FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Report on Form 10-K, including statements in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of this report, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may include: projections of matters that affect net sales, gross profit, operating expenses, earnings from operations, non-operating income and expenses, net earnings or cash flows, cash needs and the payment of accrued expenses and liabilities; the effect of changes being implemented by our largest software partner to elements of its channel incentive program; that partner funding may be further reduced or limited and our ability to implement cost reduction initiatives to offset adverse changes resulting therefrom; the expected effects of seasonality on our business; that there will be further consolidation in the IT industry; our exposure to derivative counterparty concentration and nonperformance risks; our business strategy and our strategic initiatives, including our efforts to grow by expanding our sales team and technical expertise, adding to our services partner network in Europe and Canada, increasing our products and services to existing and new clients, and expanding and accelerating our cloud and SaaS offerings; the availability of competitive sources of products for our purchase and resale; industry pricing and consolidation trends; our intentions concerning the payment of dividends; our acquisition strategy; our ability to offset the effects of inflation and manage any increase in interest rates; trends related to our effective tax rate; effects of acquisitions or dispositions; projections of capital expenditures in 2014; the sufficiency of our capital resources and the availability of financing and our needs or plans relating thereto; the effect of new accounting principles or changes in accounting policies; the effect of indemnification obligations; projections about the outcome of ongoing tax audits; statements related to accounting estimates, including estimated stock-based compensation award forfeitures, the timing of the payment of restructuring obligations and the realization of deferred tax assets, the timing of the amortization of intangible assets, the recognition of equity compensation expense and the resolution of uncertain tax positions; our positions and strategies with respect to ongoing and threatened litigation; our ability to increase our market share; that pricing pressures in the Information Technology ("IT") industry will continue; our plans to complete the upgrade and integration of our IT systems, including the timing relating thereto; the sufficiency of our facilities; the possibility that we may take future restructuring actions; our intention not to repatriate certain foreign undistributed earnings where management considers those earnings to be reinvested indefinitely and plans relating thereto; our plans to use cash flow from operations for working capital, to pay down debt, make capital expenditures, repurchase shares of our common stock, and fund acquisitions; our exposure to off-balance sheet arrangements; statements of belief; and statements of assumptions underlying any of the foregoing. Forward-looking statements are identified by such words as "believe," "anticipate," "expect," "estimate," "intend," "plan," "project," "will," "may" and variations of such words and similar expressions and are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified. Future events and actual results could differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. There can be no assurances that results described in forward-looking statements will be achieved, and actual results could differ materially from those suggested by the forward-looking statements. Some of the important factors that could cause our actual results to differ materially from those projected in any forward-looking statements include, but are not limited to, the following:

- our reliance on partners for product availability and competitive products to sell as well as our competition with our partners;
- our reliance on partners for marketing funds and purchasing incentives;
- changes in the IT industry and/or rapid changes in technology;
- disruptions in our IT systems and voice and data networks, including risks and costs associated with the integration and upgrade of our IT systems;
- actions of our competitors, including manufacturers and publishers of products we sell;
- failure to comply with the terms and conditions of our commercial and public sector contracts;
- the security of our electronic and other confidential information;
- general economic conditions;
- our dependence on certain personnel;
- the variability of our net sales and gross profit;
- the integration and operation of acquired businesses, including our ability to achieve expected benefits of the acquisitions;
- the risks associated with our international operations;
- exposure to changes in, interpretations of, or enforcement trends related to tax rules and regulations; and
- intellectual property infringement claims and challenges to our registered trademarks and trade names.

Additionally, there may be other risks that are otherwise described from time to time in the reports that we file with the Securities and Exchange Commission. Any forward-looking statements in this report should be considered in light of various important factors, including the risks and uncertainties listed above, as well as others. We assume no obligation to update, and, except as may be required by law, do not intend to update, any forward-looking statements. We do not endorse any projections regarding future performance that may be made by third parties.

PARTI

Item 1. Business

General

Insight Enterprises, Inc. ("Insight" or the "Company") is a leading global provider of information technology ("IT") solutions to businesses and public sector institutions. The Company is organized in the following three operating segments, which are primarily defined by their related geographies:

		% of 2013
Operating Segment*	Geography	Consolidated Net Sales
North America	United States and Canada	67%
EMEA	Europe, Middle East and Africa	29%
APAC	Asia-Pacific	4%

^{*} Additional detailed segment and geographic information can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 and in Note 18 to the Consolidated Financial Statements in Part II, Item 8 of this report.

We provide integrated IT solutions to our clients through our extensive hardware, software and services offerings and efficient supply chain combined with highly skilled technology specialists and engineers with expertise in complex solutions such as data center, collaboration, application integration and migration, security, virtualization and cloud. With broad technical scope and capabilities, we offer a single source for our clients' diverse IT requirements. We assess, design, deploy and manage IT solutions to help our clients enable, manage and secure their IT environments. Our product fulfillment and logistics capabilities, management tools and technical expertise make designing, deploying and managing IT solutions easier for our clients while helping them control their IT costs. Insight has locations in 22 countries, and we have the capabilities to serve clients in more than 200 countries with software provisioning and related services, transacting business in 15 languages and 15 currencies. Currently, our offerings in North America and select countries in EMEA include a suite of IT hardware, software and services solutions. Our offerings in the remainder of EMEA and in APAC are almost entirely software and select software-related services. On a consolidated basis, hardware, software and services represented 51%, 44% and 5%, respectively, of our net sales in 2013 compared to 52%, 43% and 5%, respectively, in 2012.

We began operations in Arizona in 1988, incorporated in Delaware in 1991 and completed our initial public offering in 1995. Our corporate headquarters are located in Tempe, Arizona. We began operations in the U.S., expanded into Canada in 1997 and into the United Kingdom in 1998. In 2006, through our acquisition of Software Spectrum, Inc., we expanded deeper into global markets in EMEA and APAC. In 2008, through our acquisitions of Calence, LLC in North America and MINX Limited in the United Kingdom, we enhanced our global technical expertise around higher-end networking and communications technologies, as well as managed services and security. In 2011, we enhanced our professional services capabilities by acquiring Tempe, Arizona-based Ensynch, Incorporated ("Ensynch"). In 2012, we expanded our hardware capabilities into key markets in our existing European footprint by acquiring Inmac GmbH and Micro Warehouse BV ("Inmac"), a broad portfolio business-to-business hardware reseller based in Germany and the Netherlands servicing clients in Western Europe. Through the evolution of our business and these acquisitions, we have successfully migrated from a hardware reseller to a comprehensive IT solutions provider.

Values

We are focused on instilling a winning culture and have an established set of values that set the tone for our business and define who we are. Our core values are:

- We Exist to Win the Loyalty of Our Clients
- We Respect Each Other
- We Develop and Value Our Teammates
- We Act with Integrity
- We Strive for Operational Excellence in All We Do

We believe that these values strengthen the overall Insight experience for our teammates, clients and partners (we refer to our employees as "teammates," our customers as "clients" and our suppliers as "partners"). By living these values, we believe we are able to attract, develop and retain great talent. We have identified eleven tenets which we define as the "Insight Way" of living our core values:

- Everyone either adds value for a client or adds value for someone who is.
- We are in this to win and have fun doing it.
- We recognize and reward teammates for achievements.
- The key to our success is relentless continuous improvement for every business process.
- We treat the dollars we spend as if they were our own.
- We strive to be the best choice for our partners.
- We hold ourselves and others accountable.
- We listen and encourage healthy debate and resolve conflict directly.
- We hire and retain passionate team players who drive superior results.
- We take responsibility for diversity, the environment and communities we live in.
- We embrace change and encourage innovative and creative ideas.

Business Strategy

Our vision is to be the trusted advisor to our clients, helping them enhance their business performance through innovative technology solutions. Our value is our ability to guide, advise, implement and manage IT solutions for our clients, and our strategy is to grow profitable market share by delivering relevant IT solutions to our clients on a scalable support and delivery platform. With the continual emergence of new technologies and technology solutions in the IT industry, we believe businesses continue to seek technology providers to supply value-added advice to help them identify and deploy IT solutions, rather than to just supply product selection, price and availability. We believe that Insight has a unique position in the market and can gain profitable market share and provide enhanced value to our clients. We have deep services and solutions capabilities, we have a multi-national footprint, and we serve a broad range of clients by industry and by geography. We also have a multi-partner approach and excel at providing broad product selection at competitive prices through an efficient supply chain and delivery platform.

We believe that what differentiates Insight from our competitors is:

- Our global scale and reach we had \$5.1 billion in net sales in 2013 and have the capabilities to serve clients in more than 200 countries with software provisioning and related services.
- Our people we have over 5,200 teammates worldwide, including over 1,100 skilled, certified consulting and service delivery professionals.
- Our breadth and depth of services we have developed services capabilities focused on managed, technical and professional services, particularly in the United States and the United Kingdom.
- Our business foundation we have a broad offering of hardware and software products, with access to billions of dollars in virtual inventory, efficient supply chain execution and customizable e-commerce capabilities.
- Our partners and clients we have a multi-partner approach and have partnerships with all of the leading product manufacturers, software publishers and distribution partners and service a global portfolio of commercial and public sector clients.

Our long-term strategy extends and expands upon our 2013 growth initiatives and includes three components:

- Grow our traditional core business faster than market and expand our services sales;
- Be a global channel leader in cloud products and services; and
- Employ strict operational discipline in all that we do to maximize our earnings from operations margin.

Grow our traditional core business faster than market and expand our services sales. Our geographically aligned sales and delivery model is centered on profitable organic growth and market share gain. We remain focused on selling into a specific set of targeted clients that are part of our total addressable market, or as we call it, our TAM. Key initiatives include a go-to-market model in selected cities in North America where we are investing in sales, technical and delivery resources to drive growth with existing and new TAM clients as well as to drive expansion in specific service/solution areas with key partners. In addition to our continued focus on the large enterprise client market, we are putting particular emphasis on increasing our share of the middle market client group, which is key to our strategy in all

geographies. In North America, we are prioritizing our investment in select vertical markets, including K-12 education, healthcare and service provider. In all regions, we will also continue to target the public sector. We are addressing these opportunities to grow market share by investing in our sales and technical support teams in all geographies and investing in enhanced training initiatives.

In addition to our focus on new clients, we seek to increase our share of our current clients' annual IT budgets. We are investing in focused training programs in North America and have tighter alignment between our sales teammates and our specialists, who have more advanced technical expertise, to ensure that our sales teammates are able to sell across our portfolio of offerings. We launched our new IT system in EMEA, and we now have the systems capabilities to offer hardware in key markets in EMEA. Our operating model, which includes a mix of trained teammates, management systems and IT systems, allows us to tailor offerings based on the size and complexity of our client. Accordingly, we believe that there are opportunities for Insight to expand our existing client relationships by increasing the types of products and services that our clients buy from us.

We have identified, and are engaged with, top IT partners in designing, procuring, deploying, implementing and managing solutions that combine hardware, software and services to meet the specific and critical technology needs of our clients. Our services/solutions can be provided through a variety of delivery mechanisms, including on-premise, through our remote operations center, or through a private, public or hybrid cloud. The key areas of focus are:

- Integrated Collaboration -integrating the best of breed features across Cisco and Microsoft
- Endpoint Optimization securing cross-platform application delivery
- Multi-site Deployment integrating store architecture and management
- Next Generation Data Center designing a private, public or hybrid cloud roadmap and converged infrastructure platform
- Private Cloud and Public Cloud Marketplace migrating critical workloads to the cloud

Additionally, our solutions leverage technology from several of the above areas to meet the specific needs of our clients. Our go-to-market services strategy in the United States centers around teams structured to support our portfolio of solutions. In bringing the right solutions to market, these teams play a critical role in developing expertise and best practices, generating demand, providing sales support and overseeing project delivery. We have aligned our set of market relevant and differentiated service offerings to our areas of focus, and we believe we will grow our services sales through our focus on these profitable, repeatable and scalable solutions.

We intend to take advantage of the trends impacting the technology market, with a specific focus on cloud computing, but will also explore big data and choose-your-own-device programs. We are committed to taking advantage of and leveraging opportunities as manufacturers, publishers and service providers develop new technologies and as new channels for buying and supplying technology develop and gain market acceptance.

While Insight's business was primarily built on hardware and software product sales, which are still the foundation of many of our client relationships today, we believe our services capabilities differentiate Insight in the marketplace and enhance our profitability. Although our services capabilities are most mature in our United States business, we are growing our capabilities in the United Kingdom and are selectively launching the offering of such services in Canada and certain countries in our EMEA and APAC segments.

In addition, we are developing our capabilities and expanding our service partner network in the United Kingdom, the Netherlands, Germany, France and Canada to deliver select hardware-related services to clients in those markets.

In other countries where we do not currently sell hardware, we intend to continue to enhance our software offerings by introducing Software as a Service ("SaaS") cloud solutions, expanding our software-related services capabilities, and extending our client reach with middle market and public sector clients. In addition, we intend to maintain our global software capabilities to support our multinational clients. For a discussion of risks associated with international operations, see "Risk Factors – There are risks associated with our international operations that are different than the risks associated with our operations in the United States, and our exposure to the risks of a global market could hinder our ability to maintain and expand international operations," in Part I, Item 1A of this report.

Be a global channel leader in cloud products and services. Cloud computing represents an evolution in the IT world. Private, public and hybrid cloud solutions provide flexible, reliable and affordable solutions for delivering critical IT functions, such as email, data security, data center hosting and more. To date, Insight has sold in excess of seven million seats from various partners. We are developing solutions and services to make the transition from the traditional IT computing model to cloud computing easier for our clients.

Our cloud strategy is focused on solutions targeted to meet identified needs in specific client segments and to help our clients succeed in the cloud. We are executing on this initiative by aggressively building our solutions capabilities through a combination of potential tuck-in acquisitions and organic growth and becoming a leading single-source provider of best-in-class cloud computing solutions tailored to specific client segment requirements.

Building on our value as a technology solutions provider, the InsightCloud Solutions Center offers clients in North America and EMEA a new way to learn about, shop for, and manage and provision cloud computing solutions. The InsightCloud Solutions Center provides an array of cloud offerings from industry leaders, complete with client care support services and expert presale resources to assist in client decision making and implementation. The InsightCloud Solutions Center acts as our "as-a-service" aggregation portal linked to Insight.com, which enables integrated procurement and provisioning, a utility billing system, solution administration support and on-demand services.

Employ strict operational discipline in all that we do to maximize our earnings from operations margin. We are placing significant emphasis on profitability initiatives throughout the Company. We regularly perform client and partner profitability reviews and intend to expand our business relationships to drive an appropriate level of profitability. Additionally, we are continuing to implement specific action plans to remediate the negative effects on our gross profit of program changes implemented by our largest software partner.

We define operational excellence in terms of our productivity, or how we align our organizational and departmental goals to our daily work effort. We measure our productivity based on the ratio of our selling and administrative expenses to gross profit dollars and to net sales. In order to improve productivity, we have implemented a series of initiatives, including upgrading our IT systems to garner efficiencies in our business, standardizing the process by which we measure and reward the productivity of account representative teammates, defining and setting expectations for productivity levels for all teammates, embedding these metrics into job descriptions, benchmarking ourselves internally and externally and utilizing a formalized management system to review our progress through quarterly business reviews. We have established clear roles and accountabilities for all teammates and aligned compensation models and business processes to continue our focus on productivity improvements across our business.

Utilizing metrics and a management system to track our performance and a weekly sales management commitment process, we have visibility into our business to ensure resources are aligned to drive results. We believe that our continuous focus on operational excellence, business intelligence and improvement for every business process is yielding a significant long-term benefit to Insight.

Hardware, Software and Services Offerings

Hardware Offerings. We currently offer our clients in North America and select countries in EMEA a comprehensive selection of IT hardware products. We offer products from hundreds of manufacturers, including such industry leaders as Cisco, Hewlett-Packard ("HP"), Lenovo, Dell, EMC, NetApp, Apple and IBM. Our scale and purchasing power, combined with our efficient, high-volume and cost effective direct sales and marketing model, allow us to offer competitive prices. We believe that offering choices from multiple partners enables us to better serve our clients by providing a variety of product solutions to address their specific business needs. These needs may be based on particular client preferences or other criteria, such as real-time best pricing and availability, or compatibility with existing technology.

The four hardware technology categories we have identified as key to our solutions selling focus are:

- Desktop, notebook and tablet
- Networking
- Server and power
- Storage

In addition to our distribution facilities, we have "direct-ship" programs with many of our partners, including manufacturers and distributors, allowing us to expand our product offerings without increasing inventory, handling costs or inventory risk exposure. As a result, we are able to provide a product offering with billions of dollars of products in virtual inventory. Convenience and product options among multiple brands are key competitive advantages against manufacturers' direct selling programs, which are generally limited to their own brands and may not offer clients a complete or best-in-class solution across all product categories.

Software Offerings. Our clients acquire software applications from us in the form of licensing agreements with software publishers, boxed products, or through SaaS, whereby clients subscribe to software that is hosted either by the software publisher or a dedicated third-party hosting company. We offer products from hundreds of publishers, including such industry leaders as Microsoft, Adobe, VMware, Symantec, McAfee and Citrix. The majority of our clients obtain their software applications through licensing agreements, which we believe is a result of their ease of administration and cost-effectiveness. Licensing agreements, or right-to-copy agreements, allow a client to either purchase a license for each of its users in a single transaction or periodically report its software usage, paying a license fee based on the number of users.

As software publishers choose different models for implementing licensing agreements, businesses must evaluate the alternatives to ensure that they select the appropriate agreements and comply with the publishers' licensing terms when purchasing and managing their software licenses. We work closely with our clients to understand their licensing needs and to educate them regarding the options available under publisher licensing agreements. Many of our clients who have elected to purchase software licenses through licensing agreements have also entered into software maintenance agreements, which allow clients to receive new versions, upgrades or updates of software products released during the maintenance period, in exchange for a specified annual fee. We assist our clients and partner publishers in tracking and renewing these agreements. In connection with certain enterprise-wide licensing agreements, publishers may choose to bill and collect from clients directly. In these cases, we earn a referral fee directly from the publisher.

The four software and licensing technology categories we have identified as key to our solutions selling focus are:

- Office productivity
- Virtualization
- Creativity
- Data protection

Additionally, we help our clients standardize their software environments while reducing costs and limiting risk through optimal license use and compliance management. We offer clients a portfolio of Software Asset Management ("SAM") services, including SAM consultations, assessment of ISO standard attainment, and license reconciliations. We help clients determine their license rights and utilization rates, reconcile the difference, and then proactively track, analyze, and manage their software portfolio from procurement to update to retirement.

Services Offerings. We currently offer a suite of consulting, technical and managed services in the U.S. and the United Kingdom via Insight teammates, augmented by service partners to fill gaps in our geographic coverage or capabilities. We also utilize partners to deliver these services in Canada and selected services in the rest of EMEA and APAC. We believe that developing the breadth and quality of these capabilities internally or through targeted acquisitions over time will be a key differentiator for us. We have, and intend to continue to develop, an array of technical expertise and service capabilities to help identify, acquire, implement and manage technology solutions to allow our clients to improve their business performance.

As discussed previously, to grow profitable market share, we have identified and are focused on select areas. Within these areas, we offer the following end-to-end capabilities:

- Plan
 - Assessment and Strategy
 - o Design
- Deploy
 - Integration
 - o Implementation
- Operate
 - Management
 - o Cloud and Hosted
- Refresh
 - Warranty
 - Maintenance

We know that our clients have limited resources to provide reliable support to their end users and that it is important for them to maximize the life cycle and value of their IT investments. Our consulting services are focused on assessment and design in networking, unified communications, collaboration and office productivity. Insight's technical services span multi-site deployment, on-site programs and maintenance with support across a wide range of hardware and software partners. Our managed services create an extension of our client's team and include our Remote Network Operation Center ("RNOC"), our integration labs, our service desk and our National Repair Center ("NRC"). The RNOC provides 24x7 remote management of clients' infrastructure, spanning network, server and storage. Our ISO certified labs deliver a range of services from imaging to configuration to remote testing of product in a client's IT environment via secure Virtual Private Network ("VPN") connections. The NRC offers repair, remarketing and overnight hot-swap services. We have a smaller RNOC in England with similar selected services.

We can also help our clients preserve capital and increase the value from limited resources by delivering business-critical applications and programs from the cloud. With low upfront costs and no need for in-house maintenance, "as-a-service" offerings are an effective alternative to potentially more expensive on-premise solutions. We partner with providers to deliver solutions around collaboration and messaging, managed security and data management, including Microsoft, Symantec, McAfee and IBM. We also help our clients successfully adopt "as-a-service" offerings by providing cloud readiness, migration and management services.

Our service teams are made up of industry-, technical- and product-certified engineers, consultants and specialists who are current on best practices and the latest developments in their respective practice areas and reference architectures.

We are a Cisco Gold Certified partner in the United States and the United Kingdom and have Master Certifications in unified communications and security in the United States. Our data center practice in the United States is an HP Authorized Enterprise Provider and holds HP Storage Elite, HP Blade Elite and HP Services Elite partner status. We hold Microsoft Gold certifications in identity and security, portals and collaboration, virtualization, server platform, systems management, software asset management and volume licensing and are a Microsoft Cloud Accelerator Partner. We also have been awarded premier partner status by a number of other partners, such as IBM, EMC and VMware.

Our Information Technology Systems

We have committed significant resources to the IT systems we own and use to manage our business and believe that our success is dependent upon our ability to provide prompt and efficient service to our clients based on the accuracy, quality and utilization of the information generated by our IT systems. Because these systems affect our ability to manage our sales, client service, partner relationships and programs, distribution, inventories and accounting systems and our voice and data networks, we have built redundancy into certain systems, maintain system outage policies and procedures and have comprehensive data backup. We are focused on driving improvements in sales productivity through upgraded IT systems to support higher levels of client satisfaction and new client acquisition, as well as garnering efficiencies in our business.

Over the past two years, we delivered a standardized system across North America by consolidating systems and removing operational barriers created by the multiple IT environments inherited in past acquisitions.

This systems integration strategy in North America allows us to:

- Simplify our systems landscape;
- Improve productivity by streamlining applications, process and infrastructure;
- Enhance cross-selling by improving client and account executive access to all products and services we sell;
- Implement solutions that effectively support our services business; and
- Standardize our data repository to facilitate user access and strengthen controls.

During 2013, we completed the deployment of all countries in our EMEA operations onto a separate, single new IT system platform that gives us the capability to expand our sales of hardware and services, in addition to software, to clients in that region.

In 2014, we plan to migrate our APAC operations to the same IT system platform we use in North America.

For a discussion of risks associated with our IT systems, see "Risk Factors – Disruptions in our IT systems and voice and data networks, including the integration and upgrade of our IT systems, could affect our ability to service our clients and cause us to incur additional expenses," in Part I, Item 1A of this report.

Competition

The IT hardware, software and services industry is very fragmented and highly competitive. We compete with a large number and wide variety of marketers and resellers of IT hardware, software and services, including:

- Direct marketers and resellers, such as CDW (North America), Systemax (Europe), Softchoice, Comparex, PC Connection, PCM, World Wide Technology, SHI, SoftwareONE, Computacenter, Specialist Computercenters, Bechtle and Cancom;
- National and regional resellers, including value-added resellers, specialty retailers, aggregators, distributors, and to a lesser extent, national computer retailers, computer superstores, Internet-only computer providers, consumer electronics and office supply superstores and mass merchandisers;
- Product manufacturers, such as Dell, HP, IBM and Lenovo:
- Software publishers, such as IBM, Microsoft and Symantec:
- Systems integrators, such as Compucom Systems, Inc.;
- National and global service providers, such as IBM Global Services and HP/EDS; and
- E-tailers, such as Newegg, Buy.com and e-Buyer (United Kingdom).

The competitive landscape in the industry is continually changing as various competitors expand their product and service offerings. In addition, emerging models such as cloud computing are creating new competitors and opportunities in messaging, infrastructure, security, collaboration and other services offerings, and, as with other areas, we both resell and compete directly with many of these offerings.

For a discussion of risks associated with the actions of our competitors, see "Risk Factors – The IT hardware, software and services industry is intensely competitive, and actions of our competitors, including manufacturers and publishers of products we sell, can negatively affect our business," in Part I, Item 1A of this report.

Partners

During 2013, we purchased products and software from approximately 4,200 partners. Approximately 66% (based on dollar volume) of these purchases were directly from manufacturers or software publishers, with the balance purchased through distributors. Purchases from Microsoft accounted for approximately 30% of our aggregate purchases in 2013. No other partner accounted for more than 10% of purchases in 2013. Our top five partners as a group for 2013 were Microsoft, Cisco, Ingram Micro (a distributor), HP and Tech Data (a distributor), and approximately 63% of our total purchases during 2013 came from this group of partners. Although brand names and individual products are important to our business, we believe that competitive sources of supply are available in substantially all of our product categories such that, with the exception of Microsoft, we are not dependent on any single partner for sourcing products.

During 2013, sales of Microsoft, HP and Cisco products accounted for approximately 30%, 14% and 11%, respectively, of our consolidated net sales. No other manufacturer's products accounted for more than 10% of our consolidated net sales in 2013. Sales of product from our top five manufacturers/publishers as a group (Microsoft, HP, Cisco, Lenovo and VMware) accounted for approximately 66% of Insight's consolidated net sales during 2013.

We obtain incentives from certain product manufacturers, software publishers and distribution partners based typically upon the volume of sales or purchases of their products and services. In other cases, such incentives may be in the form of participation in our partner programs, which may require specific services or activities with our clients, discounts, marketing funds, price protection or rebates. Manufacturers and publishers may also provide mailing lists, contacts or leads to us. We believe that these incentives (or partner funding) and other marketing assistance allow us to increase our marketing reach and strengthen our relationships with leading manufacturers and publishers. This funding is important to us, and any elimination or substantial reduction would increase our costs of goods sold or marketing expenses, resulting in a corresponding decrease in our earnings from operations.

We are focused on understanding our partners' objectives and developing plans and programs to grow our mutual businesses. We measure partner satisfaction regularly and hold quarterly business reviews with our largest partners to review business results from the prior quarter, discuss plans for the future and obtain feedback. Additionally, we host annual partner conferences in North America, EMEA and APAC to articulate our plans for the upcoming year.

As we move into new service areas, we may become even more reliant on certain partner relationships. For a discussion of risks associated with our reliance on partners, see "Risk Factors – We rely on our partners for product availability and competitive products to sell, and we also compete with many of our partners" and "– We rely on our partners for marketing funds and purchasing incentives," in Part I, Item 1A of this report.

Teammates

As of December 31, 2013, we employed 5,202 teammates, of whom 2,868 were engaged in management, support services and administration activities (including over 1,100 skilled, certified consulting and service delivery professionals), 2,179 were engaged in sales related activities, and 155 were engaged in distribution activities. Our teammates in the U.S. are not represented by a labor union, and our workforces in certain foreign countries, such as Germany, have worker representative committees or work councils with which we maintain strong relationships. We believe our relations with employees are good, and we have never experienced a labor related work stoppage.

For a discussion of risks associated with our dependence on certain personnel, including sales personnel, see "Risk Factors – We depend on certain personnel," in Part I, Item 1A of this report.

Seasonality

We experience some seasonal trends in our sales of IT hardware, software and services. For example:

- software sales are typically seasonally higher in our second and fourth quarters, particularly the second quarter;
- business clients, particularly larger enterprise businesses in the U.S., tend to spend more in our fourth quarter as they utilize their remaining capital budget authorizations, and less in the first quarter;
- sales to the federal government in the U.S. are often stronger in our third quarter, while sales in the state and local government and education markets are stronger in our second quarter; and
- sales to public sector clients in the United Kingdom are often stronger in our first quarter.

These trends create overall seasonality in our consolidated results such that sales and profitability are expected to be higher in the second and fourth quarters of the year. For a discussion of risks associated with seasonality see "Risk Factors – Our net sales and gross profit have historically varied, making our future operating results less predictable," in Part I, Item 1A of this report.

Backlog

The majority of our backlog historically has been and continues to be open cancelable purchase orders. We do not believe that backlog as of any particular date is predictive of future results.

Intellectual Property

We do not maintain a traditional research and development group, but we do develop and seek to protect a range of intellectual property, including trademarks, service marks, copyrights, domain name rights, trade dress, trade secrets and similar intellectual property, relying for such protection on applicable statutes and common law rights, trade-secret protection and confidentiality and license agreements, as applicable, with teammates, clients, partners and others to protect our intellectual property rights. Our principal trademark is a registered mark, and we also license certain of our proprietary intellectual property rights to third parties. We have registered a number of domain names, applied for registration of other marks in the U.S. and in select international jurisdictions, and, from time to time, filed patent applications. We believe our trademarks and service marks, in particular, have significant value, and we continue to invest in the promotion of our trademarks and service marks and in our protection of them. For a description of risks associated with our intellectual property, see "Risk Factors – We may not be able to protect our intellectual property adequately, and we may be subject to intellectual property infringement claims," in Part I, Item 1A of this report.

Available Information

Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to such reports filed pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the reports of beneficial ownership filed pursuant to Section 16(a) of the Exchange Act are available free of charge on our web site at www.insight.com, as soon as reasonably practicable after we electronically file them with, or furnish them to, the Securities and Exchange Commission. The information contained on our web site is not included as a part of, or incorporated by reference into, this Annual Report on Form 10-K.

Item 1A. Risk Factors

We rely on our partners for product availability and competitive products to sell, and we also compete with many of our partners. We acquire products for resale both directly from manufacturers and publishers and indirectly through distributors, and the loss of a significant partner relationship could cause a disruption in the availability of products to us. Many of our manufacturer and publisher partners are also our competitors, as many sell directly to business customers, particularly larger corporate customers. There is no assurance that, as manufacturers and publishers continue to sell both through the reseller channel and directly to end users, they will not limit or curtail the availability of their product to resellers like us. In addition, the manner in which publishers distribute software is changing, and many publishers now offer their programs as cloud, hosted or SaaS solutions. These changes in distribution may intensify competition and increase the volume of software made available directly to end users through these competitive programs. Any significant increase in such sales could have a material adverse effect on our business, results of operations and financial condition.

We rely on our partners for marketing funds and purchasing incentives. Certain manufacturers, publishers and distributors provide us with substantial incentives in the form of rebates, marketing funds, purchasing incentives, early payment discounts, referral fees and price protections. Partner funding is used to offset, among other things, inventory costs, costs of goods sold, marketing costs and other operating expenses. Certain of these funds are based on our volume of sales or purchases, growth rate of net sales or purchases and marketing programs. If we do not meet the goals of these programs or if we are not in compliance with the terms of these programs, there could be a material negative effect on the amount of incentives offered or paid to us by manufacturers and publishers. We have experienced adverse program changes recently, and we anticipate that in the future the incentives that many partners make available to us may either be reduced or that the requirements for earning the available amounts will change. If we are unable to react timely to any fundamental changes in the programs of publishers or manufacturers, including the elimination of, or significant reductions in, funding for some of the activities for which we have been compensated in the past, particularly related to incentive programs with our largest partners, HP and Microsoft, the changes could have a material adverse effect on our business, results of operations and financial condition. No assurance can be given that we will continue to receive such incentives.

Changes in the IT industry and/or rapid changes in technology may reduce demand for the IT hardware, software and services we sell or change who makes purchasing decisions for IT hardware, software and services. Our results of operations are influenced by a variety of factors, including the condition of the IT industry, shifts in demand for, or availability of, IT hardware, software, peripherals and services, and industry innovation and the introduction of new products. The IT industry is characterized by rapid technological change and the frequent introduction of new products and changing delivery channels and models, which can decrease demand for current products and services and

can disrupt purchasing patterns. If we fail to react in a timely manner to such changes, we may experience lower sales and, with respect to hardware, we may have to record write-downs of obsolete inventory. In addition, in order to satisfy client demand, protect ourselves against product shortages, obtain greater purchasing discounts and react to changes in original equipment manufacturers' terms and conditions, we may decide to carry inventory products that may have limited or no return privileges. There can be no assurance that we will be able to avoid losses related to inventory obsolescence on these products. Additionally, if purchasing power within our clients shifts from centralized procurement functions to business units or individual end users and we are unable to react timely to any such changes, these shifts in purchasing power could have a material adverse effect on our business, results of operations and financial condition.

The cloud and "as a service" models are disrupting the IT market and introducing new products, services and competitors to the market. In many cases, these new distribution models allow enterprises to obtain the benefits of commercially licensed, internally operated software with less complexity and lower initial set-up, operational and licensing costs, increasing competition for us. There can be no assurance that we will be able to adapt to, or compete effectively with, current or future distribution channels or competitors or that the competitive pressures we face will not have a material adverse effect on our business, results of operations and financial condition.

Disruptions in our IT systems and voice and data networks, including the integration and upgrade of our IT systems, could affect our ability to service our clients and cause us to incur additional expenses. We believe that our success to date has been, and future results of operations will be, dependent in large part upon our ability to provide prompt and efficient service to our clients. Our ability to provide that level of service is largely dependent on the ease of use, accuracy, quality and utilization of our IT systems, which affects our ability to manage our sales, client service, distribution, inventories and accounting systems, and the reliability of our voice and data networks and managed services offerings. In 2013, we completed the integration and conversion of our IT systems in North America and EMEA, and we are in the process of integrating and converting IT systems in our APAC business segment. There can be no assurances that these integration and conversion projects will yield the anticipated efficiency benefits and will not cause disruptions in our business, and any such disruption or failure to realize the benefits of these projects could have a material adverse effect on our results of operations and financial condition. If current technology is determined to have a shorter useful life or the value of the current system is impaired, we could incur additional depreciation expense and/or impairment charges. A substantial interruption in our IT systems or in our voice and data networks, however caused, could occur and could have a material adverse effect on our business, results of operations and financial condition.

The IT hardware, software and services industry is intensely competitive, and actions of our competitors, including manufacturers and publishers of products we sell, can negatively affect our business. Competition in the industry is based on price, product availability, speed of delivery, credit availability, quality and breadth of product lines, and, increasingly, on the ability to provide services and tailor specific solutions to client needs. In addition to the manufacturers and publishers of products we sell, we compete with a large number and wide variety of providers and resellers of IT hardware, software and services. We believe our industry will see further consolidation as product resellers and direct marketers combine operations or acquire or merge with other resellers, service providers and direct marketers to increase efficiency, service capabilities and market share. Moreover, current and potential competitors have established or may establish cooperative relationships among themselves or with third parties to enhance their product and service offerings. Accordingly, it is possible that new competitors or alliances among competitors may emerge and acquire significant market share. Generally, pricing is very aggressive in the industry, and we expect pricing pressures to continue. There can be no assurance that we will be able to negotiate prices as favorable as those negotiated by our competitors or that we will be able to offset the effects of price reductions with an increase in the number of clients, higher net sales, cost reductions, greater sales of services, which are typically at higher gross margins, or otherwise. Price reductions by our competitors that we either cannot or choose not to match could result in an erosion of our market share and/or reduced sales or, to the extent we match such reductions, could result in reduced operating margins or inventory impairment charges, any of which could have a material adverse effect on our business, results of operations and financial condition.

Certain of our competitors in each of our operating segments have greater financial, technical, marketing and other resources than we do. In addition, some of these competitors may be able to respond more quickly to new or changing opportunities, technologies and client requirements. Many current and potential competitors also have greater name recognition and engage in more extensive promotional activities, offer more attractive terms to their customers and adopt more aggressive pricing policies than we do. Additionally, some of our competitors have higher margins and/or lower operating cost structures, allowing them to price more aggressively. There can be no assurance that we will be able to

compete effectively with current or future competitors or that the competitive pressures we face will not have a material adverse effect on our business, results of operations and financial condition.

The failure to comply with the terms and conditions of our commercial and public sector contracts could result in, among other things, damages, fines or other liabilities. Sales to commercial clients are based on stated contractual terms, the terms and conditions on our website or terms contained in purchase orders on a transaction by transaction basis. Sales to public sector clients are derived from sales to federal, state and local governmental departments and agencies, as well as to educational institutions, through open market sales and various contracts and programs. Noncompliance with contract terms, particularly in the highly regulated public sector business, or with government procurement regulations could result in fines or penalties against us or termination of contracts, and, in the public sector, could also result in civil, criminal, and administrative liability. With respect to our public sector business, the government's remedies may include suspension or debarment. In addition, almost all of our contracts have default provisions, and substantially all of our contracts in the public sector are terminable at any time for convenience of the contracting agency. The effect of any of these possible actions or the adoption of new or modified procurement regulations or practices could materially adversely affect our business, financial position and results of operations.

Breaches in the security of our electronic and other confidential information could materially adversely affect our financial condition and results of operations. We are dependent upon automated information technology processes. Privacy, security, and compliance concerns have continued to increase as technology has evolved to facilitate commerce and as cross-border commerce increases. As part of our normal business activities, we collect and store certain confidential information, including information about teammates and information about partners and clients which may be entitled to protection under a number of regulatory regimes. In the course of normal and customary business practice, we may share some of this information with vendors who assist us with certain aspects of our business. Moreover, the success of our operations depends upon the secure transmission of confidential and personal data over public networks, including the use of cashless payments. Any failure on the part of us or our vendors to maintain the security of data we are required to protect, including via the penetration of our network security and the misappropriation of confidential and personal information, could result in business disruption, damage to our reputation, financial obligations to third parties, fines, penalties, regulatory proceedings and private litigation with potentially large costs, and also result in deterioration in our teammates', partners' and clients' confidence in us and other competitive disadvantages, and thus could have a material adverse impact on our business, financial condition and results of operations.

General economic conditions, including unfavorable economic conditions in a particular region, business or industry sector, may lead our clients to delay or forgo investments in IT hardware, software and services, which could adversely affect our business, financial condition and operating results. Weak economic conditions generally or any broad-based reduction in IT spending adversely affects our business, operating results and financial condition. A prolonged slowdown in the global economy or similar crisis, or in a particular region or business or industry sector, or tightening of credit markets, could cause our clients to have difficulty accessing capital and credit sources, delay contractual payments, or delay or forgo decisions to upgrade or add to their existing IT environments, license new software or purchase products or services (particularly with respect to discretionary spending for hardware, software and services). Further, the U.S. Government may implement further reductions in program funding, and we are not able, at present, to predict the effect of any such reductions. Such events could adversely affect our business, financial condition, operating results and cash flow.

The failure of our clients to pay the accounts receivable they owe to us or the loss of significant clients could have a significant negative impact on our business, results of operations, financial condition or liquidity. A significant portion of our working capital consists of accounts receivable from clients. If clients comprising a significant amount of accounts receivable (in number or dollar amount) were to become insolvent or otherwise unable to pay for products and services, our business, results of operations, financial condition or liquidity could be adversely affected. Economic or industry downturns could result in longer payment cycles, increased collection costs and defaults in excess of management's expectations. A significant deterioration in our ability to collect on accounts receivable could also impact the cost or availability of financing under our accounts receivable securitization program.

We depend on certain personnel. We rely on key management teammates to execute our strategy to grow profitable market share. The loss of one or more of these leaders, or a failure to attract and retain new executives, could have a material adverse effect on our business, results of operations and financial condition. We also believe that our future success will be largely dependent on our continued ability to attract and retain highly qualified management, sales, service and technical teammates, and we make a significant investment in the training of our sales account executives

and services engineers. If we are not able to retain such personnel or to train them quickly enough to meet changing market conditions, we could experience a drop in the overall quality and efficiency of our sales and services teammates, and that could have a material adverse effect on our business, results of operations and financial condition.

Our net sales and gross profit have historically varied, making our future operating results less predictable. Our operating results are highly dependent upon our level of gross profit as a percentage of net sales, which fluctuates due to numerous factors, including changes in prices from partners, changes in the amount and timing of partner funding, volumes of purchases, changes in client mix, management of our cash conversion cycle, the relative mix of products and services sold during the period, general competitive conditions, and strategic product and services pricing and purchasing actions. In addition, our expense levels are based, in part, on anticipated net sales and the anticipated amount and timing of partner funding. Therefore, we may not be able to reduce spending quickly enough to compensate for any unexpected net sales shortfall, and any such inability could have a material adverse effect on our business, results of operations and financial condition.

In addition, a reduction in the amount of credit granted to us by our partners could increase our need for and cost of working capital and have a material adverse effect on our business, results of operations and financial condition.

The integration and operation of acquired businesses may disrupt our business and create additional expenses, and we may not achieve the anticipated benefits of the acquisitions. Integration of an acquired business involves numerous challenges and risks, including assimilation of operations of the acquired business and difficulties in the convergence of IT systems, the diversion of management's attention from other business concerns, risks of entering markets in which we have had no or only limited direct experience, assumption of unknown or unquantifiable liabilities, the potential loss of key teammates and/or clients, difficulties in completing strategic initiatives already underway in the acquired companies, and unfamiliarity with partners and clients of the acquired company, each of which could have a material adverse effect on our business, results of operations and financial condition. The success of our integration of acquired businesses typically assumes certain synergies and other benefits. We cannot assure that these risks or other unforeseen factors will not offset the intended benefits of the acquisitions, in whole or in part.

There are risks associated with our international operations that are different than the risks associated with our operations in the United States, and our exposure to the risks of a global market could hinder our ability to maintain and expand international operations. We have operation centers in Australia, Canada, France, Germany, the U.S., and the United Kingdom, as well as sales offices throughout EMEA and APAC. In the regions in which we do not currently have a physical presence, we serve our clients through strategic relationships. In implementing our international strategy, we may face barriers to entry and competition from local companies and other companies that already have established global businesses, as well as the risks generally associated with conducting business internationally. The success and profitability of international operations are subject to numerous risks and uncertainties, many of which are outside of our control, such as:

- political or economic instability;
- changes in governmental regulation or taxation;
- currency exchange fluctuations;
- changes in import/export laws, regulations and customs and duties;
- trade restrictions;
- difficulties and costs of staffing and managing operations in certain foreign countries;
- work stoppages or other changes in labor conditions;
- taxes and other restrictions on repatriating foreign profits back to the U.S.;
- extended payment terms; and
- seasonal reductions in business activity in some parts of the world.

In addition, changes in policies and/or laws of the U.S. or foreign governments resulting in, among other changes, higher taxation, tariffs or similar protectionist laws, currency conversion limitations or the nationalization of private enterprises could reduce the anticipated benefits of international operations and could have a material adverse effect on our results of operations and financial condition.

We have currency exposure arising from both sales and purchases denominated in foreign currencies, including intercompany transactions outside the U.S., and we currently conduct limited hedging activities. In addition, some currencies are subject to limitations on conversion into other currencies, which can limit the ability to otherwise react to

rapid foreign currency devaluations. We cannot predict with precision the effect of future exchange-rate fluctuations on our business and operating results, and significant rate fluctuations could have a material adverse effect on results of operations and financial condition.

International operations also expose us to currency fluctuations as we translate the financial statements of our foreign operations to U.S. dollars.

Changes in, interpretations of, or enforcement trends related to, tax rules and regulations may adversely affect our effective income tax rates or operating margins and we may be required to pay additional tax assessments. We conduct business globally and file income tax returns in various U.S. and foreign tax jurisdictions. Our effective tax rate could be adversely affected by various factors, many of which are outside of our control, including:

- changes in pre-tax income in various jurisdictions in which we operate that have differing statutory tax rates;
- higher corporate tax rates and the availability of deductions or credits in the U.S. and elsewhere;
- changes in tax laws, regulations, and/or interpretations of such tax laws in multiple jurisdictions;
- tax effects related to purchase accounting for acquisitions; and
- resolutions of issues arising from tax examinations and any related interest or penalties.

The determination of our worldwide provision for income taxes and other tax liabilities requires estimation, judgment and complex calculations in situations where the ultimate tax determination may not be certain. Our determination of tax liabilities is always subject to review or examination by tax authorities in various jurisdictions. Any adverse outcome of such review or examination could have a negative impact on our operating results and financial condition. The results from various tax examinations and audits may differ from the liabilities recorded in our financial statements and may adversely affect our financial results and cash flows.

We may not be able to protect our intellectual property adequately, and we may be subject to intellectual property infringement claims. To protect our intellectual property, we rely on copyright, trademark and trade secret laws, unpatented proprietary know-how, and patents, as well as confidentiality, invention assignment, non-solicitation and non-competition agreements. There can be no assurance that these measures will afford us sufficient protection of our intellectual property, and it is possible that third parties may copy or otherwise obtain and use our proprietary information without authorization or otherwise infringe on our intellectual property rights. The disclosure of our trade secrets could impair our competitive position and could have a material adverse effect on our business relationships, results of operations, financial condition and future growth prospects.

In addition, our registered trademarks and trade names are subject to challenge by third parties. This may affect our ability to continue using those marks and names. Likewise, many businesses are actively investing in, developing and seeking protection for intellectual property in the areas of search, indexing, e-commerce and other Web-related technologies, as well as a variety of on-line business models and methods, all of which are in addition to traditional research and development efforts for IT products and application software, and non-practicing entities continue to invest in acquiring patent portfolios for the purpose of turning the portfolios into income-generating assets, whether through licensing campaigns or litigation. As a result, disputes regarding the ownership of and the right to use these technologies are likely to arise in the future, and, from time to time, parties do assert various infringement claims against us, either because of our practices or because we resell allegedly infringing hardware or software, in the form of cease-and-desist letters, licensing inquiries, lawsuits and other communications and demands. If there is a determination that we have infringed the proprietary rights of others, we could incur substantial monetary liability, be forced to stop selling infringing products or providing infringing services, be required to enter into costly royalty or licensing agreements, if available, or be prevented from using the rights, which could force us to change our business practices or hardware. software or services offerings in the future. Additionally, as we increase the types of services provided under the Insight brand, there is a greater likelihood that we will encounter challenges to our trade names, trademarks and service marks. We may not be able to use our principal mark without modification in all geographies for all of our offerings, and these challenges may come from either governmental agencies or other market participants. These types of claims could have a material adverse effect on our business, results of operations and financial condition.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal executive offices are located in Tempe, Arizona. We believe that our facilities will be suitable and adequate for our present purposes, and we anticipate that we will be able to extend our existing leases on terms satisfactory to us or, if necessary, to locate substitute facilities on acceptable terms. At December 31, 2013, we owned or leased a total of approximately 1.3 million square feet of office and warehouse space, and, while approximately 70% of the square footage is in the United States, we own or lease office and warehouse facilities in 12 countries in EMEA and we lease office facilities in five countries in APAC.

Information about significant sales, distribution, services and administration facilities in use as of December 31, 2013 is summarized in the following table:

Operating Segment Headquarters	<u>Location</u> Tempe, Arizona, USA	Primary Activities Executive Offices, Sales and Administration and Network Operations Center	Own or Lease Own
North America	Tempe, Arizona, USA	Client Support Center	Own
	Bloomingdale, Illinois, USA	Sales and Administration	Own
	Hanover Park, Illinois, USA	Services, Distribution and Administration	Lease
	Plano, Texas, USA	Sales and Administration	Lease
	Liberty Lake, Washington, USA	Sales and Administration	Lease
	Tampa, Florida, USA	Sales and Administration	Lease
	Winnipeg, Manitoba, Canada	Sales and Administration	Lease
	Montreal, Quebec, Canada	Sales and Administration	Own
	Montreal, Quebec, Canada	Distribution	Lease
EMEA	Sheffield, United Kingdom	Sales and Administration	Own
	Sheffield, United Kingdom	Distribution	Lease
	Uxbridge, United Kingdom	Sales and Administration	Lease
	Garching, Germany	Sales and Administration	Lease
	Frankfurt, Germany	Sales and Administration	Lease
	Frankfurt, Germany	Distribution	Lease
	Vélizy, France	Sales and Administration	Lease
APAC	Sydney, New South Wales, Australia	Sales and Administration	Lease

In addition to those listed above, we have leased sales offices in various cities across North America, EMEA and APAC. These properties are not included in the table above. A portion of the client support center that we own in Tempe, Arizona included in the table above is currently leased to Revana, formerly known as Direct Alliance Corporation, a discontinued operation that was sold to a third party in 2006. For additional information on operating leases, see Note 7 to the Consolidated Financial Statements in Part II, Item 8 of this report.

Item 3. Legal Proceedings

For a discussion of legal proceedings, see "Legal Proceedings" in Note 16 to the Consolidated Financial Statements in Part II, Item 8 of this report, which is incorporated by reference herein.

Item 4. Mine Safety Disclosures

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock trades under the symbol "NSIT" on The Nasdaq Global Select Market. The following table shows, for the calendar quarters indicated, the high and low sales price per share for our common stock as reported on The Nasdaq Global Select Market.

	Common Stock			
Year 2013	High Price	Low Price		
Fourth Quarter	\$25.02	\$18.37		
Third Quarter	22.11	18.36		
Second Quarter	20.47	16.51		
First Quarter	21.25	18.48		
Year 2012				
Fourth Quarter	\$18.23	\$15.01		
Third Quarter	19.43	15.71		
Second Quarter	22.59	14.39		
First Quarter	22.71	15.97		

As of February 14, 2014, we had 41,510,512 shares of common stock outstanding held by 78 stockholders of record. This figure does not include an estimate of the number of beneficial holders whose shares are held of record by brokerage firms and clearing agencies.

We have never paid a cash dividend on our common stock, and we currently do not intend to pay any cash dividends in the foreseeable future. Our senior revolving credit facility contains restrictions on the payment of cash dividends.

Issuer Purchases of Equity Securities

				(c)		(d)
	(a)			Total Number of Shares		Approximate Dollar
	Total Number		(b)	Purchased as Part of	Val	lue of Shares that May
	of Shares	Av	verage Price	Publicly Announced	Yet	t Be Purchased Under
Period	Purchased	Pa	id per Share	Plans or Programs	t	he Plans or Programs
October 1, 2013 through						
October 31, 2013	=	\$	-	-	\$	50,000,000
November 1, 2013 through						
November 30, 2013	353,316		22.00	353,316		42,226,000
December 1, 2013 through						
December 31, 2013			-			42,226,000
Total	353,316	\$	22.00	353,316		

On February 14, 2013, we announced that our Board of Directors had authorized the repurchase of up to \$50 million of our common stock. As previously reported, during the first half of 2013, we purchased in open market transactions 2,646,722 shares of our common stock at an average price of \$18.89 per share, which represented the full amount authorized under that repurchase program. On October 30, 2013, we announced that our Board of Directors had authorized the repurchase of up to an additional \$50 million of our common stock. Repurchases during the quarter ended December 31, 2013 are reflected in the table above. There is no stated expiration date for our current share repurchase plan. Any share repurchases may be made on the open market, through block trades, through 10b5-1 plans or otherwise. The amount of shares purchased and the timing of the purchases will be based on working capital requirements, general business conditions and other factors. We intend to retire the repurchased shares. All shares repurchased during the year ended December 31, 2013 have been retired.

Stock Price Performance Graph

Set forth below is a graph comparing the percentage change in the cumulative total stockholder return on our common stock with the cumulative total return of the Nasdaq Stock Market U.S. Companies (Market Index) and the Nasdaq Retail Trade Stocks (Peer Index) for the period starting January 1, 2009 and ending December 31, 2013. The graph assumes that \$100 was invested on January 1, 2009 in our common stock and in each of the two Nasdaq indices, and that, as to such indices, dividends were reinvested. As a result of a change in the total return data to be made available to us from our third party provider of this index information, our performance graphs going forward will be prepared using new indices provided by NASDAQ OMX Global Indexes. Please note that information for the Nasdaq Stock Market U.S. Companies index and the Nasdaq Retail Trade Stocks index is provided only from December 31, 2008 through December 31, 2013, the last day this data was available from our third party provider of this index information. We have not, since our inception, paid any cash dividends on our common stock. Historical stock price performance shown on the graph is not necessarily indicative of future price performance.

	Jan. 1, 2009	Dec. 31, 2009	Dec.31, 2010	Dec. 31, 2011	Dec. 31, 2012	Dec. 31, 2013

Item 6. Selected Financial Data

The following selected consolidated financial data should be read in conjunction with our Consolidated Financial Statements and the Notes thereto in Part II, Item 8 and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of this report. The selected consolidated financial data presented below under the captions "Consolidated Statements of Operations Data" and "Consolidated Balance Sheet Data" as of and for each of the years in the five-year period ended December 31, 2013 is derived from our audited consolidated financial statements. The consolidated financial statements as of December 31, 2013 and 2012, and for each of the years in the three-year period ended December 31, 2013, which have been audited by KPMG LLP, our independent registered public accounting firm, are included in Part II, Item 8 of this report.

	Years Ended December 31,						
	2013	2012	2011	2010	2009

Our consolidated statements of operations data above includes results of the acquisitions from their dates of acquisition: Inmac from February 1, 2012 and Ensynch from October 1, 2011.
 During the year ended December 31, 2009, we recorded earnings from a discontinued operation of \$4.5 million, \$2.8 million net of tax, as a result of the favorable settlement on July 7, 2009 of an arbitrated claim related to the sale of Direct Alliance Corporation, a former subsidiary that was sold on June 30, 2006.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of our operations should be read in conjunction with the Consolidated Financial Statements and notes thereto included in Part II, Item 8 of this report. Our actual results could differ materially from those contained in forward-looking statements due to a number of factors, including those discussed in "Risk Factors" in Part I, Item 1A and elsewhere in this report.

Overview

We are a global provider of information technology ("IT") hardware, software and services solutions to businesses and public sector institutions in North America; Europe, the Middle East, Africa ("EMEA"); and Asia-Pacific ("APAC"). Currently, our offerings in North America and select countries in EMEA include IT hardware, software and services. Our offerings in the remainder of our EMEA segment and in APAC are almost entirely software and select software-related services.

Our vision is to be the trusted advisor to our clients, helping them enhance business performance through innovative technology solutions. Our strategy is to grow market share and profitability by delivering relevant product, service and solutions offerings to our clients on a scalable support and delivery platform.

For the full year 2013, our consolidated financial results did not meet our expectations, but we saw improvement in the second through the fourth quarter, after the slow start in the first quarter of 2013. For example:

- Consolidated hardware sales for the full year 2013 declined 5%. However, we saw sequential growth each
 quarter beginning in the second quarter of 2013 and exited the year with a stronger run-rate in this
 category;
- Software product sales grew year over year for the full year 2013, but reported net sales declined slightly because of a higher mix of software maintenance sales, which are reported on a net basis in our financial statements;
- We executed well in mitigating the negative effects of partner program changes, realizing a decline in incentives from our largest software partner of \$4 million compared to the amount we earned in 2012, a strong performance compared to our initial expected range for the reduction of gross profit of between \$8 to \$12 million; and
- We grew our services sales by 3% year over year at higher gross margins than we saw in 2012.

On a consolidated basis, for the year ended December 31, 2013, our net sales declined 3% to \$5.1 billion, as growth in the services category was more than offset by declines in hardware and software. Our resulting gross profit decreased by \$20.8 million, or 3%, while gross margin remained flat at 13.6% of net sales. Selling and administrative expenses decreased \$296,000, or less than 1%, in 2013 compared to 2012 as the costs of our investments in our sales and services resources in North America were offset by lower expenses in EMEA from restructuring actions taken during the year. We reported earnings from operations of \$121.2 million in 2013, a decline of 18% compared to the prior year, which represented 2.4% of net sales, compared to 2.8% in the prior year. Our effective tax rate in 2013 was 38.0% compared to 35.9% in 2012 and 29.3% in 2011. The increase in the tax rate from 2012 to 2013 was primarily due to higher losses in certain foreign jurisdictions in 2013, resulting in an increase in the valuation allowance for deferred tax assets related to these foreign operating losses. The 2011 effective tax rate was lower than recent years as a result of the discrete tax benefits recognized during 2011, as detailed below. Net earnings and diluted net earnings per share were \$71.0 million and \$1.64, respectively, for the year ended December 31, 2013. In 2012, we reported net earnings of \$92.8 million and diluted net earnings per share of \$2.07. In 2011, we reported net earnings of \$100.2 million and diluted net earnings per share of \$2.18.

The results of operations for the year ended December 31, 2013 include the following items:

- severance and restructuring expenses of \$12.7 million, \$9.8 million net of tax; and
- the repurchase of approximately 3.0 million shares of the Company's common stock for \$57.8 million.

The results of operations for the year ended December 31, 2012 include the following items:

- severance and restructuring expenses of \$6.3 million, \$4.3 million net of tax;
- a reduction in legal expenses of approximately \$2.0 million associated with the recovery of legal fees incurred in previous periods;
- an operating gain of \$1.2 million on the sale of a portfolio of non-core service contracts; and
- a non-operating gain on bargain purchase of \$2.0 million as the fair value of the net assets acquired exceeded the purchase price paid by the Company for Inmac.

The results of operations for the year ended December 31, 2011 include the following items:

- severance and restructuring expenses of \$5.1 million, \$3.4 million net of tax;
- tax benefits of \$8.6 million primarily related to the recognition of foreign tax credits upon the reorganization of certain of our foreign operations and to other tax matters; and
- the repurchase of approximately 2.9 million shares of the Company's common stock for \$50.0 million.

Net of tax amounts referenced above were computed using the statutory tax rate for the taxing jurisdictions in the operating segment in which the related expenses were recorded, adjusted for the effects of valuation allowances on net operating losses in certain jurisdictions.

Effective February 1, 2012, we acquired Inmac, a broad portfolio business-to-business hardware reseller based in Frankfurt, Germany and Amsterdam, Netherlands servicing clients in Western Europe. We believe that this acquisition supports our strategic plan to expand hardware capabilities into key markets in our existing European footprint.

Effective October 1, 2011, we acquired Ensynch, a leading professional services firm with multiple Microsoft Gold competencies across the complete Microsoft solution set, including cloud migration and management. The acquisition of Ensynch did not have a significant effect on results of operations in 2011.

During 2013, we generated \$76.1 million of cash flows from operations. We repurchased \$57.8 million of our common stock and utilized \$19.0 million to fund capital investments primarily associated with our IT systems upgrades. During the year, we made combined net repayments of \$13.5 million under our senior revolving credit facility and our accounts receivable securitization financing facility. We ended the year with \$126.8 million of cash and cash equivalents and \$66.5 million of debt outstanding under our long-term facilities.

As previously disclosed, our largest software partner has changed its channel incentive program beginning in October 2013. The changes vary in substance and timing across this partner's offerings. Some of the changes became effective in the fourth quarter of 2013, and some become effective as client contracts renew under their stated terms over the next few years. We currently believe that we will receive between \$15 and \$20 million less in incentives from this partner in 2014. We are taking the necessary strategic steps to preserve our profitability and have identified actions associated with new business and cost reduction measures in 2014 that we expect will offset the adverse effect of these changes.

Details about segment results of operations can be found in Note 18 to the Consolidated Financial Statements in Part II, Item 8 of this report.

Our discussion and analysis of financial condition and results of operations is intended to assist in the understanding of our consolidated financial statements, the changes in certain key items in those consolidated financial statements from year to year and the primary factors that contributed to those changes, as well as how certain critical accounting estimates affect our consolidated financial statements.

Critical Accounting Estimates

General

Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). For a summary of significant accounting policies, see Note 1 to the Consolidated Financial Statements in Part II, Item 8 of this report. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, net sales and expenses. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results, however, may differ from our estimates. Members of our senior management have discussed the critical accounting estimates and related disclosures with the Audit Committee of our Board of Directors.

We consider the following to be our critical accounting estimates used in the preparation of our consolidated financial statements:

Sales Recognition

Sales are recognized when title and risk of loss are passed to the client, there is persuasive evidence of an arrangement for sale, delivery has occurred and/or services have been rendered, the sales price is fixed or determinable and collectibility is reasonably assured. Our standard sales terms are F.O.B. shipping point or equivalent, at which time title and risk of loss have passed to the client. However, because we either (i) have a general practice of covering client losses while products are in transit despite title and risk of loss contractually transferring at the point of shipment or (ii) have specifically stated F.O.B. destination contractual terms with the client, delivery is not deemed to have occurred until the point in time when the product is received by the client.

We make provisions for estimated product returns that we expect to occur under our return policy based upon historical return rates. Our manufacturers warrant most of the products we market, and it is our policy to request that clients return their defective products directly to the manufacturer for warranty service. On selected products, and for selected client service reasons, we may accept returns directly from the client and then either credit the client or ship a replacement product. We generally offer a limited 15- to 30-day return policy for unopened products and certain opened products, which are consistent with manufacturers' terms; however, for some products we may charge restocking fees. Products returned opened are processed and returned to the manufacturer or partner for repair, replacement or credit to us. We resell most unopened products returned to us. Subject to some manufacturers' restrictions, products that cannot be returned to the manufacturer for warranty processing, but are in working condition, are sold to inventory liquidators, to end users as "previously sold" or "used" products, or through other channels to reduce our losses from returned products.

We record the freight we bill to our clients as net sales and the related freight costs we pay as costs of goods sold. We report sales net of any sales-based taxes assessed by governmental authorities that are imposed on and concurrent with sales transactions.

Revenue is recognized from software sales when clients acquire the right to use or copy software under license, but in no case prior to the commencement of the term of the initial software license agreement, provided that all other revenue recognition criteria have been met (i.e., evidence of the arrangement exists, the fee is fixed or determinable and collectibility of the fee is probable).

The sale of hardware and software products may also include the provision of services, and the associated contracts may contain multiple elements or non-standard terms and conditions. Services that are performed by us in conjunction with hardware and software sales that are completed in our facilities prior to shipment of the product are recognized upon delivery, when title passes to the client, for the hardware sale. Net sales of services that are performed at client locations are often service-only contracts and are recorded as sales when the services are performed. If the services are performed at a client location in conjunction with a hardware, software or other services sale, we recognize net sales for each portion of the overall arrangement fee that is attributable to the items as they are delivered or the services are performed. At the inception of the arrangement, the total consideration for the arrangement is allocated to all deliverables using the relative selling price method. The relative selling price method allocates any discount in the arrangement proportionately to each deliverable on the basis of each deliverable's selling price. We determine our best estimate of selling price in a manner

that is consistent with that used to determine the price to sell the deliverable on a standalone basis. The revenue allocation is based on vendor-specific objective evidence of fair value of the products. We currently do not have any material instances in which we account for revenue from multiple element arrangements when vendor-specific evidence does not exist. If vendor-specific objective evidence were not available, we would utilize third-party evidence to allocate the selling price. If neither vendor-specific objective evidence nor third-party evidence were available, estimated selling price would be used for allocation purposes.

We sell certain third-party service contracts and software maintenance or subscription products for which we are not the primary obligor. These sales do not meet the criteria for gross sales recognition and, thus, are recorded on a net sales recognition basis. As we enter into contracts with third-party service providers or vendors and our clients, we evaluate whether the subsequent sales of such services should be recorded as gross sales or net sales. We determine whether we act as a principal in the transaction and assume the risks and rewards of ownership or if we are simply acting as an agent or broker. Under gross sales recognition, the selling price is recorded in sales and our cost to the third-party service provider or vendor is recorded in costs of goods sold. Under net sales recognition, the cost to the third-party service provider or vendor is recorded as a reduction to sales, resulting in net sales equal to the gross profit on the transaction, and there are no costs of goods sold.

We recognize revenue for sales of services ratably over the time period over which the service will be provided if there is no discernible pattern of recognition of the cost to perform the service. Billings for such services that are made in advance of the related revenue recognized are recorded as deferred revenue and recognized as revenue ratably over the billing coverage period. Revenue from certain arrangements that allow for the use of a product or service over a period of time without taking possession of software are also accounted for ratably over the time period over which the service will be provided.

We recognize revenue for professional services engagements that are on a time and materials basis based upon hours incurred as the services are performed and amounts are earned.

Additionally, we sell certain professional services contracts on a fixed fee basis. Revenues for fixed fee professional services contracts are recognized based on the ratio of costs incurred to total estimated costs. Net sales for these service contracts are not a significant portion of our consolidated net sales.

Partner Funding

We receive payments and credits from partners, including consideration pursuant to volume sales incentive programs, volume purchase incentive programs and shared marketing expense programs. Partner funding received pursuant to volume sales incentive programs is recognized as it is earned as a reduction to costs of goods sold. Partner funding received pursuant to volume purchase incentive programs is allocated as a reduction to inventories based on the applicable incentives earned from each partner and is recorded in costs of goods sold as the related inventory is sold. Partner funding received pursuant to shared marketing expense programs is recorded as it is earned as a reduction of the related selling and administrative expenses in the period the program takes place only if the consideration represents a reimbursement of specific, incremental, identifiable costs. Consideration that exceeds the specific, incremental, identifiable costs is classified as a reduction of costs of goods sold. Changes in estimates of anticipated achievement levels under individual partner programs may materially affect our results of operations and our cash flows.

See Note 1 to the Consolidated Financial Statements in Part II, Item 8 of this report for further discussion of our accounting policies related to partner funding.

Stock-Based Compensation

We recognize stock-based compensation net of an estimated forfeiture rate and only recognize compensation expense for those shares expected to vest over the requisite service period of the award. We primarily issue service-based and performance-based restricted stock units ("RSUs"). The number of RSUs ultimately awarded under performance-based RSUs varies based on whether we achieve certain financial results. We record compensation expense each period based on our estimate of the most probable number of RSUs that will be issued under the grants of performance-based RSUs. For any stock options awarded, modifications to previous awards or awards of RSUs that are tied to specified market conditions, we use option pricing models or lattice (binomial) models to determine fair value of the awards.

No stock options were granted and no stock-based compensation expense related to stock options was recognized during the three years ended December 31, 2013. All previously granted unexercised stock options expired in December 2012. If we decide to issue stock options in the future, the estimated fair value of stock options will be determined on the date of the grant using the Black-Scholes-Merton ("Black-Scholes") option-pricing model. The Black-Scholes model requires us to apply highly subjective assumptions, including expected stock price volatility, expected life of the option and the risk-free interest rate. A change in one or more of the assumptions used in the option-pricing model could result in a material change to the estimated fair value of the stock-based compensation.

See Note 9 to the Consolidated Financial Statements in Part II, Item 8 of this report for further discussion of stock-based compensation.

Allowance for Doubtful Accounts

Our allowance for doubtful accounts is determined using estimated losses on accounts receivable based on evaluation of the aging of the receivables, historical write-offs and the current economic environment. Should our clients' or vendors' circumstances change or actual collections of client and vendor receivables differ from our estimates, adjustments to the provision for losses on accounts receivable and the related allowances for doubtful accounts would be recorded. See further information on our allowance for doubtful accounts in Note 17 to the Consolidated Financial Statements in Part II, Item 8 of this report.

Inventories

We evaluate inventories for excess, obsolescence or other factors that may render inventories unmarketable at expected margins. Write-downs are recorded so that inventories reflect the approximate net realizable value and take into account our contractual provisions with our partners governing price protection, stock rotation and return privileges relating to obsolescence. Because of the large number of transactions and the complexity of managing the price protection and stock rotation process, estimates are made regarding write-downs of the carrying amount of inventories. Additionally, assumptions about future demand, market conditions and decisions by manufacturers/publishers to discontinue certain products or product lines can affect our decision to write down inventories. If our assumptions about future demand change or actual market conditions are less favorable than those projected, additional write-downs of inventories may be required. In any case, actual values could be different from those estimated.

Valuation of Long-Lived Assets Including Purchased Intangible Assets and Goodwill

We review property, plant and equipment and purchased intangible assets for impairment whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable. If such events or changes in circumstances indicate a possible impairment, our asset impairment review assesses the recoverability of the assets based on the estimated undiscounted future cash flows expected to result from the use of the asset plus net proceeds expected from disposition of the asset (if any) and compares that value to the carrying value. Such impairment test is based on the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. If the carrying value exceeds the undiscounted future cash flows, an impairment loss is recognized for the difference between fair value and the carrying amount. This approach uses our estimates of future market growth, forecasted net sales and costs, expected periods the assets will be utilized and appropriate discount rates.

We perform an annual review of our goodwill in the fourth quarter of every year, or more frequently if indicators of potential impairment exist, to determine if the carrying value of our recorded goodwill is impaired. We continually assess whether any indicators of impairment exist, and that assessment requires a significant amount of judgment. Events or circumstances that could trigger an impairment review include a significant adverse change in legal factors or in the business climate, unanticipated competition, significant changes in the manner of our use of the acquired assets or the strategy for our overall business, significant negative industry or economic trends, significant declines in our stock price for a sustained period or significant underperformance relative to expected historical or projected future cash flows or results of operations. Any adverse change in these factors, among others, could have a significant effect on the recoverability of goodwill and could have a material effect on our consolidated financial statements.

The goodwill impairment test is performed at the reporting unit level. A reporting unit is an operating segment or one level below an operating segment (referred to as a "component"). A component of an operating segment is a

reporting unit if the component constitutes a business for which discrete financial information is available and management of the segment regularly reviews the operating results of that component. When two or more components of an operating segment have similar economic characteristics, the components may be aggregated and deemed a single reporting unit. An operating segment shall be deemed to be a reporting unit if all of its components are similar, if none of its components is a reporting unit, or if the segment comprises only a single component. Insight has three reporting units, which are equivalent to our operating segments.

We may first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform a quantitative two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. In completing a quantitative test for a potential impairment of goodwill, we first compare the estimated fair value of each reporting unit in which the goodwill resides to its book value, including goodwill. Management must apply judgment in determining the estimated fair value of our reporting units. Multiple valuation techniques can be used to assess the fair value of the reporting unit, including the market and income approaches. All of these techniques include the use of estimates and assumptions that are inherently uncertain. Changes in these estimates and assumptions could materially affect the determination of fair value or goodwill impairment, or both. These estimates and assumptions primarily include, but are not limited to, an appropriate control premium in excess of the market capitalization of the Company, future market growth, forecasted sales and costs and appropriate discount rates. Due to the inherent uncertainty involved in making these estimates, actual results could differ from those estimates. Management evaluates the merits of each significant assumption, both individually and in the aggregate, used to determine the fair value of the reporting units. If the estimated fair value exceeds book value, goodwill is considered not to be impaired and no additional steps are necessary. To ensure the reasonableness of the estimated fair values of our reporting units, we perform a reconciliation of our total market capitalization to the estimated fair value of all of our reporting units.

If the fair value of the reporting unit is less than its book value, then we are required to perform the second step of the impairment analysis by comparing the carrying amount of the goodwill with its implied fair value. In step two of the analysis, we utilize the fair value of the reporting unit computed in the first step to perform a hypothetical purchase price allocation to the fair value of the assets and liabilities of the reporting unit. The difference between the fair value of the reporting unit calculated in step one and the fair value of the underlying assets and liabilities of the reporting unit is the implied fair value of the reporting unit's goodwill. Management must also apply judgment in determining the estimated fair value of these individual assets and liabilities and may include independent valuations of certain internally generated and unrecognized intangible assets, such as trademarks. Management also evaluates the merits of each significant assumption, both individually and in the aggregate, used to determine the fair values of these individual assets and liabilities. If the carrying amount of our goodwill exceeds the implied fair value of that goodwill, an impairment loss would be recognized in an amount equal to the excess.

See further information on the carrying value of goodwill in Note 3 to the Consolidated Financial Statements in Part II, Item 8 of this report.

Income Taxes

Our effective tax rate includes the effect of certain undistributed foreign earnings for which no U.S. taxes have been provided because such earnings are planned to be reinvested indefinitely outside the U.S. Earnings remittance amounts are planned based on the projected cash flow needs as well as the working capital and long-term investment requirements of our foreign subsidiaries and our domestic operations. Material changes in our estimates of cash, working capital and long-term investment requirements could affect our effective tax rate.

We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. We consider past operating results, future market growth, forecasted earnings, historical and projected taxable income, the mix of earnings in the jurisdictions in which we operate, prudent and feasible tax planning strategies and statutory tax law changes in determining the need for a valuation allowance. If we were to determine that it is more likely than not that we would not be able to realize all or part of our net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to earnings in the period such determination is made. Likewise, if we later determine that it is more likely than not that all or part of the net deferred tax assets would be realized, then all or part of the previously provided valuation allowance would be reversed.

We establish liabilities for potentially unfavorable outcomes associated with uncertain tax positions taken on specific tax matters. These liabilities are based on management's assessment of whether a tax benefit is more likely than not to be sustained upon examination by tax authorities. There may be differences between the anticipated and actual outcomes of these matters that may result in subsequent recognition or derecognition of a tax position based on all the available information at the time. If material adjustments are warranted, it could affect our effective tax rate.

Additional information about the valuation allowance and uncertain tax positions can be found in Note 10 to the Consolidated Financial Statements in Part II, Item 8 of this report.

Contingencies

From time to time, we are subject to potential claims and assessments from third parties. We are also subject to various government agency, client and vendor audits. We continually assess whether or not such claims have merit and warrant accrual. An accrual is made if it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Such estimates are subject to change and may affect our results of operations and our cash flows. Additional information about contingencies can be found in Note 16 to the Consolidated Financial Statements in Part II, Item 8 of this report.

RESULTS OF OPERATIONS

The following table sets forth certain financial data as a percentage of net sales for the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Net sales	100.0%	100.0%	100.0%
Costs of goods sold	86.4	86.4	86.6
Gross profit	13.6	13.6	13.4
Operating expenses:			
Selling and administrative expenses	11.0	10.7	10.5

Earnings from operations	2.4	2.8	2.8
Non-operating expense, net	0.2	0.1	0.1
Earnings before income taxes	2.2	2.7	2.7
Income tax expense	0.8	1.0	0.8
Net earnings	<u>1.4</u> %	<u>1.7</u> %	<u>1.9</u> %

Throughout this "Results of Operations" section of "Management's Discussion and Analysis of Financial Condition and Results of Operations," we refer to changes in net sales, gross profit and selling and administrative expenses in EMEA and APAC excluding the effects of foreign currency movements. In computing these change amounts and percentages, we compare the current year amount as translated into U.S. dollars under the applicable accounting standards to the prior year amount in local currency translated into U.S. dollars utilizing the average translation rate for the current year.

2013 Compared to 2012

Net Sales. Net sales for the year ended December 31, 2013 decreased 3% to \$5.1 billion compared to the year ended December 31, 2012. Our net sales by operating segment for the years ended December 31, 2013 and 2012 were as follows (dollars in thousands):

	2013	_	2012	% Change
North America	\$ 3,470,760	\$	3,626,357	(4%)
EMEA	1,469,174		1,463,607	-
APAC	 204,413		211,477	(3%)
Consolidated	\$ 5,144,347	\$	5,301,441	(3%)

Net sales in North America decreased \$155.6 million or 4% for the year ended December 31, 2013 compared to the year ended December 31, 2012. Net sales of services increased 1% year over year, while net sales of hardware and software decreased 5% and 4%, respectively, year to year. The services growth was primarily driven by higher SaaS offerings and cloud sales. We experienced a decline in hardware purchases by our large enterprise clients as we believe they reduced their budgets for capital expenditure investments and delayed the timing of capital projects. Software sales declined year to year due to a higher mix of software maintenance sales to public sector clients, which are recorded on a net basis in our financial statements.

Net sales in EMEA remained relatively flat at \$1.5 billion, in U.S. dollars, for the year ended December 31, 2013 compared to the year ended December 31, 2012. Excluding the effects of foreign currency movements, net sales were down 1% compared to the prior year. Net sales of software and services were up 4% and 23%, respectively, year over year, while net sales of hardware declined 7% year to year. Excluding the effects of foreign currency movements, software and services increased 2% and 22%, respectively, while hardware decreased 6%, compared to the year ended December 31, 2012. The decline in hardware sales was attributable to reduced volume across all client groups. The increase in software sales was due to higher volume with large enterprise and mid-market clients, which more than offset lower volume with our existing public sector clients. The increase in net sales of services was due primarily to new client engagements and higher volume with existing clients.

Net sales in APAC decreased \$7.1 million or 3% for the year ended December 31, 2013 compared to the year ended December 31, 2012. Excluding the effects of foreign currency movements, net sales increased 2% compared to the prior year due to higher volume with new and existing clients.

Net sales by category for North America, EMEA and APAC were as follows for the years ended December 31, 2013 and 2012:

_	North America		EM	EA	APAC		
Sales Mix	2013	2012	2013	2012	2013	2012	
Hardware	61%	62%	34%	37%	3%	2%	
Software	33%	32%	64%	61%	94%	94%	
Services	6%	6%	2%	2%	3%	4%	
=	100%	100%	100%	100%	<u>100%</u>	100%	

Gross Profit. Gross profit decreased 3% to \$698.9 million for the year ended December 31, 2013 compared to the year ended December 31, 2012, with gross margin remaining flat at 13.6% of net sales. Our gross profit and gross profit as a percent of net sales by operating segment for the years ended December 31, 2013 and 2012 were as follows (dollars in thousands):

		% of Net		% of Net
	 2013	Sales	 2012	Sales
North America	\$ 472,187	13.6%	\$ 478,522	13.2%
EMEA	191,324	13.0%	203,845	13.9%
APAC	 35,376	17.3%	 37,309	17.6%
Consolidated	\$ 698,887	13.6%	\$ 719,676	13.6%

North America's gross profit for the year ended December 31, 2013 decreased 1% compared to the year ended December 31, 2012, but as a percentage of net sales, gross margin increased by approximately 40 basis points year over year, due primarily to an 18 basis points increase in margin from sales of higher margin services and a 17 basis point increase in product margin, which includes partner funding and freight, driven primarily by strong execution under partner incentive programs, most notably in the hardware category.

EMEA's gross profit decreased 6% in U.S. dollars for the year ended December 31, 2013 compared to the year ended December 31, 2012. Excluding the effects of foreign currency movements, gross profit was down 7% compared to the prior year. As a percentage of net sales, gross margin decreased by approximately 90 basis points year to year due primarily to an 84 basis point decline in product margin, which includes partner funding and freight, primarily driven by the hardware category. The decline in hardware margin was primarily attributable to a higher mix of lower margin

hardware products and a reduction in partner funding due to decreased volume and partner program changes during 2013.

APAC's gross profit decreased 5% for the year ended December 31, 2013 compared to the year ended December 31, 2012. Excluding the effects of foreign currency movements, gross profit increased 1% compared to the prior year. As a percentage of net sales, gross margin decreased by approximately 30 basis points, due primarily to a 29 basis point decrease in margin contributed by agency fees from enterprise software agreements.

Operating Expenses.

Selling and Administrative Expenses. Selling and administrative expenses decreased \$296,000 or less than 1%, for the year ended December 31, 2013 compared to the year ended December 31, 2012. Selling and administrative expenses increased 30 basis points as a percentage of net sales for the year ended December 31, 2013 compared to the year ended December 31, 2012. Selling and administrative expenses as a percent of net sales by operating segment for the years ended December 31, 2013 and 2012 were as follows (dollars in thousands):

		% of Net		% of Net
	2013	Sales	2012	Sales
North America	\$ 362,380	10.4%	\$ 359,634	9.9%
EMEA	178,012	12.1%	179,979	12.3%
APAC	 24,518	12.0%	 25,593	12.1%
Consolidated	\$ 564,910	11.0%	\$ 565,206	10.7%

North America's selling and administrative expenses increased 1%, or \$2.7 million, for the year ended December 31, 2013 compared to the year ended December 31, 2012, and, as a percentage of net sales, selling and administrative expenses increased approximately 50 basis points to 10.4% of net sales for the year ended December 31, 2013. Selling and administrative expenses increased primarily because:

- Salaries and wages and contract labor increased approximately \$4.3 million due to investments in sales and services resources; and
- Professional fees increased approximately \$2.9 million, due primarily to the effect on the year over year comparison of a prior year reduction in legal expenses of \$2.0 million associated with the recovery during the year ended December 31, 2012 of legal fees incurred in previous periods (see further discussion under "Legal Proceedings" in Note 16 to the Consolidated Financial Statements in Part II, Item 8 of this report).
- The year over year comparison was also affected by a gain of \$1.2 million on the sale of a portfolio of non-core service contracts during the prior year.

These increases in selling and administrative expenses were offset partially by:

- A decrease in variable compensation of approximately \$2.8 million and reduced stock-based compensation of approximately \$1.1 million based on current year financial results; and
- Reduced marketing expenses of approximately \$1.6 million as we controlled costs through our continued focus on discretionary spending.

EMEA's selling and administrative expenses decreased 1%, or \$2.0 million, for the year ended December 31, 2013 compared to the year ended December 31, 2012, and, as a percentage of net sales, selling and administrative expenses decreased approximately 20 basis points to 12.1% of net sales for the year ended December 31, 2013. Excluding the effects of foreign currency movements, selling and administrative expenses decreased 2% compared to the prior year. The decrease in selling and administrative expenses is primarily attributable to a decrease in salaries and wages and contract labor of approximately \$3.5 million due to restructuring actions taken during the year, as more fully described below. The year to year decrease in salaries and wages was offset partially by a \$1.3 million increase in the provision for losses on accounts receivable due to higher write-offs in 2013, none of which were individually material.

APAC's selling and administrative expenses decreased 4%, or \$1.1 million, for the year ended December 31, 2013 compared to the year ended December 31, 2012, and, as a percentage of net sales, selling and administrative expenses decreased approximately 10 basis points to 12.0% of net sales for the year ended December 31, 2013. Excluding the

effects of foreign currency movements, selling and administrative expenses increased 1% compared to the prior year. The year over year increase is primarily due to higher salaries and wages from investments in headcount, mostly offset by lower variable compensation based on current year financial results.

Severance and Restructuring Expenses. During the year ended December 31, 2013, North America and EMEA recorded severance expense, net of adjustments, totaling \$3.3 million and \$9.4 million, respectively, related to a continued review of resource needs in North America and significant restructuring activities in EMEA, primarily in the United Kingdom and Germany, as we worked to rationalize our selling and administrative expenses in EMEA. In North America and EMEA, \$3.4 million and \$9.6 million, respectively, in new severance costs were offset by \$104,000 and \$188,000, respectively, of adjustments to prior severance accruals due to changes in estimates during 2013. During the year ended December 31, 2012, North America and EMEA recorded severance expense, net of adjustments, of \$2.8 million and \$3.5 million, respectively. See Note 8 to the Consolidated Financial Statements in Part II, Item 8 of this report for further discussion of severance and restructuring activities.

Non-Operating (Income) Expense.

Interest Income. Interest income for the years ended December 31, 2013 and 2012 was generated through short-term investments. The decrease in interest income year to year is primarily due to lower average invested cash balances during the year ended December 31, 2013.

Interest Expense. Interest expense primarily relates to borrowings under our financing facilities, our capital lease obligation and imputed interest under our inventory financing facility. Interest expense increased 4% for the year ended December 31, 2013 compared to the year ended December 30, 2012 due primarily to higher imputed interest year to year. Imputed interest under our inventory financing facility was \$2.5 million for the year ended December 31, 2013, compared to \$1.8 million for the year ended December 31, 2012. The increase was due to higher outstanding balances and increases in our average incremental borrowing rate used to compute the imputed interest amounts.

Gain on Bargain Purchase. Our EMEA operating segment reported a non-operating gain on bargain purchase of \$2.0 million in 2012, as the fair value of the Inmac net assets we acquired exceeded the purchase price.

Net Foreign Currency Exchange Gains/Losses. These gains/losses result from foreign currency transactions, including foreign currency derivative contracts and intercompany balances that are not considered long-term in nature. The change in net foreign currency exchange gains/losses is due primarily to the underlying changes in the applicable exchange rates, mitigated by our use of foreign exchange forward contracts to hedge certain non-functional currency assets and liabilities against changes in exchange rate movements.

Other Expense, Net. Other expense, net, consists primarily of bank fees associated with our cash management activities.

Income Tax Expense. Our effective tax rate for the year ended December 31, 2013 was 38.0% compared to 35.9% for the year ended December 31, 2012. The effective tax rate in 2013 was higher than the federal statutory rate of 35.0% primarily due to higher losses in certain foreign jurisdictions resulting in an increase in the valuation allowance for deferred tax assets related to these foreign operating losses and to state taxes in the U.S. These increases in our effective tax rate for 2013 were offset partially by lower taxes on earnings in foreign jurisdictions and the recognition of certain tax benefits related to the re-measurement or settlement of specific uncertain tax positions during 2013. The effective tax rate in 2012 was slightly higher than the federal statutory rate of 35.0% primarily due to state taxes in the U.S. and to increases in the liability associated with unrecognized tax benefits, partially offset by lower taxes on earnings in foreign jurisdictions. See Note 10 to the Consolidated Financial Statements in Part II, Item 8 of this report for further discussion of income tax expense.

2012 Compared to **2011**

Net Sales. Net sales for the year ended December 31, 2012 remained flat at \$5.3 billion compared to the year ended December 31, 2011. Our net sales by operating segment for the years ended December 31, 2012 and 2011 were as follows (dollars in thousands):

	2012	_	2011	% Change
North America	\$ 3,626,357	\$	3,672,492	(1%)
EMEA	1,463,607		1,398,421	5%
APAC	 211,477		216,315	(2%)
Consolidated	\$ 5,301,441	\$	5,287,228	<u> </u>

Net sales in North America decreased \$46.1 million or 1% for the year ended December 31, 2012 compared to the year ended December 31, 2011. Net sales of software increased 7% year over year, while net sales of hardware and services decreased 4% and 13%, respectively, year to year. The software growth was primarily driven by new client wins and stable demand for business productivity software across the large, mid-market and public sector client groups. Our public sector business in particular saw strong growth in 2012 in this category, gaining market share in the federal and state and local markets with new client wins. Hardware sales in the mid-market increased in 2012 compared to 2011, but we experienced a decline in 2012 in purchases by our large enterprise clients as we believe they rationalized investment dollars and the timing of projects. Hardware and services sales comparisons also reflect large client deployments in 2010 that concluded in the second half of 2011 and were not completely replaced in 2012 by new client engagements.

Net sales in EMEA increased \$65.2 million or 5%, in U.S. dollars, for the year ended December 31, 2012 compared to the year ended December 31, 2011. Excluding the effects of foreign currency movements, net sales were up 10% compared to the prior year. Net sales of hardware and services were up 23% and 17%, respectively, year over year, while net sales of software declined 4% year to year. Excluding the effects of foreign currency movements, hardware, software and services increased 25%, 2% and 23%, respectively, compared to the year ended December 31, 2011. The growth in hardware was attributable to the acquisition of Inmac in February 2012, which contributed \$102.3 million in net sales during the year ended December 31, 2012, and low single digit organic growth. The increase in software sales was due to higher sales of business productivity software products. The increase in net sales of services was due primarily to higher volume and new client engagements.

Net sales in APAC decreased \$4.8 million or 2% for the year ended December 31, 2012 compared to the year ended December 31, 2011. The decrease primarily resulted from a higher mix of public sector software sales that were reported on a net basis. Excluding the effects of foreign currency movements, net sales also decreased 2% compared to the prior year.

Net sales by category for North America, EMEA and APAC were as follows for the years ended December 31, 2012 and 2011:

	North A	merica	EM	EA	APAC		
Sales Mix	2012	2011	2012	2011	2012	2011	
Hardware	62%	64%	37%	31%	2%	1%	
Software	32%	30%	61%	67%	94%	96%	
Services	6%	6%	<u>2%</u>	2%	4%	3%	
	100%	<u>100%</u>	<u>100%</u>	100%	100%	100%	

Gross Profit. Gross profit increased 1% to \$719.7 million for the year ended December 31, 2012 compared to the year ended December 31, 2011, with gross margin increasing to 13.6% year over year. Our gross profit and gross profit as a percent of net sales by operating segment for the years ended December 31, 2012 and 2011 were as follows (dollars in thousands):

		% of Net		% of Net
	2012	Sales	 2011	Sales
North America	\$ 478,522	13.2%	\$ 476,776	13.0%
EMEA	203,845	13.9%	198,073	14.2%
APAC	37,309	17.6%	 34,308	15.9%
Consolidated	\$ 719,676	13.6%	\$ 709,157	13.4%

North America's gross profit for the year ended December 31, 2012 remained relatively flat compared to the year ended December 31, 2011, but as a percentage of net sales, gross margin increased by approximately 20 basis points year over year, due primarily to an increase in margin of 11 basis points related to agency fees for enterprise software agreements and an increase in margin of 10 basis points due to improved inventory management resulting in a decrease in the write-downs of inventories year to year.

EMEA's gross profit increased 3% in U.S. dollars for the year ended December 31, 2012 compared to the year ended December 31, 2011. Excluding the effects of foreign currency movements, gross profit was up 8% compared to the prior year. As a percentage of net sales, gross margin decreased by approximately 30 basis points year to year due primarily to a 41 basis point decline in margin from agency fees for enterprise software agreements and a 6 basis point decline in margin from services sales. The decrease in agency fees was due to program changes from our largest software partner that became effective in the fourth quarter of 2011 and were only partially offset by net new agreements and higher renewals during 2012. These decreases in gross margin were offset partially by a 22 basis point increase in product margin, which includes partner funding and freight, primarily driven by higher margin hardware sales associated with the acquisition of Inmac in February 2012.

APAC's gross profit increased 9% for the year ended December 31, 2012 compared to the year ended December 31, 2011. As a percentage of net sales, gross margin increased by approximately 170 basis points, due primarily to higher partner funding and a higher mix of netted software sales, partially offset by a decrease in services margins and a decrease in agency fees from enterprise software agreements. Excluding the effects of foreign currency movements, gross profit also increased 9% compared to the prior year.

Operating Expenses.

Selling and Administrative Expenses. Selling and administrative expenses increased \$8.5 million or 2% for the year ended December 31, 2012 compared to the year ended December 31, 2011. Selling and administrative expenses increased 20 basis points as a percentage of net sales for the year ended December 31, 2012 compared to the year ended December 31, 2011. Selling and administrative expenses as a percent of net sales by operating segment for the years ended December 31, 2012 and 2011 were as follows (dollars in thousands):

	% of Net					% of Net		
		2012	Sales		2011	Sales		
North America	\$	359,634	9.9%	\$	366,811	10.0%		
EMEA		179,979	12.3%		165,262	11.8%		
APAC		25,593	12.1%		24,616	11.4%		
Consolidated	\$	565,206	10.7%	\$	556,689	10.5%		

North America's selling and administrative expenses decreased 2%, or \$7.2 million, for the year ended December 31, 2012 compared to the year ended December 31, 2011, and as a percentage of net sales, selling and administrative expenses decreased approximately 10 basis points to 9.9% of net sales for the year ended December 31, 2012. During the year ended December 31, 2012, we continued our focus on control of selling and administrative expenses and also recognized a \$2.0 million reduction in legal expenses associated with the recovery of legal fees incurred in previous periods (see further discussion under "Legal Proceedings" in Note 16 to the Consolidated Financial Statements in Part II, Item 8 of this report) and a gain of \$1.2 million on the sale of a portfolio of non-core service contracts during the year ended December 31, 2012.

EMEA's selling and administrative expenses increased 9%, or \$14.7 million, for the year ended December 31, 2012 compared to the year ended December 31, 2011, and, as a percentage of net sales, selling and administrative expenses increased 50 basis points to 12.3% of net sales for the year ended December 31, 2012. Excluding the effects of foreign currency movements, selling and administrative expenses increased 14% compared to the prior year. The year over year increase in selling and administrative expenses is attributable to increases in salaries and benefits due to investments in headcount to support the roll-out of our hardware sales capability in the Netherlands and France and the acquisition of Inmac in February 2012.

APAC's selling and administrative expenses increased 4%, or \$977,000, for the year ended December 31, 2012 compared to the year ended December 31, 2011 and as a percentage of net sales, selling and administrative expenses increased 70 basis points to 12.1% of net sales for the year ended December 31, 2012. Excluding the effects of foreign currency movements, selling and administrative expenses also increased 4% compared to the prior year. The year over year increase in selling and administrative expenses is primarily driven by increases in salaries and benefits due to investments in headcount associated with specialty sales and professional services positions.

Severance and Restructuring Expenses. During the year ended December 31, 2012, North America and EMEA recorded severance expense, net of adjustments, totaling \$2.8 million and \$3.5 million, respectively, related to restructuring activities. These charges were associated with severance costs for the elimination of certain positions based on a re-alignment of roles and responsibilities. In North America and EMEA, \$3.0 million and \$4.0 million, respectively, in new severance costs were offset by \$188,000 and \$490,000, respectively, of adjustments to prior severance accruals due to changes in estimates during 2012. During the year ended December 31, 2011, North America and EMEA recorded severance expense of \$2.4 million and \$2.7 million, respectively. See Note 8 to the Consolidated Financial Statements in Part II, Item 8 of this report for further discussion of severance and restructuring activities.

Non-Operating (Income) Expense.

Interest Income. Interest income for the years ended December 31, 2012 and 2011 was generated through short-term investments. The decrease in interest income year over year is primarily due to lower interest rates.

Interest Expense. Interest expense primarily relates to borrowings under our financing facilities and our capital lease obligation and imputed interest under our inventory financing facility. Interest expense declined 12% for the year ended December 31, 2012 compared to the year ended December 30, 2011 due primarily to lower average borrowing rates and lower average daily debt balances year to year. Imputed interest under our inventory financing facility was \$1.8 million for the year ended December 31, 2012, compared to \$2.0 million for the year ended December 31, 2011. The decrease was due to lower average balances outstanding under the facility during 2012 compared to 2011.

Gain on Bargain Purchase. Our EMEA operating segment reported a non-operating gain on bargain purchase of \$2.0 million in 2012 as the fair value of the Inmac net assets we acquired exceeded the purchase price.

Net Foreign Currency Exchange Gains/Losses. These gains/losses result from foreign currency transactions, including foreign currency derivative contracts and intercompany balances that are not considered long-term in nature. The change in net foreign currency exchange gains/losses is due primarily to the underlying changes in the applicable exchange rates, mitigated by our use of foreign exchange forward contracts to hedge certain non-functional currency assets and liabilities against changes in exchange rate movements.

Other Expense, Net. Other expense, net, consists primarily of bank fees associated with our cash management activities.

Income Tax Expense. Our effective tax rate for the year ended December 31, 2012 was 35.9% compared to 29.3% for the year ended December 31, 2011. The effective tax rate in 2012 was slightly higher than the federal statutory rate of 35.0% primarily due to state taxes in the U.S. and to increases in the liability associated with unrecognized tax benefits, partially offset by lower taxes on earnings in foreign jurisdictions. The effective tax rate in 2011 was less than the federal statutory rate of 35.0% primarily due to the reorganization of certain of our foreign operations during the fourth quarter that resulted in the recognition of foreign tax credits. See Note 10 to the Consolidated Financial Statements in Part II, Item 8 of this report for further discussion of income tax expense.

Liquidity and Capital Resources

The following table sets forth for the periods presented certain consolidated cash flow information for the years ended December 31, 2013, 2012 and 2011 (in thousands):

	2013	2012	 2011
Net cash provided by operating activities	\$ 76,066	\$ 67,442	\$ 115,725
Net cash used in investing activities	(19,024)	(33,983)	(40,862)
Net cash used in financing activities	(75,711)	(14,575)	(68,027)
Foreign currency exchange effect on cash balances	 (6,633)	 4,899	(2,263)
(Decrease) increase in cash and cash equivalents	(25,302)	23,783	4,573
Cash and cash equivalents at beginning of year	 152,119	 128,336	123,763
Cash and cash equivalents at end of year	\$ 126,817	\$ 152,119	\$ 128,336

Cash and Cash Flow

Our primary uses of cash during 2013 were to fund working capital requirements, to repurchase shares of our common stock and to fund capital expenditures. Operating activities provided \$76.1 million in cash for the year ended December 31, 2013, a 13% increase from the year ended December 31, 2012. We had net combined repayments on our long-term debt facilities of \$13.5 million during 2013. Capital expenditures were \$19.0 million in 2013, a 37% decrease from 2012, as our larger IT system upgrade projects were completed during 2013. Cash balances in 2013 were negatively affected by \$6.6 million as a result of foreign currency exchange rates, compared to a positive effect of \$4.9 million in 2012.

Net cash provided by operating activities. Cash flows from operating activities for the year ended December 31, 2013 reflect our net earnings, adjusted for non-cash items such as depreciation, amortization, stock-based compensation expense and write-offs and write-downs of assets, as well as changes in accounts receivable, other current assets and accounts payable. In 2013, the decreases in accounts receivable and accounts payable reflect the effect of a single significant sale transacted with a public sector client late in December 2012. The increase in other current assets in 2013 was primarily a result of our deferral of costs for certain payments made or payable to partners at December 31, 2013, in advance of our being able to recognize the related revenue.

Cash flows from operating activities for the year ended December 31, 2012 reflect our net earnings, adjusted for non-cash items such as depreciation, amortization, stock-based compensation expense, gain on bargain purchase and write-offs and write-downs of assets, as well as changes in accounts receivable, inventories, accounts payable, deferred revenue and accrued expenses and other liabilities. In 2012, the increases in accounts receivable and accounts payable also reflect the effect of the single significant sale transacted with a public sector client late in December 2012 (discussed above). The decrease in inventories in 2012 was primarily a result of inventory management initiatives undertaken in our North America segment, and the decrease in accrued expenses and other liabilities in 2012 was primarily due to the relative timing of VAT and sales tax payments year over year.

Cash flows from operating activities for the year ended December 31, 2011 reflect our net earnings, adjusted for non-cash items such as depreciation, amortization, stock-based compensation expense and write-offs and write-downs of assets, as well as changes in accounts receivable, other current assets, other assets, accounts payable and deferred revenue. In 2011, the increases in accounts receivable and accounts payable reflect increased sales and associated costs of goods sold, respectively, in 2011 compared to 2010. The decreases in other current assets and deferred revenue in 2011 were primarily due to a large project for which we deferred revenue recognition and the related costs as of December 31, 2010 until we received client acceptance during 2011 of the work performed. The increase in other assets in 2011 was primarily due to an increase in multi-year contracts resulting in increased long-term accounts receivable and deferred costs compared to the prior year.

Our consolidated cash flow operating metrics for the quarters ended December 31, 2013, 2012 and 2011 are as follows:

	2013	2012	2011
Days sales outstanding in ending accounts receivable ("DSOs") (a)	83	94	82
Days inventory outstanding (excluding inventories not available for sale) (b)	8	8	9
Days purchases outstanding in ending accounts payable ("DPOs") (c)	(64)	(78)	(69)
Cash conversion cycle (days) (d)	27	24	22

- (a) Calculated as the balance of accounts receivable, net at the end of the period divided by daily net sales. Daily net sales is calculated as net sales for the quarter divided by 92 days.
- (b) Calculated as average inventories divided by daily costs of goods sold. Average inventories is calculated as the sum of the balances of inventories at the beginning of the period plus inventories at the end of the period divided by two. Daily costs of goods sold is calculated as costs of goods sold for the quarter divided by 92 days.
- (c) Calculated as the balances of accounts payable, which includes the inventory financing facility, at the end of the period divided by daily costs of goods sold. Daily costs of goods sold is calculated as costs of goods sold for the quarter divided by 92 days.
- (d) Calculated as DSOs plus days inventory outstanding, less DPOs.

Our cash conversion cycle was 27 days in the fourth quarter ended December 31, 2013, up three days from the fourth quarter of 2012, due primarily to lower DPOs in North America driven by the timing of payments to suppliers during the quarter ended December 31, 2013. The year to year decreases in both DSOs and DPOs reflect the effect of a single significant sale transacted with a public sector client late in December 2012.

Our cash conversion cycle was 24 days in the fourth quarter ended December 31, 2012, up two days from the fourth quarter of 2011, due primarily to higher accounts receivable in North America, despite lower sales recorded during the fourth quarter of 2012 compared to the fourth quarter of 2011. The year over year increases (2012 vs. 2011) in both DSOs and DPOs also reflect the effect of the single significant sale transacted with a public sector client late in December 2012 (discussed above).

Our cash conversion cycle was 22 days in the fourth quarter ended December 31, 2011, up four days from the fourth quarter of 2010 due to increases in DSO period to period, primarily in our foreign operations, and due to a higher mix of transactions booked late in the 2011 fourth quarter.

We expect that cash flow from operations will be used, at least partially, to fund working capital as we typically pay our partners on average terms that are shorter than the average terms granted to our clients in order to take advantage of supplier discounts. We intend to use cash generated in 2014 in excess of working capital needs to pay down our outstanding debt balances, repurchase shares of our common stock and support our capital expenditures for the year. We also may use cash to fund potential small acquisitions to add select capabilities.

Net cash used in investing activities. Capital expenditures of \$19.0 million, \$30.2 million and \$27.1 million for the years ended December 31, 2013, 2012 and 2011, respectively, were primarily related to investments in our IT systems. We expect total capital expenditures in 2014 to be between \$15.0 million and \$20.0 million, primarily for our IT systems upgrade projects and other facility and technology related upgrade projects.

During the year ended December 31, 2012, we acquired Inmac for \$3.8 million, net of cash acquired. During the year ended December 31, 2011, we acquired Ensynch for \$13.8 million, net of cash acquired.

Net cash used in financing activities. During the year ended December 31, 2013, we had net combined repayments on our revolving credit facility and our accounts receivable securitization facility of \$13.5 million and had net repayments under our inventory financing facility, which is included in accounts payable, of \$1.6 million. In 2013, we also funded \$57.8 million of repurchases of our common stock. During the year ended December 31, 2012, we had net combined repayments on our revolving credit facility and our accounts receivable securitization facility of \$35.0 million and had net borrowings under our inventory financing facility, which is included in accounts payable, of \$22.9 million. During the year ended December 31, 2011, we had net borrowings under our revolving credit facility of \$25.0 million and made net repayments under our inventory financing facility, which is included in accounts payable, of \$41.2 million. In 2011, we also funded \$50.0 million of repurchases of our common stock.

As of December 31, 2013, our long-term debt balance consisted of \$16.5 million outstanding under our \$350.0 million senior revolving credit facility ("revolving facility") and \$50.0 million outstanding under our \$200.0 million accounts receivable securitization financing facility ("ABS facility"). As of December 31, 2013, the current portion of our long-term debt relates solely to our capital lease obligation. Our objective is to pay our debt balances down while retaining adequate cash balances to meet overall business objectives.

While the ABS facility has a stated maximum amount, the actual availability under the ABS facility is limited by the quantity and quality of the underlying accounts receivable. As of December 31, 2013, qualified receivables were sufficient to permit access to the full \$200.0 million, of which \$50.0 million was outstanding at December 31, 2013.

Our consolidated debt balance that can be outstanding at the end of any fiscal quarter under our revolving facility and our ABS facility is limited by certain financial covenants, particularly a maximum leverage ratio. The maximum leverage ratio is calculated as aggregate debt outstanding divided by the sum of the Company's trailing twelve month net earnings (loss) plus (i) interest expense, excluding non-cash imputed interest on our inventory financing facility, (ii) income tax expense (benefit), (iii) depreciation and amortization and (iv) non-cash stock-based compensation ("adjusted earnings"). The maximum leverage ratio permitted under the agreements is 2.75 times trailing twelve-month adjusted earnings. We anticipate that we will be in compliance with our maximum leverage ratio requirements over the next four quarters. However, a significant drop in the Company's adjusted earnings would limit the amount of indebtedness that could be outstanding at the end of any fiscal quarter to a level that would be below the Company's consolidated maximum facility amounts. Based on the maximum permitted leverage ratio as of December 31, 2013, the Company's debt balance that could have been outstanding under our revolving facility and our ABS facility was reduced from the maximum borrowing capacity of \$550.0 million to \$457.6 million, of which \$66.5 million was outstanding at December 31, 2013.

Note 6 to the Consolidated Financial Statements in Part II, Item 8 of this report also includes: a description of our financing facilities; amounts outstanding; amounts available and weighted average borrowings and interest rates during the year.

Cash and cash equivalents held by foreign subsidiaries are generally subject to U.S. income taxation upon repatriation to the U.S. We do not provide for U.S. income taxes on the undistributed earnings of those of our foreign subsidiaries where earnings are reinvested and, in the opinion of management, will continue to be reinvested indefinitely outside of the U.S. As of December 31, 2013, we had approximately \$111.1 million in cash and cash equivalents in certain of our foreign subsidiaries where we consider undistributed earnings of these foreign subsidiaries to be permanently reinvested. As of December 31, 2013, the majority of our foreign cash resides in the Netherlands, Australia and Canada. Certain of these cash balances could and will be remitted to the U.S. by paying down intercompany payables generated in the ordinary course of business. This repayment would not change our policy to indefinitely reinvest earnings of our foreign subsidiaries. The undistributed earnings of foreign subsidiaries that are deemed to be indefinitely invested outside of the U.S. were approximately \$72.0 million at December 31, 2013, compared to \$64.4 million at the end of 2012. We intend to use undistributed earnings for general business purposes in the foreign jurisdictions as well as to fund our IT systems, potential small acquisitions and various facility upgrades.

We anticipate that cash flows from operations, together with the funds available under our financing facilities, will be adequate to support our presently anticipated cash and working capital requirements for operations as well as other strategic investments over the next 12 months. We currently do not intend nor foresee a need to repatriate any foreign undistributed earnings. We expect existing domestic cash and cash flows from operations to continue to be sufficient to fund our domestic operating cash activities and cash commitments for investing and financing activities, such as capital expenditures and debt repayments, for at least the next 12 months.

Off-Balance Sheet Arrangements

We have entered into off-balance sheet arrangements, which include guaranties and indemnifications. The guaranties and indemnifications are discussed in Note 16 to the Consolidated Financial Statements in Part II, Item 8 of this report. We believe that none of our off-balance sheet arrangements have, or are reasonably likely to have, a material current or future effect on our financial condition, sales or expenses, results of operations, liquidity, capital expenditures or capital resources.

Contractual Obligations

At December 31, 2013, our contractual obligations for continuing operations were as follows (in thousands):

	Payments due by period						
		Less than	1-3	3-5	More than 5		
	Total	1 Year	Years	Years	Years		
Long-term debt (a)	\$ 66,500	\$ -	\$ 50,000	\$ 16,500	\$ -		
Capital lease obligations	687	229	458	-	-		
Inventory financing facility (b)	115,252	115,252	-	-	-		
Operating lease obligations	58,324	14,902	21,714	12,229	9,479		
Severance and restructuring obligations (c)	4,957	4,957	-	-	-		
Other contractual obligations (d)	15,088	2,976	6,598	2,797	2,717		
Total	\$ 260,808	\$ 138,316	\$ 78,770	\$ 31,526	<u>\$ 12,196</u>		

- (a) Reflects the \$50.0 million outstanding at December 31, 2013 under our ABS facility as due in April 2015, the date at which the facility matures, as well as the \$16.5 million outstanding at December 31, 2013 under our revolving facility as due in April 2017, the date at which the facility matures. See further discussion in Note 6 to the Consolidated Financial Statements in Part II, Item 8 of this report.
- (b) See further discussion in Note 6 to the Consolidated Financial Statements in Part II, Item 8 of this report. As of December 31, 2013, this amount was included in accounts payable related to this facility and has been included in our contractual obligations table above as being due in less than 1 year due to the 30- to 60-day stated vendor terms.
- (c) As a result of approved severance and restructuring plans, we expect future cash expenditures related to employee termination benefits and facilities based costs. See further discussion in Note 8 to the Consolidated Financial Statements in Part II, Item 8 of this report.
- (d) The table above includes:
 - I. Estimated interest payments of \$1.6 million in 2014 through 2016 and \$534,000 in the first four months of 2017, based on the current debt balance at December 31, 2013 of \$16.5 million under our revolving facility, multiplied by the weighted average interest rate for the year ended December 31, 2013 of 9.7% per annum.
 - II. Estimated interest payments of \$800,000 in 2014 and \$267,000 in the first four months of 2015, based on the current debt balance at December 31, 2013 of \$50.0 million under our ABS facility, multiplied by the weighted average interest rate for the year ended December 31, 2013 of 1.6% per annum.
 - III. We estimate that we will owe \$8.7 million in future years in connection with the obligations to perform asset-retirement activities that are conditional on a future event.

The table above excludes \$4.5 million of unrecognized tax benefits, including \$364,000 related to accrued interest, as we are unable to reasonably estimate the ultimate amount or timing of settlement. See further discussion in Note 10 to the Consolidated Financial Statements in Part II, Item 8 of this report.

Although we set purchase targets with our partners tied to the amount of supplier reimbursements we receive, we have no material contractual purchase obligations with our partners.

Acquisitions

Our strategy includes the possible acquisition of or investments in other businesses to expand or complement our operations or to add select services capabilities. The magnitude, timing and nature of any future acquisitions or investments will depend on a number of factors, including the availability of suitable candidates, the negotiation of acceptable terms, our financial capabilities and general economic and business conditions. Financing for future transactions would result in the utilization of cash, incurrence of additional debt, issuance of stock or some combination of the three.

INSIGHT ENTERPRISES, INC.

Inflation

We have historically not been adversely affected by inflation, as technological advances and competition within the IT industry have generally caused the prices of the products we sell to decline and product life cycles tend to be short. This requires our growth in unit sales to exceed the decline in prices in order to increase our net sales. We believe that most price increases could be passed on to our clients, as prices charged by us are not set by long-term contracts; however, as a result of competitive pressure, there can be no assurance that the full effect of any such price increases could be passed on to our clients.

Recently Issued Accounting Standards

The information contained in Note 1 to the Consolidated Financial Statements in Part II, Item 8 of this report concerning a description of recent accounting pronouncements, including our expected dates of adoption and the estimated effects on our results of operations and financial condition, is incorporated by reference herein.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The information contained in Note 11 to the Consolidated Financial Statements in Part II, Item 8 of this report concerning a description of market risk management, including interest rate risk and foreign currency exchange risk, is incorporated by reference herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders Insight Enterprises, Inc.:

We have audited the accompanying consolidated balance sheets of Insight Enterprises, Inc. and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Insight Enterprises, Inc. and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Insight Enterprises, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 21, 2014 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

/s/ KPMG LLP

Phoenix, Arizona February 21, 2014

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders Insight Enterprises, Inc.:

We have audited Insight Enterprises, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Insight Enterprises, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A (a), *Management's Annual Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on Insight Enterprises, Inc.'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Insight Enterprises, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Insight Enterprises, Inc. and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013, and our report dated February 21, 2014 expressed an unqualified opinion on those consolidated financial statements.

(1) Operations and Summary of Significant Accounting Policies

Description of Business

We are a leading worldwide information technology ("IT") provider of hardware, software and services solutions to businesses and public sector clients in North America, Europe, the Middle East, Africa and Asia-Pacific. The Company is organized in the following three operating segments, which are primarily defined by their related geographies:

Operating Segment	Geography
North America	United States and Canada
EMEA	Europe, Middle East and Africa
APAC	Asia-Pacific

Currently, our offerings in North America and select countries in EMEA include IT hardware, software and services. Our offerings in the remainder of our EMEA segment and in APAC are almost entirely software and select software-related services.

Acquisitions

On October 1, 2011, we acquired Ensynch, Incorporated, ("Ensynch"), a Tempe, Arizona-based professional services firm with multiple Microsoft Gold competencies across the complete Microsoft solution set, including cloud migration and management, for a cash purchase price of \$13,769,000, net of cash acquired.

On February 1, 2012, we acquired Inmac GmbH and Micro Warehouse BV ("Inmac"), a broad portfolio business-to-business hardware reseller based in Frankfurt, Germany and Amsterdam, Netherlands servicing clients in Western Europe, for a cash purchase price, net of cash acquired, of \$3,831,000. Our EMEA operating segment recognized a non-operating gain on bargain purchase of \$2,022,000 during 2012 as the fair value of the net assets acquired exceeded the purchase price. Prior to recognizing the gain on bargain purchase, we reassessed the assets acquired and liabilities assumed in the acquisition.

Principles of Consolidation and Presentation

The consolidated financial statements include the accounts of Insight Enterprises, Inc. and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. References to "the Company," "Insight," "we," "us," "our" and other similar words refer to Insight Enterprises, Inc. and its consolidated subsidiaries, unless the context suggests otherwise.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Additionally, these estimates and assumptions affect the reported amounts of net sales and expenses during the reporting period. Actual results could differ from those estimates. On an ongoing basis, we evaluate our estimates, including those related to sales recognition, anticipated achievement levels under partner funding programs, assumptions related to stock-based compensation valuation, allowances for doubtful accounts, valuation of inventories, litigation-related obligations, valuation allowances for deferred tax assets and impairment of long-lived assets, including purchased intangibles and goodwill, if indicators of potential impairment exist.

Cash and Cash Equivalents

We consider all highly liquid investments with maturities at the date of purchase of three months or less to be cash equivalents.

Book overdrafts represent the amount by which outstanding checks issued, but not yet presented to our banks for disbursement, exceed balances on deposit in applicable bank accounts and a legal right of offset with our positive cash

balances in other financial institution accounts does not exist. Our book overdrafts, which are not directly linked to a credit facility or other bank overdraft arrangement, do not result in an actual bank financing, but rather constitute normal unpaid trade payables at the end of a reporting period. These amounts are included within our accounts payable balance in our consolidated balance sheets. The changes in these book overdrafts are included within the changes in accounts payable line item as a component of cash flows from operating activities in our consolidated statements of cash flows.

Allowance for Doubtful Accounts

We establish an allowance for doubtful accounts using estimated losses on accounts receivable based on evaluation of the aging of the receivables, historical write-offs and the current economic environment. We write off individual accounts against the reserve when we become aware of a client's or vendor's inability to meet its financial obligations, such as in the case of bankruptcy filings, or deterioration in the client's or vendor's operating results or financial position.

Inventories

We state inventories, principally purchased IT hardware, at the lower of weighted average cost (which approximates cost under the first-in, first-out method) or market. We evaluate inventories for excess, obsolescence or other factors that may render inventories unmarketable at normal margins. Write-downs are recorded so that inventories reflect the approximate net realizable value and take into account contractual provisions with our partners governing price protection, stock rotation and return privileges relating to obsolescence.

Inventories not available for sale relate to product sales transactions in which we are warehousing the product and will be deploying the product to clients' designated locations subsequent to period-end. Additionally, we may perform services on a portion of the product prior to shipment to our clients and will be paid a fee for doing so. Although these product contracts are non-cancelable with customary credit terms beginning the date the inventories are segregated in our warehouse and invoiced to the client and the warranty periods begin on the date of invoice, these transactions do not meet the sales recognition criteria under GAAP. Therefore, we do not record sales and the inventories are classified as "Inventories not available for sale" on our consolidated balance sheet until the product is delivered. If clients remit payment before we deliver product to them, we record the payments received as "deferred revenue" on our consolidated balance sheet until such time as the product is delivered.

Property and Equipment

We record property and equipment at cost. We capitalize major improvements and betterments, while maintenance, repairs and minor replacements are expensed as incurred. Depreciation or amortization is provided using the straight-line method over the following estimated economic lives of the assets:

Estimated Economic Life
Shorter of underlying lease
term or asset life
2-7 years
3-5 years
3-10 years
29 years

Costs incurred to develop internal-use software during the application development stage, including capitalized interest, are recorded in property and equipment at cost. External direct costs of materials and services consumed in developing or obtaining internal-use computer software and payroll and payroll-related costs for teammates who are directly associated with and who devote time to internal-use computer software development projects, to the extent of the time spent directly on the project and specific to application development, are capitalized.

Our capital lease assets (see Note 6) are amortized on a straight-line basis over the lease term. The related amortization expense is included in selling and administrative expenses in our consolidated statements of operations.

Reviews are regularly performed to determine whether facts and circumstances exist which indicate that the useful life is shorter than originally estimated or the carrying amount of assets may not be recoverable. When an indication exists that the carrying amount of long-lived assets may not be recoverable, we assess the recoverability of our assets by comparing the

projected undiscounted net cash flows associated with the related asset or group of assets over their remaining lives against their respective carrying amounts. Such impairment test is based on the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. Impairment, if any, is based on the excess of the carrying amount over the estimated fair value of those assets.

Goodwill

Goodwill is recorded when the purchase price paid for an acquisition exceeds the estimated fair value of net identified tangible and intangible assets acquired. Goodwill is tested for impairment at the reporting unit level on an annual basis in the fourth quarter and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying value. We may first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform a quantitative two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The quantitative two-step goodwill impairment review process compares the fair value of the reporting unit in which goodwill resides to its carrying value. The Company has three reporting units, which are the same as our operating segments. Multiple valuation techniques can be used to assess the fair value of the reporting unit. All of these techniques include the use of estimates and assumptions that are inherently uncertain. Changes in these estimates and assumptions could materially affect the determination of fair value or goodwill impairment, or both.

Intangible Assets

We amortize intangible assets acquired in business combinations using the straight-line method over the following estimated economic lives of the intangible assets from the date of acquisition:

	Estimated Economic Life
Customer relationships	2 – 11 years
Other	9 months - 3 years

We regularly perform reviews to determine if facts and circumstances exist which indicate that the useful lives of our long-lived assets are shorter than originally estimated or the carrying amount of these assets may not be recoverable. When an indication exists that the carrying amount of intangible assets may not be recoverable, we assess the recoverability of our assets by comparing the projected undiscounted net cash flows associated with the related asset or group of assets over their remaining lives against their respective carrying amounts. Such impairment test is based on the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. Impairment, if any, is based on the excess of the carrying amount over the estimated fair value of those assets.

Trade Credits

Trade credit liabilities arise from aged unclaimed credit memos, duplicate payments, payments for returned product or overpayments made to us by our clients, and, to a lesser extent, from goods received by us from a supplier for which we were never invoiced. Trade credit liabilities are included in accrued expenses and other current liabilities in our consolidated balance sheet. We derecognize the liability if and only if it has been extinguished, upon either (1) our payment of the liability to relieve our obligation or (2) our legal release from the related obligation. During the years ended December 31, 2013, 2012 and 2011, \$2,379,000, \$4,492,000 and \$4,292,000, respectively, was recorded as a reduction of costs of goods sold as result of the negotiated settlement or other legal release of trade credits.

Self Insurance

We are self-insured in the U.S. for medical insurance up to certain annual stop-loss limits and workers' compensation claims up to certain deductible limits. We establish reserves for claims, both reported and incurred but not reported, using currently available information as well as our historical claims experience.

Foreign Currencies

We use the U.S. dollar as our reporting currency. The functional currencies of our significant foreign subsidiaries are generally the local currencies. Accordingly, assets and liabilities of the subsidiaries are translated into U.S. dollars at the exchange rate in effect at the balance sheet dates. Income and expense items are translated at the average exchange rate for

each month within the year. The resulting translation adjustments are recorded directly in accumulated other comprehensive income as a separate component of stockholders' equity. Net foreign currency transaction gains/losses, including transaction gains/losses on intercompany balances that are not of a long-term investment nature and non-functional currency cash balances, are reported as a separate component of non-operating (income) expense in our consolidated statements of operations.

Derivative Financial Instruments

We enter into forward foreign exchange contracts to mitigate the risk of non-functional currency monetary assets and liabilities on our consolidated financial statements. These forward contracts are not designated as hedge instruments. The fair value of all derivative assets and liabilities are recorded gross in the other current assets and accrued expenses and other current liabilities sections of the balance sheet. Gains/losses are recorded net in non-operating (income) expense in our consolidated statements of operations.

Treasury Stock

We record repurchases of our common stock as treasury stock at cost. We also record the subsequent retirement of these treasury shares at cost. The excess of the cost of the shares retired over their par value is allocated between additional paid-in capital and retained earnings. The amount recorded as a reduction of paid-in capital is based on the excess of the average original issue price of the shares over par value. The remaining amount is recorded as a reduction of retained earnings.

Sales Recognition

Sales are recognized when title and risk of loss are passed to the client, there is persuasive evidence of an arrangement for sale, delivery has occurred and/or services have been rendered, the sales price is fixed or determinable and collectibility is reasonably assured. Our standard sales terms are F.O.B. shipping point or equivalent, at which time title and risk of loss have passed to the client. However, because we either (i) have a general practice of covering client losses while products are in transit despite title and risk of loss contractually transferring at the point of shipment or (ii) have specifically stated F.O.B. destination contractual terms with the client, delivery is not deemed to have occurred until the point in time when the product is received by the client.

We make provisions for estimated product returns that we expect to occur under our return policy based upon historical return rates. Our manufacturers warrant most of the products we market, and it is our policy to request that clients return their defective products directly to the manufacturer for warranty service. On selected products, and for selected client service reasons, we may accept returns directly from the client and then either credit the client or ship a replacement product. We generally offer a limited 15- to 30-day return policy for unopened products and certain opened products, which are consistent with manufacturers' terms; however, for some products we may charge restocking fees. Products returned opened are processed and returned to the manufacturer or partner for repair, replacement or credit to us. We resell most unopened products returned to us. Subject to some manufacturers' restrictions, products that cannot be returned to the manufacturer for warranty processing, but are in working condition, are sold to inventory liquidators, to end users as "previously sold" or "used" products, or through other channels to reduce our losses from returned products.

We record the freight we bill to our clients as net sales and the related freight costs we pay as costs of goods sold. We report sales net of any sales-based taxes assessed by governmental authorities that are imposed on and concurrent with sales transactions.

Revenue is recognized from software sales when clients acquire the right to use or copy software under license, but in no case prior to the commencement of the term of the initial software license agreement, provided that all other revenue recognition criteria have been met (i.e., evidence of the arrangement exists, the fee is fixed or determinable and collectibility of the fee is probable).

The sale of hardware and software products may also include the provision of services, and the associated contracts may contain multiple elements or non-standard terms and conditions. Services that are performed by us in conjunction with hardware and software sales that are completed in our facilities prior to shipment of the product are recognized upon delivery, when title passes to the client, for the hardware sale. Net sales of services that are performed at client locations are often service-only contracts and are recorded as sales when the services are performed. If the services are performed at a client location in conjunction with a hardware, software or other services sale, we recognize net sales for each portion of

the overall arrangement fee that is attributable to the items as they are delivered or the services are performed. At the inception of the arrangement, the total consideration for the arrangement is allocated to all deliverables using the relative selling price method. The relative selling price method allocates any discount in the arrangement proportionately to each deliverable on the basis of each deliverable's selling price. We determine our best estimate of selling price in a manner that is consistent with that used to determine the price to sell the deliverable on a standalone basis. The revenue allocation is based on vendor-specific objective evidence of fair value of the products. We currently do not have any material instances in which we account for revenue from multiple element arrangements when vendor-specific evidence does not exist. If vendor-specific objective evidence were not available, we would utilize third-party evidence to allocate the selling price. If neither vendor-specific objective evidence nor third-party evidence were available, estimated selling price would be used for allocation purposes.

We sell certain third-party service contracts and software maintenance or subscription products for which we are not the primary obligor. These sales do not meet the criteria for gross sales recognition, and thus are recorded on a net sales recognition basis. As we enter into contracts with third-party service providers or vendors and our clients, we evaluate whether the subsequent sales of such services should be recorded as gross sales or net sales. We determine whether we act as a principal in the transaction and assume the risks and rewards of ownership or if we are simply acting as an agent or broker. Under gross sales recognition, the selling price is recorded in sales and our cost to the third-party service provider or vendor is recorded in costs of goods sold. Under net sales recognition, the cost to the third-party service provider or vendor is recorded as a reduction to sales, resulting in net sales equal to the gross profit on the transaction, and there are no costs of goods sold.

We recognize revenue for sales of services ratably over the time period over which the service will be provided if there is no discernible pattern of recognition of the cost to perform the service. Billings for such services that are made in advance of the related revenue recognized are recorded as deferred revenue and recognized as revenue ratably over the billing coverage period. Revenue from certain arrangements that allow for the use of a product or service over a period of time without taking possession of software are also accounted for ratably over the time period over which the service will be provided.

We recognize revenue for professional services engagements that are on a time and materials basis based upon hours incurred as the services are performed and amounts are earned.

Additionally, we sell certain professional services contracts on a fixed fee basis. Revenues for fixed fee professional services contracts are recognized based on the ratio of costs incurred to total estimated costs. Net sales for these service contracts are not a significant portion of our consolidated net sales.

Costs of Goods Sold

Costs of goods sold include product costs, direct costs incurred associated with delivering services, outbound and inbound freight costs and provisions for inventory reserves. These costs are reduced by provisions for supplier discounts and certain payments and credits received from partners, as described under "Partner Funding" below.

Selling and Administrative Expenses

Selling and administrative expenses include salaries and wages, bonuses and incentives, stock-based compensation expense, employee-related expenses, facility-related expenses, marketing and advertising expense, reduced by certain payments and credits received from partners related to shared marketing expense programs, as described under "Partner Funding" below, depreciation of property and equipment, professional fees, amortization of intangible assets, provisions for losses on accounts receivable and other operating expenses.

Partner Funding

We receive payments and credits from partners, including consideration pursuant to volume sales incentive programs, volume purchase incentive programs and shared marketing expense programs. Partner funding received pursuant to volume sales incentive programs is recognized as it is earned as a reduction to costs of goods sold. Partner funding received pursuant to volume purchase incentive programs is allocated as a reduction to inventories based on the applicable incentives earned from each partner and is recorded in cost of goods sold as the related inventory is sold. Partner funding received pursuant to shared marketing expense programs is recorded as it is earned as a reduction of the related selling and administrative expenses in the period the program takes place only if the consideration represents a

reimbursement of specific, incremental, identifiable costs. Consideration that exceeds the specific, incremental, identifiable costs is classified as a reduction of costs of goods sold. The amount of partner funding recorded as a reduction of selling and administrative expenses in our statements of operations totaled \$34,900,000, \$30,714,000 and \$28,269,000 for the years ended December 31, 2013, 2012 and 2011, respectively.

Concentrations of Risk

Credit Risk

Although we are affected by the international economic climate, management does not believe material credit risk concentration existed at December 31, 2013. We monitor our clients' financial condition and do not require collateral. Sales to the U.S. federal government, which are diversified across multiple agencies and departments, collectively accounted for approximately 10% of our 2013 net sales. However, there are several independent purchasing decision-makers across these agencies and departments. Excluding these sales to the federal government, we are not reliant on any one client. No single client accounted for more than 3% of our consolidated net sales in 2013.

Supplier Risk

Purchases from Microsoft accounted for approximately 30% of our aggregate purchases in 2013. No other partner accounted for more than 10% of purchases in 2013. Our top five partners as a group for 2013 were Microsoft, Cisco, Ingram Micro (a distributor), HP and Tech Data (a distributor), and approximately 63% of our total purchases during 2013 came from this group of partners. Although brand names and individual products are important to our business, we believe that competitive sources of supply are available in substantially all of our product categories such that, with the exception of Microsoft, we are not dependent on any single partner for sourcing products.

Advertising Costs

Advertising costs are expensed as they are incurred. Advertising expense of \$29,394,000, \$27,632,000 and \$26,439,000 was recorded for the years ended December 31, 2013, 2012 and 2011, respectively. These amounts were partially offset by partner funding earned pursuant to shared marketing expense programs recorded as a reduction of selling and administrative expenses, as discussed above.

Stock-Based Compensation

Stock-based compensation is measured based on the fair value of the award on the date of grant and the corresponding expense is recognized over the period during which an employee is required to provide service in exchange for the reward. Stock-based compensation expense is classified in the same line item of the consolidated statements of operations as other payroll-related expenses specific to the employee. Compensation expense related to service-based restricted stock units ("RSUs") is recognized on a straight-line basis over the requisite service period for the entire award. Compensation expense related to performance-based RSUs is recognized on a straight-line basis over the requisite service period for each separately vesting portion of the award as if the award was, in-substance, multiple awards (i.e., a graded vesting basis).

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable earnings in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date.

We recognize net deferred tax assets to the extent that we believe these assets are more likely than not to be realized. In making such a determination, we consider all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax-planning strategies and results of recent operations. If we determine that we would be able to realize our deferred tax assets in the future in excess of their net recorded amount, we would make an adjustment to the deferred tax asset valuation allowance, which would reduce the provision for income taxes.

We record uncertain tax positions on the basis of a two-step process whereby (1) we determine whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, we recognize the largest amount of tax benefit that is more than 50 percent likely to be realized upon ultimate settlement with the related tax authority. Interest and penalties related to unrecognized tax benefits are recognized within the income tax expense line in the accompanying consolidated statements of operations. Accrued interest and penalties are included within the related tax liability line in the accompanying consolidated balance sheets.

Net Earnings Per Share ("EPS")

Basic EPS is computed by dividing net earnings available to common stockholders by the weighted-average number of common shares outstanding during each year. Diluted EPS is computed on the basis of the weighted average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method. Dilutive potential common shares include outstanding stock options and restricted stock units. A reconciliation of the denominators of the basic and diluted EPS calculations follows (in thousands, except per share data):

	Years Ended December 31,			
	2013	2012	2011	
Numerator:				
Net earnings	<u>\$ 71,021</u>	<u>\$ 92,763</u>	<u>\$ 100,235</u>	
Denominator:				
Weighted-average shares used to compute basic EPS Potential dilutive common shares due to dilutive stock	43,012	44,413	45,474	
options and restricted stock units	277	421	547	
Weighted-average shares used to compute diluted EPS	43,289	44,834	46,021	
Net earnings per share:				
Basic	\$ 1.65	\$ 2.09	\$ 2.20	
Diluted	\$ 1.64	\$ 2.07	\$ 2.18	

For the years ended December 31, 2013, 2012 and 2011, approximately 177,000, 295,000 and 9,000, respectively, of our restricted stock units were not included in the diluted EPS calculations because their inclusion would have been anti-dilutive. For the year ended December 31, 2011, approximately 208,000 of our then outstanding stock options were not included in the diluted EPS calculations because the exercise prices of these options were greater than the average market price of our common stock during the respective periods.

Recently Issued Accounting Standards

There are no recently issued accounting standards that are expected to have a material effect on our consolidated financial position or results of operations.

(2) Property and Equipment

Property and equipment consist of the following (in thousands):

_	December 31,		
	2013	2012	
Software	\$ 154,756	\$ 148,881	
Buildings	77,287	76,254	
Equipment	84,845	80,625	
Furniture and fixtures	35,369	33,536	
Leasehold improvements	23,319	23,185	
Land	7,656	7,716	
	383,232	370,197	
Accumulated depreciation and amortization	(250,412)	(226,684)	
Property and equipment, net	<u>\$ 132,820</u>	<u>\$ 143,513</u>	

During 2013 and 2012, we periodically assessed whether any indicators of impairment existed related to our property and equipment. We incurred non-cash charges of \$606,000, \$596,000 and \$1,390,000 during 2013, 2012 and 2011, respectively, to write-off certain property and equipment that will not be placed into service.

Depreciation and amortization expense related to property and equipment was \$29,898,000, \$28,148,000 and \$26,607,000 for the years ended December 31, 2013, 2012 and 2011, respectively. Interest charges capitalized in connection with internal-use software development projects in the years ended December 31, 2013, 2012 and 2011 were immaterial.

(3) Goodwill

There were no changes in the carrying amount of goodwill during the year ended December 31, 2013. The carrying amount of goodwill as of December 31, 2013 and 2012 was as follows (in thousands):

	North	America	_	EMEA	 APAC	<u>C</u>	<u>onsolidated</u>
Goodwill Accumulated impairment losses	\$	349,679 (323,422)	\$	151,439 (151,439)	\$ 13,973 (13,973)	\$	515,091 (488,834)
	\$	26,257	\$		\$ 	\$	26,257

On October 1, 2011, we acquired Ensynch, which has been integrated into our North America business. Under the purchase method of accounting, the purchase price for the acquisition was allocated to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values. The excess purchase price over fair value of net assets acquired of \$9,783,000 was recorded as goodwill in the North America reporting unit. The primary driver for the acquisition was to enhance our professional services capabilities across the complete Microsoft solution set, including cloud migration and management. We believe that the synergies from combining Ensynch's technical skills with Insight's sales engine elevate our ability to provide clients with complete software solutions to drive their success, which is the primary factor making up the goodwill recognized. None of the goodwill is tax deductible.

During 2013, we periodically assessed whether any indicators of impairment existed which would require us to perform an interim impairment review. As of each interim period end during the year, we concluded that a triggering event had not occurred that would more likely than not reduce the fair value of our North America reporting unit (the only reporting unit with a goodwill balance at any period end) below its carrying value. We performed our annual test of goodwill for impairment during the fourth quarter of 2013. The results of the first step of the two-step goodwill impairment test indicated that the fair value of our North America reporting unit, estimated using the market approach, was in excess of the carrying value, and thus we did not perform step two of the impairment test.

(4) <u>Intangible Assets</u>

Intangible assets consist of the following (in thousands):

	December 31,			31,
		2013		2012
Customer relationships	\$	113,897	\$	113,761
Other		298		736
		114,195		114,497
Accumulated amortization		(78,430)		(67,092)
Intangible assets, net	\$	35,765	\$	47,405

The total fair value of net assets acquired from the Ensynch acquisition was approximately \$4,403,000, including \$2,680,000 of identifiable intangible assets, consisting primarily of customer relationships which are being amortized using the straight-line method over their estimated economic life of six years.

The total fair value of net assets acquired from the Inmac acquisition was approximately \$15,631,000, including \$9,778,000 of cash acquired and \$1,027,000 of identifiable intangible assets, consisting primarily of customer relationships which are being amortized using the straight-line method over their estimated economic life of five years.

During 2013, we periodically assessed whether any indicators of impairment existed related to our intangible assets. As a result of our largest software partner changing its channel incentive program beginning in October 2013 in a manner that could adversely affect our results of operations, we assessed the recoverability of our intangible assets by comparing the asset group's carrying amount to the projected undiscounted net cash flows associated with the related asset group over the primary asset's remaining life. We concluded that the carrying amount of our long-lived assets was recoverable, and no impairment was indicated.

Amortization expense recognized for the years ended December 31, 2013, 2012 and 2011 was \$11,646,000, \$13,029,000 and \$12,532,000, respectively. Future amortization expense for the remaining unamortized balance is estimated as follows (in thousands):

Years Ending December 31,	Amortizat	ion Expense
2014	\$	11,462
2015		11,442
2016		8,565
2017		2,268
2018		2,028
Total amortization expense	\$	35,765

(5) Accrued Expenses and Other Current Liabilities

Included in accrued expenses and other current liabilities as of December 31, 2013 and 2012 is an accrual for \$62,800,000 and \$62,187,000, respectively, of sales tax, value-added tax and other indirect taxes.

(6) <u>Debt, Capital Lease Obligation and Inventory Financing Facility</u>

Debt

Our long-term debt consists of the following (in thousands):

	December 31,			,
		2013		2012
Senior revolving credit facility	\$	16,500	\$	33,000
Accounts receivable securitization financing facility		50,000		47,000
Capital lease obligation	··	666		602
Total		67,166		80,602
Less: current portion of obligation under capital lease		(217)		(602)
Less: current portion of revolving credit facilities		<u>=</u>		
Long-term debt	\$	66,949	\$	80,000

Our senior revolving credit facility ("revolving facility") has an aggregate U.S. dollar equivalent maximum borrowing capacity amount of \$350,000,000, \$25,000,000 of which is available for borrowings in certain foreign currencies and in U.S. dollars. Additionally, \$25,000,000 is available for the issuance of letters of credit. The revolving facility is guaranteed by the Company's material domestic subsidiaries and is secured by a lien on substantially all of the Company's and each guarantor's assets. The interest rates applicable to borrowings under the revolving facility are based on the leverage ratio of the Company as set forth on a pricing grid in the amended agreement. Amounts outstanding under the revolving facility bear interest, payable quarterly, at a floating rate equal to the prime rate plus a predetermined spread of 0.00% to 0.75% or, at our option, a LIBOR rate plus a pre-determined spread of 1.25% to 2.25%. The balance of \$16,500,000 outstanding at December 31, 2013 was borrowed under the prime rate option at 3.25% per annum. In addition, we pay a quarterly commitment fee on the unused portion of the facility of 0.25% to 0.45%, and our letter of credit participation fee ranges from 1.25% to 2.25%. During the year ended December 31, 2013, due to availability under our other debt and financing facilities, weighted average borrowings under our revolving facility were only \$17.943.000. Interest expense associated with the revolving facility was \$1.738.000 in 2013. including the commitment fee and amortization to interest expense of deferred financing fees capitalized in connection with amendments to the revolving facility. The weighted average interest rate on amounts outstanding under our revolving facility, including the commitment fee and origination costs incurred, was 3.1% and 1.7% during the years ended December 31, 2012 and 2011, respectively. As of December 31, 2013, \$333,500,000 was available under the revolving facility. See "Covenants" below. The revolving facility matures on April 26, 2017. Deferred financing fees of \$2,300,000 were capitalized in conjunction with the amendment to the revolving facility in 2012. Such fees are being amortized to interest expense over the five-year term of the facility.

Our accounts receivable securitization financing facility ("ABS facility") has a maximum borrowing capacity of \$200,000,000. Under our ABS facility, we can sell receivables periodically to a special purpose accounts receivable and financing entity (the "SPE"), which is exclusively engaged in purchasing receivables from us. The SPE is a whollyowned, bankruptcy-remote entity that we have included in our consolidated financial statements. The SPE funds its purchases by selling undivided interests in eligible trade accounts receivable to a multi-seller conduit administered by an independent financial institution. The SPE's assets are available first and foremost to satisfy the claims of the creditors of the conduit, and we cannot convey any interest in the receivables sold into the conduit (or allow any adverse claims on the receivables) without the consent of the SPE. We maintain effective control over the receivables that are sold. Accordingly, the receivables remain recorded on our consolidated balance sheets. At December 31, 2013 and 2012, the SPE owned \$715,415,000 and \$809,683,000, respectively, of receivables recorded at fair value and included in our consolidated balance sheets. Under certain circumstances, we may be required to obtain a public rating of our ABS facility from one or more credit rating agencies of at least "A" or its equivalent. Our failure to obtain such rating would result in an "amortization event" under our ABS facility. While our ABS facility has a stated maximum amount, the actual availability under our ABS facility is limited by the quantity and quality of the underlying accounts receivable. As of December 31, 2013, qualified receivables were sufficient to permit access to the full \$200,000,000 facility amount, of which \$50,000,000 was outstanding at December 31, 2013. See "Covenants" below. Our ABS facility matures on April 24, 2015.

Under our ABS facility, interest is payable monthly, and the floating interest rate applicable at December 31, 2013 was 1.07% per annum, including a 0.90% usage fee on any outstanding balances. In addition, we pay a monthly commitment fee on the unused portion of the facility of 0.30% if the facility is 50% or more utilized and 0.40% if the facility is less than 50% utilized. During the years ended December 31, 2013 and 2012, the weighted average interest

rates on amounts outstanding under our ABS facility, including the usage and commitment fees and origination costs incurred, was 1.6% and 1.9%, respectively. Weighted average borrowings under our ABS facility in 2013 and 2012 were \$112,959,000 and \$102,674,000, respectively. Comparatively, during the year ended December 31, 2011, due to availability under our other debt financing facilities at more favorable rates, weighted average borrowings under our ABS facility were only \$5,744,000. However, interest expense associated with the ABS facility in 2011 was \$1,488,000 due to the inclusion of the commitment fee and amortization to interest expense of deferred financing fees capitalized in conjunction with amendments to our ABS facility. Deferred financing fees of \$378,000 were capitalized in conjunction with the amendment to our ABS facility in 2012. Such fees are being amortized to interest expense over the three-year term of the facility.

Covenants

Our revolving facility and our ABS facility contain various covenants customary for transactions of this type, including limitations on the payment of dividends and the requirement that we comply with maximum leverage, minimum fixed charge and minimum asset coverage ratio requirements and meet monthly, quarterly and annual reporting requirements. If we fail to comply with these covenants, the lenders would be able to demand payment within a specified period of time. At December 31, 2013, we were in compliance with all such covenants.

Our consolidated debt balance that can be outstanding at the end of any fiscal quarter under our revolving facility and our ABS facility is limited by certain financial covenants, particularly a maximum leverage ratio. The maximum leverage ratio is calculated as aggregate debt outstanding divided by the sum of our trailing twelve month net earnings (loss) plus (i) interest expense, excluding non-cash imputed interest on our inventory financing facility, (ii) income tax expense (benefit), (iii) depreciation and amortization and (iv) non-cash stock-based compensation ("adjusted earnings"). The maximum leverage ratio permitted under the agreements is 2.75 times trailing twelve-month adjusted earnings. A significant drop in our adjusted earnings would limit the amount of indebtedness that could be outstanding at the end of any fiscal quarter to a level that would be below our consolidated maximum facility amount. Based on our maximum leverage ratio as of December 31, 2013, our consolidated debt balance that could have been outstanding under our revolving facility and our ABS facility was reduced from the maximum borrowing capacity of \$550,000,000 to \$457,552,000, of which \$66,500,000 was outstanding at December 31, 2013.

Capital Lease Obligation

Our obligations under capitalized leases are included in long-term debt in our consolidated balance sheets as of December 31, 2013 and 2012. The current and long-term portions of the obligations are included in the table above.

In July 2009, we entered into a four-year lease for certain IT equipment. We amended this lease in November 2009 and again in July 2010 to include additional IT equipment. The value of the equipment held under the original capitalized lease, \$3,867,000, was fully amortized prior to the equipment being returned to the lessor under the original lease terms in July 2013. In July 2013, we entered into a new 42-month capitalized lease for replacement equipment. The value of the equipment held under the new capitalized lease, \$735,000, is included in property and equipment as of December 31, 2013. As of December 31, 2013, accumulated amortization on the capital lease assets was \$105,000.

The new capital lease was a non-cash transaction and, accordingly, has been excluded from our consolidated statement of cash flows for the year ended December 31, 2013.

Inventory Financing Facility

The aggregate availability for vendor purchases under our inventory financing facility is \$200,000,000. The facility matures on April 26, 2017. Additionally, the facility may be renewed under certain circumstances described in the agreement for successive 12-month periods. Interest does not accrue on accounts payable under this facility provided the accounts payable are paid within stated vendor terms (ranging from 30 to 60 days). We impute interest on the average daily balance outstanding during these stated vendor terms based on our blended incremental borrowing rate during the period under our revolving facility and our ABS facility. Imputed interest of \$2,453,000, \$1,838,000 and \$1,978,000 was recorded in 2013, 2012 and 2011, respectively. Deferred financing fees of \$99,000 were capitalized in conjunction with the amendment to the inventory financing facility in 2012. Such fees are being amortized to interest expense over the five-year term of the facility. If balances are not paid within stated vendor terms, they will accrue interest at prime plus 1.25%. The facility is guaranteed by the Company and each of its material domestic subsidiaries and is secured by a lien on substantially all of the Company's domestic assets that is of equal priority to the liens securing borrowings under

our revolving facility. As of December 31, 2013 and 2012, \$115,252,000 and \$116,833,000, respectively, was included in accounts payable related to this facility.

(7) <u>Leases</u>

We have several non-cancelable operating leases with third parties, primarily for administrative and distribution center space and computer equipment. Our facilities leases generally provide for periodic rent increases and many contain escalation clauses and renewal options. We recognize rent expense on a straight-line basis over the lease term. Rental expense for these third-party operating leases was \$15,731,000, \$14,740,000 and \$14,821,000 for the years ended December 31, 2013, 2012 and 2011, respectively, and is included in selling and administrative expenses in our consolidated statements of operations.

Future minimum lease payments under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) as of December 31, 2013 are as follows (in thousands):

Years Ending December 31,	
2014	\$ 14,902
2015	13,097
2016	8,617
2017	
2018	5,636
Thereafter	
Total minimum lease payments	\$ 58,324

(8) Severance and Restructuring Activities

Severance Costs Expensed for 2013 Resource Actions

During the year ended December 31, 2013, North America and EMEA recorded severance expense totaling \$3,429,000 and \$9,603,000, respectively, related to 2013 resource actions. The charges related to a continued review of resource needs in North America and significant restructuring activities in EMEA, primarily in the United Kingdom and Germany, as we worked to rationalize our selling and administrative expenses in EMEA.

The following table details the 2013 activity and the outstanding obligations related to the 2013 resource actions as of December 31, 2013 (in thousands):

	North America	EMEA	Cons	<u>solidated</u>
Severance costs\$	3,429	\$ 9,603	\$	13,032
Foreign currency translation adjustments	-	194		194
Cash payments	(2,206)	(6,887)		(9,093)
Balance at December 31, 2013 <u>\$</u>	1,223	\$ 2,910	\$	4,133

The remaining outstanding obligations are expected to be paid during the next 12 months and are therefore included in accrued expenses and other current liabilities.

Severance Costs Expensed for 2012 Resource Actions

During the year ended December 31, 2012, North America and EMEA recorded severance expense totaling \$3,022,000 and \$3,973,000, respectively, related to 2012 restructuring actions. The charges were associated with severance for the elimination of certain positions based on a re-alignment of roles and responsibilities.

The following table details the 2013 activity and the outstanding obligations related to the 2012 resource actions as of December 31, 2013 (in thousands):

	North America	EMEA	Consolidated
Balance at December 31, 2012 \$	1,249	\$ 1,391	\$ 2,640
Foreign currency translation adjustments	-	18	18
Adjustments	(104)	(188)	(292)
Cash payments	(658)	(884)	(1,542)
Balance at December 31, 2013 \$	487	\$ 337	<u>\$ 824</u>

The remaining outstanding obligations are expected to be paid during the next 12 months and are therefore included in accrued expenses and other current liabilities.

Severance Costs Expensed for 2011 Resource Actions

During the year ended December 31, 2011, North America and EMEA recorded severance expense totaling \$2,425,000 and \$2,737,000, respectively, relating to 2011 restructuring actions. The charges were associated with severance for the elimination of certain positions based on a re-alignment of roles and responsibilities. During the year ended December 31, 2012, all remaining liabilities were settled, including adjustments recorded as a reduction to severance and restructuring expense in North America and EMEA of \$188,000 and \$412,000, respectively, due to changes in estimates.

Prior Resource Actions

In 2010 and 2009, as a result of ongoing restructuring efforts to reduce operating expenses, we recorded severance costs in each of our operating segments. During the year ended December 31, 2012, all remaining liabilities were settled, including an adjustment recorded as a reduction to severance and restructuring expense in EMEA of \$78,000 due to changes in estimates.

(9) Stock-Based Compensation

We recorded the following pre-tax amounts in selling and administrative expenses for stock-based compensation, by operating segment, in our consolidated financial statements (in thousands):

	Years Ended December 31,				
_	2013	2012	2011		
North America	\$ 5,118	\$ 6,260	\$ 5,779		
EMEA	1,061	2,030	1,908		
APAC	251	258	232		
Total Consolidated	\$ 6,430	<u>\$ 8,548</u>	\$ 7,919		

Company Plan

On October 1, 2007, Insight's Board of Directors approved the 2007 Omnibus Plan (the "2007 Plan"), and the 2007 Plan became effective when it was approved by Insight's stockholders at the annual meeting on November 12, 2007. On August 12, 2008, the 2007 Plan was amended to clarify certain provisions relating to forfeiture restrictions and grants of discretionary awards to non-employee directors. On May 18, 2011, Insight's stockholders approved the Company's Amended 2007 Omnibus Plan ("the Amended 2007 Plan") to, among other changes, increase the number of shares of common stock authorized to be issued thereunder by 3,000,000 shares to a total of 7,250,000 shares. The Amended 2007 Plan is administered by the Compensation Committee of Insight's Board of Directors, and, except as provided below, the Compensation Committee has the exclusive authority to administer the Amended 2007 Plan, including the power to determine eligibility, the types of awards to be granted, the price and the timing of awards. Under the Amended 2007 Plan, the Compensation Committee may delegate some of its authority to our Chief Executive Officer to grant awards to individuals other than individuals who are subject to the reporting requirements of Section 16(a) of the Securities Exchange Act of 1934, as amended. Teammates, officers and members of the Board of Directors are eligible for awards under the Amended 2007 Plan, and consultants and independent contractors are also eligible if they provide bona fide services that are not related to capital raising or promoting or maintaining a market for the Company's stock. The Amended 2007 Plan allows for awards of options, stock appreciation rights, restricted stock, RSUs, performance

awards as well as grants of cash awards. As of December 31, 2013, of the 7,250,000 shares of stock reserved for awards issued under the Amended 2007 Plan, 4,433,643 shares of stock were available for grant.

Accounting for Restricted Stock Units

We issue RSUs as incentives to certain officers and teammates and as compensation to members of our Board of Directors. We recognize compensation expense associated with the issuance of such RSUs over the vesting period for each respective RSU. The total compensation expense associated with RSUs represents the value based upon the number of RSUs awarded multiplied by the closing price of our common stock on the date of grant, adjusted for our estimate of forfeitures. The number of RSUs to be awarded under our service-based RSUs is fixed at the grant date. The number of RSUs ultimately awarded under our performance-based RSUs varies based on whether the Company achieves certain financial results. We record compensation expense each period based on our estimate of the most probable number of RSUs that will be issued under the grants of performance-based RSUs. Recipients of RSUs do not have voting or dividend rights until the vesting conditions are satisfied and shares are released.

As of December 31, 2013, total compensation cost related to nonvested RSUs not yet recognized is \$10,530,000, which is expected to be recognized over the next 1.33 years on a weighted-average basis.

The following table summarizes our RSU activity during the year ended December 31, 2013:

	ghted Average			
	Number	Gran	t Date Fair Value	 Fair Value
Nonvested at the beginning of year	1,162,231	\$	17.66	
Granted	393,651	\$	20.43	
Vested, including shares withheld to				
cover taxes	(580,924)	\$	16.07	\$ 11,829,527 ^(a)
Forfeited	(163,393)	\$	19.38	
Nonvested at the end of year	811,565	\$	19.91	\$ 18,430,641 ^(b)
Expected to vest	730,769			\$ 16,595,764 ^(b)

- (a) The fair value of vested RSUs represents the total pre-tax fair value, based on the closing stock price on the day of vesting, which would have been received by holders of RSUs had all such holders sold their underlying shares on that date. The aggregate intrinsic value for vested shares of restricted common stock and RSUs during 2012 and 2011 was \$14,112,284 and \$11,174,009, respectively.
- The aggregate fair value of the nonvested RSUs and the RSUs expected to vest represents the total pre-tax fair value, based on our closing stock price of \$22.71 as of December 31, 2013, which would have been received by holders of RSUs had all such holders sold their underlying shares on that date.

During each of the years in the three-year period ended December 31, 2013, the RSUs that vested for teammates in the United States were net-share settled such that we withheld shares with value equivalent to the teammates' minimum statutory United States tax obligation for the applicable income and other employment taxes and remitted the equivalent cash amount to the appropriate taxing authorities. The total shares withheld during the years ended December 31, 2013, 2012 and 2011 of 151,521, 158,231 and 154,473, respectively, were based on the value of the RSUs on their vesting dates as determined by our closing stock price on such dates. For the years ended December 31, 2013, 2012 and 2011, total payments for the employees' tax obligations to the taxing authorities were \$3,094,000, \$3,288,000 and \$2,697,000, respectively, and are reflected as a financing activity within the consolidated statements of cash flows. These net-share settlements had the effect of repurchases of our common stock as they reduced the number of shares that would have otherwise been issued as a result of the vesting and did not represent an expense to us.

Accounting for Stock Options

No options were granted and no stock-based compensation expense related to stock options was recognized during the three years ended December 31, 2013. All previously granted unexercised stock options expired in December 2012.

(10) Income Taxes

The following table presents the U.S. and foreign components of earnings before income taxes and the related income tax expense (in thousands):

Earnings before income taxes:

	Years Ended December 31,						
		2013		2012		2011	
U.S	\$	95,481	\$	99,970	\$	87,436	
Foreign		19,043		44,698	_	54,253	
•	\$	114,524	\$	144,668	\$	141,689	

<u>Income tax expense:</u>

	Years Ended December 31,						
		2013		2012		2011	
Current:							
U.S. Federal	\$	27,782	\$	25,319	\$	18,410	
U.S. State and local		2,662		2,436		1,113	
Foreign		9,614		15,172		17,379	
		40,058		42,927		36,902	
Deferred:							
U.S. Federal		4,039		7,785		4,440	
U.S. State and local		921		(823)		2,042	
Foreign		(1,515)		2,016		(1,930)	
		3,445		8,978		4,552	
	\$	43,503	\$	51,905	\$	41,454	

The following schedule reconciles the differences between the U.S. federal income taxes at the U.S. statutory rate and our income tax expense (dollars in thousands):

	Years Ended December 31,							
		2013 2012			2011			
Expected expense at U.S. statutory rate of 35%	\$	40,083	\$	50,634	\$	49,591		
Change resulting from:								
State income tax expense, net of federal income tax benefit		3,662		2,088		3,225		
Audits and adjustments, net		(1,730)		2,424		(665)		
Change in valuation allowance		4,160		641		(1,643)		
Foreign income taxed at different rates		(2,665)		(3,823)		(2,136)		
Reorganization/recapitalization of foreign operations		-		-		(7,580)		
Non-deductible compensation		275		485		512		
Other, net		(282)		(544)		150		
Income tax expense	\$	43,503	\$	51,905	\$	41,454		
Effective tax rate		38.0%		35.9%		29.3%		

The total income tax expense in 2011 includes net U.S. benefits of \$8,637,000 primarily related to the recognition of foreign tax credits upon the reorganization of certain of our foreign operations in the fourth quarter and to other tax matters.

For foreign entities not treated as branches for U.S. tax purposes, we do not provide for U.S. income taxes on the undistributed earnings of these subsidiaries as these earnings are reinvested and, in the opinion of management, will continue to be reinvested indefinitely outside of the U.S. The undistributed earnings of foreign subsidiaries that are deemed to be indefinitely invested outside of the U.S. were approximately \$71,952,000 at December 31, 2013. It is not practicable to determine the unrecognized deferred tax liability on those earnings.

The significant components of deferred tax assets and liabilities are as follows (in thousands):

	 Decen	ıber	31,
	2013		2012
Deferred tax assets:			
Goodwill and other intangibles	\$ 59,828	\$	65,523
Net operating losses	16,489		13,571
Foreign tax credits	12,651		12,244
Accruals	10,243		10,154
Accounts receivable	6,389		6,276
Stock-based compensation	2,881		3,612
Inventories	1,837		1,239
Deferred revenue	567		952
Other	 320		1,285
Gross deferred tax assets	111,205		114,856
Valuation allowance	(24,508)		(20,176)
Total deferred tax assets	 86,697		94,680
Deferred tax liabilities:			
Property and equipment	(11,803)		(16,340)
Prepaid expenses	(250)		(252)
Total deferred tax liabilities	 (12,053)		(16,592)
Net deferred tax assets	\$ 74,644	\$	78,088

The net current and non-current portions of deferred tax assets and liabilities are as follows (in thousands):

	December 31,							
	2013 2012							
Net current deferred tax asset	\$ 16,436	\$	16,387					
Net non-current deferred tax asset	58,208		61,701					
Net deferred tax asset	\$ 74,644	\$	78,088					

As of December 31, 2013, we have U.S. state net operating loss carryforwards ("NOLs") of \$740,000 that will expire between 2014 and 2030 and U.S. federal NOLs of \$48,000 that will expire in 2031. We also have NOLs from various non-U.S. jurisdictions of \$60,711,000. While the majority of the non-U.S. NOLs have no expiration date, \$5,245,000 will expire between 2014 and 2020.

On the basis of currently available information, we have provided valuation allowances for certain of our deferred tax assets where we believe it is more likely than not that the related tax benefits will not be realized. At December 31, 2013 and 2012, our valuation allowance totaled \$24,508,000 and \$20,176,000, respectively, representing certain U.S. state NOLs, non-U.S. NOLs, foreign depreciation allowances and foreign tax credits.

We believe it is more likely than not that forecasted income, including income that may be generated as a result of prudent and feasible tax planning strategies, together with the tax effects of deferred tax liabilities, will be sufficient to fully recover our remaining deferred tax assets. In the future, if we determine that realization of the remaining deferred tax asset and the availability of certain previously paid taxes to be refunded are not more likely than not, we will need to increase our valuation allowance and record additional income tax expense.

The following table summarizes the change in the valuation allowance (in thousands):

	December 31,						
		2013	2012				
Valuation allowance at beginning of year	\$	20,176	\$	18,901			
Increase in income tax expense		4,160		641			
Foreign currency translation adjustments		172		230			
Acquired valuation allowances		<u> </u>		404			
Valuation allowance at end of year	\$	24,508	\$	20,176			

A net tax benefit of \$760,000, \$1,036,000 and \$1,351,000, related to the exercise of employee stock options and other employee stock programs was applied to stockholders' equity during the years ended December 31, 2013, 2012 and 2011, respectively.

Various taxing jurisdictions are examining our tax returns for certain tax years. Although the outcome of tax audits cannot be predicted with certainty, management believes the ultimate resolution of these examinations will not result in a material adverse effect to our financial position, results of operations or cash flows.

As of December 31, 2013 and 2012, we had approximately \$4,546,000 and \$7,201,000, respectively, of unrecognized tax benefits. Of these amounts, approximately \$364,000 and \$488,000, respectively, related to accrued interest. A reconciliation of the beginning and ending amounts of unrecognized tax benefits, excluding interest, is as follows (in thousands):

Balance at December 31, 2012	\$ 6,713
Subtractions for tax positions in prior periods	(191)
Additions for tax positions in current period	470
Subtractions due to foreign currency translation	(8)
Subtractions due to audit settlements and statute expirations	 (2,802)
Balance at December 31, 2013	\$ 4,182

In the future, if recognized, the liability associated with uncertain tax positions would affect our effective tax rate. We do not believe there will be any changes over the next 12 months that would have a material effect on our effective tax rate.

Several of our subsidiaries are currently under audit for tax years 2006 through 2012. It is reasonably possible that the examination phase of these audits may conclude in the next 12 months and that the related unrecognized tax benefits for uncertain tax positions may change, potentially having a material effect on our effective tax rate. However, based on the status of the various examinations in multiple jurisdictions, an estimate of the range of reasonably possible outcomes cannot be made at this time.

We, including our subsidiaries, file income tax returns in the U.S. federal jurisdiction, and many state and local and non-U.S. jurisdictions. In the U.S., federal income tax returns for 2011 and 2012 remain open to examination. For U.S. state and local taxes as well as in non-U.S. jurisdictions, the statute of limitations generally varies between three and ten years.

(11) Market Risk Management

Interest Rate Risk

We have interest rate exposure arising from our financing facilities, which have variable interest rates. These variable interest rates are affected by changes in short-term interest rates. We currently do not hedge our interest rate exposure.

We do not believe that the effect of reasonably possible near-term changes in interest rates will be material to our financial position, results of operations and cash flows. Our financing facilities expose our net earnings to changes in short-term interest rates since interest rates on the underlying obligations are variable. We had \$16,500,000 outstanding under our revolving facility and \$50,000,000 outstanding under our ABS facility at December 31, 2013. The interest rates attributable to the borrowings under our senior revolving credit facility and the ABS facility were 3.25% and 1.07%, respectively, per annum at December 31, 2013. The change in annual earnings from continuing operations, pretax, resulting from a hypothetical 10% increase or decrease in the highest applicable interest rate would approximate \$127,000.

Foreign Currency Exchange Risk

We use the U.S. dollar as our reporting currency. The functional currencies of our significant foreign subsidiaries are generally the local currencies. Accordingly, assets and liabilities of the subsidiaries are translated into U.S. dollars at the exchange rate in effect at the balance sheet dates. Income and expense items are translated at the average exchange rate for each month within the year. Translation adjustments are recorded in other comprehensive income as a separate component

of stockholders' equity. Net foreign currency transaction gains/losses, including transaction gains/losses on intercompany balances that are not of a long-term investment nature, are reported as a separate component of non-operating (income) expense, net in our consolidated statements of operations. We also maintain cash accounts denominated in currencies other than the functional currency which expose us to foreign exchange rate movements. Remeasurement of these cash balances results in gains/losses that are also reported as a separate component of non-operating (income) expense.

We monitor our foreign currency exposure and selectively enter into forward exchange contracts to mitigate risk associated with certain non-functional currency monetary assets and liabilities related to foreign denominated payables, receivables, and cash balances. Transaction gains and losses resulting from non-functional currency assets and liabilities are offset by forward contracts in non-operating (income) and expense, net. The Company does not have a significant concentration of credit risk with any single counterparty.

The Company generally enters into forward contracts with maturities of one month or less. The derivatives entered into during 2013 were not designated as hedges. The following derivative contracts were entered into during the year ended December 31, 2013, and remained open and outstanding at December 31, 2013. All U.S. dollar and foreign currency amounts (British Pounds Sterling and Euros) are presented in thousands.

	Buy	Buy
Foreign Currency	GBP	EUR
Foreign Amount	5,000	5,000
USD Equivalent	\$8,175	\$6,850
Weighted Average Maturity	Less than 1 month	Less than 1 month

The Company does not enter into derivative contracts for speculative or trading purposes. The fair value of all forward contracts at December 31, 2013 was an asset of \$91,000.

(12) <u>Derivative Financial Instruments</u>

We use derivatives to partially offset our exposure to fluctuations in certain foreign currencies. We do not enter into derivatives for speculative or trading purposes. Derivatives are recorded at fair value on the balance sheet and gains or losses resulting from changes in fair value of the derivative are recorded currently in income. The Company does not designate our hedges for hedge accounting, and our foreign currency derivative instruments are not subject to any master netting arrangements with our counterparties.

We use foreign exchange forward contracts to hedge certain non-functional currency assets and liabilities from changes in exchange rate movements. Our non-functional currency assets and liabilities are primarily related to foreign currency denominated payables, receivables, and cash balances. The foreign currency forward contracts, carried at fair value, typically have a maturity of one month or less. We currently enter into approximately two foreign exchange forward contracts per month with an average notional value of \$10,644,000 and an average maturity of approximately eleven days.

The counterparties associated with our foreign exchange forward contracts are large creditworthy commercial banks. The derivatives transacted with these institutions are short in duration and, therefore, we do not consider counterparty concentration and non-performance to be material risks.

The following table summarizes our derivative financial instruments as of December 31, 2013 and 2012 (in thousands):

		December 31, 2013			December 31, 2013 December						r 31, 2	.012
		Asset		Liability		Asset		Lia	bility			
		Deri	vatives	Derivat	ives	Deriv	atives	Deri	vatives

Total		\$ (398)	\$	813	\$	(951)	

(13) Fair Value Measurements

The following table summarizes the valuation of our financial instruments by the following three categories as of December 31, 2013 and 2012 (in thousands):

- Level 1: Quoted market prices in active markets for identical assets or liabilities.
- Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.
- Level 3: Unobservable inputs that are not corroborated by market data.

		December 31, 2013				D	ecembe	r 31, 20	12

	Level 3		_		_		-		_
		\$	_	\$	_	\$	25	\$	_

Foreign Exchange Derivatives

We have elected to use the income approach to value the foreign exchange derivatives, using observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single present value amount assuming that participants are motivated, but not compelled, to transact. Level 2 inputs for the valuations are limited to quoted prices for similar assets or liabilities in active markets and inputs other than quoted prices that are observable for the asset or liability (specifically LIBOR rates, foreign exchange rates, and foreign exchange forward points). Mid-market pricing is used as a practical expedient for fair value measurements. Fair value measurement of an asset or liability must reflect the nonperformance risk of the entity and the counterparty. Therefore,

the impact of the counterparty's creditworthiness when in an asset position and the Company's creditworthiness when in a liability position has also been factored into the fair value measurement of the derivative instruments and did not have a material impact on the fair value of these derivative instruments. Both the counterparty and the Company are expected to continue to perform under the contractual terms of the instruments.

Non-qualified Deferred Compensation Plan Investments

The assets of the non-qualified deferred compensation plan (discussed in Note 14) were set up in a Rabbi Trust. They represented money market funds that were carried at fair value, based on quoted market prices, and were classified within Level 1 of the fair value hierarchy.

As of December 31, 2013, we have no non-financial assets or liabilities that are measured and recorded at fair value on a recurring basis, and our other financial assets or liabilities generally consist of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses and other current liabilities. The estimated fair values of our cash and cash equivalents is determined based on quoted prices in active markets for identical assets. The fair value of the other financial assets and liabilities is based on the value that would be received or paid in an orderly transaction between market participants and approximates the carrying value due to their nature and short duration.

(14) Benefit Plans

We adopted a defined contribution benefit plan (the "Defined Contribution Plan") for our U.S. teammates which complies with section 401(k) of the Internal Revenue Code. The Company provides a discretionary match to all participants who elect 401(k) contributions pursuant to the Defined Contribution Plan. The discretionary match provided to participants is equivalent to 25% of a participant's pre-tax contributions up to a maximum of 6% of eligible compensation per pay period. We have a similar plan for our Canadian teammates whereby we match 100% of a participant's pre-tax contributions up to a maximum of 1.5% of eligible compensation per pay period. Additionally, we offer several defined contribution benefit plans to our teammates in EMEA and APAC. These plans and their related terms vary by country. Total combined contribution expense under these plans was \$6,923,000, \$6,579,000 and \$6,086,000 for the years ended December 31, 2013, 2012 and 2011, respectively.

Effective January 1, 2008, we established the Insight Non-qualified Deferred Compensation Plan (the "Deferred Compensation Plan") to allow a select group of "management or highly compensated employees" as defined by the Employee Retirement Income Security Act of 1974, as amended, to voluntarily defer receipt of compensation and earn a rate of return on their deferred amounts based on their selection from a variety of independently managed funds. All deferred amounts were employee contributions, and all gains or losses on amounts held in the Deferred Compensation Plan were fully allocable to plan participants. We did not provide a guaranteed rate of return on deferred amounts nor did we make any contributions to the Deferred Compensation Plan. The Deferred Compensation Plan was terminated effective May 31, 2012, and the Deferred Compensation Plan's assets were liquidated and participant account balances were paid out during 2013. Prior to their liquidation in 2013, as of December 31, 2012, the assets held in the Deferred Compensation Plan were \$1,240,000. Liabilities related to the Deferred Compensation Plan as of December 31, 2012 were \$849,000.

(15) Share Repurchase Programs

On May 26, 2011, we announced that our Board of Directors had authorized the repurchase of up to \$50,000,000 of our common stock. During the year ended December 31, 2011, we purchased 2,897,493 shares of our common stock on the open market at an average price of \$17.26 per share, which represented the full amount authorized under the repurchase program. All shares repurchased were retired.

On February 14, 2013, we announced that our Board of Directors had authorized the repurchase of up to \$50,000,000 of our common stock. During the year ended December 31, 2013, we purchased 2,646,722 shares of our common stock on the open market at an average price of \$18.89 per share, which represented the full amount authorized under the repurchase program. All shares repurchased were retired.

On October 30, 2013, we announced that our Board of Directors had authorized another repurchase of up to \$50,000,000 of our common stock. Any share repurchases may be made on the open market, through block trades, through 10b5-1 plans or otherwise. The amount of shares purchased and the timing of the purchases will be based on working capital requirements, general business conditions and other factors. We intend to retire the repurchased shares. During the

year ended December 31, 2013, we purchased 353,316 shares of our common stock on the open market at a total cost of approximately \$7,774,000 (an average price of \$22.00 per share). All shares repurchased through December 31, 2013 have been retired.

(16) <u>Commitments and Contingencies</u>

Contractual

In the ordinary course of business, we issue performance bonds to secure our performance under certain contracts or state tax requirements. As of December 31, 2013, we had approximately \$2,890,000 of performance bonds outstanding. These bonds are issued on our behalf by a surety company on an unsecured basis; however, if the surety company is ever required to pay out under the bonds, we have contractually agreed to reimburse the surety company.

Employment Contracts and Severance Plans

We have employment contracts with, and plans covering, certain officers and management teammates under which severance payments would become payable in the event of specified terminations without cause or terminations under certain circumstances after a change in control. In addition, vesting of stock-based compensation would accelerate following a change in control. If severance payments under the current employment agreements or plan payments were to become payable, the severance payments would generally range from three to twenty-four months of salary.

Indemnifications

From time to time, in the ordinary course of business, we enter into contractual arrangements under which we agree to indemnify either our clients or third-party service providers from certain losses incurred relating to services performed on our behalf or for losses arising from defined events, which may include litigation or claims relating to past performance. These arrangements include, but are not limited to, the indemnification of our clients for certain claims arising out of our performance under our sales contracts, the indemnification of our landlords for certain claims arising from our use of leased facilities and the indemnification of the lenders that provide our credit facilities for certain claims arising from their extension of credit to us. Such indemnification obligations may not be subject to maximum loss clauses.

Management believes that payments, if any, related to these indemnifications are not probable at December 31, 2013. Accordingly, we have not accrued any liabilities related to such indemnifications in our consolidated financial statements.

We have entered into separate indemnification agreements with our executive officers and with each of our directors. These agreements require us, among other requirements, to indemnify such officers and directors against expenses (including attorneys' fees), judgments and settlements paid by such individual in connection with any action arising out of such individual's status or service as our executive officer or director (subject to exceptions such as where the individual failed to act in good faith or in a manner the individual reasonably believed to be in, or not opposed to, the best interests of the Company) and to advance expenses incurred by such individual with respect to which such individual may be entitled to indemnification by us. There are no pending legal proceedings that involve the indemnification of any of the Company's directors or officers.

Contingencies Related to Third-Party Review

From time to time, we are subject to potential claims and assessments from third parties. We are also subject to various governmental, client and vendor audits. We continually assess whether or not such claims have merit and warrant accrual. Where appropriate, we accrue estimates of anticipated liabilities in the consolidated financial statements. Such estimates are subject to change and may affect our results of operations and our cash flows.

Legal Proceedings

We are party to various legal proceedings arising in the ordinary course of business, including preference payment claims asserted in client bankruptcy proceedings, indemnification claims, claims of alleged infringement of patents, trademarks, copyrights and other intellectual property rights, claims of alleged non-compliance with contract provisions and claims related to alleged violations of laws and regulations. Many of these proceeding are at preliminary stages, and

many of these proceedings seek an indeterminate amount of damages. We regularly evaluate the status of the legal proceedings in which we are involved to assess whether a loss is probable or there is a reasonable possibility that a loss, or an additional loss, may have been incurred and determine if accruals are appropriate. If accruals are not appropriate, we further evaluate each legal proceeding to assess whether an estimate of possible loss or range of possible loss can be made for disclosure. Although litigation is inherently unpredictable, we believe that we have adequate provisions for any probable and estimable losses. It is possible, nevertheless, that our consolidated financial position, results of operations or liquidity could be materially and adversely affected in any particular period by the resolution of a legal proceeding. Legal expenses related to defense, negotiations, settlements, rulings and advice of outside legal counsel are expensed as incurred.

In August 2010, in connection with an investigation being conducted by the United States Department of Justice (the "DOJ"), our subsidiary, Calence, LLC, received a subpoena from the Office of the Inspector General of the Federal Communications Commission requesting documents and information related to the expenditure of funds under the E-Rate program, which provides schools and libraries with discounts to obtain affordable telecommunications and internet access and related hardware and software. We have completed our response to the subpoena. The basis of the investigation is a qui tam lawsuit filed in the United States District Court for the Southern District of Texas by a contractor who provided services to the former owners of Calence. The lawsuit, designated United States ex rel. Shupe v. Cisco Systems, Inc., Avnet, Inc. and Calence, LLC, was first filed in January 2010 and was unsealed in June 2012, and an amended complaint was filed and served in September 2012. The amended complaint alleged violations of the False Claims Act and sought various remedies including treble damages and civil penalties. In connection with the unsealing of the complaint, the DOJ filed a notice with the court declining to intervene in the qui tam action. However, that filing should not be viewed as a final assessment by the DOJ of the merits of this qui tam action. In November 2012, the Company filed a motion to dismiss the amended complaint, and that motion was granted in an order from the District Court in May 2013: however, motions to dismiss filed by the other defendants were denied in the May 2013 order. The Court gave the plaintiff leave to amend, and the plaintiff filed a second amended complaint in May 2013. In June 2013, the defendants filed a petition with the United States Court of Appeals for the Fifth Circuit for review of the May 2013 order, in July 2013 the Fifth Circuit granted the defendants' petition to file an appeal, which has been filed and fully briefed, and the proceedings in the District Court are now staved pending the resolution of the appeal. The claims in the second amended complaint are similar to the claims in the dismissed complaint. The Company disputes the claims and intends to defend the lawsuit vigorously. Based on the limited information currently available, the Company is not able to estimate what the possible loss or range of loss might be, if any. The Company is pursuing its rights under the Calence acquisition agreements to indemnification for losses that may arise out of or result from this matter, including our fees and expenses for responding to the subpoena and defending the lawsuit. We have recovered a substantial portion of our fees to date and continue to pursue our indemnification claims. During the year ended December 31, 2012, the Company recovered approximately \$2,000,000 of legal costs incurred in previous periods.

Aside from the matter discussed above, the Company is not involved in any pending or threatened legal proceedings that it believes could reasonably be expected to have a material adverse effect on its financial condition, results of operations or liquidity.

(17) Supplemental Financial Information

A summary of additions and deductions related to the allowance for doubtful accounts receivable for the years ended December 31, 2013, 2012 and 2011 follows (in thousands):

	Beg	ance at ginning Year	Ad	lditions_	De	ductions	 lance at l of Year
Allowance for doubtful accounts receivable:							
Year ended December 31, 2013	\$	18,905	\$	4,696	\$	(3,693)	\$ 19,908
Year ended December 31, 2012	\$	18,803	\$	4,195	\$	(4,093)	\$ 18,905
Year ended December 31, 2011	\$	17,540	\$	4,267	\$	(3,004)	\$ 18,803

(18) Segment and Geographic Information

We operate in three reportable geographic operating segments: North America; EMEA; and APAC. Currently, our offerings in North America and select countries in EMEA include IT hardware, software and services. Our offerings in the remainder of our EMEA segment and in APAC are almost entirely software and select software-related services. Net sales by product or service type for North America, EMEA and APAC were as follows for the years ended December 31, 2013, 2012 and 2011 (in thousands):

	ľ	North Americ	a

The method for determining what information regarding operating segments, products and services, geographic areas of operation and major clients to report is based upon the "management approach," or the way that management organizes the operating segments within a company, for which separate financial information is evaluated regularly by the Chief Operating Decision Maker ("CODM") in deciding how to allocate resources. Our CODM is our Chief Executive Officer.

All significant intercompany transactions are eliminated upon consolidation, and there are no differences between the accounting policies used to measure profit and loss for our segments or on a consolidated basis. Net sales are defined as net sales to external clients. Sales to the U.S. federal government, which are diversified across multiple agencies and departments, collectively accounted for approximately 10% of our 2013 net sales. However, there are several independent purchasing decision-makers across these agencies and departments. Excluding these sales to the federal government, none of our clients exceeded ten percent of consolidated net sales for the year ended December 31, 2013.

A portion of our operating segments' selling and administrative expenses arise from shared services and infrastructure that we have historically provided to them in order to realize economies of scale and to use resources efficiently. These expenses, collectively identified as corporate charges, include senior management expenses, internal audit, legal, tax, insurance services, treasury and other corporate infrastructure expenses. Charges are allocated to our operating segments, and the allocations have been determined on a basis that we considered to be a reasonable reflection of the utilization of services provided to or benefits received by the operating segments.

The tables below present information about our reportable operating segments as of and for the years ended December 31, 2013, 2012 and 2011 (in thousands):

INSIGHT ENTERPRISES, INC.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as such term is defined under Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2013. In making this assessment, our management used the criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Management has concluded that the Company maintained effective internal control over financial reporting as of December 31, 2013, based on the criteria established in COSO's Internal Control – Integrated Framework.

KPMG LLP, the independent registered public accounting firm that audited the Consolidated Financial Statements in Part II, Item 8 of this report, has issued an attestation report on the Company's internal control over financial reporting as of December 31, 2013.

(b) Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended December 31, 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

(c) Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act). Our Chief Executive Officer and Chief Financial Officer, as of the end of the period covered by this report, evaluated the effectiveness of our disclosure controls and procedures and determined that as of December 31, 2013 our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(d) Inherent Limitations of Disclosure Controls and Internal Control Over Financial Reporting

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item can be found in our definitive Proxy Statement relating to our 2014 Annual Meeting of Stockholders (our "Proxy Statement") and is incorporated herein by reference.

Item 11. Executive Compensation

The information required by this item can be found in our Proxy Statement and is incorporated herein by reference.

INSIGHT ENTERPRISES, INC.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item can be found in our Proxy Statement and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item can be found in our Proxy Statement and is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

The information required by this item can be found in our Proxy Statement and is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) Financial Statements and Schedules

The Consolidated Financial Statements of Insight Enterprises, Inc. and subsidiaries and the related Reports of Independent Registered Public Accounting Firm are filed herein as set forth under Part II, Item 8 of this report.

Financial statement schedules have been omitted since they are either not required, not applicable, or the information is otherwise included in the Consolidated Financial Statements or notes thereto.

(b) Exhibits

The exhibits list in the Index to Exhibits immediately following the signature page is incorporated herein by reference as the list of exhibits required as part of this report.

INSIGHT ENTERPRISES, INC.

- (1) We have entered into a separate indemnification agreement with each of the following directors and executive officers that differ only in names and dates: Richard E. Allen, Steven R. Andrews, Glynis A. Bryan, Timothy A. Crown, Steven W. Dodenhoff, Bennett Dorrance, Wolfgang Ebermann, Michael M. Fisher, Michael P. Guggemos, Larry A. Gunning, Anthony A. Ibargüen, Helen K. Johnson, Robertson C. Jones, Kenneth T. Lamneck, Dana A. Leighty and Kathleen S. Pushor. Pursuant to the instructions accompanying Item 601 of Regulation S-K, the Registrant is filing the form of such indemnification agreement.
- (2) Management contract or compensatory plan or arrangement.

CERTIFICATION

I, Kenneth T. Lamneck, certify that:

- 1. I have reviewed this Annual Report on Form 10-K of Insight Enterprises, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: February 21, 2014

- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5 The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 32.1

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Annual Report of Insight Enterprises, Inc. (the "Company") on Form 10-K for the period ended December 31, 2013 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), we, Kenneth T. Lamneck, Chief Executive Officer of the Company, and Glynis A. Bryan, Chief Financial Officer of the Company, certify, pursuant to 18 U.S.C. §1350, as adopted pursuant to §906 of the Sarbanes-Oxley Act of 2002, that to the best of our knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
