

Banking on Community

Investing in Prosperity on the Maine Coast

2010 Summary Annual Report

Founded in 1887, Bar Harbor Bank & Trust (the “Bank”) is a community bank with 12 locations along the coast of Maine, and offers a full range of financial products and services for families, businesses, municipalities and non-profit organizations. Bar Harbor Trust Services, a subsidiary of the Bank, and Bar Harbor Financial Services, a branch of Inflex Investments, Inc., an independent third party broker, provide retirement planning, investment management, brokerage and insurance services to meet the needs of a wide variety of individual, non-profit and municipal clients. Bar Harbor Bankshares (“BHB” or the “Company”) is the parent company of Bar Harbor Bank & Trust.

Average Shareholders' Equity	\$ 105,911	\$ 88,846	19.2%

Dear fellow shareholders:

We are pleased to provide you with the Bar Harbor Bankshares Summary Annual Report for 2010. We are most pleased to report that net income available to common shareholders for 2010 was a record \$10 million, up 7.4% from 2009.

This is our fifth consecutive year of record earnings. We are particularly pleased to have sustained this trend through 2008, 2009 and 2010, three of the most challenging years in modern banking history.

Last year at this time, due to patches of turbulence that lingered in the economy, we were uncertain about what the next twelve months might bring although we were cautiously optimistic that Bar Harbor Bankshares was prepared for it. We believe it is fair to say that by year's end, the national and regional economies had experienced a largely sideways movement. However, the coast of Maine demonstrated some very encouraging and

unique pockets of economic vitality, which supported some of our optimistic expectations. It is worth noting a few key examples.

- Bar Harbor Bankshares' principal economic driver remains tourism as our headquarters stands in the shadow of the heights of Acadia National Park, one of the major tourism destinations on the East Coast. Acadia National Park reported 2010 visits were up about 350,000 (or 15%) over 2009, and local lodging, hospitality and retail establishments generally have reported their best year in nearly a decade. Many of these businesses are our customers and we in turn

Bar Harbor Bankshares employees share their energy and enthusiasm with more than 60 non-profit groups and 40 community events each year, touching thousands of lives in the coastal Maine communities where we are fortunate to live, work, and play.

Outstanding Corporation of the Year 2010

The Association of Fundraising Professionals—Northern New England Chapter honored BHB as “Outstanding Corporation” of the year in 2010, recognizing our employees for their gifts of time, expertise and dollars.

Bowl for Kids' Sake

March 2010

When a concerned parent cares enough to connect with an organization that embraces the power of friendship...when a child is matched with an ideal mentor...the result is beyond measure—a self-confident child, involved and engaged in school, with a caring friend cheering from the sidelines. That's the power of Big Brothers Big Sisters. BHB has supported Bowl for Kids' Sake for many years, and 12 Bank teams raised over \$5,000 in 2010.

Teach Children to Save

April 2010

Every April, over 24,000 bankers bring financial lessons to classrooms across the country. In 2010, BHB employees reached over 250 students at eight local schools. A few days after BHB's Penny Carter and Leita Zeugner visited a 4th grade class, a grateful mom called the teacher to say what an impact it had on her son. "He came home and the first thing he said was that he wanted to open a savings account."

were rewarded with unusually strong seasonal increases in deposits as well as added stability in our tourism-dependent loans and related personal debt.

- Maine's iconic lobster fishing industry has struggled with difficult challenges for the past several years but 2010 was different. The Maine Department of Marine Resources has reported that the 2010 lobster harvest was the highest on record for both volume and value. Landings were over 93 million pounds with a value of over \$308 million compared to over 81 million pounds and a value of \$237 million for 2009. As these statistics signify, most lobster fishermen enjoyed a substantially better reward for their efforts than in recent years. For Bar Harbor Bankshares, this has translated to a healthier portfolio of commercial and personal business within the fishing communities.

- The Maine wild blueberry industry provides some of our largest agricultural customers and comprises wild blueberry growers and processors. This year saw some early cautions due to partial crop losses in both Maine and Canada due to untimely frosts. Eventually, domestic growers suffered less damage than did their Canadian competitors. Demand for product remained high due to the weakened overall supply with the result that our customers have reported very strong prices. 2010 brought satisfying profits for most operators in our region and we were able to increase our support to this major local industry.

As we have commented many times in our shareholder communications, we are fortunate to be a community bank on the coast of Maine, which has been hospitable to our success over the past several years and was again in 2010.

Harding Golf Tournament

May 2010

"Food and Fuel for our Neighbors on Mount Desert Island" was the fundraising objective for our 17th annual David R. Harding Memorial Golf Tournament at Kebo Valley. Tourney proceeds of \$6,000 were evenly distributed among the Bar Harbor Food Pantry, the Westside Food Pantry, and the MDI Community Campfire Coalition.

During 2010, the Company's assets grew by \$45.6 million, or 4.2%, to \$1.1 billion. In 2010, many banks were unable to demonstrate growth and we are pleased to have done so in ways that are beneficial to the customers and communities we serve. In 2009's Summary Annual Report, we noted the national perception that "banks are unwilling to lend." We are delighted to present our bank's experience as counter to that assertion. During 2008 and 2009, we began to observe that our competitive landscape was changing and that the market was becoming increasingly receptive to an experienced and responsive local community bank as an alternative source to the much larger regional and national banks for business lending. We had been building our business development and credit administration teams around conservative and consistent credit standards for several years and we were well-prepared to take advantage of these additional opportunities. Despite the specter of diminished overall market demand, we made a conscious strategic decision to deploy our business banking team at increased strength to provide what

Relay for Life

June 2010

Bar Harbor Bankshares' "Banking on a Cure" team first participated in Relay in 2001, when a group of four raised \$1,460. Since then, BHB's team has grown to around 50 employees, friends, and family members who have raised over \$78,000 to help create a world with less cancer and more birthdays. BHB's "Banking on a Cure" fundraising begins as soon as the current year's Relay ends. Our team hosts a Spud-tacular Baked Potato Supper, a Cinco de Mayo lunch, a dance, and several pancake breakfasts to bring in funds for the cause.

Relay for Life, the American Cancer Society's signature activity, raises funds to fight cancer and increase awareness of prevention and treatment options. Teams camp out overnight and take turns walking around the track during an 18-hour period. Each team is asked to have a representative on the track at all times during the event. While doing their part to help find a cure, participants celebrate the lives of those who have battled cancer and remember loved ones lost to the disease.

"Banking on a Cure" is one of the top fundraising teams in Hancock County, collecting over \$15,000 in 2009 and nearly \$14,000 in 2010, more than 10% of the overall local event proceeds. Our employees have also been involved in the Daffodil Days fundraiser for ACS since it began over 25 years ago. The American Cancer Society honored BHB with an *Outstanding Income Development Award* in 2007 in recognition of the Bank's longstanding partnership in the fight against cancer.

we believe to have been exemplary service at a time when it was most appreciated by existing customers and new prospects. This positioning has permitted healthy growth during a period of general industry retrenchment. We believe this strategy has distinguished us from many of our competitors. For 2010, business loans were up \$28.3 million over 2009, representing growth of 7.7% and ended 2010 at \$397.6 million.

Residential mortgage loans rose \$5.7 million or 2.5% compared to 2009 and, given the overall state of the market, we are pleased to report even that small measure of growth. Throughout the nation, banks have struggled with a dramatic slowdown in housing sales and diminishing opportunities to finance homes. Because of the slowness in the industry, housing values had decreased dramatically, especially in areas of previously high growth, and home purchase activity withered from prior levels. We were not immune along the Maine coast as local housing values also softened here and purchase activity gave way to refinancing of existing homes. In recent months, we have observed increased interest in both the high and entry levels of the mortgage market but

continued sluggishness in the broader middle market where trading-up transactions have become rare. In particular, since late 2009, we have observed some heightened interest in high-value vacation and retirement homes along the coast, representing, we believe, an assessment that values have leveled out for such properties and the opportunities available are compelling. We have been fortunate to be able to provide financing for several of these transactions. However, we are very cautious about projecting the rate of progress in the broader housing market from this point forward.

While asset quality factors were relatively stable through most of 2010, we did experience net charge-offs of 0.24% of total average loans for 2010 compared to 0.13% of total loans in 2009. At the end of 2010, non-performing loans were 1.95% of total loans up from 1.37% of total loans in 2009, with all of the net increase represented by a single \$5.2 million loan to a moderate-income housing project managed by a local not-for-profit agency. While the pace of resolution of residential loans in foreclosure in Maine is glacially slow, the pace of our loans entering the foreclosure process is manageable and has not worsened

Customer Appreciation Days

Summer 2010

We appreciate our customers every day... and sometimes we feed them, too. Whether it's burgers on a sizzling grill, a 6-foot sub sandwich with all the trimmings, ice cream with homemade blueberry sauce, or root beer floats—we roll out the red carpet and hometown hospitality. Good food, good fellowship, great fun. This is community banking at its most delicious.

We made a conscious strategic decision to deploy our business banking team at increased strength to provide what we believe to have been exemplary service at a time when it was most appreciated by existing customers and new prospects. This positioning has permitted healthy growth during a period of general industry retrenchment.

appreciably relative to our experience in 2009. We continue to work with every cooperative borrower to avoid foreclosure whenever possible.

We are pleased to note that our financial service units, Bar Harbor Trust Services and Bar Harbor Financial Services*, continued to grow during 2010. Combined, these units contributed top-line revenues of \$3 million up 22.1% compared to 2009. These units continue to demonstrate increased acceptance in the local market as

providers of choice for financial advisory and investment services to a wide variety of individuals and institutional clients. At the end of 2010, Bar Harbor Trust Services reported assets under management of \$314.2 million, up \$44.1 million or 16.3% from 2009.

We are pleased to report an efficiency ratio for 2010 of 55.5%, very favorable compared to peers. The slippage from 53.2% in 2009 is largely attributable to a 4.7% decline in net interest income. This decline was principally

**Bar Harbor Financial Services is a branch of Infinex Investments, Inc., an independent registered broker-dealer which is not affiliated with the Company or the Bank.*

Bar Harbor Bank & Trust YMCA Half Marathon

September 2010

“Gatorade!” “Water!” As runners pass the 5-mile mark, they are greeted with hydration and cheers from an enthusiastic team of BHB volunteers. One of the most scenic race courses in the world, the Half Marathon winds through Acadia National Park and ends up back in town at the Bar Harbor ballfield. With a limited field of only 400 runners, there is always a full roster for this popular event that draws participants from near and far. As title sponsor, BHB has supported this timeless YMCA fundraiser and economy booster since the 1980’s.

Walk for Wishes

September 2010

When the Make-A-Wish Foundation grants wishes for children with life-threatening medical conditions, the average cost is \$6,000. Many children from Maine have benefited, including our own Penny Brady’s step-daughter, Becky, who was present at the 2010 Walk. Becky’s wish of going on a cruise was granted back in 2002 when she was 10 years old and battling a brain tumor. Now she is 19, and majoring in elementary education at Husson University. Ron Hamilton, BHB employee, is a volunteer Wish Granter and organizes our local Walk, which raised nearly \$9,000 in 2010.

due to the refinancing of certain loans into lower rates as well as to accelerated cash flows from the company’s mortgage-backed securities portfolio. Non-interest expenses were up only 1.3% compared to 2009, and were a lesser factor in this ratio for 2010.

As part of our strategic plan, we identified the importance of improving the overall banking experience of our existing customers. One aspect of this commitment is to upgrade branch facilities in our largest and busiest locations. In 2010, we renovated our Blue Hill and Southwest Harbor branches and launched a project to replace our Ellsworth branch. These three offices are our largest branches aside from our Bar Harbor headquarters and represent valuable franchise assets with growth potential. Another aspect of this commitment was to recognize the popular demand of electronic banking products. In 2010, we completed deployment of a new online bill-payment system, E-statements and E-Choice, our interest-bearing electronic checking account.

The Maine Coast

Maine's coastal economy, with its strengths in tourism, fishing, boat building and blueberry farming, has proven remarkably stable over time. With 12 branches along a 120-mile stretch from Lubec to Rockland, BHB is fortunate to call coastal Maine home.

- 1 Bar Harbor 2 Blue Hill 3 Deer Isle 4 Ellsworth 5 Lubec 6 Machias 7 Millbridge
- 8 Northeast Harbor 9 Rockland 10 Somesville 11 Southwest Harbor 12 Winter Harbor

We wish to acknowledge a change in our senior management team. In July of 2010, we welcomed Raymond J. Frohnapfel as Senior Vice President of Operations and Information Systems. Mr. Frohnapfel brings over 25 years of experience in banking operations and technology management. Mr. Frohnapfel succeeds David W. Thibault who retired in June of 2010 after nine years of exemplary service to the Company.

Throughout this document we have taken the opportunity to acknowledge the extraordinary contributions of our team members who devote thousands of hours of volunteer service to a myriad of benefit events and community causes. Their volunteer efforts are from the heart and need no coaching from management. We believe that healthy communities are prosperous communities and

No matter the locale, BHB's floats are always standouts in our local parades. Shown left to right: Bar Harbor July 4th Parade, Quietside Flamingo Festival, Ellsworth Holiday Parade.

We believe that healthy communities are prosperous communities and we recognize there is no better indicator of a healthy community than the unselfish spirit of its people. Throughout this document we acknowledge the extraordinary contributions of our team members who devote thousands of hours of volunteer service to a myriad of community events and causes.

we recognize there is no better indicator of a healthy community than the unselfish spirit of its people. We are very proud of our team members and salute their remarkable commitment.

Going forward into 2011 and beyond, we remain cautiously optimistic that the broader national economy will eventually strengthen but will be remarkably changed from the pre-crisis period in ways we do not yet fully comprehend. We suspect that a segment of the population we serve will become and remain financially more conservative than they may have been before and this

will be manifest in their expectations of banks and financial services companies. By contrast, we predict a new generation of entrepreneurs will emerge, recognizing new opportunities and looking for skill, confidence and support from lending institutions. To prosper and flourish, Bar Harbor Bankshares will need to respond to both expectations and we are committed to do so.

Legislative and regulatory expectations are the extreme wild-card in the banking future. While well-intentioned, if occasionally misguided, regulatory expectations designed for large banks do not sit well on the shoulders of smaller

Thanksgiving Food Drive

November 2010

Through the generosity of our community members, BHB's 22nd annual food drive, held at grocery stores in Bar Harbor, Blue Hill, Ellsworth, and Machias, brought in more than 2,000 food items and over \$2,300. These gifts provided food for the Thanksgiving holiday as well as stocked the shelves of eleven local food pantries for the coming winter months.

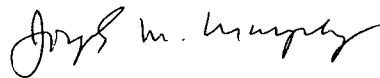

community banks. In the wake of the Dodd-Frank Wall Street Reform and Consumer Protection Act, the community banking industry is virtually certain to experience increased compliance bureaucracy and costs.

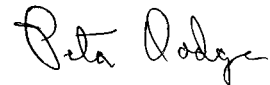

We ended 2010 in a position of strength with a Total Risk-based capital ratio of 15.41%, well above the regulatory standard of 10% for a well-capitalized financial institution. Going forward, this capital strength will determine both our strategic direction and our freedom to act upon our strategic intents. In the past two years we have taken

bold steps to acquire and preserve this significant capital strength and we are committed to use it prudently in pursuit of long term growth and appropriate returns to our shareholders. As evidence of this commitment, we were pleased to increase our dividend during the fourth quarter of 2010 and again in the first quarter of 2011.

On behalf of the Board of Directors and all the Bar Harbor Bankshares team members, we thank you, our shareholders, for your confidence and loyalty.

2010 Financial Overview

BUSINESS STRATEGY

As a diversified financial services provider, Bar Harbor Bankshares pursues a strategy of achieving long-term sustainable growth, profitability, and shareholder value, without sacrificing its soundness. The Company works toward achieving this goal by focusing on increasing its loan and deposit market share in the coastal communities of Maine. The Company believes one of its more unique strengths is an understanding of the financial needs of coastal communities and the businesses vital to Maine's coastal economy, namely: tourism, hospitality, retail establishments, restaurants, seasonal lodging and campgrounds, fishing, lobstering, boat building, and marine services.

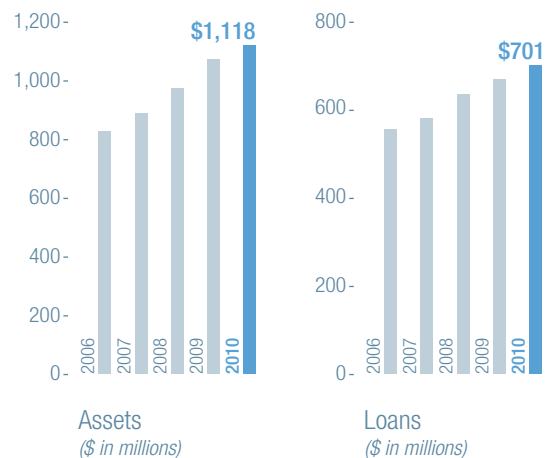

Operating under a community banking philosophy, the Company's key strategic focus is vigorous financial stewardship, deploying investor capital safely yet efficiently for the best possible returns. The Company strives to provide unmatched service to its customers, while maintaining strong asset quality and a focus toward improving operating efficiencies. In managing its earning asset portfolios, the Company seeks to utilize funding and capital resources within well-defined credit, investment, interest-rate and liquidity guidelines. In managing its balance sheet the Company seeks to preserve the sensitivity of net interest income to changes in interest rates, and to enhance profitability through strategies that promise sufficient reward for understood and controlled risk. The Company is deliberate in its efforts to maintain adequate liquidity under prevailing and expected conditions, and strives to maintain a balanced and appropriate mix of loans, securities, core deposits, and borrowed funds.

FINANCIAL CONDITION

Assets: The Company's total assets increased \$45.6 million or 4.2% during 2010, ending the year at \$1.1 billion. This increase was principally attributed to the growth of the Bank's commercial and consumer loan portfolios.

Loans: Consumer loans comprised 41.4% of the Bank's total loan portfolio at December 31, 2010 and principally consisted of residential real estate mortgage loans and home equity loans. The Bank also serves the small

business market throughout downeast and midcoast Maine. It offers business loans to individuals, partnerships, corporations, and other business entities for capital construction, real estate purchases, working capital, real estate development, and a broad range of other business purposes. At December 31, 2010, commercial business loans represented 56.7% of the Bank's total loan portfolio.

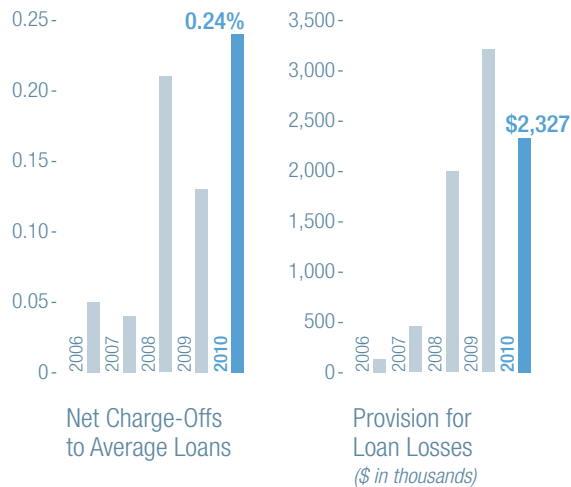

Total loans ended the year at \$700.7 million, representing an increase of \$31.2 million, or 4.7%, compared with December 31, 2009. Loan growth was led by commercial loans, which ended the year at \$397.6 million, representing an increase of \$28.3 million or 7.7% compared with year-end 2009. Commercial loan growth has been generally challenged by a weak economy, declining loan demand and vigorous competition for quality loans. Bank management attributes the overall growth in commercial loans to an effective business banking team, deep local market knowledge, sustained new business development efforts, and a resilient local economy that is faring better than the nation as a whole.

Total consumer loans ended the year at \$290.1 million, representing an increase of \$4.8 million or 1.7% compared with year-end 2009. This increase was principally attributed to residential real estate mortgage loans, which were up \$5.7 million or 2.5%. Residential mortgage loan origination activity slowed during 2010 largely reflecting current economic conditions and uncertainties with

respect to further real estate market declines in the communities served by the Bank, and to a lesser extent the expiration of the first-time home buyers tax credit. Residential mortgage loan refinancing activity continued at a brisk pace in 2010, which was principally attributed to historically low interest rates.

Credit Quality: At December 31, 2010, the Bank's total non-performing loans amounted to \$13.7 million, up from \$9.2 million at December 31, 2009. One commercial real estate development loan to a local, non-profit housing authority in support of an affordable housing project accounted for \$5.2 million, or 38.0%, of total year-end 2010 non-performing loans and more than accounted for the year-over-year increase.

The Bank's 2010 loan loss experience exceeded historical norms. Total net loan charge-offs amounted to \$1.6 million in 2010, up from \$839 thousand in 2009. Total 2010 net loan charge-offs expressed as a percentage of average loans outstanding amounted to 0.24%, up from 0.13% in 2009.

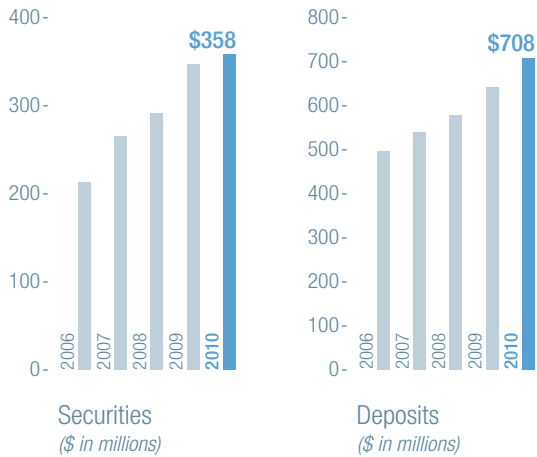

For the year ended December 31, 2010, the Bank recorded a provision for loan losses (the "provision") of \$2.3 million, representing a decline of \$880 thousand or 27.4% compared with 2009. Despite the year-over-year decline in the provision, the amounts recorded during 2010 were higher than historical experience, largely reflecting a continuance in the overall level of credit deterioration, and elevated levels of net loan charge-offs and non-performing loans. These factors were partially mitigated by stabilizing economic conditions and real estate values, and slowing loan portfolio growth.

The Bank maintains an allowance for loan losses (the "allowance") which is available to absorb probable losses on loans. The allowance is maintained at a level that, in management's judgment, is appropriate for the amount of risk inherent in the current loan portfolio and adequate to provide for estimated probable losses. At December 31, 2010, the allowance stood at \$8.5 million, representing an increase of \$686 thousand or 8.8% compared with December 31, 2009. The allowance expressed as a percentage of total loans stood at 1.21% at year end, up from 1.17% at December 31, 2009. The increase in the allowance principally reflected pockets of credit deterioration in the Bank's loan portfolio, including elevated levels of non-performing and potential problem loans.

Investment Securities: During 2010 the securities portfolio continued to serve as a key source of earning assets and liquidity for the Bank. Total securities ended the year at \$357.9 million, representing an increase of \$10.9 million, or 3.1%, compared with December 31, 2009. Company management has been cautious about leveraging the securities portfolio in consideration of historically low market yields and the corresponding interest rate risk should interest rates begin to rise. While this action inhibited the growth of the Bank's net interest income in the near-term, Company management believes the long-term risks outweigh the short-term rewards. Securities purchased during 2010 principally consisted of mortgage-backed securities issued and guaranteed by U.S. Government agencies and sponsored-enterprises.

Deposits: During 2010, the most significant funding source for the Bank’s earning assets continued to be retail deposits, gathered through its network of twelve banking offices throughout downeast and midcoast Maine.

Total deposits ended the year at \$708.3 million, representing an increase of \$67.2 million, or 10.5%, compared with December 31, 2009. All categories of deposits posted meaningful increases in 2010. The Bank’s deposit growth was principally attributed to savings and money market accounts which ended the year at \$211.7 million, representing an increase of \$40.0 million, or 23.3%. The Bank’s NOW accounts were up \$8.1 million or 10.9% in 2010, while demand deposits increased \$2.6 million, or 4.5%. The Bank’s total time deposits, which include certificates of deposit obtained from the national market, ended the year at \$353.6 million, representing an increase of \$16.5 million, or 4.9%, compared with year-end 2009.

Borrowings: Borrowed funds principally consist of advances from the Federal Home Loan Bank of Boston. The Bank utilizes borrowed funds in leveraging its strong capital position and supporting its earning asset portfolios.

Total borrowings ended the year at \$300.0 million, down \$11.6 million, or 3.7%, compared with December 31, 2009. The decline in borrowings was principally attributed to strong retail deposit growth.

Capital: Consistent with its long-term strategy of operating a sound and profitable organization, at December 31, 2010, the Company and the Bank continued to exceed regulatory requirements for “well-capitalized” financial institutions. Company management considers this to be vital in promoting depositor and investor confidence and providing a solid foundation for future growth. Under the

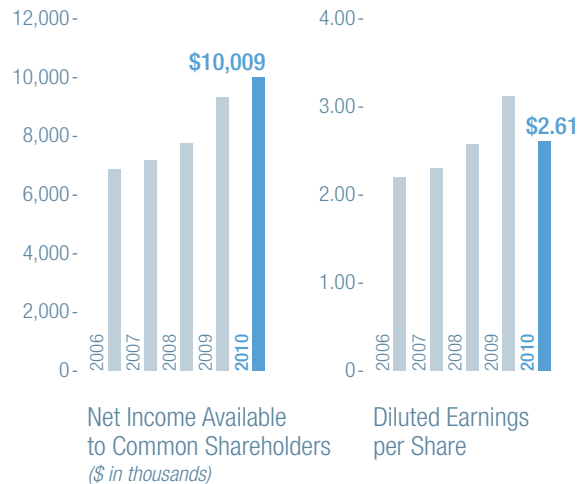

capital adequacy guidelines administered by the Bank’s principal regulators, “well-capitalized” institutions are those with Tier I leverage, Tier I Risk-based, and Total Risk-based ratios of at least 5%, 6% and 10%, respectively. At December 31, 2010, the Company’s Tier I Leverage, Tier I Risk-based, and Total Risk-based capital ratios were 9.01%, 13.57% and 15.41%, respectively.

At December 31, 2010, the Company’s tangible common equity ratio stood at 9.01%, up from 8.60% at December 31, 2009.

Shareholder Dividends: The Company paid regular cash dividends of \$1.045 per share of common stock in 2010, compared with \$1.040 in 2009.

RESULTS OF OPERATIONS

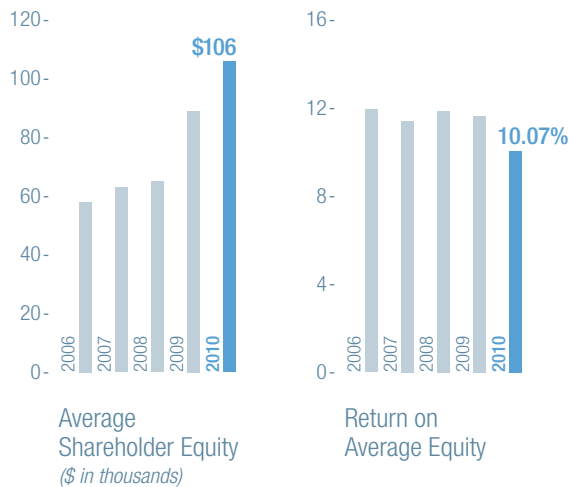

Earnings and Earnings Per Share: For the year ended December 31, 2010, the Company reported record net income available to common shareholders of \$10.0 million, compared with \$9.3 million for the year ended December 31, 2009, representing an increase of \$693 thousand or 7.4%. The Company’s diluted earnings per share amounted to \$2.61 for 2010 compared with \$3.12 in 2009, representing a decline of \$0.51, or 16.3%.

The decline in 2010 diluted earnings per share largely reflected the Company’s previously reported issuance of 882,021 shares of its common stock in the fourth quarter of 2009 and the first quarter of 2010, the proceeds from which were primarily used to repurchase all of the shares of Preferred Stock sold to the U.S. Department of the Treasury (the “Treasury”) in the first quarter of 2009 as

part of the Capital Purchase Program established by the Treasury under the Emergency Economic Stabilization Act of 2008.

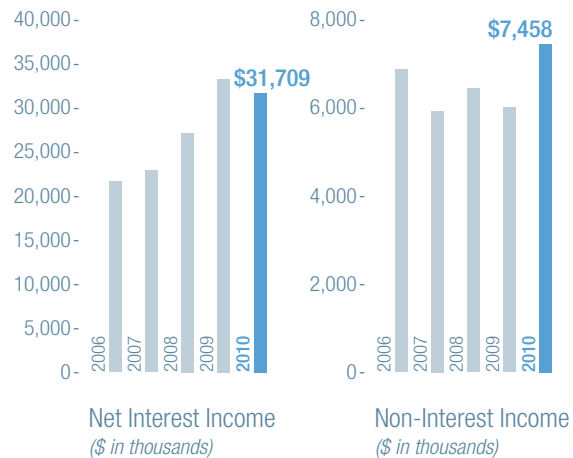

Return on Average Equity: The Company's total average shareholders' equity amounted to \$105.9 million in 2010, representing an increase of \$17.1 million, or 19.2%, compared with 2009. The Company's return on average shareholders' equity amounted to 10.07% in 2010, compared with 11.65% in 2009.

Net Interest Income: Net interest income is the principal component of the Company's income stream and represents the difference or spread between interest generated from earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in market interest rates, as well as volume and mix changes in earning assets and interest bearing liabilities, can materially impact net interest income.

For the year ended December 31, 2010, net interest income on a tax-equivalent basis amounted to \$33.3 million, representing a decline of \$1.5 million, or 4.2%, compared with 2009. The decline in net interest income was principally attributed to the Bank's tax-equivalent net interest margin, which declined 22 basis points to 3.18%, offset in part by average earning asset growth of \$25.9 million or 2.5%. The decline in the net interest margin was largely attributed to earning asset yields, which declined 22 basis points more than the cost of interest bearing liabilities.

Factors contributing to the 2010 net interest margin decline included the ongoing competitive re-pricing of certain commercial loans and the origination and accelerated refinancing of residential mortgage loans during a period of historically low interest rates. The replacement of accelerated cash flows from the Bank's mortgage-backed securities portfolio also contributed heavily to the net interest margin decline. In addition, as previously reported, during 2010 the Bank continued protecting future earnings from interest rate risk by extending a portion of its low cost, short-term, wholesale funding maturities. While this strategy pressured the net interest margin in the near-term, the Bank's balance sheet has been positioned such that future levels of net interest income are largely insulated from rising interest rates.

Non-interest Income: In addition to net interest income, non-interest income is a significant source of revenue for the Company and an important factor in its results of operations. Non-interest income is principally derived from financial services including trust and investment management activities, as well as service charges on deposit accounts, mortgage banking and servicing activities fees, credit and debit card service charges and processing fees, net securities gains, and a variety of other product and service fees.

For the year ended December 31, 2010, total non-interest income amounted to \$7.5 million, representing an increase of \$1.4 million or 23.8%, compared with 2009.

Trust and other financial services fees amounted to \$3.0 million in 2010, representing an increase of \$540 thousand, or 22.1%, compared with 2009. Reflecting additional new business and some recovery in the equity markets, at December 31, 2010 assets under management stood at \$314.2 million, up \$44.1 million or 16.3% compared with year-end 2009.

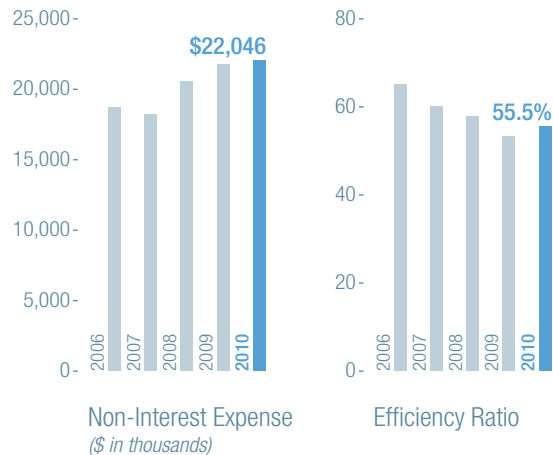

Total securities gains, net of other-than-temporary impairment losses, amounted to \$1.2 million in 2010, compared with \$67 thousand in 2009. Net 2010 securities gains were comprised of realized gains on the sale of securities amounting to \$2.1 million, offset in part by other-than-temporary impairment losses of \$898 thousand on certain available-for-sale, private label, residential mortgage-backed securities.

For the year ended December 31, 2010, credit and debit card service charges and fees amounted to \$1.2 million, up \$156 thousand or 15.5% compared with 2009. This increase was principally attributed to continued growth of the Bank's retail deposit base, higher levels of merchant credit card processing volumes, and continued success with a program that offers rewards for certain debit card transactions.

The foregoing increases in 2010 non-interest income were partially offset by a \$375 thousand, or 76.5%, decline in income from mortgage banking activities. During 2010 substantially all residential mortgage loan originations were held in the Bank's loan portfolio, whereas in 2009 a large portion of residential mortgage loan originations were sold into the secondary market with customer servicing retained.

Non-interest Expense: For the year ended December 31, 2010, total non-interest expense amounted to \$22.0 million, representing an increase of \$292 thousand, or 1.3%, compared with 2009. The increase in non-interest expense was principally attributed to salaries and employee benefits, which were up \$599 thousand or 5.2% compared with 2009. The increase in salaries and employee benefits was principally attributed to increases in employee health insurance premiums, normal increases in base salaries, as well as changes in staffing levels and mix. The foregoing increases were partially offset by \$402 thousand of employee health insurance credits attained during 2010, based on favorable claims experience.

FDIC deposit insurance assessments amounted to \$1.1 million in 2010, representing a decline of \$354 thousand, or 24.9%, compared with the same period in 2009. This decline was principally attributed to a \$495 thousand special FDIC assessment recorded in the second quarter of 2009, partially offset by increased deposit insurance premiums for all FDIC insured banks as a result of the FDIC's plan to reestablish the Deposit Insurance Fund to levels required by the Federal Deposit Reform Act of 2005.

Efficiency Ratio: The Company's efficiency ratio, or non-interest operating expenses divided by the sum of tax-equivalent net interest income and non-interest income other than net securities gains and other-than-temporary impairments, measures the relationship of operating expenses to revenues. Low efficiency ratios are typically a key factor for high performing financial institutions. For the year ended December 31, 2010, the Company's efficiency ratio amounted to 55.5%, which compared favorably to peer and industry averages.

Income Taxes: For the year ended December 31, 2010, total income taxes amounted to \$4.1 million, representing an increase of \$140 thousand, or 3.5%, compared with 2009. The Company's effective tax rate amounted to 27.9% in 2010, compared with 27.8% in 2009. Fluctuations in the Company's effective tax rate are generally attributed to increases in the level of non-taxable income in relation to taxable income.

Board of Directors

Our Board of Directors, our officers and all our team members are committed to a simple, defining principle: absolute appreciation and respect for the contributions of all stakeholders. At Bar Harbor Bankshares, there is no such thing as a small shareholder, a small customer or a team member with a small job.
