To our shareholders

2010 was a year of extraordinary growth for your company, as we achieved significant progress in our enduring goal of being a Pacific Northwest regional community bank. As we look toward the remainder of 2011 and beyond, we believe we are well positioned for the opportunities ahead.

We were pleased to report net income applicable to common shareholders of \$25.8 million for the year, or \$0.72 per diluted common share, compared to a net loss of \$8.4 million for 2009, or \$0.38 per diluted common share. Our assets are now approximately \$4.3 billion, and our geographic footprint has expanded from 52 to 85 branches, including 60 branches in the state of Washington and 25 in Oregon. Our total risk-based capital ratio at December 31, 2010 exceeded 24%, more than double the minimum of 10% required to be considered “well-capitalized” under regulatory standards. Value to our shareholders increased, as our stock price appreciated approximately 30% during the year. Bolstering our already strong capital ratios, we raised net proceeds of \$229 million through a public offering during the second quarter of 2010. We also repaid in full the funds we received in the fourth quarter of 2008 as part of our participation in the U.S. Treasury’s Capital Purchase Program, and retired the related warrants.

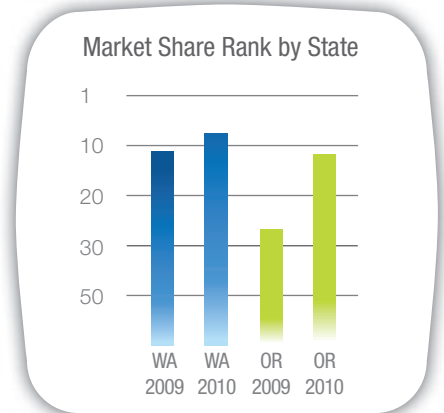

Our focus is on deploying this capital effectively; our capital position enhances our ability to consider strategic acquisitions and continue our focus on organic growth. When it makes strategic and financial sense for us, we will add experienced bankers and branch locations to help us penetrate markets in areas important to our growth.

We began 2010 with two FDIC-assisted transactions in January. The acquisitions of Columbia River Bank and American Marine Bank increased our assets by approximately 33% in less than two weeks. We made real strides in extending our geographic footprint as we moved into both eastern Oregon and eastern Washington for the first time, as well as the Olympic Peninsula in western Washington. The acquisitions are fully integrated, both technically and culturally, thanks to the combined efforts and enthusiasm of our nearly 300 new employees and our entire Columbia banking team.

During 2010, we also enhanced our presence, visibility and ability to serve customers in both new and legacy market areas in the Pacific Northwest through organic growth. In the second quarter, we opened the Fox Tower branch in downtown Portland and the Salem, Oregon branch near the end of the year. During the first quarter, 2011, we moved our Redmond, Washington office to a more convenient location, and opened our new branch in Everett, Washington, augmenting our loan production office, which opened last fall. We also invested in experienced teams of local bankers in both states in which we do business. While these strategic investments in buildings and people do add to our expenses, they put us in a stronger position to increase our revenue and market share.

The FDIC’s most recent deposit market share analysis shows that as of June 30, 2010, Columbia’s ranking rose to 9th from 11th in Washington State. We saw a significant increase in Oregon deposit market share, as we now rank 12th in the state, up from 27th place last year. In addition to our acquisitions, of course, these results reflect a higher share in our more traditional markets, as we took advantage of the disruption in the financial services industry by focusing externally, and continued to provide the exceptional level of customer service for which we are known.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, expectations and intentions that are not historical facts, and other statements identified by words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “should,” “projects,” “seeks,” “estimates” or words of similar meaning. These forward-looking statements are based on current beliefs and expectations of management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. In addition to the factors set forth in the sections titled “Risk Factors,” “Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this Form 10-K, the following factors, among others, could cause actual results to differ materially from the anticipated results:

- local and national economic conditions could be less favorable than expected or could have a more direct and pronounced effect on us than expected and adversely affect our ability to continue internal growth at historical rates and maintain the quality of our earning assets;
- the local housing/real estate market could continue to decline;
- the risks presented by a continued economic recession, which could adversely affect credit quality, collateral values, including real estate collateral, investment values, liquidity and loan originations and loan portfolio delinquency rates;
- the efficiencies and enhanced financial and operating performance we expect to realize from investments in personnel, acquisitions and infrastructure could not be realized;
- interest rate changes could significantly reduce net interest income and negatively affect funding sources;
- projected business increases following strategic expansion or opening of new branches could be lower than expected;
- changes in the scope and cost of FDIC insurance and other coverages;
- changes in accounting principles, policies, and guidelines applicable to bank holding companies and banking;
- competition among financial institutions could increase significantly;
- the goodwill we have recorded in connection with acquisitions could become impaired, which may have an adverse impact on our earnings and capital;
- the reputation of the financial services industry could deteriorate, which could adversely affect our ability to access markets for funding and to acquire and retain customers;
- the terms and costs of the numerous actions taken by the Federal Reserve, the U.S. Congress, the Treasury, the FDIC, the SEC and others in response to the liquidity and credit crisis, or the failure of these actions to help stabilize the financial markets, asset prices, market liquidity, or worsening of current financial market and economic conditions could materially and adversely affect our business, financial condition, results of operations, and the trading price of our common stock;
- our ability to effectively manage credit risk, interest rate risk, market risk, operational risk, legal risk, liquidity risk and regulatory and compliance risk; and
- our profitability measures could be adversely affected if we are unable to effectively deploy recently raised capital.

You should take into account that forward-looking statements speak only as of the date of this report. Given the described uncertainties and risks, we cannot guarantee our future performance or results of operations and you should not place undue reliance on these forward-looking statements. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required under federal securities laws.

PART I

ITEM 1. BUSINESS

General

Columbia Banking System, Inc. (referred to in this report as “we,” “our,” and “the Company”) is a registered bank holding company whose wholly owned banking subsidiary, Columbia State Bank (“Columbia Bank” or “the Bank”) also does business under the Bank of Astoria name and conducts full-service commercial banking business in the states of Washington and Oregon. Headquartered in Tacoma, Washington, we provide a full range of banking services to small and medium-sized businesses, professionals and individuals.

The Company was originally organized in 1988 under the name First Federal Corporation, which was later named Columbia Savings Bank. In 1990, an investor group acquired a controlling interest in the Company and a second corporation, Columbia National Bankshares, Inc. (“CNBI”), and CNBI’s sole banking subsidiary, Columbia National Bank. In 1993, the Company was reorganized to take advantage of commercial banking business opportunities in our principal market area. The opportunities to capture commercial banking market share were due to increased consolidations of banks, primarily through acquisitions by out-of-state holding companies, which created dislocation of customers. As part of the reorganization, CNBI was merged into the Company and Columbia National Bank was merged into the then newly chartered Columbia Bank. In 1994, Columbia Savings Bank was merged into Columbia Bank. We have grown from four branch offices at January 1, 1993 to 84 branch offices at December 31, 2010.

At December 31, 2010 Columbia Bank had 84 branch locations in Washington and Oregon. Included in these 84 branch locations are six Columbia Bank branches doing business under the Bank of Astoria name at the Bank of Astoria’s former branches located in Astoria, Warrenton, Seaside and Cannon Beach in Clatsop County and in Manzanita and Tillamook in Tillamook County. Substantially all of Columbia Bank’s loans, loan commitments and core deposits are within its service areas. Columbia Bank is a Washington state-chartered commercial bank, the deposits of which are insured in whole or in part by the Federal Deposit Insurance Corporation (“FDIC”). Columbia Bank is subject to regulation by the FDIC and the Washington State Department of Financial Institutions Division of Banks. Although Columbia Bank is not a member of the Federal Reserve System, the Board of Governors of the Federal Reserve System has certain supervisory authority over the Company, which can also affect Columbia Bank.

Recent Acquisitions

On January 22, 2010, Columbia State Bank acquired all of the deposits and certain assets of Columbia River Bank from the FDIC, which was appointed receiver of Columbia River Bank. Columbia State Bank acquired approximately \$912.9 million in assets and approximately \$893.4 million in deposits located in 21 branches in Oregon and Washington. Columbia River Bank’s loans and other real estate assets acquired of approximately \$696.1 million are subject to a loss-sharing agreement with the FDIC. The Company participated in a competitive bid process in which the accepted bid included a 1% deposit premium on non-brokered deposits and a negative bid of \$43.9 million on net assets acquired. The results of Columbia River Bank’s operations are included in those of Columbia Bank starting January 22, 2010.

On January 29, 2010 Columbia State Bank acquired substantially all of the deposits and assets of American Marine Bank from the FDIC, which was appointed receiver of American Marine Bank. Columbia State Bank acquired approximately \$307.8 million in assets and approximately \$254.0 million in deposits located in 11 branches on the western Puget Sound. American Marine Bank’s loans and other real estate assets acquired of approximately \$257.5 million are subject to a loss-sharing agreement with the FDIC. In addition, Columbia State Bank will continue to operate the Trust and Wealth Management Division of American Marine Bank. The Company participated in a competitive bid process in which the accepted bid included a 1% deposit premium on non-brokered deposits and a negative bid of \$23.0 million on net assets acquired. The results of American Marine Bank’s operations are included in those of Columbia Bank starting January 29, 2010.

On July 23, 2007, the Company completed its acquisition of Mountain Bank Holding Company (“Mt. Rainier”), the parent company of Mt. Rainier National Bank, Enumclaw, Washington. Mt. Rainier was merged into the Company and Mt. Rainier National Bank was merged into Columbia Bank doing business as Mt. Rainier Bank. The results of Mt. Rainier Bank’s operations are included in those of Columbia Bank starting on July 23, 2007. On October 1, 2009, branches doing business as Mt. Rainier Bank were renamed Columbia Bank.

On July 23, 2007, the Company completed its acquisition of Town Center Bancorp (“Town Center”), the parent company of Town Center Bank, Portland, Oregon. Town Center was merged into the Company and Town Center Bank was merged into Columbia Bank. The results of Town Center Bank’s operations are included in those of Columbia Bank starting on July 23, 2007.

Business Overview

Our goal is to be a leading Pacific Northwest regional community banking company while consistently increasing shareholder value. We continue to build on our reputation for excellent customer service in order to be recognized as the bank of choice for retail deposit customers, small to medium-sized businesses and affluent households in all markets we serve.

We have established a network of 84 branches in Washington and Oregon as of December 31, 2010 from which we intend to grow market share. We operate 53 branches in western Washington, 6 branches in eastern Washington, 15 branches in western Oregon, and 10 branches in eastern Oregon. Washington counties include: Benton, Clallam, Clark, Cowlitz, Franklin, Jefferson, King, Kitsap, Klickitat, Mason, Pierce, Thurston, Whatcom and Yakima. Oregon counties include Clackamas, Clatsop, Deschutes, Hood River, Jefferson, Marion, Multnomah, Tillamook, Umatilla, Wasco and Yamhill.

In order to fund our lending activities and to allow for increased contact with customers, we utilize a branch system to better serve both retail and business depositors. We believe this approach will enable us to expand lending activities while attracting a stable core deposit base. In order to support our strategy of market penetration and increased profitability while continuing our personalized banking approach, we have invested in experienced banking and administrative personnel and have incurred related costs in the creation of our branch network.

Business Strategy

Our business strategy is to provide our customers with the financial sophistication and product depth of a regional banking company while retaining the appeal and service level of a community bank. We continually evaluate our existing business processes while focusing on maintaining asset quality and balanced loan and deposit portfolios, building our strong core deposit base, expanding total revenue and controlling expenses in an effort to increase our return on average equity and gain operational efficiencies. We believe that, as a result of our strong commitment to highly personalized, relationship-oriented customer service, our varied products, our strategic branch locations and the long-standing community presence of our managers, banking officers and branch personnel, we are well positioned to attract and retain new customers and to increase our market share of loans, deposits, investments, and other financial services. We are committed to increasing market share in the communities we serve by continuing to leverage our existing branch network, adding new branch locations and considering business combinations that are consistent with our expansion strategy throughout the Pacific Northwest.

Products & Services

We place the highest priority on customer service and assist our customers in making informed decisions when selecting from the products and services we offer. We continuously review our product and service offerings to ensure that we provide our customers with the tools to meet their financial needs. A more complete listing of all the services and products available to our customers can be found on our website: www.columbiabank.com. Some of the core products and services we offer include:

<u>Personal Banking</u>	<u>Business Banking</u>
<ul style="list-style-type: none">• Checking and Saving Accounts• Online Banking• Electronic Bill Pay• Consumer Lending• Residential Lending• VISA® Card Services• Investment Services through CB Financial Services• Private Banking• Trust Services	<ul style="list-style-type: none">• Checking & Saving Accounts• Online Banking• Electronic Bill Pay• Remote Deposit Capture• Cash Management• Commercial & Industrial Lending • Real Estate and Real Estate Construction Lending• Equipment Finance• Small Business Services• VISA® Card Services• Investment Services through CB Financial Services• International Banking• Merchant Card Services• Professional Banking

Personal Banking: We offer our personal banking customers an assortment of account products including noninterest and interest-bearing checking, savings, money market and certificate of deposit accounts. Overdraft protection is also available with direct links to the customer's checking account. Our online banking service, Columbia Online™, provides our personal banking customers with the ability to safely and securely conduct their banking business 24 hours a day, 7 days a week. Personal banking customers are also provided with a variety of borrowing products including fixed and variable rate home equity loans and lines of credit, home mortgages for purchases and refinances, personal loans, and other consumer loans. Eligible personal banking customers with checking accounts are provided a Visa® Debit Card which can be used both to make purchases and as an ATM card. A variety of Visa® Credit Cards are also available to eligible personal banking customers.

Columbia Private Banking offers affluent clientele and their businesses complex financial solutions, such as deposit and cash management services, credit services, and wealth management strategies. Each private banker provides advisory services and coordinates a relationship team of experienced financial professionals to meet the unique needs of each discerning customer.

Through CB Financial Services⁽¹⁾, customers are provided with a full range of investment options including mutual funds, stocks, bonds, retirement accounts, annuities, tax-favored investments, US Government securities as well as long-term care and life insurance policies. Qualified investment professionals are available to provide advisory services⁽²⁾ and assist customers with retirement, education and other financial planning activities.

⁽¹⁾ Securities and insurance products are offered through primevest Financial Services, Inc., an independent, registered broker/dealer. Member FINRA/SIPC. CB Financial Services is a marketing name for primevest. * Investment products are Not FDIC insured * No bank guarantee * Not a deposit * Not insured by any federal government agency * May lose value.

⁽²⁾ Advisory services may only be offered by Investment Adviser Representatives in connection with an appropriate primevest Advisory Services Agreement and disclosure brochure as provided.

Business Banking: We offer our business banking customers the foundation of a variety of checking, savings, interest bearing money market and certificate of deposit accounts to satisfy all their banking needs. In addition to these core banking products we provide a breadth of services to support the complete financial needs of small and middle market businesses including Cash Management, Professional Banking, International Banking , VISA Credit Cards, Merchant Services and Commercial Lending.

Cash Management

Columbia State Bank's diversified Cash Management Programs are tailored to meet specific banking needs of each individual business. We combine technology with integrated operations and local expertise for safe, powerful, flexible solutions. Columbia customers, of all sizes, choose from a full range of transaction and Cash Management tools to gain more control over—and make more from—their money. Services include Commercial Online Banking, Postive Pay fraud protection, Automated Clearing House (ACH) payments, Remote Deposit Capture, and Merchant Services.

Our Cash Management professionals work with businesses to find the best combination of services to meet their needs. This customized, modular approach will ensures their business banking operations are cost-effective now, with flexibility for future growth.

Professional Banking

Columbia Professional Bankers are uniquely qualified to help medical and dental professionals acquire, build and grow their practice. We offer tailored banking and investment solutions⁽¹⁾ delivered by experienced bankers with the industry knowledge necessary to meet their business's unique needs. No matter what the needs are now or in the years to come, we guide professionals through all their financial options to make their banking as easy and personal as possible.

International Banking

Columbia Bank's International services division offers a range of financial services to help forward-thinking independent businesses explore global markets and conduct international trade smoothly and expediently. We're proud to provide small and mid-size business with the same caliber of expertise and personalized service that national banks usually limit to large businesses.

Our experience with foreign currency exchange, letters of credit, foreign collections and trade finance services can help independent companies open the door to new markets and suppliers overseas. Put simply, the wealth of opportunities that international trade offers growing businesses can have a significant impact on both long-term growth and their bottom line.

Commercial Lending

We offer a variety of loan products tailored to meet the various needs of business banking customers. Commercial loan products include accounts receivable and inventory financing as well as Small Business Administration (SBA) financing. We also offer commercial real estate loan products for construction and development or permanent financing. Real estate lending activities have been focused on construction and permanent loans for both owner occupants and investor oriented real estate properties. In addition, the Bank has pursued construction and first mortgages on owner occupied, one- to four-family residential properties. Commercial banking has been directed toward meeting the credit and related deposit needs of various sized businesses and professional practice organizations operating in our primary market areas.

⁽¹⁾ Securities and insurance products are offered through primevest Financial Services, Inc., an independent, registered broker/dealer. Member FINRA/SIPC. CB Financial Services is a marketing name for primevest. * Investment products are Not FDIC insured * No bank guarantee * Not a deposit * Not insured by any federal government agency * May lose value.

Business VISA® Credit and Debit Cards

We offer our business banking customers a selection of Visa® Cards including the Business Debit Card that works like a check wherever Visa® is accepted. We partner with First National Bank of Omaha to offer Visa® Credit Cards such as the Corporate Card which can be used all over the world as well as the Business Edition® and Business Edition Plus® that earns reward points with every purchase.

Merchant Card Services

Business clients that utilize Columbia's Merchant Card Services have the ability to accept Visa®, MasterCard® and Discover® sales drafts for deposit directly into their business checking account. Merchants are provided with a comprehensive accounting system tailored to meet each merchant's needs, which includes month-to-date credit card deposit information on a transaction statement. Internet access is available to view merchant reports that allow business customers to review merchant statements, authorized, captured, cleared and settled transactions.

CB Financial Services

Through CB Financial Services⁽¹⁾, customers are provided with an array of investment options and all the tools and resources necessary to assist them in reaching their investment goals. Some of the investment solutions available to customers include 401(k), Simple IRA, Simple Employee Pensions, Buy-Sell Agreements, Key-Man Insurance, Business Succession Planning and personal investments.

Competition

Our industry remains highly competitive in spite of challenging economic conditions. Several other financial institutions with greater resources compete for banking business in our market areas. Among the advantages of some of these institutions are their ability to make larger loans, finance extensive advertising and promotion campaigns, access international financial markets and allocate their investment assets to regions of highest yield and demand. In addition to competition from other banking institutions, we continue to experience competition from non-banking companies such as credit unions, brokerage houses and other financial services companies. We compete for deposits, loans, and other financial services by offering our customers similar breadth of products as our larger competitors while delivering a more personalized service level with faster transaction turnaround time.

⁽¹⁾ Securities and insurance products are offered through primevest Financial Services, Inc., an independent, registered broker/dealer. Member FINRA/SIPC. CB Financial Services is a marketing name for primevest. * Investment products are Not FDIC insured * No bank guarantee * Not a deposit * Not insured by any federal government agency * May lose value.

Market Areas

Washington: Approximately 40% of our total branches within Washington are located in Pierce County, with an estimated 2010 population of 814,600 residents. At June 30, 2010 our Pierce County branch locations' share of the county's total deposit market was 18%⁽¹⁾, ranking first among our competition, and an increase from 16% in 2009. Also located in Pierce County is our Company headquarters in the city of Tacoma and one nearby operational facility. Some of the most significant contributors to the Pierce County economy are the Port of Tacoma, whose activities are related to more than 43,000 jobs in the county, and well over 100,000 in the state of Washington, Joint Base Lewis-McChord which accounts for nearly 20% of the County's total employment, and the manufacturing industry which supplies the Boeing Company.

We operate twelve branch locations in King County, including Seattle, Bellevue and Redmond. King County, which is Washington's most highly populated county at close to 2 million residents, is a market that has significant growth potential for our Company and will play a key role in our expansion strategy in the future. At June 30, 2010 our share of the King County deposit market was approximately 1%⁽¹⁾; however, we have made inroads within this market through the acquisition of American Marine Bank and the strategic expansion of our banking team. The north King County economy is primarily made up of the aerospace, construction, computer software and biotechnology industries. South King County with its close proximity to Pierce County is considered a natural extension of our primary market area. The economy of south King County is primarily comprised of residential communities supported by light industrial, retail, aerospace and distributing and warehousing industries.

Some other market areas served by the Company include Cowlitz County where we operate two branch locations that account for 9%⁽¹⁾ of the deposit market share, and Kitsap County, where we operate 6 branches with 8% of the deposit market share. We also have locations in Clallam, Clark, Klickitat, Thurston and Yakima counties where we operate two branch offices in each county, and Benton, Franklin, Jefferson, Mason and Whatcom Counties where we operate one branch in each county.

Oregon: With the acquisition of Columbia River Bank in January, 2010, we significantly expanded our market area in western Oregon, and entered the eastern Oregon market area, bringing our total to 25 branch locations in the state. Oregon counties include Clackamas, Clatsop, Deschutes, Hood River, Jefferson, Marion, Multnomah, Tillamook, Umatilla, Wasco and Yamhill. Columbia ranks twelfth in total deposit market share in Oregon, up from 27th place the prior year. We are first in deposit market share in Hood River, Jefferson, and Wasco counties, and second or 28%⁽¹⁾ of the deposit market share in Clatsop county. Oregon market areas provide a significant opportunity for expansion in the future

Employees

As of December 31, 2010 the Company and its banking subsidiary employed approximately 1,092 full-time equivalent employees, significantly up from the 715 at December 31, 2009. We value our employees and pride ourselves on providing a professional work environment accompanied by comprehensive benefit programs. We are committed to providing flexible and value-added benefits to our employees through a "Total Compensation Philosophy" which incorporates all compensation and benefits. Our continued commitment to employees contributed to Columbia Bank being awarded second place in the large employer category by *Seattle Business Magazine's* 100 Best Companies to Work For 2010 and designated one of the *Puget Sound Business Journal's* "Washington's Best Workplaces 2010".

Available Information

We file annual reports on Form 10-K, quarterly reports on Form 10-Q, periodic reports on Form 8-K, proxy statements and other information with the United States Securities and Exchange Commission ("SEC"). The public may obtain copies of these reports and any amendments at the SEC's Internet site, www.sec.gov.

⁽¹⁾ Source: FDIC Annual Summary of Deposit Report as of June 30, 2010.

Additionally, reports filed with the SEC can be obtained through our website at www.columbiabank.com. These reports are available through our website as soon as reasonably practicable after they are filed electronically with the SEC. Information contained on our website is not intended to be incorporated by reference into this report.

Supervision and Regulation

General

The following discussion provides an overview of certain elements of the extensive regulatory framework applicable to the Company and Columbia State Bank, which operates under the names Columbia State Bank in Washington, and Columbia State Bank and Bank of Astoria in Oregon (collectively, referred to herein as “Columbia Bank”). This regulatory framework is primarily designed for the protection of depositors, federal deposit insurance funds and the banking system as a whole, rather than specifically for the protection of shareholders. Due to the breadth and growth of this regulatory framework, our costs of compliance continue to increase in order to monitor and satisfy these requirements.

To the extent that this section describes statutory and regulatory provisions, it is qualified by reference to those provisions. These statutes and regulations, as well as related policies, are subject to change by Congress, state legislatures and federal and state regulators. Changes in statutes, regulations or regulatory policies applicable to us, including the interpretation or implementation thereof, could have a material effect on our business or operations. Recently, in light of the recent financial crisis, numerous proposals to modify or expand banking regulation have surfaced. Based on past history, if any are approved, they will add to the complexity and cost of our business.

Federal Bank Holding Company Regulation

General. The Company is a bank holding company as defined in the Bank Holding Company Act of 1956, as amended (“BHCA”), and is therefore subject to regulation, supervision and examination by the Federal Reserve. In general, the BHCA limits the business of bank holding companies to owning or controlling banks and engaging in other activities closely related to banking. The Company must file reports with and provide the Federal Reserve such additional information as it may require. Under the Financial Services Modernization Act of 1999, a bank holding company may apply to the Federal Reserve to become a financial holding company, and thereby engage (directly or through a subsidiary) in certain expanded activities deemed financial in nature, such as securities brokerage and insurance underwriting.

Holding Company Bank Ownership. The BHCA requires every bank holding company to obtain the prior approval of the Federal Reserve before (i) acquiring, directly or indirectly, ownership or control of any voting shares of another bank or bank holding company if, after such acquisition, it would own or control more than 5% of such shares; (ii) acquiring all or substantially all of the assets of another bank or bank holding company; or (iii) merging or consolidating with another bank holding company.

Holding Company Control of Nonbanks. With some exceptions, the BHCA also prohibits a bank holding company from acquiring or retaining direct or indirect ownership or control of more than 5% of the voting shares of any company which is not a bank or bank holding company, or from engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or providing services for its subsidiaries. The principal exceptions to these prohibitions involve certain non-bank activities that, by statute or by Federal Reserve regulation or order, have been identified as activities closely related to the business of banking or of managing or controlling banks.

Transactions with Affiliates. Subsidiary banks of a bank holding company are subject to restrictions imposed by the Federal Reserve Act on extensions of credit to the holding company or its subsidiaries, on investments in their securities and on the use of their securities as collateral for loans to any borrower. These regulations and restrictions may limit the Company’s ability to obtain funds from Columbia Bank for its cash needs, including funds for payment of dividends, interest and operational expenses.

Tying Arrangements. We are prohibited from engaging in certain tie-in arrangements in connection with any extension of credit, sale or lease of property or furnishing of services. For example, with certain exceptions, neither the Company nor its subsidiaries may condition an extension of credit to a customer on either (i) a requirement that the customer obtain additional services provided by us; or (ii) an agreement by the customer to refrain from obtaining other services from a competitor.

Support of Subsidiary Bank. Under Federal Reserve policy, the Company is expected to act as a source of financial and managerial strength to Columbia Bank. This means that the Company is required to commit, as necessary, resources to support Columbia Bank. Any capital loans a bank holding company makes to its subsidiary banks are subordinate to deposits and to certain other indebtedness of those subsidiary banks.

State Law Restrictions. As a Washington corporation, the Company is subject to certain limitations and restrictions under applicable Washington corporate law. For example, state law restrictions in Washington include limitations and restrictions relating to indemnification of directors, distributions to shareholders, transactions involving directors, officers or interested shareholders, maintenance of books, records, and minutes, and observance of certain corporate formalities.

Federal and State Regulation of Columbia Bank

General. The deposits of Columbia Bank, a Washington chartered commercial bank with branches in Washington and Oregon, are insured by the FDIC. As a result, Columbia Bank is subject to supervision and regulation by the Washington Department of Financial Institutions, Division of Banks and the FDIC. With respect to branches of Columbia Bank in Oregon, the Bank is also subject to supervision and regulation by the Oregon Department of Consumer and Business Services, as well as the FDIC. These agencies have the authority to prohibit banks from engaging in what they believe constitute unsafe or unsound banking practices.

Community Reinvestment. The Community Reinvestment Act of 1977 requires that, in connection with examinations of financial institutions within their jurisdiction, the Federal Reserve or the FDIC evaluate the record of the financial institution in meeting the credit needs of its local communities, including low and moderate-income neighborhoods, consistent with the safe and sound operation of the institution. A bank's community reinvestment record is also considered by the applicable banking agencies in evaluating mergers, acquisitions and applications to open a branch or facility.

Insider Credit Transactions. Banks are also subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to executive officers, directors, principal shareholders or any related interests of such persons. Extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, and follow credit underwriting procedures that are at least as stringent as those prevailing at the time for comparable transactions with persons not covered above and who are not employees; and (ii) must not involve more than the normal risk of repayment or present other unfavorable features. Banks are also subject to certain lending limits and restrictions on overdrafts to insiders. A violation of these restrictions may result in the assessment of substantial civil monetary penalties, the imposition of a cease and desist order, and other regulatory sanctions.

Regulation of Management. Federal law (i) sets forth circumstances under which officers or directors of a bank may be removed by the institution's federal supervisory agency; (ii) places restraints on lending by a bank to its executive officers, directors, principal shareholders, and their related interests; and (iii) prohibits management personnel of a bank from serving as a director or in other management positions of another financial institution whose assets exceed a specified amount or which has an office within a specified geographic area.

Safety and Soundness Standards. Federal law imposes certain non-capital safety and soundness standards upon banks. These standards cover internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, such other operational and managerial standards as the agency determines to be appropriate, and standards for asset

quality, earnings and stock valuation. An institution that fails to meet these standards must develop a plan acceptable to its regulators, specifying the steps that the institution will take to meet the standards. Failure to submit or implement such a plan may subject the institution to regulatory sanctions.

Interstate Banking and Branching

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (“Interstate Act”) relaxed prior interstate branching restrictions under federal law by permitting nationwide interstate banking and branching under certain circumstances. Generally, bank holding companies may purchase banks in any state, and states may not prohibit these purchases. The Interstate Act requires regulators to consult with community organizations before permitting an interstate institution to close a branch in a low-income area. Federal banking agency regulations prohibit banks from using their interstate branches primarily for deposit production and the federal banking agencies have implemented a loan-to-deposit ratio screen to ensure compliance with this prohibition. As a result of the Dodd-Frank Act, prior restrictions on de novo branching by out of state banks have been removed. The Dodd-Frank Act generally permits all banks to branch into other states by opening a new branch or purchasing a branch from another financial institution, to the extent that banks chartered under the state in which the new branch is located can do so. In the past, the Interstate Act barred all financial institutions, except for thrifts, from branching into other states unless they purchased or merged with a bank located in the other state.

Dividends

The principal source of the Company’s cash is from dividends received from Columbia Bank, which are subject to government regulation and limitations. Regulatory authorities may prohibit banks and bank holding companies from paying dividends in a manner that would constitute an unsafe or unsound banking practice or would reduce the amount of its capital below that necessary to meet minimum applicable regulatory capital requirements. Washington law also limits a bank’s ability to pay dividends that are greater than the bank’s retained earnings without approval of the applicable banking agency. Additionally, current guidance from the Federal Reserve provides, among other things, that dividends per share on the Company’s common stock generally should not exceed earnings per share, measured over the previous four fiscal quarters.

Capital Adequacy

Regulatory Capital Guidelines. Federal bank regulatory agencies use capital adequacy guidelines in the examination and regulation of bank holding companies and banks. The guidelines are “risk-based,” meaning that they are designed to make capital requirements more sensitive to differences in risk profiles among banks and bank holding companies.

Tier I and Tier II Capital. Under the guidelines, an institution’s capital is divided into two broad categories, Tier I capital and Tier II capital. Tier I capital generally consists of common stockholders’ equity, surplus and undivided profits. Tier II capital generally consists of the allowance for loan losses, hybrid capital instruments and subordinated debt. The sum of Tier I capital and Tier II capital represents an institution’s total capital. The guidelines require that at least 50% of an institution’s total capital consist of Tier I capital.

Risk-based Capital Ratios. The adequacy of an institution’s capital is gauged primarily with reference to the institution’s risk-weighted assets. The guidelines assign risk weightings to an institution’s assets in an effort to quantify the relative risk of each asset and to determine the minimum capital required to support that risk. An institution’s risk-weighted assets are then compared with its Tier I capital and total capital to arrive at a Tier I risk-based ratio and a total risk-based ratio, respectively. The guidelines provide that an institution must have a minimum Tier I risk-based ratio of 4% and a minimum total risk-based ratio of 8%.

Leverage Ratio. The guidelines also employ a leverage ratio, which is Tier I capital as a percentage of average total assets, less intangibles. The principal objective of the leverage ratio is to constrain the maximum

degree to which a bank holding company may leverage its equity capital base. The minimum leverage ratio is 3%; however, for all but the most highly rated bank holding companies and for bank holding companies seeking to expand, regulators expect an additional cushion of at least 1% to 2%.

Prompt Corrective Action. Under the guidelines, an institution is assigned to one of five capital categories depending on its total risk-based capital ratio, Tier I risk-based capital ratio, and leverage ratio, together with certain subjective factors. The categories range from “well capitalized” to “critically undercapitalized.” Institutions that are “undercapitalized” or lower are subject to certain mandatory supervisory corrective actions. At each successively lower capital category, an insured bank is subject to increased restrictions on its operations. During these challenging economic times, the federal banking regulators have actively enforced these provisions.

Regulatory Oversight and Examination

The Federal Reserve conducts periodic inspections of bank holding companies, which are performed both onsite and offsite. The supervisory objectives of the inspection program are to ascertain whether the financial strength of the bank holding company is being maintained on an ongoing basis and to determine the effects or consequences of transactions between a holding company or its non-banking subsidiaries and its subsidiary banks. For holding companies under \$10 billion in assets, the inspection type and frequency varies depending on asset size, complexity of the organization, and the holding company’s rating at its last inspection.

Banks are subject to periodic examinations by their primary regulators. Bank examinations have evolved from reliance on transaction testing in assessing a bank’s condition to a risk-focused approach. These examinations are extensive and cover the entire breadth of operations of the bank. Generally, safety and soundness examinations occur on an 18-month cycle for banks under \$500 million in total assets that are well capitalized and without regulatory issues, and 12-months otherwise. Examinations alternate between the federal and state bank regulatory agency or may occur on a combined schedule. The frequency of consumer compliance and CRA examinations is linked to the size of the institution and its compliance and CRA ratings at its most recent examinations. However, the examination authority of the Federal Reserve and the FDIC allows them to examine supervised banks as frequently as deemed necessary based on the condition of the bank or as a result of certain triggering events.

Corporate Governance and Accounting

Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act of 2002 (the “Act”) addresses among other things, corporate governance, auditing and accounting, enhanced and timely disclosure of corporate information, and penalties for non-compliance. Generally, the Act (i) requires chief executive officers and chief financial officers to certify to the accuracy of periodic reports filed with the Securities and Exchange Commission (the “SEC”); (ii) imposes specific and enhanced corporate disclosure requirements; (iii) accelerates the time frame for reporting of insider transactions and periodic disclosures by public companies; (iv) requires companies to adopt and disclose information about corporate governance practices, including whether or not they have adopted a code of ethics for senior financial officers and whether the audit committee includes at least one “audit committee financial expert;” and (v) requires the SEC, based on certain enumerated factors, to regularly and systematically review corporate filings.

Anti-terrorism

USA Patriot Act of 2001. The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, intended to combat terrorism, was renewed with certain amendments in 2006 (the “Patriot Act”). Certain provisions of the Patriot Act were made permanent and other sections were made subject to extended “sunset” provisions. The Patriot Act, in relevant part, (i) prohibits banks from providing correspondent accounts directly to foreign shell banks; (ii) imposes due diligence requirements on banks opening or holding accounts for foreign financial institutions or wealthy foreign individuals; (iii) requires financial institutions to establish an anti-money-laundering compliance program; and

(iv) eliminates civil liability for persons who file suspicious activity reports. The Act also includes provisions providing the government with power to investigate terrorism, including expanded government access to bank account records.

Financial Services Modernization

Gramm-Leach-Bliley Act of 1999. The Gramm-Leach-Bliley Financial Services Modernization Act of 1999 brought about significant changes to the laws affecting banks and bank holding companies. Generally, the Act (i) repeals historical restrictions on preventing banks from affiliating with securities firms; (ii) provides a uniform framework for the activities of banks, savings institutions and their holding companies; (iii) broadens the activities that may be conducted by national banks and banking subsidiaries of bank holding companies; (iv) provides an enhanced framework for protecting the privacy of consumer information and requires notification to consumers of bank privacy policies; and (v) addresses a variety of other legal and regulatory issues affecting both day-to-day operations and long-term activities of financial institutions. Bank holding companies that qualify and elect to become financial holding companies can engage in a wider variety of financial activities than permitted under previous law, particularly with respect to insurance and securities underwriting activities.

The Emergency Economic Stabilization Act of 2008

Emergency Economic Stabilization Act of 2008. In response to market turmoil and financial crises affecting the overall banking system and financial markets in the United States, the Emergency Economic Stabilization Act of 2008 (“EESA”) was enacted on October 3, 2008. EESA provides the United States Department of the Treasury (the “Treasury”) with broad authority to implement certain actions intended to help restore stability and liquidity to the U.S. financial markets.

Troubled Asset Relief Program. Under the EESA, the Treasury has authority, among other things, to purchase up to \$700 billion in mortgage loans, mortgage-related securities and certain other financial instruments, including debt and equity securities issued by financial institutions pursuant to the Troubled Asset Relief Program (“TARP”). The purpose of TARP is to restore confidence and stability to the U.S. banking system and to encourage financial institutions to increase lending to customers and to each other. Pursuant to the EESA, the Treasury was initially authorized to use \$350 billion for TARP. Of this amount, the Treasury allocated \$250 billion to the TARP Capital Purchase Program (“CPP”), which funds were used to purchase preferred stock from qualifying financial institutions. The Company applied for and received approximately \$76 million in the CPP. Due to its capital position, on August 11, 2010, the Company redeemed all of its 76,898 outstanding shares of preferred stock, originally issued to the Treasury for a total redemption price of \$77.8 million, consisting of \$76.9 million in principal and \$918,504 in accrued and unpaid dividends. On September 1, 2010, the Company repurchased the common stock warrant issued to the Treasury for \$3.3 million. The warrant repurchase, together with the Company’s redemption in August 2010 of the entire amount of the preferred stock, represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the Treasury.

Temporary Liquidity Guarantee Program. Another program established pursuant to the EESA is the Temporary Liquidity Guarantee Program (“TLGP”), which (i) removed the limit on FDIC deposit insurance coverage for non-interest bearing transaction accounts through December 31, 2009, and (ii) provided FDIC backing for certain types of senior unsecured debt issued from October 14, 2008 through June 30, 2009. The end-date for issuing senior unsecured debt was later extended to October 31, 2009 and the FDIC also extended the Transaction Account Guarantee portion of the TLGP through December 31, 2010. Financial institutions that did not opt out of unlimited coverage for non-interest bearing accounts were initially charged an annualized 10 basis points on individual account balances exceeding \$250,000, and those issuing FDIC-backed senior unsecured debt were initially charged an annualized 75 basis points on all such debt, although those rates were subsequently increased. We elected to fully participate in both parts of the TLGP.

Deposit Insurance

The Bank's deposits are insured under the Federal Deposit Insurance Act, up to the maximum applicable limits and are subject to deposit insurance assessments designed to tie what banks pay for deposit insurance more closely to the risks they pose. The Bank has prepaid its quarterly deposit insurance assessments for 2011 and 2012 pursuant to applicable FDIC regulations, but the passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in July 2010 required the FDIC to amend its regulations to redefine the assessment base used for calculating deposit insurance assessments. As a result, in February 2011, the FDIC approved new rules to, among other things, change the assessment base from one based on domestic deposits (as it has been since 1935) to one based on assets (average consolidated total assets minus average tangible equity). Since the new assessment base is larger than the base used under prior regulations, the rules also lower assessment rates, so that the total amount of revenue collected by the FDIC from the industry is not significantly altered. The rule also revises the deposit insurance assessment system for large financial institutions, defined as institutions with at least \$10 billion in assets. The rules revise the assessment rate schedule, effective April 1, 2011, and adopt additional rate schedules that will go into effect when the Deposit Insurance Fund reserve ratio reaches various milestones.

Insurance of Deposit Accounts. The EESA included a provision for a temporary increase from \$100,000 to \$250,000 per depositor in deposit insurance effective October 3, 2008 through December 31, 2010. On May 20, 2009, the temporary increase was extended through December 31, 2013. The Dodd-Frank Act permanently raises the current standard maximum deposit insurance amount to \$250,000. The FDIC insurance coverage limit applies per depositor, per insured depository institution for each account ownership category. EESA also temporarily raised the limit on federal deposit insurance coverage to an unlimited amount for non-interest or low-interest bearing demand deposits. Pursuant to the Dodd-Frank Act, unlimited coverage for non-interest transaction accounts will continue upon expiration of the TLGP until December 31, 2012.

Recent Legislation

Dodd-Frank Wall Street Reform and Consumer Protection Act. As a result of the recent financial crises, on July 21, 2010 the Dodd-Frank Act was signed into law. The Dodd-Frank Act is expected to have a broad impact on the financial services industry, including significant regulatory and compliance changes and changes to corporate governance matters affecting public companies. Many of the requirements called for in the Dodd-Frank Act will be implemented over time and most will be subject to implementing regulations over the course of several years. Among other things, the legislation (i) centralizes responsibility for consumer financial protection by creating a new agency responsible for implementing, examining and enforcing compliance with federal consumer financial laws; (ii) applies the same leverage and risk-based capital requirements that apply to insured depository institutions to bank holding companies; (iii) requires the FDIC to seek to make its capital requirements for banks countercyclical so that the amount of capital required to be maintained increases in times of economic expansion and decreases in times of economic contraction; (iv) changes the assessment base for federal deposit insurance from the amount of insured deposits to consolidated assets less tangible capital; (v) requires the SEC to complete studies and develop rules or approve stock exchange rules regarding various investor protection issues, including shareholder access to the proxy process, and various matters pertaining to executive compensation and compensation committee oversight; (vi) makes permanent the \$250,000 limit for federal deposit insurance and provides unlimited federal deposit insurance until December 31, 2012, for non-interest bearing transaction accounts; (vii) removes prior restrictions on interstate de novo branching; and (viii) repeals the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts. Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company, the Bank and the financial services industry more generally. However, based on past experience with new legislation, it can be anticipated that the Dodd-Frank Act, directly and indirectly, will impact the business of the Company and the Bank and increase compliance costs.

American Recovery and Reinvestment Act of 2009. On February 17, 2009 the American Recovery and Reinvestment Act of 2009 (“ARRA”) was signed into law. ARRA is intended to help stimulate the economy through a combination of tax cuts and spending provisions applicable to a broad range of areas with an estimated cost of about \$780 billion. The impact that ARRA may have on the US economy, the Company and the Bank cannot be predicted with certainty.

Overdrafts. On November 17, 2009, the Board of Governors of the Federal Reserve System promulgated the Electronic Fund Transfer rule with an effective date of January 19, 2010 and a mandatory compliance date of July 1, 2010. The rule, which applies to all FDIC-regulated institutions, prohibits financial institutions from assessing an overdraft fee for paying automated teller machine (ATM) and one-time point-of-sale debit card transactions, unless the customer affirmatively opts in to the overdraft service for those types of transactions. The opt-in provision establishes requirements for clear disclosure of fees and terms of overdraft services for ATM and one-time debit card transactions. Since a percentage of the Company’s service charges on deposits are in the form of overdraft fees on point-of-sale transactions, this could have an adverse impact on our non-interest income.

Proposed Legislation

Proposed legislation is introduced in almost every legislative session. Certain of such legislation could dramatically affect the regulation of the banking industry. We cannot predict if any such legislation will be adopted or if it is adopted how it would affect the business of Columbia Bank or the Company. Past history has demonstrated that new legislation or changes to existing laws or regulations usually results in a greater compliance burden and therefore generally increases the cost of doing business.

Effects of Government Monetary Policy

Our earnings and growth are affected not only by general economic conditions, but also by the fiscal and monetary policies of the federal government, particularly the Federal Reserve. The Federal Reserve implements national monetary policy for such purposes as curbing inflation and combating recession, but its open market operations in U.S. government securities, control of the discount rate applicable to borrowings from the Federal Reserve, and establishment of reserve requirements against certain deposits, influence the growth of bank loans, investments and deposits, and also affect interest rates charged on loans or paid on deposits. The nature and impact of future changes in monetary policies and their impact on us cannot be predicted with certainty.

ITEM 1A. RISK FACTORS

Our business exposes us to certain risks. The following is a discussion of what we currently believe are the most significant risks and uncertainties that may affect our business, financial condition and future results.

A slow or fragile economic recovery could adversely affect our future results of operations or market price of our stock.

The national economy and the financial services sector in particular are currently facing challenges of a scope unprecedented in recent history. We cannot accurately predict how quickly the economy will recover from the recent recession, which has adversely impacted the markets we serve. The U.S. economy has also experienced substantial volatility in the financial markets. Any further deterioration in the economies of the nation as a whole or in our markets would have an adverse effect, which could be material, on our business, financial condition, results of operations and prospects, and could also cause the market price of our stock to decline. While it is impossible to predict how long adverse economic conditions may exist, a slow or fragile recovery could continue to present risks for some time for the industry and our company.

Economic conditions in the market areas we serve may continue to adversely impact our earnings and could increase our credit risk associated with our loan portfolio and the value of our investment portfolio.

Substantially all of our loans are to businesses and individuals in Washington and Oregon, and a continuing decline in the economies of these market areas could have a material adverse effect on our business, financial condition, results of operations and prospects. There has been a decline in housing prices and unemployment is a continued concern in both Washington and Oregon. A further deterioration in the market areas we serve could result in the following consequences, any of which could have an adverse impact, which could be material, on our business, financial condition, results of operations and prospects:

- commercial and consumer loan delinquencies may increase;
- problem assets and foreclosures may increase;
- collateral for loans made may decline further in value, in turn reducing customers' borrowing power, reducing the value of assets and collateral associated with existing loans;
- certain securities within our investment portfolio could become other than temporarily impaired, requiring a write-down through earnings to fair value, thereby reducing equity;
- low cost or non-interest bearing deposits may decrease; and
- demand for our loan and other products and services may decrease.

Our loan portfolio mix, which has a concentration of loans secured by real estate, could result in increased credit risk in a challenging economy.

Our loan portfolio is concentrated in commercial real estate and commercial business loans. These types of loans, as well as real estate construction loans and land development loans, acquisition and development loans related to the for-sale housing industry, generally are viewed as having more risk of default than residential real estate loans or certain other types of loans or investments. In fact, the FDIC has issued pronouncements alerting banks of its concern about heavy loan concentrations. Because our loan portfolio contains a significant number of construction, commercial business and commercial real estate loans with relatively large balances, the deterioration of one or a few of these loans may cause a significant increase in our non-performing loans. An increase in non-performing loans could result in a loss of earnings from these loans, an increase in the provision for loan losses, or an increase in loan charge-offs, which could have an adverse impact on our results of operations and financial condition.

A further downturn in the economies or real estate values in the markets we serve could have a material adverse effect on both borrowers' ability to repay their loans and the value of the real property securing such loans. Our ability to recover on defaulted loans would then be diminished, and we would be more likely to suffer losses on defaulted loans.

Our Allowance for Loan and Lease Losses ("ALLL") may not be adequate to cover future loan losses, which could continue to adversely affect earnings.

We maintain an ALLL in an amount that we believe is adequate to provide for losses inherent in our portfolio. While we strive to carefully monitor credit quality and to identify loans that may become non-performing, at any time there are loans in the portfolio that could result in losses, but that have not been identified as non-performing or potential problem loans. We cannot be sure that we will be able to identify deteriorating loans before they become non-performing assets, or that we will be able to limit losses on those loans that have been identified. Additionally, the process for determining the ALLL requires different, subjective and complex judgments about the future impact from current economic conditions that might impair the ability of borrowers to repay their loans. As a result, future significant increases to the ALLL may be necessary. Additionally, future increases to the ALLL may be required based on changes in the composition of the loans comprising the portfolio, deteriorating values in underlying collateral (most of which consists of real estate) and

changes in the financial condition of borrowers, such as may result from changes in economic conditions, or as a result of incorrect assumptions by management in determining the ALLL. Additionally, banking regulators, as an integral part of their supervisory function, periodically review our ALLL. These regulatory agencies may require us to increase the ALLL which could have a negative effect on our financial condition and results of operation. Any increase in the ALLL would have an adverse effect, which could be material, on our financial condition and results of operations.

Nonperforming assets take significant time to resolve and adversely affect our results of operations and financial condition.

Our nonperforming assets adversely affect our net income in various ways. Until economic and market conditions improve, we expect to continue to incur additional losses relating to elevated levels of nonperforming loans. We do not record interest income on non-accrual loans, thereby adversely affecting our income, and increasing loan administration costs. When we receive collateral through foreclosures and similar proceedings, we are required to mark the related loan to the then fair market value of the collateral if the collateral less selling costs is lower than the carrying amount of the related loan, which may result in a loss. An increase in the level of nonperforming assets also increases our risk profile and may impact the capital levels our regulators believe is appropriate in light of such risks. We utilize various techniques such as loan sales, workouts, and restructurings to manage our problem assets. Decreases in the value of these problem assets, the underlying collateral, or in the borrowers' performance or financial condition, could adversely affect our business, results of operations and financial condition. In addition, the resolution of nonperforming assets requires significant commitments of time from management and staff, which can be detrimental to performance of their other responsibilities. There can be no assurance that we will not experience further increases in nonperforming loans in the future.

Our acquisitions and the integration of acquired businesses may not result in all of the benefits anticipated, and future acquisitions may be dilutive to current shareholders.

We have in the past and may in the future seek to grow our business by acquiring other businesses. There can be no assurance that our acquisitions will have the anticipated positive results, including results relating to: correctly assessing the asset quality of the assets being acquired; the total cost of integration including management attention and resources; the time required to complete the integration successfully; the amount of longer-term cost savings; being able to profitably deploy funds acquired in an acquisition; or the overall performance of the combined entity.

We also may encounter difficulties in obtaining required regulatory approvals and unexpected contingent liabilities can arise from the businesses we acquire. Integration of an acquired business can be complex and costly, sometimes including combining relevant accounting and data processing systems and management controls, as well as managing relevant relationships with employees, clients, suppliers and other business partners. Integration efforts could divert management attention and resources, which could adversely affect our operations or results.

Given the continued market volatility and uncertainty, notwithstanding our loss-sharing arrangements with the FDIC, we may continue to experience increased credit costs or need to take additional markdowns and allowances for loan losses on the assets and loans acquired that could adversely affect our financial condition and results of operations in the future. We may also experience difficulties in complying with the technical requirements of our loss-sharing agreements with the FDIC, which could result in some assets which we acquire in FDIC-assisted transactions losing their coverage under such agreements. There is no assurance that as our integration efforts continue in connection with these transactions, other unanticipated costs, including the diversion of personnel, or losses, will not be incurred.

Acquisitions may also result in business disruptions that cause us to lose customers or cause customers to remove their accounts from us and move their business to competing financial institutions. It is possible that the

integration process related to acquisitions could result in the disruption of our ongoing businesses or inconsistencies in standards, controls, procedures and policies that could adversely affect our ability to maintain relationships with clients, customers, depositors and employees. The loss of key employees in connection with an acquisition could adversely affect our ability to successfully conduct our business.

We may engage in future acquisitions involving the issuance of additional common stock and/or cash. Any such acquisitions and related issuances of stock may have a dilutive effect on earnings per share and the percentage ownership of current shareholders. The use of cash as consideration in any such acquisitions could impact our capital position and may require us to raise additional capital.

Furthermore, notwithstanding our recent acquisitions, we cannot provide any assurance as to the extent to which we can continue to grow through acquisitions as this will depend on the availability of prospective target opportunities at valuations we find attractive and the competition for such opportunities from other parties.

Our decisions regarding the fair value of assets acquired, including the FDIC loss-sharing assets, could be inaccurate which could materially and adversely affect our business, financial condition, results of operations, and future prospects.

Management makes various assumptions and judgments about the collectability of the acquired loans, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of secured loans. In FDIC-assisted acquisitions that include loss-sharing agreements, we may record a loss-sharing asset that we consider adequate to absorb the indemnified portion of future losses which may occur in the acquired loan portfolio. The FDIC loss-sharing asset is accounted for on the same basis as the related acquired loans and OREO and primarily represents the present value of the cash flows the Company expects to collect from the FDIC under the loss-sharing agreements.

If our assumptions are incorrect, significant earnings volatility can occur and the balance of the FDIC loss-sharing asset may at any time be insufficient to cover future loan losses, and credit loss provisions may be needed to respond to different economic conditions or adverse developments in the acquired loan portfolio. Any increase in future loan losses could have a negative effect on our operating results.

FDIC-assisted acquisition opportunities may not become available and increased competition may make it more difficult for us to successfully bid on failed bank transactions.

A part of our near-term business strategy is to pursue failing banks that the FDIC plans to place in receivership. The FDIC may not place banks that meet our strategic objectives into receivership. Failed bank transactions are attractive opportunities in part because of loss-sharing arrangements with the FDIC that limit the acquirer's downside risk on the purchased loan portfolio and, apart from our assumption of deposit liabilities, we have significant discretion as to the non-deposit liabilities that we assume in such transactions. In addition, assets purchased from the FDIC are marked to their fair value and in many cases there is little or no addition to goodwill arising from an FDIC-assisted transaction. The bidding process for failing banks could become very competitive and the FDIC does not provide information about bids until after the failing bank has been closed. We may not be able to match or beat the bids of other acquirers unless we bid aggressively by increasing the premium paid on assumed deposits or reducing the discount bid on assets purchased, which could make the acquisition less attractive to us.

Our profitability measures could be adversely affected if we are unable to effectively deploy recently raised capital.

We may use the net proceeds of our capital raise completed in May 2010 for selective acquisitions that meet our disciplined acquisition criteria, to fund internal growth, or for general corporate purposes. Although we are periodically engaged in discussions with potential acquisition candidates, we are not currently a party to any purchase or merger agreement. There can be no assurance that we will be able to negotiate future acquisitions on terms acceptable to us. Investing the proceeds of our recent offering in securities until we are able to deploy the

proceeds would provide lower margins than we generally earn on loans, potentially adversely impacting shareholder returns, including earnings per share, net interest margin, return on assets and return on equity.

If the goodwill we have recorded in connection with acquisitions becomes impaired, it could have an adverse impact on our earnings and capital.

Accounting standards require that we account for acquisitions using the acquisition method of accounting. Under acquisition accounting, if the purchase price of an acquired company exceeds the fair value of its net assets, the excess is carried on the acquirer's balance sheet as goodwill. In accordance with generally accepted accounting principles, our goodwill is evaluated for impairment on an annual basis or more frequently if events or circumstances indicate that a potential impairment exists. Such evaluation is based on a variety of factors, including the quoted price of our common stock, market prices of common stock of other banking organizations, common stock trading multiples, discounted cash flows, and data from comparable acquisitions. There can be no assurance that future evaluations of goodwill will not result in impairment and ensuing write-down, which could be material, resulting in an adverse impact on our earnings and capital.

Fluctuating interest rates could adversely affect our business.

Significant increases in market interest rates on loans, or the perception that an increase may occur, could adversely affect both our ability to originate new loans and our ability to grow. Conversely, decreases in interest rates could result in an acceleration of loan prepayments. An increase in market interest rates could also adversely affect the ability of our floating-rate borrowers to meet their higher payment obligations. If this occurred, it could cause an increase in nonperforming assets and charge offs, which could adversely affect our business.

Further, our profitability is dependent to a large extent upon net interest income, which is the difference (or "spread") between the interest earned on loans, securities and other interest-earning assets and the interest paid on deposits, borrowings, and other interest-bearing liabilities. Because of the differences in maturities and repricing characteristics of our interest-earning assets and interest-bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest-earning assets and interest paid on interest-bearing liabilities. Accordingly, fluctuations in interest rates could adversely affect our interest rate spread, and, in turn, our profitability.

The FDIC has increased insurance premiums to restore and maintain the federal deposit insurance fund, which has increased our costs and could adversely affect our business.

In 2009, the FDIC imposed a special deposit insurance assessment of five basis points on all insured institutions, and also required insured institutions to prepay estimated quarterly risk-based assessments through 2012.

The Dodd-Frank Act established 1.35% as the minimum deposit insurance fund reserve ratio. The FDIC has determined that the fund reserve ratio should be 2.0% and has adopted a plan under which it will meet the statutory minimum fund reserve ratio of 1.35% by the statutory deadline of September 30, 2020. The Dodd-Frank Act requires the FDIC to offset the effect on institutions with assets less than \$10 billion of the increase in the statutory minimum fund reserve ratio to 1.35% from the former statutory minimum of 1.15%. The FDIC has not announced how it will implement this offset or how larger institutions will be affected by it.

Despite the FDIC's actions to restore the deposit insurance fund, the fund will suffer additional losses in the future due to failures of insured institutions. There can be no assurance that there will not be additional significant deposit insurance premium increases, special assessments or prepayments in order to restore the insurance fund's reserve ratio. Any significant premium increases or special assessments could have a material adverse effect on the Company's financial condition and results of operations.

We operate in a highly regulated environment and changes of or increases in, or supervisory enforcement of, banking or other laws and regulations or governmental fiscal or monetary policies could adversely affect us.

We are subject to extensive regulation, supervision and examination by federal and state banking authorities. In addition, as a publicly-traded company, we are subject to regulation by the Securities and Exchange Commission. Any change in applicable regulations or federal, state or local legislation or in policies or interpretations or regulatory approaches to compliance and enforcement, income tax laws and accounting principles could have a substantial impact on us and our operations. Changes in laws and regulations may also increase our expenses by imposing additional fees or taxes or restrictions on our operations. Additional legislation and regulations that could significantly affect our powers, authority and operations may be enacted or adopted in the future, which could have a material adverse effect on our financial condition and results of operations. Failure to appropriately comply with any such laws, regulations or principles could result in sanctions by regulatory agencies, or damage to our reputation, all of which could adversely affect our business, financial condition or results of operations.

In that regard, the Dodd-Frank Wall Street Reform and Consumer Protection Act was enacted in July 2010. Among other provisions, the new legislation (i) creates a new Bureau of Consumer Financial Protection with broad powers to regulate consumer financial products such as credit cards and mortgages, (ii) creates a Financial Stability Oversight Council comprised of the heads of other regulatory agencies, (iii) will lead to new capital requirements from federal banking agencies, (iv) places new limits on electronic debt card interchange fees and (v) will require the Securities and Exchange Commission and national stock exchanges to adopt significant new corporate governance and executive compensation reforms. The new legislation and regulations are expected to increase the overall costs of regulatory compliance.

Further, regulators have significant discretion and authority to prevent or remedy unsafe or unsound practices or violations of laws or regulations by financial institutions and holding companies in the performance of their supervisory and enforcement duties. Recently, these powers have been utilized more frequently due to the serious national, regional and local economic conditions we are facing. The exercise of regulatory authority may have a negative impact on our financial condition and results of operations. Additionally, our business is affected significantly by the fiscal and monetary policies of the U.S. federal government and its agencies, including the Federal Reserve Board.

We cannot accurately predict the full effects of recent legislation or the various other governmental, regulatory, monetary and fiscal initiatives which have been and may be enacted on the financial markets, on the Company and on the Bank. The terms and costs of these activities, or the failure of these actions to help stabilize the financial markets, asset prices, market liquidity and a continuation or worsening of current financial market and economic conditions could materially and adversely affect our business, financial condition, results of operations, and the trading price of our common stock.

A continued tightening of the credit markets and credit market volatility may make it difficult to maintain adequate funding for loan growth, which could adversely affect our earnings.

A continued tightening of the credit markets and the inability to maintain adequate liquidity to fund continued loan growth may negatively affect asset growth and, therefore, our earnings capability. In addition to deposit growth and payments of principal and interest received on loans and investment securities, we also rely on borrowing lines with the FHLB of Seattle and the FRB of San Francisco to fund loans. However, the FHLB has discontinued the repurchase of its stock and discontinued the distribution of dividends. Based on the foregoing, there can be no assurance the FHLB will have sufficient resources to continue to fund our borrowings at their current levels. In the event of a deterioration in our financial condition or a further downturn in the economy, particularly in the housing market, our ability to access these funding resources could be negatively affected, which could limit the funds available to us making it difficult for us to maintain adequate funding for

loan growth. In addition, our customers' ability to raise capital and refinance maturing obligations could be adversely affected, resulting in a further unfavorable impact on our business, financial condition and results of operations.

We may be required, in the future, to recognize impairment with respect to investment securities, including the FHLB stock we hold.

Our securities portfolio currently includes securities with unrecognized losses. We may continue to observe declines in the fair market value of these securities. We evaluate the securities portfolio for any other than temporary impairment each reporting period, as required by generally accepted accounting principles in the United States of America, and as of December 31, 2010, we did not recognize any securities as other-than-temporarily impaired. There can be no assurance, however, that future evaluations of the securities portfolio will not require us to recognize an impairment charge with respect to these and other holdings.

In addition, as a condition to membership in the FHLB, we are required to purchase and hold a certain amount of FHLB stock. Our stock purchase requirement is based, in part, upon the outstanding principal balance of advances from the FHLB. At December 31, 2010, we had stock in the FHLB totaling \$17.9 million. The FHLB stock held by us is carried at cost and is subject to recoverability testing under applicable accounting standards. The FHLB has discontinued the repurchase of their stock and discontinued the distribution of dividends. As of December 31, 2010, we did not recognize an impairment charge related to our FHLB stock holdings. There can be no assurance, however, that future negative changes to the financial condition of the FHLB may not require us to recognize an impairment charge with respect to such holdings.

Our ability to access markets for funding and acquire and retain customers could be adversely affected by negative public opinion, the deterioration of other financial institutions or the further deterioration of the financial services industry's reputation.

The financial services industry continues to be featured in negative headlines about the global and national credit crisis and the resulting stabilization legislation enacted by the U.S. federal government. These reports can be damaging to the industry's image and potentially erode consumer confidence in insured financial institutions, such as our banking subsidiary. In addition, our ability to engage in routine funding and other transactions could be adversely affected by the actions and financial condition of other financial institutions or negative public opinion resulting from our actual or alleged conduct in any number of activities, including lending practices, governmental enforcement actions taken by regulators or community organizations in response to those activities. Financial services institutions are interrelated as a result of trading, clearing, correspondent, counterparty or other relationships. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry in general, could lead to market-wide liquidity problems, losses of depositor, creditor and counterparty confidence and to losses or defaults by us or by other institutions. We could experience material changes in the level of deposits as a direct or indirect result of other banks' difficulties or failure, which could affect the amount of capital we need.

Substantial competition in our market areas could adversely affect us.

Commercial banking is a highly competitive business. We compete with other commercial banks, savings and loan associations, credit unions, finance, insurance and other non-depository companies operating in our market areas. We also experience competition, especially for deposits, from internet-based banking institutions, which have grown rapidly in recent years. We are subject to substantial competition for loans and deposits from other financial institutions. Some of our competitors are not subject to the same degree of regulation and restriction as we are. Some of our competitors have greater financial resources than we do. Some of our competitors have severe liquidity issues, which could impact the pricing of deposits in our marketplace. If we are unable to effectively compete in our market areas, our business, results of operations and prospects could be adversely affected.

Changes in accounting standards could materially impact our financial statements.

From time to time the Financial Accounting Standards Board and the SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be very difficult to predict and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements.

There can be no assurance as to the level of dividends we may pay on our common stock.

Holders of our common stock are only entitled to receive such dividends as our Board of Directors may declare out of funds legally available for such payments. Although we have historically declared cash dividends on our common stock, we are not required to do so and there may be circumstances under which we would eliminate our common stock dividend in the future. This could adversely affect the market price of our common stock.

Our ability to receive dividends from our banking subsidiary accounts for most of our revenue and could affect our liquidity and ability to pay dividends.

We are a separate and distinct legal entity from our banking subsidiary, Columbia State Bank. We receive substantially all of our revenue from dividends from our banking subsidiary. In addition to capital raised at the holding company level, these dividends are the principal source of funds to pay dividends on our common stock and principal and interest on our outstanding debt. Various federal and/or state laws and regulations limit the amount of dividends that our bank may pay us. Also, our right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of the subsidiary's creditors. Limitations on our ability to receive dividends from our subsidiary could have a material adverse effect on our liquidity and on our ability to pay dividends on common stock. Additionally, if our subsidiary's earnings are not sufficient to make dividend payments to us while maintaining adequate capital levels, we may not be able to make dividend payments to our common shareholders or principal and interest payments on our outstanding debt.

Significant legal or regulatory actions could subject us to substantial uninsured liabilities and reputational harm and have a material adverse effect on our business and results of operations.

We are from time to time subject to claims and proceedings related to our operations. These claims and legal actions, which could include supervisory or enforcement actions by our regulators, or criminal proceedings by prosecutorial authorities, could involve large monetary claims, including civil money penalties or fines imposed by government authorities, and significant defense costs. To mitigate the cost of some of these claims, we maintain insurance coverage in amounts and with deductibles that we believe are appropriate for our operations. However, our insurance coverage does not cover any civil money penalties or fines imposed by government authorities and may not cover all other claims that might be brought against us or continue to be available to us at a reasonable cost. As a result, we may be exposed to substantial uninsured liabilities, which could adversely affect our business, prospects, results of operations and financial condition. Substantial legal liability or significant regulatory action against us could have material adverse financial effects or cause significant reputational harm to us, which in turn could seriously harm our business prospects.

We are subject to a variety of operational risks, including reputational risk, legal risk and compliance risk, and the risk of fraud or theft by employees or outsiders, which may adversely affect our business and results of operations.

We are exposed to many types of operational risks, including reputational risk, legal and compliance risk, the risk of fraud or theft by employees or outsiders, and unauthorized transactions by employees or operational errors, including clerical or record-keeping errors or those resulting from faulty or disabled computer or telecommunications systems.

If personal, non-public, confidential or proprietary information of customers in our possession were to be mishandled or misused, we could suffer significant regulatory consequences, reputational damage and financial loss. Such mishandling or misuse could include, for example, if such information were erroneously provided to parties who are not permitted to have the information, either by fault of our systems, employees, or counterparties, or where such information is intercepted or otherwise inappropriately taken by third parties.

Because the nature of the financial services business involves a high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. Our necessary dependence upon automated systems to record and process transactions and our large transaction volume may further increase the risk that technical flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. We also may be subject to disruptions of our operating systems arising from events that are wholly or partially beyond our control (for example, computer viruses or electrical or telecommunications outages, or natural disasters, disease pandemics or other damage to property or physical assets) which may give rise to disruption of service to customers and to financial loss or liability. We are further exposed to the risk that our external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as we are) and to the risk that we (or our vendors') business continuity and data security systems prove to be inadequate. The occurrence of any of these risks could result in a diminished ability of us to operate our business (for example, by requiring us to expend significant resources to correct the defect), as well as potential liability to clients, reputational damage and regulatory intervention, which could adversely affect our business, financial condition and results of operations, perhaps materially.

We may pursue additional capital, which may not be available on acceptable terms or at all, could dilute the holders of our outstanding common stock and may adversely affect the market price of our common stock.

In the current economic environment, we believe it is prudent to consider alternatives for raising capital when opportunities to raise capital at attractive prices present themselves, in order to further strengthen our capital and better position ourselves to take advantage of opportunities that may arise in the future. Such alternatives may include issuance and sale of common or preferred stock, trust preferred securities, or borrowings by the Company, with proceeds contributed to our banking subsidiary, Columbia State Bank (the "Bank"). Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at the time, which are outside of our control, and our financial performance. We cannot assure you that such capital will be available to us on acceptable terms or at all. Any such capital raising alternatives could dilute the holders of our outstanding common stock, and may adversely affect the market price of our common stock and our performance measures such as earnings per share.

We have various anti-takeover measures that could impede a takeover.

Our articles of incorporation include certain provisions that could make more difficult the acquisition of us by means of a tender offer, a proxy contest, merger or otherwise. These provisions include certain non-monetary factors that our board of directors may consider when evaluating a takeover offer, and a requirement that any "Business Combination" be approved by the affirmative vote of no less than 66 $\frac{2}{3}$ % of the total shares attributable to persons other than a "Control Person." These provisions may have the effect of lengthening the time required for a person to acquire control of us through a tender offer, proxy contest or otherwise, and may deter any potentially hostile offers or other efforts to obtain control of us. This could deprive our shareholders of opportunities to realize a premium for their Columbia common stock, even in circumstances where such action is favored by a majority of our shareholders.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Locations

The Company's principal Columbia Bank properties include our corporate headquarters which is located at 13th & A Street, Tacoma, Washington, in Pierce County, where we occupy 62 thousand square feet of office space, 4 thousand square feet of commercial lending space and 750 square feet of branch space under various operating lease agreements, an operations facility in Lakewood, Washington, where we own 57 thousand square feet of office space and an office facility in Tacoma, Washington, that includes a branch where we occupy 26 thousand square feet under various operating lease agreements.

The Company's branch network as of December 31, 2010 is made up of 84 branches located throughout several Washington and Oregon counties. The number of branches per county, as well as whether it is owned or operated under a lease agreement is detailed in the following table.

<u>County</u>	<u>Number of Branches</u>	<u>Occupancy Type</u>	
		<u>Owned</u>	<u>Leased</u>
Pierce	23	14	9
King	12	8	4
Kitsap	6	3	3
Other Washington Counties	18	10	8
Total Washington Branches	<u>59</u>	<u>35</u>	<u>24</u>
Clatsop (dba Bank of Astoria)	4	4	—
Tillamook (dba Bank of Astoria)	2	2	—
Clackamas	3	—	3
Multnomah	3	1	2
Deschutes	4	2	2
Other Oregon Counties	9	7	2
Total Oregon Branches	<u>25</u>	<u>16</u>	<u>9</u>
Total Columbia Bank Branches	<u>84</u>	<u>51</u>	<u>33</u>

For additional information concerning our premises and equipment and lease obligations, see Note 10 and 20, respectively, to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

ITEM 3. LEGAL PROCEEDINGS

The Company and its banking subsidiary are parties to routine litigation arising in the ordinary course of business. Management believes that, based on the information currently known to them, any liabilities arising from such litigation will not have a material adverse impact on the Company's financial condition, results of operations or cash flows.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Quarterly Common Stock Prices and Dividends

Our common stock is traded on the NASDAQ Global Select Market under the symbol "COLB". Quarterly high and low sales prices and dividend information for the last two years are presented in the following table. The prices shown do not include retail mark-ups, mark-downs or commissions:

<u>2010</u>	<u>High</u>	<u>Low</u>	<u>Cash Dividend Declared</u>
First quarter	\$22.60	\$16.03	\$0.01
Second quarter	\$24.96	\$18.17	0.01
Third quarter	\$19.97	\$15.91	0.01
Fourth quarter	\$21.99	\$17.00	0.01
For the year	\$24.96	\$15.91	<u>\$0.04</u>
<u>2009</u>	<u>High</u>	<u>Low</u>	<u>Cash Dividend Declared</u>
First quarter	\$11.87	\$ 4.93	\$0.04
Second quarter	\$13.52	\$ 6.54	0.01
Third quarter	\$17.22	\$ 9.78	0.01
Fourth quarter	\$16.55	\$13.80	0.01
For the year	\$17.22	\$ 4.93	<u>\$0.07</u>

On December 31, 2010, the last sale price for our stock on the NASDAQ Global Select Market was \$21.06. At January 31, 2011, the number of shareholders of record was 2,154. This figure does not represent the actual number of beneficial owners of common stock because shares are frequently held in "street name" by securities dealers and others for the benefit of individual owners who may vote the shares.

At December 31, 2010, a total of 93,964 stock options were outstanding. Additional information about stock options and other equity compensation plans is included in Note 17 to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

The payment of future cash dividends is at the discretion of our Board and subject to a number of factors, including results of operations, general business conditions, growth, financial condition and other factors deemed relevant by the Board of Directors. In addition, the payment of cash dividends is subject to Federal regulatory requirements for capital levels and other restrictions. In this regard, current guidance from the Federal Reserve provides, among other things, that dividends per share on the Company's common stock generally should not exceed earnings per share, measured over the previous four fiscal quarters.

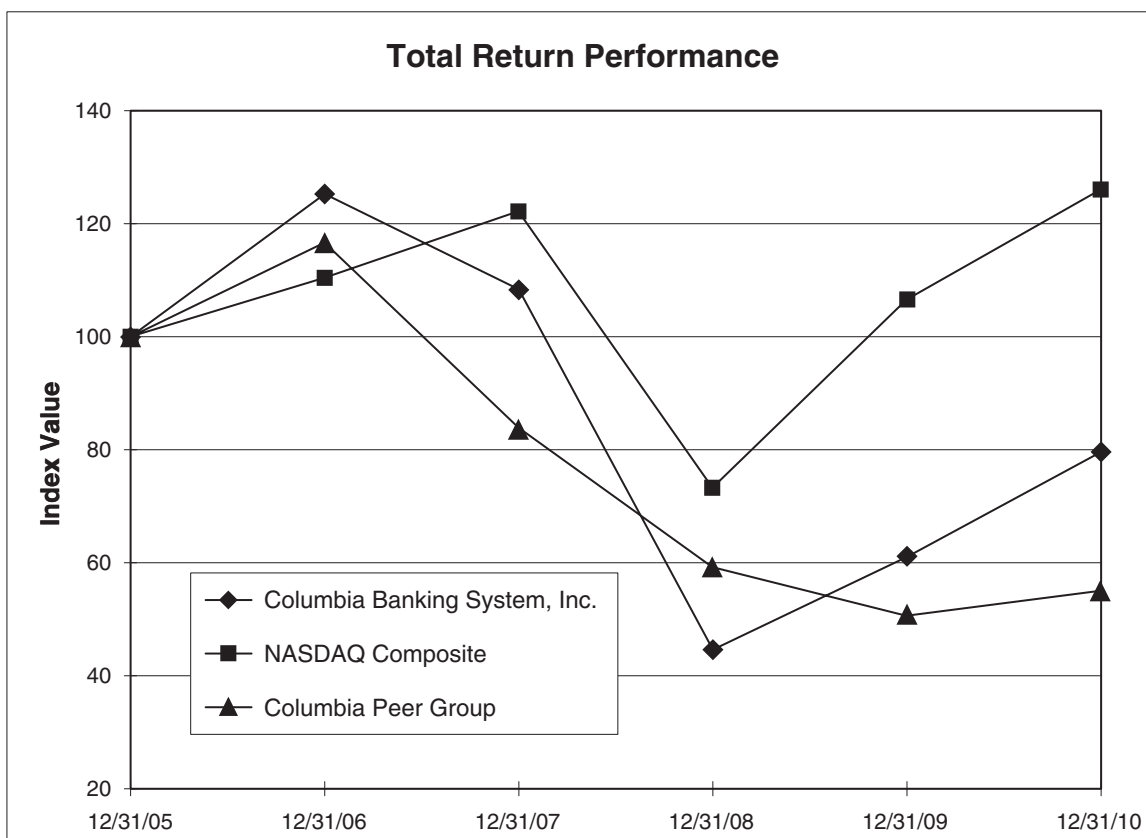

Equity Compensation Plan Information

	<u>Year Ended December 31, 2010</u>		
	<u>Number of Shares to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (1)(2)</u>	<u>Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights</u>	<u>Number of Shares Remaining Available for Future Issuance Under Equity Compensation Plans (3)</u>
Equity compensation plans approved by security holders	93,964	\$21.26	1,299,510
Equity compensation plans not approved by security holders	—	—	—

- (1) Includes shares to be issued upon exercise of options under plans of Bank of Astoria, Mountain Bank Holding Company and Town Center Bancorp, which were assumed as a result of their acquisitions.
- (2) Consists of shares that are subject to outstanding options.
- (3) Includes 620,606 shares available for future issuance under the stock option and equity compensation plan and 678,904 shares available for purchase under the Employee Stock Purchase Plan as of December 31, 2010.

Five-Year Stock Performance Graph

The following graph shows a five-year comparison of the total return to shareholders of Columbia's common stock, the Nasdaq Composite Index (which is a broad nationally recognized index of stock performance by companies listed on the Nasdaq Stock Market) and the Columbia Peer Group (comprised of banks with assets of \$1 billion to \$5 billion, all of which are located in the western United States). The definition of total return includes appreciation in market value of the stock as well as the actual cash and stock dividends paid to shareholders. The graph assumes that the value of the investment in Columbia's common stock, the Nasdaq and the Columbia Peer Group was \$100 on December 31, 2005, and that all dividends were reinvested.

Index	Period Ending					
	12/31/05	12/31/06	12/31/07	12/31/08	12/31/09	12/31/10
Columbia Banking System, Inc.	100.00	125.20	108.38	44.75	61.10	79.70
NASDAQ Composite	100.00	110.39	122.15	73.32	106.57	125.91
Columbia Peer Group	100.00	116.61	83.98	59.34	50.77	55.14

(1) These unaudited schedules provide selected financial information concerning the Company that should be read in conjunction with “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operation” of this report.

(2) Due to averaging of shares, quarterly earnings per share may not add up to the totals reported for the full year.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

This discussion should be read in conjunction with our Consolidated Financial Statements and related notes in “Item 8. Financial Statements and Supplementary Data” of this report. In the following discussion, unless otherwise noted, references to increases or decreases in average balances in items of income and expense for a particular period and balances at a particular date refer to the comparison with corresponding amounts for the period or date for the previous year.

Critical Accounting Policies

We have established certain accounting policies in preparing our Consolidated Financial Statements that are in accordance with accounting principles generally accepted in the United States. Our significant accounting policies are presented in Note 1 to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report. Certain of these policies require the use of judgments, estimates and economic assumptions which may prove inaccurate or are subject to variation that may significantly affect our reported results of operations and financial position for the periods presented or in future periods. Management believes that the judgments, estimates and economic assumptions used in the preparation of the Consolidated Financial Statements are appropriate given the factual circumstances at the time. We consider the following policies to be most critical in understanding the judgments that are involved in preparing our consolidated financial statements.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses (“ALLL”) is established to absorb known and inherent losses in our loan and lease portfolio. Our methodology in determining the appropriate level of the ALLL includes components for a general valuation allowance in accordance with the Contingencies topic of the Financial Accounting Standards Board Accounting Standards Codification (“FASB ASC”), a specific valuation allowance in accordance with the Receivables topic of the FASB ASC and an unallocated component. Both quantitative and qualitative factors are considered in determining the appropriate level of the ALLL. Quantitative factors include historical loss experience, delinquency and charge-off trends and the evaluation of specific loss estimates for problem loans. Qualitative factors include existing general economic and business conditions in our market areas as well as the duration of the current business cycle. Changes in any of the factors mentioned could have a significant impact on our calculation of the ALLL. Our ALLL policy and the judgments, estimates and economic assumptions involved are described in greater detail in the “Allowance for Loan and Lease Losses and Unfunded Commitments and Letters of Credit” section of this discussion and in Note 1 to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

Business Combinations

The Company applies the acquisition method of accounting for business combinations. Under the acquisition method, the acquiring entity in a business combination recognizes 100 percent of the assets acquired and liabilities assumed at their acquisition date fair values. Management utilizes valuation techniques appropriate for the asset or liability being measured in determining these fair values. Any excess of the purchase price over amounts allocated to assets acquired, including identifiable intangible assets, and liabilities assumed is recorded as goodwill. Where amounts allocated to assets acquired and liabilities assumed is greater than the purchase price, a bargain purchase gain is recognized. Acquisition-related costs are expensed as incurred.

Acquired Impaired Loans

Loans acquired at a discount for which it is probable that all contractual payments will not be received are accounted for under ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (“ASC 310-30”). These loans are recorded at fair value at the time of acquisition. Fair value of acquired impaired

loans is determined using a discounted cash flow model based on assumptions about the amount and timing of principal and interest payments, principal repayments and estimates of principal defaults, loss given default and current market rates. Estimated credit losses are included in the determination of fair value, therefore, an allowance for loan losses is not recorded on the acquisition date. The excess of expected cash flows at acquisition over the initial investment in acquired loans (“accretable yield”) is recorded as interest income over the life of the loans if the timing and amount of the future cash flows is reasonably estimable. Subsequent to acquisition, the Company aggregates loans into pools of loans with common risk characteristics. Increases in estimated cash flows over those expected at the acquisition date are recognized as interest income, prospectively. Decreases in expected cash flows after the acquisition date are recognized by recording an allowance for loan losses. Loans accounted for under ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of future cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and the purchase price discount on those loans is not recorded as interest income until the timing and amount of future cash flows can be reasonably estimated.

FDIC Loss Sharing Asset

In conjunction with the FDIC-assisted acquisitions, the Bank entered into loss sharing agreements with the FDIC. At the date of the acquisitions, the Company elected to account for amounts receivable under the loss sharing agreements as a loss sharing asset in accordance with the Business Combinations topic of the FASB ASC. Subsequent to the acquisitions, the loss sharing asset is accounted for on the same basis as the related covered assets and is the present value of the cash flows the Company expects to collect from the FDIC under the loss sharing agreements. The difference between the present value and the undiscounted cash flows the Company expects to collect from the FDIC is accreted into noninterest income over the life of the FDIC loss sharing asset. The FDIC loss sharing asset is adjusted for any changes in expected cash flows based on the performance of the covered assets. Any increases in cash flows of those covered assets over those expected will reduce the FDIC loss sharing asset and any decreases in cash flows of the covered assets from those expected will increase the FDIC loss sharing asset. Increases and decreases to the FDIC loss sharing asset are recorded as adjustments to noninterest income.

Valuation and Recoverability of Goodwill

Goodwill represented \$109.6 million of our \$4.26 billion in total assets and \$706.9 million in total shareholders’ equity as of December 31, 2010. The Company has one, single reporting unit. We review goodwill for impairment annually, on September 30th and also test for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of our reporting unit below its carrying amount. Such indicators may include, among others: a significant adverse change in legal factors or in the general business climate; significant decline in our stock price and market capitalization; unanticipated competition; the testing for recoverability of a significant asset group within a reporting unit; and an adverse action or assessment by a regulator. Any adverse change in these factors could have a significant impact on the recoverability of goodwill and could have a material impact on our consolidated financial statements.

When required, the goodwill impairment test involves a two-step process. We first test goodwill for impairment by comparing the fair value of the reporting unit with its carrying amount. If the fair value of the reporting unit exceeds the carrying amount of the reporting unit, goodwill is not deemed to be impaired, and no further testing is necessary. If the carrying amount of the reporting unit were to exceed the fair value of the reporting unit, we would perform a second test to measure the amount of impairment loss, if any. To measure the amount of any impairment loss, we would determine the implied fair value of goodwill in the same manner as if the reporting unit were being acquired in a business combination. Specifically, we would allocate the fair value of the reporting unit to all of the assets and liabilities of the reporting unit in a hypothetical calculation that would determine the implied fair value of goodwill. If the implied fair value of goodwill is less than the recorded goodwill, we would record an impairment charge for the difference.

The accounting estimates related to our goodwill require us to make considerable assumptions about fair values. Our assumptions regarding fair values require significant judgment about economic factors, industry factors and technology considerations, as well as our views regarding the growth and earnings prospects of the retail banking unit. Changes in these judgments, either individually or collectively, may have a significant effect on the estimated fair values.

Based on the results of the annual goodwill impairment test, we determined that no goodwill impairment charges were required at September 30, 2010. As of December 31, 2010 we determined there were no events or circumstances which would more likely than not reduce the fair value of our reporting unit below its carrying amount.

Even though we determined that there was no goodwill impairment during 2010, additional adverse changes in the operating environment for the financial services industry may result in a future impairment charge.

Please refer to Note 11 to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report for further discussion.

2010 Overview

- Consolidated net income applicable to common shareholders for 2010 was \$25.8 million, or \$0.72 per diluted common share, compared with a net loss of \$8.4 million, or \$0.38 per diluted common share, in 2009. Net income (loss) applicable to common shareholders reflects net income (loss) less dividends on preferred stock related to the Company’s participation in the U.S. Department of the Treasury’s Capital Purchase Program. The increase in net income applicable to common shareholders is primarily due to lower provision expense for loan and lease losses recorded during 2010, the August redemption of the preferred stock issued to the U.S. Department of the Treasury, and the two FDIC assisted acquisitions.
- Noninterest income was \$52.8 million for 2010, an increase from \$29.7 million for 2009. Noninterest income was significantly affected by the two FDIC assisted acquisitions. The Company recognized a net of tax bargain purchase gain through noninterest income of \$9.8 million related to the American Marine Bank transaction. In addition, noninterest income increased \$4.9 million due to the impact of recognizing the estimated economic benefit of the loss sharing asset stemming from the Company’s loss share agreements with the FDIC. Finally, service charges and other fees increased \$9.5 million due to additional transaction volume associated with a larger customer base.
- Total assets at December 31, 2010 were \$4.26 billion, up 33% from \$3.20 billion at the end of 2009. At December 31, 2010 net assets acquired covered by FDIC loss share agreements (referred to as “covered” assets or loans) represented \$531.5 million and the loss sharing asset associated with the Company’s loss share agreements with the FDIC was \$206.0 million. The allowance for noncovered loan and lease losses increased to \$61.0 million at December 31, 2010 from \$53.5 million at December 31, 2009. The Company’s allowance amounts to 3.18% of total uncovered loans, compared with 2.66% at the end of 2009. Separate from the allowance for noncovered loan and lease losses, the Company recorded expense of \$6.1 million and \$0 through the provision for losses on covered loans in 2010 and 2009 respectively. The impact to earnings of the \$6.1 million of provision expense for covered loans is offset through noninterest income by a \$4.9 million increase in the loss sharing asset related to the Company’s loss share agreements with the FDIC.
- Nonperforming assets totaled \$126.7 million as of December 31, 2010, compared with \$129.5 million at December 31, 2009. Net loan charge-offs were \$33.8 million in 2010, compared with \$52.8 million in 2009. The Company’s commercial business portfolio experienced a \$13.4 million increase in nonaccrual loans with a December 31, 2010 balance of \$32.4 million. The increase in nonaccrual loans within the commercial business portfolio was more than offset by a \$38.3 million decline in the real estate construction portfolio.

- Investment securities available for sale totaled \$763.9 million at December 31, 2010 compared to \$620.0 million at December 31, 2009.
- Deposits totaled \$3.33 billion at December 31, 2010 compared to \$2.48 billion at December 31, 2009. Core deposits totaled \$3.00 billion at December 31, 2010, comprising 90% of total deposits compared to \$2.07 billion, or 83%, of total deposits at December 31, 2009.
- The Company is well capitalized with a total risk-based capital ratio of 24.47% at December 31, 2010 compared to 19.60% at December 31, 2009. These ratios reflect the net proceeds to the Company of \$229.1 million from an underwritten public offering of common shares completed in May, 2010 as well as the payment of \$76.9 million for the retirement of the preferred shares issued under the U.S. Department of the Treasury's Capital Purchase Program and \$3.3 million paid by the Company to retire the warrants associated with the preferred shares.

Business Combinations

On January 22, 2010, Columbia State Bank acquired all of the deposits and certain assets of Columbia River Bank from the FDIC, which was appointed receiver of Columbia River Bank. Columbia State Bank acquired approximately \$912.9 million in assets and approximately \$893.4 million in deposits located in 21 branches in Oregon and Washington. Columbia River Bank's loans and other real estate assets acquired of approximately \$696.1 million are subject to a loss-sharing agreement with the FDIC. The Company participated in a competitive bid process in which the accepted bid included a 1% deposit premium on non-brokered deposits and a negative bid of \$43.9 million on net assets acquired.

On January 29, 2010 Columbia State Bank acquired substantially all of the deposits and assets of American Marine Bank from the FDIC, which was appointed receiver of American Marine Bank. Columbia State Bank acquired approximately \$307.8 million in assets and approximately \$254.0 million in deposits located in 11 branches on the western Puget Sound. American Marine Bank's loans and other real estate assets acquired of approximately \$257.5 million is subject to a loss-sharing agreement with the FDIC. In addition, Columbia State Bank will continue to operate the Trust and Wealth Management Division of American Marine Bank. The Company participated in a competitive bid process in which the accepted bid included a 1% deposit premium on non-brokered deposits and a negative bid of \$23.0 million on net assets acquired.

RESULTS OF OPERATIONS

Summary

A summary of the Company's results of operations on for each of the last five years ended December 31 follows:

	Year Ended 2010	Increase (Decrease)		Year Ended 2009	Increase (Decrease)		Years ended December 31,		
		Amount	%		Amount	%	2008	2007	2006
<i>(in thousands, except per share amounts)</i>

NM –Not Meaningful

Net Interest Income

Net interest income is the difference between interest income and interest expense. Net interest income on a fully taxable-equivalent basis expressed as a percentage of average total interest-earning assets is referred to as the net interest margin, which represents the average net effective yield on interest-earning assets.

The following table sets forth the average balances of all major categories of interest-earning assets and interest-bearing liabilities, the total dollar amounts of interest income on interest-earning assets and interest expense on interest-bearing liabilities, the average yield earned on interest-earning assets and average rate paid on interest-bearing liabilities by category and in total, net interest income, net interest spread, net interest margin and the ratio of average interest-earning assets to interest-earning liabilities:

Net Interest Income Summary

	2010			2009			2008

(1) Nonaccrual loans were included in loans. Amortized net deferred loan fees were included in the interest income calculations. The amortization of net deferred loan fees was \$2.1 million in 2010, \$2.8 million in 2009, \$3.5 million in 2008.

(2) Yields on fully taxable equivalent basis, based on a marginal tax rate of 35%.

Net interest income is impacted by the volume (changes in volume multiplied by prior rate), interest rate (changes in rate multiplied by prior volume) and the mix of interest-earning assets and interest-bearing liabilities. The following table shows changes in net interest income on a fully taxable-equivalent basis between 2010 and 2009, as well as between 2009 and 2008 broken down between volume and rate. Changes attributable to the combined effect of volume and interest rates have been allocated proportionately to the changes due to volume and the changes due to interest rates:

Changes in Net Interest Income

Taxable-equivalent net interest income totaled \$170.5 million in 2010, compared with \$120.5 million for 2009. Relatively flat interest rates from 2009 to 2010 resulted in a slight uptick in the yield on interest earning assets. The significant increase in net interest income during 2010 resulted from a combination of a higher volume of total interest earning assets and a significant reduction in the average rate paid on deposits. The yield on earning assets increased 3 basis points while the cost of interest-bearing liabilities declined 54 basis points. The net effect of the additional volume of interest earning assets and interest bearing liabilities was an increase in net interest income of \$25.0 million. The net interest margin was favorably impacted by the acquired loan portfolios, which interest income is accounted for on a level yield basis over the remaining life of the loan. The nuances of accounting for loans on a level yield basis can introduce volatility into the net interest margin, but generally for the Company's acquired portfolios, the result is an increased net interest margin.

The net interest margin was down slightly in 2009 compared to 2008, declining 5 basis points to 4.33% from 4.38%. Average loan yields decreased 102 basis points with average deposit costs decreasing 111 basis points from 2008. In addition, average borrowing costs from the Federal Home Loan Bank and Federal Reserve Bank decreased 70 basis points.

Provision for Loan and Lease Losses

The Company accounts for the credit risk associated with lending activities through its allowance for loan and lease losses and provision for loan and lease losses. The provision is the expense recognized in the consolidated statements of income to adjust the allowance to the levels deemed appropriate by management, as determined through its application of the Company's allowance methodology procedures. Impairment valuation adjustments and allowance for loan and lease losses on acquired loans, including those subject to the Company's loss share agreements with the FDIC, are accounted for separately from the allowance for loan and lease losses. For discussion over the methodology used by management in determining the adequacy of the ALLL see the following "Allowance for Loan and Lease Losses and Unfunded Commitments and Letters of Credit" and "Critical Accounting Policies" sections of this discussion.

For noncovered loans, the Company recorded expense of \$41.3 million and \$63.5 million through the provision for loan and lease losses in 2010 and 2009, respectively. The provision recorded in 2010 reflects management's ongoing assessment of the credit quality of the Company's loan portfolio, which is impacted by various economic trends, including the protracted recovery of the Pacific Northwest economy. Additional factors affecting the provision include credit quality migration, size and composition of the loan portfolio and changes in the economic environment during the period. See "Allowance for Loan and Lease Losses and Unfunded Commitments and Letters of Credit" section of this discussion for further information on factors considered by the Company in assessing the credit quality of the loan portfolio and establishing the allowance for loan and lease losses.

The Company recorded expense of \$6.1 million and \$0 through the provision for losses on covered loans in 2010 and 2009 respectively. The impact to earnings of the \$6.1 million of provision expense for covered loans is offset through noninterest income by a \$4.9 million increase in the loss sharing asset related to the Company's loss share agreements with the FDIC.

For the years ended December 31, 2010, 2009 and 2008, net loan charge-offs amounted to \$33.8 million, \$52.8 million, and \$25.0 million, respectively. Loans in the real estate construction portfolio accounted for 34% of the 2010 net charge-offs while loans in the commercial business portfolio accounted for an additional 37% of the 2010 net charge-offs compared to 69% and 23%, respectively, in 2009.

Noninterest Income

Noninterest income for the year totaled \$52.8 million, an increase of \$23.1 million from 2009. Noninterest income represented 24% of total revenues in 2010, compared with 20% and 11% in 2009 and 2008, respectively. Noninterest income for 2010 included the net of tax bargain purchase gain of \$9.8 million related to the American Marine Bank transaction. In addition, the Company accounts for changes in the FDIC loss sharing asset through noninterest income. As a result of the change in the loss sharing asset during 2010, noninterest income was increased \$4.9 million. Removing the effect in 2010 of the aforementioned bargain purchase gain and the change in loss sharing asset, noninterest income would have increased \$8.4 million from 2009, due primarily to an increase in the service charges and other fees line item. Service charges and other fees are volume driven and the increase is attributed to a larger customer base rather than higher incremental per transaction fees. Management believes it is useful for investors to understand the components of the two FDIC assisted transactions that impact 2010 noninterest income.

2008 noninterest income was lower than 2009 primarily due to the \$19.5 million impairment charge on investment securities described below, partially offset by the \$3.0 million gain from the redemption of Visa and Mastercard shares described below. Excluding securities impairment charges of \$19.5 million in 2008, net gains on sales of securities of \$1.1 million in 2009 and \$846 thousand in 2008 and proceeds from redemption of Visa and Mastercard stock of \$49 thousand in 2009 and \$3.0 million in 2008, noninterest income in 2009 was relatively flat when compared to 2008. Management believes that it is useful for investors to understand the impact of the impairment charge, net gains on sales of securities and proceeds from redemption of Visa and Mastercard stock on the Company's results of operations.

The following table presents the significant components of noninterest income and the related dollar and percentage change from period to period:

	Years ended December 31,						2008
	2010	\$ Change	% Change	2009	\$ Change	% Change	
	<i>(dollars in thousands)</i>						
Fees and Other Income							
Gain on bank acquisitions	\$ 9,818	\$ 9,818	100%	\$ —	\$ —	0%	\$ —
Service charges, loan fees and other fees	24,698	9,517	63%	15,181	368	2%	14,813
Merchant services fees	7,502	181	2%	7,321	(719)	-9%	8,040
Redemption of Visa and Mastercard shares	—	(49)	-100%	49	(2,979)	100%	3,028
Gain on sale of investment securities, net	58	(1,019)	-95%	1,077	231	100%	846
Impairment charge on investment securities	—	—	0%	—	19,541	-100%	(19,541)
Bank owned life insurance (BOLI)	2,041	18	1%	2,023	(52)	-3%	2,075
Change in indemnification asset	4,908	4,908	100%	—	—	0%	—
Other Income	3,756	(283)	-7%	4,039	(1,550)	-28%	5,589
Total noninterest income	<u>\$52,781</u>	<u>\$23,091</u>	78%	<u>\$29,690</u>	<u>\$14,840</u>	100%	<u>\$ 14,850</u>

Service charges, loan fees and other fees increased \$9.5 million in 2010 over 2009, or 63%, due to higher transaction volumes. Service charges, loan fees and other fees increased \$368 thousand in 2009 over 2008, or 2%.

Merchant services fees increased \$181 thousand in 2010 over 2009, or 2%. Merchant services fees declined \$719 thousand in 2009 over 2008, or 9%. Even though for 2010, merchant services fees increased from the prior year, they were still below the level of 2008 fee income. These reductions reflect lower volumes of merchant activity.

Proceeds from the redemption of Visa and Mastercard shares totaled \$49 thousand and \$3.0 million in 2009 and 2008, respectively. There was no redemption of these shares in 2010.

The impairment charge on investment securities was \$19.5 million in 2008 due to the impairment charge on Federal Home Loan Mortgage Corporation (“Freddie Mac”) and Federal National Mortgage Association (“Fannie Mae”) preferred stock resulting from these government-sponsored enterprises being placed into conservatorship in a plan announced by the U.S. Treasury Department (“Treasury”) and the Federal Housing Finance Agency (“FHFA”). There was no impairment charge on investment securities in 2010 or 2009. During the fourth quarter of 2009, all of the Company’s Freddie Mac and Fannie Mae preferred stock was sold resulting in a net gain on sale of \$166 thousand.

Other Noninterest Income: The following table presents selected items of “other noninterest income” and the related dollar and percentage change from period to period:

	Years ended December 31,						
	2010	\$ Change	% Change	2009	\$ Change	% Change	2008
	<i>(dollars in thousands)</i>						
Gain on disposal of assets	\$ 118	\$ 4	4%	\$ 114	\$ (378)	-77%	\$ 492
Mortgage banking	450	68	18%	382	(246)	-39%	628
Cash management 12b-1 fees	11	(234)	-96%	245	(221)	-47%	466

Credit card fees	183	56	44%	127	(15)	-11%	142
Life insurance death benefit	—	—	0%	—	(612)	100%	612
Miscellaneous	263	(607)	-70%	870	378	77%	492
Total noninterest income	<u>\$3,756</u>	<u>\$(283)</u>	<u>-7%</u>	<u>\$4,039</u>	<u>\$(1,550)</u>	<u>-28%</u>	<u>\$5,589</u>

Included in gain on disposal of assets are amounts related to the sale and lease-back of two buildings which occurred in September 2004. The resulting \$1.3 million gain on the sale was deferred and recognized over the life of the leases, the unamortized gain balance at December 31, 2010 and 2009 was \$317 thousand and \$400 thousand, respectively, and is included in other liabilities on our consolidated balance sheets. During 2010, 2009 and 2008 the Company recognized amortized gains associated with the sale and lease-back transaction of \$83 thousand per year. The decrease in other noninterest income was primarily due to the reductions in cash management fee income and letter of credit fees.

Noninterest Expense

Noninterest expense was \$137.1 million in 2010, an increase of \$42.7 million, or 45%, over 2009. Noninterest expense increased \$2.4 million, or 3%, in 2009 over 2008.

The following table presents the significant components of noninterest expense and the related dollar and percentage change from period to period:

	Years ended December 31,						
	2010	\$ Change	% Change	2009	\$ Change	% Change	2008
	<i>(dollars in thousands)</i>						
Compensation and employee benefits	\$ 69,780	\$22,505	48%	\$47,275	\$(2,040)	-4%	\$49,315

Other	14,603	4,424	43%	10,179	(778)	-7%	10,957
Total all other noninterest expense	<u>67,367</u>	<u>20,154</u>	<u>43%</u>	<u>47,213</u>	<u>4,403</u>	<u>10%</u>	<u>42,810</u>
Total noninterest expense	<u>\$137,147</u>	<u>\$42,659</u>	<u>45%</u>	<u>\$94,488</u>	<u>\$ 2,363</u>	<u>3%</u>	<u>\$92,125</u>

Compensation and employee benefits expense increased to \$69.8 million, or 48% in 2010 from \$47.3 million in 2009 reflecting staffing increases in the current year related to the two FDIC assisted acquisitions as well as the addition of teams of bankers in conjunction with the execution of our de novo expansion strategy. Compensation and employee benefits expense decreased 4% in 2009 from 2008, reflecting the Company's limited expansion during the prior year. Full-time equivalent staff increased to 1,092 at December 31, 2010 from 715 at December 31, 2009 and 735 at December 31, 2008.

The remaining noninterest expense categories increased \$20.2 million, or 43%, between 2009 and 2010. Occupancy expense increased \$4.7 million due to significantly more branch locations. Advertising and promotion expense was up 59% in 2010 from the prior year as a result of the Company's marketing efforts to establish its brand in newly served market areas. Data processing expense increased 60% due to higher transaction volumes and conversion expenses stemming from the two FDIC assisted transactions. Amortization of intangibles expense increased \$2.9 million, or 275%, as a result of the core deposit intangible recorded in conjunction with the two FDIC assisted transactions. Finally, legal and professional services expense increased \$1.8 million as the Company continues to incur significant expense while working toward the resolution of nonperforming and covered assets.

Other Noninterest Expense: The following table presents selected items of "other noninterest expense" and the related dollar and percentage change from period to period:

(1) The amounts shown represent pass-through losses from our interests in certain low-income housing related limited partnerships. As a result of these interests we receive federal low-income housing tax credits available under the Internal Revenue Code. For the year ended December 31, 2010, \$511 thousand of such credits was taken as a reduction in our current period income tax expense. In addition, we recognized a tax benefit of \$97 thousand associated with this investment expense during the twelve months ended December 31, 2010.

Income Tax

For the years ended December 31, 2010, 2009 and 2008 we recorded an income tax provision of \$2.3 million and income tax benefits of \$9.0 million and \$4.9 million, respectively. The effective tax rate was 7% in 2010 and the effective tax benefit was 69% in 2009 and 463% in 2008. For additional information, see Note 16 to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report. Our effective tax rate is less than our statutory rate of 36.02% and continues to be much lower than our historical range of 24% to 28% primarily due to the amount of tax-exempt municipal securities held in the investment portfolio, tax exempt earnings on bank owned life insurance, and tax credits received on investments in affordable housing partnerships.

Financial Condition

Our total assets increased 33% to \$4.26 billion at December 31, 2010 from \$3.20 billion at December 31, 2009. Interest-earning deposits with bank balances increased \$209.1 million. The inability to prepay advances without significant penalty from the Federal Home Loan Bank contributed to this increase. Our investment portfolio increased 23% or \$143.8 million. This increase was primarily a result of investment security purchases in the fourth quarter of 2010. The loan portfolio increased 21% or \$423.9 million to \$2.43 billion. The increase in the loan portfolio can be attributed to the two FDIC-assisted transactions. Excluding the acquired loans, the legacy portfolio declined \$93.1 million due to a combination of loan payoffs, pay downs, reduced demand from qualified borrowers, and loan charge-offs. Property, plant and equipment, net, increased \$30.4 million, of which \$21.9 million was related to the purchase of 18 branches from the FDIC in connection with the acquisitions of Columbia River Bank and American Marine Bank. Deposit balances increased \$844.6 million or 34% to \$3.33 billion and borrowings increased 16% to \$145.0 million. The increase in borrowings is due to Federal Home Loan Bank advances assumed in conjunction with the two FDIC assisted transactions.

Investment Portfolio

We invest in securities to generate revenues for the Company, to manage liquidity while minimizing interest rate risk and to provide collateral for certain public deposits and short-term borrowings. The amortized cost amounts represent the Company's original cost for the investments, adjusted for accumulated amortization or accretion of any yield adjustments related to the security. The estimated fair values are the amounts we believe the securities could be sold for as of the dates indicated. As of December 31, 2010 we had 75 available for sale securities in an unrealized loss position. Based on past experience with these types of securities and our own financial performance, we do not intend to sell any impaired securities nor does available evidence suggest it is more likely than not that management will be required to sell any impaired securities before the recovery of the amortized cost basis. We review these investments for other-than-temporary impairment on an ongoing basis.

Purchases during 2010 totaled \$179.3 million while maturities and repayments and sales totaled \$92.8 million compared to purchases of \$162.4 million and maturities and repayments of \$67.7 million during 2009. At December 31, 2010 U.S. Government agency and government-sponsored enterprise mortgage-backed securities ("MBS") and collateralized mortgage obligations ("CMO") comprised 67% of our investment portfolio and state and municipal securities were 33%. Our entire investment portfolio is categorized as available for sale and carried on our balance sheet at fair value. The average duration of our investment portfolio was approximately 3 years and 11 months at December 31, 2010. For further information on our investment portfolio see Note 5 of the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

The following table presents the contractual maturities and weighted average yield of our investment portfolio:

Securities Available for Sale

	December 31, 2010		
	Amortized Cost	Fair Value	Yield

- (1) The maturities reported for mortgage-backed securities collateralized mortgage obligations are based on contractual maturities and principal amortization.
- (2) Yields on fully taxable equivalent basis, based on a marginal tax rate of 35%.

FHLB Stock

As a condition of membership in the Federal Home Loan Bank of Seattle (“FHLB”), the Company is required to purchase and hold a certain amount of FHLB stock. Our stock purchase requirement is based, in part, upon the outstanding principal balance of advances from the FHLB and is calculated in accordance with the Capital Plan of the FHLB. Our FHLB stock has a par value of \$100 and is redeemable at par for cash.

FHLB stock is carried at cost and is subject to recoverability testing per the Financial Services – Depository and Lending topic of the FASB ASC. The FHLB is currently classified as undercapitalized by the Federal Housing Finance Agency (“Finance Agency”). Under Finance Agency regulations, a Federal Home Loan Bank that fails to meet any regulatory capital requirement may not declare a dividend or redeem or repurchase capital stock. However, management believes, despite the undercapitalized classification, the FHLB has adequate capital to cover the risks reflected on their balance sheet. Accordingly, as of December 31, 2010 we did not recognize an impairment charge related to our FHLB stock holdings. We will continue to monitor the financial condition of the FHLB as it relates to, among other things, the recoverability of our investment.

Loan Portfolio

We are a full service commercial bank, which originates a wide variety of loans, and concentrates its lending efforts on originating commercial business and commercial real estate loans. The following table sets forth our loan portfolio by type of loan for the dates indicated:

	December 31,									
	2010	% of Total	2009	% of Total	2008	% of Total	2007	% of Total	2006	% of Total

Loans held for sale	\$ 754		\$ —		\$ 1,964		\$ 4,482		\$ 933	

At December 31, 2010, total loans were \$2.43 billion compared with \$2.01 billion in the prior year, an increase of \$423.9 million or 21%. Generally, loan volumes were down across all categories with significant declines in real estate and real estate construction; commercial business loans were the exception, increasing \$50.9 million. The increase in total loans was due to covered loans acquired in conjunction with the two FDIC assisted transactions. At December 31, 2010, net covered loans were \$517.1 million. Total loans represented 57% and 63% of total assets at December 31, 2010 and 2009, respectively. Although balances declined during 2010 and 2009, the compound annual growth rate of our loan portfolio over the last five years is 9%. The decreased lending activity is due to a lack of demand for loan services on the part of qualified customers.

Commercial Business Loans: Commercial business loans increased \$50.9 million, or 7%, to \$795.4 million from year-end 2009, representing 42% of total loans at year end. The Company has focused on expanding its relationship with its existing customer base while reaching out to develop new business relationships in its primary market areas. The Company will continue to grow its commercial business as the economy improves to meet the needs and demands from our customer base.

Real Estate Loans: Residential real estate loans in our portfolio are secured by properties located within our primary market area, and typically have loan-to-value ratios of 80% or lower at origination. These loans are used to collateralize outstanding advances from the FHLB and borrowings from the FRB. Currently, we originate purchase money residential loans on a limited basis as well as refer customers seeking such loans to third parties.

Typically, commercial and five-or-more family residential real estate loans are made to borrowers who have existing banking relationships with us. Our underwriting standards generally require that the loan-to-value ratio for these loans not exceed 75% of appraised value, cost, or discounted cash flow value, as appropriate, and that commercial properties maintain debt coverage ratios (net operating income divided by annual debt servicing) of 1.2 or better. However, underwriting standards can be influenced by competition and other factors. We endeavor to maintain the highest practical underwriting standards while balancing the need to remain competitive in our lending practices.

Real Estate Construction Loans: Our underwriting guidelines for commercial and five-or-more family residential real estate construction loans generally require that the loan-to-value ratio not exceed 75% and stabilized debt coverage ratios (net operating income divided by annual debt servicing) of 1.2 or better. The recent economic environment has resulted in the Company having a substantially reduced desire to originate these types of loans. However, when we do originate such loans we endeavor to maintain the highest practical underwriting standards.

Currently, on a selected basis, we originate a variety of real estate construction loans. One-to-four family residential construction loans are originated for the construction of custom homes (where the home buyer is the borrower) and to provide financing to builders for the construction of pre-sold homes and speculative residential construction. Underwriting guidelines for these loans vary by loan type but include loan-to-value limits, term limits and loan advance limits, as applicable.

Consumer Loans: Consumer loans made by us include automobile loans, boat and recreational vehicle financing, home equity and home improvement loans, and miscellaneous personal loans.

Covered Loans: Covered loans are comprised of loans and loan commitments acquired in connection with the 2010 FDIC assisted acquisitions of Columbia River Bank and American Marine Bank. These loans are generically referred to as covered because they are generally subject to one of the loss sharing agreements between the Company and the FDIC. The loss sharing agreements limit the Company's losses to 20% of the contractual balance outstanding up to a stated threshold amount of \$206.0 million for Columbia River Bank and \$66.0 million for American Marine Bank. If losses exceed the stated threshold, the Company's share of the remaining losses decreases to 5%.

Foreign Outstanding: We are not involved with loans to foreign companies and foreign countries.

For additional information on our loan portfolio, including amounts pledged as collateral on borrowings, see Note 7 to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

Maturities and Sensitivities of Loans to Changes in Interest Rates

The following table presents the maturity distribution of our covered and noncovered commercial and real estate construction loan portfolios and the sensitivity of these loans due after one year to changes in interest rates as of December 31, 2010. Covered loan balances do not reflect valuation discount arising from acquisition accounting:

	Maturing			Total
	Due Through 1 Year	Over 1 Through 5 Years	Over 5 Years	
	<i>(in thousands)</i>			
Commercial business	\$467,233	\$277,602	\$215,790	\$ 960,625
Real estate construction	118,686	47,007	13,829	179,522
Total	<u>\$585,919</u>	<u>\$324,609</u>	<u>\$229,619</u>	<u>\$1,140,147</u>

Variable rate loans due after 1 year		147,238	168,611	315,849
Total		<u>\$324,609</u>	<u>\$229,619</u>	<u>\$ 554,228</u>

Risk Elements

The extension of credit in the form of loans or other credit substitutes to individuals and businesses is one of our principal commerce activities. Our policies, applicable laws, and regulations require risk analysis as well as ongoing portfolio and credit management. We manage our credit risk through lending limit constraints, credit review, approval policies, and extensive, ongoing internal monitoring. We also manage credit risk through diversification of the loan portfolio by type of loan, type of industry, type of borrower, and by limiting the aggregation of debt to a single borrower.

In analyzing our existing portfolio, we review our consumer and residential loan portfolios by their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. In contrast, the monitoring process for the commercial business, private banking, real estate construction, and commercial real estate portfolios includes periodic reviews of individual loans with risk ratings assigned to each loan and performance judged on a loan by loan basis.

We review these loans to assess the ability of our borrowers to service all interest and principal obligations and, as a result, the risk rating may be adjusted accordingly. In the event that full collection of principal and interest is not reasonably assured, the loan is appropriately downgraded and, if warranted, placed on non-accrual status even though the loan may be current as to principal and interest payments. Additionally, we assess whether an impairment of a loan warrants specific reserves or a write-down of the loan. For additional discussion on our methodology in managing credit risk within our loan portfolio see the following "Allowance for Loan and Lease Losses and Unfunded Commitments and Letters of Credit" section and Note 1 to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

Loan policies, credit quality criteria, portfolio guidelines and other controls are established under the guidance of our Chief Credit Officer and approved, as appropriate, by the Board. Credit Administration, together with the management loan committee, has the responsibility for administering the credit approval process. As another part of its control process, we use an independent internal credit review and examination function to provide reasonable assurance that loans and commitments are made and maintained as prescribed by our credit policies. This includes a review of documentation when the loan is initially extended and subsequent on-site examination to ensure continued performance and proper risk assessment.

Nonperforming Loans The Consolidated Financial Statements are prepared according to the accrual basis of accounting. This includes the recognition of interest income on the loan portfolio, unless a loan is placed on

nonaccrual status, which occurs when there are serious doubts about the collectability of principal or interest. Our policy is generally to discontinue the accrual of interest on all loans past due 90 days or more and place them on nonaccrual status. Covered loans accounted for under ASC 310-30 are generally considered accruing and performing as the loans accrete interest income over the estimated lives of the loans when cash flows are reasonably estimable. Accordingly, covered impaired loans contractually past due are still considered to be accruing and performing loans.

Nonperforming Assets: Nonperforming assets consist of: (i) nonaccrual loans, which generally are loans placed on a nonaccrual basis when the loan becomes past due 90 days or when there are otherwise serious doubts about the collectability of principal or interest within the existing terms of the loan; (ii) in most cases restructured loans, for which concessions, including the reduction of interest rates below a rate otherwise available to that borrower or the deferral of interest or principal, have been granted due to the borrower's weakened financial condition (interest on restructured loans is accrued at the restructured rates when it is anticipated that no loss of original principal will occur); (iii) other real estate owned; and (iv) other personal property owned, if applicable. Nonperforming assets totaled \$126.7 million, or 3.40% of year-end assets at December 31, 2010, compared to \$129.5 million or 4.05% of year end assets at December 31, 2009.

The following table sets forth information with respect to our noncovered, nonaccrual loans, restructured loans, total nonperforming loans (nonaccrual loans plus restructured loans), other real estate owned, other personal property owned, total nonperforming assets, accruing loans past-due 90 days or more, and potential problem loans:

Potential problem loans	\$ 3,793	\$ 11,423	\$ 17,736	\$ 2,343	\$ 2,288
Allowance for loan and lease losses	\$ 60,993	\$ 53,478	\$ 42,747	\$26,599	\$20,182
Allowance for loan and lease losses to nonperforming loans	63.75%	48.40%	40.04%	183.94%	579.94%
Nonperforming loans to year end loans	4.99%	5.50%	4.78%	0.63%	0.20%
Nonperforming assets to year end assets	2.98%	4.05%	3.54%	0.46%	0.14%

At December 31, 2010 nonperforming loans decreased to 4.99% of year end loans, down from 5.50% of year end loans at December 31, 2009. The nonperforming residential construction loan sector declined to \$18.0 million during 2010, down from \$47.7 million, or 43% of nonperforming loans at December 31, 2009. Nonperforming commercial real estate loans improved as well, declining from \$40.6 million at December 31, 2009 to \$30.8 million at year end 2010. Commercial business loans experienced a significant change, increasing from \$19.0 million, or 15% of nonperforming loans at December 31, 2009 to \$32.4 million or 34% of nonperforming loans at year end 2010. The length and depth of the recent economic recession negatively affected our business customers. As the economy slowly recovers, we have seen the problem loan issues migrate from Real Estate Construction to other commercial businesses. We believe all loan classes will continue to remain challenged in the near-term, but have appropriate risk management strategies in place to manage through this challenging economic cycle.

We remain aggressive in managing our construction loan portfolio and continue to be successful at reducing our overall exposure in the 1-4 family residential construction and the commercial real estate construction sectors. For the year, total nonperforming construction loans declined 60% due to payoffs, conversions to permanent loan status, and transfers to other real estate owned. Our 1-4 family residential construction loans now represent 3.5% of our entire loan portfolio. While the credit climate will likely remain stressed during 2011, we believe we have appropriate risk management strategies in place to manage through the current economic cycle.

Other Real Estate Owned: As of December 31, 2010 there was \$31.0 million in other real estate owned (“OREO”) which is comprised of property from foreclosed real estate loans, an increase of \$12.0 million from \$19.0 million at December 31, 2009. Additionally, as of December 31, 2010 the Company held \$14.4 million in OREO covered under FDIC loss sharing agreements which are excluded from nonperforming assets. Properties acquired by foreclosure or deed in lieu of foreclosure are transferred to OREO and are recorded at fair value less estimated costs to sell, at the date of transfer of the property. If the carrying value exceeds the fair value at the time of the transfer, the difference is charged to the allowance for loan and lease losses. The fair value of the OREO property is based upon current appraisal. Subsequent losses that result from the ongoing periodic valuation of these properties are charged to the net cost of operation of OREO expense in the period in which they are identified. In general, improvements to the OREO are capitalized and holding costs are charged to the net cost of operation of OREO as incurred.

Potential Problem Loans: Potential problem loans are loans which are currently performing and are not on nonaccrual status, restructured or impaired, but about which there are significant doubts as to the borrower’s future ability to comply with repayment terms and which may later be included in nonaccrual, past due, restructured or impaired loans. Potential problem loans totaled \$3.8 million at year end 2010, compared to \$11.4 million at year end 2009. For additional information on our nonperforming loans see Note 7 to our Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

The following table summarizes activity in noncovered, nonperforming loans for the period indicated:

Changes in Nonperforming Loans

	Twelve months ended December 31,	
	2010	2009
	<i>(in thousands)</i>	
Balance, beginning of period	\$110,491	\$106,750
Loans placed on nonaccrual or restructured	76,923	111,678
Advances	5,478	2,248
Charge-offs	(29,769)	(47,567)
Loans returned to accrual status	(15,478)	(2,482)
Repayments (including interest applied to principal)	(31,648)	(36,738)
Transfers to OREO	(20,329)	(23,398)
Balance, end of period	<u>\$ 95,668</u>	<u>\$110,491</u>

Loans are considered impaired when based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. The assessment for impairment occurs when and while such loans are designated as classified per the Company's internal risk rating system or when and while such loans are on nonaccrual. All nonaccrual loans greater than \$250,000 are considered impaired and analyzed individually on a quarterly basis. Classified loans with an outstanding balance greater than \$250,000 are evaluated for potential impairment on a quarterly basis. The Company's policy is to record cash receipts on impaired loans first as reductions in principal and then as interest income.

The following table summarizes noncovered, impaired loan financial data at December 31, 2010 and 2009:

<i>in thousands</i>	December 31,	
	2010	2009
Impaired loans	\$91,173	\$116,447
Impaired loans with specific allocations	\$14,408	\$ 18,129
Amount of the specific allocations	\$ 974	\$ 3,791

Impaired loans with a carrying amount of \$91.2 million at December 31, 2010 were subject to specific allocations of allowance for loan and lease losses of \$974 thousand and partial charge-offs of \$14.8 million during the year. Collateral dependent impaired loans without specific allocations at December 31, 2010 and 2009 either had collateral which exceeded the carrying value of the loans or reflected a partial charge-off to the market value of collateral (less costs to sell), as of the most recent appraisal date.

When a loan with unique risk characteristics has been identified as being impaired, the amount of impairment will be measured by the Company using discounted cash flows, except when it is determined that the primary (remaining) source of repayment for the loan is the operation or liquidation of the underlying collateral. In these cases, the current fair value of the collateral, reduced by costs to sell, will be used in place of discounted cash flows. As a final alternative, the observable market price of the debt may be used to assess impairment. Predominately, the Company uses the fair value of collateral approach based upon a reliable valuation.

When a loan secured by real estate migrates to nonperforming and impaired status and it does not have a market valuation less than one year old, the Company secures an updated market valuation by a third party appraiser that is reviewed by the Company's on staff appraiser. Subsequently, the asset will be appraised annually by a third party appraiser or the Company's on staff appraiser. The evaluation may occur more frequently if management determines that there has been increased market deterioration within a specific geographical location. Upon receipt and verification of the market valuation, the Company will record the loan at the lower of cost or market (less costs to sell) by recording a charge-off to the allowance for loan and lease losses or by designating a specific reserve in accordance with accounting principles generally accepted in the United States.

Allowance for Loan and Lease Losses and Unfunded Commitments and Letters of Credit

We maintain an allowance for loan and lease losses ("ALLL") to absorb losses inherent in the loan portfolio. The size of the ALLL is determined through quarterly assessments of the probable estimated losses in the loan portfolio. Our methodology for making such assessments and determining the adequacy of the ALLL includes the following key elements:

1. General valuation allowance consistent with the Contingencies topic of the FASB ASC.
2. Classified loss reserves on specific relationships. Specific allowances for identified problem loans are determined in accordance with the Receivables topic of the FASB ASC.

3. The unallocated allowance provides for other credit losses inherent in our loan portfolio that may not have been contemplated in the general and specific components of the allowance. This unallocated amount generally comprises less than 5% of the allowance. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends.

On a quarterly basis our Chief Credit Officer reviews with Executive Management and the Board of Directors the various additional factors that management considers when determining the adequacy of the ALLL, including economic and business condition reviews. Factors which influenced management's judgment in determining the amount of the additions to the ALLL charged to operating expense include the following as of the applicable balance sheet dates:

1. Existing general economic and business conditions affecting our market place
2. Credit quality trends
3. Historical loss experience
4. Seasoning of the loan portfolio
5. Bank regulatory examination results
6. Findings of internal credit examiners
7. Duration of current business cycle
8. Specific loss estimates for problem loans

The ALLL is increased by provisions for loan and lease losses ("provision") charged to expense, and is reduced by loans charged off, net of recoveries. While we believe the best information available is used by us to determine the ALLL, changes in market conditions could result in adjustments to the ALLL, affecting net income, if circumstances differ from the assumptions used in determining the ALLL.

In addition to the ALLL, we maintain an allowance for unfunded commitments and letters of credit. We report this allowance as a liability on our Consolidated Balance Sheet. We determine this amount using estimates of the probability of the ultimate funding and losses related to those credit exposures. This methodology is similar to the methodology we use for determining the adequacy of our ALLL. For additional information on our allowance for unfunded commitments and letters of credit, see Note 8 to the Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data" of this report.

Analysis of the ALLL

The following table provides an analysis of our noncovered loan loss experience by loan type for the last five years:

(1) Certain prior period balances have been reclassified to conform to the current period presentation.

(2) Excludes loans held for sale.

We have used the same methodology for ALLL calculations during 2010, 2009 and 2008. Adjustments to the percentages of the ALLL allocated to loan categories are made based on trends with respect to delinquencies and problem loans within each loan class. The Bank reviews the ALLL quantitative and qualitative methodology on a quarterly basis and makes adjustments when appropriate. The Bank maintains a conservative approach to credit quality and will continue to prudently add to our ALLL as necessary in order to maintain adequate reserves. The Bank carefully monitors the loan portfolio and continues to emphasize the importance of credit quality while continuously strengthening loan monitoring systems and controls.

Allocation of the ALLL

The table below sets forth the allocation of the ALLL by loan category:

Balance at End of Period Applicable to: (1)	December 31,									
	2010		2009		2008		2007		2006	
	Amount	% of Total Loans*	Amount	% of Total Loans*	Amount	% of Total Loans*	Amount	% of Total Loans*	Amount	% of Total Loans*
	<i>(dollars in thousands)</i>									
Commercial										
business	\$22,549	41.5%	\$21,969	37.1%	\$12,759	36.3%	\$ 7,068	33.4%	\$ 9,628	36.1%
Real estate and construction:										
One-to-four family residential	7,161	6.1%	9,087	8.5%	16,781	12.0%	7,648	14.5%	1,134	8.4%
Commercial and five or more family residential properties	25,880	42.8%	19,703	44.4%	11,983	42.1%	11,170	44.3%	8,841	46.9%
Consumer	2,120	9.5%	1,282	10.0%	935	9.6%	713	7.8%	281	8.6%
Unallocated	3,283	0.0%	1,437	0.0%	289	0.0%	—	0.0%	298	0.0%
Total	<u>\$60,993</u>	<u>100.0%</u>	<u>\$53,478</u>	<u>100.0%</u>	<u>\$42,747</u>	<u>100.0%</u>	<u>\$26,599</u>	<u>100.0%</u>	<u>\$20,182</u>	<u>100.0%</u>

* Represents the total of all outstanding loans in each category as a percent of total loans outstanding.

(1) Certain prior period balances have been reclassified to conform to the current period presentation.

Goodwill

The carrying amount of goodwill was \$109.6 million as of December 31, 2010 and \$95.5 million as of December 31, 2009. Goodwill is tested for impairment on an annual basis, or more frequently as events occur, or as current circumstances and conditions warrant. Under the Intangibles – Goodwill and Other topic of the FASB ASC, the testing for impairment of goodwill is a two-step process performed at the reporting level. In the first step of the goodwill impairment test (“Step I”), the fair value of a reporting unit is compared with its carrying amount. If the fair value of a reporting unit exceeds its carrying amount, there is no indication of impairment and further testing is not required. If the carrying amount of a reporting unit exceeds its fair value, then a second step of testing is required.

The Company performed its annual goodwill impairment test during the current quarter to determine whether and to what extent, if any, recorded goodwill was impaired. The analysis compared the fair value of the Company’s single reporting unit, including goodwill, to its carrying amounts utilizing a market approach to valuation. The results of the Step I Analysis indicated no impairment in the single, reporting unit of the Company. Accordingly, no further testing was required.

Deposits

The following table sets forth the composition of the Company's deposits by significant category:

	December 31,		
	2010	2009	2008
	<i>(in thousands)</i>		
Core deposits:			
Demand and other noninterest-bearing	\$ 895,671	\$ 574,687	\$ 466,078
Interest-bearing demand	672,307	499,922	519,124
Money market	920,831	604,229	530,065
Savings	210,995	139,406	122,076
Certificates of deposit less than \$100,000	298,678	254,577	303,704
Total core deposits	2,998,482	2,072,821	1,941,047
Certificates of deposit greater than \$100,000	266,708	259,794	338,971
Certificates of deposit insured by CDARS®	38,312	96,314	39,903
Wholesale certificates of deposit	23,155	53,776	62,230
Subtotal	3,326,657	2,482,705	2,382,151
Premium resulting from acquisition date fair value adjustment	612	—	—
Total deposits	<u>\$3,327,269</u>	<u>\$2,482,705</u>	<u>\$2,382,151</u>

Deposits totaled \$3.33 billion at December 31, 2010 compared to \$2.48 billion at December 31, 2009. Core deposits, which include noninterest-bearing deposits and interest-bearing deposits excluding time deposits of \$100,000 and over, provide a stable source of low cost funding. Core deposits increased to \$3.00 billion at December 31, 2010 compared with \$2.07 billion at December 31, 2009. We anticipate continued growth in our core deposits through both the addition of new customers and our current client base.

At December 31, 2010 brokered and other wholesale deposits (excluding public deposits) totaled \$61.5 million or 2% of total deposits compared to \$150.1 million or 6% of total deposits, at year-end 2009. The decrease in brokered deposits is attributed to the scheduled maturity of \$30.6 million in brokered deposits during the year and less participation in the Certificate of Deposit Account Registry Service ("CDARS®") program. CDARS® is a network that allows participating banks to offer extended FDIC deposit insurance coverage on certificates of deposit. Unlike traditional brokered deposits, the Company generally makes CDARS® available only to existing customers who desire additional deposit insurance coverage rather than as a means of generating additional liquidity.

At December 31, 2010 public deposits held by the Company totaled \$153.9 million compared to \$117.9 million at December 31, 2009. Uninsured public deposit balances increased from \$33.9 million at December 31, 2009 to \$122.6 million at December 31, 2010. The Company is required to fully collateralize Washington state public deposits and 75% of Oregon state public deposits.

The following table sets forth the amount outstanding of time certificates of deposit and other time deposits in amounts of \$100,000 or more by time remaining until maturity and percentage of total deposits:

<u>Amounts maturing in:</u>	December 31, 2010			
	Time Certificates of Deposit of \$100,000 or More		Other Time Deposits of \$100,000 or More	
	Amount	Percent of Total Deposits	Amount	Percent of Total Deposits
	<i>(dollars in thousands)</i>			
Three months or less	\$112,759	3%	\$24,745	1%
Over 3 through 6 months	40,671	1%	1,331	0%
Over 6 through 12 months	78,692	2%	10,398	1%
Over 12 months	57,925	2%	—	0%
Total	<u>\$290,047</u>	<u>9%</u>	<u>\$36,474</u>	<u>1%</u>

Other time deposits of \$100,000 or more set forth in the table above represent brokered and wholesale deposits. We use brokered and other wholesale deposits as part of our strategy for funding growth. In the future, we anticipate continuing the use of such deposits to fund loan demand or treasury functions.

The following table sets forth the average amount of and the average rate paid on each significant deposit category:

	Years ended December 31,					
	2010		2009		2008	
	Average Deposits	Rate	Average Deposits	Rate	Average Deposits	Rate
	<i>(dollars in thousands)</i>					
Interest bearing demand	\$ 637,983	0.34%	\$ 458,450	2.25%	\$ 445,449	1.35%
Money market	851,673	0.66%	568,320	0.26%	578,123	1.86%
Savings	199,117	0.14%	133,348	0.48%	118,073	0.37%
Certificates of deposit	763,829	1.14%	706,799	0.84%	780,092	3.60%
Total interest-bearing deposits	2,452,602	0.68%	1,866,917	1.25%	1,921,737	2.36%
Demand and other non-interest bearing	818,321		511,259		460,747	
Total average deposits	<u>\$3,270,923</u>		<u>\$2,378,176</u>		<u>\$2,382,484</u>	

Borrowings

Borrowed funds provide an additional source of funding for loan growth. Our borrowed funds consist primarily of borrowings from the Federal Home Loan (“FHLB”) and Federal Reserve Bank (“FRB”) as well as securities repurchase agreements. FHLB and FRB borrowings are secured by our loan portfolio and investment securities. Securities repurchase agreements are secured by investment securities and commercial loans.

The following tables set forth the details of FHLB advances and FRB borrowings:

	Years ended December 31,		
	2010	2009	2008
	<i>(dollars in thousands)</i>		
FHLB Advances			
Balance at end of year	\$119,405	\$100,000	\$150,000
Average balance during the year	\$123,685	\$111,211	\$282,624
Maximum month-end balance during the year	\$154,916	\$178,000	\$384,000
Weighted average rate during the year	2.75%	2.38%	2.53%
Weighted average rate at December 31	2.81%	2.49%	1.89%

	Years ended December 31,		
	2010	2009	2008
	<i>(dollars in thousands)</i>		
Federal Reserve Bank Borrowings			
Balance at end of year	\$ —	\$ —	\$ 50,000
Average balance during the year	\$ —	\$ 38,205	\$ 14,569
Maximum month-end balance during the year	\$ —	\$100,000	\$120,000
Weighted average rate during the year	0.00%	0.30%	0.62%
Weighted average rate at December 31	N/A	N/A	0.60%

For additional information on our borrowings, including amounts pledged as collateral, see Notes 13 and 14 to the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

Long-term Subordinated Debt

During 2001, we, participated in a pooled trust preferred offering through our subsidiary trust (the “Trust”), whereby the trust issued \$22.0 million of 30 year floating rate capital securities. The capital securities constitute guaranteed preferred beneficial interests in debentures issued by the trust. The debentures had an initial rate of 7.29% and a rate of 3.87% at December 31, 2010. The floating rate is based on the 3-month LIBOR plus 3.58% and is adjusted quarterly. Through the Trust we may call the debt at ten years at par, allowing us to retire the debt early if conditions are favorable. Through the 2007 Town Center Bancorp acquisition, the Company assumed an additional \$3.0 million in floating rate trust preferred obligations; these debentures had a rate of 4.04% at December 31, 2010. The floating rate is based on the 3-month LIBOR plus 3.75% and is adjusted quarterly.

Contractual Obligations & Commitments

We are party to many contractual financial obligations, including repayment of borrowings, operating and equipment lease payments, and commitments to extend credit. The table below presents certain future financial obligations of the Company:

	Payments due within time period at December 31, 2010				
	0-12 Months	1-3 Years	4-5 Years	Due after Five Years	Total
	<i>(in thousands)</i>				
Operating & equipment leases	\$ 4,260	\$ 7,967	\$ 6,657	\$ 7,349	\$ 26,233
Total deposits	3,197,197	88,723	40,561	788	3,327,269
Federal Home Loan Bank advances	7,000	110,290	—	1,483	118,773
Other borrowings	642	—	—	25,000	25,642
Long-term subordinated debt	—	—	—	25,735	25,735
Total	<u>\$3,209,099</u>	<u>\$206,980</u>	<u>\$47,218</u>	<u>\$60,355</u>	<u>\$3,523,652</u>

At December 31, 2010, we had commitments to extend credit of \$612.0 million compared to \$587.5 million at December 31, 2009. For additional information regarding future financial commitments, see Note 20 to our Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report.

Liquidity and Sources of Funds

In general, our primary sources of funds are net income, loan repayments, maturities and principal payments on investment securities, customer deposits, advances from the FHLB and FRB, securities repurchase agreements and other borrowings. These funds are used to make loans, purchase investments, meet deposit withdrawals and maturing liabilities and cover operational expenses. Scheduled loan repayments and core deposits have proved to be a relatively stable source of funds while other deposit inflows and unscheduled loan prepayments are influenced by interest rate levels, competition and general economic conditions. We manage liquidity through monitoring sources and uses of funds on a daily basis and had unused credit lines with the FHLB and the Federal Reserve Bank of \$402.0 million and \$449.4 million, respectively, at December 31, 2010, that are available to us as a supplemental funding source. The holding company’s sources of funds are dividends from its banking subsidiary which are used to fund dividends to common and preferred shareholders and cover operating expenses.

Capital Expenditures

Capital expenditures are anticipated to be approximately \$5.6 million during 2011.

See the Statement of Cash Flows of the Consolidated Financial Statements in “Item 8. Financial Statements and Supplementary Data” of this report for additional information regarding our sources and uses of funds during 2010, 2009 and 2008.

Capital

Our shareholders’ equity increased to \$706.9 million at December 31, 2010, from \$528.1 million at December 31, 2009. Shareholders’ equity was 16.61% and 16.50% of total assets at December 31, 2010 and 2009.

Preferred Stock. On August 11, 2010, the Company redeemed all 76,898 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A (“Preferred Stock”) originally issued to the U.S. Department of Treasury (“the Treasury”) on November 21, 2008 for approximately \$76.9 million in capital under its Capital Purchase Program (“CPP”). The Company paid a total of \$77.8 million to the Treasury, consisting of \$76.9 million in principal and \$919 thousand in accrued and unpaid dividends. Earnings available to the common shareholders were reduced by \$2.3 million upon repayment of the Preferred Stock, which represented the remaining unaccreted discount on the Preferred Stock. Additionally, on September 1, 2010, the Company repurchased the common stock warrant issued to the Treasury pursuant to the Troubled Asset Relief Program (“TARP”) CPP for \$3.3 million. The warrant repurchase, together with the Company’s redemption of its entire Preferred Stock issued to the Treasury, represented full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the Treasury.

Common Stock. On May 5, 2010, the Company completed an underwritten public offering of 11,040,000 shares of our common stock at a purchase price to the public of \$21.75 per share, resulting in gross proceeds of approximately \$240.1 million and net proceeds to us of approximately \$229.1 million.

Regulatory Capital. Banking regulations require bank holding companies to maintain a minimum “leverage” ratio of core capital to adjusted quarterly average total assets of at least 3%. In addition, banking regulators have adopted risk-based capital guidelines, under which risk percentages are assigned to various categories of assets and off-balance sheet items to calculate a risk-adjusted capital ratio. Tier I capital generally consists of preferred

stock, common shareholders' equity and trust preferred obligations, less goodwill and certain identifiable intangible assets, while Tier II capital includes the allowance for loan losses and subordinated debt, both subject to certain limitations. Regulatory minimum risk-based capital guidelines require Tier I capital of 4% of risk-adjusted assets and total capital (combined Tier I and Tier II) of 8% to be considered "adequately capitalized".

Federal Deposit Insurance Corporation regulations set forth the qualifications necessary for a bank to be classified as "well capitalized", primarily for assignment of FDIC insurance premium rates. To qualify as "well capitalized," banks must have a Tier I risk-adjusted capital ratio of at least 6%, a total risk-adjusted capital ratio of at least 10%, and a leverage ratio of at least 5%. Failure to qualify as "well capitalized" can negatively impact a bank's ability to expand and to engage in certain activities. The Company and its banking subsidiary qualify as "well-capitalized" at December 31, 2010 and 2009.

The following table sets forth the Company's and its banking subsidiary's capital ratios at December 31, 2010 and 2009:

	<u>Company</u>		<u>Columbia Bank</u>		<u>Requirements</u>	
	<u>2010</u>	<u>2009</u>	<u>2010</u>	<u>2009</u>	<u>Adequately capitalized</u>	<u>Well-Capitalized</u>
Total risk-based capital ratio	24.47%	19.60%	18.20%	16.17%	8%	10%
Tier 1 risk-based capital ratio	23.20%	18.34%	16.93%	14.91%	4%	6%
Leverage ratio	13.99%	14.33%	10.33%	11.73%	4%	5%

Dividends

The following table sets forth the dividends paid per common share and the dividend payout ratio (dividends paid per common share divided by basic earnings per share):

	<u>Years ended December 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
Dividends paid per common share	\$0.04	\$0.07	\$0.58
Dividend payout ratio (1)	6%	NM	193%

(1) Dividends paid per common share as a percentage of net income per diluted share

NM Not Meaningful

For quarterly detail of dividends declared during 2010 and 2009 see "Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities" of this report.

Applicable federal, Washington state and Oregon regulations restrict capital distributions, including dividends, by the Company's banking subsidiary. Such restrictions are tied to the institution's capital levels after giving effect to distributions. Our ability to pay cash dividends is substantially dependent upon receipt of dividends from our banking subsidiary. In addition, the payment of cash dividends is subject to Federal regulatory requirements for capital levels and other restrictions. In this regard, current guidance from the Federal Reserve provides, among other things, that dividends per share on the Company's common stock generally should not exceed earnings per share, measured over the previous four fiscal quarters.

Reference "Item 6. Selected Financial Data" of this report for our return on average assets, return on average equity and average equity to average assets ratios for all reported periods.

Non-GAAP Financial Measures

In addition to capital ratios defined by banking regulators, the Company considers various measures when evaluating capital utilization and adequacy, including:

- Tangible common equity to tangible assets, and
- Tangible common equity to risk-weighted assets.

The Company believes these measures are important because they reflect the level of capital available to withstand unexpected market conditions. Additionally, presentation of these measures allows readers to compare certain aspects of the Company's capitalization to other organizations. These ratios differ from capital measures defined by banking regulators principally in that the numerator excludes shareholders' equity associated with preferred securities, the nature and extent of which varies across organizations. Additionally, these measures present capital adequacy inclusive and exclusive of accumulated other comprehensive income. These calculations are intended to complement the capital ratios defined by banking regulators for both absolute and comparative purposes.

Because generally accepted accounting principles ("GAAP") do not include capital ratio measures, the Company believes there are no comparable GAAP financial measures to these tangible common equity ratios. The following table reconciles the Company's calculation of these measures to amounts reported under GAAP.

Despite the importance of these measures to the Company, there are no standardized definitions for them and, as a result, the Company's calculations may not be comparable with other organizations. Also, there may be limits in the usefulness of these measures to investors. As a result, the Company encourages readers to consider its consolidated financial statements in their entirety and not to rely on any single financial measure.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Sensitivity

We are exposed to interest rate risk, which is the risk that changes in prevailing interest rates will adversely affect assets, liabilities, capital, income and expenses at different times or in different amounts. Generally, there are four sources of interest rate risk as described below:

Repricing risk—Repricing risk is the risk of adverse consequences from a change in interest rates that arises because of differences in the timing of when those interest rate changes affect an institution's assets and liabilities.

Basis risk—Basis risk is the risk of adverse consequence resulting from unequal changes in the spread between two or more rates for different instruments with the same maturity.

Yield curve risk—Yield curve risk is the risk of adverse consequence resulting from unequal changes in the spread between two or more rates for different maturities for the same instrument.

Option risk—In banking, option risks are known as borrower options to prepay loans and depositor options to make deposits, withdrawals, and early redemptions. Option risk arises whenever bank products give customers the right, but not the obligation, to alter the quantity or the timing of cash flows.

We maintain an asset/liability management policy that provides guidelines for controlling exposure to interest rate risk. The guidelines direct management to assess the impact of changes in interest rates upon both earnings and capital. The guidelines further provide that in the event of an increase in interest rate risk beyond pre-established limits, management will consider steps to reduce interest rate risk to acceptable levels.

The analysis of an institution's interest rate gap (the difference between the repricing of interest-earning assets and interest-bearing liabilities during a given period of time) is one standard tool for the measurement of the exposure to interest rate risk. We believe that because interest rate gap analysis does not address all factors that can affect earnings performance. It should be used in conjunction with other methods of evaluating interest rate risk.

The table on the following page sets forth the estimated maturity or repricing, and the resulting interest rate gap of our interest-earning assets and interest-bearing liabilities at December 31, 2010. The amounts in the table are derived from our internal data and are based upon regulatory reporting formats. Therefore, they may not be consistent with financial information appearing elsewhere herein that has been prepared in accordance with accounting principles generally accepted in the United States. The amounts could be significantly affected by external factors such as changes in prepayment assumptions, early withdrawal of deposits and competition. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while other types may lag changes in market interest rates.

Additionally, certain assets, such as adjustable-rate mortgages, have features that restrict changes in the interest rates of such assets both on a short-term basis and over the lives of such assets. Further, in the event of a change in market interest rates, prepayment and early withdrawal levels could deviate significantly from those assumed in calculating the tables. Finally, the ability of many borrowers to service their adjustable-rate debt may decrease in the event of a substantial increase in market interest rates.

December 31, 2010	Estimated Maturity or Repricing				Total
	0-3 months	4-12 months	Over 1 year through 5 years	Due after 5 years

Rate sensitivity gap	\$ 418,582	\$128,182	\$1,122,067	\$ (597,230)	
Cumulative rate sensitivity gap	\$ 418,582	\$546,764	\$1,668,831	\$1,071,601	
Rate sensitivity gap as a percentage of interest-earning assets	11.39%	3.49%	30.54%	-16.26%	
Cumulative rate sensitivity gap as a percentage of interest-earning assets	11.39%	14.88%	45.42%	29.17%	

Interest Rate Sensitivity on Net Interest Income

A number of measures are used to monitor and manage interest rate risk, including income simulations and interest sensitivity (gap) analyses. An income simulation model is the primary tool used to assess the direction and magnitude of changes in net interest income resulting from changes in interest rates. Key assumptions in the model include prepayment speeds on mortgage-related assets, cash flows and maturities of other investment securities, loan and deposit volumes and pricing. These assumptions are inherently uncertain and, as a result, the model cannot precisely estimate net interest income or precisely predict the impact of higher or lower interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes and changes in market conditions and management strategies, among other factors.

Based on the results of the simulation model as of December 31, 2010, we would expect a decrease in net interest income of \$1.8 million if interest rates gradually decrease from current rates by 100 basis points and an increase in net interest income of \$5.9 million if interest rates gradually increase from current rates by 200 basis points over a twelve-month period.

Impact of Inflation and Changing Prices

The impact of inflation on our operations is increased operating costs. Unlike most industrial companies, virtually all the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates generally have a more significant impact on a financial institution's performance than the effect of general levels of inflation. Although interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services, increases in inflation generally have resulted in increased interest rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Columbia Banking System, Inc.
Tacoma, Washington

We have audited the accompanying consolidated balance sheets of Columbia Banking System, Inc. and its subsidiaries (the “Company”) as of December 31, 2010 and 2009, and the related consolidated statements of income, changes in shareholders’ equity, and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of Columbia Banking System, Inc. and its subsidiaries as of December 31, 2010 and 2009, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of December 31, 2010, based on the criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2011 expressed an unqualified opinion on the Company’s internal control over financial reporting.

COLUMBIA BANKING SYSTEM, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the Years Ended December 31, 2010, 2009 and 2008

1. Summary of Significant Accounting Policies

Organization

Columbia Banking System, Inc. (the “Corporation”) is the holding company for Columbia State Bank (the “Bank”). The Bank provides a full range of financial services through 84 branch offices, including 59 in the State of Washington and 25 in Oregon. The Corporation also has two unconsolidated subsidiaries, Columbia (WA) Statutory Trust and Town Center Bancorp Statutory Trust. Because the Bank comprises substantially all of the business of the Corporation, references to the “Company” mean the Corporation and the Bank together. The Corporation is approved as a bank holding company pursuant to the Gramm-Leach-Bliley Act of 1999.

The Company’s accounting and reporting policies conform to accounting principles generally accepted in the United States of America (“GAAP”) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and income and expenses during the reporting period. Circumstances and events that differ significantly from those underlying our estimates and assumptions could cause actual financial results to differ from our estimates. The most significant estimates included in the financial statements relate to the allowance for loan and lease losses, business combinations, acquired impaired loans, Federal Deposit Insurance Corporation loss sharing asset and goodwill impairment.

The Company has applied its accounting policies and estimation methods consistently in all periods presented in these financial statements (to the periods in which they applied). The results of operations reflect any adjustments, all of which are of a normal recurring nature, and which, in the opinion of management, are necessary for a fair presentation of the results of the periods presented.

Consolidation

The consolidated financial statements of the Company include the accounts of the Corporation and the Bank. Intercompany balances and transactions have been eliminated in consolidation.

Cash and cash equivalents

Cash and cash equivalents include cash and due from banks, and interest bearing balances due from correspondent banks and the Federal Reserve Bank. Cash and cash equivalents have a maturity of 90 days or less at the time of purchase.

Securities

Securities are classified based on management’s intention on the date of purchase. All securities are classified as available for sale and are presented at fair value. Unrealized gains or losses on securities available for sale are excluded from net income but are included as separate components of other comprehensive income, net of taxes. Purchase premiums or discounts on securities available for sale are amortized or accreted into income using the interest method over the terms of the individual securities. The Company performs a quarterly assessment to determine whether a decline in fair value below amortized cost is other-than-temporary. Amortized cost includes adjustments made to the cost of an investment for accretion, amortization, collection of cash and previous other-than temporary impairment recognized in earnings. Other-than-temporary impairment exists when it is probable that the Company will be unable to recover the entire amortized cost basis of the security. If the decline in fair value is judged to be other than temporary, the security is written down to fair value which becomes the new cost basis and an impairment loss is recognized.

In performing the quarterly assessment for debt securities, management considers whether or not the Company expects to recover the entire amortized cost basis of the security. In addition, management must determine its position with respect to its intent to sell the security and whether it is more likely than not that it will not have to sell the security before recovery of its cost basis. The total amount recognized in earnings when there are credit losses associated with an impaired debt security and management asserts that it does not have the intent to sell the security and it is more likely than not that it will not have to sell the security before recovery of its cost basis is separated into (a) the amount representing a credit loss and (b) the amount related to non-credit factors. The amount of impairment related to credit losses is recognized in earnings. The credit loss component of other-than-temporary impairment, representing an increase in credit risk, is determined by the Company using its best estimate of the present value of cash flows expected to be collected from the debt security. The amount of impairment related to non-credit factors is recognized in other comprehensive income. The previous cost basis less impairment recognized in earnings becomes the new cost basis of the security and is not adjusted for subsequent recoveries in fair value. However, the difference between the new amortized cost basis and the cash flows expected to be collected is accreted as interest income. The total other-than-temporary impairment is presented in the consolidated statements of income with a reduction for the amount of other-than-temporary impairment that is recognized in other comprehensive income, if any.

Realized gains or losses on sales of securities available for sale are recorded using the specific identification method.

Federal Home Loan Bank Stock

The Company's investment in Federal Home Loan Bank ("FHLB") stock is carried at par value because the shares can only be redeemed with the FHLB at par. The Company is required to maintain a minimum level of investment in FHLB stock based on specific percentages of its outstanding mortgages and FHLB advances. Stock redemptions are at the discretion of the FHLB or of the Company, upon five years' prior notice for FHLB Class B stock or six months notice for FHLB Class A stock to the FHLB. FHLB stock is carried at cost and is subject to recoverability testing per the Financial Services—Depository and Lending topic of the FASB Accounting Standards Codification ("ASC").

Loans

The Company's accounting methods for loans differ depending on whether the loans were originated or were acquired as a result of a business acquisition.

Originated Loans

Loans are generally carried at principal amounts less net deferred loan fees. Net deferred loan fees include deferred unamortized origination fees less direct incremental origination costs. Net deferred loan fees are amortized into interest income over the contractual life of the related loans. The amortization is calculated using the interest method for all loans except revolving loans, for which the straight-line method is used. Interest income is accrued as earned. Fees related to lending activities other than the origination or purchase of loans are recognized as noninterest income during the period the related services are performed.

Loans are placed on nonaccrual status when a loan becomes contractually past due 90 days with respect to interest or principal unless the loan is both well secured and in the process of collection, or if full collection of interest or principal becomes uncertain. When a loan is placed on nonaccrual status, the accrued and unpaid interest receivable is reversed and the accretion of net deferred loan fees ceases. Thereafter, interest collected on the loan is accounted for on the cash collection or cost recovery method until qualifying for return to accrual status. Generally, a loan may be returned to accrual status when the delinquent principal and interest are brought current in accordance with the terms of the loan agreement and future payments are reasonably assured.

Loans are considered impaired when based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. The assessment for impairment occurs when and while such loans are designated as classified per the Company's internal risk rating system or when and while such loans are on nonaccrual. All nonaccrual loans greater than \$250,000 are considered impaired and analyzed individually on a quarterly basis. Classified loans with an outstanding balance greater than \$250,000 are evaluated for potential impairment on a quarterly basis.

When a loan with unique risk characteristics has been identified as being impaired, the amount of impairment will be measured by the Company using discounted cash flows, except when it is determined that the primary (remaining) source of repayment for the loan is the operation or liquidation of the underlying collateral. In these cases, the current fair value of the collateral, reduced by costs to sell, will be used in place of discounted cash flows. As a final alternative, the observable market price of the debt may be used to assess impairment. Predominantly, the Company uses the fair value of collateral approach based upon a reliable valuation.

When the measurement of the impaired loan is less than the recorded amount of the loan, an impairment is recognized by recording a charge-off to the allowance for loan and lease losses or by designating a specific reserve. The Company's policy is to record cash receipts received on impaired loans first as reductions to principal and then to interest income.

Unfunded commitments are generally related to providing credit facilities to clients of the Bank, and are not actively traded financial instruments.

Acquired Loans

Loans acquired in a business acquisition after December 31, 2008 are recorded at their fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date.

Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under Accounting Standards Codification ("ASC") 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, formerly SOP 03-3 *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*. In situations where such loans have similar risk characteristics, loans are aggregated into pools to estimate cash flows. The Company aggregated all of the loans acquired in the Federal Deposit Insurance Corporation ("FDIC")-assisted acquisitions into pools, based on common risk characteristics. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. Expected cash flows at the acquisition date in excess of the fair value of loans are considered to be accretible yield, which is recognized as interest income over the life of the loan pool using a level yield method if the timing and amount of the future cash flows of the pool is reasonably estimable. Subsequent to the acquisition date, any increases in cash flow over those expected at purchase date in excess of fair value are recorded as interest income prospectively. Any subsequent decreases in cash flow over those expected at purchase date are recognized by recording an allowance for losses on covered loans. Any disposals of loans, including sales of loans, payments in full or foreclosures result in the removal of the loan from the loan pool at the carrying amount. The Company elected to account for all acquired loans under ASC 310-30.

Allowance for Loan and Lease Losses

The Company accounts for the credit risk associated with lending activities through its allowance for loan and lease losses and provision for loan and lease losses. The provision is the expense recognized in the consolidated statements of income to adjust the allowance to the levels deemed appropriate by management, as determined through application of the Company's allowance methodology procedures. The provision for loan and lease losses reflects management's judgment of the adequacy of the allowance for loan and lease losses. Loan and lease losses are charged against the allowance when management believes the collectability of a loan balance is unlikely. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan and lease losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of general, specific, and unallocated components. The general component covers loans not specifically measured for impairment and is based on historical loss experience adjusted for qualitative factors. The specific component relates to loans that are impaired. For impaired loans an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The unallocated allowance provides for other credit losses inherent in the Company's loan portfolio that may not have been contemplated in the general and specific components of the allowance. This unallocated amount generally comprises less than 5% of the allowance. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends.

Allowance for Unfunded Commitments and Letters of Credit

The allowance for unfunded commitments is maintained at a level believed by management to be sufficient to absorb estimated probable losses related to these unfunded credit facilities. The determination of the adequacy of the allowance is based on periodic evaluations of the unfunded credit facilities including an assessment of the probability of commitment usage, credit risk factors for loans outstanding to these same customers, and the terms and expiration dates of the unfunded credit facilities. The allowance for unfunded commitments is included in other liabilities on the consolidated balance sheets, with changes to the balance charged against noninterest expense.

Premises and Equipment

Land, buildings, leasehold improvements and equipment are stated at cost less accumulated depreciation and amortization. Buildings and equipment are depreciated over their estimated useful lives using the straight-line method. Leasehold improvements are amortized over the shorter of their useful lives or lease terms. Gains or losses on dispositions are reflected in current operations. Expenditures for improvements and major renewals are capitalized, and ordinary maintenance, repairs and small purchases are charged to operating expenses.

Software

Capitalized software is stated at cost, less accumulated amortization. Amortization is computed on a straight-line basis and charged to expense over the estimated useful life of the software which is generally three years. Capitalized software is included in Premises and equipment, net in the consolidated balance sheets.

Other Real Estate Owned—Noncovered

Other real estate owned ("OREO") is composed of real estate acquired in satisfaction of loans. Properties acquired by foreclosure or deed in lieu of foreclosure are transferred to OREO and are recorded at fair value less estimated costs to sell, at the date of transfer of the property. If the carrying value exceeds the fair value at the time of the transfer, the difference is charged to the allowance for loan and lease losses. The fair value of the OREO property is based upon current appraisal. Losses that result from the ongoing periodic valuation of these properties are charged to the net cost of operation of OREO in the period in which they are identified. Improvements to the OREO are capitalized and holding costs are charged to the net cost of operation of OREO as incurred.

Covered Assets and Related FDIC Loss Sharing Asset

Assets subject to loss-sharing agreements with the FDIC are labeled "covered" on the Consolidated Condensed Balance Sheet and include certain loans and OREO.

All OREO acquired in FDIC-assisted acquisitions are subject to FDIC loss-sharing agreements and are referred to as covered OREO. Covered OREO is reported exclusive of expected reimbursement cash flows from the FDIC. Upon transferring covered loan collateral to covered OREO status, valuation adjustments arising from acquisition accounting on the related loan are also transferred to covered OREO. Valuation adjustments arising from acquisition accounting on covered OREO result in a reduction of the covered OREO carrying amount and a corresponding increase in the expected FDIC reimbursement, with the estimated net loss to the Company, if any, charged against earnings.

The acquisition date fair value of the reimbursement the Company expected to receive from the FDIC under those agreements was recorded in the FDIC loss sharing asset on the Consolidated Condensed Balance Sheet. Subsequent to the acquisition the loss sharing asset is tied to the loss in the covered loans and covered OREO and is not being accounted for under fair value. The FDIC loss sharing asset is accounted for on the same basis as the related covered loans and covered OREO and primarily represents the present value of the cash flows the Company expects to collect from the FDIC under the loss-sharing agreements. The difference between the carrying value and the undiscounted cash flow the Company expects to collect from the FDIC is accreted into noninterest income over the life of the FDIC loss sharing asset. The FDIC loss sharing asset is adjusted for any changes in expected cash flows based on the loan performance. Any projected increase in cash flows of the loans over those expected will result in a decrease in the accretion for the FDIC loss sharing asset recognized in noninterest income. Any projected decrease in cash flows of the loans over those expected will result in an increase in the FDIC loss sharing asset with a corresponding benefit recorded to noninterest income.

Goodwill and Intangibles

Net assets of companies acquired in purchase transactions are recorded at fair value at the date of acquisition. Identified intangibles are amortized on an accelerated basis over the period benefited. Goodwill is not amortized but is reviewed for potential impairment during the third quarter on an annual basis or, more frequently, if events or circumstances indicate a potential impairment, at the reporting unit level. A reporting unit is an operating segment or one level below an operating segment for which discrete financial information is available and regularly reviewed by management. If the fair value of the reporting unit, including goodwill, is determined to be less than the carrying amount of the reporting unit, a further test is required to measure the amount of impairment. If an impairment loss exists, the carrying amount of goodwill is adjusted to a new cost basis. Subsequent reversal of a previously recognized goodwill impairment loss is prohibited.

Intangible assets are evaluated for impairment if events and circumstances indicate a possible impairment. Such evaluation of other intangible assets is based on undiscounted cash flow projections. At December 31, 2010, intangible assets included on the consolidated balance sheets consist of a core deposit intangible amortized using an accelerated method with an original estimated life of approximately 10 years.

Income Taxes

The provision for income taxes includes current and deferred income tax expense on net income adjusted for permanent and temporary differences such as interest income on state and municipal securities and affordable housing credits. Deferred tax assets and liabilities are recognized for the expected future tax consequences of existing temporary differences between the financial reporting and tax reporting basis of assets and liabilities using enacted tax laws and rates. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. On a quarterly basis, management evaluates deferred tax assets to determine if these tax benefits are expected to be realized in future periods. This determination is based on facts and circumstances, including the Company's current and future tax outlook. To the extent a deferred tax asset is no longer considered "more likely than not" to be realized, a valuation allowance is established.

Earnings per Common Share

The Company calculates earnings per common share (“EPS”) using the two-class method in accordance with the Earnings per Share topic of the FASB ASC. The two-class method requires the Company to present EPS as if all of the earnings for the period are distributed to common shareholders and any participating securities, regardless of whether any actual dividends or distributions are made. Under authoritative guidance, all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities. The Company grants restricted shares under a share-based compensation plan that qualifies as participating securities. Restricted shares issued under the Company’s share-based compensation plan are entitled to dividends at the same rate as common stock.

Basic EPS are computed by dividing distributed and undistributed earnings available to common shareholders by the weighted average number of common shares outstanding for the period. Distributed and undistributed earnings available to common shareholders represent net income reduced by preferred stock dividends and distributed and undistributed earnings available to participating securities. Common shares outstanding include common stock and vested restricted stock awards. Diluted EPS reflect the assumed conversion of all potential dilutive securities.

Share-Based Payment

The Company accounts for stock options and stock awards in accordance with the Compensation—Stock Compensation topic of the FASB ASC. Authoritative guidance requires the Company to measure the cost of employee services received in exchange for an award of equity instruments, such as stock options or stock awards, based on the fair value of the award on the grant date. This cost must be recognized in the consolidated statements of income over the vesting period of the award.

The Company issues restricted stock awards which generally vest over a four- or five-year period during which time the holder receives dividends and has full voting rights. Restricted stock is valued at the closing price of the Company’s stock on the date of an award.

Derivatives and Hedging Activities

In accordance with the Derivatives and Hedging topic of the FASB ASC, the Company recognizes derivatives as assets or liabilities on the consolidated balance sheets at their fair value. The treatment of changes in the fair value of derivatives depends on the character of the transaction.

The Company enters into derivative contracts to add stability to interest income and to manage its exposure to changes in interest rates. On the date the Company enters into a derivative contract, the derivative instrument is designated as: (1) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (a “fair value” hedge); (2) a hedge of the variability in expected future cash flows associated with an existing recognized asset or liability or a probable forecasted transaction (a “cash flow” hedge); or (3) held for other economic purposes (an “economic” hedge) and not formally designated as part of qualifying hedging relationships under authoritative guidance.

In a fair value hedge, changes in the fair value of the hedging derivative are recognized in earnings and offset by recognizing changes in the fair value of the hedged item attributable to the risk being hedged. To the extent that the hedge is ineffective, the changes in fair value will not offset and the difference is reflected in earnings.

In a cash flow hedge, the effective portion of the change in the fair value of the hedging derivative is recorded in accumulated other comprehensive income and is subsequently reclassified into earnings during the same period in which the hedged item affects earnings. The change in fair value of any ineffective portion of the hedging derivative is recognized immediately in earnings. When a cash flow hedge is discontinued, the net derivative gain or loss continues to be reported in accumulated other comprehensive income unless it is probable

that the forecasted transactions will not occur by the end of the originally specified time period. The net derivative gain or loss from a discontinued cash flow hedge is reclassified into earnings during the originally specified time period in which the forecasted transactions were to occur.

The Company formally documents the relationship between the hedging instruments and hedged items, as well as its risk management objective and strategy before initiating a hedge. To qualify for hedge accounting, the derivatives and related hedged items must be designated as a hedge. For hedging relationships in which effectiveness is measured, the correlations between the hedging instruments and hedged items are assessed at inception of the hedge and on an ongoing basis, which includes determining whether the hedge relationship is expected to be highly effective in offsetting changes in fair value or cash flows of hedged items.

Derivatives used for other economic purposes are used as economic hedges in which the Company has not attempted to achieve the highly effective hedge accounting standard under authoritative guidance. The changes in fair value of these instruments are recognized immediately in earnings.

Accounting Pronouncements

During the year ended December 31, 2010, the following Accounting Standards Updates (“ASU”) were issued or became effective:

In July 2010, the Financial Accounting Standards Board (“the FASB”) issued ASU 2010-20, an amendment of *Receivables—Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* (Topic 310). ASU 2010-20 requires new and enhanced disclosure requirements about the credit quality of an entity’s financing receivables and its allowance for credit losses. The new and amended disclosure requirements focus on such areas as nonaccrual and past due financing receivables, allowance for credit losses related to financing receivables, impaired loans, credit quality information and modifications. The ASU requires an entity to disaggregate new and existing disclosures based on how it develops its allowance for credit losses and how it manages credit exposures. The expanded period-end disclosure requirements became effective for the Company for the year ended December 31, 2010 (see note 7 and note 8). The expanded disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. The new guidance did not have a material impact on the Company’s consolidated financial statements.

In April 2010, the FASB issued ASU 2010-18, an amendment of *Receivables—Loans and Debt Securities Acquired with Deteriorated Credit Quality* (Topic 310-30). ASU 2010-18 attempts to eliminate diversity in practice related to loan modifications. Modifications of loans within a pool of loans accounted for as a single asset do not result in the removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled debt restructuring. The entity will continue to be required to consider whether the pool of assets in which the loans are included is impaired if expected cash flows for the pool change. The new guidance became effective for the Company in the first reporting period ended on or after July 15, 2010 and was applied prospectively. The Company was already in compliance with the amendments of this topic prior to the release of ASU 2010-18. The new guidance did not have an impact on the Company’s consolidated financial statements.

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures* (Topic 820), which focuses on *Improving Disclosures about Fair Value Measurement*. ASU 2010-06 requires new disclosures about transfers in and out of Level 1 and Level 2 fair value measurements and the activity in Level 3 fair value measurements (i.e. purchases, sales, issuances, and settlements). ASU 2010-06 also amended disclosure requirements related to the level of disaggregation of assets and liabilities, as well as disclosures about input and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements. The new guidance became effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements and did not have a material impact on the Company’s consolidated financial

statements. Those disclosures related to activity in the Level 3 fair value measurements are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years and are not expected to have a significant impact on the Company's consolidated financial statements.

2. Earnings per Common Share

The Company applies the two-class method of computing basic and diluted EPS. Under the two-class method, EPS is determined for each class of common stock and participating security according to dividends declared and participation rights in undistributed earnings. The Company grants restricted shares under a share-based compensation plan that qualify as participating securities under the Earnings per Share topic of the FASB Accounting Standards Codification.

The following table sets forth the computation of basic and diluted earnings per share for the periods indicated:

	Year Ended December 31,		
	2010	2009	2008 (1)
	<i>(in thousands except per share)</i>		
Basic EPS:			
Net income (loss)	\$30,784	\$ (3,968)	\$ 5,968
Less: Preferred dividends and accretion of issuance discount for preferred stock	(4,947)	(4,403)	(470)
Net income applicable to common shareholders	\$25,837	\$ (8,371)	\$ 5,498
Less: Earnings allocated to participating securities	(244)	(16)	(104)
Earnings (loss) allocated to common shareholders	<u>\$25,593</u>	<u>\$ (8,387)</u>	<u>\$ 5,394</u>
Weighted average common shares outstanding	35,209	21,854	17,914
Basic earnings (loss) per common share	<u>\$ 0.73</u>	<u>\$ (0.38)</u>	<u>\$ 0.30</u>
Diluted EPS:			
Earnings (loss) allocated to common shareholders (2)	<u>\$25,593</u>	<u>\$ (8,410)</u>	<u>\$ 5,394</u>
Weighted average common shares outstanding	35,209	21,854	17,914
Dilutive effect of equity awards	183	—	96
Weighted average diluted common shares outstanding (3)	<u>35,392</u>	<u>21,854</u>	<u>18,010</u>
Diluted earnings (loss) per common share	<u>\$ 0.72</u>	<u>\$ (0.38)</u>	<u>\$ 0.30</u>
Potentially dilutive securities that were not included in the computation of diluted EPS because to do so would be anti-dilutive.	54	754	54

- (1) The Company adopted authoritative guidance in the Earnings per Share topic of the FASB ASC on January 1, 2009. All prior periods have been restated to the current period's presentation.
- (2) Earnings allocated to common shareholders for basic and diluted EPS may differ under the two-class method as a result of adding common stock equivalents for options and warrants to dilutive shares outstanding, which alters the ratio used to allocate earnings to common shareholders and participating securities for the purposes of calculating diluted EPS.
- (3) Due to the net loss applicable to common shareholders for the year ended December 31, 2009, basic shares were used to calculate diluted earnings per share. Adding dilutive securities to the denominator would result in anti-dilution.

3. Business Combinations

Columbia River Bank

On January 22, 2010 the Bank acquired certain assets and assumed certain liabilities of Columbia River Bank from the FDIC in an FDIC-assisted transaction. As part of the Purchase and Assumption Agreement, the Bank and the FDIC entered into loss-sharing agreements (each, a "loss-sharing agreement" and collectively, the "loss-sharing agreements"), whereby the FDIC will cover a substantial portion of any future losses on loans (and

related unfunded commitments), OREO and certain accrued interest on loans. We refer to the acquired loans and OREO subject to the loss-sharing agreements collectively as “covered assets.” Under the terms of the loss-sharing agreements, the FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$206 million on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$206 million. The loss-sharing agreements for commercial and single family residential mortgage loans are in effect for five years and ten years, respectively, from the January 22, 2010 acquisition date and the loss recovery provisions for such loans are in effect for eight years and ten years, respectively, from the acquisition date.

The Bank acquired assets with an acquisition date fair value of approximately \$912.9 million, including \$480.3 million of loans, an FDIC loss sharing asset of \$189.8 million, \$100.7 million of investment securities, \$98.1 million of cash and cash equivalents and \$44.0 million of other assets. The Bank assumed liabilities with an acquisition date fair value of approximately \$912.9 million, including \$893.4 million of insured and uninsured deposits, \$18.4 million of Federal Home Loan Bank (“FHLB”) advances and \$1.1 million of other liabilities. Columbia River Bank was a full service commercial bank headquartered in The Dalles, Oregon that operated 21 branch locations, including 14 in the state of Oregon and seven in the state of Washington. We made this acquisition to expand our geographic footprint.

The assets acquired and liabilities assumed have been accounted for under the acquisition method of accounting (formerly the purchase method). The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the January 22, 2010 acquisition date. The application of the acquisition method of accounting resulted in the recognition in \$14.1 million of goodwill and a core deposit intangible of \$13.4 million. The goodwill represents the excess of the estimated fair value of the liabilities assumed over the estimated fair value of the assets acquired and is influenced significantly by the FDIC-assisted transaction process. All of the goodwill and core deposit intangible assets recognized are deductible for income tax purposes.

The operating results of the Company for the year ended December 31, 2010 include the operating results produced by the acquired assets and assumed liabilities for the period January 23, 2010 to December 31, 2010. Due primarily to the Company acquiring only certain assets and liabilities of Columbia River Bank, the significant amount of fair value adjustments and the FDIC loss-sharing agreements now in place, historical results of Columbia River Bank are not meaningful to the Company’s results and thus no pro forma information is presented.

The table below displays the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed:

	<u>January 22, 2010</u>
Assets	
Cash and due from banks	\$ 33,222
Interest-earning deposits with banks	64,921
Investment securities	100,650
Federal Home Loan Bank stock	3,045
Loans covered by loss sharing	480,306
Accrued interest receivable	4,021
Other real estate owned covered by loss sharing	8,714
Goodwill	14,120
Core deposit intangible	13,442
FDIC loss sharing asset	189,822
Other assets	615
Total assets acquired	<u>\$912,878</u>
Liabilities	
Deposits	\$893,356
Federal Home Loan Bank advances	18,428
Accrued interest payable	524
Other liabilities	570
Total liabilities assumed	<u>\$912,878</u>

American Marine Bank

On January 29, 2010, the Bank acquired certain assets and assumed certain liabilities of American Marine Bank from the FDIC, which had been appointed receiver of the institution. As part of the Purchase and Assumption Agreement, the Bank and the FDIC entered into loss-sharing agreements whereby the FDIC will cover a substantial portion of any future losses on loans (and related unfunded commitments), OREO and certain accrued interest on loans. Under the terms of the loss-sharing agreements, the FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$66 million on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$66 million. The loss-sharing agreements for commercial and single family residential mortgage loans are in effect for five years and ten years, respectively, from the January 29, 2010 acquisition date and the loss recovery provisions for such loans are in effect for eight years and ten years, respectively, from the acquisition date.

The Bank acquired assets with an acquisition date fair value of approximately \$307.8 million, including \$176.3 million of loans, an FDIC loss sharing asset of \$70.4 million, \$28.6 million of investment securities, \$14.5 million of cash and cash equivalents and \$18.0 million of other assets. The Bank assumed liabilities with an acquisition date fair value of approximately \$292.6 million, including \$254.0 million of insured and uninsured deposits, \$37.7 million of FHLB advances and \$974 thousand of other liabilities. American Marine Bank was a full service commercial bank headquartered on Bainbridge Island, Washington that operated 11 branch locations in western Washington. In addition, as part of this acquisition, the Bank received regulatory approval to exercise trust powers and intends to continue to operate the Trust and Wealth Management Division of American Marine Bank. We made this acquisition to expand our geographic footprint.

The assets acquired and liabilities assumed have been accounted for under the acquisition method of accounting. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the January 29, 2010 acquisition date. The application of the acquisition method of accounting resulted in the recognition of a bargain purchase gain, net of tax, of \$9.8 million, which is included in the *Gain on bank acquisition* line item in the Consolidated Condensed Statements of Income, and a core deposit intangible of \$4.3 million. The transaction resulted in a bargain purchase gain as the fair value of assets acquired exceeded the fair value of liabilities assumed.

The operating results of the Company for the year ended December 31, 2010 include the operating results produced by the acquired assets and assumed liabilities for the period January 30, 2010 to December 31, 2010. Due primarily to the Company acquiring only certain assets and liabilities of American Marine Bank, the significant amount of fair value adjustments and the FDIC loss-sharing agreements now in place, historical results of American Marine Bank are not meaningful to the Company's results and thus no pro forma information is presented.

The table below displays the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed:

	<u>January 29, 2010</u>
Assets	
Cash and cash equivalents	\$ 14,215
Federal funds sold	267
Investment securities	28,592
Federal Home Loan Bank stock	3,257
Loans covered by loss sharing	176,278
Accrued interest receivable	1,280
Other real estate owned covered by loss sharing	8,680
Core deposit intangible	4,313
FDIC loss sharing asset	70,442
Other assets	498
Total assets acquired	<u>307,822</u>
Liabilities	
Deposits	253,965
Federal Home Loan Bank advances	37,682
Accrued interest payable	337
Deferred tax liability, net	5,383
Other liabilities	637
Total liabilities assumed	<u>298,004</u>
Net assets acquired	<u>\$ 9,818</u>

The following is a description of the methods used to determine the fair values of the significant assets and liabilities presented above for both the Columbia River Bank and American Marine Bank acquisitions.

Cash and cash equivalents—Cash and cash equivalents include cash and due from banks, interest-earning deposits with banks and the Federal Reserve Bank (“FRB”) and federal funds sold. Cash and cash equivalents have a maturity of 90 days or less at the time of purchase. The fair value of financial instruments that are short-term or re-price frequently and that have little or no risk are considered to have a fair value equal to carrying value.

Investment securities—The fair value for each purchased security was the quoted market price at the close of the trading day effective on the acquisition dates.

Federal Home Loan Bank stock—The fair value of acquired FHLB stock was estimated to be its redemption value, which is also the par value. The FHLB requires member banks to purchase its stock as a condition of membership and the amount of FHLB stock owned varies based on the level of FHLB advances outstanding. This stock is generally redeemable and is presented at the par value.

Loans—We refer to certain loans acquired in the Columbia River Bank and American Marine Bank acquisitions as “covered loans” as we will be reimbursed for a substantial portion of any future losses on them under the terms of the FDIC loss-sharing agreements. The estimated fair value of the loan portfolios at the acquisition dates represents the discounted expected cash flows from the portfolio. In estimating such fair value, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments (the “undiscounted contractual cash flows”) and (b) estimated the amount and timing of undiscounted expected principal and interest payments (the “undiscounted expected cash flows”). The amount by which the undiscounted expected cash flows exceed the estimated fair value (the “accretable yield”) is accreted into interest income over the life of the loans. The difference between the undiscounted contractual cash flows and the

undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents an estimate of the credit risk in the Columbia River Bank and American Marine Bank loan portfolios at the acquisition dates.

In calculating expected cash flows, management made several assumptions regarding prepayments, collateral cash flows, the timing of defaults and the loss severity of defaults. Other factors expected by market participants were considered in determining the fair value of acquired loans, including loan pool level estimated cash flows, type of loan and related collateral, risk classification status (i.e. performing or nonperforming), fixed or variable interest rate, term of loan and whether or not the loan was amortizing and current discount rates.

Other real estate owned—OREO is presented at its estimated fair value based on discounted expected cash flows and is also subject to the FDIC shared-loss agreements. Cash flows were estimated using expected selling price and date, less selling and carrying costs and were discounted to present value.

Goodwill—Goodwill represents the excess of the estimated fair value of the liabilities assumed over the estimated fair value of the assets acquired and is influenced significantly by the FDIC-assisted transaction process.

Core deposit intangible—In determining the estimated life and fair value of the core deposit intangible, deposits were analyzed based on factors such as type of deposit, deposit retention, interest rates, and age of the deposit relationships. Based on this valuation, the core deposit intangible asset will be amortized over the projected useful lives of the related deposits on an accelerated basis over 10 years.

FDIC loss sharing asset—The FDIC loss sharing asset is measured separately from each of the covered asset categories as it is not contractually embedded in any of the covered asset categories. For example, the FDIC loss sharing asset related to estimated future loan losses is not transferable should we sell a loan prior to foreclosure or maturity. The fair value of the FDIC loss sharing asset represents the present value of the estimated cash payments (net of amount owed to the FDIC) expected to be received from the FDIC for future losses on covered assets and loss claims submitted but awaiting payment from the FDIC. The ultimate collectability of the FDIC loss sharing asset is dependent upon the performance of the underlying covered loans, the passage of time and claims paid by the FDIC.

Deposit liabilities—The fair values used for demand and savings deposits are, by definition, equal to the amount payable on demand at the reporting date. The fair values for time deposits are estimated using a discounted cash flow method that applies interest rates currently being offered on time deposits to a schedule of aggregated contractual maturities of such time deposits.

Borrowings—The fair values for FHLB advances are estimated using a discounted cash flow method based on the current market rates.

4. Cash and Cash Equivalents

The Company is required to maintain an average reserve balance with the Federal Reserve Bank or maintain such reserve balance in the form of cash. The average required reserve balance for the years ended December 31, 2010 and 2009 was approximately \$225 thousand and \$200 thousand, respectively, and was met by holding cash and maintaining an average balance with the Federal Reserve Bank.

5. Securities

At December 31, 2010, the Company's securities portfolio primarily consisted of securities issued by U.S. government agencies, U.S. government-sponsored enterprises and state and municipalities. All of the Company's mortgage-backed securities and collateralized mortgage obligations are issued by U.S. government agencies and U.S. government-sponsored enterprises and are implicitly guaranteed by the U.S. government. The Company did not have any other issuances in its portfolio which exceeded ten percent of shareholders' equity.

The following table summarizes the amortized cost, gross unrealized gains and losses, and the resulting fair value of securities available for sale:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Fair Value</u>
	<i>(in thousands)</i>			
December 31, 2010:				
U.S. government agency and government-sponsored enterprise mortgage-backed securities and collateralized mortgage obligations				
obligations	\$491,530	\$16,139	\$(1,027)	\$506,642
State and municipal securities	249,117	7,247	(2,383)	253,981
Other securities	3,281	—	(38)	3,243
Total	<u>\$743,928</u>	<u>\$23,386</u>	<u>\$(3,448)</u>	<u>\$763,866</u>
December 31, 2009:				
U.S. government agency and government-sponsored enterprise mortgage-backed securities and collateralized mortgage obligations				
obligations	\$390,688	\$10,034	\$ (566)	\$400,156
State and municipal securities	210,987	8,545	(621)	218,911
Other securities	1,000	—	(29)	971
Total	<u>\$602,675</u>	<u>\$18,579</u>	<u>\$(1,216)</u>	<u>\$620,038</u>

Gross realized losses amounted to \$148 thousand, \$10 thousand and \$36 for the years ended December 31, 2010, 2009 and 2008, respectively. Gross realized gains amounted to \$206 thousand, \$1.1 million and \$882 thousand for the years ended December 31, 2010, 2009 and 2008, respectively. The following table summarizes the amortized cost and fair value of securities available for sale by contractual maturity groups:

	<u>December 31, 2010</u>	
	<u>Amortized Cost</u>	<u>Fair Value</u>
	<i>(in thousands)</i>	
Due within one year	\$ 5,784	\$ 5,922
Due after one year through five years	64,206	66,787
Due after five years through ten years	155,948	160,453
Due after ten years	514,709	527,461
Total investment securities available for sale	<u>\$740,647</u>	<u>\$760,623</u>

At December 31, 2010 and 2009 available for sale securities with a fair value of \$458.5 million and \$370.0 million, respectively, were pledged to secure public deposits, Federal Home Loan Bank borrowings, and for other purposes as required or permitted by law.

The following tables summarize information pertaining to securities with gross unrealized losses at December 31, 2010 and 2009 aggregated by investment category and length of time that individual securities have been in a continuous loss position:

	<u>Less than 12 Months</u>		<u>12 Months or More</u>		<u>Total</u>

Total	<u>\$163,559</u>	<u>\$(3,130)</u>	<u>\$4,348</u>	<u>\$(318)</u>	<u>\$167,907</u>	<u>\$(3,448)</u>

	<u>Less than 12 Months</u>		<u>12 Months or More</u>		<u>Total</u>	
	<u>Fair Value</u>	<u>Unrealized Losses</u>	<u>Fair Value</u>	<u>Unrealized Losses</u>	<u>Fair Value</u>	<u>Unrealized Losses</u>
	<i>(in thousands)</i>					
December 31, 2009						
U.S. government agency and government-sponsored enterprise mortgage-backed securities and collateralized mortgage obligations	\$ 87,879	\$(566)	\$ 17	\$ —	\$ 87,896	\$ (566)
State and municipal securities	14,846	(42)	16,272	(579)	31,118	(621)
Other securities	—	—	971	(29)	971	(29)
Total	<u>\$102,725</u>	<u>\$(608)</u>	<u>\$17,260</u>	<u>\$(608)</u>	<u>\$119,985</u>	<u>\$(1,216)</u>

At December 31, 2010, there were 56 state and municipal government securities in an unrealized loss position, of which three were in a continuous loss position for 12 months or more. The unrealized losses on state and municipal securities were caused by interest rate changes or widening of market spreads subsequent to the purchase of the individual securities. Management monitors published credit ratings of these securities for adverse changes. As of December 31, 2010 none of the rated obligations of state and local government entities held by the Company had an adverse credit rating. Because the credit quality of these securities are investment grade and the Company does not intend to sell these securities nor does the Company consider it more likely than not that it will be required to sell these securities before the recovery of amortized cost basis, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2010.

At December 31, 2010, there were 17 U.S. Government agency and government-sponsored enterprise mortgage-backed securities & collateralized mortgage obligations securities in an unrealized loss position, of which five were in a continuous loss position for 12 months or more. The decline in fair value is attributable to changes in interest rates relative to where these investments fall within the yield curve and their individual characteristics. Because the Company does not intend to sell these securities nor does the Company consider it more likely than not that it will be required to sell these securities before the recovery of amortized cost basis, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2010.

At December 31, 2010, there were two other securities, a mortgage-backed securities fund and a community reinvestment act fund in an unrealized loss position, with the mortgage-backed securities fund in a continuous loss position for 12 months or more. The decline in fair value is attributable to changes in interest rates and the additional risk premium investors are demanding for investment securities with these characteristics. The Company does not consider this investment to be other-than-temporarily impaired at December 31, 2010 as it has the intent and ability to hold the investment for sufficient time to allow for recovery in the market value.

6. Comprehensive Income

The components of comprehensive income are as follows:

	Years Ended December 31,		
	2010	2009	2008
	<i>(in thousands)</i>		
Net income (loss) as reported	\$30,784	\$(3,968)	\$ 5,968
Unrealized gain(loss) from securities:

Reclassification adjustment of net gain from sale of available for sale securities included in income, net of tax of \$20, \$383 and \$300	(38)	(695)	(546)
Net unrealized gain(loss) from securities, net of reclassification adjustment	1,549	8,740	729
Cash flow hedging instruments:			
Net unrealized gain from cash flow hedging instruments arising during the year, net of tax of \$0, \$0 and \$410	—	—	754
Reclassification adjustment of net (gain)loss included in income, net of tax of \$625, \$913 and \$587	(1,134)	(1,657)	(1,106)
Net change in cash flow hedging instruments	(1,134)	(1,657)	(352)
Pension plan liability adjustment:			
Unrecognized net actuarial gain(loss) during period, net of tax of \$(12), \$379 and \$0	23	(689)	—
Less: amortization of unrecognized net actuarial loss included in net periodic pension cost, net of tax of \$(15), \$(18) and \$0	27	33	—
Pension plan liability adjustment, net	50	(656)	—
Total comprehensive income	<u>\$31,249</u>	<u>\$ 2,459</u>	<u>\$ 6,345</u>

7. Loans

The following is an analysis of the loan portfolio by major types of loans (net of deferred loan fees):

	December 31, 2010	December 31, 2009
	<i>(in thousands)</i>	
Loans, excluding covered loans:		
Commercial business	\$ 795,369	\$ 744,440
Real Estate:		
1-4 family residential	49,383	63,364
Commercial and multifamily residential properties	794,329	856,260
Total real estate	843,712	919,624
Real estate construction:		
1-4 family residential	67,961	107,620
Commercial and multifamily residential properties	30,185	41,829
Total real estate construction	98,146	149,449
Consumer	182,017	199,987
Less: deferred loan fees	(3,490)	(4,616)
Total loans, excluding covered loans	<u>1,915,754</u>	<u>2,008,884</u>
Covered loans	517,061	—
Total loans, net of deferred loan fees	<u>\$2,432,815</u>	<u>\$2,008,884</u>
Loans held for sale	<u>\$ 754</u>	<u>\$ —</u>

Originated Loans

At December 31, 2010 and 2009, the Company had no loans to foreign domiciled businesses or foreign countries, or loans related to highly leveraged transactions. Substantially all of the Company's loans and loan commitments are geographically concentrated in its service areas within Washington and Oregon.

The Company and its banking subsidiary have granted loans to officers and directors of the Company and related interests. These loans are made on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated persons and do not involve more than the normal risk of collectability. The aggregate dollar amount of these loans was \$12.9 million and \$6.8 million at December 31, 2010 and 2009, respectively. During 2010, \$8.8 million of related party loans were made and repayments totaled \$2.7 million. During 2009, \$1.7 million of related party loans were made and repayments totaled \$3.7 million.

At December 31, 2010 and 2009, \$426.6 million and \$505.0 million of commercial and residential real estate loans were pledged as collateral on FHLB borrowings. Additionally, at December 31, 2010, the Company had \$642 thousand in Small Business Administration ("SBA") loans pledged as collateral for SBA-secured borrowings.

Non-accrual loans totaled \$89.2 million and \$110.4 million at December 31, 2010 and 2009, respectively. The amount of interest income foregone as a result of these loans being placed on non-accrual status totaled \$6.4 million for 2010, \$7.6 million for 2009 and \$4.1 million for 2008. There was only one loan totaling \$1 thousand 90 days past due and still accruing interest as of December 31, 2010 and there were no loans greater than 90 days past due still accruing interest as of December 31, 2009. At December 31, 2010 and 2009, there were \$5.6 million and \$4.6 million, respectively, of commitments of additional funds for loans accounted for on a non-accrual basis.

The following is an analysis of nonaccrual loans as of December 31, 2010:

	<u>Recorded Investment (1) Nonaccrual Loans</u>	<u>Unpaid Principal Balance Nonaccrual Loans</u>

(1) Recorded investment includes unpaid principal balance, net of charge-offs, unamortized deferred loans fees or costs, unamortized premiums or discounts and accrued interest.

At December 31, 2010, the total recorded investment in impaired loans was \$94.1 million with \$17.2 million having a specific valuation allowance of \$974 thousand. At December 31, 2009 the total recorded investment in impaired loans was \$116.4 million, with \$18.1 million of impaired loans having a specific valuation allowance of \$3.8 million. The average recorded investment in impaired loans for the years ended December 31, 2010, 2009, and 2008, was \$102.6 million, \$94.6 million, and \$134.1 million, respectively. Interest income recognized on impaired loans was \$0 in 2010, \$42 thousand in 2009, and \$40 thousand in 2008.

Acquired Loans

As of the acquisition dates, we estimated the fair value of the Columbia River Bank and American Marine Bank loan portfolios at \$480.3 million and \$176.3 million, respectively, which represents the expected cash flows from the portfolio discounted at market-based rates. In estimating such fair value, we (a) calculated the contractual amount and timing of the undiscounted principal and interest payments (the “undiscounted contractual cash flows”); and (b) estimated the amount and timing of the undiscounted expected principal and interest payments (the “undiscounted expected cash flows”). The amount by which the undiscounted expected cash flows exceed the estimated fair value (the “accretable yield”) is accreted into interest income over the lives of the loans. The difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is referred to as the “non-accretable difference.” The non-accretable difference represents an estimate of credit risk in the covered loan portfolios on the acquisition dates. On the acquisition dates, the preliminary estimate of the undiscounted contractual principal and interest payments for the covered loans acquired in the Columbia River Bank and American Marine Bank acquisitions were \$799.8 million and \$259.6 million, respectively. The accretable yields were approximately \$101.1 million and \$21.6 million, respectively, and the non-accretable differences were \$217.9 million and \$65.5 million, respectively. The expected cash flows at acquisition date, which is the undiscounted contractual principal and interest payments, less the non-accretable differences were \$581.9 million and \$194.1 million, respectively.

The following table shows the changes in accretable yield for acquired loans for the year ended December 31, 2010:

	<u>December 31, 2010</u> <i>(in thousands)</i>
Balance at beginning of period	\$ —
Established through acquisitions	122,705
Accretion	(45,956)
Transfers from nonaccretable difference	188,837
Disposals and other	<u>(9,014)</u>
Balance at end of period	<u>\$256,572</u>

FDIC loss sharing asset—As of the acquisition dates, we recorded an FDIC loss sharing asset consisting of the present value of the amounts the Company expects to receive from the FDIC under the loss-sharing agreements. The FDIC loss sharing asset was \$206.0 million at December 31, 2010.

8. Allowances for Loan and Lease Losses and Unfunded Commitments and Letters of Credit

We maintain an allowance for loan and lease losses (“ALLL”) to absorb losses inherent in the loan portfolio. The size of the ALLL is determined through quarterly assessments of the probable estimated losses in the loan portfolio. Our methodology for making such assessments and determining the adequacy of the ALLL includes the following key elements:

1. General valuation allowance consistent with the Contingencies topic of the FASB ASC.

2. Classified loss reserves on specific relationships. Specific allowances for identified problem loans are determined in accordance with the Receivables topic of the FASB ASC.
3. The unallocated allowance provides for other factors inherent in our loan portfolio that may not have been contemplated in the general and specific components of the allowance. This unallocated amount generally comprises less than 5% of the allowance. The unallocated amount is reviewed quarterly based on trends in credit losses, the results of credit reviews and overall economic trends.

The general valuation allowance is systematically calculated quarterly using quantitative and qualitative information about specific loan classes. The minimum required level in which an entity develops a systematic methodology to determine its allowance for loan and lease losses is at the segment level. However, the Company's systematic methodology in determining its allowance for loan and lease losses is prepared at the class level, which is more detailed than the segment level. The quantitative information uses historical losses from a specific loan classes and incorporates the loan's risk rating migration from origination to the point of loss. A loan's risk rating is primarily determined based upon the borrower's ability to fulfill its debt obligation from a cash flow perspective. In the event there is financial deterioration of the borrower, the borrower's other sources of income or repayment are also considered, including recent appraisal values for collateral dependent loans. The qualitative information takes into account general economic and business conditions affecting our market place, seasoning of the loan portfolio, duration of the business cycle, etc. to ensure our methodologies reflect the current economic environment and other factors as using historical loss information exclusively may not give an accurate estimate of inherent losses within the Company's loan portfolio.

The specific valuation allowance is a reserve for each loan determined to be impaired and the value of the impaired loan is less than its recorded investment. The Company measures the impairment based on the discounted expected future cash flows, observable market price, or the fair value of the collateral if the loan is collateral dependant or if foreclosure is probable. The specific reserve for each loan is equal to the difference between the recorded investment in the loan and its determined impairment value.

The ALLL is increased by provisions for loan and lease losses ("provision") charged to expense, and is reduced by loans charged off, net of recoveries. While the Company's management believes the best information available is used to determine the ALLL, changes in market conditions could result in adjustments to the ALLL, affecting net income, if circumstances differ from the assumptions used in determining the ALLL.

We have used the same methodology for ALLL calculations during 2010, 2009 and 2008. Adjustments to the percentages of the ALLL allocated to loan categories are made based on trends with respect to delinquencies and problem loans within each pool of loans. The Company reviews the ALLL quantitative and qualitative methodology on a quarterly basis and makes adjustments when appropriate. The Company strives to maintain a conservative approach to credit quality and will continue to prudently add to our ALLL as necessary in order to maintain adequate reserves. The Company carefully monitors the loan portfolio and continues to emphasize the importance of credit quality while continuously strengthening loan monitoring systems and controls.

The following table shows a detailed analysis of the allowance for loan losses as of December 31, 2010:

	<u>Beginning Balance</u>	<u>Charge- offs</u>	<u>Recoveries</u>	<u>Provision</u>	<u>Ending Balance</u>	<u>Specific Reserve</u>	<u>General Allocation</u>

Balance at beginning of year	\$ 42,747	\$ 26,599
Loans charged off	(54,521)	(25,987)
Recoveries	1,752	959
Net chargeoffs	(52,769)	(25,028)
Provision charged to expense	63,500	41,176
Balance at end of year	<u>\$ 53,478</u>	<u>\$ 42,747</u>

Risk Elements

The extension of credit in the form of loans to individuals and businesses is one of our principal commerce activities. Our policies and applicable laws and regulations require risk analysis as well as ongoing portfolio and credit management. We manage our credit risk through lending limit constraints, credit review, approval policies and extensive, ongoing internal monitoring. We also manage credit risk through diversification of the loan portfolio by type of loan, type of industry, type of borrower and by limiting the aggregation of debt to a single borrower.

In analyzing our existing portfolio, we review our consumer and residential loan portfolios for impairment by their performance as pools of loans segregated in to risk rating categories, since no single loan is individually

significant or judged by its risk rating, size or potential risk of loss. In contrast, the monitoring process for the commercial business, real estate construction and commercial real estate portfolios includes periodic reviews of individual loans with risk ratings assigned to each loan. Based on the analysis, loans are given a risk rating of 1-10 based on the following criteria:

- 1) ratings of 1-3 indicate minimal to low credit risk,
- 2) ratings of 4-5 indicate an average to above average credit risk with adequate repayment capacity when prolonged periods of adversity do not exist,
- 3) ratings of 6-7 indicate potential weaknesses and higher credit risk requiring greater attention by bank personnel and management to help prevent further deterioration,
- 4) rating of 8 indicates a loss is possible if loan weaknesses are not corrected,
- 5) rating of 9 indicates loss is highly probable; however, the amount of loss has not yet been determined,
- 6) rating of 10 indicates the loan is uncollectable, and when identified is charged-off.

Loans with a risk rating of 1-6 are considered Pass loans and loans with risk ratings of 7, 8, 9 and 10 are considered Special Mention, Substandard, Doubtful and Loss, respectively. Loans risk rated Substandard or worse are reported as classified loans in our allowance for loan and lease losses analysis. We review these loans to assess the ability of our borrowers to service all interest and principal obligations and, as a result, the risk rating may be adjusted accordingly. Risk ratings should be reviewed and updated whenever appropriate, with more periodic reviews as the risk and dollar value of loss on the loan increases. In the event that full collection of principal and interest is not reasonably assured, the loan is appropriately downgraded and, if warranted, placed on non-accrual status even though the loan may be current as to principal and interest payments. Additionally, we assess whether an impairment of a loan warrants specific reserves or a write-down of the loan.

The following is an analysis of the credit quality of our noncovered loan portfolio as of December 31, 2010:

	Weighted- Average Risk Rating	Recorded Investment Noncovered Loans (1)
	(dollars in thousands)	
Commercial Business		
Secured	4.96	\$ 757,372
Unsecured	4.23	41,175
Real Estate 1-4 Family		
Residential RE Perm	4.96	49,436
Real Estate Commercial & Multifamily		
Commercial RE Land	5.75	24,956
Income Property Multifamily Perm	5.07	406,711
Owner Occupied RE Perm	5.12	366,284
Construction 1-4 Family		
Land & Acquisition	6.79	37,054
Residential Construction	6.63	31,293
Construction Commercial & Multifamily		
Income Property Multifamily Construction	6.38	18,296
Owner Occupied RE Construction	4.93	11,990
Consumer	4.31	182,624
Total balance of classified loans		<u>\$1,927,191</u>

(1) Recorded investment includes unpaid principal balance, net of charge-offs, unamortized deferred loans fees or costs, unamortized premiums or discounts and accrued interest.

The following is an analysis of our covered loans, net of related allowance for losses on covered loans as of December 31, 2010:

	<u>Covered Loans December 31, 2010</u>	<u>Weighted- Average Risk Rating</u>	<u>Allowance for Loan Losses</u>
	<i>(dollars in thousands)</i>		
Commercial Business	\$165,255	5.74	\$2,903
Real Estate 1-4 Family	68,700	4.77	1,013
Real Estate Commercial & Multifamily	341,063	5.70	821
Construction 1-4 Family	39,754	7.29	98
Construction Commercial & Multifamily	41,624	6.79	469
Consumer	<u>58,337</u>	4.49	<u>751</u>
Subtotal of covered loans	714,733		<u>\$6,055</u>
Less:			
Valuation discount resulting from acquisition accounting	191,617		
Allowance for loan losses	<u>6,055</u>		
Covered loans, net of allowance for loan losses	<u>\$517,061</u>		

Covered loans acquired in the Columbia River Bank and American Marine Bank acquisitions are also subject to the Bank's internal and external credit review and are risk rated using the same criteria as noncovered loans. However, covered loans are accounted for under ASC Topic 310-30, and initially measured at fair value based on expected future cash flows over the lives of the loans and therefore, risk ratings are not a clear indicator of loss as the majority of the losses on covered loans are recoverable from the FDIC under the loss sharing agreements. Over the life of the covered loan pools, management continues to monitor and estimate expected future cash flows on a quarterly basis. During the year ended December 31, 2010, the Company recorded a provision expense of \$6.1 million on covered loans. The impact to earnings of the \$6.1 million of provision expense for covered loans is offset through noninterest income by a \$4.9 million increase in the FDIC loss sharing asset.

Changes in the allowance for unfunded commitments and letters of credit are summarized as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
	<i>(in thousands)</i>		
Balance at beginning of year	\$ 775	\$500	\$349
Net changes in the allowance for unfunded commitments and letters of credit	<u>390</u>	<u>275</u>	<u>151</u>
Balance at end of year	<u>\$1,165</u>	<u>\$775</u>	<u>\$500</u>

9. Other Real Estate Owned

The following table sets forth activity in noncovered OREO for the period:

	<u>December 31, 2010</u>	<u>December 31, 2009</u>
	<i>(in thousands)</i>	
Noncovered OREO:		
Balance, beginning of period	\$19,037	\$ 2,874
Transfers in, net of write-downs (\$193 and \$2,950, respectively)	19,006	23,398
OREO improvements	1,635	1,165
Additional OREO write-downs	(3,962)	(119)
Proceeds from sale of OREO property	(4,800)	(8,098)
Gain (loss) on sale of OREO	<u>75</u>	<u>(183)</u>
Total non-covered OREO, end of period	<u>\$30,991</u>	<u>\$19,037</u>

The following table sets forth activity in covered OREO at carrying value for the period:

	<u>December 31, 2010</u> <i>(in thousands)</i>
Covered OREO:	
Balance, beginning of period	\$ —
Established through acquisitions	17,394
Transfers in, net of write-downs (\$2,087 and \$0, respectively)	10,858
OREO improvements	85
Additional OREO write-downs	(1,182)
Proceeds from sale of OREO property	(17,890)
Gain (loss) on sale of OREO	5,178
Total covered OREO, end of period	<u>\$ 14,443</u>

The acquired OREO is covered by loss-sharing agreements with the FDIC in which the FDIC will assume 80% of additional write-downs and losses on covered OREO sales, or 95% of additional write-downs and losses on covered OREO sales if the minimum loss share thresholds are met (see note 3 for threshold amounts).

10. Premises and Equipment

Land, buildings, and furniture and equipment, less accumulated depreciation and amortization, were as follows:

	<u>December 31,</u>	
	<u>2010</u>	<u>2009</u>
	<i>(in thousands)</i>	
Land	\$ 29,368	\$ 19,712
Buildings	67,373	46,485
Leasehold improvements	2,918	3,216
Furniture and equipment	21,801	19,389
Vehicles	352	313
Computer software	10,070	8,310
Total Cost	<u>131,882</u>	<u>97,425</u>
Less accumulated depreciation and amortization	<u>(38,774)</u>	<u>(34,755)</u>
Total	<u>\$ 93,108</u>	<u>\$ 62,670</u>

Total depreciation and amortization expense was \$5.2 million, \$4.7 million, and \$5.0 million, for the years ended December 31, 2010, 2009, and 2008, respectively.

11. Goodwill and Other Intangibles

In accordance with the Intangibles—Goodwill and Other topic of the FASB ASC, goodwill is not amortized but is reviewed for potential impairment at the reporting unit level. Management analyzes its goodwill for impairment during the third quarter of each year on an annual basis and between annual tests in certain circumstances such as material adverse changes in legal, business, regulatory and economic factors. An impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value. Management completed its annual assessment of goodwill for impairment during the third quarter of 2010 and determined the fair value of the Company's single consolidated reporting unit exceeded its carrying value.

The core deposit intangible “CDI” is evaluated for impairment if events and circumstances indicate a possible impairment. The CDI is amortized on an accelerated basis over an estimated life of approximately 10 years. The following table summarizes the changes in the Company’s goodwill and core deposit intangible asset for the years ended December 31, 2010, 2009 and 2008:

	Years ended December 31,		
	2010	2009	2008
	<i>(in thousands)</i>		
Total goodwill, beginning of period	\$ 95,519	\$ 95,519	\$ 95,519
Established through acquisitions	14,120	—	—
Total goodwill, end of period	<u>109,639</u>	<u>95,519</u>	<u>95,519</u>
Gross core deposit intangible balance	8,896	8,896	8,896
Accumulated amortization at beginning of period	(4,033)	(2,988)	(1,846)
Core deposit intangible, net, beginning of period	4,863	5,908	7,050
Established through acquisitions	17,755	—	—
CDI current period amortization	(3,922)	(1,045)	(1,142)
Total core deposit intangible, end of period	<u>18,696</u>	<u>4,863</u>	<u>5,908</u>
Total goodwill and intangible assets, end of period	<u>\$128,335</u>	<u>\$100,382</u>	<u>\$101,427</u>

The following table provides the estimated future amortization expense of core deposit intangibles for the succeeding five years:

Years ending December 31,	(in thousands)
2011	\$3,825
2012	\$3,441
2013	\$3,066
2014	\$2,604
2015	\$1,958

12. Deposits

Year-end deposits are summarized in the following table:

	December 31,	
	2010	2009
	<i>(in thousands)</i>	
Core deposits:		
Demand and other noninterest-bearing	\$ 895,671	\$ 574,687
Interest-bearing demand	672,307	499,922
Money market	920,831	604,229
Savings	210,995	139,406
Certificates of deposit less than \$100,000	298,678	254,577
Total core deposits	<u>2,998,482</u>	<u>2,072,821</u>
Certificates of deposit greater than \$100,000	266,708	259,794
Certificates of deposit insured by CDARS®	38,312	96,314
Wholesale certificates of deposit	23,155	53,776
Subtotal	<u>3,326,657</u>	<u>2,482,705</u>
Valuation adjustment resulting from acquisition accounting	612	—
Total deposits	<u>\$3,327,269</u>	<u>\$2,482,705</u>

The following table shows the amount and maturity of time deposits that had balances of \$100,000 or greater:

<u>Years Ending December 31,</u>	<u>(in thousands)</u>
2011	\$268,596
2012	31,018
2013	5,389
2014	9,139
2015	12,058
Thereafter	321
Total	<u>\$326,521</u>

13. Federal Home Loan Bank and Federal Reserve Bank Borrowings

The Company has entered into borrowing arrangements with the FHLB of Seattle to borrow funds under a short-term floating rate cash management advance program and fixed-term loan agreements. All borrowings are secured by stock of the FHLB, certain pledged available for sale investment securities and a blanket pledge of qualifying loans receivable. At December 31, 2010 FHLB advances were scheduled to mature as follows:

	Federal Home Loan Bank Advances	
	Fixed rate advances	
	<u>Wtd Avg Rate</u>	<u>Amount</u>
	<i>(dollars in thousands)</i>	
Within 1 year	4.57%	\$ 7,000
Over 1 through 5 years	2.67%	110,290
Over 6 through 10 years	5.26%	1,483
Total	2.81%	118,773
Valuation adjustment from acquisition accounting		632
Total		<u>\$119,405</u>

The maximum, average outstanding and year-end balances and average interest rates on advances from the FHLB were as follows for the years ended December 31, 2010, 2009 and 2008:

FEDERAL HOME LOAN BANK

	<u>Years ended December 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
	<i>(dollars in thousands)</i>		
Balance at end of year	\$119,405	\$100,000	\$150,000
Average balance during the year	\$123,685	\$111,211	\$282,624
Maximum month-end balance during the year	\$154,916	\$178,000	\$349,000
Weighted average rate during the year	2.75%	2.38%	2.53%
Weighted average rate at December 31	2.81%	2.49%	1.89%

FHLB advances are collateralized by the following:

	<u>December 31,</u>	
	<u>2010</u>	<u>2009</u>
	<i>(in thousands)</i>	
Fair value of investment securities	\$ 96,496	\$130,039
Recorded value of blanket pledge on loans receivable	426,555	504,978
Total	<u>\$523,051</u>	<u>\$635,017</u>
FHLB Borrowing Capacity	<u>\$402,048</u>	<u>\$535,017</u>

The Company is also eligible to borrow under the Federal Reserve Bank’s primary credit program, including the Term Auction Facility (“TAF”) auctions. All borrowings are secured by certain pledged available for sale investment securities.

The maximum, average outstanding and year-end balances and average interest rates on advances from the Federal Reserve Bank were as follows for the years ended December 31, 2010, 2009 and 2008:

FEDERAL RESERVE BANK

	Years ended December 31,		
	2010	2009	2008
	<i>(dollars in thousands)</i>		
Balance at end of year	\$ —	\$ —	\$ 50,000
Average balance during the year	\$ —	\$ 38,205	\$ 14,569
Maximum month-end balance during the year	\$ —	\$100,000	\$120,000
Weighted average rate during the year	0.00%	0.30%	0.62%
Weighted average rate at December 31	N/A	N/A	0.60%

N/A—Not applicable

Federal Reserve Bank advances are collateralized by the following:

FEDERAL RESERVE BANK

	December 31,	
	2010	2009
	<i>(in thousands)</i>	
Fair value of investment securities	\$135,966	\$144,253
Recorded value of pledged commercial loans	313,452	210,775
Total	<u>\$449,418</u>	<u>\$355,028</u>
Federal Reserve Bank borrowing capacity	<u>\$449,418</u>	<u>\$335,028</u>

14. Other Borrowings

Securities Sold Under Agreements to Repurchase

The Company has entered into wholesale repurchase agreements with certain brokers. At December 31, 2010, the Company held \$25.0 million in wholesale repurchase agreements with an interest rate of 1.88%. Securities available for sale with a carrying amount of \$28.8 million were pledged as collateral for the repurchase agreement borrowings. The broker holds the securities while the Company continues to receive the principal and interest payments from the securities. Upon maturity of the agreement, the pledged securities will be returned to the Company.

15. Long-term Subordinated Debt

During 2001, the Company, through its subsidiary trust (the “Trust”) participated in a pooled trust preferred offering, whereby the trust issued \$22.0 million of 30 year floating rate capital securities. The capital securities constitute guaranteed preferred beneficial interests in debentures issued by the trust. The debentures had an initial rate of 7.29% and a rate of 3.87% at December 31, 2010. The floating rate is based on the 3-month LIBOR plus 3.58% and is adjusted quarterly. The Company through the Trust may call the debt after ten years at par, allowing the Company to retire the debt early if conditions are favorable. In accordance with the Consolidation topic of the FASB ASC, the Trust is deconsolidated with the result being that the trust preferred obligations are classified as long-term subordinated debt on the Company’s Consolidated Balance Sheet and the Company’s related investment in the Trust of \$681,000 is recorded in other assets. At December 31, 2010 and 2009, the

balance of the Company's investment in the Trust remained at \$681,000. The subordinated debt payable to the Trust is on the same interest and payment terms as the trust preferred obligations issued by the Trust. Through a 2007 acquisition, the Company assumed an additional \$3.0 million in floating rate trust preferred obligations from the Town Center Bancorp Statutory Trust; these debentures had a rate of 4.04% at December 31, 2010. The floating rate is based on the 3-month LIBOR plus 3.75% and is adjusted quarterly. At December 31, 2010 and 2009, the balance of the Company's investment in this Town Center Bancorp Statutory Trust was \$93,000 which is recorded in other assets on the Consolidated Balance Sheets.

16. Income Tax

The components of income tax expense (benefit) are as follows:

	<u>Years Ended December 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
	<i>(in thousands)</i>		
Current tax (benefit) expense	\$(13,547)	\$(8,893)	\$ 9,503
Deferred tax expense (benefit)	15,838	(85)	(14,409)
Total	<u>\$ 2,291</u>	<u>\$(8,978)</u>	<u>\$ (4,906)</u>

Significant components of the Company's deferred tax assets and liabilities are as follows:

	<u>December 31,</u>	
	<u>2010</u>	<u>2009</u>
	<i>(in thousands)</i>	
Deferred tax assets:		
Allowance for loan and lease losses	\$ 22,942	\$ 18,939
Supplemental executive retirement plan	6,185	5,251
Stock option and restricted stock	1,295	1,048

Purchase accounting	(1,373)	(1,722)
Deferred loan fees	(1,214)	(707)
Unrealized gain on investment securities	(7,186)	(6,167)
Depreciation	(646)	(866)
Total deferred tax liabilities	<u>(34,997)</u>	<u>(11,447)</u>
Net deferred tax (liability) asset	<u>\$ 1,853</u>	<u>\$ 18,120</u>

A reconciliation of the Company's effective income tax rate with the federal statutory tax rate is as follows:

	Years Ended December 31,					
	2010		2009		2008	
	Amount	Percent	Amount	Percent	Amount	Percent
	<i>(in thousands)</i>					
Income tax based on statutory rate	\$11,576	35%	\$(4,531)	35%	\$ 372	35%
Reduction resulting from:						
Tax credits	(808)	-2%	(687)	5%	(725)	-68%
Tax exempt instruments	(3,744)	-11%	(3,072)	24%	(2,810)	-265%
Life insurance proceeds	(735)	-2%	(708)	5%	(940)	-89%
Bargain purchase	(5,383)	-16%	—	0%	—	0%
Other, net	1,385	3%	20	0%	(803)	-76%
Income tax provision (benefit)	<u>\$ 2,291</u>	<u>7%</u>	<u>\$(8,978)</u>	<u>69%</u>	<u>\$(4,906)</u>	<u>-463%</u>

As of December 31, 2010 and 2009, we had no unrecognized tax positions. Our policy is to recognize interest and penalties on unrecognized tax benefits in "Provision for income taxes" in the Consolidated Statements of Income. There were no amounts related to interest and penalties recognized for the years ended December 31, 2010 and 2009. The tax years subject to examination by federal and state taxing authorities are the years ending December 31, 2009, 2008, and 2007.

17. Share-Based Payments

At December 31, 2010, the Company had one equity compensation plan (the "Plan"), which is shareholder approved, that provides for the granting of share options and shares to eligible employees and directors up to 2,191,482 shares.

Share Awards: Restricted share awards provide for the immediate issuance of shares of Company common stock to the recipient, with such shares held in escrow until certain service conditions are met, generally four years of continual service. Recipients of restricted shares do not pay any cash consideration to the Company for the shares, have the right to vote all shares subject to such grant, and receive all dividends with respect to such shares, whether or not the shares have vested. The fair value of share awards is equal to the fair market value of the Company's common stock on the date of grant.

A summary of the status of the Company's nonvested shares as of December 31, 2010, 2009 and 2008 is presented below:

<u>Nonvested Shares</u>	<u>Shares</u>	<u>Weighted Average Grant-Date Fair Value</u>
Nonvested at January 1, 2008	143,325	32.36
Granted	69,360	23.65
Vested	(13,065)	30.89
Forfeited	(8,300)	29.72
Nonvested at December 31, 2008	<u>191,320</u>	<u>29.41</u>
Granted	122,097	9.92
Vested	(15,763)	27.67
Forfeited	(19,150)	24.03
Nonvested at December 31, 2009	<u>278,504</u>	<u>21.34</u>
Granted	108,075	20.68
Vested	(25,521)	21.38
Forfeited	(7,775)	20.77
Nonvested at December 31, 2010	<u><u>353,283</u></u>	<u><u>\$21.14</u></u>

As of December 31, 2010, there was \$4.1 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Plan. That cost is expected to be recognized over a weighted average period of 2.5 years. The total fair value of shares vested during the years ended December 31, 2010, 2009, and 2008 was \$546 thousand, \$404 thousand, and \$404 thousand, respectively.

Share Options: Option awards are generally granted with an exercise price equal to the market price of the Company's stock at the date of grant; those option awards generally vest based on three years of continual service and are exercisable for a five-year period after vesting. Option awards granted have a 10-year maximum term.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option valuation model. The fair value of all options is amortized on a straight-line basis over the requisite service periods, which are generally the vesting periods. The expected life of options granted represents the period of time that they are expected to be outstanding. The expected life is determined based on historical experience with similar awards, giving consideration to the contractual terms and vesting schedules. Expected volatilities of our common stock are estimated at the date of grant based on the historical volatility of the stock. The volatility factor is based on historical stock prices over the most recent period commensurate with the estimated expected life of the award. The risk-free interest rate is based on the U.S. Treasury curve in effect at the time of the award. The expected dividend yield is based on dividend trends and the market value of the Company's stock price at the time of the award.

A summary of option activity under the Plan as of December 31, 2010, and changes during the year then ended is presented below:

<u>Options</u>	<u>Shares</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value (\$000)</u>
Balance at December 31, 2009	118,191	\$19.73		
Granted	—	—		
Forfeited	—	—		
Expired	—	—		
Exercised	(24,227)	13.81		
Balance at December 31, 2010	<u>93,964</u>	<u>\$21.26</u>	<u>2.3</u>	<u>\$211</u>
Total Exercisable at December 31, 2010	<u>93,964</u>	<u>\$21.26</u>	<u>2.3</u>	<u>\$211</u>

The total intrinsic value of options exercised during the years ended December 31, 2010, 2009, and 2008 was \$154 thousand, \$123 thousand, and \$1.2 million, respectively. No options were granted in 2010, 2009 and 2008.

As of December 31, 2010, outstanding stock options consist of the following:

<u>Ranges of Exercise Prices</u>	<u>Number of Option Shares</u>	<u>Weighted Average Remaining Contractual Life</u>	<u>Weighted Average Exercise Price of Option Shares</u>	<u>Number of Exercisable Option Shares</u>	<u>Weighted Average Exercise Price of Exercisable Option Shares</u>
9.26 - 12.34	2,752	0.5	11.63	2,752	11.63
12.35 - 15.43	16,285	2.3	13.99	16,285	13.99
15.44 - 18.51	13,749	1.5	17.29	13,749	17.29
18.52 - 21.60	9,697	3.7	19.36	9,697	19.36
21.61 - 24.68	15,500	1.9	22.95	15,500	22.95
24.69 - 27.77	30,310	1.9	25.77	30,310	25.77
27.78 - 30.86	5,671	6.1	30.86	5,671	30.86
	<u>93,964</u>	<u>2.3</u>	<u>\$21.26</u>	<u>93,964</u>	<u>\$21.26</u>

It is the Company's policy to issue new shares for share option exercises and share awards. The Company expenses awards of share options and shares on a straight-line basis over the related vesting term of the award. For the 12 months ended December 31, 2010 and 2009, the Company recognized pre-tax share-based compensation expense for nonvested share awards of \$1.4 million and \$1.0 million, respectively.

18. Regulatory Capital Requirements

The Company (on a consolidated basis) and its banking subsidiary are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company and its subsidiaries' financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and its banking subsidiaries must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and its banking subsidiaries to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital to risk-weighted assets (as defined in the regulations) and of Tier 1 capital to average assets (as defined in the regulations). Management believes, as of December 31, 2010 and 2009, that the Company and Columbia Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2010, the most recent notification from the Federal Deposit Insurance Corporation categorized Columbia Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the following tables. There are no conditions or events since the notification that management believes have changed Columbia Bank's category. The Company and its banking subsidiary's actual capital amounts and ratios as of December 31, 2010 and 2009, are also presented in the following table.

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provision	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
<i>(dollars in thousands)</i>						
As of December 31, 2010						
Total Capital (to risk-weighted assets):						
The Company	\$623,526	24.47%	\$203,871	8.0%	N/A	N/A
Columbia Bank	\$463,587	18.20%	\$203,789	8.0%	\$254,736	10.0%
Tier 1 Capital (to risk-weighted assets):						
The Company	\$591,263	23.20%	\$101,936	4.0%	N/A	N/A
Columbia Bank	\$431,337	16.93%	\$101,894	4.0%	\$152,841	6.0%
Tier 1 Capital (to average assets):						
The Company	\$591,263	13.99%	\$169,062	4.0%	N/A	N/A
Columbia Bank	\$431,337	10.33%	\$166,961	4.0%	\$208,702	5.0%
As of December 31, 2009						
Total Capital (to risk-weighted assets):						
The Company	\$471,292	19.60%	\$192,335	8.0%	N/A	N/A
Columbia Bank	\$388,794	16.17%	\$192,335	8.0%	\$240,419	10.0%
Tier 1 Capital (to risk-weighted assets):						
The Company	\$440,941	18.34%	\$ 96,167	4.0%	N/A	N/A
Columbia Bank	\$358,443	14.91%	\$ 96,167	4.0%	\$144,251	6.0%
Tier 1 Capital (to average assets):						
The Company	\$440,941	14.33%	\$123,069	4.0%	N/A	N/A
Columbia Bank	\$358,443	11.73%	\$122,260	4.0%	\$152,825	5.0%

19. Employee Benefit Plans

401(k) Plan

The Company maintains defined contribution and profit sharing plans in conformity with the provisions of section 401(k) of the Internal Revenue Code at Columbia Bank. The Columbia Bank 401(k) and Profit Sharing Plan (the "401(k) Plan"), permits eligible Columbia Bank employees, those who are at least 18 years of age and have completed six months of service, to contribute up to 75% of their eligible compensation to the 401(k) Plan. On a per pay period basis the Company is required to match 50% of employee contributions up to 3% of each employee's eligible compensation. Additionally, as determined annually by the Board of Directors of the Company, the 401(k) Plan provides for a non-matching discretionary profit sharing contribution. The Company contributed \$866 thousand during 2010, \$748 thousand during 2009, and \$818 thousand during 2008, in matching funds to the 401(k) Plan. The Company's discretionary profit sharing contributions were \$1.2 million during 2010, \$0 during 2009 and \$1.0 million during 2008.

Employee Stock Purchase Plan

The Company maintains an “Employee Stock Purchase Plan” (the “ESP Plan”) in which substantially all employees of the Company are eligible to participate. The ESP Plan provides participants the opportunity to purchase common stock of the Company at a discounted price. Under the ESP Plan, participants can purchase common stock of the Company for 90% of the lowest price on either the first or last day in each of two six month look-back periods. The look-back periods are January 1st through June 30th and July 1st through December 31st of each calendar year. The 10% discount is recognized by the Company as compensation expense and does not have a material impact on net income or earnings per common share. Participants of the ESP Plan purchased 35,806 shares for \$614 thousand in 2010, 55,443 shares for \$578 thousand in 2009 and 37,179 shares for \$568 thousand in 2008. At December 31, 2010 there were 687,892 shares available for purchase under the ESP plan.

Supplemental Compensation Plan

The Company maintains supplemental compensation arrangements (“Unit Plans”) to provide benefits for certain employees. The Unit Plans generally vest over a 4-10 year period and provide a fixed annual benefit over a 5-10 year period. At December 31, 2010 and 2009 the liability associated with these plans was \$4.0 million and \$3.5 million, respectively. Expense associated with these plans for the years ended December 31, 2010, 2009 and 2008 was \$750 thousand, \$530 thousand and \$634 thousand, respectively.

Supplemental Executive Retirement Plan

The Company maintains a supplemental executive retirement plan (the “SERP”), a nonqualified deferred compensation plan that provides retirement benefits to certain highly compensated executives. The SERP is unsecured and unfunded and there are no program assets. The SERP projected benefit obligation, which represents the vested net present value of future payments to individuals under the plan is accrued over the estimated remaining term of employment of the participants and has been determined by actuarial valuation using the “RP-2000 Annuity Mortality Table” for the mortality assumptions and discount rates of 5.90% and 5.75% in 2010 and 2009, respectively. Additional assumptions and features of the plan are a normal retirement age of 65 and a 2% annual cost of living benefit adjustment. The projected benefit obligation is included in other liabilities on the Consolidated Balance Sheets.

The following table reconciles the accumulated liability for the projected benefit obligation:

	December 31,	
	2010	2009
	<i>(in thousands)</i>	
Balance at beginning of year	\$ 9,947	\$8,541
Change in actuarial loss	(78)	1,068
Transfer to supplemental compensation plan	—	(614)
Benefit expense	928	1,299
Benefit payments	(434)	(347)
Balance at end of year	<u>\$10,363</u>	<u>\$9,947</u>

The benefits expected to be paid in conjunction with the SERP are presented in the following table:

<u>Years Ending December 31,</u>	<u>(in thousands)</u>
2011	\$ 442
2012	510
2013	526
2014	555
2015	572
2016 through 2020	<u>5,425</u>
Total	<u>\$8,030</u>

20. Commitments and Contingent Liabilities

Lease Commitments: The Company leases locations as well as equipment under various non-cancellable operating leases that expire between 2011 and 2045. The majority of the leases contain renewal options and provisions for increases in rental rates based on an agreed upon index or predetermined escalation schedule. As of December 31, 2010, minimum future rental payments, exclusive of taxes and other charges, of these leases were:

<u>Years Ending December 31,</u>	<u>(in thousands)</u>
2011	\$ 4,260
2012	4,076
2013	3,891
2014	3,613
2015	3,044
Thereafter	<u>7,349</u>
Total minimum payments	<u>\$26,233</u>

Total rental expense on buildings and equipment, net of rental income of \$591 thousand, \$602 thousand and \$674 thousand, was \$4.5 million, \$3.5 million and \$3.7 million, for the years ended December 31, 2010, 2009 and 2008, respectively.

On September 30, 2004, the Company sold its Broadway and Longview locations. The Company maintains a substantial continuing involvement in the locations through various non-cancellable operating leases that do not contain renewal options. The resulting gain on sale of \$1.3 million was deferred using the financing method in accordance with the Leases topic of the FASB ASC and is being amortized over the life of the respective leases. At December 31, 2010 and 2009, the deferred gain was \$317 thousand and \$400 thousand, respectively, and is included in "Other liabilities" on the Consolidated Balance Sheets.

Financial Instruments with Off-Balance Sheet Risk: In the normal course of business, the Company makes loan commitments (typically unfunded loans and unused lines of credit) and issues standby letters of credit to accommodate the financial needs of its customers.

Standby letters of credit commit the Company to make payments on behalf of customers under specified conditions. Historically, no significant losses have been incurred by the Company under standby letters of credit. Both arrangements have credit risk essentially the same as that involved in extending loans to customers and are subject to the Company's normal credit policies, including collateral requirements, where appropriate. At December 31, 2010 and 2009, the Company's loan commitments amounted to \$622.8 million and \$587.5 million, respectively. Standby letters of credit were \$31.2 million and \$31.3 million at December 31, 2010 and 2009, respectively. In addition, commitments under commercial letters of credit used to facilitate customers' trade transactions amounted to \$0 and \$1.5 million at December 31, 2010 and 2009, respectively.

Legal Proceedings: The Company and its subsidiaries are from time to time defendants in and are threatened with various legal proceedings arising from their regular business activities. Management, after consulting with legal counsel, is of the opinion that the ultimate liability, if any, resulting from these pending or threatened actions and proceedings will not have a material effect on the financial statements of the Company.

21. Fair Value Accounting and Measurement

The Fair Value Measurements and Disclosures topic of the FASB ASC defines fair value, establishes a consistent framework for measuring fair value and expands disclosure requirements about fair value. We hold fixed and variable rate interest-bearing securities, investments in marketable equity securities and certain other financial instruments, which are carried at fair value. Fair value is determined based upon quoted prices when available or through the use of alternative approaches, such as discounted cash flow models, when market quotes are not readily accessible or available.

The valuation techniques are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our own market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1—Quoted prices for identical instruments in active markets that are accessible at the measurement date.

Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3—Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable.

Fair values are determined as follows:

Securities at fair value are priced using matrix pricing based on the securities' relationship to other benchmark quoted prices, and under the provisions of the Fair Value Measurements and Disclosures topic of the FASB ASC are considered a Level 2 input method.

Interest rate contracts are valued in models, which use as their basis, readily observable market parameters and are classified within level 2 of the valuation hierarchy.

The following table sets forth the Company's financial assets and liabilities that were accounted for at fair value on a recurring basis at December 31, 2010 by level within the fair value hierarchy. As required by the Fair Value Measurements and Disclosures topic of the FASB ASC, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

	Fair value at December 31, 2010	Fair Value Measurements at Reporting Date Using		
		Level 1	Level 2	Level 3
Assets				
Securities available for sale				
U.S. Government agency and government sponsored enterprise mortgage-backed securities and collateralized mortgage obligations	\$506,642	\$—	\$506,642	\$—
State and municipal debt securities	253,981	—	253,981	—
Other securities	3,243	—	3,243	—
Total securities available for sale	\$763,866	\$—	\$763,866	\$—
Other assets (Interest rate contracts)	\$ 10,167	\$—	\$ 10,167	\$—
Liabilities				
Other liabilities (Interest rate contracts)	\$ 10,167	\$—	\$ 10,167	\$—

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition such as loans measured for impairment and OREO. The following methods were used to estimate the fair value of each such class of financial instrument:

Impaired loans—A loan is considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due (both interest and principal) according to the contractual terms of the loan agreement. Impaired loans are measured by the fair market value of the collateral less estimated costs to sell.

Other real estate owned—OREO is real property that the Bank has taken ownership of in partial or full satisfaction of a loan or loans. OREO is recorded at the lower of the carrying amount of the loan or fair value less estimated costs to sell. This amount becomes the property's new basis. Any write-downs based on the property fair value less estimated cost to sell at the date of acquisition are charged to the allowance for loan and lease losses. Management periodically reviews OREO in an effort to ensure the property is carried at the lower of its new basis or fair value, net of estimated costs to sell. Any write-downs subsequent to acquisition are charged to earnings.

The following table sets forth the Company's assets that were measured using fair value estimates on a nonrecurring basis at December 31, 2010:

	Fair value at December 31, 2010	Fair Value Measurements at Reporting Date Using			Losses During the Year Ended December 31, 2010
		Level 1	Level 2	Level 3	
		<i>(in thousands)</i>			
Impaired loans	\$65,226	\$—	\$—	\$65,226	\$(13,906)
Other real estate owned	18,266	—	—	18,266	(4,155)
	<u>\$83,492</u>	<u>\$—</u>	<u>\$—</u>	<u>\$83,492</u>	<u>\$(18,061)</u>

The losses on impaired loans disclosed above represent the amount of the specific reserve and/or charge-offs during the period applicable to loans held at period end. The amount of the specific reserve is included in the allowance for loan and lease losses. The losses on other real estate owned disclosed above represent the writedowns taken at foreclosure that were charged to the allowance for loan and lease losses, as well as subsequent writedowns from updated appraisals that were charged to earnings.

22. Fair Value of Financial Instruments

Because broadly traded markets do not exist for most of the Company's financial instruments, the fair value calculations attempt to incorporate the effect of current market conditions at a specific time. These determinations are subjective in nature, involve uncertainties and matters of significant judgment and do not include tax ramifications; therefore, the results cannot be determined with precision, substantiated by comparison to independent markets and may not be realized in an actual sale or immediate settlement of the instruments. There may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results. For all of these reasons, the aggregation of the fair value calculations presented herein do not represent, and should not be construed to represent, the underlying value of the Company.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and due from banks and interest earning deposits with banks—The fair value of financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value that approximates carrying value.

Securities available for sale—The fair value of all investment securities are based upon the assumptions market participants would use in pricing the security. Such assumptions include quoted market prices, dealer quotes and discounted cash flows.

Federal Home Loan Bank stock—The fair value is based upon the par value of the stock which equates to its carrying value.

Loans held for sale—Loans held for sale are considered to have a fair value that approximates carrying value.

Loans—Loans are not recorded at fair value on a recurring basis. Nonrecurring fair value adjustments are periodically recorded on impaired loans that are measured for impairment based on the fair value of collateral. See Note 21, *Fair Value Accounting and Measurement*. For most performing loans, fair value is estimated using expected duration and lending rates that would have been offered on December 31, 2010 for loans which mirror the attributes of the loans with similar rate structures and average maturities. Commercial loans and construction loans, which are variable rate and short-term are reflected with fair values equal to carrying value. The fair values resulting from these calculations are reduced by an amount representing the change in estimated fair value attributable to changes in borrowers' credit quality since the loans were originated. For nonperforming loans, fair value is estimated by applying a valuation discount based upon loan sales data from the Federal Deposit Insurance Corporation.

FDIC loss sharing asset—The FDIC loss sharing asset is considered to have a fair value that approximates carrying value.

Interest rate contracts—Interest rate swap positions are valued in models, which use as their basis, readily observable market parameters.

Deposits—For deposits with no contractual maturity, the fair value is equal to the carrying value. The fair value of fixed maturity deposits is based on discounted cash flows using the difference between the deposit rate and current market rates for deposits of similar remaining maturities.

FHLB advances—The fair value of FHLB advances are estimated based on discounting the future cash flows using the market rate currently offered.

Repurchase Agreements—The fair value of securities sold under agreement to repurchase are estimated based on discounting the future cash flows using the market rate currently offered.

Long-term subordinated debt—The fair value of securities sold under agreement to repurchase are estimated based on discounting the future cash flows using an estimated market rate.

Other Financial Instruments—The majority of our commitments to extend credit and standby letters of credit carry current market interest rates if converted to loans, as such, carrying value is assumed to equal fair value.

The following table summarizes carrying amounts and estimated fair values of selected financial instruments as well as assumptions used by the Company in estimating fair value:

	December 31,			
	2010		2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)			
Assets				
Cash and due from banks	\$ 55,492	\$ 55,492	\$ 55,802	\$ 55,802
Interest-earning deposits with banks	458,638	458,638	249,272	249,272
Securities available for sale	763,866	763,866	620,038	620,038
FHLB stock	17,908	17,908	11,607	11,607
Loans held for sale	754	754	—	—
Loans	2,371,822	2,525,113	1,955,406	1,808,256
FDIC loss sharing asset	205,991	205,991	—	—
Interest rate contracts	10,167	10,167	9,054	9,054

Repurchase agreements	25,000	27,251	25,000	29,884
Other borrowings	642	642	86	86
Long-term obligations	25,735	20,156	25,669	20,296
Interest rate contracts	10,167	10,167	9,054	9,054

23. Derivatives and Hedging Activities

The Company periodically enters into certain commercial loan interest rate swap agreements in order to provide commercial loan customers the ability to convert from variable to fixed interest rates. Under these agreements, the Company enters into a variable-rate loan agreement with a customer in addition to a swap agreement. This swap agreement effectively converts the customer's variable rate loan into a fixed rate. The Company then enters into a corresponding swap agreement with a third party in order to offset its exposure on the variable and fixed components of the customer agreement. As the interest rate swap agreements with the customers and third parties are not designated as hedges under the Derivatives and Hedging topic of the FASB ASC, the instruments are marked to market in earnings.

The following table presents the fair value of derivative instruments at December 31, 2010 and 2009:

As of December 31,	Asset Derivatives				Liability Derivatives			
	2010		2009		2010		2009	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
(in thousands)								
Derivatives not designated as hedging instruments								
Interest rate contracts	Other assets	\$10,167	Other assets	\$9,054	Other liabilities	\$10,167	Other liabilities	\$9,054

Termination of Hedging Activities: On January 7, 2008, the Company discontinued its three prime rate floor derivative instruments that were previously utilized to hedge the variable cash flows associated with existing variable-rate loan assets based on the prime rate. The Company received \$8.1 million as a result of the termination transaction resulting in a net derivative gain of \$6.2 million. The interest rate floors had an original maturity date of April 4, 2011. In accordance with the Derivatives and Hedging topic of the FASB ASC, the net

derivative gain related to a discontinued cash flow hedge continues to be reported in accumulated other comprehensive income and is reclassified into earnings in the same periods during which the originally hedged forecasted transactions affect earnings. For the year ended December 31, 2010, \$1.8 million of the net derivative gain was reclassified into earnings. For the year ended December 31, 2011, the Company estimates that \$222 thousand of the net derivative gain will be reclassified from accumulated other comprehensive income into interest income.

24. Shareholders' Equity

Preferred Stock. On August 11, 2010, the Company redeemed all 76,898 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A ("Preferred Stock") originally issued to the U.S. Department of Treasury ("the Treasury") on November 21, 2008 for approximately \$76.9 million in capital under its Capital Purchase Program ("CPP"). The Company paid a total of \$77.8 million to the Treasury, consisting of \$76.9 million in principal and \$919 thousand in accrued and unpaid dividends. Earnings available to the common shareholders were reduced by \$2.3 million upon repayment of the Preferred Stock, which represented the remaining unamortized discount on the Preferred Stock. Additionally, on September 1, 2010, the Company repurchased the common stock warrant issued to the Treasury pursuant to the Troubled Asset Relief Program ("TARP") CPP for \$3.3 million. The warrant repurchase, together with the Company's redemption of its entire Preferred Stock issued to the Treasury, represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the Treasury.

Common Stock. On January 28, 2010, the Company declared a quarterly cash dividend of \$0.01 per share, payable on February 24, 2010 to shareholders of record as of the close of business February 10, 2010. On April 28, 2010, the Company declared a quarterly cash dividend of \$0.01 per share, payable on May 26, 2010, to shareholders of record at the close of business May 12, 2010. On July 29, 2010, the Company declared a quarterly cash dividend of \$0.01 per share, payable on August 25, 2010, to shareholders of record at the close of business August 11, 2010. On October 28, 2010 the Company declared a quarterly cash dividend of \$0.01 per share, payable on November 24, 2010, to shareholders of record at the close of business November 10, 2010. Subsequent to year end, on February 4, 2011 the Company declared a quarterly cash dividend of \$0.03 per share, payable on March 3, 2011, to shareholders of record at the close of business on February 17, 2011.

The payment of cash dividends is subject to Federal regulatory requirements for capital levels and other restrictions. In addition, the cash dividends paid by the Bank to the Company are subject to both Federal and State regulatory requirements.

On May 5, 2010, the Company completed an underwritten public offering of 11,040,000 shares of our common stock at a purchase price to the public of \$21.75 per share, resulting in gross proceeds of approximately \$240.1 million and net proceeds to us of approximately \$229.1 million.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). Based on that evaluation, the CEO and CFO have concluded that as of the end of the period covered by this report, our disclosure controls and procedures are effective in ensuring that the information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934 is (i) accumulated and communicated to our management (including the CEO and CFO) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Internal Control Over Financial Reporting

Management's Annual Report On Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The internal control system has been designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of the Company's published financial statements. Internal control over financial reporting includes maintaining records that in reasonable detail accurately and fairly reflect the Company's transactions; providing reasonable assurance that transactions are recorded as necessary for preparation of the Company's financial statements; providing reasonable assurance that receipts and expenditures are made in accordance with management authorization; and providing reasonable assurance that unauthorized acquisition, use or disposition of company assets that could have a material effect on the Company's financial statements would be prevented or detected on a timely basis. Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of the Company's financial statements would be prevented or detected.

Management has evaluated the effectiveness of its internal control over financial reporting as of December 31, 2010 based on the control criteria established in a report entitled *Internal Control-Integrated Framework*, issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, management has concluded that the Company's internal control over financial reporting is effective as of December 31, 2010.

Our independent registered public accounting firm has issued an attestation report our internal control over financial reporting, which appears in this annual report on Form 10K.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Columbia Banking System, Inc.
Tacoma, Washington

We have audited the internal control over financial reporting of Columbia Banking System, Inc. and its subsidiaries (the “Company”) as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Because management’s assessment and our audit were conducted to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management’s assessment and our audit of the Company’s internal control over financial reporting included controls over the preparation of the schedules equivalent to the basic financial statements in accordance with the instructions for the Consolidated Reports of Condition and Income for Schedules RC, RI, and RI-A. The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Annual Report On Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (“generally accepted accounting principles”). A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have not examined and, accordingly, we do not express an opinion or any other form of assurance on management’s statement referring to compliance with laws and regulations.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2010 of the Company and our report dated February 28, 2011 expressed an unqualified opinion on those financial statements.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information regarding “Directors, Executive Officers and Corporate Governance” is set forth under the headings “Proposal No.1: Election of Directors”, “Management—Executive Officers Who are Not Directors” and “Corporate Governance” in the Company’s 2011 Annual Proxy Statement (“Proxy Statement”) and is incorporated herein by reference.

Information regarding “Compliance with Section 16(a) of the Exchange Act” is set forth under the section “Section 16(a) Beneficial Ownership Reporting Compliance” of the Company’s Proxy Statement and is incorporated herein by reference. Information regarding the Company’s audit committee financial expert is set forth under the heading “Board Structure and Compensation—What Committees has the Board Established” in our Proxy Statement and is incorporated by reference.

On February 25, 2004, consistent with the requirements of the Sarbanes-Oxley Act of 2002, the Company adopted a Code of Ethics applicable to senior financial officers including the principal executive officer. The Code of Ethics was filed as Exhibit 14 to our 2003 Form 10-K Annual Report and can be accessed electronically by visiting the Company’s website at www.columbiabank.com.

ITEM 11. EXECUTIVE COMPENSATION

Information regarding “Executive Compensation” is set forth under the headings “Board Structure and Compensation” and “Executive Compensation” of the Company’s Proxy Statement and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information regarding “Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters” is set forth under the heading “Stock Ownership” of the Company’s Proxy Statement and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information regarding “Certain Relationships and Related Transactions, and Director Independence” is set forth under the headings “Interest of Management in Certain Transactions” and “Corporate Governance—Director Independence” of the Company’s Proxy Statement and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information regarding “Principal Accounting Fees and Services” is set forth under the heading “Independent Public Accountants” of the Company’s Proxy Statement and is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a)(1) **Financial Statements:**

The Consolidated Financial Statements and related documents set forth in “Item 8. Financial Statements and Supplementary Data” of this report are filed as part of this report.

(2) **Financial Statements Schedules:**

All other schedules to the Consolidated Financial Statements required by Regulation S-X are omitted because they are not applicable, not material or because the information is included in the Consolidated Financial Statements and related notes in “Item 8. Financial Statements and Supplementary Data” of this report.

(3) **Exhibits:**

The response to this portion of Item 15 is submitted as a separate section of this report appearing immediately following the signature page and entitled “Index to Exhibits.”

INTERNET

For information about Columbia Banking System, Inc., including news and financial results, product information, and service locations, access our home page on the World Wide Web at www.columbiabank.com. You can also view or retrieve copies of Columbia's financial reports on the Internet by connecting to www.sec.gov. Immediate access to the Company's quarterly earnings news releases via the Internet is provided by Company News On Call at www.prnewswire.com.

Total deposits were \$3.33 billion at the end of 2010, up 34% from \$2.48 billion in 2009. A real success story is the increase in our core deposits, which are an important factor in the net interest margin we have maintained. Core deposits, which we define as checking, savings, money market accounts and certificates of deposit under \$100,000, rose about 7% to \$3.0 billion at December 31, 2010 and comprise an exceptional 90% of total deposits.

Loans not covered under the FDIC loss-sharing agreements related to our two acquisitions were \$1.92 billion at the end of 2010, down 5% from \$2.01 billion at the end of 2009. Most of this decrease was centered in real estate and real estate construction loans, offset by an increase in our commercial business loans, which were up over \$50 million for the year. Our emphasis on the diversification of our loan portfolio continues to be a strength for us. At the end of 2010, 42% of our total portfolio was in commercial business loans, 41% was in commercial real estate loans, 9% in consumer loans, 5% in real estate construction-related loans, and approximately 3% in the for-sale housing segment.

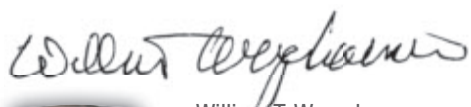

Although our non-performing assets increased slightly during the fourth quarter, we see general improvement in our overall loan quality. At the end of December, our criticized and classified asset totals were at their lowest level since December 2008. In light of the continued uncertainties in the economy, we have increased the level of our allowance for loan losses relative to total loans. The allowance for loan losses was 3.18% of total loans at December 31, 2010 compared to 2.66% at the end of 2009. At the end of the year, non-performing assets were \$126.7 million, compared to \$129.5 million at December 31, 2009.

This year in particular, we want to acknowledge our outstanding employees. This amazing team of bankers more than stepped up to the challenges of our extraordinarily rapid growth, all the while continuing to deliver excellent customer service on a daily basis. This made us even more gratified to again receive recognition in 2010 as one of the best places to work in Washington by both the Puget Sound Business Journal and Seattle Business Magazine.

Until the current difficult economic conditions improve, we will likely be challenged by slow loan growth, and do not anticipate a sharp increase in loan growth in 2011. In the coming months, we will work to increase our market share around every one of our branches by providing real value through our products and services, and our customer-focused approach to doing business. We have the ability to take advantage of the many opportunities provided by the disruption in our market areas. This is a period of time in which we believe we can make investments that will position your company for strength as a more normalized economy emerges.

We firmly believe the foundation of our success is our ongoing commitment to our customers and to every community we serve, resulting in long-term benefits for our shareholders.

Sincerely,

William T. Weyerhaeuser
Chairman of the Board
Columbia Banking System, Inc.
