

INVESTING IN PARTNERSHIP

A Quarter Century of Leadership in the Production of Specialty Hydrocarbons

About Us

Calumet Specialty Products Partners, L.P. (“Calumet”) (Nasdaq: CLMT) is a publicly traded, fixed distribution Master Limited Partnership (“MLP”) engaged in the production and sale of specialty hydrocarbon products, fuel products and oilfield services.

Geographic Footprint

SPECIALTY PRODUCTS

72% of Adjusted EBITDA*
Ten specialty products facilities that manufacture more than 4,900 products for global customers

FUEL PRODUCTS

16% of Adjusted EBITDA*
Four fuel products refineries with access to cost-advantaged Canadian and shale-based feedstocks

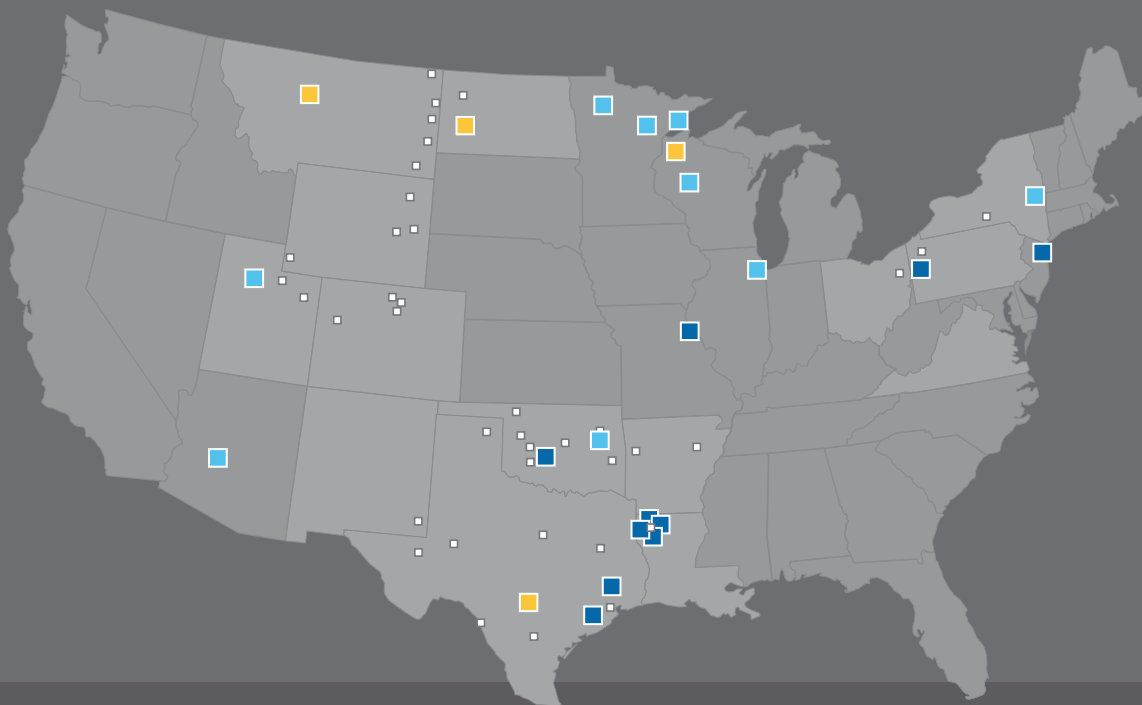

OILFIELD SERVICES

12% of Adjusted EBITDA*
More than 30 facilities serving ~300 E&P customers that operate in key shale plays in North America

STORAGE

In total, we have approximately 13.2 million barrels of aggregate storage capacity at our facilities and leased storage locations

* For the year ended December 31, 2014

CLMT
NASDAQ
LISTED

Fixed distribution Master Limited Partnership founded in 1990; IPO in 2006

\$366.8 million in Adjusted EBITDA (excluding special items) and **\$5.8 billion** in sales in 2014

14 production facilities
with more than **180,000 bpd**
of capacity

Produce nearly **4,900 specialty products** sold to approximately **6,400 global customers**

The Calumet Strategy

**To become the most
integrated, independent
specialty hydrocarbon
business in North America
with the most diverse line of
specialty product solutions.**

(1) Replacement capital expenditures are defined as those capital expenditures which do not increase operating capacity or reduce operating costs and exclude turnaround costs. Environmental capital expenditures include asset additions to meet or exceed environmental and operating regulations.

(2) Represents consolidated interest expense less non-cash interest expense.

(3) For a reconciliation of non-GAAP measures (including EBITDA, Adjusted EBITDA and Distributable Cash Flow) to GAAP measures, please refer to our latest public disclosures filed with the Securities and Exchange Commission.

Note: The sum of line items and the total lines may not equal due to rounding.

To our unitholders

FELLOW PARTNERS:

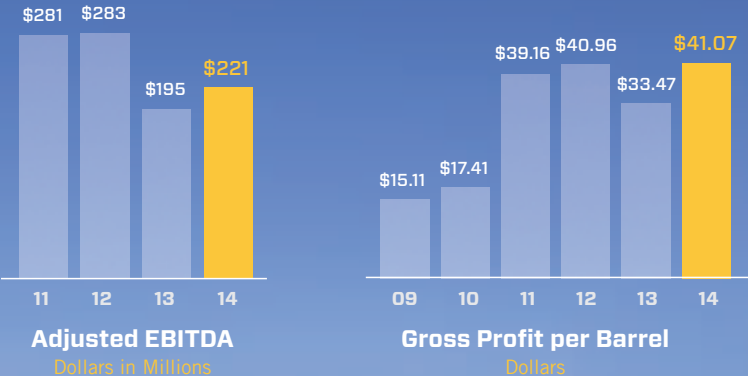

During the past year, Calumet continued to establish its position as one of the premier petroleum-based specialty and fuel products refiners in North America.

Our key performance metrics, including Adjusted EBITDA and Distributable Cash Flow (DCF), increased significantly during 2014 compared to the prior year. The results were driven by ongoing execution of our strategy to become the most integrated, independent specialty hydrocarbon business in North America, with the most diverse line of specialty product solutions.

In 2014, we paid \$210 million in distributions to our limited partners, or \$2.74 per limited partner unit, representing one of the most attractive yields in the fixed distribution Master Limited Partnership universe. Importantly, distribution coverage recovered dramatically in 2014 compared to 2013, moving us closer to our long-term distribution coverage ratio target of 1.2x-1.5x. The Partnership benefited from improved plant reliability, favorable fuels refining economics and stable products margins within our specialty products segment.

As we have done historically, we continued to bolster our portfolio with strategic acquisitions. In 2014, we purchased two companies – Anchor Drilling Fluids USA, Inc. and Specialty Oilfield Solutions, Ltd., both of which produce

Specialty Products Segment Financial Highlights

Calumet Specialty Products Partners, L.P. has one of the **most diverse specialty hydrocarbon capabilities** in the world.

and market drilling fluid solutions for oil/gas exploration & production companies. Although Calumet had previously sold a variety of specialty products into this market, the addition of these assets further expands our presence in this segment. We believe the execution of a vertical integration strategy – one that puts us closer to our crude oil suppliers and customers – represents a long-term competitive advantage for the Partnership.

From a capital markets perspective, we had a very successful year. In March 2014, we priced \$900 million in aggregate principal amount of 6.5% senior unsecured notes – the lowest coupon we’ve printed in our Partnership’s history. We used a portion of the proceeds from this offering and redeemed \$500 million of higher interest bearing senior unsecured notes, which helped to lower our interest expense. Then, in July, we amended and extended our revolving credit facility, increasing its size from \$850 million to \$1 billion, which served to both increase the Partnership’s access to liquidity and lower our borrowing costs. Overall, we remain opportunistic about our ability to secure lower cost of debt and equity to help fund the long-term growth of the Partnership.

During the past three years, we have invested hundreds of millions of dollars in four, high-return organic growth projects. In 2015, three of these four projects will come online, while the fourth, and largest, of these is scheduled for completion during the first quarter of 2016. Collectively, these projects are estimated to yield cash-on-cash returns of 20% to 30% and represent a significant opportunity to grow our Adjusted EBITDA on an annualized basis. As we look ahead to the next 24 months, we expect the combined benefit of lower turnaround spending and improved utilization rates at our fuels refineries, in addition to incremental contributions from the organic growth projects, will help position Calumet for distribution growth.

FOCUSED ON SAFE, RELIABLE OPERATIONS

For Calumet to consistently generate profitable growth, our refineries must operate safely, reliably and in compliance with all regulatory guidelines. While planned facility maintenance is a requisite part of being in the business of specialty and fuel products refining, some years involve more maintenance than others. Generally speaking,

our fuel products refineries conduct planned maintenance “turnarounds” once every five years; most recently, our last turnaround cycle lasted between 2013 and the first half of 2014. Having concluded maintenance at each of our fuels facilities, we fully anticipate our fuels refineries will operate at optimal levels until the next round of planned turnaround maintenance begins in 2018.

Exiting this most recent turnaround cycle, our fuels refineries have performed well. Our Shreveport (Louisiana), Superior (Wisconsin), San Antonio (Texas) and Great Falls (Montana) refineries each operated at or above our targeted run rates during the third and fourth quarters of 2014, resulting in significantly improved fuel products segment gross profits for the full-year 2014. Following an extended planned turnaround under new plant management at Shreveport during the second quarter of 2014, this facility has dramatically increased its production levels above historical rates, in sharp contrast to the refinery’s performance in recent years.

SEGMENT HIGHLIGHTS

With our fuels refineries operating on plan, Calumet was able to take advantage of relatively robust refining economics during most of the year, particularly within key niche markets where refining competition is limited, such as Superior and Great Falls. Fuel products segment Adjusted EBITDA increased to \$50 million in 2014, versus \$47 million in 2013. Although product cracks and crude oil differentials remain highly volatile, we continue to help mitigate market risk within our fuels refining segment by selectively using derivatives contracts through hedging counterparties, seeking to hedge up to 75% of our fuels production as far as three years forward.

Despite an otherwise solid year in the fuels refining business, both Calumet and the broader refining industry remain subject to compliance costs under the Renewable Fuel Standard (RFS). Under the regulation of the Environmental Protection Agency (EPA), the RFS provides annual requirements for the total volume of renewable transportation fuels, which are mandated to be blended into finished petroleum fuels. If a refiner does not meet its required annual Renewable Volume Obligation (RVO), the refiner can purchase blending credits in the open market, referred to as Renewable Identification Numbers (RINs).

In a positive development, the EPA recently granted the Partnership’s Shreveport and San Antonio refineries a “small refinery exemption” under the RFS for the full year 2013, as provided for under the Clean Air Act. The EPA determined that for the full year 2013, compliance with the RFS would represent a “disproportionate economic hardship” for these two refineries, which, in turn, led to a significant reduction in the Partnership’s requirement to purchase RINs at these two refineries. We intend to reapply for the small refinery exemption at several of our refineries for full year 2014 during early 2015.

Long-Term Commitment to Cash Distributions

As of February 2015, Calumet has paid 36 consecutive quarterly cash distributions to its limited partners.

Our record of cash distributions represents a return of capital in excess of \$930 million over the last nine years. Since our initial public offering in 2006, our cash distribution has increased at a compounded annual growth rate of 2.3% per year. Currently, we have the highest quarterly cash distribution of any fixed-distribution refiner in the market and pay that distribution with a consistency that has positioned us as an attractive income/yield vehicle for many individual and institutional investors.

At December 31, 2014, our annualized cash distribution stood at \$2.74 per limited partner unit.

We expect the combined benefit of lower turnaround spending and improved utilization rates at our fuels refineries, in addition to incremental contributions from our organic growth projects, **will help position Calumet for distribution growth.**

Distributable Cash Flow
Dollars in Millions

Distribution Coverage Ratio

Our specialty products segment also performed well in 2014, supported by incremental contributions from recently completed acquisitions, coupled with a decline in the average price per barrel of crude oil, particularly during the second half of 2014. During 2014, our specialty products segment Adjusted EBITDA increased to \$221 million, versus \$195 million in 2013. Given our leadership in the specialty products markets in which we operate, prices on many of our specialty formulations are slow to decline – and even tend to expand – in an environment where crude oil prices rapidly plummet. This dynamic was particularly relevant in the fourth quarter of 2014, a period during which the price of West Texas Intermediate (WTI) crude oil declined by approximately 40%, resulting in lower cost of sales for our business. Although we choose not to predict the long-term direction of commodities prices, we think it is important to highlight the defensive posture of our business even in the most volatile of markets.

PLATFORM FOR GROWTH

We seek to grow our business through a combination of targeted strategic acquisitions and investments in organic growth projects. In some cases, the acquisitions we complete lead to fresh organic growth opportunities, while in other instances, we seek to capitalize on emerging technologies or inefficient markets through greenfield investments that enable the Partnership to establish a leadership position.

Presently, we are engaged in four such growth projects:

- A 50/50 joint venture in a 20,000-barrel-per-day refinery in Dickinson, North Dakota, which is scheduled to begin selling diesel, among other finished products, into the local market during 2Q15;
- More than doubling capacity at our Louisiana, Missouri esters plant, which should be complete by 2Q15;
- A project at our San Antonio refinery that will convert lower-margin diesel into higher-margin aliphatic solvents by the end of 4Q15; and
- More than doubling production capacity from 10,000 barrels per day to 25,000 barrels per day at our Great Falls, Montana, refinery by 1Q16, a project that will allow us to further capitalize on locally sourced, discounted crude oil feedstock, as well as latent demand for fuel products in the local market.

Collectively, these four projects are expected to cost an estimated \$640 million to \$665 million and are forecasted to generate \$128-\$157 million of incremental EBITDA per year for the Partnership. We remain focused on the successful, timely completion of these projects, given their importance to our long-term growth story. Although various factors have the potential to impact projects of this size and scope, we are excited to be in the “final stretch” of the campaign, with three of the four projects slated for completion in 2015. In the years ahead, we expect contributions from these projects will provide our investors with additional sources of cash flow capable of supporting consistent growth in the quarterly cash distribution.

LOWER CAPITAL SPENDING, IMPROVED PERFORMANCE METRICS

For 2015, we anticipate total capital spending of \$285-\$335 million (a 26% to 37% decline from the prior year), the majority of which will be dedicated to the completion of our remaining organic growth projects. Between 2011 and 2014, discretionary spending on growth projects accounted for 50% to 80% of total annual capital spending. Once the Great Falls refinery expansion is completed in the first quarter of 2016, spending on organic growth projects is expected to decline dramatically. This decline in growth-related capital spending, coupled with the decline in turnaround-related spending (until the commencement of the next turnaround cycle in 2018), equates to a period in the 2016-2017 timeframe when Calumet expects to experience a period of significantly lower annual capital spending, likely well below \$100 million per year.

This decline in capital spending should benefit us on a number of fronts. Lower capital spending serves to reduce our leverage ratio, it benefits DCF, or cash flow available to the Partnership for distribution purposes, and it also serves to benefit our Distribution Coverage Ratio (DCR). Having invested significant capital in accretive growth projects in prior years, we will begin to reap the full cash flow contributions stemming from these projects in 2016-2017, even as total capital spending declines to maintenance levels.

BUILDING OUR 'INVESTMENT BRAND'

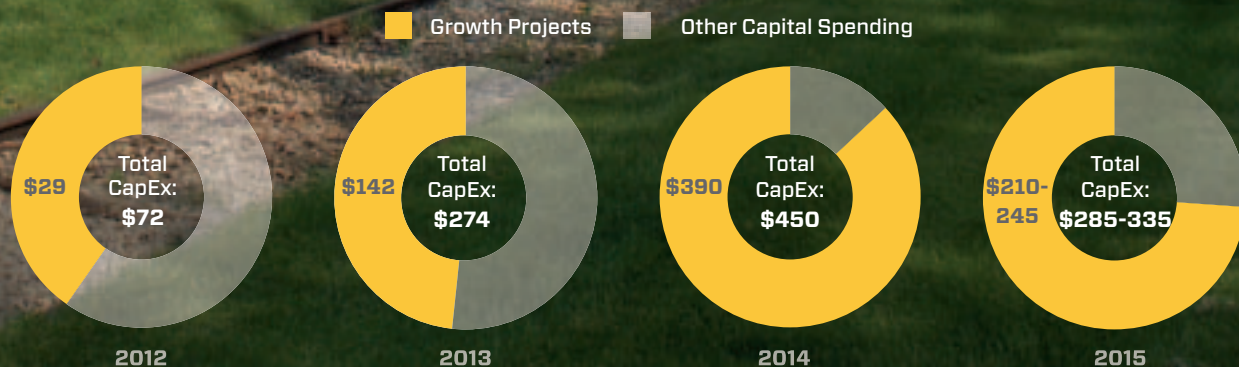

The Calumet story is a unique one, characterized by high insider ownership, niche refining assets, a highly specialized product mix, a diverse range of global customers and a highly attractive quarterly distribution. While we encounter competitors who engage in one or even several of the markets that we occupy, Calumet is the lone full-service, publicly traded specialty products company in North America; we have no "perfect peer." Consequently, educating the public on our story has been no easy task; yet, for those who take the time to learn about our business and the long-term possibilities for growth, they are generally pleased to find themselves

acquainted with a well managed organization whose heritage of innovation, customer service and commitment to product quality set it apart.

During the past two years, we have made significant progress in more effectively serving our unitholders through a proactive investor relations function. During this time, we have made a broader effort to achieve a fair cost of capital for our equity and debt by expanding our investor base, increasing our marketing efforts and adding significant sell-side analyst coverage. While we still have work ahead of us, we are encouraged by our early progress and, given the opportunity, look forward to meeting with each of you as you learn more about our Company.

Total Capital Spending and Investment in Organic Growth Projects (Dollars in Millions)

BOARD UPDATES

In September, we announced that Daniel Sajkowski and Amy Schumacher were elected to the Board of Directors of Calumet GP, LLC, the general partner of the Partnership. Mr. Sajkowski and Ms. Schumacher replaced Mr. Nick Rutigliano and Mr. Bill Fehsenfeld, two seasoned executives who chose to retire from the Board following many years of dedicated service. In Mr. Sajkowski, we add a board member with deep technical expertise, given his three decades of energy industry experience, particularly in the crude oil refining sector. Previously, Mr. Sajkowski was the business unit leader for six years at BP's Whiting, Indiana refinery, the fourth-largest refinery in the United States, where he was responsible for initiating a \$4 billion modernization of the refinery. Ms. Schumacher provides a similarly impressive background as a chemicals executive, currently serving as President of Monument Chemicals, Inc. and Haltermann Solutions. We welcome these new board members and look forward to benefiting from their knowledge and experience in the years to come.

STRATEGIC OUTLOOK

When Fred Fehsenfeld and I founded Calumet in 1990, our strategy was as uncomplicated as it was elegant: acquire high-margin, low-volume specialty products businesses that were too small – or too complex – for larger, integrated energy companies. In short, we sought to buy diamonds in the rough that were small but diamonds nonetheless. Nearly 25 years later, that strategy remains intact at Calumet. We continue to evaluate both the private and public markets for acquisition opportunities, with a focus on the midstream and downstream sectors, and an emphasis on niche market assets with high barriers to entry.

While for the time being the bulk of our attention remains on the successful, timely completion of our organic growth projects, we continue to actively evaluate the M&A landscape for the next addition to our asset portfolio. As leverage declines with the addition of EBITDA contribution from the organic projects, we seek to become more active again in the M&A arena.

The Calumet story is a unique one, characterized by high insider ownership, niche refining assets, a highly specialized product mix, a diverse range of global customers and a highly attractive quarterly distribution.

On behalf of our entire Partnership, including our more than 2,000 dedicated employees, I want to express my deepest appreciation for the continued support of our strategic partners, customers and the communities where we live and work. We couldn't do what we do without you. We also extend a thank you to you, our unitholders, for your continued support for, and confidence in, the Partnership.

We make products that change the way people live for the better. For any business, that's a legacy worth having. We look forward to building upon that legacy in the year ahead, as our combined efforts from across our many brands, facilities and geographies contribute to the profitable growth of our Partnership.

Regards,

F. William Grube

Chief Executive Officer
Vice Chairman of the Board

Platform for Growth

Multi-year capital spending campaign
with **four high-return organic growth projects**

SPECIALTY PRODUCTS

LOUISIANA, MISSOURI

Esters Plant Expansion Project

More than double esters production capacity from 35 to 75 million pounds

DESCRIPTION: Increasing the manufacturing and blending flexibility of the plant; also enhancing R&D capabilities and adding new warehouse and tank farm

BENEFITS: Esters are a key base stock used in the aviation, refrigerant and automotive lubricants markets

EST. COMPLETION DATE: 2Q15

EST. TOTAL COST: \$40-45 million

EST. ANNUAL EBITDA CONTRIBUTION: \$8-12 million

SAN ANTONIO, TEXAS

Refinery Solvents Project

Create capacity for production of up to 3,000 bpd of specialty solvents

DESCRIPTION: Take the refinery's ultra-low sulfur diesel and jet fuel production and convert it into up to 3,000 bpd of higher-margin solvents that will meet customer requirements for low aromatic content

BENEFITS: Solvents production will supplement the refinery's current fuels production slate and will be targeted toward the drilling fluids, paints and coatings markets

EST. COMPLETION DATE: 4Q15

EST. TOTAL COST: \$65-75 million

EST. ANNUAL EBITDA CONTRIBUTION: \$20 million

- » **20-30%** forecasted annualized rates of return
- » Significant base of **incremental EBITDA growth** during next 24 months
- » Approximately **\$440 million invested** through 2014
- » Total projected campaign cost of approximately **\$640-665 million**

FUEL PRODUCTS

DICKINSON, NORTH DAKOTA

Refinery Construction Project

Build 'greenfield' 20,000-bpd 'Dakota Prairie' diesel refinery

DESCRIPTION: Joint venture project between Calumet and its 50/50 JV partner, MDU Resources, Inc. Cost and EBITDA contribution split 50/50 between the JV partners

BENEFITS: Refinery is expected to be completely supplied with locally sourced Bakken crude oil. JV forecasted returns assume Bakken crude oil discount to WTI of \$6 per barrel and normalized product margins within the local market

EST. COMPLETION DATE: 2Q15

EST. TOTAL COST: \$425-435 million

EST. ANNUAL EBITDA CONTRIBUTION: \$60-70 million

GREAT FALLS, MONTANA

Refinery Expansion Project

Increase production capacity from 10,000 bpd to 25,000 bpd

DESCRIPTION: Installation of a new crude unit that will process 25,000 bpd of crude oil and other feedstocks, and a 25,000 bpd hydrocracker

BENEFITS: Capitalize on local access to cost-advantaged Bow River crude oil, while producing additional fuels and refined products for delivery into the regional market

EST. COMPLETION DATE: 1Q16

EST. TOTAL COST: \$400 million

EST. ANNUAL EBITDA CONTRIBUTION: \$70-90 million

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K (this “Annual Report”) includes certain “forward-looking statements.” These statements can be identified by the use of forward-looking terminology including “may,” “intend,” “believe,” “expect,” “anticipate,” “estimate,” “continue,” or other similar words. The statements regarding (i) estimated capital expenditures as a result of required audits or required operational changes or other environmental and regulatory liabilities, (ii) estimated capital expenditures as a result of our planned organic growth projects and estimated annual EBITDA contributions from such projects, (iii) our anticipated levels of, use and effectiveness of derivatives to mitigate our exposure to crude oil price changes, natural gas price changes and fuel products price changes, (iv) estimated costs of complying with the U.S. Environmental Protection Agency’s (“EPA”) Renewable Fuel Standard, including the prices paid for Renewable Identification Numbers (“RINs”), (v) our ability to meet our financial commitments, minimum quarterly distributions to our unitholders, debt service obligations, debt instrument covenants, contingencies and anticipated capital expenditures and (vi) our access to capital to fund capital expenditures and our working capital needs and our ability to obtain debt or equity financing on satisfactory terms, as well as other matters discussed in this Annual Report that are not purely historical data, are forward-looking statements. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate. All comments concerning our expectations for future sales and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Known material factors that could cause our actual results to differ from those in the forward-looking statements are those described in Part I, Item 1A “Risk Factors” of this Annual Report. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.

References in this Annual Report to “Calumet Specialty Products Partners, L.P.,” “Calumet,” “the Company,” “we,” “our,” “us” or like terms refer to Calumet Specialty Products Partners, L.P. and its subsidiaries. References to “Predecessor” in this Annual Report refer to Calumet Lubricants Co., Limited Partnership and its subsidiaries, the assets and liabilities of which were contributed to Calumet Specialty Products Partners, L.P. and its subsidiaries upon the completion of our initial public offering in 2006. References in this Annual Report to “our general partner” refer to Calumet GP, LLC, the general partner of Calumet Specialty Products Partners, L.P.

PART I

Items 1 and 2. *Business and Properties*

Overview

We are a leading independent producer of high-quality, specialty hydrocarbon products in North America. We are headquartered in Indianapolis, Indiana and own specialty and fuel products facilities primarily located in northwest Louisiana, northwest Wisconsin, northern Montana, western Pennsylvania, Texas, New Jersey, eastern Missouri and North Dakota. We own and lease oilfield services locations in Texas, Oklahoma, Louisiana, Arkansas, Colorado, Utah, Wyoming, Montana, New Mexico, New York, North Dakota, Pennsylvania and Ohio. We own and lease additional facilities, primarily related to production and distribution of specialty, fuel and oilfield services products, throughout the United States (“U.S.”). Our business is organized into three segments: specialty products, fuel products and oilfield services. In our specialty products segment, we process crude oil and other feedstocks into a wide variety of customized lubricating oils, white mineral oils, solvents, petrolatums and waxes. Our specialty products are sold to domestic and international customers who purchase them primarily as raw material components for basic industrial, consumer and automotive goods. We also blend and market specialty products through our Royal Purple, Bel-Ray, TruFuel and Quantum brands. In our fuel products segment, we process crude oil into a variety of fuel and fuel-related products, including gasoline, diesel, jet fuel, asphalt and heavy fuel oils, as well as reselling purchased crude oil to third party customers. Our oilfield services segment manufactures and markets products and provides oilfield services including drilling fluids, completion fluids, production chemicals and solids control services to the oil and gas exploration industry throughout the U.S. For the year ended December 31, 2014, approximately 29.9% of our sales and 70.5% of our gross profit were generated from our specialty products segment, approximately 63.7% of our sales and 6.5% of our gross profit were generated from our fuel products segment and approximately 6.4% of our sales and 23.0% of our gross profit were generated from our oilfield services segment.

Our Primary Operating Assets

Our primary operating assets consist of:

Refinery/Facility	Location	Year Acquired	Current Feedstock Throughput Capacity in barrels per day (“bpd”)	Products
Shreveport	Louisiana	2001	60,000	Specialty lubricating oils and waxes, gasoline, diesel, jet fuel and asphalt
Superior	Wisconsin	2011	45,000	Gasoline, diesel, asphalt and heavy fuel oils
San Antonio	Texas	2013	17,500	Diesel, jet fuel, gasoline and other fuel products
Cotton Valley	Louisiana	1995	13,500	Specialty solvents used principally in the manufacture of paints, cleaners, automotive products and drilling fluids
Montana	Montana	2012	10,000	Gasoline, diesel, jet fuel and asphalt
Princeton	Louisiana	1990	10,000	Specialty lubricating oils, including process oils, base oils, transformer oils, refrigeration oils and asphalt
Karns City	Pennsylvania	2008	5,500	White mineral oils, solvents, petrolatums, gelled hydrocarbons, cable fillers and natural petroleum sulfonates
Dickinson	Texas	2008	1,300	White mineral oils, compressor lubricants, natural petroleum sulfonates and biodiesel
Royal Purple	Texas	2012	N/A	Specialty products including premium industrial and consumer synthetic lubricants
Bel-Ray	New Jersey	2013	N/A	Specialty products including premium industrial and consumer synthetic lubricants and greases

Drilling and Oilfield Services Assets. Anchor Drilling Fluids and Anchor Oilfield Services (as defined below) manufactures and markets specialty products and provides oilfield services including drilling fluids, completion fluids, production chemicals and solids control services to the oil and gas exploration industry. We design, manufacture and package these specialty products at our locations in Texas, Oklahoma, Louisiana, Arkansas, Colorado, Utah, Wyoming, Montana, New

Mexico, New York, North Dakota, Pennsylvania and Ohio. These locations serve the great majority of major onshore oil fields in the U.S.

Crude Oil Logistics Assets. We own and operate seven crude oil loading facilities and related assets in North Dakota and Montana, which provide us the ability to transport crude oil directly from the point of lease, into our crude oil loading facilities and then onto the Enbridge Pipeline System (“Enbridge Pipeline”) where it can be routed to our refineries and/or third party customers.

Storage, Distribution and Logistics Assets. We own and operate product terminals in Burnham, Illinois (“Burnham”), Rhinelander, Wisconsin (“Rhinelander”), Crookston, Minnesota (“Crookston”) and Proctor, Minnesota (“Duluth”) with aggregate storage capacities of approximately 150,000, 166,000, 156,000, and 200,000 barrels, respectively. These terminals, as well as additional owned and leased facilities throughout the U.S., facilitate the distribution of products in the Upper Midwest, East Coast, West Coast and Mid-Continent regions of the U.S. and Canada.

We also use approximately 3,000 leased railcars to receive crude oil or distribute our products throughout the U.S. and Canada. In total, we have approximately 13.2 million barrels of aggregate storage capacity at our facilities and leased storage locations.

Business Strategies

Our management team is dedicated to improving our operations by executing the following strategies:

- *Concentrate on Stable Cash Flows.* We intend to continue to focus on operating assets and businesses that generate stable cash flows. Approximately 29.9% of our sales and 70.5% of our gross profit in 2014 were generated by the sale of specialty products, a segment of our business which is characterized by stable customer relationships due to our customers’ requirements for the highly specialized products we provide. In addition, we manage our exposure to crude oil price fluctuations in this segment by passing on incremental feedstock costs to our specialty products customers. In our fuel products segment, which accounted for 63.7% of our sales and 6.5% of our gross profit in 2014, we seek to mitigate our exposure to fuel products margin volatility by maintaining a longer-term fuel products hedging program. Our entry into the oilfield services industry, which accounted for 6.4% of our sales and 23.0% of our gross profit in 2014, also contributes to our diversity of cash flows. In addition, our recent acquisitions of various refineries located in different geographic locations provides for diversity of cash flows based on the refining margin environment in each such region. We believe the diversity of our operating assets, products, our broad customer base and our hedging activities help contribute to the stability of our cash flows.
- *Develop and Expand Our Customer Relationships.* Due to the specialized nature of, and the long lead-time associated with, the development and production of many of our specialty products, our customers are incentivized to continue their relationships with us. We believe that our larger competitors do not work with customers as we do from product design to delivery for smaller volume specialty products like ours. We intend to continue to assist our existing customers in their efforts to expand their product offerings, as well as marketing specialty product formulations and services to new customers. By striving to maintain our long-term relationships with our broad base of existing customers and by adding new customers, we seek to limit our dependence on any one portion of our customer base.
- *Enhance Profitability of Our Existing Assets.* We continue to evaluate opportunities to improve our existing asset base, to increase our throughput, profitability and cash flows. Following each of our asset acquisitions, we have undertaken projects designed to maximize the profitability of our acquired assets, such as: (1) the enhancement at our Superior refinery completed in November 2012, which enables the refinery to ship crude oil by railcar to our other facilities as well as third party customers, (2) the enhancements at our San Antonio refinery completed in December 2013 allowed us to blend finished gasoline and increased its production capacity from 14,500 bpd to 17,500 bpd and (3) the increase of production capacity at our Montana refinery from 10,000 bpd to 25,000 bpd, expected to be completed in the first quarter of 2016. We intend to further increase the profitability of our existing asset base through various measures which may include changing the product mix of our processing units, debottlenecking and expanding units as necessary to increase throughput, restarting idle assets and reducing costs by improving operations. We also continue to focus on optimizing current operations through energy savings initiatives, improving reliability, product quality enhancements and product yield improvements.
- *Pursue Strategic and Complementary Acquisitions.* Since 1990, our management team has demonstrated the ability to identify opportunities to acquire assets and product lines where we can enhance operations and improve profitability. In the future, we intend to continue to consider strategic acquisitions of assets or agreements with third parties that offer the opportunity for operational efficiencies, the potential for increased utilization and expansion of facilities, or the expansion of product offerings in each of our specialty products, fuel products and oilfield services segments. In addition, we may pursue selected acquisitions in new geographic or product areas to the extent we perceive similar

opportunities. For example, since 2011 we have completed the following acquisitions that we believe significantly enhance and diversify our existing specialty products, fuel products and oilfield services segments:

- Superior, Wisconsin refinery (“Superior”) - a refinery that produces and sells gasoline, diesel, asphalt and heavy fuel oils acquired in September 2011 (“Superior Acquisition”).
- Calumet Packaging, LLC (“Calumet Packaging”) - formerly known as TruSouth Oil, LLC, a specialty petroleum packaging and distribution company acquired in January 2012.
- Louisiana, Missouri facility - an aviation and refrigerant synthetic lubricants business acquired in January 2012.
- Royal Purple, Inc. (“Royal Purple”) - a leading independent formulator and marketer of specialty synthetic lubricants and greases acquired in July 2012.
- Montana Refining Company, Inc. (“Montana Refining”) - a refinery that produces and sells gasoline, diesel, jet fuel and asphalt products acquired in October 2012.
- San Antonio, Texas refinery (“San Antonio”) - a refinery that produces and sells diesel, gasoline, jet fuel and other fuel products acquired in January 2013.
- Crude oil logistics assets - crude oil loading facilities and related assets in North Dakota and Montana acquired in August 2013.
- Bel-Ray Company, LLC (“Bel-Ray”) - a manufacturer and global distributor of high-performance synthetic lubricants and greases acquired in December 2013.
- United Petroleum, LLC assets (“United Petroleum”) - a marketer and distributor of high performance lubricants acquired in February 2014.
- ADF Holdings, Inc., the parent company of Anchor Drilling Fluids USA, Inc. (“Anchor Drilling Fluids”) - an independent provider and marketer of drilling fluids, completion fluids and production chemicals to the oil and gas exploration industry acquired in March 2014.
- Specialty Oilfield Solutions, Ltd. assets (“Anchor Oilfield Services”) - a full-service drilling fluids and solids control company with primary operations in the Eagle Ford, Marcellus and Utica shale formations acquired from Specialty Oilfield Services, Ltd. in August 2014.

See “—Recent Acquisitions” below for additional information regarding our recent acquisitions.

Competitive Strengths

We believe that we are well positioned to execute our business strategies successfully based on the following competitive strengths:

- *We Offer Our Customers a Diverse Range of Specialty Products.* We offer a wide range of approximately 4,900 specialty products. We believe that our ability to provide our customers with a more diverse selection of products than most of our competitors gives us an advantage in competing for new business. We believe that we are the only specialty products manufacturer that produces all four of naphthenic lubricating oils, paraffinic lubricating oils, waxes and solvents. A contributing factor in our ability to produce numerous specialty products is our ability to ship products between our facilities for product upgrading in order to meet customer specifications.
- *We Have Strong Relationships with a Broad Customer Base.* We have long-term relationships with many of our customers and we believe that we will continue to benefit from these relationships. Our customer base includes more than 6,400 active accounts and we are continually seeking new customers. No single customer accounted for more than 10% of our consolidated sales in each of the three years ended December 31, 2014, 2013 and 2012.
- *Our Facilities Have Advanced Technology.* Our facilities are equipped with advanced, flexible technology that allows us to produce high-grade specialty products and to produce fuel products that comply with low sulfur fuel regulations. For example, our fuel products refineries have the capability to make ultra-low sulfur diesel and gasoline that meet federally mandated low sulfur standards and the Mobile Source Air Toxic Rule II standards (“MSAT II Standards”) set by the EPA requiring the reduction of benzene levels in gasoline. Also, unlike larger refineries, which lack some of the equipment necessary to achieve the narrow distillation ranges associated with the production of specialty products, our operations are capable of producing a wide range of products tailored to our customers’ needs.
- *We Have an Experienced Management Team.* Our management has a proven track record of enhancing value through the acquisition, exploitation and integration of refining assets and the development and marketing of specialty products

and services. Our senior management team has an average of over 25 years of industry experience. Our team’s extensive experience and contacts within the refining industry provide a strong foundation and focus for managing and enhancing our operations, accessing strategic acquisition opportunities and constructing and enhancing the profitability of new assets.

Recent Acquisitions

The following table summarizes acquisitions that we completed during 2014. Please see Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Acquisitions” and Note 3 “Acquisitions” in Part II, Item 8 “Financial Statements and Supplementary Data” for additional information regarding these acquisitions.

Acquisition	Acquisition Date	Description	Aggregate Purchase Price ⁽¹⁾
ADF Holdings, Inc. (“Anchor Acquisition”)	March 31, 2014	An independent provider and marketer of drilling fluids, completion fluids and production chemicals to the oil and gas exploration industry.	\$ 223.6 ⁽²⁾
Specialty Oilfield Solutions, Ltd. assets (“SOS Acquisition”)	August 1, 2014	A full-service drilling fluids and solids control company with primary operations in the Eagle Ford, Marcellus and Utica shale formations.	\$ 29.6
United Petroleum, LLC assets (“United Petroleum Acquisition”)	February 28, 2014	A marketer and distributor of high performance lubricants.	\$ 10.4

⁽¹⁾ Aggregate purchase price is net of cash acquired and includes working capital.

⁽²⁾ Aggregate purchase price is subject to certain other adjustments, including tax adjustments.

Ongoing Acquisition Activities

Consistent with our business growth strategy, we are continuously engaged in discussions with potential sellers regarding the possible purchase of assets and operations that are strategic and complementary to our existing operations. These acquisition efforts may involve participation by us in processes that have been made public and involve a number of potential buyers, commonly referred to as “auction” processes, as well as situations in which we believe we are the only potential buyer or one of a limited number of potential buyers in negotiations with the potential seller. These acquisition efforts often involve assets and operations which, if acquired, could have a material effect on our financial condition and results of operations and require special financing.

We typically do not announce a transaction until we have executed a definitive acquisition agreement. However, in certain cases in order to protect our business interests or for other reasons, we may defer public announcement of an acquisition until closing or a later date. Past experience has demonstrated that discussions and negotiations regarding a potential acquisition can advance or terminate in a short period of time. Moreover, the closing of any transaction for which we have entered into a definitive acquisition agreement will be subject to customary and other closing conditions, which may not ultimately be satisfied or waived. Accordingly, we can give no assurance that our current or future acquisition efforts will be successful. Although we expect the acquisitions we make to be accretive in the long term, we can provide no assurance that our expectations will ultimately be realized.

Partnership Structure and Management

Calumet Specialty Products Partners, L.P. is a Delaware limited partnership formed on September 27, 2005. Our general partner is Calumet GP, LLC, a Delaware limited liability company. As of March 2, 2015, we have 69,760,218 common units and 1,423,677 general partner units outstanding. Our general partner owns 2% of the Company and all incentive distribution rights and has sole responsibility for conducting our business and managing our operations. For more information about our general partner’s board of directors and executive officers, please read Part III, Item 10 “Directors, Executive Officers of Our General Partner and Corporate Governance.”

Our Operating Assets and Contractual Arrangements

General

The following table sets forth information about our combined operations, excluding the results of operations of Anchor and SOS. Facility production volume differs from sales volume due to changes in inventories and the sale of purchased fuel product blendstocks such as ethanol and biodiesel and the resale of crude oil in our fuel products segment. The table includes the results of operations at our Missouri facility commencing January 3, 2012, Calumet Packaging facility commencing January 6, 2012, Royal Purple facility commencing July 3, 2012, Montana refinery commencing October 1, 2012, San Antonio refinery

commencing January 2, 2013, Bel-Ray facility commencing December 10, 2013 and United Petroleum assets commencing February 28, 2014:

	Year Ended December 31,			Year Ended December 31,		
	2014	2013	% Change	2013	2012	% Change
	(In bpd)			(In bpd)		
Total sales volume ⁽¹⁾	122,852	116,477	5.5 %	116,477	97,789	19.1 %
Total feedstock runs ⁽²⁾	117,427	110,237	6.5 %	110,237	97,600	12.9 %
Facility production: ⁽³⁾						
Specialty products:						
Lubricating oils	11,836	13,247	(10.7)%	13,247	14,524	(8.8)%
Solvents	8,934	8,759	2.0 %	8,759	9,332	(6.1)%
Waxes	1,510	1,443	4.6 %	1,443	1,280	12.7 %
Packaged and synthetic specialty products ⁽⁴⁾	1,754	1,481	18.4 %	1,481	1,351	9.6 %
Other	1,829	2,192	(16.6)%	2,192	3,084	(28.9)%
Total specialty products	25,863	27,122	(4.6)%	27,122	29,571	(8.3)%
Fuel products:						
Gasoline	34,221	29,374	16.5 %	29,374	24,394	20.4 %
Diesel	27,074	26,015	4.1 %	26,015	22,438	15.9 %
Jet fuel	4,799	4,105	16.9 %	4,105	4,325	(5.1)%
Asphalt, heavy fuel oils and other	22,189	19,976	11.1 %	19,976	15,444	29.3 %
Total fuel products	88,283	79,470	11.1 %	79,470	66,601	19.3 %
Total facility production ⁽³⁾	114,146	106,592	7.1 %	106,592	96,172	10.8 %

⁽¹⁾ Total sales volume includes sales from the production at our facilities and certain third-party facilities pursuant to supply and/or processing agreements, sales of inventories and the resale of crude oil to third party customers. Total sales volume includes the sale of purchased fuel product blendstocks, such as ethanol and biodiesel, as components of finished fuel products in our fuel products segment sales.

⁽²⁾ Total feedstock runs represent the bpd of crude oil and other feedstocks processed at our facilities and at certain third-party facilities pursuant to supply and/or processing agreements.

⁽³⁾ Total facility production represents the bpd of specialty products and fuel products yielded from processing crude oil and other feedstocks at our facilities and at certain third-party facilities pursuant to supply and/or processing agreements. The difference between total facility production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

⁽⁴⁾ Represents production of packaged and synthetic specialty products, including the products from the Royal Purple, Bel-Ray, Calumet Packaging and Missouri facilities.

The following table sets forth information about our combined sales of principal products and services by segment. The table includes the results of operations at our Missouri facility commencing January 3, 2012, Calumet Packaging facility commencing January 6, 2012, Royal Purple facility commencing July 3, 2012, Montana refinery commencing October 1, 2012, San Antonio refinery commencing January 2, 2013, Bel-Ray facility commencing December 10, 2013, United Petroleum assets commencing February 28, 2014, Anchor commencing March 31, 2014 and SOS commencing August 1, 2014:

	Year Ended December 31,					
	2014		2013		2012	
	(In millions)	% of Sales	(In millions)	% of Sales	(In millions)	% of Sales
Sales of specialty products:						
Lubricating oils	\$ 748.4	12.9%	\$ 848.8	15.7%	\$ 1,007.9	21.6%
Solvents	485.2	8.4%	511.7	9.4%	491.1	10.5%
Waxes	144.1	2.5%	141.0	2.6%	142.8	3.1%
Packaged and synthetic specialty products ⁽¹⁾	313.5	5.4%	233.6	4.3%	161.7	3.5%
Other ⁽²⁾	38.0	0.7%	39.8	0.7%	46.4	1.0%
Total	1,729.2	29.9%	1,774.9	32.7%	1,849.9	39.7%
Sales of fuel products:						
Gasoline	1,443.1	24.9%	1,409.4	26.0%	1,174.9	25.2%
Diesel	1,197.4	20.7%	1,259.2	23.3%	941.0	20.2%
Jet fuel	199.3	3.4%	191.4	3.5%	184.0	4.0%
Asphalt, heavy fuel oils and other ⁽³⁾	853.6	14.7%	786.5	14.5%	507.5	10.9%
Total	3,693.4	63.7%	3,646.5	67.3%	2,807.4	60.3%
Sales of oilfield services:	368.5	6.4%	—	—	—	—
Consolidated sales	\$ 5,791.1	100.0%	\$ 5,421.4	100.0%	\$ 4,657.3	100.0%

(1) Represents production of packaged and synthetic specialty products at the Royal Purple, Bel-Ray, Calumet Packaging and Missouri facilities.

(2) Represents by-products, including fuels and asphalt, produced in connection with the production of specialty products at the Princeton and Cotton Valley refineries and Dickinson and Karns City facilities.

(3) Represents asphalt, heavy fuel oils and other products produced in connection with the production of fuels at the Shreveport, Superior, San Antonio and Montana refineries and purchased crude oil sales from the Superior and San Antonio refineries to third party customers.

Please read Note 17 “Segments and Related Information” in Part II, Item 8 “Financial Statements and Supplementary Data” of this Annual Report for additional financial information about each of our segments and the geographic areas in which we conduct business.

Shreveport Refinery

The Shreveport refinery, located on a 240 acre site in Shreveport, Louisiana (“Shreveport”), currently has aggregate crude oil throughput capacity of 60,000 bpd and processes paraffinic crude oil and associated feedstocks into fuel products, paraffinic lubricating oils, waxes, asphalt and by-products.

The Shreveport refinery consists of 17 major processing units including hydrotreating, catalytic reforming and dewaxing units and approximately 3.3 million barrels of storage capacity in 130 storage tanks and related loading and unloading facilities and utilities. Since our acquisition of the Shreveport refinery in 2001, we have expanded the refinery’s capabilities by adding additional processing and blending facilities, adding a second reactor to the high pressure hydrotreater, resuming production of gasoline, diesel and other fuel products and adding both 18,000 bpd of crude oil throughput capacity and the capability to run up to 25,000 bpd of sour crude oil with an expansion project completed in May 2008.

The following table sets forth historical information about production at our Shreveport refinery:

	Shreveport Refinery		
	Year Ended December 31,		
	2014	2013	2012
	(In bpd)		
Crude oil throughput capacity	60,000	60,000	60,000
Total feedstock runs ⁽¹⁾⁽²⁾	35,140	36,178	39,831
Total refinery production ⁽²⁾⁽³⁾	34,189	34,832	38,849

⁽¹⁾ Total feedstock runs represents the barrels per day of crude oil and other feedstocks processed at our Shreveport refinery. Total feedstock runs does not include certain interplant feedstocks supplied by our Cotton Valley, Princeton and San Antonio refineries.

⁽²⁾ Total refinery production represents the barrels per day of specialty products and fuel products yielded from processing crude oil and other feedstocks. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

⁽³⁾ Total refinery production includes certain interplant feedstock supplied to our Cotton Valley, Princeton and San Antonio refineries and Karns City facility.

The Shreveport refinery has a flexible operational configuration and operating personnel that facilitate development of new product opportunities. Product mix may fluctuate from one period to the next to capture market opportunities. The refinery has an idle residual fluid catalytic cracking unit, alkylation unit, vacuum tower and a number of idle towers that can be utilized for future project needs. Certain idle towers were utilized as a part of the Shreveport refinery expansion project completed in 2008.

The Shreveport refinery receives crude oil via tank truck, railcar and a common carrier pipeline system that is operated by a subsidiary of Plains All American Pipeline, L.P. (“Plains”) and is connected to the Shreveport refinery’s facilities. The Plains pipeline system delivers local supplies of crude oil and condensates from north Louisiana and east Texas. In November 2012, we completed an expansion project at our Superior refinery, which enabled the refinery to ship crude oil by railcar to our Shreveport refinery, as well as third party customers. Crude oil is also purchased from various suppliers, including local producers, who deliver crude oil to the Shreveport refinery via tank truck.

The Shreveport refinery also has direct pipeline access to the Enterprise Products Partners L.P. pipeline (“TEPPCO pipeline”), on which it can ship certain grades of gasoline, diesel and jet fuel. Further, the refinery has direct access to the Red River Terminal facility, which provides the refinery with barge access, via the Red River, to major feedstock and petroleum products logistics networks on the Mississippi River and Gulf Coast inland waterway system. The Shreveport refinery also ships its finished products throughout the U.S. through both truck and railcar service.

Superior Refinery

The Superior refinery is located on a 245 acre site, with an additional 430 acres owned around the existing refinery, in Superior, Wisconsin. The Superior refinery currently has aggregate crude oil throughput capacity of 45,000 bpd and processes light and heavy crude oil from the Bakken shale formation in North Dakota and western Canada into fuel products and asphalt.

The Superior refinery consists of 14 major processing units including hydrotreating, catalytic reforming, fluid catalytic cracking and alkylation units and approximately 3.2 million barrels of storage capacity in 76 tanks and related loading and unloading facilities and utilities.

The following table sets forth historical information about production at our Superior refinery:

	Superior Refinery		
	Year Ended December 31,		
	2014	2013	2012
	(In bpd)		
Crude oil throughput capacity	45,000	45,000	45,000
Total feedstock runs ⁽¹⁾⁽²⁾	36,736	32,821	34,609
Total refinery production ⁽²⁾	35,712	31,757	33,438

⁽¹⁾ Total feedstock runs represents the barrels per day of crude oil and other feedstocks processed at our Superior refinery.

- (2) Total refinery production represents the barrels per day of fuel products yielded from processing crude oil. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

The Superior refinery has a flexible operational configuration and operating personnel that facilitate development of new product opportunities. Product mix may fluctuate from one period to the next to capture market opportunities. Currently the Superior refinery produces gasoline, diesel, asphalt and heavy fuel oils.

Finished fuel products produced at the Superior refinery are sold through the Superior refinery truck rack, several Magellan pipeline terminals in Minnesota, Wisconsin, Iowa, North Dakota, South Dakota, Nevada, Utah, Wyoming, Washington, Idaho, and Montana and through our Duluth terminal. The Superior wholesale fuel business also sells gasoline wholesale to Calumet branded gas stations located throughout the Upper Midwest (including Minnesota, Wisconsin and Michigan), which are owned and operated by independent franchisees. The Superior refinery ships finished fuel products by railcar, truck and pipeline service. Asphalt products produced at the Superior refinery are shipped by railcar and truck service and are sold through our terminals in Rhinelander and Crookston and through other leased terminals in the U.S.

Finished fuel products sales are primarily made through spot agreements and short-term contracts. Asphalt is primarily sold through spot agreements and short-term contracts with customers primarily located in and around the Upper Midwest, North Dakota, South Dakota, Utah and New York.

The Superior refinery receives crude oil via pipeline. The Enbridge Pipeline delivers crude oil to the Superior refinery and is adjacent to one of the Enbridge Pipeline's first crude oil holding facilities after crossing the Canadian border into the U.S., providing reliable access to high quality crude oil from the Bakken shale formation in North Dakota and from western Canada. The refinery receives approximately 44% of its daily crude oil requirements under a crude oil purchase agreement (the "BP Purchase Agreement") with BP Products North America Inc. ("BP"). For more information about the BP Purchase Agreement, please read the information provided under Note 6 "Commitments and Contingencies" in Part II, Item 8 "Financial Statements and Supplementary Data" of this Annual Report. In November 2012, the Superior refinery completed an expansion project, which enables the refinery to ship crude oil by railcar to our Shreveport refinery, as well as to third party customers.

San Antonio Refinery

The San Antonio refinery, located on a 32 acre site in San Antonio, Texas, has aggregate crude oil throughput capacity of 17,500 bpd and processes light crude oil from south Texas, including the Eagle Ford shale formation, into a variety of transportation fuels, feedstocks. The San Antonio refinery consists of five major processing units including hydrotreating and catalytic reforming and approximately 162,000 barrels of storage capacity in 57 tanks and related loading and unloading facilities and utilities.

Currently, the San Antonio refinery produces diesel, jet fuel, gasoline and other fuel products. The San Antonio refinery is compliant with federal regulations for ultra-low sulfur diesel. The San Antonio refinery ships products by railcar and truck service. Product sales are primarily made through spot agreements and short-term contracts. The San Antonio refinery purchases crude oil and intermediate products from various suppliers and receives crude oil by pipeline originating from its crude oil terminal in Elmendorf, Texas ("Elmendorf"), providing reliable access to high quality crude oil from Texas, primarily the Eagle Ford shale formation. The San Antonio refinery has a 20-year agreement with TexStar Midstream Logistics, L.P. ("TexStar") under which TexStar operates the Karnes North Pipeline System ("KNPS") which transports crude oil from Karnes City, Texas to the refinery's Elmendorf terminal. Currently, the San Antonio refinery receives at least 12,000 bpd of crude oil at the refinery through the KNPS-Elmendorf terminal supply route. Elmendorf has aggregate storage capacity of approximately 188,000 barrels.

Since acquiring the San Antonio refinery, we expanded the refinery's capabilities by adding 3,000 bpd of crude oil throughput capacity and adding additional processing and blending facilities which allow the San Antonio refinery to blend up to 5,000 bpd of finished gasoline. Additionally, we have initiated a project that will take a portion of the San Antonio refinery's diesel and jet fuel production and convert it into up to 3,000 bpd of higher margin solvent products that will meet customer requirements for low aromatic content. This project is currently expected to reach completion during the fourth quarter 2015.

The following table sets forth historical information at our San Antonio refinery since our acquisition of the refinery on January 2, 2013:

	San Antonio Refinery	
	Year Ended December 31,	
	2014	2013
	(In bpd)	
Crude oil throughput capacity	17,500	17,500
Total feedstock runs ^{(1) (2)}	14,617	10,908
Total refinery production ⁽²⁾	13,541	10,381

⁽¹⁾ Total feedstock runs represents the barrels per day of crude oil and other feedstocks processed at our San Antonio refinery from January 2, 2013 through December 31, 2014. Total feedstock runs did not meet throughput capacity in 2014 as a result of a turnaround in the third quarter of 2014.

⁽²⁾ Total refinery production represents the barrels per day of specialty products and fuel products yielded from processing crude oil and other feedstocks from January 2, 2013 through December 31, 2014. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

Cotton Valley Refinery

The Cotton Valley refinery, located on a 77 acre site in Cotton Valley, Louisiana (“Cotton Valley”), currently has aggregate crude oil throughput capacity of 13,500 bpd, hydrotreating capacity of 6,200 bpd and processes crude oil into specialty solvents and residual fuel oil. The residual fuel oil is an important feedstock for the production of specialty products at our Shreveport refinery. We believe the Cotton Valley refinery produces the most complete, single-facility line of paraffinic solvents in the U.S.

The Cotton Valley refinery consists of three major processing units that include a crude unit, a hydrotreater and a fractionation train, approximately 625,000 barrels of storage capacity in 74 storage tanks and related loading and unloading facilities and utilities. Since our acquisition of the Cotton Valley refinery in 1995, we have expanded the refinery’s capabilities by installing a hydrotreater that removes aromatics, increased the crude unit processing capability to 13,500 bpd and reconfigured the refinery’s fractionation train to improve product quality, enhance flexibility and lower utility costs.

The following table sets forth historical information about production at our Cotton Valley refinery:

	Cotton Valley Refinery		
	Year Ended December 31,		
	2014	2013	2012
	(In bpd)		
Crude oil throughput capacity	13,500	13,500	13,500
Total feedstock runs ^{(1) (2)}	6,580	5,667	5,487
Total refinery production ^{(2) (3)}	6,544	6,678	6,043

⁽¹⁾ Total feedstock runs do not include certain interplant solvent feedstocks supplied by our Shreveport refinery.

⁽²⁾ Total refinery production represents the barrels per day of specialty products yielded from processing crude oil and other feedstocks. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

⁽³⁾ Total refinery production includes certain interplant feedstocks supplied to our Shreveport refinery.

The Cotton Valley refinery has a flexible operational configuration and operating personnel that facilitate development of new product opportunities. Product mix may fluctuate from one period to the next to capture market opportunities, which allows us to respond to market changes and customer demands by modifying the refinery’s product mix. The reconfigured fractionation train also allows the refinery to satisfy demand fluctuations efficiently without large finished product inventory requirements.

The Cotton Valley refinery receives crude oil via truck and through a pipeline system operated by a subsidiary of Plains. The Cotton Valley refinery’s feedstock is primarily low sulfur, paraffinic crude oil originating from north Louisiana and is purchased from various marketers and gatherers. In addition, the Cotton Valley refinery receives interplant feedstocks for

solvent production from the Shreveport refinery. The Cotton Valley refinery ships finished products by both truck and railcar service.

Montana Refinery

The Montana refinery, located on an 86 acre site in Great Falls, Montana, currently has aggregate crude oil throughput capacity of 10,000 bpd and processes light and heavy crude oil from Canada into fuel and asphalt products. During 2013, we commenced an expansion project which we expect will add 15,000 bpd of feedstock throughput capacity at completion, which we expect to be completed during the first quarter of 2016.

The Montana refinery consists of 13 major processing units including hydrotreating, catalytic reforming, fluid catalytic cracking and alkylation units, approximately 939,000 barrels of storage capacity in 71 tanks and related loading and unloading facilities and utilities.

The following table sets forth historical information about production at the Montana refinery since our acquisition of the refinery on October 1, 2012:

	Montana Refinery		
	Year Ended December 31,		Three Months
	2014	2013	Ended December 31,
			2012
	(In bpd)		
Crude oil throughput capacity	10,000	10,000	10,000
Total feedstock runs ^{(1) (2)}	10,201	9,290	10,169
Total refinery production ⁽²⁾	10,274	9,015	9,992

⁽¹⁾ Total feedstock runs represents the barrels per day of crude oil and other feedstocks processed at our Montana refinery from October 1, 2012 through December 31, 2014.

⁽²⁾ Total refinery production represents the barrels per day of specialty products and fuel products yielded from processing crude oil and other feedstocks from October 1, 2012 through December 31, 2014. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

Currently, the Montana refinery produces gasoline, diesel, jet fuel and asphalt products. The Montana refinery ships finished fuel and asphalt products by railcar and truck service. Finished fuel and asphalt products sales are primarily made through spot agreements and short-term contracts.

The Montana refinery purchases crude oil from various suppliers and receives crude oil by pipeline through the Front Range Pipeline via the Bow River Pipeline in Canada, providing reliable access to high quality crude oil from western Canada.

We have initiated a project designed to increase production capacity at the Montana refinery by 15,000 bpd to 25,000 bpd. This project will allow us to capitalize on local access to cost-advantaged Bow River crude oil, while producing additional fuels and refined products for delivery into the regional market. The scope of this project currently includes the installation of a new crude unit that will process 25,000 bpd of crude oil and other feedstocks and a 25,000 bpd hydrocracker. We currently estimate that this project will be completed during the first quarter of 2016.

Princeton Refinery

The Princeton refinery, located on a 208 acre site in Princeton, Louisiana ("Princeton"), currently has aggregate crude oil throughput capacity of 10,000 bpd and processes naphthenic crude oil into lubricating oils, asphalt and feedstock for the Shreveport refinery for further processing into ultra-low sulfur diesel. The asphalt produced may be further processed or blended for coating and roofing product applications at the Princeton refinery or transported to the Shreveport refinery for further processing into bright stock.

The Princeton refinery consists of seven major processing units, approximately 650,000 barrels of storage capacity in 200 storage tanks and related loading and unloading facilities and utilities. Since our acquisition of the Princeton refinery in 1990, we have debottlenecked the crude unit to increase production capacity to 10,000 bpd, increased the hydrotreater's capacity to 7,000 bpd and upgraded the refinery's fractionation unit, which has enabled us to produce higher value specialty products.

The following table sets forth historical information about production at our Princeton refinery:

	Princeton Refinery		
	Year Ended December 31,		
	2014	2013	2012
	(In bpd)		
Crude oil throughput capacity	10,000	10,000	10,000
Total feedstock runs ⁽¹⁾	6,669	6,464	6,914
Total refinery production ⁽¹⁾⁽²⁾	5,420	5,313	7,044

⁽¹⁾ Total refinery production represents the barrels per day of specialty products yielded from processing crude oil and other feedstocks. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

⁽²⁾ Total refinery production includes certain interplant feedstocks supplied to our Shreveport refinery.

The Princeton refinery has a hydrotreater and significant fractionation capability enabling the refining of high quality naphthenic lubricating oils at numerous distillation ranges. The Princeton refinery's processing capabilities consist of atmospheric and vacuum distillation, hydrotreating, asphalt oxidation processing and clay/acid treating. In addition, we have the necessary tankage and technology to process our asphalt into higher value product applications such as coatings, road paving and emulsions for road paving and specialty applications.

The Princeton refinery receives crude oil via tank truck, railcar and the Plains pipeline system. Its crude oil supply primarily originates from east Texas and north Louisiana, which is purchased directly from third-party suppliers under month-to-month evergreen supply contracts and on the spot market. The Princeton refinery ships its finished products throughout the U.S. via both truck and railcar service.

Royal Purple

The Royal Purple facility, located on a 28 acre site in Porter, Texas, develops, blends and packages high performance synthetic lubricants and fluid additive products for use in industrial, commercial and automotive applications. The Royal Purple facility's processing capability includes 10 in-house packaging and production lines. Outsourced packaging services for specific products are also used. The facility has approximately 30,500 barrels of storage capacity in 91 tanks and related loading and unloading facilities and utilities. The facility receives its base oil feedstocks and additives by truck under supply agreements or spot agreements with various suppliers.

The Royal Purple facility utilizes the latest automated batch processing technology designed to ensure blending accuracy while maintaining production flexibility to meet customer needs.

Bel-Ray

The Bel-Ray facility, located on a 32 acre site in Wall Township, New Jersey, blends and packages high performance synthetic lubricants and greases for use primarily in aerospace, automotive, energy, food, marine, military, mining, motorcycle, powersports, steel and textiles applications. The Bel-Ray facility's processing capability includes 27 blending tanks and packaging production lines. In addition, the Bel-Ray facility has approximately 13,000 barrels of storage capacity in 67 tanks and related loading and unloading facilities and utilities. The Bel-Ray facility receives its base oil feedstocks and additives by truck under supply agreements or spot agreements with various suppliers.

The Bel-Ray facility is designed with batch processing technology and is also designed to maximize blending flexibility to meet customer needs. The packaging operations utilize both in-house packaging equipment and outsourced packaging services for specific products.

Karns City and Dickinson Facilities and Other Processing Agreements

The Karns City facility, located on a 225 acre site in Karns City, Pennsylvania ("Karns City"), has aggregate base oil throughput capacity of 5,500 bpd and processes white mineral oils, solvents, petrolatums, gelled hydrocarbons, cable fillers and natural petroleum sulfonates. The Karns City facility's processing capability includes hydrotreating, fractionation, acid treating, filtering, blending and packaging. In addition, the facility has approximately 817,000 barrels of storage capacity in 250 tanks and related loading and unloading facilities and utilities.

The Dickinson facility, located on a 28 acre site in Dickinson, Texas ("Dickinson"), has aggregate base oil throughput capacity of 1,300 bpd and processes white mineral oils, compressor lubricants, natural petroleum sulfonates and biodiesel. The Dickinson facility's processing capability includes acid treating, filtering and blending, approximately 183,000 barrels of storage capacity in 186 tanks and related loading and unloading facilities and utilities.

These facilities each receive their base oil feedstocks by railcar and truck under supply agreements or spot purchases with various suppliers, the most significant of which is a long-term supply agreement with Phillips 66. Please read “— Our Crude Oil and Feedstock Supply” below for further discussion of the long-term supply agreement with Phillips 66.

The following table sets forth the combined historical information about production at our Karns City, Dickinson and other facilities:

	Combined Karns City, Dickinson and Other Facilities		
	Year Ended December 31,		
	2014	2013	2012
	(in bpd)		
Feedstock throughput capacity ⁽¹⁾	11,300	11,300	11,300
Total feedstock runs ⁽²⁾⁽³⁾	6,651	7,250	7,030
Total production ⁽³⁾	6,575	7,137	7,012

⁽¹⁾ Includes Karns City, Dickinson and other facilities.

⁽²⁾ Includes feedstock runs at our Karns City and Dickinson facilities as well as throughput at certain third-party facilities pursuant to supply and/or processing agreements and includes certain interplant feedstocks supplied from our Shreveport refinery. For more information regarding our purchase commitments related to these supply and/or processing agreements, please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Contractual Obligations and Commitments” for additional information.

⁽³⁾ Total production represents the barrels per day of specialty products yielded from processing feedstocks at our Karns City and Dickinson facilities and certain third-party facilities pursuant to supply and/or processing agreements. The difference between total production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and the production of finished products.

Anchor Drilling Fluids and Anchor Oilfield Services

We are an independent provider and marketer of drilling fluids, completion fluids and production chemicals to the oil and gas exploration industry. We design, manufacture and package drilling fluid products at our locations in Texas, Oklahoma, Louisiana, Arkansas, Colorado, Utah, Wyoming, Montana, New Mexico, New York, North Dakota, Pennsylvania and Ohio. We service oil and gas resource plays in North America, including the Bakken, Barnett, Eagle Ford, Fayetteville, Granite Wash, Haynesville, Marcellus, Niobrara, Permian, Piceance, Uinta and Utica shale formations.

We develop custom formulations and innovative solutions based on unique customer and well specifications. Through our extensive line of drilling and completion fluids, we deliver solutions that reduce drilling and completion time, help to control reservoir formation pressures and maximize oil and gas production, contributing to improved well economics for end-users.

Terminals

Our terminals are complementary to our refineries and play a key role in moving our products to end-user markets by providing services including distribution and blending to achieve specified products and storage and inventory management. We operate the following terminals:

Burnham Terminal: We own and operate a terminal located on an 11 acre site, in Burnham, Illinois. The Burnham terminal receives specialty products from certain of our refineries primarily by railcar and distributes them by truck and railcar to our customers in the Upper Midwest and East Coast regions of the U.S. and in Canada. The terminal includes a tank farm with 90 tanks having aggregate storage capacity of approximately 150,000 barrels, as well as blending equipment for producing engine oil additives and tackifiers.

Rhineland Terminal: We own and operate a terminal located on an 18 acre site, in Rhineland, Wisconsin. The Rhineland terminal receives asphalt by truck from the Superior refinery and distributes product by truck. Asphalt from this terminal is sold to customers in the Upper Midwest region of the U.S. The terminal includes a tank farm with four tanks with aggregate storage capacity of approximately 166,000 barrels.

Crookston Terminal: We own and operate a terminal located on a 19 acre site in Crookston, Minnesota. The Crookston terminal receives asphalt by truck from the Superior refinery and distributes product by truck. Asphalt from this terminal is sold to customers in the Upper Midwest region of the U.S. The terminal includes a tank farm with three tanks with aggregate storage capacity of approximately 156,000 barrels.

Duluth Terminal: We own and operate a terminal located on a 49 acre site in Proctor, Minnesota. The Duluth terminal is supplied refined fuel products from the Superior refinery by the Magellan pipeline and receives ethanol and biodiesel products

by truck. Fuel products from this terminal are distributed by truck to customers in Minnesota and northern Wisconsin. The terminal includes seven tanks with aggregate storage capacity of approximately 200,000 barrels.

In addition to the above terminals, we own and lease additional facilities, primarily related to distribution of finished products, throughout the U.S.

Crude Oil Logistics Assets

We own and operate seven crude oil loading facilities and related assets in North Dakota and Montana, which provides us with the ability to transport crude oil directly from the point of lease, into our crude oil loading facilities and then onto the Enbridge Pipeline where it can be routed to our refineries and/or third party customers.

Other Logistics Assets

We use approximately 3,000 railcars leased from various lessors. This fleet of railcars enables us to receive and ship crude oil and distribute various specialty products and fuel products throughout the U.S. and Canada to and from each of our facilities.

Our Crude Oil and Feedstock Supply

We purchase crude oil and other feedstocks from major oil companies, as well as from various crude oil gatherers and marketers in Texas, north Louisiana, North Dakota and Canada. Crude oil supplies at our refineries are as follows:

Refinery	Crude Oil Slate	Mode of Transportation
Shreveport	West Texas Intermediate (“WTI”), local crude oils from East Texas, North Louisiana, Arkansas and Light Louisiana Sweet (“LLS”)	Tank truck, railcar and Plains Pipeline
Superior	Canadian Heavy, Canadian Synthetic, North Dakota Sweet (e.g. Bakken) and Mixed Sweet Blend (“MSW”)	Enbridge Pipeline
San Antonio	Local Texas sweet crude oil (e.g. Eagle Ford)	Truck, pipeline connected to its Elmendorf crude oil terminal
Cotton Valley	Local paraffinic crude oil	Plains Pipeline and tank truck
Montana	Canadian Heavy and Canadian Sour (e.g. Bow River)	Front Range Pipeline
Princeton	Local naphthentic crude oil	Tank truck, railcar and Plains Pipeline

In 2014, subsidiaries of Plains supplied us with approximately 29.9% of our total crude oil supply under term contracts and month-to-month evergreen crude oil supply contracts. In 2014, BP supplied us with approximately 16.0% of our total crude oil supply under the BP Purchase Agreement. Each of our refineries is dependent on one or more key suppliers and the loss of any of these suppliers would adversely affect our financial results to the extent we were unable to find another supplier of this substantial amount of crude oil. For more information about the BP Purchase Agreement, please read the information provided under Note 6 “Commitments and Contingencies” in Part II, Item 8 “Financial Statements and Supplementary Data” of this Annual Report.

We do not maintain long-term contracts with most of our crude oil suppliers. For example, our contracts with Plains are currently month-to-month, terminable upon 90 days’ notice. In April 2012, we amended and restated the BP Purchase Agreement, which had an initial term of one year ending April 1, 2013, and automatically renews for successive one-year terms unless terminated by either party upon 90 days’ notice prior to the end of any renewal term. We also purchase foreign crude oil when its spot market price is attractive relative to the price of crude oil from domestic sources.

We have various long-term feedstock supply agreements with Phillips 66, with remaining terms ranging from one to three years, with some agreements operating under the option to continue on a month-to-month basis thereafter, for feedstocks that are key to the operations of our Karns City and Dickinson facilities. In addition, certain products of our refineries can be used as feedstocks by these facilities.

We believe that adequate supplies of crude oil and feedstocks will continue to be available to us.

Our cost to acquire crude oil and feedstocks and the prices for which we ultimately can sell refined products depend on a number of factors beyond our control, including regional and global supply of and demand for crude oil and other feedstocks and specialty and fuel products. These, in turn, are dependent upon, among other things, the availability of imports, overall economic conditions, production levels of domestic and foreign suppliers, U.S. relationships with foreign governments, political affairs and the extent of governmental regulation. We have historically been able to pass on the costs associated with increased crude oil and feedstock prices to our specialty products customers, although the increase in selling prices for specialty products typically lags a rising cost of crude oil. From time to time, we use a hedging program to manage a portion of our

commodity price risk. Please read Part II, Item 7A “Quantitative and Qualitative Disclosures About Market Risk — Commodity Price Risk — Derivative Instruments” for a discussion of our hedging program.

Our Products, Markets and Customers

Products

Specialty Products and Fuel Products. We produce a full line of specialty products, including lubricating oils, solvents, waxes, packaged and synthetic specialty products, other by-products, as well as a variety of fuel and fuel related products, asphalt and heavy fuel oils. Our customers purchase these products primarily as raw material components for basic industrial, consumer and automotive goods.

Oilfield Services. We are an independent provider and marketer of drilling fluids, completion fluids and production chemicals.

- Drilling fluids - Drilling fluids, often referred to as “drilling mud,” are an essential and critical product of the drilling process for every oil and gas well. We provide three different types of drilling fluids including water-based mud, oil-based mud and synthetic-based mud.
- Completion fluids - Completion fluids replace drilling fluids during the final operations leading up to oil and gas production from a well. Completion fluids are critical products designed to control reservoir formation pressures and minimize formation damage in the event of a failure in down hole equipment.
- Production chemicals - Production chemicals are specialty products applied to maximize production in oil and gas wells.
- Solids control - Solids control is employed in drilling operations to filter out cuttings and clean the drilling fluid before it is pumped back into the well.

The following table depicts a representative sample of the diversity of end-use applications for the products we produce:

Representative Sample of End Use Applications by Product

Lubricating Oils	Solvents	Waxes	Packaged and Synthetic Specialty Products	Oilfield Services	Other	Fuels & Fuel Related
13% (1)	8% (1)	3% (1)	5% (1)	6% (1)	1% (1)	64% (1)
<ul style="list-style-type: none"> • Hydraulic oils • Passenger car motor oils • Railroad engine oils • Cutting oils • Compressor oils • Metalworking fluids • Transformer oils • Rubber process oils • Industrial lubricants • Gear oils • Grease • Automatic transmission fluid • Animal feed dedusting • Baby oils • Bakery pan oils • Catalyst carriers • Gelatin capsule lubricants • Sunscreen 	<ul style="list-style-type: none"> • Waterless hand cleaners • Alkyd resin diluents • Automotive products • Calibration fluids • Camping fuel • Charcoal lighter fluids • Chemical processing • Drilling fluids • Printing inks • Water treatment • Paint and coatings • Stains 	<ul style="list-style-type: none"> • Paraffin waxes • FDA compliant products • Candles • Adhesives • Crayons • Floor care • PVC • Paint strippers • Skin & hair care • Timber treatment • Waterproofing • Pharmaceuticals • Cosmetics 	<ul style="list-style-type: none"> • Refrigeration compressor oils • Positive displacement and roto-dynamic compressor oils • Commercial and military jet engine oil • Lubricating greases • Gear oils • Aviation hydraulic oils • High performance small engine fuels • Two cycle and four stroke engine oils • High performance automotive engine oils • High performance industrial lubricants • High temperature chain lubricants • Food contact grade lubricants • Charcoal lighter fluids and other solvents • Engine treatment additives 	<ul style="list-style-type: none"> • Drilling fluids • Completion fluids • Production chemicals • Solids control 	<ul style="list-style-type: none"> • Roofing • Paving 	<ul style="list-style-type: none"> • Gasoline • Diesel • Jet fuel • Marine diesel fuel • Biodiesel • Ethanol • Ethanol free fuels • Fluid catalytic cracking feedstock • Asphalt vacuum residuals • Mixed butanes • Roofing • Paving • Heavy fuel oils

(1) Based on the percentage of total sales for the year ended December 31, 2014 and includes the results of operations at our United Petroleum, Anchor and SOS operations commencing February 28, 2014, March 31, 2014 and August 1, 2014, respectively. Except for the listed fuel products and certain products sold by our Royal Purple, Bel-Ray and Calumet Packaging facilities and United Petroleum assets, we do not produce any of these end-use products.

Marketing

We have an experienced marketing department with average industry tenure of approximately 20 years. Our salespeople regularly visit customers and our marketing department works closely with both the laboratories at our production facilities and our technical services department to help create specialized blends that will work optimally for our customers.

Markets

Specialty Products. The specialty products market represents a small portion of the overall petroleum refining industry in the U.S. Of the nearly 140 refineries currently in operation in the U.S., only a small number of the refineries are considered specialty products producers and only a few compete with us in terms of the number of products produced.

Our specialty products are utilized in applications across a broad range of industries, including in:

- industrial goods such as metalworking fluids, belts, hoses, sealing systems, batteries, hot melt adhesives, pressure sensitive tapes, electrical transformers, refrigeration compressors and drilling fluids;
- consumer goods such as candles, petroleum jelly, creams, tonics, lotions, coating on paper cups, chewing gum base, automotive aftermarket car-care products (e.g. fuel injection cleaners, tire shines and polishes), lamp oils, charcoal lighter fluids, camping fuel and various aerosol products; and
- automotive goods such as motor oils, greases, transmission fluid and tires.

We have the capability to ship our specialty products worldwide. In the U.S. and Canada, we ship our specialty products via railcars, trucks and barges. We use our fleet of approximately 3,000 leased railcars to ship our specialty products and a majority of our specialty products sales are shipped in trucks owned and operated by several different third-party carriers. For shipments outside of North America, which accounted for less than 10% of our consolidated sales in 2014, we ship via railcars and trucks to several ports where the product is loaded onto vessels for shipment to customers abroad.

Fuel Products. The fuel products market represents a large portion of the overall petroleum refining industry in the U.S. Of the nearly 140 refineries currently in operation in the U.S., a large number of the refineries are fuel products producers; however, only a few compete with us in our local markets.

Gulf Coast Market (PADD 3)

Fuel products produced at our Shreveport refinery can be sold locally or to the Midwest region of the U.S. through the TEPPCO pipeline. Local sales are made from the TEPPCO terminal in Bossier City, Louisiana, located approximately 15 miles from the Shreveport refinery, as well as from our own Shreveport refinery terminal.

Gasoline, diesel and jet fuel from the Shreveport refinery is sold primarily into the Louisiana, Texas and Arkansas markets, and any excess volumes are sold to marketers further up the TEPPCO pipeline. Should the appropriate market conditions arise, we have the capability to redirect and sell additional volumes into the Louisiana, Texas and Arkansas markets rather than transport them to the Midwest region via the TEPPCO pipeline.

The Shreveport refinery has the capacity to produce about 9,000 bpd of commercial jet fuel that can be marketed to the U.S. Department of Defense, sold as Jet-A locally or sold via the TEPPCO pipeline, or occasionally transferred to the Cotton Valley refinery to be processed further as a feedstock to produce solvents. We have a sales contract with the U.S. Department of Defense for approximately 3,000 bpd of jet fuel. This contract is effective until March 2015 and is bid annually.

Fuel products produced at our San Antonio refinery are sold locally in Texas. Additionally, the San Antonio refinery produces commercial and specialty jet fuel that can be marketed to the U.S. Department of Defense or sold locally as Jet-A fuel. We have a sales contract with the U.S. Department of Defense for approximately 550 bpd of jet fuel. This contract is effective until March 2015 with one year renewal increments through March 2017 at the option of the U.S. Department of Defense.

Additionally, we produce a number of fuel-related products including fluid catalytic cracking (“FCC”) feedstock, vacuum residuals and mixed butanes. FCC feedstock is sold to other refiners as a feedstock for their FCC units to make fuel products. Vacuum residuals are blended or processed further to make asphalt products. Volumes of vacuum residuals which we cannot process are sold locally into the fuel oil market or sold via railcar to other refiners. Mixed butanes are primarily available in the summer months and are primarily sold to local marketers. If the mixed butanes are not sold, they are blended into our gasoline production.

Upper Midwest Market (PADD 2)

Fuel products produced at our Superior refinery can be sold locally and in the Upper Midwest region of the U.S. and in Canada. The Superior wholesale business sells fuel products produced at the Superior refinery through several Magellan pipeline terminals in Minnesota, Wisconsin, Iowa, North Dakota, South Dakota, Nevada, Utah, Wyoming, Washington, Idaho, and Montana and through its own leased or owned product terminals located in Superior, Wisconsin and Duluth, Minnesota.

The Superior wholesale business also sells gasoline wholesale to Calumet branded gas stations throughout the Upper Midwest, which are owned and operated by independent franchisees.

Northwest Market (PADD 4)

Fuel products produced at our Montana refinery can be sold locally and in Idaho, Arizona, California, Kansas, North Dakota, Nevada, Oklahoma, Oregon, Texas, Utah and Canada. Seasonally, the Montana refinery transports fuel products to terminals in Washington.

We have a sales contract with the U.S. Department of Defense for approximately 200 bpd of jet fuel. This contract is effective until September 2015.

Oilfield Services. We sell oilfield products and services in the Bakken, Barnett, Eagle Ford, Fayetteville, Granite Wash, Haynesville, Marcellus, Niobrara, Permian, Piceance, Uinta and Utica shale formations.

Customers

Specialty Products. We have a diverse customer base for our specialty products, with approximately 5,400 active accounts. Many of our customers are long-term customers who use our products in specialty applications, after an approval process ranging from six months to two years. No single customer in our specialty products segment accounted for more than 10% of our consolidated sales in each of the three years ended December 31, 2014, 2013 and 2012.

Fuel Products. We have a diverse customer base for our fuel products, with approximately 700 active accounts. Our diverse customer base includes wholesale distributors and retail chains. We are able to sell the majority of the fuel products we produce at the Shreveport refinery to the local markets of Louisiana, Texas and Arkansas. We also have the ability to ship additional fuel products from the Shreveport refinery to the Midwest region through the TEPPCO pipeline should the need arise. Additionally, we are able to sell the majority of the fuel products we produce at the Superior refinery to local markets in Minnesota and Wisconsin. We also have the ability to ship additional fuel products from the Superior refinery to the Upper Midwest region through the Magellan pipeline. The majority of our fuel products produced at our Montana refinery are sold to local markets in Montana and Idaho as well as in Canada. Fuel products produced at our San Antonio refinery are sold to local markets in Texas. No single customer in our fuel products segment represented 10% or greater of consolidated sales in each of the three years ended December 31, 2014, 2013 and 2012.

Oilfield Services. We have a diversified, established and unique customer base for our oilfield services, with approximately 300 active accounts. Our customers are companies operating in the domestic oil and gas exploration and production industry. No single customer in our oilfield services segment accounted for more than 10% of our consolidated sales in the year ended December 31, 2014.

Competition

Competition in our markets is from a combination of large, integrated petroleum companies, independent refiners, wax production companies and oilfield services companies. Many of our competitors are substantially larger than us and are engaged on a national or international basis in many segments of the petroleum products business, including exploration and production, refining, transportation and marketing. These competitors may have greater flexibility in responding to or absorbing market changes occurring in one or more of these business segments. We distinguish our competitors according to the products that they produce. Set forth below is a description of our significant competitors according to product category.

Naphthenic Lubricating Oils. Our primary competitor in producing naphthenic lubricating oils is Ergon Refining, Inc., Cross Oil Refining and Marketing, Inc., San Joaquin Refining Co., Inc. and Martin Midstream Partners L.P.

Paraffinic Lubricating Oils. Our primary competitors in producing paraffinic lubricating oils include ExxonMobil Corporation, Motiva Enterprises, LLC, Phillips 66, Petro-Canada, HollyFrontier Corporation, Chevron Corporation, Sonneborn Refined Products and Royal Dutch Shell plc.

Paraffin Waxes. Our primary competitors in producing paraffin waxes include ExxonMobil, HollyFrontier Corporation, The International Group Inc. and Sonneborn Refined Products.

Solvents. Our primary competitors in producing solvents include CITGO Petroleum Corporation, ExxonMobil Chemical, Phillips 66 and Royal Dutch Shell plc.

Packaged and Synthetic Specialty Products. Our primary competitors in retail and commercial packaged and synthetic specialty products include ExxonMobil (Mobil 1), Ashland, Inc. (Valvoline) and BP Lubricants, USA (Castrol). Our primary competitors in industrial packaged and synthetic specialty products include ExxonMobil Corporation, Royal Dutch Shell plc and Chevron.

Fuel Products and By-Products. Our primary competitors in producing fuel products in the local markets in which we operate include Delek US Holdings, Flint Hills Resources, Northern Tier Energy, Inc., ExxonMobil, Valero Energy Corporation, Phillips 66, Cenex, Alon USA and Marathon Petroleum Corporation.

Oilfield Services. Our primary competitors in servicing oilfields in the local markets in which we operate include Halliburton, Baker Hughes, Newpark Resources, Canadian Energy Services, National Oilwell Varco and Schlumberger.

Our ability to compete effectively depends on our responsiveness to customer needs and our ability to maintain competitive prices and product and service offerings. We believe that our flexibility and customer responsiveness differentiate us from many of our larger competitors. However, it is possible that new or existing competitors could enter the markets in which we operate, which could negatively affect our financial performance.

Governmental Regulation

From time to time, we are a party to certain claims and litigation incidental to our business, including claims made by various taxation and regulatory authorities, such as the EPA, various state environmental regulatory bodies, the Internal Revenue Service (“IRS”), various state and local departments of revenue and the federal Occupational Safety and Health Administration (“OSHA”), as the result of audits or reviews of our business. In addition, we have property, business interruption, general liability and various other insurance policies that may result in certain losses or expenditures being reimbursed to us.

Environmental and Occupational Health and Safety Matters

Environmental

We operate crude oil and specialty hydrocarbon refining, blending and terminal operations, which are subject to stringent federal, state, regional and local laws and regulations governing worker health and safety, the discharge of materials into the environment and environmental protection. These laws and regulations impose obligations that are applicable to our operations, such as requiring the acquisition of permits to conduct regulated activities, restricting the manner in which we may release materials into the environment, requiring remedial activities or capital expenditures to mitigate pollution from former or current operations, requiring the application of specific health and safety criteria addressing worker protection and imposing substantial liabilities for pollution resulting from our operations. Certain of these laws impose joint and several, strict liability for costs required to remediate and restore sites where petroleum hydrocarbons, wastes or other materials have been released or disposed.

Failure to comply with environmental laws and regulations may result in the triggering of administrative, civil and criminal measures, including the assessment of monetary penalties, the imposition of remedial obligations and the issuance of injunctions limiting or prohibiting some or all of our operations. On occasion, we receive notices of violation or enforcement and other complaints from regulatory agencies alleging non-compliance with applicable environmental laws and regulations.

The trend in environmental regulation is to place more restrictions and limitations on activities that may affect the environment, and thus, any changes in environmental laws and regulations that result in more stringent and costly pollution controls or remediation requirements could have a material adverse effect on our operations and financial position. Moreover, in connection with accidental spills or releases associated with our results of operations, we cannot assure our unitholders that we will not incur substantial costs and liabilities as a result of such spills or releases, including those relating to claims for damage to property and persons. In the event of future increases in costs, we may be unable to pass on those increases to our customers. While we believe that we are in substantial compliance with existing environmental laws and regulations and that continued compliance with these requirements will not have a material adverse effect on us, there can be no assurance that our environmental compliance expenditures will not become material in the future.

San Antonio Refinery

In connection with the San Antonio Acquisition, we agreed to indemnify NuStar from any environmental liabilities associated with the San Antonio refinery, except for any governmental penalties or fines that may result from NuStar’s actions or inactions during NuStar’s 20-month period of ownership of the San Antonio refinery. The indemnification is unlimited in duration and is not subject to any monetary deductibles or cap. Anadarko Petroleum Corporation (“Anadarko”) and Age Refining, Inc. (“Age Refining”), a third party that has since entered bankruptcy, are subject to a 1995 Agreed Order from the Texas Natural Resource Conservation Commission, now known as the Texas Commission on Environmental Quality (“TCEQ”), pursuant to which Anadarko and Age Refining are obligated to assess and remediate certain contamination at our San Antonio refinery that predates our acquisition of the facility. We do not expect this pre-existing contamination at the San Antonio refinery to have a material adverse effect on our financial position or results of operations.

Montana Refinery

In connection with the acquisition of the Montana refinery from Connacher Oil and Gas Limited (“Connacher”), we became a party to an existing 2002 Refinery Initiative Consent Decree (“Montana Consent Decree”) with the EPA and the

Montana Department of Environmental Quality (“MDEQ”). The material obligations imposed by the Montana Consent Decree have been completed. Periodic well monitoring and reporting of the results is the primary current obligation under the Montana Consent Decree. In September 2012, Montana Refining received a final Corrective Action Order on Consent, replacing the refinery’s previously held hazardous waste permit. This Corrective Action Order on Consent governs the investigation and remediation of contamination at the Montana refinery. We believe the majority of remedial costs related to such contamination at our Montana refinery are covered by a contractual indemnity provided by HollyFrontier Corporation (“Holly”), the owner and operator of the Montana refinery prior to its acquisition by Connacher under an asset purchase agreement between Holly and Connacher, pursuant to which Connacher acquired the Montana refinery. Under this asset purchase agreement, Holly agreed to indemnify Connacher and Montana Refining, subject to timely notification, certain conditions and certain monetary baskets and cap, for environmental conditions arising under Holly’s ownership and operation of the Montana refinery and existing as of the date of sale to Connacher. During 2014, Holly provided us a notice challenging our position that Holly is obligated to indemnify our remediation expenses for environmental conditions to the extent arising under Holly’s ownership and operation of the refinery and existing as of the date of the sale to Connacher which expenses totaled approximately \$16.5 million as of December 31, 2014, of which \$14.1 million was capitalized into the cost of our expansion project and \$2.4 million was expensed. We continue to believe that Holly is responsible to indemnify us for these remediation expenses disputed by Holly, and we have invoked the dispute resolution procedure under the asset purchase agreement to resolve this issue. In the event we are unsuccessful, we will be responsible for those remediation expenses. We expect that we may incur some expenses to remediate other environmental conditions at the Montana refinery in connection with the current capacity expansion of the refinery; however, we believe at this time that these other costs we may incur will not be material to our financial position or results of operations.

Superior Refinery

In connection with the acquisition of our Superior refinery, we became a party to an existing Refinery Initiative Consent Decree (“Superior Consent Decree”) with the EPA and the Wisconsin Department of Natural Resources (“WDNR”) that applies, in part, to our Superior refinery. Under the Superior Consent Decree, we must complete certain reductions in air emissions at the Superior refinery as well as report upon certain emissions from the refinery to the EPA and the WDNR and therefore, we currently estimate costs of up to \$1.0 million to make known equipment upgrades and conduct other discrete tasks in compliance with the Superior Consent Decree. Failure to perform these required tasks under the Superior Consent Decree could result in the imposition of stipulated penalties, which could be material. We are currently assessing certain past actions at the refinery for compliance with the terms of the decree, which actions may be subject to stipulated penalties under the decree but, in any event, we do not currently believe that the imposition of such penalties for those actions, should they be imposed, would be material. In addition, we are pursuing certain additional environmental and safety-related projects at the Superior refinery. Completion of these additional projects will result in us incurring additional costs, which could be substantial. During 2014 and 2013, we incurred approximately \$0.7 million and \$1.9 million of costs, respectively, related to installing process equipment at the Superior refinery pursuant to the EPA fuel content regulations.

On June 29, 2012, the EPA issued a Finding of Violation/Notice of Violation to our Superior refinery, which included a proposed penalty amount of \$0.1 million. This finding is in response to information provided to the EPA by us in response to an information request. The EPA alleges that the efficiency of the flares at our Superior refinery is lower than regulatory requirements. We are contesting the allegations and attended an informal conference with the EPA held September 12, 2012. We do not believe that the resolution of these allegations will have a material adverse effect on our financial results or operations.

We are contractually indemnified by Murphy Oil Corporation (“Murphy Oil”) under an asset purchase agreement between us and Murphy Oil for specified environmental liabilities arising from the operation of the Superior refinery including: (i) certain obligations arising out of the Superior Consent Decree (including payment of a civil penalty required under the Superior Consent Decree), (ii) certain liabilities arising in connection with Murphy Oil’s transport of certain wastes and other materials to specified offsite real properties for disposal or recycling prior to the Superior Acquisition and (iii) certain liabilities for certain third party actions, suits or proceedings alleging exposure, prior to the Superior Acquisition, of an individual to wastes or other materials at the specified on-site real property, which wastes or other materials were spilled, released, emitted or otherwise discharged by Murphy Oil. We believe our contractual indemnity by Murphy Oil for such specified environmental liabilities is unlimited in duration and not subject to any monetary deductibles or cap. The amount of any damages payable by Murphy Oil pursuant to the contractual indemnities under the asset purchase agreement are net of any amount recoverable under an environmental insurance policy we obtained in connection with the Superior Acquisition, which named us and Murphy Oil as insureds and covers environmental conditions existing at the Superior refinery prior to the Superior Acquisition.

Shreveport, Cotton Valley and Princeton Refineries

On December 23, 2010, we entered into a settlement agreement with the Louisiana Department of Environmental Quality (“LDEQ”) under LDEQ’s “Small Refinery and Single Site Refinery Initiative,” covering our Shreveport, Princeton and Cotton Valley refineries. This settlement agreement became effective on January 31, 2012. The settlement agreement, termed the

“Global Settlement,” resolved alleged violations of the federal Clean Air Act and federal Clean Water Act regulations that arose prior to December 31, 2010. Among other things, we agreed to complete beneficial environmental programs and implement emissions reduction projects at our Shreveport, Cotton Valley and Princeton refineries on an agreed-upon schedule. During 2014 and 2013, we incurred approximately \$0.6 million and \$4.9 million, respectively, of such expenditures and estimate additional expenditures of approximately \$10.0 million to \$12.0 million of capital expenditures and expenditures related to additional personnel and environmental studies over the next two years as a result of the implementation of these requirements. These capital investment requirements will be incorporated into our annual capital expenditures budget and we do not expect any additional capital expenditures as a result of the required audits or required operational changes included in the Global Settlement to have a material adverse effect on our financial results or operations. For additional information regarding the impact on our capital expenditures, please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Capital Expenditures.”

We are contractually indemnified by Shell Oil Company (“Shell”), as successor to Pennzoil-Quaker State Company and Atlas Processing Company, under an asset purchase agreement between us and Shell, for specified environmental liabilities arising from the operations of the Shreveport refinery prior to our acquisition of the facility. We believe the contractual indemnity is unlimited in amount and duration, but required us to contribute \$1.0 million of the first \$5.0 million of indemnified costs for certain of the specified environmental liabilities.

Bel-Ray Facility

Bel-Ray executed an Administrative Consent Order (“ACO”) with the New Jersey Department of Environmental Protection, effective January 4, 1994, which required investigation and remediation of contamination at or emanating from the Bel-Ray facility. In 2000, Bel-Ray entered into a fixed price remediation contract with Weston Solutions (“Weston”), a large remediation contractor, whereby Weston agreed to be fully liable for the remediation of the soil and groundwater issues at the facility, including an offsite groundwater plume pursuant to the ACO (“Weston Agreement”). The Weston Agreement set up a trust fund to reimburse Weston, administered by Bel-Ray’s environmental counsel. As of December 31, 2014, the trust fund contained approximately \$0.8 million. In addition, Weston has remediation cost containment insurance, should Weston be unable to complete the work required under the Weston Agreement. In connection with the Bel-Ray Acquisition, we became a party to the Weston Agreement.

Weston has been addressing the environmental issues at the Bel-Ray facility over time, and the next phase will address the groundwater issues, which extend offsite.

Air Emissions

Our operations are subject to the federal Clean Air Act, as amended, and comparable state and local laws. The federal Clean Air Act Amendments of 1990 require most industrial operations in the U.S. to incur capital expenditures to meet the air emission control standards that are developed and implemented by the EPA and state environmental agencies. Under the federal Clean Air Act, facilities that emit certain air pollutants face increasingly stringent regulations, including requirements to install various levels of control technology on sources of pollutants. In addition, the petroleum refining sector has come under stringent new EPA regulations, imposing maximum achievable control technology (“MACT”) on refinery equipment emitting certain listed hazardous air pollutants. Some of our facilities have been included within the categories of sources regulated by MACT rules. In addition, air permits are required for our refining and terminal operations that result in the emission of regulated air contaminants. These permits incorporate stringent control technology requirements and are subject to extensive review and periodic renewal. We believe that we are in substantial compliance with the federal Clean Air Act and similar state and local laws but can provide no assurances that future compliance with existing or new laws or regulations will not have a material adverse effect on our business and results of operations. For example, in November 2014, the EPA published a proposed rulemaking that it expects to finalize by October 1, 2015, which rulemaking proposes to revise the National Ambient Air Quality Standard for ozone to between 65 to 70 parts per billion for both the 8-hour primary and secondary standards. Also, in June 2014, the EPA proposed a rule seeking to impose additional emission control requirements on storage tanks, flares and coking units at petroleum refineries. The proposal would also require monitoring of air concentration at the fence line of refinery facilities to ensure proposed standards are being met. These proposed rulemakings could impact us by requiring installation of new emission controls on some of our equipment, resulting in longer permitting timelines, and significantly increasing our capital expenditures and operating costs, which could adversely impact our business.

The federal Clean Air Act authorizes the EPA to require modifications in the formulation of the refined transportation fuel products we manufacture in order to limit the emissions associated with the fuel product’s final use. For example, in December 1999, the EPA promulgated regulations limiting the sulfur content allowed in gasoline. These regulations required the phase-in of gasoline sulfur standards beginning in 2004, with special provisions for small refiners and for refiners serving those western U.S. states exhibiting lesser air quality problems. Similarly, the EPA promulgated regulations that limit the sulfur content of highway diesel beginning in 2006 from its former level of 500 parts per million (“ppm”) to 15 ppm (the “ultra-low sulfur standard”). Our Shreveport, Superior, Montana and San Antonio refineries have implemented the sulfur standard with respect to

produced gasoline and produced diesel meeting the ultra-low sulfur standard. In addition, we are required to meet the MSAT II Standards adopted by the EPA to reduce the benzene content of motor gasoline produced at our facilities. We have completed capital projects at our Shreveport and Superior refineries to comply with these fuel quality requirements.

The EPA has issued Renewable Fuel Standard (“RFS”) mandates, requiring refiners such as us to blend renewable fuels into the petroleum fuels they produce and sell in the U.S. We, and other refiners subject to RFS, may meet the RFS requirements by blending the necessary volumes of renewable transportation fuels produced by us or purchased from third parties. To the extent that refiners will not or cannot blend renewable fuels into the products they produce in the quantities required to satisfy their obligations under the RFS program, those refiners must purchase renewable credits, referred to as RINs, to maintain compliance. To the extent that we exceed the minimum volumetric requirements for blending of renewable transportation fuels, we generate our own RINs for which we have the option of retaining the RINs for current or future RFS compliance or selling those RINs on the open market.

Under RFS, the volume of renewable fuels that obligated parties are required to blend into their finished petroleum fuels increases annually over time until 2022. Our Shreveport, Superior, Montana and San Antonio refineries are nominally subject to compliance with the RFS mandates. However, on October 7, 2014, the EPA granted both the Shreveport and San Antonio refineries a “small refinery exemption” under the RFS for the 2013 calendar year, as provided under the Clean Air Act. Under the 2013 exemptions granted by the EPA, both the Shreveport and San Antonio refineries are not subject to the requirements of RFS as an “obligated party” for fuels produced at these refineries between January 1, 2013 and December 31, 2013. As a result of the exemptions, our requirements to purchase RINs for 2013 compliance were reduced by approximately 39 million RINs. As result of the exemptions, we sold approximately 31 million RINs for a gain of approximately \$18.2 million during the fourth quarter of 2014.

The EPA has published the proposed volume mandates for 2014, which are generally lower than the volumes for 2013 and lower than the statutory mandates. While the EPA submitted a draft final rule for regulatory review by the federal Office of Management and Budget in August 2014, the agency subsequently published notice on December 9, 2014 that it would not finalize the proposed volume mandates for 2014 until sometime in 2015. Consequently, the EPA also announced in the December 9, 2014 notice that compliance reporting would not be required until a final 2014 standards rule is issued, which is expected to occur in 2015.

We are in the process of an assessment to determine which of our fuels refineries potentially could be eligible for economic hardship exemptions for the 2014 calendar year. While we received a small refinery exemption for the Shreveport and San Antonio refineries in 2013, there is no assurance that such an exemption will be obtained for either of these refineries for the 2014 year or in future years, which would result in the need for more RINs for the applicable calendar year. Our gross 2014 annual RINs obligation, which includes RINs that were required to be secured through either our own blending or through the purchase of RINs in the open market, was 87 million RINs for the 2014 calendar year.

On October 13, 2010, the EPA raised the maximum amount of ethanol content allowed under federal law from 10% to 15% for cars and light trucks manufactured since 2007, and on January 21, 2011, EPA extended the maximum allowable ethanol content of 15% to apply to cars and light trucks manufactured since 2001. The maximum amount allowed under federal law currently remains at 10% ethanol for all other vehicles. EPA required that fuel and fuel additive manufacturers take certain steps before introducing gasoline containing 15% ethanol (“E15”) into the market, including developing and obtaining EPA approval of a plan to minimize the potential for E15 to be used in vehicles and engines not covered by the partial waiver. EPA has taken several recent actions to authorize the introduction of E15 into the market, including approving, on June 15, 2012, the first plan to minimize the potential for E15 to be used in vehicles and engines not covered by the partial waiver, followed by approving, on February 7, 2013, a new blender pump configuration for general use by retail stations that wish to dispense E15 and gasoline containing 10% ethanol (“E10”) from a common hose and nozzle. Existing laws and regulations could change, and the minimum volumes of renewable fuels that must be blended with refined petroleum fuels may increase. Because we do not produce renewable transportation fuels at all of our refineries, increasing the volume of renewable fuels that must be blended into our products displaces an increasing volume of our Shreveport, Superior, Montana and San Antonio refineries’ fuel products pool, potentially resulting in lower earnings and materially adversely affecting our ability to make payments on our debt obligations.

Climate Change

In response to findings by the EPA that emissions of carbon dioxide, methane and other “greenhouse gases” (“GHG”) present an endangerment to public health and the environment because emissions of such gases are contributing to the warming of the earth’s atmosphere and other climate changes, the EPA has adopted regulations under existing provisions of the federal Clean Air Act that, among other things, establish Prevention of Significant Deterioration (“PSD”) construction and Title V operating permit program requiring reviews for GHG emissions from certain large stationary sources. Facilities required to obtain PSD permits for their GHG emissions will also be required to meet “best available control technology” standards, which will be established by the states or, in some instances, by the EPA on a case-by-case basis. Moreover, on December 23, 2010,

the EPA entered a settlement agreement with environmental groups requiring the agency to propose by December 10, 2011 GHG New Source Performance Standards (“NSPS”) for refineries and to finalize these rules by November 15, 2012. To date, the EPA has not completed those rulemakings, and we do not know when they will be completed. In addition, the EPA has adopted rules requiring the monitoring and reporting of GHG emissions from specified large GHG emission sources in the U.S., including petroleum refineries, on an annual basis. We monitor for GHG emissions at our facilities, where required, and believe we are in substantial compliance with the applicable GHG reporting requirements. These EPA policies and rulemakings could adversely affect our operations and restrict or delay our ability to obtain air permits for new or modified facilities.

In addition, from time to time Congress has considered legislation to reduce emissions of GHG, and a number of the states have already taken legal measures to reduce emissions of GHG, primarily through the planned development of GHG emission inventories and/or regional GHG cap and trade programs. The adoption of any legislation or regulations that requires reporting of GHG or otherwise limits emissions of GHG from our equipment and operations could require us to incur costs to reduce emissions of GHG associated with our operations or could adversely affect demand for the refined petroleum products that we produce. For example, on January 14, 2015, the Obama Administration announced that the EPA is expected to propose in the summer of 2015 and finalize in 2016 new regulations that will set methane emission standards for new and modified oil and gas production and natural gas processing and transmission facilities as part of the Administration’s efforts to reduce methane emissions from the oil and gas sector by up to 45% from 2012 levels by 2025. Finally, it should be noted that some scientists have concluded that increasing concentrations of GHG in the earth’s atmosphere may produce climate changes that have significant physical effects, such as increased frequency and severity of storms, floods and other climatic events; if any such effects were to occur, they could have an adverse effect on our operations.

Hazardous Substances and Wastes

The Comprehensive Environmental Response, Compensation and Liability Act, as amended (“CERCLA”), also known as the “Superfund” law, and comparable state laws impose liability without regard to fault or the legality of the original conduct, on certain classes of persons who are considered to be responsible for the release of a hazardous substance into the environment. Such classes of persons include the current and past owners and operators of sites where a hazardous substance was released and companies that disposed or arranged for disposal of hazardous substances at offsite locations, such as landfills. Under CERCLA, these “responsible persons” may be subject to joint and several, strict liability for the costs of cleaning up the hazardous substances that have been released into the environment, for damages to natural resources, and for the costs of certain health studies. It is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the release of hazardous substances into the environment. In the course of our operations, we generate wastes or handle substances that may be regulated as hazardous substances, and we could become subject to liability under CERCLA and comparable state laws.

We also may incur liability under the Resource Conservation and Recovery Act, as amended (“RCRA”), and comparable state laws, which impose requirements related to the handling, storage, treatment and disposal of hazardous and non-hazardous wastes. In the course of our operations, we generate petroleum product wastes and ordinary industrial wastes, such as paint wastes, waste solvents and waste oils that may be regulated as hazardous wastes. In addition, our operations also generate non-hazardous solid wastes, which are regulated under RCRA and state laws. We believe that we are in substantial compliance with the existing requirements of RCRA and similar state and local laws, and the cost involved in complying with these requirements is not material.

We currently own or operate, and have in the past owned or operated, properties that for many years have been used for refining and terminal activities. These properties have in the past been operated by third parties whose treatment and disposal or release of petroleum hydrocarbons and wastes were not under our control. Although we used operating and disposal practices that were standard in the industry at the time, petroleum hydrocarbons or wastes have been released on or under the properties owned or operated by us. These properties and the materials disposed or released on them may be subject to CERCLA, RCRA and analogous state laws. Under such laws, we could be required to remove or remediate previously disposed wastes or property contamination or to perform remedial activities to prevent future contamination.

In addition, new laws and regulations, new interpretations of existing laws and regulations, increased governmental enforcement or other developments could require us to make additional unforeseen expenditures. Many of these laws and regulations are becoming increasingly stringent, and the cost of compliance with these requirements can be expected to increase over time. For example, on September 12, 2012, the EPA published final amendments to the NSPS for petroleum refineries, including standards for emissions of nitrogen oxides from process heaters and work practice standards and monitoring requirements for flares. In a second example, in November 2014, the EPA published a proposed rulemaking that it expects to finalize by October 1, 2015, which rulemaking proposes to revise the National Ambient Air Quality Standard for ozone between 65 to 70 parts per billion for both the 8-hour primary and secondary standards.

Voluntary remediation of subsurface contamination is in process at certain of our refinery sites. The remedial projects are being overseen by the applicable state agencies. Based on current investigative and remedial activities, we believe that the

groundwater contamination at these refineries can be controlled or remedied without having a material adverse effect on our financial condition. However, such costs are often unpredictable and, therefore, there can be no assurance that the future costs will not become material.

Water Discharges

The Federal Water Pollution Control Act of 1972, as amended, also known as the federal Clean Water Act, and analogous state laws impose restrictions and stringent controls on the discharge of pollutants, including oil, into federal and state waters. Such discharges are prohibited, except in accordance with the terms of a permit issued by the EPA or the appropriate state agencies. Any unpermitted release of pollutants, including crude oil or hydrocarbon specialty oils as well as refined products, could result in penalties, as well as significant remedial obligations. Spill prevention, control, and countermeasure requirements of federal laws require appropriate containment berms and similar structures to help prevent the contamination of navigable waters in the event of a petroleum hydrocarbon tank spill, rupture, or leak. We believe that we are in substantial compliance with the requirements of the federal Clean Water Act and similar state laws.

The primary federal law for oil spill liability is the Oil Pollution Act of 1990, as amended (“OPA”), which addresses three principal areas of oil pollution — prevention, containment and cleanup. OPA applies to vessels, offshore facilities and onshore facilities, including refineries, terminals and associated facilities that may affect waters of the U.S. Under OPA, responsible parties, including owners and operators of onshore facilities, may be subject to oil cleanup costs and natural resource damages as well as a variety of public and private damages from oil spills. We believe that we are in substantial compliance with OPA and similar state laws.

Occupational Health and Safety

We are subject to various laws and regulations relating to occupational health and safety, including OSHA and comparable state laws. These laws and regulations strictly govern the protection of the health and safety of employees. In addition, OSHA’s hazard communication standard requires that information be maintained about hazardous materials used or produced in our operations and that this information be provided to employees, contractors, state and local government authorities and customers. We maintain safety and training programs as part of our ongoing efforts to ensure compliance with applicable laws and regulations. We conduct periodic audits of Process Safety Management (“PSM”) systems at each of our locations subject to the PSM standard. Our compliance with applicable health and safety laws and regulations has required, and continues to require, substantial expenditures. Changes in occupational safety and health laws and regulations or a finding of non-compliance with current laws and regulations could result in additional capital expenditures or operating expenses, as well as civil penalties and, in the event of a serious injury or fatality, criminal charges.

We have completed studies to assess the adequacy of our PSM practices at our Shreveport refinery with respect to certain consensus codes and standards. During the years ended December 31, 2014 and 2013, we incurred approximately \$1.1 million and \$3.2 million, respectively, of related capital expenditures and expect to incur up to \$1.6 million of capital expenditures during 2015 to address OSHA compliance issues identified in these studies. We expect these capital expenditures will enhance our equipment such that the equipment maintains compliance with applicable consensus codes and standards.

In the first quarter of 2011, OSHA conducted an inspection of the Cotton Valley refinery’s PSM program under this OSHA initiative. On March 14, 2011, OSHA issued a Citation and Notification of Penalty (the “Cotton Valley Citation”) to us as a result of our Cotton Valley inspection, which included a proposed penalty amount of \$0.2 million. We have contested the Cotton Valley Citation and have reached a tentative settlement with OSHA on the matter, which we do not believe will have a material adverse effect on our results of operations or financial condition.

Other Environmental and Maintenance Items

We perform preventive and normal maintenance on all of our refining and terminal assets and make repairs and replacements when necessary or appropriate. We also conduct inspections of these assets as required by law or regulation.

Insurance

Our operations are subject to certain hazards of operations, including fire, explosion and weather-related perils. We maintain insurance policies, including business interruption insurance for each of our facilities, with insurers in amounts and with coverage and deductibles that we, with the advice of our insurance advisors and brokers, believe are reasonable and prudent. We cannot, however, ensure that this insurance will be adequate to protect us from all material expenses related to potential future claims for personal and property damage or that these levels of insurance will be available in the future at economical prices. We are not fully insured against certain risks because such risks are not fully insurable, coverage is unavailable, or premium costs, in our judgment, do not justify such expenditures.

Seasonality

The operating results for the fuel products segment, including the selling prices of asphalt products we produce, generally follow seasonal demand trends. Asphalt demand is generally lower in the first and fourth quarters of the year, as compared to the second and third quarters, due to the seasonality of the road construction and roofing industries we supply. Demand for gasoline and diesel is generally higher during the summer months than during the winter months due to seasonal increases in highway traffic. In addition, our natural gas costs can be higher during the winter months, as demand for natural gas as a heating fuel increases during the winter. As a result, our operating results for the first and fourth calendar quarters may be lower than those for the second and third calendar quarters of each year due to seasonality related to these and other products that we produce and sell.

The operating results for the oilfield services segment follow seasonal changes in weather and significant weather events can temporarily affect the performance and delivery of our oilfield services and products. The severity and duration of the winter can have a significant impact on drilling activity. Additionally, customer spending patterns for other oilfield services and products can result in lower activity in the fourth quarter of the year.

Properties

We own and lease the principal properties which are listed below. The principal properties which we own, among others not listed below, are pledged as collateral under our Collateral Trust Agreement as discussed in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt and Credit Facilities.” We believe that all properties are suitable for their intended purpose, are being efficiently utilized and provide adequate capacity to meet demand for the next several years.

<u>Property</u>	<u>Business Segment(s)</u>	<u>Acres</u>	<u>Owned / Leased</u>	<u>Location</u>
Shreveport refinery	Fuels and Specialty	240	Owned	Shreveport, Louisiana
Superior refinery	Fuels	675	Owned	Superior, Wisconsin
Montana refinery	Fuels	86	Owned	Great Falls, Montana
San Antonio refinery	Fuels	32	Owned	San Antonio, Texas
Princeton refinery	Specialty	208	Owned	Princeton, Louisiana
Cotton Valley refinery	Specialty	77	Owned	Cotton Valley, Louisiana
Burnham terminal	Specialty	11	Owned	Burnham, Illinois
Karns City facility	Specialty	225	Owned	Karns City, Pennsylvania
Dickinson facility	Specialty	28	Owned	Dickinson, Texas
Rhineland terminal	Fuels	18	Owned	Rhineland, Wisconsin
Crookston terminal	Fuels	19	Owned	Crookston, Minnesota
Missouri facility	Specialty	22	Owned	Louisiana, Missouri
Calumet Packaging facility	Specialty	10	Leased	Shreveport, Louisiana
Royal Purple facility	Specialty	28	Owned	Porter, Texas
Bel-Ray facility	Specialty	32	Owned	Wall Township, New Jersey
Elmendorf terminal	Fuels	8	Owned	Elmendorf, Texas
Duluth terminal	Fuels	49	Owned	Proctor, Minnesota

In addition to the items listed above, we lease or own a number of storage tanks, railcars, warehouses, equipment, land, crude oil loading facilities and precious metals.

Intellectual Property

Our patents relating to our refining operations are not material to us as a whole. Our products consist of composition patents which are integral to the formulas of our products. We own, have registered or applied for registration of a variety of trade names, service marks and trademarks for us in our business. The trademarks, tradenames and design marks under which we conduct our branded business (including Royal Purple, Bel-Ray and Quantum) and other trademarks employed in the marketing of our products are integral to our marketing operations. We also license intellectual property rights from third parties. We are not aware of any facts as of the date of this filing which would negatively impact our continuing use of our trade names, service marks or trademarks.

Office Facilities

In addition to our principal properties discussed above, as of December 31, 2014, we were a party to a number of cancelable and noncancelable leases for certain properties, including our corporate headquarters in Indianapolis, Indiana. The

corporate headquarters lease is for 44,291 square feet of office space. The lease term expires in August 2024. See Note 6 “Commitments and Contingencies” in Part II, Item 8 “Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements” of this Annual Report for additional information regarding our leases.

While we may require additional office space as our business expands, we believe that our existing facilities are adequate to meet our needs for the immediate future and that additional facilities will be available on commercially reasonable terms as needed.

Employees

As of March 2, 2015, our general partner employs approximately 2,200 people who provide direct support to our operations. Of these employees, approximately 600 are covered by collective bargaining agreements.

Employees at the following locations are covered by the following separate collective bargaining agreements:

Facility/ Refinery	Union	Expiration Date
Superior	International Union of Operating Engineers	June 30, 2017
Cotton Valley	International Union of Operating Engineers	March 31, 2016
Princeton	International Union of Operating Engineers	October 31, 2017
Dickinson	International Union of Operating Engineers	March 31, 2016
Shreveport	United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied-Industrial and Service Workers International Union	April 30, 2016
Missouri	United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied-Industrial and Service Workers International Union	April 30, 2015
Karns City ⁽¹⁾	United Steel, Paper and Forestry, Rubber, Manufacturing, Energy Allied-Industrial and Service Workers International Union	January 31, 2015
Montana ⁽¹⁾	United Steel, Paper and Forestry, Rubber, Manufacturing, Energy Allied-Industrial and Service Workers International Union	January 31, 2015

⁽¹⁾ The Montana and Karns City facilities are currently on a rolling 24-hour contract. We are currently in negotiations with these facilities to reach a new collective bargaining agreement.

None of the employees at the San Antonio refinery, Calumet Packaging facility, Royal Purple facility, Bel-Ray facility, Anchor or SOS locations or at the Burnham, Rhineland, Crookston, Duluth or Elmendorf terminals are covered by collective bargaining agreements. Our general partner considers its employee relations to be good, with no history of work stoppages.

Address, Internet Website and Availability of Public Filings

Our principal executive offices are located at 2780 Waterfront Parkway East Drive, Suite 200, Indianapolis, Indiana 46214 and our telephone number is (317) 328-5660. Our website is located at <http://www.calumetspecialty.com>.

Our Securities and Exchange Commission (“SEC”) filings are available on our website as soon as reasonably practicable after we electronically file such material with, or furnish such material to, the SEC. We make available, free of charge on our website, our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q, our Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). These documents are located on our website at <http://www.calumetspecialty.com> — by selecting the “Investor Relations” link and then selecting the “SEC Filings” link. We also make available, free of charge on our website, our Charters for the Audit, Compensation and Conflicts Committees, Related Party Transactions Policy and Code of Business Conduct and Ethics. These documents are located on our website at <http://www.calumetspecialty.com> — by selecting the “Investor Relations” link and then selecting the “Corporate Governance” link.

The above information is available to anyone who requests it and is free of charge either in print from our website or upon request by contacting Investor Relations using the contact information listed above. Information on our website is not incorporated into this Annual Report or our other securities filings and is not a part of them.

All reports and documents filed with the SEC are also available via the SEC website, <http://www.sec.gov>, or may be read and copied at the SEC Public Reference Room at 100 F Street, NE, Washington, DC 20549. Information on the operation of the SEC Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330.

Item 1A. Risk Factors

Risks Relating to our Business

We may not have sufficient cash from operations to enable us to pay the minimum quarterly distribution following the establishment of cash reserves and payment of fees and expenses, including payments to our general partner.

We may not have sufficient available cash from operations each quarter to enable us to pay the minimum quarterly distribution. Under the terms of our partnership agreement, we must pay expenses, including payments to our general partner, and set aside any cash reserve amounts before making a distribution to our unitholders. The amount of cash we can distribute on our units principally depends upon the amount of cash we generate from our operations, which is primarily dependent upon our producing and selling quantities of fuel products, specialty products, or refined products, and oilfield services at margins that are high enough to cover our fixed and variable expenses. Crude oil costs, fuel and specialty products prices and, accordingly, the cash we generate from operations, will fluctuate from quarter to quarter based on, among other things:

- overall demand for specialty hydrocarbon products, fuel and other refined products;
- overall demand for oilfield products and services;
- the level of foreign and domestic production of crude oil and refined products;
- our ability to produce fuel products, specialty products and products used in oilfield services that meet our customers' unique and precise specifications;
- the marketing of alternative and competing products;
- the extent of government regulation;
- results of our hedging activities; and
- overall economic and local market conditions.

In addition, the actual amount of cash we will have available for distribution will depend on other factors, some of which are beyond our control, including:

- the level of capital expenditures we make, including those for acquisitions, if any;
- our debt service requirements;
- fluctuations in our working capital needs;
- our ability to borrow funds and access capital markets;
- restrictions on distributions and on our ability to make working capital borrowings for distributions contained in our debt instruments; and
- the amount of cash reserves established by our general partner for the proper conduct of our business.

Refining margins are volatile, and a reduction in our refining margins will adversely affect the amount of cash we will have available for distribution to our unitholders and for payments of our debt obligations.

Our financial results are primarily affected by the relationship, or margin, between our specialty products prices and fuel products prices and the prices for crude oil and other feedstocks. The cost to acquire our feedstocks and the price at which we can ultimately sell our refined products depend upon numerous factors beyond our control. Historically, refining margins have been volatile, and they are likely to continue to be volatile in the future.

A widely used benchmark in the fuel products industry to measure market values and margins is the Gulf Coast 2/1/1 crack spread ("Gulf Coast crack spread"), which represents the approximate gross margin resulting from refining crude oil, assuming that two barrels of a benchmark crude oil are converted, or cracked, into one barrel of gasoline and one barrel of heating oil. The Gulf Coast crack spread ranged from a high of \$24.10 per barrel to a low of \$3.46 per barrel during 2014 and averaged \$17.13 per barrel during 2014 compared to an average of \$21.57 in 2013 and \$30.07 in 2012.

Our actual refining margins vary from the Gulf Coast crack spread due to the actual crude oil used and products produced, transportation costs, regional differences, and the timing of the purchase of the feedstock and sale of the refined products, but we use the Gulf Coast crack spread as an indicator of the volatility and general levels of refining margins.

The prices at which we sell specialty products are strongly influenced by the commodity price of crude oil. If crude oil prices increase, our specialty products segment margins will fall unless we are able to pass through these price increases to our customers. Increases in selling prices for specialty products typically lag behind the rising cost of crude oil and may be difficult to implement quickly enough when crude oil costs increase dramatically over a short period of time. For example, in the first

six months of 2008, excluding the effects of hedges, we experienced a 31.3% increase in the cost of crude oil per barrel as compared to an 18.3% increase in the average sales price per barrel of our specialty products. It is possible we may not be able to pass through all or any portion of increased crude oil costs to our customers. In addition, we are not able to completely eliminate our commodity risk through our hedging activities.

Because refining margins are volatile, unitholders should not assume that our current margins will be sustained. If our refining margins fall, it will adversely affect the amount of cash we will have available for distribution to our unitholders.

Our hedging activities may not be effective in reducing the volatility of our cash flows and may reduce our earnings, profitability and cash flows.

We are exposed to fluctuations in the price of crude oil, fuel products, natural gas and interest rates. From time to time, we utilize derivative financial instruments related to the future price of crude oil, natural gas, fuel products and their relationship with each other with the intent of reducing volatility in our cash flows due to fluctuations in commodity prices and spreads. Historically, we have utilized derivative instruments related to interest rates for future periods with the intent of reducing volatility in our cash flows due to fluctuations in interest rates. We are not able to enter into derivative financial instruments to reduce the volatility of the prices of the specialty products we sell as there is no established derivative market for such products.

The extent of our commodity price exposure is related largely to the effectiveness and scope of our hedging activities. The derivative instruments we utilize are based on posted market prices, which may differ significantly from the actual crude oil prices, natural gas prices or fuel products prices that we incur or realize in our operations. For example, excluding our crude oil basis swaps, all of the crude oil derivatives in our hedge portfolio are based on the market price of New York Mercantile (“NYMEX”) WTI and the fuel products derivatives are all based on U.S. Gulf Coast market prices. In recent periods, the spread between NYMEX WTI and other crude oil indices (specifically Light Louisiana Sweet, Western Canadian Select and Brent, on which a portion of our crude oil purchases are priced) has changed period to period, which has reduced the effectiveness of certain crude oil hedges. Accordingly, our commodity price risk management policy may not protect us from significant and sustained increases in crude oil or natural gas prices or decreases in fuel products prices. Conversely, our policy may limit our ability to realize cash flows from crude oil and natural gas price decreases.

We have a policy to enter into derivative transactions related to only a portion of the volume of our expected purchase and sales requirements and, as a result, we will continue to have direct commodity price exposure to the unhedged portion of our expected purchase and sales requirements. Thus, we could be exposed to significant crude oil cost increases on a portion of our purchases. Please read Part II, Item 7A “Quantitative and Qualitative Disclosures About Market Risk.”

Our actual future purchase and sales requirements may be significantly higher or lower than we estimate at the time we enter into derivative transactions for such period. If the actual amount is higher than we estimate, we will have greater commodity price exposure than we intended. If the actual amount is lower than the amount that is subject to our derivative financial instruments, we might be forced to satisfy all or a portion of our derivative transactions without the benefit of the cash flow from our sale or purchase of the underlying physical commodity, which may result in a substantial diminution of our liquidity. As a result, our hedging activities may not be as effective as we intend in reducing the volatility of our cash flows. In addition, our hedging activities are subject to the risks that a counterparty may not perform its obligations under the applicable derivative instrument, the terms of the derivative instruments are imperfect, and our hedging policies and procedures are not properly followed. It is possible that the steps we take to monitor our derivative financial instruments may not detect and prevent violations of our risk management policies and procedures, particularly if deception or other intentional misconduct is involved.

Our financing arrangements contain operating and financial provisions that restrict our business and financing activities.

The operating and financial restrictions and covenants in our financing arrangements, including our revolving credit facility, indentures governing each series of our outstanding senior notes and master derivative contracts, do currently restrict, and any future financing agreements could restrict, our ability to finance future operations or capital needs or to engage, expand or pursue our business activities, including restrictions on our ability to, among other things:

- sell assets, including equity interests in our subsidiaries;
- pay distributions or redeem or repurchase our units or repurchase our subordinated debt;
- incur or guarantee additional indebtedness or issue preferred units;
- create or incur certain liens;
- make certain acquisitions and investments;

- redeem or repay other debt or make other restricted payments;
- enter into transactions with affiliates;
- enter into agreements that restrict distributions or other payments from our restricted subsidiaries to us;
- create unrestricted subsidiaries;
- enter into sale and leaseback transactions;
- enter into a merger, consolidation or transfer or sale of assets, including equity interests in our subsidiaries; and
- engage in certain business activities.

Our revolving credit facility also contains a springing financial covenant which provides that, if availability under the revolving credit facility falls below the greater of (a) 12.5% of the Borrowing Base (as defined in the revolving credit agreement) then in effect and (b) \$45.0 million, then we will be required to maintain as of the end of each fiscal quarter a Fixed Charge Coverage Ratio (as defined in the revolving credit agreement) of at least 1.0 to 1.0.

Our existing indebtedness imposes, and any future indebtedness may impose, a number of covenants on us regarding collateral maintenance and insurance maintenance. As a result of these covenants and restrictions, we will be limited in the manner in which we conduct our business, and we may be unable to engage in favorable business activities or finance future operations or capital needs.

Our ability to comply with the covenants and restrictions contained in our financing arrangements may be affected by events beyond our control. If market or other economic conditions deteriorate, our ability to comply with these covenants and restrictions may be impaired. A failure to comply with the covenants, ratios or tests in our financing arrangements or any future indebtedness could result in an event of default under these financing arrangements, which, if not cured or waived, could have a material adverse effect on our business, financial condition and results of operations. Among other things, in the event of any default on our indebtedness, our debt holders and lenders:

- will not be required to lend any additional amounts to us;
- could elect to declare all borrowings outstanding, together with accrued and unpaid interest and fees, to be due and payable;
- could elect to require that all obligations accrue interest at the default rate, if such rate has not already been imposed;
- may have the ability to require us to apply all of our available cash to repay these borrowings;
- may prevent us from making debt service payments under our other agreements, any of which could result in an event of default under our other financing arrangements; or
- in the case of our revolving credit facility, foreclose on the collateral pledged pursuant to the terms of the revolving credit facility.

If our existing indebtedness were to be accelerated, there can be no assurance that we would have, or be able to obtain, sufficient funds to repay such indebtedness in full. Even if new financing were available, it may be on terms that are less attractive to us than our then existing indebtedness or it may not be on terms that are acceptable to us. In addition, our obligations under our revolving credit facility are secured by a first priority lien on our cash, accounts receivable, inventory and certain other personal property and our obligations under our master derivative contracts are secured by a first priority lien on our real property, plant and equipment, fixtures, intellectual property, certain financial assets, certain investment property, commercial tort claims, chattel paper, documents, instruments and proceeds of the forgoing (including proceeds of hedge agreements), and if we are unable to repay our indebtedness under the revolving credit facility or master derivative contracts, the lenders under our revolving credit facility and the counterparties to our master derivative contracts could seek to foreclose on these assets. Please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt and Credit Facilities,” “—Short Term Liquidity,” “—Long-Term Financing,” and “—Master Derivative Contracts” for additional information regarding our long-term debt.

Our debt levels may limit our flexibility in obtaining additional financing and in pursuing other business opportunities.

We had approximately \$1,719.4 million of outstanding indebtedness as of December 31, 2014 and availability for borrowings of \$310.8 million under our senior secured revolving credit facility. We continue to have the ability to incur additional debt, including the ability to borrow up to an aggregate principal amount of \$1.0 billion at any time outstanding, subject to borrowing base limitations, under our revolving credit facility. Our level of indebtedness could have important consequences to us, including the following:

- our ability to obtain additional financing, if necessary, for working capital, capital expenditures, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;
- covenants contained in our existing and future credit and debt arrangements will require us to meet financial tests that may affect our flexibility in planning for and reacting to changes in our business, including possible acquisition opportunities;
- we will need a substantial portion of our cash flow to make principal and interest payments on our indebtedness, reducing the funds that would otherwise be available for operations, future business opportunities and payments of our debt obligations; and
- our debt level will make us more vulnerable than our competitors with less debt to competitive pressures or a downturn in our business or the economy generally.

Our ability to service our indebtedness will depend upon, among other things, our future financial and operating performance, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors, some of which are beyond our control. If our operating results are not sufficient to service our current or future indebtedness, we will be forced to take actions such as reducing distributions to our unitholders, reducing or delaying our business activities, acquisitions, investments and/or capital expenditures, selling assets, restructuring or refinancing our indebtedness, or seeking additional equity capital or bankruptcy protection. We may not be able to effect any of these remedies on satisfactory terms, or at all. Please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt and Credit Facilities” for additional information regarding our indebtedness.

Decreases in the price of crude oil may lead to a reduction in the borrowing base under our revolving credit facility and our ability to issue letters of credit or the requirement that we post substantial amounts of cash collateral for derivative instruments, which could adversely affect our liquidity, financial condition and our ability to distribute cash to our unitholders.

We rely on borrowings and letters of credit under our revolving credit agreement to purchase crude oil or other feedstocks for our facilities, lease certain precious metals for use in our refinery operations and enter into derivative instruments of crude oil and natural gas purchases and fuel products sales. From time to time, we also rely on our ability to issue letters of credit to enter into certain hedging arrangements in an effort to reduce our exposure to adverse fluctuations in the prices of crude oil, natural gas and crack spreads. The borrowing base under our revolving credit facility is determined weekly or monthly depending upon availability levels or the existence of a default or event of default. Reductions in the value of our inventories as a result of lower crude oil prices could result in a reduction in our borrowing base, which would reduce the amount of financial resources available to meet our capital requirements. If, under certain circumstances, our available capacity under our revolving credit facility falls below certain threshold amounts, or a default or event of default exists, then our cash balances in a dominion account established with the administrative agent will be applied on a daily basis to our outstanding obligations under our revolving credit facility. In addition, decreases in the price of crude oil or increases in crack spreads may require us to post substantial amounts of cash collateral to our hedging counterparties in order to maintain our derivative instruments. If, due to our financial condition or other reasons, the borrowing base under our revolving credit facility decreases, we are limited in our ability to issue letters of credit or we are required to post substantial amounts of cash collateral to our hedging counterparties, our liquidity, financial condition and our ability to distribute cash to our unitholders could be materially and adversely affected. Please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt and Credit Facilities” for additional information.

We depend on certain key crude oil and other feedstock suppliers for a significant portion of our supply of crude oil and other feedstocks, and the loss of any of these key suppliers or a material decrease in the supply of crude oil and other feedstocks generally available to our facilities could materially reduce our ability to make distributions to unitholders.

We purchase crude oil and other feedstocks from major oil companies as well as from various crude oil gatherers and marketers primarily in Texas, north Louisiana, North Dakota and Canada. In 2014, subsidiaries of Plains supplied us with approximately 29.9% of our total crude oil supplies under term contracts and month-to-month evergreen crude oil supply contracts. In 2014, BP supplied us with approximately 16.0% of our total crude oil supplies under the BP Purchase Agreement. Each of our facilities is dependent on one or more of these suppliers and the loss of any of these suppliers would adversely affect our financial results to the extent we were unable to find another supplier of this substantial amount of crude oil. We do not maintain long-term contracts with most of our suppliers. For example, our contracts with Plains are currently month-to-month and terminable upon 90 days’ notice and our contract with BP automatically renewed in April 2014 for a one year term and will continue to automatically renew for successive one-year terms unless terminated by either party upon 90 days’ notice.

We purchase all of our crude oil supply directly from third-party suppliers, generally under month-to-month evergreen supply contracts and on the spot market. Evergreen contracts are generally terminable upon 30 days’ notice and purchases on

the spot market may expose us to changes in commodity prices. For additional discussion regarding our crude oil and feedstock supply, please read Items 1 and 2 “Business and Properties — Our Crude Oil and Feedstock Supply.”

To the extent that our suppliers reduce the volumes of crude oil and other feedstocks that they supply us as a result of declining production or competition or otherwise, our sales, net income and cash available for distribution to unitholders and payments of our debt obligations would decline unless we were able to acquire comparable supplies of crude oil and other feedstocks on comparable terms from other suppliers, which may not be possible in areas where the supplier that reduces its volumes is the primary supplier in the area. Fluctuations in crude oil prices can greatly affect production rates and investments by third parties in the development of new oil reserves. Drilling activity generally decreases as crude oil prices decrease. We have no control over the level of drilling activity in the fields that supply our refineries, the amount of reserves underlying the wells in these fields, the rate at which production from a well will decline or the production decisions of producers. A material decrease in either the crude oil production from or the drilling activity in the fields that supply our refineries, as a result of depressed commodity prices, natural production declines, governmental moratoriums on drilling or production activities, the availability and the cost of capital or otherwise, could result in a decline in the volume of crude oil we refine.

Trends in crude oil and natural gas prices affect the level of exploration, development, and production activity of our customers and the demand for our oilfield services and products, which could adversely affect the amount of cash we will have available for distribution to our unitholders and for payments of our debt obligations.

Demand for our oilfield services and products is particularly sensitive to the level of exploration, development and production activity of, and the corresponding capital spending by, crude oil and natural gas companies. The level of exploration, development, and production activity is directly affected by trends in oil and natural gas prices, which historically have been volatile and are likely to continue to be volatile.

Prices for crude oil and natural gas are subject to large fluctuations in response to relatively minor changes in the supply of and demand for crude oil and natural gas, market uncertainty and a variety of other economic factors that are beyond our control. Any prolonged reduction in crude oil and natural gas prices will depress the immediate levels of exploration, development and production activity which could adversely affect the amount of cash we will have available for distribution to our unitholders and for payments of our debt obligations. Even the perception of longer-term lower crude oil and natural gas prices by oil and natural gas companies can similarly reduce or defer major expenditures given the long-term nature of many large-scale development projects. Factors affecting the prices of crude oil and natural gas include:

- the level of supply and demand for crude oil and natural gas, especially demand for natural gas in the U.S.;
- governmental regulations, including the policies of governments regarding the exploration for and production and development of their oil and natural gas reserves;
- weather conditions and natural disasters;
- worldwide political, military, and economic conditions;
- the level of crude oil production by non-Organization of the Petroleum Exporting Countries (“OPEC”) countries and the available excess production capacity within OPEC;
- crude oil refining capacity and shifts in end-customer preferences toward fuel efficiency and the use of natural gas;
- the cost of producing and delivering crude oil and natural gas; and
- potential acceleration of the development of alternative fuels.

We depend on certain third-party pipelines for transportation of crude oil and refined fuel products, and if these pipelines become unavailable to us, our revenues and cash available for distributions to our unitholders and payment of our debt obligations could decline.

Our Shreveport refinery is interconnected to a pipeline that supplies a portion of its crude oil and a pipeline that ships a portion of its refined fuel products to customers, such as pipelines operated by subsidiaries of Enterprise Products Partners L.P. and Plains All American Pipeline, L.P. Our Superior refinery receives crude oil through the Enbridge Pipeline and the Superior wholesale business transports products produced at the Superior refinery through several Magellan pipeline terminals in Minnesota, Wisconsin, Iowa, North Dakota and South Dakota. Our Montana refinery receives crude oil through the Front Range pipeline system via the Bow River Pipeline in Canada. Since we do not own or operate any of these pipelines, their continuing operation is not within our control. In addition, any of these third-party pipelines could become unavailable to transport crude oil or our refined fuel products because of acts of God, accidents, earthquakes or hurricanes, government regulation, terrorism or other third-party events. For example, our refinery run rates were affected by an approximately three-week shutdown during May and June 2011 of the ExxonMobil crude oil pipeline serving our Shreveport refinery resulting from the Mississippi River flooding occurring during this period. In addition, ExxonMobil shut down this pipeline on April 28, 2012

after a leak was discovered. Also, on June 20, 2012, excessive flooding caused our Superior refinery to reduce its run rate to approximately half its usual throughput for one day and shut down the portion of the Magellan pipeline that connects our Superior refinery to our Duluth terminal for one day. The unavailability of any of these third-party pipelines for the transportation of crude oil or our refined fuel products, because of acts of God, accidents, earthquakes or hurricanes, government regulation, terrorism or other third-party events, could lead to disputes or litigation with certain of our suppliers or a decline in our sales, net income and cash available for distributions to our unitholders and payments of our debt obligations.

The price volatility of fuel and utility services may result in decreases in our earnings, profitability and cash flows.

The volatility in costs of fuel, principally natural gas, and other utility services, principally electricity, used by our refinery and other operations affect our net income and cash flows. Fuel and utility prices are affected by factors outside of our control, such as supply and demand for fuel and utility services in both local and regional markets. Natural gas prices have historically been volatile.

For example, daily prices for natural gas as reported on the NYMEX ranged between \$6.15 and \$2.89 per million British thermal unit (“MMBtu”), in 2014 and between \$4.46 and \$3.11 per MMBtu in 2013. Typically, electricity prices fluctuate with natural gas prices. Future increases in fuel and utility prices may have a material adverse effect on our results of operations. Fuel and utility costs constituted approximately 15.3% and 15.6% of our total operating expenses included in cost of sales for the years ended December 31, 2014 and 2013, respectively. If our natural gas costs rise, it will adversely affect the amount of cash available for distribution to our unitholders.

Our refineries, blending and packaging sites, terminals and related facility operations face operating hazards, and the potential limits on insurance coverage could expose us to potentially significant liability costs.

Our refineries, blending and packaging sites, terminals and related facility operations are subject to certain operating hazards, and our cash flow from those operations could decline if any of our facilities experiences a major accident, pipeline rupture or spill, explosion or fire, is damaged by severe weather or other natural disaster, or otherwise is forced to curtail its operations or shut down. For example, in 2010, our Shreveport refinery experienced an explosion that caused us to shut down one of this refinery’s environmental operating units between February and August 2010 when it was replaced with a newly constructed unit, resulting in modified operations during the interim period, including lower throughput rates at certain times during this period. These operating hazards could result in substantial losses due to personal injury and/or loss of life, severe damage to and destruction of property and equipment and pollution or other environmental damage and may result in significant curtailment or suspension of our related operations.

Although we maintain insurance policies, including personal and property damage and business interruption insurance for each of our facilities with insurers in amounts and with coverage and deductibles that we, with the advice of our insurance advisors and brokers, believe are reasonable and prudent, we cannot ensure that this insurance will be adequate to protect us from all material expenses related to potential future claims for personal and property damage or significant interruption of operations. Our business interruption insurance will not apply unless a business interruption exceeds 60 days. Furthermore, we may be unable to maintain or obtain insurance of the type and amount we desire at reasonable rates. As a result of market conditions, premiums and deductibles for certain of our insurance policies have increased and could escalate further. In some instances, certain insurance could become unavailable or available only for reduced amounts of coverage. In addition, we are not fully insured against all risks incident to our business because certain risks are not fully insurable, coverage is unavailable, or premium costs, in our judgment, do not justify such expenditures. For example, we are not insured for all environmental liabilities, including, for example, product spills and other releases at all of our facilities. If we were to incur a significant liability for which we were not fully insured, it could diminish our ability to make distributions to our unitholders.

We may incur significant environmental costs and liabilities in the operation of our refineries, terminals and related facilities.

The operation of our refineries, blending and packaging sites, terminals, and related facilities subject us to the risk of incurring significant environmental costs and liabilities due to our handling of petroleum hydrocarbons and wastes, because of air emissions and water discharges related to our operations, and as a result of historical operations and waste disposal practices at our facilities, some of which may have been conducted by prior owners or operators. We currently own or operate properties that for many years have been used for industrial activities, including refining and blending operations or terminal storage operations, sometimes by third parties over whom we had no control with respect to their operations or waste disposal activities. Petroleum hydrocarbons or wastes have been released on, under or from the properties owned or operated by us. For example, we are investigating and remediating, in some cases pursuant to government order, soil and groundwater contamination at our Montana refinery arising from a predecessor operators’ handling of petroleum hydrocarbons and wastes. While we believe our costs in pursuing these investigatory and remedial activities are subject to reimbursement under a contractual indemnification we received from our predecessor operator in the share purchase agreement transferring ownership of this refinery, this predecessor operator is currently disputing responsibility for reimbursement of certain of these remedial

costs being incurred at our Montana refinery, which dispute likely will result in contractual-mandated mediation between the parties pursuant to the share purchase agreement. Joint and several, strict liability may be incurred in connection with releases of petroleum hydrocarbons and wastes on, under or from our properties and facilities. Neither the owners of our general partner nor their affiliates have indemnified us for any environmental liabilities, including those arising from non-compliance or pollution that may be discovered at, or arise from operations on, the assets they contributed to us in connection with the closing of our initial public offering. Private parties, including the owners of properties adjacent to our operations and facilities where our petroleum hydrocarbons or wastes are taken for reclamation or disposal, may also have the right to pursue legal actions to enforce compliance as well as to seek damages for non-compliance with environmental laws and regulations or for personal injury or property damage. We may not be able to recover some or any of these costs from insurance or other sources of indemnity. To the extent that the costs associated with meeting any or all of these requirements are significant and not adequately secured or indemnified for, there could be a material adverse effect on our business, financial condition, and results of operations.

We are subject to compliance with stringent environmental and occupational health and safety laws and regulations that may expose us to significant costs and liabilities.

Our refining, blending and packaging site, terminal and related facility operations are subject to stringent federal, regional, state and local laws and regulations governing worker health and safety, the discharge of materials into the environment and environmental protection. These laws and regulations impose numerous obligations that are applicable to our operations, including the obligation to obtain permits to conduct regulated activities, the incurrence of significant capital expenditures for air pollution control equipment to otherwise limit or prevent releases of pollutants from our refineries, blending and packaging sites, terminals, and related facilities, the expenditure of significant monies in the application of specific health and safety criteria addressing worker protection, the requirement to maintain information about hazardous materials used or produced in our operations and to provide this information to employees, state and local government authorities, and local residents and the incurrence of significant costs and liabilities for pollution resulting from our operations or from those of prior owners or operators of our facilities. Numerous federal governmental authorities, such as the EPA and OSHA as well as state agencies, such as the LDEQ, TCEQ, MDEQ and the WDNR have the power to enforce compliance with these laws and regulations and the permits issued under them, often requiring difficult and costly actions. Failure to comply with these laws and regulations as well as any issued permits and orders may result in the assessment of administrative, civil, and criminal sanctions, including monetary penalties, the imposition of remedial obligations or corrective actions, and the issuance of injunctions limiting or preventing some or all of our operations.

On occasion, we receive notices of violation, other enforcement proceedings and regulatory inquiries from governmental agencies alleging non-compliance with applicable environmental and occupational health and safety laws and regulations. For example, we have pending proceedings with the LDEQ involving a series of alleged unauthorized emissions of pollutants from equipment at the Shreveport refinery, as described in a draft “Consolidated Compliance Order and Notice of Potential Penalty” issued on or around April 13, 2013 for which a penalty of more than \$0.1 million may result. In a further example, we have a pending proceeding with the EPA involving alleged unauthorized emissions of pollutants from flares at the Superior Refinery, as described in a “Notice of Violation” issued by the EPA on or around June 29, 2012 which included a proposed penalty amount of \$0.1 million.

New worker safety and environmental laws and regulations, new interpretations of existing laws and regulations, increased governmental enforcement or other developments could require us to make additional unforeseen expenditures. Many of these laws and regulations are becoming increasingly stringent, and the cost of compliance with these requirements can be expected to increase. For example, in September 2012, the EPA issued final amendments to the NSPS for petroleum refineries, including standards for emissions of nitrogen oxides from process heaters and work practice standards and monitoring requirements for flares. In another example, on March 3, 2014, the EPA announced its final Tier 3 fuel standards that require, among other things, a lower allowable sulfur level in gasoline to no more than 10 parts per million by January 1, 2017. In two other examples, in November 2014, the EPA published a proposed rulemaking that it expects to finalize by October 1, 2015, which rulemaking proposes to revise the National Ambient Air Quality Standard for ozone between 65 to 70 parts per billion for both the 8-hour primary and secondary standards, and in January 2015, the Obama Administration announced that the EPA is expected to propose in the summer of 2015 and finalize in 2016 new regulations that will set methane emission standards for new and modified oil and gas production and natural gas processing and transmission facilities as part of the Administration’s efforts to reduce methane emissions from the oil and gas sector by up to 45% from 2012 levels by 2025. One or more of these regulatory initiatives could impact us by requiring installation of new emission controls on some of our equipment, resulting in longer permitting timelines, and significantly increasing our capital expenditures and operating costs, which could adversely impact our business, cash flows and results of operation. Please read Items 1 and 2 “Business and Properties — Environmental and Occupational Health and Safety Matters” for additional information regarding our communications with the LDEQ and EPA.

Renewable transportation fuels mandates may reduce demand for the petroleum fuels we produce, which could have a material adverse effect on our results of operations and financial condition, and our ability to make distributions to our unitholders.

The EPA has issued RFS mandates, requiring refiners such as us to blend renewable fuels into the petroleum fuels they produce and sell in the U.S. We, and other refiners subject to RFS, may meet the RFS requirements by blending the necessary volumes of renewable transportation fuels produced by us or purchased from third parties. To the extent that refiners will not or cannot blend renewable fuels into the products they produce in the quantities required to satisfy their obligations under the RFS program, those refiners must purchase renewable credits, referred to as RINs, to maintain compliance. To the extent that we exceed the minimum volumetric requirements for blending of renewable transportation fuels, we generate our own RINs for which we have the option of retaining the RINs for current or future RFS compliance or selling those RINs on the open market.

Under RFS, the volume of renewable fuels that obligated parties are required to blend into their finished petroleum fuels increases annually over time until 2022. Our Shreveport, Superior, Montana and San Antonio refineries are nominally subject to compliance with the RFS mandates. However, on October 7, 2014, the EPA granted both our Shreveport and San Antonio refineries a “small refinery exemption” under the RFS for the 2013 calendar year, as provided under the Clean Air Act. Under the 2013 exemptions granted by the EPA, both our Shreveport and San Antonio refineries are not subject to the requirements of RFS as an “obligated party” for fuels produced at these refineries between January 1, 2013 and December 31, 2013. As a result of the exemptions, our requirements to purchase RINs for 2013 compliance were reduced by approximately 39 million RINs. As result of the exemptions, we sold approximately 31 million RINs during the fourth quarter 2014, generating cash of approximately \$14.5 million and resulting in an \$18.2 million gain.

The EPA has published the proposed volume mandates for 2014, which are generally lower than the volumes for 2013 and lower than the statutory mandates. While the EPA submitted a draft final rule for regulatory review by the federal Office of Management and Budget in August 2014, the agency subsequently published notice on December 9, 2014 that it would not finalize the proposed volume mandates for 2014 until sometime in 2015. Consequently, the EPA also announced in the December 9, 2014 notice that compliance reporting would not be required until a final 2014 standards rule is issued, which is expected to occur in 2015.

We are in the process of an assessment to determine which of our fuels refineries potentially could be eligible for economic hardship exemptions for the 2014 calendar year. While we received a small refinery exemption for the Shreveport and San Antonio refineries in 2013, there is no assurance that such an exemption will be obtained for either of these refineries for the 2014 year or in future years, which would result in the need for more RINs for the applicable calendar year. Our gross 2014 annual RINs obligation, which includes RINs that were required to be secured through either our own blending or through the purchase of RINs in the open market, was 87 million RINs for the 2014 calendar year.

Existing laws, regulations or regulatory initiatives could change and, notwithstanding that the EPA’s proposed volume mandates for 2014 may be relatively lower than that applied in 2013, the final minimum volumes of renewable fuels that must be blended with refined petroleum fuels could increase. Because we do not produce renewable transportation fuels at all of our refineries, increasing the volume of renewable fuels that must be blended into our produces displaces an increase volume of our Shreveport, Superior, Montana and San Antonio refineries’ fuel products pool, potentially resulting in lower earnings and materially adversely affecting our ability to make distributions to our unitholders. Moreover, despite a recent decline in RINs prices from levels during mid-2013, we cannot currently predict the future prices of RINs and, thus, the expenses related to acquiring RINs in the future could increase relative to the cost in prior years. The inability to receive an exemption from RFS for one or more of our refineries, any increase in the final minimum volumes renewable fuels that must be blended with refined petroleum fuels, and/or any increase in the cost to acquire RINs has the potential to result in significant costs in connection with RIN compliance in 2014, which costs could be material. Finally, while there is no current regulatory standard that authenticates RINs that may be purchased on the open market from third parties, we believe that the RINs we purchase are from reputable sources, are valid and serve to demonstrate compliance with applicable RFS requirements.

Downtime for maintenance at our refineries and facilities will reduce our revenues and cash available for distributions to our unitholders and payments of our debt obligations.

Our refineries and facilities consist of many processing units, a number of which have been in operation for a long time. One or more of the units may require additional unscheduled downtime for unanticipated maintenance or repairs that are more frequent than our scheduled turnaround for each unit every one to five years. Scheduled and unscheduled maintenance reduce our revenues and increase our operating expenses during the period of time that our processing units are not operating and could reduce our ability to make distributions to our unitholders.

If we do not successfully execute growth through acquisitions, our future growth and ability to increase distributions to our unitholders may be limited.

Our ability to grow depends in substantial part on our ability to make acquisitions that result in an increase in the cash generated from operations per unit. If we are unable to make these accretive acquisitions either because we are: (1) unable to identify attractive acquisition candidates or negotiate acceptable purchase contracts with them, (2) unable to consummate acquisitions on favorable terms, (3) unable to obtain financing for these acquisitions on economically acceptable terms, or (4) outbid by competitors, then our future growth and ability to increase distributions to our unitholders may be limited. Furthermore, any acquisition, involves potential risks, including, among other things:

- performance from the acquired assets and businesses that is below the forecasts we used in evaluating the acquisition;
- a significant increase in our indebtedness and working capital requirements;
- an inability to timely and effectively integrate the operations of recently acquired businesses or assets, particularly those in new geographic areas or in new lines of business;
- the incurrence of substantial seen or unforeseen environmental and other liabilities arising out of the acquired businesses or assets;
- the diversion of management's attention from other business concerns;
- customer or key employee losses at the acquired businesses; and
- significant changes in our capitalization and results of operations.

Our asset reconfiguration and enhancement initiatives may not result in revenue or cash flow increases, may be subject to significant cost overruns and are subject to regulatory, environmental, political, legal and economic risks, which could adversely affect our business, operating results, cash flows and financial condition.

Historically we have grown our business in part through the reconfiguration and enhancement of our existing refinery assets. For example, we completed an expansion project at our Shreveport refinery to increase throughput capacity and crude oil processing flexibility in May 2008. In addition, during 2013 we commenced an expansion project at our Montana refinery to increase throughput capacity from 10,000 bpd to 25,000 bpd. These expansion projects and the construction of other additions or modifications to our existing refineries have and will continue to involve numerous regulatory, environmental, political, legal, labor and economic uncertainties beyond our control, which could cause delays in construction or require the expenditure of significant amounts of capital, which we may finance with additional indebtedness or by issuing additional equity securities. Our forecasted internal rates of return on such projects are also based on our projections of future market fundamentals, which are not within our control, including changes in general economic conditions, available alternative supply and customer demand. For example, the total cost of the Shreveport refinery expansion project completed in 2008 was approximately \$375.0 million and was significantly over budget due primarily to increased construction labor costs. Future reconfiguration and enhancement projects may not be completed at the budgeted cost, on schedule, or at all due to the risks described above which could significantly affect our cash flows and financial condition.

We face substantial competition from other refining companies.

The refining industry is highly competitive. Our competitors include large, integrated, major or independent oil companies that, because of their more diverse operations, larger refineries or stronger capitalization, may be better positioned than we are to withstand volatile industry conditions, including shortages or excesses of crude oil or refined products or intense price competition at the wholesale level. If we are unable to compete effectively, we may lose existing customers or fail to acquire new customers. For example, if a competitor attempts to increase market share by reducing prices, our operating results and cash available for distribution to our unitholders and payments of our debt obligations could be reduced.

The amount of cash we have available for distribution to unitholders depends primarily on our cash flow and not solely on profitability.

Unitholders should be aware that the amount of cash we have available for distribution depends primarily upon our cash flow, including cash flow from financial reserves and working capital borrowings, and not solely on profitability, which will be affected by non-cash items. As a result, we may make cash distributions during periods when we record net losses and may not make cash distributions during periods when we record net income.

Distributions to unitholders and payments of our debt obligations could be adversely affected by a decrease in the demand for our specialty products.

Changes in our customers' products or processes may enable our customers to reduce consumption of the specialty products that we produce or make our specialty products unnecessary. Should a customer decide to use a different product due to price, performance or other considerations, we may not be able to supply a product that meets the customer's new requirements. In addition, the demand for our customers' end products could decrease, which could reduce their demand for our specialty products. Our specialty products customers are primarily in the industrial goods, consumer goods and automotive goods industries and we are therefore susceptible to overall economic conditions, which may change demand patterns and products in those industries. Consequently, it is important that we develop and manufacture new products to replace the sales of products that mature and decline in use. If we are unable to manage successfully the maturation of our existing specialty products and the introduction of new specialty products our revenues, net income and cash available for distribution to our unitholders and payments of our debt obligations could be reduced.

Distributions to unitholders and payments of our debt obligations could be adversely affected by a decrease in demand for fuel products in the markets we serve.

Any sustained decrease in demand for fuel products in the markets we serve could result in a significant reduction in our cash flows, reducing our ability to make distributions to unitholders and payments of our debt obligations. Factors that could lead to a decrease in market demand include:

- a recession or other adverse economic condition that results in lower spending by consumers on gasoline, diesel and travel;
- higher fuel taxes or other governmental or regulatory actions that increase, directly or indirectly, the cost of fuel products;
- an increase in fuel economy or the increased use of alternative fuel sources;
- an increase in the market price of crude oil that lead to higher refined product prices, which may reduce demand for fuel products;
- competitor actions; and
- availability of raw materials.

We depend on unionized labor for the operation of our facilities. Any work stoppages or labor disturbances at these facilities could disrupt our business.

Substantially all of our operating personnel at our Shreveport, Superior, Montana, Princeton, Cotton Valley, Karns City, Dickinson and Missouri facilities are employed under collective bargaining agreements, two of which expired in January 2015 and are now on a rolling 24-hour extension and one of which expires in April 2015. If we are unable to renegotiate these agreements as they expire, any work stoppages or other labor disturbances at these facilities could have an adverse effect on our business and reduce our ability to make distributions to our unitholders. In addition, employees who are not currently represented by labor unions may seek union representation in the future, and any renegotiation of current collective bargaining agreements may result in terms that are less favorable to us.

Because of the volatility of crude oil and refined products prices, our method of valuing our inventory may result in decreases in net income.

The nature of our business requires us to maintain substantial quantities of crude oil and refined product inventories. Because crude oil and refined products are essentially commodities, we have no control over the changing market value of these inventories. Because our inventory is valued at the lower of cost or market ("LCM") value, if the market value of our inventory were to decline to an amount less than our cost, we would record a write-down of inventory and a non-cash charge to cost of sales. In a period of decreasing crude oil or refined product prices, our inventory valuation methodology may result in decreases in net income. For example, due to the significant decrease in crude oil prices in the fourth quarter 2014 we recorded a \$74.1 million LCM adjustment.

The operating results for our fuel products segment, including the asphalt we produce and sell, are seasonal and generally lower in the first and fourth quarters of the year.

The operating results for the fuel products segment, including the selling prices of asphalt products we produce, can be seasonal. Asphalt demand is generally lower in the first and fourth quarters of the year as compared to the second and third quarters due to the seasonality of road construction. Demand for gasoline is generally higher during the summer months than during the winter months due to seasonal increases in highway traffic. In addition, our natural gas costs can be higher during the

winter months. Our operating results for the first and fourth calendar quarters may be lower than those for the second and third calendar quarters of each year as a result of this seasonality.

Due to our lack of asset and geographic diversification, adverse developments in our operating areas would reduce our ability to make distributions to our unitholders.

We rely primarily on sales generated from products processed at the facilities we own. Furthermore, the majority of our assets and operations are located in Louisiana, Wisconsin, Montana and Texas. Due to our lack of diversification in asset type and location, an adverse development in these businesses or areas, including adverse developments due to catastrophic events or weather, decreased supply of crude oil and feedstocks and/or decreased demand for refined petroleum products, would have a significantly greater impact on our financial condition and results of operations than if we maintained more diverse assets in more diverse locations.

Climate change legislation or regulations restricting emissions of GHG could result in increased operating costs and a decreased demand for our refined products.

The EPA has adopted rules requiring the reporting of carbon dioxide, methane and other GHGs from specified large GHG emissions sources in the U.S., including refineries, on an annual basis. Operators of covered sources in the U.S. must annually monitor and report these GHG emissions to EPA and certain state agencies. Our refineries and certain of our other facilities are subject to the federal GHG reporting requirements because of combustion GHG emissions and potential fugitive emissions that exceed reporting thresholds and our compliance with this reporting program has increased our operating costs.

In addition, the EPA has determined that emissions of GHG present a danger to public health and the environment and, based on these findings, has adopted regulations under existing provisions of the federal Clean Air Act that, among other things, establish Title V and PSD permitting requirements for certain large stationary sources of GHG that apply to certain of our facilities, including our refineries, which are potential major sources of GHG emissions. We may be required to install “best available control technology” to limit emissions of GHG from any new or significantly modified facilities that we may seek to construct in the future if they would otherwise emit large volumes of GHG. PSD permits with GHG emissions limitations have generally required efficient combustion requirements on sources that burn large volumes of fossil fuels rather than post-combustion GHG capture requirements. Also, as part of a settlement in December 2010 with certain environmental groups derived out of legal challenges seeking judicial review of an EPA final rule on standards of performance for petroleum refineries, the EPA agreed to propose new source performance standards for GHG emissions from petroleum refineries by December 10, 2011 and to finalize these rules by November 15, 2012. While no such standards have been proposed by the EPA to date, we expect the agency to continue to pursue this rulemaking. Depending on the nature of the requirements imposed by the EPA as part of this rulemaking, we could encounter increased operating costs and capital expenditures that could be significant.

While the U.S. Congress has from time to time considered legislation to reduce emissions of GHG, there has not been significant activity in the form of adopted legislation to reduce GHG emissions at the federal level in recent years. In the absence of federal climate legislation in the U.S., a number of state and regional efforts have emerged that are aimed at tracking and/or reducing GHG emissions. If the U.S. Congress undertakes comprehensive tax reform in the coming year, it is possible that such reform may include a carbon tax, which could impose additional direct costs on our operations and reduce demand for refined products. The ultimate impact of any carbon tax on our operations would further depend upon whether a carbon tax supplanted the other federal GHG regulations to which we are currently subject or is administered as an additional program.

Although it is not possible at this time to predict how legislation or new regulations that may be adopted to address GHG emissions would impact our business, any such future laws and regulations could result in increased compliance costs or additional operating restrictions, and could have a material adverse effect on our business, financial condition, demand for our products, results of operations and cash flows. For example, on January 14, 2015, the Obama Administration announced that the EPA is expected to propose in the summer of 2015 and finalize in 2016 new regulations that will set methane emission standards for new and modified oil and gas production and natural gas processing and transmission facilities as part of the Administration’s efforts to reduce methane emissions from the oil and gas sector by up to 45% from 2012 levels by 2025. Finally, it should be noted that some scientists have concluded that increasing concentrations of GHG in the earth’s atmosphere may produce climate changes that have significant physical effects, such as increased frequency and severity of storms, droughts, and floods and other climate events that could have an adverse effect on our assets and operations.

A proposed rule imposing more stringent standards relating to the use of upgraded emissions controls, observance of performance requirements and fenceline monitoring could cause us to incur increased capital expenditures and operating costs, which could be significant.

On June 30, 2014, the EPA published a proposed rule that would further control air emissions from refineries. In particular, this rulemaking proposes amendments to two refinery standards already in effect: the National Emission Standards for Hazardous Air Pollutants (“NESHAP”) from Petroleum Refineries and the NESHAP for Petroleum Refineries: Catalytic

Cracking Units, Catalytic Reforming Units, and Sulfur Recovery Units. In addition, the proposed rule would amend emission requirements under a third refinery standard already in effect, the Petroleum Refinery New Source Performance Standard. Collectively, the amendments recommended in the proposed rule would, among other things, require monitoring of air concentrations of benzene around the fence-line perimeter of refineries to assure that emissions are controlled, and these results would be available to the public. The proposal would also require upgraded emission controls for storage tanks including controls for smaller tanks; performance requirements for flares to ensure that waste gases are properly destroyed; and emissions standards for delayed coking units which are currently a significant unregulated source of toxic air emissions at refineries. The rule received a 60-day extension for public comment, to October 28, 2014, and the agency is currently evaluating comments received. If adopted, the rule could increase our compliance costs, which could be significant.

We could be subject to damages based on claims brought against us by our customers or lose customers as a result of the failure of our products to meet certain quality specifications.

Our specialty products provide precise performance attributes for our customers' products. If a product fails to perform in a manner consistent with the detailed quality specifications required by the customer, the customer could seek replacement of the product or damages for costs incurred as a result of the product failing to perform as guaranteed. A successful claim or series of claims against us could result in a loss of one or more customers and reduce our ability to make distributions to unitholders and payments of our debt obligations.

The enactment of derivatives legislation could have an adverse effect on our ability to use derivative instruments to hedge risks associated with our business.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Act"), enacted on July 21, 2010, established federal oversight and regulation of the over-the-counter derivatives market and entities, such as us, that participate in that market. The Act requires the Commodity Futures Trading Commission ("CFTC") and the SEC to promulgate rules and regulations implementing the Act. In its rulemaking under the Act, the CFTC has issued final regulations to set position limits for certain futures and option contracts in the major energy markets and for swaps that are their economic equivalents. Certain bona fide hedging transactions or derivative instruments would be exempt from these position limits. The position limits rule was vacated by the U.S. District Court for the District of Columbia in September 2012. In November 2013, the CFTC proposed new rules relating to position limits that would replace the vacated rule. As these new position limit rules are not yet final, their impact on us is uncertain at this time. The CFTC also has finalized other regulations, including critical rulemakings on the definition of "swap," "security-based swap," "swap dealer" and "major swap participant." Some regulations, however, remain to be finalized and it is not possible at this time to predict when this will be accomplished and when the compliance date for those regulations will commence. Although we believe that we qualify for the end-user exceptions to the mandatory clearing and uncleared swap margin requirements with respect to those swaps entered to hedge our commercial risks, the application of such requirements to other market participants, such as swap dealers, may change the cost and availability of the swaps that we use for hedging. The Act and any new regulations could significantly increase the cost of derivative instruments, materially alter the terms of derivative instruments, reduce the availability of derivatives to protect against risks we encounter and reduce our ability to monetize or restructure our existing derivatives contracts. An increase in the cost of derivatives contracts would affect our results of operations and cash available for distribution to our unitholders and payments of our debt obligations. If we reduce our use of derivatives as a result of the Act and regulations, our results of operations may become more volatile and our cash flows may be less predictable, which could adversely affect our ability to plan for and fund capital expenditures and make distributions to our unitholders and payments of our debt obligations. Finally, the Act was intended, in part, to reduce the volatility of oil and natural gas prices, which some legislators attributed to speculative trading in derivatives and commodity instruments related to oil and natural gas. Our revenues could therefore be adversely affected if a consequence of the Act and regulations is to lower commodity prices. Any of these consequences could have a material adverse effect on our business, our financial condition, and our results of operations. In addition, the European Union and other non-U.S. jurisdictions are implementing regulations with respect to the derivatives market. To the extent we transact with counterparties in foreign jurisdictions, we may become subject to such regulations, the impact of which is not clear at this time.

We depend on key personnel for the success of our business and the loss of those persons could adversely affect our business and our ability to make distributions to our unitholders.

The loss of the services of any member of senior management or key employee could have an adverse effect on our business and reduce our ability to make distributions to our unitholders. We may not be able to locate or employ on acceptable terms qualified replacements for senior management or other key employees if their services were no longer available. In addition to the employment agreement in place with respect to Mr. Grube, on May 7, 2014, we entered into employment agreements with Jennifer G. Straumins, Executive Vice President, Strategy and Development; R. Patrick Murray, II, Executive Vice President, Chief Financial Officer and Secretary; and Timothy R. Barnhart, Executive Vice President of Operations. We do not maintain any key-man life insurance.

An increase in interest rates will cause our debt service obligations to increase.

Borrowings under our revolving credit facility bear interest at a rate equal to prime plus a basis points margin or LIBOR plus a basis points margin, at our option. As of December 31, 2014, there were outstanding borrowings under our revolving credit facility of \$150.8 million and \$114.3 million in standby letters of credit were issued under our revolving credit facility. The interest rate is subject to adjustment based on fluctuations in the London Interbank Offered Rate (“LIBOR”) or prime rate, as applicable. An increase in the interest rates associated with our floating-rate debt would increase our debt service costs and affect our results of operations and cash flow available for distribution to our unitholders. In addition, an increase in interest rates could adversely affect our future ability to obtain financing or materially increase the cost of any additional financing.

A change of control could result in us facing substantial repayment obligations under our revolving credit agreement, our senior notes and our Collateral Trust Agreement.

Certain events relating to a change of control of our general partner, our partnership and our operating subsidiaries would constitute an event of default under our revolving credit agreement, the indentures governing our senior notes and our Collateral Trust Agreement. In addition, an event of default under our revolving credit agreement would likely constitute an event of default under our master derivatives contracts and the BP Purchase Agreement. As a result, upon a change of control event, we may be required immediately to repay the outstanding principal, any accrued interest on and any other amounts owed by us under our revolving credit facility and the senior notes and the outstanding payment obligations under our master derivatives contracts and the BP Purchase Agreement. The source of funds for these repayments would be our available cash or cash generated from other sources and there can be no assurance that we would have, or be able to obtain, sufficient funds to repay such indebtedness and other payment obligations in full. In addition, our obligations under our revolving credit facility are secured by a first priority lien on our cash, accounts receivable, inventory and certain related assets and our obligations under our master derivatives contracts and the BP Purchase Agreement are secured by a first priority lien on our real property, plant and equipment, fixtures, intellectual property, certain financial assets, certain investment property, commercial tort claims, chattel paper, documents, instruments and proceeds of the forgoing (including proceeds of hedge agreements). If we are unable to repay our indebtedness under the revolving credit facility, the payment obligations under our master derivative contracts or the payment obligations under the BP Purchase Agreement or obtain waivers of such defaults, then the lenders under our revolving credit facility, the derivative counterparties under our master derivative contracts and BP would have the right to foreclose on those assets, which would have a material adverse effect on us. There is no restriction in our partnership agreement on the ability of our general partner to enter into a transaction which would trigger the change of control provisions of our revolving credit facility agreement, the indentures governing our senior notes or our Collateral Trust Agreement.

We are exposed to trade credit risk in the ordinary course of our business activities.

We are exposed to risks of loss in the event of nonperformance by our customers and by counterparties of our derivative instruments. Some of our customers and counterparties may be highly leveraged and subject to their own operating and regulatory risks. Even if our credit review and analysis mechanisms work properly, we may experience financial losses in our dealings with other parties. Any increase in the nonpayment or nonperformance by our customers and/or counterparties could reduce our ability to make distributions to our unitholders and payments of our debt obligations.

Risks Inherent in an Investment in Us

At March 2, 2015, the families of our chairman, chief executive officer and vice chairman, The Heritage Group and certain of their affiliates own an approximate 25.3% limited partner interest in us and own and control our general partner, which has sole responsibility for conducting our business and managing our operations. Our general partner and its affiliates have conflicts of interest and limited fiduciary duties, which may permit them to favor their own interests to other unitholders’ detriment.

At March 2, 2015, the families of our chairman, chief executive officer and vice chairman, the Heritage Group, and certain of their affiliates own an approximate 25.3% limited partner interest in us. In addition, The Heritage Group and the families of our chairman and chief executive officer and vice chairman own our general partner. Conflicts of interest may arise between our general partner and its affiliates, on the one hand, and us and our unitholders, on the other hand. As a result of these conflicts, the general partner may favor its own interests and the interests of its affiliates over the interests of our unitholders. These conflicts include, among others, the following situations:

- our general partner is allowed to take into account the interests of parties other than us, such as its affiliates, in resolving conflicts of interest, which has the effect of limiting its fiduciary duty to our unitholders;
- our general partner has limited its liability and reduced its fiduciary duties under our partnership agreement and has also restricted the remedies available to our unitholders for actions that, without the limitations, might constitute breaches of fiduciary duty. As a result of purchasing common units, unitholders consent to some actions and conflicts of interest that might otherwise constitute a breach of fiduciary or other duties under Delaware law;

- our general partner determines the amount and timing of asset purchases and sales, borrowings, issuance of additional partnership securities, and reserves, each of which can affect the amount of cash that is distributed to unitholders;
- our general partner determines which costs incurred by it and its affiliates are reimbursable by us;
- our general partner determines the amount and timing of any capital expenditures and whether a capital expenditure is a maintenance capital expenditure, which reduces operating surplus, or a capital expenditure for acquisitions or capital improvements, which does not. This determination can affect the amount of cash that is available for distribution to our unitholders and payments of our debt obligations;
- our general partner has the flexibility to cause us to enter into a broad variety of derivative transactions covering different time periods, the net cash receipts from which will increase operating surplus and adjusted operating surplus, with the result that our general partner may be able to shift the recognition of operating surplus and adjusted operating surplus between periods to increase the distributions it and its affiliates receive on their incentive distribution rights; and
- in some instances, our general partner may cause us to borrow funds in order to permit the payment of cash distributions, even if the purpose or effect of the borrowing is to make incentive distributions.

The Heritage Group and certain of its affiliates may engage in limited competition with us.

Pursuant to the omnibus agreement we entered into in connection with our initial public offering, The Heritage Group and its controlled affiliates have agreed not to engage in, whether by acquisition or otherwise, the business of refining or marketing specialty lubricating oils, solvents and wax products as well as gasoline, diesel and jet fuel products in the continental U.S. for so long as it controls us. This restriction does not apply to certain assets and businesses which are more fully described under Part III, Item 13 “Certain Relationships and Related Transactions and Director Independence — Omnibus Agreement.”

Although Mr. Grube is prohibited from competing with us pursuant to the terms of his employment agreement, the owners of our general partner, other than The Heritage Group, are not prohibited from competing with us, except to the extent described above.

Our partnership agreement limits our general partner’s fiduciary duties to our unitholders and restricts the remedies available to unitholders for actions taken by our general partner that might otherwise constitute breaches of fiduciary duty.

Our partnership agreement contains provisions that reduce the standards to which our general partner would otherwise be held by state fiduciary duty law. For example, our partnership agreement:

- Permits our general partner to make a number of decisions in its individual capacity, as opposed to in its capacity as our general partner. This entitles our general partner to consider only the interests and factors that it desires, and it has no duty or obligation to give any consideration to any interest of, or factors affecting, us, our affiliates or any limited partner. Examples include the exercise of its limited call right, its voting rights with respect to the units it owns, its registration rights and its determination whether or not to consent to any merger or consolidation of our partnership or amendment of our partnership agreement;
- Provides that our general partner will not have any liability to us or our unitholders for decisions made in its capacity as a general partner so long as it acted in good faith, meaning it believed the decision was in the best interests of our partnership;
- Generally provides that affiliated transactions and resolutions of conflicts of interest not approved by the conflicts committee of the board of directors of our general partner and not involving a vote of unitholders must be on terms no less favorable to us than those generally being provided to or available from unrelated third parties or be “fair and reasonable” to us. In determining whether a transaction or resolution is “fair and reasonable,” our general partner may consider the totality of the relationships between the parties involved, including other transactions that may be particularly advantageous or beneficial to us; and
- Provides that our general partner and its officers and directors will not be liable for monetary damages to us or our limited partners for any acts or omissions unless there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that the general partner or those other persons acted in bad faith or engaged in fraud or willful misconduct or, in the case of a criminal matter, acted with knowledge that such person’s conduct was criminal.

By purchasing a common unit, a unitholder agrees to be bound by the provisions in the partnership agreement, including the provisions discussed above.

Unitholders have limited voting rights and are not entitled to elect our general partner or its directors.

Unlike the holders of common stock in a corporation, unitholders have only limited voting rights on matters affecting our business and, therefore, limited ability to influence management's decisions regarding our business. Unitholders do not elect our general partner or its board of directors, and have no right to elect our general partner or its board of directors on an annual or other continuing basis. The board of directors of our general partner is chosen by the members of our general partner. Furthermore, if the unitholders are dissatisfied with the performance of our general partner, the vote of the holders of at least 66²/₃% of all outstanding units voting together as a single class is required to remove the general partner. At March 2, 2015, the owners of our general partner and certain of their affiliates own approximately 25.3% of our common units. As a result of these limitations, the price at which the common units trade could be diminished because of the absence or reduction of a takeover premium in the trading price.

Our partnership agreement restricts the voting rights of those unitholders owning 20% or more of our common units.

Unitholders' voting rights are further restricted by the partnership agreement provision providing that any units held by a person that owns 20% or more of any class of units then outstanding, other than our general partner, its affiliates, their transferees, and persons who acquired such units with the prior approval of the board of directors of our general partner, cannot vote on any matter. Our partnership agreement also contains provisions limiting the ability of unitholders to call meetings or to acquire information about our operations, as well as other provisions limiting the unitholders' ability to influence the manner or direction of management.

Our general partner interest or control of our general partner may be transferred to a third party without unitholder consent.

Our general partner may transfer its general partner interest to a third party in a merger or in a sale of all or substantially all of its assets without the consent of the unitholders. Furthermore, our partnership agreement does not restrict the ability of the members of our general partner from transferring their respective membership interests in our general partner to a third party. The new members of our general partner would then be in a position to replace the board of directors and officers of our general partner with their own choices and thereby control the decisions taken by the board of directors.

We do not have our own officers and employees and rely solely on the officers and employees of our general partner and its affiliates to manage our business and affairs.

We do not have our own officers and employees and rely solely on the officers and employees of our general partner and its affiliates to manage our business and affairs. We can provide no assurance that our general partner will continue to provide us the officers and employees that are necessary for the conduct of our business nor that such provision will be on terms that are acceptable to us. If our general partner fails to provide us with adequate personnel, our operations could be adversely impacted and our cash available for distribution to unitholders and payments of our debt obligations could be reduced.

We may issue additional common units without unitholder approval, which would dilute our current unitholders' existing ownership interests.

We may issue an unlimited number of limited partner interests of any type without the approval of our unitholders. Our partnership agreement does not give our unitholders the right to approve our issuance of equity securities ranking junior to the common units at any time. In addition, our partnership agreement does not prohibit the issuance by our subsidiaries of equity securities, which may effectively rank senior to the common units. The issuance of additional common units or other equity securities of equal or senior rank to the common units will have the following effects:

- our unitholders' proportionate ownership interest in us may decrease;
- the amount of cash available for distribution on each unit may decrease;
- the relative voting strength of each previously outstanding unit may be diminished;
- the market price of the common units may decline; and
- the ratio of taxable income to distributions may increase.

Our general partner's determination of the level of cash reserves may reduce the amount of available cash for distribution to unitholders.

Our partnership agreement requires our general partner to deduct from operating surplus cash reserves that it establishes are necessary to fund our future operating expenditures. In addition, our partnership agreement also permits our general partner to reduce available cash by establishing cash reserves for the proper conduct of our business, to comply with applicable law or agreements to which we are a party, or to provide funds for future distributions to partners. These reserves will affect the amount of cash available for distribution to unitholders.

We have a holding company structure in which our subsidiaries conduct our operations and own our operating assets and our ability to distribute cash to our unitholders and make payments of our debt obligations depends on the performance of our subsidiaries and their ability to distribute funds to us.

We are a holding company, and our subsidiaries conduct all of our operations and own all of our operating assets. We have no significant assets other than the equity interests in our subsidiaries. As a result, our ability to distribute cash to our unitholders and make payments of debt obligations depends on the performance of our subsidiaries and their ability to distribute funds to us. The ability of our subsidiaries to make distributions to us is restricted by our revolving credit facility and the indentures governing our senior notes and may be restricted by, among other things, applicable state laws and other laws and regulations. If we are unable to obtain the funds necessary to distribute cash to our unitholders or make payments of debt obligations, we may be required to adopt one or more alternatives, such as a refinancing of our indebtedness or incurring borrowings under our revolving credit facility. We cannot assure unitholders that we would be able to refinance our indebtedness or that the terms on which we could refinance our indebtedness would be favorable.

Cost reimbursements due to our general partner and its affiliates will reduce cash available for distribution to unitholders and payments of our debt obligations.

Prior to making any distribution on the common units, we will reimburse our general partner and its affiliates for all expenses they incur on our behalf. Any such reimbursement will be determined by our general partner and will reduce the cash available for distribution to unitholders and payments of our debt obligations. These expenses will include all costs incurred by our general partner and its affiliates in managing and operating us. Please read Part III, Item 13 “Certain Relationships and Related Transactions and Director Independence.”

Our general partner has a limited call right that may require unitholders to sell their units at an undesirable time or price.

If at any time our general partner and its affiliates own more than 80% of the issued and outstanding common units, our general partner will have the right, but not the obligation, which right it may assign to any of its affiliates or to us, to acquire all, but not less than all, of the common units held by unaffiliated persons at a price not less than their then-current market price. As a result, unitholders may be required to sell their common units to our general partner, its affiliates or us at an undesirable time or price and may not receive any return on their investment. Unitholders may also incur a tax liability upon a sale of their common units. At March 2, 2015, our general partner and its affiliates own approximately 25.3% of our common units.

Unitholder liability may not be limited if a court finds that unitholder action constitutes control of our business.

A general partner of a partnership generally has unlimited liability for the obligations of the partnership, except for those contractual obligations of the partnership that are expressly made without recourse to the general partner. Our partnership is organized under Delaware law and we conduct business in a number of other states. The limitations on the liability of holders of limited partner interests for the obligations of a limited partnership have not been clearly established in some of the other states in which we do business. Unitholders could be liable for any and all of our obligations as if they were a general partner if:

- a court or government agency determined that we were conducting business in a state but had not complied with that particular state’s partnership statute; or
- unitholders’ right to act with other unitholders to remove or replace the general partner, to approve some amendments to our partnership agreement or to take other actions under our partnership agreement constitute “control” of our business.

Unitholders may have liability to repay distributions that were wrongfully distributed to them.

Under certain circumstances, unitholders may have to repay amounts wrongfully returned or distributed to them. Under Section 17-607 of the Delaware Revised Uniform Limited Partnership Act, which we call the Delaware Act, we may not make a distribution to our unitholders if the distribution would cause our liabilities to exceed the fair value of our assets. Delaware law provides that for a period of three years from the date of the impermissible distribution, limited partners who received the distribution and who knew at the time of the distribution that it violated Delaware law will be liable to the limited partnership for the distribution amount. Purchasers of units who become limited partners are liable for the obligations of the transferring limited partner to make contributions to the partnership that are known to the purchaser of the units at the time it became a limited partner and for unknown obligations if the liabilities could be determined from the partnership agreement. Liabilities to partners on account of their partnership interest and liabilities that are non-recourse to the partnership are not counted for purposes of determining whether a distribution is permitted.

Our common units have a low trading volume compared to other units representing limited partner interests.

Our common units are traded publicly on the NASDAQ Global Select Market under the symbol “CLMT.” However, our common units have a low average daily trading volume compared to many other units representing limited partner interests quoted on the NASDAQ Global Select Market.

The market price of our common units may continue to be volatile and may also be influenced by many factors, some of which are beyond our control, including:

- our quarterly distributions;
- our quarterly or annual earnings or those of other companies in our industry;
- changes in commodity prices or refining margins;
- loss of a large customer;
- announcements by us or our competitors of significant contracts or acquisitions;
- changes in accounting standards, policies, guidance, interpretations or principles;
- general economic conditions;
- the failure of securities analysts to cover our common units or changes in financial estimates by analysts;
- future sales of our common units; and
- the other factors described in Item 1A “Risk Factors” of this Annual Report.

Tax Risks to Common Unitholders

Our tax treatment depends on our status as a partnership for U.S. federal income tax purposes, as well as our not being subject to a material amount of entity-level taxation by individual states. If the IRS was to treat us as a corporation for federal income tax purposes, or if we become subject to material additional amounts of entity-level taxation for state tax purposes, then our cash available for distribution to our unitholders would be substantially reduced.

The anticipated after-tax economic benefit of an investment in our common units depends largely on our being treated as a partnership for U.S. federal income tax purposes.

Despite the fact that we are organized as a limited partnership under Delaware law, we would be treated as a corporation for federal income tax purposes unless we satisfy a “qualifying income” requirement. Based upon our current operations and private letter rulings we have received with respect to certain aspects of our business, we believe we satisfy the qualifying income requirement. Failing to meet the qualifying income requirement or a change in current law could cause us to be treated as a corporation for federal income tax purposes or otherwise subject us to taxation as an entity.

If we were treated as a corporation for federal income tax purposes, we would pay federal income tax on our taxable income at the corporate tax rate, which is currently a maximum of 35%. Distributions to our unitholders would generally be taxed again as corporate distributions, and no income, gains, losses, deductions or credits would flow through to our unitholders. Because a tax would be imposed upon us as a corporation, our cash available for distribution to our unitholders would be substantially reduced. Therefore, treatment of us as a corporation would result in a material reduction in the anticipated cash flow and after-tax return to the unitholders, likely causing a substantial reduction in the value of our common units.

Our partnership agreement provides that if a law is enacted or existing law is modified or interpreted in a manner that subjects us to taxation as a corporation or otherwise subjects us to a material amount of entity-level taxation for federal, state or local income tax purposes, the anticipated quarterly distribution amount and the target distribution amounts may be adjusted to reflect the impact of that law on us. At the state level, several states have been evaluating ways to subject partnerships to entity-level taxation through the imposition of state income, franchise, or other forms of taxation. Imposition of a similar tax on us in the jurisdictions in which we operate or in other jurisdictions to which we may expand could substantially reduce our cash available for distribution to our unitholders.

The tax treatment of publicly traded partnerships or an investment in our common units could be subject to potential legislative, judicial or administrative changes and differing interpretations, possibly on a retroactive basis.

The present U.S. federal income tax treatment of publicly traded partnerships, including us, or an investment in our common units may be modified by administrative, legislative or judicial changes or differing interpretations at any time. For example, the Obama administration's budget proposal for fiscal year 2016 recommends that certain publicly traded partnerships earning income from activities related to fossil fuels be taxed as corporations beginning in 2021. From time to time, members of Congress propose and consider substantive changes to the existing federal income tax laws that affect publicly traded partnerships. If successful, the Obama administration's proposal or other similar proposals could eliminate the qualifying income exception to the treatment of all publicly-traded partnerships as corporations upon which we rely for our treatment as a partnership for U.S. federal income tax purposes.

In addition, the IRS has been considering changes to its private letter ruling policy concerning which activities give rise to qualifying income within the meaning of section 7704 of the Code. The implementation of changes to this policy could include the modification or revocation of existing rulings, including ours. Any modification to the U.S. federal income tax laws may be applied retroactively and could make it more difficult or impossible to meet the exception for certain publicly traded partnerships to be treated as partnerships for U.S. federal income tax purposes. We are unable to predict whether any of these changes or other proposals will be reintroduced or will ultimately be enacted. Any such changes could negatively impact the value of an investment in our common units.

Unitholders will be required to pay taxes on their share of our taxable income even if they do not receive any cash distributions from us.

Unitholders will be required to pay federal income taxes and, in some cases, state and local income taxes on their share of our taxable income, whether or not they receive cash distributions from us. Unitholders may not receive cash distributions from us equal to their share of our taxable income or even equal to the actual tax liability which results from that income.

The sale or exchange of 50% or more of our capital and profits interests during any twelve-month period will result in the termination of our partnership for federal income tax purposes.

We will be considered to have terminated as a partnership for federal income tax purposes if there is a sale or exchange of 50% or more of the total interests in our capital and profits within a twelve-month period. For purposes of determining whether the 50% threshold has been met, multiple sales of the same interest will be counted only once. Our termination would, among other things, result in the closing of our taxable year for all unitholders, which would result in us filing two tax returns for one calendar year and could result in a significant deferral of depreciation deductions allowable in computing our taxable income. In the case of a unitholder reporting on a taxable year other than the calendar year, the closing of our taxable year may also result in more than 12 months of our taxable income or loss being includable in his taxable income for the year of termination. Our termination currently would not affect our classification as a partnership for federal income tax purposes, but it would result in our being treated as a new partnership for federal income tax purposes. If we were treated as a new partnership, we would be required to make new tax elections and could be subject to penalties if we are unable to determine that a termination occurred. The IRS recently announced a relief procedure whereby if a publicly-traded partnership that has technically terminated requests and the IRS grants special relief, among other things, the partnership may be permitted to provide only a single Schedule K-1 to unitholders for the two short tax periods included in the year in which the termination occurs.

Tax gain or loss on the disposition of our common units could be more or less than expected.

If our unitholders sell their common units, they will recognize a gain or loss equal to the difference between the amount realized and their tax basis in those common units. Because distributions in excess of a unitholder's allocable share of our net taxable income result in a decrease in such unitholder's tax basis in their common units, the amount, if any, of such prior excess distributions with respect to the units they sell will, in effect, become taxable income to our unitholders if they sell such units at a price greater than their tax basis in those units, even if the price they receive is less than their original cost. Furthermore, a substantial portion of the amount realized, whether or not representing gain, may be taxed as ordinary income due to potential recapture of depreciation and deductions and certain other items. In addition, because the amount realized includes a unitholder's share of our nonrecourse liabilities, if unitholders sell their units, they may incur a tax liability in excess of the amount of cash they receive from the sale.

Tax-exempt entities and non-U.S. persons face unique tax issues from owning common units that may result in adverse tax consequences to them.

Investments in common units by tax-exempt entities, such as employee benefit plans and individual retirement accounts (known as "IRAs"), and non-U.S. persons raise issues unique to them. For example, virtually all of our income allocated to organizations that are exempt from federal income tax, including IRAs and other retirement plans, will be unrelated business taxable income and will be taxable to them. Allocations and/or distributions to non-U.S. persons will be reduced by withholding

taxes imposed at the highest effective tax rate applicable to non-U.S. persons, and each non-U.S. person will be required to file a U.S. federal tax return and pay tax on their share of our taxable income. If you are a tax-exempt entity or a non-U.S. person, you should consult your tax advisor before investing in our common units.

If the IRS contests the federal income tax positions we take, the market for our common units may be adversely impacted and the cost of any IRS contest will reduce our cash available for distribution to our unitholders.

The IRS may adopt positions that differ from the positions we take. It may be necessary to resort to administrative or court proceedings to sustain some or all of the positions we take. A court may not agree with some or all of the positions we take. Any contest by the IRS may materially and adversely impact the market for our common units and the price at which they trade. Our costs of any contest by the IRS will be borne indirectly by our unitholders and our general partner because the costs will reduce our cash available for distribution.

We have subsidiaries that are treated as a corporation for federal income tax purposes and subject to corporate-level income taxes.

Even though we (as a partnership for U.S. federal income tax purposes) are not subject to U.S. federal income tax, some of our operations are currently conducted through subsidiaries that are organized as a corporation for U.S. federal income tax purposes. The taxable income, if any, of such subsidiaries are subject to corporate-level U.S. federal income taxes, which may reduce the cash available for distribution to us and, in turn, to our unitholders. If the IRS or other state or local jurisdictions were to successfully assert that these corporations have more tax liability than we anticipate or legislation was enacted that increased the corporate tax rate, the cash available for distribution could be further reduced. The income tax return filings positions taken by these corporate subsidiaries require significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is also required in assessing the timing and amounts of deductible and taxable items. Despite our belief that the income tax return positions taken by these subsidiaries is fully supportable, certain positions may be successfully challenged by the IRS, state or local jurisdictions.

We will treat each purchaser of our common units as having the same tax benefits without regard to the actual common units purchased. The IRS may challenge this treatment, which could adversely affect the value of the common units.

Because we cannot match transferors and transferees of common units and because of other reasons, we will adopt depreciation and amortization positions that may not conform to all aspects of existing Treasury Regulations. A successful IRS challenge to those positions could adversely affect the amount of tax benefits available to our unitholders. It also could affect the timing of these tax benefits or the amount of gain from unitholders' sale of common units and could have a negative impact on the value of our common units or result in audit adjustments to their tax returns.

We will prorate our items of income, gain, loss and deduction between transferors and transferees of our units each month based upon the ownership of our units on the first day of each month, instead of on the basis of the date a particular unit is transferred. The IRS may challenge this treatment, which could change the allocation of items of income, gain, loss and deduction among our unitholders.

We generally prorate our items of income, gain, loss and deduction between transferors and transferees of our common units each month based upon the ownership of our common units on the first day of each month, instead of on the basis of the date a particular common unit is transferred. Nonetheless, we allocate certain deductions for depreciation of capital additions based upon the date the underlying property is placed in service. The use of this proration method may not be permitted under existing Treasury Regulations. The U.S. Treasury Department has issued proposed Treasury Regulations that provide a safe harbor pursuant to which a publicly-traded partnership may use a similar monthly simplifying convention to allocate tax items among transferor and transferee unitholders. Nonetheless, the proposed regulations do not specifically authorize the use of the proration method we have adopted. If the IRS were to successfully challenge our proration method or new Treasury Regulations were issued, we may be required to change the allocation of items of income, gain, loss, and deduction among our unitholders.

We have adopted certain valuation methodologies in determining unitholder's allocations of income, gain, loss and deduction. The IRS may challenge these methods or the resulting allocations, and such a challenge could adversely affect the value of our common units.

In determining the items of income, gain, loss and deduction allocable to our unitholders, we must routinely determine the fair market value of our respective assets. Although we may from time to time consult with professional appraisers regarding valuation matters, we make many fair market value estimates using a methodology based on the market value of our common units as a means to measure the fair market value of our respective assets. The IRS may challenge these valuation methods and the resulting allocations of income, gain, loss and deduction.

A successful IRS challenge to these methods or allocations could adversely affect the amount, character, and timing of taxable income or loss being allocated to our unitholders. It also could affect the amount of gain from our unitholders' sale of

common units and could have a negative impact on the value of the common units or result in audit adjustments to our unitholders' tax returns without the benefit of additional deductions.

A unitholder whose common units are the subject of a securities loan (e.g., a loan to a “short seller” to cover a short sale of common units) may be considered as having disposed of those common units. If so, he would no longer be treated for tax purposes as a partner with respect to those common units during the period of the loan and may recognize gain or loss from the disposition.

Because there are no specific rules governing the U.S. federal income tax consequences of loaning a partnership interest, a unitholder whose common units are the subject of a securities loan may be considered as having disposed of the loaned units. In that case, the unitholder may no longer be treated for tax purposes as a partner with respect to those common units during the period of the loan and the unitholder may recognize gain or loss from such disposition. Moreover, during the period of the loan, any of our income, gain, loss or deduction with respect to those common units may not be reportable by the unitholder and any cash distributions received by the unitholder as to those common units could be fully taxable as ordinary income. Unitholders desiring to assure their status as partners and avoid the risk of gain recognition from a loan to a short seller should modify any applicable brokerage account agreements to prohibit their brokers from borrowing their common units.

Unitholders will likely be subject to state and local taxes and return filing requirements in states where they do not live as a result of investing in our common units.

In addition to U.S. federal income taxes, our unitholders will likely be subject to other taxes, including state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we conduct business or own property now or in the future, even if they do not live in any of those jurisdictions. We own assets and conduct business in 47 states. Our unitholders may be required to file foreign, state and local income tax returns and pay state and local income taxes in any state in which we now or may conduct business in the future. Further, they may be subject to penalties for failure to comply with those requirements. As we make acquisitions or expand our business, we may own assets or conduct business in additional states or foreign jurisdictions that impose a personal income tax. It is the responsibility of our unitholders to file all U.S. federal, foreign, state and local tax returns.

Item 1B. *Unresolved Staff Comments*

None.

Item 3. *Legal Proceedings*

We are not a party to, and our property is not the subject of, any pending legal proceedings other than ordinary routine litigation incidental to our business. Our operations are subject to a variety of risks and disputes normally incident to our business. As a result, we may, at any given time, be a defendant in various legal proceedings and litigation arising in the ordinary course of business. Please see Items 1 and 2 “Business and Properties — Environmental and Occupational Health and Safety Matters” for a description of our current regulatory matters related to the environment, health and safety. Additionally, the information provided under Note 6 “Commitments and Contingencies” in Part II, Item 8 “Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements” is incorporated herein by reference.

Item 4. *Mine Safety Disclosures*

Not applicable.

PART II

Item 5. *Market for Registrant's Common Equity, Related Unitholder Matters and Issuer Purchases of Equity Securities*

Market Information

Our common units are quoted and traded on the NASDAQ Global Select Market ("NASDAQ") under the symbol "CLMT." The following table shows the low and high sales prices per common unit, as reported by NASDAQ, for the periods indicated. Cash distributions presented below represent amounts declared subsequent to each respective quarter end based on the results of that quarter.

	Low	High	Cash Distribution per Unit ⁽¹⁾
2013:			
First quarter	\$ 31.05	\$ 40.25	\$ 0.68
Second quarter	\$ 31.60	\$ 38.10	\$ 0.685
Third quarter	\$ 26.67	\$ 36.91	\$ 0.685
Fourth quarter	\$ 24.84	\$ 31.83	\$ 0.685
2014:			
First quarter	\$ 24.23	\$ 30.60	\$ 0.685
Second quarter	\$ 25.74	\$ 32.81	\$ 0.685
Third quarter	\$ 26.60	\$ 33.30	\$ 0.685
Fourth quarter	\$ 18.66	\$ 29.70	\$ 0.685

⁽¹⁾ We also paid cash distributions to our general partner with respect to its 2% general partner interest and, to the extent distributions exceeded \$0.495 per unit, its incentive distribution rights, as described below in "Cash Distribution Policy — General Partner Interest and Incentive Distribution Rights."

As of March 2, 2015, there were approximately 39 unitholders of record of our common units. The actual number of unitholders is greater than the number of holders of record. As of March 2, 2015, there were 69,760,218 common units outstanding. The last reported sale price of our common units by NASDAQ on February 27, 2015 was \$27.84.

Cash Distribution Policy

General. Within 45 days after the end of each quarter, we distribute our available cash (as defined in our partnership agreement) to unitholders of record on the applicable record date.

Available Cash. Available cash generally means, for any quarter, all cash on hand at the end of the quarter:

- less the amount of cash reserves established by our general partner to:
 - provide for the proper conduct of our business;
 - comply with applicable law, any of our debt instruments or other agreements; and
 - provide funds for distributions to our unitholders and to our general partner for any one or more of the next four quarters.
- plus all cash on hand on the date of determination of available cash for the quarter resulting from working capital borrowings made after the end of the quarter for which the determination is being made. Working capital borrowings are generally borrowings that will be made under our revolving credit facility and in all cases are used solely for working capital purposes or to pay distributions to partners.

Intent to Distribute the Minimum Quarterly Distribution. We distribute to the holders of common units on a quarterly basis at least the minimum quarterly distribution of \$0.45 per unit, or \$1.80 in aggregate per year, to the extent we have sufficient cash from our operations after establishment of cash reserves and payment of fees and expenses, including payments to our general partner. However, there is no guarantee that we will pay the minimum quarterly distribution on the units in any quarter. Even if our cash distribution policy is not modified or revoked, the amount of distributions paid under our policy and the decision to make any distribution is determined by our general partner, taking into consideration the terms of our partnership agreement. We will be prohibited from making any distributions to unitholders if it would cause an event of default, or an event of default exists, under our debt instruments, including our revolving credit agreement and the indentures governing

our 2020 Notes, 2021 Notes and 2022 Notes. Please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt and Credit Facilities” for a discussion of the restrictions in our debt instruments that restrict our ability to make distributions. On February 13, 2015, we paid a quarterly cash distribution of \$0.685 per unit on all outstanding units totaling approximately \$52.7 million for the quarter ended December 31, 2014 to all unitholders of record as of the close of business on February 3, 2015.

General Partner Interest and Incentive Distribution Rights. Our general partner is entitled to 2% of all quarterly distributions since inception that we make prior to our liquidation. This general partner interest is represented by 1,417,392 general partner units. Our general partner has the right, but not the obligation, to contribute a proportionate amount of capital to us to maintain its current general partner interest. The general partner’s 2% interest in these distributions may be reduced if we issue additional units in the future and our general partner does not contribute a proportionate amount of capital to us to maintain its 2% general partner interest. Our general partner also currently holds incentive distribution rights that entitle it to receive increasing percentages, up to a maximum of 50%, of the cash we distribute from operating surplus (as defined in our partnership agreement) in excess of \$0.495 per unit. The maximum distribution of 50% includes distributions paid to our general partner on its 2% general partner interest, and assumes that our general partner maintains its general partner interest at 2%. The maximum distribution of 50% does not include any distributions that our general partner may receive on units that it owns. Our general partner earned incentive distribution rights of approximately \$15.4 million and \$14.7 million during the years ended December 31, 2014 and 2013, respectively.

Our general partner is entitled to incentive distributions if the amount we distribute to unitholders with respect to any quarter exceeds specified target levels shown below:

	Total Quarterly Distribution Target Amount Per Common Unit	Marginal Percentage Interest in Distributions	
		Unitholders	General Partner
Minimum Quarterly Distribution	\$0.45	98%	2%
First Target Distribution	up to \$0.495	98%	2%
Second Target Distribution	above \$0.495 up to \$0.563	85%	15%
Third Target Distribution	above \$0.563 up to \$0.675	75%	25%
Thereafter	above \$0.675	50%	50%

Equity Compensation Plans

The equity compensation plan information required by Item 201(d) of Regulation S-K in response to this Item 5 is incorporated by reference into Part III, Item 12 “Security Ownership of Certain Beneficial Owners and Management and Related Unitholder Matters” of this Annual Report.

Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

None.

Item 6. Selected Financial Data

The following table shows selected historical consolidated financial and operating data of the Company. The selected historical consolidated financial data as of and after December 31, 2014, 2013, 2012 and 2011 includes the operations acquired as part of the acquisitions of Superior, Missouri, Calumet Packaging, Royal Purple, Montana, San Antonio, Bel-Ray, United Petroleum, Anchor and SOS from their respective dates of acquisition, September 30, 2011, January 3, 2012, January 6, 2012, July 3, 2012, October 1, 2012, January 2, 2013, December 10, 2013, February 28, 2014, March 31, 2014 and August 1, 2014.

The following table includes the non-GAAP financial measures EBITDA, Adjusted EBITDA and Distributable Cash Flow. For a reconciliation of EBITDA, Adjusted EBITDA and Distributable Cash Flow to net income (loss) and net cash provided by operating activities, our most directly comparable financial performance and liquidity measures calculated in accordance with U.S. generally accepted accounting principles (“GAAP”), please read “—Non-GAAP Financial Measures.”

We derived the information in the following table from, and the information should be read together with, and is qualified in its entirety by reference to, the historical consolidated financial statements and the accompanying notes included in Item 8 “Financial Statements and Supplementary Data” except for operating data, such as sales volume, feedstock runs and facility production. The following table also should be read together with Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Year Ended December 31,

	2014	2013	2012	2011	2010
	(In millions)				
Summary of Operations Data:					
Sales	\$ 5,791.1	\$ 5,421.4	\$ 4,657.3	\$ 3,134.9	\$ 2,190.8
Cost of sales	5,261.4	5,011.4	4,144.1	2,860.8	1,992.1
Gross profit	529.7	410.0	513.2	274.1	198.7
Operating costs and expenses:					
Selling	149.6	62.6	41.6	12.2	8.4

Total partners' capital	\$ 810.2	\$ 1,062.8	\$ 889.8	\$ 728.9	\$ 398.3
Cash Flow Data:					
Net cash flow provided by (used in):					
Operating activities	\$ 226.8	\$ 39.1	\$ 380.1	\$ 63.8	\$ 134.1
Investing activities	\$ (658.8)	\$ (370.3)	\$ (624.2)	\$ (460.4)	\$ (34.7)
Financing activities	\$ 319.4	\$ 420.1	\$ 276.2	\$ 396.7	\$ (99.4)
Other Financial Data:					
EBITDA	\$ 226.3	\$ 233.1	\$ 383.7	\$ 170.9	\$ 108.1
Adjusted EBITDA	\$ 305.9	\$ 241.5	\$ 404.6	\$ 211.0	\$ 138.5
Distributable Cash Flow	\$ 142.9	\$ 18.5	\$ 281.1	\$ 127.2	\$ 76.2
Operating Data (bpd):⁽¹⁾					
Total sales volume ⁽²⁾	122,852	116,477	97,789	66,134	55,668
Total feedstock runs ⁽³⁾	117,427	110,237	97,600	69,295	55,957
Total facility production ⁽⁴⁾	114,146	106,592	96,172	70,909	57,314

⁽¹⁾ Operating data excludes operations of the oilfield services segment.

⁽²⁾ Total sales volume includes sales from the production at our facilities and certain third-party facilities pursuant to supply and/or processing agreements, sales of inventories and the resale of crude oil to third party customers. Total sales volume includes the sale of purchased fuel product blendstocks, such as ethanol and biodiesel, as components of finished fuel products in our fuel products segment sales.

⁽³⁾ Total feedstock runs represent the bpd of crude oil and other feedstocks processed at our facilities and at certain third-party facilities pursuant to supply and/or processing agreements.

⁽⁴⁾ Total facility production represents the bpd of specialty products and fuel products yielded from processing crude oil and other feedstocks at our facilities and at certain third-party facilities pursuant to supply and/or processing agreements. The difference between total facility production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

Non-GAAP Financial Measures

We include in this Annual Report the non-GAAP financial measures EBITDA, Adjusted EBITDA and Distributable Cash Flow, and provide reconciliations of EBITDA, Adjusted EBITDA and Distributable Cash Flow to net income (loss) and net cash provided by operating activities, our most directly comparable financial performance and liquidity measures calculated and presented in accordance with GAAP.

EBITDA, Adjusted EBITDA and Distributable Cash Flow are used as supplemental financial measures by our management and by external users of our financial statements such as investors, commercial banks, research analysts and others, to assess:

- the financial performance of our assets without regard to financing methods, capital structure or historical cost basis;
- the ability of our assets to generate cash sufficient to pay interest costs and support our indebtedness;
- our operating performance and return on capital as compared to those of other companies in our industry, without regard to financing or capital structure; and
- the viability of acquisitions and capital expenditure projects and the overall rates of return on alternative investment opportunities.

We believe that these non-GAAP measures are useful to analysts and investors as they exclude transactions not related to our core cash operating activities and provide metrics to analyze our ability to pay distributions. We believe that excluding these transactions allows investors to meaningfully analyze trends and performance of our core cash operations.

We define EBITDA for any period as net income (loss) plus interest expense (including debt issuance and extinguishment costs), income taxes and depreciation and amortization.

We define Adjusted EBITDA for any period as: (1) net income (loss) plus (2)(a) interest expense; (b) income taxes; (c) depreciation and amortization; (d) unrealized losses from mark to market accounting for hedging activities; (e) realized gains under derivative instruments excluded from the determination of net income (loss); (f) non-cash equity based compensation expense and other non-cash items (excluding items such as accruals of cash expenses in a future period or amortization of a prepaid cash expense) that were deducted in computing net income (loss); (g) debt refinancing fees, premiums and penalties and (h) all extraordinary, unusual or non-recurring items of gain or loss, or revenue or expense; minus (3) (a) unrealized gains from mark to market accounting for hedging activities; (b) realized losses under derivative instruments excluded from the determination of net income and (c) other non-recurring expenses and unrealized items that reduced net income (loss) for a prior period, but represent a cash item in the current period.

We define Distributable Cash Flow for any period as Adjusted EBITDA less replacement and environmental capital expenditures, turnaround costs, cash interest expense (consolidated interest expense less non-cash interest expense) and income tax expense. Distributable Cash Flow is used by us and our investors and analysts to analyze our ability to pay distributions.

The definitions of Adjusted EBITDA and Distributable Cash Flow that are presented in this Annual Report have been updated to reflect the calculation of “Consolidated Cash Flow” contained in the indentures governing our 2020 Notes, 2021 Notes and 2022 Notes (as defined in this Annual Report). We are required to report Consolidated Cash Flow to the holders of our 2020 Notes, 2021 Notes and 2022 Notes and Adjusted EBITDA to the lenders under our revolving credit facility, and these measures are used by them to determine our compliance with certain covenants governing those debt instruments. Adjusted EBITDA and Distributable Cash Flow that are presented in this Annual Report for prior periods have been updated to reflect the use of the new calculations. Please read Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt and Credit Facilities” for additional details regarding the covenants governing our debt instruments.

EBITDA, Adjusted EBITDA and Distributable Cash Flow should not be considered alternatives to net income (loss), operating income (loss), net cash provided by (used in) operating activities or any other measure of financial performance presented in accordance with GAAP. In evaluating our performance as measured by EBITDA, Adjusted EBITDA and Distributable Cash Flow, management recognizes and considers the limitations of these measurements. EBITDA, Adjusted EBITDA and Distributable Cash Flow do not reflect our obligations for the payment of income taxes, interest expense or other obligations such as capital expenditures. Accordingly, EBITDA, Adjusted EBITDA and Distributable Cash Flow are only three of the measurements that management utilizes. Moreover, our EBITDA, Adjusted EBITDA and Distributable Cash Flow may not be comparable to similarly titled measures of another company because all companies may not calculate EBITDA, Adjusted EBITDA and Distributable Cash Flow in the same manner. The following tables present a reconciliation of both net income (loss) to EBITDA, Adjusted EBITDA and Distributable Cash Flow, and Distributable Cash Flow, Adjusted EBITDA and EBITDA to net cash provided by operating activities, our most directly comparable GAAP financial performance and liquidity measures, for each of the periods indicated.

	Year Ended December 31,

(1) Replacement capital expenditures are defined as those capital expenditures which do not increase operating capacity or reduce operating costs and exclude turnaround costs. Environmental capital expenditures include asset additions to meet or exceed environmental and operating regulations.

(2) Represents consolidated interest expense less non-cash interest expense.

(3) Includes a \$12.4 million gain related to the early settlement of certain derivative instruments and \$5.8 million of non-cash derivative gains included in net loss in 2014.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The historical consolidated financial statements included in this Annual Report reflect all of the assets, liabilities and results of operations of the Company. The following discussion analyzes the financial condition and results of operations of the Company for the years ended December 31, 2014, 2013 and 2012. For the year ended December 31, 2014, the Company realigned its reportable segments for financial reporting purposes as a result of the Anchor and SOS Acquisitions in 2014 resulting in a new segment, oilfield services. This reporting change did not impact segment reporting for 2012 or 2013 or the Company's consolidated results for any year. For the years ended December 31, 2013 and 2014, the Company realigned its reportable segments for financial reporting purposes as a result of the significant growth in the Company. The change primarily represented reporting asphalt produced at the Shreveport, Superior and Montana refineries in the fuel products segment. Prior to this change, asphalt was reported as part of the specialty products segment. While this reporting change did not impact the Company's consolidated results, segment data for previous years has been restated and is consistent with the current year presentation throughout the financial statements and the accompanying notes. Unitholders should read the following discussion and analysis of the financial condition and results of operations of the Company in conjunction with the historical consolidated financial statements and notes of the Company included elsewhere in this Annual Report.

Overview

We are a leading independent producer of high-quality, specialty hydrocarbon products in North America. We are headquartered in Indianapolis, Indiana and own specialty and fuel products facilities primarily located in northwest Louisiana, northwest Wisconsin, northern Montana, western Pennsylvania, Texas, New Jersey, eastern Missouri and North Dakota. We own and lease oilfield services locations in Texas, Oklahoma, Louisiana, Arkansas, Colorado, Utah, Wyoming, Montana, New Mexico, New York, North Dakota, Pennsylvania and Ohio. We own and lease additional facilities, primarily related to production and distribution of specialty, fuel and oilfield services products, throughout the United States ("U.S."). Our business is organized into three segments: specialty products, fuel products and oilfield services. In our specialty products segment, we process crude oil and other feedstocks into a wide variety of customized lubricating oils, white mineral oils, solvents, petrolatums and waxes. Our specialty products are sold to domestic and international customers who purchase them primarily as raw material components for basic industrial, consumer and automotive goods. We also blend and market specialty products through our Royal Purple, Bel-Ray, TruFuel and Quantum brands. In our fuel products segment, we process crude oil into a variety of fuel and fuel-related products, including gasoline, diesel, jet fuel, asphalt and heavy fuel oils, as well as reselling purchased crude oil to third party customers. Our oilfield services segment manufactures and markets products and provides oilfield services including drilling fluids, completion fluids, production chemicals and solids control services to the oil and gas exploration industry throughout the U.S.

2014 Update

Financial Results

During 2014, each of our key performance metrics, including Adjusted EBITDA (as defined in "Non-GAAP Financial Measures") and Distributable Cash Flow ("DCF") (as defined in "Non-GAAP Financial Measures"), increased significantly when compared to 2013, driven mainly by improved plant reliability, attractive fuels refining economics and stable to growing margins within our specialty products segment.

Adjusted EBITDA was \$305.9 million in 2014, an increase of 26.7% from 2013. Distributable Cash Flow increased from \$18.5 million in 2013 to \$142.9 million in 2014, due to a combination of increased Adjusted EBITDA and a marked decline in turnaround capital spending. During 2014, our specialty products segment represented 72.2% of total Adjusted EBITDA, our fuel products segment represented 16.3% of Adjusted EBITDA and our oilfield services segment represented 11.5% of Adjusted EBITDA. We seek to weight our company-wide Adjusted EBITDA toward high margin, stable volume specialty products, given our goal of stable quarterly distributions. In 2014, Adjusted EBITDA generated from our specialty products and fuel products segments increased by 13.5% and 6.4%, respectively, when compared to the prior year.

Our full-year Adjusted EBITDA results included a lower of cost or market ("LCM") inventory adjustment of \$92.1 million; \$44.8 million of early settlements of second quarter 2015 through calendar year 2016 fixed priced crack spread derivative instruments; \$31.8 million of losses related to liquidation of last-in, first-out ("LIFO") inventory layers and an \$18.2 million gain on RINs sales related to small refinery hardship exemptions granted by the EPA at our San Antonio and Shreveport refineries for the full year 2013.

Our specialty products segment generated a gross profit per barrel of \$41.07 in 2014, versus \$33.47 in the prior year, due primarily to the decreased cost of feedstocks, higher sales price per barrel and incremental gross profit generated from the Bel-Ray and United Petroleum Acquisitions, partially offset by decreased sales volume. Given the inherently high barriers to entry evident in many of the specialty formulations we produce, the specialty products segment enjoyed significant expansion in per barrel margins exiting 2014, following a significant decline in the cost of crude oil per barrel during the fourth quarter.

Our fuel products segment generated a gross profit per barrel of \$0.96 in 2014, versus \$2.67 in the prior year primarily due to a year-over-year decline in benchmark refined product margins as a result of a narrowing in the discount between West Texas Intermediate (“WTI”) and select crude oil feedstocks processed at our fuels refineries, partially offset by improved refining system reliability.

For benchmarking purposes, we compare our per barrel refined fuel products margin to the U.S. Gulf Coast 2/1/1 crack spread (“Gulf Coast crack spread”). The Gulf Coast crack spread represents the approximate gross margin per barrel that results from processing two barrels of crude oil into one barrel of gasoline and one barrel of ultra-low sulfur diesel fuel. The Gulf Coast crack spread is calculated using the first-month futures price of NYMEX WTI crude oil, the price of U.S. Gulf Coast Pipeline 87 Octane Conventional Gasoline and U.S. Gulf Coast Pipeline Ultra-Low Sulfur Diesel (“ULSD”).

In 2014, the Gulf Coast crack spread averaged more than \$17 per barrel, or approximately 21% less than in 2013. The benchmark gasoline and diesel margins both declined on a year over year basis during 2014, although the diesel crack spread remained elevated as compared to long-term historical levels. The market ULSD crack spread averaged \$21 per barrel during 2014, compared to \$27 per barrel in the prior year period. The market gasoline crack spread averaged \$13 per barrel during 2014, compared to approximately \$27 in the prior year.

We refer to our fuel products segment gross profit per barrel divided by the Gulf Coast crack spread as the “capture rate.” The capture rate is a means of measuring refinery system gross profit per barrel against the benchmark crack spread. In 2014, our capture rate was approximately 6%, versus approximately 12% in 2013. There are several factors that impact our refined product margin when compared to the benchmark crack spread. For example, several of our fuel products refineries produce asphalt and other residual products that may carry an average sales price below our feedstock costs. Alternatively, many of our fuel products refineries purchase select quantities of crude oil at a discount to NYMEX WTI, which helps support a higher capture rate, relative to the crack spread benchmark. Based on our system wide crude purchasing behaviors and overall production slate, we believe the Gulf Coast crack spread remains a meaningful indicator in tracking directional shifts in refined product margins.

Our oilfield services segment, which includes Anchor Drilling Fluids (“Anchor”) and Specialty Oilfield Solutions (“SOS”), services the U.S. oil and gas exploration and production (“E&P”) industry. Since the acquisitions of Anchor and SOS in 2014, the oilfield services segment generated Adjusted EBITDA of \$35.1 million.

Operational Reliability

We seek to operate each of our assets safely, reliably and in compliance with all regulatory guidelines. While planned facility maintenance is a requisite part of being in the business of specialty and fuel products refining, some years involve more maintenance than others. Generally speaking, our fuel products refineries conduct significant planned maintenance “turnarounds” once every four to five years; our last turnaround cycle lasted between 2013 and the first half of 2014. Having concluded maintenance at each of our fuel facilities until the next staggered turnaround cycle which we expect to begin in 2018, we anticipate that our fuel refineries should operate at optimal levels until the next round of planned maintenance. Importantly, we expect the next turnaround cycle will involve staggered maintenance at each fuel products refinery over a multi-year period in order to minimize the financial impact of the planned maintenance in a shorter period of time.

Exiting our most recent turnaround cycle, our fuel products refineries have performed well. In 2014, production of fuel products increased by 11.1% when compared to 2013. Our Superior, Montana and San Antonio refineries each reported record total feedstock runs in 2014 versus prior years while under our ownership.

Capital Markets Activity

On March 26, 2014, Calumet priced \$900.0 million of 6.50% notes due 2021. The offering was upsized to \$900.0 million from the original offering size of \$850 million. We used a portion of the net proceeds from the private placement to fund the approximately \$223.6 million purchase price of Anchor and the redemption of all \$500.0 million aggregate principal amount of our outstanding 9.375% senior unsecured notes due 2019. The remaining funds were used for general partnership purposes, including planned capital expenditures at our facilities.

On March 10, 2014, we entered into an Equity Placement Agreement with various sales agents. The Equity Placement Agreement provides a cost-effective means for us to conduct at-the-market equity offerings from time to time using our shelf registration statement. Our board of directors has authorized a \$300.0 million at the market (“ATM”) equity distribution program. Under this authorization, we have the option to sell units into the open market on a ratable basis at the current available market price. During 2014, we sold approximately \$3.6 million in limited partner common units under the ATM authorization.

Quarterly Cash Distribution

On January 23, 2015, we declared a regular quarterly cash distribution that was paid on February 13, 2015 to unitholders of record as of the close of business on February 3, 2015. For the full year 2014, we paid total cash distributions of \$210.2 million, versus \$201.6 million in 2013, representing an annualized cash distribution of \$2.74 per unit.

Liquidity Update

On December 31, 2014, we had availability under our revolving credit facility of approximately \$310.8 million, based on a \$575.9 million borrowing base, \$114.3 million in outstanding standby letters of credit and \$150.8 million in outstanding borrowings. In addition, we had \$8.5 million of cash on hand as of December 31, 2014. We believe we will continue to have ample liquidity from cash on hand, cash flow from operations, borrowing capacity under our revolving credit facility and adequate access to capital markets to meet our financial commitments, minimum quarterly distributions to unitholders, debt service obligations, contingencies and anticipated capital expenditures.

On July 14, 2014, we amended and restated our revolving credit agreement. The amended agreement increased the maximum availability of credit under the revolving credit facility by \$150.0 million to \$1.0 billion, while providing for a reduction in borrowing rates and increased covenant flexibility. The facility matures in July 2019.

Renewable Fuel Standard Update

We, along with the broader refining industry, remain subject to compliance costs under the Renewable Fuel Standard (“RFS”). Under the regulation of the Environmental Protection Agency (“EPA”), the RFS provides annual requirements for the total volume of renewable transportation fuels which are mandated to be blended into finished petroleum fuels. If a refiner does not meet its required annual Renewable Volume Obligation (“RVO”), the refiner can purchase blending credits in the open market, referred to as Renewable Identification Numbers (“RINs”).

In October 2014, the EPA granted our Shreveport and San Antonio refineries a “small refinery exemption” under the RFS for the full year 2013, as provided for under the Clean Air Act. The EPA determined that for the full year 2013, compliance with the RFS would represent a “disproportionate economic hardship” for these two refineries which, in turn, led to a significant reduction in our requirement to purchase RINs at these two refineries. We intend to reapply for the small refinery exemption at selected refineries for the full year 2014 during early 2015 but can provide no assurances that we will be granted small refinery exemptions for any of our refineries in 2014 or future years.

For the full year 2015, excluding the potential benefit of small refinery exemptions at one or more of refineries that might be granted to us by the EPA at a later time, we expect our gross estimated annual RINs obligation, which includes RINs that are required to be secured through either blending or through the purchase of RINs in the open market, to be in the range of 90 million to 100 million RINs, versus 87 million RINs in 2014. We record our outstanding RINs obligation as a balance sheet liability. This liability is marked-to-market on a quarterly basis to reflect the market price of RINs on the last day of each quarter.

Organic Growth Projects Update

We seek to grow our business through a combination of targeted strategic acquisitions and investments in organic growth projects. In some cases, the acquisitions we complete lead to fresh organic growth opportunities, while in other instances, we seek to capitalize on emerging technologies or inefficient markets through greenfield investments that offer us an opportunity to establish a market leadership position.

Currently, we are engaged in a multi-year capital spending campaign that includes four high-return organic growth projects. These projects have forecasted annualized rates of return of 20% to 30% and stand to provide a significant base of incremental EBITDA growth for us by early 2016, at which time all four projects are scheduled to have reached completion.

Through December 31, 2014, we had invested approximately \$440.0 million in the organic growth campaign. The current projected cost of the organic growth campaign is approximately \$640.0 million to \$665.0 million, up from the prior forecast of approximately \$600.0 million. Revised cost estimates for the total campaign are attributable to higher project costs related to the construction of the Dakota Prairie refinery and the San Antonio refinery solvents expansion project and static project costs on the Missouri esters plant expansion and on the Montana refinery expansion.

Great Falls, Montana Refinery Expansion Project

We are engaged in a project designed to increase production capacity at our Great Falls, Montana refinery from 10,000 bpd to 25,000 bpd. This project will allow us to capitalize on local access to cost-advantaged Bow River crude oil, while producing additional fuels and refined products for delivery into the regional market. The scope of this project currently includes the installation of a new crude unit that will process 25,000 bpd of crude oil and other feedstocks and a 25,000 bpd hydrocracker. We currently estimate that this project will be completed during the first quarter of 2016.

The current estimated total cost of the expansion project is approximately \$400.0 million, while the total estimated annual EBITDA contribution from this project is \$70 million to \$90 million, subject to market conditions.

Dakota Prairie (North Dakota) Refinery

Together with our 50/50 joint venture partner, MDU Resources Group Inc. (“MDU”), we are nearing completion on the construction of a 20,000 bpd diesel refinery located in Dickinson, North Dakota. The refinery, which is expected to be completely supplied with locally-sourced Bakken crude oil, is currently expected to commence operations during the second quarter of 2015.

The current estimated total cost of plant construction to the joint venture is approximately \$425.0 million to \$435.0 million, versus the prior estimate of approximately \$400.0 million. We expect to fund our portion of this project through estimated cash contributions of \$137.5 million to \$142.5 million, together with \$75.0 million from an unsecured syndicated term loan facility with the joint venture as the borrower, which is expected to be repaid by us through our allocation of profits from the joint venture. The total estimated annual EBITDA contribution from this project is estimated to be \$60 million to \$70 million, subject to market conditions. Both the project cost and EBITDA contribution are to be split 50/50 between the joint venture partners.

San Antonio, Texas Refinery Solvents Project

We have commenced a project that will take a portion of our San Antonio refinery’s ultra-low sulfur diesel and jet fuel production and convert it into up to 3,000 bpd of higher margin solvents that will meet customer requirements for low aromatic content. Solvents production will supplement the refinery’s current fuels production slate and will be targeted toward the drilling fluid, paints and coating markets.

This project is currently expected to reach completion during the fourth quarter 2015. The current estimated total construction cost of the solvents project is approximately \$65.0 million to \$75.0 million, while the total estimated annual EBITDA contribution from this project is estimated to be approximately \$20.0 million, subject to market conditions.

Missouri Esters Plant Expansion Project

We continue to progress on a project designed to more than double the production capacity of our Louisiana, Missouri esters plant from 35 million to 75 million pounds per year. We currently anticipate this project should reach completion during the second quarter of 2015. Esters are a key base stock used in the aviation, refrigerant and automotive lubricants markets.

The current estimated total construction cost of the esters plant expansion is approximately \$40.0 million to \$45.0 million, while the total estimated annual EBITDA contribution from this project is estimated to be \$8.0 million to \$12.0 million, subject to market conditions.

Acquisitions

Acquisition	Acquisition Date	Description	Aggregate Purchase Price ⁽¹⁾
Specialty Oilfield Solutions, Ltd. assets (“SOS Acquisition”)	August 1, 2014	A full-service drilling fluids and solids control company with primary operations in the Eagle Ford, Marcellus and Utica shale formations.	\$ 29.6
ADF Holdings, Inc. (“Anchor Acquisition”)	March 31, 2014	An independent provider and marketer of drilling fluids, completion fluids and production chemicals to the oil and gas exploration industry.	\$ 223.6 ⁽²⁾
United Petroleum, LLC assets (“United Petroleum Acquisition”)	February 28, 2014	A marketer and distributor of high performance lubricants.	\$ 10.4
Bel-Ray Company, LLC (“Bel-Ray Acquisition”)	December 10, 2013	A manufacturer and global distributor of high-performance lubricants and greases.	\$ 53.6 ⁽³⁾
Murphy Oil USA, Inc. logistics assets (“Crude Oil Logistics Acquisition”)	August 9, 2013	Crude oil loading facilities and related assets in North Dakota.	\$ 6.2
NuStar Energy L.P.’s San Antonio, Texas refinery (“San Antonio Acquisition”)	January 2, 2013	A refinery in San Antonio, Texas with total crude oil throughput capacity of 17,500 bpd and produces jet fuel, diesel, gasoline and other fuel products.	\$ 117.9
Montana Refining Company, Inc. (“Montana Acquisition”)	October 1, 2012	A refinery in Great Falls, Montana with total crude throughput capacity of 10,000 bpd and produces gasoline, diesel, jet fuel and asphalt which are marketed primarily into local markets in Washington, Montana, Idaho and Alberta, Canada.	\$ 191.6 ⁽⁴⁾
Royal Purple, Inc. (“Royal Purple Acquisition”)	July 3, 2012	A leading independent formulator and marketer of premium industrial and consumer lubricants to a diverse customer base across several large markets including oil and gas, chemicals and refining, power generation, manufacturing and transportation, food and drug manufacturing and automotive aftermarket.	\$ 331.2
TruSouth Oil, LLC, renamed Calumet Packaging, LLC (“Calumet Packaging Acquisition”)	January 6, 2012	A specialty petroleum packaging and distribution company located in Shreveport, Louisiana.	\$ 26.9
Hercules Incorporated (“Missouri Acquisition”)	January 3, 2012	An aviation and refrigerant lubricants business (a polyolester based synthetic lubricants business) and a manufacturing facility located in Louisiana, Missouri.	\$ 19.6

⁽¹⁾ Aggregate purchase price is net of cash acquired and includes working capital.

⁽²⁾ Aggregate purchase price is net of cash acquired and excludes debt assumed.

⁽³⁾ Aggregate purchase price is net of cash acquired and net of cash acquired and subject to certain other adjustments, including tax adjustments.

⁽⁴⁾ Aggregate purchase price is net of cash acquired and an estimated \$27.6 million of income taxes due to the conversion to a Delaware limited liability company.

Key Performance Measures

Our sales and net income are principally affected by the price of crude oil, demand for specialty products, fuel products and oilfield products and services, prevailing crack spreads for fuel products, the price of natural gas used as fuel in our operations and our results from derivative instrument activities.

Our primary raw materials are crude oil and other specialty feedstocks and our primary outputs are specialty petroleum products, fuel products and oilfield services products. The prices of crude oil, specialty products, fuel products and oilfield services are subject to fluctuations in response to changes in supply, demand, market uncertainties and a variety of additional factors beyond our control. We monitor these risks and enter into physical contracts and derivative instruments designed to mitigate the impact of commodity price fluctuations on our business. The primary purpose of our commodity risk management activities is to economically hedge our cash flow exposure to commodity price risk so that we can meet our cash distribution, debt service and capital expenditure requirements despite fluctuations in crude oil and fuel products prices. Please refer to Part II, Item 7A “Quantitative and Qualitative Disclosures About Market Risk — Commodity Price Risk” for detailed information regarding our derivative instruments and our commodity price risk.

As of December 31, 2014, we have hedged refining margins, or crack spreads, on approximately 1.4 million barrels of fuel products through December 2016 at an average refining margin of \$24.04 per barrel with average refining margins ranging from a low of \$13.18 per barrel in the first quarter of 2015 to a high of \$28.03 per barrel in second quarter of 2015. Please refer to Note 8 “Derivatives” under Part II, Item 8 “Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements” and Part II, Item 7A “Quantitative and Qualitative Disclosures About Market Risk — Commodity Price Risk” for detailed information regarding our derivative instruments and our commodity price risk.

Our management uses several financial and operational measurements to analyze our performance. These measurements include the following:

- sales volumes;
- production yields;
- specialty products, fuel products and oilfield services segment gross profit; and
- specialty products, fuel products and oilfield services segment Adjusted EBITDA.

Sales volumes. We view the volumes of specialty products and fuel products sold as an important measure of our ability to effectively utilize our operating assets. Our ability to meet the demands of our customers is driven by the volumes of crude oil and feedstocks that we run at our facilities. Higher volumes improve profitability both through the spreading of fixed costs over greater volumes and the additional gross profit achieved on the incremental volumes.

Production yields. In order to maximize our gross profit and minimize lower margin by-products, we seek the optimal product mix for each barrel of crude oil we refine, or feedstocks we, or third parties, process, which we refer to as production yield.

Specialty products, fuel products and oilfield services segment gross profit. Specialty products, fuel products and oilfield services gross profit are important measures of our ability to maximize the profitability of our specialty products, fuel products and oilfield services segments. We define gross profit as sales less the cost of crude oil and other feedstocks and other production-related and service-related expenses, the most significant portion of which includes labor, plant fuel, utilities, contract services, maintenance, depreciation and processing materials. We use gross profit as an indicator of our ability to manage our business during periods of crude oil and natural gas price fluctuations, as the prices of our specialty products and fuel products generally do not change immediately with changes in the price of crude oil and natural gas. The increase in selling prices typically lags behind the rising costs of crude oil feedstocks for specialty products. Other than plant fuel, production-related expenses generally remain stable across broad ranges of specialty products and fuel products throughput volumes, but can fluctuate depending on maintenance activities performed during a specific period.

Our fuel products segment gross profit may differ from standard U.S. Gulf Coast, Group 3, PADD 4 Billings, Montana or 3/2/1 and 2/1/1 market crack spreads due to many factors, including derivative activities to hedge both our fuel products segment sales and the cost of crude oil reflected in gross profit, our fuel products mix as shown in our production table being different than the ratios used to calculate such market crack spreads, operating costs including fixed costs and actual crude oil costs differing from market indices and our local market pricing differentials for fuel products in the Shreveport, Louisiana, San Antonio, Texas, Superior, Wisconsin and Great Falls, Montana vicinities as compared to U.S. Gulf Coast, Group 3 and PADD 4 Billings, Montana postings.

Specialty products, fuel products and oilfield services segment Adjusted EBITDA. We believe that specialty products, fuel products and oilfield services segment Adjusted EBITDA measures are useful as they exclude transactions not related to our core cash operating activities and provide metrics to analyze our ability to pay distributions to our unitholders as Adjusted EBITDA is a component in the calculation of distributable cash flow and allows us to meaningfully analyze the trends and performance of our core cash operations as well as make decisions regarding the allocation of resources to segments.

In addition to the foregoing measures, we also monitor our selling and general and administrative expenditures.

Results of Operations

The following table sets forth information about our combined operations, excluding the results of operations of Anchor and SOS. Facility production volume differs from sales volume due to changes in inventories and the sale of purchased fuel product blendstocks such as ethanol and biodiesel and the resale of crude oil in our fuel products segment. The table includes the results of operations at our Missouri facility commencing January 3, 2012, Calumet Packaging facility commencing January 6, 2012, Royal Purple facility commencing July 3, 2012, Montana refinery commencing October 1, 2012, San Antonio refinery commencing January 2, 2013, Bel-Ray facility commencing December 10, 2013 and United Petroleum assets commencing February 28, 2014:

	Year Ended December 31,		
	2014	2013	2012
	(In bpd)		
Total sales volume ⁽¹⁾	122,852	116,477	97,789
Total feedstock runs ⁽²⁾	117,427	110,237	97,600
Facility production: ⁽³⁾			
Specialty products:			
Lubricating oils	11,836	13,247	14,524
Solvents	8,934	8,759	9,332
Waxes	1,510	1,443	1,280
Packaged and synthetic specialty products ⁽⁴⁾	1,754	1,481	1,351
Other	1,829	2,192	3,084
Total specialty products	25,863	27,122	29,571
Fuel products:			
Gasoline	34,221	29,374	24,394
Diesel	27,074	26,015	22,438
Jet fuel	4,799	4,105	4,325
Asphalt, heavy fuel oils and other	22,189	19,976	15,444
Total fuel products	88,283	79,470	66,601
Total facility production ⁽³⁾	114,146	106,592	96,172

- ⁽¹⁾ Total sales volume includes sales from the production at our facilities and certain third-party facilities pursuant to supply and/or processing agreements, sales of inventories and the resale of crude oil to third party customers. Total sales volume includes the sale of purchased fuel product blendstocks, such as ethanol and biodiesel, as components of finished fuel products in our fuel products segment sales.

The increase in total sales volume in 2014 compared to 2013 is due primarily to increased production at the Montana and Superior refineries as a result of turnaround activity in 2013, increased production at the San Antonio refinery as a result of the crude oil unit expansion completed in December 2013 and incremental sales volume from the Bel-Ray Acquisition, partially offset by decreased production at the Shreveport refinery as a result of extended turnaround activity in 2014.

The increase in total sales volume in 2013 compared to 2012 is due primarily to incremental sales of fuel products, asphalt and packaged and synthetic specialty products resulting from the Royal Purple, Montana and San Antonio Acquisitions, partially offset by decreased sales of lubricating oils, asphalt and fuel products from the Shreveport and Superior refineries.

- ⁽²⁾ Total feedstock runs represent the bpd of crude oil and other feedstocks processed at our facilities and at certain third-party facilities pursuant to supply and/or processing agreements.

The increase in total feedstock runs in 2014 compared to 2013 is due primarily to increased feedstock runs at the Superior refinery in 2014 as a result of turnaround activity in 2013, increased feedstock runs at the Montana refinery in 2014 as a result of turnaround activity in 2013, incremental feedstock runs as a result of the Bel-Ray Acquisition and incremental feedstock runs in 2014 as a result of the San Antonio crude oil unit expansion completed in December 2013, partially offset by decreased feedstock runs at the Shreveport refinery as a result of extended turnaround activity in 2014.

The increase in total feedstock runs in 2013 compared to 2012 is due primarily to incremental feedstock runs resulting from the Royal Purple, Montana and San Antonio Acquisitions, partially offset by reduced run rates at our Shreveport refinery due to unscheduled downtime associated with various operational reliability issues and planned turnaround activity at the Shreveport and Superior refineries during 2013.

- (3) Total facility production represents the bpd of specialty products and fuel products yielded from processing crude oil and other feedstocks at our facilities and at certain third-party facilities pursuant to supply and/or processing agreements. The difference between total facility production and total feedstock runs is primarily a result of the time lag between the input of feedstocks and production of finished products and volume loss.

The increases in total facility production in 2014 over 2013 and 2013 over 2012 are due primarily to the operational items discussed above in footnote 2 of this table.

- (4) Represents production of packaged and synthetic specialty products, including the products from the Royal Purple, Bel-Ray, Calumet Packaging and Missouri facilities.

The following table reflects our consolidated results of operations and includes the non-GAAP financial measures EBITDA, Adjusted EBITDA and Distributable Cash Flow. For a reconciliation of EBITDA, Adjusted EBITDA and Distributable Cash Flow to net income (loss) and net cash provided by operating activities, our most directly comparable financial performance and liquidity measures calculated and presented in accordance with GAAP, please read “— Non-GAAP Financial Measures.”

Year Ended December 31, 2014 Compared to Year Ended December 31, 2013

Sales. Sales increased \$369.7 million, or 6.8%, to \$5,791.1 million in 2014 from \$5,421.4 million in 2013. The results of operations related to the San Antonio and Crude Oil Logistics Acquisitions have been included in the fuel products segment since their dates of acquisition, January 2, 2013 and August 9, 2013, respectively. The results of operations related to the Bel-Ray and United Petroleum Acquisitions have been included in the specialty products segment since their dates of acquisition, December 10, 2013 and February 28, 2014, respectively. The results of operations related to the Anchor and SOS Acquisitions have been included in the oilfield services segment since their dates of acquisition, March 31, 2014 and August 1, 2014, respectively. Sales for each of our principal product categories in these periods were as follows:

	Year Ended December 31,		
	2014	2013	% Change
(In millions, except barrel and per barrel data)			
Sales by segment:			
Specialty products:			
Lubricating oils	\$ 748.4	\$ 848.8	(11.8)%

Total specialty and fuel products sales volume (in barrels)	44,841,000	42,514,000	5.5 %

⁽¹⁾ Represents production of packaged and synthetic specialty products at the Royal Purple, Bel-Ray, Calumet Packaging and Missouri facilities.

⁽²⁾ Represents by-products, including fuels and asphalt, produced in connection with the production of specialty products at the Princeton and Cotton Valley refineries and Dickinson and Karns City facilities.

⁽³⁾ Represents asphalt, heavy fuel oils and other products produced in connection with the production of fuels at the Shreveport, Superior, San Antonio and Montana refineries and purchased crude oil sales from the Superior and San Antonio refineries to third party customers.

The components of the \$45.7 million specialty products segment sales decrease in 2014 were as follows:

	<u>Dollar Change</u> <u>(In millions)</u>
Acquisitions	\$ 58.1
Sales price	17.8
Volume	<u>(121.6)</u>
Total specialty products segment sales decrease	<u>\$ (45.7)</u>

Specialty products segment sales for 2014 decreased \$45.7 million, or 2.6%, primarily as a result of \$58.1 million of incremental sales from the Bel-Ray and United Petroleum Acquisitions and an increase in the average selling price per barrel, partially offset by lower sales volume. Legacy operations' sales increased \$17.8 million compared to 2013 due to a 1.1% increase in the average selling price per barrel primarily as a result of higher lubricating oil sales prices and improved product mix. Legacy operations' sales volumes decreased 6.8% as compared to 2013, which resulted in a \$121.6 million decrease in sales. The decrease in sales volume is due primarily to lower sales volumes of lubricating oils and solvents due to market conditions, partially offset by increased sales volumes of packaged and synthetic specialty products.

The components of the \$46.9 million fuel products segment sales increase in 2014 were as follows:

	<u>Dollar Change</u> <u>(In millions)</u>
Volume	\$ 318.5
Hedging activities	(5.9)
Sales price	<u>(265.7)</u>
Total fuel products segment sales increase	<u>\$ 46.9</u>

Fuel products segment sales for 2014 increased \$46.9 million, or 1.3%, due primarily to increased volume, partially offset by a decrease in the average selling price per barrel and a \$5.9 million increase in realized derivative losses recorded in sales on our fuel products cash flow hedges. Sales volumes increased 8.7% primarily due to increased sales volume of gasoline, jet fuel and asphalt primarily as a result of increased production at the Superior and Montana refineries due to turnaround activity in 2013 and increased production at the San Antonio refinery as a result of the crude oil unit expansion completed in December 2013, partially offset by extended turnaround activity in 2014 at the Shreveport refinery. The average selling price per barrel (excluding the impact of hedging activities reflected in sales) decreased \$7.43, or 6.7%, resulting in a \$265.7 million decrease in sales, compared to a 6.3% decrease in the average price of crude oil per barrel. The average selling price per barrel decreased across all fuel products categories as a result of lower crude oil prices.

Oilfield services segment sales for 2014 increased \$368.5 million as a result of the Anchor and SOS Acquisitions in 2014. Volatility in crude oil and natural gas prices impacted our customers' drilling and production activities, which resulted in an unfavorable impact to our sales late in 2014. The U.S. onshore rig count decreased 6% from the third quarter of 2014 to the fourth quarter of 2014. Currently, we sell to approximately 10% of the U.S. land based rigs.

Gross Profit. Gross profit increased \$119.7 million, or 29.2%, to \$529.7 million in 2014 from \$410.0 million in 2013. Gross profit for our specialty, fuel products and oilfield services segments was as follows:

	Year Ended December 31,		
	2014	2013	% Change
(Dollars in millions except per barrel data)			
Gross profit by segment:			
Specialty products:			
Gross profit	\$ 373.2	\$ 322.3	15.8 %
Percentage of sales	21.6%	18.2%	
Specialty products gross profit per barrel	\$ 41.07	\$ 33.47	22.7 %
Fuel products:			
Gross profit excluding hedging activities	\$ (0.7)	\$ 87.7	(100.8)%
Hedging activities	35.2	—	100.0 %
Gross profit	\$ 34.5	\$ 87.7	(60.7)%
Percentage of sales	0.9%	2.4%	
Fuel products gross profit per barrel (excluding hedging activities)	\$ (0.02)	\$ 2.67	(100.7)%
Fuel products gross profit per barrel (including hedging activities)	\$ 0.96	\$ 2.67	(64.0)%
Oilfield services:			
Gross profit	\$ 122.0	\$ —	—
Percentage of sales	33.1%	—	
Total gross profit	\$ 529.7	\$ 410.0	29.2 %
Percentage of sales	9.1%	7.6%	

The components of the \$50.9 million specialty products segment gross profit increase in 2014 were as follows:

	Dollar Change (In millions)
2013 reported gross profit	\$ 322.3
Cost of materials	60.0
Sales price	17.8
Acquisitions	18.1
Operating costs	(3.0)
LCM inventory adjustment	(1.1)
LIFO inventory layer liquidation	(6.3)
Volume	(34.6)
2014 reported gross profit	\$ 373.2

The increase in specialty products segment gross profit of \$50.9 million year over year was due primarily to the decreased cost of feedstocks, higher sales price per barrel and incremental gross profit of \$18.1 million generated from the Bel-Ray and United Petroleum Acquisitions, partially offset by decreased sales volume. Sales price and cost of materials, net, from our legacy operations increased gross profit by \$77.8 million. The cost of materials decrease was primarily a result of the 7.8% decrease in the average cost of crude oil per barrel and decreased cost of base oil feedstocks per barrel. Gross profit was negatively impacted by a \$1.1 million LCM inventory adjustment and decreased gains of \$6.3 million related to the liquidation of LIFO inventory layers.

The components of the \$53.2 million fuel products segment gross profit decrease in 2014 were as follows:

	<u>Dollar Change</u> <u>(In millions)</u>
2013 reported gross profit	\$ 87.7
Sales price	(265.8)
LCM inventory adjustment	(75.0)
Operating costs	(31.5)
LIFO inventory layer liquidation	(29.8)
Cost of materials	257.9
Volume	35.6
Hedging activities	35.2
RINs, net	20.2
2014 reported gross profit	<u>\$ 34.5</u>

The decrease in fuel products segment gross profit of \$53.2 million year over year was due primarily to narrowing crack spreads and increased operating costs, partially offset by increased realized gains on derivatives of \$35.2 million. Sales price and cost of materials, net, decreased gross profit by \$7.9 million, as the average selling price per barrel decreased 6.7%, while the average cost of crude oil per barrel decreased 6.3%. Gross profit was negatively impacted by a \$75.0 million LCM inventory adjustment and increased losses of \$29.8 million related to the liquidation of LIFO inventory layers. Operating costs increased \$31.5 million primarily as a result of higher repairs and maintenance, depreciation and natural gas costs, partially offset by an \$18.2 million gain on RINs from the sale of approximately 31 million RINs as a result of receiving approval from the EPA of a one-year extension of the small refinery exemption from the requirements of the RFS for our Shreveport and San Antonio refineries for the 2013 calendar year.

The increase in oilfield services segment gross profit of \$122.0 million year over year was due to the Anchor and SOS Acquisitions in 2014. Volatility in crude oil and natural gas prices impacted our customers' drilling and production activities, which resulted in an unfavorable impact to our gross profit late in 2014. The decrease in crude oil prices created tighter market conditions in the basins in which we operate.

Selling. Selling expenses increased \$87.0 million, or 139.0%, to \$149.6 million in 2014 from \$62.6 million in 2013. This increase was due primarily to incremental selling expenses related to the Anchor, Bel-Ray and SOS Acquisitions, a \$1.7 million increase in advertising expense and a \$0.7 million increase in professional fees expense.

General and administrative. General and administrative expenses increased \$16.2 million, or 19.7%, to \$98.3 million in 2014 from \$82.1 million in 2013. The increase was due primarily to incremental general and administrative expenses related to the Anchor, Bel-Ray and SOS Acquisitions, a \$6.1 million increase in incentive compensation costs, a \$2.6 million increase in information technology related expenses and a \$1.5 million increase in professional fees expense.

Transportation. Transportation expenses increased \$28.7 million, or 20.1%, to \$171.4 million in 2014 from \$142.7 million in 2013. This increase is due primarily to incremental transportation expenses related to the Anchor, Bel-Ray and SOS Acquisitions and increased crude oil sales to third parties, partially offset by decreased lubricating oil sales.

Other operating costs and expenses. Other operating costs and expenses increased \$7.9 million, or 125.4%, to \$14.2 million in 2014 from \$6.3 million in 2013. The increase was due primarily to increased environmental remediation expenses.

Interest expense. Interest expense increased \$14.0 million, or 14.5%, to \$110.8 million in 2014 from \$96.8 million in 2013. The increase is due primarily to additional outstanding long-term debt in the form of 2022 Notes (as defined below), 2021 Notes (as defined below) and borrowings under our revolving credit facility, partially offset by lower interest expense resulting from the redemption of the 2019 Notes (as defined below).

Asset impairment. During 2014, we recorded an impairment charge of \$36.0 million related to the oilfield services segment. The impairment was driven primarily by our reduced outlook on revenues and profitability as a result of the extreme fluctuations in crude oil prices during the fourth quarter of 2014.

Debt extinguishment costs. Debt extinguishment costs were \$89.9 million in 2014. Debt extinguishment costs were due primarily to the redemption of the remaining 2019 Notes with a portion of the net proceeds from the issuance of the 2021 Notes. Please read Note 7 "Long-Term Debt" to our consolidated financial statements in Part II, Item 8 "Financial Statements and Supplementary Data" for additional information.

Derivative activity. The following table details the impact of our derivative instruments on the consolidated statements of operations for 2014 and 2013:

	Year Ended December 31,	
	2014	2013
	(In millions)	
Derivative loss reflected in sales	\$ (9.0)	\$ (3.1)
Derivative gain reflected in cost of sales	46.0	3.6
Derivative gain reflected in gross profit	\$ 37.0	\$ 0.5
Realized gain (loss) on derivative instruments	\$ 43.8	\$ (4.7)
Unrealized gain (loss) on derivative instruments	(0.6)	25.7
Derivative gain reflected in interest expense	3.3	—
Total derivative gain reflected in the consolidated statements of operations	\$ 83.5	\$ 21.5
Total gain (loss) on commodity derivative settlements	\$ 87.5	\$ (6.0)

Realized gain (loss) on derivative instruments. Realized gain (loss) on derivative instruments decreased \$48.5 million to a gain of \$43.8 million in 2014 from a loss of \$4.7 million in 2013. The change was due primarily to increased realized gains of approximately \$22.8 million related to settlements of derivative instruments used to economically hedge crack spreads that are not classified as hedges for accounting purposes, increased realized gains of approximately \$13.4 million on crude oil basis swaps used to economically hedge crude oil purchases and increased realized gains of \$9.9 million related to ineffectiveness on settlements of cash flow hedges.

Unrealized gain (loss) on derivative instruments. Unrealized gain (loss) on derivative instruments decreased \$26.3 million to a loss of \$0.6 million in 2014 from a gain of \$25.7 million in 2013. This change was due primarily to increased unrealized loss ineffectiveness of approximately \$41.6 million, partially offset by increased unrealized gains of \$15.5 million related to derivative instruments used to economically hedge crack spreads and natural gas that are not accounted for as hedges for accounting purposes.

Income tax expense (benefit). Income tax expense (benefit) decreased \$1.2 million to a benefit of \$0.8 million in 2014 from an expense of \$0.4 million in 2013. The change was due primarily to the Anchor Acquisition, which increased the proportion of earnings subject to federal, state and local income taxes.

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

Sales. Sales increased \$764.1 million, or 16.4%, to \$5,421.4 million in 2013 from \$4,657.3 million in 2012. The results of operations related to the Montana, San Antonio and Crude Oil Logistics Acquisitions have been included in the fuel products segment since the dates of acquisition October 1, 2012, January 2, 2013 and August 9, 2013, respectively. The results of operations related to the Missouri, Calumet Packaging, Royal Purple and Bel-Ray Acquisitions have been included in the specialty products segment since the dates of acquisition, January 3, 2012, January 6, 2012, July 3, 2012 and December 10, 2013, respectively. Sales for each of our principal product categories in these periods were as follows:

	Year Ended December 31,		
	2013	2012	% Change
(In millions, except barrel and per barrel data)			
Sales by segment:			
Specialty products:			
Lubricating oils	\$ 848.8	\$ 1,007.9	(15.8)%
Solvents	511.7	491.1	4.2 %
Waxes	141.0	142.8	(1.3)%
Packaged and synthetic specialty products ⁽¹⁾	233.6	161.7	44.5 %
Other ⁽²⁾	39.8	46.4	(14.2)%
Total specialty products	<u>\$ 1,774.9</u>	<u>\$ 1,849.9</u>	(4.1)%
Total specialty products sales volume (in barrels)	9,630,000	9,769,000	(1.4)%
Average specialty products sales price per barrel	\$ 184.31	\$ 189.36	(2.7)%
Fuel products:			
Gasoline	\$ 1,409.8	\$ 1,213.3	16.2 %
Diesel	1,263.2	1,081.1	16.8 %
Jet fuel	190.1	211.3	(10.0)%
Asphalt, heavy fuel oils and other ⁽³⁾	786.5	507.5	55.0 %
Hedging activities loss	(3.1)	(205.8)	(98.5)%
Total fuel products	<u>\$ 3,646.5</u>	<u>\$ 2,807.4</u>	29.9 %
Total fuel products sales volume (in barrels)	32,884,000	25,924,000	26.8 %
Average fuel products sales price per barrel (excluding hedging activities)	\$ 110.98	\$ 116.23	(4.5)%
Average fuel products sales price per barrel (including hedging activities)	<u>\$ 110.89</u>	<u>\$ 108.29</u>	2.4 %
Total sales	<u>\$ 5,421.4</u>	<u>\$ 4,657.3</u>	16.4 %
Total specialty and fuel products sales volume (in barrels)	<u>42,514,000</u>	<u>35,693,000</u>	19.1 %

⁽¹⁾ Represents production of packaged and synthetic specialty products at the Royal Purple, Bel-Ray, Calumet Packaging and Missouri facilities.

⁽²⁾ Represents by-products, including fuels and asphalt, produced in connection with the production of specialty products at the Princeton and Cotton Valley refineries and Dickinson and Karns City facilities.

⁽³⁾ Represents asphalt, heavy fuel oils and other products produced in connection with the production of fuels at the Shreveport, Superior, San Antonio and Montana refineries and purchased crude oil sales from the Superior, Shreveport and San Antonio refineries to third party customers.

The components of the \$75.0 million specialty products segment sales decrease in 2013 were as follows:

	<u>Dollar Change</u> <u>(In millions)</u>
Sales price	\$ (94.6)
Volume	(38.1)
Acquisitions	57.7
Total specialty products segment sales decrease	<u>\$ (75.0)</u>

Specialty products segment sales for 2013 decreased \$75.0 million, or 4.1%, primarily as a result of decreased average selling prices per barrel and lower sales volumes, partially offset by incremental sales from acquisitions. Legacy operations' sales decreased \$94.6 million, or 5.2%, compared to 2012 primarily due to lower average selling prices per barrel of lubricating oils, while the average cost of crude oil per barrel increased 1.5%. Legacy operations' sales volumes decreased 2.1% as compared to 2012 which resulted in a \$38.1 million decrease in sales. The decrease in sales volume is due primarily to lower sales volumes of lubricating oils as a result of market conditions and lower run rates at our Shreveport refinery, partially offset by increased sales volume of solvents and packaged and synthetic specialty products. The Shreveport refinery had lower run rates in 2013 due to unscheduled down time caused by various reliability issues and a planned turnaround as well as a change in the crude oil mix which reduced specialty products production yields. The Royal Purple and Bel-Ray Acquisitions increased sales by \$57.7 million which were all related to packaged and synthetic specialty products.

The components of the \$839.1 million fuel products segment sales increase in 2013 were as follows:

	<u>Dollar Change</u> <u>(In millions)</u>
Acquisitions	\$ 799.4
Hedging activities	202.7
Sales Price	(142.7)
Volume	(20.3)
Total fuel products segment sales increase	<u>\$ 839.1</u>

Fuel products segment sales for 2013 increased \$839.1 million, or 29.9%, due primarily to incremental sales from acquisitions and a \$202.7 million decrease in realized derivative losses recorded in sales on our fuel products cash flow hedges, partially offset by a decrease in the average selling price per barrel and lower sales volumes in our legacy operations. The acquisitions of Montana in 2012 and San Antonio in 2013 increased sales by \$799.4 million. Legacy operations' average selling price per barrel (excluding the impact of hedging activities reflected in sales) decreased \$5.55, or 4.8%, resulting in a \$142.7 million decrease in sales, compared to a 1.5% increase in the average price of crude oil per barrel with the average gasoline, asphalt and diesel selling prices per barrel declining the most compared to the prior year. Calumet's legacy operations' sales volumes remained relatively consistent as a result of increased crude oil sales to third party customers as we continued to grow our crude oil gathering business, partially offset by decreased run rates year over year. The decreased run rates were primarily due to unscheduled down time caused by various reliability issues at the Shreveport refinery and a plantwide turnaround at the Superior refinery that lasted approximately 45 days.

Gross Profit. Gross profit decreased \$103.2 million, or 20.1%, to \$410.0 million in 2013 from \$513.2 million in 2012. Gross profit for our specialty and fuel products segments was as follows:

	Year Ended December 31,		
	2013	2012	% Change
(Dollars in millions, except per barrel data)			
Gross profit by segment:			
Specialty products:			
Gross profit	\$ 322.3	\$ 400.1	(19.4)%
Percentage of sales	18.2%	21.6%	
Specialty products gross profit per barrel	\$ 33.47	\$ 40.96	(18.3)%
Fuel products:			
Gross profit excluding hedging activities	\$ 87.7	\$ 269.1	(67.4)%
Hedging activities	—	(156.0)	100.0 %
Gross profit	\$ 87.7	\$ 113.1	(22.5)%
Percentage of sales	2.4%	4.0%	
Fuel products gross profit per barrel (excluding hedging activities)	\$ 2.67	\$ 10.38	(74.3)%
Fuel products gross profit per barrel (including hedging activities)	\$ 2.67	\$ 4.36	(38.8)%
Total gross profit	\$ 410.0	\$ 513.2	(20.1)%
Percentage of sales	7.6%	11.0%	

The components of the \$77.8 million specialty products segment gross profit decrease in 2013 were as follows:

	Dollar Change (In millions)
2012 reported gross profit	\$ 400.1
Sales price	(94.6)
Operating costs	(14.4)
Volume	(11.5)
Cost of materials	12.9
Acquisitions	29.8
2013 reported gross profit	\$ 322.3

The decrease in specialty products segment gross profit of \$77.8 million year over year was due primarily to decreased average selling prices per barrel and increased operating costs of \$14.4 million primarily as a result of higher repairs and maintenance and natural gas costs partially offset by acquisitions. Sales price and cost of materials, net, from our legacy operations decreased gross profit by \$81.7 million, as the average selling price per barrel of specialty products decreased 5.2% compared to a 1.5% increase in the average cost of crude oil per barrel. This pricing decrease was primarily due to decreased average selling prices per barrel of lubricating oils. The Royal Purple and Bel-Ray Acquisitions contributed \$29.8 million of incremental gross profit to partially offset these decreases.

The components of the \$25.4 million fuel products segment gross profit decrease in 2013 were as follows:

	<u>Dollar Change</u> <u>(In millions)</u>
2012 reported gross profit	\$ 113.1
Sales price	(142.7)
Operating costs	(38.7)
Cost of materials	(34.0)
Volume	(3.3)
Hedging activities	156.0
Acquisitions	37.3
2013 reported gross profit	<u>\$ 87.7</u>

The decrease in fuel products segment gross profit of \$25.4 million year over year was due primarily to decreased gross profit from our legacy operations due to narrowing crack spreads, lower asphalt average selling prices per barrel and increased operating costs, partially offset by decreased realized losses on derivatives of \$156.0 million and \$37.3 million of gross profit contributed from the Montana and San Antonio Acquisitions. Contributing factors to this narrowing of our fuel products crack spreads included lower crude oil differentials to NYMEX WTI and lower market Gulf Coast crack spreads in the current year due to market conditions. Operating costs increased \$38.7 million primarily as a result of \$22.1 million of higher RINs costs in our legacy operations and higher repairs and maintenance and natural gas costs.

Selling. Selling expenses increased \$21.0 million, or 50.5%, to \$62.6 million in 2013 from \$41.6 million in 2012. This increase was due primarily to the Royal Purple Acquisition which includes increased amortization expense of \$11.6 million primarily related to the recording of intangible assets, additional employee compensation costs and increased advertising expenses of \$6.4 million.

General and administrative. General and administrative expenses increased \$21.2 million, or 34.8%, to \$82.1 million in 2013 from \$60.9 million in 2012. The increase was due primarily to a \$7.2 million gain related to the curtailment of certain benefits in benefit plans covering employees at the Superior refinery in the 2012 period with no similar gains in the same period in 2013, increased professional fees of \$11.9 million due primarily to consulting fees related to our enterprise resource planning system implementation and additional employee compensation costs from the Royal Purple, Montana, San Antonio and Bel-Ray Acquisitions, with no similar expenses in the prior year. These increases were partially offset by decreased incentive compensation costs of \$10.0 million due to the lower financial performance in the current year relative to performance targets.

Transportation. Transportation expenses increased \$34.8 million, or 32.3%, to \$142.7 million in 2013 from \$107.9 million in 2012. This increase is due primarily to incremental transportation expenses related to sales from the Royal Purple, Montana and San Antonio Acquisitions and crude oil sales to third party customers.

Other operating costs and expenses. Other operating costs and expenses increased \$9.0 million, or 115.4%, to \$16.8 million in 2013 from \$7.8 million in 2012. The increase was due primarily to a non-cash charge of \$10.5 million related to a write-down of idle fixed assets, compared to a \$1.6 million write-down of idle fixed assets in the prior year.

Interest expense. Interest expense increased \$11.2 million, or 13.1%, to \$96.8 million in 2013 from \$85.6 million in 2012. The increase is due primarily to additional outstanding long-term debt in the form of 2020 Notes issued to partially fund the Royal Purple Acquisition and 2022 Notes issued to fund general partnership purposes, the Bel-Ray Acquisition and the redemption of \$100.0 million in aggregate principal amount outstanding of 2019 Notes.

Debt extinguishment costs. Debt extinguishment costs were \$14.6 million in 2013. Debt extinguishment costs were primarily due to the partial redemption of 2019 Notes with a portion of the proceeds from the issuance of 2022 Notes.

Derivative activity. The following table details the impact of our derivative instruments on the consolidated statements of operations for 2013 and 2012:

	Year Ended December 31,	
	2013	2012
	(In millions)	
Derivative loss reflected in sales	\$ (3.1)	\$ (205.8)
Derivative gain reflected in cost of sales	3.6	51.7
Derivative gain (loss) reflected in gross profit	\$ 0.5	\$ (154.1)
Realized gain (loss) on derivative instruments	\$ (4.7)	\$ 9.5
Unrealized gain (loss) on derivative instruments	25.7	(3.8)
Total derivative gain (loss) reflected in the consolidated statements of operations	\$ 21.5	\$ (148.4)
Total loss on commodity derivative settlements	\$ (6.0)	\$ (149.7)

Realized gain (loss) on derivative instruments. Realized gain (loss) on derivative instruments decreased \$14.2 million to a loss of \$4.7 million in 2013 from a gain of \$9.5 million in 2012. The change was due primarily to increased realized losses of approximately \$39.9 million related to settlements of derivative instruments used to economically hedge crack spreads at our Superior refinery that are not classified as hedges for accounting purposes and therefore are not reflected in gross profit and increased realized losses of approximately \$9.8 million on crude oil basis swaps used to economically hedge crude oil purchases at our Shreveport and Superior refineries. Partially offsetting these increased realized losses were increased realized gains of \$26.5 million from decreased hedging ineffectiveness related to settlements of cash flow hedges as well as increased realized gains of approximately \$4.8 million on natural gas swaps used to economically hedge natural gas purchases.

Unrealized gain (loss) on derivative instruments. Unrealized gain (loss) on derivative instruments increased \$29.5 million to a gain of \$25.7 million in 2013 from a loss of \$3.8 million in 2012. This change was due primarily to increased unrealized gain ineffectiveness of approximately \$31.2 million and increased unrealized gains of approximately \$7.2 million on crude oil basis swaps used to economically hedge crude oil purchases at our Shreveport and Superior refineries. Partially offsetting these increased unrealized gains were increased unrealized losses of approximately \$7.6 million on derivatives used to economically hedge our specialty products segment natural gas purchases and specialty products segment crude oil purchases but are not classified as hedges for accounting purposes.

Liquidity and Capital Resources

Our principal sources of cash have historically included cash flow from operations, proceeds from public equity offerings, proceeds from notes offerings and bank borrowings. Principal uses of cash have included capital expenditures, acquisitions, distributions to our limited partners and general partner and debt service. We expect that our principal uses of cash in the future will be for distributions to our unitholders and general partner, debt service, replacement and environmental capital expenditures, capital expenditures related to internal growth projects and acquisitions from third parties or affiliates.

We expect to fund future capital expenditures with current cash flow from operations, borrowings under our revolving credit facility and by accessing capital markets as necessary. Future internal growth projects or acquisitions may require expenditures in excess of our then-current cash flow from operations and borrowing availability under our existing revolving credit facility and may require us to issue debt or equity securities in public or private offerings or incur additional borrowings under bank credit facilities to meet those costs.

As a result of the extreme fluctuations in crude oil prices during the fourth quarter of 2014 and the corresponding impacts on cash flows and liquidity as evidenced by the decrease in the revolving credit facility borrowing base from \$831.5 million at September 30, 2014 to \$575.9 million at December 31, 2014 and the corresponding decrease to our availability from \$557.4 million at September 30, 2014 to \$310.8 million at December 31, 2014, we have completed the following:

- Given the high value of certain of our derivative assets, our risk management committee approved the early settlement of select second quarter 2015 through calendar year 2016 fixed priced crack spread derivative instruments. As a result of the settlement of these derivative assets, we received approximately \$44.8 million during the fourth quarter of 2014, which is included in Adjusted EBITDA, and \$9.6 million in the first quarter of 2015.
- As a result of receiving approval from the EPA of a one-year extension of the small refinery exemption from the requirements of the RFS for our Shreveport and San Antonio refineries for the 2013 calendar year, we sold approximately 31 million RINs generating cash of approximately \$14.5 million resulting in an \$18.2 million gain during the fourth quarter of 2014, which is included Adjusted EBITDA.

- We have implemented strategies to minimize inventory levels across all of our operations and we expect to maintain prudent levels of working capital to enhance liquidity. For example, excluding inventory related to the Anchor and SOS Acquisitions, we have reduced our total inventory levels by approximately 970,000 barrels, or approximately 16%, as of December 31, 2014 as compared to June 30, 2014.
- During the first quarter 2015, we terminated our interest rate swap, which was designated as a fair value hedge, related to the 2022 Notes and having a notional amount of \$200.0 million. In settlement of this swap, we received approximately \$3.3 million.

Cash Flows from Operating, Investing and Financing Activities

We believe that we have sufficient liquid assets, cash flow from operations, borrowing capacity and adequate access to capital markets to meet our financial commitments, debt service obligations and anticipated capital expenditures. However, we are subject to business and operational risks that could materially adversely affect our cash flows. A material decrease in our cash flow from operations including a significant, sudden decrease in crude oil prices would likely produce a corollary material adverse effect on our borrowing capacity under our revolving credit facility and potentially our ability to comply with the covenants under our revolving credit facility. A significant, sudden increase in crude oil prices, if sustained, would likely result in increased working capital requirements which would be funded by borrowings under our revolving credit facility. In addition, our cash flow from operations may be impacted by the timing of settlement of our derivative activities. Gains and losses from derivative instruments that qualify as effective cash flow hedges are deferred in accumulated other comprehensive income (loss), but may impact operating cash flow in the period settled. Gains and losses from derivative instruments that do not qualify as hedges are recorded in unrealized gain (loss) until settlement and will impact operating cash flow in the period settled.

The following table summarizes our primary sources and uses of cash in each of the most recent three years:

	Year Ended December 31,		
	2014	2013	2012
	(In millions)		
Net cash provided by operating activities	\$ 226.8	\$ 39.1	\$ 380.1
Net cash used in investing activities	(658.8)	(370.3)	(624.2)
Net cash provided by financing activities	319.4	420.1	276.2
Net increase (decrease) in cash and cash equivalents	<u>\$ (112.6)</u>	<u>\$ 88.9</u>	<u>\$ 32.1</u>

Operating Activities. Operating activities provided cash of \$226.8 million during 2014 compared to \$39.1 million during 2013. The increase in cash provided by operating activities is due primarily to decreased working capital requirements in 2014 providing \$25.1 million, compared to 2013 working capital requirements using \$101.4 million as well as an increase in non-cash items of \$176.9 million, partially offset by decreased net income of \$115.7 million. Working capital improvements were primarily driven by decreased inventory, accounts receivable and turnaround costs, \$44.8 million related to the early settlement of certain crack spread derivative instruments and a gain on sales of RINs of \$18.2 million.

Operating activities provided \$39.1 million in cash during 2013 compared to \$380.1 million during 2012. The decrease in cash provided by operating activities is due primarily to decreased net income of \$202.2 million and an increase in turnaround costs of \$53.7 million in 2013 compared to 2012.

Investing Activities. Cash used in investing activities increased to \$658.8 million in 2014 compared to \$370.3 million in 2013. The increase is due primarily to the higher combined purchase price of \$263.6 million for the United Petroleum, Anchor and SOS Acquisitions, which closed in 2014 compared to a combined purchase price of \$177.7 million for the San Antonio, Crude Oil Logistics and Bel-Ray Acquisitions in 2013, an increase in capital expenditures of \$129.1 million due primarily to the capital improvement projects discussed below and \$105.4 million contributed to the Dakota Prairie Refining, LLC and Juniper GTL LLC joint ventures.

Cash used in investing activities decreased to \$370.3 million in 2013 compared to \$624.2 million in 2012. The decrease is due primarily to the higher combined purchase price of \$569.2 million for the Missouri, Calumet Packaging, Royal Purple and Montana Acquisitions, which closed during 2012, compared to a combined purchase price of \$177.7 million for the San Antonio, Crude Oil Logistics and Bel-Ray Acquisitions in 2013, partially offset by an increase in capital expenditures of \$103.8 million due primarily to the capital improvement projects discussed below and \$31.8 million contributed to the Dakota Prairie Refining, LLC joint venture.

Financing Activities. Financing activities provided cash of \$319.4 million during 2014 compared to \$420.1 million during 2013. The decrease is due primarily to the redemption of the remaining 2019 Notes of \$500.0 million, a decrease in net proceeds from public offerings of common units (including our general partner's contributions) of \$397.2 million and increased

distributions to our unitholders of \$8.6 million. Partially offsetting these decreases are increased net proceeds from the private placement of senior notes of \$555.3 million and increased revolving credit facility borrowings of \$150.8 million.

Financing activities provided cash of \$420.1 million during 2013 compared to \$276.2 million during 2012. The increase is due primarily to increased net proceeds from public offerings of common units (including our general partner's contributions) of \$251.2 million and increased net proceeds from the private placement of senior notes of \$74.5 million, partially offset by the partial redemption of senior notes of \$100.0 million, repayment of \$11.9 million of debt assumed in the Bel-Ray Acquisition and increased distributions to our unitholders of \$69.2 million.

Acquisitions

Acquisitions impact our results of operations commencing on the closing date of each acquisition. Our acquisitions are discussed further in Note 3 "Acquisitions" in the notes to our consolidated financial statements under Part II, Item 8 "Financial Statements and Supplementary Data." Information regarding acquisitions completed in 2014, 2013 and 2012 is set forth in the table below (in millions):

Acquisition	Closing Date	Purchase Price	Funding Methods	Segment
United Petroleum	February 28, 2014	\$ 10.4	Cash on hand	Specialty Products
Anchor	March 31, 2014	223.6	Net proceeds from our March 2014 private placement of 2021 Notes	Oilfield Services
SOS	August 1, 2014	29.6	Borrowings under our revolving credit facility	Oilfield Services
2014 Total		<u>\$ 263.6</u>		
San Antonio	January 2, 2013	\$ 117.9	Borrowings under our revolving credit facility	Fuel Products
Crude Oil Logistics Assets	August 9, 2013	6.2	Cash on hand	Fuel Products
Bel-Ray	December 10, 2013	53.6	Net proceeds from our November 2013 private placement of 2022 Notes	Specialty Products
2013 Total		<u>\$ 177.7</u>		
Missouri	January 3, 2012	\$ 19.6	Borrowings under our revolving credit facility and cash on hand	Specialty Products
Calumet Packaging	January 6, 2012	26.9	Borrowings under our revolving credit facility	Specialty Products
Royal Purple	July 3, 2012	331.2	Net proceeds from our June 2012 private placement of 2020 Notes	Specialty Products
Montana	October 1, 2012	191.6	Cash on hand and borrowings under our revolving credit facility	Fuel Products
2012 Total		<u>\$ 569.3</u>		

Joint Ventures

Dakota Prairie Refining, LLC

On February 7, 2013, we entered into a joint venture agreement with MDU Resources Group, Inc. ("MDU") to develop, build and operate a diesel refinery in southwestern North Dakota. The joint venture is named Dakota Prairie Refining, LLC ("Dakota Prairie"). The capitalization of the joint venture is expected to be funded through contributions of \$217.5 million from MDU and a total of \$217.5 million from us comprised of \$142.5 million through cash contributions and proceeds of \$75.0 million from an unsecured syndicated term loan facility with the joint venture as the borrower which is expected to be repaid by us through our allocation of profits from the joint venture. The term loan facility was funded in April 2013. The majority of our direct funding occurred in 2014. The joint venture will allocate profits on a 50%/50% basis to us and MDU. The joint venture is governed by a board of managers comprised of representatives from both us and MDU. MDU will provide a portion of the crude oil supply to the refinery, as well as natural gas and electricity utility services. We are providing refinery operations, crude oil procurement and refined product marketing expertise to the joint venture. As of December 31, 2014 and 2013, we have an investment of \$117.2 million and \$33.4 million, respectively, in Dakota Prairie primarily related to the development of the refinery and are committed to fund approximately \$23.0 million in 2015.

Juniper GTL LLC

On June 9, 2014, we entered into a joint venture agreement with Clean Fuels North America, LLC, which is owned by SGC Energia and Great Northern Project Development, to develop, build and operate a gas-to-liquids ("GTL") plant in Lake Charles, Louisiana, which is expected to be operational by late 2015. The joint venture is named New Source Fuels, LLC, and it owns 100% of Juniper GTL LLC ("Juniper"). The capitalization of the joint venture is expected to be funded through \$100.0 million of equity contributions and \$35.0 million in senior secured debt with the joint venture as the borrower. We intend to

invest \$25.0 million in total in exchange for an equity interest of approximately 23% in the joint venture. Funding of the project will occur over the course of the construction period. The joint venture is governed by a board of managers comprised of representatives from all of the members that own at least 10% of the equity in Juniper. As of December 31, 2014, we had an investment of \$18.5 million in Juniper primarily related to the development of the plant and are committed to fund \$6.5 million in 2015.

Capital Expenditures

Our property, plant and equipment capital expenditure requirements consist of capital improvement expenditures, replacement capital expenditures and environmental capital expenditures. Capital improvement expenditures include expenditures to acquire assets to grow our business, to expand existing facilities, such as projects that increase operating capacity, or to reduce operating costs. Replacement capital expenditures replace worn out or obsolete equipment or parts. Environmental capital expenditures include asset additions to meet or exceed environmental and operating regulations. Turnaround costs represent capitalized costs associated with our periodic major maintenance and repairs.

The following table sets forth our capital improvement expenditures, replacement capital expenditures, environmental capital expenditures, turnaround capital expenditures and joint venture contributions in each of the periods shown.

	Year Ended December 31,		
	2014	2013	2012
	(In millions)		
Capital improvement expenditures	\$ 284.9	\$ 109.7	\$ 28.7
Replacement capital expenditures	18.8	33.8	12.9
Environmental capital expenditures	13.0	30.4	15.4
Turnaround capital expenditures	27.6	68.6	14.9
Joint venture contributions	105.4	31.8	—
Total	<u>\$ 449.7</u>	<u>\$ 274.3</u>	<u>\$ 71.9</u>

We anticipate that future capital expenditure requirements will be provided primarily through cash flow from operations, cash on hand, available borrowings under our revolving credit facility and by accessing capital markets as necessary. If future capital expenditures require expenditures in excess of our then-current cash flow from operations and borrowing availability under our existing revolving credit facility, we may be required to issue debt or equity securities in public or private offerings or incur additional borrowings under bank credit facilities to meet those costs.

Our environmental capital improvement expenditures have decreased in 2014 as compared to 2013 due primarily to expenditures in 2013 related to the Global Settlement with the Louisiana Department of Environmental Quality (“LDEQ”) and the federal Occupational Safety and Health Administration (“OSHA”) compliance matters. Please read Note 6 “Commitments and Contingencies” Part II, Item 8 “Financial Statements and Supplementary Data” for additional information on the Global Settlement and OSHA compliance issues.

Our replacement capital expenditures have decreased in 2014 as compared to 2013 due primarily to increased reliability at certain of our refineries and .

We estimate our replacement and environmental capital expenditures will be \$60.0 million to \$70.0 million in 2015. These estimated amounts for 2015 include a portion of the \$10.0 million to \$12.0 million in environmental projects to be spent as required by our settlement with the LDEQ under the “Small Refinery and Single Site Refining Initiative.” Please read Part I, Items 1 and 2 “Business and Properties — Environmental and Occupational Health and Safety Matters — Air Emissions” for additional information.

Beginning in 2013, we initiated a series of organic growth projects, the last of which is expected to be completed by the first quarter 2016 including capacity expansions at certain of our facilities, as well as active investments, such as the joint venture with MDU. The current projected cost of the organic growth campaign is approximately \$640.0 million to \$665.0 million, up from the prior forecast of approximately \$600.0 million. We estimate we will spend approximately \$210.0 million to \$245.0 million in 2015 on capital investment in growth projects, including \$30.6 million for which we are committed to fund. Our primary capital improvements projects include the following:

- *Montana Refinery Expansion* - We plan to increase our Montana refinery’s crude oil throughput capacity from 10,000 bpd to 25,000 bpd (“Montana Refinery Expansion”). The incremental production slate will consist primarily of gasoline, diesel, jet fuel and diluent, all of which will be sold into regional markets. We anticipate the total cost of the Montana Refinery Expansion to be approximately \$400.0 million, with expected completion by the first quarter of 2016. We are committed to fund approximately \$0.3 million in 2015.

- *Dakota Prairie Refining, LLC* - We have entered into a joint venture agreement with MDU to develop, build and operate a 20,000 bpd diesel refinery in southwestern North Dakota. Please read — “Joint Ventures” above for additional information.

During 2014, we spent approximately \$27.6 million primarily related to scheduled turnarounds at our Shreveport and Cotton Valley refineries funded through cash flow from operations. Additionally, we estimate turnaround spending requirements will be \$15.0 million to \$20.0 million in 2015 primarily related to scheduled turnaround activity at our Shreveport and Princeton refineries. We expect these expenditures will be funded primarily through cash flow from operations.

Debt and Credit Facilities

As of December 31, 2014, our primary debt and credit instruments consisted of:

- a \$1.0 billion senior secured revolving credit facility maturing in July 2019, subject to borrowing base limitations, with a maximum letter of credit sublimit equal to \$600.0 million, which amount may be increased to 90% of revolver commitments in effect with the consent of the Agent (as defined in the revolving credit agreement) (“revolving credit facility”);
- \$275.0 million of 9.625% senior notes due 2020 (“2020 Notes”);
- \$900.0 million of 6.50% senior notes due 2021 (“2021 Notes”); and
- \$350.0 million of 7.625% senior notes due 2022 (“2022 Notes”).

We were in compliance with all covenants under our debt instruments in place as of December 31, 2014 and have adequate liquidity to conduct our business.

Short Term Liquidity

As of December 31, 2014, our principal sources of short-term liquidity were (i) \$310.8 million of availability under our revolving credit facility and (ii) \$8.5 million of cash. Borrowings under our revolving credit facility can be used for, among other things, working capital, capital expenditures, and other lawful partnership purposes including acquisitions.

On July 14, 2014, we entered into a second amended and restated senior secured revolving credit facility, which increased the maximum availability of credit under the revolving credit facility from \$850.0 million to \$1.0 billion, subject to borrowing base limitations, and includes a \$500.0 million incremental uncommitted expansion option. Borrowings under the revolving credit facility are limited to a borrowing base that is determined based on advance rates of percentages of Eligible Accounts Receivable and Eligible Inventory (as defined in the revolving credit agreement). As such, the borrowing base can fluctuate based on changes in selling prices of our products and our current material costs, primarily the cost of crude oil. On December 31, 2014, we had availability on our revolving credit facility of \$310.8 million, based on a \$575.9 million borrowing base, \$114.3 million in outstanding standby letters of credit and \$150.8 million of outstanding borrowings. The borrowing base cannot exceed the revolving credit facility commitments then in effect. The lender group under our revolving credit facility is comprised of a syndicate of fifteen lenders. The lenders under our revolving credit facility have a first priority lien on our accounts receivable, inventory and substantially all of our cash.

Amounts outstanding under our revolving credit facility fluctuate materially during each quarter mainly due to cash flow from operations, normal changes in working capital, payments of quarterly distributions to unitholders, capital expenditures and debt service costs. Specifically, the amount borrowed under our revolving credit facility is typically at its highest level after we pay for the majority of our crude oil supplies on the 20th day of every month per standard industry terms. The maximum revolving credit facility borrowings during the quarter ended December 31, 2014 were \$233.1 million. Our availability on our revolving credit facility during the peak borrowing days of the quarter has been ample to support our operations and service upcoming requirements. During the quarter ended December 31, 2014, availability for additional borrowings under our revolving credit facility was approximately \$310.8 million at its lowest point.

The revolving credit facility currently bears interest at a rate equal to prime plus a basis points margin or LIBOR plus a basis points margin, at our option. As of December 31, 2014, this margin was 75 basis points for prime and 175 basis points for LIBOR; however, the margin can fluctuate quarterly based on our average availability for additional borrowings under the revolving credit facility in the preceding calendar quarter.

In addition to paying interest on outstanding borrowings under the revolving credit facility, we are required to pay a commitment fee to the lenders under the revolving credit facility with respect to the unutilized commitments thereunder at a rate equal to either 0.250% or 0.375% per annum depending on the average daily available unused borrowing capacity for the preceding month. We also pay a customary letter of credit fee, including a fronting fee of 0.125% per annum of the stated amount of each outstanding letter of credit, and customary agency fees.

Our revolving credit facility contains various covenants that limit, among other things, our ability to: incur indebtedness; grant liens; dispose of certain assets; make certain acquisitions and investments; redeem or prepay other debt or make other restricted payments such as distributions to unitholders; enter into transactions with affiliates; and enter into a merger, consolidation or sale of assets. The revolving credit facility generally permits us to make cash distributions to our unitholders as long as immediately after giving effect to such a cash distribution we have cash and availability under the revolving credit facility totaling at least the greater of (i) 15% of the Borrowing Base (as defined in the credit agreement) then in effect and (ii) \$70.0 million. Further, the revolving credit facility contains one springing financial covenant which provides that only if our availability under the revolving credit facility falls below the greater of (a) 12.5% of the Borrowing Base (as defined in the credit agreement) then in effect and (b) \$45.0 million, we will be required to maintain as of the end of each fiscal quarter a Fixed Charge Coverage Ratio (as defined in the credit agreement) of at least 1.0 to 1.0.

If an event of default exists under the revolving credit facility, the lenders will be able to accelerate the maturity of the credit facility and exercise other rights and remedies. An event of default includes, among other things, the nonpayment of principal, interest, fees or other amounts; failure of any representation or warranty to be true and correct when made or confirmed; failure to perform or observe covenants in the revolving credit facility or other loan documents, subject, in limited circumstances, to certain grace periods; cross-defaults in other indebtedness if the effect of such default is to cause, or permit the holders of such indebtedness to cause, the acceleration of such indebtedness under any material agreement; bankruptcy or insolvency events; monetary judgment defaults; asserted invalidity of the loan documentation; and a change of control.

As of December 31, 2014, we were in compliance with all covenants under the revolving credit facility.

For additional information regarding our revolving credit facility, see Note 7 “Long-Term Debt” in Part II, Item 8 “Financial Statements and Supplementary Data.”

Long-Term Financing

In addition to our principal sources of short-term liquidity listed above, we can meet our cash requirements (other than distributions of cash from operations to our common unitholders) through the issuance of long-term notes or additional common units.

From time to time we issue long-term debt securities, referred to as our senior notes. All of our outstanding senior notes are unsecured obligations that rank equally with all of our other senior debt obligations to the extent they are unsecured. As of December 31, 2014, we had \$275.0 million in 2020 Notes, \$900.0 million in 2021 Notes and \$350.0 million in 2022 Notes outstanding. As of December 31, 2013, we had \$500.0 million in 2019 Notes, \$275.0 million in 2020 Notes and \$350.0 million in 2022 Notes outstanding.

The indentures governing our senior notes contain covenants that, among other things, restrict our ability and the ability of certain of our subsidiaries to: (i) sell assets; (ii) pay distributions on, redeem or repurchase our common units or redeem or repurchase its subordinated debt; (iii) make investments; (iv) incur or guarantee additional indebtedness or issue preferred units; (v) create or incur certain liens; (vi) enter into agreements that restrict distributions or other payments from our restricted subsidiaries to us; (vii) consolidate, merge or transfer all or substantially all of our assets; (viii) engage in transactions with affiliates and (ix) create unrestricted subsidiaries. These covenants are subject to important exceptions and qualifications. At any time when the senior notes are rated investment grade by either Moody’s Investors Service, Inc. (“Moody’s”) or Standard & Poor’s Ratings Services (“S&P”) and no Default or Event of Default, each as defined in the indentures governing the senior notes, has occurred and is continuing, many of these covenants will be suspended and, except in the case of the 2020 Notes, an investment grade rating is required from both Moody’s and S&P. As of December 31, 2014, our Fixed Charge Coverage Ratio (as defined in the indentures governing the 2020, 2021 and 2022 Notes) was 2.5 to 1.0.

Upon the occurrence of certain change of control events, each holder of the senior notes will have the right to require that we repurchase all or a portion of such holder’s senior notes in cash at a purchase price equal to 101% of the principal amount thereof, plus any accrued and unpaid interest to the date of repurchase.

To date, our debt balances have not adversely affected our operations, our ability to grow or our ability to repay or refinance our indebtedness. Based on our historical record, we believe that our capital structure will continue to allow us to achieve our business objectives.

We are subject, however, to conditions in the equity and debt markets for our common units and long-term senior notes, and there can be no assurance we will be able or willing to access the public or private markets for our common units and/or senior notes in the future. If we are unable or unwilling to issue additional common units, we may be required to either restrict capital expenditures and/or potential future acquisitions or pursue debt financing alternatives, some of which could involve

higher costs or negatively affect our credit ratings. Furthermore, our ability to access the public and private debt markets is affected by our credit ratings.

For additional information regarding our senior notes, see Note 7 “Long-Term Debt” in Part II, Item 8 “Financial Statements and Supplementary Data.”

Master Derivative Contracts and Collateral Trust Agreement

Under our credit support arrangements, our payment obligations under all of our master derivatives contracts for commodity hedging generally are secured by a first priority lien on our and our subsidiaries’ real property, plant and equipment, fixtures, intellectual property, certain financial assets, certain investment property, commercial tort claims, chattel paper, documents, instruments and proceeds of the foregoing (including proceeds of hedge arrangements). We had no additional letters of credit or cash margin posted with any hedging counterparty as of December 31, 2014. Our master derivatives contracts and Collateral Trust Agreement (as defined below) continue to impose a number of covenant limitations on our operating and financing activities, including limitations on liens on collateral, limitations on dispositions of collateral and collateral maintenance and insurance requirements. For financial reporting purposes, we do not offset the collateral provided to a counterparty against the fair value of our obligation to that counterparty. Any outstanding collateral is released to us upon settlement of the related derivative instrument liability.

The fair value of our derivatives that were outstanding as of December 31, 2014 decreased by approximately \$16.0 million subsequent to December 31, 2014 to a net liability of approximately \$15.0 million. All credit support thresholds with our hedging counterparties are at levels such that it would take a substantial increase in fuel products crack spreads or interest rates to require significant additional collateral to be posted. As a result, we do not expect further increases in fuel products crack spreads or interest rates to significantly impact our liquidity.

Additionally, we have a collateral trust agreement (the “Collateral Trust Agreement”) which governs how secured hedging counterparties will share collateral pledged as security for the payment obligations owed by us to secured hedging counterparties under their respective master derivatives contracts. The Collateral Trust Agreement limits to \$100.0 million the extent to which forward purchase contracts for physical commodities are covered by, and secured under, the Collateral Trust Agreement. There is no such limit on financially settled derivative instruments used for commodity hedging. Subject to certain conditions set forth in the Collateral Trust Agreement, we have the ability to add secured hedging counterparties from time to time.

Equity Transactions

On March 10, 2014, we entered into an Equity Placement Agreement with various sales agents under which we may issue and sell, from time to time, common units representing limited partner interests, having an aggregate offering price of up to \$300.0 million through one or more sales agents. The Equity Placement Agreement provides us the right, but not the obligation, to sell common units in the future, at prices we deem appropriate. These sales, if any, will be made pursuant to the terms of the Equity Placement Agreement between us and the sales agents. The net proceeds from any sales under this agreement will be used for general partnership purposes, which may include, among other things, repayment of indebtedness, working capital, capital expenditures and acquisitions. Our general partner contributed its proportionate capital contribution to retain its 2% general partner interest. For the year ended December 31, 2014, we sold 134,955 common units for net proceeds of \$3.6 million. Underwriting discounts totaled \$0.1 million and our general partner contributed \$0.1 million to retain its general partner interest.

During 2013 and 2012, we completed the following marketed public offerings of common units (in millions except unit and per unit data):

Closing Date	Number of Common Units Offered	Price per Unit	Net Proceeds ⁽¹⁾	General Partner Contribution ⁽²⁾	Underwriting Discount	Use of Proceeds
May 8, 2012	6,000,000	\$25.50	\$ 146.6	\$ 3.1	\$ 6.2	Net proceeds were used to repay borrowings under the revolving credit facility.
January 8, 2013	5,750,000 ⁽³⁾	\$31.81	\$ 175.2	\$ 3.8	\$ 7.4	Net proceeds were used to repay borrowings under the revolving credit facility and for general partnership purposes.
April 1, 2013	6,037,500 ⁽⁴⁾	\$37.50	\$ 217.3	\$ 4.6	\$ 9.1	Net proceeds were used for general partnership purposes.

- (1) Proceeds are net of underwriting discounts, commissions and expenses but before its general partner's capital contribution.
- (2) Our general partner contributions were made to retain its 2% general partner interest.
- (3) Includes the full exercise of the overallotment option of 750,000 common units which closed concurrently with the 5,000,000 firm units on January 8, 2013.
- (4) Includes the full exercise of the overallotment option of 787,500 common units which closed on April 4, 2013.

During 2014 and through March 2015, we made the following cash distributions on all outstanding common units (including our general partner's incentive distribution rights) (in millions except per unit data):

Quarter Ended	Declaration Date	Record Date	Distribution Date	Quarterly Distribution per Unit	Aggregate Quarterly Distribution	Annualized Distribution per Unit	Aggregate Annualized Distribution
December 31, 2013	January 24, 2014	February 4, 2014	February 14, 2014	\$ 0.685	\$ 52.6	\$ 2.74	\$ 210.4
March 31, 2014	April 22, 2014	May 5, 2014	May 15, 2014	\$ 0.685	\$ 52.5	\$ 2.74	\$ 210.0
June 30, 2014	July 24, 2014	August 4, 2014	August 14, 2014	\$ 0.685	\$ 52.5	\$ 2.74	\$ 210.0
September 30, 2014	October 21, 2014	November 4, 2014	November 14, 2014	\$ 0.685	\$ 52.6	\$ 2.74	\$ 210.4
December 31, 2014	January 23, 2015	February 3, 2015	February 13, 2015	\$ 0.685	\$ 52.7	\$ 2.74	\$ 210.8

Seasonality Impacts on Liquidity

The operating results for the fuel products segment, including the selling prices of asphalt products we produce, generally follow seasonal demand trends. Asphalt demand is generally lower in the first and fourth quarters of the year, as compared to the second and third quarters, due to the seasonality of the road construction and roofing industries we supply. Demand for gasoline and diesel is generally higher during the summer months than during the winter months due to seasonal increases in highway traffic. In addition, our natural gas costs can be higher during the winter months, as demand for natural gas as a heating fuel increases during the winter. As a result, our operating results for the first and fourth calendar quarters may be lower than those for the second and third calendar quarters of each year due to seasonality related to these and other products that we produce and sell.

The operating results for the oilfield services segment follow seasonal changes in weather and significant weather events can temporarily affect the performance and delivery of our oilfield services and products. The severity and duration of the winter can have a significant impact on drilling activity. Additionally, customer spending patterns for other oilfield services and products can result in lower activity in the fourth quarter of the year.

Contractual Obligations and Commercial Commitments

A summary of our total contractual cash obligations as of December 31, 2014 at current maturities is as follows:

	Total	Payments Due by Period			
		Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
(In millions)					
Operating Activities:					
Interest on long-term debt at contractual rates and maturities ⁽¹⁾	\$ 865.9	\$ 127.0	\$ 249.3	\$ 245.8	\$ 243.8
Operating lease obligations ⁽²⁾	181.4	39.3	62.6	43.3	36.2
Letters of credit ⁽³⁾	114.3	88.0	26.3	—	—
Purchase commitments ⁽⁴⁾	1,009.8	563.6	229.3	216.9	—
Pension obligations	15.1	1.6	0.8	2.1	10.6
Employment agreements	6.1	4.4	1.7	—	—
Investing Activities:					
Investment in unconsolidated affiliates	29.5	29.5	—	—	—
Capital expenditures ⁽⁵⁾	1.1	1.1	—	—	—
Financing Activities:					
Capital lease obligations	43.6	0.6	1.4	1.6	40.0
Long-term debt obligations, excluding capital lease obligations	1,675.8	—	—	150.8	1,525.0
Total obligations	\$ 3,942.6	\$ 855.1	\$ 571.4	\$ 660.5	\$ 1,855.6

⁽¹⁾ Interest on long-term debt at contractual rates and maturities relates primarily to interest on our senior notes, revolving credit facility interest and fees and interest on our capital lease obligations, which excludes the adjustment for the interest rate swap agreement.

⁽²⁾ We have various operating leases primarily for railcars, the use of land, storage tanks, compressor stations, equipment, precious metals and office facilities that extend through April 2027.

⁽³⁾ Letters of credit primarily supporting crude oil purchases and precious metals leasing.

⁽⁴⁾ Purchase commitments consist primarily of obligations to purchase fixed volumes of crude oil, other feedstocks, finished products for resale and renewable fuels from various suppliers based on current market prices at the time of delivery.

⁽⁵⁾ Relates to the Montana Refinery Expansion and the San Antonio solvents expansion project. Including the committed amounts in the table above, we currently estimate total capital expenditures in 2015 to be approximately \$255 million to \$295 million.

In connection with the closing of the acquisition of Penreco on January 3, 2008, we entered into a feedstock purchase agreement with Phillips 66 related to the LVT unit at its Lake Charles, Louisiana refinery (the “LVT Feedstock Agreement”). Pursuant to the LVT Feedstock Agreement, Phillips 66 is obligated to supply a minimum quantity (the “Base Volume”) of feedstock for the LVT unit for a term of ten years. Based upon this minimum supply quantity, we expect to purchase \$41.5 million of feedstock for the LVT unit in each fiscal year of the term based on pricing estimates as of December 31, 2014. This amount is not included in the table above.

For additional information regarding our expected capital and turnaround expenditures, for which we have not contractually committed, refer to “Capital Expenditures” above.

Off-Balance Sheet Arrangements

We did not enter into any material off-balance sheet debt or operating lease transactions during the fiscal year 2014.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements for the years ended December 31, 2014, 2013 and 2012. These consolidated financial statements have been prepared in accordance with GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the amounts reported in those financial statements. On an ongoing basis, we evaluate estimates and base our estimates on historical experience and assumptions believed to be reasonable under the circumstances. Those estimates form the basis for our judgments that affect the amounts reported in the financial statements. Actual results could differ from our estimates under different assumptions or conditions. Our significant accounting policies, which may be affected by our estimates and assumptions, are more fully described in Note 2 “Summary of Significant Accounting Policies” in Part II, Item 8 “Financial Statements and Supplementary Data.” We believe that the following are the more critical judgment areas in the application of our accounting policies that currently affect our financial condition and results of operations.

Revenue Recognition

The Company recognizes revenue on orders received from its customers when there is persuasive evidence of an arrangement with the customer that is supportive of revenue recognition, the customer has made a fixed commitment to purchase the product for a fixed or determinable sales price, collection is reasonably assured under the Company’s normal billing and credit terms, all of the Company’s obligations related to the product have been fulfilled and ownership and all risks of loss have been transferred to the buyer, which is primarily upon shipment to the customer or, in certain cases, upon receipt by the customer in accordance with contractual terms. The Company recognizes revenue on certain drilling fluids, completion fluids and production chemicals when consumed at the customer site during the drilling process.

We maintain an allowance for doubtful accounts for estimated losses in the collection of accounts receivable.

Inventory

The cost of inventory is recorded using the last-in, first-out (“LIFO”) method. Costs include crude oil and other feedstocks, labor, processing costs and refining overhead costs. Inventories are valued at the lower of cost or market. Under the LIFO method, the most recently incurred costs are charged to cost of sales and inventories are valued at the earliest acquisition costs. In periods of rapidly declining prices, LIFO inventories may have to be written down to market value due to the higher costs assigned to LIFO layers in prior periods. In addition, the use of the LIFO inventory method may result in increases or decreases to cost of sales in years that inventory volumes decline as the result of charging cost of sales with LIFO inventory costs generated in prior periods. Accordingly, interim LIFO calculations are based on management’s estimates of expected year-end inventory levels and are subject to the final year-end LIFO inventory valuation.

Significant Estimates and Assumptions

Judgment is required in determining the market value of inventory, as the geographic location impacts market prices, and quoted market prices may not be available for the particular location of our inventory. Because crude oil and refined products are essentially commodities, we have no control over the changing market value of these inventories. Because our inventory is valued at the lower of cost or market, if the market value of our inventory were to decline to an amount less than our cost, we would record a write-down of inventory and a charge to cost of sales. In a period of decreasing crude oil or refined product prices, our inventory valuation methodology may result in decreases in net income.

Sensitivity Analysis

We have not made any material changes in the accounting methodology we use to establish our markdown or inventory loss adjustments during the past three fiscal years.

The replacement cost of our inventory, based on current market values, would have been \$18.9 million lower and \$32.2 million higher at December 31, 2014 and 2013, respectively. During the years ended December 31, 2014 and 2013, we recorded \$74.1 million of losses and \$2.1 million of gains, respectively, in cost of sales in the consolidated statements of operations due to lower of cost or market inventory valuation. During the year ended December 31, 2014, we recorded \$31.8 million of losses in cost of sales in the consolidated statements of operations due to the liquidation of higher cost LIFO inventory layers. During the year ended December 31, 2013, we recorded \$4.2 million of gains in cost of sales in the consolidated statements of operations due to the liquidation of lower cost LIFO inventory layers.

Valuation of Definite Long-Lived Assets

Property, plant and equipment and intangible assets with finite lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the estimated undiscounted future cash flows related to the asset are less than the carrying value, we recognize a loss equal to the difference between the carrying value and the estimated fair value, usually determined by the estimated discounted future cash flows of the asset. When a decision has been made to dispose of property and equipment prior to the end of the previously estimated useful life, depreciation estimates are revised to reflect the use of the asset over the shortened estimated useful life.

Significant Estimates and Assumptions

Estimated undiscounted future cash flows used for the purpose of testing our definite long-lived assets for impairment. Fair values calculated for the purpose of measuring impairments on definite long-lived assets are estimated using the expected present value of future cash flows method and comparative market prices when appropriate. Significant judgment is involved in estimating undiscounted future cash flows and performing these fair value estimates since the results are based on forecasted assumptions. Significant assumptions include:

- *Future margins on products produced and sold.* Our estimates of future product margins are based on our analysis of various supply and demand factors, which include, among other things, industry-wide capacity, our planned utilization rate, end-user demand, capital expenditures and economic conditions. Such estimates are consistent with those used in our planning and capital investment reviews.
- *Future capital requirements.* These are based on authorized spending and internal forecasts.
- *Discount rate commensurate with the risks involved.* We apply a discount rate to our cash flows based on a variety of factors, including market and economic conditions, operational risk, regulatory risk and political risk. This discount rate is also compared to recent observable market transactions, if possible. A higher discount rate decreases the net present value of cash flows.

We base our estimated undiscounted future cash flows and fair value estimates on projected financial information which we believe to be reasonable. However, actual results may differ from these projections.

Sensitivity Analysis

An estimate of the sensitivity to net income resulting from impairment calculations is not practicable, given the numerous assumptions (e.g., pricing, volumes and discount rates) that can materially affect our estimates. That is, unfavorable adjustments to some of the above listed assumptions may be offset by favorable adjustments in other assumptions.

Valuation of Goodwill and Indefinite Lived Intangible Assets

We review goodwill for impairment annually on October 1 and whenever events or changes in circumstances indicate its carrying value may not be recoverable in accordance with ASC 350, *Intangibles — Goodwill and Other (Topic 350): Testing Goodwill for Impairment* (“ASU 2011-08”). Under ASU 2011-08, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary.

In assessing the qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, we assess relevant events and circumstances that may impact the fair value and the carrying amount of the reporting unit. The identification of relevant events and circumstances and how these may impact a reporting unit’s fair value or carrying amount involve significant judgment and assumptions. The judgment and assumptions include the identification of macroeconomic conditions, industry and market considerations, cost factors, overall financial performance and Company specific events and making the assessment on whether each relevant factor will impact the impairment test positively or negatively and the magnitude of any such impact.

If our qualitative assessment concludes that it is probable that an impairment exists or we skip the qualitative assessment, then we need to perform a quantitative assessment. In the first step of the quantitative assessment, our assets and liabilities, including existing goodwill and other intangible assets, are assigned to the identified reporting units to determine the carrying value of the reporting units. If the carrying value of a reporting unit is in excess of its fair value, an impairment may exist, and we must perform an impairment analysis, in which the implied fair value of the goodwill is compared to its carrying value to determine the impairment charge, if any.

When performing the quantitative assessment, the fair value of the reporting units is determined using the income approach. The income approach focuses on the income-producing capability of an asset, measuring the current value of the

asset by calculating the present value of its future economic benefits such as cash earnings, cost savings, corporate tax structure and product offerings. Value indications are developed by discounting expected cash flows to their present value at a rate of return that incorporates the risk-free rate for the use of funds, the expected rate of inflation, and risks associated with the reporting unit.

Intangible assets with an indefinite life are not amortized but are subject to review each reporting period to determine whether events and circumstances continue to support an indefinite useful life as well as an annual impairment test.

Due to falling crude oil prices in the fourth quarter of 2014, we updated our goodwill impairment analysis as of December 31, 2014, resulting in the fair value of one reporting unit to be less than its carrying value. The discount rate used in our reporting unit valuation was 13.5%. Revenue growth rates assumed for this reporting unit ranged from -7% to 15% in 2015 through 2020 and 3% thereafter. A significant decline in our revenue and earnings or a significant decline in the price of common stock could result in an impairment charge in the future. An impairment charge of \$36.0 million was recorded on goodwill as a result of this step 2 analysis. Subsequent to the impairment charge, goodwill on this one reporting unit of \$33.8 million was recorded on the consolidated balance sheet.

Significant Estimates and Assumptions

Fair values calculated for the purpose of testing our goodwill and indefinite lived intangible assets for impairment is estimated using the expected present value of future cash flows method and comparative market prices when appropriate. Significant judgment is involved in performing these fair value estimates since the results are based on forecasted assumptions. Significant assumptions include:

- *Future margins on products produced and sold.* Our estimates of future product margins are based on our analysis of various supply and demand factors, which include, among other things, industry-wide capacity, our planned utilization rate, end-user demand, crack spreads, capital expenditures and economic conditions. Such estimates are consistent with those used in our planning and capital investment reviews and include recent historical prices and published forward prices.
- *Discount rate commensurate with the risks involved.* We apply a discount rate to our cash flows based on a variety of factors, including market and economic conditions, operational risk, regulatory risk and political risk. This discount rate is also compared to recent observable market transactions, if possible. A higher discount rate decreases the net present value of cash flows.
- *Future capital requirements.* These are based on authorized spending and internal forecasts.

We base our fair value estimates on projected financial information which we believe to be reasonable. However, actual results may differ from these projections.

Sensitivity Analysis

An estimate of the sensitivity to net income resulting from impairment calculations is not practicable, given the numerous assumptions (e.g., pricing, volumes and discount rates) that can materially affect our estimates. That is, unfavorable adjustments to some of the above listed assumptions may be offset by favorable adjustments in other assumptions.

Fair Value of Financial Instruments

As of December 31, 2014, approximately 32% of our recurring assets and approximately 21% of our recurring liabilities were measured at fair value and classified as Level 3 in the fair value hierarchy.

Derivative Instruments

In accordance with ASC 815-10, *Derivatives and Hedging*, we recognize all derivative instruments as either assets or liabilities at fair value on the consolidated balance sheets. Our derivative instruments are valued at Level 3 fair value measurement under ASC 820-10, *Fair Value Measurements and Disclosures*, depending upon the degree by which inputs are observable.

The increase in the fair market value of our outstanding derivative instruments from a net liability of \$54.8 million as of December 31, 2013 to a net asset of \$17.6 million as of December 31, 2014 was due primarily to decreases in the forward market values of fuel products margins, or crack spreads, relative to our hedged products margins and settlements of derivatives in 2014 that resulted in realized gains. We recorded realized gains of \$43.8 million and unrealized losses of \$0.6 million on derivative instruments for the year ended December 31, 2014.

The decrease in the fair market value of our outstanding derivative instruments from a net liability of \$44.9 million as of December 31, 2012 to a net liability of \$54.8 million as of December 31, 2013 was due primarily to increases in the forward

market values of fuel products margins, or crack spreads, relative to our hedged products margins and settlements of derivatives in 2013 that resulted in realized losses.

Significant Estimates and Assumptions

Our derivative instruments consist of over-the-counter (“OTC”) contracts, which are not traded on a public exchange. Substantially all of our derivative instruments are with counterparties that have long-term credit ratings of at least Baa2 and A- by Moody’s and S&P, respectively.

To estimate the fair values of our derivative instruments, we use the forward rate, the strike price, contractual notional amounts, the risk free rate of return and contract maturity. Various analytical tests are performed to validate the counterparty data. The fair values of our derivative instruments are adjusted for nonperformance risk and creditworthiness of the hedging entities through our credit valuation adjustment (“CVA”). The CVA is calculated at the counterparty level utilizing the fair value exposure at each payment date and applying a weighted probability of the appropriate survival and marginal default percentages. We use the counterparty’s marginal default rate and our survival rate when we are in a net asset position at the payment date and use our marginal default rate and the counterparty’s survival rate when we are in a net liability position at the payment date. As a result of applying the applicable CVA at December 31, 2014, our net asset was increased by approximately \$2.0 million and net liability was reduced by approximately \$0.1 million. As a result of applying the CVA at December 31, 2013, our net liability was reduced by approximately \$1.9 million.

Observable inputs utilized to estimate the fair values of our derivative instruments were primarily based on inputs that are readily available in public markets or can be derived from information available in publicly quoted markets. Based on the use of various unobservable inputs, principally non-performance risk, creditworthiness of the hedging entities and unobservable inputs in the forward rate, we have categorized these derivative instruments as Level 3. Significant increases (decreases) in any of those unobservable inputs in isolation would result in a significantly lower (higher) fair value measurement. We believe we have obtained the most accurate information available for the types of derivative instruments we hold. See Note 8 “Derivatives” in Part II, Item 8 “Financial Statements and Supplementary Data” for further information on derivative instruments.

Sensitivity Analysis

We have not made any material changes in the accounting methodology we use to establish our derivative values or pension asset valuations during the past three fiscal years. We have consistently applied these valuation techniques in all periods presented and believe we obtained the most accurate information available for the types of derivative instruments and pension assets we hold.

We believe that the fair values of our derivative instruments may diverge materially from the amounts currently recorded at fair value at settlement due to the volatility of commodity prices. Holding all other variables constant, we expect a \$1 increase in the applicable commodity prices would change our recorded mark-to-market valuation by the following amounts based upon the volumes hedged as of December 31, 2014:

	In millions
Crude oil swaps	\$ 2.2
Crude oil basis swaps	\$ 0.1
Crude oil percent basis swaps	\$ (0.4)
Diesel crack spread swap contracts	\$ (2.5)
Diesel swaps	\$ (1.7)
Gasoline swaps	\$ (0.3)
Natural gas swaps	\$ 14.4
Natural gas collars	\$ 1.5

Recent Accounting Pronouncements

For a summary of recently issued and adopted accounting standards applicable to us, see Note 2 “Summary of Significant Accounting Policies” in Part II, Item 8 “Financial Statements and Supplementary Data.”

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Commodity Price Risk

Derivative Instruments

We are exposed to price risks due to fluctuations in the price of crude oil, refined products (primarily in our fuel products segment), natural gas and precious metals. We use various strategies to reduce our exposure to commodity price risk. We do not

attempt to eliminate all of our risk as the costs of such actions are believed to be too high in relation to the risk posed to our future cash flows, earnings and liquidity. The strategies we use to reduce our risk utilize both physical forward contracts and financially settled derivative instruments, such as swaps, collars and options, to attempt to reduce our exposure with respect to:

- crude oil purchases and sales;
- refined product sales and purchases;
- natural gas purchases;
- precious metals; and
- fluctuations in the value of crude oil between geographic regions and between the different types of crude oil such as NYMEX WTI, Light Louisiana Sweet (“LLS”), Western Canadian Select (“WCS”), Mixed Sweet Blend (“MSW”) and ICE Brent (“Brent”).

We manage our exposure to commodity markets, credit, volumetric and liquidity risks to manage our costs and volatility of cash flows as conditions warrant or opportunities become available. These risks may be managed in a variety of ways that may include the use of derivative instruments. Derivative instruments may be used for the purpose of mitigating risks associated with an asset, liability and anticipated future transactions and the changes in fair value of our derivative instruments will affect our earnings and cash flows; however, such changes should be offset by price or rate changes related to the underlying commodity or financial transaction that is part of the risk management strategy. We do not speculate with derivative instruments or other contractual arrangements that are not associated with our business objectives. Speculation is defined as increasing our natural position above the maximum position of our physical assets or trading in commodities, currencies or other risk bearing assets that are not associated with our business activities and objectives. Our positions are monitored routinely by a risk management committee and discussed with our board of directors quarterly to ensure compliance with our stated risk management policy and documented risk management strategies. All strategies are reviewed on an ongoing basis by our risk management committee, which will add, remove or revise strategies in anticipation of changes in market conditions and/or in risk profiles. These changes in strategies are to position us in relation to our risk exposures in an attempt to capture market opportunities as they arise.

As of December 31, 2014, we had primarily entered into swap contracts on forecasted purchases from 2015 through 2016 of NYMEX WTI crude oil and forecasted sales of U.S. Gulf Coast ultra-low sulfur diesel, U.S. Gulf Coast jet fuel and U.S. Gulf Coast gasoline. These derivative instruments, on a combined basis, were entered into to hedge a portion of our gross profit in our fuel products segment. We have also entered into basis swap contracts that improve the effectiveness of our crude oil swap contracts by locking in the spread between NYMEX WTI and the crude oil that we are actually purchasing for use by our facilities.

The following table provides a summary of the implied crack spreads for our crude oil and diesel fuel swaps on a combined basis as of December 31, 2014 in our fuel products segment:

<u>Crude Oil and Diesel Swap Contracts by Expiration Dates</u>	<u>Barrels</u>	<u>BPD</u>	<u>Implied Crack Spread (\$/Bbl)</u>
Second Quarter 2015	91,000	1,000	\$ 28.03
Third Quarter 2015	138,000	1,500	\$ 28.02
Fourth Quarter 2015	138,000	1,500	\$ 28.02
Calendar Year 2016	732,000	2,000	\$ 26.71
Total	1,099,000		
Average price			\$ 27.15

The following table provides a summary of the implied crack spreads for our crude oil and gasoline fuel swaps on a combined basis as of December 31, 2014 in our fuel products segment:

<u>Crude Oil and Gasoline Swap Contracts by Expiration Dates</u>	<u>Barrels</u>	<u>BPD</u>	<u>Implied Crack Spread (\$/Bbl)</u>
First Quarter 2015	315,000	3,500	\$ 13.18
Total	315,000		
Average price			\$ 13.18

During 2014, we entered into crack spread derivative instruments to secure a fixed percentage of gross profit on diesel in excess of the floating value of NYMEX WTI crude oil. The following table provides a summary of diesel percent basis crack spread swap contracts as of December 31, 2014 in our fuel products segment:

<u>Diesel Crack Spread Swap Contracts by Expiration Dates</u>	<u>Barrels Sold</u>	<u>BPD</u>	<u>Average % of WTI/Bbl</u>
Third Quarter 2015	414,000	4,500	33.2%
Fourth Quarter 2015	414,000	4,500	33.2%
Calendar Year 2016	1,647,000	4,500	31.7%
Total	2,475,000		
Average percentage			32.2%

The following table provides a summary of crude oil percent basis swap contracts related to crude oil purchases as of December 31, 2014 in our fuel products segment:

<u>Crude Oil Percent Basis Swap Contracts by Expiration Dates</u>	<u>Barrels Purchased</u>	<u>BPD</u>	<u>Fixed Percentage of NYMEX WTI (Average % of WTI/Bbl)</u>
Third Quarter 2015	184,000	2,000	73.0%
Fourth Quarter 2015	184,000	2,000	73.0%
Total	368,000		
Average percentage			73.0%

The following table provides a summary of natural gas swaps as of December 31, 2014 in our specialty products segment:

<u>Natural Gas Swap Contracts by Expiration Dates</u>	<u>MMBtu</u>	<u>\$/MMBtu</u>
First Quarter 2015	1,770,000	\$ 4.09
Second Quarter 2015	1,500,000	\$ 4.11
Third Quarter 2015	1,500,000	\$ 4.11
Fourth Quarter 2015	1,900,000	\$ 4.12
Calendar Year 2016	5,880,000	\$ 4.22
Calendar Year 2017	1,830,000	\$ 4.28
Total	14,380,000	
Average price		\$ 4.18

The following table provides a summary of natural gas collars as of December 31, 2014 in our specialty products segment:

<u>Natural Gas Collars by Expiration Dates</u>	<u>MMBtu</u>	<u>Average Bought Call (\$/MMBtu)</u>	<u>Average Sold Put (\$/MMBtu)</u>
First Quarter 2015	240,000	\$ 4.25	\$ 3.79
Second Quarter 2015	240,000	\$ 4.25	\$ 3.79
Third Quarter 2015	240,000	\$ 4.25	\$ 3.79
Fourth Quarter 2015	200,000	\$ 4.25	\$ 3.85
Calendar Year 2016	600,000	\$ 4.25	\$ 3.89
Total	1,520,000		
Average price		\$ 4.25	\$ 3.84

Subsequent to December 31, 2014, we entered into the following diesel percent basis crack spread swap contracts in our fuel products segment:

Diesel Crack Spread Swap Contracts by Expiration Dates	Barrels Sold	BPD	Average % of WTI/Bbl
Third Quarter 2015	92,000	1,000	32.6%
Fourth Quarter 2015	92,000	1,000	32.6%
Calendar Year 2016	549,000	1,500	32.0%
Total	733,000		
Average percentage			32.2%

Subsequent to December 31, 2014, we entered into the following implied crack spreads for our crude oil and diesel fuel swaps on a combined basis in our fuel products segment:

Crude Oil and Diesel Swap Contracts by Expiration Dates	Barrels Sold	BPD	Implied Crack Spread (\$/Bbl)
Third Quarter 2015	46,000	500	\$ 18.99
Fourth Quarter 2015	46,000	500	\$ 18.99
Calendar Year 2016	366,000	1,000	\$ 19.64
Total	458,000		
Average price			\$ 19.51

Subsequent to December 31, 2014, we entered into the following implied crack spreads for our crude oil and gasoline fuel swaps on a combined basis in our fuel products segment:

Crude Oil and Gasoline Swap Contracts by Expiration Dates	Barrels	BPD	Implied Crack Spread (\$/Bbl)
First Quarter 2015	423,500	4,706	\$ 12.81
Second Quarter 2015	1,274,000	14,000	\$ 16.82
Third Quarter 2015	322,000	3,500	\$ 14.31
Total	2,019,500		
Average price			\$ 15.58

Please read Note 8 “Derivatives” in the notes to our consolidated financial statements under Part II, Item 8 “Financial Statements and Supplementary Data” for a discussion of the accounting treatment for the various types of derivative instruments, and a further discussion of our hedge accounting policies and more information relating to our implied crack spreads of crude oil, diesel, gasoline and jet fuel derivative instruments.

Our derivative instruments and overall specialty products segment and fuel products segment hedging positions are monitored regularly by our risk management committee, which includes our executive officers. The risk management committee reviews market information and our hedging positions regularly to determine if additional derivatives activity is required. A summary of derivative positions and a summary of hedging strategy are presented to our general partner’s board of directors quarterly.

The following table illustrates how a change in market price (holding all other variables constant and excluding the impact of our current hedges) would affect our sales and cost of sales in the consolidated statements of operations:

	Sales		Cost of Sales	
	Year Ended December 31,		Year Ended December 31,	
	2014	2013	2014	2013
	(In millions)			
Fuel Products:				
\$1.00 change in per barrel price of crude oil ⁽¹⁾			\$ 25.7	\$ 23.9
\$1.00 change in per barrel selling price of gasoline, diesel and jet fuel ⁽¹⁾	\$ 25.7	\$ 23.9		
Specialty Products:				
\$1.00 change in per barrel price of crude oil ⁽¹⁾			\$ 9.1	\$ 9.6
\$0.50 change in MMBtu (one million British Thermal Units) of natural gas ⁽²⁾			\$ 6.0	\$ 5.6

⁽¹⁾ Based on our 2014 and 2013 sales volumes.

⁽²⁾ Based on our results for the years ended December 31, 2014 and 2013.

Revolving Credit Facility

Borrowings under the revolving credit facility are limited to a borrowing base that is determined based on advance rates of percentages of Eligible Accounts Receivable and Eligible Inventory (as defined in the revolving credit agreement). As such, the borrowing base can fluctuate based on changes in selling prices of our products and our current material costs, primarily the cost of crude oil. Our inventory is based on local crude oil prices at period end, which can materially fluctuate period to period.

Pension Assets Volatility and Investment Policy

Our Pension Plan assets are also subject to volatility that can be caused by fluctuation in general economic conditions. Plan assets are invested by the Plan's fiduciaries, which direct investments according to specific policies. Our consolidated statement of operations is currently shielded from volatility in plan assets due to the way accounting standards are applied for pension plans, although favorable or unfavorable investment performance over the long term will impact our pension expense if it deviates from our assumption related to the future rate of return. Please read Note 12 "Employee Benefit Plans" under Part II, Item 8 "Financial Statements and Supplementary Data" for a further discussion of our investment policies.

Compliance Price Risk

Renewable Identification Numbers

We are exposed to market risks related to the volatility in the price of credits needed to comply with governmental programs. The EPA sets annual quotas for the percentage of biofuels that must be blended into transportation fuels consumed in the U.S., and as a producer of motor fuels from petroleum, we are required to blend biofuels into the fuel products we produce at a rate that will meet the EPA's annual quota. On October 7, 2014, we received correspondence from the EPA evidencing the approval of a one-year extension of the small refinery exemption from the requirements of the RFS for our Shreveport and San Antonio refineries for the 2013 calendar year. To the extent we are unable to blend biofuels at that rate, we must purchase RINs in the open market to satisfy the annual requirement. We have not entered into any derivative instruments to manage this risk, but we have purchased RINs when the price of these instruments is deemed favorable.

Holding other variables constant (RINs requirements), a \$1.00 change in the price of RINs as of December 31, 2014 would be expected to have an impact on net income for 2014 of approximately \$87.0 million.

Interest Rate Risk

We use various strategies to reduce our exposure to interest rate risk, including the use of financially settled derivative instruments, such as interest rate swaps and options, to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Our goal is to manage interest rate sensitivity by modifying the pricing characteristics of certain debt instruments so that earnings are not adversely affected by movement in interest rates. During 2014, we entered into an interest rate swap agreement that converted a portion of our senior notes from a fixed interest rate to a variable rate that fluctuates based on changes in the one-month London Interbank Offered Rate ("LIBOR"). During the first quarter 2015, we terminated this interest rate swap agreement. We have disclosed this interest rate swap designated as a fair value hedge in Note 8 "Derivatives" under Part II, Item 8 "Financial Statements and Supplementary Data."

For the balance of our long-term debt that is not subject to interest rate swap arrangements, our exposure to interest rate changes is limited to the fair value of the debt issued, which would not have a material impact on our earnings or cash flows. The following table provides information about the fair value of our fixed rate debt obligations as of December 31, 2014 and 2013, which we disclose in Note 7 “Long-Term Debt” and Note 9 “Fair Value Measurements” under Part II, Item 8 “Financial Statements and Supplementary Data.”

	December 31, 2014		December 31, 2013	
	Fair Value	Carrying Value	Fair Value	Carrying Value
	(In millions)			
Financial Instrument:				
2019 Notes	\$ —	\$ —	\$ 554.2	\$ 490.5
2020 Notes	\$ 290.5	\$ 271.3	\$ 309.4	\$ 270.7
2021 Notes	\$ 803.3	\$ 900.0	\$ —	\$ —
2022 Notes	\$ 339.5	\$ 347.8	\$ 353.9	\$ 344.8

For our variable rate debt, if any, changes in interest rates generally do not impact the fair value of the debt instrument, but may impact our future earnings and cash flows. We had a \$1.0 billion revolving credit facility as of December 31, 2014, with borrowings bearing interest at the prime rate or LIBOR, at our option, plus the applicable margin. Borrowings under this facility are variable. We had \$150.8 million of variable rate debt as of December 31, 2014. Holding other variables constant (such as debt levels), a 100 basis point change in interest rates on our variable rate debt as of December 31, 2014 would be expected to have an impact on net income and cash flows for 2014 of approximately \$1.5 million. We had no variable rate debt outstanding as of December 31, 2013.

Foreign Currency Risk

We have minimal exposure to foreign currency risk and as such the cost of hedging this risk is viewed to be in excess of the benefit of further reductions in our exposure to foreign currency exchange rate fluctuations.

Item 8. Financial Statements and Supplementary Data

Management's Report on Internal Control Over Financial Reporting

The management of Calumet Specialty Products Partners, L.P. (the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Anchor Drilling Fluids USA, Inc. and Anchor Oilfield Services, which are included in the Company's 2014 consolidated financial statements and constituted \$375,377,000 and \$282,309,000 of the Company's total and net assets, respectively, as of December 31, 2014 and \$368,449,000 and \$14,726,000 of the Company's sales and net loss, respectively, for the year then ended. Management also did not perform an evaluation of the internal control over financial reporting of Anchor Drilling Fluids USA, Inc. and Anchor Oilfield Services.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014, based on criteria for effective internal control over financial reporting described in "Internal Control — Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) ("COSO"). Based on this assessment, we have concluded that internal control over financial reporting was effective as of December 31, 2014.

Ernst & Young LLP, an independent registered public accounting firm, has audited the Company's consolidated financial statements and has issued an attestation report on the effectiveness of internal control over financial reporting which appears on the following page.

March 2, 2015

R. Patrick Murray, II
Executive Vice President, Chief Financial Officer and Secretary
of Calumet GP, LLC (Principal Accounting and Financial
Officer)

Report of Independent Registered Public Accounting Firm

The Board of Directors of Calumet GP, LLC
General Partner of Calumet Specialty Products Partners, L.P.

We have audited Calumet Specialty Products Partners, L.P.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Calumet Specialty Products Partners, L.P.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Anchor Drilling Fluids USA, Inc. and Anchor Oilfield Services, which are included in the 2014 consolidated financial statements of Calumet Specialty Products Partners, L.P. and constituted \$375,377,000 and \$282,309,000 of total and net assets, respectively, as of December 31, 2014 and \$368,449,000 and \$14,726,000 of sales and net loss, respectively, for the year then ended. Our audit of internal control over financial reporting of Calumet Specialty Products Partners, L.P. also did not include an evaluation of the internal control over financial reporting of Anchor Drilling Fluids USA, Inc. and Anchor Oilfield Services.

In our opinion Calumet Specialty Products Partners, L.P. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Calumet Specialty Products Partners, L.P. as of December 31, 2014 and 2013, and the related consolidated statements of operations and comprehensive income (loss), partners' capital and cash flows for each of the three years in the period ended December 31, 2014 of Calumet Specialty Products Partners, L.P. and our report dated March 2, 2015 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors of Calumet GP, LLC
General Partner of Calumet Specialty Products Partners, L.P.

We have audited the accompanying consolidated balance sheets of Calumet Specialty Products Partners, L.P. as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income (loss), partners' capital and cash flows for each of the three years in the period ended December 31, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Calumet Specialty Products Partners, L.P. at December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Calumet Specialty Products Partners, L.P.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated March 2, 2015 expressed an unqualified opinion thereon.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of the Business

Calumet Specialty Products Partners, L.P. (the “Company”) is a publicly traded Delaware limited partnership listed on the NASDAQ Global Select Market (“NASDAQ”) under the ticker symbol “CLMT.” The general partner of the Company is Calumet GP, LLC, a Delaware limited liability company. As of December 31, 2014, the Company had 69,452,233 limited partner common units and 1,417,392 general partner equivalent units outstanding. The general partner owns 2% of the Company and all of the incentive distribution rights (as defined in the Company’s partnership agreement), while the remaining 98% is owned by limited partners. The general partner employs all of the Company’s employees and the Company reimburses the general partner for certain of its expenses.

The Company is engaged in the production and marketing of crude oil-based specialty products including lubricating oils, white mineral oils, solvents, petrolatums, waxes, drilling fluids and fuel and fuel related products including gasoline, diesel, jet fuel, asphalt and heavy fuel oils in addition to oilfield services and products. The Company is also engaged in the resale of purchased crude oil to third party customers. The Company is based in Indianapolis, Indiana and owns specialty and fuel products facilities primarily located in northwest Louisiana, northwest Wisconsin, northern Montana, western Pennsylvania, Texas, New Jersey, eastern Missouri and North Dakota. We own and lease oilfield services locations in Texas, Oklahoma, Louisiana, Arkansas, Colorado, Utah, Wyoming, Montana, New Mexico, New York, North Dakota, Pennsylvania and Ohio. We own and lease additional facilities, primarily related to the production and distribution of specialty, fuel and oilfield services products, throughout the United States (“U.S.”).

2. Summary of Significant Accounting Policies

Consolidation

The consolidated financial statements reflect the accounts of the Company and its wholly-owned and majority-owned subsidiaries. All intercompany profits, transactions and balances have been eliminated.

Reclassifications

Certain amounts in the prior years’ consolidated financial statements have been reclassified to conform to the current year presentation.

Use of Estimates

The Company’s consolidated financial statements are prepared in conformity with U.S. generally accepted accounting (“U.S. GAAP”) principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents includes all highly liquid investments with a maturity of three months or less at the time of purchase.

Accounts Receivable

The Company performs periodic credit evaluations of customers’ financial condition and generally does not require collateral. Accounts receivable are carried at their face amounts and are generally due within 30 days to 45 days from date of invoice for the specialty products and oilfield services segments and 10 days from date of invoice for the fuel products segment. The Company maintains an allowance for doubtful accounts for estimated losses in the collection of accounts receivable. The Company makes estimates regarding the future ability of its customers to make required payments based on historical experience, the age of the accounts receivable balances, credit quality of the Company’s customers, current economic conditions, expected future trends and other factors that may affect customers’ ability to pay. Individual accounts are written off against the allowance for doubtful accounts after all reasonable collection efforts have been exhausted.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The activity in the allowance for doubtful accounts was as follows (in millions):

	December 31,		
	2014	2013	2012
Beginning balance	\$ 1.2	\$ 1.2	\$ 0.9
Provision	0.5	0.1	—
Recoveries	—	—	0.4
Write-offs, net	(0.1)	(0.1)	(0.1)
Ending balance	<u>\$ 1.6</u>	<u>\$ 1.2</u>	<u>\$ 1.2</u>

Inventories

The cost of inventory is recorded using the last-in, first-out (“LIFO”) method. Costs include crude oil and other feedstocks, labor, processing costs and refining overhead costs. Inventories are valued at the lower of cost or market value. The replacement cost of these inventories, based on current market values, would have been \$18.9 million lower and \$32.2 million higher as of December 31, 2014 and 2013, respectively. At December 31, 2014 and 2013, the Company had \$8.2 million and \$2.6 million, respectively, of consigned inventory.

Inventories consist of the following (in millions):

	December 31,	
	2014	2013
Raw materials	\$ 77.8	\$ 122.7
Work in process	75.4	102.6
Finished goods	360.3	342.1
	<u>\$ 513.5</u>	<u>\$ 567.4</u>

Under the LIFO method, the most recently incurred costs are charged to cost of sales and inventories are valued at the earliest acquisition costs. For each of the years ended December 31, 2014, 2013 and 2012, the Company recorded gains and (losses) of \$(31.8) million, \$4.2 million and \$(4.2) million, respectively, in cost of sales in the consolidated statements of operations due to the liquidation of inventory layers.

In addition, the use of the LIFO inventory method may result in increases or decreases to cost of sales in years that inventory volumes decline as the result of charging cost of sales with LIFO inventory costs generated in prior periods. In periods of rapidly declining prices, LIFO inventories may have to be written down to market value due to the higher costs assigned to LIFO layers in prior periods. During the years ended December 31, 2014 and 2012 the Company recorded \$74.1 million and \$6.1 million, respectively, of losses in cost of sales in the consolidated statements of operations due to the lower of cost or market valuation. During the year ended December 31, 2013, the Company recorded \$2.1 million of gains in cost of sales in the consolidated statements of operations due to the lower of cost or market valuation.

Derivatives

The Company is exposed to fluctuations in the price of numerous commodities, such as crude oil (its principal raw material) and natural gas, as well as the sales prices of gasoline, diesel and jet fuel. Given the historical volatility of commodity prices, these fluctuations can significantly impact sales, gross profit and net income. Therefore, the Company utilizes derivative instruments primarily to minimize its price risk and volatility of cash flows associated with the purchase of crude oil and natural gas and the sale of fuel products. The Company employs various hedging strategies and does not hold or issue derivative instruments for trading purposes. For further information, please refer to Note 8.

Property, Plant and Equipment

Property, plant and equipment are stated on the basis of cost. Depreciation is calculated generally on composite groups, using the straight-line method over the estimated useful lives of the respective groups. Assets under capital leases are amortized over the lesser of the useful life of the asset or the term of the lease.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Property, plant and equipment, including depreciable lives, consisted of the following (in millions):

	December 31,	
	2014	2013
Land	\$ 18.3	\$ 17.6
Buildings and improvements (10 to 40 years)	66.8	39.1
Machinery and equipment (10 to 20 years)	1,419.1	1,327.4
Furniture and fixtures (5 to 10 years)	21.8	21.7
Assets under capital leases (10 to 28 years)	50.5	11.1
Construction-in-progress	354.0	121.5
	<u>1,930.5</u>	<u>1,538.4</u>
Less accumulated depreciation	(466.1)	(378.0)
	<u>\$ 1,464.4</u>	<u>\$ 1,160.4</u>

Under the composite depreciation method, the cost of partial retirements of a group is charged to accumulated depreciation. However, when there are dispositions of complete groups or significant portions of groups, the cost and related accumulated depreciation are retired, and any gain or loss is reflected in earnings.

During 2014, 2013 and 2012, the Company incurred \$122.8 million, \$101.2 million and \$86.3 million, respectively, of interest expense of which \$12.0 million, \$4.4 million and \$0.7 million, respectively, was capitalized as a component of property, plant and equipment.

The Company has not recorded an asset retirement obligation as of December 31, 2014 or 2013 because such potential obligations cannot be measured since it is not possible to estimate the settlement dates.

During the years ended December 31, 2014, 2013 and 2012, the Company recorded \$98.3 million, \$92.0 million and \$74.3 million, respectively, of depreciation expense on its property, plant and equipment. Depreciation expense included \$0.8 million, \$0.7 million and \$1.0 million for the years ended 2014, 2013 and 2012, respectively, related to the Company's capital lease assets.

The Company capitalizes the cost of computer software developed or obtained for internal use. Capitalized software is amortized using the straight-line method over five years. As of December 31, 2014 and 2013, the Company has \$17.4 million and \$17.3 million, respectively, of unamortized capitalized software costs. During the years ended December 31, 2014, 2013 and 2012, the Company recorded \$3.4 million, \$3.3 million, and \$1.0 million, respectively, of amortization expense on capitalized computer software.

Investment in Unconsolidated Affiliates

The Company accounts for its ownership in its Dakota Prairie Refining, LLC and Juniper GTL LLC joint ventures in accordance with ASC 323, *Investments — Equity Method and Joint Ventures*. The equity method of accounting is applied when the investor has an ownership interest of less than 50% and/or has significant influence over the operating or financial decisions of the investee. Under the equity method, the Company's proportionate share of net income (loss) is reflected as a single-line item in the consolidated statements of operations and increases or decreases, as applicable, in the carrying value of the Company's investment in the consolidated balance sheets. In addition, the proportionate share of net income (loss) is reflected as a non-cash activity in operating activities in the consolidated statements of cash flows. Contributions increase the carrying value of the investment and are reflected as an investing activity in the consolidated statements of cash flows.

Equity method investments are assessed for other-than-temporary impairment when the investment generates net losses. No impairment was recognized in 2014 or 2013. For further information on investment in unconsolidated affiliates, refer to Note 4.

Goodwill and Indefinite Lived Intangible Assets

Goodwill represents the excess of purchase price over fair value of the net assets acquired in various acquisitions. See Note 3 for more information. The Company reviews goodwill for impairment annually on October 1 and whenever events or changes in circumstances indicate its carrying value may not be recoverable in accordance with ASC 350, *Intangibles — Goodwill and Other (Topic 350): Testing Goodwill for Impairment* ("ASU 2011-08"). Under ASU 2011-08, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary.

In assessing the qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the Company assesses relevant events and circumstances that may impact the fair value and the carrying amount of the reporting unit. The identification of relevant events and circumstances and how these may impact a reporting unit's fair value or carrying amount involve significant judgment and assumptions. The judgment and assumptions include the identification of macroeconomic conditions, industry and market considerations, cost factors, overall financial performance and Company specific events and making the assessment on whether each relevant factor will impact the impairment test positively or negatively and the magnitude of any such impact.

If the Company's qualitative assessment concludes that it is probable that an impairment exists or the Company skips the qualitative assessment then the Company needs to perform a quantitative assessment. In the first step of the quantitative assessment, the Company's assets and liabilities, including existing goodwill and other intangible assets, are assigned to the identified reporting units to determine the carrying value of the reporting units. If the carrying value of a reporting unit is in excess of its fair value, an impairment may exist, and the Company must perform an impairment analysis, in which the implied fair value of the goodwill is compared to its carrying value to determine the impairment charge, if any.

When performing the quantitative assessment, the fair value of the reporting units is determined using the income approach. The income approach focuses on the income-producing capability of an asset, measuring the current value of the asset by calculating the present value of its future economic benefits such as cash earnings, cost savings, corporate tax structure and product offerings. Value indications are developed by discounting expected cash flows to their present value at a rate of return that incorporates the risk-free rate for the use of funds, the expected rate of inflation, and risks associated with the reporting unit.

Intangible assets with an indefinite life are not amortized but are subject to review each reporting period to determine whether events and circumstances continue to support an indefinite useful life as well as an annual impairment test.

Due to falling crude oil prices in the fourth quarter of 2014, the Company updated its goodwill impairment analysis as of December 31, 2014, resulting in the fair value of one reporting unit to be less than its carrying value. An impairment charge of \$36.0 million was recorded on goodwill as a result of this step 2 analysis.

No impairment was recognized on indefinite lived intangible assets in 2014 nor for goodwill and indefinite lived intangible assets in 2013 or 2012 based upon the quantitative and qualitative assessments, respectively.

Definite Lived Intangible Assets

Definite lived intangible assets consist of intangible assets associated with customer relationships, supplier agreements, tradenames, trade secrets, patents, non-competition agreements, distributor agreements and royalty agreements that were acquired in various acquisitions. The majority of these assets are being amortized using discounted estimated future cash flows over the term of the related agreements. Intangible assets associated with customer relationships are being amortized using the discounted estimated future cash flows method based upon assumed rates of annual customer attrition. For more information, refer to Note 5.

Other Noncurrent Assets

Other noncurrent assets include deferred debt issuance costs and turnaround costs. Deferred debt issuance costs were \$34.7 million and \$29.7 million as of December 31, 2014 and 2013, respectively, and are being amortized by the effective interest rate method over the lives of the related debt instruments. These amounts are net of accumulated amortization of \$4.3 million and \$13.6 million at December 31, 2014 and 2013, respectively.

Turnaround costs represent capitalized costs associated with the Company's periodic major maintenance and repairs and were \$70.1 million and \$67.0 million as of December 31, 2014 and 2013, respectively. The Company capitalizes these costs and amortizes the costs on a straight-line basis over the lives of the turnaround assets. These amounts are net of accumulated amortization of \$46.2 million and \$25.7 million at December 31, 2014 and 2013, respectively.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Impairment of Long-Lived Assets

The Company periodically evaluates the carrying value of long-lived assets to be held and used, including definite-lived intangible assets, when events or circumstances warrant such a review. The carrying value of a long-lived asset to be held and used is considered impaired when the anticipated separately identifiable undiscounted cash flows from such an asset are less than the carrying value of the asset. In such an event, a write-down of the asset would be recorded through a charge to operations, based on the amount by which the carrying value exceeds the fair value of the long-lived asset. Fair value is determined primarily using anticipated cash flows assumed by a market participant discounted at a rate commensurate with the risk involved. Long-lived assets to be disposed of other than by sale are considered held and used until disposal.

During 2013, the Company recorded write-downs related to idle fixed assets within its specialty products segment. The non-cash charges of \$10.5 million, were recorded in asset impairment on the consolidated statements of operations and loss on disposal of fixed assets in the consolidated statements of cash flows for the year ended December 31, 2013.

Business Combinations and Related Business Acquisition Costs

Assets and liabilities associated with business acquisitions are recorded at fair value, using the acquisition method of accounting. The Company allocates the purchase price of acquisitions based upon the fair value of each component, which may be derived from various observable or unobservable inputs and assumptions. The Company may utilize third-party valuation specialists to assist the Company in this allocation. Initial purchase price allocations are preliminary and subject to revision within the measurement period, not to exceed one year from the date of acquisition. The fair value of the property, plant and equipment and intangible assets are based upon the discounted cash flow method that involves inputs that are not observable in the market (Level 3). Goodwill assigned represents the amount of consideration transferred in excess of the fair value assigned to identifiable assets acquired and liabilities assumed.

Business acquisition costs are expensed as incurred, and are reported as general and administrative expenses in the consolidated statements of operations. The Company defines these costs to include finder's fees, advisory, legal, accounting, valuation, and other professional or consulting fees, as well as travel associated with the evaluation and effort to acquire specific businesses. For further information, refer to Note 3.

Revenue Recognition

The Company recognizes revenue on orders received from its customers when there is persuasive evidence of an arrangement with the customer that is supportive of revenue recognition, the customer has made a fixed commitment to purchase the product for a fixed or determinable sales price, collection is reasonably assured under the Company's normal billing and credit terms, all of the Company's obligations related to the product have been fulfilled and ownership and all risks of loss have been transferred to the buyer, which is primarily upon shipment to the customer or, in certain cases, upon receipt by the customer in accordance with contractual terms. The Company recognizes revenue on certain drilling fluids, completion fluids and production chemicals when consumed at the customer site during the drilling process.

Concentrations of Credit Risk

The Company performs periodic credit evaluations of its customers' financial condition and in some instances requires cash in advance or letters of credit prior to shipment for domestic orders. For international orders, letters of credit are generally required and the Company maintains insurance policies which cover certain export orders. The Company maintains an allowance for doubtful customer accounts for estimated losses resulting from the inability of its customers to make required payments. The allowance for doubtful accounts is developed based on several factors including historical experience, the age of the accounts receivable balances, credit quality of the Company's customers, current economic conditions, expected future trends and other factors that may affect customers' ability to pay, which exist as of the balance sheet dates. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. In addition, from time to time the Company has significant derivative assets with a limited number of counterparties. The evaluation of these counterparties is performed quarterly in connection with the Company's ASC 820-10, *Fair Value Measurements and Disclosures*, valuations to determine the impact of the counterparty credit risk on the valuation of its derivative instruments.

Income Taxes

The Company, as a partnership, is generally not liable for federal and state income taxes on the earnings of Calumet Specialty Products Partners, L.P. and its wholly-owned subsidiaries. However, the Company conducts certain activities through wholly-owned subsidiaries that are corporations, including ADF Holdings, Inc. and Anchor Drilling Fluids USA, Inc. (collectively "Anchor"), which are subject to federal, state and local income taxes. Additionally, the Company is subject to

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

franchise taxes in certain states. Income taxes on the earnings of the Company, with the exception of the above mentioned taxes, are the responsibility of its partners, with earnings of the Company included in partners' earnings.

In the event that the Company's taxable income does not meet certain qualification requirements, the Company would be taxed as a corporation. Interest and penalties related to income taxes, if any, would be recorded in income tax expense. Generally, tax returns remain subject to examination by taxing authorities for three years. The Company had no unrecognized tax benefits as of December 31, 2014 and 2013.

The Company accounts for income taxes under the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in earnings in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts more likely than not to be realized.

The determination of the provision for income taxes requires significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is required in assessing the timing and amounts of deductible and taxable items and the probability of sustaining uncertain tax positions. The benefits of uncertain tax positions are recorded in the Company's financial statements only after determining a more-likely-than-not probability that the uncertain tax positions will withstand challenge, if any, from taxing authorities. When facts and circumstances change, the Company reassesses these probabilities and records any changes through the provision for income taxes.

Excise and Sales Taxes

The Company assesses, collects and remits excise taxes associated with the sale of certain of its fuel products. Furthermore, the Company collects and remits sales taxes associated with certain sales of its products to non-exempt customers. Excise taxes and sales taxes assessed and collected from customers are recorded on a net basis within sales in the Company's consolidated statements of operations.

Earnings per Unit

The Company calculates earnings per unit under ASC 260-10, *Earnings per Share*. The Company treats incentive distribution rights ("IDRs") as participating securities for the purposes of computing earnings per unit in the period that the general partner becomes contractually obligated to receive IDRs. Also, the undistributed earnings are allocated to the partnership interests based on the allocation of earnings to the Company's partners' capital accounts as specified in the Company's partnership agreement. When distributions exceed earnings, net income is reduced by the actual distributions with the resulting net loss being allocated to capital accounts as specified in the Company's partnership agreement.

Unit Based Compensation

For unit based compensation awards granted, compensation expense is recognized in the Company's consolidated financial statements on a straight line basis over the awards' vesting periods based on their fair values on the dates of grant. The unit based compensation awards vest over a period not exceeding four years. The amount of compensation expense recognized at any date is at least equal to the portion of the grant date value of the award that is vested at that date.

Unit based compensation liability awards are awards that are expected to be settled in cash on their vesting dates, rather than in equity units ("Liability Awards"). Liability Awards are recorded in accrued salaries, wages and benefits based on the vested portion of the fair value of the awards on the balance sheet date. The fair values of Liability Awards are updated at each balance sheet date and changes in the fair values of the vested portions of the awards are recorded as increases or decreases to compensation expense. See Note 11 for more information on Liability Awards.

Shipping and Handling Costs

The Company complies with ASC 605-45, *Revenue Recognition — Principal Agent Considerations*. ASC 605-45 requires the classification of shipping and handling costs billed to customers in sales and the classification of shipping and handling costs incurred in cost of sales, or to be disclosed if classified elsewhere. The Company has reflected \$171.4 million, \$142.7 million and \$107.9 million, respectively, for the years ended December 31, 2014, 2013, and 2012, in transportation expense in the consolidated statements of operations, the majority of which is billed to customers.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Advertising Expenses

The Company expenses advertising costs as incurred which totaled \$20.5 million, \$14.6 million and \$8.2 million in 2014, 2013 and 2012, respectively. Advertising expenses are reported as selling expenses in the consolidated statements of operations.

Renewable Identification Numbers Obligation

The Company's Renewable Identification Numbers obligation ("RINs Obligation") represents a liability for the purchase of RINs to satisfy the U.S. Environmental Protection Agency ("EPA") requirement to blend biofuels into the fuel products it produces pursuant to the EPA's Renewable Fuel Standard ("RFS"). RINs are assigned to biofuels produced in the U.S. as required by the EPA. The EPA sets annual quotas for the percentage of biofuels that must be blended into transportation fuels consumed in the U.S., and as a producer of motor fuels from petroleum, the Company is required to blend biofuels into the fuel products it produces at a rate that will meet the EPA's annual quota. To the extent the Company is unable to blend biofuels at that rate, it must purchase RINs in the open market to satisfy the annual requirement. The Company's RINs Obligation is based on the amount of RINs it must purchase and the price of those RINs as of the balance sheet date. The Company uses the inventory model to account for RINs, measuring acquired RINs at weighted-average cost. The cost of RINs used each period is charged to cost of sales with cash inflows and outflows recorded in the operating cash flow section of the consolidated statements of cash flows. Excess RINs are classified as inventory in the consolidated balance sheets. The Company recognizes a liability at the end of each reporting period in which the Company does not have sufficient RINs to cover the RINs Obligation. The liability is calculated by multiplying the RINs shortage (based on actual results) by the period end RIN spot price.

From time to time, the Company holds varying amounts of RINs for resale. RINs obtained from third parties are initially recorded at their cost at the time the Company acquires them and are subsequently revalued at the lower of cost or market as of the last day of each accounting period and the resulting adjustments are reflected in costs of goods sold for the period. The value of RINs obtained from third parties would be reflected in prepaid expenses and other assets on the consolidated balance sheets.

Foreign Currency Translation and Transactions

Certain of the Company's subsidiaries use a local currency as their functional currency. Assets and liabilities of subsidiaries with a local currency as their functional currency are translated at period-end rates of exchange, and revenues and expenses are translated at average exchange rates prevailing for each month. The resulting translation adjustments are made directly to a separate component of other comprehensive income (loss), which is reflected in partners' capital in the Company's consolidated balance sheets.

Certain of the Company's subsidiaries also enter into transactions and have monetary assets and liabilities that are denominated in a currency other than such entity's respective functional currency. Gains and losses from the revaluation of foreign currency transactions and monetary assets and liabilities are included in other income (expense) in the consolidated statements of operations.

New Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board ("FASB") issued ASU No. 2013-04, *Liabilities (Topic 405) — Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date* ("ASU 2013-04"). ASU 2013-04 provides guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements from which the total amount of the obligation within the scope of this guidance is fixed at the reporting date. ASU 2013-04 was effective for fiscal periods (including interim periods) beginning after December 15, 2013 and should be applied retrospectively. The adoption of ASU 2013-04 did not have an impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)* ("ASU 2014-09"), which supersedes the revenue recognition requirements in ASC 605, Revenue Recognition. ASU 2014-09 is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. ASU 2014-09 will be effective beginning in fiscal year 2017 and early adoption is not permitted. ASU 2014-09 allows for either a full retrospective or a modified retrospective transition method. The Company is currently evaluating the impact of this standard on its consolidated financial statements.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

In June 2014, the FASB issued ASU No. 2014-12, *Compensation-Stock Compensation (Topic 718) - Accounting for Share-Based Payments When the Terms of an Award provide that a Performance Target Could Be Achieved after the Requisite Service Period* (“ASU 2014-12”). ASU 2014-12 provides guidance for the recognition, measurement and disclosure of obligations resulting from unit-based payments after the requisite service period has ended when the eligible employee has ceased rendering service and is still eligible to vest in the award if the performance target is achieved. ASU 2014-12 is effective for fiscal periods (including interim periods) beginning after December 15, 2015 and early adoption is permitted. Provisions of ASU 2014-12 may be applied either prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all or modified awards thereafter. The adoption of ASU 2014-12 is not expected to have an impact on the Company’s consolidated financial statements as its unit-based compensation plans do not currently provide for achieving performance targets subsequent to the end of requisite service periods.

In August 2014, the FASB issued ASU No. 2014-15, *Presentation of Financial Statements - Going Concern (Subtopic 205-40) - Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern* (“ASU 2014-15”). ASU 2014-15 provides guidance about management’s responsibility to evaluate whether there is substantial doubt about an entity’s ability to continue as a going concern and to provide related footnote disclosures. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and for annual periods and interim periods thereafter. Early adoption is permitted. The adoption of ASU 2014-15 is not expected to have an impact on the Company’s consolidated financial statements.

In November 2014, the FASB issued ASU No. 2014-17, *Business Combinations (Topic 805): Pushdown Accounting* (“ASU 2014-17”). ASU 2014-17 provides guidance that allows all acquired entities to choose to apply pushdown accounting in their separate financial statements when an acquirer obtains control of them. ASU 2014-17 was effective on November 18, 2014. The adoption of ASU 2014-17 did not have an impact on the Company’s consolidated financial statements.

3. Acquisitions

On August 1, 2014, the Company completed the acquisition of substantially all of the assets of privately-held Specialty Oilfield Solutions, Ltd. (“SOS”) for aggregate consideration of approximately \$29.6 million, net of cash acquired and subject to certain purchase price adjustments (“SOS Acquisition”). SOS is a full-service drilling fluids and solids control company with operations in the Eagle Ford, Marcellus and Utica shale formations. The SOS Acquisition was financed with borrowings under the Company’s revolving credit facility. The Company believes the SOS Acquisition increases its sales into the oilfield services market, expands its geographic reach and increases its asset diversity.

On March 31, 2014, the Company completed the acquisition of 100% of the membership interests of ADF Holdings, Inc., the parent company of Anchor, an independent provider and marketer of drilling fluids, completion fluids and production chemicals to the oil and gas exploration industry (“Anchor Acquisition”). Total consideration was approximately \$223.6 million, net of cash acquired and subject to certain other adjustments. In connection with the Anchor Acquisition, the Company is required to pay 50% by which the amount of taxes paid in a post-closing tax period are reduced (or a refund is actually received or credited) as a result of the utilization of post-closing transaction tax deductions in the 2014 taxable year (but, for the avoidance of doubt, no other taxable year) to the sellers, which is estimated to be \$1.0 million as of December 31, 2014. Anchor designs, manufactures and packages drilling fluid products at its locations in Texas, Oklahoma, Louisiana, Arkansas, Colorado, Utah, Wyoming, Montana, New Mexico, New York, North Dakota, Pennsylvania and Ohio. The Anchor Acquisition was financed by using a portion of the net proceeds of approximately \$884.0 million from the Company’s March 2014 private placement of 6.50% senior notes due April 15, 2021. The Company believes the Anchor Acquisition further expands its specialty products offering, increases its sales into the oilfield services market, expands its geographic reach and increases its asset diversity.

On February 28, 2014, the Company completed the acquisition of substantially all of the assets of United Petroleum, LLC (“United Petroleum”), a marketer and distributor of high performance lubricants, for aggregate consideration of approximately \$10.4 million, (“United Petroleum Acquisition”). The United Petroleum Acquisition was financed with cash on hand. The Company believes the United Petroleum Acquisition increases its position in the specialty lubricants market.

On December 10, 2013, the Company completed the acquisition of 100% of the membership interests of Bel-Ray Company, LLC (“Bel-Ray”), a manufacturer and global distributor of high-performance lubricants and greases, for aggregate consideration of approximately \$53.6 million, net of cash acquired and excluding debt assumed (“Bel-Ray Acquisition”). Bel-Ray distributes, both domestically and internationally, a wide array of high-end specialty synthetic lubricants and greases which are used in the aerospace, automotive, energy, food, marine, military, mining, motorcycle, powersports, steel and textiles industries. The Bel-Ray Acquisition was financed by using a portion of the net proceeds of \$337.4 million from the Company’s November 2013 private placement of 7.625% senior notes due January 15, 2022. The Company believes the Bel-Ray

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Acquisition increases its position in the specialty lubricants market, expands its geographic reach and increases its asset diversity. At closing, the Company repaid the \$11.9 million of debt assumed in connection with the Bel-Ray Acquisition.

On August 9, 2013, the Company completed the acquisition of seven crude oil loading facilities and related assets in North Dakota and Montana from Murphy Oil USA, Inc. (“Murphy”) for aggregate consideration of approximately \$6.2 million (“Crude Oil Logistics Acquisition”). The Crude Oil Logistics Acquisition was funded with cash on hand. As part of this acquisition, the Company assumed pipeline space on the Enbridge Pipeline System (“Enbridge Pipeline”) previously held by Murphy. The Company has the ability to transport crude oil directly from the point of lease, into the Company’s acquired crude oil loading facilities and then onto the Enbridge Pipeline where it can be routed to the Company’s refineries and/or third party customers. As part of this transaction, the Company and Murphy jointly consented to terminate an existing crude oil purchase agreement wherein Murphy supplied the Company’s Superior refinery with up to 10,000 barrels per day of crude oil. The Company believes this acquisition expands its growing portfolio of crude oil logistics assets, while positioning the Company to purchase increased volumes of price-advantaged feedstock directly from the producers that operate in the major shale oil plays encompassing certain of the Company’s refineries.

On January 2, 2013, the Company completed the acquisition of NuStar Energy L.P.’s (“NuStar”) San Antonio, Texas refinery, together with related assets and the assumption of certain liabilities and obligations (“San Antonio Acquisition”). Total consideration for the San Antonio Acquisition was approximately \$117.9 million, net of cash acquired. The refinery has total crude oil throughput capacity of 17,500 bpd and primarily produces diesel, jet fuel, gasoline and other fuel products. The San Antonio Acquisition was funded with borrowings under the Company’s revolving credit facility with the balance through cash on hand. The Company believes the San Antonio Acquisition further diversifies the Company’s crude oil feedstock slate, operating asset base and geographic presence.

On October 1, 2012, the Company completed the acquisition from Connacher Oil and Gas Limited (“Connacher”) of all the shares of common stock of Montana Refining Company, Inc. (“Montana Refining”) and an insignificant affiliated company for aggregate consideration of approximately \$191.6 million, net of cash acquired (“Montana Acquisition”). Montana Refining produces gasoline, diesel, jet fuel and asphalt, which are marketed primarily into local markets in Washington, Montana, Idaho and Alberta, Canada. The Montana Acquisition was funded primarily with cash on hand with the balance through borrowings under the Company’s revolving credit facility. The Company believes the Montana Acquisition further diversifies its crude oil feedstock slate, operating asset base and geographic presence. Immediately after closing the Montana Acquisition, the Company converted Montana Refining into a Delaware limited liability company, Calumet Montana Refining, LLC. This conversion resulted in the recognition of a current income tax liability of approximately \$27.6 million, which was paid during the year ended December 31, 2013 and was offset by the derecognition of a deferred tax liability for a comparable amount assumed in connection with the acquisition.

On July 3, 2012, the Company completed the acquisition of Royal Purple, Inc. (“Royal Purple”), a Texas corporation which was converted into a Delaware limited liability company at closing, for aggregate consideration of approximately \$331.2 million, net of cash acquired (“Royal Purple Acquisition”). Royal Purple is a leading independent formulator and marketer of premium industrial and consumer lubricants to a diverse customer base across several large markets including oil and gas, chemicals and refining, power generation, manufacturing and transportation, food and drug manufacturing and automotive aftermarket. The Royal Purple Acquisition was financed with net proceeds of \$262.5 million from the Company’s June 2012 private placement of 9.625% senior notes due August 1, 2020 and cash on hand. The Company believes the Royal Purple Acquisition increases its position in the specialty lubricants market, expands its geographic reach, increases its asset diversity and enhances its specialty products segment.

On January 6, 2012, the Company completed the acquisition of all of the outstanding membership interests of TruSouth Oil, LLC, renamed Calumet Packaging, LLC in 2013 (“Calumet Packaging”), a specialty petroleum packaging and distribution company located in Shreveport, Louisiana for aggregate consideration of approximately \$26.9 million, net of cash acquired (“Calumet Packaging Acquisition”). The Calumet Packaging Acquisition was financed with borrowings under the Company’s revolving credit facility. Immediately prior to its acquisition by the Company, Calumet Packaging was owned in part by affiliates of the Company’s general partner. The Company believes the Calumet Packaging Acquisition provides greater diversity to its specialty products segment.

On January 3, 2012, the Company completed the acquisition of the aviation and refrigerant lubricants business (a polyolester based synthetic lubricants business) of Hercules Incorporated, a subsidiary of Ashland, Inc., including a manufacturing facility located in Louisiana, Missouri for aggregate consideration of approximately \$19.6 million (“Missouri Acquisition”). The Missouri Acquisition was financed with borrowings under the Company’s revolving credit facility and cash on hand. The Company believes the Missouri Acquisition provides greater diversity to its specialty products segment.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Purchase Price Allocation

The assets and results of the operations from such assets acquired as a result of the Montana, San Antonio and Crude Oil Logistics Acquisitions have been included in the fuel products segments since their dates of acquisition, October 1, 2012, January 2, 2013 and August 9, 2013, respectively. The assets and results of operations from such assets acquired as a result of the Missouri, Calumet Packaging, Royal Purple, Bel-Ray and United Petroleum Acquisitions have been included in the specialty products segment since their dates of acquisition, January 3, 2012, January 6, 2012, July 3, 2012, December 10, 2013 and February 28, 2014, respectively. The assets and results of operations from such assets acquired as a result of the Anchor and SOS Acquisitions have been included in the oilfield services segment since their dates of acquisition, March 31, 2014 and August 1, 2014, respectively.

The allocations of the aggregate purchase prices to assets acquired and liabilities assumed for acquisitions are as follows (in millions):

	2014 Acquisitions			2013 Acquisitions			2012 Acquisitions			
	SOS	Anchor	United Petroleum	Bel-Ray	Crude Oil Logistics	San Antonio	Montana	Royal Purple	Calumet Packaging	Missouri

Goodwill

The Company recorded the following goodwill (in millions):

	Amount	Business Segment
SOS Acquisition ⁽¹⁾	\$ 0.8	Oilfield Services
Anchor Acquisition ⁽¹⁾⁽³⁾	\$ 69.0	Oilfield Services
United Petroleum Acquisition ⁽¹⁾	\$ 5.0	Specialty Products
Bel-Ray Acquisition ⁽¹⁾	\$ 9.1	Specialty Products
Crude Oil Logistics Acquisition ⁽²⁾	\$ 5.2	Fuel Products
San Antonio Acquisition ⁽¹⁾	\$ 5.7	Fuel Products

⁽¹⁾ Goodwill recognized relates primarily to enhancing the Company's strategic platform for expansion in the respective business segment noted above.

⁽²⁾ Goodwill recognized relates primarily to enhancing the Company's crude oil gathering operations to support the Superior refinery and sales to third party customers.

⁽³⁾ Approximately \$9.7 million of goodwill associated with the Anchor Acquisition is tax deductible due to Anchor's tax status as a corporation.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Acquisition Expenses

In connection with the respective acquisitions, the Company incurred the following expenses, which are reflected in general and administrative expenses in the consolidated statements of operations for the years ended December 31, 2014, 2013 and 2012 (in millions):

	Year Ended December 31,		
	2014	2013	2012
SOS Acquisition	\$ 0.1	\$ —	\$ —
Anchor Acquisition	\$ 0.6	\$ —	\$ —
United Petroleum Acquisition	\$ 0.1	\$ —	\$ —
Bel-Ray Acquisition	\$ 0.3	\$ 0.4	\$ —
Crude Oil Logistics Acquisition	\$ —	\$ 0.2	\$ —
San Antonio Acquisition	\$ —	\$ 0.5	\$ —
Montana Acquisition	\$ —	\$ 0.1	\$ 3.3
Royal Purple Acquisition	\$ —	\$ —	\$ 0.4
Calumet Packaging Acquisition	\$ —	\$ —	\$ 0.2
Missouri Acquisition	\$ —	\$ —	\$ 0.5

Results of Sales and Earnings

The following financial information reflects sales and operating income (loss) of the United Petroleum, Anchor and SOS Acquisitions in 2014, the San Antonio and Bel-Ray Acquisitions in 2013 and the Missouri, Calumet Packaging, Royal Purple and Montana Acquisitions in 2012 that are included in the consolidated statements of operations (in millions):

	Year Ended December 31,		
	2014	2013	2012
Sales	\$ 382.9	\$ 480.1	\$ 266.1
Operating income (loss)	\$ (11.2)	\$ (22.5)	\$ 18.6

Unaudited Pro Forma Financial Information

The following unaudited pro forma financial information reflects the unaudited consolidated results of operations of the Company as if the Anchor Acquisition had taken place on January 1, 2013 (in millions, except for per unit data):

	Year Ended December 31,	
	2014	2013
Sales	\$ 5,873.6	\$ 5,730.8
Net income (loss)	\$ (124.6)	\$ 21.9
Limited partners' interest net income (loss) per unit — basic	\$ (1.97)	\$ 0.10
Limited partners' interest net income (loss) per unit — diluted	\$ (1.97)	\$ 0.10

The Company's historical financial information was adjusted to give effect to the pro forma events that were directly attributable to the Anchor Acquisition. This unaudited pro forma financial information has been presented for illustrative purposes only and is not necessarily indicative of results of operations that would have been achieved had the pro forma events taken place on the dates indicated, or the future consolidated results of operations of the combined company.

4. Investment in Unconsolidated Affiliates

Dakota Prairie Refining, LLC

On February 7, 2013, the Company entered into a joint venture agreement with MDU Resources Group, Inc. ("MDU") to develop, build and operate a diesel refinery in southwestern North Dakota. The joint venture is named Dakota Prairie Refining, LLC ("Dakota Prairie"). The capitalization of the joint venture is expected to be funded through contributions of \$217.5 million from MDU and a total of \$217.5 million from the Company comprised of \$142.5 million through cash contributions and

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

proceeds of \$75.0 million from an unsecured syndicated term loan facility with the joint venture as the borrower which is expected to be repaid by the Company through its allocation of profits from the joint venture. The term loan facility was funded in April 2013. The majority of the direct funding by the Company occurred in 2014. The joint venture will allocate profits on a 50%/50% basis to the Company and MDU. The joint venture is governed by a board of managers comprised of representatives from both the Company and MDU. MDU will provide a portion of the crude oil supply to the refinery, as well as natural gas and electricity utility services. The Company is providing refinery operations, crude oil procurement and refined product marketing expertise to the joint venture.

The Company accounts for its ownership in the Dakota Prairie joint venture under the equity method of accounting. As of December 31, 2014 and 2013, the Company had an investment of \$117.2 million and \$33.4 million, respectively, in Dakota Prairie primarily related to the development of the refinery. The Company is committed to fund approximately \$23.0 million in 2015.

Juniper GTL LLC

On June 9, 2014, the Company entered into a joint venture agreement with Clean Fuels North America, LLC, which is owned by SGC Energia and Great Northern Project Development, to develop, build and operate a gas-to-liquids (“GTL”) plant in Lake Charles, Louisiana, which is expected to be operational by late 2015. The joint venture is named New Source Fuels, LLC, and it owns 100% of Juniper GTL LLC (“Juniper”). The capitalization of the joint venture is expected to be funded through \$100.0 million of equity contributions and \$35.0 million in senior secured debt with the joint venture as the borrower. The Company intends to invest \$25.0 million in total in exchange for an equity interest of approximately 23% in the joint venture. Funding of the project will occur over the course of the construction period. The joint venture is governed by a board of managers comprised of representatives from all of the members that own at least 10% of the equity in Juniper.

The Company accounts for its ownership in the Juniper joint venture under the equity method of accounting. As of December 31, 2014, the Company had an investment of \$18.5 million in Juniper primarily related to the development of the plant. The Company is committed to fund approximately \$6.5 million in 2015.

5. Goodwill and Other Intangible Assets

In the fourth quarter of 2014, the Company determined that the expected operating results for one of its reporting units was projected to be substantially lower than previous forecasts due to the falling crude oil prices. Given this information, the Company updated its impairment test and determined that impairment existed for this reporting unit. An impairment charge of \$36.0 million for goodwill related to the oilfield services segment has been recorded in the consolidated statements of operations within asset impairment. The impairment charge was primarily driven by the reduced outlook on revenues and profitability as a result of falling crude oil prices driving declines in U.S. land based rig counts.

To derive the fair value of the reporting units, as required in step one of the impairment test, the Company used the income approach, specifically the discounted cash flow method, to determine the fair value of each reporting unit and the associated amount of the impairment charge. The income approach focuses on the income-producing capability of an asset, measuring the current value of the asset by calculating the present value of its future economic benefits such as cash earnings, cost savings, corporate tax structure and product offerings. Value indications are developed by discounting expected cash flows to their present value at a rate of return that incorporates the risk-free rate for the use of funds, the expected rate of inflation, and risks associated with the reporting unit.

Inputs used to fair value the Company’s reporting units are considered Level 3 inputs of the fair value hierarchy and include the following:

- The Company’s financial projections for its reporting units are based on our analysis of various supply and demand factors, which include, among other things, industry-wide capacity, our planned utilization rate, end-user demand, crack spreads, capital expenditures and economic conditions. Such estimates are consistent with those used in the Company’s planning and capital investment reviews and include recent historical prices and published forward prices. Revenue growth rates assumed for the Company’s reporting unit where impairment was recognized was approximately -7% for 2015 and 3% to 15% for 2016 and beyond.
- The discount rate used to measure the present value of the projected future cash flows is based on a variety of factors, including market and economic conditions, operational risk, regulatory risk and political risk. This discount rate is also compared to recent observable market transactions, if possible. Discount rates used for the Company’s reporting unit where impairment was recognized was approximately 13.5%.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

For Level 3 measurements, significant increases or decreases in long-term growth rates or discount rates in isolation or in combination could result in a significantly lower or higher fair value measurement.

Changes in goodwill balances are as follows (in millions):

	Year Ended December 31,							
	2014				2013			
	Specialty Products	Fuel Products	Oilfield Services	Total	Specialty Products	Fuel Products	Oilfield Services	Total
Beginning balance:	\$ 168.5	\$ 38.5	\$ —	\$ 207.0	\$ 159.4	\$ 27.6	\$ —	\$ 187.0
Acquisitions	5.0	—	69.8	74.8	9.1	10.9	—	20.0
Accumulated impairment losses	—	—	(36.0)	(36.0)	—	—	—	—
Ending balance:	<u>\$ 173.5</u>	<u>\$ 38.5</u>	<u>\$ 33.8</u>	<u>\$ 245.8</u>	<u>\$ 168.5</u>	<u>\$ 38.5</u>	<u>\$ —</u>	<u>\$ 207.0</u>

Other intangible assets consist of the following (in millions):

	Weighted Average Life (Years)	December 31, 2014		December 31, 2013	
		Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
		Customer relationships	21	\$ 243.7	\$ (68.4)
Supplier agreements	4	21.5	(21.5)	21.5	(21.5)
Tradenames	Indefinite	14.8	—	14.8	—
Tradenames	18	31.8	(4.9)	10.6	(1.6)
Trade secrets	13	52.7	(16.7)	52.7	(9.6)
Patents	12	1.6	(1.3)	1.6	(1.2)
Non-competition agreements	4	8.8	(7.3)	5.9	(5.8)
Distributor agreements	3	2.0	(2.0)	2.0	(2.0)
Royalty agreements	19	4.5	(1.8)	4.5	(1.6)
	<u>18</u>	<u>\$ 381.4</u>	<u>\$ (123.9)</u>	<u>\$ 296.5</u>	<u>\$ (83.6)</u>

Supplier agreements, tradenames (other than indefinite lived), trade secrets, patents, non-competition agreements, distributor agreements and royalty agreements are being amortized to properly match expenses with the discounted estimated future cash flows over the terms of the related agreements or the period expected to be benefited. Agreements with terms allowing for the potential extension of such agreements are being amortized based on the initial term only. Customer relationships are being amortized using discounted estimated future cash flows based upon assumed rates of annual customer attrition. For the years ended December 31, 2014, 2013 and 2012, the Company recorded amortization expense of intangible assets of \$40.3 million, \$25.6 million and \$16.9 million, respectively.

As of December 31, 2014, the Company estimates that amortization of intangible assets for the next five years will be as follows (in millions):

Year	Amortization Amount
2015	\$ 41.4
2016	\$ 35.3
2017	\$ 30.5
2018	\$ 25.7
2019	\$ 21.3

6. Commitments and Contingencies

Operating Leases

The Company has various operating leases primarily for the use of land, storage tanks, railcars, equipment, precious metals and office facilities that extend through April 2027. Renewal options are available on certain of these leases in which the

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Company is the lessee. Rent expense for the years ended December 31, 2014, 2013 and 2012 was \$59.9 million, \$35.3 million and \$26.9 million, respectively.

As of December 31, 2014, the Company had estimated minimum commitments for the payment of rentals under leases which, at inception, had a noncancelable term of more than one year, as follows (in millions):

Year	Operating Leases
2015	\$ 39.3
2016	33.1
2017	29.5
2018	26.4
2019	16.9
Thereafter	36.2
Total	\$ 181.4

Crude Oil Supply, Other Feedstocks and Finished Products

The Company is currently purchasing a majority of its crude oil under month-to-month evergreen contracts or on a spot basis.

On October 5, 2011, the Company entered into a Crude Oil Purchase Agreement (the “BP Purchase Agreement”) with BP Products North America Inc. (“BP”), pursuant to which BP supplies the Superior refinery with a portion of its daily crude oil requirements, utilizing a market-based pricing mechanism, plus transportation and handling costs. Total crude oil requirements for the Superior refinery are estimated to be between 35,000 and 45,000 bpd. In April 2012, the Company amended and restated the BP Purchase Agreement, which had an initial term of one year ending April 1, 2014, and automatically renews for successive one-year terms unless terminated by either party upon 90 days’ notice prior to the end of any renewal term. To secure a portion of the Company’s payment obligations under the BP Purchase Agreement, the Company and its affiliates have granted a limited interest, capped at \$100.0 million, for physical forwards in the collateral pledged as security under the Collateral Trust Agreement to BP as a “Forward Purchase Secured Hedge Counterparty” under its Collateral Trust Agreement, as such term is defined therein.

Certain other feedstocks are purchased under long-term supply contracts. The Company also purchases finished products from Houston Refining. The Company is required to purchase at least a minimum volume of 3,100 bpd of naphthenic lubricating oils produced at Houston Refining’s refinery in Houston, Texas, and has a right of first refusal to purchase any additional naphthenic lubricating oils produced at the refinery. In addition, Houston Refining is required to process a minimum of approximately 600 bpd of white mineral oil for the Company at Houston Refining’s Houston, Texas refinery. The annual purchase commitment under these agreements is approximately \$113.2 million.

As of December 31, 2014, the estimated minimum purchase commitments under the Company’s crude oil, other feedstock supply and finished product agreements were as follows (in millions):

Year	Commitment
2015	\$ 563.6
2016	115.8
2017	113.5
2018	113.2
2019	103.7
Thereafter	—
Total	\$ 1,009.8

In connection with the closing of the acquisition of Penreco on January 3, 2008, the Company entered into a feedstock purchase agreement with Phillips 66 related to the LVT unit at its Lake Charles, Louisiana refinery (the “LVT Feedstock Agreement”). Pursuant to the LVT Feedstock Agreement, Phillips 66 is obligated to supply a minimum quantity (the “Base Volume”) of feedstock for the LVT unit for a term of ten years. Based upon this minimum supply quantity, the Company expects to purchase approximately \$41.5 million of feedstock for the LVT unit in each fiscal year of the term of the contract expiring January 1, 2018, based on pricing estimates as of December 31, 2014. This amount is not included in the table above.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Investments In Unconsolidated Affiliates Commitments

As of December 31, 2014, the Company is committed to fund approximately \$23.0 million and \$6.5 million for the Dakota Prairie and Juniper joint ventures, respectively, in 2015.

Capital Expenditures Commitments

As of December 31, 2014, the Company is committed to fund approximately \$1.1 million related to capital growth projects at the San Antonio and Montana refineries in 2015.

Contingencies

From time to time, the Company is a party to certain claims and litigation incidental to its business, including claims made by various taxation and regulatory authorities, such as the EPA, various state environmental regulatory bodies, the Internal Revenue Service, various state and local departments of revenue and the federal Occupational Safety and Health Administration (“OSHA”), as the result of audits or reviews of the Company’s business. In addition, the Company has property, business interruption, general liability and various other insurance policies that may result in certain losses or expenditures being reimbursed to the Company.

Environmental

The Company operates crude oil and specialty hydrocarbon refining, blending and terminal operations, which are subject to stringent federal, state, regional and local laws and regulations governing worker health and safety, the discharge of materials into the environment and environmental protection. These laws and regulations impose obligations that are applicable to the Company’s operations, such as requiring the acquisition of permits to conduct regulated activities, restricting the manner in which the Company may release materials into the environment, requiring remedial activities or capital expenditures to mitigate pollution from former or current operations, requiring the application of specific health and safety criteria addressing worker protection and imposing substantial liabilities for pollution resulting from its operations. Certain of these laws impose joint and several, strict liability for costs required to remediate and restore sites where petroleum hydrocarbons, wastes or other materials have been released or disposed.

In addition, new laws and regulations, new interpretations of existing laws and regulations, increased governmental enforcement or other developments could require the Company to make additional unforeseen expenditures. Many of these laws and regulations are becoming increasingly stringent, and the cost of compliance with these requirements can be expected to increase over time. For example, on January 14, 2015, the Obama Administration announced that the EPA is expected to propose in the summer of 2015, and finalize in 2016, new regulations that will set methane emission standards for new and modified oil and gas production and natural gas processing and transmission facilities as part of the Administration’s efforts to reduce methane emissions from the oil and gas sector by up to 45% from 2012 levels by 2025. In a second example, in December 2014, the EPA published a proposed rulemaking that it expects to finalize by October 1, 2015, which rulemaking proposes to revise the National Ambient Air Quality Standard for ozone to between 65 to 70 parts per billion for both the 8-hour primary and secondary standards.

Voluntary remediation of subsurface contamination is in process at certain of the Company’s refinery sites. The remedial projects are being overseen by the appropriate state agencies. Based on current investigative and remedial activities, the Company believes that the groundwater contamination at these refineries can be controlled or remedied without having a material adverse effect on the Company’s financial condition. However, such costs are often unpredictable and, therefore, there can be no assurance that the future costs will not become material.

San Antonio Refinery

In connection with the San Antonio Acquisition (see Note 3), the Company agreed to indemnify NuStar for an unlimited term and without consideration of a monetary deductible or cap from any environmental liabilities associated with the San Antonio refinery, except for any governmental penalties or fines that may result from NuStar’s actions or inactions during NuStar’s 20-month period of ownership of the San Antonio refinery. Anadarko Petroleum Corporation (“Anadarko”) and Age Refining, Inc. (“Age Refining”), a third party that has since entered bankruptcy, are subject to a 1995 Agreed Order from the Texas Natural Resource Conservation Commission, now known as the Texas Commission on Environmental Quality (“TCEQ”), pursuant to which Anadarko and Age Refining are obligated to assess and remediate certain contamination at the San Antonio refinery that predates the Company’s acquisition of the facility. The Company does not expect this pre-existing contamination at the San Antonio refinery to have a material adverse effect on its financial position or results of operations.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Montana Refinery

In connection with the acquisition of the Montana refinery from Connacher Oil and Gas Limited (“Connacher”), the Company became a party to an existing 2002 Refinery Initiative Consent Decree (“Montana Consent Decree”) with the EPA and the Montana Department of Environmental Quality (“MDEQ”). The material obligations imposed by the Montana Consent Decree have been completed. Periodic well monitoring and reporting of the results is the primary current obligation under the Montana Consent Decree. On September 27, 2012, Montana Refining Company, Inc. received a final Corrective Action Order on Consent, replacing the refinery’s previously held hazardous waste permit. This Corrective Action Order on Consent governs the investigation and remediation of contamination at the Montana refinery. The Company believes the majority of damages related to such contamination at the Montana refinery are covered by a contractual indemnity provided by Holly Frontier Corporation (“Holly”), the owner and operator of the Montana refinery prior to its acquisition by Connacher, under an asset purchase agreement between Holly and Connacher, pursuant to which Connacher acquired the Montana refinery. Under this asset purchase agreement, Holly agreed to indemnify Connacher and Montana Refining Company, Inc., subject to timely notification, certain conditions and certain monetary baskets and cap, for environmental conditions arising under Holly’s ownership and operation of the Montana refinery and existing as of the date of sale to Connacher. Holly has provided the Company a notice challenging the Company’s position that Holly is obligated to indemnify the Company’s remediation expenses for environmental conditions to the extent arising under Holly’s ownership and operation of the refinery and existing as of the date of sale to Connacher, which expenses totaled approximately \$16.5 million as of December 31, 2014, of which \$14.1 million was capitalized into the cost of the Company’s expansion project and \$2.4 million was expensed. The Company continues to believe that Holly is responsible to indemnify the Company for these remediation expenses disputed by Holly, and the Company has invoked the dispute resolution procedure under the asset purchase agreement to resolve this issue. In the event the Company is unsuccessful, the Company will be responsible for those remediation expenses. The Company expects that it may incur some expenses to remediate other environmental conditions at the Montana refinery in connection with the current capacity expansion of the refinery; however, the Company believes at this time that these other costs it may incur will not be material to its financial position or results of operations.

Superior Refinery

In connection with the acquisition of the Superior refinery, the Company became a party to an existing Refinery Initiative Consent Decree (“Superior Consent Decree”) with the EPA and the Wisconsin Department of Natural Resources (“WDNR”) that applies, in part, to its Superior refinery. Under the Superior Consent Decree, the Company must complete certain reductions in air emissions at the Superior refinery as well as report upon certain emissions from the refinery to the EPA and the WDNR. The Company currently estimates costs of up to \$1.0 million to make known equipment upgrades and conduct other discrete tasks in compliance with the Superior Consent Decree. Failure to perform these required tasks under the Superior Consent Decree could result in the imposition of stipulated penalties, which could be material. The Company is currently assessing certain past actions at the refinery for compliance with the terms of the decree, which actions may be subject to stipulated penalties under the decree but, in any event, the Company does not currently believe that the imposition of such penalties for those actions, should they be imposed, would be material. In addition, the Company is pursuing certain additional environmental and safety-related projects at the Superior refinery. Completion of these additional projects will result in the Company incurring additional costs, which could be substantial. During 2014 and 2013, the Company incurred approximately \$0.7 million and \$1.9 million, respectively, related to installing process equipment at the Superior refinery pursuant to the EPA fuel content regulations.

On June 29, 2012, the EPA issued a Finding of Violation/Notice of Violation to the Superior refinery, which included a proposed penalty amount of \$0.1 million. This finding is in response to information provided to the EPA by the Company in response to an information request. The EPA alleges that the efficiency of the flares at the Superior refinery is lower than regulatory requirements. The Company is contesting the allegations and attended an informal conference with the EPA held September 12, 2012. The Company does not believe that the resolution of these allegations will have a material adverse effect on the Company’s financial results or operations.

The Company is contractually indemnified by Murphy Oil Corporation (“Murphy Oil”) under an asset purchase agreement between the Company and Murphy Oil for specified environmental liabilities arising from the operation of the Superior refinery including: (i) certain obligations arising out of the Superior Consent Decree (including payment of a civil penalty required under the Superior Consent Decree), (ii) certain liabilities arising in connection with Murphy Oil’s transport of certain wastes and other materials to specified offsite real properties for disposal or recycling prior to the Superior Acquisition and (iii) certain liabilities for certain third party actions, suits or proceedings alleging exposure, prior to the Superior Acquisition, of an individual to wastes or other materials at the specified on-site real property, which wastes or other materials were spilled, released, emitted or otherwise discharged by Murphy Oil. The Company believes contractual indemnity by

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Murphy Oil for such specified environmental liabilities is unlimited in duration and not subject to any monetary deductibles or maximums. The amount of any damages payable by Murphy Oil pursuant to the contractual indemnities under the asset purchase agreement are net of any amount recoverable under an environmental insurance policy that the Company obtained in connection with the Superior Acquisition, which named the Company and Murphy Oil as insureds and covers environmental conditions existing at the Superior refinery prior to the Superior Acquisition.

Shreveport, Cotton Valley and Princeton Refineries

On December 23, 2010, the Company entered into a settlement agreement with the Louisiana Department of Environmental Quality (“LDEQ”) under LDEQ’s “Small Refinery and Single Site Refinery Initiative,” covering the Shreveport, Princeton and Cotton Valley refineries. This settlement agreement became effective on January 31, 2012. The settlement agreement, termed the “Global Settlement,” resolved alleged violations of the federal Clean Air Act and federal Clean Water Act regulations that arose prior to December 31, 2010. Among other things, the Company agreed to complete beneficial environmental programs and implement emissions reduction projects at the Company’s Shreveport, Cotton Valley and Princeton refineries on an agreed-upon schedule. During 2014 and 2013, the Company incurred approximately \$0.6 million and \$4.9 million, respectively, of such expenditures and estimates additional expenditures of approximately \$10.0 million to \$12.0 million of capital expenditures and expenditures related to additional personnel and environmental studies over the next two years as a result of the implementation of these requirements. These capital investment requirements will be incorporated into the Company’s annual capital expenditures budget and the Company does not expect any additional capital expenditures as a result of the required audits or required operational changes included in the Global Settlement to have a material adverse effect on the Company’s financial results or operations.

The Company is contractually indemnified by Shell Oil Company (“Shell”), as successor to Pennzoil-Quaker State Company, and Atlas Processing Company, under an asset purchase agreement between the Company and Shell, for specified environmental liabilities arising from the operations of the Shreveport refinery prior to the Company’s acquisition of the facility. The Company believes the contractual indemnity is unlimited in amount and duration, but required the Company to contribute up to \$1.0 million of the first \$5.0 million of indemnified costs for certain of the specified environmental liabilities.

Bel-Ray Facility

Bel-Ray executed an Administrative Consent Order (“ACO”) with the New Jersey Department of Environmental Protection, effective January 4, 1994, which required investigation and remediation of contamination at or emanating from the Bel-Ray facility. In 2000, Bel-Ray entered into a fixed price remediation contract with Weston Solutions (“Weston”), a large remediation contractor, whereby Weston agreed to be fully liable for the remediation of the soil and groundwater issues at the facility, including an offsite groundwater plume pursuant to the ACO (“Weston Agreement”). The Weston Agreement set up a trust fund to reimburse Weston, administered by Bel-Ray’s environmental counsel. As of December 31, 2014, the trust fund contained approximately \$0.8 million. In addition, Weston has remediation cost containment insurance, should Weston be unable to complete the work required under the Weston Agreement. In connection with the Bel-Ray Acquisition, the Company became a party to the Weston Agreement.

Weston has been addressing the environmental issues at the Bel-Ray facility over time, and the next phase will address the groundwater issues, which extend offsite.

Occupational Health and Safety

The Company is subject to various laws and regulations relating to occupational health and safety, including OSHA and comparable state laws. These laws and regulations strictly govern the protection of the health and safety of employees. In addition, OSHA’s hazard communication standard requires that information be maintained about hazardous materials used or produced in the Company’s operations and that this information be provided to employees, contractors, state and local government authorities and customers. The Company maintains safety and training programs as part of its ongoing efforts to ensure compliance with applicable laws and regulations. The Company conducts periodic audits of Process Safety Management (“PSM”) systems at each of its locations subject to the PSM standard. The Company’s compliance with applicable health and safety laws and regulations has required, and continues to require, substantial expenditures. Changes in occupational safety and health laws and regulations or a finding of non-compliance with current laws and regulations could result in additional capital expenditures or operating expenses, as well as civil penalties and, in the event of a serious injury or fatality, criminal charges.

The Company has completed studies to assess the adequacy of its PSM practices at its Shreveport refinery with respect to certain consensus codes and standards. During the years ended December 31, 2014 and 2013, the Company incurred approximately \$1.1 million and \$3.2 million, respectively, of related capital expenditures and expects to incur up to \$1.6 million of capital expenditures during 2015 to address OSHA compliance issues identified in these studies. The Company

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

expects these capital expenditures will enhance its equipment such that the equipment maintains compliance with applicable consensus codes and standards.

In the first quarter of 2011, OSHA conducted an inspection of the Cotton Valley refinery's PSM program under this OSHA initiative. On March 14, 2011, OSHA issued a Citation and Notification of Penalty (the "Cotton Valley Citation") to the Company as a result of the Cotton Valley inspection, which included a proposed penalty amount of \$0.2 million. The Company has contested the Cotton Valley Citation and have reached a tentative settlement with OSHA on the matter, which the Company does not believe will have a material adverse effect on its results of operations or financial condition.

Labor Matters

The Company has approximately 590 employees covered by various collective bargaining agreements, or approximately 26.8% of its total workforce of approximately 2,200 employees. These agreements have expiration dates of April 30, 2015, March 31, 2016, April 30, 2016, June 30, 2017 and October 31, 2017. The Karns City and Montana collective bargaining agreements expired on January 31, 2015 and are currently on a 24-hour rolling contract until a new agreement is agreed upon. The Company has approximately 200 employees, or approximately 9.1% of its total workforce, covered by collective bargaining agreements that expire in less than one year and does not expect any work stoppages.

Standby Letters of Credit

The Company has agreements with various financial institutions for standby letters of credit which have been issued primarily to vendors. As of December 31, 2014 and 2013, the Company had outstanding standby letters of credit of \$114.3 million and \$95.2 million, respectively, under its senior secured revolving credit facility, which was amended and restated on July 14, 2014 (the "revolving credit facility"). Refer to Note 7 for additional information regarding the Company's revolving credit facility. At December 31, 2014, the maximum amount of letters of credit the Company could issue under its revolving credit facility was subject to borrowing base limitations, with a maximum letter of credit sublimit equal to \$600.0 million, which amount may be increased to 90% of revolver commitments in effect (\$1,000.0 million at December 31, 2014) with the consent of the Agent (as defined in the revolving credit facility agreement). At December 31, 2013, the maximum amount of letters of credit the Company could issue under its revolving credit facility was subject to borrowing base limitations, with a maximum letter of credit sublimit equal to \$680.0 million, which is the greater of (i) \$400.0 million and (ii) 80% of revolver commitments in effect (\$850.0 million at December 31, 2013).

As of December 31, 2014 and 2013, the Company had availability to issue letters of credit of \$310.8 million and \$472.4 million, respectively, under its revolving credit facility.

7. Long-Term Debt

Long-term debt consisted of the following (in millions):

	December 31, 2014	December 31, 2013
Borrowings under amended and restated senior secured revolving credit agreement with third-party lenders, interest payments quarterly, borrowings due July 2019, weighted average interest rate of 2.6% at December 31, 2014	\$ 150.8	\$ —
Borrowings under 2019 Notes, interest at a fixed rate of 9.375%, interest payments semiannually, borrowings due May 2019	—	500.0
Borrowings under 2020 Notes, interest at a fixed rate of 9.625%, interest payments semiannually, borrowings due August 2020, effective interest rate of 10.1% for the year ended December 31, 2014 and 10.0% for the year ended December 31, 2013	275.0	275.0
Borrowings under 2021 Notes, interest at a fixed rate of 6.50%, interest payments semiannually, borrowings due April 2021, effective interest rate of 6.7% for the year ended December 31, 2014	900.0	—
Borrowings under 2022 Notes, interest at a fixed rate of 7.625%, interest payments semiannually, borrowings due January 2022, effective interest rate of 8.0% for the year ended December 31, 2014 and 7.9% for the year ended December 31, 2013 ⁽¹⁾	352.5	350.0
Capital lease obligations, at various interest rates, interest and principal payments monthly through October 2034	43.6	4.8
Less unamortized discounts	(8.4)	(19.0)
Total long-term debt	1,713.5	1,110.8
Less current portion of long-term debt	0.6	0.4
	<u>\$ 1,712.9</u>	<u>\$ 1,110.4</u>

⁽¹⁾ The balance includes a fair value interest rate hedge adjustment, which increased the debt balance by \$2.5 million and \$0.0 million as of December 31, 2014 and 2013, respectively (refer to Note 8 for additional information on the interest rate swap designated as a fair value hedge).

Senior Notes

6.50% Senior Notes (the “2021 Notes”)

On March 31, 2014, the Company issued and sold \$900.0 million in aggregate principal amount of 6.50% senior notes due April 15, 2021 in a private placement pursuant to Section 4(a)(2) of the Securities Act of 1933, as amended (the “Securities Act”), to eligible purchasers at par. The Company received net proceeds of approximately \$884.0 million, net of initial purchasers’ fees and expenses, which the Company used to fund the purchase price of the Anchor Acquisition (refer to Note 3 for additional information), the redemption of \$500.0 million in aggregate principal amount outstanding of 2019 Notes (defined below) and for general partnership purposes, including planned capital expenditures at the Company’s facilities. Interest on the 2021 Notes is paid semiannually in arrears on April 15 and October 15 of each year, beginning on October 15, 2014.

At any time prior to April 15, 2017, the Company may on any one or more occasions redeem up to 35% of the aggregate principal amount of the 2021 Notes with the net proceeds of a public or private equity offering at a redemption price of 106.5% of the principal amount, plus any accrued and unpaid interest to the date of redemption, provided that: (1) at least 65% of the aggregate principal amount of 2021 Notes issued remains outstanding immediately after the occurrence of such redemption and (2) the redemption occurs within 180 days of the date of the closing of such public or private equity offering.

On and after April 15, 2017, the Company may on any one or more occasions redeem all or a part of the 2021 Notes at the redemption prices (expressed as percentages of principal amount) set forth below, plus any accrued and unpaid interest to the applicable redemption date on such 2021 Notes, if redeemed during the twelve-month period beginning on April 15 of the years indicated below:

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Year	Percentage
2017	103.250%
2018	101.625%
2019 and thereafter	100.000%

Prior to April 15, 2017, the Company may on any one or more occasions redeem all or part of the 2021 Notes at a redemption price equal to the sum of: (1) the principal amount thereof, plus (2) a make-whole premium (as set forth in the indenture governing the 2021 Notes) at the redemption date, plus any accrued and unpaid interest to the applicable redemption date.

7.625% Senior Notes (the “2022 Notes”)

On November 26, 2013, the Company issued and sold \$350.0 million in aggregate principal amount of 7.625% senior notes due January 15, 2022 in a private placement pursuant to Section 4(a)(2) of the Securities Act, to eligible purchasers at a discounted price of 98.494 percent of par. The 2022 Notes were resold to qualified institutional buyers pursuant to Rule 144A under the Securities Act and to persons outside the U.S. pursuant to Regulation S under the Securities Act. The Company received net proceeds of \$337.4 million, net of discount, initial purchasers’ fees and expenses, which the Company used for general partnership purposes, to fund previously announced organic growth projects, to fund the purchase price of the Bel-Ray Acquisition and the redemption of \$100.0 million in aggregate principal amount outstanding of 2019 Notes (defined below). Refer to Note 3 for additional information regarding the Bel-Ray Acquisition. Interest on the 2022 Notes is paid semiannually in arrears on January 15 and July 15 of each year, beginning on July 15, 2014.

At any time prior to January 15, 2017, the Company may on any one or more occasions redeem up to 35% of the aggregate principal amount of the 2022 Notes with the net proceeds of a public or private equity offering at a redemption price of 107.625% of the principal amount, plus any accrued and unpaid interest to the date of redemption, provided that: (1) at least 65% of the aggregate principal amount of 2022 Notes issued remains outstanding immediately after the occurrence of such redemption and (2) the redemption occurs within 180 days of the date of the closing of such public or private equity offering.

On and after January 15, 2018, the Company may on any one or more occasions redeem all or a part of the 2022 Notes at the redemption prices (expressed as percentages of principal amount) set forth below, plus any accrued and unpaid interest to the applicable redemption date on such 2022 Notes, if redeemed during the twelve-month period beginning on January 15 of the years indicated below:

Year	Percentage
2018	103.813%
2019	101.906%
2020 and thereafter	100.000%

Prior to January 15, 2018, the Company may on any one or more occasions redeem all or part of the 2022 Notes at a redemption price equal to the sum of: (1) the principal amount thereof, plus (2) a make-whole premium (as set forth in the indenture governing the 2022 Notes) at the redemption date, plus any accrued and unpaid interest to the applicable redemption date.

On November 26, 2013, in connection with the issuance and sale of the 2022 Notes, the Company entered into a registration rights agreement with the initial purchasers of the 2022 Notes obligating the Company to use reasonable best efforts to file an exchange offer registration statement with the Securities and Exchange Commission (“SEC”), so that holders of the 2022 Notes can offer to exchange the 2022 Notes for registered notes having substantially the same terms as the 2022 Notes and evidencing the same indebtedness as the 2022 Notes. On November 27, 2013, the Company filed an exchange offer registration statement for the 2022 Notes with the SEC, which was declared effective on December 10, 2013. The exchange offer was completed on January 13, 2014, thereby fulfilling all of the requirements of the 2022 Notes registration rights agreement.

9.625% Senior Notes (the “2020 Notes”)

On June 29, 2012, in connection with the acquisition of Royal Purple, the Company issued and sold \$275.0 million in aggregate principal amount of 9.625% senior notes due August 1, 2020 in a private placement pursuant to Section 4(a)(2) of the Securities Act, to eligible purchasers at a discounted price of 98.25 percent of par. The 2020 Notes were resold to qualified institutional buyers pursuant to Rule 144A under the Securities Act and to persons outside the U.S. pursuant to Regulation S under the Securities Act. The Company received net proceeds of \$262.5 million, net of discount, initial purchasers’ fees and

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

expenses, which the Company used to fund a portion of the purchase price of the Royal Purple Acquisition. Refer to Note 3 for additional information regarding the Royal Purple Acquisition. Interest on the 2020 Notes is paid semiannually in arrears on February 1 and August 1 of each year, beginning on February 1, 2013.

At any time prior to August 1, 2015, the Company may on any one or more occasions redeem up to 35% of the aggregate principal amount of the 2020 Notes with the net proceeds of a public or private equity offering at a redemption price of 109.625% of the principal amount, plus any accrued and unpaid interest to the date of redemption, provided that: (1) at least 65% of the aggregate principal amount of 2020 Notes issued remains outstanding immediately after the occurrence of such redemption and (2) the redemption occurs within 120 days of the date of the closing of such public or private equity offering.

On and after August 1, 2016, the Company may on any one or more occasions redeem all or a part of the 2020 Notes at the redemption prices (expressed as percentages of principal amount) set forth below, plus any accrued and unpaid interest to the applicable redemption date on such 2020 Notes, if redeemed during the twelve-month period beginning on August 1 of the years indicated below:

Year	Percentage
2016	104.813%
2017	102.406%
2018 and thereafter	100.000%

Prior to August 1, 2016 the Company may on any one or more occasions redeem all or part of the 2020 Notes at a redemption price equal to the sum of: (1) the principal amount thereof, plus (2) a make-whole premium (as set forth in the indenture governing the 2020 Notes) at the redemption date, plus any accrued and unpaid interest to the applicable redemption date.

In connection with the issuance and sale of the 2020 Notes, the Company entered into a registration rights agreement with the initial purchasers of the 2020 Notes obligating the Company to use reasonable best efforts to file an exchange offer registration statement with the SEC so that holders of the 2020 Notes could offer to exchange the 2020 Notes for registered notes having substantially the same terms as the 2020 Notes and evidencing the same indebtedness as the 2020 Notes. On December 4, 2012, the Company filed initially an exchange offer registration statement for the 2020 Notes with the SEC, which was declared effective on June 27, 2013. The exchange offer was completed on July 26, 2013, thereby fulfilling all of the requirements of the 2020 Notes registration rights agreement.

9.375% Senior Notes (the “2019 Notes”)

On April 21, 2011, in connection with the restructuring of the majority of its outstanding long-term debt, the Company issued and sold \$400.0 million in aggregate principal amount of 9.375% of senior notes due May 1, 2019 (the “2019 Notes issued in April 2011”) in a private placement pursuant to Section 4(a)(2) of the Securities Act, to eligible purchasers at par. The 2019 Notes issued in April 2011 were resold to qualified institutional buyers pursuant to Rule 144A of the Securities Act and to persons outside the U.S. pursuant to Regulation S under the Securities Act. The Company received proceeds of \$389.0 million, net of underwriters’ fees and expenses, which the Company used to repay in full borrowings outstanding under its prior term loan, as well as all accrued interest and fees, and for general partnership purposes.

On September 19, 2011, in connection with the acquisition of the Superior Refinery, the Company issued and sold \$200.0 million in aggregate principal amount of 9.375% of senior notes due May 1, 2019 (the “2019 Notes issued in September 2011”) in a private placement pursuant to Section 4(a)(2) of the Securities Act, to eligible purchasers at a discounted price of 93.0 percent of par. The 2019 Notes issued in September 2011 were resold to qualified institutional buyers pursuant to Rule 144A of the Securities Act and to persons outside the U.S. pursuant to Regulation S under the Securities Act. The Company received proceeds of \$180.3 million, net of discount, underwriters’ fees and expenses, which the Company used to fund a portion of the purchase price of the Superior Acquisition. Because the terms of the 2019 Notes issued in September 2011 are substantially identical to the terms of the 2019 Notes issued in April 2011, in this Annual Report, the Company collectively refers to the 2019 Notes issued in April 2011 and the 2019 Notes issued in September 2011 as the “2019 Notes.”

On November 26, 2013, the Company redeemed approximately \$74.0 million and \$26.0 million in aggregate principal amount outstanding of the 2019 issued in April 2011 and 2019 Notes issued in September 2011, respectively, with the net proceeds from the issuance of the 2022 Notes at a redemption price of \$111.2 million. In conjunction with the early redemption, the Company recognized a loss of \$14.6 million recorded in debt extinguishment costs on the consolidated statements of operations for the year ended December 31, 2013. Interest on the 2019 Notes is paid semiannually in arrears on May 1 and

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

November 1 of each year, beginning on November 1, 2011. The 2019 Notes will mature on May 1, 2019, unless redeemed prior to maturity.

On March 31, 2014, the Company redeemed approximately \$326.0 million and \$174.0 million in aggregate principal amount outstanding of the remaining 2019 Notes issued in April 2011 and 2019 Notes issued in September 2011, respectively, with the net proceeds from the issuance of the 2021 Notes at a redemption price of \$570.9 million. In conjunction with the early redemption, the Company recognized a loss of \$89.6 million recorded in debt extinguishment costs in the consolidated statements of operations for the year ended December 31, 2014.

In connection with the issuances and sales of the 2019 Notes, the Company entered into registration rights agreements with the initial purchasers of the 2019 Notes obligating the Company to use reasonable best efforts to file an exchange offer registration statement with the SEC so that holders of the 2019 Notes could offer to exchange the 2019 Notes for registered notes having substantially the same terms as the 2019 Notes and evidencing the same indebtedness as the 2019 Notes. On December 16, 2011, the Company filed exchange offer registration statements for the 2019 Notes with the SEC, which were declared effective on January 3, 2012. The exchange offers were completed on February 2, 2012, thereby fulfilling all of the requirements of the 2019 Notes registration rights agreements by the specified dates.

2020 Notes, 2021 Notes and 2022 Notes

In accordance with SEC Rule 3-10 of Regulation S-X, consolidated financial statements of non-guarantors are not required. The Company has no assets or operations independent of its subsidiaries. Obligations under its 2020, 2021 and 2022 Notes are fully and unconditionally and jointly and severally guaranteed on a senior unsecured basis by the Company's current 100%-owned operating subsidiaries and certain of the Company's future operating subsidiaries, with the exception of the Company's "minor" subsidiaries (as defined by Rule 3-10 of Regulation S-X), including Calumet Finance Corp. (100%-owned Delaware corporation that was organized for the sole purpose of being a co-issuer of certain of the Company's indebtedness, including the 2020, 2021 and 2022 Notes). There are no significant restrictions on the ability of the Company or subsidiary guarantors for the Company to obtain funds from its subsidiary guarantors by dividend or loan. None of the subsidiary guarantors' assets represent restricted assets pursuant to SEC Rule 4-08(e)(3) of Regulation S-X.

The 2020, 2021 and 2022 Notes are subject to certain automatic customary releases, including the sale, disposition, or transfer of capital stock or substantially all of the assets of a subsidiary guarantor, designation of a subsidiary guarantor as unrestricted in accordance with the applicable indenture, exercise of legal defeasance option or covenant defeasance option, liquidation or dissolution of the subsidiary guarantor and a subsidiary guarantor ceases to both guarantee other Company debt and to be an obligor under the revolving credit facility. The Company's operating subsidiaries may not sell or otherwise dispose of all or substantially all of their properties or assets to, or consolidate with or merge into, another company if such a sale would cause a default under the indentures governing the 2020, 2021 and 2022 Notes.

The indentures governing the 2020, 2021 and 2022 Notes contain covenants that, among other things, restrict the Company's ability and the ability of certain of the Company's subsidiaries to: (i) sell assets; (ii) pay distributions on, redeem or repurchase the Company's common units or redeem or repurchase its subordinated debt; (iii) make investments; (iv) incur or guarantee additional indebtedness or issue preferred units; (v) create or incur certain liens; (vi) enter into agreements that restrict distributions or other payments from the Company's restricted subsidiaries to the Company; (vii) consolidate, merge or transfer all or substantially all of the Company's assets; (viii) engage in transactions with affiliates and (ix) create unrestricted subsidiaries. These covenants are subject to important exceptions and qualifications. At any time when the 2020, 2021 and 2022 Notes are rated investment grade by either Moody's Investors Service, Inc. ("Moody's") or Standard & Poor's Ratings Services ("S&P") and no Default or Event of Default, each as defined in the indentures governing the 2020, 2021 and 2022 Notes, has occurred and is continuing, many of these covenants will be suspended, except in the case of the 2020 Notes, an investment grade rating is required from both Moody's and S&P. As of December 31, 2014, the Company's Fixed Charge Coverage Ratio (as defined in the indentures governing the 2020, 2021 and 2022 Notes) was 2.5 to 1.0.

Second Amended and Restated Senior Secured Revolving Credit Facility

On July 14, 2014, the Company entered into a second amended and restated senior secured revolving credit facility, which increased the maximum availability of credit under the revolving credit facility from \$850.0 million to \$1.0 billion, subject to borrowing base limitations, and includes a \$500.0 million incremental uncommitted expansion feature. The revolving credit facility, which is the Company's primary source of liquidity for cash needs in excess of cash generated from operations, matures in July 2019 and bears interest at a rate equal to prime plus a basis points margin or London Interbank Offered Rate ("LIBOR") plus a basis points margin, at the Company's option. As of December 31, 2014, the margin was 75 basis points for prime and 175 basis points for LIBOR; however, the margin can fluctuate quarterly based on the Company's average availability for additional borrowings under the revolving credit facility in the preceding calendar quarter as follows:

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Quarterly Average Availability Percentage	Margin on Base Rate Revolving Loans	Margin on LIBOR Revolving Loans
≥ 66%	0.50%	1.50%
≥ 33% and < 66%	0.75%	1.75%
< 33%	1.00%	2.00%

In addition to paying interest quarterly on outstanding borrowings under the revolving credit facility, the Company is required to pay a commitment fee to the lenders under the revolving credit facility with respect to the unutilized commitments thereunder at a rate equal to 0.250% or 0.375% per annum depending on the average daily available unused borrowing capacity for the preceding month. The Company also pays a customary letter of credit fee, including a fronting fee of 0.125% per annum of the stated amount of each outstanding letter of credit, and customary agency fees.

The borrowing capacity at December 31, 2014 under the revolving credit facility was \$575.9 million. As of December 31, 2014, the Company had \$150.8 million in outstanding borrowings under the revolving credit facility and outstanding standby letters of credit of \$114.3 million, leaving \$310.8 million available for additional borrowings based on specified availability limitations. Lenders under the revolving credit facility have a first priority lien on the Company's accounts receivable, inventory and substantially all of its cash.

The revolving credit facility contains various covenants that limit, among other things, the Company's ability to: incur indebtedness; grant liens; dispose of certain assets; make certain acquisitions and investments; redeem or prepay other debt or make other restricted payments such as distributions to unitholders; enter into transactions with affiliates and enter into a merger, consolidation or sale of assets. Further, the revolving credit facility contains one springing financial covenant which provides that only if the Company's availability under the revolving credit facility falls below the greater of (a) 12.5% of the Borrowing Base (as defined in the revolving credit agreement) then in effect and (b) \$45.0 million, then the Company will be required to maintain as of the end of each fiscal quarter a Fixed Charge Coverage Ratio (as defined in the revolving credit agreement) of at least 1.0 to 1.0.

As of December 31, 2014, the Company was in compliance with all covenants under the revolving credit facility.

Master Derivative Contracts

The Company's payment obligations under all of the Company's master derivatives contracts for commodity hedging generally are secured by a first priority lien on the Company's real property, plant and equipment, fixtures, intellectual property, certain financial assets, certain investment property, commercial tort claims, chattel paper, documents, instruments and proceeds of the foregoing (including proceeds of hedge arrangements). The Company had no additional letters of credit or cash margin posted with any hedging counterparty as of December 31, 2014. The Company's master derivatives contracts and Collateral Trust Agreement (as defined below) continue to impose a number of covenant limitations on the Company's operating and financing activities, including limitations on liens on collateral, limitations on dispositions of collateral and collateral maintenance and insurance requirements.

Collateral Trust Agreement

The Company has a collateral sharing agreement (the "Collateral Trust Agreement") with each of its secured hedging counterparties and an administrative agent for the benefit of the secured hedging counterparties, which governs how the secured hedging counterparties will share collateral pledged as security for the payment obligations owed by the Company to the secured hedging counterparties under their respective master derivatives contracts. The Collateral Trust Agreement limits to \$100.0 million the extent to which forward purchase contracts for physical commodities would be covered by, and secured under, the Collateral Trust Agreement. There is no such limit on financially settled derivative instruments used for commodity hedging. Subject to certain conditions set forth in the Collateral Trust Agreement, the Company has the ability to add secured hedging counterparties from time to time.

Capital Leases

Assets recorded under these capital lease obligations are included in property, plant and equipment and total \$50.5 million and \$11.1 million as of December 31, 2014 and 2013, respectively. As of December 31, 2014 and 2013, the Company had recorded \$5.7 million and \$5.0 million, respectively, in accumulated depreciation for these capital lease assets.

On July 7, 2014, the Company entered into a capital lease agreement with TexStar Midstream Logistics, L.P. ("TexStar") under which TexStar constructed, owns and operates a 30,000 bpd crude oil pipeline system supplying significant volumes of Eagle Ford crude oil to the Company's San Antonio refinery for a term of 20 years. Thereafter, the agreement will continue on a month-to-month basis unless terminated by either party. Under the terms of the agreement, TexStar installed and operates the

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Karnes North Pipeline System (“KNPS”), a pipeline that transports crude oil from Karnes City, Texas to the San Antonio refinery’s Elmendorf, Texas terminal, a key supply hub for the San Antonio refinery. The Company expects to receive deliveries of at least 12,000 bpd of crude oil through the KNPS-Elmendorf terminal supply route. The pipeline became fully operational on November 1, 2014. The total obligation and asset under the capital lease agreement as of December 31, 2014 was \$39.3 million. Total depreciation expense for this lease during the year ended December 31, 2014 was \$0.3 million.

As of December 31, 2014, the Company had estimated minimum commitments for the payment of total rentals under capital leases as follows (in millions):

Year	Capital Leases
2015	\$ 7.0
2016	7.0
2017	7.0
2018	7.0
2019	6.9
Thereafter	102.9
Total minimum lease payments	137.8
Less amount representing interest	94.2
Capital lease obligations	43.6
Less obligations due within one year	0.6
Long-term capital lease obligations	\$ 43.0

Maturities of Long-Term Debt

As of December 31, 2014, principal payments of debt obligations and future minimum rentals on capital lease obligations are as follows (in millions):

Year	Maturity
2015	\$ 0.6
2016	0.7
2017	0.7
2018	0.8
2019	151.5
Thereafter	1,565.1
Total	\$ 1,719.4

8. Derivatives

The Company is exposed to price risks due to fluctuations in the price of crude oil, refined products (primarily in the Company’s fuel products segment), natural gas and precious metals. The Company uses various strategies to reduce its exposure to commodity price risk. The strategies to reduce the Company’s risk utilize both physical forward contracts and financially settled derivative instruments, such as swaps, collars and options, to attempt to reduce the Company’s exposure with respect to:

- crude oil purchases and sales;
- fuel product sales and purchases;
- natural gas purchases;
- precious metals purchases: and

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

- fluctuations in the value of crude oil between geographic regions and between the different types of crude oil such as NYMEX West Texas Intermediate (“NYMEX WTI”), Light Louisiana Sweet (“LLS”), Western Canadian Select (“WCS”), Mixed Sweet Blend (“MSW”) and ICE Brent (“Brent”).

The Company manages its exposure to commodity markets, credit, volumetric and liquidity risks to manage its costs and volatility of cash flows as conditions warrant or opportunities become available. These risks may be managed in a variety of ways that may include the use of derivative instruments. Derivative instruments may be used for the purpose of mitigating risks associated with an asset, liability, and anticipated future transactions and the changes in fair value of the Company’s derivative instruments will affect its earnings and cash flows; however, such changes should be offset by price or rate changes related to the underlying commodity or financial transaction that is part of the risk management strategy. The Company does not speculate with derivative instruments or other contractual arrangements that are not associated with its business objectives. Speculation is defined as increasing the Company’s natural position above the maximum position of its physical assets or trading in commodities, currencies or other risk bearing assets that are not associated with the Company’s business activities and objectives. The Company’s positions are monitored routinely by a risk management committee to ensure compliance with its stated risk management policy and documented risk management strategies. All strategies are reviewed on an ongoing basis by the Company’s risk management committee, which will add, remove or revise strategies in anticipation of changes in market conditions and/or in risk profiles. These changes in strategies are to position the Company in relation to its risk exposures in an attempt to capture market opportunities as they arise.

The Company recognizes all derivative instruments at their fair values (see Note 9) as either current assets or current liabilities in the consolidated balance sheets. Fair value includes any premiums paid or received and unrealized gains and losses. Fair value does not include any amounts receivable from or payable to counterparties, or collateral provided to counterparties. Derivative asset and liability amounts with the same counterparty are netted against each other for financial reporting purposes. The Company’s financial results are subject to the possibility that changes in a derivative’s fair value could result in significant ineffectiveness and potentially no longer qualify portions or all of our derivative instruments for hedge accounting.

During the fourth quarter 2014, the risk management committee approved the early settlement of select second quarter 2015 through calendar year 2016 crude oil, gasoline, diesel and jet fuel swaps derivative. As a result of the settlement of these derivative assets, the Company received approximately \$44.8 million.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following tables summarize the Company's gross fair values of its derivative instruments, presenting the impact of offsetting derivative assets in the Company's consolidated balance sheets as of December 31, 2014 and 2013 (in millions):

	December 31, 2014			December 31, 2013

The Company is exposed to credit risk in the event of nonperformance by its counterparties on these derivative transactions. The Company does not expect nonperformance on any derivative instruments, however, no assurances can be provided. The Company's credit exposure related to these derivative instruments is represented by the fair value of contracts reported as derivative assets. As of December 31, 2014, the Company had five counterparties in which derivatives held were net assets, totaling \$23.2 million. As of December 31, 2013, the Company had no counterparties, in which the derivatives held were net assets. To manage credit risk, the Company selects and periodically reviews counterparties based on credit ratings. The Company primarily executes its derivative instruments with large financial institutions that have ratings of at least Baa2 and A- by Moody's and S&P, respectively. In the event of default, the Company would potentially be subject to losses on derivative instruments with mark-to-market gains. The Company requires collateral from its counterparties when the fair value of the derivatives exceeds agreed upon thresholds in its master derivative contracts with these counterparties. No such collateral was held by the Company as of December 31, 2014 or December 31, 2013. The Company's contracts with these counterparties allow for netting of derivative instruments executed under each contract. Collateral received from counterparties is reported in other current liabilities, and collateral held by counterparties is reported in deposits, on the Company's consolidated balance sheets and is not netted against derivative assets or liabilities. Any outstanding collateral is released to the Company upon settlement of the related derivative instrument liability. As of December 31, 2014 and 2013, the Company had provided its counterparties with no collateral.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Certain of the Company's outstanding derivative instruments are subject to credit support agreements with the applicable counterparties which contain provisions setting certain credit thresholds above which the Company may be required to post agreed-upon collateral, such as cash or letters of credit, with the counterparty to the extent that the Company's mark-to-market net liability, if any, on all outstanding derivatives exceeds the credit threshold amount per such credit support agreement. The majority of the credit support agreements covering the Company's outstanding derivative instruments also contain a general provision stating that if the Company experiences a material adverse change in its business, in the reasonable discretion of the counterparty, the Company's credit threshold could be lowered by such counterparty. The Company does not expect that it will experience a material adverse change in its business.

The cash flow impact of the Company's derivative activities is classified primarily as a change in derivative activity in the operating activities section in the consolidated statements of cash flows.

Derivative Instruments Designated as Cash Flow Hedges

The Company accounts for certain derivatives hedging purchases of crude oil and sales of gasoline, diesel and jet fuel swaps as cash flow hedges. The derivative instruments designated as cash flow hedges that are hedging sales and purchases are recorded to sales and cost of sales, respectively, in the consolidated statements of operations upon recording the related hedged transaction in sales or cost of sales. The Company assesses, both at inception of the cash flow hedge and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. Periodically, the Company may enter into crude oil and fuel product basis swaps to more effectively hedge its crude oil purchases, crude oil sales and fuel products sales. These derivatives can be combined with a swap contract in order to create a more effective cash flow hedge.

To the extent a derivative instrument designated as a cash flow hedge is determined to be effective as a cash flow hedge of an exposure to changes in the fair value of a future transaction, the change in fair value of the derivative is deferred in accumulated other comprehensive income (loss), a component of partners' capital in the consolidated balance sheets, until the underlying transaction hedged is recognized in the consolidated statements of operations.

Ineffectiveness is inherent in the hedging of crude oil and fuel products. Due to the volatility in the markets for crude oil and fuel products, the Company is unable to predict the amount of ineffectiveness each period, determined on a derivative by derivative basis or in the aggregate for a specific commodity, and has the potential for the future loss of cash flow hedge accounting. Ineffectiveness has resulted, and the loss of cash flow hedge accounting has resulted, in increased volatility in the Company's financial results. However, even though certain derivative instruments may not qualify for cash flow hedge accounting, the Company intends to continue to utilize such instruments as management believes such derivative instruments continue to provide the Company with the opportunity to more effectively stabilize cash flows.

Cash flow hedge accounting is discontinued when it is determined that a derivative no longer qualifies as an effective hedge or when it is no longer probable that the hedged forecasted transaction will occur. When cash flow hedge accounting is discontinued because the derivative instrument no longer qualifies as an effective cash flow hedge, the derivative instrument is subject to the mark-to-market method of accounting prospectively. Changes in the mark-to-market fair value of the derivative instrument are recorded to unrealized gain (loss) on derivative instruments in the consolidated statements of operations. Unrealized gains and losses related to discontinued cash flow hedges that were previously deferred in accumulated other comprehensive income (loss) will remain in accumulated other comprehensive income (loss) until the underlying transaction is reflected in earnings, unless it is probable that the hedged forecasted transaction will not occur, at which time, associated deferred amounts in accumulated other comprehensive income (loss) are immediately recognized in unrealized gain (loss) on derivative instruments.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company recorded the following amounts in its consolidated balance sheets, consolidated statements of operations, consolidated statements of comprehensive income (loss) and consolidated statements of partners' capital as of, and for the years ended December 31, 2014 and 2013 related to its derivative instruments that were designated as cash flow hedges (in millions):

Type of Derivative	Amount of Gain (Loss) Recognized in Accumulated Other Comprehensive Income (Loss) on Derivatives (Effective Portion)		Location of (Gain) Loss	Amount of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income (Loss) into Net Income (Loss) (Effective Portion)		Location of Gain (Loss)	Amount of Gain (Loss) Recognized in Net Income (Loss) on Derivatives (Ineffective Portion)	
	Year Ended December 31,			Year Ended December 31,			Year Ended December 31,	
	2014	2013		2014	2013		2014	2013
Fuel products segment:								
Crude oil swaps	\$ (185.8)	\$ 18.7	Cost of sales	\$ 44.2	\$ 3.1	Unrealized/Realized	\$ 4.8	\$ (3.0)
Gasoline swaps	56.3	(19.5)	Sales	(1.4)	(0.4)	Unrealized/Realized	(7.6)	(1.7)
Diesel swaps	220.0	(28.8)	Sales	(6.7)	(4.4)	Unrealized/Realized	—	(5.3)
Jet fuel swaps	23.7	(7.3)	Sales	(0.9)	1.7	Unrealized/Realized	0.6	5.1
Specialty products segment:								
Crude oil swaps	—	—	Cost of sales	1.8	0.5	Unrealized/Realized	—	—
Total	\$ 114.2	\$ (36.9)		\$ 37.0	\$ 0.5		\$ (2.2)	\$ (4.9)

The effective portion of the cash flow hedges classified in accumulated other comprehensive income (loss) was a gain of \$25.8 million and a loss of \$51.4 million as of December 31, 2014 and 2013, respectively. Absent a change in the fair market value of the underlying transactions, except for any underlying transactions pertaining to the payment of interest on existing financial instruments, the following other comprehensive income at December 31, 2014 will be reclassified to earnings by December 31, 2016 with balances being recognized as follows (in millions):

Year	Accumulated Other Comprehensive Income
2015	\$ 15.0
2016	10.8
Total	\$ 25.8

Based on fair values as of December 31, 2014, the Company expects to reclassify \$15.0 million of net gains on derivative instruments from accumulated other comprehensive income (loss) to earnings during the next twelve months due to actual crude oil purchases, diesel, gasoline and jet fuel sales. However, the amounts actually realized will be dependent on the fair values as of the dates of settlements.

Derivative Instruments Designated as Fair Value Hedges

For derivative instruments that are designated and qualify as a fair value hedge, the effective gain or loss on the derivative instrument, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk are recognized as interest expense in the consolidated statements of operations. No hedge ineffectiveness was recognized as the interest rate swap qualifies for the "shortcut" method and, as a result, changes in the fair value of the derivative instrument offset the changes in the fair value of the underlying hedged debt. In addition, the differential to be paid or received on the interest rate swap arrangement is accrued and recognized as an adjustment to interest expense in the consolidated statements of operations. The Company assesses at the inception of the fair value hedge whether the derivatives that are used in the hedging transactions are highly effective in offsetting changes in fair values of hedged items.

Fair value hedge accounting is discontinued when it is determined that a derivative no longer qualifies as an effective hedge or when it is no longer probable that the hedged forecasted transaction will occur. When fair value hedge accounting is discontinued because the derivative instrument no longer qualifies as effective fair value hedge, the derivative instrument is still subject to mark-to-market method of accounting, however the Company will cease to adjust the hedged asset or liability for changes in fair value.

In 2014, the Company entered into an interest rate swap agreement which converts a portion of the Company's fixed rate debt to a floating rate. This agreement involves the receipt of fixed rate amounts in exchange for floating rate interest payments

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

over the life of the agreement without an exchange of the underlying principal amount. Also, in connection with the interest rate swap agreement, the Company entered into an option that permits the counterparty to cancel the interest rate swap for a specified premium. The Company designated this interest rate swap and option as a fair value hedge. As of December 31, 2014, the total notional amount of the Company's receive-fixed/pay-variable interest rate swap was \$200.0 million with a maturity date of January 15, 2022.

The Company recorded the following gains (losses) in its consolidated statements of operations for the years ended December 31, 2014 and 2013 related to its derivative instrument designated as a fair value hedge (in millions):

	Location of Gain (Loss) of Derivative	Amount of Gain Recognized in Net Income (Loss)		Hedged Item	Location of Gain (Loss) on Hedged Item	Amount of Loss Recognized in Net Income (Loss)	
		Year Ended December 31,				Year Ended December 31,	
		2014	2013			2014	2013
Swaps not allocated to a specific segment:							
Interest rate swap	Interest expense	\$ 2.5	\$ —	2022 Notes	Interest expense	\$ (2.5)	\$ —
Total		\$ 2.5	\$ —			\$ (2.5)	\$ —

Derivative Instruments Not Designated as Hedges

For derivative instruments not designated as hedges, the change in fair value of the asset or liability for the period is recorded to unrealized gain (loss) on derivative instruments in the consolidated statements of operations. Upon the settlement of a derivative not designated as a hedge, the gain or loss at settlement is recorded to realized gain (loss) on derivative instruments in the consolidated statements of operations. The Company has entered into crude oil basis swaps that do not qualify as cash flow hedges for accounting purposes as they were not entered into simultaneously with a corresponding NYMEX WTI derivative contract. Additionally, the Company has entered into diesel crack spread collars, gasoline crack spread collars, natural gas collars, and certain other crude oil swaps, diesel swaps, gasoline swaps, natural gas swaps and platinum swaps that do not qualify as cash flow hedges for accounting purposes as they are determined not to be highly effective in offsetting changes in the cash flows associated with crude oil purchases and gasoline and diesel sales at the Company's Superior refinery.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Crude Oil Basis Swap Contracts

The Company has entered into crude oil basis swaps to mitigate the risk of future changes in pricing differentials between Canadian heavy crude oil and NYMEX WTI crude oil, pricing differentials between LLS and NYMEX WTI and pricing differentials between MSW and NYMEX WTI. At December 31, 2014, the Company had the following derivatives related to crude oil basis swaps in its fuel products segment, none of which are designated as hedges.

<u>Crude Oil Basis Swap Contracts by Expiration Dates</u>	<u>Barrels Purchased</u>	<u>BPD</u>	<u>Average Differential to NYMEX WTI (\$/Bbl)</u>
First Quarter 2015	118,000	2,000	\$ (22.40)
Total	<u>118,000</u>		
Average differential			\$ (22.40)

At December 31, 2013, the Company had the following derivatives related to crude oil basis swaps in its fuel products segment, none of which are designated as hedges.

<u>Crude Oil Basis Swap Contracts by Expiration Dates</u>	<u>Barrels Purchased</u>	<u>BPD</u>	<u>Average Differential to NYMEX WTI (\$/Bbl)</u>
First Quarter 2014	118,000	1,311	\$ (28.50)
Third Quarter 2014	184,000	2,000	\$ (21.75)
Fourth Quarter 2014	184,000	2,000	\$ (21.50)
Total	<u>486,000</u>		
Average differential			\$ (23.29)

As of December 31, 2013, the Company had approximately 248,000 barrels of crude oil basis swaps related to future crude oil purchases and sales to mitigate the risk of future changes in pricing differentials between Brent and NYMEX WTI on the Company's reselling of crude oil. The net impact of these derivative instruments, none of which are designated as hedges, was a net loss of \$0.6 million that was recorded to realized gain (loss) on derivative instruments in the consolidated statements of operations for the year ended December 31, 2013.

Crude Oil Percent Basis Swap Contracts

During the fourth quarter of 2014, the Company entered into derivative instruments to secure a percentage differential on WCS crude oil to NYMEX WTI. At December 31, 2014, the Company had the following derivatives related to crude oil percent basis swaps in its fuel products segment, none of which are designated as hedges.

<u>Crude Oil Percent Basis Swap Contracts by Expiration Dates</u>	<u>Barrels Purchased</u>	<u>BPD</u>	<u>Fixed Percentage of NYMEX WTI (Average % of WTI/Bbl)</u>
Third Quarter 2015	184,000	2,000	73.0%
Fourth Quarter 2015	184,000	2,000	73.0%
Total	<u>368,000</u>		
Average percentage			73.0%

Total	1,683,500		
Average price			\$ 107.82

Platinum Swap Contracts

At December 31, 2014, the Company had approximately 1,900 troy ounces of platinum swap contracts through 2015 in its fuel products segment, none of which are designated as hedges.

9. Fair Value Measurements

The Company uses a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. Observable inputs are from sources independent of the Company. Unobservable inputs reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability developed based upon the best information available in the circumstances. These tiers include the following:

- Level 1—inputs include observable unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2—inputs include other than quoted prices in active markets that are either directly or indirectly observable
- Level 3—inputs include unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions

In determining fair value, the Company uses various valuation techniques and prioritizes the use of observable inputs. The availability of observable inputs varies from instrument to instrument and depends on a variety of factors including the type of instrument, whether the instrument is actively traded and other characteristics particular to the instrument. For many financial instruments, pricing inputs are readily observable in the market, the valuation methodology used is widely accepted by market participants and the valuation does not require significant management judgment. For other financial instruments, pricing inputs are less observable in the marketplace and may require management judgment.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Recurring Fair Value Measurements

Derivative Assets and Liabilities

Derivative instruments are reported in the accompanying consolidated financial statements at fair value. The Company's derivative instruments consist of over-the-counter ("OTC") contracts, which are not traded on a public exchange. Substantially all of the Company's derivative instruments are with counterparties that have long-term credit ratings of at least Baa2 and A- by Moody's and S&P, respectively.

To estimate the fair values of the Company's commodity derivative instruments, the Company uses the forward rate, the strike price, contractual notional amounts, the risk free rate of return and contract maturity. To estimate the fair value of the Company's fixed-to-floating interest rate swap derivative instrument, the Company uses discounted cash flows, which use observable inputs such as maturity and market interest rates. Various analytical tests are performed to validate the counterparty data. The fair values of the Company's derivative instruments are adjusted for nonperformance risk and creditworthiness of the hedging entities through the Company's credit valuation adjustment ("CVA"). The CVA is calculated at the counterparty level utilizing the fair value exposure at each payment date and applying a weighted probability of the appropriate survival and marginal default percentages. The Company uses the counterparty's marginal default rate and the Company's survival rate when the Company is in a net asset position at the payment date and uses the Company's marginal default rate and the counterparty's survival rate when the Company is in a net liability position at the payment date. As a result of applying the applicable CVA at December 31, 2014, the Company's net asset was increased by approximately \$2.0 million and net liability was reduced by approximately \$0.1 million. As a result of applying the CVA at December 31, 2013, the Company's net liability was reduced by approximately \$1.9 million.

Observable inputs utilized to estimate the fair values of the Company's derivative instruments were primarily based on inputs that are readily available in public markets or can be derived from information available in publicly quoted markets. Based on the use of various unobservable inputs, principally non-performance risk, creditworthiness of the hedging entities and unobservable inputs in the forward rate, the Company has categorized these derivative instruments as Level 3. Significant increases (decreases) in any of those unobservable inputs in isolation would result in a significantly lower (higher) fair value measurement. The Company believes it has obtained the most accurate information available for the types of derivative instruments it holds. See Note 8 for further information on derivative instruments.

Pension Assets

Pension assets are reported at fair value in the accompanying consolidated financial statements. At December 31, 2014, the Company's investments associated with its pension plan (as such term is hereinafter defined) primarily consisted of mutual funds. The mutual funds are categorized as Level 2 because inputs used in their valuation are not quoted prices in active markets that are indirectly observable and are valued at the NAV of shares in each fund held by the pension plan at quarter end as provided by the third party administrator. See Note 12 for further information on pension assets.

Liability Awards

Unit based compensation liability awards are awards that are expected to be settled in cash on their vesting dates, rather than in equity units ("Liability Awards"). The Liability Awards are categorized as Level 1 because the fair value of the Liability Awards is based on the Company's quoted closing unit price as of each balance sheet date.

Renewable Identification Numbers Obligation

The Company's RINs Obligation represents a liability for the purchase of RINs to satisfy the EPA requirement to blend biofuels into the fuel products it produces pursuant to the EPA's Renewable Fuel Standard. RINs are assigned to biofuels produced in the U.S. as required by the EPA. The EPA sets annual quotas for the percentage of biofuels that must be blended into transportation fuels consumed in the U.S., and as a producer of motor fuels from petroleum, the Company is required to blend biofuels into the fuel products it produces at a rate that will meet the EPA's annual quota. To the extent the Company is unable to blend biofuels at that rate, it must purchase RINs in the open market to satisfy the annual requirement. The Company's RINs Obligation is based on the amount of RINs it must purchase net of amounts internally generated and the price of those RINs as of the balance sheet date. The RINs Obligation is categorized as Level 2 and is measured at fair value using the market approach based on quoted prices from an independent pricing service.

In October 2014, the EPA granted the Company's Shreveport and San Antonio refineries a "small refinery exemption" under the RFS for the full year 2013, as provided for under the Clean Air Act. The EPA determined that for the full year 2013, compliance with the RFS would represent a "disproportionate economic hardship" for these two refineries. As a result of the exemption, the Company sold all excess RINs related to these refineries for a gain of \$18.2 million, net of cost to generate, recorded in cost of sales for the year ended December 31, 2014 in the consolidated statement of operations.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The table below sets forth a summary of net changes in fair value of the Company's Level 3 financial assets and liabilities for the years ended December 31, 2014 and 2013 (in millions):

	Derivative Instruments, Net	
	For the Year Ended December 31,	
	2014	2013
Fair value at January 1,	\$ (54.8)	\$ (44.9)
Realized (gain) loss on derivative instruments	(43.8)	4.7
Unrealized gain (loss) on derivative instruments	(0.6)	25.7
Interest income, net	(0.8)	—
Change in fair value of cash flow hedges	114.2	(36.9)
Settlements	3.4	(3.4)
Transfers in (out) of Level 3	—	—
Fair value at December 31,	<u>\$ 17.6</u>	<u>\$ (54.8)</u>
Total gain (loss) included in net income (loss) attributable to changes in unrealized gain (loss) relating to financial assets and liabilities held as of December 31,	<u>\$ (0.6)</u>	<u>\$ 25.7</u>

All settlements from derivative instruments designated as cash flow hedges and deemed "effective" are included in sales for gasoline, diesel and jet fuel derivatives, and cost of sales for crude oil in the consolidated statements of operations in the period that the hedged cash flow occurs. Any "ineffectiveness" associated with these settlements from derivative instruments designated as cash flow hedges are recorded in earnings in realized gain (loss) on derivative instruments in the consolidated statements of operations. All settlements from derivative instruments designated as fair value hedges are accrued and recorded as an adjustment to interest expense in the consolidated statements of operations. All settlements from derivative instruments not designated as hedges are recorded in realized gain (loss) on derivative instruments in the consolidated statements of operations. See Note 8 for further information on derivative instruments.

Nonrecurring Fair Value Measurements

Certain nonfinancial assets and liabilities are measured at fair value on a nonrecurring basis and are subject to fair value adjustments in certain circumstances, such as when there is evidence of impairment. Assets and liabilities acquired in business combinations are recorded at their fair value as of the date of acquisition. Refer to Note 3 for the fair values of assets acquired and liabilities assumed in connection with the Company's acquisitions.

The Company reviews for goodwill impairment annually on October 1 and whenever events or changes in circumstances indicate its carrying value may not be recoverable. The fair value of the reporting units is determined using the income approach. The income approach focuses on the income-producing capability of an asset, measuring the current value of the asset by calculating the present value of its future economic benefits such as cash earnings, cost savings, corporate tax structure and product offerings. Value indications are developed by discounting expected cash flows to their present value at a rate of return that incorporates the risk-free rate for the use of funds, the expected rate of inflation and risks associated with the reporting unit. These assets would generally be classified within Level 3, in the event that the Company were required to measure and record such assets at fair value within its consolidated financial statements, as discussed in Note 5.

The Company periodically evaluates the carrying value of long-lived assets to be held and used, including indefinite-lived intangible assets and property plant and equipment, when events or circumstances warrant such a review. Fair value is determined primarily using anticipated cash flows assumed by a market participant discounted at a rate commensurate with the risk involved and these assets would generally be classified within Level 3, in the event that the Company was required to measure and record such assets at fair value within its consolidated financial statements.

Estimated Fair Value of Financial Instruments

Cash

The carrying value of cash is considered to be representative of its fair value.

Debt

The estimated fair value of long-term debt at December 31, 2014 and 2013 consists primarily of the senior notes. The estimated aggregate fair value of the Company's senior notes defined as Level 1 was based upon quoted market prices in an active market. The estimated aggregate fair value of the Company's senior notes classified as Level 2 was based upon directly

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

observable inputs. The carrying value of borrowings, if any, under the Company's revolving credit facility and capital lease obligations approximate their fair values as determined by discounted cash flows and are classified as Level 3. See Note 7 for further information on long-term debt.

The Company's carrying and estimated fair value of the Company's financial instruments, carried at adjusted historical cost, at December 31, 2014 and 2013 were as follows (in millions):

	December 31, 2014			December 31, 2013	
	Level	Fair Value	Carrying Value	Fair Value	Carrying Value
Financial Instrument:					
Senior notes	1	\$ 630.0	\$ 619.1	\$ 863.6	\$ 761.2
Senior notes	2	\$ 803.3	\$ 900.0	\$ 353.9	\$ 344.8
Revolving credit facility	3	\$ 150.8	\$ 150.8	—	\$ —
Capital lease and other obligations	3	\$ 43.6	\$ 43.6	\$ 4.8	\$ 4.8

10. Partners' Capital

Units Outstanding

Of the 69,452,233 common units outstanding at December 31, 2014, 51,823,027 common units were held by the public, with the remaining 17,629,206 common units held by the Company's affiliates.

Significant information regarding rights of the limited partners includes the following:

- Rights to receive distributions of available cash within 45 days after the end of each quarter, to the extent the Company has sufficient cash from operations after the establishment of cash reserves.
- Limited partners have limited voting rights on matters affecting the Company's business. The general partner may consider only the interests and factors that it desires and has no duty or obligation to give any consideration of any interests of the Company's limited partners. Limited partners have no right to elect the board of directors of the Company's general partner.
- The vote of the holders of at least 66 2/3% of all outstanding units voting together as a single class is required to remove the general partner. Any holder, other than the general partner or the general partner's affiliates, that owns 20% or more of any class of units outstanding cannot vote on any matter.
- The Company may issue an unlimited number of limited partner interests without the approval of the limited partners.
- Limited partners may be required to sell their units to the general partner if at any time the general partner owns more than 80% of the issued and outstanding common units.

Distributions and Incentive Distribution Rights

The Company's general partner is entitled to incentive distributions if the amount it distributes to unitholders with respect to any quarter exceeds specified target levels shown below:

	Total Quarterly Distribution Per Common Unit	Marginal Percentage Interest in Distributions	
	Target Amount	Unitholders	General Partner
Minimum Quarterly Distribution	\$0.45	98%	2%
First Target Distribution	up to \$0.495	98%	2%
Second Target Distribution	above \$0.495 up to \$0.563	85%	15%
Third Target Distribution	above \$0.563 up to \$0.675	75%	25%
Thereafter	above \$0.675	50%	50%

The Company's ability to make distributions is limited by its debt instruments. The revolving credit facility generally permits the Company to make cash distributions to unitholders as long as immediately after giving effect to such a cash distribution the Company has availability under the revolving credit facility at least the greater of (i) 15% of the Borrowing Base (as defined in the credit agreement) then in effect and (ii) \$70.0 million. Further, the revolving credit facility contains one springing financial covenant which provides that only if the Company's availability under the revolving credit facility falls

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

below the greater of (a) 12.5% of the Borrowing Base (as defined in the credit agreement) then in effect and (b) \$45.0 million, the Company will be required to maintain as of the end of each fiscal quarter a Fixed Charge Coverage Ratio (as defined in the credit agreement) of at least 1.0 to 1.0. The indentures governing the 2020 Notes, 2021 Notes and 2022 Notes provide that if the Company's fixed charge coverage ratio (as defined in the indentures) for the most recently ended four full fiscal quarters is not less than 1.75 to 1.0, the Company will be permitted to pay distributions to its unitholders in an amount equal to available cash from operating surplus (each as defined in the Company's partnership agreement) with respect to its preceding fiscal quarter, subject to certain customary adjustments described in the indentures. If the Company's fixed charge coverage ratio is less than 1.75 to 1.0, the Company will be able to pay distributions to its unitholders up to an amount equal to (i) a \$120.0 million basket for the 2020 Notes, (ii) a \$225.0 million basket for the 2021 Notes and (iii) a \$210.0 million basket for the 2022 Notes, subject to certain customary adjustments described in the indentures.

The Company's distribution policy is as defined in its partnership agreement. For the years ended December 31, 2014, 2013 and 2012, the Company made distributions of \$210.2 million, \$201.6 million and \$132.4 million, respectively, to its partners. For the years ended December 31, 2014, 2013 and 2012, the general partner was allocated \$15.4 million, \$14.7 million and \$5.5 million, respectively, in incentive distribution rights.

Public Offerings of Common Units

During 2014, 2013 and 2012, the Company completed the following marketed public offerings of its common units (in millions except unit and per unit data):

Closing Date	Number of Common Units Offered	Price per Unit	Net Proceeds ⁽¹⁾	General Partner Contribution ⁽²⁾	Underwriting Discount	Use of Proceeds
May 8, 2012	6,000,000	\$25.50	\$ 146.6	\$ 3.1	\$ 6.2	Net proceeds were used to repay borrowings under the revolving credit facility.
January 8, 2013	5,750,000 ⁽³⁾	\$31.81	\$ 175.2	\$ 3.8	\$ 7.4	Net proceeds were used to repay borrowings under the revolving credit facility and for general partnership purposes.
April 1, 2013	6,037,500 ⁽⁴⁾	\$37.50	\$ 217.3	\$ 4.6	\$ 9.1	Net proceeds were used for general partnership purposes.

⁽¹⁾ Proceeds are net of underwriting discounts, commissions and expenses but before its general partner's capital contribution.

⁽²⁾ The Company's general partner contributions were made to retain its 2% general partner interest.

⁽³⁾ Includes the full exercise of the overallotment option of 750,000 common units which closed concurrently with the 5,000,000 firm units on January 8, 2013.

⁽⁴⁾ Includes the full exercise of the overallotment option of 787,500 common units which closed on April 4, 2013.

On March 10, 2014, the Company entered into an Equity Placement Agreement with various sales agents under which the Company may issue and sell, from time to time, common units representing limited partner interests, having an aggregate offering price of up to \$300.0 million through one or more sales agents. The Equity Placement Agreement provides the Company the right, but not the obligation, to sell common units in the future, at prices the Company deems appropriate. These sales, if any, will be made pursuant to the terms of the Equity Placement Agreement between the Company and the sales agents. The net proceeds from any sales under this agreement will be used for general partnership purposes, which may include, among other things, repayment of indebtedness, working capital, capital expenditures and acquisitions. The Company's general partner contributed its proportionate capital contribution to retain its 2% general partner interest. For the year ended December 31, 2014, the Company sold 134,955 common units under the Equity Placement Agreement for net proceeds of \$3.6 million. Underwriting discounts totaled \$0.1 million and the Company's general partner contributed \$0.1 million to maintain its general partner interest.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

11. Unit-Based Compensation

The Company's general partner originally adopted a Long-Term Incentive Plan on January 24, 2006, which was amended and restated effective January 22, 2009, for its employees, consultants and directors and its affiliates who perform services for the Company. The Long-Term Incentive Plan provides for the grant of restricted units, phantom units, unit options and substitute awards and, with respect to unit options and phantom units, the grant of distribution equivalent rights ("DERs"). Subject to adjustment for certain events, an aggregate of 783,960 common units may be delivered pursuant to awards under the Long-Term Incentive Plan. Units withheld to satisfy the Company's general partner's tax withholding obligations are available for delivery pursuant to other awards. The Long-Term Incentive Plan is administered by the compensation committee of the Company's general partner's board of directors.

Non-employee directors of the Company's general partner have been granted phantom units under the terms of the Long-Term Incentive Plan as part of their director compensation package related to fiscal years 2012, 2013 and 2014. These phantom units have a four year service period with one-quarter of the phantom units vesting annually on each December 31st of the vesting period. Although ownership of common units related to the vesting of such phantom units does not transfer to the recipients until the phantom units vest, the recipients have DERs on these phantom units from the date of grant.

For the years ended December 31, 2014 and 2012, named executive officers and certain employees were awarded phantom units under the terms of the Long-Term Incentive Plan, as part of the Company's achievement of specified levels of financial performance in the fiscal year. These phantom units are subject to time-vesting requirements whereby 25% of the units vest during the performance period, and the remainder will vest ratably over the next three years on each December 31st. Although ownership of common units related to the vesting of such phantom units does not transfer to the recipients until the phantom units vest, the recipients have DERs on these phantom units from the date of grant.

The Company uses the market price of its common units on the grant date to calculate the fair value and related compensation cost of the phantom units. The Company amortizes this compensation cost to partners' capital and general and administrative expense in the consolidated statements of operations using the straight-line method over the service period, as it expects these units to fully vest.

Liability Awards are awards that are expected to be settled in cash on their vesting dates, rather than in equity units. Phantom unit Liability Awards are recorded in accrued salaries, wages and benefits in the consolidated balance sheets based on the vested portion of the fair value of the awards on the balance sheet date. The fair value of Liability Awards are updated at each balance sheet date and changes in the fair values of the vested portions of the awards are recorded as increases or decreases to compensation expense within general and administrative expense in the consolidated statements of operations.

A summary of the Company's nonvested phantom units as of December 31, 2014, and the changes during the years ended December 31, 2014, 2013 and 2012, are presented below:

	Number of Phantom Units	Weighted-Average Grant Date Fair Value
Non-vested at January 1, 2012	562,696	\$ 19.77
Granted	616,997	26.69
Vested	(286,976)	21.16
Forfeited	(56,790)	20.00
Non-vested at December 31, 2012	835,927	\$ 27.57
Granted	483,044	27.73
Vested	(276,115)	24.22
Forfeited	(354,600)	30.60
Non-vested at December 31, 2013	688,256	\$ 23.70
Granted	477,527	25.97
Vested	(280,263)	23.72
Forfeited	(383,400)	25.59
Non-vested at December 31, 2014	502,120	\$ 26.48

For the years ended December 31, 2014, 2013 and 2012, compensation expense of \$5.5 million, \$4.8 million and \$4.6 million, respectively, was recognized in the consolidated statements of operations related to vested phantom unit grants, including \$2.5 million and \$1.6 million, attributable to Liability Awards for the years ended December 31, 2014 and 2013,

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

respectively. As of December 31, 2014 and 2013, there was a total of \$12.2 million and \$16.3 million, respectively of unrecognized compensation costs related to nonvested phantom unit grants, including \$10.5 million and \$12.4 million, attributable to Liability Awards for the years ended December 31, 2014 and 2013, respectively. These costs are expected to be recognized over a weighted-average period of approximately 3 years. The total fair value of phantom units vested during the years ended December 31, 2014 and 2013, was \$6.7 million and \$6.7 million, respectively.

12. Employee Benefit Plans

Defined Contribution Plan

The Company has a domestic defined contribution plan administered by its general partner for (i) all full-time employees that are eligible to participate in the plan (“401(k) Plan”). Participants in the 401(k) Plan are allowed to contribute 1% to 70% of their pre-tax earnings to the plan, subject to government imposed limitations. The Company matches 100% of each 1% of eligible compensation contributed by the participant up to 4% and 50% of each additional 1% of eligible compensation contributed up to 6%, for a maximum contribution by the Company of 5% of eligible compensation contributed per participant. The plan also includes a profit-sharing component for eligible employees. Contributions under the profit-sharing component are determined by the board of directors of the Company’s general partner and are discretionary. The funding policy is consistent with funding requirements of applicable laws and regulations.

The Company recorded the following 401(k) Plan matching contribution and profit sharing expenses in the consolidated statement of operations for the years ended December 31, 2014, 2013 and 2012 (in millions):

	Year Ended December 31,		
	2014	2013	2012
401(k) Plan matching contribution expense	\$ 5.4	\$ 4.1	\$ 3.2
Profit sharing expense	\$ 1.2	\$ 0.9	\$ 2.5

Defined Pension Plan

The Company has domestic noncontributory defined benefit plans for those salaried employees as well as those employees represented by either the United Steelworkers (“USW”) or the International Union of Operating Engineers (“IUOE”); who (i) were formerly employees of Penreco and became employees of the Company as a result of the acquisition of Penreco on January 3, 2008 (“Penreco Pension Plan”), (ii) were formerly employees of Murphy Oil Corporation (“Murphy Oil”) represented by the IUOE and who became employees of the Company as a result of the acquisition of the Superior refinery on September 30, 2011 (the “Superior Pension Plan”) or (iii) were formerly employees of Montana Refining and who became employees of the Company as a result of the Montana Acquisition on October 1, 2012 (the “Montana Pension Plan” and together with the Penreco Pension Plan and the Superior Pension Plan, the “Pension Plan”). During 2014, the Company made contributions of \$1.5 million to its Pension Plan and expects to make contributions in 2015 of approximately \$1.6 million to its Pension Plan.

Under the Penreco Pension Plan, benefits are based primarily on years of service for USW and IUOE represented employees and the employee’s final 60 months’ average compensation for salaried employees. In 2009, the Company amended the Penreco Pension Plan, which curtailed Penreco employees from accumulating additional benefits subsequent to December 31, 2009.

Under the Superior Pension Plan, benefits are based primarily on years of service for IUOE represented employees and the employee’s three highest consecutive calendar years of compensation within the last 10 years of service. Effective July 1, 2012, the Company amended the Superior Pension Plan, which curtailed Superior employees from accumulating additional benefits subsequent to December 31, 2012. For the year ended December 31, 2012, the Company recorded a \$0.2 million curtailment gain.

Under the Montana Pension Plan, benefits are based primarily on years of service and the employees’ 36 months’ highest average compensation for salaried employees. Effective October 1, 2012, the date of the Montana Acquisition, the Company amended the Montana Pension Plan, which curtailed only the Montana salaried employees from accumulating additional benefits subsequent to October 31, 2012.

Defined Benefit Other Plans

The Company also has domestic contributory defined benefit post retirement medical plans and contributory life insurance plans for (i) those salaried employees, as well as those employees represented by either the International Brotherhood

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

of Teamsters (“IBT”), USW or IUOE, who were formerly employees of Penreco and who became employees of the Company as a result of the acquisition of Penreco on January 3, 2008 (“Penreco Other Plan”) or (ii) employees represented by the IUOE, who were formerly employees of Murphy Oil and who became employees of the Company as a result of the acquisition of the Superior refinery on September 30, 2011 (“Superior Other Plan” and together with the Penreco Other Plan, the “Other Plan”). The funding policy is consistent with funding requirements of applicable laws and regulations.

Effective 2009, the Company amended the Penreco Other Plan, which curtailed employees from accumulating additional benefits subsequent to February 28, 2009. Effective July 1, 2012, the Company amended the Superior Other Plan, which curtailed Superior employees from accumulating additional benefits subsequent to December 31, 2012. For the year ended December 31, 2012, the Company recorded a \$7.0 million curtailment gain.

All information presented below has been adjusted for these curtailments for the Pension Plan and Other Plan. The change in the benefit obligations, change in the plan assets, funded status and amounts recognized in the consolidated balance sheets were as follows (in millions):

	Year Ended December 31,			
	2014		2013	
	Pension Plan	Other Plan	Pension Plan	Other Plan
Change in projected benefit obligation:				
Benefit obligation at beginning of year	\$ 57.2	\$ 0.3	\$ 65.3	\$ 0.3

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The portion relating to the Pension Plan and Other Plan classified in accumulated other comprehensive income (loss) is \$11.5 million and \$1.9 million as of December 31, 2014 and 2013, respectively. In 2015, the estimated amount that will be amortized from accumulated other comprehensive income includes a net loss of \$0.8 million for the Pension Plan.

For the Pension Plan, the Company uses a corridor approach to amortize actuarial gains and losses. Under this approach, net actuarial gains or losses in excess of ten percent of the larger of the projected benefit obligation or the fair value of plan assets are amortized on a straight-line basis. The period of amortization is the average remaining service of active participants who are expected to receive benefits under the plans.

For the Other Plan, the Company uses corridor approach to amortize actuarial gains and losses. Under this approach, net actuarial gains or losses in excess of ten percent of the larger of the accumulated projected benefit obligation or the fair value of plan assets are amortized on a straight-line basis. The period of amortization is the average life expectancy of participants who are expected to receive benefits under the plans.

All pension and other post retirement plans have a December 31 measurement date. The significant weighted average assumptions used to determine the benefit obligations for the years ended December 31, 2014 and 2013 were as follows:

	Benefit Obligations Assumptions	
	2014	2013
Pension Plan:		
Discount rate for Penreco Pension Plan	3.92%	4.78%
Discount rate for Superior Pension Plan	3.86%	4.66%
Discount rate for Montana Pension Plan	4.13%	4.97%
Rate of compensation increase for Montana Pension Plan	3.00%	3.00%
Other Plan:		
Discount rate for Penreco Other Plan	3.70%	4.29%
Immediate trend rate for Penreco Other Plan ⁽¹⁾	7.30%	7.50%
Ultimate trend rate for Penreco Other Plan ⁽¹⁾	4.50%	4.50%
Year that the rate reaches ultimate trend rate for Penreco Other Plan ⁽¹⁾	2029	2029

⁽¹⁾ For measurement purposes, an annual rate of increase in the per capita cost of covered health care benefits was assumed for 2014. The rate was assumed to decrease by 0.20% per year for an ultimate rate of 4.50% in 2029 for the Penreco Other Plan and remain at that level thereafter.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The significant weighted average assumptions used to determine the net periodic benefit cost (income) for the years ended December 31, 2014, 2013 and 2012 were as follows:

	Net Periodic Benefit Cost (Income) Assumptions		
	2014	2013	2012
Pension Plan:			
Discount rate for Penreco Pension Plan	4.78%	3.86%	4.63%
Discount rate for Superior Pension Plan	4.66%	3.75%	4.55%
Discount rate for Montana Pension Plan	4.97%	4.03%	3.89%
Expected return on plan assets for Penreco Pension Plan ⁽¹⁾	6.75%	6.75%	6.00%
Expected return on plan assets for Superior Pension Plan ⁽¹⁾	6.75%	6.75%	3.00%
Expected return on plan assets for Montana Pension Plan ⁽¹⁾	6.75%	6.75%	6.00%
Rate of compensation increase for Superior Pension Plan	N/A	N/A	3.75%
Rate of compensation increase for Montana Pension Plan	3.00%	3.00%	3.00%
Other Plan:			
Discount rate for Penreco Other Plan	4.29%	3.33%	4.04%
Discount rate for Superior Other Plan	N/A	N/A	4.65%
Immediate trend rate ⁽²⁾	7.50%	7.70%	8.00%
Ultimate trend rate for Penreco Other Plan ⁽²⁾	4.50%	4.50%	4.50%
Ultimate trend rate for Superior Other Plan ⁽²⁾	N/A	N/A	4.50%
Year that the rate reaches ultimate trend rate for Penreco Other Plan ⁽²⁾	2029	2029	2029
Year that the rate reaches ultimate trend rate for Superior Other Plan ⁽²⁾	N/A	N/A	2029

⁽¹⁾ The Company considered the historical returns, the future expectation for returns for each asset class and fair value of the plan assets, as well as the target asset allocation of the Pension Plan portfolio which was developed in accordance with the Company's Statement of Investment Policy, to develop the expected long-term rate of return on plan assets.

⁽²⁾ For measurement purposes, an annual rate of increase in the per capita cost of covered health care benefits was assumed for 2014. The rate was assumed to decrease by 0.20% per year for an ultimate rate of 4.50% for 2029 for the Penreco Other Plan and remain at that level thereafter.

An increase or decrease by one percentage point in the assumed healthcare cost trend rates would have less than \$0.1 million effect on the post retirement benefit obligation and service and interest cost components of benefit costs for the Other Plan as of December 31, 2014.

Investment Policy

The Defined Benefit Plan Investment Committee (the "Investment Committee") is responsible for the overall management of the Pension Plan assets, and its responsibilities encompass establishing the investment strategies and policies, monitoring the management of plan assets, reviewing the asset allocation mix on a regular basis, monitoring the performance of the Pension Plan assets to determine whether the investments objectives are met and guidelines followed and taking the appropriate action if objectives are not followed. The Company uses different investment managers with various asset management objectives to eliminate any significant concentration of risk. The Investment Committee believes there are no significant concentrations of risks associated with the investment assets. The Company's investment manager will assist in the continual assessment of assets and the potential reallocation of certain investments and will evaluate the selection of investment managers for the Pension Plan assets based on such factors as organizational stability, depth of resources, experience, investment strategy and process, performance expectations and fees.

Long-term strategic investment objectives utilize a diversified mix of equity and fixed income securities to preserve the funded status of the trusts, and balance risk and return in relationship to the respective liabilities. The primary investment

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

strategy currently employed is a dynamic de-risking strategy that periodically rebalances among various investment categories depending on the current funded position and maximizes the effectiveness of the Pension Plan asset allocation strategy. This program is designed to actively move from return-seeking investments (such as equities) toward liability-hedging investments (such as fixed income) as funding levels improve.

Effective June 2013, all of the Pension Plan assets were invested in a Master Trust. Trust assets in the Pension Plan are invested subject to the policy restriction that the average quality of the fixed income portfolio must be rated at least investment grade by both Moody's and S&P. These assets are invested in accordance with prudent expert standards as mandated by the Employee Retirement Income Security Act ("ERISA"). The Pension Plan's target asset allocation is currently comprised of the following:

<u>Asset Class</u>	<u>Range of Asset Allocation</u>	<u>Target Allocation</u>
Domestic equities	0 — 50%	25%
Foreign equities	0 — 50%	25%
Fixed income	50 — 100%	50%

Investment Fund Strategies

Domestic equity funds include funds that invest in U.S. common and preferred stocks. Foreign equity funds invest in securities issued by companies listed on international stock exchanges. Certain funds have value and growth objectives and managers may attempt to profit from security mispricing in equity markets to meet these objectives. Short term investments (including commercial paper, certificates of deposits and government repurchase agreements) and derivatives may be used for hedging purposes to limit exposure to various risk factors.

Fixed income funds invest in U.S. dollar-denominated, investment grade bonds, including U.S. Treasury and government agency securities, corporate bonds and mortgage and asset-backed securities. These funds may also invest in any combination of non-investment grade bonds, non-U.S. dollar-denominated bonds and bonds issued by issuers in emerging capital markets. Short term investments (including commercial paper, certificates of deposits and government repurchase agreements) and derivatives may be used for hedging purposes to limit exposure to various risk factors.

The Company's Pension Plan asset allocations, as of December 31, 2014 and 2013 by asset category, are as follows:

	<u>2014</u>	<u>2013</u>
Domestic equities	20%	23%
Foreign equities	19%	23%
Fixed income	61%	54%
	<u>100%</u>	<u>100%</u>

At December 31, 2014, the Company's investments associated with its Pension Plan (as such term is hereinafter defined) primarily consisted of (i) cash and cash equivalents and (ii) mutual funds. The mutual funds are categorized as Level 2 because inputs used in their valuation are not quoted prices in active markets that are indirectly observable and are valued at the net asset value ("NAV") of shares in each fund held by the Pension Plan at quarter end as provided by the third party administrator. See Note 9 for the definition of Levels 1, 2 and 3. The Company's Pension Plan assets measured at fair value at December 31, 2014 and 2013 were as follows (in millions):

	<u>Fair Value of Pension Assets at December 31,</u>			
	<u>2014</u>		<u>2013</u>	
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 1</u>	<u>Level 2</u>
Cash and cash equivalents	\$ 0.2	\$ —	\$ —	\$ —
Domestic equities	—	10.0	—	10.6
Foreign equities	—	9.4	—	10.6
Fixed income	—	30.0	—	24.6
	<u>\$ 0.2</u>	<u>\$ 49.4</u>	<u>\$ —</u>	<u>\$ 45.8</u>

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following benefit payments for the Pension Plan, which reflect expected future service, as appropriate, are expected to be paid in the years indicated as of December 31, 2014 (in millions):

	Pension Benefits
2015	\$ 2.6
2016	2.7
2017	2.8
2018	3.0
2019	3.2
2020 to 2024	18.0
Total	\$ 32.3

13. Accumulated Other Comprehensive Loss

The table below sets forth a summary of changes in accumulated other comprehensive loss by component for the year ended December 31, 2014 (in millions):

	Derivatives	Defined Benefit Pension And Retiree Health Benefit Plans	Foreign Currency Translation Adjustment	Total
Accumulated other comprehensive loss at December 31, 2013	\$ (51.4)	\$ (1.9)	\$ (0.1)	\$ (53.4)
Other comprehensive income (loss) before reclassifications	114.2	(9.9)	(0.5)	103.8
Amounts reclassified from accumulated other comprehensive income	(37.0)	0.3	—	(36.7)
Net current period other comprehensive income (loss)	77.2	(9.6)	(0.5)	67.1
Accumulated other comprehensive income (loss) at December 31, 2014	<u>\$ 25.8</u>	<u>\$ (11.5)</u>	<u>\$ (0.6)</u>	<u>\$ 13.7</u>

The table below sets forth a summary of reclassification adjustments out of accumulated other comprehensive loss in the Company's consolidated statements of operations for the year ended December 31, 2014 (in millions):

Components of Accumulated Other Comprehensive Loss	Amount Reclassified From Accumulated Other Comprehensive Loss	Location of Gain (Loss)
Derivative gains (losses) reflected in gross profit		
	\$ (9.0)	Sales
	46.0	Cost of sales
	<u>\$ 37.0</u>	Total
Amortization of defined benefit pension benefit plans:		
Amortization of net loss	\$ (0.3) ⁽¹⁾	
	<u>\$ (0.3)</u>	Total

⁽¹⁾ This accumulated other comprehensive loss component is included in the computation of net periodic pension cost. See Note 12 for additional information.

14. Income Taxes

The Company conducts certain activities through wholly-owned subsidiaries that are corporations which are subject to federal, state and local income taxes. As of December 31, 2014, 2013 and 2012, the components of federal and state income tax expense are summarized as follows (in millions):

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	December 31,		
	2014	2013	2012
Current expense:			
Federal	\$ 0.2	\$ —	\$ —
State	0.2	0.4	0.8
Total	\$ 0.4	\$ 0.4	\$ 0.8
Deferred expense (benefit):			
Federal	\$ (1.5)	\$ —	\$ —
State	0.3	—	—
Total	\$ (1.2)	\$ —	\$ —
Total income tax expense (benefit)	\$ (0.8)	\$ 0.4	\$ 0.8

A reconciliation of effective tax rate to the U.S. statutory rate attributable to operations for December 31, 2014, 2013 and 2012 is as follows:

	December 31,		
	2014	2013	2012
Federal income tax rate	35.0 %	35.0 %	35.0 %
Partnership earnings not subject to tax	(22.4)%	(35.0)%	(35.0)%
State income taxes, net of federal income tax effect	(0.4)%	11.4 %	0.4 %
Impact of non-deductible goodwill	(11.5)%	— %	— %
Other items, net	— %	(1.1)%	— %
Effective tax rate	0.7 %	10.3 %	0.4 %

Deferred Taxes

Deferred taxes result from the temporary differences between financial reporting carrying amounts and the tax basis of existing assets and liabilities. The table below summarizes the principal components of the deferred tax assets (liabilities) as follows as of December 31, 2014 and 2013 (in millions):

	December 31,	
	2014	2013
Deferred income tax assets:		
Inventory	\$ 2.3	\$ —
Net operating loss carryforwards	3.7	—
Total deferred income tax assets	\$ 6.0	\$ —
Deferred income tax liabilities:		
Intangible assets	\$ (22.0)	\$ —
Property, plant and equipment	(14.0)	(1.7)
Total deferred income tax liabilities	\$ (36.0)	\$ (1.7)
Net deferred income tax liability	\$ (30.0)	\$ (1.7)

As a result of the Company's analysis, management has determined that the Company does not have any uncertain tax positions. As of December 31, 2014, the Company had tax loss carryforwards of approximately \$14.3 million, which are expected to be utilized prior to expiration in 2034. As of December 31, 2014, the Company had \$3.7 million deferred tax assets arising from net operating loss carryforwards. The Company's tax federal and state returns remain subject to examination by taxing authorities for three years.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

15. Earnings per Unit

The following table sets forth the computation of basic and diluted earnings per limited partner unit for the years ended December 31, 2014, 2013 and 2012 (in millions, except unit and per unit data):

	Year Ended December 31,		
	2014	2013	2012
Numerator for basic and diluted earnings per limited partner unit:			
Net income (loss)	\$ (112.2)	\$ 3.5	\$ 205.7
Less:			
General partner's interest in net income (loss)	(2.2)	0.1	4.1
General partner's incentive distribution rights	15.4	14.7	5.5
Non-vested share based payments	—	0.2	1.1
Net income (loss) available to limited partners	<u>\$ (125.4)</u>	<u>\$ (11.5)</u>	<u>\$ 195.0</u>
Denominator for basic and diluted earnings per limited partner unit:			
Basic weighted average limited partner units outstanding	69,671,827	67,938,784	55,559,183
Effect of dilutive securities:			
Participating securities — phantom units	—	—	117,558
Diluted weighted average limited partner units outstanding ⁽¹⁾	<u>69,671,827</u>	<u>67,938,784</u>	<u>55,676,741</u>
Limited partners' interest basic net income (loss) per unit	<u>\$ (1.80)</u>	<u>\$ (0.17)</u>	<u>\$ 3.51</u>
Limited partners' interest diluted net income (loss) per unit	<u>\$ (1.80)</u>	<u>\$ (0.17)</u>	<u>\$ 3.50</u>

⁽¹⁾ Total diluted weighted average limited partner units outstanding excludes 0.2 million and 0.2 million potentially dilutive phantom units for the years ended December 31, 2014 and 2013.

16. Transactions with Related Parties

During the years ended December 31, 2014, 2013 and 2012, the Company had product sales to related parties owned by a limited partner of \$9.1 million, \$9.7 million and \$9.3 million, respectively. Trade accounts and other receivables from related parties at December 31, 2014 and 2013 were \$1.2 million and \$0.2 million, respectively. The Company also had purchases from related parties owned by a limited partner, excluding crude purchases related to Legacy Resources Co., L.P. ("Legacy Resources") and directors' and officers' liability insurance premiums discussed below, during the years ended December 31, 2014, 2013 and 2012 of \$41.1 million, \$9.0 million and \$7.2 million, respectively. Accounts payable to related parties, excluding accounts payable related to the Legacy Resources agreement discussed below, at December 31, 2014 and 2013 were \$4.3 million and \$4.3 million, respectively.

The Company has a crude oil supply agreement with Legacy Resources, the Master Crude Oil Purchase and Sale Agreement. Legacy Resources is owned in part by one of the Company's general partners, an affiliate of the Company's general partner, the Company's chief executive officer and vice chairman of the board of the Company's general partner, F. William Grube, and the Company's executive vice president - strategy and development, Jennifer G. Straumins. No crude oil is currently being purchased by the Company under this agreement. During the years ended December 31, 2014, 2013 and 2012, the Company had crude oil purchases of \$0.8 million, \$1.2 million and \$1.1 million, respectively, from Legacy Resources under spot agreements. The Company had no accounts payable to Legacy Resources at December 31, 2014 and \$0.1 million at December 31, 2013.

Nicholas J. Rutigliano, a former member of the board of directors of the Company's general partner who retired in September 2014, founded Tobias Insurance Group, Inc. ("Tobias"), a commercial insurance brokerage business, which was acquired by Assured Partners, LLC. Mr. Rutigliano continues to serve as president of Tobias. Tobias has historically placed the Company's directors' and officers' liability insurance. The total premiums paid to Tobias by the Company for the years ended December 31, 2014, 2013 and 2012 were \$0.7 million, \$0.7 million and \$0.5 million, respectively. With the exception of its directors' and officers' liability insurance which were placed with this commercial insurance brokerage company, the Company placed its insurance requirements with third parties during the years ended December 31, 2014, 2013 and 2012.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

17. Segments and Related Information

a. Segment Reporting

The Company manages its business in multiple operating segments, which are grouped on the basis of similar product, market and operating factors into the following reportable segments:

- *Specialty Products.* The specialty products segment produces a variety of lubricating oils, solvents, waxes, synthetic lubricants and other products which are sold to customers who purchase these products primarily as raw material components for basic automotive, industrial and consumer goods. Specialty products also include synthetic lubricants used in manufacturing, mining and automotive applications.
- *Fuel Products.* The fuel products segment produces primarily gasoline, diesel, jet fuel and asphalt which are primarily sold to customers located in the PADD 2, PADD 3 and PADD 4 areas within the U.S.
- *Oilfield Services.* The oilfield services segment markets its products and oilfield services including drilling fluids, completion fluids, production chemicals and solids control services to the oil and gas industry.

During the fourth quarter 2014, the Company realigned its reportable segments for financial reporting purposes as a result of the Anchor and SOS Acquisitions in 2014 resulting in a new segment, oilfield services. Prior to this change, Anchor and SOS were reported as part of the specialty products segment. This reporting change did not impact the Company's consolidated results.

The accounting policies of the reporting segments are the same as those described in the summary of significant accounting policies as disclosed in Note 2, except that the disaggregated financial results for the reporting segments have been prepared using a management approach, which is consistent with the basis and manner in which management internally disaggregates financial information for the purposes of assisting internal operating decisions. The Company evaluates performance based upon Adjusted EBITDA. The Company defines Adjusted EBITDA for any period as: (1) net income (loss) plus (2)(a) interest expense; (b) income taxes; (c) depreciation and amortization; (d) unrealized losses from mark to market accounting for hedging activities; (e) realized gains under derivative instruments excluded from the determination of net income (loss); (f) non-cash equity based compensation expense and other non-cash items (excluding items such as accruals of cash expenses in a future period or amortization of a prepaid cash expense) that were deducted in computing net income (loss); (g) debt refinancing fees, premiums and penalties and (h) all extraordinary, unusual or non-recurring items of gain or loss, or revenue or expense; minus (3)(a) unrealized gains from mark to market accounting for hedging activities; (b) realized losses under derivative instruments excluded from the determination of net income and (c) other non-recurring expenses and unrealized items that reduced net income (loss) for a prior period, but represent a cash item in the current period.

The Company manages its assets on a total company basis, not by segment. Therefore, management does not review any asset information by segment and, accordingly, the Company does not report asset information by segment.

Reportable segment information is as follows (in millions):

b. Geographic Information

International sales accounted for less than 10% of consolidated sales in each of the three years ended December 31, 2014, 2013 and 2012. Substantially all of the Company's long-lived assets are domestically located.

c. Product Information

The Company offers specialty products primarily in categories consisting of lubricating oils, solvents, waxes, packaged and synthetic specialty products and other. Fuel products categories primarily consist of gasoline, diesel, jet fuel, asphalt, heavy fuel oils and other. All oilfield services products are consolidated in a standalone category. The following table sets forth the major product category sales (in millions):

	Year Ended December 31,					
	2014		2013		2012	
Specialty products:						
Lubricating oils	\$ 748.4	12.9%	\$ 848.8	15.7%	\$ 1,007.9	21.6%

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

d. Major Customers

During the years ended December 31, 2014, 2013 and 2012, the Company had no customer that represented 10% or greater of consolidated sales.

e. Major Suppliers

During the years ended December 31, 2014, 2013 and 2012, the Company had two suppliers that supplied approximately 45.9%, 54.1% and 65.0%, respectively, of its crude oil supply.

18. Quarterly Financial Data (Unaudited)

The table below sets forth selected quarterly financial data for each of the last two fiscal years (in millions, except unit and per unit data):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total ⁽¹⁾
2014					
Sales	\$ 1,341.0	\$ 1,434.9	\$ 1,675.8	\$ 1,339.4	\$ 5,791.1

Sales	\$ 1,318.6	\$ 1,354.2	\$ 1,505.5	\$ 1,243.1	\$ 5,421.4
Gross profit	134.4	101.0	62.1	112.5	410.0
Net income (loss)	46.0	7.8	(34.8)	(15.5)	3.5
Net income (loss) available to limited partners	41.7	3.8	(37.9)	(19.0)	(11.5)
Limited partners' interest basic net income (loss) per unit	\$ 0.67	\$ 0.05	\$ (0.54)	\$ (0.27)	\$ (0.17)
Limited partners' diluted net income (loss) per unit	\$ 0.66	\$ 0.05	\$ (0.54)	\$ (0.27)	\$ (0.17)
Weighted average limited partner units outstanding — basic	62,831,155	69,571,855	69,626,650	69,635,865	
Weighted average limited partner units outstanding — diluted	63,017,869	69,769,536	69,626,650	69,635,865	

⁽¹⁾ The sum of the four quarters may not equal the total year due to rounding.

19. Subsequent Events

On January 13, 2015, the Company terminated its interest rate swap, which was designated as a fair value hedge, related to the 2022 Notes and having a notional amount of \$200.0 million. In settlement of this swap, the Company received approximately \$3.3 million.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

On January 23, 2015, the Company declared a quarterly cash distribution of \$0.685 per unit on all outstanding common units, or approximately \$52.7 million (including the general partner's incentive distribution rights) in aggregate, for the quarter ended December 31, 2014. The distribution was paid on February 13, 2015 to unitholders of record as of the close of business on February 3, 2015. This quarterly distribution of \$0.685 per unit equates to \$2.74 per unit, or approximately \$210.8 million (including the general partner's incentive distribution rights) in aggregate on an annualized basis.

Subsequent to December 31, 2014, the Company settled select second quarter 2015 through calendar year 2016 fixed priced crack spread derivative instruments for net proceeds of approximately \$9.6 million.

Subsequent to December 31, 2014, the Company sold 307,985 common units for net proceeds of approximately \$7.6 million under the Equity Placement Agreement.

Subsequent to December 31, 2014, the Company entered into the following derivatives related to crude oil purchases in its fuel products segment:

<u>Crude Oil Basis Swap Contracts by Expiration Dates</u>	<u>Barrels Purchased</u>	<u>BPD</u>	<u>Average Swap (\$/Bbl)</u>
First Quarter 2015	423,500	4,706	\$ 48.84
Second Quarter 2015	1,274,000	14,000	\$ 52.61
Third Quarter 2015	382,950	4,163	\$ 56.58
Fourth Quarter 2015	60,950	663	\$ 58.40
	479,460	1,310	\$ 63.35
Total	2,620,860		
Average price			\$ 54.68

Subsequent to December 31, 2014, the Company entered into the following derivatives related to gasoline sales in its fuel products segment:

<u>Gasoline Swap Contracts by Expiration Dates</u>	<u>Barrels Sold</u>	<u>BPD</u>	<u>Average Swap (\$/Bbl)</u>
First Quarter 2015	423,500	4,706	\$ 61.64
Second Quarter 2015	1,274,000	14,000	\$ 69.42
Third Quarter 2015	322,000	3,500	\$ 70.55
Total	2,019,500		
Average price			\$ 67.97

Subsequent to December 31, 2014, the Company entered into the following derivatives related to diesel sales in its fuel products segment:

<u>Diesel Swap Contracts by Expiration Dates</u>	<u>Barrels Sold</u>	<u>BPD</u>	<u>Average Swap (\$/Bbl)</u>
Third Quarter 2015	46,000	500	\$ 77.39
Fourth Quarter 2015	46,000	500	\$ 77.39
Calendar Year 2016	366,000	1,000	\$ 82.99
Total	458,000		
Average price			\$ 81.86

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Subsequent to December 31, 2014, the Company entered into the following derivatives related to diesel percent basis crack spread swap contracts in its fuel products segment, none of which are designated as cash flow hedges:

<u>Diesel Crack Spread Swap Contracts by Expiration Dates</u>	<u>Barrels Sold</u>	<u>BPD</u>	<u>Average % of WTI/Bbl</u>
Third Quarter 2015	92,000	1,000	32.6%
Fourth Quarter 2015	92,000	1,000	32.6%
Calendar Year 2016	549,000	1,500	32.0%
Total	733,000		
Average percentage			32.2%

The fair value of the Company's derivatives that were outstanding as of December 31, 2014 decreased by approximately \$16.0 million subsequent to December 31, 2014 to a net liability of approximately \$15.0 million. The fair value of the Company's senior notes has increased by approximately \$104.0 million subsequent to December 31, 2014.

Item 9. *Changes in and Disagreements With Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) of the Securities Exchange Act of 1934 (the “Exchange Act”), as amended, we have evaluated, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Annual Report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based upon the evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of December 31, 2014 at the reasonable assurance level. See Management’s Report on Internal Control Over Financial Reporting included in Item 8 “Financial Statements and Supplementary Data.”

Changes in Internal Control over Financial Reporting

There have been no changes to our internal controls over financial reporting during the fourth quarter of fiscal year 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

On March 31, 2014 and August 1, 2014, we completed the Anchor and SOS Acquisitions, respectively, which include certain existing information systems and internal controls over financial reporting. We are currently in the process of evaluating and integrating the Anchor and SOS Acquisitions’ historical internal controls over financial reporting with ours. We expect to complete the integrations of the Anchor and SOS Acquisitions in fiscal year 2015.

See Management’s Report on Internal Control Over Financial Reporting included in Item 8 “Financial Statements and Supplemental Data.”

Item 9B. *Other Information*

None.

PART III

Item 10. *Directors, Executive Officers of Our General Partner and Corporate Governance*

Management of Calumet Specialty Products Partners, L.P. and Director Independence

Our general partner, Calumet GP, LLC, manages our operations and activities. Unitholders are limited partners and are not entitled to elect the directors of our general partner or directly or indirectly participate in our management or operations. Our general partner owes a fiduciary duty to our unitholders, as limited by the various provisions of our partnership agreement modifying and restricting the fiduciary duties that might otherwise be owed by our general partner to our unitholders.

The directors of our general partner oversee our operations. The owners of our general partner have appointed seven members to our general partner's board of directors. The directors of our general partner are generally elected by a majority vote of the owners of our general partner on an annual basis. However, as long as our chief executive officer and vice chairman of our general partner, F. William Grube, or trusts established for the benefit of his family members, continue to own at least 30% of the membership interests in our general partner, Mr. Grube (or in certain specified instances, his designee or transferee) has the right to serve as a director of our general partner. The directors of our general partner hold office until the earlier of their death, resignation, removal or disqualification or until their successors have been elected and qualified.

Pursuant to Section 4360 of the NASDAQ Stock Market, LLC Marketplace Rules ("NASDAQ Rules"), a listed limited partnership like us is not required to have a majority of independent directors on the board of directors of our general partner or to establish a compensation committee or a nominating/governance committee. However, three of our general partner's seven directors are "independent" as that term is defined in the NASDAQ Rules and Rule 10A-3 of the Exchange Act. In determining the independence of each director, our general partner has adopted standards that incorporate the NASDAQ Rules and Exchange Act standards. Our general partner's independent directors as determined in accordance with those standards are: James S. Carter, Robert E. Funk and George C. Morris III.

The officers of our general partner manage the day-to-day affairs of our business. Officers serve at the discretion of the board of directors.

Directors and Executive Officers

The following table shows information regarding the directors and executive officers of Calumet GP, LLC as of March 2, 2015.

<u>Name</u>	<u>Age</u>	<u>Position with Calumet GP, LLC</u>
Fred M. Fehsenfeld, Jr.	64	Chairman of the Board
F. William Grube	67	Chief Executive Officer and Vice Chairman of the Board
Jennifer G. Straumins	41	Executive Vice President — Strategy and Development
R. Patrick Murray, II	43	Executive Vice President, Chief Financial Officer and Secretary
Timothy R. Barnhart	55	Executive Vice President — Operations
William A. Anderson	46	Executive Vice President — Sales
James S. Carter	66	Director
Robert E. Funk	69	Director
George C. Morris III	59	Director
Daniel J. Sajkowski	55	Director
Amy M. Schumacher	43	Director

Each director's biographical information set forth below includes the particular experience and qualifications that led the board of directors to conclude that the director is qualified to serve in such capacity.

Fred M. Fehsenfeld, Jr. has served as the chairman of the board of our general partner since September 2005. Mr. Fehsenfeld also served as the vice chairman of the board of our Predecessor from 1990 until our initial public offering. Mr. Fehsenfeld has worked for The Heritage Group in various capacities since 1977 and has served as its managing trustee since 1980. Mr. Fehsenfeld received his B.S. in Mechanical Engineering from Duke University and his M.S. in Management from the Massachusetts Institute of Technology Sloan School.

As co-founder of our Predecessor, Mr. Fehsenfeld has an extensive knowledge base regarding the Company's operations and has participated in all major strategic decision making for the Company and our Predecessor since their inception. In his role as managing trustee of The Heritage Group, Mr. Fehsenfeld serves in lead executive roles, including the role of chairman

and chief executive officer, for a multitude of different companies within The Heritage Group, providing breadth of experience in leadership and management across a wide variety of industries, including energy. Since 2008, Mr. Fehsenfeld has served as chairman of the board of directors of Heritage-Crystal Clean, Inc., a publicly-traded environmental services company which is owned in part by The Heritage Group. Mr. Fehsenfeld is the father of Amy M. Schumacher, member of the board of directors of our general partner.

F. William Grube has served as the chief executive officer and vice chairman of the board of our general partner since January 2011. From September 2005 through December 2010, Mr. Grube served as chief executive officer, president and director of our general partner. Mr. Grube has also served as president and chief executive officer of our Predecessor from 1990 until our initial public offering. From 1973 to 1989, Mr. Grube served as executive vice president of Rock Island Refining Corporation. Mr. Grube received his B.S. in Chemical Engineering from Rose-Hulman Institute of Technology and his M.B.A. from Harvard University. Mr. Grube is the father of Jennifer G. Straumins, executive vice president - strategy and development of our general partner.

As co-founder of our Predecessor and through his role as the chief executive officer since inception, Mr. Grube possesses unique experience relative to the management of the Company on a day-to-day basis over a significant time period and across all functional areas of the Company. Mr. Grube has significant technical expertise in refining developed over the course of his career, with both the Company and our Predecessor, as well as another refining company which specialized in the production of fuel products.

Jennifer G. Straumins has served as executive vice president - strategy and development of our general partner since October 2014. From January 2011 through October 2014, Ms. Straumins served as president and chief operating officer of our general partner. From December 2009 through December 2010, Ms. Straumins served as executive vice president and chief operating officer of our general partner. From February 2007 through December 2009, Ms. Straumins served as senior vice president of our general partner. From January 2006 through February 2007, Ms. Straumins served as vice president — investor relations of our general partner. Ms. Straumins served in various capacities in financial planning and economics for our Predecessor from 2002 until our initial public offering. Prior to joining our Predecessor, Ms. Straumins held financial planning positions with Great Lakes Chemical Company and Exxon Chemical Company. Ms. Straumins received a B.E. in Chemical Engineering from Vanderbilt University and her M.B.A. from the University of Kansas. Ms. Straumins is the daughter of F. William Grube, the chief executive officer and vice chairman of the board of our general partner.

R. Patrick Murray, II has served as executive vice president, chief financial officer and secretary of our general partner since October 2014. From December 2012 through October 2014, Mr. Murray served as senior vice president, chief financial officer and secretary of our general partner. From September 2005 through December 2012, Mr. Murray served as vice president, chief financial officer and secretary of our general partner. Mr. Murray served as the vice president and chief financial officer of our Predecessor from 1999 until our initial public offering and served as its controller from 1998 to 1999. From 1993 to 1998, Mr. Murray was a senior auditor with Arthur Andersen LLP. Mr. Murray received his B.B.A. in Accountancy from the University of Notre Dame.

Timothy R. Barnhart has served as executive vice president — operations of our general partner since October 2014. From December 2012 through October 2014, Mr. Barnhart served as senior vice president — operations of our general partner. From December 2009 to December 2012, Mr. Barnhart served as vice president — operations of our general partner. Mr. Barnhart served as the plant manager of our Karns City facility from January 2008 to December 2009. Prior to joining Calumet in 2008 upon our acquisition of Penreco, Mr. Barnhart held various engineering, supervisory and management positions at Penreco and Pennzoil Products Company since 1981. Mr. Barnhart received his B.S. in Engineering from Grove City College.

William A. Anderson has served as executive vice president — sales of our general partner since October 2014. From October 2012 through October 2014, Mr. Anderson served as vice president — marketing and new products. From September 2005 through September 2012, Mr. Anderson served as vice president — sales of our general partner. Mr. Anderson served as vice president — sales and marketing of our Predecessor from 2000 until our initial public offering and served in various other capacities from 1993 to 2000. Mr. Anderson received his B.A. in Communications from DePauw University.

James S. Carter has served as a member of the board of directors of our general partner since January 2006. Mr. Carter served as U.S. regional director of Exxon Mobil Fuels Company, the fuels subsidiary of Exxon Mobil Corporation, from 1999 until his retirement in 2003. Mr. Carter received his B.S. in Mechanical Engineering from Clemson University and his M.B.A. in Finance and Accounting from Tulane University.

Mr. Carter brings extensive marketing and managerial experience with one of the largest integrated energy companies in the world. He possesses a broad background in petroleum products marketing, with specific experience in the marketing of fuel products.

Robert E. Funk has served as a member of the board of directors of our general partner since January 2006. Mr. Funk previously served as vice president-corporate planning and economics of CITGO Petroleum Corporation, a refiner and marketer of transportation fuels, lubricants, petrochemicals, refined waxes, asphalt and other industrial products, from 1997 until his retirement in December 2004. Mr. Funk previously served CITGO or its predecessor, Cities Services Company, as general manager-facilities planning from 1988 to 1997, general manager-lubricants operations from 1983 to 1988 and manager-refinery east, Lake Charles refinery from 1982 to 1983. Mr. Funk received his B.S. in Chemical Engineering from the University of Kansas.

Mr. Funk has extensive refining industry experience including planning, operations and managerial roles for a large multinational refining company. His broad background of experience provides helpful insight to the Company in its implementation of strategic initiatives and its refinery operations in general.

George C. Morris III has served as a member of the board of directors of our general partner since May 2009. Mr. Morris has served as president of Morris Energy Advisors, Inc. since March 2009 and most recently served as a managing director at Merrill Lynch & Co. from December 2006 until his retirement in March 2009. Mr. Morris served as a managing director of investment banking at Petrie Parkman & Co. until its acquisition by Merrill Lynch in December 2006 and also served as a managing director of investment banking at Simmons & Company International and as a director of investment banking at First Boston Corporation. Mr. Morris holds B.B.A. and M.B.A. degrees from the University of Texas and a J.D. from Southern Methodist University. Mr. Morris is also a member of the board of directors of Arch Coal, Inc., a public company which produces thermal and metallurgical coal from surface and underground mines.

Mr. Morris' long tenure in the investment banking industry with a focus on the energy sector provides unique breadth of experience to the board of directors in areas of finance and capital markets. In his role as a financial advisor to the Company prior to joining the board of directors, Mr. Morris gained significant insight into the Company's operations and strategy.

Daniel J. Sajkowski has served as a member of the board of directors of our general partner since September 2014. Mr. Sajkowski has served as executive vice president, growth and new ventures of The Heritage Group since 2013. Prior to joining The Heritage Group, Mr. Sajkowski was the senior director, downstream technology at Sapphire Energy from 2010 until 2013. From 2004 to 2010, Mr. Sajkowski served as business unit leader at BP's Whiting, Indiana refinery. During his career with BP/Amoco, Mr. Sajkowski also held positions as the manager of integrated supply from 2002 until 2004 and trading and vice president of refining technology from 2000 until 2002. Mr. Sajkowski earned his B.S. and M.S. degrees in Chemical Engineering from the University of Michigan and a Ph.D. in Chemical Engineering from Stanford University in 1986. He also completed The General Manager Program at Harvard University in 2000.

Mr. Sajkowski has extensive refining industry experience including planning, operations and managerial roles for a large multinational refining company. His broad background of experience provides helpful insight to the Company in its implementation of strategic initiatives and its refinery operations in general.

Amy M. Schumacher has served as a member of the board of directors of our general partner since September 2014. Ms. Schumacher has served as the president of Monument Chemicals, Inc. and Haltermann Solutions since 2010. Prior to joining Monument Chemicals, Inc. and Haltermann Solutions, Ms. Schumacher worked in various capacities for The Heritage Group leading a variety of growth projects from 2003 until 2010. From 1998 to 2003, Ms. Schumacher was a consultant with Accenture. Ms. Schumacher received her B.S. in Civil Engineering from Purdue University and her M.S. in Management from the Massachusetts Institute of Technology Sloan School. Ms. Schumacher currently serves as a trustee for The Heritage Group and sits on a number of private subsidiary boards. Ms. Schumacher is the daughter of Fred M. Fehsenfeld, Jr., the chairman of the board of our general partner.

Ms. Schumacher has extensive managerial experience including planning and strategy. She possesses a broad background within the chemicals industry, with specific experience in strategic growth projects.

Board of Directors Committees

Conflicts Committee

Two members of the board of directors of our general partner serve on a conflicts committee to review specific matters that the board believes may involve conflicts of interest. The conflicts committee determines if the resolution of the conflict of interest is fair and reasonable to us. The members of the conflicts committee may not be owners, officers or employees of our general partner or directors, officers, or employees of its affiliates, and must meet the independence and experience standards established by NASDAQ and the Exchange Act to serve on an audit committee of a board of directors, and certain other requirements. Any matters approved by the conflicts committee will be conclusively deemed to be fair and reasonable to us, approved by all of our partners, and not a breach by our general partner of any duties it may owe us or our unitholders. The two independent board members who serve on the conflicts committee are Messrs. James S. Carter and Robert E. Funk. Mr. Carter serves as the chairman of the conflicts committee.

Compensation Committee

The board of directors of our general partner also has a compensation committee which, among other responsibilities, has overall responsibility for evaluating and either approving or recommending to the board of directors the director, chief executive officer and senior executive compensation plans, policies and programs of the Company. NASDAQ does not require a limited partnership like us to have a compensation committee comprised entirely of independent directors. Accordingly, Messrs. Fred M. Fehsenfeld, Jr. and F. William Grube serve as members of our compensation committee. Mr. Fehsenfeld serves as the chairman of the compensation committee.

The board of directors has adopted a written charter for the compensation committee which defines the scope of the committee's authority. The committee may form and delegate some or all of its authority to subcommittees comprised of committee members when it deems appropriate. The committee is responsible for reviewing and recommending to the board of directors for its approval the annual salary and other compensation components for the chief executive officer. The committee reviews and makes recommendations to the board of directors for its approval any of the Company's equity compensation-based plans, including the Long-Term Incentive Plan, or any cash bonus or incentive compensation plans or programs. Also, the committee reviews and approves all annual salary and other compensation arrangements and components for the senior executives of the Company. Further, the compensation committee periodically reviews and makes a recommendation to the board of directors for changes in the compensation of all directors. The committee has the authority to retain and terminate any compensation consultant to assist it in the evaluation of director and senior executive compensation and to obtain independent advice and assistance from internal and external legal, accounting and other advisors.

See Item 11 "Executive and Director Compensation — Compensation Discussion and Analysis — Peer Group and Compensation Targets" for additional discussion regarding the results of this executive compensation review.

Audit Committee

The board of directors of our general partner has an audit committee comprised of three directors, Messrs. James S. Carter, Robert E. Funk and George C. Morris III, each of whom the board of directors of our general partner has determined meets the independence and experience standards established by NASDAQ and the SEC. In addition, the board of directors of our general partner has determined that Mr. Morris is an "audit committee financial expert" as defined by the SEC. Mr. Morris serves as the chairman of the audit committee.

The board of directors has adopted a written charter for the audit committee. The audit committee assists the board of directors in its oversight of the integrity of our financial statements and our compliance with legal and regulatory requirements and corporate policies and controls. The audit committee has the sole authority to retain and terminate our independent registered public accounting firm, approves all auditing services and related fees and the terms thereof and pre-approves any non-audit services to be rendered by our independent registered public accounting firm. The audit committee is also responsible for confirming the independence and objectivity of our independent registered public accounting firm. Our independent registered public accounting firm is given unrestricted access to the audit committee.

Code of Ethics

We have adopted a Code of Business Conduct and Ethics that applies to all directors, officers and employees.

Available on our website at www.calumetspecialty.com are copies of our board of directors committee charters and Code of Business Conduct and Ethics, all of which also will be provided to unitholders without charge upon their written request to: Investor Relations, Calumet Specialty Products Partners, L.P., 2780 Waterfront Parkway East Drive, Suite 200, Indianapolis, IN 46214.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934, as amended, requires Calumet's directors and certain executive officers, as well as beneficial owners of ten percent or more of Calumet's common units, to report their holdings and transactions in Calumet's securities. Based on information furnished to Calumet and contained in reports filed pursuant to Section 16(a), as well as written representations that no other reports were required for 2014, Calumet's directors and executive officers filed all reports required by Section 16(a) with the exception of (i) one late filing related to a phantom unit grant and related vesting on November 4, 2014 for Fred M. Fehsenfeld, Jr., (ii) one late filing related to a phantom unit grant and related vesting on November 4, 2014 for James S. Carter, (iii) one late filing related to a phantom unit grant and related vesting on November 4, 2014 for George C. Morris, III, (iv) one late filing related to a phantom unit grant on November 24, 2014 for Fred M. Fehsenfeld, Jr., (v) one late filing related to a phantom unit grant on November 24, 2014 for James S. Carter, (vi) one late filing related to a phantom unit grant on November 24, 2014 for Robert E. Funk, (vii) one late filing related to a phantom unit grant on November 24, 2014 for George C. Morris, III, (viii) one late filing related to a phantom unit grant on November 24, 2014 for Daniel J. Sajkowski and (ix) one late filing related to a phantom unit grant on November 24, 2014 for Amy M. Schumacher.

Item 11. *Executive and Director Compensation*

Compensation Discussion and Analysis

Overview

For purposes of this Compensation Discussion and Analysis and the compensation tables that follow, the names and positions of our named executive officers for the 2014 year were:

- F. William Grube - Chief Executive Officer and Vice Chairman of the Board
- R. Patrick Murray, II - Executive Vice President and Chief Financial Officer
- Jennifer G. Straumins - Executive Vice President - Strategy and Development
- Timothy R. Barnhart - Executive Vice President - Operations
- William A. Anderson - Executive Vice President - Sales

The compensation committee of the board of directors of our general partner oversees our compensation programs. Our general partner maintains compensation and benefits programs designed to allow us to attract, motivate and retain the best possible employees to manage us, including executive compensation programs designed to reward the achievement of both short-term and long-term goals necessary to promote growth and generate positive unitholder returns. Our general partner's executive compensation programs are based on a pay-for-performance philosophy, including measurement of our performance against a specified financial target, namely distributable cash flow. Our executive compensation programs include both long-term and short-term compensation elements which, together with base salary and employee benefits, constitute a total compensation package intended to be competitive with similar companies.

Under their collective authority, the compensation committee and the board of directors maintain the right to develop and modify compensation programs and policies as they deem appropriate. Factors they may consider in making decisions to materially increase or decrease compensation include our overall financial performance, our growth over time, our changes in complexity as well as individual executive job scope, complexity and performance, and changes in competitive compensation practices in our defined labor markets. In determining any forms of compensation other than the base salary for the senior executives, or in the case of the chief executive officer, the recommendation to the board of directors of the forms of compensation for the chief executive officer, the compensation committee considers our financial performance and relative unitholder return, the value of similar incentive awards to senior executives at comparable companies and the awards given to senior executives in past years.

Financial Performance Metric Used in Compensation Programs

Our primary business objective is to generate cash flows to make distributions to our unitholders. As a result, our distributable cash flow is the primary measurement of performance taken into account in setting policies and making compensation decisions, as we believe this represents the most comprehensive measurement of our ability to generate cash flows. Both short-term and long-term forms of executive compensation are specifically structured on our achievement relative to annual distributable cash flow goals and, as such, determination of related awards, as well as their grant or payment, occurs subsequent to the end of each fiscal year upon final determination of distributable cash flow. We believe that including this financial objective as the primary performance measurement to determine compensation awards for all of our executive officers recognizes the integrated and collaborative effort required by the full executive team to maximize performance. Distributable cash flow is a non-GAAP measure that we define, consistent with the terms of our revolving credit agreement and senior notes indentures, as our Adjusted EBITDA less replacement capital expenditures, cash interest expense, turnaround costs and income tax expense. Please refer to Part II, Item 6 "Selected Financial Data — Non-GAAP Financial Measures" for our definition of Adjusted EBITDA.

In August 2014, the compensation committee approved changes to our 2014 incentive compensation programs based on our performance on achievement of distributable cash flow goals for the third and fourth quarters of 2014 combined, rather than performance for the full fiscal year. These changes were designed to reward the achievement of both short-term and long-term goals necessary to promote growth and generate positive unitholder returns during the second half of 2014, and to incentivize enhanced performance in the second half of 2014 compared to the first half of 2014.

Peer Group and Compensation Targets

To evaluate all areas of executive compensation, the compensation committee seeks the additional input of outside compensation consultants and available comparative information to validate that the compensation programs established for our executives are consistent with the philosophy of compensating our executives at ranges that approximate within 25% of the median of market for companies of similar size to us. In 2013, the compensation committee retained Buck Consultants, LLC ("Buck Consultants") as an independent consultant to review our general partner's executive compensation programs. Buck

Consultants reported directly to the compensation committee and did not provide any additional services to our general partner. The scope of this engagement included the following:

- review of a peer group of publicly-traded master limited partnerships for executive compensation comparisons;
- analysis of market pay levels and trends for our named executive officers, other officers and key employees from peer companies including base salary, annual incentives and long-term incentives; and
- assessment of Calumet's executive pay levels relative to overall market levels.

The following master limited partnerships and corporation were included by Buck Consultants in the peer group for the compensation review: Alon USA Energy, Inc., Atlas Pipeline Partners, L.P., Boardwalk Pipeline Partners, LP, Buckeye Partners, L.P., Copano Energy, L.L.C., Crestwood Equity Partners LP, Crosstex Energy, L.P., CVR Refining, LP, DCP Midstream Partners, L.P., Enbridge Energy Partners, L.P., Genesis Energy, L.P., Kinder Morgan, Inc., Magellan Midstream Partners, L.P., MarkWest Energy Partners, L.P., NGL Energy Partners LP, Northern Tier Energy LP, NuStar Energy L.P., ONEOK Partners, L.P., Regency Energy Partners LP, Targa Resources Partners LP and Williams Partners, L.P. Peer group companies were validated and selected based on their comparability of EBITDA (a non-GAAP measurement), sales and market capitalization to those of Calumet. Market data compiled from public disclosures of the peer group companies were used in the review to compare our compensation of the key executive group against the market. Buck Consultants provided a presentation of its findings to the compensation committee in October 2013 that assisted us in making the compensation decisions described below for the 2014 year.

The compensation committee used the findings of the Buck Consultants executive compensation review to validate the total competitiveness of compensation for our key executives, including each named executive officer. Specifically, the Buck Consultants review indicated that aggregate target total direct compensation of our key executives, which includes all the major elements of our executive compensation program, including base salary, short-term incentives and long-term compensation, was below the median of market by approximately 25%, driven primarily by long-term compensation, whereas total cash compensation, which includes aggregate base salaries and aggregate short-term incentives for the key executives, assuming the target levels of such incentives are achieved, were within the median by 10%. Long-term incentives for the key executives fall below the 25th percentile of the peer group by approximately 20%, which the compensation committee deemed appropriate given our smaller size relative to certain master limited partnerships included in the peer group, with an expectation by the compensation committee that with future achievement of strategic goals and further growth in financial performance, such long-term incentive opportunities should migrate toward the median level of the peer group. As of this filing, we have not made any material changes to our compensation program for the 2015 year.

Review of Named Executive Officer Performance

The compensation committee reviews, on an annual basis, each compensation element for a named executive officer. In each case, the compensation committee takes into account the scope of responsibilities and experience and balances these against competitive salary levels. The compensation committee has the opportunity to meet with the named executive officers at various times during the year, which allows the compensation committee to form its own assessment of each individual's performance.

Objectives of Compensation Programs

Our executive compensation programs are designed with the following primary objectives:

- reward strong individual performance that drives our positive financial results;
- make incentive compensation a significant portion of an executive's total compensation, designed to balance short-term and long-term performance;
- align the interests of our executives with those of our unitholders; and
- attract, develop and retain executives with a compensation structure that is competitive with other publicly-traded partnerships of similar size.

Elements of Executive Compensation

The compensation committee believes the total compensation and benefits program for our named executive officers should consist of the following:

- base salary;
- annual incentive plan which includes short-term cash awards and also includes an optional deferred compensation element;

- long-term incentive compensation, including unit-based awards;
- retirement, health and welfare benefits; and
- perquisites.

These elements are designed to constitute an integrated executive compensation structure meant to incentivize a high level of individual executive officer performance in line with our financial and operating goals.

Base Salary

Design. Salaries provide executives with a base level of semi-monthly income as consideration for fulfillment of certain roles and responsibilities. The salary program assists us in achieving our objective of attracting and retaining the services of quality individuals who are essential for the growth and profitability of Calumet. Generally, changes in the base salary levels for our named executive officers are determined on an annual basis by the compensation committee of the board of directors and are effective at the beginning of the following fiscal year. In the case of Mr. Grube, his initial base salary was established under his employment agreement, which provides that the amount of his annual salary increase must be at least equal to the average of the percentage increases of all salaried employees of Calumet's general partner.

Results. Mr. Grube's salary increase for 2014 was 3.0%, which was equivalent to the average of the percentage increases of all salaried employees for 2014. With respect to our other executive officers, the 2014 base salaries for Mr. Murray, Ms. Straumins, Mr. Barnhart and Mr. Anderson were \$329,600, \$360,500, \$309,000 and \$279,130, respectively. These 2014 base salaries for Mr. Murray, Ms. Straumins and Mr. Barnhart compare to \$320,000, \$350,000 and \$300,000, respectively, in 2013. As with Mr. Grube's salary increase, the levels of increases in the base salaries for these executives were also a 3.0% increase from 2013 levels.

Compensation Changes for 2015. Mr. Grube's salary increase for 2015 was 3.0%, based on the same formula described above. With respect to our other named executive officers, the compensation committee approved increased salaries as part of its annual salary review process. Effective January 1, 2015, the base salaries for Mr. Murray, Ms. Straumins and Mr. Barnhart are \$339,488, \$371,315 and \$318,270, respectively. The levels of increases in the base salaries for these executives were based on the same formula as above. Effective January 1, 2015, the base salary for Mr. Anderson is \$312,626. The level of increase takes into account his increased job responsibilities resulting from his promotion to executive vice president - sales. The compensation committee also considered the increases to base salary to be appropriate based on comparisons against our peer group of publicly traded partnerships in an effort to ensure that base salaries were closer to the market median of our peer group.

Short-Term Cash Awards

Design. Under the Cash Incentive Compensation Plan (the "Cash Incentive Plan"), short-term cash awards are designed to aid us in retaining and motivating executives to assist us in meeting our financial performance objectives on an annual basis. Short-term cash awards are granted to named executive officers and certain other management employees based on our achievement of performance targets on our distributable cash flow, thereby establishing a direct link between executive compensation and our financial performance.

The compensation committee establishes minimum, target and stretch incentive opportunities for each executive officer and other key employees expressed as a percentage of base salary. The amount that is paid out is based on our achievement of a minimum, target or stretch level of distributable cash flow for a set period of time during the fiscal year. The compensation committee may determine whether the applicable performance period will be a full calendar year or a specific portion of a calendar year, depending upon our incentive goals for the short-term cash awards for that year. As previously noted, with respect to the 2014 year, our bonus targets were based on the third and fourth quarter distributable cash flow goals. At the recommendation of the compensation committee, the board of directors approves distributable cash flow targets for each performance period based on budgets prepared by management. When making the annual determination of the minimum goal, target goal and stretch goal levels of distributable cash flow, the compensation committee and the board of directors consider the specific circumstances facing us during the relevant year. Generally, the compensation committee seeks to set the minimum goal, target goal and stretch goal levels such that the relative challenge of achieving each level is consistent from year to year. The expectation that management will achieve the minimum goal level is very high, while meaningful additional effort would be required to achieve the target goal and considerable additional effort would be required to achieve the stretch goal.

Generally, no awards are paid under the Cash Incentive Plan unless we achieve at least the minimum distributable cash flow goal. If the minimum, target or stretch level distributable cash flow goal is achieved, participants in the plan will receive their minimum, target or stretch cash award opportunity, respectively. If our distributable cash flow is between specified goal levels, participants are eligible to receive a prorated percentage of their cash award opportunity based on where the actual distributable cash flow amount falls between the levels.

Results. For the second half of 2014, the minimum distributable cash flow goal was \$79.9 million, the target goal was \$110.5 million and the stretch goal was \$141.1 million. For the reasons described in “Management’s Discussion and Analysis of Financial Condition and Results of Operations — 2014 Update,” we met at least our target goal with 2014 distributable cash flow of \$114.1 million, as defined under the Cash Incentive Plan.

The following table summarizes the levels of cash award opportunity for each named executive officer and the actual percentage earned by them in 2014:

	Cash Incentive Award Opportunity as a Percentage of Base Salary			
	Minimum	Target	Stretch	Actual Payout
F. William Grube	17.5%	50%	100%	69% ⁽¹⁾
R. Patrick Murray, II, Jennifer G. Straumins, Timothy R. Barnhart and William A. Anderson	17.5%	50%	100%	56%

⁽¹⁾ Mr. Grube’s employment agreement guarantees him a potential award that is at least 150% of the amount of the next highest potential award paid to any other executive officer of our general partner, which would have been the maximum potential award for Ms. Straumins.

The compensation committee determined these percentages of base salary at levels, when combined with both base salary and potential long-term, unit-based awards, to develop a total direct compensation structure for the named executive officers which is intended to be within approximately 25% of the median of our peer group, while placing significant emphasis on the achievement of our distributable cash flow goals.

For the second half of 2014, the target goal for distributable cash flow was set at the budgeted amount, a level that the board of directors believed reflected the reasonable expectations management had for our financial performance during the fiscal year and likely to be achieved given actual distributable cash flow achieved for the 2013 fiscal year. The board of directors set the stretch distributable cash flow goal at 28% above the budgeted amount, a level which they believed would be attained only with higher levels of performance relative to the reasonable expectations management had for our financial performance and therefore not likely to be achieved. The minimum goal was set at approximately 28% below the budgeted amount. Please read “Management’s Discussion and Analysis of Financial Condition and Results of Operations — 2014 Update,” for a discussion of the factors that impacted our results, including our higher gross profit per barrel sold of specialty products and higher sales volume, the primary drivers that enabled us to meet our distributable cash flow targets. The following table reflects our historical minimum, target and stretch distributable cash flow goals:

Fiscal Year	Distributable Cash Flow (In millions)			
	Actual	Minimum Goal	Target Goal	Stretch Goal
2014 ⁽¹⁾	\$114.1	\$79.9	\$110.5	\$141.1
2013	\$18.5	\$175.3	\$246.8	\$357.6
2012	\$281.1	\$123.0	\$138.5	\$169.3

⁽¹⁾ Actual, minimum goal, target goal and stretch goal were based on the combined third and fourth quarters of 2014. Actual results exclude bonus expense for calculation purposes.

Compensation Changes for 2015. Upon the recommendation of the compensation committee, the board of directors has approved new distributable cash flow targets for the 2015 fiscal year based on budgets prepared by management. We do not disclose our confidential 2015 targets, which, if disclosed, would put us at a competitive disadvantage. However, we believe that the targets set for the 2015 year will be difficult to achieve and that there is no guarantee that our named executive officers will receive an award related to the 2015 year.

For further description of this compensation program, please see “Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table — Description of Cash Incentive Plan.”

Executive Deferred Compensation Plan

Design. The compensation committee allows for the participation of the executive officers in the Calumet Specialty Products Partners, L.P. Executive Deferred Compensation Plan (the “Deferred Compensation Plan”) to encourage the officers to save for retirement and to assist us in retaining our officers. The Deferred Compensation Plan is intended to promote retention

by giving employees an opportunity to save in a tax-efficient manner. The terms governing the retirement benefit under this plan for the executive officers are the same as those available for other eligible employees in the U.S. Pursuant to the Deferred Compensation Plan, a select group of management, including the named executive officers, and all of the non-employee directors are eligible to participate by making an annual irrevocable election to defer, in the case of management, all or a portion of their annual cash incentive award under the Cash Incentive Plan, and, in the case of non-management directors, all or none of their annual cash retainer. The deferred amounts are credited to participants' accounts in the form of phantom units, with each such phantom unit representing a notional unit that entitles the holder to receive either an actual common unit or the cash value of a common unit (determined by using the fair market value of a common unit at the time a determination is needed). The phantom units credited to each participant's account also receive distribution equivalent rights ("DERs"), which are credited to the participant's account in the form of additional phantom units. In our sole discretion, we may make matching contributions of phantom units or purely discretionary contributions of phantom units, in amounts and at times as the compensation committee recommends and the board of directors approves.

Results. We did not make any discretionary matching contributions of phantom units to the accounts of those participants in the Deferred Compensation Plan during 2014.

Long-Term, Unit-Based Awards

Design. Long-term unit-based awards may consist of phantom units, restricted units, unit options, substitution awards and DERs. These awards are granted to employees, consultants and directors of our general partner under the provisions of our Long-Term Incentive Plan, as amended, originally adopted on January 24, 2006 and administered by the compensation committee. These awards aid Calumet in retaining and motivating executives to assist us in meeting our financial performance objectives.

In fiscal year 2014, the annual unit award opportunity to named executive officers consisted of the contingent right to receive phantom units. Under the Long-Term Incentive Plan, phantom units are granted only upon our achievement of specified levels of distributable cash flow. When granted, phantom units are subject to further time-based vesting criteria specified in the grant. Upon satisfaction of the time-based vesting criteria specified in the grant, phantom units convert into common units (or cash equivalent). Accordingly, these awards established a direct link between executive compensation and our financial performance. This component of executive compensation, when coupled with an extended ratable vesting period as compared to cash awards, further aligns the interests of executives with our unitholders in the longer-term and reinforces unit ownership levels among executives.

Results. The following table provides the annual unit award opportunity for each named executive officer. Our general objective when determining the size of the phantom unit awards is to provide our named executive officers with long-term incentive opportunities targeted within approximately 20% of the 25th percentile of peer practices for long-term equity based awards for similarly situated executive officers. The following table reflects the number of phantom units that would be awarded to our named executive officers depending on whether we achieved the distributable cash flow minimum, target or stretch goals discussed above in "Short-Term Cash Awards":

	2014 Phantom Unit Award Opportunity			Phantom Units Granted
	Minimum	Target	Stretch	
F. William Grube	3,780	10,800	16,200	10,800
R. Patrick Murray, II, Jennifer G. Straumins, Timothy R. Barnhart and William A. Anderson	2,520	7,200	10,800	7,200

Phantom units granted are subject to a time-vesting requirement, whereby 25% of the units would vest immediately at grant and the remainder vest ratably over three years on each December 31. These phantom units also receive DERs, which are paid in the form of cash.

For further description of this compensation program, please see "Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table — Description of Long-Term Incentive Plan."

Health and Welfare Benefits

We offer a variety of health and welfare benefits to all eligible employees of our general partner. These benefits are consistent with the types of benefits provided by our peer group and provided so as to ensure that we are able to maintain a competitive position in terms of attracting and retaining executive officers and other employees. In addition, the health and welfare programs are intended to protect employees against catastrophic loss and encourage a healthy lifestyle. The named executive officers generally are eligible for the same benefit programs on the same basis as the rest of our employees. Our health and welfare programs include medical, pharmacy, dental, life and accidental death and dismemberment insurance coverages. In addition, certain employees are eligible for long-term disability coverage. Coverage under long-term disability offers benefits specific to the named executive officers. We provide the named executive officers with a compensation allowance, which is grossed up for the payment of taxes to allow them to purchase long-term disability coverage on an after-tax basis at no net cost to them. As structured, these long-term disability benefits will pay 60% of monthly earnings, as defined by the policy, up to a maximum of \$6,000 per month during a period of continuing disability up to normal retirement age, as defined by the policy. Executive officers and other key employees are also eligible to obtain executive physical examinations which are paid for by Calumet. Decisions made with respect to this compensation element do not significantly factor into or affect decisions made with respect to other compensation elements.

Retirement Benefits

We provide the Calumet GP, LLC Retirement Savings Plan (the “401(k) Plan”) to assist our eligible officers and employees in providing for their retirement. Named executive officers participate in the same retirement savings plan as other eligible employees subject to ERISA limits. We match 100% of each 1% of eligible compensation contribution by the participant up to 4% and 50% of each additional 1% of eligible compensation contribution up to 6%, for a maximum contribution by us of 5% of eligible compensation contributions per participant. These contributions are provided as a reward for prior contributions and future efforts toward our success and growth.

The 401(k) Plan also includes a discretionary profit-sharing component. Determination of annual contributions is subjectively made by the compensation committee based on our overall profitability. The board of directors approved a discretionary profit sharing contribution to the 401(k) Plan for all eligible participants equivalent to 1.0% of their eligible compensation for the 2014 fiscal year. The value of our contributions to the retirement savings plan for named executive officers is included in the Summary Compensation Table. Decisions made with respect to this compensation element do not significantly factor into or affect decisions made with respect to other compensation elements.

Although we have not historically maintained a traditional pension plan for our employees, we continued to maintain the Penreco Pension Plan after our acquisition of Penreco in 2008 for the employees that were participating in the plan at that time. Only one of our named executive officers, Mr. Barnhart, was and is a participant in the Penreco Pension Plan. While the plan was frozen in 2009, Mr. Barnhart still holds an account in that plan. Please see the “Pension Benefits” section below for additional details.

Perquisites

We provide executive officers with perquisites and other personal benefits that we believe are reasonable and consistent with our overall compensation programs and philosophy. These benefits are provided in order to enable us to attract and retain these executives. Decisions made with respect to this compensation element do not significantly factor into or affect decisions made with respect to other compensation elements.

All named executive officers are provided with all, or certain of, the following benefits as a supplement to their other compensation:

- *Use of Company Vehicles:* In order to assist them in conducting our daily affairs, we provide each named executive officer with a company vehicle that may be used for personal use as well as business use. Personal use of a company vehicle is treated as taxable compensation to the named executive officer.
- *Executive Physical Program:* Generally on an annual basis, we pay for a complete and professional personal physical exam for each named executive officer appropriate for his or her age to improve their health and productivity.
- *Club Memberships:* We pay club membership fees for a certain named executive officer. Although such club memberships may be used for personal purposes in addition to business entertainment purposes, each named executive officer having such a membership is responsible for the reimbursement to us or direct payment for any incremental costs above the base membership fees associated with his or her personal use of such membership.
- *Spousal and Family Travel:* On an occasional basis, we pay expenses related to travel of the spouses or certain family members of our named executive officers in order to accompany the named executive officer to business-related events.

- *Long-Term Disability Insurance:* We provide compensation to allow each named executive officer to purchase long-term disability insurance on an after-tax basis at no net cost to them.
- *Legal Expenses:* On an occasional basis, we pay legal expenses related to the negotiation of employment agreements for our named executive officers.
- *Use of Company Aircraft:* On an occasional basis, our named executive officers may be eligible to use a leased aircraft for personal use and the incremental cost to us is treated as and reflected in the tables below as compensation to the applicable officer for purposes of these disclosures. The items that we use to determine the incremental cost to us of these flights include the variable costs for personal use of aircraft that were charged to us by the vendor that operates the leased aircraft for contracted hourly costs, fuel charges, and taxes.

The compensation committee periodically reviews the perquisite program to determine if adjustments are appropriate and noted the addition of payment of legal expenses was appropriate.

Other Compensation Related Matters

Tax Implications of Executive Compensation

Because we are not an entity taxable as a corporation, many of the tax issues associated with executive compensation that face publicly traded corporations do not directly affect us. Internal Revenue Code Section 409A (“Section 409A”) provides that amounts deferred under nonqualified deferred compensation plans are includible in a participant’s income when vested, unless certain requirements are met. If these requirements are not met, participants are also subject to an additional income tax and interest. All of our awards under our Long-Term Incentive Plan, severance arrangements and other nonqualified deferred compensation plans presently meet these requirements. As a result, employees will be taxed when the deferred compensation is actually paid to them. We will be entitled to a tax deduction at that time.

Executive Ownership of Units

While we have not adopted any security ownership requirements or policies for our executives, our executive compensation programs foster the enhancement of executives’ equity ownership through long-term, unit-based awards under the Long-Term Incentive Plan. Further, in 2006 several executives purchased a significant number of our common units as participants in a directed unit program in conjunction with our initial public offering. For a listing of security ownership by our named executive officers, refer to Item 12 “Security Ownership of Certain Beneficial Owners and Management and Related Unitholder Matters.”

The board of directors has adopted the Insider Trading Policy of Calumet GP, LLC and Calumet Specialty Products Partners, L.P. (the “Insider Trading Policy”), which provides guidelines to employees, officers and directors with respect to transactions in our securities. Pursuant to Calumet’s Insider Trading Policy, all executive officers and directors must confer with our Chief Financial Officer before effecting any put or call options for our securities. Further, the Insider Trading Policy states that we strongly discourage all such transactions by officers, directors and all other employees and consultants. The Insider Trading Policy is available on our website at www.calumetspecialty.com or a copy will be provided at no cost to unitholders upon their written request to: Investor Relations, Calumet Specialty Products Partners, L.P., 2780 Waterfront Parkway East Drive, Suite 200, Indianapolis, IN 46214.

Employment Agreements

We have entered into employment agreements with F. William Grube, chief executive officer and chairman of the board, R. Patrick Murray, II, executive vice president and chief financial officer, Jennifer G. Straumins, executive vice president - strategy and development and Timothy R. Barnhart, executive vice president - operations to ensure they will perform their roles for an extended period of time given their position and value to us. For a discussion of the material terms of the employment agreements, please refer to “Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table — Description of Employment Agreements.”

Under these employment agreements, the named executive officers are entitled to receive severance compensation if their employment is terminated under certain conditions, such as termination by the named executive officer for “good reason” or by us without “cause,” each as defined in the agreements and further described in “Potential Payments Upon Termination or Change in Control.”

Our employment agreements with the named executive officers and the related severance provisions are designed to meet the following objectives:

- *Change in Control:* In certain scenarios, the potential for merger or being acquired may be in the best interests of our unitholders. We provide the potential for severance compensation to the named executive officers in the event of a

change in control transaction to promote their ability to act in the best interests of our unitholders even though their employment could be terminated as a result of the transaction.

- *Termination without Cause:* We believe severance compensation in such a scenario is appropriate because the named executive officers are bound by confidentiality, nonsolicitation and noncompetition provisions covering one year after termination and because we and the named executive officer have mutually agreed to a severance package that is in place prior to any termination event. This provides us with more flexibility to make a change in this executive position if such a change is in our and our unitholders' best interests.

The salary multiple of the change of control benefits, use of the single or double trigger change of control benefits and the amount of the severance payout were determined through negotiations with each named executive officer at the time that we entered into the employment agreements. Relative to the overall value to us, the compensation committee believes these potential benefits are reasonable.

Report of the Compensation Committee for the Year Ended December 31, 2014

The compensation committee of our general partner has reviewed and discussed our Compensation Discussion and Analysis with management. Based upon such review, the related discussion with management and such other matters deemed relevant and appropriate by the compensation committee, the compensation committee has recommended to the board of directors that our Compensation Discussion and Analysis be included in the Company's Annual Report on Form 10-K.

Members of the Compensation Committee:

Fred M. Fehsenfeld, Jr., Chairman

F. William Grube

Summary Compensation Table

The following table sets forth certain compensation information of our named executive officers for the years ended December 31, 2014, 2013 and 2012:

Summary Compensation Table for 2014							
Name and Principal Position	Year	Salary	Unit Awards ⁽⁵⁾	Non-Equity Incentive Plan Compensation ⁽⁶⁾	Change in Pension Value and Nonqualified Deferred Compensation Earnings ⁽⁷⁾	All Other Compensation ⁽⁸⁾	Total
F. William Grube <i>Chief Executive Officer and Vice Chairman of the Board</i>	2014	\$ 441,129	\$ 393,900	\$ 302,184	\$ —	\$ 89,918	\$ 1,227,131
	2013	\$ 428,281	\$ 68,711	\$ —	\$ —	\$ 6,098	\$ 503,090
	2012	\$ 413,000	\$ 698,289	\$ 892,500	\$ —	\$ 40,608	\$ 2,044,397
R. Patrick Murray, II ⁽¹⁾ <i>Executive Vice President and Chief Financial Officer</i>	2014	\$ 329,600	\$ 269,815	\$ 165,769	\$ —	\$ 87,200	\$ 852,384
	2013	\$ 320,000	\$ 52,641	\$ —	\$ —	\$ 18,263	\$ 390,904
	2012	\$ 292,000	\$ 493,475	\$ 525,600	\$ —	\$ 19,409	\$ 1,330,484
Jennifer G. Straumins ⁽²⁾ <i>Executive Vice President - Strategy and Development</i>	2014	\$ 360,500	\$ 233,857	\$ 201,456	\$ —	\$ 92,098	\$ 887,911
	2013	\$ 350,000	\$ 39,030	\$ —	\$ —	\$ 17,483	\$ 406,513
	2012	\$ 297,500	\$ 427,751	\$ 595,000	\$ —	\$ 19,428	\$ 1,339,679
Timothy R. Barnhart ⁽³⁾ <i>Executive Vice President — Operations</i>	2014	\$ 309,000	\$ 288,412	\$ 172,676	\$ 108,839	\$ 89,141	\$ 968,068
	2013	\$ 300,000	\$ 139,743	\$ —	\$ —	\$ 6,564	\$ 446,307
	2012	\$ 271,000	\$ 683,380	\$ 325,200	\$ 54,848	\$ 19,334	\$ 1,353,762
William A. Anderson ⁽⁴⁾ <i>Executive Vice President — Sales</i>	2014	\$ 279,130	\$ 217,584	\$ 155,984	\$ —	\$ 79,048	\$ 731,746
	2013	\$ 279,130	\$ —	\$ —	\$ —	\$ 15,741	\$ 294,871
	2012	\$ 271,000	\$ 395,928	\$ 542,000	\$ —	\$ 19,334	\$ 1,228,262

- (1) Mr. Murray was appointed executive vice president and chief financial officer effective October 28, 2014.
- (2) Ms. Straumins was appointed executive vice president - strategy and development effective October 28, 2014.
- (3) Mr. Barnhart was appointed executive vice president - operations effective October 28, 2014.
- (4) Mr. Anderson was appointed executive vice president - sales effective October 28, 2014.
- (5) The amounts include the aggregate grant date fair value of (i) phantom unit awards made in connection with each executive officer's election to defer a portion of his or her cash incentive plan award into our Deferred Compensation Plan (ii) phantom units to reward services provided during the fiscal year and the number of which is determined based on our level of distributable cash flow during the fiscal year, excluding the effect of estimated forfeitures and (iii) DERs granted in the form of phantom units with respect to phantom units credited to the Deferred Compensation Plan accounts. The amounts exclude discretionary matching contributions made in the form of phantom units granted to our named executive officers based on their individual elections to defer all or a portion of their cash award under the Cash Incentive Plan related to the 2014 fiscal year into the Deferred Compensation Plan. These amounts will be reported in the Summary Compensation Table in 2015. The amounts reflect the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. See Note 11 to our consolidated financial statements for the fiscal year ending December 31, 2014 for a discussion of the assumptions used to determine the FASB ASC Topic 718 value of the awards.
- (6) Represents amounts earned under our Cash Incentive Plan and not deferred into the Deferred Compensation Plan. Please read "Compensation Discussion and Analysis — Elements of Executive Compensation — Short-Term Cash Awards" for further details.
- (7) Represents aggregate change in the actuarial present value of accumulated benefits under the Penreco Pension Plan. The actuarial present value of accumulated benefits under the Penreco Pension Plan decreased \$48,079 in 2013 for Mr. Barnhart. Please read "Pension Benefits" for further details.
- (8) The following table provides the aggregate "All Other Compensation" information for each of the named executive officers, except that it excludes perquisites or other personal benefits received by Mr. Grube in 2014, as such amounts for this named executive officer were less than \$10,000 in aggregate.

	401(k) Plan Matching Contributions	DERs	Legal Fees	Vehicle	Club Memberships	Spousal and Family Travel	Long-Term Disability Insurance	Term Life Insurance	Total
F. William Grube	\$ 10,300	\$ 78,604	\$ —	\$ —	\$ —	\$ —	\$ —	\$ 1,014	\$ 89,918
R. Patrick Murray, II	\$ 15,500	\$ 52,403	\$ 10,864	\$ 5,608	\$ —	\$ 494	\$ 1,044	\$ 1,287	\$ 87,200
Jennifer G. Straumins	\$ 15,500	\$ 52,403	\$ 10,864	\$ 9,215	\$ —	\$ 1,664	\$ 1,044	\$ 1,408	\$ 92,098
Timothy R. Barnhart	\$ 15,500	\$ 52,403	\$ 10,864	\$ 8,125	\$ —	\$ —	\$ 1,044	\$ 1,205	\$ 89,141
William A. Anderson	\$ 15,500	\$ 52,403	\$ —	\$ 7,630	\$ 551	\$ 828	\$ 1,044	\$ 1,092	\$ 79,048

Grants of Plan-Based Awards

The following table sets forth grants of plan-based awards to our named executive officers for the year ended December 31, 2014:

Grants of Plan-Based Awards Table for the Year Ended December 31, 2014

Name	Grant Date	Estimated Possible Payouts Under Non-Equity Incentive Plan Awards ⁽¹⁾			Estimated Possible Payouts Under Equity Incentive Plan Awards ⁽²⁾			All Other Unit Awards: Number of Units ⁽³⁾ (#)	Grant Date Fair Value of Unit Awards (\$)
		Minimum (\$)	Target (\$)	Maximum (\$)	Minimum (#)	Target (#)	Maximum (#)		
F. William Grube		94,632	270,375	540,750

	7/24/2014							583	19,239
	10/21/2014							623	17,002
William A. Anderson		48,848	139,565	279,130					
					2,520	7,200	10,800		

⁽¹⁾ Estimated possible payouts under non-equity incentive plan awards represent the ranges of potential cash incentive awards granted under our Cash Incentive Plan related to fiscal year 2014. For a description of this plan and available awards please read “Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table — Description of Cash Incentive Plan.”

⁽²⁾ Estimated possible payouts under equity incentive plan awards represent the ranges of potential unit based awards earned under the 2014 Phantom Unit Program as part of the Long-Term Incentive Plan. For a description of this plan and available awards under the 2014 Phantom Unit Program please read “Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table — Description of Long-Term Incentive Plan.”

- (3) All other unit awards represent DERs credited in the form of phantom units earned on discretionary phantom unit grants, deferred cash incentive awards and discretionary matches on such deferred cash incentive awards.

Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table

Description of Cash Incentive Plan

Annual distributable cash flow goals are recommended by the compensation committee to the board of directors and are based upon our annual forecast of financial performance for the upcoming fiscal year, and such goals are reviewed and approved by the board of directors. Three increasing distributable cash flow goals are established to calculate awards under the Cash Incentive Plan: minimum, target and stretch. Under the Cash Incentive Plan, if our actual performance meets at least the minimum distributable cash flow goal for the fiscal year, executives and certain other management employees may receive incentive awards ranging from 7% to 17.5% of base salary, depending on the employee's position with the general partner. If financial performance exceeds the minimum distributable cash flow goal, the cash incentive award paid as a percentage of base salary may be larger, ultimately reaching an upper range of 30% to 100% of base salary, if distributable cash flow for the fiscal year reaches the stretch goal. Cash incentive awards are prorated if actual performance falls between the defined minimum and stretch cash flow goals. If distributable cash flow falls below the minimum goal, no cash incentive awards are paid under the Cash Incentive Plan. The compensation committee can recommend to the full board of directors, however, that cash awards be given notwithstanding the fact that we failed to achieve at least the minimum distributable cash flow goal. Awards earned, if any, under this plan are generally paid in the first quarter of the following fiscal year after finalizing the calculation of our performance relative to the distributable cash flow targets. The following table summarizes the levels of awards available to participants in the Cash Incentive Plan:

Incentive Level ⁽¹⁾	Cash Incentive Award Calculated as a Percentage of Base Salary		
	Minimum	Target	Stretch
1	17.5%	50%	100%
2	17.5%	50%	75%
3	7%	20%	40%
4	7%	20%	30%

- (1) Mr. Grube, Mr. Murray, Ms. Straumins, Mr. Barnhart and Mr. Anderson participate in the Cash Incentive Plan at Incentive Level 1.

Participants in the Cash Incentive Plan are eligible to defer all or a portion of their award, if any, under the Cash Incentive Plan into the Deferred Compensation Plan, which was adopted by the board of directors on December 18, 2008 and effective as of January 1, 2009. See "Compensation Discussion and Analysis — Elements of Executive Compensation — Executive Deferred Compensation Plan" for additional discussion of this plan.

Description of Long-Term Incentive Plan

Following is a summary of the Long-Term Incentive Plan and the material terms relating to phantom units that we may grant pursuant to the Long-Term Incentive Plan:

General. The Long-Term Incentive Plan provides for the grant of restricted units, phantom units, unit options and substitute awards and, with respect to unit options and phantom units, the grant of DERs. Subject to adjustment for certain events, an aggregate of 783,960 common units may be delivered pursuant to awards under the Long-Term Incentive Plan. Units withheld to satisfy our general partner's tax withholding obligations are available for delivery pursuant to other awards. Our general partner's board of directors, in its discretion, may terminate the Long-Term Incentive Plan at any time with respect to the common units for which a grant has not theretofore been made. The Long-Term Incentive Plan will automatically terminate on the earlier of the 10th anniversary of the date it was initially approved by the board of directors of our general partner or when common units are no longer available for delivery pursuant to awards under the Long-Term Incentive Plan. Our general partner's board of directors have the right to alter or amend the Long-Term Incentive Plan or any part of it from time to time and the compensation committee may amend any award; provided, however, that no change in any outstanding award may be made that would materially impair the rights of the participant without the consent of the affected participant. Subject to unitholder approval, if required by the rules of the principal national securities exchange upon which the common units are traded, the board of directors of our general partner may increase the number of common units that may be delivered with respect to awards under the Long-Term Incentive Plan.

Phantom Units. During 2014, we granted phantom units pursuant to the Long-Term Incentive Plan. A phantom unit is a notional unit that entitles the grantee to receive a common unit upon the vesting of the phantom unit or, in the discretion of the compensation committee, cash equal to the fair market value of a common unit. The compensation committee may make grants of phantom units under the Long-Term Incentive Plan to eligible individuals containing such terms, consistent with the Long-Term Incentive Plan, as the compensation committee may determine, including the period over which phantom units granted will vest. The compensation committee may, in its discretion, base vesting on the grantee's completion of a period of service or upon the achievement of specified financial objectives or other criteria. In addition, the phantom units will vest automatically upon a change of control (as defined in the Long-Term Incentive Plan) of us or our general partner, subject to any contrary provisions in the award agreement.

If a grantee's employment, consulting or membership on the board of directors terminates for any reason, the grantee's phantom units will be automatically forfeited unless, and to the extent, the grant agreement or the compensation committee provides otherwise. Common units to be delivered with respect to these awards may be common units acquired by our general partner in the open market, common units already owned by our general partner, common units acquired by our general partner directly from us or any other person or any combination of the foregoing. Our general partner is entitled to reimbursement by us for the cost incurred in acquiring common units. If we issue new common units with respect to these awards, the total number of common units outstanding will increase. Any outstanding restricted unit or phantom unit awards fully vest upon the occurrence of certain events including, but not limited to, change of control, death, disability and normal retirement.

DERs are rights that entitle the grantee to receive, with respect to a phantom unit, cash equal to the cash distributions made by us on a common unit. The compensation committee, in its discretion, may grant tandem DERs with phantom units on such terms as it deems appropriate.

Participants do not pay any consideration for the common units they receive with respect to these types of awards, and neither we nor our general partner will receive remuneration for the units delivered with respect to these awards.

2014 Phantom Unit Program. In addition to the features described above, potential awards under our 2014 Phantom Unit Program ranged from 632 to 3,780 phantom units for achievement of the minimum distributable cash flow goal, 1,800 to 10,800 phantom units for achievement of the target distributable cash flow goal and from 2,700 to 16,200 phantom units for achievement of the stretch distributable cash flow goal. Awards are not prorated for actual distributable cash flow that is achieved between the minimum, target and stretch levels. Phantom units that are granted under this program are subject to a time-vesting requirement, whereby 25% of the units vest immediately at grant and the remainder vest ratably over three years on each December 31st. At the election of the general partner, phantom unit awards may be settled in either cash or common units. Phantom units also receive DERs, which are paid in the form of cash.

The following table summarizes the levels of phantom unit awards that were available to participants in the 2014 program:

Incentive Level ⁽¹⁾	Phantom Unit Award Opportunity		
	Minimum	Target	Stretch
1	3,780	10,800	16,200
2	2,520	7,200	10,800
3	1,892	5,400	8,100
4	1,260	3,600	5,400
5	632	1,800	2,700

⁽¹⁾ Mr. Grube is the only employee and named executive officer who was eligible for a long-term unit-based award under Incentive Level 1. Mr. Murray, Ms. Straumins, Mr. Barnhart and Mr. Anderson were the only employees and named executive officers who were eligible for a long-term unit-based award under Incentive Level 2.

Description of Employment Agreements

Employment Agreement with F. William Grube, Chief Executive Officer and Vice Chairman of the Board. We have an employment agreement with Mr. Grube dated as of January 31, 2006 (the “Grube Effective Date”). The initial term of the employment agreement was five years and would have expired on January 31, 2011 (the “Employment Period”), but for the automatic extensions of an additional twelve months added to the Employment Period beginning on the third anniversary of the Grube Effective Date, and on every anniversary of the Grube Effective Date thereafter, unless either party notifies the other of non-extension at least ninety days prior to any such anniversary date. As neither we nor Mr. Grube provided notice of a non-renewal of the agreement within the ninety day period prior to January 31, 2014, the effective term now extends to at least January 31, 2017.

The agreement provides for an initial annual base salary of approximately \$333,000, subject to various annual adjustments by the board of directors of our general partner that have been made following the Grube Effective Date, as well as the right to participate in the Long-Term Incentive Plan, other bonus plans, our retirement, health and welfare benefit plans, and the use of an automobile. Mr. Grube will generally be entitled to receive a payout or distribution of at least 150% of the amount of any cash, equity or other payout or distribution that may be made to any other executive officer under the terms of these plans. Mr. Grube’s employment agreement may be terminated at any time by either party with proper notice. The potential severance benefits provided within the employment agreement are described in greater detail in the “Potential Payments Upon Termination or Change in Control” section below. For the term of the employment agreement and for the one-year period following the termination of employment, Mr. Grube is prohibited from engaging in competition (as defined in the employment agreement) with us and soliciting our customers and employees.

Employment Agreements with R. Patrick Murray, II, Executive Vice President and Chief Financial Officer; Jennifer G. Straumins, Executive Vice President - Strategy and Development and Timothy R. Barnhart, Executive Vice President - Operations. We have employment agreements with Mr. Murray, Ms. Straumins and Mr. Barnhart dated as of May 7, 2014 (the “Effective Date”). The initial term of their employment agreements is three years and will expire on May 7, 2017, but for the automatic extensions of an additional twelve months beginning on the third anniversary of the Effective Date, and on every anniversary of the Effective Date thereafter, unless either party notifies the other of non-extension at least 180 days prior to any such anniversary date.

The agreements provide for an initial annual base salary of approximately \$329,600, \$360,500 and \$309,000, for Mr. Murray, Ms. Straumins and Mr. Barnhart, respectively, subject to various annual adjustments by the board of directors of our general partner that have been made following the Effective Date, as well as the right to participate in the Long-Term Incentive Plan, other bonus plans, our retirement, health and welfare benefit plans, and the use of an automobile. Mr. Murray’s, Ms. Straumins’ and Mr. Barnhart’s employment agreements may be terminated at any time by either party with proper notice. The potential severance benefits provided within the employment agreement are described in greater detail in the “Potential Payments Upon Termination or Change in Control” section below. For the term of their employment agreements and for the one-year period following the termination of employment, Mr. Murray, Ms. Straumins and Mr. Barnhart are prohibited from engaging in competition (as defined in their employment agreements) with us and soliciting our customers and employees.

Salary in Proportion to Total Compensation

The following table sets forth the percentage of each named executive officer’s total compensation that we paid in the form of salary for 2014.

Salary Percentage for 2014

Name	Percentage of Total Compensation
F. William Grube	36%
R. Patrick Murray, II	39%
Jennifer G. Straumins	41%
Timothy R. Barnhart	32%
William A. Anderson	38%

Outstanding Equity Awards at Fiscal Year-End

Our named executive officers had the following outstanding equity awards at December 31, 2014.

Outstanding Equity Awards at December 31, 2014

<u>Name</u>	Unit Awards	
	Number of Units That Have Not Vested ⁽¹⁾	Market Value of Units That Have Not Vested ⁽²⁾
F. William Grube	18,313	\$ 410,394
R. Patrick Murray, II	11,869	\$ 265,984
Jennifer G. Straumins	11,029	\$ 247,160
Timothy R. Barnhart	13,698	\$ 306,972
William A. Anderson	10,800	\$ 242,028

⁽¹⁾ These units are scheduled to vest in amounts and on the dates shown in the following table:

Vesting Date	F. William Grube	R. Patrick Murray, II	Jennifer G. Straumins	Timothy R. Barnhart	William A. Anderson
July 1, 2015	1,360	532	229	1,348	—
December 31, 2015	10,800	7,200	7,200	7,200	7,200
July 1, 2016	753	391	—	1,004	—
December 31, 2016	2,700	1,800	1,800	1,800	1,800
July 1, 2017	—	146	—	546	—
December 31, 2017	2,700	1,800	1,800	1,800	1,800
Total	18,313	11,869	11,029	13,698	10,800

⁽²⁾ Market value of phantom units reported in these columns is calculated by multiplying the closing market price of \$22.41 of our common units at December 31, 2014 (the last trading day of the fiscal year) by the number of units.

Options Exercises and Stock Vested

Our named executive officers exercised no options and had a total of 80,308 phantom units related to the Deferred Compensation Plan and the Long-Term Incentive Plan vest during the year ended December 31, 2014. The vested units related to the Deferred Compensation Plan will remain in the Deferred Compensation Plan until the earlier of the date specified by each participant and the participant's termination of employment.

Unit Awards Vested During Year Ended December 31, 2014

<u>Name</u>	Unit Awards	
	Number of Units Vested	Value Realized on Vesting ⁽¹⁾
F. William Grube	22,907	\$ 545,685
R. Patrick Murray, II	14,441	\$ 338,227
Jennifer G. Straumins	13,932	\$ 323,258
Timothy R. Barnhart	16,428	\$ 398,643
William A. Anderson	12,600	\$ 282,366

⁽¹⁾ Market value of phantom units reported in this column is calculated by multiplying the closing market price of our common units on the vesting date by the number of units vesting on such date.

Pension Benefits

Executive	Plan Name	Number of Years of Credited Service ⁽¹⁾	Present Value of Accumulated Benefits ⁽²⁾	Payments During 2014
Timothy R. Barnhart	Penreco Pension Plan	26.3205	\$ 420,085	\$ —

(1) Mr. Barnhart's "Number of Years Credited Service" is computed using the same pension plan measurement dates used for our financial statement reporting purposes with respect to our audited consolidated financial statements for the 2014 fiscal year; a further description can be found in Note 12 to such statements included in this Annual Report. This column contemplates Mr. Barnhart's previous employment with Penreco, as well as our decision to freeze account benefit accumulation for all salaried participants as of January 31, 2009.

(2) In addition to the assumptions noted within Note 12 to our audited consolidated financial statements for the 2014 fiscal year, the assumptions used to calculate the amounts shown in the "Present Value of Accumulated Benefits" column above are as follows: (a) payments under the Pension Plan were assumed to begin for Mr. Barnhart at age 65; (b) the December 31, 2014 Financial Accounting Standards ("FAS") disclosure weighted average discount rate of 3.92% was used; and (c) payments assumed to be made following age 65 were also discounted using the FAS disclosure mortality assumption (no mortality was assumed prior to age 65).

We acquired Penreco from ConocoPhillips and M.E. Zukerman Specialty Oil Corporation on January 3, 2008. In connection with this acquisition, we also took over the Penreco Pension Plan, a noncontributory defined benefit plan, in which both salaried and union employees were entitled to participate (the "Pension Plan"). However, while we agreed to maintain and continue administration of the Pension Plan, we froze the plan as in effect for salaried employees effective January 31, 2009. "Freezing" this portion of the Pension Plan meant that no more salaried employees were permitted to join the plan following January 31, 2009, and the accounts of current participants were not permitted to accrue further benefits following January 31, 2009.

Mr. Timothy R. Barnhart, as a former salaried Penreco employee, participates in the Pension Plan. Salaried employees such as Mr. Barnhart were eligible to participate in the plan following one year of completed service. The Pension Plan is intended to provide a "normal" pension benefit to participants upon their "normal" retirement age of 65. A normal retirement benefit is equal to the greater of: (1) the sum of (a) one and one-sixth percent of the participant's "final average compensation" multiplied by his years of service prior to 1974, plus (b) one and one-tenth percent of a participant's "final average compensation" multiplied by his years of service after 1973, plus (c) five-tenths percent of the amount of the participant's monthly "final average compensation" in excess of the participant's final "covered compensation" in the year of retirement, multiplied by his years of service after 1973; or (2) \$40 multiplied by a participant's years of service; or (3) the accrued pension amount as determined under the terms of the Pension Plan as in effect on June 30, 2003. Once the greatest of these three options is determined, a normal pension will then be calculated by subtracting the pension benefit determined under two of the various superseded and prior plans, or the pension benefit as calculated under the union employee portion of the Pension Plan if the participant was previously a participant in that portion of the Pension Plan.

The "average final compensation" is the highest monthly "considered compensation" of a participant during the 60 consecutive months immediately prior to January 31, 2009. A participant's "considered compensation" under the Pension Plan consists of all of the compensation actually provided to a participant in consideration of his performance of services to his employer that is considered taxable wages, excluding any compensation received from the exercise of stock options, from distributions of any other employee benefit plan accounts, or amounts paid by his employer for life insurance policies; this amount will be limited to the amount as noted in Code section 401(a)(17)(B) for an applicable year (which was \$260,000 for the 2014 year). However, due to our freezing of benefits in 2009, no amount of compensation earned after January 31, 2009 shall be deemed "considered compensation" for purposes of the Pension Plan. "Covered compensation" under the Pension Plan means the average taxable wage base during the 35 years immediately prior to the date the participant reaches the social security retirement age.

Other than a "normal" retirement, there are various events that would require or allow the distribution of Pension Plan accounts. Participants may receive an "early" retirement benefit upon reaching the age of 55 but prior to reaching age 65. In the event that a participant suffers a "disability" prior to normal retirement, the participant will be eligible to receive a disability pension benefit upon reaching the age of 65. If a participant works past the age of 65, his Pension Plan benefit will not be calculated differently than if calculated at age 65. If a participant separates from service prior to retirement, the retirement benefit will be calculated based upon years of service completed at the separation date, although payments will not begin until the participant reaches a normal or early retirement age. As of December 31, 2014, Mr. Barnhart was not yet eligible to receive an "early" or a "normal" retirement benefit pursuant to the Pension Plan. Any participant in the Pension Plan as of January 31,

2009 was also considered fully vested in his or her account, thus Mr. Barnhart is 100% vested in all portions of his Pension Plan account.

A normal form of payment will be distributed in a monthly annuity payment, but a participant may also elect a different monthly benefit amount prior to normal retirement, which would allow the participant to receive a reduced pension amount while continuing to provide for a surviving spouse upon his death, known as a joint and survivor annuity benefit. This will typically provide a 50% benefit as a retirement benefit and 50% will be deferred until it is needed for surviving spouse support, although the participant and his spouse may make written elections to alter these percentages during the participant's service.

Nonqualified Deferred Compensation

The Deferred Compensation Plan became effective as of January 1, 2009. The Deferred Compensation Plan is an unfunded arrangement intended to be exempt from the participation, vesting, funding and fiduciary requirements set forth in Title I of the Employee Retirement Income Security Act of 1974, as amended, and to comply with Section 409A of the Code. Our obligations under the Deferred Compensation Plan will be general unsecured obligations to pay deferred compensation in the future to eligible participants in accordance with the terms of the Deferred Compensation Plan from our general assets. The compensation committee of our general partner's board of directors acts as the plan administrator.

Nonqualified Deferred Compensation Table for 2014

Name	Executive Contributions in 2014 ⁽¹⁾	Company Contributions in 2014 ⁽²⁾	Aggregate Earnings in 2014 ⁽³⁾	Aggregate Withdrawals/ Distributions in 2014 ⁽⁴⁾	Aggregate Balance at end of 2014 ⁽⁵⁾
F. William Grube	\$ —	\$ —	\$ 67,524	\$ —	\$ 724,874
R. Patrick Murray, II	\$ 18,419	\$ 6,140	\$ 33,812	\$ —	\$ 369,250
Jennifer G. Straumins	\$ —	\$ —	\$ 15,842	\$ 413,519	\$ 82,670
Timothy R. Barnhart	\$ —	\$ —	\$ 70,828	\$ —	\$ 748,741
William A. Anderson	\$ —	\$ —	\$ —	\$ —	\$ —

- (1) Executive contributions in 2014 represent phantom units granted to certain of our named executive officers based on their individual elections to defer all or a portion of their cash incentive award under the Cash Incentive Plan related to the 2014 fiscal year into the Deferred Compensation Plan. All amounts reflected in this column were also reported as compensation for the 2014 year in the Summary Compensation Table under the heading "Non-Equity Incentive Plan Compensation."
- (2) Our contributions in 2014 represent discretionary matching contributions made in the form of phantom units granted to our named executive officers based on their individual elections to defer all or a portion of their cash award under the Cash Incentive Plan related to the 2014 fiscal year into the Deferred Compensation Plan.
- (3) Aggregate earnings in 2014 represent additional phantom units earned through DERs in the applicable named executive officer's Deferred Compensation Plan account on phantom units granted under the executive contribution and the discretionary matching contribution in fiscal years 2013, 2012, 2011, 2010 and 2009. These amounts, which represent the fair value of the phantom units earned on the corresponding dates of our distributions to our unitholders in fiscal year 2014, are included as compensation in 2014 under "Unit Awards" in the Summary Compensation Table.
- (4) Represents phantom units previously elected to defer upon vesting until July 1, 2014. The amount reported in this column represents the fair market value of the common units on the distribution date.
- (5) While the aggregate balance of each participant's Deferred Compensation Plan account at the end of the fiscal year is comprised of the phantom units related to the executive and discretionary matching contributions as well as the phantom units attributable to aggregate earnings accumulated during the 2014 year, the dollar amount of each participant's account as of December 31, 2014 was determined by multiplying all phantom units deemed to be included in the participant's account by the closing price of our common units on December 31, 2014, which was \$22.41. The phantom units associated with each executive's account as of December 31, 2014 were as follows: Mr. Grube, 32,346; Mr. Murray, 16,477; Ms. Straumins, 3,689 and Mr. Barnhart, 33,411. Subject to the executive's continued employment with us, these phantom units will become vested over a four year period (except for phantom units associated with executive contributions, which are fully vested at the time of cash incentive deferral), but such vesting applies to the number of phantom units credited to the participant's account, and not the value of the account at any given time. The value of the executives' accounts will fluctuate due to the fact that the value of their phantom units will track the value of our common units. Also, please keep in mind that the executives' accounts are not currently fully vested; subject to

the forfeiture provisions described below, these amounts do not reflect the payout amount that an executive would receive if he or she voluntarily left our service prior to vesting. The amounts in this column also include amounts that were previously reported as compensation in the Summary Compensation Table during previous years as follows: (a) for 2009, Mr. Grube, \$113,348; Mr. Murray, \$49,354 and Mr. Barnhart, \$74,939 (b) for 2010, Mr. Grube, \$115,373; Mr. Murray, \$28,553; Ms. Straumins, \$43,590 and Mr. Barnhart, \$66,178 (c) for 2011, Mr. Grube, \$160,800; Mr. Murray, \$52,664 and Mr. Barnhart, \$97,726 (d) for 2012, Mr. Murray, \$58,384 and Mr. Barnhart, \$216,811 and (e) for 2013, Messrs. Grube, Murray, Barnhart and Ms. Straumins, \$0.

The named executive officers, as well as other officers and key employees, participate in the Deferred Compensation Plan by making an annual irrevocable election to defer all or a portion of their annual cash incentive award for the year. The deferred amounts will be credited to the participants' accounts in the form of phantom units, and will receive DERs to be credited in the form of additional phantom units to the participants' account. We have the discretion to make matching contributions of phantom units or purely discretionary contributions of phantom units, in amounts and at times as the compensation committee determines appropriate. For the 2014 year, the compensation committee authorized matching contributions of deferred amounts related to the 2014 fiscal year. For each equivalent three phantom units credited to a participant's account at the time the 2014 cash incentive award will be paid during the first quarter of 2015, we will match with one additional phantom unit credited to the participant's account. Participants will at all times be 100% vested in amounts they have deferred; however, amounts we have contributed may be subject to a vesting schedule, as determined appropriate by the compensation committee. The 2014 matching contributions related to fiscal year 2014 will vest ratably over four years on each July 1 beginning July 1, 2016. The participants' accounts are adjusted at least quarterly to determine the fair market value of our phantom units, as well as any DERs that may have been credited in that time period. Distributions from the Deferred Compensation Plan are payable on the earlier of the date specified by each participant and the participant's termination of employment. Death, disability, normal retirement or our change of control (as such terms are defined within the Long-Term Incentive Plan) require automatic distribution of the Deferred Compensation Plan benefits, and will also accelerate at that time the vesting of any portion of a participant's account that has not already become vested. Benefits will be distributed to participants in the form of our common units, cash or a combination of common units and cash at the election of the compensation committee. In the event that accounts are paid in common units, such units will be distributed pursuant to the Long-Term Incentive Plan. Unvested portions of a participant's account will be forfeited in the event that a distribution was due to a participant's voluntary resignation or a termination for cause. To ensure compliance with Section 409A of the Code, distributions to participants that are considered "key employees" (as defined in Code Section 409A of the Code) may be delayed for a period of six months following such key employees' termination of employment with us.

Potential Payments Upon Termination or Change in Control

We provide certain of our named executive officers with certain severance and change in control benefits in order to provide them with assurances against certain types of terminations without cause or resulting from change in control transactions where the terminations were not based upon cause. This type of protection is intended to provide the executive with a basis for keeping focus and functioning in the unitholders' interests at all times. In addition to the potential acceleration of our equity-based awards upon certain events, our employment agreements with Messrs. Grube, Murray and Barnhart and Ms. Straumins contain severance and change in control provisions.

Messrs. Grube, Murray, Barnhart and Ms. Straumins will be eligible to receive payments as soon as administratively possible, though if Code Section 409A would subject them to additional taxes upon receipt of the payments, we will delay the payment of these amounts for a period of six months and provide for interest to accrue on such delayed amounts at the maximum nonusurious rate from the date of the originally scheduled payment date. Messrs. Grube, Murray, Barnhart and Ms. Straumins are also eligible to receive an additional sum from us in the event that any termination payments we provide to them is considered "parachute" payments pursuant to Section 280G of the Internal Revenue Code of 1986, as amended (the "Code"); a parachute payment could occur in connection with a change in control or a termination of employment that was also in connection with a change in control, but such a payment would not occur in the event of a termination of Messrs. Grube's, Murray's and Barnhart's and Ms. Straumins' employment that is not in connection with a change in control. This additional payment, if necessary, would equal the amount necessary to place them in the same after-tax position they would have been in absent the additional excise taxes imposed by Section 280G of the Code. Lastly, severance potentially payable to the executives under their employment agreements is partially provided in consideration for the executive's agreement not to compete with us or solicit our employees for a period of one year following a termination of employment.

The employment agreements in place as of December 31, 2014 contain the following definitions for each of the possible "triggering events" that could result in a termination payment to the below referenced named executive officers:

- *Cause.* Mr. Grube may be terminated for cause due to: (i) Mr. Grube's willful and continuing failure (excluding as a result of his mental or physical incapacity) to perform his duties and responsibilities with us; (ii) Mr. Grube's having committed any act of material dishonesty against us or any of its affiliates as defined

in the employment agreement; (iii) Mr. Grube's willful and continuing breach of the employment agreement; (iv) Mr. Grube's having been convicted of, or having entered a plea of nolo contendere to any felony; or (v) Mr. Grube's having been the subject of any final and non-appealable order, judicial or administrative, obtained or issued by the SEC, for any securities violation involving fraud.

Messrs. Murray and Barnhart and Ms. Straumins may be terminated for cause if: (i) executive materially breaches their employment agreement or any other compensatory agreement (including any equity or incentive-based compensation agreement (with any member of the Company Group (as defined in their agreement) or any Affiliate (as defined in their agreement) thereof, including executive's material breach of any representation, warranty or covenant made under their agreement, or executive's material breach of any policy, code of conduct or code of ethics established by a member of the Company Group and applicable to executive; (ii) executive's commission of an act of fraud, theft or embezzlement, in each case having the effect of materially injuring the Company's business or interests; (iii) executive's commissions of an act of gross negligence, willful misconduct or breach of fiduciary duty; (iv) the conviction of executive, or a plea of nolo contendere by executive, to any felony (or state law equivalent) or any crime involving moral turpitude; or (v) executive's willful failure or refusal (other than due to executive's disability) to perform executive's obligations pursuant to their agreement or to follow any lawful directive from the Company, as determined by the board of directors; provided, however, that if executive's actions or omissions are of such a nature that they may be cured, such actions or omissions must remain uncured 30 days after the Company or the board of directors has provided executive written notice of the obligation to cure such actions or omissions

- *Change in Control.* Messrs. Grube's, Murray's and Barnhart's and Ms. Straumins' agreements state that a change in control may occur upon any of the following events:
 - any "person" or "group," within the meaning of those terms as used in Sections 13(d) and 14(d)(2) of the Securities Exchange Act of 1934, as amended, other than the Company or its Affiliates, or Fred M. Fehsenfeld Jr. or F. William Grube or their respective immediate families or Affiliates, becomes the beneficial owner, by way or merger, consolidation, recapitalization, reorganization or otherwise, of 50% or more of the voting power of the outstanding equity interests of the Company;
 - a person or entity other than the Company or an Affiliate of the Company becomes the general partner of the Company; or
 - the sale or other disposition, including by liquidation or dissolution, of all or substantially all of the assets of the Company in one or more transactions to any person other than an Affiliate of the Company.
- *Good Reason.* Good reason under Mr. Grube's employment agreement includes: (i) any material breach by us of the employment agreement; (ii) any requirement by us that Mr. Grube relocate outside of the metropolitan Indianapolis, Indiana area; (iii) failure of any successor to us to assume the employment agreement not later than the date as of which it acquires substantially all of the equity, assets or business of us; (iv) any material reduction in Mr. Grube's title, authority, responsibilities, or duties (including a change that causes him to cease being a member of the board of directors or reporting directly and solely to the board of directors); or (v) the assignment of Mr. Grube any duties materially inconsistent with his duties as our chief executive officer.

Messrs. Murray and Barnhart and Ms. Straumins have the right to terminate employment under their employment agreements, upon the occurrence of any of the following good reason events, within 60 days of, and in connection with or based upon, without executive's prior consent: (i) material diminution in executive's total compensation opportunity in effect on the Effective Date; (ii) material breach by the Company of any of its covenants or obligations under their agreement; (iii) material reduction in executive's authority, duties or responsibilities or reporting relationships; (iv) the involuntary relocation of the geographic location of executive's principal place of employment by more than 30 miles from the location of executive's principal place of employment as of the Effective Date; and (v) following a Change in Control (as defined in the agreement), the Company's failure to obtain an agreement from any successor to the Company to assume and agree to perform this agreement in the same manner and to the same extent that the Company would be required to perform if no succession had taken place, except where such assumption occurs by operation of law; provided however, that notwithstanding the foregoing provisions or any other provisions of their agreement to the contrary, any assertion by executive of a termination for Good Reason (as defined in their agreement) shall not be effective unless all of the following conditions are satisfied: (i) the conditions described above giving rise to executive's termination of employment must have arisen

without executive's consent; (ii) executive must provide written notice to the Board of the existence of such condition(s) within 30 days of the initial existence of such condition(s); (iii) the condition(s) specified in such notice must remain uncorrected for 30 days following the Board's receipt of such written notice; and (iv) the date of executive's termination of employment must occur within 60 days after the initial existence of the condition(s) specified in such notice.

- *Totally Disabled.* Disabled under Mr. Grube's employment agreement states that if he is unable to perform his duties under the employment agreement by reason of mental or physical incapacity for 90 consecutive calendar days during the Employment Period, provided that we will not have the right to terminate his employment for disability if in the written opinion of a qualified physician reasonably acceptable to us is delivered to the us within 30 days of our delivery to Mr. Grube of a notice of termination (as defined in the employment agreement) that it is reasonably likely that Mr. Grube will be able to resume his duties on a regular basis within 90 days of the notice of termination and Mr. Grube does resume such duties within such time.

Under Messrs. Murray's and Barnhart's and Ms. Straumins' employment agreements, we have the right to terminate the executive's employment if the executive is unable to perform, with reasonable accommodation, the essential functions of the executive's position by reason of any medically determinable physical or mental impairment or other incapacity that can be reasonably expected to result in death or can be reasonably expected to last for a period in excess of 180 days, whether or not consecutive.

Change of Control Pursuant to Long-Term Incentive Plan

Unless specifically provided otherwise in the named executive officers' individual award agreement, upon a Change of Control all outstanding awards granted pursuant to the Long-Term Incentive Plan shall automatically vest and be payable at their maximum target level or become exercisable in full, as the case may be, or any restricted periods connected to the award shall terminate and all performance criteria, if any, shall be deemed to have been achieved at the maximum level. We provide these "single-trigger" change of control benefits because we believe such benefits are important retention tools for us, as providing for accelerated vesting of awards under the Long-Term Incentive Plan upon a Change of Control enables employees, including the named executive officers, to realize value from these awards in the event that we go through a change of control transaction. In addition, we believe that it is important to provide the named executive officers with a sense of stability, both in the middle of transactions that may create uncertainty regarding their future employment and post-termination as they seek future employment. Whether or not a change of control results in a termination of our officers' employment with us or a successor entity, we want to provide our officers with certain guarantees regarding the importance of equity incentive compensation awards they were granted prior to that change of control. Further, we believe that change of control protection allows management to focus their attention and energy on the business transaction at hand without any distractions regarding the effects of a change of control. Also, we believe that such protection maximizes unitholder value by encouraging the named executive officers to review objectively any proposed transaction in determining whether such proposed transaction is in the best interest of our unitholders, whether or not the executive will continue to be employed.

For purposes of the Long-Term Incentive Plan, a Change of Control shall be deemed to have occurred upon one or more of the following events: (i) any person or group, other than a person or group who is our affiliate, becomes the beneficial owner, by way of merger, consolidation, recapitalization, reorganization or otherwise, of fifty percent (50%) or more of the voting power of our outstanding equity interests; (ii) a person or group, other than our general partner or one of our general partner's affiliates, becomes our general partner; or (iii) the sale or other disposition, including by liquidation or dissolution, of all or substantially all of our assets or the assets of our general partner in one or more transactions to any person or group other than an a person or group who is our affiliate. However, in the event that an award is subject to Code Section 409A, a Change of Control shall have the same meaning as such term in the regulations or other guidance issued with respect to Code Section 409A for that particular award.

Under the Long-Term Incentive Plan, the awards will also accelerate upon a termination due to death, disability or a normal retirement upon or after reaching the age of 66. The Board has the final authority to determine if a disability is permanent or of a long term duration resulting in termination from us. A "disability" per the terms of the Long-Term Incentive Plan grant means (i) a participant's inability to engage in any substantial gainful activity by reason of a physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of 12 months, or (ii) the participant is, by reason of a physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of 12 months, receiving income replacement benefits for a period of not less than 3 months under one of our accident and health plans. We have determined that providing acceleration of the Long-Term Incentive Plan awards upon a death or disability is appropriate because the termination of a participant's employment with us due to such an occurrence is often an unexpected event, and it is our belief that providing an immediate value to the participant or his or her family, as appropriate, in such a situation is a competitive retention tool. We also believe that providing for acceleration upon a normal

retirement is appropriate due to the fact that the definition of a normal retirement requires an executive to remain employed with us until late in his or her career, and the acceleration of their equity awards upon such an event provides the executives with a reassurance that they will receive value for their awards at the end of their career. We have determined that it is in the unitholders' best interest to provide such retention tools with respect to our equity compensation awards due to the fact that we strive to retain a high level of executive talent while competing in a very aggressive industry.

Change of Control with Respect to Deferred Compensation Plan Participants

The Deferred Compensation Plan provides the executives with the opportunity to defer all or a portion of their eligible compensation each year. At the time of their deferral election, the executive may choose a day in the future in which a payout from the plan will occur with regard to their vested account balance, or, if earlier, the payout of vested accounts will occur upon the executive's termination from service for any reason. Despite the executive's payout election date, however, the Deferred Compensation Plan accounts will also receive accelerated vesting and a pay out in the event of the executive's termination from service due to death, disability or normal retirement, or upon the occurrence of a Change of Control.

A "disability" under the Deferred Compensation Plan means (i) a participant's inability to engage in any substantial gainful activity by reason of a physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of 12 months, or (ii) the participant is, by reason of a physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of 12 months, receiving income replacement benefits for a period of not less than 3 months under one of our accident and health plans. A "normal retirement" means a participant's termination of employment on or after the date that he or she reaches the age of 66.

There are various connections between the Deferred Compensation Plan and the Long-Term Incentive Plan. A "Change of Control" for the Deferred Compensation Plan shall have the same definition as that term within the Long-Term Incentive Plan noted above. Our compensation committee also has the discretion to pay Deferred Compensation Plan accounts in either cash or our common units. In the event that a Deferred Compensation Plan account is settled in our common units, those units will be issued pursuant to the Long-Term Incentive Plan. For purposes of this disclosure we have assumed that the compensation committee would determine to settle the Deferred Compensation Plan accounts solely in our common units, meaning that the amounts below would reflect the fair market value of common units that could be issued pursuant to the Long-Term Incentive Plan in connection with a termination of employment or a Change of Control. Please note that the compensation committee's decision regarding such a settlement could not be determined with any certainty until such an event actually occurred.

The table below reflects the amount of compensation payable to our named executive officers in the event of a termination of employment or a change in control of the Company on December 31, 2014. For purposes of calculating the potential payments, we have made certain assumptions that we have determined to be reasonable and relevant to our unitholders.

(1) As per their employment agreements, Mr. Grube will receive 3 times his base salary and Messrs. Murray and Barnhart and Ms. Straumins will receive 3 times their base salary if a qualifying termination occurs within twenty-four months following a Change in Control (“Change in Control Period”) or 1.5 times their base salary if the qualifying termination occurs at any time other than the Change in Control Period.

(2) As per their employment agreements, for termination due to death or disability, Messrs. Grube, Murray and Barnhart and Ms. Straumins will be entitled to receive a pro rata portion of any incentive compensation awards for the bonus year in which the termination occurs. For termination for good reason by the executive or by us without cause, Mr. Grube will be entitled to receive a pro rata portion of any compensation incentive awards for the bonus year in which the termination occurs and Messrs. Murray and Barnhart and Ms. Straumins will be entitled to 3 times their cash incentive bonus if a qualifying termination occurs with the Change in Control Period or 1.5 times their cash incentive bonus if the termination occurs at any time other than the Change in Control Period. For termination without good reason by executive or by us with cause, Messrs. Grube, Murray and Barnhart and Ms. Straumins will not be entitled to any pro rata portion of incentive compensation awards.

- (3) All amounts assume that the executives received full vesting of equity awards due to the applicable qualifying termination or Change in Control event, and the value of all phantom units pursuant to equity awards under the Long-Term Incentive Plan were valued at our December 31, 2014 closing common unit price of \$22.41. As required pursuant to Section 409A of the Code, in the event that any of the executives are also “key employees” as defined in Section 409A of the Code at the time a settlement would become due, we would delay the settlement of such an executive’s equity awards until the first day of the seventh month following the applicable event requiring settlement of equity awards under the Long-Term Incentive Plan.
- (4) All amounts assume that the executives received full vesting of the accounts due to the applicable qualifying termination or Change in Control event, and the value of all phantom units held in the Deferred Compensation Plan accounts was valued at our December 31, 2014 closing common unit price of \$22.41. As required pursuant to Section 409A of the Code, in the event that any of the executives are also “key employees” as defined in Section 409A of the Code at the time a settlement would become due, we would delay the settlement of such an executive’s account until the first day of the seventh month following the applicable event requiring settlement of the Deferred Compensation Plan account.
- (5) Per the employment agreements of Messrs. Murray and Barnhart and Ms. Straumins, in connection with certain qualifying terminations, if the executive timely and properly elects continuation coverage under the Company’s group health plans pursuant to the Consolidated Omnibus Reconciliation act of 1985 (“COBRA”) then: (i) the Company shall reimburse the executive for the difference between the monthly amount the executive pays to effect and continue such coverage for himself and spouse and eligible dependents, if any, and the monthly employee contribution amount that active similarly situated employees of the Company pay for the same or similar coverage under such group health plans; and (ii) on and after the date the executive is no longer eligible to receive COBRA continuation coverage, if the executive has not become eligible to receive coverage under a group health plan sponsored by another employer, then the Company shall pay a lump sum cash payment equal to the product of (x) the monthly reimbursement amount and (y) (A) if such termination does not occur within the Change of Control Period, 6 and (B) if such termination occurs within the Change in Control Period, 18.
- (6) Per the employment agreements for Messrs. Murray and Barnhart and Ms. Straumins, in connection with certain qualifying terminations, for the 12-month period beginning on their termination date, or until the executive begins other full-time employment with a new employer, whichever occurs first, the executive shall be entitled to receive outplacement services that are directly related to the termination of the executive’s employment and are provided by a nationally prominent executive outplacement services firm, provided however, that the total amount of the expenses paid by Company shall not exceed \$50,000. A maximum payment is assumed to be made.

Compensation of Directors

Officers or employees of our general partner who also serve as directors do not receive additional compensation for their service as a director of our general partner. Each director who is not an officer or employee of our general partner receives an annual fee as well as compensation for attending meetings of the board of directors and board committee meetings. Non-employee director compensation for 2014 consists of the following:

- an annual fee of \$50,000, payable in quarterly installments;
- an annual award of 2,200 restricted or phantom units;
- an audit committee chair annual fee of \$8,000, payable in quarterly installments;
- a non-chair audit committee member annual fee of \$4,000, payable in quarterly installments;
- all other committee chair annual fee of \$5,000, payable in quarterly installments; and
- all other committee member annual fee of \$2,500, payable in quarterly installments.

In addition, we reimburse each non-employee director for his or her out-of-pocket expenses incurred in connection with attending meetings of the board of directors or board committees. Under certain circumstances, we will also indemnify each director for his or her actions associated with being a director to the fullest extent permitted under Delaware law.

The following table sets forth certain compensation information of our non-employee directors or former non-employee directors for the year ended December 31, 2014:

<u>Name</u>	<u>Fees Earned or Paid in Cash</u>	<u>Unit Awards</u> ⁽¹⁾	<u>Total</u>
Fred M. Fehsenfeld, Jr.	\$ 55,000	\$ 127,414	\$ 182,414
James S. Carter	\$ 60,500	\$ 135,509	\$ 196,009
William S. Fehsenfeld ⁽²⁾	\$ 37,500	\$ 70,765	\$ 108,265
Robert E. Funk	\$ 58,000	\$ 78,489	\$ 136,489
George C. Morris III	\$ 59,500	\$ 107,340	\$ 166,840
Nicholas J. Rutigliano ⁽³⁾	\$ 37,500	\$ 119,092	\$ 156,592
Daniel J. Sajkowski ⁽⁴⁾	\$ 12,500	\$ 20,925	\$ 33,425
Amy M. Schumacher ⁽⁵⁾	\$ 12,500	\$ 20,925	\$ 33,425

- ⁽¹⁾ The amounts in this column are calculated based on the aggregate grant date fair value of (i) annual phantom unit awards to all non-employee directors, (ii) matching phantom unit awards granted to those non-employee directors who deferred all of the fees they earned in 2014 pursuant to the Deferred Compensation Plan and (iii) DERs credited in the form of phantom units earned on deferred fees and discretionary matches on such deferred fees. Please see “Compensation Discussion and Analysis — Elements of Executive Compensation — Executive Deferred Compensation Plan” for a discussion of how we calculated these values. The amounts reflect the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. See Note 11 to our consolidated financial statements for the fiscal year ending December 31, 2014 for a discussion of the assumptions used to determine the FASB ASC Topic 718 value of the awards.
- ⁽²⁾ Mr. W. Fehsenfeld retired from the board of directors on September 12, 2014.
- ⁽³⁾ Mr. Rutigliano retired from the board of directors on September 12, 2014.
- ⁽⁴⁾ Mr. Sajkowski joined the board of directors on September 12, 2014.
- ⁽⁵⁾ Ms. Schumacher joined the board of directors on September 12, 2014.

Annual Phantom Unit Awards

	<u>Grant Date</u>	<u>Number of Units Granted</u>	<u>Aggregate Grant Date Fair Value</u>
Fred M. Fehsenfeld, Jr. ⁽¹⁾	November 24, 2014	2,200	\$ 61,380
James S. Carter ⁽¹⁾	November 24, 2014	2,200	\$ 61,380
William S. Fehsenfeld ⁽²⁾	September 12, 2014	2,200	\$ 60,962
Robert E. Funk ⁽¹⁾	November 24, 2014	2,200	\$ 61,380
George C. Morris III ⁽¹⁾	November 24, 2014	2,200	\$ 61,380
Nicholas J. Rutigliano ⁽²⁾	September 12, 2014	2,200	\$ 60,962
Daniel J. Sajkowski ⁽¹⁾	November 24, 2014	750	\$ 20,925
Amy M. Schumacher ⁽¹⁾	November 24, 2014	750	\$ 20,925

- ⁽¹⁾ With respect to this award, 25% of the phantom units vested on December 31, 2014, entitling the director to receive an equal number of common units, with an additional 25% vesting on December 31st of each of the three successive years.
- ⁽²⁾ With respect to this award, 100% of the phantom units vested on September 12, 2014, entitling the director to receive an equal number of common units.

The following table summarizes the aggregate balance of each director's or former director's outstanding annual awards as of December 31, 2014:

	Annual Director Phantom Unit Awards	
	Number of Units That Have Not Vested	Market Value of Units That Have Not Vested
Fred M. Fehsenfeld, Jr.	3,300	\$ 73,953
James S. Carter	3,300	\$ 73,953
William S. Fehsenfeld	—	\$ —
Robert E. Funk	3,300	\$ 73,953
George C. Morris III	3,300	\$ 73,953
Nicholas J. Rutigliano	—	\$ —
Daniel J. Sajkowski	562	\$ 12,594
Amy M. Schumacher	562	\$ 12,594
Total	14,324	\$ 321,000

Deferred Compensation Plan

Messrs. F. Fehsenfeld, Jr., Carter, Fehsenfeld, Morris and Rutigliano each elected to defer all of their fees earned related to fiscal year 2014 into the Deferred Compensation Plan. These deferred amounts are credited to the participant's account in the form of phantom units, and will receive DERs to be credited to the participant's account in the form of additional phantom units on the corresponding dates of our distributions to our unitholders. The compensation committee recommended, and the board of directors approved, a matching contribution of one phantom unit for each equivalent three phantom units deferred for those fees earned related to fiscal year 2014. Phantom units credited to a participant's account pursuant to matching contributions also carry DERs to be credited to the participant's account in the form of additional phantom units. The matching contribution for each participant for fiscal year 2014 was made on a quarterly basis as of the date of our quarterly board meetings related to fiscal year 2014.

The following table summarizes the aggregate balance of each director's Deferred Compensation Plan account at the end of the fiscal year:

Director Nonqualified Deferred Compensation Table for 2014

<u>Name</u>	<u>Number of Units</u>	<u>Aggregate Balance at end of 2014⁽¹⁾</u>
Fred M. Fehsenfeld, Jr.	24,153	\$ 541,269
James S. Carter	27,566	\$ 617,754
William S. Fehsenfeld ⁽²⁾	1,178	\$ 26,399
Robert E. Funk	7,760	\$ 173,902
George C. Morris III	12,900	\$ 289,089
Nicholas J. Rutigliano ⁽²⁾	22,907	\$ 513,346

⁽¹⁾ The dollar amount of each director's account as of December 31, 2014 was determined by multiplying all phantom units deemed to be included in the participant's account by the closing price of our common units on December 31, 2014, which was \$22.41.

⁽²⁾ As a result of the retirement of Messrs. Fehsenfeld and Rutigliano, their respective Deferred Compensation Plan accounts will be distributed in the first quarter 2015.

Compensation Committee Interlocks and Insider Participation

The members of our compensation committee are F. William Grube and Fred M. Fehsenfeld, Jr. Mr. Grube is our chief executive officer and vice chairman of the board of our general partner. Mr. F. Fehsenfeld, Jr. is the chairman of the board of our general partner. Please read Item 13 "Certain Relationships and Related Transactions and Director Independence — Specialty Product Sales and Related Purchases" for descriptions of our transactions in fiscal year 2014 with certain entities related to Messrs. Grube and F. Fehsenfeld, Jr. No executive officer of our general partner served as a member of the compensation committee of another entity that had an executive officer serving as a member of our board of directors or compensation committee.

Risk Considerations in our Overall Compensation Program

Our compensation policies and practices are designed to provide rewards for high levels of financial performance. Currently, our incentive compensation programs are based on performance, at the Company level, relative to goals we set for distributable cash flow. In our assessment of risk related to such use of a single financial performance metric, we considered the relative difficulty for any employee to engage in an undue amount of risk-taking activity with a result that would be reasonably likely to have a material adverse effect on us due to the breadth and scope of activities, both operational and financial, across that organization that are captured in the calculation of distributable cash flow. Also, we considered the current approval controls that exist to mitigate against excessive risk-taking that might impact distributable cash flow and, in turn, our compensation programs. For example, we have specific approval policies related to the entry into derivative instruments, material commercial agreements and significant capital expenditures. Also, our full board of directors, as well as through the actions of its various committees, regularly assesses our key risk areas to monitor the impacts of such risks on our financial performance. Further, we considered the design of our incentive compensation programs, noting that the inclusion of both shorter-term cash incentive awards and longer-term unit awards further align the interest our employees and its unitholders. As a result of these considerations, we have concluded that the risks arising from our compensation policies and practices for our employees are not reasonably likely to have a material adverse effect on us.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Unitholder Matters*

The following table sets forth the beneficial ownership of our units as of March 2, 2015 held by:

- each person who beneficially owns 5% or more of our outstanding units;
- each director of our general partner;
- each named executive officer of our general partner; and
- all directors, and executive officers of our general partner as a group.

The amounts and percentages of units beneficially owned are reported on the basis of regulations of the SEC governing the determination of beneficial ownership of securities. Under the rules of the SEC, a person is deemed to be a “beneficial owner” of a security if that person has or shares “voting power,” which includes the power to vote or to direct the voting of such security, or “investment power,” which includes the power to dispose of or to direct the disposition of such security. A person is also deemed to be a beneficial owner of any securities of which that person has a right to acquire beneficial ownership within 60 days. Under these rules, more than one person may be deemed a beneficial owner of the same securities and a person may be deemed a beneficial owner of securities as to which he has no economic interest.

Except as indicated by footnote, the persons named in the table below have sole voting and investment power with respect to all units shown as beneficially owned by them, subject to community property laws where applicable. Except as indicated by footnote, the address for the beneficial owners listed below is 2780 Waterfront Parkway East Drive, Suite 200, Indianapolis, Indiana 46214.

<u>Name of Beneficial Owner</u>	<u>Common Units Beneficially Owned</u>	<u>Percentage of Total Units Beneficially Owned</u>
The Heritage Group ⁽¹⁾⁽²⁾	11,867,533	17.09%
Calumet, Incorporated ⁽²⁾	1,934,287	2.79%
F. William Grube ⁽³⁾⁽⁴⁾	933,510	1.34%
Jennifer G. Straumins ⁽⁵⁾	1,390,014	2.00%
Fred M. Fehsenfeld, Jr. ⁽¹⁾⁽²⁾⁽⁶⁾⁽⁷⁾	677,162	*
R. Patrick Murray, II	41,365	*
Timothy R. Barnhart	39,609	*
William A. Anderson ⁽⁸⁾	15,780	*
George C. Morris III ⁽⁹⁾	92,551	*
James S. Carter	49,619	*
Robert E. Funk	41,573	*
Daniel J. Sajkowski ⁽¹⁰⁾	3,588	*
Amy M. Schumacher ⁽¹⁾⁽⁷⁾⁽¹¹⁾	13,288	*
All directors and executive officers as a group (11 persons)	3,298,059	4.75%

* = less than 1 percent.

- (1) Thirty grantor trusts indirectly own all of the outstanding general partner interests in The Heritage Group, an Indiana general partnership. The direct or indirect beneficiaries of the grantor trusts are members of the Fehsenfeld family. Each of the grantor trusts has five trustees, Fred M. Fehsenfeld, Jr., James C. Fehsenfeld, Nicholas J. Rutigliano, William S. Fehsenfeld and Amy M. Schumacher, each of whom exercises equivalent voting rights with respect to each such trust. Each of Fred M. Fehsenfeld, Jr. and Amy M. Schumacher, who are directors of our general partner, disclaims beneficial ownership of all of the common units owned by The Heritage Group, and none of these units are shown as being beneficially owned by such directors in the table above. Of these common units, 367,197 are owned by The Heritage Group Investment Company, LLC (“Investment LLC”). Investment LLC is under common ownership with The Heritage Group. The Heritage Group, although not the owner of the common units, serves as the Manager of Investment LLC, and in that capacity has sole voting and investment power over the common units. The Heritage Group disclaims beneficial ownership of the common units owned by Investment LLC except to the extent of its pecuniary interest therein. The address for The Heritage Group is 5400 W. 86th St., Indianapolis, Indiana 46268.
- (2) The common units of Calumet, Incorporated are indirectly owned 45.8% by The Heritage Group and 5.1% by Fred M. Fehsenfeld, Jr. personally. Fred M. Fehsenfeld, Jr. is also a director of Calumet, Incorporated. Accordingly, 885,294 of the common units owned by Calumet, Incorporated are also shown as being beneficially owned by The Heritage Group in the table above, and 97,971 of the common units owned by Calumet, Incorporated are also shown as being beneficially owned by Fred M. Fehsenfeld, Jr. in the table above. The Heritage Group and Fred M. Fehsenfeld, Jr. disclaim beneficial ownership of all of the common units owned by Calumet, Incorporated in excess of their respective pecuniary interests in such units. The address of Calumet, Incorporated is 5400 W. 86th St., Indianapolis, Indiana 46268.
- (3) Includes 775,000 common units that are owned by AEG Associates II, LLC, an Indiana limited liability company (“AEG II”). F. William Grube has sole voting and investment power over the common units. AEG II is co-owned by F. William Grube, William F. Grube, Jennifer G. Straumins and one grantor retained annuity trust for which Jennifer G. Straumins serves as sole trustee. F. William Grube disclaims beneficial ownership of the common units owned by AEG II except to the extent of his pecuniary interest therein.
- (4) Includes common units that are owned by the spouse of F. William Grube, for which he disclaims beneficial ownership.

- (5) Includes common units that are owned by the children of Jennifer G. Straumins, for which she disclaims beneficial ownership.
- (6) Includes common units that are owned by the spouse and certain children of Fred M. Fehsenfeld, Jr., for which he disclaims beneficial ownership.
- (7) Does not include a total of 1,979,804 common units owned by two trusts, the direct or indirect beneficiaries of which are members of the Fred M. Fehsenfeld, Jr. family. Each of the trusts has five trustees, Fred M. Fehsenfeld, Jr., James C. Fehsenfeld, Nicholas J. Rutigliano, William S. Fehsenfeld and Amy M. Schumacher, each of whom exercises equivalent voting rights with respect to each such trust. Each of Fred M. Fehsenfeld, Jr. and Amy M. Schumacher, who are directors of our general partner, disclaims beneficial ownership of all of the common units owned by the trusts, and none of these units are shown as being beneficially owned by such directors in the table above.
- (8) Includes common units that are owners by the children of William A. Anderson, for which he disclaims beneficial ownership.
- (9) Includes common units that are owned by the spouse of George C. Morris III, for which he disclaims beneficial ownership.
- (10) The address of Daniel J. Sajkowski is 5400 W. 86th St., Indianapolis, Indiana 46268.
- (11) Includes common units that are owned by the spouse and children of Amy M. Schumacher, for which she disclaims beneficial ownership. The address of Amy M. Schumacher is 6510 Telecom Dr., Suite 425, Indianapolis, Indiana 46268.

Equity Compensation Plan Information

The following table summarizes information about our equity compensation plans as of December 31, 2014:

	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights ⁽¹⁾ (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by unitholders	—	\$ —	—
Equity compensation plans not approved by unitholders	783,960	—	—
Total	783,960	\$ —	—

- ⁽¹⁾ The Long-Term Incentive Plan contemplates the issuance or delivery of up to 783,960 common units to satisfy awards under the plan. The number of units presented in column (a) assumes that all outstanding grants may be satisfied by the issuance of new units or the purchase of existing units on the open market upon vesting. In fact, some portion of the phantom units may be settled in cash and some portion will be withheld for taxes. Any units not issued upon vesting will become “available for future issuance” under Column (c). For more information on our Long-Term Incentive Plan, which did not require approval by our limited partners, refer to Item 11 “Executive and Director Compensation — Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table — Description of Long-Term Incentive Plan.”

Item 13. *Certain Relationships and Related Transactions and Director Independence*

Distributions and Payments to Our General Partner and its Affiliates

Owners of our general partner and their affiliates own 17,629,206 common units representing a 25.3% limited partner interest in us. In addition, our general partner owns a 2% general partner interest in us and all of the incentive distribution rights. Our general partner is entitled to receive incentive distributions if the amount we distribute with respect to any quarter exceeds levels specified in our partnership agreement. Under the quarterly incentive distribution provisions, generally our general partner is entitled, without duplication, to 15% of amounts we distribute in excess of \$0.495 (\$1.98 annualized) per unit, 25% of the amounts we distribute in excess of \$0.563 (\$2.25 annualized) per unit and 50% of amounts we distribute in excess of \$0.675 (\$2.70 annualized) per unit. Please refer to Part II, Item 5 “Market for Registrant’s Common Equity, Related Unitholder Matters and Issuer Purchases of Equity Securities — Market Information” for a summary of cash distribution levels of the Company during the year ended December 31, 2014 and for additional information related to incentive distribution rights.

Our general partner does not receive any management fee or other compensation for its management of our partnership; however, our general partner and its affiliates are reimbursed for all expenses incurred on our behalf. These expenses include the cost of employee, officer and director compensation and benefits properly allocable to us and all other expenses necessary or appropriate to the conduct of our business and allocable to us. The partnership agreement provides that our general partner determines the expenses that are allocable to us. There is no limit on the amount of expenses for which our general partner and its affiliates may be reimbursed.

Omnibus Agreement

We entered into an omnibus agreement, dated January 31, 2006, with The Heritage Group and certain of its affiliates pursuant to which The Heritage Group and its controlled affiliates agreed not to engage in, whether by acquisition or otherwise, the business of refining or marketing specialty lubricating oils, solvents and wax products as well as gasoline, diesel and jet fuel products in the continental U.S. (“restricted business”) for so long as The Heritage Group controls us. This restriction does not apply to:

- any business owned or operated by The Heritage Group or any of its affiliates as of January 31, 2006;
- the refining and marketing of asphalt and asphalt-related products and related product development activities;
- the refining and marketing of other products that do not produce “qualifying income” as defined in the Internal Revenue Code;

- the purchase and ownership of up to 9.9% of any class of securities of any entity engaged in any restricted business;
- any restricted business acquired or constructed that The Heritage Group or any of its affiliates acquires or constructs that has a fair market value or construction cost, as applicable, of less than \$5.0 million;
- any restricted business acquired or constructed that has a fair market value or construction cost, as applicable, of \$5.0 million or more if we have been offered the opportunity to purchase it for fair market value or construction cost and we decline to do so with the concurrence of the conflicts committee of the board of directors of our general partner; and
- any business conducted by The Heritage Group with the approval of the conflicts committee of the board of directors of our general partner.

Insurance Brokerage

Nicholas J. Rutigliano, a former member of the board of directors of our general partner who retired in September 2014, served as president of Tobias Insurance Group, Inc., a commercial insurance brokerage business he founded, prior to it being acquired by Assured Partners, LLC. Mr. Rutigliano continues to serve as president of Tobias. Tobias has historically placed a portion of our insurance underwriting and surety/performance bond requirements, including our general liability, automobile liability, excess liability, workers' compensation as well as directors' and officers' liability and issuance of surety/performance bonds. The total premiums and fees paid by us through Mr. Rutigliano's firm for 2014 were approximately \$0.7 million and were related to our directors' and officers' liability insurance. We believe these premiums are comparable to the premiums we would pay for such insurance from a non-affiliated third party and we have assessed our other insurance brokerage options to confirm this belief. We have transitioned the majority of the aforementioned insurance underwriting requirements to a non-affiliated third party commercial insurance broker.

Crude Oil Purchases

Since May 2008, we have purchased a portion of our crude oil supplies from Legacy Resources Co., L.P. ("Legacy Resources"), an exploration and production company owned in part by The Heritage Group, our chief executive officer and vice chairman of the board of our general partner, F. William Grube, and Jennifer G. Straumins, our executive vice president - strategy and development. Mr. Grube and Ms. Straumins serve as members of the board of directors of Legacy Resources. The total purchases made by us from Legacy Resources under spot agreements in 2014 were approximately \$0.8 million, which represented purchases based upon standard, index-based market rates.

We have one crude oil supply agreement with Legacy Resources, the Master Crude Oil Purchase and Sale Agreement, that was entered into on January 26, 2009. No crude oil is currently being purchased by the Company under this agreement.

Because Legacy Resources is owned in part by one of our limited partners, an affiliate of our general partner, our chief executive officer and vice chairman of the board of directors of our general partner, F. William Grube, and our executive vice president - strategy and development, Jennifer G. Straumins, the terms of the aforementioned agreements were reviewed by the conflicts committee of the board of directors of our general partner, which consists entirely of independent directors. The conflicts committee approved the agreements after determining that the terms of the agreements are fair and reasonable to us.

Product Sales and Related Purchases

During 2014, we made ordinary course sales of certain specialty products to Johann Haltermann, Ltd. ("Haltermann"), a specialty chemical company owned in part by The Heritage Group and Jennifer G. Straumins as an individual. Amy M. Schumacher is president of Monument Chemicals, Inc., which is the parent company of Johann Haltermann, Ltd. The total sales made by us to Haltermann in 2014 were approximately \$2.1 million. As of December 31, 2014 there was no balance due us from Haltermann related to these products sales. We anticipate that we will continue to sell products to Haltermann in the future. We believe that the product sales prices and credit terms offered to Haltermann are comparable to prices and terms offered to non-affiliated third party customers.

During 2014, we made ordinary course sales of certain specialty products to Heritage-Crystal Clean Inc. ("Crystal Clean"), a cleaning and waste removal company owned in part by The Heritage Group and Fred M. Fehsenfeld, Jr. as an individual. The total sales made by us to Crystal Clean in 2014 were approximately \$0.3 million. As of December 31, 2014, there was no balance due us from Crystal Clean related to these products sales. We anticipate that we will continue to sell products to Crystal Clean in the future. The total purchases made by us from Crystal Clean in 2014 for cleaning and waste removal services were approximately \$8.0 million. As of December 31, 2014, there was a \$0.6 million balance due from us to Crystal Clean related to these purchases. We believe that the product sales prices and credit terms offered to Crystal Clean are comparable to prices and terms offered to non-affiliated third party customers.

During 2014, we made ordinary course purchases from Heritage Environmental Services ("Heritage Environmental"), a cleaning and waste removal company owned in part by The Heritage Group and Fred M. Fehsenfeld, Jr. as an individual. Total

purchases made by us from Heritage Environmental in 2014 for cleaning and waste removal services were approximately \$12.1 million. As of December 31, 2014, there was a \$0.6 million balance due from us to Heritage Environmental related to these purchases.

During 2014, we made payments to Asphalt Materials, Inc., an affiliate of The Heritage Group (“Asphalt Materials”), for expenses related to the business use of The Heritage Group’s company plane by our senior executive officers and for environmental consulting services provided to us by Asphalt Materials. The aggregate payments for these services made by us to Asphalt Materials in 2014 were approximately \$0.6 million. As of December 31, 2014, there was a \$0.1 million amount due from us to Asphalt Materials related to these services. We believe that the costs of the services provided to us by Asphalt Materials are comparable to costs charged by non-affiliated third-party suppliers of similar services. During 2014, we made ordinary course sales of certain fuel products to Asphalt Materials of \$5.7 million. As of December 31, 2014, there was a \$1.1 million balance due us from Asphalt Materials related to these products sales. We also reimburse Asphalt Materials for ordinary course purchases made by us under a procurement card program administered by Asphalt Materials. As of December 31, 2014, there was approximately \$0.1 million payable by us to Asphalt Materials related to the reimbursement of these ordinary course purchases. With the exception of the procurement card program, we expect that we will continue to utilize each of these services from Asphalt Materials in the future.

Procedures for Review and Approval of Related Person Transactions

Effective February 9, 2007, to further formalize the process by which related person transactions are analyzed and approved or disapproved, the board of directors of our general partner has adopted the Calumet Specialty Products Partners, L.P. Related Person Transactions Policy (the “Policy”) to be followed in connection with all related person transactions (as defined by the Policy) involving the Company and its subsidiaries. The Policy was adopted to provide guidelines and procedures for the application of the partnership agreement to related person transactions and to further supplement the conflicts resolutions policies already set forth therein.

The Policy defines a “related person transaction” to mean any transaction since the beginning of the Company’s last fiscal year (or any currently proposed transaction) in which: (i) the Company or any of its subsidiaries was or is to be a participant; (ii) the amount involved exceeds \$120,000 (including any series of similar transactions exceeding such amount on an annual basis); and (iii) any related person (as defined in the Policy) has or will have a direct or indirect material interest. Under the terms of the policy, our general partner’s chief executive officer (“CEO”) has the authority to approve a related person transaction (considering any and all factors as the CEO determines in his sole discretion to be relevant, reasonable or appropriate under the circumstances) so long as it is:

- (a) in the normal course of the Company’s business;
- (b) not one in which the CEO or any of his immediate family members has a direct or indirect material interest; and
- (c) on terms no less favorable to the Company than those generally being provided to or available from unrelated third parties or fair to the Company, taking into account the totality of the relationships between the parties involved (including other transactions that may be particularly favorable or advantageous to the Company).

The CEO does not have the authority to approve the issuances of equity or grants of awards under the Company’s Long-Term Incentive Plan, except as provided in that plan. Pursuant to the Policy, any other related person transaction must be approved by the conflicts committee acting in accordance with the terms and provisions of its charter.

A copy of the Policy is available on our website at www.calumetspecialty.com and will be provided to unitholders without charge upon their written request to: Investor Relations, Calumet Specialty Products Partners, L.P., 2780 Waterfront Parkway E. Drive, Suite 200, Indianapolis, IN 46214.

Please see Item 10 “Directors, Executive Officers of Our General Partner and Corporate Governance” for a discussion of director independence matters.

Item 14. *Principal Accounting Fees and Services*

The following table details the aggregate fees billed for professional services rendered by our independent auditor during 2014 and 2013 (in millions).

	Year Ended December 31,	
	2014	2013
Audit fees	\$ 5.8	\$ 5.4
Audit-related fees	0.2	0.2
Tax fees	0.1	0.2
Total	\$ 6.1	\$ 5.8

“Audit fees” above include those related to our annual audit, audit of our general partner and quarterly review procedures.

“Audit-related fees” primarily relate to procedures related to due diligence related to acquisitions, accounting consultations and audits in connection with acquisitions and attest services related to financial reporting that are not required for the audit.

“Tax fees” are related to due diligence and domestic compliance matters.

Pre-Approval Policy

The audit committee of our general partner’s board of directors has adopted an audit committee charter, which is available on our website at <http://www.calumetspecialty.com>. The charter requires the audit committee to pre-approve all audit and non-audit services to be provided by our independent registered public accounting firm. The audit committee does not delegate its pre-approval responsibilities to management or to an individual member of the audit committee. Services for the audit, tax and all other fee categories above were pre-approved by the audit committee.

PART IV

Item 15. Exhibits

(a)(1) Consolidated Financial Statements

The consolidated financial statements of Calumet Specialty Products Partners, L.P. are included in Part II, Item 8 “Financial Statements and Supplementary Data.”

(a)(2) Financial Statement Schedules

All schedules are omitted because they are not applicable, or the required information is shown in the consolidated financial statements or notes thereto.

(a)(3) Exhibits

The following documents are filed as exhibits to this Annual Report:

<u>Exhibit Number</u>	<u>Description</u>
2.1	— Unit Purchase Agreement, dated as of June 5, 2012, by and among Calumet Lubricants Co., Limited Partnership, Royal Purple, Inc. and the shareholders of Royal Purple, Inc. named therein (incorporated by reference to Exhibit 2.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on June 8, 2012 (File No. 000-51734)).
2.2	— Share Purchase Agreement, dated as of August 14, 2012, among Calumet Specialty Products Partners, L.P. and Connacher Oil and Gas Limited (incorporated by reference to Exhibit 2.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on August 20, 2012 (File No. 000-51734)).
2.3	— Securities Purchase Agreement, dated as of March 25, 2014, by and among ADF Holdings, Inc., Calumet Lubricants Co., Limited Partnership, the sellers listed therein, GarMark Advisors II L.L.C., as the sellers’ representative, and Calumet Specialty Products Partners, L.P., as guarantor (incorporated by reference to Exhibit 2.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on March 26, 2014 (File No. 000-51734)).
3.1	— Certificate of Limited Partnership of Calumet Specialty Products Partners, L.P. (incorporated by reference to Exhibit 3.1 to the Registrant’s Registration Statement on Form S-1 filed with the Commission on October 7, 2005 (File No. 333-128880)).
3.2	— Amended and Restated Limited Partnership Agreement of Calumet Specialty Products Partners, L.P. (incorporated by reference to Exhibit 3.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on February 13, 2006 (File No. 000-51734)).
3.3	— Amendment No. 1 to the First Amended and Restated Agreement of Limited Partnership of Calumet Specialty Products Partners, L.P. (incorporated by reference to Exhibit 3.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on July 11, 2006 (File No. 000-51734)).
3.4	— Amendment No. 2 to First Amended and Restated Agreement of Limited Partnership of Calumet Specialty Products Partners, L.P. (incorporated by reference to Exhibit 3.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on April 18, 2008 (File No. 000-51734)).
3.5	— Certificate of Formation of Calumet GP, LLC (incorporated by reference to Exhibit 3.3 to the Registrant’s Registration Statement on Form S-1 filed with the Commission on October 7, 2005 (File No. 333-128880)).
3.6	— Amended and Restated Limited Liability Company Agreement of Calumet GP, LLC (incorporated by reference to Exhibit 3.2 to the Registrant’s Current Report on Form 8-K filed with the Commission on February 13, 2006 (File No. 000-51734)).
4.1	— Specimen Unit Certificate representing common units (incorporated by reference to Exhibit 3.7 to the Registrant’s Quarterly Report on Form 10-Q filed with the Commission on November 4, 2010 (File No. 000-51734)).
4.2	— Indenture, dated June 29, 2012, by and among Calumet Specialty Products Partners, L.P., Calumet Finance Corp., certain subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on July 5, 2012 (File No. 000-51734)).
4.3	— Indenture, dated November 26, 2013, by and among Calumet Specialty Products, L.P., Calumet Finance Corp., certain subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on November 26, 2013 (File No. 000-51734)).

<u>Exhibit Number</u>	<u>Description</u>
4.4	— Indenture, dated March 31, 2014, by and among Calumet Specialty Products, L.P., Calumet Finance Corp., certain subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed with the Commission on March 31, 2014 (File No. 000-51734)).
4.5	— Form of 6.50% Senior Note due 2021 (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K filed with the Commission on March 31, 2014 (File No. 000-51734)).
4.6	— Registration Rights Agreement, dated March 31, 2014, by and among the Issuers, the Guarantors and the Initial Purchasers, relating to the offering of the 2021 Notes (incorporated by reference to Exhibit 4.3 to the Registrant's Current Report on Form 8-K filed with the Commission on March 31, 2014 (File No. 000-51734)).
10.1	— LVT Unit Agreement, effective January 1, 2008, between ConocoPhillips Company and Calumet Penreco, LLC (incorporated by reference to Exhibit 10.11 to the Registrant's Annual Report on Form 10-K filed with the Commission on March 4, 2008 (File No. 000-51734)). Portions of this exhibit have been omitted pursuant to a request for confidential treatment.
10.2	— LVT Feedstock Purchase Agreement, effective January 1, 2008, between ConocoPhillips Company, as Seller and Calumet Penreco, LLC, as Buyer (incorporated by reference to Exhibit 10.12 to the Registrant's Annual Report on Form 10-K filed with the Commission on March 4, 2008 (File No. 000-51734)). Portions of this exhibit have been omitted pursuant to a request for confidential treatment.
10.3	— HDW Diesel Sale and Purchase Agreement, effective January 1, 2008, between ConocoPhillips Company, as Seller and Calumet Penreco, LLC, as Buyer (incorporated by reference to Exhibit 10.13 to the Registrant's Annual Report on Form 10-K filed with the Commission on March 4, 2008 (File No. 000-51734)). Portions of this exhibit have been omitted pursuant to a request for confidential treatment.
10.4	— Amended Crude Oil Sale Contract, effective April 1, 2008, between Plains Marketing, L.P. and Calumet Shreveport Fuels, LLC (incorporated by reference to Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed with the Commission on March 20, 2008 (File No. 000-51734)).
10.5*	— Calumet Specialty Products Partners, L.P. Executive Deferred Compensation Plan, dated December 18, 2008 and effective January 1, 2009 (incorporated by reference to Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed with the Commission on December 22, 2008 (File No. 000-51734)).
10.6*	— Form of Phantom Unit Grant Agreement (incorporated by reference to Exhibit 99.1 to the Registrant's Current Report on Form 8-K filed with the Commission on January 28, 2009 (File No. 000-51734)).
10.7*	— F. William Grube Employment Contract (incorporated by reference to Exhibit 10.3 to the Registrant's Current Report on Form 8-K filed with the Commission on February 13, 2006 (File No. 000-51734)).
10.8	— Omnibus Agreement (incorporated by reference to Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed with the Commission on February 13, 2006 (File No. 000-51734)).
10.9*	— Form of Unit Option Grant (incorporated by reference to Exhibit 10.4 to the Registrant's Registration Statement on Form S-1/A filed with the Commission on November 16, 2005 (File No. 333-128880)).
10.10*	— Amended and Restated Long-Term Incentive Plan, dated and effective January 22, 2009 (incorporated by reference to Exhibit 10.18 to the Registrant's Annual Report on Form 10-K filed with the Commission on March 4, 2009 (File No. 000-51734)).
10.11*	— Reaffirmation Agreement, General Release and Covenant Not to Sue, dated December 22, 2010 and effective as of December 29, 2010, between Calumet GP, LLC and Allan A. Moyes III (incorporated by reference to Exhibit 10.26 to the Registrant's Current Report on Form 8-K filed with the Commission on January 4, 2011 (File No. 000-51734)).
10.12*	— Jennifer G. Straumins Employment Agreement (incorporated by reference to Exhibit 10.1 to the Registrant's Quarterly Report on Form 10-Q filed with the Commission on May 9, 2014 (File No. 000-51734)).
10.13*	— R. Patrick Murray, II Employment Agreement (incorporated by reference to Exhibit 10.2 to the Registrant's Quarterly Report on Form 10-Q filed with the Commission on May 9, 2014 (File No. 000-51734)).
10.14*	— Timothy R. Barnhart Employment Agreement (incorporated by reference to Exhibit 10.3 to the Registrant's Quarterly Report on Form 10-Q filed with the Commission on May 9, 2014 (File No. 000-51734)).

<u>Exhibit Number</u>	<u>Description</u>
10.15	— Second Amended and Restated Credit Agreement, dated as of July 14, 2014, by and among Calumet Specialty Products Partners, L.P. and certain of its subsidiaries as Borrowers, certain of its subsidiaries as Guarantors, the Lenders, Bank of America, N.A., as Agent, JPMorgan Chase Bank, N.A. and Wells Fargo Capital Finance, LLC, as Co-Syndication Agents, U.S. Bank National Association and Deutsche Bank Trust Company Americas, as Co-Documentation Agents and Bank of America, N.A., J.P. Morgan Securities LLC and Wells Fargo Capital Finance, LLC, as Joint Lead Arrangers and Joint Book Runners (incorporated by reference to Exhibit 10.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on July 17, 2014 (File No. 000-51734)).
10.16	— Collateral Trust Agreement, as amended, dated as of April 21, 2011, among Calumet Lubricants Co., Limited Partnership, the guarantors party thereto, the secured hedge counterparties thereto and Bank of America, N.A. (incorporated by reference to Exhibit 10.2 to the Registrant’s Quarterly Report on Form 10-Q filed with the Commission on August 8, 2011 (File No. 000-51734)).
10.17	— Amendment No. 2 to Collateral Trust Agreement, effective as of September 30, 2011, by and among Calumet Lubricants Co., Limited Partnership, the guarantors party thereto, the secured hedge counterparties thereto and Bank of America, N.A. (incorporated by reference to Exhibit 10.1 to the Registrant’s Current Report on Form 8-K filed with the Commission on October 6, 2011 (File No. 000-51734)).
10.18	— Crude Oil Purchase Agreement effective as of October 1, 2011, by and between BP Products North America Inc. and Calumet Superior, LLC (incorporated by reference to Exhibit 10.30 to the Registrant’s Annual Report on Form 10-K filed with the Commission on February 29, 2012 (File No. 000-51734)). Portions of this exhibit have been omitted pursuant to a request for confidential treatment.
10.19	— Amended and Restated Crude Oil Purchase Agreement, dated April 1, 2012 by and between BP Products North America Inc. and Calumet Superior, LLC (incorporated by reference to Exhibit 10.1 to the Registrant’s Quarterly Report on Form 10-Q filed with the Commission on August 9, 2012 (File No. 000-51734)). Portions of this exhibit have been omitted pursuant to a request for confidential treatment.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO RULE 13A-14(A) AND RULE 15D-14(A)
OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED**

I, F. William Grube, certify that:

1. I have reviewed this Annual Report on Form 10-K of Calumet Specialty Products Partners, L.P. (the “registrant”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report.
4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Safe Harbor Statement

Certain statements and information in this press release may constitute "forward-looking statements." The words "believe," "expect," "anticipate," "plan," "intend," "foresee," "should," "would," "could" or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate. All comments concerning our expectations for future sales and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Important factors that could cause actual results to differ materially from those in the forward-looking statements include: the overall demand for specialty hydrocarbon products, fuels and other refined products; our ability to produce specialty products and fuels that meet our customers' unique and precise specifications; the impact of fluctuations and rapid increases or decreases in crude oil and crack spread prices, including the resulting impact on our liquidity; the results of our hedging and other risk management activities; our ability to comply with financial covenants contained in our debt instruments; the availability of, and our ability to consummate, acquisition or combination opportunities and the impact of any completed acquisitions; labor relations; our access to capital to fund expansions, acquisitions and our working capital needs and our ability to obtain debt or equity financing on satisfactory terms; successful integration and future performance of acquired assets, businesses or third-party product supply and processing relationships; our ability to timely and effectively integrate the operations of recently acquired businesses or assets, particularly those in new geographic areas or in new lines of business; environmental liabilities or events that are not covered by an indemnity, insurance or existing reserves; maintenance of our credit ratings and ability to receive open credit lines from our suppliers; demand for various grades of crude oil and resulting changes in pricing conditions; fluctuations in refinery capacity; our ability to access sufficient crude oil supply through long-term or month-to-month evergreen contracts and on the spot market; the effects of competition; continued creditworthiness of, and performance by, counterparties; the impact of current and future laws, rulings and governmental regulations, including guidance related to the Dodd-Frank Wall Street Reform and Consumer Protection Act; shortages or cost increases of power supplies, natural gas, materials or labor; hurricane or other weather interference with business operations; our ability to access the debt and equity markets; accidents or other unscheduled shutdowns; and general economic, market or business conditions. For additional information regarding known material factors that could cause our actual results to differ from our projected results, please see our filings with Securities and Exchange Commission ("SEC"), including our latest Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date they are made. We undertake no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.
