the Board of Governors of the Federal Reserve System (the "Federal Reserve"). As such, it is subject to the Bank Holding Company Act of 1956 ("BHCA") and many of the Federal Reserve's regulations promulgated thereunder. The Federal Reserve has broad enforcement powers over bank holding companies, including the power to impose substantial fines and civil penalties.

The BHCA requires Mid Penn to file an annual report with the Federal Reserve regarding the holding company and its subsidiary bank. The Federal Reserve Board also makes examinations of the holding company. The Bank is not a member of the Federal Reserve System; however, the Federal Reserve possesses cease-and-desist powers over bank holding companies and their subsidiaries where their actions would constitute an unsafe or unsound practice or violation of law. The Federal Reserve Board also makes policy that guides the declaration and distribution of dividends by bank holding companies.

The BHCA restricts a bank holding company's ability to acquire control of additional banks. In addition, the BHCA restricts the activities in which bank holding companies may engage directly or through non-bank subsidiaries.

Gramm-Leach-Bliley Financial Modernization Act

The Gramm-Leach-Bliley Act ("GLB") became effective on March 11, 2000. The primary purpose of GLB was to eliminate barriers between investment banking and commercial banking and to permit, within certain limitations, the affiliation of financial service providers. Generally, GLB:

- repealed the historical restrictions against, and eliminated many federal and state law barriers to affiliations among banks, securities firms, insurance companies and other financial service providers;
- provided a uniform framework for the activities of banks, savings institutions and their holding companies;
- broadened the activities that may be conducted by and through national banks and other banking subsidiaries of bank holding companies;
- provided an enhanced framework for protecting the privacy of consumers' information;
- adopted a number of provisions related to the capitalization, membership, corporate governance and other measures designed to modernize the Federal Home Loan Bank System;
- modified the laws governing the implementation of the Community Reinvestment Act; and
- addressed a variety of other legal and regulatory issues affecting both day-to-day operations and long-term activities of financial institutions.

More specifically, under GLB, bank holding companies, such as Mid Penn, that meet certain management, capital, and Community Reinvestment Act standards, are permitted to become financial holding companies and, by doing so, to affiliate with securities firms and insurance companies and to engage in other activities that are financial in nature, incidental to such financial activities, or complementary to such activities. A bank holding company may become a financial holding company if each of its subsidiary banks is well capitalized under the FDIC Improvement Act's prompt corrective action provisions, is well managed and has at least a satisfactory rating under the Community Reinvestment Act. The required filing is a declaration that the bank holding company wishes to become a financial holding company and meets all applicable requirements. Mid Penn has not elected to become a financial holding company at this time.

No prior regulatory approval will be required for a financial holding company to acquire a company, other than a bank or savings association, engaged in activities permitted under GLB. Activities cited by GLB as being financial in nature include:

- securities underwriting, dealing and market making;
- sponsoring mutual funds and investment companies;
- insurance underwriting and agency;
- merchant banking activities; and
- activities that the Federal Reserve has determined to be closely related to banking.

In addition to permitting financial services providers to enter into new lines of business, the law allows firms the freedom to streamline existing operations and to potentially reduce costs. The Act may increase both opportunity as well as competition. Many community banks are less able to devote the capital and management resources needed to facilitate broad expansion of financial services including insurance and brokerage services.

Corporate Governance

On July 30, 2002, the Sarbanes-Oxley Act of 2002 was enacted. The Sarbanes-Oxley Act represents a comprehensive revision of laws affecting corporate governance, auditor independence and accounting standards, executive compensation, insider loans, whistleblower protection, and enhanced and timely disclosure of corporate information. The Sarbanes-Oxley Act is applicable to all companies with equity securities registered or that file reports under the Securities Exchange Act of 1934. In particular, the Sarbanes-Oxley Act established:

- new requirements for audit committees, including independence, expertise and responsibilities;
- additional responsibilities regarding financial statements for the Chief Executive Officer and Chief Financial Officer of the reporting company;
- new standards for auditors and regulation of audits;
- increased disclosure and reporting obligations for the reporting company and its directors and executive officers; and
- new and increased civil and criminal penalties for violations of the securities laws.

The SEC and NASDAQ have adopted numerous rules implementing the provisions of the Sarbanes-Oxley Act that affect Mid Penn. The changes are intended to allow shareholders to monitor more effectively the performance of companies and management.

Bank Regulation

The Bank, a Pennsylvania-chartered institution, is subject to supervision, regulation and examination by the Pennsylvania Department of Banking and Securities and the FDIC. The deposits of the Bank are insured by the FDIC to the extent provided by law. The FDIC assesses deposit insurance premiums the amount of which may, in the future, depend in part on the condition of the Bank. Moreover, the FDIC may terminate deposit insurance of the Bank under certain circumstances. The Bank regulatory agencies have broad enforcement powers over depository institutions under their jurisdiction, including the power to terminate deposit insurance, to impose fines and other civil and criminal penalties, and to appoint a conservator or receiver if any of a number of conditions is met. In addition, the Bank is subject to a variety of local, state and federal laws that affect its operations.

Banking regulations include, but are not limited to, permissible types and amounts of loans, investments and other activities, capital adequacy, branching, interest rates on loans and the safety and soundness of banking practices.

Capital Requirements

Under risk-based capital requirements for bank holding companies, Mid Penn is required to maintain a minimum ratio of total capital to risk-weighted assets (including certain off-balance-sheet activities, such as standby letters of credit) of eight percent. At least half of the total capital is to be composed of common equity, retained earnings and qualifying perpetual preferred stock, less goodwill ("Tier 1 Capital" and together with Tier 2 Capital, Total Capital"). The remainder may consist of subordinated debt, non-qualifying preferred stock and a limited amount of the loan loss allowance ("Tier 2 Capital").

In addition, the Federal Reserve Board has established minimum leverage ratio requirements for bank holding companies. These requirements provide for a minimum leverage ratio of Tier 1 Capital to adjusted average quarterly assets ("leverage ratio") equal to 3% for bank holding companies that meet certain specified criteria, including having the highest regulatory rating. All other bank holding companies will generally be required to maintain a leverage ratio of at least 4-5%. The requirements also provide that bank holding companies experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Furthermore, the requirements indicate that the Federal Reserve Board will continue to consider a "Tangible Tier 1 Leverage Ratio" (deducting all intangibles) in evaluating proposals for expansion or new activity. The Federal Reserve Board has not advised Mid Penn of any specific minimum Tier 1 leverage ratio.

The Bank is subject to similar capital requirements adopted by the FDIC. The FDIC has not advised the Bank of any specific minimum leverage ratios.

The capital ratios of Mid Penn and the Bank are described in Note 17 to Mid Penn's Consolidated Financial Statements, which are incorporated herein by reference.

Banking regulators continue to indicate their desire to further develop capital requirements applicable to banking organizations. Changes to capital requirements could materially affect the profitability of Mid Penn or the fair value of Mid Penn stock.

Regulatory Capital Changes

In July 2013, the federal banking agencies issued final rules to implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. The phase-in period for community banking organizations begins January 1, 2015, while larger institutions (generally those with assets of $250 billion or more) must begin compliance on January 1, 2014. The final rules call for the following capital requirements:

- A minimum ratio of common tier 1 capital to risk-weighted assets of 4.5%.
- A minimum ratio of tier 1 capital to risk-weighted assets of 6%.
- A minimum ratio of total capital to risk-weighted assets of 8% (no change from the current rule).
- A minimum leverage ratio of 4%.

In addition, the final rules establishes a common equity tier 1 capital conservation buffer of 2.5% of risk-weighted assets applicable to all banking organizations. If a banking organization fails to hold capital above the minimum capital ratios and the capital conservation buffer, it will be subject to certain restrictions on capital distributions and discretionary bonus payments. The phase-in period for the capital conservation and countercyclical capital buffers for all banking organizations will begin on January 1, 2016.

Under the proposed rules, accumulated other comprehensive income (AOCI) would have been included in a banking organization's common equity tier 1 capital. The final rules allow community banks to make a one-time election not to include these additional components of AOCI in regulatory capital and instead use the existing treatment under the general risk-based capital rules that excludes most AOCI components from regulatory capital. The opt-out election must be made in the first call report or FR Y-9 series report that is filed after the financial institution becomes subject to the final rule.

The final rules permanently grandfather non-qualifying capital instruments (such as trust preferred securities and cumulative perpetual preferred stock) issued before May 19, 2010 for inclusion in the tier 1 capital of banking organizations with total consolidated assets less than $15 billion as of December 31, 2009 and banking organizations that were mutual holding companies as of May 19, 2010.

The proposed rules would have modified the risk-weight framework applicable to residential mortgage exposures to require banking organizations to divide residential mortgage exposures into two categories in order to determine the applicable risk weight. In response to commenter concerns about the burden of calculating the risk weights and the potential negative effect on credit availability, the final rules do not adopt the proposed risk weights but retain the current risk weights for mortgage exposures under the general risk-based capital rules.

Consistent with the Dodd-Frank Act, the new rules replace the ratings-based approach to securitization exposures, which is based on external credit ratings, with the simplified supervisory formula approach in order to determine the appropriate risk weights for these exposures. Alternatively, banking organizations may use the existing gross-ups approach to assign securitization exposures to a risk weight category or choose to assign such exposures a 1,250% risk weight.

Under the new rules, mortgage servicing assts (MSAs) and certain deferred tax assets (DTAs) are subject to stricter limitations than those applicable under the current general risk-based capital rule. The new rules also increase the risk weights for past-due loans, certain risk weights and credit conversion factors.

Mid Penn is in the process of assessing the impact of these changes on the regulatory ratios of Mid Penn and Mid Penn Bank on the capital, operations, liquidity and earnings of Mid Penn and Mid Penn Bank.

FDIC Improvement Act

As a result of the FDIC Improvement Act of 1991, banks are subject to increased reporting requirements and more frequent examinations by the bank regulatory agencies. The agencies also have the authority to dictate certain key decisions that formerly were left to management, including compensation standards, loan underwriting standards, asset growth, and payment of dividends. Failure to comply with these standards, or failure to maintain capital above specified levels set by the regulators, could lead to the imposition of penalties or the forced resignation of management. If a bank becomes critically undercapitalized, the banking agencies have the authority to place an institution into receivership.

Safety and Soundness Standards

Pursuant to FDICIA, the federal banking regulatory agencies have adopted a set of guidelines prescribing safety and soundness standards for depository institutions such as the Bank. The guidelines establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, asset quality, earnings and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risks and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal shareholder. In addition, the agencies adopted regulations that authorize an agency to order an institution that has been given notice by an agency that it is not satisfying any of such safety and soundness standards to submit a compliance plan. If the institution fails to submit an acceptable compliance plan or fails to implement an accepted plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions be taken, including restricting asset growth, restricting interest rates paid on deposits, and requiring an increase in the institution's ratio of tangible equity to assets.

Payment of Dividends and Other Restrictions

Mid Penn is a legal entity separate and distinct from its subsidiary, the Bank. There are various legal and regulatory limitations on the extent to which the Bank can, among other things, finance, or otherwise supply funds to, Mid Penn. Specifically, dividends from the Bank are the principal source of Mid Penn's cash funds and there are certain legal restrictions under Pennsylvania law and Pennsylvania banking regulations on the payment of dividends by state-chartered banks. The relevant regulatory agencies also have authority to prohibit Mid Penn and the Bank from engaging in what, in the opinion of such regulatory body, constitutes an unsafe or unsound banking practice. The payment of dividends could, depending upon the financial condition of Mid Penn and the Bank, be deemed to constitute such an unsafe or unsound practice.

Prompt Corrective Action

In addition to the required minimum capital levels described above, federal law establishes a system of "prompt corrective actions" which Federal banking agencies are required to take, and certain actions which they have discretion to take, based upon the capital category into which a federally regulated depository institution falls. Regulations set forth detailed procedures and criteria for implementing prompt corrective action in the case of any institution, which is not adequately capitalized. Under the rules, an institution will be deemed to be "adequately capitalized" if it exceeds the minimum Federal regulatory capital requirements. However, it will be deemed "undercapitalized" if it fails to meet the minimum capital requirements, "significantly undercapitalized" if it has a total risk-based capital ratio that is less than 6.0%, a Tier 1 risk-based capital ratio that is less than 3.0%, or a leverage ratio that is less than 3.0%, and "critically undercapitalized" if the institution has a ratio of tangible equity to total assets that is equal to or less than 2.0%.

The prompt corrective action rules require an undercapitalized institution to file a written capital restoration plan, along with a performance guaranty by its holding company or a third party. In addition, an undercapitalized institution becomes subject to certain automatic restrictions including a prohibition on payment of dividends, a limitation on asset growth and expansion, in certain cases, a limitation on the payment of bonuses or raises to senior executive officers, and a prohibition on the payment of certain "management fees" to any "controlling person". Institutions that are classified as undercapitalized are also subject to certain additional supervisory actions, including increased reporting burdens and regulatory monitoring, a limitation on the institution's ability to make acquisitions, open new branch offices, or engage in new lines of business, obligations to raise additional capital, restrictions on transactions with affiliates, and restrictions on interest rates paid by the institution on deposits. In certain cases, bank regulatory agencies may require replacement of senior executive officers or directors, or sale of the institution to a willing purchaser. If an institution is deemed "critically undercapitalized" and continues in that category for four quarters, the statute requires, with certain narrowly limited exceptions, that the institution be placed in receivership.

Deposit Insurance

The FDIC insures deposits of the Bank through the Deposit Insurance Fund ("DIF"). The FDIC maintains the DIF by assessing depository institutions an insurance premium. The amount each institution is assessed is based upon a variety of factors that include the balance of insured deposits as well as the degree of risk the institution poses to the insurance fund. The FDIC insures deposits up to $250,000. The Bank pays an insurance premium into the DIF based on the quarterly average daily deposit liabilities net of certain exclusions. The FDIC uses a risk-based premium system that assesses higher rates on those institutions that pose greater risks to the DIF. The FDIC places each institution in one of four risk categories using a two-step process based first on capital ratios (the capital group assignment) and then on other relevant information (the supervisory group assignment). Subsequently, the rate for each institution within a risk category may be adjusted depending upon different

factors that either enhance or reduce the risk the institution poses to the DIF, including the unsecured debt, secured liabilities and brokered deposits related to each institution. Finally, certain risk multipliers may be applied to the adjusted assessment. In 2009, the FDIC increased the amount assessed from financial institutions by increasing its risk-based deposit insurance assessment scale. The quarterly annualized assessment scale for 2009 ranged from twelve basis points of assessable deposits for the strongest institutions to 77.5 basis points for the weakest.

On November 12, 2009, the FDIC approved a rule to require insured institutions to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011, and 2012. An insured institution's risk-based deposit insurance assessments will continue to be calculated on a quarterly basis, but will be paid from the amount the institution prepaid until the later of the date that amount is exhausted or June 30, 2013, at which point any remaining funds would be returned to the insured institution. Consequently, Mid Penn's prepayment of DIF premiums made in December 2009 resulted in a prepaid asset of $2,719,000 at December 31, 2009. At December 31, 2010, 2011, and 2012 the prepaid asset was $1,878,000, $871,000, and $12,000, respectively. At December 31, 2013, the prepaid asset was $0.

Beginning with the second quarter of 2011, as mandated by the recently enacted Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), the assessment base that the FDIC will use to calculate assessment premiums will be a bank's average assets minus average tangible equity. As the asset base of the banking industry is larger than the deposit base, the range of assessment rates will change to a low of 2.5 basis points through a high of 45 basis points, per $100 of assets; however, the dollar amount of total actual premiums is expected to be roughly the same.

The FDIC is required under the Dodd-Frank Act to establish assessment rates that will allow the Deposit Insurance Fund to achieve a reserve ratio of 1.35% of Insurance Fund insured deposits by September 2020. In addition, the FDIC has established a "designated reserve ratio" of 2.0%, a target ratio that, until it is achieved, will not likely result in the FDIC reducing assessment rates. In attempting to achieve the mandated 1.35% ratio, the FDIC is required to implement assessment formulas that charge banks over $10 billion in asset size more than banks under that size. Those new formulas began in the second quarter of 2011, but did not affect the Bank. Under the Dodd-Frank Act, the FDIC is authorized to make reimbursements from the insurance fund to banks if the reserve ratio exceeds 1.50%, but the FDIC has adopted the "designated reserve ratio" of 2.0% and has announced that any reimbursements from the fund are indefinitely suspended.

Environmental Laws

Management does not anticipate that compliance with environmental laws and regulations will have any material effect on Mid Penn's capital, expenditures, earnings, or competitive position. However, environmentally related hazards have become a source of high risk and potentially unlimited liability for financial institutions.

In 1995, the Pennsylvania General Assembly enacted the Economic Development Agency, Fiduciary and Lender Environmental Liability Protection Act, which among other things, provides protection to lenders from environmental liability and remediation costs under the environmental laws for releases and contamination caused by others. A lender who engages in activities involved in the routine practices of commercial lending, including, but not limited to, the providing of financial services, holding of security interests, workout practices, foreclosure or the recovery of funds from the sale of property shall not be liable under the environmental acts or common law equivalents to the Pennsylvania Department of Environmental Resources or to any other person by virtue of the fact that the lender engages in such commercial lending practice. A lender, however, will be liable if it, its employees or agents, directly cause an immediate release or directly exacerbate a release of regulated substance on or from the property, or known and willfully compelled the borrower to commit an action which caused such release or violate an environmental act. The Economic Development Agency, Fiduciary and Lender Environmental Liability Protection Act does not limit federal liability which still exists under certain circumstances.

Consumer Protection Laws

A number of laws govern the relationship between the Bank and its customers. For example, the Community Reinvestment Act is designed to encourage lending by banks to persons in low and moderate income areas. The Home Mortgage Disclosure Act and the Equal Credit Opportunity Act attempt to minimize lending decisions based on impermissible criteria, such as race or gender. The Truth-in-Lending Act and the Truth-in-Savings Act require banks to provide certain disclosure of relevant terms related to loans and savings accounts, respectively. Anti-tying restrictions (which prohibit conditioning the availability or terms of credit on the purchase of another banking product) further restrict the Bank's relationships with its customers.

Privacy Laws

In 2000, the federal banking regulators issued final regulations implementing certain provisions of GLB governing the privacy of consumer financial information. The regulations limit the disclosure by financial institutions, such as Mid Penn and the Bank, of nonpublic personal information about individuals who obtain financial products or services for personal, family, or household purposes. Subject to certain exceptions allowed by law, the regulations cover information sharing between financial institutions and nonaffiliated third parties. More specifically, the regulations require financial institutions to:

- provide initial notices to customers about their privacy policies, describing the conditions under which they may disclose nonpublic personal financial information to nonaffiliated third parties and affiliates;
- provide annual notices of their privacy policies to their current customers; and
- provide a reasonable method for consumers to "opt out" of disclosures to nonaffiliated third parties.

Protection of Customer Information

In 2001, the federal banking regulators issued final regulations implementing the provisions of GLB relating to the protection of customer information. The regulations, applicable to Mid Penn and the Bank, relate to administrative, technical, and physical safeguards for customer records and information. These safeguards are intended to:

- insure the security and confidentiality of customer records and information;
- protect against any anticipated threats or hazards to the security or integrity of such records; and
- protect against unauthorized access to or use of such records or information that could result in substantial harm or inconvenience to any customer.

Affiliate Transactions

Transactions between Mid Penn and the Bank and its affiliates are governed by Sections 23A and 23B of the Federal Reserve Act. An "affiliate" of a bank or savings institution is any company or entity that controls, is controlled by, or is under common control with the bank or savings institution. Generally, a subsidiary of a depository institution that is not also a depository institution is not treated as an affiliate of the bank for purposes of Sections 23A and 23B. Sections 23A and 23B are intended to protect insured depository institutions from suffering losses arising from transactions with non-insured affiliates, by limiting the extent to which a bank or its subsidiaries may engage in covered transactions with any one affiliate and with all affiliates of the bank in the aggregate, and requiring that such transactions be on terms that are consistent with safe and sound banking practices.

Effective April 1, 2003, Regulation W of the Federal Reserve comprehensively amended Sections 23A and 23B. The regulation unifies and updates staff interpretations issued over the years, incorporates several new interpretative proposals (such as to clarify when transactions with an unrelated third party will be attributed to an affiliate), and addresses new issues arising as a result of the expanded scope of non-banking activities engaged in by bank and bank holding companies in recent years and authorized for financial holding companies under the GLB.

The USA Patriot Act

In 2001, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA Patriot Act) was signed into law. The USA Patriot Act broadened the application of anti-money laundering regulations to apply to additional types of financial institutions, such as broker-dealers, and strengthened the ability of the U.S. government to detect and prosecute international money laundering and the financing of terrorism. The principal provisions of Title III of the USA Patriot Act require that regulated financial institutions, including state-chartered banks:

- establish an anti-money laundering program that includes training and audit components;
- comply with regulations regarding the verification of the identity of any person seeking to open an account;
- take additional required precautions with non-U.S. owned accounts; and
- perform certain verification and certification of money laundering risk for their foreign correspondent banking relationships.

The USA Patriot Act also expanded the conditions under which funds in a U.S. interbank account may be subject to forfeiture and increased the penalties for violation of anti-money laundering regulations. Failure of a financial institution to comply with the USA Patriot Act's requirements could have serious legal and reputational consequences for the institution. The Bank has adopted policies, procedures and controls to address compliance with the requirements of the USA Patriot Act under the existing regulations and will continue to revise and update its policies, procedures and controls to reflect changes required by the USA Patriot Act and implementing regulations.

Anti-Money Laundering and Anti-Terrorism Financing

Under Title III of the USA PATRIOT Act, also known as the International Money Laundering Abatement and Anti-Terrorism Financing Act of 2001, all financial institutions, including Mid Penn and the Bank, are required in general to identify their customers, adopt formal and comprehensive anti-money laundering programs, scrutinize or prohibit altogether certain transactions of special concern, and be prepared to respond to inquiries from U.S. law enforcement agencies concerning their customers and their transactions. Additional information-sharing among financial institutions, regulators, and law enforcement authorities is encouraged by the presence of an exemption from the privacy provisions of the GLB Act for financial institutions that comply with this provision and the authorization of the Secretary of the Treasury to adopt rules to further encourage cooperation and information-sharing. The effectiveness of a financial institution in combating money-laundering activities is a factor to be considered in any application submitted by the financial institution under the Bank Merger Act, which applies to the Bank.

JOBS Act

In 2012, the Jumpstart Our Business Startups Act (the "JOBS Act") became law. The JOBS Act is aimed at facilitating capital raising by smaller companies and banks and bank holding companies by implementing the following changes:

- raising the threshold requiring registration under the Securities Exchange Act of 1934 (the "Exchange Act") for banks and bank holdings companies from 500 to 2,000 holders of record;
- raising the threshold for triggering deregistration under the Exchange Act for banks and bank holding companies from 300 to 1,200 holders of record;
- raising the limit for Regulation A offerings from $5 million to $50 million per year and exempting some Regulation A offerings from state blue sky laws;
- permitting advertising and general solicitation in Rule 506 and Rule 144A offerings;
- allowing private companies to use "crowdfunding" to raise up to $1 million in any 12-month period, subject to certain conditions; and
- creating a new category of issuer, called an "Emerging Growth Company," for companies with less than $1 billion in annual gross revenue, which will benefit from certain changes that reduce the cost and burden of carrying out an equity IPO and complying with public company reporting obligations for up to five years.

While the JOBS Act is not expected to have any immediate application to the Corporation, management will continue to monitor the implementation rules for potential effects which might benefit the Corporation.

Dodd-Frank Act

The Dodd-Frank Act, which became law in July 2010, significantly changes regulation of financial institutions and the financial services industry, including: creating a Financial Services Oversight Council to identify emerging systemic risks and improve interagency cooperation; centralizing responsibility for consumer financial protection by creating a new agency, the Consumer Financial Protection Bureau, which will be responsible for implementing, examining and enforcing compliance with federal consumer financial laws; permanently raising the current standard maximum deposit insurance amount to $250,000; establishing strengthened capital standards for banks, and disallowing certain trust preferred securities from qualifying as Tier 1 capital (subject to certain grandfather provisions for existing trust preferred securities); establishing new minimum mortgage underwriting standards; granting the Federal Reserve Board the power to regulate debit card interchange fees; and implementing corporate governance changes. Many aspects of the Dodd-Frank Act are subject to rulemaking that will take effect over several years, thus making it difficult to assess the impact of the statute on the financial industry, including Mid Penn, at this time.

It is difficult to predict at this time the specific impact the Dodd-Frank Act and the yet to be written implementing rules and regulations will have on community banks. Given the uncertainty associated with the manner in which the provisions of the Dodd-Frank Act will be implemented by the various regulatory agencies and through regulations, the full extent of the impact such requirements will have on financial institutions' operations is presently unclear. The changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage ratio requirements or otherwise adversely affect our business. These changes may also require us to invest significant management attention and resources to evaluate and make necessary changes in order to comply with new statutory and regulatory requirements.

Effects of Government Policy and Potential Changes in Regulation

Changes in regulations applicable to Mid Penn or the Bank, or shifts in monetary or other government policies, could have a material effect on our business. Mid Penn's and the Bank's business is also affected by the state of the financial services industry in general. As a result of legal and industry changes, management believes that the industry will continue to experience an increased rate of change as the financial services industry strives for greater product offerings, market share and economies of scale.

From time to time, legislation is enacted that has the effect of increasing the cost of doing business, limiting or expanding permissible activities or affecting the competitive balance between banks and other financial institutions. Proposals to change the laws and regulations governing the

operations and taxation of banks, bank holding companies and other financial institutions are frequently made in Congress, and before various bank regulatory agencies. Mid Penn cannot predict the likelihood of any major changes or the impact such changes might have on Mid Penn and/or the Bank. Various congressional bills and other proposals have proposed a sweeping overhaul of the banking system, including provisions for: limitations on deposit insurance coverage; changing the timing and method financial institutions use to pay for deposit insurance; expanding the power of banks by removing the restrictions on bank underwriting activities; and tightening the regulation of bank derivatives activities; and allowing commercial enterprises to own banks.

Mid Penn's earnings are, and will be affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. The monetary policies of the Federal Reserve have had, and will likely continue to have, an impact on the operating results of commercial banks because of the Federal Reserve's power to implement national monetary policy to, among other things, curb inflation or combat recession. The Federal Reserve has a major impact on the levels of bank loans, investments and deposits through its open market operations in United States government securities and through its regulation of, among other things, the discount rate on borrowings of member banks and the reserve requirements against member bank deposits. It is not possible to predict the nature and impact of future changes in monetary and fiscal policies.

From time to time, various types of federal and state legislation have been proposed that could result in additional regulation of, and restrictions on, the business of Mid Penn and the Bank. As a consequence of the extensive regulation of commercial banking activities in the United States, the Bank's business is particularly susceptible to being affected by federal legislation and regulations that may increase the costs of doing business. Congress is currently debating major legislation that may fundamentally change the regulatory oversight of banking institutions in the United States. Whether any legislation will be enacted or additional regulations will be adopted, and how they might impact Mid Penn cannot be determined at this time.

Available Information

Mid Penn's common stock is registered under Section 12(b) of the Securities Exchange Act of 1934 and is traded on the NASDAQ Stock Market under the trading symbol MPB. Mid Penn is subject to the informational requirements of the Exchange Act, and, accordingly, files reports, proxy statements and other information with the Securities and Exchange Commission. The reports, proxy statements and other information filed with the SEC are available for inspection and copying at the SEC's Public Reference Room at 100 F Street, NE, Room 1580, Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Mid Penn is an electronic filer with the SEC. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The SEC's Internet site address is www.sec.gov.

Mid Penn's headquarters are located at 349 Union Street, Millersburg, Pennsylvania 17061, and its telephone number is 1-866-642-7736. Mid Penn's Internet address is midpennbank.com. Mid Penn makes available through its website, free of charge, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports as soon as reasonably practicable after filing with the Securities and Exchange Commission. Mid Penn has adopted a Code of Ethics that applies to all employees. This document is also available on Mid Penn's website. The information included on our website is not a part of this document.

ITEM 1A. RISK FACTORS

Mid Penn is subject to interest rate risk

Mid Penn's earnings and cash flows are largely dependent upon its net interest income. Net interest income is the difference between interest income earned on interest-earning assets such as loans and securities and interest expense paid on interest-bearing liabilities such as deposits and borrowed funds. Interest rates are highly sensitive to many factors that are beyond Mid Penn's control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System. Changes in monetary policy, including changes in interest rates, could influence not only the interest Mid Penn receives on loans and securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) Mid Penn's ability to originate loans and obtain deposits, (ii) the fair value of Mid Penn's financial assets and liabilities, and (iii) the average duration of Mid Penn's mortgage-backed securities portfolio. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, Mid Penn's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings.

Management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on Mid Penn's results of operations. Any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on Mid Penn's financial condition and results of operations.

Mid Penn is subject to lending risk

As of December 31, 2013, approximately 70.0% of Mid Penn's loan portfolio consisted of commercial and industrial, construction and commercial real estate loans. These types of loans are generally viewed as having more risk of default than residential real estate loans or consumer loans. These types of loans are also typically larger than residential real estate loans and consumer loans. Because Mid Penn's loan portfolio contains a significant number of commercial and industrial, construction and commercial real estate loans with relatively large balances, the deterioration of one or a few of these loans could cause a significant increase in non-performing loans. An increase in non-performing loans could result in a net loss of earnings from these loans, an increase in the provision for possible loan and lease losses and an increase in loan charge-offs, all of which could have a material adverse effect on Mid Penn's financial condition and results of operations.

Mid Penn's allowance for possible loan and lease losses may be insufficient

Mid Penn maintains an allowance for possible loan and lease losses, which is a reserve established through provisions for possible losses charged to expense, that represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan and lease losses and risks inherent in the loan portfolio. The level of the allowance reflects management's continuing evaluation of industry concentrations; specific credit risks; loan loss experience; current loan portfolio quality; present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. The determination of the appropriate level of the allowance for possible loan and lease losses inherently involves a high degree of subjectivity and requires Mid Penn to make significant estimates of current credit risks and future trends, all of which may undergo material changes. Changes in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem credits and other factors, both within and outside of Mid Penn's control, may require an increase in the allowance. In addition, bank regulatory agencies periodically review Mid Penn's allowance for possible loan and lease losses and may require an increase in the provision for possible loan and lease losses or the recognition of further loan charge-offs, based on judgments different than those of management. In addition, if charge-offs in future periods exceed the allowance, Mid Penn may need additional provisions to increase the allowance for possible loan and lease losses. Any increases in the allowance will result in a decrease in net income and, possibly, capital, and may have a material adverse effect on Mid Penn's financial condition and results of operations.

Competition from other financial institutions may adversely affect Mid Penn's profitability

Mid Penn's banking subsidiary faces substantial competition in originating both commercial and consumer loans. This competition comes principally from other banks, credit unions, savings institutions, mortgage banking companies and other lenders. Many of its competitors enjoy advantages, including greater financial resources and higher lending limits, a wider geographic presence, more accessible branch office locations, the ability to offer a wider array of services or more favorable pricing alternatives, as well as lower origination and operating costs. This competition could reduce the Corporation's net income by decreasing the number and size of loans that its banking subsidiary originates and the interest rates it may charge on these loans.

In attracting business and consumer deposits, its banking subsidiary faces substantial competition from other insured depository institutions such as banks, savings institutions and credit unions, as well as institutions offering uninsured investment alternatives, including money market funds. Many of Mid Penn's competitors enjoy advantages, including greater financial resources, more aggressive marketing campaigns, better brand recognition, and more convenient branch locations. These competitors may offer higher interest rates than Mid Penn, which could decrease the deposits that Mid Penn attracts or require Mid Penn to increase its rates to retain existing deposits or attract new deposits. Increased deposit competition could adversely affect Mid Penn's ability to generate the funds necessary for lending operations. As a result, Mid Penn may need to seek other sources of funds that may be more expensive to obtain and could increase its cost of funds.

Mid Penn's banking subsidiary also competes with non-bank providers of financial services, such as brokerage firms, consumer finance companies, credit unions, insurance agencies and governmental organizations, which may offer more favorable terms. Some of its non-bank competitors are not subject to the same extensive regulations that govern its banking operations. As a result, such non-bank competitors may have advantages over Mid Penn's banking subsidiary in providing certain products and services. This competition may reduce or limit Mid Penn's margins on banking services, reduce its market share and adversely affect its earnings and financial condition.

We have 5,000 shares of Series B Preferred Stock outstanding which have preference over the common stock as to dividends and liquidation distributions, among other preferential rights

As of the date hereof, we have issued and outstanding 5,000 shares of 7% Non-Cumulative, Non-Voting, Non-Convertible Perpetual Preferred Stock, Series B, par value $1.00 per share (the "Series B Preferred Stock"). The Series B Preferred Stock affords holders a preference to assets upon liquidation and an annual dividend which rights impact the outstanding shares of common stock. The Preferred Stock's right to annual dividends makes less likely the possibility that we will declare dividends on the common stock. In the event of a liquidation of the Corporation's assets, holders of Series B Preferred Stock will have a right to receive as a liquidation payment any remaining assets of the Corporation prior to any distributions to holders of the common stock and the holders of the Series B Preferred Stock may be able to block actions otherwise approved by the holders of the common stock if such action is adverse to their rights.

The Basel III capital requirements may require us to maintain higher levels of capital, which could reduce our profitability

Basel III targets higher levels of base capital, certain capital buffers and a migration toward common equity as the key source of regulatory capital. Although the new capital requirements are phased in over the next decade and may change substantially before final implementation, Basel III signals a growing effort by domestic and international bank regulatory agencies to require financial institutions, including depository institutions, to maintain higher levels of capital. The direction of the Basel III implementation activities or other regulatory viewpoints could require additional capital to support our business risk profile prior to final implementation of the Basel III standards. If Mid Penn is required to maintain higher levels of capital, Mid Penn may have fewer opportunities to invest capital into interest-earning assets, which could limit the profitable business operations available to Mid Penn and adversely impact our financial condition and results of operations.

Future credit downgrades of the United States Government due to issues relating to debt and the deficit may adversely affect the Mid Penn

As a result of failure of the federal government to reach agreement over federal debt and the ongoing issues connected with the debt ceiling, certain rating agencies placed the United States government's long-term sovereign debt rating on their equivalent of negative watch and announced the possibility of a rating downgrade. The rating agencies, due to constraints related to the rating of the United States, also placed government-sponsored enterprises in which Mid Penn invests and receives lines of credit on negative watch and a downgrade of the United State's credit rating would trigger a similar downgrade in the credit rating of these government sponsored enterprises. Furthermore, the credit rating of other entities, such as state and local governments, may also be downgraded should the United States credit rating be downgraded. The impact that a credit rating downgrade may have on the national and local economy could have an adverse effect on Mid Penn's financial condition and results of operations.

If Mid Penn's information systems are interrupted or sustain a breach in security, those events may negatively affect Mid Penn's financial performance and reputation

In conducting its business, Mid Penn relies heavily on its information systems. Maintaining and protecting those systems is difficult and expensive, as is dealing with any failure, interruption, or breach in security of these systems, whether due to acts or omissions by Mid Penn or by a third party, and whether intentional or not. Any such failure, interruption, or breach could result in failures or disruptions in Mid Penn's customer relationship management, general ledger, deposit, loan and other systems. A breach of Mid Penn's information security may result from fraudulent activity committed against Mid Penn or its clients, resulting in financial loss to Mid Penn or its clients, or privacy breaches against Mid Penn's clients. Such fraudulent activity may consist of check fraud, electronic fraud, wire fraud, "phishing", social engineering or other deceptive acts. The policies, procedures, and technical safeguards put in place by Mid Penn to prevent or limit the effect of any failure, interruption, or security breach of its information systems may be insufficient to prevent or remedy the effects of any such occurrences. The occurrence of any failures, interruptions, or security breaches of Mid Penn's information systems could damage Mid Penn's reputation, cause Mid Penn to incur additional expenses, result in online services or other businesses, subject Mid Penn to regulatory sanctions or additional regular scrutiny, or expose Mid Penn to civil litigation and possible financial liability, any of which could have a material adverse effect on Mid Penn's financial condition and results of operations.

Mid Penn's controls and procedures may fail or be circumvented

Management periodically reviews and updates Mid Penn's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of Mid Penn's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on Mid Penn's business, results of operations, and financial condition.

Mid Penn's ability to pay dividends depends primarily on dividends from its banking subsidiary, which is subject to regulatory limits

Mid Penn is a bank holding company and its operations are conducted by its subsidiaries. Its ability to pay dividends depends on its receipt of dividends from its subsidiaries. Dividend payments from its banking subsidiary are subject to legal and regulatory limitations, generally based on net profits, and retained earnings, imposed by the various banking regulatory agencies. The ability of Mid Penn's subsidiaries to pay dividends is also subject to their profitability, financial condition, capital expenditures and other cash flow requirements. There is no assurance that Mid Penn's subsidiaries will be able to pay dividends in the future or that Mid Penn will generate adequate cash flow to pay dividends in the future. Federal Reserve Board policy, which applies to Mid Penn as a registered bank holding company, also provides that dividends by bank holding companies should generally be paid out of current earnings looking back over a one-year period. Mid Penn's failure to pay dividends on its common stock could have a material adverse effect on the market price of its common stock.

Mid Penn's profitability depends significantly on economic conditions in central Pennsylvania

Mid Penn's success is dependent to a significant degree on economic conditions in central Pennsylvania, especially in Dauphin, lower Northumberland, western Schuylkill and eastern Cumberland Counties, which Mid Penn defines as our primary market. The banking industry is affected by general economic conditions including the effects of inflation, recession, unemployment, real estate values, trends in the national and global economics, and other factors beyond our control. An economic recession or a delayed recovery over a prolonged period of time in

Central Pennsylvania area could cause an increase in the level of the Bank's non-performing assets and loan and lease losses, thereby causing operating losses, impairing liquidity, and eroding capital. Mid Penn cannot assure you that adverse changes in the local economy would not have a material adverse effect on Mid Penn's consolidated financial condition, results of operations, and cash flows.

Mid Penn may not be able to attract and retain skilled people

Mid Penn's success depends, in large part, on its ability to attract and retain key people. Competition for the best people in most activities engaged in by Mid Penn can be intense and Mid Penn may not be able to hire people or to retain them. The unexpected loss of services of one or more of Mid Penn's key personnel could have a material adverse impact on Mid Penn's business because of their skills, knowledge of Mid Penn's market, years of industry experience, and the difficulty of promptly finding qualified replacement personnel.

Mid Penn is subject to claims and litigation pertaining to fiduciary responsibility

From time to time, customers make claims and take legal action pertaining to Mid Penn's performance of its fiduciary responsibilities. Whether customer claims and legal action related to Mid Penn's performance of its fiduciary responsibilities are founded or unfounded, if such claims and legal actions are not resolved in a manner favorable to Mid Penn they may result in significant financial liability and/or adversely affect the market perception of Mid Penn and its products and services as well as impact customer demand for those products and services. Any financial liability or reputation damage could have a material adverse effect on Mid Penn's business, which, in turn, could have a material adverse effect on Mid Penn's financial condition and results of operations.

The trading volume in Mid Penn's common stock is less than that of other larger financial services companies

Mid Penn's common stock is listed for trading on NASDAQ; the trading volume in its common stock, however, is less than that of other larger financial services companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of willing buyers and sellers of Mid Penn's common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which Mid Penn has no control. Given the lower trading volume of Mid Penn's common stock, significant sales of Mid Penn's common stock, or the expectation of these sales, could cause Mid Penn's stock price to fall.

Mid Penn operates in a highly regulated environment and may be adversely affected by changes in federal, state and local laws and regulations

Mid Penn is subject to extensive regulation, supervision and examination by federal and state banking authorities. Any change in applicable regulations or federal, state or local legislation could have a substantial impact on Mid Penn and its operations. Additional legislation and regulations that could significantly affect Mid Penn's powers, authority and operations may be enacted or adopted in the future, which could have a material adverse effect on its financial condition and results of operations. Further, regulators have significant discretion and authority to prevent or remedy unsafe or unsound practices or violations of laws by banks and bank holding companies in the performance of their supervisory and enforcement duties. The exercise of regulatory authority may have a negative impact on Mid Penn's results of operations and financial condition.

The potential exists for additional federal or state laws and regulations, or changes in policy, affecting many aspects of our operations, including capital levels, lending and funding practices, and liquidity standards. New laws and regulations may increase our costs of regulatory compliance and of doing business and otherwise affect our operations, and may significantly affect the markets in which we do business, the markets for and value of our loans and investments, the fees we can charge and our ongoing operations, costs and profitability.

The soundness of other financial institutions may adversely affect Mid Penn

Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. Mid Penn has exposure to many different industries and counterparties, and routinely executes transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, and other institutional clients. Many of these transactions expose Mid Penn to credit risk in the event of a default by a counterparty or client. In addition, Mid Penn's credit risk may be exacerbated when the collateral held by Mid Penn cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the credit or derivative exposure due to Mid Penn. Any such losses could have a material adverse affect on the Mid Penn's financial condition and results of operations.

Prior levels of market volatility were unprecedented and future volatility may have materially adverse effects on our liquidity and financial condition

In the recent past, the capital and credit markets experienced extreme volatility and disruption for more than two years. In some cases, the markets exerted downward pressure on stock prices, security prices, and credit availability for certain issuers without regard to their underlying financial strength. If such levels of market disruption and volatility return, there can be no assurance that we will not experience adverse effects, which may be material, on our liquidity, financial condition, and profitability.

Mid Penn's banking subsidiary may be required to pay higher FDIC insurance premiums or special assessments which may adversely affect its earning

Poor economic conditions and the resulting bank failures have increased the costs of the FDIC and depleted its deposit insurance fund. Additional bank failures may prompt the FDIC to increase its premiums above the recently increased levels or to issue special assessments. Mid Penn generally is unable to control the amount of premiums or special assessments that its subsidiary is required to pay for FDIC insurance. Any future changes in the calculation or assessment of FDIC insurance premiums may have a material adverse effect on our results of operations, financial condition, and our ability to continue to pay dividends on our common stock at the current rate or at all.

Pennsylvania Business Corporation Law and various anti-takeover provisions under our articles and bylaws could impede the takeover of Mid Penn

Various Pennsylvania laws affecting business corporations may have the effect of discouraging offers to acquire Mid Penn, even if the acquisition would be advantageous to shareholders. In addition, we have various anti-takeover measures in place under our articles of incorporation and bylaws, including a supermajority vote requirement for mergers, a staggered board of directors, and the absence of cumulative voting. Any one or more of these measures may impede the takeover of Mid Penn without the approval of our board of directors and may prevent our shareholders from taking part in a transaction in which they could realize a premium over the current market price of our common stock.

Mid Penn may need to or be required to raise additional capital in the future, and capital may not be available when needed and on terms favorable to current shareholders

Federal banking regulators require Mid Penn and its subsidiary bank to maintain adequate levels of capital to support their operations. These capital levels are determined and dictated by law, regulation, and banking regulatory agencies. In addition, capital levels are also determined by Mid Penn's management and board of directors, based on capital levels that they believe are necessary to support Mid Penn's business operations.

If Mid Penn raises capital through the issuance of additional shares of its common stock or other securities, it would likely dilute the ownership interests of current investors and could dilute the per share book value and earnings per share of its common stock. Furthermore, a capital raise through issuance of additional shares may have an adverse impact on Mid Penn's stock price. New investors also may have rights, preferences and privileges senior to Mid Penn's current shareholders, which may adversely impact its current shareholders.

Mid Penn's ability to raise additional capital will depend on conditions in the capital markets at that time, which are outside of its control, and on its financial performance. Accordingly, Mid Penn cannot be certain of its ability to raise additional capital on acceptable terms and acceptable time frames or to raise additional capital at all. If Mid Penn cannot raise additional capital in sufficient amounts when needed, its ability to comply with regulatory capital requirements could be materially impaired. Additionally, the inability to raise capital in sufficient amounts may adversely affect Mid Penn's financial condition and results of operations.

Mid Penn's profitability depends significantly on the economic conditions in the Commonwealth of Pennsylvania and the local region in which it does business

Mid Penn's profitability depends primarily on the general economic conditions of the Commonwealth of Pennsylvania and the specific markets in which Mid Penn operates. Unlike larger national or other regional banks that are more geographically diversified, Mid Penn provides banking and financial services to customers primarily in south central Pennsylvania. The local economic conditions in this area has a significant impact on the demand for Mid Penn's products and services, as well as the ability of Mid Penn's customers to repay loans, the value of collateral securing loans, and the stability of Mid Penn's deposit funding sources. A significant decline in general economic conditions caused by inflation, recession, unemployment, changes in securities markets, or other factors could impact these local economic conditions and, consequently, have a material adverse effect on Mid Penn's financial condition and results of operation.

If we conclude that the decline in the value of any of our investment securities is other than temporary, we are required to write down the value of that security through a charge to earnings

We review our investment securities portfolio at each quarter-end reporting period to determine whether the fair value is below the current carrying value. When the fair value f any of our investment securities has declined below its carrying value, we are required to assess whether the decline is other than temporary. If we conclude that the decline is other than temporary, we are required to write down the value of that security through a charge to earnings. Changes in the expected cash flows of these securities and/or prolonged price declines have resulted and may result in our concluding in future periods that there is additional impairment of these securities that is other than temporary, which would require a charge to earnings to write down these securities to their fair value. Due to the complexity of the calculations and assumptions used in determining whether an asset is impaired, the impairment disclosed may not accurately reflect the actual impairment in the future.

Mid Penn's operations of its business, including its interaction with customers, are increasingly done via electronic means, and this has increased its risks related to cyber security

Mid Penn is exposed to the risk of cyber-attacks in the normal course of business. In general, cyber incidents can result from deliberate attacks or unintentional events. Mid Penn has observed an increased level of attention in the industry focused on cyber-attacks that include, but are not limited to, gaining unauthorized access to digital systems for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. To combat against these attacks, policies and procedures are in place to prevent or limit the effect of the possible security breach of its information systems and it has insurance against some cyber-risks and attacks. While Mid Penn has not incurred any material losses related to cyber-attacks, nor is it aware of any specific or threatened cyber-incidents as of the date of this report, it may incur substantial costs and suffer other negative consequences if it falls victim to successful cyber-attacks. Such negative consequences could include remediation costs that may include liability for stolen assets or information and repairing system damage that may have been caused; deploying additional personnel and protection technologies, training employees, and engaging third party experts and consultants; lost revenues resulting from unauthorized use of proprietary information or the failure to retain or attract customers following an attack; litigation; and reputational damage adversely affecting customer or investor confidence.

Mid Penn is Subject To Environmental Liability Risk Associated with Lending Activities

A significant portion of Mid Penn's loan portfolio is secured by real property. During the ordinary course of business, Mid Penn may foreclose on and take title to properties securing certain loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, Mid Penn may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require Mid Penn to incur substantial expenses and may materially reduce the affected property's value or limit Mid Penn's ability to use or sell the affected property. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws, may increase Mid Penn's exposure to environmental liability. Although Mid Penn has policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on Mid Penn's financial condition and results of operations.

Mid Penn's financial performance may suffer if its information technology is unable to keep pace with its growth or industry developments

Effective and competitive delivery of Mid Penn's products and services is increasingly dependent upon information technology resources and processes, both those provided internally as well as those provided through third party vendors. In addition to better serving customers, the effective use of technology increases efficiency and enables Mid Penn to reduce costs. Mid Penn's future success will depend, in part, upon its ability to address the needs of its customers by using technology to provide products and services to enhance customer convenience, as well as to create additional efficiencies in its operations. Many of Mid Penn's competitors have greater resources to invest in technological improvements. Additionally, as technology in the financial services industry changes and evolves, keeping pace becomes increasingly complex and expensive for Mid Penn. There can be no assurance that Mid Penn will be able to effectively implement new technology-driven products and services, which could reduce its ability to compete effectively.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

With the exception of the Market Square Office and Derry Street Loan Operations Center in Harrisburg, PA, the Bank owns its main office, Operations Center, and branch offices and certain parking facilities related to its banking offices, all of which are free and clear of any lien. The Bank's main office and all branch offices are located in Pennsylvania. All of these properties are in good condition and are deemed by management to be adequate for the Bank's purposes. The table below sets forth the location of each of the Bank's properties.

Property Location	Description of Property
Millersburg 349 Union Street Millersburg, PA 17061	Main Office & Branch Office
Elizabethville Office 4642 State Route 209 Elizabethville, PA 17023	Branch Office
Dalmatia Office 132 School House Road Dalmatia, PA 17017	Branch Office
Carlisle Pike Office 4622 Carlisle Pike Mechanicsburg, PA 17050	Branch Office
Derry Street Office 4509 Derry Street Harrisburg, PA 17111	Branch Office
Front Street Office 2615 North Front Street Harrisburg, PA 17110	Branch Office
Tower City Office 545 East Grand Avenue Tower City, PA 17980	Branch Office
Dauphin Office 1001 Peters Mountain Road Dauphin, PA 17018	Branch Office

Property Location	Description of Property
Lykens Office 550 Main Street Lykens, PA 17048	Branch Office

Operations Center 894 N. River Road Halifax, PA 17032	Operations Center
Derry Street Loan Administrative Operations 4099 Derry Street Harrisburg, PA 17111	Administrative Office

ITEM 3. LEGAL PROCEEDINGS

Management is not aware of any litigation that would have a material adverse effect on the consolidated financial position of the Corporation. Mid Penn and the Bank have no proceedings pending other than ordinary routine litigation occurring in the normal course of business. In addition, management does not know of any material proceedings contemplated by governmental authorities against Mid Penn or the Bank or any of its properties.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SPECIAL CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

Certain of the matters discussed in this document may constitute forward-looking statements for purposes of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, and as such may involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Mid Penn to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. The words "expect," "anticipate," "intend," "plan," "believe," "estimate," and similar expressions are intended to identify such forward-looking statements.

Mid Penn's actual results may differ materially from the results anticipated in these forward-looking statements due to a variety of factors, including, without limitation:

- The effects of weak economic conditions on current customers, specifically the effect of the economy on loan customers' ability to repay loans;
- Governmental monetary and fiscal policies, as well as legislative and regulatory changes, including the effects of the Dodd-Frank Wall Street Reform and Consumer Protection Act;
- The effects of the failure of the federal government to reach a deal to raise the debt ceiling and the negative results on economic or business conditions resulting therefrom;
- Possible impacts of the capital and liquidity requirements of Basel III standards and other regulatory pronouncements;
- The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, Financial Accounting Standards Board, and other accounting standard setters;
- The risks of changes in interest rates on the level and composition of deposits, loan demand, and the values of loan collateral, securities and interest rate protection agreements, as well as interest rate risks;
- The effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in Mid Penn's market area and elsewhere, including institutions operating locally, regionally, nationally and internationally, together with such competitors offering banking products and services by mail, telephone, computer and the internet;
- The costs and effects of litigation and of unexpected or adverse outcomes in such litigation;
- Technological changes;
- Acquisitions and integration of acquired businesses;
- The failure of assumptions underlying the establishment of reserves for loan and lease losses and estimations of values of collateral and various financial assets and liabilities;
- Acts of war or terrorism;
- Volatilities in the securities markets; and
- Deteriorating economic conditions.

All written or oral forward-looking statements attributable to Mid Penn are expressly qualified in their entirety by these cautionary statements.

Management's Discussion and Analysis of Financial Condition and Results of Operations analyzes the major elements of Mid Penn's consolidated financial statements and should be read in conjunction with the Consolidated Financial Statements of the Corporation and Notes thereto and other detailed information appearing elsewhere in this Annual Report. Mid Penn is not aware of any known trends, events, uncertainties or of any current recommendations by the regulatory authorities which, if they were to be implemented, would have a material effect on Mid Penn's liquidity, capital resources or operations.

Critical Accounting Estimates

Mid Penn's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and conform to general practices within the banking industry. Application of these principles involves significant judgments and estimates by management that have a material impact on the carrying value of certain assets and liabilities. The judgments and estimates that we used are based on historical experiences and other factors, which are believed to be reasonable under the circumstances. Because of the nature of the judgments and estimates that we have made, actual results could differ from these judgments and estimates, which could have a material impact on the carrying values of assets and liabilities and the results of our operations.

Management of the Corporation considers the accounting judgments relating to the allowance for loan and lease losses, the evaluation of the Corporation's investment securities for other-than-temporary impairment, the valuation of deferred tax assets, and the assessment of goodwill for impairment to be the accounting areas that require the most subjective and complex judgments.

The allowance for loan and lease losses represents management's estimate of probable incurred credit losses inherent in the loan and lease portfolio. Determining the amount of the allowance for loan and lease losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses

on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan and lease portfolio also represents the largest asset type on the consolidated balance sheet. Throughout the remainder of this report, the terms "loan" or "loans" refers to both loans and leases.

Valuations for the investment portfolio are determined using quoted market prices, where available. If quoted market prices are not available, investment valuation is based on pricing models, quotes for similar investment securities, and observable yield curves and spreads. In addition to valuation, management must assess whether there are any declines in value below the carrying value of the investments that should be considered other than temporary or otherwise require an adjustment in carrying value and recognition of the loss in the consolidated statement of income.

Accounting Standards Codification (ASC) Topic 350, *Intangibles-Goodwill and Other*, requires that goodwill is not amortized to expense, but rather that it be tested for impairment at least annually. Impairment write-downs are charged to results of operations in the period in which the impairment is determined. The Corporation did not identify any impairment on its outstanding goodwill from its most recent testing, which was performed as of December 31, 2013. If certain events occur which might indicate goodwill has been impaired, the goodwill is tested when such events occur.

The Corporation recognizes deferred tax assets and liabilities for the future effects of temporary differences and tax credits. Enacted tax rates are applied to cumulative temporary differences based on expected taxable income in the periods in which the deferred tax asset or liability is anticipated to be realized. Future tax rate changes could occur that would require the recognition of income or expense in the consolidated statements of income in the period in which they are enacted. Deferred tax assets must be reduced by a valuation allowance if in management's judgment it is "more likely than not" that some portion of the asset will not be realized. Management may need to modify their judgments in this regard from one period to another should a material change occur in the business environment, tax legislation, or in any other business factor that could impair the Corporation's ability to benefit from the asset in the future.

Financial Summary

The consolidated earnings of Mid Penn are derived primarily from the operations of its wholly owned subsidiary, Mid Penn Bank.

2013 versus 2012

Mid Penn's net income available to common shareholders of $4,616,000 for the year 2013 reflects an increase of $179,000, or 4.0%, over the $4,437,000 for the year 2012. This represents net income in 2013 of $1.32 per common share compared to $1.27 per common share in 2012.

Total assets of Mid Penn grew $7,925,000, or 1.1%, in 2013 to close the year at $713,125,000, compared to $705,200,000 at year-end 2012. The majority of the asset growth was centered in the loan portfolio, which increased $62,242,000, or 12.9%, to $546,462,000. This loan growth was supported by a decrease in investments, which fell to $122,803,000, or 20.4%, from $154,295,000 at the end of 2012.

Total deposits decreased $17,331,000, or 2.8%, from $625,461,000 at the end of 2012 to $608,130,000 at December 31, 2013. This was part of a comprehensive effort to improve Mid Penn's overall funding mix by reducing reliance on higher-priced money market and certificate of deposit funds and placing greater emphasis on less expensive demand deposits and savings balances. As a result of these efforts, demand deposits and savings comprise 45.9% of total deposits at the end of 2013 versus 40.2% of total deposits at the end of 2012. Mid Penn also had shifted to a short-term borrowing position of $23,833,000 as part of its funding strategy by the end of 2013.

Mid Penn's return on average shareholders' equity, (ROE), a widely recognized performance indicator in the financial industry, was 9.37% in 2013 and 8.78% in 2012. Return on average assets (ROA), another performance indicator, was 0.71% in 2013 and 0.69% in 2012.

Mid Penn's performance during 2013 improved over the results reported in 2012. This improvement was the result of increased loan production, improving cost of funds, improvement in nonperforming loans, and consistent management of controllable expenses throughout 2013.

Net interest margin improved to 3.80% in 2013 from 3.63% in 2012. This improvement was driven by a 34 basis point improvement in the rate on supporting liabilities to 0.86% in 2013 from 1.20% in 2012. This improvement allowed average interest spread to increase to 3.70% from 3.49% in 2012 and net interest income on a tax equivalent basis to increase to $25,250,000 in 2013 from $24,494,000 in 2012. This increase was achieved in spite of the substantial pool of nonperforming loans being carried on the balance sheet. The amount of interest income lost on this pool of troubled loans in 2013 amounted to $861,000. Further discussion of net interest margin can be found in the Net Interest Income section below.

Total nonperforming assets decreased $425,000 from $13,100,000 in 2012 to $12,675,000 at the end of 2013. Decreasing nonaccrual loans were the leading source of improvement in nonperforming assets. Further discussion of these components can be found in the Credit Quality, Credit Risk, and Allowance for Loan and Lease Losses section below.

Net charge-offs decreased to $877,000 in 2013 from $2,299,000 during 2012. Mid Penn increased provision for loan and lease losses from $1,036,000 in 2012 to $1,685,000 in 2013. This was largely driven by the increase in loans in the overall portfolio. Further discussion of these issues can be found in the Provision for Loan and Lease Losses section below.

The Bank's tier one capital (to risk weighted assets) of $52,693,000, or 9.9%, and total capital (to risk weighted assets) of $59,100,000, or 11.1%, at December 31, 2013, are above the regulatory requirements. Tier one capital consists primarily of the Bank's shareholders' equity and any qualifying preferred stock. Total capital also includes qualifying subordinated debt, if any, and the allowance for loan and lease losses, within permitted limits. Risk-weighted assets are determined by assigning various levels of risk to different categories of assets and off-balance sheet activities.

2012 versus 2011

Mid Penn recorded net income available to common shareholders of $4,437,000 for the year 2012, compared to $4,029,000 in 2011, which was an increase of $408,000 or 10.1%. This represents net income in 2012 of $1.27 per common share compared to $1.16 per common share in 2011.

Total assets of Mid Penn contracted in 2012, falling to $705,200,000, a decrease of $10,183,000, or 1.4% from $715,383,000 at year-end 2011. The majority of asset contraction came from a decrease in investments, which fell to $154,295,000 or 3.0% from $159,043,000 at the end of 2011. Federal funds sold also decreased, falling $3,439,000 or 53.4% from $6,439,000 at the end of 2011. These asset reductions were used to offset a reduction in deposits, which decreased 1.4% to $625,461,000 from $634,055,000 at year-end 2011. This deposit decrease was the result of the maturity of a $10,000,000 brokered certificate of deposit early in 2012.

The continued soft economy was the major contributor to modest loan growth during 2012. Loan balances increased 0.3% to $484,220,000 from $482,717,000 in 2011. Mid Penn experienced weak loan demand during 2012 despite a desire to sensibly lend to support creditworthy existing and new customers in the marketplace. Adding additional strain to weakened demand was the increase in unscheduled payoffs of large loans within the portfolio. The continued low interest rate environment and weak economy has increased the competitive pressure from other lending institutions to attract borrowers from other institutions as well as incenting borrowers to use surplus cash reserves to pay down debt rather than expand their operations.

Mid Penn's return on average shareholders' equity, (ROE), a widely recognized performance indicator in the financial industry, was 8.78% in 2012 and 8.96% in 2011. Return on average assets (ROA), another performance indicator, was 0.69% in 2012 and 0.66% in 2011.

Mid Penn's performance during 2012 was a solid improvement over the results reported in 2011. This improvement was the result of reduced provision for loan and lease losses, improving cost of funds, consistent management of controllable expenses, and growth in noninterest income sources throughout 2012.

Net charge-offs increased from $1,494,000 in 2011 to $2,299,000 during 2012. Despite the increase in net charge-offs from 2011, Mid Penn was able to reduce provision for loan and lease losses from $1,205,000 in 2011 to $1,036,000 in 2012. This stemmed from the fact that $1,499,000 of the net charge-offs during 2012 had a previously recorded balance included in the allowance for loan and lease losses. As Mid Penn continues to work to resolve the elevated levels of nonperforming loans, the relationship between net charge-offs and provision for loan and lease losses may continue to have a more tenuous link. Further discussion of these issues can be found in the Provision for Loan and Lease Losses section below.

Net interest margin improved to 3.63% in 2012 from 3.52% in 2011. This improvement was driven by a 48 basis point improvement in the rate on supporting liabilities from 1.68% in 2011 to 1.20% in 2012. This improvement allowed average interest spread to increase to 3.49% from 3.29% in 2011 and net interest income on a tax equivalent basis to increase from $23,094,000 in 2011 to $24,494,000 in 2012. This increase was achieved in spite of the substantial pool of nonperforming loans being carried on the balance sheet. The amount of interest income lost on this pool of troubled loans in 2012 amounted to $2,974,000. Further discussion of net interest margin can be found in the Net Interest Income section below.

In addition to the interest lost on nonperforming loans, this pool of troubled assets increases Mid Penn's costs associated with the management and collection of this pool of assets. During 2012, the expenses associated with the increased collection and management efforts on troubled assets were $369,000 as compared to $299,000 in 2011. These expenses remain at historically high levels as Mid Penn resolves problems associated with the pool of troubled assets.

Mid Penn's fundamental operating performance in 2012 was sound despite these issues and the general economic conditions experienced by the banking industry as a whole.

The Bank's tier one capital (to risk weighted assets) of $48,764,000, or 10.0%, and total capital (to risk weighted assets) of $54,363,000, or 11.1%, at December 31, 2012, are above the regulatory requirements. Tier one capital consists primarily of the Bank's shareholders' equity and any qualifying preferred stock. Total capital also includes qualifying subordinated debt, if any, and the allowance for loan and lease losses,

within permitted limits. Risk-weighted assets are determined by assigning various levels of risk to different categories of assets and off-balance sheet activities.

Net Interest Income

Net interest income, Mid Penn's primary source of revenue, represents the difference between interest income and interest expense. Net interest income is affected by changes in interest rates and changes in average balances (volume) in the various interest-sensitive assets and liabilities.

The effect of changing volume and rate has been allocated entirely to the rate column. Tax-exempt income is shown on a tax equivalent basis assuming a federal income tax rate of 34%.

During 2013, net interest income increased $756,000, or 3.1%, as compared to an increase of $1,400,000, or 6.1%, in 2012. The average balances, effective interest differential, and interest yields for the years ended December 31, 2013, 2012, and 2011 and the components of net interest income, are presented in Table 1. A comparative presentation of the changes in net interest income for 2013 compared to 2012, and 2012 compared to 2011, is provided in Table 2. This analysis indicates the changes in interest income and interest expense caused by the volume and rate components of interest earning assets and interest bearing liabilities.

The yield on earning assets decreased to 4.56% in 2013 from 4.69% in 2012. The yield on earning assets for 2011 was 4.97%. The change in the yield on earning assets was due primarily to changes in market interest rates and extreme rate competition within our market. The average "prime rate" for 2013, 2012, and 2011 was 3.25%. The yield on earning assets is also negatively impacted by the loss of interest on nonperforming loans. During 2013, this loss of interest amounted to $861,000. Had this interest been included in Mid Penn's earnings, the yield on earning assets would have increased by 13 basis points.

Interest expense decreased by $2,068,000, or 29.0%, in 2013 as compared to a decrease of $2,397,000, or 25.2%, in 2012. The cost of interest bearing liabilities decreased to 0.86% in 2013 from 1.20% in 2012. The cost of interest bearing liabilities for 2011 was 1.68%. The reduction in the cost of interest bearing liabilities was due to changes in market interest rates and Mid Penn's ability to replace higher-cost time deposits with lower-cost demand deposits.

Net interest margin, on a tax equivalent basis was 3.80% in 2013 compared to 3.63% in 2012 and 3.52% in 2011. The interest rate impact of earning assets and funding sources due to changes in interest rates can be reasonably estimated at current interest rate levels, the options selected by customers, and the future mix of the loan, investment, and deposit products in the Bank's portfolios, may significantly change the estimates used in the simulation models. In addition, our net interest income may be impacted by further interest rate actions of the Federal Reserve Bank. Management continues to monitor the net interest margin closely.

Provision for Loan and Lease Losses

The provision for loan and lease losses is the expense necessary to maintain the allowance for loan and lease losses at a level adequate to absorb management's estimate of probable losses in the loan and lease portfolio. Mid Penn's provision for loan and lease losses is based upon management's monthly review of the loan portfolio. The purpose of the review is to assess loan quality, identify impaired loans and leases, analyze delinquencies, ascertain loan and lease growth, evaluate potential charge-offs and recoveries, and assess general economic conditions in the markets we serve.

During 2013, Mid Penn continued to experience a challenging economic and operating environment. Given the economic pressures that impact some borrowers, Mid Penn has maintained the allowance for loan and lease losses in accordance with Mid Penn's assessment process, which took into consideration the risk characteristics of the loan and lease portfolio and shifting collateral values from December 31, 2012 to December 31, 2013. For the year ended December 31, 2013, the provision for loan and lease losses was $1,685,000, as compared to $1,036,000 for the year ended December 31, 2012.

For the year ended December 31, 2013, Mid Penn had net charge-offs of $877,000 compared to net charge-offs of $2,299,000 during the year ended December 31, 2012. Loans charged off during 2013 were comprised of 12 commercial real estate loans totaling $936,000. Seven of these loans totaling $801,000 were to two borrowers with the remaining loans to unrelated borrowers. In addition, there were charge-offs for eight residential real estate loans to unrelated borrowers totaling $167,000, four commercial and industrial loans to unrelated borrowers totaling $183,000, and one home equity loan representing $91,000 of the total charged off during 2013. The remaining $96,000 was comprised of various consumer loans to unrelated borrowers.

During 2013, Mid Penn recovered $596,000 against loans previously charged off compared to $89,000 in 2012. The majority of the recoveries in 2013 were on six loans to unrelated borrowers totaling $531,000. Of these six loans, a total of $20,000 was recovered on two loans following regular repayment plans, $60,000 was recovered on a loan following the liquidation of collateral by the borrower on which the Bank could not establish a reliable value, and a $165,000 recovery was made on a charged off credit after a successful court challenge. Mid Penn recorded an additional $264,000 recovery following the sale of a large tract of land securing a charged down note and another $22,000 on a loan when the original borrower repurchased a property for more than the appraised value. The remaining $65,000 was recovered on a variety of loans to unrelated borrowers through ongoing collection efforts.

Mid Penn may need to make future adjustments to the allowance and the provision for loan and lease losses if economic conditions or loan credit quality differs substantially from the assumptions used in making Mid Penn's evaluation of the level of the allowance for loan losses as compared to the balance of outstanding loans.

Following its model for loan and lease loss allowance adequacy, management recorded a $1,685,000 provision in 2013, as well as a provision of $1,036,000 in 2012, and $1,205,000 in 2011. The allowance for loan and lease losses as a percentage of total loans was 1.16% at December 31, 2013, compared to 1.14% at December 31, 2012 and 1.40% at December 31, 2011. Several factors contributed to this increase in provision expense in 2013. First, the growth in the loan portfolio was substantial in 2013. This growth had a material impact on the amount of required reserves within the allowance for loan and lease losses from qualitative and quantitative factors. Secondly, total impaired loans increased $720,000, from $10,192,000 at December 31, 2012 to $10,912,000 at December 31, 2013. Specific reserves required on these impaired loans increased $550,000, from $1,383,000 at December 31, 2012 to $1,933,000 at December 31, 2013. Additionally, the qualitative segment of the allowance for loan and lease losses increased $415,000 to $3,682,000 at December 31, 2013, from $3,267,000 at December 31, 2012. This increase was primarily the result of the growth in the overall loan and lease portfolio. These increases were offset by a change in the mix of classified loans. Loans internally classified as special mention fell from $7,916,000 at December 31, 2012 to $4,214,000 at December 31, 2013, or a reduction of $3,702,000. Loans internally classified as substandard but not impaired decreased $6,168,000 from $10,726,000 at December 31, 2012 to $4,558,000 at December 31, 2013. Additionally during 2013, the historical loss experience within these segments of the portfolio continued to migrate downward as high levels of activity during 2009 and 2010 rolled out of the calculation and were replaced by more current experience. The combination of the shifting balances and migrating loss experience resulted in a decrease of $177,000 in required balances in the allowance for loan and lease losses.

A summary of charge-offs and recoveries of loans and leases are presented in Table 3.

TABLE 3: ANALYSIS OF THE ALLOWANCE FOR LOAN AND LEASE LOSSES

(Dollars in thousands)	Years ended December 31,				
	2013	2012	2011	2010	2009

Net charge-offs	877	2,299	1,494	3,260	7,339
Provision for loan and lease losses	1,685	1,036	1,205	2,635	9,520
Balance, end of year	$ 6,317	$ 5,509	$ 6,772	$ 7,061	$ 7,686

	Years ended December 31,				
	2013	2012	2011	2010	2009
Ratio of net charge-offs during the year to average loans and leases outstanding during the year, net of unearned discount	0.17%	0.48%	0.31%	0.69%	1.58%
Allowance for loan and lease losses as a percentage of total loans and leases at December 31	1.16%	1.14%	1.40%	1.51%	1.60%
Allowance for loan and lease losses as a percentage of non-performing assets at December 31	49.84%	42.05%	50.91%	35.05%	48.33%

Noninterest Income

2013 versus 2012

Income from fiduciary activities for 2013 was $492,000, an $83,000, or 14.4%, decrease from $575,000 in 2012. This revenue source is comprised of fees generated by Mid Penn's Trust department and fees from the sale of third-party mutual funds and annuities to the Bank's retail and commercial customers. Fees from third-party mutual fund and annuity sales were $267,000 in 2013 and $389,000 in 2012. This decline in fee revenue is responsible for the variance from 2012.

Mid Penn recognized gains on sale of investment securities in 2013 of $220,000 and $267,000 in 2012 as a result of efforts to position the portfolio to provide improved earnings and cash flow in support of future loan growth.

Mortgage banking income suffered from increasing mortgage rates earlier in the year, which effectively shut off the flow of customers seeking to refinance their existing mortgages from higher rates. Mortgage banking income for 2013 was $348,000, a decrease of $327,000, or 48.4%, from $675,000 in 2012.

Merchant services revenue increased to $330,000 in 2013, an increase of $74,000, or 28.9%, compared to $256,000 for 2012. Sales efforts in this area were also very positive in 2013, adding to the enhanced revenue.

2012 versus 2011

Income from fiduciary activities for 2012 was $575,000, a $36,000, or 6.7%, increase from $539,000 in 2011. This revenue source is comprised of fees generated by Mid Penn's Trust department and fees from the sale of third-party mutual funds and annuities to the Bank's retail and commercial customers. Fees from third-party mutual fund and annuity sales were $389,000 in 2012 and $354,000 in 2011.

Service charges on deposit accounts amounted to $565,000 for 2012, a decrease of $139,000, or 19.7%, compared to $704,000 for 2011. The decrease in service charges in 2012 occurred in spite of general growth in transaction accounts during 2012. During this period of economic downturn, customers seem to have become more conscientious about their account balances and avoiding unnecessary charges related to insufficient funds. In addition to this behavioral change, Mid Penn was negatively impacted by regulatory changes contained in the Dodd-Frank Act governing overdraft charges, which has resulted in a reduction in NSF revenue.

Mid Penn recognized gains on sale of investment securities in 2012 of $267,000 as a result of efforts to position the portfolio to provide improved earnings and cash flow in support of future loan growth.

Mortgage banking income remained robust during the year ended December 31, 2012. Historically low long-term mortgage rates triggered a wave of refinancing and increasing purchase activity, generating robust fee income from this line of business. Mortgage banking income for 2012 was $675,000, an increase of $285,000, or 73.1%, over $390,000 in 2011.

Merchant services revenue increased to $256,000 in 2012, an increase of $91,000, or 55.2%, compared to $165,000 for 2011. During 2012, Mid Penn successfully renegotiated the revenue sharing contract with its vendor, significantly augmenting the revenue stream. Sales efforts in this area were also very positive in 2012, adding to the enhanced revenue.

TABLE 4: NONINTEREST INCOME

(Dollars in thousands)	Years ended December 31,		
	2013	2012	2011
Income from fiduciary activities	$ 492	$ 575	$ 539
Service charges on deposits	576	565	704
Net gain on sales of investment securities	220	267	-
Earnings from cash surrender value of life insurance	231	247	258
Mortgage banking income	348	675	390
ATM debit card interchange income	508	472	452
Merchant services revenue	330	256	165
Other income	585	626	488
Total Noninterest Income	$ 3,290	$ 3,683	$ 2,996

Noninterest Expense

2013 versus 2012

Salaries and employee benefits represent the major component of noninterest expense. During 2013, increases in the workforce primarily included adding experienced team members to add depth to the sales and support areas of Mid Penn. In 2013, Mid Penn also recognized a full year of salary and employee benefits expense from the 2012 additions within the support functions throughout the Corporation to enhance controls and support future growth. Commissions paid to employees in the retail investment and mortgage banking lines of business in 2013 were down $192,000 from 2012 due to reduced activity in both of these business lines.

FDIC Assessment decreased $548,000 to $486,000 in 2013. Prior to 2011, assessments were calculated based on the total deposits of a financial institution. Beginning in the second quarter of 2011, the assessment base was changed from deposits to average total assets less tangible equity. This resulted in significant savings for Mid Penn. In addition, 2013 reflects the recognition of a refund of $139,000 in overbillings from the FDIC due to an error by the FDIC in Mid Penn's assessment calculation.

Legal and professional fees increased to $705,000 in 2013 from $604,000 in 2012. This increase was primarily related to consultants used in the information technology area to improve the Bank's network capabilities and successfully migrate to a service bureau processing environment.

Software licensing increased from $648,000 in 2012 to $947,000 in 2013. During 2013, Mid Penn incurred one-time charges of $26,000 associated with the migration its core banking data processing software from an in-house environment to a service bureau hosted platform. This migration allowed for staffing reductions in the information technology and operations areas of $39,000 for part of the year in 2013. The

remaining increase is due to new service contracts on software to comply with various regulatory requirements and to expand the Bank's online loan and deposit application capabilities.

Mid Penn recognized a gain on sale or write-down on foreclosed assets of $302,000 in 2013. During 2013, Mid Penn recognized a gain of $340,000 on the sale of a repossessed property. This gain was offset by Mid Penn's ongoing analysis of the carrying values of repossessed properties and the adjustment of their values to current market rates.

Loan collection costs decreased to $214,000 in 2013 from $369,000 in 2012. OREO expense increased to $290,000 in 2013 from $253,000 in 2012. These items represent the costs associated with working through collection efforts on the pool of nonperforming assets within the loan portfolio. While decreasing in total during 2013, they continue to be at historically elevated levels due to the size and nature of the nonperforming assets pool.

ATM debit card processing and internet banking expenses have both increased in recent years due to increasing customer demand for these banking services.

2012 versus 2011

The major component of noninterest expense is salaries and employee benefits. Increases in the 2012 workforce primarily included adding experienced team members to add depth to the sales and support areas and bolster compliance functions of Mid Penn. Mid Penn also recognized in 2012 a full year of salary and employee benefits expense from the 2011 additions within the support functions throughout the Corporation to enhance controls and support future growth. During 2012, medical benefits increased $184,000 from 2011 levels, primarily due to the increase in actual medical claims experienced from Mid Penn's self-funded medical insurance plan. In addition, commission-based compensation paid to mortgage originators and retail investment representatives increased $144,000 from 2011 levels and are reflective of the enhanced revenues generated from these lines of business.

Legal and professional fees increased from $444,000 in 2011 to $604,000 in 2012. Mid Penn incurred elevated legal fees in 2012 stemming from coordination with the U.S. Treasury on the repayment of Mid Penn's Capital Purchase Program funds and the buyout of the related warrants. In addition, Mid Penn engaged a computer consultant to perform an evaluation of the core computer system and its ancillary programs as a resource in making future enhancement decisions.

Loss on sale or write-down on foreclosed assets increased to $96,000 in 2012. During 2012, this item increased as a result of Mid Penn's ongoing analysis of the carrying values of repossessed properties and the adjustment of their values to current market rates.

Loan collection costs increased to $369,000 in 2012 from $299,000 in 2011. OREO expense increased to $253,000 in 2012 from $161,000 in 2011. These items have risen as Mid Penn continues to work through collection efforts on the pool of nonperforming assets within the loan portfolio.

ATM debit card processing and internet banking expenses have both increased in recent years due to increasing customer demand for these banking services.

During 2012, Mid Penn reached the end of a three year contract for its insurance coverage and experienced an increase in premium costs upon renewal of its policies. Also during 2012, Mid Penn made increasing use of temporary employees to finalize the conversion of loan and credit documents from paper storage to an electronic storage mechanism, significantly reducing the need for floor space and fire protection safeguards for these documents.

TABLE 5: NONINTEREST EXPENSE

(Dollars in thousands)	Years ended December 31,		
	2013	2012	2011

Investments

Mid Penn's investment portfolio is utilized to provide liquidity and managed to maximize return within reasonable risk parameters.

Mid Penn's entire portfolio of investment securities is considered available for sale. As such, the investments are recorded at fair value. Our investments are valued at a market price relative to investments of the same type with similar maturity dates. As the interest rate environment of these securities changes, the value of securities changes accordingly.

As of December 31, 2013, the unrealized loss on investment securities resulted in a decrease in shareholders' equity of $747,000 (unrealized loss on securities of $1,132,000 plus estimated income tax benefit of $385,000). At December 31, 2012, the unrealized gain on investment securities resulted in an increase in shareholders' equity of $2,432,000 (unrealized gain on securities of $3,685,000 less estimated income tax expense of $1,253,000). Mid Penn does not have any significant concentrations within its portfolio of investment securities. Table 6 provides a summary of our available for sale investment securities.

TABLE 6: FAIR VALUE OF INVESTMENT SECURITIES

(Dollars in thousands)	December 31,		
	2013	2012	2011
U.S. Treasury and U.S. government agencies	$ 12,834	$ 17,740	$ 27,617

Loans

At December 31, 2013, loans and leases totaled $546,462,000, a $62,242,000 or 12.9% increase from December 31, 2012. During 2013, Mid Penn experienced a net increase in commercial real estate, commercial/industrial, and residential real estate loans of approximately $64,060,000. This increase was attributed to the increase in lending opportunities to credit-worthy borrowers within the markets Mid Penn serves as well as enhancements to the lending sales team during 2013.

At December 31, 2013, loans, net of unearned income, represented 80.2% of earning assets as compared to 72.4% on December 31, 2012, and 71.0% on December 31, 2011.

The Bank's loan portfolio is diversified among individuals and small and medium-sized businesses generally located within the Bank's trading area of Dauphin County, lower Northumberland County, western Schuylkill County and eastern Cumberland County. Commercial real estate, construction and land development loans are collateralized mainly by mortgages on the income-producing real estate or land involved. Commercial, industrial and agricultural loans are made to business entities and may be secured by business assets, including commercial real estate, or may be unsecured. Residential real estate loans are secured by liens on the residential property. Consumer loans include installment loans, lines of credit and home equity loans. The Bank has no concentration of credit to any one borrower. The Bank’s highest concentration of credit is in Commercial Real Estate financings.

A distribution of the Bank's loan portfolio according to major loan classification is shown in Table 8.

TABLE 8: LOAN PORTFOLIO

(Dollars in thousands)	December 31,									
	2013		2012		2011		2010		2009	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%

Credit Quality, Credit Risk, and Allowance for Loan and Lease Losses

Other than as described herein, we do not believe there are any trends, events or uncertainties that are reasonably expected to have a material impact on future results of operations, liquidity, or capital resources. Further, based on known information, we believe that the effects of current and past economic conditions and other unfavorable business conditions may influence certain borrowers' abilities to comply with their repayment terms. Mid Penn continues to monitor closely the financial strength of these borrowers. Mid Penn does not engage in practices which may be used to artificially shield certain borrowers from the negative economic or business cycle effects that may compromise their ability to repay. Mid Penn does not normally structure construction loans with interest reserve components. Mid Penn has not in the past performed any commercial real estate or other type loan workouts whereby an existing loan was restructured into multiple new loans. Also, Mid Penn does not extend loans at maturity solely due to the existence of guarantees, without recognizing the credit as impaired. While the existence of a guarantee may be a mitigating factor in determining the proper level of allowance once impairment has been identified, the guarantee does not affect the impairment analysis.

TABLE 10: NONPERFORMING ASSETS

(Dollars in thousands)	December 31,				
	2013	2012	2011	2010	2009
Nonperforming Assets:					
Nonaccrual loans	$ 10,877	$ 11,831	$ 11,800	$ 17,228	$ 14,933
Accruing troubled debt restructured loans	833	426	571	2,323	308
Total nonperforming loans	11,710	12,257	12,371	19,551	15,241
Foreclosed real estate	965	843	931	596	663
Total nonperforming assets	12,675	13,100	13,302	20,147	15,904
Accruing loans 90 days or more past due	-	-	-	19	661
Total risk elements	$ 12,675	$ 13,100	$ 13,302	$ 20,166	$ 16,565
Nonperforming loans as a % of total loans outstanding	2.14%	2.53%	2.56%	4.18%	3.17%
Nonperforming assets as a % of total loans outstanding and other real estate	2.32%	2.71%	2.76%	4.31%	3.31%
Ratio of allowance for loan losses to nonperforming loans	53.94%	44.95%	54.74%	36.12%	50.43%

Mid Penn assesses a specific allocation for both commercial loans and commercial real estate loans prior to charging down or charging off the loan. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact and is not treated as a restructured credit. During 2013, nonperforming loans declined $547,000 from $12,257,000 at December 31, 2012. This improvement has been the result of slight improvement in some sectors of the general economy and maintaining a close relationship with troubled borrowers as they navigate their plan toward a resolution of credit issues.

Mid Penn's troubled debt restructured loans at December 31, 2013 totaled $7,765,000 of which, $833,000 are accruing residential mortgages in compliance with the terms of the modification. $6,932,000 of the troubled debt restructured loans are included in nonaccrual loans. As a result of the evaluation, a specific allocation and, subsequently, charge offs have been taken as appropriate. Further discussion of troubled debt restructured loans can be found in Note 7 to Mid Penn's Consolidated Financial Statements, which are included in Item 8. As of December 31, 2013, there were no defaulted troubled debt restructured loans as all troubled debt restructured loans were current with respect to their associated forbearance agreements.

Mid Penn entered into forbearance agreements on all loans currently classified as troubled debt restructures and all of these agreements have resulted in additional principal repayment. The terms of these forbearance agreements vary whereby principal payments have been decreased, interest rates have been reduced and/or the loan will be repaid as collateral is sold.

The following table provides additional analysis of partially charged-off loans:

TABLE 11: PARTIALLY CHARGED OFF LOANS

(Dollars in thousands)

	December 31, 2013	December 31, 2012
Period ending total loans outstanding (net of unearned income)	$ 546,462	$ 484,220
Allowance for loan and lease losses	6,317	5,509
Total Nonperforming loans	11,710	12,257
Nonperforming and impaired loans with partial charge-offs	2,103	3,744
Ratio of nonperforming loans with partial charge-offs to total loans	0.38%	0.77%
Ratio of nonperforming loans with partial charge-offs to total nonperforming loans	17.96%	30.55%
Coverage ratio net of nonperforming loans with partial charge-offs	65.75%	64.71%
Ratio of total allowance to total loans less nonperforming loans with partial charge-offs	1.16%	1.15%

Mid Penn has not experienced any additional charge-offs on loans for which a partial charge-off had originally been taken.

Mid Penn considers a commercial loan or commercial real estate loan to be impaired when it becomes 90 days or more past due and not in the process of collection. This methodology assumes the borrower cannot or will not continue to make additional payments. At that time the loan would be considered collateral dependent as the discounted cash flow ("DCF") method indicates no operating income is available for evaluating the collateral position; therefore, all impaired loans are deemed to be collateral dependent.

Mid Penn evaluates loans for charge-off on a monthly basis. Policies that govern the recommendation for charge-off are unique to the type of loan being considered. Commercial loans rated as nonaccrual or lower will first have a collateral evaluation completed in accordance with the guidance on impaired loans. Once the collateral evaluation has been completed, a specific allocation of allowance is made based upon the results of the evaluation. In the event the loan is unsecured, the loan would have been charged-off at the recognition of impairment. If the loan is secured, it will undergo a 90 day waiting period to ensure the collateral shortfall identified in the evaluation is accurate and then charged down by the specific allocation. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact (not restructured). Commercial real estate loans rated as impaired will also have an initial collateral evaluation completed in accordance with the guidance on impaired loans. An updated real estate valuation is ordered and the collateral evaluation is modified to reflect any variations in value. A specific allocation of allowance is made for any anticipated collateral shortfall and a 90-day waiting period begins to ensure the accuracy of the collateral shortfall. The loan is then charged down by the specific allocation. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact (not restructured). The process of charge-off for residential mortgage loans begins upon a loan becoming delinquent for 90 days and not in the process of collection. The existing appraisal is reviewed and a lien search is obtained to determine lien position and any instances of intervening liens. A new appraisal of the property will be ordered if deemed necessary by management and a collateral evaluation is completed. The loan will then be charged down to the value indicated in the evaluation. Consumer loans are recommended for charge-off after reaching delinquency of 90 days and the loan is not in the process of collection. The entire balance of the consumer loan is recommended for charge-off at this point.

As noted above, Mid Penn assesses a specific allocation for both commercial loans and commercial real estate loans prior to charging down or charging off the loan. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact (not restructured). In addition, Mid Penn takes a preemptive step when any commercial loan or commercial real estate loan becomes classified under its internal classification system. A preliminary collateral evaluation in accordance with the guidance on impaired loans is prepared using the existing collateral information in the loan file. This process allows Mid Penn to review both the credit and documentation files to determine the status of the information needed to make a collateral evaluation. This collateral evaluation is preliminary but allows Mid Penn to determine if any potential collateral shortfalls exist.

Larger groups of small-balance loans, such as residential mortgages and consumer installment loans are collectively evaluated for impairment. Accordingly, individual consumer and residential loans are not separately identified for impairment disclosures unless such loans are the subject of a restructuring agreement.

Mid Penn's rating system assumes any loans classified as sub-standard non-accrual to be impaired, and all of these loans are considered collateral dependent; therefore, all of Mid Penn's impaired loans, whether reporting a specific allocation or not, are considered collateral dependent.

It is Mid Penn's policy to obtain updated third party valuations on all impaired loans collateralized by real estate within 30 days of the credit being classified as sub-standard non-accrual. Prior to receipt of the updated real estate valuation Mid Penn will use any existing real estate valuation to determine any potential allowance issues; however no allowance recommendation will be made until which time Mid Penn is in receipt of the updated valuation. The credit department employs an electronic tracking system to monitor the receipt of and need for updated appraisals. To date, there have been no significant time lapses noted with the above processes.

In some instances Mid Penn is not holding real estate as collateral and is relying on business assets (personal property) for repayment. In these circumstances a collateral inspection is performed by Mid Penn personnel to determine an estimated value. The value is based on net book value, as provided by the financial statements, and discounted accordingly based on determinations made by management. Occasionally, Mid Penn will employ an outside service to provide a fair estimate of value based on auction sales or private sales. Management reviews the estimates of these third parties and discounts them accordingly based on management's judgment, if deemed necessary.

For impaired loans with no valuation allowance required, Mid Penn's practice of obtaining independent third party market valuations on the subject property within 30 days of being placed on non-accrual status sometimes indicates that the loan to value ratio is sufficient to obviate the need for a specific allocation in spite of significant deterioration in real estate values in Mid Penn's primary market area. These circumstances are determined on a case by case analysis of the impaired loans.

Mid Penn actively monitors the values of collateral on impaired loans. This monitoring may require the modification of collateral values over time or changing circumstances by some factor, either positive or negative, from the original values. All collateral values will be assessed by management at least every 12 months for possible revaluation by an independent third party.

Mid Penn does not currently, or plan in the future to, use automated valuation methodologies as a method of valuing real estate collateral.

As of December 31, 2013, Mid Penn had several unrelated loan relationships, with an aggregate carrying balance of $10,912,000, deemed impaired. This pool of loans is further broken down into a group of loans with an aggregate carrying balance of $7,838,000 for which specific allocations totaling $1,933,000 have been included within the loan loss reserve for these loans. The remaining $3,074,000 of loans requires no specific allocation within the loan loss reserve. The $10,912,000 pool of impaired loan relationships is comprised of $9,014,000 in real estate secured commercial relationships and $1,898,000 in business relationships. There are specific allocations against the real estate secured pool totaling $1,343,000, spread among thirteen relationships composed primarily of customers engaged in real estate investment activities. The group of impaired business relationships with specific allocations is made up of four relationships and a specific allocation of $590,000 has been set aside against these credits. One large commercial participation loan in this pool has shown exceptional collateral devaluation and is responsible for a specific allocation of $548,000 of the total pool attributable to this segment. Management currently believes that the specific reserves are adequate to cover probable future losses related to these relationships.

The allowance for loan losses is a reserve established in the form of a provision expense for loan and lease losses and is reduced by loan charge-offs net of recoveries. In conjunction with an internal loan review function that operates independently of the lending function, management monitors the loan portfolio to identify risk on a monthly basis so that an appropriate allowance is maintained. Based on an evaluation of the loan portfolio, management presents a monthly review of the allowance for loan and lease losses to the Board of Directors, indicating any changes in the allowance since the last review. In making the evaluation, management considers the results of recent regulatory examinations, which typically include a review of the allowance for loan and lease losses an integral part of the examination process.

In establishing the allowance, management evaluates on a quantitative basis individual classified loans and nonaccrual loans, and determines an aggregate reserve for those loans based on that review. In addition, an allowance for the remainder of the loan and lease portfolio is determined based on historical loss experience within certain components of the portfolio. These allocations may be modified if current conditions indicate that loan and lease losses may differ from historical experience.

In addition, a portion of the allowance is established for losses inherent in the loan and lease portfolio which have not been identified by the quantitative processes described above. This determination inherently involves a higher degree of subjectivity, and considers risk factors that may not have yet manifested themselves in historical loss experience. These factors include:

- Changes in local, regional, and national economic and business conditions affecting the collectability of the portfolio, the values of underlying collateral, and the condition of various market segments.
- Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified loans.
- Changes in the experience, ability, and depth of lending management and other relevant staff as well as the quality of the institution's loan review system.
- Changes in the nature and volume of the portfolio and the terms of loans generally offered.
- The existence and effect of any concentrations of credit and changes in the level of such concentrations.

While the allowance for loan and lease losses is maintained at a level believed to be adequate by management for covering estimated losses in the loan and lease portfolio, determination of the allowance is inherently subjective, as it requires estimates, all of which may be susceptible to significant change. Changes in these estimates may impact the provisions charged to expense in future periods.

Management believes, based on information currently available, that the allowance for loan and lease losses of $6,317,000 is adequate as of December 31, 2013.

The allocation of the allowance for loan and lease losses among the major classifications is shown in Table 12 as of December 31 of each of the past five years.

TABLE 12: ALLOCATION OF THE ALLOWANCE FOR LOAN AND LEASE LOSSES

(Dollars in thousands)	December 31,				
	2013	2012	2011	2010	2009
Commercial real estate, construction and land development	$ 4,015	$ 3,122	$ 3,567	$ 3,775	$ 3,334
Commercial, industrial and agricultural	1,187	1,299	2,276	2,448	3,545
Real estate - residential	581	635	362	219	175
Consumer	513	444	424	424	467
Unallocated	21	9	143	195	165
	$ 6,317	$ 5,509	$ 6,772	$ 7,061	$ 7,686

The 2013 provision of $1,685,000 is an increase of $649,000 from the $1,036,000 provision in 2012. The growth in the loan portfolio during 2013, as well as increases in some specific reserves, necessitated a larger provision in 2013. See also the discussion in the Provision for Loan and Lease Losses section.

The allowance for loan and lease losses at December 31, 2013 was $6,317,000, or 1.16%, of total loans less unearned discount as compared to $5,509,000, or 1.14%, at December 31, 2012 and $6,772,000, or 1.40%, at December 31, 2011.

Deposits and Other Funding Sources

Mid Penn's primary source of funds are deposits. Total deposits at December 31, 2013 decreased by $17,331,000, or 2.8%, over December 31, 2012, which decreased by $8,594,000, or 1.4%, over December 31, 2011. Average balances and average interest rates applicable to the major classifications of deposits for the years ended December 31, 2013, 2012, and 2011 are presented in Table 13.

Average short-term borrowings for 2013 were $10,533,000 as compared to $1,044,000 in 2012. These borrowings consisted of federal funds purchased.

At December 31, 2013, the Bank had $2,750,000 in brokered deposits, a decrease of $1,378,000, or 33.4%, over December 31, 2012, which decreased by $9,226,000, or 69.1%, over the same period in 2011. With continued success in the local deposit environment, along with the maturity of a $10,000,000 brokered certificate of deposit in 2012, the Bank has virtually eliminated its brokered deposit funding.

TABLE 13: DEPOSITS BY MAJOR CLASSIFICATION

(Dollars in thousands)	December 31,					
	2013		2012		2011	
	Average Balance	Average Rate	Average Balance	Average Rate	Average Balance	Average Rate
Noninterest-bearing demand deposits	$ 49,318	0.00%	$ 47,670	0.00%	$ 63,484	0.00%
Interest-bearing demand deposits	182,118	0.36%	126,171	0.36%	57,342	0.25%
Money market	202,393	0.59%	236,434	0.84%	248,615	1.20%
Savings	29,597	0.05%	28,632	0.05%	27,801	0.05%
Time	148,863	1.73%	180,356	2.04%	209,574	2.56%
	$ 612,289	0.72%	$ 619,263	0.99%	$ 606,816	1.40%

The maturity distribution of time deposits of $100,000 or more is reflected in Table 14.

TABLE 14: MATURITY OF TIME DEPOSITS $100,000 OR MORE

(Dollars in thousands)	December 31,		
	2013	2012	2011
Three months or less	$ 4,745	$ 7,207	$ 7,824
Over three months to twelve months	16,953	18,340	21,979
Over twelve months	24,230	32,763	36,807
	$ 45,928	$ 58,310	$ 66,610

Capital Resources

Shareholders' equity, or capital, is evaluated in relation to total assets and the risk associated with those assets. The detailed computation of the Bank's regulatory capital ratios can be found in Note 17 of Item 8, Notes to Consolidated Financial Statements. The greater a corporation's capital resources, the more likely it is to meet its cash obligations and absorb unforeseen losses. Too much capital, however, indicates that not enough of the corporation's earnings have been invested in the continued growth of the business or paid to shareholders. The buildup makes it difficult for a corporation to offer a competitive return on the shareholders' capital going forward. For these reasons capital adequacy has been, and will continue to be, of paramount importance.

Shareholders' equity increased in 2013 by $696,000, or 1.3%, following a decrease in 2012 of $1,232,000, or 2.3%, and an increase in 2011 by $5,251,000, or 10.9%. Capital was positively impacted in 2013 by the net income available to common shareholders of $4,616,000; however, the increase was muted by an increase in accumulated other comprehensive loss. Capital was negatively impacted in 2012 by the repayment and redemption of the $10,000,000 in the Series A preferred stock, but the impact was softened by the net income available to common shareholders of $4,437,000 and the issuance of the $4,880,000 in Series B preferred stock in 2012. Subsequently, the Series B preferred stock offering of $5,000,000 was completed on January 3, 2013. Capital was positively impacted in 2011 by the net income available to common shareholders of $4,029,000 and the increase in other comprehensive income from the increase in value of the assets in the available for sale investment portfolio.

Mid Penn's normal intent for dividend payout is to provide quarterly cash returns to shareholders and earnings retention at a level sufficient to finance future growth. The dividends paid on common shares totaled $0.25 for the years ended December 31, 2013 and December 31, 2012, while $0.20 in dividends were paid for the year ended December 31, 2011.

The dividend payout ratio, which represents the percentage of annual net income returned to shareholders in the form of cash dividends, was 18.94% for 2013 and 19.69% for 2012.

Mid Penn maintained the following regulatory capital levels, leverage ratios, and risk-based capital ratios as of December 31, 2013, and 2012, as follows:

(Dollars in thousands)	Capital Adequacy					
	Actual		Minimum Capital Required		To Be Well-Capitalized Under Prompt Corrective Action Provisions

Capital Purchase Program Participation

On December 19, 2008, Mid Penn entered into and closed a letter agreement with the United States Department of the Treasury (the "Treasury") pursuant to which the Treasury invested $10,000,000 in Mid Penn under the Treasury's Capital Purchase Program (the "CPP"). Under the letter agreement, the Treasury received (1) 10,000 shares of Series A Fixed Rate Cumulative Perpetual Preferred Stock, $1,000 liquidation preference ("Series A Preferred Stock"), and (2) warrants to purchase up to 73,099 shares of the Mid Penn common stock at an exercise price of $20.52 per share (the "Warrants").

On December 28, 2012, Mid Penn entered into a letter agreement with the Treasury pursuant to which Mid Penn repurchased from the Treasury all 10,000 shares of the Series A Preferred Stock issued to the Treasury, which constitutes all of the issued and outstanding shares of Series A Preferred Stock. Mid Penn repurchased the Series A Preferred Stock for a purchase price equal to the aggregate liquidation amount of the Preferred Stock of $10,000,000, plus accrued but unpaid dividends of $59,722. All 10,000 shares of Series A Preferred Stock have subsequently been cancelled.

On January 23, 2013, Mid Penn entered into a letter agreement with the Treasury pursuant to which Mid Penn repurchased from the Treasury on that date the Warrants for $58,479. The Warrants have subsequently been cancelled.

As of the date hereof, Mid Penn has no further financial obligations under the Series A Preferred Stock, the Warrants, or the Treasury's CPP.

Federal Income Taxes

Federal income tax expense for 2013 was $1,201,000 compared to $1,244,000 in 2012 and $1,223,000 in 2011. The effective tax rate was 20% for 2013 and 2012, and 21% for 2011.

The tax expense in 2013 and 2012 resulted from net income generated in the normal course of business. Generally, our effective tax rate is below the statutory rate due to earnings on tax-exempt loans, investments, and bank-owned life insurance, and the impact of tax credits. The realization of deferred tax assets is dependent on future earnings. As a result of Mid Penn's adoption of ASC Topic 740, *Income Taxes*, no significant income tax uncertainties were identified; therefore, Mid Penn recognized no adjustment for unrealized income tax benefits for the periods ended December 31, 2013 and December 31, 2012. We currently anticipate that future earnings will be adequate to fully utilize deferred tax assets.

Liquidity

Mid Penn's asset-liability management policy addresses the management of Mid Penn's liquidity position and its ability to raise sufficient funds to meet deposit withdrawals, fund loan growth and meet other operational needs. Mid Penn utilizes its investments as a source of liquidity, along with deposit growth and increases in repurchase agreements and borrowings. (See Deposits and Other Funding Sources which appears earlier in this discussion.) Liquidity from investments is provided primarily through investments and interest-bearing balances with maturities of one year or less. Funds are available to Mid Penn through loans from the Federal Home Loan Bank and established federal funds (overnight) lines of credit. Mid Penn's major source of funds is its core deposit base.

Major sources of cash in 2013 came from the maturity of investment securities and interest-bearing time deposits totaling $53,151,000, the increase in short-term borrowings of $23,833,000, and the sale of investment securities of $15,118,000.

Major uses of cash in 2013 were the increase in net loans and leases of $65,896,000, the purchases of investment securities of $27,881,000 and decrease in time deposits of $31,280,000.

Major sources of cash in 2012 came from the maturity of investment securities of $39,453,000, the sale of investment securities of $17,895,000, and the increase in demand deposit and savings accounts of $29,645,000.

Major uses of cash in 2012 were the purchases of investment securities of $53,553,000, as well as the decrease in time deposits of $38,239,000.

Aggregate Contractual Obligations

Table 15 represents Mid Penn's on-and-off balance sheet aggregate contractual obligations to make future payments as of December 31, 2013.

TABLE 15: AGGREGATE CONTRACTUAL OBLIGATIONS

(Dollars in thousands)			Payments Due by Period			
	Note Reference	Total	One Year or Less	One to Three Years	Three to Five Years	More than Five Years
Certificates of deposit	9	$ 132,373	$ 60,006	$ 59,196	$ 11,451	$ 1,720
Long-term debt	11	23,145	-	20,000	-	3,145
Operating lease obligations	19	141	113	28	-	-
Payments under benefit plans	13	1,681	133	320	344	884
		$ 157,340	$ 60,252	$ 79,544	$ 11,795	$ 5,749

We are not aware of any other commitments or contingent liabilities which may have a material adverse impact on Mid Penn's liquidity or capital resources.

Effects of Inflation

A bank's asset and liability structure is substantially different from that of an industrial company in that virtually all assets and liabilities of a bank are monetary in nature. Management believes the impact of inflation on its financial results depends principally upon Mid Penn's ability to manage the balance sheet sensitivity to changes in interest rates and, by such reaction, mitigate the inflationary impact on performance. Interest rates do not necessarily move in the same direction or at the same magnitude as the prices of other goods and services. As discussed previously, Management seeks to manage the relationship between interest sensitive assets and liabilities in order to protect against wide interest rate fluctuations, including those resulting from inflation.

Information shown elsewhere in this Annual Report will assist in the understanding of how Mid Penn is positioned to react to changing interest rates and inflationary trends. In particular, the summary of net liabilities, as well as the composition of loans, investments and deposits should be considered.

Off-Balance Sheet Items

Mid Penn makes contractual commitments to extend credit and extends lines of credit, which are subject to Mid Penn's credit approval and monitoring procedures.

As of December 31, 2013, commitments to extend credit amounted to $141,616,000 as compared to $99,958,000 as of December 31, 2012.

Mid Penn also issues standby letters of credit to its customers. The risk associated with standby letters of credit is essentially the same as the credit risk involved in loan extensions to customers. Standby letters of credit decreased to $8,458,000 at December 31, 2013, from $10,417,000 at December 31, 2012.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a financial institution, Mid Penn's primary source of market risk is interest rate risk. Interest rate risk is the exposure to fluctuations in Mid Penn's future earnings (earnings at risk) resulting from changes in interest rates. This exposure or sensitivity is a function of the repricing characteristics of Mid Penn's portfolio of assets and liabilities. Each asset and liability reprices either at maturity or during the life of the instrument. Interest rate sensitivity is measured as the difference between the volume of assets and liabilities that are subject to repricing in a future period of time.

The principal purpose of asset-liability management is to maximize current and future net interest income within acceptable levels of interest rate risk while satisfying liquidity and capital requirements. Net interest income is increased by increasing the net interest margin and by volume growth. Thus the goal of interest rate risk management is to maintain a balance between risk and reward such that net interest income is maximized while risk is maintained at an acceptable level.

Mid Penn utilizes an asset-liability management model to measure the impact of interest rate movements on its interest rate sensitivity position. Mid Penn's management also reviews the traditional maturity gap analysis regularly. Mid Penn does not always attempt to achieve an exact match between interest sensitive assets and liabilities because it believes that an actively managed amount of interest rate risk is inherent and appropriate in the management of the Corporation's profitability.

Modeling techniques and simulation analysis involve assumptions and estimates that inherently cannot be measured with complete precision. Key assumptions in the analyses include maturity and repricing characteristics of assets and liabilities, prepayments on amortizing assets, non-maturing deposit sensitivity, and loan and deposit pricing. These assumptions are inherently uncertain due to the timing, magnitude and frequency of rate changes and changes in market conditions and management strategies, among other factors. However, the analyses are useful in quantifying risk and provide a relative gauge of Mid Penn's interest rate risk position over time.

Management reviews interest rate risk on a quarterly basis. This analysis includes earnings scenarios whereby interest rates are increased and decreased by 100, 200, and 300 basis points. These scenarios, detailed in Table 16, indicate that Mid Penn would experience enhanced net interest income over a one-year time frame due to upward interest rate changes, while a reduction in interest rates would result in a less pronounced reduction in net interest income over a one-year time frame; however, actual results could vary significantly from the calculations prepared by Management. At December 31, 2013, all interest rate risk levels according to the model were within the tolerance limits of Board approved policy.

TABLE 16: EFFECT OF HYPOTHETICAL CHANGES IN INTEREST RATES

December 31, 2013			December 31, 2012

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
Mid Penn Bancorp, Inc.
Millersburg, Pennsylvania

We have audited the accompanying consolidated balance sheet of Mid Penn Bancorp, Inc. and subsidiaries, (the "Corporation") as of December 31, 2013 and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Corporation is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Mid Penn Bancorp, Inc. and subsidiaries at December 31, 2013, and the results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
Mid Penn Bancorp, Inc.

We have audited the accompanying consolidated balance sheet of Mid Penn Bancorp, Inc. and subsidiaries (the "Corporation") as of December 31, 2012, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2012. The Corporation's management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Corporation is not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for expressing an opinion on the effectiveness of the Corporation's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Corporation as of December 31, 2012, and the results of their operations and their cash flows for each of the years in the two-year period ended December 31, 2012 in conformity with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these consolidated financial statements.

(1) Basis of Presentation

The accompanying consolidated financial statements include the accounts of Mid Penn Bancorp, Inc. and its wholly-owned subsidiary Mid Penn Bank ("Bank"), and the Bank's wholly-owned subsidiary Mid Penn Insurance Services, LLC (collectively, "Mid Penn"). All material intercompany accounts and transactions have been eliminated in consolidation.

Each of Mid Penn's lines of business are part of the same reporting segment, community banking, whose operating results are regularly reviewed and managed by a centralized executive management group. As a result, Mid Penn has only one reportable segment for financial reporting purposes.

For comparative purposes, the December 31, 2012 and December 31, 2011 balances have been reclassified to conform to the 2013 presentation. Such reclassifications had no impact on net income.

Mid Penn has evaluated events and transactions occurring subsequent to the balance sheet date of December 31, 2013, for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

(2) Nature of Business

The Bank engages in a full-service commercial banking and trust business, making available to the community a wide range of financial services, including, but not limited to, installment loans, mortgage and home equity loans, secured and unsecured commercial and consumer loans, lines of credit, construction financing, farm loans, community development loans, loans to non-profit entities and local government loans and various types of time and demand deposits, including but not limited to, checking accounts, savings accounts, clubs, money market deposit accounts, certificates of deposit and IRAs. In addition, the Bank provides a full range of trust services through its Trust Department. Deposits are insured by the Federal Deposit Insurance Corporation ("FDIC") to the extent provided by law.

The financial services are provided to individuals, partnerships, non-profit organizations, and corporations through its fourteen offices located in Dauphin County, the southern portion of Northumberland County, the western portion of Schuylkill County and the eastern portion of Cumberland County.

Mid Penn Insurance Services, LLC, a wholly-owned subsidiary of the Bank, provides a wide array of personal and commercial insurance products. Income from Mid Penn Insurance Services, LLC is not material to Mid Penn.

(3) Summary of Significant Accounting Policies

The accounting and reporting policies of Mid Penn conform with accounting principles generally accepted in the United States of America ("GAAP") and to general practice within the financial industry. The following is a description of the more significant accounting policies.

(a) Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan and lease losses, the valuation of deferred tax assets, the assessment of other-than-temporary impairment of investment securities, and core deposit intangible and goodwill valuation.

(b) Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash on hand, balances due from banks, and federal funds sold, all of which mature within ninety days.

(c) Investment Securities

Available for sale securities include debt and equity securities. Debt and equity securities are reported at fair value, with unrealized holding gains and losses excluded from earnings and reported, net of deferred income taxes, as a component of accumulated other comprehensive income (loss) within shareholders' equity. Realized gains and losses on sales of

investment securities are computed on the basis of specific identification of the cost of each security. Net gains on sales of investment securities were $220,000 in 2013, $267,000 in 2012, and $0 in 2011. Mid Penn had no held to maturity securities in 2013 and 2012.

(d) Loans and Allowance for Loan and Lease Losses

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at their outstanding unpaid principal balances, net of an allowance for loan losses and any deferred fees or costs. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) of the related loans. These amounts are generally being amortized over the contractual life of the loan. Premiums and discounts on purchased loans are amortized as adjustments to interest income using the effective yield method.

The loan portfolio is segmented into commercial and consumer loans. Commercial loans consist of the following classes: commercial and industrial, commercial real estate, commercial real estate-construction and lease financing. Consumer loans consist of the following classes: residential mortgage loans, home equity loans and other consumer loans.

For all classes of loans, the accrual of interest is discontinued when the contractual payment of principal or interest has become 90 days or more past due or management has serious doubts about further collectability of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against the allowance for loan and lease losses. Interest received on nonaccrual loans, including impaired loans, generally is either applied against principal or reported as interest income, according to management's judgment as to the collectability of principal. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time (generally six months) and the ultimate collectability of the total contractual principal and interest is no longer in doubt. The past due status of all classes of loans receivable is determined based on contractual due dates for loan payments.

Commercial and industrial

Mid Penn originates commercial and industrial loans. Most of the Bank's commercial and industrial loans have been extended to finance local and regional businesses and include short-term loans to finance machinery and equipment purchases, inventory, and accounts receivable. Commercial loans also involve the extension of revolving credit for a combination of equipment acquisitions and working capital in expanding companies.

The maximum term for loans extended on machinery and equipment is based on the projected useful life of such machinery and equipment. Generally, the maximum term on non-mortgage lines of credit is one year. The loan-to-value ratio on such loans and lines of credit generally may not exceed 80% of the value of the collateral securing the loan. The Bank's commercial business lending policy includes credit file documentation and analysis of the borrower's character, capacity to repay the loan, the adequacy of the borrower's capital and collateral as well as an evaluation of conditions affecting the borrower. Analysis of the borrower's past, present, and future cash flows is also an important aspect of the Bank's current credit analysis. Nonetheless, such loans are believed to carry higher credit risk than more traditional investments.

Commercial and industrial loans typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial business loans may be substantially dependent on the success of the business itself, which, in turn, is likely to be dependent upon the general economic environment. Mid Penn's commercial and industrial loans are usually, but not always, secured by business assets and personal guarantees. However, the collateral securing the loans may depreciate over time, may be difficult to appraise, and may fluctuate in value based on the success of the business.

Commercial real estate and commercial real estate - construction

Commercial real estate and commercial real estate construction loans generally present a higher level of risk than loans secured by one to four family residences. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effect of general economic conditions on income producing properties, and the increased difficulty of evaluating and monitoring these types of loans. In addition, the repayment of loans secured by commercial real estate is typically dependent upon the successful operation of the related real estate project. If the cash flow from the project is reduced, the borrower's ability to repay the loan may be impaired.

Lease financing

Mid Penn originates leases for select commercial and state and municipal government lessees. The nature of the leased asset is often subject to rapid depreciation in salvage value over a relatively short time frame or may be of an industry specific nature, making appraisal or liquidation of the asset difficult. These factors have led the Bank to severely curtail the origination of new leases to state or municipal government agencies where default risk is extremely limited and to only the most credit-worthy commercial customers. These commercial customers are primarily leasing fleet vehicles for use in their primary line of business, mitigating some of the asset value concerns within the portfolio. Leasing has been a declining percentage of the Mid Penn's portfolio since 2006, representing 0.25% of the portfolio at December 31, 2013.

Residential mortgage

Mid Penn offers a wide array of residential mortgage loans for both permanent structures and those under construction. The Bank's residential mortgage originations are secured primarily by properties located in its primary market and surrounding areas. Residential mortgage loans have terms up to a maximum of 30 years and with loan to value ratios up to 100% of the lesser of the appraised value of the security property or the contract price. Private mortgage insurance is generally required in an amount sufficient to reduce the Bank's exposure to at or below the 85% loan to value level. Residential mortgage loans generally do not include prepayment penalties.

In underwriting residential mortgage loans, the Bank evaluates both the borrower's ability to make monthly payments and the value of the property securing the loan. Most properties securing real estate loans made by Mid Penn are appraised by independent fee appraisers. The Bank generally requires borrowers to obtain an attorney's title opinion or title insurance and fire and property insurance (including flood insurance, if necessary) in an amount not less than the amount of the loan. Real estate loans originated by the Bank generally contain a "due on sale" clause allowing the Bank to declare the unpaid principal balance due and payable upon the sale of the security property.

The Bank underwrites residential mortgage loans to the standards established by the secondary mortgage market, i.e., Fannie Mae, Ginnie Mae, Freddie Mac, or Pennsylvania Housing Finance Agency standards, with the intention of selling the majority of residential mortgages originated into the secondary market. In the event that the facts and circumstances surrounding a residential mortgage application do not meet all underwriting conditions of the secondary mortgage market, the Bank will evaluate the failed conditions and evaluate the potential risk of holding the residential mortgage in the Bank's portfolio rather than rejecting the loan request. In the event that the loan is held in the Bank's portfolio, the interest rate on the residential mortgage would be increased to compensate for the added portfolio risk.

Consumer, including home equity

Mid Penn offers a variety of secured consumer loans, including home equity, automobile, and deposit secured loans. In addition, the Bank offers other secured and unsecured consumer loans. Most consumer loans are originated in Mid Penn's primary market and surrounding areas.

The largest component of Mid Penn's consumer loan portfolio consists of fixed rate home equity loans and variable rate home equity lines of credit. Substantially all home equity loans and lines of credit are secured by second mortgages on principal residences. The Bank will lend amounts, which, together with all prior leins, typically may be up to 85% of the appraised value of the property securing the loan. Home equity term loans may have maximum terms up to 20 years while home equity lines of credit generally have maximum terms of five years.

Consumer loan terms vary according to the type and value of collateral, length of contract and creditworthiness of the borrower. The underwriting standards employed by the Bank for consumer loans include an application, a determination of the applicant's payment history on other debts and an assessment of ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of the applicant is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, in relation to the proposed loan amount.

Consumer loans may entail greater credit risk than do residential mortgage loans, particularly in the case of consumer loans which are unsecured or are secured by rapidly depreciable assets, such as automobiles or recreational equipment. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount that can be recovered on such loans.

Allowance for Loan and Lease Losses

The allowance for credit losses consists of the allowance for loan and lease losses and the reserve for unfunded lending commitments. The allowance for loan and lease losses represents management's estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The reserve for unfunded lending commitments represents management's estimate of losses inherent in its unfunded loan commitments and is recorded in other liabilities on the consolidated balance sheet and was $90,000 at December 31, 2013 and 2012. The allowance for loan and lease losses is increased by the provision for loan and lease losses, and decreased by charge-offs, net of recoveries. Loans deemed to be uncollectible are charged against the allowance for loan and lease losses, and subsequent recoveries, if any, are credited to the allowance. All, or part, of the principal balance of loans are charged off to the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely. Non-residential consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible. Because all identified losses are immediately charged off, no portion of the allowance for loan and lease losses is restricted to any individual loan or groups of loans, and the entire allowance is available to absorb any and all loan losses.

The allowance for credit losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. Management performs a monthly evaluation of the adequacy of the allowance. The allowance is based on Mid Penn's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as impaired. For loans that are classified as impaired, an allowance is established when the discounted cash flows, collateral value, or observable market price of the impaired loan is lower than the carrying value of that loan. The general component covers pools of loans by loan class including commercial loans not considered impaired, as well as smaller balance homogeneous loans, such as residential real estate, home equity and other consumer loans. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these categories of loans, adjusted for qualitative factors. These qualitative risk factors include changes in economic conditions, fluctuations in loan quality measures, changes in the experience of the lending staff and loan review systems, growth or changes in the mix of loans originated, and shifting industry or portfolio concentrations.

Each factor is assigned a value to reflect improving, stable or declining conditions based on management's best judgment using relevant information available at the time of the evaluation. Adjustments to the factors are supported through documentation of changes in conditions in a narrative accompanying the allowance for loan loss calculation.

Mid Penn considers a commercial loan (consisting of commercial and industrial, commercial real estate, commercial real estate-construction, and lease financing loan classes) to be impaired when it becomes 90 days or more past due and not in the process of collection. This methodology assumes the borrower cannot or will not continue to make additional payments. At that time the loan would be considered collateral dependent as the discounted cash flow ("DCF") method indicates no operating income is available for evaluating the collateral position; therefore, all impaired loans are deemed to be collateral dependent.

In addition, Mid Penn's rating system assumes any loans classified as sub-standard non-accrual to be impaired, and all of these loans are considered collateral dependent; therefore, all of Mid Penn's impaired loans, whether reporting a specific allocation or not, are considered collateral dependent.

Mid Penn evaluates loans for charge-off on a monthly basis. Policies that govern the recommendation for charge-off are unique to the type of loan being considered. Commercial loans rated as nonaccrual or lower will first have a collateral evaluation completed in accordance with the guidance on impaired loans. Once the collateral evaluation has been completed, a specific allocation of allowance is made based upon the results of the evaluation. In the event the loan is unsecured, the loan would have been charged-off at the recognition of impairment. If the loan is secured, it will undergo a 90 day waiting period to ensure the collateral shortfall identified in the evaluation is accurate and then charged down by the specific allocation. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact (not restructured). Commercial loans secured by real estate rated as impaired will also have an initial collateral evaluation completed in accordance with the guidance on impaired loans. An updated real estate valuation is ordered and the collateral evaluation is modified to reflect any variations in value. A specific allocation of allowance is made for any anticipated collateral shortfall and a 90 day waiting period begins to ensure the accuracy of the collateral shortfall. The loan is then charged down by the specific allocation. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact (not restructured). The process of charge-off for residential mortgage loans begins upon a loan becoming delinquent for 90 days and not in the process of collection. The

existing appraisal is reviewed and a lien search is obtained to determine lien position and any instances of intervening liens. A new appraisal of the property will be ordered if deemed necessary by management and a collateral evaluation is completed. The loan will then be charged down to the value indicated in the evaluation. Consumer loans (including home equity loans and other consumer loans) are recommended for charge-off after reaching delinquency of 90 days and the loan is not in the process of collection. The entire balance of the consumer loan is recommended for charge-off at this point.

As noted above, Mid Penn assesses a specific allocation for commercial loans prior to charging down or charging off the loan. Once the charge down is taken, the remaining balance remains a nonperforming loan with the original terms and interest rate intact (not restructured). In addition, Mid Penn takes a preemptive step when any commercial loan becomes classified under its internal classification system. A preliminary collateral evaluation in accordance with the guidance on impaired loans is prepared using the existing collateral information in the loan file. This process allows Mid Penn to review both the credit and documentation files to determine the status of the information needed to make a collateral evaluation. This collateral evaluation is preliminary but allows Mid Penn to determine if any potential collateral shortfalls exist.

It is Mid Penn's policy to obtain updated third party valuations on all impaired loans collateralized by real estate within 30 days of the credit being classified as sub-standard non-accrual. Prior to receipt of the updated real estate valuation Mid Penn will use any existing real estate valuation to determine any potential allowance issues; however no allowance recommendation will be made until which time Mid Penn is in receipt of the updated valuation. The credit department employs an electronic tracking system to monitor the receipt of and need for updated appraisals. To date, there have been no significant time lapses noted with the above processes.

In some instances Mid Penn is not holding real estate as collateral and is relying on business assets (personal property) for repayment. In these circumstances a collateral inspection is performed by Mid Penn personnel to determine an estimated value. The value is based on net book value, as provided by the financial statements, and discounted accordingly based on determinations made by management. Occasionally, Mid Penn will employ an outside service to provide a fair estimate of value based on auction sales or private sales. Management reviews the estimates of these third parties and discounts them accordingly based on management's judgment, if deemed necessary.

For impaired loans with no valuation allowance required, Mid Penn's practice of obtaining independent third party market valuations on the subject property within 30 days of being placed on non-accrual status sometimes indicates that the loan to value ratio is sufficient to obviate the need for a specific allocation in spite of significant deterioration in real estate values in Mid Penn's primary market area. These circumstances are determined on a case by case analysis of the impaired loans.

Mid Penn actively monitors the values of collateral on impaired loans. This monitoring may require the modification of collateral values over time or changing circumstances by some factor, either positive or negative, from the original values. All collateral values will be assessed by management at least every 18 months for possible revaluation by an independent third party.

Mid Penn does not currently, or plan in the future to, use automated valuation methodologies as a method of valuing real estate collateral.

An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, Mid Penn does not separately identify individual residential mortgage loans, home equity loans and other consumer loans for impairment disclosures, unless such loans are the subject of a troubled debt restructuring agreement.

Loans whose terms are modified are classified as troubled debt restructurings if the borrowers have been granted concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a temporary reduction in interest rate or an extension of a loan's stated maturity date. Non-accrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive months after modification. Loans classified as troubled debt restructurings are designated as impaired.

The allowance calculation methodology includes further segregation of loan classes into risk rating categories. The borrower's overall financial condition, repayment sources, guarantors, and value of collateral, if appropriate, are evaluated annually for commercial loans or when credit deficiencies arise, such as delinquent loan payments. Credit quality risk ratings include regulatory classifications of special mention, substandard, doubtful, and loss. Loans criticized as special mention have potential weaknesses that deserve management's close attention. If uncorrected, the potential weaknesses may result in deterioration of the repayment prospects. Loans classified substandard have a well-defined weakness or

weaknesses that jeopardize the liquidation of the debt. They include loans that are inadequately protected by the current sound net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified doubtful have all the weaknesses inherent in loans classified substandard with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable. Loans classified as a loss are considered uncollectible and are charged to the allowance for loan losses. Any loans not classified as noted above are rated pass.

In addition, Federal and State regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan and lease losses and may require the Bank to recognize additions to the allowance based on their judgments about information available to them at the time of their examination, which may not be currently available to management. Based on management's comprehensive analysis of the loan portfolio, management believes the current level of the allowance for loan losses is adequate.

(e) Bank Premises and Equipment

Land is carried at cost. Buildings, furniture, fixtures, equipment, land improvements, and leasehold improvements are stated at cost less accumulated depreciation. Depreciation is computed by the straight-line method over the estimated useful lives of the assets. Building assets are depreciated using an estimated useful life of five to fifty years. Furniture, fixtures, and equipment are depreciated using an estimated useful life of three to ten years. Land improvements are depreciated over an estimated useful life of ten to twenty years. Leasehold improvements are depreciated using an estimated useful life that is the lesser of the remaining life of the lease or ten to thirty years. Maintenance and normal repairs are charged to expense when incurred, while major additions and improvements are capitalized. Gains and losses on disposals are reflected in current operations.

(f) Restricted Investment in Federal Home Loan Bank Stock

The Bank owns restricted stock investments in the Federal Home Loan Bank ("FHLB"). Federal law requires a member institution of the FHLB to hold stock according to a predetermined formula. The stock is carried at cost. In December 2008, the FHLB of Pittsburgh notified member banks that it was suspending dividend payments and the repurchase of capital stock; however, the dividend was reinstated in February 2012. Total dividends received in 2013 and 2012 totaled $20,000 and $5,000, respectively. During 2012 and 2013, the FHLB of Pittsburgh performed limited excess capital stock repurchases each calendar quarter. Any future capital stock repurchases will be made on a quarterly basis if conditions warrant such repurchases.

Management evaluates the restricted stock for impairment on an annual basis. Management's determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of their cost is influenced by criteria such as (1) the significance of the decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the FHLB.

Management believes no impairment charge is necessary related to the FHLB restricted stock as of December 31, 2013 and 2012.

(g) Foreclosed Assets Held for Sale

Foreclosed assets held for sale consist primarily of real estate acquired through, or in lieu of, foreclosure in settlement of debt and are recorded at fair value less cost to sell at the date of transfer, establishing a new cost basis. Any valuation adjustments required at the date of transfer are charged to the allowance for loan losses. Subsequent to acquisition, foreclosed assets are carried at fair value less costs of disposal, based upon periodic evaluations that consider changes in market conditions and development and disposal costs. Operating results from assets acquired in satisfaction of debt, including rental income less operating costs and gains or losses on the sale of, or the periodic evaluation of foreclosed assets, are recorded in noninterest expense.

(h) Mortgage Servicing Rights

Mortgage servicing rights are recognized as assets upon the sale of a mortgage loan. A portion of the cost of the loan is allocated to the servicing right based upon relative fair value. The fair value of servicing rights is based on the present value of estimated future cash flows of mortgages sold stratified by rate and maturity date. Assumptions that are incorporated in the valuation of servicing rights include assumptions about prepayment speeds on mortgages and the cost to service loans. Servicing rights are reported in other intangibles and are amortized over the estimated period of future

servicing income to be received on the underlying mortgage loans. The carrying amount of mortgage servicing rights was $223,000 and $233,000 at December 31, 2013 and 2012, respectively. Amortization expense is netted against loan servicing fee income and is reflected in the Consolidated Statements of Income in mortgage banking income. Servicing rights are evaluated for impairment based upon estimated fair value as compared to unamortized book value.

(i) Investment in Limited Partnership

Mid Penn invested as a limited partner in a partnership in September 2008 that provides low-income housing in Enola, Pennsylvania. The carrying value of Mid Penn's investment in the limited partnership was $452,000 at December 31, 2013 using the straight-line method. Mid Penn's maximum exposure to loss is limited to the carrying value of its investment at year-end. The partnership anticipates receiving $46,000 annually in low-income housing tax credits.

(j) Income Taxes

Certain items of income and expense are recognized in different accounting periods for financial reporting purposes than for income tax purposes. Deferred income tax assets and liabilities are provided in recognition of these temporary differences at currently enacted income tax rates. As changes in tax laws or rates are enacted, deferred income tax assets and liabilities are adjusted through the provision for income taxes. Mid Penn recognizes interest and/or penalties related to income tax matters in income tax expense.

(k) Core Deposit Intangible

Core deposit intangible is a measure of the value of consumer demand and savings deposits acquired in business combinations accounted for as purchases. The core deposit intangible is being amortized over an 8-year life on a straight-line basis. The core deposit intangible is subject to impairment testing whenever events or changes in circumstances indicate its carrying amount may not reflect benefit.

(l) Goodwill

Goodwill is the excess of the purchase price over the fair value of assets acquired in connection with 2004 and 2006 business acquisitions accounted for as purchases. Accounting Standards Codification ("ASC") Topic 350, *Intangibles, Goodwill and Other* requires a two-step process for testing the impairment of goodwill on at least an annual basis. Mid Penn did not identify any impairment on its outstanding goodwill from its most recent testing, which was performed as of December 31, 2013. In addition, Mid Penn did not identify any impairment in 2012 or 2011.

(m) Bank Owned Life Insurance

Mid Penn is the owner and beneficiary of bank owned life insurance ("BOLI") policies on current and former directors. The earnings from the BOLI policies are an asset that can be liquidated, if necessary, with associated tax costs. However, Mid Penn intends to hold these policies and, accordingly, Mid Penn has not provided deferred income taxes on the earnings from the increase in cash surrender value.

GAAP requires Split-Dollar Life Insurance Arrangements to have a liability recognized related to the postretirement benefits covered by an endorsement split-dollar life insurance arrangement, and a liability for the future death benefit.

(n) Marketing and Advertising Costs

Marketing and advertising costs are expensed as incurred.

(o) Postretirement Benefit Plans

Mid Penn follows the guidance in ASC Topic 715, *Compensation-Retirement Benefits* related to postretirement benefit plans. This guidance requires additional disclosures about defined benefit pension plans and other postretirement defined benefit plans.

(p) Other Benefit Plan

A funded contributory defined-contribution plan is maintained for substantially all employees. The cost of the Mid Penn defined contribution plan is charged to current operating expenses and is funded annually.

(q) Trust Assets and Income

Assets held by the Bank in a fiduciary or agency capacity for customers of the Trust Department are not included in the consolidated financial statements since such items are not assets of the Bank. Trust income is recognized on the cash basis, which is not materially different than if it were reported on the accrual basis.

(r) Earnings Per Share

Earnings per share are computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding during each of the years presented. The following data show the amounts used in computing basic and diluted earnings per share. As shown in the table that follows, diluted earnings per share is computed using weighted average common shares outstanding, plus weighted average common shares available from the exercise of all dilutive stock warrants issued to the U.S. Treasury under the provisions of the Capital Purchase Program, based on the average share price of Mid Penn's common stock during the period.

The computations of basic earnings per common share follow:

(Dollars in thousands, except per share data)

	2013	2012	2011
Net Income	$ 4,939	$ 4,951	$ 4,543
Less: Dividends on Series A preferred stock	-	(500)	(500)
Accretion of Series A preferred stock discount	(14)	(14)	(14)
Dividends on Series B preferred stock	(309)	-	-
Net income available to common shareholders	$ 4,616	$ 4,437	$ 4,029
Weighted average common shares outstanding	3,491,653	3,486,543	3,481,414
Basic earnings per common share	$ 1.32	$ 1.27	$ 1.16

The computations of diluted earnings per common share follow:

(Dollars in thousands, except per share data)

	2013	2012	2011
Net income available to common stockholders	$ 4,616	$ 4,437	$ 4,029
Weighted average number of common shares outstanding	3,491,653	3,486,543	3,481,414
Dilutive effect of potential common stock arising from stock warrants:			
Exercise of outstanding stock warrants issued to U.S. Treasury under the Capital Repurchase Program	-	-	-
Adjusted weighted-average common shares outstanding	3,491,653	3,486,543	3,481,414
Diluted earnings per common share	$ 1.32	$ 1.27	$ 1.16

Mid Penn repurchased all warrants in 2013; therefore, there were none remaining as of December 31, 2013. Mid Penn had 73,099 warrants that were anti-dilutive because the fair value of the common stock was below the $20.52 exercise price of these warrants as of December 31, 2012 and 2011.

(4) Accumulated Other Comprehensive (Loss) Income

The components of accumulated other comprehensive (loss) income, net of taxes, are as follows:

(Dollars in thousands)

	Unrealized Gain on Securities	Defined Benefit Plan Liability	Accumulated Other Comprehensive (Loss) Income
Balance - December 31, 2012	$ 2,433	$ (140)	$ 2,293
Balance - December 31, 2013	$ (745)	$ (127)	$ (872)

(5) <u>Restrictions on Cash and Due from Bank Accounts</u>

The Bank is required to maintain reserve balances with the Federal Reserve Bank of Philadelphia. There was no required reserve balance at December 31, 2013 because the Bank had sufficient vault cash available. The required reserve balance was $554,000 at December 31, 2012.

(6) <u>Investment Securities</u>

Securities to be held for indefinite periods, but not intended to be held to maturity, are classified as available for sale and carried at fair value. Securities held for indefinite periods include securities that management intends to use as part of its asset and liability management strategy and that may be sold in response to liquidity needs, changes in interest rates, resultant prepayment risk, and other factors related to interest rate and resultant prepayment risk changes.

Realized gains and losses on dispositions are based on the net proceeds and the adjusted book value of the securities sold, using the specific identification method. Unrealized gains and losses on investment securities available for sale are based on the difference between book value and fair value of each security. These gains and losses are credited or charged to other comprehensive income (loss), whereas realized gains and losses flow through the Corporation's consolidated statements of income.

ASC Topic 320, *Investments – Debt and Equity Securities*, clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security and (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are done before assessing whether the entity will recover the cost basis of the investment. Previously, this assessment required management to assert it has both the intent and the ability to hold a security for a period of time sufficient to allow for an anticipated recovery in fair value to avoid recognizing other-than-temporary impairment. This change does not affect the need to forecast recovery of the value of the security through either cash flows or market price.

In instances when a determination is made that other-than-temporary impairment exists but the investor does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, this guidance changes the presentation and amount of the other-than-temporary impairment recognized in the income statement. The other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit loss) and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income (loss).

In assessing potential other-than-temporary impairment for equity securities, consideration is given to management's intent and ability to hold the securities until recovery of unrealized losses.

At December 31, 2013 and 2012, amortized cost, fair value, and unrealized gains and losses on investment securities are as follows:

(Dollars in thousands)

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
December 31, 2013				
Available for sale securities:				
U.S. Treasury and U.S. government agencies	$ 12,134	$ 700	$ -	$ 12,834
Mortgage-backed U.S. government agencies	39,481	349	438	39,392
State and political subdivision obligations	70,770	744	2,476	69,038
Equity securities	1,550	20	31	1,539
	$ 123,935	$ 1,813	$ 2,945	$ 122,803

(Dollars in thousands)

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
December 31, 2012				
Available for sale securities:				
U.S. Treasury and U.S. government agencies	$ 16,394	$ 1,346	$ -	$ 17,740
Mortgage-backed U.S. government agencies	66,783	393	490	66,686
State and political subdivision obligations	67,033	2,542	96	69,479
Equity securities	400	-	10	390
	$ 150,610	$ 4,281	$ 596	$ 154,295

Estimated fair values of debt securities are based on quoted market prices, where applicable. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments, adjusted for differences between the quoted instruments and the instruments being valued.

Included in equity securities is an investment in Access Capital Strategies, an equity fund that invests in low to moderate income financing projects. This initial investment was purchased in 2004 to help fulfill the Bank's regulatory requirement of the Community Reinvestment Act and an additional investment was purchased in 2011. At December 31, 2013 and 2012, the investment is reported at fair value.

Investment securities having a fair value of $114,600,000 at December 31, 2013, and $96,124,000 at December 31, 2012, were pledged to secure public deposits and other borrowings.

The following table presents gross unrealized losses and fair value of investments aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at December 31, 2013 and 2012.

(Dollars in thousands)		Less Than 12 Months		12 Months or More		Total	
December 31, 2013	Number of Securities	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Available for sale securities:							
Mortgage-backed U.S. government agencies	29	$ 9,799	$ 182	$ 9,866	$ 256	$ 19,665	$ 438
State and political subdivision obligations	90	39,611	2,150	4,288	326	43,899	2,476
Equity securities	1	-	-	550	31	550	31
Total temporarily impaired available for sale securities	120	$ 49,410	$ 2,332	$ 14,704	$ 613	$ 64,114	$ 2,945

(Dollars in thousands)		Less Than 12 Months		12 Months or More		Total	
December 31, 2012	Number of Securities	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Available for sale securities:							
Mortgage-backed U.S. government agencies	53	$ 30,345	$ 270	$ 15,839	$ 220	$ 46,184	$ 490
State and political subdivision obligations	20	9,389	66	1,231	30	10,620	96
Equity securities	1	-	-	390	10	390	10
Total temporarily impaired available for sale securities	74	$ 39,734	$ 336	$ 17,460	$ 260	$ 57,194	$ 596

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis; and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and the extent to which the fair value has been less than cost, and the financial condition and near term prospects of the issuer. In addition, for debt securities, the Corporation considers (a) whether management has the intent to sell the security, (b) it is more likely than not that management will be required to sell the security prior to its anticipated recovery, and (c) whether management expects to recover the entire amortized cost basis. For equity securities, management considers the intent and ability to hold securities until recovery of unrealized losses.

The majority of the investment portfolio is comprised of mortgage-backed U.S. government agencies and state and political subdivision obligations. For the investment securities with an unrealized loss, Mid Penn has concluded, based on its analysis, that the unrealized losses in the investments are primarily caused by the movement of interest rates, and the contractual terms of these investments do not permit the issuer to settle the securities at a price less than the par value of the investment.

At December 31, 2013, Mid Penn had 120 securities with unrealized losses totaling $2,945,000 that depreciated 4.59% from their amortized cost basis. During this period, securities in an unrealized loss position for twelve months or longer totaled $613,000 of which the majority was attributed to mortgage-backed U.S. government agencies and state and political subdivision obligations with $256,000 and $326,000 in unrealized losses, respectively. At December 31, 2012, 74 debt securities with unrealized losses totaling $596,000 that depreciated 1.04% from the amortized cost basis. During this period, securities in an unrealized loss position for twelve months or longer totaled $260,000 of which the majority was attributed to mortgage-backed U.S. government agencies with $220,000 in unrealized losses.

Because Mid Penn does not intend to sell these investments and it is not likely it will be required to sell these investments before a recovery of fair value, which may be maturity, Mid Penn does not consider the securities with unrealized losses for twelve months or longer to be other-than-temporarily impaired as losses relate to changes in interest rates and not erosion of credit quality.

The table below is the maturity distribution of investment securities at amortized cost and fair value at December 31, 2013.

(Dollars in thousands)	December 31, 2013	
	Amortized Cost	Fair Value
Due in 1 year or less	$ -	$ -
Due after 1 year but within 5 years	18,937	19,811
Due after 5 years but within 10 years	26,813	26,596
Due after 10 years	37,154	35,465
	82,904	81,872
Mortgage-backed securities	39,481	39,392
Equity securities	1,550	1,539
	$ 123,935	$ 122,803

(7) Loans and Allowance for Loan and Lease Losses

The Bank has granted loans to certain of its executive officers, directors, and their related interests. These loans were made on substantially the same basis, including interest rates and collateral as those prevailing for comparable transactions with other borrowers at the same time. The aggregate amount of these loans was $8,402,000 and $4,817,000 at December 31, 2013 and 2012, respectively. During 2013, $8,815,000 of new loans and advances were extended and repayments totaled $5,230,000. None of these loans were past due, in non-accrual status, or restructured at December 31, 2013.

The classes of the loan portfolio, summarized by the aggregate pass rating and the classified ratings of special mention, substandard, and doubtful within Mid Penn's internal risk rating system as of December 31, 2013 and 2012 are as follows:

(Dollars in thousands) December 31, 2013	Pass	Special Mention	Substandard	Doubtful	Total
Commercial and industrial	$ 103,330	$ 938	$ 1,576	$ -	$ 105,844
Commercial real estate	277,232	2,771	12,771	-	292,774
Commercial real estate - construction	45,265	382	-	-	45,647
Lease financing	1,356	-	-	-	1,356
Residential mortgage	69,447	27	356	-	69,830
Home equity	26,056	96	169	-	26,321
Consumer	4,690	-	-	-	4,690
	$ 527,376	$ 4,214	$ 14,872	$ -	$ 546,462

(Dollars in thousands) December 31, 2012	Pass	Special Mention	Substandard	Doubtful	Total
Commercial and industrial	$ 74,763	$ 1,651	$ 1,469	$ -	$ 77,883
Commercial real estate	260,941	5,375	18,551	-	284,867
Commercial real estate - construction	32,767	410	54	-	33,231
Lease financing	1,305	-	-	-	1,305
Residential mortgage	57,007	-	448	-	57,455
Home equity	22,336	188	396	-	22,920
Consumer	6,267	292	-	-	6,559
	$ 455,386	$ 7,916	$ 20,918	$ -	$ 484,220

Impaired loans by loan portfolio class as of December 31, 2013 and 2012 are summarized as follows:

(Dollars in thousands)	December 31, 2013			December 31, 2012		
	Recorded Investment	Unpaid Principal Balance	Related Allowance	Recorded Investment	Unpaid Principal Balance	Related Allowance
With no related allowance recorded:

The recorded investments in troubled debt restructured loans at December 31, 2013 and 2012 are as follows:

(Dollars in thousands) December 31, 2013	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Recorded Investment
Commercial and industrial	$ 40	$ 417	$ 266
Commercial real estate	10,581	8,686	7,470
Residential mortgage	423	35	29
	$ 11,044	$ 9,138	$ 7,765

(Dollars in thousands) December 31, 2012	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Recorded Investment
Commercial and industrial	$ 40	$ 35	$ 30
Commercial real estate	7,326	3,748	2,916
Residential mortgage	558	552	448
	$ 7,924	$ 4,335	$ 3,394

At December 31, 2013, Mid Penn's troubled debt restructured loans totaled $7,765,000, of which, $833,000, representing five loans, are accruing mortgages in compliance with the terms of the modification. Of the $833,000, four are accruing residential mortgages totaling $235,000 and one is an accruing commercial real estate loan totaling $598,000. The remaining $6,932,000, representing 12 loans, are nonaccrual impaired loans, and resulted in a collateral evaluation in accordance with the guidance on impaired loans. Two large relationships account for $4,819,000 of the $6,932,000 nonaccrual impaired troubled debt restructured loan total. As a result of the evaluation, a specific allocation and, subsequently, charge offs have been taken as appropriate. As of December 31, 2013, charge offs associated with troubled debt restructured loans while under a forbearance agreement totaled $0. As of December 31, 2013, there were no defaulted troubled debt restructured loans as all troubled debt restructured loans were current with respect to their associated forbearance agreements. One forbearance agreement was negotiated during 2008, 10 forbearance agreements were negotiated during 2009, one was negotiated during 2010, and five were negotiated during 2013.

Mid Penn's troubled debt restructured loans at December 31, 2012 totaled $3,394,000, of which, $426,000, representing seven loans, are accruing residential mortgages in compliance with the terms of the modification. The remaining $2,968,000, representing 10 loans, are nonaccrual impaired loans, and resulted in a collateral evaluation in accordance with the guidance on impaired loans. As a result of the evaluation, a specific allocation and, subsequently, charge offs have been taken as appropriate. As of December 31, 2012, charge offs associated with troubled debt restructured loans while under a forbearance agreement totaled $0. As of December 31, 2012, there were no defaulted troubled debt restructured loans as all troubled debt restructured loans were current with respect to their associated forbearance agreements. One forbearance agreement was negotiated during 2008, 12 forbearance agreements were negotiated during 2009, while the remaining four were negotiated during 2010.

Mid Penn entered into forbearance agreements on all loans currently classified as troubled debt restructures and all of these agreements have resulted in additional principal repayment. The terms of these forbearance agreements vary whereby principal payments have been decreased, interest rates have been reduced and/or the loan will be repaid as collateral is sold.

There were five loans modified in 2013 that resulted in troubled debt restructurings, while no loans were modified in 2012. The following table summarizes the loans whose terms have been modified resulting in troubled debt restructurings during the year ended December 31, 2013.

(Dollars in thousands) December 31, 2013	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Recorded Investment
Commercial real estate	3	$ 6,091	$ 5,588	$ 5,417
Residential mortgage	2	74	74	28
	5	$ 6,165	$ 5,662	$ 5,445

If nonaccrual loans and leases had been current in accordance with their original terms and had been outstanding throughout the period or since origination, if held for part of the period, Mid Penn would have recorded interest income on these loans of $861,000, $774,000, and $772,000, in the years ended December 31, 2013, 2012, and 2011, respectively. Mid Penn has no commitments to lend additional funds to borrowers with impaired or nonaccrual loans.

(8) Bank Premises and Equipment

At December 31, 2013 and 2012, bank premises and equipment are as follows:

(Dollars in thousands)	2013	2012
Land	$ 2,712	$ 2,712
Buildings	10,087	10,007
Furniture, fixtures, and equipment	9,483	9,045
Leasehold improvements	828	828
Construction in progress	13	3
	23,123	22,595
Less accumulated depreciation	(10,654)	(9,472)
	$ 12,469	$ 13,123

Depreciation expense was $1,250,000 in 2013, $1,153,000 in 2012, and $1,230,000 in 2011.

(9) Deposits

At December 31, 2013 and 2012, time deposits amounted to $132,373,000 and $163,653,000, respectively. Interest expense on such certificates of deposit amounted to $2,568,000, $3,683,000, and $5,358,000 for the years ended December 31, 2013, 2012 and 2011, respectively.

These time deposits at December 31, 2013, mature as follows:

(Dollars in thousands)	Time Deposits	
	Less than $100,000	$100,000 or more
Maturing in 2014	$ 38,290	$ 21,716
Maturing in 2015	26,323	14,528
Maturing in 2016	12,956	5,389
Maturing in 2017	3,614	1,453
Maturing in 2018	4,428	1,956
Maturing thereafter	835	885
	$ 86,446	$ 45,927

Brokered deposits included in the deposit totals equaled $2,750,000 at December 31, 2013 and $4,128,000 at December 31, 2012. Deposits and other funds from related parties held by Mid Penn at December 31, 2013 and 2012 amounted to $9,010,000 and $6,804,000, respectively.

(10) Short-term Borrowings

As of December 31, 2013, short-term borrowings totaled $23,833,000. There were no short-term borrowings as of December 31, 2012. The Bank has a line of credit commitment from the Federal Home Loan Bank ("FHLB") for overnight borrowings up to $40,000,000. This line is collateralized by certain qualifying loans and investment securities of the Bank. The Bank also has unused lines of credit with correspondent banks amounting to $12,500,000 at December 31, 2013.

(11) Long-term Debt

The Bank is a member of the Federal Home Loan Bank of Pittsburgh ("FHLB") and through its membership, the Bank can access a number of credit products, which are utilized to provide liquidity. The maximum borrowing capacity available to the Bank at the FHLB at December 31, 2013 was $259,179,000, which includes the line of credit commitment for overnight borrowings. As of December 31, 2013 and 2012, the Bank had long-term debt in the amount of $23,145,000 and $22,510,000, respectively, consisting of:

(Dollars in thousands)	At December 31,	
	2013	2012
Loans maturing in 2013 with rates ranging from 3.24% to 4.75%	$ -	$ 14,189
Loans maturing in 2015 with rates ranging from 0.58% to 4.18%	15,000	5,000
Loans maturing in 2016 at a rate of 0.89%	5,000	-
Loans maturing in 2026 at a rate of 4.80%	3,073	3,245
Loans maturing in 2027 at a rate of 6.71%	72	76
	$ 23,145	$ 22,510

The aggregate amounts due on long-term debt subsequent to December 31, 2013 are $184,000 (2014), $15,193,000 (2015), $5,203,000 (2016), $213,000 (2017), $223,000 (2018), and $2,129,000 thereafter.

(12) Fair Value Measurement

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. This guidance provides additional information on determining when the volume and level of activity for the asset or liability has significantly decreased. The guidance also includes information on identifying circumstances when a transaction may not be considered orderly.

Fair value measurement and disclosure guidance provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed and significant adjustments to the related prices may be necessary to estimate fair value in accordance with the fair value measurement and disclosure guidance.

This guidance clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The guidance provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own belief about the assumptions market participants would use in pricing the asset or liability based upon the best information available in the circumstances. Fair value measurement and disclosure guidance establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Inputs - Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability;

Level 3 Inputs - Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

There were no transfers of assets between fair value Level 1 and Level 2 for the year ended December 31, 2013. The following table illustrates the assets measured at fair value on a recurring basis segregated by hierarchy fair value levels:

(Dollars in thousands)

		Fair value measurements at December 31, 2013 using:		
Assets:	Total carrying value at December 31, 2013	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
U.S. Treasury and U.S. government agencies	$ 12,834	$ -	$ 12,834	$ -
Mortgage-backed U.S. government agencies	39,392	-	39,392	-
State and political subdivision obligations	69,038	-	69,038	-
Equity securities	1,539	519	1,020	-
	$ 122,803	$ 519	$ 122,284	$ -

(Dollars in thousands)

Assets:	Total carrying value at December 31, 2012	Fair value measurements at December 31, 2012 using: Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
U.S. Treasury and U.S. government agencies	$ 17,740	$ -	$ 17,740	$ -
Mortgage-backed U.S. government agencies	66,686	-	66,686	-
State and political subdivision obligations	69,479	-	69,479	-
Equity securities	390	390	-	-
	$ 154,295	$ 390	$ 153,905	$ -

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis, but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table illustrates the assets measured at fair value on a nonrecurring basis segregated by hierarchy fair value levels.

(Dollars in thousands)

Assets:	Total carrying value at December 31, 2013	Fair value measurements at December 31, 2013 using: Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Impaired Loans	$ 6,535	$ -	$ -	$ 6,535
Foreclosed Assets Held for Sale	465	-	-	465

(Dollars in thousands)

Assets:	Total carrying value at December 31, 2012	Fair value measurements at December 31, 2012 using: Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Impaired Loans	$ 3,075	$ -	$ -	$ 3,075
Foreclosed Assets Held for Sale	105	-	-	105

The following tables present additional quantitative information about assets measured at fair value on a nonrecurring basis and for which Mid Penn has utilized Level 3 inputs to determine the fair value.

(Dollars in thousands)

December 31, 2013	Quantitative Information about Level 3 Fair Value Measurements: Fair Value Estimate	Valuation Technique	Unobservable Input	Range Weighted Average
Impaired Loans	$ 6,535	Appraisal of collateral (1)	Appraisal adjustments (2)	10% - 95% (25%)
Foreclosed Assets Held for Sale	$ 465	Appraisal of collateral (1), (3)	Appraisal adjustments (2)	15% - 40% (24%)

(Dollars in thousands) — Quantitative Information about Level 3 Fair Value Measurements

December 31, 2012	Fair Value Estimate		Valuation Technique	Unobservable Input	Range Weighted Average
Impaired Loans	$	3,075	Appraisal of collateral (1)	Appraisal adjustments (2)	10% - 95% (28%)
Foreclosed Assets Held for Sale	$	105	Appraisal of collateral (1), (3)	Appraisal adjustments (2)	15% - 40% (24%)

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally includes various level 3 inputs which are not observable.
(2) Appraisals may be adjusted downward by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal. Higher downward adjustments are caused by negative changes to the collateral or conditions in the real estate market, actual offers or sales contracts received, or age of the appraisal.
(3) Includes qualitative adjustments by management and estimated liquidation expenses.

The following methodologies and assumptions were used to estimate the fair value of Mid Penn's financial instruments.

Cash and Cash Equivalents:
The carrying value of cash and cash equivalents is considered to be a reasonable estimate of fair value.

Interest-bearing Balances with other Financial Institutions:
The estimate of fair value was determined by comparing the present value of quoted interest rates on like deposits with the weighted average yield and weighted average maturity of the balances.

Securities Available for Sale:
The fair value of securities classified as available for sale is determined by obtaining quoted market prices on nationally recognized securities exchanges (Level 1), or matrix pricing (level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather relying on the securities' relationship to other benchmark quoted prices.

Impaired Loans:
Mid Penn's rating system assumes any loans classified as sub-standard non-accrual to be impaired, and all of these loans are considered collateral dependent; therefore, all of Mid Penn's impaired loans, whether reporting a specific allocation or not, are considered collateral dependent.

It is Mid Penn's policy to obtain updated third party valuations on all impaired loans collateralized by real estate within 30 days of the credit being classified as sub-standard non-accrual. Prior to receipt of the updated real estate valuation Mid Penn will use any existing real estate valuation to determine any potential allowance issues; however no allowance recommendation will be made until which time Mid Penn is in receipt of the updated valuation.

In some instances Mid Penn is not holding real estate as collateral and is relying on business assets (personal property) for repayment. In these circumstances a collateral inspection is performed by Mid Penn personnel to determine an estimated value. The value is based on net book value, as provided by the financial statements, and discounted accordingly based on determinations made by management. Occasionally, Mid Penn will employ an outside service to provide a fair estimate of value based on auction sales or private sales. Management reviews the estimates of these third parties and discounts them accordingly based on management's judgment, if deemed necessary. Mid Penn considers the estimates used in its impairment analysis to be Level 3 inputs.

Mid Penn actively monitors the values of collateral on impaired loans. This monitoring may require the modification of collateral values over time or changing circumstances by some factor, either positive or negative, from the original values. All collateral values will be assessed by management at least every 18 months for possible revaluation by an independent third party.

Mid Penn does not currently, or plan to in the future, use automated valuation methodologies as a method of valuing real estate collateral.

Loans:
For variable-rate loans that reprice frequently and which entail no significant changes in credit risk, carrying values approximated fair value. The fair value of other loans are estimated by calculating the present value of the cash flow difference between the current rate and the market rate, for the average maturity, discounted quarterly at the market rate.

Foreclosed Assets Held for Sale:
Assets included in foreclosed assets held for sale are carried at fair value, less costs to sell, and accordingly is presented as measured on a non-recurring basis. Values are estimated using Level 3 inputs, based on appraisals that consider the sales prices of property in the proximate vicinity.

Accrued Interest Receivable and Payable:
The carrying amount of accrued interest receivable and payable approximates their fair values.

Restricted Investment in Bank Stocks:
The carrying amount of required and restricted investment in correspondent bank stock approximates fair value, and considers the limited marketability of such securities.

Mortgage Servicing Rights:
The fair value of servicing rights is based on the present value of estimated future cash flows on pools of mortgages stratified by rate and maturity date.

Deposits:
The fair value for demand deposits (e.g., interest and noninterest checking, savings, and money market deposit accounts) is by definition, equal to the amount payable on demand at the reporting date (i.e. their carrying amounts). Fair value for fixed-rate certificates of deposit was estimated using a discounted cash flow calculation by combining all fixed-rate certificates into a pool with a weighted average yield and a weighted average maturity for the pool and comparing the pool with interest rates currently being offered on a similar maturity.

Short-term Borrowings:
Because of time to maturity, the estimated fair value of short-term borrowings approximates the book value.

Long-term Debt:
The estimated fair values of long-term debt were determined using discounted cash flow analysis, based on currently available borrowing rates for similar types of borrowing arrangements.

Commitments to Extend Credit and Letters of Credit:
The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account market interest rates, the remaining terms and present credit worthiness of the counterparties. The fair value of guarantees and letters of credit is based on fees currently charged for similar agreements.

The following table summarizes the carrying value and fair value of financial instruments at December 31, 2013 and 2012.

(Dollars in thousands)	December 31, 2013		December 31, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:				
Cash and cash equivalents	$ 8,623	$ 8,623	$ 15,473	$ 15,473
Interest-bearing time balances with other financial institutions	7,513	7,513	23,563	23,563
Investment securities	122,803	122,803	154,295	154,295
Net loans and leases	540,145	548,923	478,711	495,181
Restricted investment in bank stocks	2,969	2,969	2,503	2,503
Accrued interest receivable	2,704	2,704	2,893	2,893
Mortgage servicing rights	223	223	233	233
Financial liabilities:				
Deposits	$ 608,130	$ 610,419	$ 625,461	$ 629,096
Short-term borrowings	23,833	23,833	-	-
Long-term debt	23,145	22,988	22,510	23,240
Accrued interest payable	393	393	620	620
Off-balance sheet financial instruments:				
Commitments to extend credit	$ -	$ -	$ -	$ -
Financial standby letters of credit	-	-	-	-

The following presents the carrying amount, fair value, and placement in the fair value hierarchy of Mid Penn's financial instruments as of December 31, 2013 and 2012. Carrying values approximate fair values for cash and cash equivalents, interest-bearing time balances with other financial institutions, restricted investment in bank stocks, mortgage servicing rights, accrued interest receivable and payable, and short-term borrowings. Other than cash and cash equivalents, which are considered Level 1 Inputs, these instruments are Level 2 Inputs. The following tables exclude financial instruments for which the carrying amount approximates fair value.

(Dollars in thousands)			Fair Value Measurements		
December 31, 2013	Carrying Amount	Fair Value	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial instruments - assets					
Net loans and leases	$ 540,145	$ 548,923	$ -	$ -	$ 548,923
Financial instruments - liabilities					
Deposits	$ 608,130	$ 610,419	$ -	$ 610,419	$ -
Long-term debt	23,145	22,988	-	22,988	-

(Dollars in thousands)			Fair Value Measurements		
December 31, 2012	Carrying Amount	Fair Value	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

(13) Postretirement Benefit Plans

Mid Penn has an unfunded noncontributory defined benefit Plan for directors. The Plan provides defined benefits based on years of service.

Mid Penn also has other postretirement benefit Plans covering full-time employees. These health care and life insurance Plans are noncontributory.

The significant aspects of each Plan are as follows:

(a) Health Insurance

For full-time employees who retire after at least 20 years of service, Mid Penn will pay premiums for major medical insurance (as provided to active employees) for a period ending on the earlier of the date the participant obtains other employment where major medical coverage is available or the date of the participant's death; however, in all cases payment of medical premiums by Mid Penn will not exceed five years. If the retiree becomes eligible for Medicare within the five-year period beginning on his/her retirement date, the Bank may pay, at its discretion, premiums for 65 Special coverage or a similar supplemental coverage. After the five-year period has expired, all Mid Penn paid benefits cease; however, the retiree may continue coverage through the Bank at his/her own expense. This Plan was amended in 2008 to encompass only those employees that had achieved ten years of full-time continuous service to Mid Penn as of January 1, 2008. Employees hired after that date and those that had not achieved the service requirements are not eligible for the Plan.

(b) **Life Insurance**

For full-time employees who retire after at least 20 years of service, Mid Penn will provide term life insurance. The amount of coverage prior to age 65 will be three times the participant's annual salary at retirement or $50,000, whichever is less. After age 65, the life insurance coverage amount will decrease by 10% per year, subject to a minimum amount of $2,000.

(c) **Directors' Retirement Plan**

Mid Penn has an unfunded defined benefit retirement Plan for directors with benefits based on years of service. The adoption of this Plan generated unrecognized prior service cost of $274,000, which is being amortized over the expected future years of service of active directors. The unamortized balance at December 31, 2013, was $108,000.

Health and Life

The following tables provide a reconciliation of the changes in the Plan's health and life insurance benefit obligations and fair value of Plan assets for the years ended December 31, 2013 and 2012, and a statement of the funded status at December 31, 2013 and 2012.

(Dollars in thousands)	December 31,			
Change in benefit obligations:	2013		2012	
Benefit obligations, January 1	$	894	$	904
Service cost		17		21
Interest cost		34		37
Actuarial gain		(15)		(76)
Change in assumptions		(55)		38
Benefit payments		(39)		(30)
Benefit obligations, December 31	$	836	$	894
Change in fair value of plan assets:				
Fair value of plan assets, January 1	$	-	$	-
Employer contributions		39		30
Benefit payments		(39)		(30)
Fair value of plan assets, December 31	$	-	$	-
Funded status at year end	$	(836)	$	(894)

The amount recognized in the consolidated balance sheet at December 31, 2013 and 2012, is as follows:

(Dollars in thousands)	2013		2012	
Accrued benefit liability	$	836	$	894

The amounts recognized in accumulated other comprehensive (loss) income consist of:

(Dollars in thousands)	December 31,			
	2013		2012	
Net (gain) loss, pretax	$	(33)	$	37
Prior service cost, pretax		(1)		(2)

The accumulated benefit obligation for health and life insurance plans was $836,000 and $894,000 at December 31, 2013 and 2012, respectively.

The estimated prior service costs that will be amortized from accumulated other comprehensive loss into net periodic benefit cost during 2014 is ($1,052).

The components of net periodic postretirement benefit cost for 2013, 2012 and 2011 are as follows:

(Dollars in thousands)	2013	2012	2011
Service cost	$ 17	$ 21	$ 22
Interest cost	34	37	42
Amortization of prior service cost	(1)	(1)	(1)
Net periodic postretirement benefit cost	$ 50	$ 57	$ 63

Assumptions used in the measurement of Mid Penn's benefit obligations at December 31, 2013 and 2012 are as follows:

Weighted-average assumptions:	2013	2012
Discount rate	4.75%	4.00%
Rate of compensation increase	3.75%	3.00%

Assumptions used in the measurement of Mid Penn's net periodic benefit cost for the years ended December 31, 2013, 2012 and 2011 are as follows:

Weighted-average assumptions:	2013	2012	2011
Discount rate	4.00%	4.50%	5.50%
Rate of compensation increase	3.00%	3.50%	4.50%

Assumed health care cost trend rates at December 31, 2013, 2012 and 2011 are as follows:

	2013	2012	2011
Health care cost trend rate assumed for next year	7.00%	7.50%	7.00%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5.50%	5.50%	5.50%
Year that the rate reaches the ultimate trend rate	2016	2016	2016

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care Plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

(Dollars in thousands)	One-Percentage Point	
	Increase	Decrease
Effect on total of service and interest cost	$ 53	$ 4
Effect on accumulated postretirement benefit obligation	59	4

Mid Penn expects to contribute $42,000 to its life and health benefit Plans in 2014. The following table shows the estimated benefit payments for future periods.

(Dollars in thousands)	
1/1/2014 to 12/31/2014	$ 42
1/1/2015 to 12/31/2015	60
1/1/2016 to 12/31/2016	70
1/1/2017 to 12/31/2017	71
1/1/2018 to 12/31/2018	71
1/1/2019 to 12/31/2023	355

Benefit obligations were measured as of December 31, 2013, for the postretirement benefit Plan.

Retirement Plan

The following tables provide a reconciliation of the changes in the directors' defined benefit Plan's benefit obligations and fair value of Plan assets for the years ended December 31, 2013 and 2012 and a statement of the status at December 31, 2013 and 2012. This Plan is unfunded.

(Dollars in thousands)	December 31,	
Change in benefit obligations:	2013	2012
Benefit obligations, January 1	$ 1,139	$ 1,069
Service cost	32	22
Interest cost	44	49
Actuarial loss	4	10
Change in assumptions	(5)	5
Change due to plan amendment	-	53
Benefit payments	(84)	(69)
Benefit obligations, December 31	$ 1,130	$ 1,139
Change in fair value of plan assets:		
Fair value of plan assets, January 1	$ -	$ -
Employer contributions	84	69
Benefit payments	(84)	(69)
Fair value of plan assets, December 31	$ -	$ -
Funded status at year end	$ (1,130)	$ (1,139)

Amounts recognized in the consolidated balance sheet at December 31, 2013 and 2012 are as follows:

(Dollars in thousands)	2013	2012
Accrued benefit liability	$ 1,130	$ 1,139

Amounts recognized in accumulated other comprehensive income consist of:

(Dollars in thousands)	December 31,	
	2013	2012
Net prior service cost, pretax	$ 108	$ 129
Net loss, pretax	40	41

The accumulated benefit obligation for the retirement Plan was $1,130,000 at December 31, 2013 and $1,139,000 at December 31, 2012.

The estimated prior service costs that will be amortized from accumulated other comprehensive income into net periodic benefit cost during 2014 is $32,304.

The components of net periodic retirement cost for 2013, 2012 and 2011 are as follows:

(Dollars in thousands)	2013	2012	2011
Service cost	$ 32	$ 22	$ 24
Interest cost	44	49	53
Amortization of prior-service cost	22	22	22
Net periodic retirement cost	$ 98	$ 93	$ 99

Assumptions used in the measurement of Mid Penn's benefit obligations at December 31, 2013 and 2012 are as follows:

Weighted-average assumptions:	2013	2012
Discount rate	4.75%	4.00%
Change in consumer price index	2.75%	2.00%

Assumptions used in the measurement of Mid Penn's net periodic benefit cost for the years ended December 31, 2013, 2012 and 2011 are as follows:

Weighted-average assumptions:	2013	2012	2011
Discount rate	4.00%	4.50%	5.50%
Change in consumer price index	2.00%	2.50%	3.00%

Mid Penn expects to contribute $91,000 to its retirement Plan in 2014. The following table shows the estimated benefit payments for future periods.

(Dollars in thousands)		
1/1/2014 to 12/31/2014	$	91
1/1/2015 to 12/31/2015		94
1/1/2016 to 12/31/2016		96
1/1/2017 to 12/31/2017		99
1/1/2018 to 12/31/2018		103
1/1/2019 to 12/31/2023		529

Plan benefit obligations were measured as of December 31, 2013 for the directors' defined benefit Plan.

The Bank is the owner and beneficiary of insurance policies on the lives of certain officers and directors, which informally fund the retirement plan obligation. The aggregate cash surrender value of these policies was $3,609,000 and $3,513,000 at December 31, 2013 and 2012, respectively.

(14) Other Benefit Plans

(a) Defined-Contribution Plan

The Bank has a funded contributory defined-contribution Plan covering substantially all employees. The Bank did not contribute to the Plan in 2013, 2012, or 2011.

(b) Deferred Compensation Plans

The Bank has an executive deferred compensation Plan, which allows an executive officer to defer compensation for a specified period in order to provide future retirement income. The only participant in this Plan is a former executive officer. At both December 31, 2013 and 2012, the Bank accrued a liability of approximately $192,000 for this Plan.

The Bank also has a directors' deferred compensation Plan, which allows directors to defer receipt of fees for a specified period in order to provide future retirement income. At December 31, 2013 and 2012, the Bank accrued a liability of approximately $405,000 and $423,000, respectively, for this Plan.

(c) Salary Continuation Agreement

The Bank maintains a Salary Continuation Agreement ("Agreement") for a former executive officer. The Agreement provides the former executive officer with a fixed annual benefit. The benefit is payable beginning at age 65 for a period of 15 years. At December 31, 2013 and 2012, the Bank accrued a liability of approximately $206,000 and $192,000, respectively, for the Agreement. The expense related to the Agreement was $14,000 for 2013, $13,000 for 2012, and $12,000 for 2011.

The Bank is the owner and beneficiary of an insurance policy on the life of the participating former executive officer, which informally funds the benefit obligation. The aggregate cash surrender value of this policy was approximately $1,178,000 and $1,143,000 at December 31, 2013 and 2012, respectively.

(d) Employee Stock Ownership Plan

The Employee Stock Ownership Plan ("ESOP") was terminated in 2013. Total expense related to Mid Penn's contribution to the ESOP for 2013, 2012, and 2011 was $0, respectively. Contributions to the ESOP were made at the discretion of the Board of Directors. The ESOP held no common shares as of December 31, 2013, and 38,799 common shares as of December 31, 2012, all of which were allocated to Plan participants. The ESOP shares were valued using Level 1 inputs as there is an active market for identical assets at the measurement date. At December 31, 2013, the total fair value of the ESOP was $0. At December 31, 2012, the fair value of Mid Penn stock on the NASDAQ Stock Market was $11.19 per common share, resulting in a total fair value of the ESOP of $434,000. Shares held by the ESOP are considered outstanding for purposes of calculating earnings per share. Dividends paid on shares held by the ESOP are charged to retained earnings.

(e) Split Dollar Life Insurance Arrangements

At December 31, 2013 and 2012, the Bank had Split Dollar Life Insurance arrangements with two former executives for which the aggregate collateral assignment and cash surrender values are approximately $1,739,000 and $1,694,000, respectively.

(f) 401(k) Plan

The Bank has a 401(k) Plan that covers substantially all full-time employees. The Plan allows employees to contribute a portion of their salaries and wages to the Plan. The Plan provides for the Bank to match a portion of employee-elected salary deferrals, subject to certain percentage maximums of their salaries and wages. The Bank's contribution to the Plan was $129,000, $111,000, and $115,000 for the years ending December 31, 2013, 2012, and 2011, respectively.

(g) Employee Stock Purchase Plan

Mid Penn has an Employee Stock Purchase Plan ("ESPP") in which all employees are eligible to participate. The Plan allows employees to use a portion of their salaries and wages to purchase common shares of Mid Penn stock at the market value of shares at the end of each calendar quarter.

(15) Federal Income Taxes

The following temporary differences gave rise to the net deferred tax asset at December 31, 2013 and 2012.

(Dollars in thousands)	2013	2012
Deferred tax assets:		
Allowance for loan and lease losses	$ 2,148	$ 1,873
Loan fees	167	198
Benefit plans	976	974
Nonaccrual interest	895	1,204
Unrealized loss on securities	385	-
AMT Credit Carryforward	-	333
Other	127	108
	4,698	4,690
Deferred tax liabilities:		
Depreciation	(945)	(1,109)
Bond accretion	(92)	(80)
Goodwill and intangibles	(254)	(234)
Unrealized gain on securities	-	(1,253)
Prepaid expenses	(170)	(222)
Other	(2)	(3)
	(1,463)	(2,901)
Deferred tax asset, net	$ 3,235	$ 1,789

In assessing the realisability of federal or state deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and prudent, feasible and permissible as well as available tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that Mid Penn will realize the benefits of these deferred tax assets.

The provision for (benefit from) income taxes consists of the following:

(Dollars in thousands)	2013	2012	2011
Current	$ 1,009	$ 794	$ 1,749
Deferred	192	450	(526)
Total provision for income taxes	$ 1,201	$ 1,244	$ 1,223

A reconciliation of income tax at the statutory rate to Mid Penn's effective rate is as follows:

(Dollars in thousands)	2013	2012	2011
Provision at the expected statutory rate	$ 2,088	$ 2,106	$ 1,960
Effect of tax-exempt income	(873)	(827)	(710)
Effect of investment in life insurance	(78)	(84)	(88)
Nondeductible interest	40	49	49
Other items	24	-	12
Provision for income taxes	$ 1,201	$ 1,244	$ 1,223

Mid Penn has no unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in future periods. Mid Penn does not expect the total amount of unrecognized tax benefits to significantly increase or decrease in the next twelve months.

No amounts for interest and penalties were recorded in income tax expense in the consolidated statement of income for the years ended December 31, 2013, 2012, or 2011. There were no amounts accrued for interest and penalties at December 31, 2013 or 2012.

Mid Penn and its subsidiaries are subject to U.S. federal income tax and income tax for the state of Pennsylvania. Mid Penn is no longer subject to examination by taxing authorities for years before 2010. Tax years 2010 through the present, with limited exception, remain open to examination.

(16) Core Deposit Intangible

A summary of core deposit intangible is as follows at December 31, 2013:

(Dollars in thousands)	2004 Acquisition	2006 Acquisition	Total
Gross carrying amount	$ 291	$ 232	$ 523
Less accumulated amortization	(291)	(205)	(496)
Net carrying amount	$ -	$ 27	$ 27

The core deposit intangibles for the acquisitions are being amortized over the weighted average useful life of 8 years, with no estimated residual value.

Amortization expense amounted to $29,000 in 2013, $45,000 in 2012, and $65,000 in 2011. The estimated amortization expense of intangible assets is $27,000 in 2014.

(17) Regulatory Matters

Mid Penn Bancorp, Inc., is a bank holding company and, as such, chooses to maintain a well-capitalized status in its bank subsidiary. Quantitative measures established by regulation to ensure capital adequacy require Mid Penn to maintain minimum amounts and ratios (set forth below) of Tier 1 capital to average assets and of total capital (as defined in the regulations) to risk-weighted assets. As of December 31, 2013 and December 31, 2012, Mid Penn met all capital adequacy requirements to which the Bank is subject, and the Bank is considered "well-capitalized". However, future changes in regulations could increase capital requirements and may have an adverse effect on capital resources.

Certain restrictions exist regarding the ability of the Bank to transfer funds to the Corporation in the form of cash dividends, loans or advances. The amount of dividends that may be paid in any calendar year is limited to the current year's net profits, combined with the retained net profits of the preceding two years. At December 31, 2013, $5,686,000 of undistributed earnings of the Bank included in the consolidated shareholders' equity was available for distribution to the Corporation as dividends without prior regulatory approval, subject to regulatory capital requirements below.

Mid Penn maintained the following regulatory capital levels, leverage ratios, and risk-based capital ratios as of December 31, 2013, and December 31, 2012, as follows:

(Dollars in thousands)	Capital Adequacy					
	Actual		Minimum Capital Required		To Be Well-Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Corporation						
As of December 31, 2013:						
Tier 1 Capital (to Average Assets)	$ 52,693	7.5%	$ 28,031	4.0%	$ N/A	N/A
Tier 1 Capital (to Risk Weighted Assets)	52,693	9.9%	21,234	4.0%	N/A	N/A
Total Capital (to Risk Weighted Assets)	59,100	11.1%	42,467	8.0%	N/A	N/A
Bank						
As of December 31, 2013:						
Tier 1 Capital (to Average Assets)	$ 52,598	7.5%	$ 28,041	4.0%	$ 35,051	5.0%
Tier 1 Capital (to Risk Weighted Assets)	52,598	9.9%	21,234	4.0%	31,850	6.0%
Total Capital (to Risk Weighted Assets)	59,005	11.1%	42,467	8.0%	53,084	10.0%
Corporation						
As of December 31, 2012:						
Tier 1 Capital (to Average Assets)	$ 48,822	6.8%	$ 28,530	4.0%	$ N/A	N/A
Tier 1 Capital (to Risk Weighted Assets)	48,822	10.0%	19,593	4.0%	N/A	N/A
Total Capital (to Risk Weighted Assets)	54,421	11.1%	39,185	8.0%	N/A	N/A
Bank						
As of December 31, 2012:						
Tier 1 Capital (to Average Assets)	$ 48,764	6.9%	$ 28,111	4.0%	$ 35,138	5.0%
Tier 1 Capital (to Risk Weighted Assets)	48,764	10.0%	19,593	4.0%	29,389	6.0%
Total Capital (to Risk Weighted Assets)	54,363	11.1%	39,185	8.0%	48,981	10.0%

(18) Concentration of Risk and Off-Balance Sheet Risk

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant, and equipment, and income-producing commercial properties. The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit written is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for direct, funded loans.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The term of these standby letters of credit is generally one year or less. The amount of the liability as of December 31, 2013 and 2012 for guarantees under letters of credit issued is not material.

As of December 31, 2013, commitments to extend credit amounted to $141,616,000 and standby letters of credit amounted to $8,458,000.

Significant concentration of credit risk may occur when obligations of parties engaged in similar activities occur and accumulate in significant amounts.

In analyzing the Bank's exposure to significant concentration of credit risk, management set a parameter of 10% or more of the Bank's total net loans outstanding as the threshold in determining whether the obligations of the same or affiliated parties would be classified as significant concentration of credit risk. Concentrations by industry, product line, type of collateral, etc., are also considered. U.S. Treasury securities, obligations of U.S. government agencies and corporations, and any assets collateralized by the same were excluded.

As of December 31, 2013, commercial real estate financing was the only similar activity that met the requirements to be classified as a significant concentration of credit risk. However, there is a geographical concentration in that most of the Bank's business activity is with customers located in Central Pennsylvania, specifically within the Bank's trading area made up of Dauphin County, lower Northumberland County, western Schuylkill County and eastern Cumberland County.

The Bank's highest concentrations of credit within the loan portfolio are in the areas of Commercial Real Estate financing (50.2%) as of December 31, 2013.

(19) Commitments and Contingencies

Operating Leases:

In April 2005, Mid Penn entered into a non-cancelable operating lease agreement to lease approximately 2,500 square feet of office space in the downtown Harrisburg area, with the initial term extending through April 2010. Mid Penn has the option to renew this lease for two additional five-year periods and has exercised the first of these options, extending the term of the lease through April of 2015. Mid Penn also has entered into a non-cancelable lease on a drive-up ATM site in Halifax, PA. This lease was renewed in 2012 and runs through October of 2015. In December 2011, Mid Penn entered into a non-cancelable operating lease agreement to lease approximately 5,900 square feet of office space on Derry St. in the Harrisburg area, with the initial term extending through November 2014. Mid Penn has the option to renew this lease for two additional three-year periods.

Minimum future rental payments under these operating leases as of December 31, 2013 are as follows:

(Dollars in thousands)	
2014	$ 113
2015	28
	$ 141

Mid Penn paid rent payments in 2013, 2012, and 2011 of $121,000, $120,000, and $79,000, respectively.

Litigation:

Mid Penn is subject to lawsuits and claims arising out of its business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material adverse effect on the consolidated financial condition of Mid Penn.

(20) Common Stock

Mid Penn has reserved 50,000 of authorized, but unissued shares of its common stock for issuance under a Stock Bonus Plan (the "Plan"). Shares issued under the Plan are at the discretion of the Board of Directors.

Under Mid Penn's amended and restated dividend reinvestment plan, (DRIP), 200,000 of Mid Penn's authorized but unissued common stock are reserved for issuance. The DRIP also allows for voluntary cash payments within specified limits, for the purchase of additional shares.

(21) Preferred Stock

On December 19, 2008, Mid Penn entered into and closed a Letter Agreement with the United States Department of the Treasury (the "Treasury") pursuant to which the Treasury invested $10,000,000 in the Mid Penn Bank under the Treasury's Capital Purchase Program (the "CPP"). Under the letter agreement, the Treasury received (1) 10,000 shares of Series A Fixed Rate Cumulative Perpetual Preferred Stock, $1,000 liquidation preference ("Series A Preferred Stock"), and (2) warrants to purchase up to 73,099 shares of Mid Penn common stock at an exercise price of $20.52 per share (the "Warrants").

On December 28, 2012, Mid Penn entered into a letter agreement with the Treasury pursuant to which Mid Penn repurchased from the Treasury all 10,000 shares of the Series A Preferred Stock issued to the Treasury which constitutes all of the issued and outstanding shares of Series A Preferred Stock. Mid Penn repurchased the Series A Preferred Stock for a purchase price equal to the aggregate liquidation amount of the Preferred Stock of $10,000,000, plus accrued but unpaid dividends of $59,722. All 10,000 shares of Series A Preferred Stock have subsequently been cancelled.

On January 23, 2013, Mid Penn entered into a letter agreement with the Treasury pursuant to which Mid Penn repurchased from the Treasury on that date the Warrants for $58,479. The Warrants have subsequently been cancelled.

As of the date hereof, Mid Penn has no further financial obligations under the Series A Preferred Stock, the Warrants or the Treasury's CPP.

(22) Stock Issued Under Private Placement Offering

On September 26, 2012, Mid Penn filed with the Pennsylvania Department of State a *Statement with Respect to Shares* which, effective upon filing, designated a series of preferred stock as "7% Non-Cumulative Non-Voting Non-Convertible Perpetual Preferred Stock, Series B" ("Series B Preferred Stock"), and set forth the voting and other powers, designations, preferences and relative, participating, optional or other rights, and the qualifications, limitations or restrictions of the Series B Preferred Stock.

Sales of Preferred Stock

Mid Penn sold shares of its Non-Cumulative Non-Voting Non-Convertible Perpetual Preferred Stock, Series B ("Series B Preferred Stock"), in transactions exempt from registration under the Securities Act of 1933, pursuant to Section 4(2) thereof.

Between September 26, 2012, and December 31, 2012, Mid Penn sold 4,880 shares of its Series B Preferred Stock for total gross proceeds of $4,880,000, which have been offset by issuance costs of $50,000. On January 3, 2013, 120 additional shares were sold resulting in total gross proceeds of $5,000,000 for the Series B Preferred Stock offering.

The following table summarizes the Series B Preferred Stock shares sold and the gross proceeds received through the private placement offering as of December 31, 2013:

(Dollars in thousands)

Period	Shares	Gross Proceeds
September 26, 2012 - September 30, 2012	345	$ 345,000
October 1, 2012 - December 31, 2012	4,535	4,535,000
January 1, 2013 - December 31, 2013	120	120,000
Total	5,000	$ 5,000,000

Terms of the Series B Preferred Stock

The annual dividend rate for the Series B Preferred Stock is 7% per annum of the liquidation preference of the Series B Preferred Stock or $70.00 per annum for each share of Series B Preferred Stock. The Board of Directors must approve each dividend payment from legally available funds. Dividends are payable to holders of record of the Series B Preferred Stock as they appear on our books on the record dates fixed by our Board of Directors. Dividends on any of Series B Preferred Stock are non-cumulative and we currently expect them to be declared quarterly for payment on February 15, May 15, August 15, and November 15 of each year. If a dividend payment date is not a business day, the dividend will be paid on the immediately preceding business day but no additional dividend payment will be prorated from the date of purchase to the first dividend payment date over a quarterly dividend period of 90 days.

Mid Penn may redeem shares of its Series B Preferred Stock at its option, in whole or in part, at any time subject to prior approval of the Federal Reserve Board, if then required, at a redemption price of $1,020 per share of Series B Preferred Stock plus an amount equal to any declared but unpaid dividends and in accordance with the terms and conditions set forth in a Certificate of Designations for the Series B Preferred Stock as filed with the Pennsylvania Department of State.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Mid Penn carried out an evaluation, under the supervision and with the participation of its management, including the Chief Executive Officer and Treasurer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15 as of December 31, 2013. Based upon that evaluation, the Chief Executive Officer and Treasurer concluded, as of December 31, 2013, that, Mid Penn's disclosure controls and procedures were effective in recording, processing, summarizing, and reporting information required to be disclosed by Mid Penn, within the time periods specified in the SEC's rules and forms, and such information is accumulated and communicated to management to allow timely decisions regarding required disclosures.

Changes in Internal Controls over Financial Reporting

There have been no changes in Mid Penn's internal control over financial reporting during the fourth quarter of 2013 that have materially affected, or are reasonably likely to materially affect, Mid Penn's internal control over financial reporting.

Mid Penn Bancorp, Inc. Management Report on Internal Controls over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a and 15(d) – 15(f) under the Exchange Act of 1934 ("1934 Act"). The corporation's internal control over financial reporting includes those policies and procedures that pertain to the corporation's ability to record, process, summarize, and report reliable financial data. All internal control systems have inherent limitations in the effectiveness of any internal control over financial reporting, including the possibility of human error and the circumvention or overriding of internal control. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation. Further, because of changes in conditions, the effectiveness of internal control over financial reporting may vary over time.

In order to ensure that the corporation's internal control over financial reporting is effective, management regularly assesses such controls and did so most recently for its financial reporting as of December 31, 2013. This assessment was based on criteria for effective internal control over financial reporting described in *Internal Control-Integrated* Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Management has concluded that Mid Penn's internal control over financial reporting, as of December 31, 2013, is effective based on those criteria.

This annual report does not include an attestation report of Mid Penn's independent registered public accounting firm regarding internal control over financial reporting. Mid Penn's internal control over financial reporting was not subject to attestation by Mid Penn's independent registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit Mid Penn to provide only management's report in this annual report.

CERTIFICATION

I, Rory G. Ritrievi, certify that:

1. I have reviewed this annual report on Form 10-K of Mid Penn Bancorp, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report.
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report.
4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
