

THE TJX COMPANIES, INC. 2010 ANNUAL REPORT

Flexibility Leading
to Success

At TJX, we operate one of the most flexible business models in the world. Year after year, our great flexibility, particularly for a company of our size, has enabled us to succeed through various economic and business cycles.

We have delivered steady earnings growth and in our 34-year history, consolidated comparable store sales have declined in only one year. Our flexible store formats allow us to shift merchandise categories quickly as market trends and consumers' tastes change.

Rapid inventory turns allow us to buy close to need which leads to

better buying and more current fashion, and drives merchandise margins. Sourcing from a universe of

over 14,000 vendors provides us enormous flexibility. With our broad U.S. and international customer base, we believe we have one of the widest demographic audiences in retail. This Annual Report highlights the

variety of our store locations, including Manhattan, London, Miami, and Toronto. Further, our financial strength gives us the strong foundation

and flexibility to grow our business and simultaneously return value to shareholders. These elements of our flexibility, along with our focus on

the execution of our value confidence in our ability vision as a global off-price

mission, give us great to achieve our growth value Company.

To Our Fellow Shareholders:

We are very proud of our strong performance in 2010. We grew the top and bottom lines substantially over extraordinary growth in the prior year. We are even prouder of this Company's ability to deliver strong, consistent growth year after year, through strong and weak economies. This speaks to the tremendous flexibility of our off-price business model, and our ability to successfully capitalize on that flexibility.

In 2010, we ran our business with extremely low levels of inventories, which drove faster inventory turns and higher merchandise margins over large increases in the prior year, and we believe we can reduce our inventories even further. Our consolidated comparable store sales continued to be driven by customer traffic, as our great values are attracting new customers and retaining our loyal customer base. Offering great values on great brands and fashions is our mission and we focus every day on the best ways of delivering that value. Our cost-reduction initiatives helped fuel profitability in 2010, and we remain vigilant on controlling costs. We are convinced that we have further opportunities to improve in all of these areas, which gives us great confidence that our strong top- and bottom-line performance will continue in 2011 and

Our flexibility allows us to operate stores in a wide variety of locations and capitalize on great real estate opportunities, as we have in New York City. In many locations around the U.S., Marshalls and T.J. Maxx can be located in close proximity.

beyond. Further, we believe the actions that we took in 2010 to focus on fewer, larger businesses position us even more strongly to achieve our long-term growth goals.

In 2010, net sales reached \$21.9 billion, up 8% over the prior year. Consolidated comparable store sales grew 4% over last year's strong 6% increase. Income from continuing operations rose to \$1.3 billion. Adjusted diluted earnings per share from continuing operations were \$3.49, up 23% over the prior year's significant double-digit increase.¹ The year 2010 marks the 15th consecutive year of earnings per share growth on a continuing operations basis. Overall, we grew total square footage by 4% and netted a total of 116 stores to end the fiscal year with 2,859 stores.

Value: Top-of-Mind for Consumers

Our customer traffic was up throughout 2010 over huge increases in the prior year, and continued to increase as we entered 2011. This indicates to us that value continues to be a top priority for consumers, regardless of the strength of the economy. We offer consumers great values,

which for us, is the combination of great fashions, brands, quality, and price. We strongly believe that our amazing values are why our loyal customers will continue to choose our stores and new customers will turn to TJX brands. In fact, our customer research tells us that we have significantly increased our U.S. market share and continue to widen our demographic reach. In 2010, our research showed that 37% of U.S. adults had shopped our stores within the last year versus 25% in 2009, and even more importantly, that the new customers we gained in 2010 intend to continue shopping our stores. Yet, significant opportunity for gaining more new customers remains, as there are tens of millions of untapped shoppers in the U.S. alone.

Strengthened Marketing + Upgraded Stores = New Customers

In 2010, our investments to drive customer traffic and retain new customers paid dividends. Our strengthened marketing campaigns and increased advertising on U.S. network television in 2010 worked

very well, as did our test of a triple-branding campaign for T.J. Maxx, Marshalls and HomeGoods. In 2011, our marketing will reach out even more aggressively to consumers who have not yet shopped our stores, emphasizing that we are a source for current fashions at great values. Our initiatives to enhance the customer shopping experience are helping retain the new customers whom we are attracting through our effective marketing. In 2010, we saw sales lift in the 700 Marmaxx stores that we opened or remodeled in our new store prototype over the last two years. In 2011, we will continue our substantial store upgrade program to drive sales across all TJX banners.

Powerful Global Sourcing

We source merchandise in over 60 countries and view ourselves as a “sourcing machine.” Our vast vendor universe and global buying presence, which we continue to expand, afford us enormous flexibility in sourcing and are important factors giving us confidence in always having product availability. In 2010, we continued to open new vendor doors, growing our vendor universe to over 14,000 and gaining even

Now with several locations in the heart of London, we are one of the few U.S. retailers to have expanded profitably internationally. Europe continues to hold great growth potential for us as we are its only major off-price retailer.

greater flexibility in sourcing. Unlike traditional retailers which typically order merchandise far in advance of when it is needed on the selling floor, our merchant organization of over 700 people constantly covers the marketplace, buying great brands close to need and into current fashion and pricing trends. Opportunistic buying is core to our flexibility and allows us to offer customers better brands, more excitement and continuous freshness. Our store formats are very flexible, with no walls between departments, which enables us to shift merchandise categories to capitalize on the best buying opportunities and respond quickly to consumers' changing tastes.

Lean inventory management is fundamental to our opportunistic buying because it affords us the flexibility to buy close to need and make better purchase decisions. Our distribution network and inventory planning infrastructure support this flexibility and are highly efficient, allowing us to tailor our

merchandise mix for particular regions and customer preferences. As effective as we are in this area, we believe we have substantial room for improvement to run *even* faster and leaner, which is a major factor in our confidence in sustaining our top- and bottom-line strength. Over the next few years, we plan to continue our investments to become even more precise in getting the right goods to the right stores at the right time.

Running with Even Leaner Inventories

In the last two years, we have made significant improvements in our supply chain, which has enabled us to run our business with extremely low levels of inventories. As we run even leaner, we turn inventories even faster and drive more excitement to our stores, which has reduced markdowns and led to sequential improvement in our merchandise margins.

As we entered 2011, there was considerable discussion in the retail industry about the sourcing and pricing environment. Historically, disruptions in the marketplace have benefited our business because they have created favorable off-price buying opportunities. With our very liquid inventory position, we can respond quickly to market trends. If other retailers

respond to rising costs by raising their retail prices, then our pricing umbrella rises, generally presenting us the opportunity to raise our retail prices and drive merchandise margins, while maintaining our value gap with traditional retailers. If other retailers do not pass their costs on to consumers, we can use our flexibility to buy close to need, at the right price, which allows us to remain under the pricing umbrella while sustaining merchandise margins. Whichever direction prices go, our flexibility allows us to make adjustments faster than almost any other retailer, a positive for our business in any retail environment.

Continuing with Cost Control

At TJX, being a low cost operator allows us to offer customers great values while maintaining strong profitability. Our new stores require relatively low cash investments and are typically profitable within their first year of operation. While we have enhanced our marketing campaigns, our advertising expenses as a percentage of sales remain very low compared to traditional retailers. With our ongoing focus on cost control, we have achieved leverage on selling, general and administrative expenses overall over the last five years, despite

Whether here in Miami or in a cold climate, we tailor our merchandise mix for various climates, regions, and customer preferences. We believe we can become even more precise in flowing the right product to the right stores at the right time.

our facing the same rising healthcare and other costs as other companies. In 2010, we exceeded our plan to reduce costs, and in 2011, are planning cost reductions in the \$50-\$75 million range. Our continued cost-reduction initiatives are one of the reasons for our confidence in the sustainability of our profit margins in the short and long term.

A Focused Portfolio of Businesses

Our Company is comprised of a focused portfolio of four large divisions, with all of our retail chains running on the same off-price business platform. The synergies across our brands allow us the flexibility to share best practices, information, ideas and talent across divisions. Our ability to operate our stores in a wide variety of locations gives us the flexibility to capitalize on advantageous real estate opportunities.

In 2011, we are leveraging our flexible business portfolio to convert 90 of the former A.J. Wright stores into the more profitable T.J. Maxx, Marshalls and HomeGoods banners, as part of the A.J. Wright consolidation that we

announced toward the end of 2010. Although any decision that impacts so many Associates is an extremely difficult one, we are certain that this was the right decision for TJX as a whole. This move enables us to focus our managerial and financial resources on fewer, larger businesses with higher financial returns.

Four Strong Growth Vehicles

With over 2,700 stores today, we see the potential to grow our business to over 4,300 stores long term with our current portfolio of brands in our current markets. In 2011, we expect to grow square footage by 4% and net 115 stores.² This is slightly less than our original plans for

2011, as we are slowing the pace of growth at TJX Europe this year. At the same time, we are accelerating growth at Marmaxx, HomeGoods, and TJX Canada in 2011, which have all been performing strongly.

Marmaxx delivered another outstanding year in 2010, with comparable store sales up 4% over the prior year's exceptional

7% increase and segment profit up 18% over record results last year. In addition to Marmaxx's continued strong performance, T.J. Maxx and Marshalls have been very successful in more moderate-income markets, which gives us confidence in increasing our expectation for Marmaxx's long-term store growth potential to 2,300-2,400 stores. This represents 300-400 more stores than we originally envisioned, considering our ability to grow T.J. Maxx and Marshalls in what would have been A.J. Wright markets.

HomeGoods achieved excellent results in 2010, driving strong sales and profit increases over record results in the prior year. This division has improved its merchandise mix and value equation and has seen customer traffic increase as a result. With HomeGoods' consistent performance, we also see opportunities to expand this store chain beyond our previous thinking. We now believe that we can nearly double the size of HomeGoods over time to at least 600 stores.

TJX Canada had terrific performance in 2010, which bodes well for our launch of Marshalls in Canada, where we opened

From Toronto to the western and Atlantic provinces, we have operated in Canada very successfully since 1990. We are excited to bring the Marshalls brand to Canada in 2011 and believe that we can grow Marshalls to a chain of 90-100 stores there over time.

our first three stores to terrific customer response in March 2011. We have achieved our highest returns in Canada, so we are thrilled to bring another growth vehicle to that country. This is another example of our emphasis on international expansion, and long term, we see the potential to grow to 420-430 stores in Canada.

with opportunities and we believe we have the potential to grow to 750-875 stores in our existing markets.

Financial Strength and Flexibility

Results at **TJX Europe** were disappointing in 2010. We believe that opening 54 stores in 2010, although right for the business long term, pressured the organization, causing us to lose some of our focus on our off-price fundamentals. We believe that slowing growth this year will give our team time to refocus on our value equation of great fashions, brands, quality, and price. We are also strengthening our European organization and leveraging the knowledge of seasoned TJX veterans from across the Company. TJX Europe had been on a very successful 15-year trajectory, and we are convinced that it will get back onto its very solid track this year. We remain as confident as ever in our long-term outlook in Europe, where the competitive landscape is rich

and give us great confidence in our ability to navigate various economic and retail environments. Our “A” Standard & Poor’s credit rating is one of the strongest in retail, which is important to our vendors, landlords and other business associates. Our strong operations and low cost model enable us to deliver superior financial returns that are among the highest in retail. In 2010, we generated \$2.0 billion in cash from operations and our after-tax return on invested capital reached approximately 20%. We deploy this cash with a careful balance between maintaining our financial flexibility while simultaneously reinvesting in our businesses and distributing excess cash to shareholders. In 2010, we spent a total of \$1.2 billion to

repurchase TJX stock, which was more than we originally planned, retiring 27.6 million shares, and increased the per-share dividend 25%.

In 2011, we will continue our balanced approach to managing cash. We are increasing capital spending to \$800-\$825 million to support continued growth and improvement in our stores and investments in our supply chain and infrastructure. Simultaneously, we plan to continue our significant share buyback program, with \$1.2 billion of repurchases planned for 2011. Further, we increased the per-share dividend by 27% again in April 2011, which represents the 15th consecutive year of dividend increases. These actions underscore our confidence in our ability to continue to deliver significant increases in sales, earnings, and cash flow, and to generate superior financial returns.

Strengthening Our Organization

We have taken important steps to strengthen our organization which we believe provides continuity of strong leadership and further supports our goals of growing TJX successfully over the coming years. Ernie Herrman, a TJX veteran with many years of merchandising and executive leadership, has taken on a bigger role with the Company as TJX President. We are proud of our outstanding management team which together, has many decades of TJX experience and has led this Company through good as well as difficult economic times, delivering strong financial performance and growth.

In Closing

Our strong 2010 performance demonstrates the power and flexibility of our off-price business model to deliver steady, year-over-year growth in both recessionary and recovery periods. We have great opportunities in 2011 and beyond and are convinced that our strong sales and profits are sustainable. We believe that value is more important than ever in consumers' minds. Our vast sourcing universe affords us enormous flexibility to react quickly to market trends and consumer preferences and capitalize on buying opportunities. We remain focused on reducing inventory levels to drive the top and bottom lines, as well as improving our supply chain and controlling costs. With our "no walls" approach to sharing information, we are convinced that we will advance all of these aspects of our business to succeed. We are offering

consumers great fashions, brands, quality, and price, which is why we believe we will continue to be a *Retailer of Choice*, capable of growing to twice our size today!

OUR GRATITUDE

We would like to gratefully acknowledge the dedicated service of Robert Shapiro, who stepped down as a member of our Board of Directors since our last letter. A Director since 1974, Bob made significant contributions to the success of our Company in his several decades of service. We wish Bob and his family the best for future success and good health.

We know that without the hard work and dedication of our 166,000 Associates, our success would not be possible, and we thank them for it. Our customers are also to be deeply thanked for their patronage. We also thank our vendors and other business associates. Last, but not least, we very much appreciate the support of our fellow shareholders.

Respectfully,

A handwritten signature in black ink that reads "Bernard Cammarata".

Chief Executive Officer

¹ On a U.S. GAAP basis, diluted earnings per share from continuing operations in fiscal 2011 increased 16% to \$3.30. Fiscal 2011 adjusted earnings per share exclude the \$.02 per share benefit from a reduction in the Company's provision related to the previously announced computer intrusion(s) and a \$.21 per share negative impact from the previously announced A.J. Wright consolidation and store closings.

² Excludes A.J. Wright store closings and consolidations.

always about
TJX.A.L.U.E.

In last year's Annual Report, we introduced our newly named corporate social responsibility (CSR) program, V.A.L.U.E., and in the spring of 2010, greatly enhanced the CSR section of our corporate website. While our core values remain constant and our dedication to the goals of CSR is unchanged, our work and progress in each area are ongoing. This year, we will be issuing a CSR report which will be posted to our website. We have highlighted below only some of the many examples of our progress in the past year and invite you to visit the CSR section of our website, www.tjx.com, or read our full CSR report.

V. Our **VENDOR SOCIAL COMPLIANCE** program is based on our commitment to uphold the highest standards of business ethics. We require our vendors to comply with our standards set out in our Vendor Code of Conduct. In 2010, we conducted 10 training sessions for our buying agents, vendors and factory management so that they understand the Vendor Code of Conduct and our commitment to achieving our high standards.

A. **ATTENTION TO GOVERNANCE** has played a central role in TJX's focus on corporate responsibility for more than three decades. Our high standards of ethics are reflected in our Director Code of Business Conduct and Ethics, Code of Ethics for TJX Executives, and Associate Code of Conduct. In 2010, we continued to meet with our shareholders, including socially conscious investors to discuss areas of interest to them, including our corporate social responsibility program.

L. **LEVERAGING DIFFERENCES** among our customers and vendors, our Associates and within the communities we serve is an important part of our being a *Company of Choice*. We embrace global diversity and inclusion as seriously as any business imperative. In 2010, we formed a new Associate Resource Group, LEAD, for the Leadership, Education and Adaptation for Disabilities.

U. Being **UNITED WITH OUR COMMUNITIES** in the U.S., Canada and Europe is central to our role as a *Neighbor of Choice*. We unite with our communities through many programs, including Corporate Partnerships, Workforce Initiatives, and Associate volunteerism. In 2010, The TJX Foundation funded over 1,300 non-profit organizations and TJX Europe continued its Pan-European initiative supporting Save the Children and Comic Relief, an organization committed to helping people suffering from poverty or social injustice in the U.K. and Africa.

E. **ENVIRONMENTAL INITIATIVES** have long been important to TJX because they are smart for our Company and benefit the environment. We continue to find innovative and cost effective ways to reduce carbon emissions, minimize waste and conserve natural resources in our operations. In 2010, we created a management position specifically to coordinate our environmental sustainability efforts on a global basis. Further, our first time participation in the Carbon Disclosure Project in 2010 earned us a prominent position in The Carbon Disclosure Leadership Index.

TJX Stock Performance

Five-Year Cumulative Performance of TJX Stock Compared with the S&P 500 Index and the DJ Apparel Index

The line graph above compares the cumulative performance of TJX's common stock with the S&P Composite-500 Stock Index and the Dow Jones Apparel Retailers Index as of the date nearest the end of TJX's fiscal year for which index data is readily available for each year in the five-year period ended January 29, 2011. The graph assumes that \$100 was invested on January 28, 2006, in each of TJX's common stock, the S&P Composite-500 Stock Index and the Dow Jones Apparel Retailers Index and that all dividends were reinvested.

Cautionary Note Regarding Forward-Looking Statements

This Form 10-K and our 2010 Annual Report to Shareholders contain “forward-looking statements” intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995, including some of the statements in this Form 10-K under Item 1, “Business,” Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and Item 8, “Financial Statements and Supplementary Data,” and in our 2010 Annual Report to Shareholders under “Letter to Shareholders” and “Financial Graphs.” Forward-looking statements are inherently subject to risks, uncertainties and potentially inaccurate assumptions. Such statements give our current expectations or forecasts of future events; they do not relate strictly to historical or current facts. We have generally identified such statements by using words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “forecast,” “intend,” “looking forward,” “may,” “plan,” “potential,” “project,” “should,” “target,” “will” and “would” or any variations of these words or other words with similar meanings. All statements that address activities, events or developments that we intend, expect or believe may occur in the future are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended, or Exchange Act. These “forward looking statements” may relate to such matters as our future actions, future performance or results of current and anticipated sales, expenses, interest rates, foreign exchange rates and results and the outcome of contingencies such as legal proceedings.

We cannot guarantee that the results and other expectations expressed, anticipated or implied in any forward-looking statement will be realized. The risks set forth under Item 1A of this Form 10-K describe major risks to our business. A variety of factors including these risks could cause our actual results and other expectations to differ materially from the anticipated results or other expectations expressed, anticipated or implied in our forward-looking statements. Should known or unknown risks materialize, or should our underlying assumptions prove inaccurate, actual results could differ materially from past results and those anticipated, estimated or projected in the forward-looking statements. You should bear this in mind as you consider forward-looking statements.

Our forward-looking statements speak only as of the dates on which they are made, and we do not undertake any obligation to update any forward-looking statement, whether to reflect new information, future events or otherwise. You are advised, however, to consult any further disclosures we may make in our future reports to the Securities and Exchange Commission (“SEC”), on our website, or otherwise.

PART I

ITEM 1. BUSINESS

BUSINESS OVERVIEW

The TJX Companies, Inc. (TJX) is the leading off-price apparel and home fashions retailer in the United States and worldwide. Our over 2,700 stores offer a rapidly changing assortment of quality, brand-name and designer merchandise at prices generally 20% to 60% below department and specialty store regular prices, every day.

Retail Concepts: We operate multiple off-price retail chains in the U.S., Canada and Europe which are known for their treasure hunt shopping experience and excellent values on fashionable, brand-name merchandise. Our stores turn their inventories rapidly relative to traditional retailers to create a sense of urgency and excitement for our customers which encourages frequent customer visits. With our flexible “no walls” business model, we can quickly expand and contract merchandise categories in response to consumers’ changing tastes. Although our stores primarily target the middle to upper middle income customer, we reach a broad range of customers across many demographic groups and income levels with the values we offer. The operating platforms and strategies of all of our retail concepts are synergistic. As a result, we capitalize on our expertise and systems throughout our business, leveraging information, best practices, initiatives and new ideas, and developing talent across our concepts. We also leverage the substantial buying power of our businesses in our global relationships with vendors.

In the United States:

- **T.J. MAXX and MARSHALLS:** T.J. Maxx and Marshalls (referred to together in the U.S. as Marmaxx) are the largest off-price retailers in the United States with a total of 1,753 stores. We founded T.J. Maxx in 1976 and acquired Marshalls in 1995. Both chains sell family apparel (including footwear and accessories), home fashions (including home basics, accent furniture, lamps, rugs, wall décor, decorative accessories and giftware) and other merchandise. We differentiate T.J. Maxx and Marshalls through different product assortment (including an expanded assortment of fine jewelry and accessories and a designer section called The Runway at T.J. Maxx and a full line of footwear, a broader men’s offering and a juniors’ department called The Cube at Marshalls), in-store initiatives, marketing and store appearance. This differentiated shopping experience at T.J. Maxx and Marshalls encourages our customers to shop both chains.
- **HOMEGOODS:** HomeGoods, introduced in 1992, is the leading off-price retailer of home fashions in the U.S. Through 336 stores, it sells a broad array of home basics, giftware, accent furniture, lamps, rugs, wall décor, decorative accessories, children’s furniture, seasonal merchandise and other merchandise.

In Canada:

- **WINNERS:** Acquired in 1990, Winners is the leading off-price apparel and home fashions retailer in Canada. The merchandise offering at its 215 stores across Canada is comparable to T.J. Maxx and Marshalls. In 2008, Winners opened 3 StyleSense stores, a concept that offers family footwear and accessories.
- **MARSHALLS:** In March 2011, we brought the Marshalls chain to Canada, with six stores planned to open in Canada during Fiscal 2012.
- **HOMESENSE:** HomeSense introduced the home fashions off-price concept to Canada in 2001. The chain has 82 stores with a merchandise mix of home fashions similar to HomeGoods.

In Europe:

- **T.K. MAXX:** Launched in 1994, T.K. Maxx introduced off-price to Europe and remains Europe’s only major off-price retailer of apparel and home fashions. With 307 stores, T.K. Maxx operates in the U.K. and Ireland as well as Germany, to which it expanded in 2007, and Poland, to which it expanded in 2009. Through its stores and online website, T.K. Maxx offers a merchandise mix similar to T.J. Maxx, Marshalls and Winners.
- **HOMESENSE:** HomeSense introduced the home fashions off-price concept to the U.K. in 2008 and its 24 stores offer a merchandise mix of home fashions in the U.K. similar to that of HomeGoods in the U.S. and HomeSense in Canada.

A.J. Wright Consolidation: In the fourth quarter of fiscal 2011, we announced our decision to consolidate A.J. Wright, an off-price retailer of family apparel and home fashions primarily targeting the lower middle income customer, by converting 90 of its stores to T.J. Maxx, Marshalls or HomeGoods banners and by closing the remaining 72 stores, two distribution centers and home office. We have increasingly improved our ability to reach the A.J. Wright customer demographic through our T.J. Maxx and Marshalls stores and have seen these stores perform well in markets with these demographics. Consolidating the A.J. Wright chain is expected to allow us to serve this customer demographic more efficiently, focus our financial and managerial resources on fewer, larger businesses with higher returns and enhance the growth prospects for the Company overall. For more detail on the A.J. Wright consolidation, see Note C to the consolidated financial statements.

Flexible Business Model: Our off-price business model is flexible, particularly for a company of our size, allowing us to react to market trends. Our opportunistic buying and inventory management strategies give us flexibility to adjust our merchandise assortments more frequently than traditional retailers, and the design and operation of our stores and distribution centers support this flexibility. By maintaining a liquid inventory position, our merchants can buy close to need, enabling them to buy into current market trends and take advantage of opportunities in the marketplace. Buying close to need gives us insight into consumer and fashion trends and current pricing at the time we make our purchases, helping us “buy smarter” and reduce our markdown exposure. Our selling floor space is flexible, without walls between departments and largely free of permanent fixtures, so we can easily expand and contract departments in response to customer demand, as well as market and fashion trends. Our distribution facilities are designed to accommodate our methods of receiving and shipping broadly ranging quantities of product to our large store base quickly and efficiently.

Opportunistic Buying: We are differentiated from traditional retailers by our opportunistic buying of quality, fashionable, brand name merchandise, which permits us to buy into current trends and pricing. We purchase the majority of our apparel inventory and a significant portion of our home fashion inventory opportunistically. Virtually all of our opportunistic purchases are made at discounts from initial wholesale prices. Our merchant organization numbers over 700, and we operate 12 buying offices in nine countries. In contrast to traditional retailers, which typically order goods far in advance of the time the product appears on the selling floor, our merchants are in the marketplace virtually every week. They buy primarily for the current selling season, and to a limited extent, for a future selling season. Buying later in the inventory cycle than traditional retailers and using the flexibility of our stores to shift in and out of categories, we are able to take advantage of opportunities to acquire merchandise at substantial discounts that regularly arise from the routine flow of inventory in the highly fragmented apparel and home fashions marketplace, such as order cancellations, manufacturer overruns and special production. We operate with lean inventory levels compared to conventional retailers to give ourselves the flexibility to take advantage of these opportunities.

We buy most of our inventory directly from manufacturers, with some coming from retailers and other sources. A small percentage of the merchandise we sell is private label merchandise produced for us by third parties. Our expansive vendor universe, which is in excess of 14,000, provides us substantial and diversified access to merchandise. We have not historically experienced difficulty in obtaining adequate amounts of quality inventory for our business in either favorable or difficult retail environments and believe that we will continue to have adequate inventory as we continue to grow.

We believe a number of factors make us an attractive outlet for the vendor community and provide us excellent access on an ongoing basis to leading branded merchandise. We are typically willing to purchase less-than-full assortments of items, styles and sizes and quantities ranging from small to very large; we are able to disperse inventory across our geographically diverse network of stores; we pay promptly; and we generally do not ask for typical retail concessions (such as advertising, promotional and markdown allowances), delivery concessions (such as drop shipments to stores or delayed deliveries) or return privileges. Importantly, we provide vendors an outlet with financial strength and an excellent credit rating.

Inventory Management: We offer our customers a rapidly changing selection of merchandise to create a “treasure hunt” experience in our stores and spur customer visits. To achieve this, we seek to turn the inventory in our stores rapidly, regularly offering fresh selections of apparel and home fashions at excellent values. Our specialized inventory planning, purchasing, monitoring and markdown systems, coupled with distribution center storage, processing, handling and shipping systems, enable us to tailor the merchandise in our stores to local preferences and demographics, achieve rapid in-store inventory turnover on a vast array of products and sell substantially all merchandise within targeted selling periods. We make pricing and markdown decisions and store inventory replenishment determinations centrally, using

information provided by specialized computer systems, designed to move inventory through our stores in a timely and disciplined manner. We do not generally engage in promotional pricing activity such as sales or coupons. Over the past several years, we have improved our supply chain, allowing us to reduce inventory levels and ship more efficiently and quickly. We plan to continue to invest in our supply chain with the goal of more precisely and effectively allocating the right merchandise to each store and delivering it quicker and more efficiently.

Pricing: Our mission is to offer retail prices in our stores generally 20% to 60% below department and specialty store regular retail prices. Through our opportunistic purchasing, we are generally able to react to price fluctuations in the wholesale market to maintain this pricing. For example, in a time of rising inventory prices, if conventional retailers increase retail prices to preserve merchandise margin, we typically are able to increase our retail prices correspondingly, while maintaining our value relative to conventional retailers and preserve our own merchandise margin. If conventional retailers do not raise prices to pass rising inventory costs on to consumers, we seek to buy inventory at prices that permit us to maintain our values relative to conventional retailers and sustain our merchandise margins.

Low Cost Operations: We operate with a low cost structure compared to many traditional retailers. We focus aggressively on expenses throughout our business. Although we have enhanced our advertising over the past several years to attract new customers to our stores, our advertising budget as a percentage of sales remains low compared to traditional retailers. We design our stores, generally located in community shopping centers, to provide a pleasant, convenient shopping environment but, relative to other retailers, do not spend heavily on store fixtures. Additionally, our distribution network is designed to run cost effectively. We continue to pursue cost savings in our operations.

Customer Service: While we offer a self-service format, we train our store associates to provide friendly and helpful customer service and seek to staff our stores to deliver a positive shopping experience. We typically offer customer-friendly return policies. We accept a variety of payment methods including cash, credit cards and debit cards. In the U.S., we offer a co-branded TJX credit card and a private label credit card, both through a bank, but do not own the customer receivables related to either program. We are engaged in a store upgrade program across our banners, designed to enhance the customer shopping experience and drive sales.

Distribution: We operate distribution centers encompassing approximately 10 million square feet in four countries, which are large, highly automated and built to suit our specific, off-price business model. We ship substantially all of our merchandise to our stores through these distribution centers as well as warehouses and shipping centers operated by third parties. We shipped approximately 1.8 billion units to our stores during fiscal 2011.

Store Growth: Expansion of our business through the addition of new stores is an important part of our strategy for TJX as a global, off-price, value Company. The following table provides information on the growth and potential growth of each of our current chains in their current geographies:

	Approximate Average Store Size (square feet)	Number of Stores at Year End ⁽¹⁾			Estimated Ultimate Number of Stores
		Fiscal 2010	Fiscal 2011	Fiscal 2012 (estimated)	
In the United States:					
T.J. Maxx	30,000	890	923		
Marshalls	32,000	813	830		
Marmaxx		1,703	1,753	1,869	2,300-2,400
HomeGoods	25,000	323	336	374	600
In Canada:					
Winners	29,000	211	215	220	240
HomeSense	24,000	79	82	86	90
Marshalls	33,000	—	—	6	90-100
In Europe:					
T.K. Maxx	32,000	263	307	334	650-725*
HomeSense	21,000	14	24	24	100-150**
		2,593	2,717	2,913	4,070-4,305

(1) The number of stores at fiscal year end in the above table does not include A.J. Wright stores, which were 150 for fiscal 2010 and 142 for fiscal 2011. The conversion of 90 A.J. Wright stores, of which 9 are relocations of existing T.J. Maxx and Marshalls' stores, is included in the Fiscal 2012 (estimated) count for Marmaxx and HomeGoods.

* U.K., Ireland, Germany and Poland only

** U.K. and Ireland only

Included in the Marshalls store counts above are free-standing Marshalls Shoe Shop stores, which sell family footwear and accessories (six stores at fiscal 2011 year end). Included in the Winners store counts above are StyleSense stores in Canada, which sell family footwear and accessories (three stores at fiscal 2011 year end). Some of our HomeGoods and Canadian HomeSense stores are co-located with one of our apparel stores in a superstore format. We count each of the stores in the superstore format as a separate store.

Revenue Information: The percentages of our consolidated revenues by geography for the last three fiscal years are as follows:

	<u>Fiscal 2009</u>	<u>Fiscal 2010</u>	<u>Fiscal 2011</u>
United States	77%	78%	77%
Northeast	26%	26%	26%
Midwest	13%	13%	14%
South (including Puerto Rico)	25%	26%	24%
West	13%	13%	13%
Canada	11%	11%	12%
Europe	12%	11%	11%
Total	100%	100%	100%

The percentages of our consolidated revenues by major product category for the last three fiscal years are as follows:

	<u>Fiscal 2009</u>	<u>Fiscal 2010</u>	<u>Fiscal 2011</u>
Clothing including footwear	62%	61%	61%
Home fashions	25%	26%	26%
Jewelry and accessories	13%	13%	13%
Total	100%	100%	100%

Segment Overview: As of January 29, 2011, we operated five business segments: three in the U.S. and one in each of Canada and Europe. Each of our segments has its own administrative, buying and merchandising organization and distribution network. Of the U.S. based chains, T.J. Maxx and Marshalls, referred to as Marmaxx, are managed together and reported as a single segment and HomeGoods and A.J. Wright each is reported as a separate segment. As a result of the consolidation of A.J. Wright, it will cease to be a separate segment during fiscal 2012. Outside the U.S., chains in Canada (Winners, HomeSense and StyleSense) are under common management and reported as the TJX Canada segment, and chains in Europe (T.K. Maxx and HomeSense) are under common management and reported as the TJX Europe segment. More detailed information about our segments, including financial information for each of the last three fiscal years, can be found in Note H to the consolidated financial statements.

STORE LOCATIONS

Our current chains operated stores in the following locations as of January 29, 2011:

Stores located in the United States:

	T.J. Maxx	Marshalls	HomeGoods
Alabama	20	4	2
Arizona	11	14	6
Arkansas	10	–	1
California	84	116	35

Nova Scotia	8	2
Ontario	101	38
Prince Edward Island	1	–
Quebec	39	12
Saskatchewan	3	2
Total Stores	215	82

Store counts above include the Winners or HomeSense portion of a superstore.

Stores Located in Europe:

	T.K. Maxx	HomeSense
United Kingdom	237	24
Republic of Ireland	16	–
Germany	47	–
Poland	7	–
Total Stores	307	24

Competition: The retail apparel and home fashion business is highly competitive. We compete on the basis of fashion, quality, price, value, merchandise selection and freshness, brand name recognition, service, reputation and store location. We compete with local, regional, national and international department, specialty, off-price, discount, warehouse and outlet stores as well as other retailers that sell apparel, home fashions and other merchandise that we sell, whether in stores, through catalogues or other media or over the internet.

Employees: At January 29, 2011, we had approximately 166,000 employees, many of whom work less than 40 hours per week. In addition, we hire temporary employees, particularly during the peak back-to-school and holiday seasons.

Trademarks: We have the right to use our principal trademarks and service marks, which are T.J. Maxx, Marshalls, HomeGoods, Winners, HomeSense and T.K. Maxx, in relevant countries. Our rights in these trademarks and service marks endure for as long as they are used.

Seasonality: Our business is subject to seasonal influences. In the second half of the year, which includes the back-to-school and holiday seasons, we generally realize higher levels of sales and income.

SEC Filings and Certifications: Copies of our annual reports on Form 10-K, proxy statements, quarterly reports on Form 10-Q and current reports on Form 8-K filed with, or furnished to, the SEC, and any amendments to those documents, are available free of charge on our website, www.tjx.com, under “SEC Filings,” as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. They are also available free of charge from TJX Investor Relations, 770 Cochituate Road, Framingham, Massachusetts 01701. The public can read and copy materials at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC 20549, 1-800-SEC-0330. The SEC maintains a website containing all reports, proxies, information statements, and all other information regarding issuers that file electronically (<http://www.sec.gov>).

Information appearing on www.tjx.com is not a part of, and is not incorporated by reference in, this Form 10-K.

Unless otherwise indicated, all store information in this Item 1 is as of January 29, 2011, and references to store square footage are to gross square feet. Fiscal 2009 means the fiscal year ended January 31, 2009, fiscal 2010 means

the fiscal year ended January 30, 2010, fiscal 2011 means the fiscal year ended January 29, 2011 and fiscal 2012 means the fiscal year ending January 28, 2012.

Unless otherwise stated or the context otherwise requires, references in this Form 10-K to “TJX,” “we,” “us” and “our” refer to The TJX Companies, Inc. and its subsidiaries.

ITEM 1A. RISK FACTORS

The statements in this section describe the major risks to our business and should be considered carefully, in connection with all of the other information set forth in this annual report on Form 10-K. The risks that follow, individually or in the aggregate, are those that we think could cause our actual results to differ materially from those stated or implied in forward-looking statements.

Global economic conditions may adversely affect our financial performance.

During the recent economic recession, global financial markets experienced extreme volatility, disruption and credit contraction. The volatility and disruption to the capital markets significantly adversely affected global economic conditions, resulting in additional significant recessionary pressures and declines in employment levels, disposable income and actual and perceived wealth. Although there have been some recent improvements, continuing or worsened adverse economic conditions, including higher unemployment, energy and health care costs, interest rates and taxes and tighter credit, could continue to affect consumer confidence and discretionary consumer spending adversely and may adversely affect our sales, cash flows and results of operations. Additionally, renewed financial turmoil in the financial and credit markets could adversely affect our costs of capital and the sources of liquidity available to us and could increase our pension funding requirements.

Fluctuations in foreign currency exchange rates may lead to lower revenues and earnings.

In addition to our U.S. businesses, we operate stores in Canada and Europe and plan to continue to expand our international operations. Sales made by our stores outside the United States are denominated in the currency of the country in which the store is located, and changes in foreign exchange rates affect the translation of the sales and earnings of these businesses into U.S. dollars for financial reporting purposes. Because of this, movements in exchange rates have had and are expected to continue to have a significant impact on our net sales and earnings.

Additionally, we routinely enter into inventory-related hedging instruments to mitigate the impact of foreign currency exchange rates on merchandise margins of merchandise purchased by our international segments that is denominated in currencies other than their local currencies. In accordance with U.S. GAAP, we evaluate the fair value of these hedging instruments and make mark-to-market adjustments at the end of an accounting period. These adjustments are of a much greater magnitude when there is significant volatility in currency exchange rates and may have a significant impact on our earnings.

Changes in foreign currency exchange rates can also increase the cost of inventory purchases by our businesses that are denominated in a currency other than the local currency of the business. When these changes occur suddenly, it can be difficult for us to adjust retail prices accordingly, and gross margin can be adversely affected. A significant amount of merchandise we offer for sale is made in China and accordingly, a revaluation of the Chinese currency, or increased market flexibility in the exchange rate for that currency, increasing its value relative to the U.S. dollar or currencies in which our stores are located could be particularly significant.

Although we implement foreign currency hedging and risk management strategies to reduce our exposure to fluctuations in earnings and cash flows associated with changes in foreign exchange rates, we expect that foreign currency fluctuations could have a material adverse effect on our net sales and results of operations. In addition, fluctuations in foreign currency exchange rates may have a greater impact on our earnings and operating results if a counterparty to one of our hedging arrangements fails to perform.

Failure to execute our opportunistic buying and inventory management could adversely affect our business.

We purchase the majority of our apparel inventory and much of our home inventory opportunistically with our buyers purchasing close to need. To drive traffic to the stores and to increase same store sales, the treasure hunt nature of the off-price buying experience is enhanced by rapid inventory turns and continued replenishment of fresh, high quality, attractively priced merchandise in our stores. While opportunistic buying provides our buyers the ability to buy at desirable times and prices, in the quantities we need and into market trends, it places considerable discretion in our buyers, subjecting us to risks on the appropriate pricing, quantity, nature and timing of inventory flowing to our stores. In addition, we base our purchases of inventory, in part, on sales forecasts. If our sales forecasts do not match customer demand, we may experience higher inventory levels and need to take markdowns on excess or slow-moving inventory, leading to decreased profit margins, or we

may have insufficient inventory to meet customer demand leading to lost sales, either of which could adversely affect our financial performance. Our pricing model requires that we purchase inventory sufficiently below conventional retail to maintain our pricing differential and margin, which we may not achieve at times. We must also properly execute our inventory management strategies through appropriately allocating merchandise among our stores, timely and efficiently distributing inventory to stores, maintaining an appropriate mix and level of inventory in stores, appropriately changing the allocation of floor space of stores among product categories to respond to customer demand and effectively managing pricing and markdowns. Our vendors and others in our supply chain are also subject to risks of labor issues, financial liquidity, weather and other natural disasters, economic, political and regulatory conditions and other matters that could affect our ability to receive and provide to our stores acceptable merchandise in adequate quantities on a timely basis. Failure to execute our opportunistic inventory buying and inventory management well could adversely affect our performance and our relationship with our customers.

Failure to continue to expand our operations successfully could adversely affect our financial results.

Our revenue growth is dependent, among other things, upon our ability to continue to expand successfully through successful new store openings as well as our ability to increase same store sales. Successful store growth requires acquisition and development of appropriate real estate including selection of store locations in appropriate geographies, availability of attractive stores or store sites in such locations and negotiation of acceptable terms. Competition for desirable sites, increases in real estate, construction and development costs and availability and costs of capital could limit our ability to open new stores in desirable locations in the future or adversely affect the economics of new stores. We may encounter difficulties in attracting customers in new markets for various reasons including decisions to open new banners, expansion into new geographies, customers' lack of familiarity with our brands or our lack of familiarity with local customer preferences and cultural differences. New stores may not achieve the same sales or profit levels as our existing stores, and new and existing stores in a market area may adversely affect each other's sales and profitability. Further, expansion places significant demands on the administrative, merchandising, store operations, distribution and other organizations in our businesses to manage rapid growth, and we may not do so successfully. As a result, we may need to reduce our rate of expansion or we may operate with decreased operational efficiency, and it may adversely affect our results.

Failure to successfully identify customer trends and preferences to meet customer demand could negatively impact our performance.

Because our success depends on our ability to meet customer demand, we take various steps to keep up with customer trends and preferences including contacts with vendors, monitoring product category and fashion trends and comparison shopping. Our flexible business model allows us to buy close to need and in response to consumer preferences and trends and to expand and contract merchandise categories in response to consumers' changing tastes. However, identifying consumer trends and preferences in the various geographies in which we do business and successfully meeting customer demand is challenging, and we may not successfully do so, which could adversely affect our results.

Our quarterly operating results can be subject to significant fluctuations and may fall short of either a prior quarter or investors' expectations.

Our operating results have fluctuated from quarter to quarter at points in the past, and they may continue to do so in the future. Our earnings may not continue to grow at rates we plan and may fall short of either a prior quarter or investors' expectations. If we fail to meet the expectations of securities analysts or investors, our share price may decline. Factors that could cause us not to meet our securities analysts' or investors' earnings expectations include some factors that are within our control, such as the execution of our off-price buying; selection, pricing and mix of merchandise; and inventory management including flow, markon and markdowns; and some factors that are not within our control, including actions of competitors, weather conditions, economic conditions, consumer confidence, seasonality, and cost increases due, among other things, to government regulation and increased healthcare costs. In addition, if we do not repurchase the number of shares we contemplate pursuant to our stock repurchase program, our earnings per share may be adversely affected. Most of our operating expenses, such as rent expense and associate salaries, do not vary directly with the amount of sales and are difficult to adjust in the short term. As a result, if sales in a particular quarter are below expectations for that quarter, we may not proportionately reduce operating expenses for that quarter, and therefore such a sales shortfall would have a disproportionate effect on our net income for the quarter. We maintain a forecasting process that seeks to project sales and align expenses. If we do not correctly forecast sales and control costs or appropriately adjust costs to actual results, our financial performance could be adversely affected.

Our future performance is dependent upon our ability to continue to expand within our existing markets and to extend our off-price model in new product lines, chains and geographic regions.

Our strategy is to continue to expand within existing markets, to expand to new markets and geographies and to attract new customers in existing and new markets across demographics. This growth strategy includes developing new ways to sell more or different categories of merchandise within our existing stores, continued expansion of our existing chains in our existing markets and countries, expansion of these chains to new markets and countries, development and opening of new chains or potential expansion of e-commerce, all of which entail significant risk. Our growth is dependent upon our ability to successfully extend our business in these ways. If any of our expansion vehicles does not achieve the success we expect in whole or in part, we may be required to increase our investment or close stores or operations. Unsuccessful extension of our model could adversely affect growth and financial performance.

If we fail to successfully implement our marketing, advertising and promotional programs, or if our competitors are more effective with their programs than we are, our revenue may be adversely affected.

We use marketing, advertising and promotional programs to attract customers to our stores. We use various media for these programs, including print, television, social media, database marketing and direct marketing. Some of our competitors may have substantially larger expenditures for their programs, which may provide them with a competitive advantage. There can be no assurance that we will be able to continue to execute our marketing, advertising and promotional programs effectively, and any failure to do so could have a material adverse effect on our revenue and results of operations. Information posted about us and our merchandise on social media platforms and similar venues, including blogs, social media websites, and other forums for Internet-based communications that allow individuals access to a broad audience of consumers and other interested persons, may be inaccurate or may harm our brand, which could have a material effect on our revenue and results of operations.

Compromises of our data security could materially harm our reputation and business.

In the ordinary course of our business, we collect and store certain personal information from individuals, such as our customers and associates, and we process customer payment card and check information. We suffered an unauthorized intrusion or intrusions (such intrusion or intrusions, collectively, the "Computer Intrusion") into portions of our computer system that process and store information related to customer transactions, discovered late in fiscal 2007 in which we believe customer data were stolen. We have taken steps designed to further strengthen the security of our computer system and protocols and have instituted an ongoing program with respect to data security, consistent with a consent order with the Federal Trade Commission. Nevertheless, there can be no assurance that we will not suffer a future data compromise. We rely on commercially available systems, software, tools and monitoring to provide security for processing, transmission and storage of confidential information. Further, the systems currently used for transmission and approval of payment card transactions, and the technology utilized in payment cards themselves, all of which can put payment card data at risk, are determined and controlled by the payment card industry, not by us. This is also true for check information and approval. Computer hackers may attempt to penetrate our computer system and, if successful, misappropriate personal information, payment card or check information or confidential Company business information. In addition, a Company associate, contractor or other third party with whom we do business may attempt to circumvent our security measures in order to obtain such information, and may purposefully or inadvertently cause a breach involving such information. Advances in computer and software capabilities and encryption technology, new tools and other developments may increase the risk of such a breach. Any such compromise of our data security and loss of personal or business information could disrupt our operations, damage our reputation and customers' willingness to shop in our stores, violate applicable laws, regulations, orders and agreements, and subject us to additional costs and liabilities which could be material.

Our business is subject to seasonal influences; a decrease in sales or margins during the second half of the year could disproportionately adversely affect our operating results.

Our business is subject to seasonal influences; we generally realize higher levels of sales and income in the second half of the year, which includes the back-to-school and year-end holiday seasons. Any decrease in sales or margins during this period could have a disproportionately adverse effect on our results of operations.

We may experience risks associated with our substantial size and scale.

We operate multiple retail chains in the U.S., Canada and Europe. Some aspects of the businesses and operations of the chains are conducted with relative autonomy. The large size of our operations, our multiple businesses and the autonomy

afforded to the chains increase the risk that systems and practices will not be implemented uniformly throughout our company and that information will not be appropriately shared across different chains and countries.

Unseasonable weather in the markets in which our stores operate or our distribution centers are located could adversely affect our operating results.

Adverse and unseasonable weather affects customers' willingness to shop and their demand for the merchandise in our stores. Severe weather could also affect our ability to transport merchandise to our stores from our distribution and shipping centers. As a result, frequent, unusually heavy, unseasonable or untimely weather in our markets, such as snow, ice or rain storms, severe cold or heat or extended periods of unseasonable temperatures, could adversely affect our sales and increase markdowns. Increased governmental regulations focused on climate change could increase compliance costs.

Our results may be adversely affected by serious disruptions or catastrophic events.

Unforeseen public health issues, such as pandemics and epidemics, as well as natural disasters such as hurricanes, tornadoes, floods, earthquakes and other adverse weather and climate conditions, whether occurring in the United States or abroad, could disrupt our operations or the operations of one or more of our vendors or could severely damage or destroy one or more of our stores or distribution facilities located in the affected areas. Day to day operations, particularly our ability to receive products from our vendors or transport products to our stores could be adversely affected, or we could be required to close stores or distribution centers in the affected areas or in areas served by the affected distribution center. As a result, our business could be adversely affected.

We operate in highly competitive markets, and we may not be able to compete effectively.

The retail apparel and home fashion business is highly competitive. We compete with many other local, regional, national and international retailers that sell apparel, home fashions and other merchandise we sell, whether in stores, through catalogues or media or over the internet. We compete on the basis of fashion, quality, price, value, merchandise selection and freshness, brand name recognition, service, reputation and store location. Other competitive factors that influence the demand for our merchandise include our advertising, marketing and promotional activities and the name recognition and reputation of our chains. If we fail to compete effectively, our sales and results of operations could be adversely affected.

Failure to attract and retain quality sales, distribution center and other associates in appropriate numbers as well as experienced buying and management personnel could adversely affect our performance.

Our performance depends on recruiting, developing, training and retaining quality sales, distribution center and other associates in large numbers as well as experienced buying and management personnel. Many of our associates are in entry level or part-time positions with historically high rates of turnover. The nature of the workforce in the retail industry subjects us to the risk of immigration law violations, which risk has increased in recent years. In addition, any failure of third-parties that perform services on our behalf to comply with immigration, employment or other laws could damage our reputation or disrupt our ability to obtain needed labor. Our ability to meet our labor needs while controlling labor costs is subject to external factors such as unemployment levels, prevailing wage rates, minimum wage legislation, changing demographics, health and other insurance costs and governmental labor and employment requirements. Recently enacted health care reform legislation could increase our costs. In the event of increasing wage rates, if we fail to increase our wages competitively, the quality of our workforce could decline, causing our customer service to suffer, while increasing our wages could cause our earnings to decrease. In addition, certain associates in our distribution centers are members of unions and therefore subject us to the risk of labor actions. Because of the distinctive nature of our off-price model, we must do significant internal training and development for a substantial number of our associates. The market for retail management is highly competitive and, in common with other retailers, we face challenges in securing sufficient management talent. If we do not continue to attract, train and retain quality associates and management personnel, our performance could be adversely affected.

If we engage in mergers or acquisitions of new businesses, or divest, close or consolidate any of our current businesses, our business will be subject to additional risks.

We have grown our business in part through mergers and acquisitions and may acquire new businesses or divest, close or consolidate current businesses. Acquisition or divestiture activities may divert attention of management from operating the existing businesses. We may do a less-than-optimal job of evaluating target companies and their risks and benefits, and integration of acquisitions can be difficult and time-consuming. Acquisitions may not meet our performance and other expectations or may expose us to unexpected or greater-than-expected liabilities and risks. Divestitures, closings and

consolidations also involve risks, such as the risks of exposure on lease and other contractual, employment and severance obligations, obligations undertaken in the process and potential liabilities that may arise under law as a result of the disposition or the subsequent failure of the acquirer. Failure to execute on mergers or divestitures, closings and consolidations in a satisfactory manner could adversely affect our future results of operations and financial condition.

Failure to operate information systems and implement new technologies effectively could disrupt our business or reduce our sales or profitability.

We rely extensively on various information systems, data centers and software applications to manage many aspects of our business, including to process and record transactions in our stores, to enable effective communication systems, to plan and track inventory flow, and to generate performance and financial reports. We are dependent on the integrity, security and consistent operations of these systems and related back-up systems. Our computer systems are subject to damage or interruption from power outages, computer and telecommunications failures, computer viruses, security breaches, catastrophic events such as fires, floods, earthquakes, tornadoes, hurricanes, acts of war or terrorism and usage errors by our associates or contractors. The efficient operation and successful growth of our business depends upon these information systems, including our ability to operate them effectively and to select and implement appropriate new technologies, systems, controls, data centers and adequate disaster recovery systems successfully. The failure of our information systems to perform as designed or our failure to implement and operate them effectively could disrupt our business or subject us to liability and thereby harm our profitability.

We depend upon strong cash flows from our operations to supply capital to fund our expansion, operations, interest and debt repayments, stock repurchases and dividends.

Our business depends upon our operations to generate strong cash flow, and to some extent upon the availability of financing sources, to supply capital to fund our expansions, general operating activities, stock repurchases, dividends, interest and debt repayments. Our inability to continue to generate sufficient cash flows to support these activities or the lack of availability of financing in adequate amounts and on appropriate terms when needed could adversely affect our financial performance including our earnings per share.

General economic and other factors may adversely affect consumer spending, which could adversely affect our sales and operating results.

Interest rates; recession; inflation; deflation; consumer credit availability; consumer debt levels; energy costs; tax rates and policy; unemployment trends; threats or possibilities of war, terrorism or other global or national unrest; actual or threatened epidemics; political or financial instability; and general economic, political and other factors beyond our control have significant effects on consumer confidence and spending. Consumer spending, in turn, affects sales at retailers, which may include TJX. Although we benefit from being an off-price retailer, these factors could adversely affect our sales and performance if we are not able to implement strategies to mitigate them promptly and successfully.

Issues with merchandise quality or safety could damage our reputation, sales and financial results.

Various governmental authorities in the jurisdictions where we do business regulate the quality and safety of the merchandise we sell in our stores. Regulations and standards in this area, including those related to the Consumer Product Safety Improvement Act of 2008 in the United States and similar legislation in other countries in which we operate, change from time to time. Our inability to comply on a timely basis with regulatory requirements could result in significant fines or penalties, which could have a material adverse effect on our financial results. We rely on our vendors to provide quality merchandise that complies with applicable product safety laws and other applicable laws, but they may not comply with their contractual obligations to do so. Issues with the quality and safety of merchandise, particularly with food, bath and body and children's products, or issues with the genuineness of merchandise, regardless of our fault, or customer concerns about such issues, could cause damage to our reputation and could result in lost sales, uninsured product liability claims or losses, merchandise recalls and increased costs, and regulatory, civil or criminal fines or penalties, any of which could have a material adverse effect on our financial results.

We are subject to import risks associated with importing merchandise from foreign countries.

Many of the products sold in our stores are sourced by our vendors and, to a lesser extent, by us, in many foreign countries, particularly southeastern Asia. Where we are the importer of record, we may be subject to regulatory or other requirements similar to those imposed upon the manufacturer of such products. We are subject to the various risks of

doing business in foreign markets, importing merchandise from abroad and purchasing product made in foreign countries, such as:

- potential disruptions in manufacturing, logistics and supply;
- changes in duties, tariffs, quotas and voluntary export restrictions on imported merchandise;
- strikes and other events affecting delivery;
- consumer perceptions of the safety of imported merchandise;
- product compliance with laws and regulations of the destination country;
- product liability claims from customers or penalties from government agencies relating to products that are recalled, defective or otherwise noncompliant or alleged to be harmful;
- concerns about human rights, working conditions and other labor rights and conditions in foreign countries where merchandise is produced, and changing labor, environmental and other laws in these countries;
- compliance with laws and regulations concerning ethical business practices, such as the U.S. Foreign Corrupt Practices Act;
- potentially greater exposure for product warranty and safety problems; and
- economic, political or other problems in countries from or through which merchandise is imported.

Political or financial instability, trade restrictions, tariffs, currency exchange rates, labor conditions, transport capacity and costs, systems issues, problems in third party distribution and warehousing and other interruptions of the supply chain, compliance with U.S. and foreign laws and regulations and other factors relating to international trade and imported merchandise beyond our control could affect the availability and the price of our inventory. Furthermore, although we have implemented policies and procedures designed to facilitate compliance with laws and regulations relating to doing business in foreign markets and importing merchandise from abroad, there can be no assurance that our associates, contractors, agents, vendors or other third parties with whom we do business will not violate such laws and regulations or our policies, which could subject us to liability and could adversely affect our operations or operating results.

Our expanding international operations increasingly expose us to risks inherent in operating in foreign jurisdictions.

We have a significant retail presence in Canada and Europe, as well as buying offices around the world, and our goal as a global retailer is to continue to expand into other international markets in the future. Our foreign operations encounter risks similar to those faced by our U.S. operations, as well as risks inherent in foreign operations, such as understanding the retail climate and trends, local customs and competitive conditions in foreign markets, complying with foreign laws, rules and regulations, and foreign currency fluctuations, which could have an adverse impact on our profitability.

Our results may be adversely affected by increases in the price of oil and other commodities.

Prices of oil have fluctuated dramatically in the past and have recently risen significantly. Increase in the price of oil increases our transportation costs for distribution, utility costs for our retail stores and costs to purchase our products from suppliers. Although we have implemented a hedging strategy to manage a portion of our transportation costs, increases in oil and gasoline prices could adversely affect consumer spending and demand for our products and increase our operating costs, which could have an adverse effect on our performance. Similarly, other commodity prices have also fluctuated dramatically in the past. Cost of cotton and synthetic fabrics have recently risen significantly. Such increases are expected to increase the cost of merchandise, which could adversely affect our performance through potentially reduced consumer demand or reduced margins.

Failure to comply with existing laws, regulations and orders or changes in existing laws and regulations could negatively affect our business operations and financial performance.

We are subject to federal, state, provincial and local laws, rules and regulations in the United States and abroad, any of which may change from time to time, as well as orders and assurances. If we fail to comply with these laws, rules, regulations and orders, we may be subject to fines or other penalties, which could materially adversely affect our operations and our financial results and condition. We must also comply with new and changing laws. Further, Generally

Accepted Accounting Principles (GAAP) in the U.S. may change from time to time, and the changes could have material effects on our reported financial results and condition. In addition, there have been a large number of new legislative and regulatory initiatives and reforms introduced in the U.S., and the initiatives and reforms that have been and may be enacted may increase our costs.

Our results may be materially adversely affected by the outcomes of litigation and other legal proceedings.

We are periodically involved in various legal proceedings, which may involve local, state and federal government inquiries and investigations; tax, employment, real estate, tort, consumer litigation and intellectual property litigation; or other disputes. There have been a growing number of employment-related lawsuits, including class actions, and we have been subject to these types of suits. In addition, we may be subject to investigations and other proceedings by regulatory agencies, including, but not limited to, consumer protection laws, advertising regulations, escheat and employment and wage and hour regulations. Results of legal and regulatory proceedings cannot be predicted with certainty and may differ from reserves we establish estimating the probable outcome. Regardless of merit, litigation may be both time-consuming and disruptive to our operations and cause significant expense and diversion of management attention. Legal and regulatory proceedings and investigations could expose us to significant defense costs, fines, penalties and liability to private parties and governmental entities for monetary recoveries and other amounts and attorneys' fees and/or require us to change aspects of our operations, any of which could have a material adverse effect on our business and results of operations.

Our real estate leases generally obligate us for long periods, which subjects us to various financial risks.

We lease virtually all of our store locations, generally for long terms and either own or lease for long periods our primary distribution centers and administrative offices. Accordingly, we are subject to the risks associated with owning and leasing real estate, which can have a material adverse effect on our results as reflected in our reserve for former operations. While we have the right to terminate some of our leases under specified conditions by making specified payments, we may not be able to terminate a particular lease if or when we would like to do so. If we decide to close stores, we are generally required to continue to perform obligations under the applicable leases, which generally includes, among other things, paying rent and operating expenses for the balance of the lease term, or paying to exercise rights to terminate, and the performance of any of these obligations may be expensive. When we assign or sublease leases, we can remain liable on the lease obligations if the assignee or sublessee does not perform. In addition, when leases for the stores in our ongoing operations expire, we may be unable to negotiate renewals, either on commercially acceptable terms or at all, which could cause us to close stores.

Our stock price may fluctuate based on market expectations.

The public trading of our stock is based in large part on market expectations that our business will continue to grow and that we will achieve certain levels of net income. If the securities analysts that regularly follow our stock lower their rating or lower their projections for future growth and financial performance, the market price of our stock is likely to drop. In addition, if our quarterly financial performance does not meet the expectations of securities analysts, our stock price would likely decline. The decrease in the stock price may be disproportionate to the shortfall in our financial performance.

Tax matters could adversely affect our results of operations and financial condition.

We are subject to income taxes in both the United States and numerous foreign jurisdictions. Our provision for income taxes and future tax liability could be adversely affected by numerous factors including, but not limited to, income before taxes being lower than anticipated in countries with lower statutory income tax rates and higher than anticipated in countries with higher statutory income tax rates, changes in income tax rates, changes in transfer pricing, changes in the valuation of deferred tax assets and liabilities, changes in U.S. tax legislation and regulation, foreign tax laws, regulations and treaties, exposure to additional tax liabilities, changes in accounting principles and interpretations relating to tax matters, which could adversely impact our results of operations and financial condition in future periods. In addition, we are subject to the continuous examination of our income tax returns by federal, state and local tax authorities in the U.S. and foreign countries, such authorities may challenge positions we take, and we are engaged in various proceedings with such authorities with respect to assessments, claims, deficiencies and refunds, and the results of these examinations, judicial proceedings or as a result of the expiration of statute of limitations in specific jurisdictions. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. However, it is possible that the actual results of proceedings with tax authorities and in courts,

changes in facts, expiration of statutes of limitations or other resolutions of tax positions will differ from the amounts we have accrued in either a positive or a negative manner, which could materially affect our effective income tax rate in a given financial period, the amount of taxes we are required to pay and our results of operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We lease virtually all of our over 2,700 store locations, generally for 10 years with options to extend the lease term for one or more 5-year periods. We have the right to terminate some of these leases before the expiration date under specified circumstances and some with specified payments.

The following is a summary of our primary owned and leased distribution centers and primary administrative office locations of our current operations as of January 29, 2011. Square footage information for the distribution centers represents total "ground cover" of the facility. Square footage information for office space represents total space occupied.

DISTRIBUTION CENTERS

Marmaxx:

T.J. Maxx	Worcester, Massachusetts	494,000 s.f.—owned
	Evansville, Indiana	989,000 s.f.—owned
	Las Vegas, Nevada	713,000 s.f. shared with Marshalls—owned
	Charlotte, North Carolina	595,000 s.f.—owned
	Pittston Township, Pennsylvania	1,017,000 s.f.—owned
Marshalls	Decatur, Georgia	780,000 s.f.—owned
	Woburn, Massachusetts	472,000 s.f.—leased
	Bridgewater, Virginia	562,000 s.f.—leased
	Philadelphia, Pennsylvania	1,001,000 s.f.—leased
HomeGoods	Brownsburg, Indiana	805,000 s.f.—owned
	Bloomfield, Connecticut	803,000 s.f.—owned
TJX Canada	Brampton, Ontario	506,000 s.f.—leased
	Mississauga, Ontario	667,000 s.f.—leased
TJX Europe	Wakefield, England	176,000 s.f.—leased
	Stoke, England	261,000 s.f.—leased
	Walsall, England	277,000 s.f.—leased
	Bergheim, Germany	326,000 s.f.—leased

OFFICE SPACE

Corporate, Marmaxx, HomeGoods	Framingham and Westboro, Massachusetts	1,291,000 s.f.—leased in several buildings
TJX Canada	Mississauga, Ontario	174,000 s.f.—leased
TJX Europe	Watford, England	61,000 s.f.—leased
	Dusseldorf, Germany	21,000 s.f.—leased

In addition to the distribution centers listed above, TJX owns two distribution centers that were used by the A.J. Wright segment. These distribution centers, one in Fall River, Massachusetts and the other in South Bend, Indiana, were closed in fiscal 2011 as part of the A.J. Wright consolidation. The company is actively marketing these properties.

In addition to the office space listed above, TJX leases a limited amount of space for its numerous regional buying offices located worldwide.

ITEM 3. LEGAL PROCEEDINGS

TJX is subject to certain legal proceedings and claims that rise from time to time in the ordinary course of our business. In addition, TJX is a defendant in several lawsuits filed in federal and state courts in California, New York and Texas brought as putative class or collective actions on behalf of various groups of current and former salaried and hourly associates in the U.S. The lawsuits allege violations of the Fair Labor Standards Act and of state wage and hour statutes, including alleged misclassification of positions as exempt from overtime and alleged entitlement to additional wages for alleged off-the-clock work by hourly employees. The lawsuits seek unspecified monetary damages, injunctive relief and attorneys' fees. TJX is vigorously defending these claims.

We provide the following additional information concerning these lawsuits, setting forth the name of the matter, the court in which the matter is pending, the related case number and the date on which the lawsuit was filed.

Wage and Hour Class Actions: Halton-Hurt et al. v. The TJX Companies, Inc. d/b/a T.J. Maxx, U.S. District Court, Northern District of Texas, 3:09-CV-02171-N, November 13, 2009; *Ebo v. The TJX Companies, et al.*, Superior Court of CA, Los Angeles County Superior Court, BC380575, November 13, 2007.

Exempt Status Cases: Ahmed v. T.J. Maxx Corp. et al., U.S. District Court, Eastern District of New York, 10-CV-03609, August 5, 2010; *Archibald, et al. v. Marshalls of MA, Inc., et al.*, U.S. District Court, Southern District of New York, 09-CV-2323, March 12, 2009; *Guillen v. Marshalls of MA, Inc., et al.*, U.S. District Court, Southern District of New York, 09-CV-9575, November 18, 2009; *Jenkins v. The TJX Companies, Inc. et al.*, U.S. District Court, Eastern District of New York, Case No. CV-10 3753, August 16, 2010.

ITEM 4. (REMOVED AND RESERVED)

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED SECURITY HOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Price Range of Common Stock

Our common stock is listed on the New York Stock Exchange (Symbol: TJX). The quarterly high and low sale prices for our common stock for fiscal 2011 and fiscal 2010 are as follows:

Quarter	Fiscal 2011		Fiscal 2010	
	High	Low	High	Low
First	\$48.50	\$37.12	\$29.17	\$19.19
Second	\$47.49	\$40.08	\$37.00	\$26.62
Third	\$46.61	\$39.56	\$40.64	\$33.80
Fourth	\$48.75	\$42.55	\$39.75	\$35.75

The approximate number of common shareholders at January 29, 2011 was 63,000.

We declared four quarterly dividends of \$0.15 per share for fiscal 2011 and \$0.12 per share for fiscal 2010. While our dividend policy is subject to periodic review by our Board of Directors, we are currently planning to pay a \$0.19 per share quarterly dividend in fiscal 2012 and intend to continue to pay comparable dividends in the future.

Information on Share Repurchases

The number of shares of common stock repurchased by TJX during the fourth quarter of fiscal 2011 and the average price paid per share are as follows:

Period	Total Number of Shares Repurchased ⁽¹⁾ (a)	Average Price Paid Per Share ⁽²⁾ (b)	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program ⁽³⁾ (c)	Maximum Number (or Approximate Dollar Value) of Shares that May Yet be Purchased Under the Plans or Programs ⁽⁴⁾ (d)
October 31, 2010 through November 27, 2010	1,981,470	\$45.60	1,981,470	\$859,267,857
November 28, 2010 through January 1, 2011	4,372,783	\$44.59	4,372,783	\$664,267,976
January 2, 2011 through January 29, 2011	1,512,456	\$46.28	1,512,456	\$594,268,098
Total:	7,866,709		7,866,709	

(1) All shares were purchased as part of publicly announced plans or programs.

(2) Average price paid per share includes commissions and is rounded to the nearest two decimal places.

(3) During the third quarter of fiscal 2011, we completed a \$1 billion stock repurchase program that was approved in September 2009 and initiated another multi-year \$1 billion stock repurchase program, approved in February 2010. As of January 29, 2011, \$594 million remained available for purchase under that program.

(4) In February 2011, TJX's Board of Directors approved a new stock repurchase program that authorizes the repurchase of up to an additional \$1 billion of TJX common stock from time to time.

Equity Compensation Plan Information

The following table provides certain information as of January 29, 2011 with respect to our equity compensation plans:

Plan Category	(a) Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	(b) Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
Equity compensation plans approved by security holders	25,047,372	\$31.41	16,945,286
Equity compensation plans not approved by security holders ⁽¹⁾	N/A	N/A	N/A
Total	25,047,372	\$31.41	16,945,286

(1) All equity compensation plans have been approved by shareholders.

For additional information concerning our equity compensation plans, see Note I to our consolidated financial statements.

ITEM 6. SELECTED FINANCIAL DATA

HomeSense	402	222	107	—	—
Total	66,030	63,471	61,454	58,772	56,356

(1) Fiscal 2008 and fiscal 2007 have been adjusted to reclassify the operating results of Bob's Stores to discontinued operations.

(2) Includes long-term debt, exclusive of current installments and capital lease obligation, less portion due within one year.

(3) Total capitalization includes shareholders' equity, short-term debt, long-term debt and capital lease obligation, including current maturities.

(4) As a result of the consolidation of the A.J. Wright chain, all A.J. Wright stores ceased operations by the end of February, 2011.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The discussion that follows relates to our 52-week fiscal years ended January 29, 2011 (fiscal 2011) and January 30, 2010 (fiscal 2010), and the 53-week fiscal year ended January 31, 2009 (fiscal 2009). Like most retailers we have a 53-week fiscal year every five to six years. This extra week of sales volume, which also provides a lift to pre-tax margins due to the flow of certain monthly and annual expenses, impacts comparisons to 52-week fiscal years.

RESULTS OF OPERATIONS

Highlights of our financial performance for fiscal 2011 include the following:

- Same store sales for fiscal 2011 increased 4% over the prior year. This was achieved on top of a 6% same store sales increase in fiscal 2010. Our strategies of operating with lean inventories and buying close to need, which we managed even more aggressively in fiscal 2010 and continued in fiscal 2011, increased inventory turns and drove continued growth in customer traffic resulting in healthy gains in sales and profitability in both years.
- Net sales increased 8% to \$21.9 billion for fiscal 2011. Stores in operation and selling square footage were both up 4% at the end of fiscal 2011 compared to last fiscal year end. Foreign currency exchange rates benefitted fiscal 2011 sales growth by one percentage point.
- We made the major decision in the fourth quarter of fiscal 2011 to consolidate the A.J. Wright business by converting 90 stores to other banners and closing the remaining 72 stores, its two distribution centers and home office. Although this transaction resulted in significant charges and operating losses to the A.J. Wright segment for the fiscal 2011 fourth quarter, we believe consolidating the A.J. Wright chain allows us to serve the A.J. Wright customer demographic more efficiently, focus our financial and managerial resources on fewer, larger businesses with higher returns and enhance our growth prospects overall.
- Our fiscal 2011 pre-tax margin (the ratio of pre-tax income to net sales) was 9.9% compared to 9.6% for fiscal 2010. The fourth quarter results of the A.J. Wright segment decreased our fiscal 2011 pre-tax margin by 0.7 percentage points, which was more than offset by strong merchandise margin growth as well as expense leverage.
- Our cost of sales ratio for fiscal 2011 improved 0.7 percentage points to 73.1%. Improved merchandise margins and leverage of buying and occupancy costs on strong same store sales more than offset the negative impact of 0.2 percentage points due to the fourth quarter results of the A.J. Wright segment. The selling, general and administrative expense ratio for fiscal 2011 increased by 0.5 percentage points to 16.9%. The fourth quarter A.J. Wright segment loss negatively impacted the selling, general and administrative ratio by 0.6 percentage points, which was almost entirely offset by the benefit of cost reduction programs and expense leverage on strong same store sales in fiscal 2011.
- Income from continuing operations was \$1.3 billion, or \$3.30 per diluted share, for fiscal 2011 compared to \$1.2 billion, or \$2.84 per diluted share, for fiscal 2010. Fiscal 2011 diluted earnings per share includes the negative impact of the fourth quarter A.J. Wright segment loss of \$0.21 per share and the benefit of \$0.02 per share due to a reduction to the Provision for Computer Intrusion related costs.
- During fiscal 2011, we repurchased 27.6 million shares of our common stock for \$1.2 billion. Earnings per share reflect the benefit of the stock repurchase program.
- Consolidated average per store inventories from our continuing operations, including inventory on hand at our distribution centers, were up 4% at the end of fiscal 2011 versus the prior year end as compared to a decrease of 10% at the end of fiscal 2010 over the prior fiscal year end. In fiscal 2010 and 2011, we managed inventory levels more aggressively than in prior years, which had a much greater impact on the year over year inventory comparison in fiscal 2010 to the prior year. The fiscal 2011 per-store inventories reflected larger available quantities of end-of-season branded product for future selling seasons based on greater market opportunities in fiscal 2011.

The following is a discussion of our consolidated operating results, followed by a discussion of our segment operating results.

Net sales: Consolidated net sales for fiscal 2011 totaled \$21.9 billion, an 8% increase over net sales of \$20.3 billion in fiscal 2010. The increase reflected a 4% increase from same store sales, a 3% increase from new stores and a 1% increase from foreign currency exchange rates. Consolidated net sales for fiscal 2010 totaled \$20.3 billion, a 7% increase over net sales of \$19.0 billion in fiscal 2009. The increase reflected a 6% increase from same store sales and a 4% increase from new stores, offset by a 2% decline from the negative impact of foreign currency exchange rates and a 1% decrease from the 53rd week in fiscal 2009.

New stores have been a significant source of sales growth. Both our consolidated store count and our selling square footage increased by 4% in fiscal 2011 as compared to fiscal 2010 and by 3% in fiscal 2010 over the prior fiscal year. We expect to end fiscal 2012 with 2,913 stores, which would represent a 2% increase in both our consolidated store base and in our selling square footage. The anticipated growth rate for fiscal 2012 will be negatively impacted by the closing of the 72 A.J. Wright stores that will not be converted to other banners.

The 4% same store sales increase in fiscal 2011 was driven entirely by continued growth in transactions, with the value of the average transaction down slightly for the year. Junior apparel, jewelry and home fashions performed particularly well in fiscal 2011. Geographically, same store sales increases in Canada were in line with the consolidated average while same store sales decreased in Europe. In the U.S., sales were strong throughout the country with the West Coast and Southwest above the consolidated average and the Northeast below the consolidated average.

The 6% same store sales increase in fiscal 2010 was driven by significant increases in customer transactions at all of our businesses, partially offset by a decline in the value of the average transaction. The increase in customer transactions accelerated during the course of fiscal 2010. Junior apparel, dresses, children's apparel, footwear, accessories and home fashions performed particularly well in fiscal 2010. Geographically, same store sales increases in Europe and Canada trailed the consolidated average. In the U.S., sales were strong throughout the country with the Midwest, Southeast and West Coast above the average, and New England and Florida below the average.

We define same store sales to be sales of those stores that have been in operation for all or a portion of two consecutive fiscal years, or in other words, stores that are in at least their third fiscal year of operation. We classify a store as a new store until it meets the same store sales criteria. We determine which stores are included in the same store sales calculation at the beginning of a fiscal year and the classification remains constant throughout that year, unless a store is closed. We calculate same store sales results by comparing the current and prior year weekly periods that are most closely aligned. Relocated stores and stores that have increased in size are generally classified in the same way as the original store, and we believe that the impact of these stores on the consolidated same store percentage is immaterial. Same store sales of our foreign divisions are calculated on a constant currency basis, meaning we translate the current year's same store sales of our foreign divisions at the same exchange rates used in the prior year. This removes the effect of changes in currency exchange rates, which we believe is a more accurate measure of divisional operating performance.

The following table sets forth our consolidated operating results from continuing operations as a percentage of net sales:

	Fiscal Year Ended January		
	2011	2010	2009
Net sales	100.0%	100.0%	100.0%
Cost of sales, including buying and occupancy costs	73.1	73.8	75.9
Selling, general and administrative expenses	16.9	16.4	16.5
Provision (credit) for Computer Intrusion related costs	(0.1)	—	(0.2)
Interest expense, net	0.2	0.2	0.1
Income from continuing operations before provision for income taxes*	9.9%	9.6%	7.6%

* Due to rounding, the individual items may not foot to Income from continuing operations before provision for income taxes.

Impact of foreign currency exchange rates: Our operating results are affected by foreign currency exchange rates as a result of changes in the value of the U.S. dollar in relation to other currencies. Two ways in which foreign currency affects our reported results are as follows:

Translation of foreign operating results into U.S. dollars: In our financial statements we translate the operations of our segments in Canada and Europe from local currencies into U.S. dollars using currency rates in effect at different points in

time. Significant changes in foreign exchange rates between comparable prior periods can result in meaningful variations in consolidated net sales, net income and earnings per share growth as well as the net sales and operating results of our Canadian and European segments. Currency translation generally does not affect operating margins, as sales and expenses of the foreign operations are translated at essentially the same rates within a given period.

Inventory hedges: We routinely enter into inventory-related hedging instruments to mitigate the impact of foreign currency exchange rates on merchandise margins when our divisions, principally in Europe and Canada, purchase goods in currencies other than their local currencies. As we have not elected “hedge accounting” as defined by U.S. GAAP, we record a mark-to-market gain or loss on the hedging instruments in our results of operations at the end of each reporting period. In subsequent periods, the income statement impact of the mark-to-market adjustment is effectively offset when the inventory being hedged is sold. While these effects occur every reporting period, they are of much greater magnitude when there are sudden and significant changes in currency exchange rates during a short period of time. The mark-to-market adjustment on these hedges does not affect net sales, but it does affect the cost of sales, operating margins and earnings we report.

Cost of sales, including buying and occupancy costs: Cost of sales, including buying and occupancy costs, as a percentage of net sales was 73.1% in fiscal 2011, 73.8% in fiscal 2010 and 75.9% in fiscal 2009. In fiscal 2011, the 0.2 percentage point negative impact of the fourth quarter A.J. Wright segment loss was more than offset by improved consolidated merchandise margin, which increased 0.5 percentage points, along with expense leverage on the 4% same store sales increase. Merchandise margin improvement was driven by our strategy of operating with leaner inventories and buying closer to need, leading to lower markdowns compared to the prior year.

The improvement in fiscal 2010 was primarily due to improved consolidated merchandise margin, which increased 2.1 percentage points, along with expense leverage on the 6% same store sales increase, particularly in occupancy costs, which improved by 0.3 percentage points. Merchandise margin improvement was driven by our strategy of operating with leaner inventories and buying closer to need, which resulted in an increase in markon, along with a reduction in markdowns compared to the prior year. These improvements were partially offset by a benefit to this expense ratio in fiscal 2009 due to the 53rd week (approximately 0.2 percentage points). Additionally, for fiscal 2010, buying and occupancy expense leverage was offset by higher accruals for performance-based incentive compensation as a result of operating performance that was well ahead of our objectives.

Selling, general and administrative expenses: Selling, general and administrative expenses as a percentage of net sales were 16.9% in fiscal 2011, 16.4% in fiscal 2010 and 16.5% in fiscal 2009. The increase in selling, general and administrative expenses in fiscal 2011 compared to fiscal 2010 was due to the 0.6 percentage point negative effect of the fourth quarter A.J. Wright segment loss. Fiscal 2011 selling, general and administrative expenses include impairment charges, severance and termination benefits, lease related obligations and other store closing costs in connection with the A.J. Wright consolidation, which was almost entirely offset by the benefit of cost reduction programs, a reduction in our fiscal 2011 incentive compensation versus the prior year and expense leverage on strong same store sales in fiscal 2011.

The improvement in fiscal 2010 compared to fiscal 2009 was due to leveraging of expenses and savings from our expense reduction initiatives. These improvements were partially offset by the increase in performance-based incentive compensation, which increased selling, general and administrative expense ratio by 0.5 percentage points in fiscal 2010.

Provision for Computer Intrusion related costs: In the second quarter of fiscal 2008, we established a reserve to reflect our estimate of our probable losses in accordance with U.S. GAAP with respect to the Computer Intrusion.

We reduced the Provision for Computer Intrusion related costs by \$11.6 million during the second quarter of fiscal 2011, primarily as a result of insurance proceeds and adjustments to our remaining reserve. The reserve balance was \$17.3 million at January 29, 2011. As an estimate, the reserve is subject to uncertainty, actual costs may vary from the current estimate, however such variations are not expected to be material to our results.

Interest expense, net: Interest expense, net amounted to \$39.1 million for fiscal 2011, \$39.5 million for fiscal 2010 and \$14.3 million for fiscal 2009. The components of interest expense, net for the last three fiscal years are summarized below:

Dollars in thousands	Fiscal Year Ended January		
	2011	2010	2009
Interest expense	\$49,014	\$49,278	\$ 38,123
Capitalized interest	—	(758)	(1,647)
Interest (income)	(9,877)	(9,011)	(22,185)
Interest expense, net	\$39,137	\$39,509	\$ 14,291

Gross interest expense and gross interest income for fiscal 2011 were flat to the prior period.

Gross interest expense for fiscal 2010 increased over fiscal 2009 as a result of the incremental interest cost of the \$375 million aggregate principal amount of 6.95% notes issued in April 2009 and the \$400 million aggregate principal amount of 4.20% notes issued in July 2009. The 6.95% notes were issued in conjunction with the call for redemption of our zero coupon convertible securities, and we refinanced our C\$235 million credit facility prior to its scheduled maturity with a portion of the proceeds of the 4.20% notes. In addition, interest income for fiscal 2010 was less than fiscal 2009 due to considerably lower rates of return on investments more than offsetting higher cash balances available for investment during fiscal 2010.

Income taxes: Our effective annual income tax rate was 38.1% in fiscal 2011, 37.8% in fiscal 2010 and 36.9% in fiscal 2009. The increase in our effective income tax rate for fiscal 2011 as compared to fiscal 2010 is primarily attributable to the effects of repatriation of cash from Europe and increasing state tax reserves, partially offset by the finalization of an advance pricing agreement between Canada and the United States (related to our intercompany transfer pricing) and a favorable Canadian court ruling regarding withholding taxes.

The increase in our effective income tax rate for fiscal 2010 as compared to fiscal 2009 is primarily attributed to the favorable impact in fiscal 2009 of a \$19 million reduction in the reserve for uncertain tax positions arising from the settlement of several state tax audits. The absence of this fiscal 2009 benefit increased the effective income tax rate in fiscal 2010 by 1.3 percentage points, partially offset by a reduction in the effective income tax rate related to foreign income.

We anticipate an effective annual income tax rate for fiscal 2012 comparable to that for fiscal 2011.

Income from continuing operations and income per share from continuing operations: Income from continuing operations was \$1.3 billion in fiscal 2011, a 10% increase over the \$1.2 billion in fiscal 2010, which in turn was a 33% increase over the \$914.9 million in fiscal 2009. Comparisons between fiscal 2011 and fiscal 2010 are negatively impacted by \$86 million for the after tax impact of the A.J. Wright fourth quarter segment loss. Income from continuing operations per share was \$3.30 in fiscal 2011, \$2.84 in fiscal 2010 and \$2.08 in fiscal 2009. Several items, discussed below, affected earnings per share comparisons for fiscal 2011, fiscal 2010 and fiscal 2009.

Fiscal 2011 earnings per share were adversely affected by the fiscal 2011 fourth quarter segment loss for A.J. Wright, which reduced earnings per share by \$0.21 per share, offset in part by a \$0.02 per share benefit for the fiscal 2011 reduction in the Provision for the Computer Intrusion related costs.

Fiscal 2009 earnings per share reflected an estimated \$0.09 per share benefit from the 53rd week in fiscal 2009, as well as a \$0.04 per share benefit from the fiscal 2009 reduction in the Provision for Computer Intrusion related costs.

Foreign currency exchange rates also affected the comparability of our results. Foreign currency exchange rates benefitted fiscal 2011 earnings per share by \$0.02 per share compared to an immaterial impact in fiscal 2010. When comparing fiscal 2010 to fiscal 2009, foreign currency rates reduced earnings per share by \$0.01 per share in fiscal 2010 compared to a \$0.01 per share benefit in fiscal 2009.

In addition, our weighted average diluted shares outstanding affect the comparability of earnings per share, which are benefitted by our share repurchase programs. We repurchased 27.6 million shares of our stock at a cost of \$1.2 billion in fiscal 2011; 27.0 million shares at a cost of \$950 million in fiscal 2010; and 24.0 million shares at a cost of \$741 million in fiscal 2009.

Discontinued operations and net income: The fiscal 2011 net gain from discontinued operations reflects an after-tax benefit of \$3.6 million, (which did not impact earnings per share) as a result of a \$6 million pre-tax reduction for the estimated cost of settling lease-related obligations of former businesses. Fiscal 2009 net loss from discontinued operations reflects an after-tax loss of \$34 million, or \$0.08 per share, on the sale of Bob's Stores. Including the impact of discontinued operations, net income was \$1.3 billion, or \$3.30 per share, for fiscal 2011, \$1.2 billion, or \$2.84 per share, for fiscal 2010 and \$880.6 million, or \$2.00 per share, for fiscal 2009.

Segment information: The following is a discussion of the operating results of our business segments. As of January 29, 2011, we operated five business segments: three in the United States and one in each of Canada and Europe. In the United States, our T.J. Maxx and Marshalls stores are aggregated as the Marmaxx segment, and HomeGoods and A.J. Wright are each reported as a separate segment. A.J. Wright will cease to be a business segment during fiscal 2012 as a result of its consolidation. TJX's stores operated in Canada (Winners, HomeSense and StyleSense) are reported as the TJX Canada segment, and TJX's stores operated in Europe (T.K. Maxx and HomeSense) are reported as the TJX Europe segment. We evaluate the performance of our segments based on "segment profit or loss," which we define as pre-tax income before general corporate expenses, Provision (credit) for Computer Intrusion related costs, and interest expense. "Segment profit or loss," as we define the term, may not be comparable to similarly titled measures used by other entities. In addition, this measure of performance should not be considered an alternative to net income or cash flows from operating activities as an indicator of our performance or as a measure of liquidity.

Presented below is selected financial information related to our business segments:

U.S. Segments:

Marmaxx

Dollars in millions	Fiscal Year Ended January		
	2011	2010	2009
Net sales	\$14,092.2	\$13,270.9	\$12,362.1
Segment profit	\$ 1,876.0	\$ 1,588.5	\$ 1,155.8
Segment profit as a percentage of net sales	13.3%	12.0%	9.3%
Percent increase in same store sales	4%	7%	0%
Stores in operation at end of period			
T.J. Maxx	923	890	874
Marshalls	830	813	806
Total Marmaxx	1,753	1,703	1,680
Selling square footage at end of period (in thousands)			
T.J. Maxx	21,611	20,890	20,543
Marshalls	20,912	20,513	20,388
Total Marmaxx	42,523	41,403	40,931

Net sales at Marmaxx increased 6% in fiscal 2011 as compared to fiscal 2010. Same store sales for Marmaxx were up 4%, which was on top of a strong 7% increase in the prior year.

Same store sales growth at Marmaxx for fiscal 2011 was driven by continued growth in customer transactions, partially offset by a slight decrease in the value of the average transaction. The growth in customer transactions in fiscal 2011 was on top of a significant increase in fiscal 2010. Same store sales for women's apparel were above the chain average, with junior apparel particularly strong. Same store sales for men's apparel were slightly below the chain average. Home categories improved significantly at Marmaxx, with same store sales increases above the chain average for fiscal 2011. Geographically, there were strong trends throughout the country. Same store sales were strongest in the West Coast and Southwest, while the Northeast trailed the chain average for fiscal 2011. We also saw a lift in the net sales of stores renovated during the year.

Segment profit as a percentage of net sales ("segment margin" or "segment profit margin") increased to 13.3% in fiscal 2011 from 12.0% in fiscal 2010. This increase in segment margin for fiscal 2011 was primarily due to an increase in merchandise margin of 0.8 percentage points driven primarily by lower markdowns. In addition, the 4% increase in same

store sales provided expense leverage as a percentage of net sales, particularly occupancy costs which improved by 0.2 percentage points.

Segment margin increased to 12.0% in fiscal 2010 from 9.3% in fiscal 2009. This increase in segment margin for fiscal 2010 was primarily due to an increase in merchandise margin of 2.4 percentage points driven by lower markdowns and higher markon. In addition, the 7% increase in same store sales provided expense leverage as a percentage of net sales, particularly occupancy costs, which improved by 0.3 percentage points. These increases were partially offset by an increase in administrative costs as a percentage of sales, primarily due to higher accruals for performance-based incentive compensation as a result of operating performance well ahead of objectives.

We expect to open approximately 116 new stores (net of closings and including the conversion of 65 A.J. Wright stores) in fiscal 2012, increasing the Marmaxx store base and selling square footage each by 7%.

HomeGoods

Dollars in millions	Fiscal Year Ended January		
	2011	2010	2009
Net sales	\$1,958.0	\$1,794.4	\$1,578.3
Segment profit	\$ 186.5	\$ 137.5	\$ 42.4
Segment profit as a percentage of net sales	9.5%	7.7%	2.7%
Percent increase (decrease) in same store sales	6%	9%	(3)%
Stores in operation at end of period	336	323	318
Selling square footage at end of period (in thousands)	6,619	6,354	6,248

HomeGoods' net sales increased 9% in fiscal 2011 compared to fiscal 2010. Same store sales increased 6% in fiscal 2011, driven by continued strong growth in customer traffic, compared to a same store sales increase of 9% in fiscal 2010. Segment margin of 9.5% was up from 7.7% for fiscal 2010, due to increased merchandise margins, driven by decreased markdowns, leveraging of expenses on the 6% same store sales and operational efficiencies. The merchandise margin improvements were driven by our continuing to manage this business with much lower inventory levels and increasing inventory turns.

HomeGoods' net sales increased 14% in fiscal 2010 compared to fiscal 2009. Same store sales increased 9% in fiscal 2010, driven by significantly increased customer traffic, compared to a decrease of 3% in fiscal 2009. Segment margin of 7.7% was up significantly from 2.7% for fiscal 2009, due to increased merchandise margins driven by increased markon and decreased markdowns, leveraging of expenses on the 9% same store sales and operational efficiencies. The merchandise margin improvements were driven by managing this business with much lower inventory levels, which drove better off-price buying and increased inventory turns. These improvements were partially offset by higher accruals for performance-based incentive compensation as a result of operating performance well ahead of objectives.

In fiscal 2012, we plan to add a net of 38 HomeGoods stores (including the conversion of 16 A.J. Wright stores) and increase selling square footage by 11%.

A.J. Wright

In the fourth quarter of fiscal 2011, TJX announced that it would consolidate its A.J. Wright division by converting 90 of the A.J. Wright stores into T.J. Maxx, Marshalls or HomeGoods stores and by closing the remaining 72 stores, its two distribution centers and home office. TJX commenced the liquidation process in the fiscal 2011 fourth quarter and 20 stores had been closed as of January 29, 2011. All of the remaining stores ceased operation by February 13, 2011. See Note C to the consolidated financial statements for more information.

Dollars in millions	Fiscal Year Ended January		
	2011	2010	2009
Net sales	\$ 888.4	\$779.8	\$677.6
Segment profit (loss)	\$(130.0)	\$ 12.6	\$ 2.9
Segment profit (loss) as a percentage of net sales	(14.6)%	1.6%	0.4%
Percent increase in same store sales	6%	9%	4%
Stores in operation at end of period	142	150	135
Selling square footage at end of period (in thousands)	2,874	3,012	2,680

A majority of the costs related to the closing of the A.J. Wright business were recorded in the fourth quarter. The operating results of the A.J. Wright segment for the full year of fiscal 2011 include a fourth quarter loss of \$140.6 million, which includes the following:

Dollars in thousands	Fiscal 2011 Fourth Quarter
Fixed asset impairment charges—Non cash	\$ 82,589
Severance and termination benefits	25,400
Lease obligations and other closing costs	11,700
Operating losses	20,912
Total segment loss	\$140,601

In the first half of fiscal 2012, TJX will incur additional store closing costs and operating losses due to the completion of the A.J. Wright store closings as well as the costs to convert the A.J. Wright stores to other TJX banners and grand re-opening costs for those stores. TJX estimates that during fiscal 2012, it will incur additional A.J. Wright segment losses of approximately \$66 million, primarily relating to the completion of store operations and lease related obligations, and conversion costs and grand re-opening costs of approximately \$28 million, which will be reflected in the segments of the new banners into which the stores are converted. The majority of these charges are expected to be incurred in the first quarter of fiscal 2012.

A.J. Wright's net sales increased 15% in fiscal 2010 as compared to fiscal 2009, and same store sales increased 9%. Segment profit increased to \$12.6 million in fiscal 2010, compared to segment profit of \$2.9 million in fiscal 2009. The increase in segment margin in fiscal 2010 was primarily due to improved merchandise margin. Like our other divisions, cost reduction initiatives and the benefit of expense leverage on the same store sales increase was partially offset by higher accruals for performance-based incentive compensation.

International Segments:

TJX Canada

U.S. Dollars in millions	Fiscal Year Ended January		
	2011	2010	2009
Net sales	\$2,510.2	\$2,167.9	\$2,139.4
Segment profit	\$ 352.0	\$ 255.0	\$ 236.1
Segment profit as a percentage of net sales	14.0%	11.8%	11.0%
Percent increase in same store sales	4%	2%	3%
Stores in operation at end of period			
Winners	215	211	202
HomeSense	82	79	75
Total	297	290	277
Selling square footage at end of period (in thousands)			
Winners	4,966	4,847	4,647
HomeSense	1,594	1,527	1,437
Total	6,560	6,374	6,084

Net sales for TJX Canada (which includes Winners and HomeSense) increased 16% in fiscal 2011 as compared to fiscal 2010. Currency translation benefitted fiscal 2011 sales growth by approximately 9 percentage points, as compared to the same period last year. Same store sales were up 4% in fiscal 2011 compared to an increase of 2% in fiscal 2010. Same store sales of men's apparel, dresses and home fashions were above the segment average for fiscal 2011.

Segment profit for fiscal 2011 increased to \$352 million compared to \$255 million in fiscal 2010. The impact of foreign currency translation increased segment profit by \$25 million in fiscal 2011 as compared to fiscal 2010. The mark-to-market adjustment on inventory-related hedges reduced segment profit in fiscal 2011 by \$7 million compared to an immaterial impact in fiscal 2010. The unfavorable change in the mark-to-market adjustment of our inventory hedges reduced fiscal 2011 segment margin by 0.3 percentage points. TJX Canada segment margin increased 2.2 percentage

points to 14.0% in fiscal 2011, compared to 11.8% in fiscal 2010. The segment margin improvement in fiscal 2011 was driven by a strong improvement in merchandise margins.

Net sales increased 1% in fiscal 2010 as compared to fiscal 2009. Currency exchange translation reduced fiscal 2010 sales by approximately \$62 million, or 3%, as compared to fiscal 2009. Same store sales were up 2% in fiscal 2010 compared to an increase of 3% in fiscal 2009. Same store sales of junior apparel, dresses, men's apparel and footwear, as well as HomeSense on a standalone basis, were above the segment average for fiscal 2010.

Segment profit for fiscal 2010 increased to \$255 million compared to \$236 million in fiscal 2009. The impact of foreign currency translation decreased segment profit by \$4 million, or 2%, in fiscal 2010 compared to fiscal 2009. The mark-to-market adjustment on inventory related hedges did not have a material impact on segment profit in fiscal 2010 compared to fiscal 2009. Segment margin increased 0.8 percentage points to 11.8% in fiscal 2010, compared to 11.0% in fiscal 2009, which was primarily due to an improvement in merchandise margins. Improvements in store payroll and distribution costs as a percentage of net sales in fiscal 2010 due to operating efficiencies were offset by higher accruals for performance-based incentive compensation as a result of operating performance well ahead of objectives.

As of the end of fiscal 2011, we operated three StyleSense stores which are included in the Winners totals in the above table. We are bringing the Marshalls chain to Canada, with six stores scheduled to open in fiscal 2012. We believe that Canada can ultimately support 90 to 100 Marshalls stores. We expect to add a net of 15 stores in Canada in fiscal 2012 (including the Marshalls stores) and plan to increase selling square footage by 5%.

TJX Europe

U.S. Dollars in millions	Fiscal Year Ended January		
	2011	2010	2009
Net sales	\$2,493.5	\$2,275.4	\$2,242.1
Segment profit	\$ 75.8	\$ 164.0	\$ 137.6
Segment profit as a percentage of net sales	3.0%	7.2%	6.1%
Percent (decrease) increase in same store sales	(3)%	5%	4%
Stores in operation at end of period			
T.K. Maxx	307	263	235
HomeSense	24	14	7
Total	331	277	242
Selling square footage at end of period (in thousands)			
T.K. Maxx	7,052	6,106	5,404
HomeSense	402	222	107
Total	7,454	6,328	5,511

Net sales for TJX Europe increased in fiscal 2011 to \$2.5 billion compared to \$2.3 billion in fiscal 2010. Currency translation negatively impacted the fiscal 2011 results, reducing net sales by \$86 million. Same store sales were down 3% in fiscal 2011 compared to a 5% increase in fiscal 2010.

Segment profit decreased to \$75.8 million for fiscal 2011, and segment profit margin decreased to 3.0%. We believe that execution issues at TJX Europe were the primary reasons for below-plan sales and segment profit. We believe that our expansion in Europe took management's focus off of the proper execution of the fundamentals of our off-price strategy and that as a result, consumers did not find the values they had come to expect at our stores. This led to same store sales declines, reduced merchandise margins, as a result of increased markdowns, and the de-levering of expenses. We intend to slow store growth for TJX Europe in fiscal 2012 and focus on correcting the execution issues. Despite this setback, we remain confident that Europe holds significant growth potential for TJX.

Net sales for TJX Europe increased in fiscal 2010 to \$2.3 billion compared to \$2.2 billion in fiscal 2009. Currency exchange rate translation reduced fiscal 2010 sales by approximately \$252 million, or 11%, as compared to fiscal 2009. Same store sales increased 5% for fiscal 2010 compared to a 4% increase in fiscal 2009. Segment profit for fiscal 2010 increased 19% to \$164 million, and segment profit margin increased 1.1 percentage points to 7.2%. The increase in segment margin for fiscal 2010 reflects improved merchandise margins and leverage of expenses on the 5% same store sales increase, partially offset by costs of operations in Germany and Poland along with higher accruals for performance-based incentive compensation in fiscal 2010. We also invested in strengthening our shared services infrastructure.

Foreign currency had an immaterial impact on fiscal 2010 segment profit, while segment profit for fiscal 2009 included a favorable mark-to-market adjustment of \$10 million, primarily relating to the conversion of Euros to Pound Sterling.

As stated above, we intend to slow our growth in fiscal 2012. We plan to open a net of 27 new T.K. Maxx stores in Europe and to expand total TJX Europe selling square footage by 8%. This compares to a net increase of 54 stores and an 18% increase in selling square footage in fiscal 2011.

General Corporate Expense:

Dollars in millions	Fiscal Year Ended January		
	2011	2010	2009
General corporate expense	\$168.7	\$166.4	\$140.0

General corporate expense for segment reporting purposes represents those costs not specifically related to the operations of our business segments and is included in selling, general and administrative expenses, except for the mark-to-market adjustment on diesel fuel hedges, which is included in cost of sales. Fiscal 2011 general corporate expense was relatively flat to the prior year. The slight increase in fiscal 2011 was due to increased investment in corporate systems, management training programs and normal expense growth offsetting the effect of higher charitable donations and incentive compensation incurred in fiscal 2010. The increase in general corporate expense in fiscal 2010 compared to fiscal 2009 was primarily due to an \$18 million contribution to the TJX Foundation in fiscal 2010 and higher performance-based incentive and benefit plan accruals, partially offset by benefits related to hedging activity.

LIQUIDITY AND CAPITAL RESOURCES

Operating Activities:

Net cash provided by operating activities was \$1,976 million in fiscal 2011, \$2,272 million in fiscal 2010 and \$1,155 million in fiscal 2009. The cash generated from operating activities in each of these fiscal years was largely due to operating earnings.

Operating cash flows for fiscal 2011 decreased \$295 million compared to fiscal 2010. Net income plus the non-cash impact of depreciation and impairment charges provided cash of \$1,897 million in fiscal 2011 compared to \$1,659 million in fiscal 2010, an increase of \$238 million. The change in merchandise inventory, net of the related change in accounts payable, resulted in a use of cash of \$48 million in fiscal 2011, compared to a source of cash of \$345 million in fiscal 2010. Although we continued to operate with leaner inventories throughout fiscal 2011, our strategy of being more aggressive with managing inventories had a much greater impact on cash flows in fiscal 2010. In addition, the increase in inventory in fiscal 2011 reflected our business growth, as well as a year-end increase in packaway merchandise to take advantage of market opportunities. Changes in current income taxes payable/recoverable unfavorably impacted fiscal 2011 cash flows, as compared to fiscal 2010, by \$203 million due to the timing of tax payments. The change in accrued expenses and other liabilities provided cash of \$78 million in fiscal 2011 compared to cash provided of \$31 million in fiscal 2010.

Operating cash flows for fiscal 2010 increased \$1,117 million compared to fiscal 2009. Net income provided cash of \$1,214 million in fiscal 2010, an increase of \$333 million over net income of \$881 million in fiscal 2009. The change in merchandise inventory, net of the related change in accounts payable, provided a source of cash of \$345 million in fiscal 2010, compared to a \$210 million use of cash in fiscal 2009. The reduction in inventory in fiscal 2010 was the result of the ongoing implementation of our strategy of operating with leaner inventories and buying closer to need, which, in turn, increased inventory turnover. Changes in current income taxes payable/recoverable increased cash in fiscal 2010 by \$191 million compared to a decrease in cash of \$49 million in fiscal 2009. The change in prepaid expenses and other current assets had a favorable impact on fiscal 2010 cash flows of \$64 million, primarily due to the timing of February rental payments. The change in accrued expenses and other liabilities provided cash of \$31 million in fiscal 2010, compared to a \$35 million use of cash in fiscal 2009, reflecting higher accruals in fiscal 2010 for performance-based incentive compensation, partially offset by increased funding of the pension plan. Partially offsetting these favorable changes to fiscal 2010 operating cash flows was the change in the deferred income tax provision, which reduced cash flows by \$79 million compared to fiscal 2009 and the unfavorable impact of \$61 million of all other items, which primarily reflects unrealized gains on assets of the executive savings plan in fiscal 2010 versus unrealized losses in fiscal 2009.

Reserve for obligations of former operations: We have a reserve for the remaining future obligations of businesses we have closed, sold or otherwise disposed of including, among others, Bob’s Stores and A.J. Wright. The

majority of these obligations relate to real estate leases associated with these businesses. The reserve balance was \$54.7 million at January 29, 2011 and \$35.9 million at January 30, 2010. See Note C to the consolidated financial statements for more information.

We may also be contingently liable on up to 13 leases of BJ's Wholesale Club, a former TJX business, and up to seven leases of Bob's Stores, in addition to those included in the reserve. The reserve for former operations does not reflect these leases because we do not believe that the likelihood of future liability to us is probable.

Off-balance sheet liabilities: We have contingent obligations on leases, for which we were a lessee or guarantor, which were assigned to third parties without TJX being released by the landlords. Over many years, we have assigned numerous leases that we originally leased or guaranteed to a significant number of third parties. With the exception of leases of our former businesses for which we have reserved, we have rarely had a claim with respect to assigned leases, and accordingly, we do not expect that such leases will have a material impact on our financial condition, results of operations or cash flows. We do not generally have sufficient information about these leases to estimate our potential contingent obligations under them that could be triggered in the event that one or more of the current tenants do not fulfill their obligations related to one or more of these leases.

We also have contingent obligations in connection with some assigned or sublet properties that we are able to estimate. We estimate the undiscounted obligations of (i) leases of former operations not included in our reserve for former operations and (ii) properties of our discontinued operations that we would expect to sublet, if the subtenants did not fulfill their obligations, is approximately \$75 million as of January 29, 2011. We believe that most or all of these contingent obligations will not revert to us and, to the extent they do, will be resolved for substantially less due to mitigating factors.

We are a party to various agreements under which we may be obligated to indemnify other parties with respect to breach of warranty or losses related to such matters as title to assets sold, specified environmental matters or certain income taxes. These obligations are typically limited in time and amount. There are no amounts reflected in our balance sheets with respect to these contingent obligations.

Investing Activities:

Our cash flows for investing activities include capital expenditures for the last three fiscal years as set forth in the table below:

In millions	Fiscal Year Ended January		
	2011	2010	2009
New stores	\$196.3	\$127.8	\$147.6
Store renovations and improvements	301.0	206.8	264.3
Office and distribution centers	209.8	94.7	171.0
Capital expenditures	\$707.1	\$429.3	\$582.9

We expect that capital expenditures will approximate \$800 million to \$825 million for fiscal 2012, which we expect to fund through internally generated funds. Fiscal 2012 capital expenditures are expected to include \$239 million for new stores, \$55 million of which is associated with converting the 90 A.J. Wright stores to other banners. Additionally, \$269 million is for our offices and distribution centers to support growth and \$317 million is for store renovations.

We also purchased short-term investments that had initial maturities in excess of 90 days which, per our policy, are not classified as cash on the balance sheets presented. In fiscal 2011, we purchased \$120 million of such short-term investments, compared to \$279 million in fiscal 2010. Additionally, \$180 million of such short-term investments were sold or matured during fiscal 2011 compared to \$153 million last year. No such short-term investments were held during fiscal 2009. Investing activities for fiscal 2009 also include cash flows associated with net investment hedges. During fiscal 2009, we suspended our policy of hedging the net investment in our foreign subsidiaries and settled such hedges during the fourth quarter of that year. The net cash received on net investment hedges during fiscal 2009 amounted to \$14.4 million.

Financing Activities:

Cash flows from financing activities resulted in net cash outflows of \$1,224 million in fiscal 2011, \$584 million in fiscal 2010 and \$769 million in fiscal 2009.

We spent \$1,200 million to repurchase and retire 27.6 million shares of our stock in fiscal 2011, \$950 million to repurchase and retire 27.0 million shares in fiscal 2010 and \$741 million to repurchase and retire 24.0 million shares in fiscal 2009 under our stock repurchase programs. We record the purchase of our stock on a cash basis, and the amounts reflected in the financial statements may vary from the above due to the timing of the settlement of our repurchases. During the third quarter of fiscal 2011, we completed the \$1 billion stock repurchase program approved in September 2009 and initiated another \$1 billion stock repurchase program approved in February 2010. As of January 29, 2011, \$594 million remained available for purchase under that program, and in February 2011, our Board of Directors authorized an additional \$1 billion stock repurchase program. We currently plan to repurchase approximately \$1.2 billion of stock under our stock repurchase programs in fiscal 2012. We determine the timing and amount of repurchases made directly and under Rule 10b5-1 plans from time to time based on our assessment of various factors including anticipated excess cash flow, liquidity, market conditions, the economic environment and prospects for the business and other factors. The timing and amount of these purchases may change from our plans.

Cash flows from financing activities for fiscal 2010 include the net proceeds of \$774 million from two debt offerings. On April 7, 2009, we issued \$375 million aggregate principal amount of 6.95% ten-year notes. Related to this transaction, TJX called for the redemption of its zero coupon convertible subordinated notes, virtually all of which were converted into 15.1 million shares of common stock. We used the proceeds of the 6.95% notes to repurchase additional shares of common stock under our stock repurchase program. On July 23, 2009, we issued \$400 million aggregate principal amount of 4.20% six-year notes. We used a portion of the proceeds of this offering to refinance our C\$235 million term credit facility on August 10, 2009, prior to its scheduled maturity, and used the remainder, together with funds from operations, to pay our 7.45% notes on their scheduled maturity of December 15, 2009.

We declared quarterly dividends on our common stock which totaled \$0.60 per share in fiscal 2011, \$0.48 per share in fiscal 2010 and \$0.44 per share in fiscal 2009. Cash payments for dividends on our common stock totaled \$229 million in fiscal 2011, \$198 million in fiscal 2010 and \$177 million in fiscal 2009. We announced our intention to increase the quarterly dividend on our common stock to \$0.19 per share, effective with the dividend payable in June 2011, subject to the approval of our Board of Directors. Financing activities also included proceeds from the exercise of employee stock options of \$176 million in fiscal 2011, \$170 million in fiscal 2010 and \$142 million in fiscal 2009.

We traditionally have funded our seasonal merchandise requirements through cash generated from operations, short-term bank borrowings and the issuance of short-term commercial paper. As of January 29, 2011, we had a \$500 million revolving credit facility maturing in May 2013 and a \$500 million revolving credit facility maturing in May 2011. The three-year agreement maturing in May 2013 was entered into in May 2010 to replace a similar agreement that matured at that time. The three-year agreement requires the payment of 17.5 basis points annually on the unused committed amount. The agreement maturing in May 2011 requires the payment of six basis points annually on the committed amount (whether used or unused). Both of these agreements have no compensating balance requirements; contain various covenants, including a requirement of a specified ratio of debt to earnings and serve as back up to TJX's commercial paper program. The availability under our revolving credit facilities was \$1 billion at January 29, 2011 and January 30, 2010, and we had no borrowings outstanding at those dates under these agreements. We believe existing cash balances, internally-generated funds and our revolving credit facilities will meet our future operating needs. The maximum amount of our U.S. short-term borrowings outstanding was \$165 million during fiscal 2010. There were no U.S. short-term borrowings outstanding during fiscal 2011.

As of January 29, 2011 and January 30, 2010, TJX's foreign subsidiaries had uncommitted credit facilities. TJX Canada had two credit lines, a C\$10 million facility for operating expenses and a C\$10 million letter of credit facility. As of January 29, 2011 and January 30, 2010, there were no amounts outstanding on the Canadian credit line for operating expenses. As of January 29, 2011, TJX Europe had a credit line of £20 million. There were no outstanding borrowings on this European credit line as of January 29, 2011 or January 30, 2010.

We believe that internally-generated funds and our current credit facilities will adequately meet our operating, debt and capital needs for at least the next twelve months. See Note K to the consolidated financial statements for further information regarding our long-term debt and other financing sources.

Contractual obligations: As of January 29, 2011, we had payment obligations (including current installments) under long-term debt arrangements, leases for property and equipment and purchase obligations that will require cash outflows as follows (in thousands):

Tabular Disclosure of Contractual Obligations	Total	Less Than 1 Year	Payments Due by Period		
			1-3 Years	3-5 Years	More Than 5 Years
Long-term debt obligations including estimated interest and current installments	\$ 1,092,963	\$ 42,863	\$ 85,725	\$ 485,701	\$ 478,674
Operating lease commitments	6,800,093	1,092,709	1,938,020	1,464,690	2,304,674
Capital lease obligation	19,219	3,897	7,824	7,498	—
Purchase obligations	2,673,988	2,635,019	34,976	3,993	—
Total Obligations	\$10,586,263	\$3,774,488	\$2,066,545	\$1,961,882	\$2,783,348

The long-term debt obligations above include estimated interest costs. The lease commitments in the above table are for minimum rent and do not include costs for insurance, real estate taxes, other operating expenses and, in some cases, rentals based on a percentage of sales; these items totaled approximately one-third of the total minimum rent for the fiscal year ended January 29, 2011.

Our purchase obligations primarily consist of purchase orders for merchandise; purchase orders for capital expenditures, supplies and other operating needs; commitments under contracts for maintenance needs and other services; and commitments under executive employment and other agreements. We exclude from purchase obligations long-term agreements for services and operating needs that can be cancelled without penalty.

We also have long-term liabilities which include \$209.0 million for employee compensation and benefits, the majority of which will come due beyond five years, \$165.3 million for accrued rent, the cash flow requirements of which are included in the lease commitments in the above table, and \$179.8 million for uncertain tax positions for which it is not reasonably possible for us to predict when they may be paid.

CRITICAL ACCOUNTING POLICIES

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States (U.S. GAAP) which require us to make certain estimates and judgments that impact our reported results. These judgments and estimates are based on historical experience and other factors which we continually review and believe are reasonable. We consider our most critical accounting policies, involving management estimates and judgments, to be those relating to the areas described below.

Inventory valuation: We use the retail method for valuing inventory, which results in a weighted average cost. Under the retail method, the cost value of inventory and gross margins are determined by calculating a cost-to-retail ratio and applying it to the retail value of inventory. This method is widely used in the retail industry, and we believe the retail method results in a more conservative inventory valuation than other inventory accounting methods. It involves management estimates with regard to markdowns and inventory shrinkage. Under the retail method, permanent markdowns are reflected in inventory valuation when the price of an item is reduced. Typically, a significant area of judgment in the retail method is the amount and timing of permanent markdowns. However, as a normal business practice, we have a specific policy as to when and how markdowns are to be taken, greatly reducing management's discretion and the need for management estimates as to markdowns. Inventory shrinkage requires estimating a shrinkage rate for interim periods, but we take a full physical inventory near the fiscal year end to determine shrinkage at year end. Thus, actual and estimated amounts of shrinkage may differ in quarterly results, but the difference is typically not a significant factor in full year results. Overall, we believe that the retail method, coupled with our disciplined permanent markdown policy and the full physical inventory taken at each fiscal year end, results in an inventory valuation that is fairly stated. Lastly, many retailers have arrangements with vendors that provide for rebates and allowances under certain conditions that ultimately affect the value of inventory. We have generally not entered into such arrangements with our vendors in our continuing operations.

Impairment of long-lived assets: We evaluate the recoverability of the carrying value of our long-lived assets at least annually and whenever events or circumstances occur that would indicate that the carrying amounts of those

assets are not recoverable. Significant judgment is involved in projecting the cash flows of individual stores, as well as our business units, which involve a number of factors including historical trends, recent performance and general economic assumptions. If we determine that an impairment of long-lived assets has occurred, we record an impairment charge equal to the excess of the carrying value of those assets over the estimated fair value of the assets. We believe as of January 29, 2011 that the carrying value of our long-lived assets was appropriate.

Retirement obligations: Retirement costs are accrued over the service life of an employee and represent, in the aggregate, obligations that will ultimately be settled far in the future and are therefore subject to estimates. We are required to make assumptions regarding variables, such as the discount rate for valuing pension obligations and the long-term rate of return assumed to be earned on pension assets, both of which impact the net periodic pension cost for the period. The discount rate, which we determine annually based on market interest rates, and our estimated long-term rate of return, which can differ considerably from actual returns, are two factors that can have a considerable impact on the annual cost of retirement benefits and the funded status of our qualified pension plan. When the market performance of our plan assets, discount rates or other factors have a negative impact on the funded status of our plan, we may make contributions to the plan in excess of mandatory funding requirements. In fiscal 2011 we funded our qualified pension plan with a voluntary contribution of \$100 million.

Share-based compensation: In accordance with U.S. GAAP, we estimate the fair value of stock awards issued to employees and directors under our stock incentive plan. The fair value of the awards is amortized as “share-based compensation” over the vesting periods during which the recipients are required to provide service. We use the Black-Scholes option pricing model for determining the fair value of stock options granted, which requires management to make significant judgments and estimates. The use of different assumptions and estimates could have a material impact on the estimated fair value of stock option grants and the related compensation cost.

Casualty insurance: In fiscal 2008, we initiated a fixed premium program for our casualty insurance. Previously, our casualty insurance program required us to estimate the total claims we would incur as a component of our annual insurance cost. The estimated claims are developed, with the assistance of an actuary, based on historical experience and other factors. These estimates involve significant judgments and assumptions, and actual results could differ from these estimates. A large portion of these claims is funded with a non-refundable payment during the policy year, offsetting our estimated claims accrual. We had a net accrual of \$14.2 million for the unfunded portion of our casualty insurance program as of January 29, 2011.

Income taxes: Like many large corporations, our income tax returns are regularly audited by federal, state and local tax authorities in the United States and in foreign countries where we operate. Such authorities may challenge positions we take, and we are engaged in various proceedings with such authorities with respect to assessments, claims, deficiencies and refunds. In accordance with U.S. GAAP, we evaluate uncertain tax positions based on our understanding of the facts, circumstances and information available at the reporting date, and we accrue for exposure when we believe that it is more likely than not, based on the technical merits, that the positions will not be sustained upon examination. However, it is possible that amounts accrued or paid as the result of the final resolutions of examinations, judicial or administrative proceedings, changes in facts or law, expirations of statute of limitations in specific jurisdictions or other resolutions of, or changes in, tax positions, will differ either positively or negatively from the amounts we have accrued, and may result in accruals or payments for periods not currently under examination or for which no claims have been made. It is possible that such final resolutions or changes in accruals could have a material adverse impact on the results of operations of the period in which an examination or proceeding is resolved or in the period in which a changed outcome becomes probable and reasonably estimable.

Reserves for Computer Intrusion related costs and for former operations: As discussed in Notes B and C to the consolidated financial statements and elsewhere in the Management's Discussion and Analysis, we have reserves for probable losses arising out of the Computer Intrusion and for future obligations of former operations, primarily real estate leases. We must make estimates and assumptions about the costs and expenses we will incur in connection with the Computer Intrusion and in connection with the future obligations of our former operations. The leases relating to A.J. Wright and other former businesses are long-term obligations, and the estimated cost to us involves numerous estimates and assumptions including when and on what terms we will assign the lease, or sublease the leased properties, whether and for how long we remain obligated with respect to particular leases, the extent to which assignees or subtenants will fulfill our financial and other obligations under the leases, how particular obligations may ultimately be settled and what mitigating factors, including indemnification, may exist to any liability we may have. We develop these assumptions based on past experience and evaluation of various potential outcomes and the circumstances surrounding each situation and location. We

believe that our reserves are reasonable estimates of the most likely outcomes of the future obligations arising out of the Computer Intrusion and the future obligations of our former operations and should be adequate to cover the ultimate costs we will incur. However, actual results may differ from our current estimates, and we may decrease or increase the amount of our reserves to adjust for future developments relating to the underlying assumptions and other factors, although we do not expect any such differences to be material to our results of operations.

Loss contingencies: Certain conditions may exist as of the date the financial statements are issued that may result in a loss to us but will not be resolved until one or more future events occur or fail to occur. Our management, with the assistance of our legal counsel, assesses such contingent liabilities. Such assessments inherently involve the exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against us or claims that may result in such proceedings, our legal counsel assists us in evaluating the perceived merits of any legal proceedings or claims as well as the perceived merits of the relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be reasonably estimated, we will accrue for the estimated liability in the financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be reasonably estimated, we will disclose the nature of the contingent liability, together with an estimate of the range of the possible loss or a statement that such loss is not reasonably estimable.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note A to our consolidated financial statements included in this annual report for recently issued accounting standards, including the expected dates of adoption and estimated effects on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We do not enter into derivatives for speculative or trading purposes.

FOREIGN CURRENCY EXCHANGE RISK

We are exposed to foreign currency exchange rate risk on our investment in our Canadian and European operations on the translation of these foreign operations into the U.S. dollar and on purchases of goods in currencies that are not the local currencies of stores where the goods are sold. As more fully described in Note F to our consolidated financial statements, we hedge a portion of our intercompany transactions with foreign operations and certain merchandise purchase commitments incurred by these operations with derivative financial instruments. We enter into derivative contracts only for the purpose of hedging an underlying economic exposure. We utilize currency forward and swap contracts, designed to offset the gains or losses in the underlying exposures. The contracts are executed with banks we believe are creditworthy and are denominated in currencies of major industrial countries. We have performed a sensitivity analysis assuming a hypothetical 10% adverse movement in foreign currency exchange rates applied to the hedging contracts and the underlying exposures described above as well as the translation of our foreign operations into our reporting currency. As of January 29, 2011, the analysis indicated that such an adverse movement would not have a material effect on our consolidated financial position but could have reduced our pre-tax income for fiscal 2011 by approximately \$43 million.

INTEREST RATE RISK

Our cash equivalents, short-term investments and certain lines of credit bear variable interest rates. Changes in interest rates affect interest earned and paid by us. In addition, changes in the gross amount of our borrowings and future changes in interest rates will affect our future interest expense. We periodically enter into financial instruments to manage our cost of borrowing; however, we believe that fixed interest rates on most of our debt minimizes our exposure to changes in market conditions. We have performed a sensitivity analysis assuming a hypothetical 10% adverse movement in interest rates applied to our maximum variable rate debt outstanding, and to our cash and cash equivalents and short-term investments as of January 29, 2011. The analysis indicated that such an adverse movement as of that date would not have had a material effect on our consolidated financial position, results of operations or cash flows.

EQUITY PRICE RISK

The assets of our qualified pension plan, a large portion of which are equity securities, are subject to the risks and uncertainties of the financial markets. We invest the pension assets in a manner that attempts to minimize and control our exposure to market uncertainties. Investments, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risks. A significant decline in the financial markets can adversely affect the value of our pension plan assets and the funded status of our pension plan, resulting in increased contributions to the plan.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information required by this item may be found on pages F-1 through F-32 of this Annual Report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

We have carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this report pursuant to Rules 13a-15 and 15d-15 of the Exchange Act. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms; and (ii) accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosures. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of implementing controls and procedures.

(b) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fourth quarter of fiscal 2011 identified in connection with our Chief Executive Officer's and Chief Financial Officer's evaluation that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

(c) Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, our principal executive and principal financial officers, or persons performing similar functions, and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. GAAP and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of TJX;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of TJX are being made only in accordance with authorizations of management and directors of TJX; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of TJX's assets that could have a material effect on the financial statements.

Our internal control system is designed to provide reasonable assurance to our management and Board of Directors regarding the preparation and fair presentation of published financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems designed to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of January 29, 2011 based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on that evaluation, management concluded that its internal control over financial reporting was effective as of January 29, 2011.

(d) Attestation Report of the Independent Registered Public Accounting Firm

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited and reported on our consolidated financial statements contained herein, has audited the effectiveness of our internal control over financial reporting as of January 29, 2011, and has issued an attestation report on the effectiveness of our internal control over financial reporting included herein.

ITEM 9B. OTHER INFORMATION

Not applicable.

Part III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The following are the executive officers of TJX as of March 29, 2011:

Name	Age	Office and Employment During Last Five Years
Bernard Cammarata	71	Chairman of the Board since 1999. Acting Chief Executive Officer from September 2005 to January 2007 and Chief Executive Officer from 1989 to 2000. Led TJX and its former TJX subsidiary and T.J. Maxx Division from the organization of the business in 1976 until 2000, including serving as Chief Executive Officer and President of TJX, Chairman and President of TJX's T.J. Maxx Division, and Chairman of The Marmaxx Group.
Ernie Herrman	50	President since January 2011, Senior Executive Vice President, Group President from August 2008 to January 2011. Senior Executive Vice President since January 2007 and President, Marmaxx from January 2005 to August 2008. Senior Executive Vice President, Chief Operating Officer, Marmaxx from 2004 to 2005. Executive Vice President, Merchandising, Marmaxx from 2001 to 2004. Various merchandising positions with TJX since joining in 1989.
Michael MacMillan	54	Senior Executive Vice President, Group President since February 2011. President Marmaxx from August 2008 to January 2011. President, Winners Merchants International (WMI) from June 2003 to August 2008, Executive Vice President, WMI from 2000 to 2003. Various finance positions with TJX since joining in 1985.
Carol Meyrowitz	57	Chief Executive Officer since January 2007, Director since September 2006 and President from October 2005 to January 2011. Consultant to TJX from January 2005 to October 2005. Senior Executive Vice President from March 2004 to January 2005. President of Marmaxx from 2001 to January 2005. Executive Vice President of TJX from 2001 to 2004.
Jeffrey G. Naylor	52	Senior Executive Vice President, Chief Financial and Administrative Officer since February 2009. Senior Executive Vice President, Chief Administrative and Business Development Officer, June 2007 to February 2009. Chief Financial and Administrative Officer, September 2006 to June 2007. TJX will file with the Securities and Exchange Commission a definitive proxy statement no later than 120 days after the close of its fiscal year ended January 29, 2011 (Proxy Statement). The information required by this Item and not given in this Item will appear under the headings "Election of Directors," "Corporate Governance," "Audit Committee Report" and "Beneficial Ownership" in our Proxy Statement, which sections are incorporated in this item by reference.

TJX has a Code of Ethics for TJX Executives governing its Chairman, Chief Executive Officer, President, Chief Financial and Administrative Officer, Principal Accounting Officer and other senior operating, financial and legal executives. The Code of

Ethics for TJX Executives is designed to ensure integrity in its financial reports and public disclosures. TJX also has a Code of Conduct and Business Ethics for Directors which promotes honest and ethical conduct, compliance with applicable laws, rules and regulations and the avoidance of conflicts of interest. Both of these codes of conduct are published at www.tjx.com. We intend to disclose any future amendments to, or waivers from, the Code of Ethics for TJX Executives or the Code of Business Conduct and Ethics for Directors within four business days of the waiver or amendment through a website posting or by filing a Current Report on Form 8-K with the Securities and Exchange Commission.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item will appear under the heading “Executive Compensation” in our Proxy Statement, which section is incorporated in this item by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item will appear under the heading “Beneficial Ownership” in our Proxy Statement, which section is incorporated in this item by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item will appear under the headings “Transactions with Related Persons” and “Corporate Governance” in our Proxy Statement, which sections are incorporated in this item by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this Item will appear under the heading “Audit Committee Report” in our Proxy Statement, which section is incorporated in this item by reference.

Notes to Consolidated Financial Statements	F-7
Financial Statement Schedules:	
Schedule II—Valuation and Qualifying Accounts	39

Report of Independent Registered Public Accounting Firm

To The Board of Directors and Shareholders of The TJX Companies, Inc:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of The TJX Companies, Inc. and its subsidiaries (the "Company") as of January 29, 2011 and January 30, 2010, and the results of their operations and their cash flows for each of the three years in the period ended January 29, 2011 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 29, 2011, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and the financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of the financial statements.

The TJX Companies, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note A. Summary of Accounting Policies

Basis of Presentation: The consolidated financial statements of The TJX Companies, Inc. (referred to as “TJX” or “we”) include the financial statements of all of TJX’s subsidiaries, all of which are wholly owned. All of its activities are conducted by TJX or its subsidiaries and are consolidated in these financial statements. All intercompany transactions have been eliminated in consolidation.

Fiscal Year: During fiscal 2010, TJX amended its bylaws to change its fiscal year end to the Saturday nearest to the last day of January of each year. Previously TJX’s fiscal year ended on the last Saturday of January. The fiscal years ended January 29, 2011 (fiscal 2011) and January 30, 2010 (fiscal 2010) included 52 weeks, while the fiscal year ended January 31, 2009 (fiscal 2009) included 53 weeks. This change shifted the timing of TJX’s next 53 week fiscal year to the fiscal year ending February 2, 2013.

Earnings Per Share: All earnings per share amounts refer to diluted earnings per share unless otherwise indicated.

Use of Estimates: The preparation of the TJX financial statements, in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP), requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent liabilities, at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. TJX considers its accounting policies relating to inventory valuation, impairments of long-lived assets, retirement obligations, share-based compensation, casualty insurance, income taxes, reserves for Computer Intrusion related costs, disposal activity and discontinued operations, and loss contingencies to be the most significant accounting policies that involve management estimates and judgments. Actual amounts could differ from those estimates, and such differences could be material.

Revenue Recognition: TJX records revenue at the time of sale and receipt of merchandise by the customer, net of a reserve for estimated returns. We estimate returns based upon our historical experience. We defer recognition of a layaway sale and its related profit to the accounting period when the customer receives the layaway merchandise. Proceeds from the sale of store cards as well as the value of store cards issued to customers as a result of a return or exchange are deferred until the customers use the cards to acquire merchandise. Based on historical experience, we estimate the amount of store cards that will not be redeemed (“store card breakage”) and, to the extent allowed by local law, these amounts are amortized into income over the redemption period. Revenue recognized from store card breakage was \$10.1 million in fiscal 2011, \$7.8 million in fiscal 2010 and \$10.7 million in fiscal 2009.

Consolidated Statements of Income Classifications: Cost of sales, including buying and occupancy costs, includes the cost of merchandise sold and gains and losses on inventory and fuel-related derivative contracts; store occupancy costs (including real estate taxes, utility and maintenance costs and fixed asset depreciation); the costs of operating our distribution centers; payroll, benefits and travel costs directly associated with buying inventory; and systems costs related to the buying and tracking of inventory.

Selling, general and administrative expenses include store payroll and benefit costs; communication costs; credit and check expenses; advertising; administrative and field management payroll, benefits and travel costs; corporate administrative costs and depreciation; gains and losses on non-inventory related foreign currency exchange contracts; and other miscellaneous income and expense items.

Cash and Cash Equivalents: TJX generally considers highly liquid investments with a maturity of three months or less at the date of purchase to be cash equivalents. Investments with maturities greater than three months but less than one year at the date of purchase are included in short-term investments. Our investments are primarily high-grade commercial paper, institutional money market funds and time deposits with major banks. At January 29, 2011, the Company had \$14.6 million of restricted cash, all of which is reported in other assets on the consolidated balance sheets. The restricted cash serves as collateral that provides financial assurance that the Company will fulfill its obligations with respect to certain leases in Europe. The cash is held in an escrow account and is restricted as to withdrawal or use for a term as long as the underlying lease.

Merchandise Inventories: Inventories are stated at the lower of cost or market. TJX uses the retail method for valuing inventories which results in a weighted average cost. We utilize a permanent markdown strategy and lower the cost value of the inventory that is subject to markdown at the time the retail prices are lowered in our stores. We accrue for inventory

obligations at the time inventory is shipped. At January 29, 2011 and January 30, 2010, in-transit inventory included in merchandise inventories was \$445.7 million and \$396.8 million, respectively. Comparable amounts were reflected in accounts payable at those dates.

Common Stock and Equity: Equity transactions consist primarily of the repurchase by TJX of its common stock under its stock repurchase programs and the recognition of compensation expense and issuance of common stock under TJX's stock incentive plan. In fiscal 2010, we also issued shares upon conversion of convertible notes that were called for redemption, discussed in Note K. Under our stock repurchase programs we repurchase our common stock on the open market. The par value of the shares repurchased is charged to common stock with the excess of the purchase price over par first charged against any available additional paid-in capital ("APIC") and the balance charged to retained earnings. Due to the high volume of repurchases over the past several years, we have no remaining balance in APIC in any of the years presented. All shares repurchased have been retired.

Shares issued under TJX's stock incentive plan are issued from authorized but unissued shares, and proceeds received are recorded by increasing common stock for the par value of the shares with the excess over par added to APIC. Income tax benefits upon the expensing of options result in the creation of a deferred tax asset, while income tax benefits due to the exercise of stock options reduce deferred tax assets to the extent that an asset for the related grant has been created. Any tax benefits greater than the deferred tax assets created at the time of expensing the options are credited to APIC; any deficiencies in the tax benefits are debited to APIC to the extent a pool for such deficiencies exists. In the absence of a pool any deficiencies are realized in the related periods' statements of income through the provision for income taxes. Any excess income tax benefits are included in cash flows from financing activities in the statements of cash flows. The par value of restricted stock awards is also added to common stock when the stock is issued, generally at grant date. The fair value of the restricted stock awards in excess of par value is added to APIC as the awards are amortized into earnings over the related vesting periods. Upon the call of our convertible notes most holders of the notes converted them into TJX common stock. When converted the face value of the convertible notes less unamortized debt discount was relieved, common stock was credited with the par value of the shares issued, and the excess of the carrying value of the convertible notes over par was added to APIC.

Share-Based Compensation: TJX accounts for share-based compensation in accordance with U.S. GAAP whereby it estimates the fair value of each option grant on the date of grant using the Black-Scholes option pricing model. See Note I for a detailed discussion of share-based compensation.

Interest: TJX's interest expense is presented as a net amount. The following is a summary of net interest expense:

Dollars in thousands	Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009
Interest expense	\$49,014	\$49,278	\$ 38,123
Capitalized interest	—	(758)	(1,647)
Interest (income)	(9,877)	(9,011)	(22,185)
Interest expense, net	\$39,137	\$39,509	\$ 14,291

We capitalize interest during the active construction period of major capital projects. Capitalized interest is added to the cost of the related assets.

Depreciation and Amortization: For financial reporting purposes, TJX provides for depreciation and amortization of property using the straight-line method over the estimated useful lives of the assets. Buildings are depreciated over 33 years. Leasehold costs and improvements are generally amortized over their useful life or the committed lease term (typically 10 years), whichever is shorter. Furniture, fixtures and equipment are depreciated over 3 to 10 years. Depreciation and amortization expense for property was \$461.5 million for fiscal 2011, \$435.8 million for fiscal 2010 and \$398.0 million for fiscal 2009. Amortization expense for property held under a capital lease was \$2.2 million in each of fiscal 2011, 2010 and 2009. Maintenance and repairs are charged to expense as incurred. Significant costs incurred for internally developed software are capitalized and amortized over 3 to 10 years. Upon retirement or sale, the cost of disposed assets and the related accumulated depreciation are eliminated and any gain or loss is included in income. Pre-opening costs, including rent, are expensed as incurred.

Lease Accounting: TJX begins to record rent expense when it takes possession of a store, which is typically 30 to

60 days prior to the opening of the store and generally occurs before the commencement of the lease term, as specified in the lease.

Long-Lived Assets: Presented below is information related to carrying values of our long-lived assets by geographic location:

Dollars in thousands	January 29, 2011	January 30, 2010	January 31, 2009
United States	\$1,657,090	\$1,607,733	\$1,631,370
TJX Canada	210,693	195,434	178,176
TJX Europe	592,999	483,930	391,658
Total long-lived assets	\$2,460,782	\$2,287,097	\$2,201,204

Goodwill and Tradename: Goodwill is primarily the excess of the purchase price paid over the carrying value of the minority interest acquired in fiscal 1990 in TJX's former 83%-owned subsidiary and represents goodwill associated with the T.J. Maxx chain. In addition, goodwill includes the excess of cost over the estimated fair market value of the net assets of Winners acquired by TJX in fiscal 1991.

Goodwill totaled \$72.2 million as of January 29, 2011, \$72.1 million as of January 30, 2010 and \$71.8 million as of January 31, 2009. Goodwill is considered to have an indefinite life and accordingly is not amortized. Changes in goodwill are attributable to the effect of exchange rate changes on Winners' reported goodwill.

Tradename is the value assigned to the name "Marshalls," acquired by TJX in fiscal 1996 as part of the acquisition of the Marshalls chain. The value of the tradename was determined by the discounted present value of assumed after-tax royalty payments, offset by a reduction for their pro-rata share of negative goodwill acquired. The Marshalls tradename is carried at a value of \$107.7 million and is considered to have an indefinite life.

TJX occasionally acquires or licenses other trademarks to be used in connection with private label merchandise. Such trademarks are included in other assets and are amortized to cost of sales, including buying and occupancy costs, over their useful life, generally from 7 to 10 years.

Goodwill, tradename and trademarks, and the related accumulated amortization if any, are included in the respective operating segment to which they relate.

Impairment of Long-Lived Assets, Goodwill and Tradename: TJX evaluates its long-lived assets and assets with indefinite lives (other than goodwill and tradename) for indicators of impairment whenever events or changes in circumstances indicate their carrying amounts may not be recoverable, and at least annually in the fourth quarter of each fiscal year. An impairment exists when the undiscounted cash flow of an asset or asset group is less than the carrying cost of that asset or asset group. The evaluation for long-lived assets is performed at the lowest level of identifiable cash flows, which is generally at the individual store level. If indicators of impairment are identified, an undiscounted cash flow analysis is performed to determine if an impairment exists. The store-by-store evaluations did not indicate any recoverability issues (for any of our continuing operations) during the past three fiscal years. Our decision to close the A.J. Wright chain (see Note C) resulted in the impairment of A.J. Wright's fixed assets and impairment charges of \$83 million are reflected in the A.J. Wright segment.

Goodwill is tested for impairment whenever events or changes in circumstances indicate that an impairment may have occurred and at least annually in the fourth quarter of each fiscal year, by comparing the carrying value of the related reporting unit to its fair value. An impairment exists when this analysis, using typical valuation models such as the discounted cash flow method, shows that the fair value of the reporting unit is less than the carrying cost of the reporting unit.

Tradename is also tested for impairment whenever events or changes in circumstances indicate that the carrying amount of the tradename may exceed its fair value and at least annually in the fourth quarter of each fiscal year. Testing is performed by comparing the discounted present value of assumed after-tax royalty payments to the carrying value of the tradename.

There was no impairment related to our goodwill, tradename or trademarks in fiscal 2011, 2010 or 2009.

Advertising Costs: TJX expenses advertising costs as incurred. Advertising expense was \$249.8 million for fiscal 2011, \$227.5 million for fiscal 2010 and \$254.0 million for fiscal 2009.

Foreign Currency Translation: TJX's foreign assets and liabilities are translated into U.S. dollars at fiscal year end exchange rates with resulting translation gains and losses included in shareholders' equity as a component of accumulated

other comprehensive income (loss). Activity of the foreign operations that affect the statements of income and cash flows is translated at average exchange rates prevailing during the fiscal year.

Loss Contingencies: TJX records a reserve for loss contingencies when it is both probable that a loss will be incurred and the amount of the loss is reasonably estimable. TJX evaluates pending litigation and other contingencies at least quarterly and adjusts the reserve for such contingencies for changes in probable and reasonably estimable losses. TJX includes an estimate for related legal costs at the time such costs are both probable and reasonably estimable.

New Accounting Standards: We do not expect the adoption of recently issued accounting pronouncements to have a significant impact on our results of operations, financial position or cash flow.

Note B. Provision (credit) for Computer Intrusion related costs

TJX has a reserve for its estimate of the remaining probable losses arising from an unauthorized intrusion or intrusions (the intrusion or intrusions, collectively, the “Computer Intrusion”) into portions of its computer system, which was discovered late in fiscal 2007 and in which TJX believes customer data were stolen. TJX reduced the Provision for Computer Intrusion related costs by \$11.6 million in fiscal 2011 and by \$30.5 million in fiscal 2009 as a result of negotiations, settlements, insurance proceeds and adjustments in our estimated losses. The reserve balance was \$17.3 million at January 29, 2011 and \$23.5 million at January 30, 2010. As an estimate, the reserve is subject to uncertainty, actual costs may vary from the current estimate however such variations are not expected to be material.

Note C. Dispositions and Reserves Related to Former Operations

TJX has disposal activities relating to two businesses during the last three fiscal years.

Consolidation of A.J. Wright: On December 8, 2010, the Board of Directors approved the consolidation of the A.J. Wright division whereby TJX would convert 90 A.J. Wright stores into T.J. Maxx, Marshalls or HomeGoods stores and close the remaining 72 stores, its two distribution centers and home office. TJX has increasingly improved its ability to reach the A.J. Wright customer demographic through T.J. Maxx and Marshalls stores and has seen these stores perform well in markets with these demographics. Even though the A.J. Wright chain was profitable, consolidating the A.J. Wright chain is expected to allow TJX to serve this customer demographic more efficiently, focus TJX’s financial and managerial resources on fewer, larger businesses with higher returns and enhance the growth prospects for TJX overall. All A.J. Wright stores ceased operating by February 13, 2011 with the conversion to other banners expected to be completed by the end of the first half of fiscal 2012. Our fourth quarter segment results for A.J. Wright include impairment charges, severance and termination benefits, estimated lease obligations and other store closing costs as well as operating losses to liquidate store inventory.

The A.J. Wright consolidation is not classified as a discontinued operation due to our expectation that a significant portion of the sales of the A.J. Wright stores will migrate to other TJX stores. Thus the costs incurred in fiscal 2011 relating to the A.J. Wright consolidation are reflected in continuing operations as part of the A.J. Wright segment which reported a segment loss of \$130 million for fiscal 2011. The fiscal 2011 segment loss includes the following:

Fixed asset impairment charges—Non cash	\$ 82,589
Severance and termination benefits	25,400
Lease obligations and other closing costs	11,700
Operating losses	10,297
Total segment loss	\$129,986

The impairment charges relate to furniture and fixtures and leasehold improvements that will be disposed of and are deemed to have no value, as well as A.J. Wright’s two owned distribution centers. The distribution centers were closed prior to the end of the fiscal year, are being held for sale and were adjusted to fair market value. The impairment charges, severance and termination benefits, lease obligations and other closing costs are included in selling, general and administrative expenses on the consolidated income statement.

In the first half of fiscal 2012, TJX will incur additional store closing costs and operating losses due to the completion of the A.J. Wright store closings as well as the costs to convert the A.J. Wright stores to other TJX banners and grand re-opening costs for those stores. TJX estimates that during fiscal 2012 it will incur additional A.J. Wright segment losses of approximately \$65 million, primarily relating to the completion of store operations and lease related obligations and conversion costs and

grand re-opening costs of approximately \$28 million, which will be reflected in the segments of the new banners into which the stores are converted. The majority of these charges will occur in the first quarter of fiscal 2012.

Sale of Bob's Stores: In fiscal 2009, TJX sold Bob's Stores and recorded as a component of discontinued operations a loss on disposal (including expenses relating to the sale) of \$19 million, net of tax benefits of \$13 million. The net carrying value of Bob's Stores assets sold was \$33 million, which consisted primarily of merchandise inventory of \$56 million, offset by merchandise payable of \$21 million. The loss on disposal reflects sales proceeds of \$7.2 million as well as expenses of \$5.8 million relating to the sale. TJX also remains contingently liable on seven of the Bob's Stores leases.

TJX reclassified the operating results of Bob's Stores for all periods prior to the sale as a component of discontinued operations. The following table presents the net sales, segment profit (loss) and after-tax loss from operations reclassified to discontinued operations for all periods presented:

In thousands	January 31, 2009
Net sales	\$148,040
Segment (loss)	(25,524)
After-tax (loss) from operations	(15,314)

The table below summarizes the pre-tax and after-tax loss from discontinued operations for fiscal 2009:

In thousands	January 31, 2009
(Loss) from discontinued operations before provision for income taxes	\$(56,980)
Tax benefits	22,711
(Loss) from discontinued operations, net of income taxes	\$(34,269)

Reserves Related to Former Operations: TJX has a reserve for its estimate of future obligations of business operations it has closed, sold or otherwise disposed of. The reserve activity for the last three fiscal years is presented below:

In thousands	January 29, 2011	Fiscal Year Ended January 30, 2010	January 31, 2009
Balance at beginning of year	\$35,897	\$40,564	\$46,076
Additions (reductions) to the reserve charged to net income:			
Reduction in reserve for lease related obligations of former operations classified as discontinued operations	(6,000)	—	—
A.J. Wright closing costs	37,100	—	—
Interest accretion	1,475	1,761	1,820
Charges against the reserve:			
Lease related obligations	(7,155)	(5,891)	(7,323)
Termination benefits and all other	(6,622)	(537)	(9)
Balance at end of year	\$54,695	\$35,897	\$40,564

In the fourth quarter of fiscal 2011 we reduced our reserve by \$6 million to reflect a lower estimated cost for lease obligations for former operations classified as discontinued operations, which was recorded to discontinued operations on the income statement. We also added to the reserve the consolidation costs of the A.J. Wright chain detailed above. The reserve balance as of January 29, 2011 includes approximately \$20 million for severance and termination benefits relating to the A.J. Wright consolidation. The lease related obligations reflects our estimation of lease costs, net of estimated subtenant income, and the cost of probable claims against us for liability as an original lessee or guarantor of the leases of former businesses, after mitigation of the number and cost of these lease obligations. The actual net cost of the various lease obligations included in the reserve may differ from our estimate. We estimate that the majority of the former operations reserve will be paid in the next three to five years. The actual timing of cash outflows will vary depending on how the remaining lease obligations are actually settled.

TJX may also be contingently liable on up to 13 leases of BJ's Wholesale Club, a former TJX business, and up to seven leases of Bob's Stores, also a former TJX business, in addition to those included in the reserve. The reserve for discontinued operations does not reflect these leases because TJX does not believe that the likelihood of future liability to TJX is probable.

Note D. Other Comprehensive Income

TJX's comprehensive income information, net of related tax effects, is presented below:

In thousands	Fiscal Year Ended	
	January 29, 2011	January 30, 2010
Net income	\$1,343,141	\$1,213,572
Other comprehensive income (loss):		
Foreign currency translation adjustments	38,325	76,678
Recognition of prior service cost and deferred gains	5,219	8,191
Recognition of unfunded post retirement obligations	(1,175)	(1,212)
Total comprehensive income	\$1,385,510	\$1,297,229

Note E. Capital Stock and Earnings Per Share

Capital Stock: TJX repurchased and retired 27.6 million shares of its common stock at a cost of \$1,200.7 million during fiscal 2011. TJX reflects stock repurchases in its financial statements on a "settlement" basis. We had cash expenditures under our repurchase programs of \$1,193.4 million in fiscal 2011, \$944.8 million in fiscal 2010 and \$751.1 million in fiscal 2009. We repurchased 27.4 million shares in fiscal 2011, 26.9 million shares in fiscal 2010 and 24.3 million shares in fiscal 2009. These expenditures were funded primarily by cash generated from operations together, in fiscal 2009, with the proceeds of a debt issuance. In October 2010, TJX completed the \$1 billion stock repurchase program authorized in September 2009 under which TJX repurchased 24.1 million shares of common stock. In February 2010, TJX's Board of Directors approved another stock repurchase program that authorizes the repurchase of up to an additional \$1 billion of TJX common stock from time to time. Under this plan, on a "trade date" basis, TJX repurchased 9.0 million shares of common stock at a cost of \$405.7 million during fiscal 2011 and \$594.3 million remained available at January 29, 2011. All shares repurchased under the stock repurchase programs have been retired.

In February 2011, TJX's Board of Directors approved a new stock repurchase program that authorizes the repurchase of up to an additional \$1 billion of TJX common stock from time to time.

TJX has five million shares of authorized but unissued preferred stock, \$1 par value.

Earnings Per Share: The following schedule presents the calculation of basic and diluted earnings per share for income from continuing operations:

Amounts in thousands except per share amounts	Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009 (53 weeks)
<i>Basic earnings per share:</i>			
Income from continuing operations	\$1,339,530	\$1,213,572	\$914,886
Weighted average common stock outstanding for basic earnings per share calculation	400,145	417,796	419,076
Basic earnings per share	\$ 3.35	\$ 2.90	\$ 2.18
<i>Diluted earnings per share:</i>			
Income from continuing operations	\$1,339,530	\$1,213,572	\$914,886
Add back: Interest expense on zero coupon convertible subordinated notes, net of income taxes	—	1,073	4,653
Income from continuing operations used for diluted earnings per share calculation	\$1,339,530	\$1,214,645	\$919,539
Weighted average common stock outstanding for basic earnings per share calculation	400,145	417,796	419,076
Assumed conversion/exercise of:			
Convertible subordinated notes	—	3,901	16,434
Stock options and awards	6,268	5,922	6,745
Weighted average common stock outstanding for diluted earnings per share calculation	406,413	427,619	442,255
Diluted earnings per share	\$ 3.30	\$ 2.84	\$ 2.08

In April 2009, TJX called for the redemption of its zero coupon convertible subordinated notes. There were 462,057 notes with a carrying value of \$365.1 million that were converted into 15.1 million shares of TJX common stock at a conversion rate of 32.667 shares per note. TJX paid \$2.3 million to redeem the remaining 2,886 notes outstanding that were not converted.

The weighted average common shares for the diluted earnings per share calculation excludes the impact of outstanding stock options if the assumed proceeds per share of the option is in excess of the related fiscal period's average price of TJX's common stock. Such options are excluded because they would have an antidilutive effect. No such options were excluded at the end of fiscal 2011. There were 9.5 million options excluded at the end of fiscal 2010 and 5.2 million options were excluded at the end of fiscal 2009.

Note F. Financial Instruments

As a result of its operating and financing activities TJX is exposed to market risks from changes in interest and foreign currency exchange rates and fuel costs. These market risks may adversely affect TJX's operating results and financial position. When deemed appropriate, TJX seeks to minimize risk from changes in interest and foreign currency exchange rates and fuel costs through the use of derivative financial instruments. Derivative financial instruments are not used for trading or other speculative purposes. TJX does not use leveraged derivative financial instruments. TJX recognizes all derivative instruments as either assets or liabilities in the statements of financial position and measures those instruments at fair value. The fair values of the derivatives are classified as assets or liabilities, current or non-current, based upon valuation results and settlement dates of the individual contracts. Changes to the fair value of derivative contracts that do not qualify for hedge accounting are reported in earnings in the period of the change. For derivatives that qualify for hedge accounting, changes in the fair value of the derivatives are either recorded in shareholders' equity as a component of other comprehensive income or are recognized currently in earnings, along with an offsetting adjustment against the basis of the item being hedged. Effective in the fourth quarter of fiscal 2009, TJX no longer entered into contracts to hedge its net investments in foreign subsidiaries and settled all existing contracts. As a result, there were no net investment contracts as of January 29, 2011 or January 30, 2010.

Interest Rate Contracts: During fiscal 2004, TJX entered into interest rate swaps with respect to \$100 million of the \$200 million ten-year notes outstanding at that time. Under those interest rate swaps, which settled in December 2009, TJX paid a specific variable interest rate indexed to the six-month LIBOR rate and received a fixed rate applicable to the underlying debt, effectively converting the interest on a portion of the notes from fixed to a floating rate of interest. The interest

income/expense on those swaps was accrued as earned and recorded as an adjustment to the interest expense accrued on the fixed-rate debt. The interest rate swaps were designated as fair value hedges on the underlying debt. The valuation of the swaps resulted in an offsetting fair value adjustment to the debt hedged. Accordingly, current installments of long-term debt were increased by \$1.6 million in fiscal 2009. The average effective interest rate on \$100 million of the 7.45% unsecured notes, inclusive of the effect of hedging activity, was approximately 4.04% in fiscal 2010 and 6.54% in fiscal 2009.

Diesel Fuel Contracts: During fiscal 2011, TJX entered into agreements to hedge a portion of its notional diesel requirements for fiscal 2012, based on the diesel fuel consumed by independent freight carriers transporting the Company's inventory. These economic hedges at January 29, 2011 relate to 10% of TJX's notional diesel requirement in the first quarter of fiscal 2012. These diesel fuel hedge agreements will settle during the first half of fiscal 2012. The fuel hedge agreements outstanding at January 30, 2010 hedged approximately 10% of our notional diesel fuel requirements in the second quarter of fiscal 2011 and 20% of our notional diesel requirement in the third and fourth quarter of fiscal 2011, which settled throughout the year and terminated in February 2011.

Independent freight carriers transporting the Company's inventory charge TJX a mileage surcharge for diesel fuel price increases as incurred by the carrier. The hedge agreements are designed to mitigate the volatility of diesel fuel pricing (and the resulting per mile surcharges payable by TJX) by setting a fixed price per gallon for the period being hedged. TJX elected not to apply hedge accounting rules to these contracts. The change in the fair value of the hedge agreements resulted in a gain of \$1.2 million in fiscal 2011, a gain of \$4.5 million in fiscal 2010 and a loss of \$4.9 million in fiscal 2009, all of which are reflected in earnings as a component of cost of sales, including buying and occupancy costs.

Foreign Currency Contracts: TJX enters into forward foreign currency exchange contracts to obtain economic hedges on portions of merchandise purchases made and anticipated to be made in currencies other than the functional currency of TJX Europe (operating in the United Kingdom, Ireland, Germany and Poland), TJX Canada (Canada) and Marmaxx (U.S.). These contracts are typically twelve months or less in duration. The contracts outstanding at January 29, 2011 cover certain commitments and anticipated needs throughout fiscal 2012. TJX elected not to apply hedge accounting rules to these contracts. The change in the fair value of these contracts resulted in a loss of \$6.8 million in fiscal 2011, income of \$0.5 million in fiscal 2010 and a loss of \$2.3 million in fiscal 2009 and is included in earnings as a component of cost of sales, including buying and occupancy costs.

Until the fourth quarter of fiscal 2009, TJX entered into foreign currency forward and swap contracts in both Canadian dollars and British pounds sterling and accounted for them as hedges of the net investment in and between foreign subsidiaries or cash flow hedges of Winners' long-term intercompany debt. TJX applied hedge accounting to these hedge contracts of our investment in foreign subsidiaries, and changes in fair value of these contracts, as well as gains and losses upon settlement, were recorded in accumulated other comprehensive income, offsetting changes in the cumulative foreign translation adjustments of the foreign subsidiaries. The change in fair value of the contracts designated as hedges of the investment in foreign subsidiaries resulted in a gain of \$68.8 million, net of income taxes, in fiscal 2009. The ineffective portion of the net investment hedges resulted in pre-tax charges to the income statement of \$2.2 million in fiscal 2009. The change in the cumulative foreign currency translation adjustment resulted in a loss of \$38.3 million, net of income taxes, in fiscal 2011, a loss of \$76.7 million, net of income taxes, in fiscal 2010, and a gain of \$171.2 million, net of income taxes, in fiscal 2009. Amounts included in other comprehensive income relating to cash flow hedges were reclassified to earnings as the underlying exposure on the debt had an impact on earnings. The net amount reclassified from other comprehensive income to the income statement in fiscal 2009 related to cash flow hedges was \$0.7 million, net of income taxes.

TJX also enters into derivative contracts, generally designated as fair value hedges, to hedge intercompany debt and intercompany interest payable. The changes in fair value of these contracts are recorded in selling, general and administrative expenses and are offset by marking the underlying item to fair value in the same period. Upon settlement, the realized gains and losses on these contracts are offset by the realized gains and losses of the underlying item in selling, general and administrative expenses. The net impact on the income statement of hedging activity related to these intercompany payables was income of \$0.1 million in fiscal 2011, income of \$3.7 million in fiscal 2010 and expense of \$1.7 million in fiscal 2009.

Following is a summary of TJX's derivative financial instruments, related fair value and balance sheet classification at January 29, 2011:

In thousands	Pay	Receive	Blended Contract Rate	Balance Sheet Location	Current Asset US\$	Current (Liability) US\$	Net Fair Value in US\$ at January 29, 2011

Gain (loss) recognized in income		\$(3,047)	\$(1,751)

Note G. Disclosures about Fair Value of Financial Instruments

The following table sets forth TJX's financial assets and liabilities that are accounted for at fair value on a recurring basis:

In thousands	January 29, 2011	January 30, 2010
Level 1		
Assets:		
Executive savings plan investments	\$73,925	\$ 55,404
Level 2		
Assets:		
Short-term investments	\$76,261	\$130,636
Foreign currency exchange contracts	2,768	5,642
Diesel fuel contracts	746	—
Liabilities:		
Foreign currency exchange contracts	\$ 6,233	\$ 1,029
Diesel fuel contracts	—	442

The fair value of TJX's general corporate debt, including current installments, was estimated by obtaining market quotes given the trading levels of other bonds of the same general issuer type and market perceived credit quality. The fair value of long-term debt at January 29, 2011 was \$881.7 million compared to a carrying value of \$774.4 million. The fair value of long-term debt as of January 30, 2010 was \$862.3 million compared to a carrying value of \$774.3 million. These estimates do not necessarily reflect provisions or restrictions in the various debt agreements that might affect TJX's ability to settle these obligations.

TJX's cash equivalents are stated at cost, which approximates fair value, due to the short maturities of these instruments.

Investments designed to meet obligations under the executive savings plan are invested in securities traded in active markets and are recorded at unadjusted quoted prices.

The foreign currency exchange contracts are valued using broker quotations which include observable market information. TJX does not make adjustments to quotes or prices obtained from brokers or pricing services but does assess the credit risk of counterparties and will adjust final valuations when appropriate. Where independent pricing services provide fair values, TJX obtains an understanding of the methods used in pricing. As such, these derivative instruments are classified within level 2.

Note H. Segment Information

At January 29, 2011, TJX operated five business segments: three in the United States and one each in Canada and Europe. Each of TJX's segments had its own administrative, buying and merchandising organization and distribution network. Of the U.S. based chains, T.J. Maxx and Marshalls, referred to as Marmaxx, are managed together and reported as a single segment and A.J. Wright and HomeGoods each is reported as a separate segment. As a result of the consolidation of A.J. Wright, it will cease to be a business segment after fiscal 2012 (see Note C). Outside the U.S., chains in Canada (Winners, HomeSense and StyleSense) are under common management and reported as the TJX Canada segment, and chains in Europe (T.K. Maxx and HomeSense) are under common management and reported as the TJX Europe segment.

For fiscal 2011, TJX Canada and TJX Europe accounted for 23% of TJX's net sales, 18% of segment profit and 23% of consolidated assets. All of our stores, with the exception of HomeGoods and HomeSense, sell family apparel and home fashions. The HomeGoods and HomeSense stores offer exclusively home fashions. By merchandise category, we derived approximately 61% of our sales from clothing (including footwear), 26% from home fashions and 13% from jewelry and accessories in fiscal 2011.

TJX evaluates the performance of its segments based on "segment profit or loss," which it defines as pre-tax income before general corporate expense, Provision (credit) for Computer Intrusion related costs, and interest expense. "Segment profit or loss," as defined by TJX, may not be comparable to similarly titled measures used by other entities. In addition, this measure of performance should not be considered an alternative to net income or cash flows from operating activities as an indicator of our performance or as a measure of liquidity.

Presented below is selected financial information related to our business segments:

In thousands	January 29, 2011	Fiscal Year Ended January 30, 2010	January 31, 2009 (53 weeks)

	\$ 458,052	\$ 435,218	\$ 401,707

(1) On December 8, 2010, the Board of Directors of TJX approved the consolidation of the A.J. Wright segment. All stores ceased operating under the A.J. Wright banner by February 13, 2011 with the conversion process expected to be completed by the end of the second quarter of fiscal 2012 (see Note C).

(2) Corporate identifiable assets consist primarily of cash, receivables, prepaid insurance, a note receivable, ESP trust, deferred taxes and reflects a significant increase in cash from fiscal 2009 to fiscal 2010.

(3) Reflects activity of Bob's Stores through the date of sale in fiscal 2009 (see Note C).

(4) Includes debt discount accretion and debt expense amortization.

Note I. Stock Incentive Plan

TJX has a stock incentive plan under which options and other share-based awards may be granted to its directors, officers and key employees. This plan has been approved by TJX's shareholders, and all stock compensation awards are made under this plan. The Stock Incentive Plan, as amended with shareholder approval, provides for the issuance of up to 160.9 million shares with 16.9 million shares available for future grants as of January 29, 2011. TJX issues shares from authorized but unissued common stock.

Total compensation cost related to share-based compensation was \$37.7 million, net of income taxes of \$21.1 million, in fiscal 2011, \$33.5 million, net of income taxes of \$21.6 million, in fiscal 2010 and \$31.2 million, net of income taxes of \$20.1 million, in fiscal 2009.

As of January 29, 2011, there was \$108.9 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the plan. That cost is expected to be recognized over a weighted-average period of two years.

Options for the purchase of common stock have been granted at 100% of market price on the grant date and generally vest in thirds over a three-year period starting one year after the grant, and have a ten-year term.

The fair value of options is estimated as of the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	2011	Fiscal Year 2010	2009
Risk-free interest rate	1.57%	2.49%	2.96%
Dividend yield	1.5%	1.3%	1.3%
Expected volatility factor	32.3%	37.3%	33.9%
Expected option life in years	5.0	5.0	4.8
Weighted average fair value of options issued	\$10.84	\$12.27	\$10.46

Expected volatility is based on a combination of implied volatility from traded options on our stock, and historical volatility during a term approximating the expected term of the option granted. We use historical data to estimate option exercise, employee termination behavior and dividend yield within the valuation model. Employee groups and option characteristics are considered separately for valuation purposes when applicable. No such distinctions existed during the fiscal years presented. The expected option life represents an estimate of the period of time options are expected to remain outstanding based upon historical exercise trends. The risk-free rate is for periods within the contractual life of the option based on the U.S. Treasury yield curve in effect at the time of grant.

Stock Options: A summary of the status of TJX's stock options and related Weighted Average Exercise Prices ("WAEP") is presented below (shares in thousands):

	January 29, 2011		Fiscal Year Ended January 30, 2010		January 31, 2009	
	Options	WAEP	Options	WAEP	Options	WAEP
						(53 weeks)
Outstanding at beginning of year	27,975	\$27.92	31,773	\$24.83	35,153	\$22.17
Granted	4,947	41.13	4,877	37.74	5,199	35.02
Exercised and repurchased	(7,368)	24.45	(8,012)	21.30	(7,533)	19.08
Forfeitures	(507)	35.19	(663)	31.79	(1,046)	27.59
Outstanding at end of year	25,047	\$31.41	27,975	\$27.92	31,773	\$24.83
Options exercisable at end of year	15,613	\$26.79	18,372	\$24.01	21,664	\$21.56

Included in the exercised and repurchased amount in the table above are approximately 77,000 options that were repurchased from optionees by TJX during fiscal 2009. There were no such option repurchases during fiscal 2011 or fiscal 2010. Cash paid for such repurchased options amounted to \$0.7 million in fiscal 2009.

The total intrinsic value of options exercised was \$143.3 million in fiscal 2011, \$109.2 million in fiscal 2010 and \$108.1 million in fiscal 2009.

The following table summarizes information about stock options outstanding that were expected to vest and stock options outstanding that were exercisable at January 29, 2011:

In thousands except years and per share amounts	Shares	Aggregate Intrinsic Value	Weighted Average Remaining Contract Life	Weighted Average Exercise Price
Options outstanding expected to vest	8,766	\$ 76,623	9.0 years	\$38.97
Options exercisable	15,613	\$408,345	5.3 years	\$26.79
Total outstanding options vested and expected to vest	24,379	\$484,968	6.6 years	\$31.17

Options outstanding expected to vest represents total unvested options of 9.4 million adjusted for anticipated forfeitures.

Performance-Based Restricted Stock and Other Awards: TJX has issued performance-based restricted and deferred stock awards under the Stock Incentive Plan which are issued at no cost to the recipient of the award and are subject to achievement of specified performance criteria for a period of one to three fiscal years. The grant date fair value of the award is charged to income ratably over the requisite service period during which the recipient must remain employed. The fair value of the awards is determined at date of grant and assumes that performance goals will be achieved. If such goals are not met, no compensation cost is recognized and any recognized compensation cost is reversed.

A summary of the status of our nonvested performance-based restricted stock and changes during fiscal 2011 is presented below:

Shares in thousands	Performance Based Restricted Stock	Weighted Average Grant Date Fair Value
Nonvested at beginning of year	641	\$27.30
Granted	621	46.17
Vested	(259)	27.06
Forfeited	(32)	35.11
Nonvested at end of year	971	\$39.18

There were 621,000 shares of performance-based restricted stock, with a weighted average grant date fair value of \$46.17, granted in fiscal 2011; 470,000 shares of performance-based restricted stock, with a weighted average grant date fair value of \$25.91, granted in fiscal 2010; and 173,000 shares with a weighted average grant date fair value of \$33.49 were granted in fiscal 2009. The fair value of performance-based restricted stock that vested was \$7.0 million in fiscal 2011, \$6.7 million in fiscal 2010 and \$5.9 million in fiscal 2009.

TJX also awards deferred shares to its outside directors under the Stock Incentive Plan. The outside directors are awarded two annual deferred share awards, each representing shares of TJX common stock valued at \$50,000. One award vests immediately and is payable, with accumulated dividends, in stock at the earlier of separation from service as a director or change of control. The second award vests based on service as a director until the annual meeting that follows the award and is payable, with accumulated dividends, in stock at vesting date, unless an irrevocable advance election is made whereby it is payable at the same time as the first award. As of the end of fiscal 2011, a total of 157,619 deferred shares were outstanding under the plan.

Note J. Pension Plans and Other Retirement Benefits

Pension: TJX has a funded defined benefit retirement plan which covered a majority of its full-time U.S. employees hired prior to February 1, 2006. As a result of an amendment to the plan, employees hired after February 1, 2006 do not participate in this plan but are eligible to receive enhanced employer contributions to their 401(k) plans. This plan amendment has not had a material impact on pension expense in the periods presented, but is expected to reduce net periodic pension costs gradually due to a reduction in the number of participants. Employees who had attained twenty-one years of age and completed one year of service prior to amendment were, and remain, covered under the plan. No employee contributions are required, and benefits are based principally on compensation earned in each year of service. Our funded defined benefit retirement plan assets are invested in domestic and international equity and fixed income securities, both directly and through investment funds. The plan does not invest in the securities of TJX. TJX also has an unfunded supplemental retirement plan which covers certain key employees and provides additional retirement benefits based on average compensation for certain of those employees or, alternatively based on benefits that would be provided under the funded retirement plan absent Internal Revenue Code limitations.

Presented below is financial information relating to TJX's funded defined benefit retirement plan (funded plan) and its unfunded supplemental pension plan (unfunded plan) for the fiscal years indicated:

In thousands	Funded Plan Fiscal Year Ended		Unfunded Plan Fiscal Year Ended	
	January 29, 2011	January 30, 2010	January 29, 2011	January 30, 2010
Change in projected benefit obligation:				
Projected benefit obligation at beginning of year	\$580,203	\$492,413	\$51,727	\$ 55,463
Service cost	32,142	30,049	1,202	876
Interest cost	34,429	31,320	2,682	2,923
Actuarial losses (gains)	34,246	39,931	(2,727)	7,686
Settlements	—	—	—	(12,156)
Benefits paid	(12,662)	(11,403)	(3,358)	(3,065)
Expenses paid	(2,002)	(2,107)	—	—
Projected benefit obligation at end of year	\$666,356	\$580,203	\$49,526	\$ 51,727
Accumulated benefit obligation at end of year	\$614,584	\$532,276	\$43,229	\$ 41,855

In thousands	Funded Plan Fiscal Year Ended		Unfunded Plan Fiscal Year Ended	
	January 29, 2011	January 30, 2010	January 29, 2011	January 30, 2010
Change in plan assets:				
Fair value of plan assets at beginning of year	\$508,420	\$314,212	\$ —	\$ —
Actual return on plan assets	69,835	75,018	—	—
Employer contribution	100,000	132,700	3,358	15,221
Benefits paid	(12,662)	(11,403)	(3,358)	(3,065)
Settlements	—	—	—	(12,156)
Expenses paid	(2,002)	(2,107)	—	—
Fair value of plan assets at end of year	\$663,591	\$508,420	\$ —	\$ —
Reconciliation of funded status:				
Projected benefit obligation at end of year	\$666,356	\$580,203	\$49,526	\$ 51,727
Fair value of plan assets at end of year	663,591	508,420	—	—
Funded status—excess obligation	\$ 2,765	\$ 71,783	\$49,526	\$ 51,727
Net liability recognized on consolidated balance sheets	\$ 2,765	\$ 71,783	\$49,526	\$ 51,727
Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income (loss):				
Prior service cost	\$ —	\$ —	\$ 12	\$ 93
Accumulated actuarial losses	149,034	155,752	9,483	13,152
Amounts included in accumulated other comprehensive income (loss)	\$149,034	\$155,752	\$ 9,495	\$ 13,245

The consolidated balance sheets reflect the funded status of the plans with any unrecognized prior service cost and actuarial gains and losses recorded in accumulated other comprehensive income (loss). The combined net accrued liability of \$52.3 million at January 29, 2011 is reflected on the balance sheet as of that date as a current liability of \$2.8 million and a long-term liability of \$49.5 million.

The combined net accrued liability of \$123.5 million at January 30, 2010 is reflected on the balance sheet as of that date as a current liability of \$3.8 million and a long-term liability of \$119.7 million.

The estimated prior service cost that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost in fiscal 2012 for both the funded and unfunded plan is immaterial. The estimated net actuarial loss that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost in fiscal 2012 is \$9.3 million for the funded plan and \$0.8 million for the unfunded plan.

Weighted average assumptions for measurement purposes for determining the obligation at the year end measurement date:

	Funded Plan Fiscal Year Ended		Unfunded Plan Fiscal Year Ended	
	January 29, 2011	January 30, 2010	January 29, 2011	January 30, 2010
Discount rate	5.75%	6.00%	5.25%	5.75%
Expected return on plan assets	8.00%	8.00%	N/A	N/A
Rate of compensation increase	4.00%	4.00%	6.00%	6.00%

TJX determines the assumed discount rate using the Citigroup Pension Liability Index. TJX develops its long-term rate of return assumption by evaluating input from professional advisors taking into account the asset allocation of the portfolio and long-term asset class return expectations, as well as long-term inflation assumptions.

TJX made aggregate cash contributions of \$103.4 million in fiscal 2011, \$147.9 million in fiscal 2010 and \$2.8 million in fiscal 2009 to the defined benefit retirement plan and to fund current benefit and expense payments under the unfunded plan. The cash contributions made in fiscal 2009 were solely to fund current benefit and expense payments under the unfunded plan. TJX's policy with respect to the qualified defined benefit plan is to fund, at a minimum, the

amount required to maintain a funded status of 80% of the applicable pension liability (the Funding Target) or such other amount sufficient to avoid restrictions with respect to the funding of nonqualified plans under the Internal Revenue Code. As a result of funding in fiscal 2011, we do not anticipate any required funding in fiscal 2012 for the defined benefit retirement plan. We anticipate making contributions of \$3.9 million to fund current benefit and expense payments under the unfunded plan in fiscal 2012.

Following are the components of net periodic benefit cost and other amounts recognized in other comprehensive income related to our pension plans:

Dollars in thousands	Funded Plan Fiscal Year Ended			Unfunded Plan Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009 (53 weeks)	January 29, 2011	January 30, 2010	January 31, 2009 (53 weeks)
Net periodic pension cost:						
Service cost	\$ 32,142	\$ 30,049	\$ 30,406	\$ 1,202	\$ 876	\$ 1,069
Interest cost	34,429	31,320	28,711	2,682	2,923	3,366
Expected return on plan assets	(40,043)	(28,222)	(34,369)	—	—	—
Settlement costs	—	—	—	—	2,447	—
Amortization of prior service cost	—	15	43	81	125	124
Amortization of net actuarial loss	11,172	13,656	—	941	1,045	1,270
Net periodic pension cost	\$ 37,700	\$ 46,818	\$ 24,791	\$ 4,906	\$ 7,416	\$ 5,829
Other changes in plan assets and benefit obligations recognized in other comprehensive income						
Net (gain) loss	\$ 4,454	\$ (6,866)	\$ 142,186	\$ (2,727)	\$ 7,686	\$ 2,252
Settlement costs	—	—	—	—	(2,447)	—
Amortization of net (loss)	(11,172)	(13,656)	—	(941)	(1,045)	(1,270)
Amortization of prior service cost	—	(15)	(44)	(81)	(125)	(125)
Total recognized in other comprehensive income	\$ (6,718)	\$ (20,537)	\$ 142,142	\$ (3,749)	\$ 4,069	\$ 857
Total recognized in net periodic benefit cost and other comprehensive income	\$ 30,982	\$ 26,281	\$ 166,933	\$ 1,157	\$ 11,485	\$ 6,686
Weighted average assumptions for expense purposes:						
Discount rate	6.00%	6.50%	6.50%	5.75%	6.50%	6.25%
Expected rate of return on plan assets	8.00%	8.00%	8.00%	N/A	N/A	N/A
Rate of compensation increase	4.00%	4.00%	4.00%	6.00%	6.00%	6.00%

The unrecognized gains and losses in excess of 10% of the projected benefit obligation are amortized over the average remaining service life of participants. In addition, for the unfunded plan, unrecognized actuarial gains and losses that exceed 30% of the projected benefit obligation are fully recognized in net periodic pension cost.

Following is a schedule of the benefits expected to be paid in each of the next five fiscal years and in the aggregate for the five fiscal years thereafter:

In thousands	Funded Plan Expected Benefit Payments	Unfunded Plan Expected Benefit Payments
Fiscal Year		
2012	\$ 17,537	\$ 3,909
2013	20,055	3,532
2014	22,794	3,260
2015	25,672	3,194
2016	28,666	2,218
2017 through 2021	196,802	20,855

The following table presents the fair value hierarchy for pension and postretirement assets measured at fair value on a recurring basis as of January 29, 2011:

Balance as of January 30, 2010	19,817	7,779
Earned income, net of management expenses	(269)	(416)
Unrealized gain on investment	2,233	2,896
Purchases, sales, issuances and settlements, net	(5,681)	350
Balance as of January 29, 2011	\$ 16,100	\$10,609

Pension plan assets are reported at fair value. Investments in equity securities traded on a national securities exchange are valued at the composite close price, as reported in the Wall Street Journal, as of the financial statement date. This information is provided by the independent pricing services IDC, Bloomberg and Reuters.

Certain corporate and government bonds are valued at the closing price reported in the active market in which the bond is traded. Other bonds are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks. All bonds are priced by IDC, JP Morgan and Reuters.

The investments in the limited partnerships are stated at the fair value of the Plan's partnership interest based on information supplied by the partnerships as compared to financial statements of the limited partnership or other fair value information as determined by management. Any cash equivalents or short-term investments are stated at cost which approximates fair value.

The fair value of the investments in the Common/Collective trusts is determined based on net asset value as reported by their fund managers.

The following is a summary of our target allocation for plan assets along with the actual allocation of plan assets as of the valuation date for the fiscal years presented:

	Target Allocation	Actual Allocation for Fiscal Year Ended	
		January 29, 2011	January 30, 2010
Equity securities	50%	43%	47%
Fixed income	50%	41%	37%
All other—primarily cash	—	16%	16%

We employ a total return investment approach whereby a mix of equities and fixed income investments is used to seek to maximize the long-term return on plan assets with a prudent level of risk. Risks are sought to be mitigated through asset diversification and the use of multiple investment managers. Investment risk is measured and monitored on an ongoing basis through quarterly investment portfolio reviews, annual liability measurements and periodic asset/liability studies.

TJX also sponsors an employee savings plan under Section 401(k) of the Internal Revenue Code for all eligible U.S. employees and a similar type plan for eligible employees in Puerto Rico. Assets under the plans totaled \$776.0 million as of December 31, 2010 and \$676.4 million as of December 31, 2009 and are invested in a variety of funds. Employees may contribute up to 50% of eligible pay, subject to limitation. TJX matches employee contributions, up to 5% of eligible pay, at rates ranging from 25% to 50%, based upon TJX's performance and makes discretionary contributions from time to time. Employees hired after February 1, 2006 are eligible for participation in the savings plans with an enhanced matching formula beginning five years after hire date. TJX contributed \$13.9 million in fiscal 2011, \$13.3 million in fiscal 2010 and \$8.6 million in fiscal 2009 to the employee savings plans. Employees cannot invest their

contributions in the TJX stock fund option in the plans, and may elect to invest up to only 50% of TJX's contribution in the TJX stock fund. The TJX stock fund has no other trading restrictions. The TJX stock fund represents 4.7% of plan investments at December 31, 2010, 4.5% at December 31, 2009 and 3.3% at December 31, 2008.

TJX also has a nonqualified savings plan for certain U.S. employees. TJX matches employee deferrals at various rates which amounted to \$2.4 million in fiscal 2011, \$1.9 million in fiscal 2010 and \$425,432 in fiscal 2009. Although the plan is unfunded, in order to help meet its future obligations TJX transfers an amount equal to employee deferrals and the related company match to a separate "rabbi" trust. The trust assets, which are invested in a variety of mutual funds, are included in other assets on the balance sheets.

In addition to the plans described above, TJX also maintains retirement/deferred savings plans for eligible associates at its foreign subsidiaries. We contributed \$5.2 million for these plans in fiscal 2011, \$4.6 million for these plans in fiscal 2010 and \$4.2 million in fiscal 2009.

Postretirement Medical: TJX has an unfunded postretirement medical plan that provides limited postretirement medical and life insurance benefits to retirees who participate in its retirement plan and who retired at age 55 or older with ten or more years of service. During the fourth quarter of fiscal 2006, TJX eliminated this benefit for all active associates and modified the benefit to cover only retirees enrolled in the plan at that time. The plan amendment replaces the previous medical benefits with a defined amount (up to \$35.00 per month) that approximates the cost of enrollment in the Medicare Plan for retirees enrolled in the plan at the time of modification.

TJX paid \$233,000 of benefits in fiscal 2011 and will pay similar amounts over the next several years. The post retirement medical liability as of January 29, 2011 is estimated at \$1.5 million, of which \$1.3 million is included in non-current liabilities on the balance sheet.

The amendment to plan benefits in fiscal 2006 resulted in a negative plan amendment of \$46.8 million which is being amortized into income over the average remaining life of the active plan participants. The unamortized balance of \$23.3 million as of January 29, 2011 is included in accumulated other comprehensive income (loss) of which \$3.8 million will be amortized into income in fiscal 2012. During fiscal 2011, there was a pre-tax net benefit of \$3.4 million reflected in the income statement as it relates to this post retirement medical plan.

Note K. Long-Term Debt and Credit Lines

The table below presents long-term debt, exclusive of current installments, as of January 29, 2011 and January 30, 2010. All amounts are net of unamortized debt discounts. Capital lease obligations are separately presented in Note M.

In thousands	January 29, 2011	January 30, 2010
General corporate debt:		
4.20% senior unsecured notes, maturing August 15, 2015 (effective interest rate of 4.20% after reduction of unamortized debt discount of \$24 and \$29 in fiscal 2011 and 2010, respectively)	\$399,976	\$399,971
6.95% senior unsecured notes, maturing April 15, 2019 (effective interest rate of 6.98% after reduction of unamortized debt discount of \$576 and \$646 in fiscal 2011 and 2010, respectively)	374,424	374,354
Long-term debt, exclusive of current installments	\$774,400	\$774,325

The aggregate maturities of long-term debt, exclusive of current installments at January 29, 2011 are as follows:

In thousands	Long-Term Debt
Fiscal Year	
2013	\$ —
2014	—
2015	—
2016	400,000
Later years	375,000
Less amount representing unamortized debt discount	(600)
Aggregate maturities of long-term debt, exclusive of current installments	\$774,400

On April 7, 2009, TJX issued \$375 million aggregate principal amount of 6.95% ten-year notes and used the proceeds from the 6.95% notes offering to repurchase additional common stock under its stock repurchase program in fiscal 2010. Also in April 2009, prior to the issuance of the 6.95% notes, TJX entered into a rate-lock agreement to hedge the underlying treasury rate of those notes. The cost of this agreement is being amortized to interest expense over the term of the 6.95% notes and results in an effective fixed rate of 7.00% on those notes.

On July 23, 2009, TJX issued \$400 million aggregate principal amount of 4.20% six-year notes. TJX used a portion of the proceeds from the sale of the notes to refinance its C\$235 million term credit facility on August 10, 2009, prior to its scheduled maturity, and used the remainder, together with funds from operations, to repay its \$200 million 7.45% notes due December 15, 2009, at maturity. Also in July 2009, prior to the issuance of the 4.20% notes, TJX entered into a rate-lock agreement to hedge the underlying treasury rate on \$250 million of those notes. The cost of this agreement is being amortized to interest expense over the term of the 4.20% notes and results in an effective fixed rate of 4.19% on the notes.

In February 2001, TJX issued \$517.5 million zero coupon convertible subordinated notes due in February 2021 and raised gross proceeds of \$347.6 million. The issue price of the notes represented a yield to maturity of 2% per year. During fiscal 2010, TJX called for the redemption of these notes at the original issue price plus accrued original issue discount, and 462,057 notes with a carrying value of \$365.1 million were converted into 15.1 million shares of TJX common stock at a rate of 32.667 shares per note. TJX paid \$2.3 million to redeem the remaining 2,886 notes outstanding that were not converted. Prior to fiscal 2010, a total of 52,557 notes were either converted into common shares of TJX or put back to TJX.

In May 2010, TJX entered into a \$500 million three-year revolving credit facility with similar terms and provisions as the \$500 million facility it replaced, updated for market pricing. As of January 29, 2011, TJX also had a \$500 million five-year revolving credit facility maturing in May 2011. The three-year agreement requires the payment of 17.5 basis points annually on the unused committed amount. The five-year agreement maturing in May 2011 requires the payment of six basis points annually on the committed amount (whether used or unused). There were no U.S. short-term borrowings outstanding during fiscal 2011. The maximum amount of our U.S. short-term borrowings outstanding was \$165 million during fiscal 2010. Both of these agreements have no compensating balance requirements, have various covenants including a requirement of a specified ratio of debt to earnings, and serve as back up to TJX's commercial paper program. There were no outstanding amounts under these credit facilities as of January 29, 2011 or January 30, 2010.

As of January 29, 2011 and January 30, 2010, TJX's foreign subsidiaries had uncommitted credit facilities. TJX Canada had two credit lines, a C\$10 million facility for operating expenses and a C\$10 million letter of credit facility. As of January 29, 2011 and January 30, 2010, there were no amounts outstanding on the Canadian credit line for operating expenses and there were no short-term borrowings during fiscal 2011 or fiscal 2010. As of January 29, 2011, TJX Europe had a credit line of £20 million. There were no outstanding borrowings on this U.K. credit line as of January 29, 2011 and January 30, 2010. The maximum amount outstanding under this U.K. line was £1.0 million in fiscal 2011 and £1.9 million in fiscal 2010.

Note L. Income Taxes

The provision for income taxes includes the following:

In thousands	Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009 (53 weeks)
Current:			
Federal	\$510,629	\$465,799	\$259,857
State	113,573	104,621	27,376
Foreign	105,489	114,195	97,976
Deferred:			
Federal	91,568	54,544	126,816
State	1,731	1,773	23,955
Foreign	1,572	(2,942)	74
Provision for income taxes	\$824,562	\$737,990	\$536,054

Income from continuing operations before income taxes includes foreign pre-tax income of \$354.2 million in fiscal 2011, \$342.3 million in fiscal 2010, and \$292.6 million in fiscal 2009.

TJX had net deferred tax (liabilities) assets as follows:

In thousands	Fiscal Year Ended	
	January 29, 2011	January 30, 2010
Deferred tax assets:		
Foreign tax credit carryforward	\$ 43,088	\$ 89,796
Reserve for former operations	17,641	11,813
Pension, stock compensation, postretirement and employee benefits	214,578	253,926
Leases	39,567	39,635
Foreign currency and hedging	3,973	3,743
Computer Intrusion reserve	6,285	8,722
Other	61,421	88,447
Total deferred tax assets	\$ 386,553	\$496,082
Deferred tax liabilities:		
Property, plant and equipment	\$ 274,725	\$274,937
Capitalized inventory	45,871	44,079
Tradename	42,873	42,873
Undistributed foreign earnings	183,906	193,252
Other	15,011	10,926
Total deferred tax liabilities	\$ 562,386	\$566,067
Net deferred tax (liability)	\$(175,833)	\$ (69,985)

The fiscal 2011 net deferred tax liability is presented on the balance sheet as a current asset of \$66.1 million and a non-current liability of \$241.9 million. The fiscal 2010 net deferred tax liability is presented on the balance sheet as a current asset of \$122.5 million and a non-current liability of \$192.4 million. TJX has provided for deferred U.S. taxes on all undistributed earnings from its Winners Canadian subsidiary, its Marshalls Puerto Rico subsidiary and its Italian subsidiary through January 29, 2011. All earnings of TJX's other foreign subsidiaries are considered indefinitely reinvested and no U.S. deferred taxes have been provided on those earnings. The net deferred tax liability summarized above includes deferred taxes relating to temporary differences at our foreign operations and amounted to a \$20.1 million net liability as of January 29, 2011, and \$18.9 million net liability as of January 30, 2010.

TJX established valuation allowances against certain deferred tax assets, primarily related to state tax net operating losses, which may not be realized in future years. The amount of the valuation allowances was \$4.9 million as of January 29, 2011 and \$3.9 million as of January 30, 2010.

TJX's worldwide effective income tax rate was 38.1% for fiscal 2011, 37.8% for fiscal 2010 and 36.9% for fiscal 2009. The difference between the U.S. federal statutory income tax rate and TJX's worldwide effective income tax rate is reconciled below:

	Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009
U.S. federal statutory income tax rate	35.0%	35.0%	35.0%
Effective state income tax rate	4.1	4.3	2.8
Impact of foreign operations	(0.5)	(0.6)	(0.1)
All Other	(0.5)	(0.9)	(0.8)
Worldwide effective income tax rate	38.1%	37.8%	36.9%

The increase in TJX's effective income tax rate for fiscal 2011 as compared to fiscal 2010 is primarily attributed to the effects of repatriation of cash from Europe and the increase in state tax reserves, partially offset by the finalization of an advance pricing agreement between Canada and the United States and a favorable Canadian court ruling regarding withholding taxes. The increase in our effective income tax rate for fiscal 2010 as compared to fiscal 2009 is primarily attributed to the favorable impact in fiscal 2009 of a \$19 million reduction in the reserve for uncertain tax positions arising from the settlement of several state tax audits. The absence of this fiscal 2009 benefit increased the effective income tax rate in fiscal 2010 by 1.3 percentage points, partially offset by a reduction in the effective income tax rate related to foreign income.

In the first quarter of fiscal 2008, TJX adopted the tax accounting provisions for recognizing and measuring tax positions taken or expected to be taken in a tax return that affect amounts reported in the financial statements. TJX had net unrecognized tax benefits of \$122.9 million as of January 29, 2011, \$121.0 million as of January 30, 2010 and \$129.9 million as of January 31, 2009.

A reconciliation of the beginning and ending gross amount of unrecognized tax benefits is as follows:

In thousands	Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009
Balance at beginning of year	\$191,741	\$202,543	\$232,859
Additions for uncertain tax positions taken in current year	3,968	59,301	59,807
Additions for uncertain tax positions taken in prior years	23,730	1,444	1,848
Reductions for uncertain tax positions taken in prior years	(92,483)	(53,612)	(80,959)
Reductions resulting from lapse of statute of limitations	(1,123)	(3,267)	(2,002)
Settlements with tax authorities	(2,739)	(14,668)	(9,010)
Balance at end of year	\$123,094	\$191,741	\$202,543

Included in the gross amount of unrecognized tax benefits are items that will not impact future effective tax rates upon recognition. These items amount to \$11.0 million as of January 29, 2011, \$57.6 million as of January 30, 2010 and \$49.3 million as of January 31, 2009.

TJX is subject to U.S. federal income tax as well as income tax in multiple state, local and foreign jurisdictions. In nearly all jurisdictions, the tax years through fiscal 2001 are no longer subject to examination.

TJX's accounting policy is to classify interest and penalties related to income tax matters as part of income tax expense. The amount of interest and penalties expensed was \$1.9 million for the year ended January 29, 2011, \$7.6 million for the year ended January 30, 2010 and \$15.3 million for the year ended January 31, 2009. The accrued amounts for interest and penalties are \$34.6 million as of January 29, 2011, \$50.6 million as of January 30, 2010 and \$51.1 million as of January 31, 2009.

Based on the final resolution of tax examinations, judicial or administrative proceedings, changes in facts or law, expirations of statute of limitations in specific jurisdictions or other resolutions of, or changes in, tax positions, it is reasonably possible that unrecognized tax benefits for certain tax positions taken on previously filed tax returns may change materially from those represented on the financial statements as of January 29, 2011. During the next twelve months, it is reasonably possible that such circumstances may occur that would have a material effect on previously

unrecognized tax benefits. As a result, the total net amount of unrecognized tax benefits may decrease, which would reduce the provision for taxes on earnings by a range estimated at \$1.0 million to \$49.0 million.

Note M. Commitments

TJX is committed under long-term leases related to its continuing operations for the rental of real estate and fixtures and equipment. Most of our leases are store operating leases with a ten-year initial term and options to extend for one or more five-year periods. TJX Europe generally enters leases for ten to fifteen years with five-or ten-year kick-out options. Many of our leases contain escalation clauses and some contain early termination penalties. In addition, we are generally required to pay insurance, real estate taxes and other operating expenses including, in some cases, rentals based on a percentage of sales. These expenses in the aggregate were approximately one-third of the total minimum rent in fiscal 2011, fiscal 2010 and fiscal 2009.

Following is a schedule of future minimum lease payments for continuing operations as of January 29, 2011:

In thousands	Capital Lease	Operating Leases
Fiscal Year		
2012	\$ 3,897	\$1,092,709
2013	3,912	1,022,364
2014	3,912	915,656
2015	3,912	794,253
2016	3,586	670,437
Later years	—	2,304,674
Total future minimum lease payments	19,219	\$6,800,093
Less amount representing interest	3,375	
Net present value of minimum capital lease payments	\$15,844	

The capital lease relates to a 283,000-square-foot portion of TJX's home office facility. Rental payments commenced June 1, 2001, and we recognized a capital lease asset and related obligation equal to the present value of the lease payments of \$32.6 million.

Rental expense under operating leases for continuing operations amounted to \$1,031.4 million for fiscal 2011, \$962.0 million for fiscal 2010 and \$936.6 million for fiscal 2009. Rental expense includes contingent rent and is reported net of sublease income. Contingent rent paid was \$12.0 million in fiscal 2011, \$13.0 million in fiscal 2010 and \$8.3 million in fiscal 2009. Sublease income was \$1.2 million in fiscal 2011, \$1.3 million in fiscal 2010 and \$2.1 million in fiscal 2009. The total net present value of TJX's minimum operating lease obligations approximated \$5,572.6 million as of January 29, 2011.

TJX had outstanding letters of credit totaling \$39.1 million as of January 29, 2011 and \$37.6 million as of January 30, 2010. Letters of credit are issued by TJX primarily for the purchase of inventory.

Note N. Accrued Expenses and Other Liabilities, Current and Long Term

The major components of accrued expenses and other current liabilities are as follows:

In thousands	Fiscal Year Ended	
	January 29, 2011	January 30, 2010
Employee compensation and benefits, current	\$ 375,013	\$ 394,070
Computer Intrusion	17,340	23,481
Reserve for former operations — short term	30,598	—
Rent, utilities and occupancy, including real estate taxes	164,459	152,997
Merchandise credits and gift certificates	167,675	146,464
Insurance	39,518	39,302
Sales tax collections and V.A.T. taxes	93,234	97,167
All other current liabilities	460,114	394,521
Accrued expenses and other current liabilities	\$1,347,951	\$1,248,002

All other current liabilities include accruals for advertising, property additions, dividends, freight, interest, reserve for sales returns, purchased services, and other items, each of which are individually less than 5% of current liabilities.

The major components of other long-term liabilities are as follows:

In thousands	Fiscal Year Ended	
	January 29, 2011	January 30, 2010
Employee compensation and benefits, long term	\$209,042	\$254,503
Reserve for former operations — long term	24,097	35,897
Accrued rent	165,284	151,006
Landlord allowances	76,236	57,693
Tax reserve, long term	179,758	181,740
Long-term liabilities — other	54,904	16,260
Other long-term liabilities	\$709,321	\$697,099

Note O. Contingent Obligations and Contingencies

Contingent Obligations: TJX has contingent obligations on leases, for which it was a lessee or guarantor, which were assigned to third parties without TJX being released by the landlords. Over many years, we have assigned numerous leases that we originally leased or guaranteed to a significant number of third parties. With the exception of leases of former businesses for which we have reserved, we have rarely had a claim with respect to assigned leases, and accordingly, we do not expect that such leases will have a material adverse impact on our financial condition, results of operations or cash flows. We do not generally have sufficient information about these leases to estimate our potential contingent obligations under them, which could be triggered in the event that one or more of the current tenants does not fulfill their obligations related to one or more of these leases.

TJX also has contingent obligations in connection with some assigned or sublet properties that TJX is able to estimate. We estimate that the undiscounted obligations of (i) leases of former operations not included in our reserve for former operations and (ii) properties of our former operations that we would expect to sublet, if the subtenants did not fulfill their obligations, is approximately \$75 million as of January 29, 2011. We believe that most or all of these contingent obligations will not revert to us and, to the extent they do, will be resolved for substantially less due to mitigating factors.

TJX is a party to various agreements under which we may be obligated to indemnify the other party with respect to breach of warranty or losses related to such matters as title to assets sold, specified environmental matters or certain income taxes. These obligations are typically limited in time and amount. There are no amounts reflected in our balance sheets with respect to these contingent obligations.

Contingencies: TJX is involved from time to time in claims, proceedings and litigation arising in the ordinary course of business. Among these, TJX is a defendant in several lawsuits filed in federal and state courts in California, New York and

Texas purportedly brought as class or collective actions on behalf of various groups of current and former salaried and hourly associates in the U.S. The lawsuits allege violations of the Fair Labor Standards Act and of state wage and hour statutes, including alleged misclassification of positions as exempt from overtime and alleged entitlement to additional wages for alleged off-the-clock work by hourly employees. The lawsuits seek unspecified monetary damages, injunctive relief and attorneys' fees. TJX is vigorously defending these claims. At this time, TJX is not able to predict the outcome of these lawsuits or the amount of any loss that may arise from them.

Note P. Supplemental Cash Flows Information

The cash flows required to satisfy contingent obligations of the discontinued operations as discussed in Note C, are classified as a reduction in cash provided by continuing operations. There are no remaining operating activities relating to these operations.

TJX's cash payments for interest and income taxes and non-cash investing and financing activities are as follows:

In thousands	Fiscal Year Ended		
	January 29, 2011	January 30, 2010	January 31, 2009
			(53 weeks)
Cash paid for:			
Interest on debt	\$ 48,501	\$ 30,638	\$ 28,269
Income taxes	787,273	494,169	449,916
Changes in accrued expenses due to:			
Dividends payable	\$ 9,675	\$ 3,829	\$ 6,945
Property additions	14,568	37,060	(19,829)
Non-cash investing and financing activity:			
Conversion of zero coupon convertible notes	\$ —	\$365,088	\$ —

There were no non-cash financing or investing activities during fiscal 2011 and fiscal 2009.

Note Q. Selected Quarterly Financial Data (Unaudited)

Presented below is selected quarterly consolidated financial data for fiscal 2011 and fiscal 2010 which was prepared on the same basis as the audited consolidated financial statements and includes all adjustments necessary to present fairly, in all material respects, the information set forth therein on a consistent basis.

In thousands except per share amounts	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Fiscal Year Ended January 29, 2011				
Net sales	\$5,016,540	\$5,068,080	\$5,525,847	\$6,331,726
Gross earnings ⁽¹⁾	1,367,866	1,348,870	1,519,443	1,665,553
Income from continuing operations ⁽²⁾	331,434	304,984	372,309	330,803
Net income ⁽³⁾	331,434	304,984	372,309	334,414
Income from continuing operations				
Basic earnings per share	0.81	0.76	0.94	0.84
Diluted earnings per share	0.80	0.74	0.92	0.83
Net income				
Basic earnings per share	0.81	0.76	0.94	0.85
Diluted earnings per share	0.80	0.74	0.92	0.84
Fiscal Year Ended January 30, 2010				
Net sales	\$4,354,224	\$4,747,528	\$5,244,946	\$5,941,746
Gross earnings ⁽¹⁾	1,080,878	1,213,226	1,442,767	1,583,144
Net income	209,214	261,561	347,799	394,998
Basic earnings per share	0.51	0.62	0.82	0.96
Diluted earnings per share	0.49	0.61	0.81	0.94

(1) Gross earnings equal net sales less cost of sales, including buying and occupancy costs.

(2) The fourth quarter of fiscal 2011 income from continuing operations includes a pre-tax \$141 million negative impact from the A.J. Wright segment, or \$0.21 per share (see Note C). The second quarter of fiscal 2011 income from continuing operations includes a pre-tax \$12 million benefit from a reduction in the Company's provision related to the previously announced Computer Intrusion(s), or \$0.02 per share (see Note B).

(3) The fourth quarter of fiscal 2011 net income includes a \$4 million, net of income taxes of \$2 million, or \$0.01 per share, benefit from a reduction in the Company's reserve related to discontinued operations.

The TJX Companies, Inc., the largest off-price apparel and home fashions retailer in the United States and worldwide, is a Fortune 200 company operating four major divisions: The Marmaxx Group, HomeGoods, TJX Canada and TJX Europe. With over 2,700 stores and more than 160,000 Associates, we see ourselves as a global, off-price, value retailer and our mission is to deliver great value to our customers through the combination of quality, fashion, brand, and price. We operate with a rapidly changing assortment of brand name merchandise at prices that are 20-60% less than department and specialty store regular prices, every day. We continue to broaden our customer reach by appealing to a wider demographic, with our core target customer being a middle- to upper-middle-income shopper, who is fashion and value conscious and fits the same profile as a department store shopper.

UNITED STATES

T.J. Maxx was founded in 1976, and together with Marshalls, forms The Marmaxx Group, the largest off-price retailer of apparel and home fashions in the U.S. T.J. Maxx operated 923 stores in 48 states and Puerto Rico at year-end 2010. T.J. Maxx offers family apparel and home fashions with expanded fine jewelry and accessories departments and in some stores, The Runway, a high-end designer department. T.J. Maxx stores average approximately 30,000 square feet in size.

Marshalls was acquired by TJX in 1995, and with T.J. Maxx, forms The Marmaxx Group, the largest off-price retailer of apparel and home fashions in the U.S. Marshalls operated 830 stores in 42 states and Puerto Rico at 2010's year-end. Marshalls offers family apparel and home fashions, including expanded footwear and men's departments and The CUBE, a department specifically for juniors. Marshalls also operates the Marshalls Shoe Shop, a standalone store featuring shoes and accessories. Marshalls stores average approximately 32,000 square feet in size.

HomeGoods, introduced in 1992, is a destination for off-price home fashions, including giftware, home basics, accent furniture, lamps, rugs and wall décor. HomeGoods operates in a standalone and superstore format which couples HomeGoods with T.J. Maxx or Marshalls. At 2010's year-end, HomeGoods operated 336 stores, with standalone stores averaging approximately 27,000 square feet in size.

TJX CANADA

WINNERS®

Winners is the leading off-price family apparel and home fashions retailer in Canada, acquired by TJX in 1990. Select Winners stores offer fine jewelry and some feature The Runway, a high-end designer department. Winners operated 215 stores at 2010's year-end, which average approximately 29,000 square feet in size. In 2008, Winners launched STYLESENSE which, through its three stores, offers shoes for the whole family, handbags and accessories.

HOMESENSE®

HomeSense introduced the home fashions off-price concept to Canada in 2001. This chain offers a broad array of home basics and home décor merchandise. It operates in a standalone and superstore format, which pairs HomeSense with Winners. At 2010's year-end, HomeSense operated 82 stores in Canada, with standalone stores averaging approximately 25,000 square feet in size.

Marshalls launched in Canada in March 2011, with six planned store openings in 2011. In Canada, Marshalls offers great, off-price values on family apparel with an expanded footwear department and The CUBE, an exciting juniors department.

TJX EUROPE

Launched in 1994, T.K. Maxx introduced off-price retailing to the U.K. and Ireland, and is Europe's only major off-price retailer. T.K. Maxx expanded into Germany in 2007 and into Poland in 2009. T.K. Maxx offers top-brand family apparel as well as home fashions at great values, and ended 2010 with 307 stores, which average approximately 32,000 square feet in size.

HOMESENSE®

HomeSense introduced the off-price home fashions concept to the U.K. in 2008. This business offers our U.K. customers great values on top-quality home fashions, including home basics and home décor merchandise. At 2010's year-end, HomeSense operated 24 stores, each averaging approximately 21,000 square feet in size.
