NFI Shareholder Information Inside Back Cover

The fiscal year ended March 31, 2020 marked our 35th year in business and our 33rd year as a public company. On this, our 35th Anniversary, we are ecstatic to report our return to profitability after posting a net loss the last two years and having previously posted five straight years of declining results. We previously called fiscal year 2019 an important and transformative year despite our net loss. At the conclusion of fiscal year 2020, we can see just how true that was. The securing of our long-term credit facility, the investment in our infrastructure, the continued focus on discipline in underwriting, the proliferation of our direct loan product and our openness to portfolio acquisitions all combined to create an environment that positioned us well for future success and profit. Now, in fiscal year 2020, those elements and more came together nicely to produce four quarters of positive earnings totaling \$2.2 MM in pre-tax earnings for the year – a swing of \$6.8 MM over our \$4.6 MM pre-tax loss last year.

There is no doubt that the Covid-19 pandemic of 2020 had some impact on our 4th quarter and overall fiscal year results, and potentially will impact our fiscal year 2021 progress, as well. However, the return to our core business model and strategy a little over two years ago positioned us well to weather the early storms associated with Covid-19. Although there was nothing that we could do about the virtual shutdown in business and new originations that took place in the second half of March 2020, our model and philosophy helped us successfully manage our portfolio.

As I have said since the first day I returned to Nicholas in December of 2017, we finance primary transportation to and from work for the subprime borrower. We do not finance luxury cars, second units or recreational vehicles, which are the first payments customers tend to skip in times of economic insecurity. We finance the main and often only vehicle in the household that is needed to get our customers to and from work. The amounts we finance are much lower than most of our competitors, and therefore the payments are materially lower, too. The combination of financing a need over a want and having that loan be very affordable comparatively, creates a situation in which our customer is able and willing to better maintain their account with us.

Our status as an essential business kept us open and operational throughout the pandemic, but our branch-based business model made us that much nimbler and more productive. If ever there was a time that proved our branch concept, it was the Covid-19 pandemic and its related shutdowns. Each market had varying degrees of stay-at-home orders and restrictions. The markets that were the most restrictive were able to funnel their customer servicing, underwriting and funding to the next closest branch without missing a beat. The fact that our branches are staffed with between three to five employees on average, allowed us to easily follow CDC guidelines on social distancing without impacting our ability to service our customers and dealers directly. The focus on our infrastructure and technological improvements in fiscal year 2019 allowed us to offer many more options for electronic payments and remote servicing. In short, we were well prepared and well positioned to handle the one-two punch Covid-19 threw at us with elevated unemployment and greatly reduced retail sales initially.

There is still a lot that is not known about the impact Covid-19 will have on the economy overall and our business specifically, but for now we are cautiously optimistic that we will get through to the other side relatively well. We entered the crisis with a solid liquidity position and excellent access to capital. We currently maintain both of these assets. Although business was and is down in terms of year over year production and actual versus budget, we have not (and the industry has not) experienced the complete shutdown that many expected when the pandemic began. Between the nature of our loan product and pricing, combined with stimulus relief money and enhanced unemployment benefits, our portfolio is performing at or better than expected in terms of delinquency control, cash collections and loss levels.

Key Performance Indicators (KPI's)

We did ask for and were granted special dispensation on the use of deferrals for those customers suffering a real hardship from Covid-19, and we did indeed put the use of those deferrals into practice. However, the extent to which we needed to rely on those deferrals was much lower than originally anticipated internally and as an industry. All of that bodes well for the future, but we will, of course, have to wait and see what happens to the economy as a whole. In the meantime, we can review all the other aspects of fiscal year 2020 that contributed to our results, as well as look forward towards fiscal year 2021 and beyond.

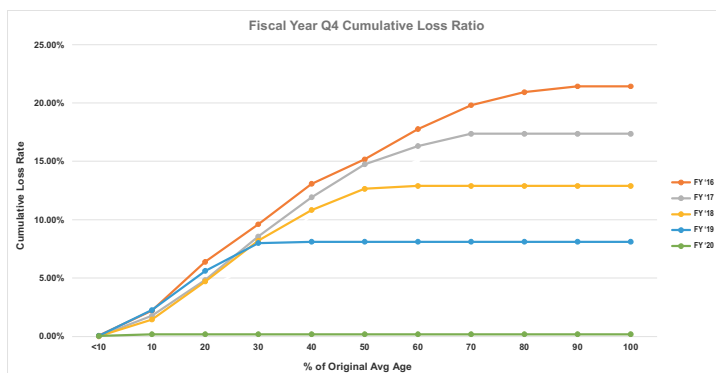

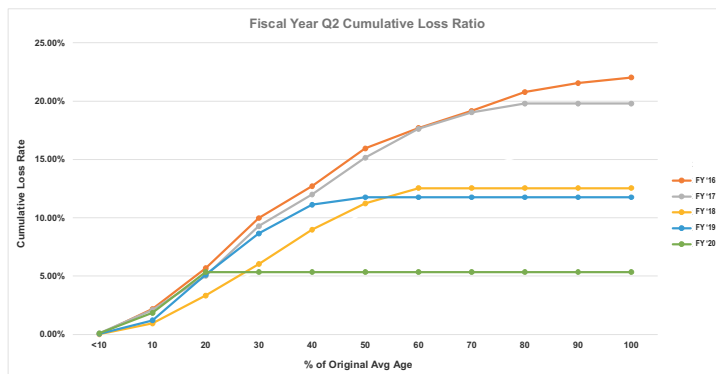

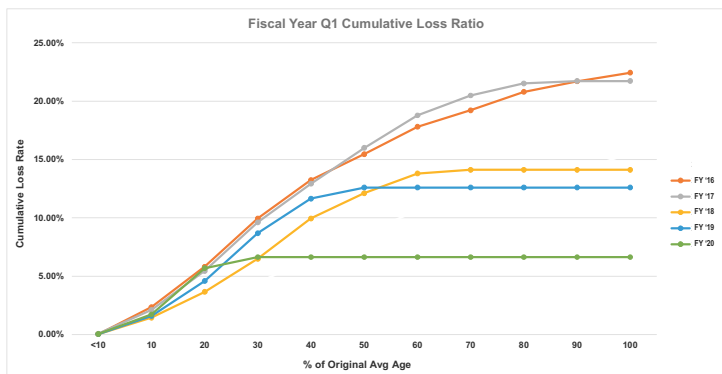

First and foremost, our recent success has been a direct result of our recommitment to common sense lending, conservative underwriting, and risk-based pricing that began over two years ago. Since January of 2018 we have systematically brought our Key Performance Indicators on new originations in line with what we know leads to better portfolio performance. We have consistently been able to produce an average loan size of approximately \$10,000, an average APR of 23.5%, an average discount in the 8% range and an average term below 48 months. The chart (above) shows our ability to consistently maintain these KPI's over the last 2 plus years.

This chart also shows that we were able to steadily increase our production and gain increased market share throughout most of fiscal year 2020. After a slow start in the 1st quarter, we were able to out produce both the 2nd and 3rd quarters of fiscal year 2019 in fiscal year 2020. We were well on our way to doing so again in the 4th quarter, but the second half of March produced very little business and the ensuing shutdown prevented us from outproducing the previous year's 4th quarter.

We were able to post these year-over-year production increases even though we have reduced our branch network. Last year we announced our exit from Dallas and Houston, Texas as well as Richmond and Virginia Beach, Virginia. We also consolidated multi-branch markets in Atlanta, Georgia, Raleigh, Charlotte and Greensboro, North Carolina. At the conclusion of fiscal year 2020 and into the start of fiscal year 2021, we announced a second wave of branch consolidations where we had multiple offices serving the same market. We believe we will be able to maintain and even increase volume production while materially reducing overhead expense in these consolidated markets.

Year-over-Year Indirect and Direct Loan Performance

| Contracts | Contracts Twelve Months ended March 31, (Purchases in thousands) | | Direct Loans Twelve Months ended March 31, (Originations in thousands) | | Contracts Three Months ended June 30, (Purchases in thousands) | | Direct Loans Three Months ended June 30, (Originations in thousands) | |

Cumulative Loan Loss Ratio Timing Curves by Quarter

The improved KPI's combined with our disciplined underwriting and verification processes have combined to improve the performance of our purchases from January 2018 forward, as compared to previous years. The charts below show the quarterly performance of FY 18 Q4 through current quarter by way of loss timing curves. They exemplify our progress when we returned to a more disciplined and conservative approach in January 2018. Our originations beginning at the end of fiscal 2018 and continuing through fiscal years 2019 and 2020 are experiencing lower losses per quarter than each of the previous three years at the same aging point.

One of the key initiatives in fiscal year 2020 was to proliferate our Direct Loan product to as many of our markets as possible. We became fully licensed for the origination of direct consumer loans and the selling of credit-related insurance products in all states serviced by our branch locations, except for Pennsylvania. The result has been a material percentage increase in our direct loan production and a growing impact from that product on our income statement.

Since the vast majority of our direct loans consist of current or former Nicholas borrowers in good standing, we are able to enjoy higher customer retention rates with reduced customer acquisition cost. We also are enjoying dramatically reduced delinquency and losses on this portfolio as compared to our indirect portfolio.

In addition to increasing production from our local branch markets on both the indirect sales finance and direct loan fronts, we set out to expand our presence in new markets by the end of fiscal year 2020. We were able to initiate entrance into Columbia, South Carolina, Milwaukee, Wisconsin, Wichita, Kansas and Las Vegas, Nevada by the conclusion of the fiscal year.

Much of those expansion efforts were put on hold towards the end of the year due to the Covid-19 pandemic, but we have resumed those operations in June. In fact, we have added Salt Lake City, Utah and Boise, Idaho to the mix. As we continue to improve our presence in these markets and build receivables, we will look to establish physical brick and mortar branch offices in these cities.

Nicholas Financial Branch Locations & Expansion Markets

The final piece of our four-pronged approach to growth was our openness to portfolio acquisitions. We began the year announcing the acquisition of all material assets and certain specific liabilities of Metrolina Credit Company. This acquisition added approximately \$22.5 MM in receivables to our portfolio (mostly in North and South Carolina). A little over a year later we can look back and confidently confirm this was a very good deal for Nicholas that not only contributed to our profitability, but also helped improve other aspects of our operations. We were able to achieve cost savings by way of office consolidations, retain some quality personnel talent in our combined operations, expand our dealer base in most markets, and reduce the amount of direct competition all in one transaction.

We followed up the Metrolina transaction with a series of bulk acquisitions between December 2019 and February 2020 – resulting in approximately \$22 MM in total portfolio acquisitions from Platinum Auto Finance. Once again, by adding seasoned receivables with a proven pay history and the protection of limited recourse, we were able to add to our portfolio more quickly than we could through core originations alone – all the while mitigating the risk of default and loss.

Although we remain committed to our core business of indirect retail sales financing for the subprime buyer of used vehicles as well as the expansion of our direct loan product, we are also very open to exploring and even pursuing quality portfolio acquisitions that align well with our customer base and operations.

Fiscal year 2020 is now behind us. We have celebrated our success and our victories, learned from our challenges and setbacks, and now eagerly look forward to the years ahead of us.

Armed with an extremely solid liquidity position, we have the strength to face and survive many challenges and obstacles. Equipped with excellent access to capital through our credit facility, we have the ability to maximize our share in existing and new markets, as well as to act quickly as new opportunities present themselves. Blessed with some of the best and most talented individuals both in the field and in our corporate office, we have the team in place to execute on our strategy today and for years to come. It will never be perfect, and it will surely never be easy, but we have once again tasted some modest success and are hungry for much, much more.

On behalf of our Board of Directors, our management team and each of our hardworking and dedicated employees I say, “Thank You!” Thank you to all of you who have invested in Nicholas. We appreciate your continued belief in our Company. We are sincerely grateful for your confidence, support and trust.

A handwritten signature in black ink, appearing to read 'Doug Marohn'.

Forward-Looking Information

This Annual Report on Form 10-K (this “Report” or “Annual Report”) contains various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such statements are based on management’s current beliefs and assumptions, as well as information currently available to management. When used in this document, the words “anticipate,” “estimate,” “expect,” “will,” “may,” “plan,” “believe,” “intend” and similar expressions are intended to identify forward-looking statements. Although Nicholas Financial, Inc. and its subsidiaries (collectively the “Company”) believes that the expectations reflected or implied in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to be correct. As a result, actual results could differ materially from those indicated in these forward-looking statements. Forward-looking statements in this Annual Report may include, without limitation: (1) the projected impact of the novel coronavirus disease (“COVID-19”) outbreak on our customers and our business, (2) projections of revenue, income, and other items relating to our financial position and results of operations, (3) statements of our plans, objectives, strategies, goals and intentions, (4) statements regarding the capabilities, capacities, market position and expected development of our business operations, and (5) statements of expected industry and general economic trends; such statements are subject to certain risks, uncertainties and assumptions that may cause results to differ materially from those expressed or implied in forward-looking statements, including without limitation:

- future impacts of the COVID-19 outbreak and measures taken in response thereto, for which future developments are highly uncertain and difficult to predict;
- availability of capital (including the ability to access bank financing);
- recently enacted, proposed or future legislation and the manner in which it is implemented, including tax legislation initiatives or challenges to our tax positions and/or interpretations, and state sales tax rules and regulations;
- fluctuations in the economy;
- the degree and nature of competition and its effects on the Company’s financial results;
- fluctuations in interest rates;
- effectiveness of our risk management processes and procedures, including the effectiveness of the Company’s internal control over financial reporting and disclosure controls and procedures;
- demand for consumer financing in the markets served by the Company;
- our ability to successfully develop and commercialize new or enhanced products and services;
- the sufficiency of our allowance for credit losses and the accuracy of the assumptions or estimates used in preparing our financial statements;
- increases in the default rates experienced on automobile finance installment contracts (“Contracts”);
- higher borrowing costs and adverse financial market conditions impacting our funding and liquidity;
- our ability to securitize our loan receivables, occurrence of an early amortization of our securitization facilities, loss of the right to service or subservice our securitized loan receivables, and lower payment rates on our securitized loan receivables;
- regulation, supervision, examination and enforcement of our business by governmental authorities, and adverse regulatory changes in the Company’s existing and future markets, including the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) and other legislative and regulatory developments, including regulations relating to privacy, information security and data protection and the impact of the Consumer Financial Protection Bureau’s (the “CFPB”) regulation of our business
- fraudulent activity;
- failure of third parties to provide various services that are important to our operations;
- alleged infringement of intellectual property rights of others and our ability to protect our intellectual property;
- litigation and regulatory actions;
- our ability to attract, retain and motivate key officers and employees; use of third-party vendors and ongoing third-party business relationships; cyber-attacks or other security breaches;

- disruptions in the operations of our computer systems and data centers;
- our ability to realize our intentions regarding strategic alternatives;
- our ability to expand our business, including our ability to complete acquisitions and integrate the operations of acquired businesses and to expand into new markets; and
- the risk factors discussed herein under “Item 1A – Risk Factors.”

Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or expected. All forward-looking statements included in this Report are based on information available to the Company as the date of filing of this Annual Report, and the Company assumes no obligation to update any such forward-looking statement. Prospective investors should also consult the risk factors described from time to time in the Company’s other filings made with the U.S. Securities and Exchange Commission (“SEC”), including its reports on Forms 10-Q, 8-K and annual reports to shareholders.

PART I

Item 1. Business

General

Nicholas Financial, Inc. (“Nicholas Financial-Canada”) is a Canadian holding company incorporated under the laws of British Columbia in 1986. The business activities of Nicholas Financial-Canada are currently conducted exclusively through its wholly-owned indirect subsidiary, Nicholas Financial, Inc., a Florida corporation (“Nicholas Financial”). Nicholas Financial is a specialized consumer finance company engaged primarily in acquiring and servicing automobile finance installment contracts (“Contracts”) for purchases of used and new automobiles and light trucks. Additionally, Nicholas Financial originates direct consumer loans (“Direct Loans”) and sells consumer-finance related products. A second Florida subsidiary, Nicholas Data Services, Inc. (“NDS”), serves as the intermediate holding company for Nicholas Financial. In addition, NF Funding I, LLC (“NF Funding I”), is a wholly-owned, special purpose financing subsidiary of Nicholas Financial.

Nicholas Financial-Canada, Nicholas Financial, NDS, and NF Funding I are hereafter collectively referred to as the “Company”.

All financial information herein is designated in United States dollars. References to “fiscal 2020” are to the fiscal year ended March 31, 2020 and references to “fiscal 2019” are to the fiscal year ended March 31, 2019.

The Company’s principal executive offices are located at 2454 McMullen Booth Road, Building C, Clearwater, Florida 33759, and its telephone number is (727) 726-0763.

Available Information

The Company’s filings with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q, definitive proxy statements on Schedule 14A, current reports on Form 8-K, and any amendments to those reports filed pursuant to Sections 13, 14 or 15(d) of the Securities Exchange Act of 1934, are made available free of charge through the Investor Center section of the Company’s Internet website at <http://www.nicholasfinancial.com> as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the SEC. The Company is not including the information contained on or available through its web site as a part of, or incorporating such information by reference into, this Report. Copies of any materials the Company files with the SEC can also be obtained free of charge through the SEC’s website at <http://www.sec.gov>.

Operating Strategy

The Company remains committed to its branch-based model and its core product of financing primary transportation to and from work for the subprime borrower through the local independent automobile dealership. The Company will strategically employ the use of centralized servicing departments to supplement the branch operations and improve operational efficiencies, but its focus will be on its core business model of decentralized operations. The Company’s strategy also includes risk-based pricing (rate, yield, advance, term, etc.) and a commitment to the underwriting discipline required for optimal portfolio performance as opposed to chasing competition for to sake of simply generating volume. The Company’s principal goals are to increase its profitability and its long-term shareholder value. During fiscal 2020, the Company focused on the following items:

- maintaining our commitment to the local branch model;
- continuing to focus on the accountability of branch managers
- focusing on increased return on assets through strategic initiatives;
- identifying additional ancillary products to enhance profitability;

- strengthening relationships with independent dealers across our network and throughout the industry;
- growing the Direct Loan portfolio and implementing such product in all our existing branch offices.

The Company also focused on selecting the right markets to have branch locations. As of March 31, 2020, the Company operated brick and mortar branch locations in 14 states — Alabama, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Michigan, Missouri, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee. The Company also originated business in its expansion states of Nevada and Wisconsin without a physical branch in such markets.

During fiscal 2019, the Company exited the Maryland market by closing its branch office located in Baltimore. The Company also consolidated offices in Florida (the Sunrise branch was consolidated with the Pompano branch) and in North Carolina (the Winston-Salem branch consolidated with the Greensboro branch). In addition, the Company announced that it was exiting the Texas and Virginia markets. During the first quarter of fiscal 2020, the Company also consolidated two branches in North Carolina and two branches in Georgia. In the fourth quarter of fiscal 2020, the Company consolidated five branches in Florida. The Company will continue to evaluate underperforming markets and underperforming branches, as needed.

During fiscal 2019, the Company expanded into Milwaukee, Wisconsin. During fiscal 2020, the Company expanded into the markets of Boise, Idaho; Des Moines, Iowa; Phoenix, Arizona; and Salt Lake City, Utah. The Company also continues to look for other expansion opportunities. Although the Company cannot assert how many new markets it will enter (if any) in the foreseeable future, it does remain focused on growing the branch network where conditions are favorable.

On April 30, 2019 the Company acquired substantially all of the assets of ML Credit Group, LLC (d/b/a Metrolina Credit Company) (“Metrolina”). Metrolina provided automobile financing to consumers by direct loans and through purchases of retail installment sales contracts originated by automobile dealers in the states of North Carolina and South Carolina. This acquisition represented the first bulk purchase of Contracts in over two decades. If other opportunities arise, the Company may consider possible acquisitions of portfolios of seasoned Contracts from dealers or lenders in bulk transactions as a means of further penetrating its existing markets or expanding its presence in targeted geographic locations.

During fiscal 2020, the Company completed bulk portfolio purchases for a total of \$21.0 million, with \$1.1 million in the third quarter and \$19.9 million in the fourth quarterly, respectively. The Company plans to consider more bulk portfolio purchase when favorable opportunities present themselves.

The Company is currently licensed to provide Direct Loans in 14 states— Alabama, Florida, Georgia (over \$3,000), Illinois, Indiana, Kansas, Kentucky, Michigan, Missouri, North Carolina, Ohio, Pennsylvania, South Carolina, and Tennessee. The Company solicits current and former customers in these states for the purpose of providing Direct Loans to such customers, and intends to continue the expansion of its Direct Loan capabilities to the other states in which it acquires Contracts. Even with this targeted expansion, the Company expects its total Direct Loans portfolio to remain between 5% and 10% of its total portfolio for the foreseeable future.

The Company cannot provide any assurances that it will be able to expand in either its current markets or any targeted new markets.

Automobile Finance Business – Contracts

The Company is engaged in the business of providing financing programs, primarily to purchasers of used cars and light trucks who meet the Company’s credit standards but who do not meet the credit standards of traditional lenders, such as banks and credit unions, because of the customer’s credit history, job instability, the age of the vehicle being financed, or some other factor(s). Unlike lenders that look primarily to the credit history of the borrower in making lending decisions, typically financing new automobiles, the Company is willing to purchase Contracts for purchases made by borrowers who do not have a good credit history and for older model and high-mileage automobiles. In making decisions regarding the purchase of a particular Contract, the Company considers the following factors related to the borrower: current income; credit history; history in making installment payments for automobiles; current and prior job status; and place and length of residence. In addition, the Company examines its prior experience with Contracts purchased from the dealer from which the Company is purchasing the Contract, and the value of the automobile in relation to the purchase price and the term of the Contract.

As of the date of this Annual Report, the Company's automobile finance programs are conducted in 16 states through a total of 43 branch offices located in the states of Florida, Georgia, Ohio, Illinois, Indiana, Kentucky, Missouri, North Carolina, Alabama, South Carolina, Tennessee, Michigan, Kansas, Pennsylvania, Nevada, and Wisconsin (Nevada and Wisconsin are expansion states with no local branch office). The Company acquires Contracts in Nevada and Wisconsin through its virtual expansion office operations based in the Charlotte, North Carolina branch location. As of March 31, 2020, the Company had non-exclusive agreements with approximately 11,400 dealers, of which approximately 8,700 were active, for the purchase of individual Contracts that meet the Company's financing criteria. The Company considers a dealer agreement to be active if the Company has purchased a Contract thereunder in the last six months. Each dealer agreement requires the dealer to originate Contracts in accordance with the Company's guidelines. Once a Contract is purchased by the Company, the dealer is no longer involved in the relationship between the Company and the borrower, other than through the existence of limited representations and warranties of the dealer in favor of the Company.

A customer under a Contract typically makes a down payment, in the form of cash and/or trade-in, ranging from 5% to 35% of the sale price of the vehicle financed. The balance of the purchase price of the vehicle plus taxes, title fees and, if applicable, premiums for extended service contracts, GAP waiver coverage, roadside assistance plans, credit disability insurance and/or credit life insurance are generally financed over a period of 12 to 60 months. At approximately the time of origination, the Company purchases a Contract from an automobile dealer at a negotiated price that is less than the original principal amount being financed by the purchaser of the automobile. The Company refers to the difference between the negotiated price and the original principal amount being financed as the dealer discount. The amount of the dealer discount depends upon factors such as the age and value of the automobile and the creditworthiness of the customer. The Company has recommitted to maintaining pricing discipline and therefore places less emphasis on competition when pricing the discount. Generally, the Company will pay more (i.e., purchase the Contract at a smaller discount from the original principal amount) for Contracts as the credit risk of the customer improves. To date, the Contracts purchased by the Company have been purchased at discounts that range from 1% to 15% of the original principal amount of each Contract, with the typical average discount being between 8.50% and 9.50%. As of March 31, 2020, the Company's loan portfolio consisted of Contracts purchased from a dealer or acquired through a bulk acquisition. Such contracts are purchase without recourse to the dealer, however each dealer remains potentially liable to the Company for breaches of certain representations and warranties made by the dealer with respect to compliance with applicable federal and state laws and valid title to the vehicle. The Company's policy is to only purchase a Contract after the dealer has provided the Company with the requisite proof that (a) the Company has a first priority lien on the financed vehicle (or the Company has, in fact, perfected such first priority lien), (b) the customer has obtained the required collision insurance naming the Company as loss payee with a deductible of not more than \$1,000 and (c) the Contract has been fully and accurately completed and validly executed. Once the Company has received and approved all required documents, it pays the dealer for the Contract and commences servicing the Contract.

Contract Procurement

The Company purchased Contracts in the states listed in the table below during the periods indicated. The Contracts purchased by the Company are predominantly for used vehicles; for the periods shown below, less than 1% were for new vehicles. The average model year collateralizing the portfolio as of March 31, 2020 was a 2011 vehicle. The dollar amounts shown in the table below represent the Company's finance receivables on Contracts purchased within the respective fiscal year:

| State | Maximum allowable interest rate (1) | Number of Branches | Fiscal year ended March 31, (In thousands) | |
|----------------|-------------------------------------|--------------------|--|-----------|
| | | | 2020 | 2019 |
| Alabama | 18-36%(2) | 2 | \$ 2,359 | \$ 1,590 |
| Florida | 18-30%(3) | 12 | 19,294 | 21,524 |
| Georgia | 18-30%(3) | 5 | 10,712 | 8,988 |
| Illinois | (2) | 1 | 815 | 700 |
| Indiana | 25% | 2 | 3,661 | 3,995 |
| Kansas | (2) | - | 1,030 | 1,087 |
| Kentucky | 18-25%(3) | 3 | 3,990 | 3,792 |
| Michigan | 25% | 2 | 3,043 | 3,389 |
| Missouri | (2) | 2 | 4,361 | 3,207 |
| Nevada | (2) | - | 350 | - |
| North Carolina | 18-29%(3) | 3 | 6,859 | 7,283 |
| Ohio | 25% | 6 | 10,380 | 11,768 |
| Pennsylvania | 18-21%(3) | 1 | 1,678 | 1,772 |
| South Carolina | (2) | 2 | 4,566 | 2,366 |
| Tennessee | (2) | 2 | 3,285 | 2,463 |
| Texas | 18-23%(3) | - | - | 1,787 |
| Virginia | (2) | - | - | 1,655 |
| Wisconsin | (2) | - | 313 | 133 |
| Total | | 43 | \$ 76,696 | \$ 77,499 |

- (1) The maximum allowable interest rates are subject to change and vary based on the laws of the individual states.
- (2) None of these states currently imposes a maximum allowable interest rate with respect to the types and sizes of Contracts the Company purchases. The maximum rate which the Company will typically charge any customer in each of these states is 36% per annum.
- (3) The maximum allowable interest rate in each of these states varies depending upon the model year of the vehicle being financed. In addition, Georgia does not currently impose a maximum allowable interest rate with respect to Contracts over \$5,000.

The following table presents selected information on Contracts purchased by the Company:

| Contracts | Fiscal year ended March 31, (Purchases in thousands) | |
|-------------------------------|---|-----------|
| | 2020 | 2019 |
| Purchases | \$ 76,696 | \$ 77,499 |
| Average APR | 23.4% | 23.5% |
| Average dealer discount | 7.9% | 8.2% |
| Average term (months) | 47 | 47 |
| Average loan | \$ 10,035 | \$ 10,086 |
| Number of Contracts purchased | 7,647 | 7,684 |

Direct Loans

The Company currently originates Direct Loans in Alabama, Florida, Georgia (over \$3,000), Illinois, Indiana, Kansas, Kentucky, Michigan, Missouri, North Carolina, Ohio, South Carolina, and Tennessee. Direct Loans are loans originated directly between the Company and the consumer. These loans are typically for amounts ranging from \$500 to \$11,000 and are generally secured by a lien on an automobile, watercraft or other permissible tangible personal property. The average loan made during fiscal 2020 by the Company had an initial principal balance of approximately \$4,000. The Company does not expect the average loan size to increase significantly within the foreseeable future. Most of the Direct Loans are originated with current or former customers under the Company's automobile financing program. The typical Direct Loan represents a better credit risk than our typical Contract due to the customer's payment history with the Company, as well as their established relationship with the local branch staff. The Company does not have a Direct Loan license in Pennsylvania, Nevada, Idaho, or Wisconsin, and none is presently required in Georgia provided that the original principal balance of the loan is greater than \$3,000. The Company obtained a Direct Loan license in Ohio during the fiscal year ended 2019 and pursued licenses in all other states with physical branch operations with the exception of Pennsylvania during the fiscal year ended 2020. The size of the loan and maximum interest rate that may be (and is) charged varies from state to state. The Company considers the individual's income, credit history, job stability, and the value of the collateral offered by the borrower to secure the loan as the primary factors in determining whether an applicant will receive an approval for such loan. Additionally, because most of the Direct Loans made by the Company to date have been made to borrowers under Contracts previously purchased by the Company, the payment history of the borrower under the Contract is a significant factor in making the loan decision. The Company's Direct Loan program was implemented in April 1995 and accounted for approximately 5% of the Company's annual consolidated revenues during the year ended March 31, 2020.

In connection with its Direct Loan program, the Company also makes available credit disability insurance, credit life insurance, and involuntary unemployment insurance coverage to customers through unaffiliated third-party insurance carriers. Approximately 64% of the Direct Loans outstanding as of March 31, 2020 elected to purchase third-party insurance coverage made available by the Company. The cost of this insurance to the customer, which includes a commission for the Company, is included in the amount financed by the customer.

The following table presents selected information on Direct Loans originated by the Company:

| <u>Direct Loans</u> | <u>Fiscal year ended March 31,</u> <u>(Originations in thousands)</u> | |
|--------------------------------|--|-------------|
| | <u>2020</u> | <u>2019</u> |
| Originations | \$ 12,638 | \$ 7,741 |
| Average APR | 28.2% | 26.4% |
| Average term (months) | 25 | 25 |
| Average loan | \$ 4,017 | \$ 4,036 |
| Number of contracts originated | 3,142 | 1,918 |

Underwriting Guidelines

The Company's typical customer has a credit history that fails to meet the lending standards of most banks and credit unions. Some of the credit problems experienced by the Company's customers that resulted in a poor credit history include but are not limited to: prior automobile account repossessions, unpaid revolving credit card obligations, unpaid medical bill, unpaid student loans, prior bankruptcy, and evictions for nonpayment of rent. The Company believes that its customer profile is similar to that of its direct competitors.

The Company's process to approve the purchase of a Contract begins with the Company receiving a standardized credit application completed by the consumer which contains information relating to the consumer's background, employment, and credit history. The Company also obtains credit reports from Equifax and/or TransUnion, which are independent credit reporting services. The Company verifies the consumer's employment history, income, and residence. In most cases, consumers are interviewed via telephone by a Company application processor (usually the Branch Manager or Assistant Branch Manager). The Company also considers the customer's prior payment history with the Company, if any, as well as the collateral value of the vehicle being financed.

The Company has established internal underwriting guidelines to be used by its Branch Managers and internal underwriters when purchasing Contracts. Any Contract that does not meet these guidelines must be approved by the District Managers or senior management of the Company. The Company currently has District Managers charged with managing the specific branches in a defined geographic area. In addition to a variety of administrative duties, the District Managers are responsible for monitoring their assigned branches' compliance with the Company's underwriting guidelines as well as approving underwriting exceptions.

The Company uses similar criteria in analyzing a Direct Loan as it does in analyzing the purchase of a Contract. Lending decisions regarding Direct Loans are made based upon a review of the customer's loan application, income, credit history, job stability, and the value of the collateral offered by the borrower to secure the loan. To date, since the majority of the Company's Direct Loans have been made to individuals whose automobiles have been financed by the Company, the customer's payment history under his or her existing or past Contract is a significant factor in the lending decision.

After reviewing the information included in the Contract or Direct Loan application and taking the other factors into account, the Company's loan origination system categorizes the customer using internally developed credit classifications of "1," indicating higher creditworthiness, through "4," indicating lower creditworthiness. Contracts are financed for individuals who fall within all four acceptable rating categories utilized, "1" through "4". Usually a customer who falls within the two highest categories (i.e., "1" or "2") is purchasing a two to five-year old, lower mileage used automobile, while a customer in any of the two lowest categories (i.e., "3," or "4") usually is purchasing an older, higher mileage automobile from an independent used automobile dealer.

The Company utilizes internal audit ("IA") to perform audits of its branches' compliance with Company underwriting guidelines. IA audits Company branches on a schedule that is variable depending on the size of the branch, length of time a branch has been open, current tenure of the Branch Manager, previous branch audit score, and current and historical branch profitability. Additionally, field supervisions and audits are conducted by District Managers, Divisional Vice Presidents and Divisional Administrative Assistants to ensure operational and underwriting compliance throughout the branch network.

Monitoring and Enforcement of Contracts

The Company requires each customer under a Contract to obtain and maintain collision insurance covering damage to the vehicle. Failure to maintain such insurance constitutes a default under the Contract, and the Company may, at its discretion, repossess the vehicle. To reduce potential loss due to insurance lapse, the Company has the contractual right to obtain collateral protection insurance through a third-party, which covers loss due to physical damage to a vehicle not covered by any insurance policy of the customer.

The Company's Management Information Services personnel maintain a number of reports to monitor compliance by customers with their obligations under Contracts and Direct Loans made by the Company. These reports may be accessed on a real-time basis or at the end of the day throughout the Company by management personnel, including Branch Managers and staff, at computer terminals located in the main office and each branch office. These reports include delinquency reports, customer promise reports, vehicle information reports, purchase reports, dealer analysis reports, static pool reports, and repossession reports.

A delinquency report is an aging report that provides basic information regarding each customer account and indicates accounts that are past due. The report includes information such as the account number, address of the customer, phone numbers of the customer, original term of the Contract, number of remaining payments, outstanding balance, due dates, date of last payment, number of days past due, scheduled payment amount, amount of last payment, total past due, and special payment arrangements or agreements.

On March 27, 2020, the Company began extending assistance to our customers experiencing hardship due to COVID-19 in the form of up to two months' worth of hardship deferments. These hardship deferments will be processed in the same manner as any other deferment, including the proper review and approval by management.

When an account becomes delinquent, the Company immediately contacts the customer to determine the reason for the delinquency and to determine if appropriate arrangements for payment can be made. If payment arrangements acceptable to the Company can be made, the information is entered in its database and is used to generate a customer promises report, which is utilized by the Company's collection staff for account follow up.

The Company prepares a repossession report that provides information regarding repossessed vehicles and aids the Company in disposing of repossessed vehicles. In addition to information regarding the customer, this report provides information regarding the date of repossession, date the vehicle was sold, number of days it was held in inventory prior to sale, year, make and model of the vehicle, mileage, payoff amount on the Contract, NADA book value, Black Book value, suggested sale price, location of the vehicle, original dealer and condition of the vehicle, as well as notes other information that may be helpful to the Company.

If an account is 121 days delinquent and the related vehicle has not yet been repossessed, the account is charged-off and transferred to the Loss Prevention and Recovery Department. Once a vehicle has been repossessed, the related loan balance no longer appears on the delinquency report. Instead, the vehicle appears on the Company's repossession report and is generally sold at auction. During the fourth quarter of fiscal 2019, the Company changed its charge-off policy from 181 days past due to 121 days past due. Please see Note 3 to the Consolidated Financial Statements included in this Annual Report for further discussion.

The Company also prepares a dealer analysis report that provides information regarding each dealer from which it purchases Contracts. This report allows the Company to analyze the volume of business done with each dealer, the terms on which it has purchased Contracts from such dealer, as well as the overall portfolio performance of Contracts purchased from the dealer.

The Company is subject to seasonal variations within the subprime marketplace. While the APR, discount, and term remain consistent across quarters, write offs and delinquencies tend to be lower while purchases tend to be higher in the fourth and first quarter of the fiscal year. The second and third quarter of the fiscal year tend to have higher write offs and delinquencies, and a lower level of purchases.

Marketing and Advertising

The Company's Contract marketing efforts currently are directed primarily toward automobile dealers. The Company attempts to meet dealers' needs by offering highly responsive, cost-competitive, and service-oriented financing programs. The Company relies on its District and Branch Managers to solicit agreements for the purchase of Contracts with automobile dealers located within a 60-mile radius of each branch office. The Branch Manager provides dealers with information regarding the Company and the general terms upon which the Company is willing to purchase Contracts. The Company is evaluating and assessing other forms of advertising, such as radio or newspaper advertisements, for the purchase of Contracts.

The Company solicits customers under its Direct Loan program primarily through direct mailings, followed by telephone calls to individuals who have a good credit history with the Company in connection with Contracts purchased by the Company.

Computerized Information System

On February 1, 2019, the Company converted from an internally-developed system to a third-party loan servicing system to assist in responding to customer inquiries and to monitor the performance of its Contract and Direct Loan portfolio and the performance of individual customers under Contracts.

All Company personnel are provided with real-time access to information. The Company has created specialized programs to automate the tracking of Contracts and Direct Loans from inception. The Company's computer network encompasses both its corporate headquarters and its branch office locations. See "Monitoring and Enforcement of Contracts" above for a summary of the different reports prepared by the Company.

Competition

The consumer finance industry is highly fragmented and highly competitive. Due to various factors, including the existing low interest rate environment, the competitiveness of the industry continues to increase as new competitors continue to enter the market and certain existing competitors continue to expand their operations. There are numerous financial service companies that provide consumer credit in the markets served by the Company, including banks, credit unions, other consumer finance companies, and captive finance companies owned by automobile manufacturers and retailers. Increased competition for the purchase of Contracts enabled automobile dealers to shop for the best price, resulting in an erosion in the dealer discounts from the initial principal amounts at which the Company was willing to purchase Contracts and higher advance rates. Further, increased competition resulted in the purchase of lower credit quality Contracts. However, with the Company's change in management during the end of fiscal 2018 and beginning of fiscal 2019, it has placed less emphasis on competition when pricing the dealer discount. The Company instead focuses on purchasing Contracts that are priced to reflect the inherent risk level of the contract, and intends to sacrifice loan volume, if necessary, to maintain that pricing discipline. Primarily as a result of increased competition within the industry, for the fiscal year ended March 31, 2020, the Company's average dealer discount on Contracts purchased decreased to 7.9%, compared to 8.2% for the fiscal year ended March 31, 2019. The table below shows number and principal amount of Contracts purchased, average amount financed, average term, and average APR for the periods presented:

Key Performance Indicators on Contracts Purchased
(Purchases in thousands)

| Fiscal Year /Quarter | Number of Contracts Purchased | Principal Amount Purchased# | Average Amount Financed*^ | Average APR* | Average Discount%* | Average Term* |
|----------------------|-------------------------------|-----------------------------|---------------------------|---------------|--------------------|---------------|
| 2020 | 7,647 | \$ 76,696 | \$ 10,035 | 23.4 % | 7.9 % | 47 |
| 4 | 1,991 | 19,658 | 9,873 | 23.5 % | 7.9 % | 46 |
| 3 | 1,753 | 17,880 | 10,200 | 23.3 % | 7.6 % | 47 |
| 2 | 2,011 | 20,104 | 9,997 | 23.5 % | 7.9 % | 46 |
| 1 | 1,892 | 19,054 | 10,071 | 23.4 % | 8.3 % | 47 |
| 2019 | 7,684 | \$ 77,499 | \$ 10,086 | 23.5 % | 8.2 % | 47 |

| 2018 | 2,036 | \$ 7,642 | \$ 3,754 | 25.2 % | 29 |
| 4 | 380 | 1,445 | 3,752 | 25.0 % | 29 |
| 3 | 622 | 2,218 | 3,566 | 25.2 % | 28 |
| 2 | 501 | 1,953 | 3,897 | 25.1 % | 29 |
| 1 | 533 | 2,026 | 3,801 | 25.4 % | 30 |

*Each average included in the tables is calculated as a simple average.

^Average amount financed is calculated as a single loan amount.

#Bulk portfolio purchase excluded for period-over-period comparability.

The Company's ability to compete effectively with other companies offering similar financing arrangements depends in part upon the Company maintaining close business relationships with dealers of used and new vehicles. No single dealer out of the approximately 8,700 dealers with which the Company currently has active contractual relationships represents a significant amount of the Company's business volume for any of the fiscal years ended March 31, 2020 or 2019.

Regulation

The Company's financing operations are subject to regulation, supervision and licensing under many federal, state and local statutes, regulations and ordinances. Additionally, the procedures that the Company must follow regarding the repossession of vehicles securing Contracts are regulated by each of the states in which the Company does business. To date, the Company's operations have been conducted exclusively in the states of Alabama, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Maryland, Michigan, Missouri, Nevada, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia and Wisconsin (as of March 31, 2020, the Company has exited Maryland, Texas and Virginia). Accordingly, the laws of such states, as well as applicable federal law, govern the Company's operations. The following constitute certain of the existing federal, state and local statutes, regulations and ordinances with which the Company must comply:

- *State consumer regulatory agency requirements.* Pursuant to state regulations, on-site or off-site examinations can be conducted for any of the locations listed below. Examinations monitor compliance with applicable regulations. These regulations include but, are not limited to: licensure requirements; requirements for maintenance of proper records; payment of required fees; maximum interest rates that may be charged on loans to finance used vehicles; and, proper disclosure to customers regarding financing terms.
- *State licensing requirements.* The Company files a notification or obtains a license to acquire Contracts within the following states: Alabama, Florida, Illinois, Indiana, Kansas, Michigan, Missouri, Pennsylvania, South Carolina, and Wisconsin. Furthermore, some states require dealers to maintain a Retail Installment Seller's License, and where applicable, the Company only conducts business with dealers who hold such a license. For Direct Loan activities, the Company obtains licenses from each state to allow us to offer consumer loans within the following states:
- *Fair Debt Collection Practices Act.* The Fair Debt Collection Practices Act ("FDCPA") and applicable state law counterparts prohibit the Company from contacting customers during certain times and at certain places, from using certain threatening practices and from making false implications when attempting to collect a debt.
- *Truth in Lending Act.* The Truth in Lending Act ("TILA") requires the Company and the dealers it does business with to make certain disclosures to customers, including the terms of repayment, the total finance charge and the annual percentage rate charged on each Contract or Direct Loan.
- *Equal Credit Opportunity Act.* The Equal Credit Opportunity Act ("ECOA") prohibits creditors from discriminating against loan applicants on the basis of race, color, sex, age or marital status. Pursuant to Regulation B promulgated under the ECOA, creditors are required to make certain disclosures regarding consumer rights and advise consumers whose credit applications are not approved of the reasons for the rejection.
- *Electronic Signatures in Global and National Commerce Act.* The Electronic Signatures in Global and National Commerce Act ("ESIGN") requires the Company to provide consumers with clear and conspicuous disclosures before the consumer gives consent to authorize the use of electronic signatures, electronic contracts, and electronic records.
- *Fair Credit Reporting Act.* The Fair Credit Reporting Act ("FCRA") requires the Company to provide certain information to consumers whose credit applications are not approved on the basis of a report obtained from a consumer reporting agency, as well as, ensure the accuracy and integrity of consumer information reported to credit reporting agencies.
- *Gramm-Leach-Bliley Act.* The Gramm-Leach-Bliley Act ("GLBA") requires the Company to maintain privacy with respect to certain consumer data in its possession and to periodically communicate with consumers on privacy matters.

- *Servicemembers Civil Relief Act.* The Servicemembers Civil Relief Act (“SCRA”) requires the Company to reduce the interest rate charged on each loan to customers who have subsequently joined, enlisted, been inducted or called to active military duty and places limitations on collection and repossession activity.
- *Military Lending Act.* The Military Lending Act (“MLA”) requires the Company to limit the military annual percentage rate (“MAPR”) that the Company may charge to a maximum of 36 percent, requires certain disclosures to military consumers, and provides other substantive consumer protections on credit extended to Servicemembers and their families.
- *Electronic Funds Transfer Act.* The Electronic Funds Transfer Act (“EFTA”) prohibits the Company from requiring its customers to repay a loan or other credit by electronic funds transfer (“EFT”), except in limited situations which do not apply to the Company. The Company is also required to provide certain documentation to its customers when an EFT is initiated and to provide certain notifications to its customers with regard to preauthorized payments.
- *Telephone Consumer Protection Act.* The Telephone Consumer Protection Act (“TCPA”) governs the Company’s practice of contacting customers by certain means i.e. auto dealers, pre-recorded or artificial voice calls on customers’ land lines, fax machines and cell phones, including text messages.
- *Bankruptcy.* Federal bankruptcy and related state laws may interfere with or affect the Company’s ability to recover collateral or enforce a deficiency judgment.
- *Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank Act”).* Title X of the Dodd-Frank Act created the Consumer Financial Protection Bureau (“CFPB”), which, effective as of July 21, 2011, has the authority to issue and enforce regulations under the federal “enumerated consumer laws,” including (subject to certain statutory limitations) FDCPA, TILA, ECOA, FCRA, GLBA and EFTA. The CFPB has rulemaking and enforcement authority over certain non-depository institutions, including us. The CFPB is specifically authorized, among other things, to take actions to prevent companies providing consumer financial products or services and their service providers from engaging in unfair, deceptive or abusive acts or practices in connection with consumer financial products and services, and to issue rules requiring enhanced disclosures for consumer financial products or services. Under the Dodd-Frank Act, the CFPB also may restrict the use of pre-dispute mandatory arbitration clauses in contracts between covered persons and consumers for a consumer financial product or service. The CFPB also has authority to interpret, enforce, and issue regulations implementing enumerated consumer laws, including certain laws that apply to the Company’s business. The CFPB issued rules regarding the supervision and examination of non-depository “larger participants” in the automobile finance business. At this time, the Company is not deemed a larger participant.

Failure to comply with these laws or regulations could have a material adverse effect on the Company by, among other things, limiting the jurisdictions in which the Company may operate, restricting the Company’s ability to realize the value of the collateral securing the Contracts, and making it more costly or burdensome to do business or resulting in potential liability. The volume of new or modified laws and regulations and the activity of agencies enforcing such law have increased in recent years in response to issues arising with respect to consumer lending. From time to time, legislation and regulations are enacted which increase the cost of doing business, limit or expand permissible activities or affect the competitive balance among financial services providers. Proposals to change the laws and regulations governing the operations and taxation of financial institutions and financial services providers are frequently made in the U.S. Congress, in the state legislatures and by various regulatory agencies. This legislation may change the Company’s operating environment in substantial and unpredictable ways and may have a material adverse effect on the Company’s business.

In particular, the Dodd-Frank Act and regulations promulgated thereunder, including the rules regarding supervision and examination issued by the CFPB, are likely to affect the Company’s cost of doing business, may limit or expand the Company’s permissible activities, may affect the competitive balance within the Company’s industry and market areas and could have a material adverse effect on the Company. The Company’s management continues to assess the Dodd-Frank Act’s probable impact on the Company’s business, financial condition and results of operations, and to monitor developments involving the entities charged with promulgating regulations thereunder. However, the ultimate effect of the Dodd-Frank Act on the financial services industry in general, and on the Company in particular, is uncertain at this time.

In addition to the CFPB, other state and federal agencies have the ability to regulate aspects of the Company's business. For example, the Dodd-Frank Act provides a mechanism for state Attorneys General to investigate the Company. In addition, the Federal Trade Commission has jurisdiction to investigate aspects of the Company's business. The Company expects that regulatory investigation by both state and federal agencies will continue and that the results of these investigations could have a material adverse impact on the Company.

Dealers with which the Company does business must also comply with credit and trade practice statutes and regulations. Failure of these dealers to comply with such statutes and regulations could result in customers having rights of rescission and other remedies that could have a material adverse effect on the Company.

The sale of vehicle service contracts and other ancillary products by dealers in connection with Contracts assigned to the Company from dealers is also subject to state laws and regulations. As the Company is the holder of the Contracts that may, in part, finance these products, some of these state laws and regulations may apply to the Company's servicing and collection of the Contracts. Although these laws and regulations may not significantly affect the Company's business, there can be no assurance that insurance or other regulatory authorities in the jurisdictions in which these products are offered by dealers will not seek to regulate or restrict the operation of the Company's business in these jurisdictions. Any regulation or restriction of the Company's business in these jurisdictions could materially adversely affect the income received from these products.

The Company's management believes that the Company maintains all requisite licenses and permits and is in material compliance with applicable local, state and federal laws and regulations. The Company periodically reviews its branch office practices in an effort to ensure such compliance. Although compliance with existing laws and regulations has not had a material adverse effect on the Company's operations to date, given the increasingly complex regulatory environment, the increasing costs of complying with such laws and regulations, and the increasing risk of penalties, fines or other liabilities associated therewith, no assurances can be given that the Company is in material compliance with all of such laws or regulations or that the costs of such compliance, or the failure to be in such compliance, will not have a material adverse effect on the Company's business, financial condition or results of operations.

For more information, please refer to the risk factors titled "On October 5, 2017, the CFPB released the final rule Payday, Vehicle Title and Certain High-Cost Installment Loans under the Dodd Frank Act, which as adopted could potentially have a material adverse effect on our operations and financial performance", "The CFPB has broad authority to pursue administrative proceedings and litigation for violations of federal consumer financing laws" and "Pursuant to the authority granted to it under the Dodd-Frank Act, the CFPB adopted rules that subject larger nonbank automobile finance companies to supervision and examination by the CFPB. Any such examination by the CFPB likely would have a material adverse effect on our operations and financial performance", which are incorporated herein by reference.

Employees

The Company's management and various support functions are centralized at the Company's corporate headquarters in Clearwater, Florida. As of March 31, 2020, the Company employed a total of 260 persons, of which 48 persons were employed at the Company's corporate headquarters. None of the Company's employees are subject to a collective bargaining agreement, and the Company considers its relations with its employees generally to be good.

Item 1A. Risk Factors

The following factors, as well as other factors not set forth below, may adversely affect the business, operations, financial condition or results of operations of the Company (sometimes referred to in this section as "we" "us" or "our").

We have in the past experienced and may in the future experience high delinquency and loss rates in our portfolios. This has reduced and may continue to reduce our profitability. In addition, our inability to accurately forecast and estimate the amount and timing of future collections could have a material adverse effect on our financial position, liquidity and results of operations.

Our consolidated net income for the year ended March 31, 2020 was \$3.5 million as compared to net loss of \$3.6 million for the year ended March 31, 2019. Our profitability depends, to a material extent, on the performance of contracts that we purchase. Historically, we have experienced higher delinquency rates than traditional financial institutions because substantially all of our Contracts and Direct Loans are to non-prime borrowers, who are unable to obtain financing from traditional sources due primarily to their credit history. Contracts and Direct Loans made to these individuals generally entail a higher risk of delinquency, default, repossession, and higher losses than loans made to consumers with better credit.

Our underwriting standards and collection procedures may not offer adequate protection against the risk of default, especially in periods of economic uncertainty and wage stagnation such as have existed over much of the past few years. In the event of a default, the collateral value of the financed vehicle usually does not cover the outstanding Contract or Direct Loan balance and costs of recovery.

Our ability to accurately forecast performance and determine an appropriate provision and allowance for credit losses, is critical to our business and financial results. The allowance for credit losses is established through a provision for credit losses based on management's evaluation of the risk inherent in the portfolio, the composition of the portfolio, specific impaired Contracts and Direct Loans, and current economic conditions. Please see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policy" in Item 7 of this Form 10-K and "Management's Report on Internal Control over Financial Reporting" in Item 9A of this Form 10-K, both of which are incorporated herein by reference.

There can be no assurance that our performance forecasts will be accurate. In periods with changing economic conditions, such as is the case currently, accurately forecasting the performance of Contract and Direct Loans is more difficult. Our allowance for losses is an estimate, and if actual Contract and Direct Loan losses are materially greater than our allowance for losses, or more generally, if our forecasts are not accurate, our financial position, liquidity and results of operations could be materially adversely affected. For example, uncertainty surrounding the full economic impact of COVID-19 on our customers has made historical information on credit losses slightly less reliable in the current environment, and there can be no assurances that we have accurately estimated loan losses.

Other than limited representations and warranties made by dealers in favor of the Company, Contracts are purchased from the dealers without recourse, and we are therefore only able to look to the borrowers for repayment.

In June 2016, the Financial Accounting Standards Board ("FASB") issued the ASU 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. Among other things, the amendments in this ASU require the measurement of all expected credit losses for financial instruments held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. Many of the loss estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. The ASU also requires additional disclosures related to estimates and judgments used to measure all expected credit losses. The new guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. Recently, the FASB voted to delay the implementation date for this accounting standard, for smaller reporting companies, the new effective date is beginning after December 15, 2022, and early adoption is permitted. The Company is currently evaluating the impact of the adoption of this ASU on the consolidated financial statements and is collecting and analyzing data that will be needed to produce historical inputs into any models created as a result of adopting this ASU. At this time, the Company believes the adoption of this ASU will likely have a material effect and is expected to increase the overall allowance for credit losses.

The extent to which COVID-19 and measures taken in response thereto impact our business, results of operations and financial condition will depend on future developments, which are highly uncertain and are difficult to predict. COVID-19 has had and is likely to continue to have a material adverse impact on our results of operations and financial condition and heightens many of our known risks.

The outbreak of the global pandemic of COVID-19 and resultant economic effects of preventative measures taken across the United States and worldwide have been weighing on the macroeconomic environment, negatively

impacting consumer confidence, employment rates and other economic indicators that contribute to consumer spending behavior and demand for credit. The extent to which COVID-19 impacts our business, results of operations and financial condition will depend on future developments, which are highly uncertain and are difficult to predict, including, but not limited to, the duration and spread of the outbreak, its severity, the actions to contain the virus or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. While the magnitude of the impact from COVID-19 is uncertain, we could see

- a decline in purchase volume, which ultimately impacts the growth of our loan receivables;
- a decline in the growth of our interest income, due to reductions in benchmark interest rates and an expectation that we will provide, for a temporary period of time, forbearance in terms of interest and fee waivers for our cardholders impacted by COVID-19; and
- increases in our delinquencies and net charge-off rate and our allowance for credit losses, given the recent increases in filings for unemployment benefits in the U.S.

For more information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

In addition, the spread of COVID-19 has caused us to modify our business practices (including restricting employee travel, developing social distancing plans for our employees and cancelling physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or as we determine is in the best interests of our employees, partners and customers. The outbreak has adversely impacted and may further adversely impact our workforce and operations and the operations of our partners, customers, suppliers and third-party vendors, throughout the time period during which the spread of COVID-19 continues and related restrictions remain in place, and even after the COVID-19 outbreak has subsided. In particular, we may experience financial losses due to a number of operational factors, including:

- third-party disruptions, including potential outages at third-party data centers and other suppliers;
- an increased volume of unanticipated customer and regulatory requests for information and support, or additional regulatory requirements, which could require additional resources and costs to address, including, for example, government initiatives to reduce or eliminate payments costs.

Even after the COVID-19 outbreak has subsided, our business may continue to experience materially adverse impacts as a result of the virus’s economic impact, including the availability and cost of funding and any recession that has occurred or may occur in the future. There are no comparable recent events that provide guidance as to the effect COVID-19 as a global pandemic may have, and, as a result, the ultimate impact of the outbreak is highly uncertain and subject to change.

We do not yet know the full extent of the impacts on our business, our operations or the economy as a whole.

We operate in an increasingly competitive market.

The non-prime consumer-finance industry is highly competitive, and the competitiveness of the market continues to increase as new competitors continue to enter the market and certain existing competitors continue to expand their operations and become more aggressive in offering competitive terms. There are numerous financial service companies that provide consumer credit in the markets served by us, including banks, credit unions, other consumer finance companies and captive finance companies owned by automobile manufacturers and retailers. Many of these competitors have substantially greater financial resources than us. In addition, some of our competitors often provide financing on terms more favorable to automobile purchasers or dealers than we offer. Many of these competitors also have long-standing relationships with automobile dealerships and may offer dealerships, or their customers, other forms of financing including dealer floor-plan financing and leasing, which are not provided by us. Providers of non-prime consumer financing have traditionally competed primarily on the basis of:

- interest rates charged;
- the quality of credit accepted;

- dealer discount;
- amount paid to dealers relative to the wholesale book value;
- the flexibility of Contract and Direct Loan terms offered; and
- the quality of service provided.

Our ability to compete effectively with other companies offering similar financing arrangements depends in part on our ability to maintain close relationships with dealers of used and new vehicles. We may not be able to compete successfully in this market or against these competitors. In recent years, it has become increasingly difficult for the Company to match or exceed pricing of its competitors, which has generally resulted in declining Contract acquisition rates during the 2019 and 2020 fiscal years.

We have focused on a segment of the market composed of consumers who typically do not meet the more stringent credit requirements of traditional consumer financing sources and whose needs, as a result, have not been addressed consistently by such financing sources. As new and existing providers of consumer financing have undertaken to penetrate our targeted market segment, we have experienced increasing pressure to reduce our interest rates, fees and dealer discounts in order to maintain our market share. The Company's average dealer discount on Contracts purchased for the fiscal years ended March 31, 2020 and 2019 was 7.9% and 8.2%, respectively. The Company's average APR on Contracts purchased for the fiscal years ended March 31, 2020 and 2019, was 23.4% and 23.5%, respectively. These competitive factors continue to exist and may impact our ability to secure quality loans on our preferred terms in significant quantities.

In addition, the number of Contracts and Direct Loans under which customers decided to discontinue contractually required payments to us after they were approved by other lenders for new vehicle financing has recently increased. We are particularly vulnerable to the effects of these practices because of our focus on providing financing with respect to used vehicles.

Our business depends on our continued access to bank financing on acceptable terms.

Prior to March 2019, we financed our operations through traditional bank credit facilities and cash flows generated from operations. On March 29, 2019, we entered into a new senior secured credit facility (the "Credit Facility"). Our ability to access capital through our existing facility, or undertake a future facility, or other debt or equity transactions on economically favorable terms or at all, depends in large part on factors that are beyond our control, including:

- Conditions in the securities and finance markets generally, and for securitized instruments in particular;
- A negative bias toward our industry;
- General economic conditions and the economic health of our earnings, cash flows and balance sheet;
- Security or collateral requirements;
- The credit quality and performance of our customer receivables;
- Regulatory restrictions applicable to us;
- Our overall business and industry prospects;
- Our overall sales performance, profitability, cash flow, balance sheet quality, and regulatory restrictions;
- Our ability to provide or obtain financial support for required credit enhancement;
- Our ability to adequately service our financial instruments;
- Our ability to meet debt covenant requirements; and
- Prevailing interest rates.

Our existing and future levels of indebtedness could adversely affect our financial health, ability to obtain financing in the future, ability to react to changes in our business and ability to fulfill our obligations under such indebtedness.

As of March 31, 2020, we had aggregate outstanding indebtedness, under our Credit Facility of \$126.8 million compared to \$145 million as of March 31, 2019. This level of indebtedness could:

- Make it more difficult for us to satisfy our obligations with respect to our outstanding notes and other indebtedness, resulting in possible defaults on and acceleration of such indebtedness;
- Require us to dedicate a substantial portion of our cash flow from operations to the payment of principal and interest on our indebtedness, thereby reducing the availability of such cash flows to fund working capital, acquisitions, new store openings, capital expenditures and other general corporate purposes;
- Limit our ability to obtain additional financing for working capital, acquisitions, new store openings, capital expenditures, debt service requirements and other general corporate purposes;
- Limit our ability to refinance indebtedness or cause the associated costs of such refinancing to increase;
- Increase our vulnerability to general adverse economic and industry conditions, including interest rate fluctuations (because a portion of our borrowings are at variable rates of interest); and
- Place us at a competitive disadvantage compared to our competitors with proportionately less debt or comparable debt at more favorable interest rates which, as a result, may be better positioned to withstand economic downturns.

Any of the foregoing impacts of our level of indebtedness could have a material adverse effect on us.

Our Credit Facility is subject to certain defaults and negative covenants.

The Credit Facility loan documents contain customary events of default and negative covenants, including but not limited to those governing indebtedness, liens, fundamental changes, investments, and sales of receivables. Such loan documents also restrict the Company's ability, without lenders' consent, to modify its credit policies or make changes to its form of Direct Loan contract or its form of dealer agreement. If an event of default occurs, the lenders could increase borrowing costs, restrict our ability to obtain additional advances under the Credit Facility, accelerate all amounts outstanding under the Credit Facility, enforce their interest against collateral pledged under the Credit Facility or enforce their rights under the guarantees.

If we fail to maintain an effective system of internal control over financial reporting and disclosure controls and procedures, we may not be able to accurately and timely report our financial results, which could lead to a loss of investor confidence in our financial statements and have an adverse effect on our stock price.

Effective internal control over financial reporting and disclosure controls and procedures are necessary for us to provide reliable and accurate financial statements and to effectively prevent fraud and to operate successfully as a public company. As further described in Item 9A. *Controls and Procedures*, our management has concluded that, because of material weaknesses, our internal control over financial reporting and our disclosure controls and procedures were not effective as of March 31, 2019 or as of March 31, 2020. The Company has and will continue to enhance its controls and expects to remediate the material weaknesses. However, we cannot be certain that these measures will be successful or that we will be able to prevent future significant deficiencies or material weaknesses. Inadequate internal control over financial reporting or inadequate disclosure controls and procedures could cause investors to lose confidence in our reported financial information, which could hurt our reputation and have a negative effect on the trading price of our stock and our access to capital.

Uncertainty about the continuing availability of LIBOR may adversely affect our business.

The interest rates under our Credit Facility are calculated by reference to LIBOR. On July 27, 2017, the United Kingdom's Financial Conduct Authority, the authority that regulates LIBOR, announced that it intends to stop compelling banks to submit rates required for the calculation of LIBOR after 2021, and it is unclear whether new methods of calculating LIBOR will be established. Various industry groups continue to discuss replacement

benchmark rates, the process for amending existing LIBOR-based contracts, and the potential economic impacts of different alternatives. For example, the U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, is considering replacing U.S. dollar LIBOR with a newly created index, calculated based on repurchase agreements backed by treasury securities.

If LIBOR ceases to exist after 2021, then the administrative agent will select a broadly accepted comparable successor rate, if one exists, or such other successor rate determined by the administrative agent to maintain the lender's then-current yield. It is not possible to predict the effect of these changes, or reforms, tax legislation impacts, or the establishment of alternative reference rates in the United Kingdom, the United States or elsewhere, and such changes may result in, among other things, increased volatility and illiquidity in markets for instruments that currently rely on LIBOR and increased borrowing costs.

On October 5, 2017, the CFPB released the final rule Payday, Vehicle Title and Certain High-Cost Installment Loans under the Dodd Frank Act, which as adopted could potentially have a material adverse effect on our operations and financial performance.

In 2017, the CFPB adopted rules applicable to payday, title and certain high-cost installment loans. The rules address the underwriting of covered short-term loans and longer-term balloon-payment loans, including payday and vehicle title loans, as well as related reporting and recordkeeping provisions. These provisions have become known as the "mandatory underwriting provisions" and include rules for lenders to follow to determine whether or not consumers have the ability to repay the loans according to their terms. On February 6, 2019, the CFPB proposed to rescind the ability to repay provisions and delay the compliance date for the mandatory underwriting provisions until November 19, 2020. If this rule becomes effective it could have a materially adverse effect on our current business and make it less profitable. Additionally, the CFPB may target specific features of loans by rulemaking that could cause us to cease offering certain products, or adopt rules imposing new and potentially burdensome requirements and limitations with respect to any of our current or future lines of business, which could have a material adverse effect on our operations and financial performance. The CFPB could also implement rules that limit our ability to continue servicing our financial products and services.

The CFPB has broad authority to pursue administrative proceedings and litigation for violations of federal consumer financing laws.

The CFPB has the authority to obtain cease and desist orders (which can include orders for restitution or rescission of contracts, as well as other kinds of affirmative relief) and monetary penalties ranging from \$5,000 per day for minor violations of federal consumer financial laws (including the CFPB's own rules) to \$25,000 per day for reckless violations and \$1 million per day for knowing violations. If we are subject to such administrative proceedings, litigation, orders or monetary penalties in the future, this could have a material adverse effect on our operations and financial performance. Also, where a company has violated Title X of the Dodd-Frank Act or CFPB regulations under Title X, the Dodd-Frank Act empowers state attorneys general and state regulators to bring civil actions for the kind of cease and desist orders available to the CFPB (but not for civil penalties). If the CFPB or one or more state officials believe we have violated the foregoing laws, they could exercise their enforcement powers in ways that would have a material adverse effect on us. See "Item 1. Business – Regulation" for additional information.

Pursuant to the authority granted to it under the Dodd-Frank Act, the CFPB adopted rules that subject larger nonbank automobile finance companies to supervision and examination by the CFPB. Any such examination by the CFPB likely would have a material adverse effect on our operations and financial performance.

The CFPB defines a "larger participant" of automobile financing if it has at least 10,000 aggregate annual originations. The Company does not meet the threshold of at least 10,000 aggregate annual direct loan originations, and therefore would not fall under the CFPB's supervisory authority. The CFPB issued rules regarding the supervision and examination of non-depository "larger participants" in the automobile finance business. The CFPB's stated objectives of such examinations are: to assess the quality of a larger participant's compliance management systems for preventing violations of federal consumer financial laws; to identify acts or practices that materially increase the risk of violations of federal consumer finance laws and associated harm to consumers; and to gather facts that help determine whether the larger participant engages in acts or practices that are likely to violate federal consumer financial laws in connection with its automobile finance business. At such time, if we become or the CFPB defines us as a larger participant, we will be subject to examination by the CFPB for, among other things,

ECOA compliance; unfair, deceptive or abusive acts or practices (“UDAAP”) compliance; and the adequacy of our compliance management systems.

We have continued to evaluate our existing compliance management systems. We expect this process to continue as the CFPB promulgates new and evolving rules and interpretations. Given the time and effort needed to establish, implement and maintain adequate compliance management systems and the resources and costs associated with being examined by the CFPB, such an examination could likely have a material adverse effect on our business, financial condition and profitability. Moreover, any such examination by the CFPB could result in the assessment of penalties, including fines, and other remedies which could, in turn, have a material effect on our business, financial condition, and profitability.

We are subject to many other laws and governmental regulations, and any material violations of or changes in these laws or regulations could have a material adverse effect on our financial condition and business operations.

Our financing operations are subject to regulation, supervision, and licensing under various other federal, state and local statutes and ordinances. Additionally, the procedures that we must follow in connection with the repossession of vehicles securing Contracts are regulated by each of the states in which we do business. The various federal, state and local statutes, regulations, and ordinances applicable to our business govern, among other things:

- licensing requirements;
- requirements for maintenance of proper records;
- payment of required fees to certain states;
- maximum interest rates that may be charged on loans to finance used and new vehicles;
- debt collection practices;
- proper disclosure to customers regarding financing terms;
- privacy regarding certain customer data;
- interest rates on loans to customers;
- late fees and insufficient fees charged;
- telephone solicitation of Direct Loan customers; and
- collection of debts from loan customers who have filed bankruptcy.

We believe that we maintain all material licenses and permits required for our current operations and are in substantial compliance with all applicable local, state and federal regulations. Our failure, or the failure by dealers who originate the contracts we purchase, to maintain all requisite licenses and permits, and to comply with other regulatory requirements, could result in consumers having rights of rescission and other remedies that could have a material adverse effect on our financial condition. Furthermore, any changes in applicable laws, rules and regulations, such as the passage of the Dodd-Frank Act and the creation of the CFPB, may make our compliance therewith more difficult or expensive or otherwise materially adversely affect our business and financial condition.

The loss of our key executives could have a material adverse effect on our business.

Our future growth and development are significantly dependent upon the skills and experience of our senior management team and our ability to retain that team.

We do not maintain key-man life insurance policies on any of these executives. The loss of services of one or more of the executives could have a material adverse effect on our business, results of operations, and financial condition. See *Item 9A. Controls and Procedures* in this Annual Report, the text of which is incorporated herein by reference.

We are subject to risks associated with litigation.

As a consumer finance company, we are subject to various consumer claims and litigation seeking damages and statutory penalties, based upon, among other things:

- usury laws;
- disclosure inaccuracies;
- wrongful repossession;
- violations of bankruptcy stay provisions;
- certificate of title disputes;
- fraud;
- breach of contract; and
- discriminatory treatment of credit applicants.

Some litigation against us could take the form of class action complaints by consumers. As the assignee of contracts originated by dealers, we may also be named as a co-defendant in lawsuits filed by consumers principally against dealers. The damages and penalties claimed by consumers in these types of actions can be substantial. The relief requested by the plaintiffs varies but may include requests for compensatory, statutory, and punitive damages. We also are periodically subject to other kinds of litigation typically experienced by businesses such as ours, including employment disputes and breach of contract claims. No assurances can be given that we will not experience material financial losses in the future as a result of litigation or other legal proceedings.

We depend upon our relationships with our dealers.

Our business depends in large part upon our ability to establish and maintain relationships with reputable dealers who originate the Contracts we purchase. Although we believe we have been successful in developing and maintaining such relationships, such relationships are not exclusive, and many of them are not longstanding. There can be no assurances that we will be successful in maintaining such relationships or increasing the number of dealers with whom we do business, or that our existing dealer base will continue to generate a volume of Contracts comparable to the volume of such Contracts historically generated by such dealers.

Our success depends upon our ability to implement our business strategy.

Our financial position depends on management's ability to execute our business strategy. Key factors involved in the execution of our business strategy include achievement of the desired contract purchase volume, the use of effective risk management techniques and collection methods, continued investment in technology to support operating efficiency, and continued access to significant funding and liquidity sources.

With the recent change in senior management, the Company's business strategy has been redefined. This strategy includes remaining committed to the branch-based model, focusing on financing primary transportation to and from work for the subprime borrower, pricing based on risk (rate, yield, advance, etc.), and a commitment to the underwriting discipline required for optimal portfolio performance.

Our failure or inability to execute any element of our business strategy could have a material adverse effect on our business and financial condition.

Our business is highly dependent upon general economic conditions.

We are subject to changes in general economic conditions that are beyond our control. During periods of economic uncertainty, such as has existed for much of the past few years, delinquencies, defaults, repossessions, and losses generally increase, absent offsetting factors. These periods also may be accompanied by decreased consumer demand for automobiles and declining values of automobiles securing outstanding loans, which weakens collateral coverage on our loans and increases the amount of a loss we would experience in the event of default. Because we focus on non-prime borrowers, the actual rates of delinquencies, defaults, repossessions, and losses on these loans are higher than those experienced in the general automobile finance industry and could be more dramatically affected by a general economic downturn. In addition, during an economic slowdown or recession, our servicing costs may increase without a corresponding increase in our servicing income. No assurances can be given that our underwriting criteria and collection methods to manage the higher risk inherent in loans made to non-prime borrowers will afford adequate protection against these risks. Any sustained period of increased delinquencies, defaults, repossessions, or losses, or increased servicing costs could have a material adverse effect on our business and financial condition.

Furthermore, in a low interest-rate environment such as has existed in the United States in recent years, the level of competition increases in the non-prime consumer-finance industry as new competitors enter the market and many existing competitors expand their operations. Such increased competition, in turn, has exerted increased pressure on us to reduce our interest rates, fees, and dealer discount rates in order to maintain our market share. Any further reductions in our interest rates, fees or dealer discount rates could have a material adverse impact on our profitability or financial condition.

The auction proceeds we receive from the sale of repossessed vehicles and other recoveries are subject to fluctuation due to economic and other factors beyond our control.

If we repossess a vehicle securing a Contract, we typically have it transported to an automobile auction for sale. Auction proceeds from the sale of repossessed vehicles and other recoveries are usually not sufficient to cover the outstanding balance of the Contract, and the resulting deficiency is charged off. In addition, there is, on average, approximately a 30-day lapse between the time we repossess a vehicle and the time it is sold. The proceeds we receive from such sales depend upon various factors, including the supply of, and demand for, used vehicles at the time of sale. Such supply and demand are dependent on many factors. For example, during periods of economic uncertainty, the demand for used cars may soften, resulting in decreased auction proceeds to us from the sale of repossessed automobiles. Furthermore, depressed wholesale prices for used automobiles may result from significant liquidations of rental or fleet inventories, and from increased volume of trade-ins due to promotional financing programs offered by new vehicle manufacturers. Newer, more expensive vehicles securing our larger dollar loans are more susceptible to wholesale pricing fluctuations than are older vehicles and also experience depreciation at a much greater rate. Until the Company's portfolio has been successfully converted to primarily consisting of our target vehicle (primary transportation to and from work for the subprime borrower), the Company expects to be affected by softer auction activity and reduced vehicle values.

An increase in market interest rates may reduce our profitability.

Our long-term profitability may be directly affected by the level of and fluctuations in interest rates. Sustained, significant increases in interest rates may adversely affect our liquidity and profitability by reducing the interest rate spread between the rate of interest we receive on our Contracts and interest rates that we pay under our Credit Facility. As interest rates increase, our gross interest rate spread on new originations will generally decline since the rates charged on the contracts originated or purchased from dealers generally are limited by statutory maximums, restricting our opportunity to pass on increased interest costs. We monitor the interest rate environment and, on occasion, enter into interest rate swap agreements relating to a portion of our outstanding debt. Such agreements effectively convert a portion of our floating-rate debt to a fixed-rate, thus reducing the impact of interest rate changes on our interest expense. However, the interest rate swap agreements in effect for most of the past five years matured during the fiscal year ended March 31, 2018, and we have not entered into new arrangements. We will continue to evaluate interest rate swap pricing and we may or may not enter into interest rate swap agreements in the future.

We may experience problems with integrated computer systems or be unable to keep pace with developments in technology or conversion to new integrated computer systems.

We use various technologies in our business, including telecommunication, data processing, and integrated computer systems. Technology changes rapidly. Our ability to compete successfully with other financing companies may depend on our ability to efficiently and cost-effectively implement technological changes. Moreover, to keep pace with our competitors, we may be required to invest in technological changes that do not necessarily improve our profitability.

In February 2019, we converted from our internally developed loan operating system to a third-party loan operating system. This system is used to respond to customer inquiries and to monitor the performance of our Contract and Direct Loan portfolios and the performance of individual customers under our Contracts and Direct Loans. Problems with the system conversion could adversely impact our ability to monitor our portfolios or collect amounts due under our Contracts and Direct Loans, which could have a material adverse effect on our financial condition and results of operations.

In fact, delays completing the system integration with the accounting system contributed to a material weakness in our internal control over financial reporting for the fiscal year ended March 31, 2019. See *Item 9A. Controls and Procedures* in this Annual Report, the text of which is incorporated herein by reference.

Failure to properly safeguard confidential customer information could subject us to liability, decrease our profitability, and damage our reputation.

In the ordinary course of our business, we collect and store sensitive data, including our proprietary business information and personally identifiable information of our customers, on our computer networks, and share such data with third parties. The secure processing, maintenance and transmission of this information is critical to our operations and business strategy.

Any failure, interruption, or breach in our cyber security, including through employee misconduct or any failure of our back-up systems or failure to maintain adequate security surrounding customer information, could result in reputational harm, disruption in the management of our customer relationships, or the inability to originate, process and service our products. Further, any of these cyber security and operational risks could result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to lawsuits by customers for identity theft or other damages resulting from the misuse of their personal information and possible financial liability, any of which could have a material adverse effect on our results of operations, financial condition and liquidity. In addition, regulators may impose penalties or require remedial action if they identify weaknesses in our security systems, and we may be required to incur significant costs to increase our cyber security to address any vulnerabilities that may be discovered or to remediate the harm caused by any security breaches. As part of our business, we may share confidential customer information and proprietary information with clients, vendors, service providers, and business partners. The information systems of these third parties may be vulnerable to security breaches and we may not be able to ensure that these third parties have appropriate security controls in place to protect the information we share with them. If our confidential information is intercepted, stolen, misused, or mishandled while in possession of a third party, it could result in reputational harm to us, loss of customer business, and additional regulatory scrutiny, and it could expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our results of operations, financial condition, and liquidity.

We rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to secure online transmission of confidential customer information. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive customer data. A party who is able to circumvent our security measures could misappropriate proprietary information or cause interruptions in our operations. We may be required to expend capital and other resources to protect against, or alleviate problems caused by, security breaches or other cybersecurity incidents. Although we have not experienced any material cybersecurity incidents to date, there can be no assurance that a cyber-attack, security breach or other cybersecurity incident will not have a material adverse effect on our business, financial condition or results of operations in the future. Our security measures are designed to protect against security breaches, but our failure to prevent security breaches could subject us to liability, decrease our profitability and damage our reputation.

We partially rely on third parties to deliver services, and failure by those parties to provide these services or meet contractual requirements could have a material adverse effect on our business, financial condition and results of operations.

We depend on third-party service providers for many aspects of our business operations, including loan origination, title processing, and online payments, which increases our operational complexity and decreases our control. We rely on these service providers to provide a high level of service and support, which subjects us to risks associated with inadequate or untimely service. If a service provider fails to provide the services that we require or expect, or fails to meet contractual requirements, such as service levels or compliance with applicable laws, a failure could negatively impact our business by adversely affecting our ability to process customers' transactions in a timely and accurate manner, otherwise hampering our ability to service our customers, or subjecting us to litigation or regulatory risk for poor vendor oversight. We may be unable to replace or be delayed in replacing these sources and there is a risk that we would be unable to enter into a similar agreement with an alternate provider on terms that we consider favorable or in a timely manner. Such a failure could have a material and adverse effect on our business, financial condition, and results of operations.

Our growth depends upon our ability to retain and attract a sufficient number of qualified employees.

To a large extent, our growth strategy depends on the opening of new offices that focus primarily on purchasing Contracts and making Direct Loans in markets we have not previously served. Future expansion of our branch office network depends, in part, upon our ability to attract and retain qualified and experienced office managers and the ability of such managers to develop relationships with dealers that serve those markets. We generally do not open a new office until we have located and hired a qualified and experienced individual to manage the office. Typically, this individual will be familiar with local market conditions and have existing relationships with dealers in the area to be served. Although we believe that we can attract and retain qualified and experienced personnel as we proceed with planned expansion into new markets, no assurance can be given that we will be successful in doing so. Competition to hire personnel possessing the skills and experience required by us could contribute to an increase in our employee turnover rate. High turnover or an inability to attract and retain qualified personnel could have an adverse effect on our origination, delinquency, default, and net loss rates and, ultimately, our business and financial condition.

Our stock is thinly traded, which may limit your ability to resell your shares.

The average daily trading volume of our common shares on the NASDAQ Global Select Market for the fiscal year ended March 31, 2020 was approximately 8,000 shares, which makes ours a thinly traded stock. Thinly traded stocks pose several risks for investors because they have wider spreads and less displayed size than other stocks that trade in higher volumes or an active trading market. Other risks posed by thinly traded stocks include difficulty selling the stock, challenges attracting market makers to make markets in the stock, and difficulty with financings. Our financial results, the introduction of new products and services by us or our competitors, and various factors affecting the consumer-finance industry generally may also have a significant impact on the market price of our common shares. In recent years, the stock market has experienced a high level of price and volume volatility, and market prices for the stocks of many companies, including ours, have experienced wide price fluctuations that have not necessarily been related to their operating performance. These risks could affect a shareholder's ability to sell their shares at the volumes, prices, or times that they desire.

Natural disasters, acts of war, terrorist attacks and threats, or the escalation of military activity in response to these attacks or otherwise may negatively affect our business, financial condition, and results of operations.

Natural disasters (such as hurricanes), acts of war, terrorist attacks and the escalation of military activity in response to these attacks or otherwise may have negative and significant effects, such as disruptions in our operations, imposition of increased security measures, changes in applicable laws, market disruptions and job losses. These events may have an adverse effect on the economy in general. Moreover, the potential for future terrorist attacks and the national and international responses to these threats could affect the business in ways that cannot be predicted. The effect of any of these events or threats could have a material adverse effect on our business, financial condition and results of operations.

Changes in U.S. federal, state and local tax law or interpretations of existing tax law could increase our tax burden or otherwise adversely affect our financial condition or results of operations.

We are subject to taxation at the federal, state, and local levels in the United States. On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (“TCJA”). The changes included in TCJA are broad and complex. The final transition impacts of TCJA may differ from the estimates provided elsewhere in this Annual Report, possibly materially, due to, among other things, changes in interpretations of TCJA, any legislative action to address questions that arise because of TCJA, any changes in accounting standards for income taxes or related interpretations in response to TCJA, or any updates or changes to estimates the Company has utilized to calculate the transition impacts, including impacts from changes to current year earnings estimates. The estimated impact of the new law is based on management’s current knowledge and assumptions and recognized impacts could be materially different from current estimates.

In response to the global impacts of COVID-19 on U.S. companies and citizens, the government enacted the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”) on March 27, 2020. The CARES Act included several tax relief options for companies, which resulted in the following provisions available to the Company.

- In May 2020, the Company elected to carryback its fiscal year 2019 net operating losses of \$9.7 million to 2013, thus generating a refund of \$3.5 million and an income tax benefit of \$1.4 million. The tax benefit is the result of the federal income tax rate differential between the current statutory rate of 21% and the 35% rate applicable to 2013.
- The Company plans to carryback its fiscal year 2020 net operating losses of \$3.0 million to 2014, thus generating an anticipated refund of \$1.0 million and an income tax benefit of \$0.4 million. The tax benefit is the result of the federal income tax rate differential between the current statutory rate of 21% and the 35% rate applicable to 2014.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company leases its corporate headquarters and branch office facilities. The Company’s headquarters, located at 2454 McMullen Booth Road, Building C, in Clearwater, Florida, consist of approximately 15,000 square feet of office space leased at an annual rate of approximately \$18.25 per square foot. The current lease relating to this space was entered into effective April 1, 2015 and expires on March 31, 2023.

As of March 31, 2020, each of the Company’s 43 branch offices located in Alabama, Florida, Georgia, Illinois, Indiana, Kentucky, Michigan, Missouri, Nevada, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, and Wisconsin consists of approximately 1,700 square feet of office space (Nevada and Wisconsin are expansion states with no local branch office). The Company acquires Contracts in Nevada and Wisconsin through its virtual expansion office operations based in the Charlotte, North Carolina branch location. These offices are located in office parks, shopping centers, or strip malls and are occupied pursuant to leases with an initial term of one to five years at annual rates ranging from approximately \$13.00 to \$35.00 per square foot. The Company believes that these facilities and additional or alternate space available to it are adequate to meet its needs for the foreseeable future.

Item 3. Legal Proceedings

The Company currently is not a party to any pending legal proceedings other than ordinary routine litigation incidental to its business, none of which, if decided adversely to the Company, would, in the opinion of management, have a material adverse effect on the Company’s financial condition or results of operations.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company's common shares are traded on the NASDAQ Global Select Market under the symbol "NICK."

The following table sets forth the high and low sales prices of the Company's common shares for the fiscal years ended March 31, 2020 and 2019, respectively.

| Fiscal year ended March 31, 2020 | High | Low |
|---|-------------|------------|
| First Quarter | \$ 9.94 | \$ 7.92 |
| Second Quarter | \$ 9.90 | \$ 8.07 |
| Third Quarter | \$ 9.60 | \$ 8.24 |
| Fourth Quarter | \$ 9.10 | \$ 4.76 |

| Fiscal year ended March 31, 2019 | High | Low |
|---|-------------|------------|
| First Quarter | \$ 9.50 | \$ 8.36 |
| Second Quarter | \$ 12.50 | \$ 9.01 |
| Third Quarter | \$ 12.42 | \$ 9.07 |
| Fourth Quarter | \$ 10.95 | \$ 8.50 |

As of June 19, 2020, there were approximately 120 holders of record of the Company's common shares.

The Company has not declared and paid cash dividends on its common shares in the recent past and has no current plans to declare or pay any cash dividends in the foreseeable future. There are no Canadian foreign exchange controls or laws that would affect the remittance of dividends or other payments to the Company's non-Canadian resident shareholders. There are no Canadian laws that restrict the export or import of capital, other than the Investment Canada Act (Canada), which requires the notification or review of certain investments by non-Canadians to establish or acquire control of a Canadian business. The Company is not a Canadian business as defined under the Investment Canada Act because it has no place of business in Canada, has no individuals employed in Canada in connection with its business, and has no assets in Canada used in carrying on its business.

Canada and the United States of America are signatories to the Convention Between the United States of America and Canada With Respect to Taxes on Income and on Capital (the "Tax Treaty"). The Tax Treaty contains provisions governing the tax treatment of interest, dividends, gains, and royalties paid to or received by a person residing in the United States. The Tax Treaty also contains provisions to prevent the occurrence of double taxation, essentially by permitting the taxpayer to claim a tax credit for taxes paid in the foreign jurisdiction.

Earnings from U.S. subsidiaries are permanently invested in the U.S. The Company has not provided any Canadian income tax or U.S. withholding tax on unremitted earnings. If a dividend was paid to the Company from the current or accumulated earnings and profits of the U.S. subsidiary, the dividend would be subject to a U.S. withholding tax of 5%. The gross dividend (i.e., before payment of the withholding tax) would generally be included in the Company's Canadian taxable income. However, under certain circumstances, the Company may be allowed to deduct the dividends in the calculation of its Canadian taxable income. If the Company has no other foreign (i.e., non-Canadian) non-business income, no relief is available in that case to recover the withholding taxes previously paid.

A 15% Canadian withholding tax applies to dividends paid by the Company to a U.S. shareholder (including those that own less than 10% of the Company's voting shares) that is an individual. The U.S. shareholder must include the gross amount of the dividends in the shareholder's net income to be taxed at the regular rates. In general, a U.S. shareholder can obtain a foreign tax credit for U.S. federal income tax purposes with respect to the Canadian withholding tax on such dividends, but the amount of such credit is subject to a limitation that depends, in part, on the amount of the shareholder's income and losses from other sources. A U.S. shareholder that is an individual also can elect to claim a deduction (rather than a foreign tax credit) for all non-U.S. income taxes paid by the shareholder during the particular year. The benefit of any deduction for foreign taxes may be negatively impacted by the overall limitation on deducting income and other taxes. U.S. shareholders are urged to consult their own tax advisors regarding the U.S. federal income tax treatment of any Canadian withholding tax imposed on dividends from the Company.

Performance Graph

Set forth below is a graph comparing the cumulative total return on the Company's common shares for the five-year period ended March 31, 2020, with that of an overall stock market (NASDAQ Composite) and the Company's peer group index (Dow Jones US General Financial Index). The stock performance graph assumes that the value of the investment in each of the Company's common shares, the NASDAQ Composite Index, and the Dow Jones US General Financial Index was \$100 on April 1, 2015 and that all dividends were reinvested.

The graph displayed below is presented in accordance with SEC requirements. Shareholders are cautioned against drawing any conclusions from the data contained therein, as past results are not necessarily indicative of future performance. This graph in no way reflects the Company's forecast of future financial performance.

| | 04/1/2015 | 04/1/2016 | 04/1/2017 | 04/1/2018 | 04/1/2019 | 04/1/2020 |
|--------------------------------------|-----------|-----------|-----------|-----------|-----------|-----------|
| Nicholas Financial, Inc. | \$ 100.00 | \$ 77.02 | \$ 75.87 | \$ 64.74 | \$ 64.24 | \$ 41.68 |
| NASDAQ Composite | 100.00 | 99.37 | 120.63 | 144.13 | 157.71 | 157.12 |

Unregistered Sales of Equity Securities and Use of Proceeds

The tables below sets forth the information with respect to purchase made by or on behalf of the Company or any “affiliated purchaser” (as defined in Rule 10b-18(a)(3) under the Exchange Act) of our shares of common stock during the Fiscal Year 2020:

| Period | <u>Total Number of Shares Purchased</u> | <u>Weighted Average Price Paid per Share</u> | <u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u> | <u>Approximate Dollar Value of Shares that May Yet Be Purchased Under Plans or Programs</u> |
|---------------------------------------|--|--|---|---|
| | <u>(In thousands, except for average price paid per share)</u> | | | |
| October 1, 2019 to October 31, 2019 | 14 | \$ 8.84 | 14 | \$ 8,876 |
| November 1, 2019 to November 30, 2019 | 5 | 8.82 | 5 | 8,832 |
| December 1, 2019 to December 31, 2019 | 5 | 8.98 | 5 | \$ 8,787 |
| Total | <u>24</u> | <u>\$ 8.88</u> | <u>24</u> | |

| Period | <u>Total Number of Shares Purchased</u> | <u>Weighted Average Price Paid per Share</u> | <u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u> | <u>Approximate Dollar Value of Shares that May Yet Be Purchased Under Plans or Programs</u> |
|---------------------------------------|--|--|---|---|
| | <u>(In thousands, except for average price paid per share)</u> | | | |
| January 1, 2020 to January 31, 2020 | 12 | \$ 8.51 | 12 | \$ 8,685 |
| February 1, 2020 to February 29, 2020 | 21 | 8.22 | 21 | 8,512 |
| March 1, 2020 to March 31, 2020 | 62 | 7.76 | 62 | \$ 8,031 |
| Total | <u>95</u> | <u>\$ 7.96</u> | <u>95</u> | |

In May 2019, the Company’s Board of Directors (“Board”) authorized a new stock repurchase program allowing for the repurchase of up to \$8.0 million of the Company’s outstanding shares of common stock in open market purchases, privately negotiated transactions, or through other structures in accordance with applicable federal securities laws. The authorization was effective immediately.

The timing and actual number of sharers will depend on a variety of factors, including stock price, corporate and regulatory requirements and other market and economic conditions. The Company’s stock repurchase program may be suspended or discontinued at any time.

In August 2019, the Company’s Board authorized additional repurchase of up to \$1.0 million of the Company’s outstanding shares.

Item 6. Selected Financial Data

The following tables present selected consolidated financial data of the Company as of and for the fiscal years ended March 31, 2020, 2019, 2018, 2017, and 2016. The selected consolidated financial data has been derived from our consolidated financial statements. You should read the selected consolidated financial data below in conjunction with “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our audited consolidated financial statements and notes thereto that are included elsewhere in this Report and, for the fiscal years ended March 31, 2018, 2017 and 2016 and as of March 31, 2018, 2017 and 2016, that are included in our annual reports for such fiscal years. Quarterly results of operations are incorporated herein by reference to *Note 13 – Quarterly Results of Operations (Unaudited)* in the notes to the consolidated financial statements included elsewhere in this Report.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

Nicholas Financial-Canada is a Canadian holding company incorporated under the laws of British Columbia in 1986. Nicholas Financial-Canada currently conducts its business activities exclusively through a wholly-owned indirect Florida subsidiary, Nicholas Financial. Nicholas Financial is a specialized consumer finance company engaged primarily in acquiring and servicing automobile finance installment contracts (“Contracts”) for purchases of used and new automobiles and light trucks. To a lesser extent, Nicholas Financial also originates direct consumer loans (“Direct Loans”) and sells consumer-finance related products. Nicholas Financial’s financing activities accounted for 100% of the Company’s consolidated revenue for the fiscal years ended March 31, 2020 and 2019. A second Florida subsidiary, Nicholas Data Services, Inc. (“NDS”), serves as an intermediate holding company for Nicholas Financial. In addition, NF Funding I, LLC (“NF Funding I”) is a wholly-owned, special purpose financing subsidiary of Nicholas Financial.

Nicholas Financial-Canada, Nicholas Financial, NDS, NF Funding I are collectively referred to herein as the “Company”.

Introduction

The Company’s consolidated revenues decreased from \$71.3 million for the fiscal year ended March 31, 2019 to \$62.1 million for the fiscal year ended March 31, 2020. The Company’s diluted earnings per share increased from a loss of \$0.46 per share for the fiscal year ended March 31, 2019 to a net income of \$0.45 per share for the fiscal year ended March 31, 2020. The Company reported a \$2.2 million operating income for the year ended March 31, 2020 compared to operating loss of \$4.6 million for the year ended March 31, 2019. The increase was a result of:

- focused disciplined underwriting and risk-based pricing;
- increased year-over-year gross portfolio yield;
- a change in the charge-off policy from 181 days to 121 days, resulting in a one-time gross charge-off of \$6.4 million of finance receivables;
- decreased net charge-off percentage due to improvement in the provision for credit losses
- the closing or consolidating of 11 branches in fiscal year 2020, which represented approximately 26% of the Company’s network, as of March 31, 2020 resulting in reduced expenses; and
- reduction in workforce due to the branch closures, which impacted approximately 20 employees and represented 9% of the Company workforce, as of March 31, 2020 resulting in charges associated with severance payments.

The Company’s consolidated net income for the fiscal year ended March 31, 2020 was \$3.5 million as compared to net loss of \$3.6 million for the fiscal year ended March 31, 2019.

The gross portfolio yield of the portfolio for the fiscal years ended March 31, 2020 and 2019, was 27.41% and 26.40%, respectively. Primarily as a result of increased competition within the industry and the Company's decision not to sacrifice pricing for volume, the average dealer discount as a percent of finance receivables associated with new volume for the fiscal years ended March 31, 2020 and 2019 was 7.9% and 8.2%, respectively. The increase in APR (and therefore overall yield) on new purchases in fiscal 2020 as compared with fiscal 2019 was primarily driven by the Company's recommitment to its core principles of disciplined underwriting and, risk-based pricing.

| <u>Portfolio Summary</u> | Fiscal Year ended March 31, | |
|--|------------------------------------|-------------|
| | (In thousands) | |
| | 2020 | 2019 |
| Average finance receivables (1) | \$ 226,541 | \$ 270,106 |
| Average indebtedness (2) | \$ 132,552 | \$ 136,386 |
| Interest and fee income on finance receivables | 62,095 | 71,300 |
| Interest expense | 8,515 | 9,504 |
| Net interest and fee income on finance receivables | \$ 53,580 | \$ 61,796 |
| Portfolio yield (3) | 27.41% | 26.40% |
| Interest expense as a percentage of average finance receivables | 3.76% | 3.52% |
| Provision for credit losses as a percentage of average finance receivables | 7.46% | 12.16% |
| Net portfolio yield (3) | 16.19% | 10.72% |
| Operating expenses as a percentage of average finance receivables | 15.20% | 12.42% |
| Pre-tax yield as a percentage of average finance receivables (4) | 0.99% | (1.70)% |
| Net charge-off percentage (5) | 10.01% | 13.39% |
| Allowance percentage (6) | 4.93% | 6.28% |

- (1) Average finance receivables represent the average of finance receivables throughout the period.
- (2) Average indebtedness represents the average outstanding borrowings under the Credit Facility.
- (3) Gross portfolio yield represents interest and fee income on finance receivables as a percentage of average finance receivables. Net portfolio yield represents (a) interest and fee income on finance receivables minus (b) interest expense minus (c) the provision for credit losses, as a percentage of average finance receivables.
- (4) Pre-tax yield represents net portfolio yield minus administrative expenses (marketing, salaries, employee benefits, depreciation, and administrative), as a percentage of average finance receivables.
- (5) Write-off to liquidation percentage is defined as net charge-offs divided by liquidation. Liquidation is defined as beginning finance receivables balance plus current period purchases and originations minus ending finance receivables balance.
- (6) Net charge-off percentage represents net charge-offs divided by average finance receivables outstanding during the period.

COVID-19

While the magnitude and duration of the impact from COVID-19 on our business remains uncertain, it may negatively affect our business and financial condition.

While the Company's results of operations in April and May 2020 appeared to be resilient to downward pressure exerted by macroeconomic conditions, such as significant increases in unemployment across the country, there can be no assurance that this apparent resilience can be sustained.

The government stimulus checks, which briefly increased daily cash collections in April 2020, the expansion of unemployment benefits by the CARES Act to allow individuals to receive their weekly unemployment benefit for a maximum of 39 weeks, and the fact that unemployed customers are expected to be eligible to receive Pandemic Unemployment Compensation ("PUC") equal to an additional \$600 per week through July 31, 2020, collectively are

expected to have a beneficial effect on the Company. The Company continued to experience strong cash collections in May 2020 and experienced positive trending on gross charge-off balances in April 2020 and May 2020.

However, the extent to which the COVID-19 pandemic will impact our business, financial condition, results of operations or cash flows will depend on numerous evolving factors that we are unable to accurately predict at this time. The length and scope of the restrictions imposed by various governments and success of efforts to find a suitable vaccine, among other factors, will determine the ultimate severity of the COVID-19 impact on our business. However, it is likely that prolonged periods of difficult market conditions could have material adverse impacts on our business, financial condition, results of operations and cash flows.

Critical Accounting Policy

The Company's critical accounting policy relates to the allowance for credit losses. It is based on management's opinion of an amount that is adequate to absorb losses incurred in the existing portfolio. Because of the nature of the customers under the Company's Contracts and Direct Loan program, the Company considers the establishment of adequate reserves for credit losses to be imperative.

During the first quarter of fiscal 2019, the Company began using the trailing six-month net charge-off percentage, annualized, and applied to ending finance receivables to calculate the allowance for credit losses. This change was made to reflect changes in the Company's lending policies and underwriting standards, which resulted from the Company changing its business strategies. The change in the Company's method for calculating the allowance for credit losses was accounted for as a change in estimate. The Company re-focused on financing primary transportation to and from work for the subprime borrower. This change resulted in purchasing higher yielding loans, with smaller amounts financed and shorter monthly terms. A trailing six-month net charge-off percentage, annualized, applied to ending finance receivables is also more in line with the industry practice, which typically uses a trailing twelve-month net charge-off methodology. Management believes a trailing six-month will more quickly reflect changes in the portfolio.

In addition, the Company takes into consideration the composition of the portfolio, current economic conditions, the estimated net realizable value of the underlying collateral, historical loan loss experience, delinquency, non-performing assets, and bankrupt accounts when determining management's estimate of probable credit losses and the adequacy of the allowance for credit losses. If the allowance for credit losses is determined to be inadequate, then an additional charge to the provision would be recorded to maintain adequate reserves based on management's evaluation of the risk inherent in the loan portfolio.

Contracts are purchased from many different dealers and are all purchased on an individual Contract-by-Contract basis. Individual Contract pricing is determined by the automobile dealerships and is generally the lesser of the applicable state maximum interest rate, if any, or the maximum interest rate which the customer will accept. In most markets, competitive forces will drive down Contract rates from the maximum rate to a level where an individual competitor is willing to buy an individual Contract. The Company generally purchases Contracts on an individual basis.

The Company utilizes the branch model, which allows for Contract purchasing to be done at the branch level. The Company has detailed underwriting guidelines it utilizes to determine which Contracts to purchase. These guidelines are specific and are designed to provide reasonable assurance that the Contracts that the Company purchases have common risk characteristics. The Company utilizes its District Managers to evaluate their respective branch locations for adherence to these underwriting guidelines, as well as approve underwriting exceptions. The Company also utilizes internal audit ("IA") to assure adherence to its underwriting guidelines. Any Contract that does not meet the Company's underwriting guidelines can be submitted by a branch manager for approval from the Company's District Managers or senior management.

Fiscal 2020 Compared to Fiscal 2019

Interest and Fee Income on Finance Receivables

Interest and fee income on finance receivables, predominantly finance charge income, decreased to \$62.1 million in fiscal 2020 as compared to \$71.3 million in fiscal 2019. The average finance receivables totaled \$226.5 million for the fiscal year ended March 31, 2020, a decrease of 16.1% from \$270.1 million for the fiscal year ended March 31, 2019. Purchasing volume has continued to decrease from fiscal 2019 as a result of tightening the Company's credit underwriting standards and a reduction in auto sales year over year.

Competition also continued to affect the Company's ability to acquire Contracts, furthermore, the Company's renewed strategic focus on financing primary transportation to and from work for the subprime borrower has impacted the Company's ability to acquire Contracts at desired yields. The average APR on new Contract purchases decreased slightly from 23.5% for fiscal year 2019 to 23.4% for fiscal year 2020. Concurrently, the dealer discount on new Contract purchases decreased from 8.2% for fiscal year 2019 to 7.9% for fiscal year 2020. Related to desired yields, the Company's strategy focused on risk-based pricing (rate, yield, advance, term, etc.) and a commitment to the underwriting discipline required for optimal portfolio performance as opposed to chasing competition for the sake of simply generating volume.

The gross portfolio yield increased to 27.4% for the fiscal year ended March 31, 2020 as compared to 26.4% for the fiscal year ended March 31, 2019. The gross portfolio yield increased primarily due to increase in the average portfolio APR from 22.98% for the fiscal year 2019 to 23.12% for fiscal year 2020. The net portfolio yield increased to 16.2% for the fiscal year ended March 31, 2020 from 10.7% for the fiscal year ended March 31, 2019. The net portfolio yield increased primarily due to a decrease in the provision for credit losses as a percentage of finance receivables, as described under "Analysis of Credit Losses" below. Additionally, the Company recorded lower interest expenses for the fiscal year 2020, which also increased net portfolio yield.

Operating Expenses

Operating expenses increased slightly to \$34.4 million for the fiscal year ended March 31, 2020 compared to \$33.5 million for the fiscal year ended March 31, 2019 as a result of increases across expense accounts, including but not limited to acceleration of dealers' spiffs expenses, bank/custody fees, professional/consulting fees, and repossessions/collection expenses. Marketing expenses decreased approximately \$0.9 million from the prior year due to the Company no longer capitalizing bonus ("Spiffs") paid to the dealers in fiscal year 2020. The Company accounted for this change as a change in accounting estimate. Beginning in fiscal 2019, spiffs are expensed when incurred. Salaries and employee benefits decreased by approximately \$0.2 million, resulting from a reduction in the number of employees, which was offset by increases in bonuses and benefits to employees. Administrative expense increased approximately \$1.7 million primarily due to increases of \$0.6 million in collateral protection insurance charges, \$0.5 million in repossession and recovery expenses, and \$0.5 million in bank and custody fees.

Interest Expense

Interest expense decreased to \$8.5 million for the fiscal year ended March 31, 2020, as compared to \$9.5 million for the fiscal year ended March 31, 2019, due to a decrease in average outstanding debt and interest rate. The average outstanding debt during the year ended March 31, 2020 decreased to \$132.6 million from \$136.4 million during the year ended March 31, 2019. The following table summarizes the Company's average cost of borrowed funds for the fiscal years ended March 31:

| | <u>2020</u> | <u>2019</u> |
|--|--------------|--------------|
| Variable interest under the line of credit and credit facility | 2.67% | 2.97% |
| Credit spread under the line of credit and credit facility | <u>3.75%</u> | <u>4.00%</u> |
| Average cost of borrowed funds | <u>6.42%</u> | <u>6.97%</u> |

LIBOR rates have decreased (0.99% as of March 31, 2020 compared to 2.49% as of March 31, 2019) and the Company's credit spread under the line of credit decreased (3.75% as of March 31, 2020 compared to 4.00% as of March 31, 2019). For further discussions regarding interest rates see "Note 5 – Credit Facility".

Analysis of Credit Losses

The following table sets forth a reconciliation of the changes in the allowance for credit losses on Contracts and Direct Loans for the fiscal years ended March 31:

| | For the year ended March 31, 2020 | | |
|------------------------------|-----------------------------------|---------------|------------------|
| | (In thousands) | | |
| | Indirect | Direct | Total |
| Balance at beginning of year | \$ 16,575 | \$ 357 | \$ 16,932 |
| Provision for credit losses | 16,096 | 805 | 16,901 |
| Charge-offs | (29,174) | (663) | (29,837) |
| Recoveries | 6,936 | 230 | 7,166 |
| Balance at end of year | <u>\$ 10,433</u> | <u>\$ 729</u> | <u>\$ 11,162</u> |

| | For the year ended March 31, 2019 | | |
|------------------------------|-----------------------------------|---------------|------------------|
| | (In thousands) | | |
| | Indirect | Direct | Total |
| Balance at beginning of year | \$ 19,433 | \$ 833 | \$ 20,266 |
| Provision for credit losses | 32,715 | 121 | 32,836 |
| Charge-offs | (37,514) | (638) | (38,152) |
| Recoveries | 1,941 | 41 | 1,982 |
| Balance at end of year | <u>\$ 16,575</u> | <u>\$ 357</u> | <u>\$ 16,932</u> |

During the first quarter of the fiscal year ended March 31, 2019, the Company began using the trailing six-month net charge-off percentage, annualized, and applied to ending finance receivables to calculate the allowance for credit losses. This change was made to reflect changes in the Company's lending policies and underwriting standards, which resulted from the Company changing its business strategies. The Company re-focused on financing primary transportation to and from work for the subprime borrower. This change resulted in purchasing higher yielding loans, with smaller amounts financed and shorter monthly terms. A trailing six-month, annualized, is also more in line with the industry practice, which uses a trailing twelve-month. Management believes a trailing six-month more accurately reflects changes in the portfolio. Using the prior method (discussed below), the allowance and provision expense for the first quarter of fiscal 2019 would have been approximately \$151,000 lower.

As of March 2019, the Company changed its charge-off policy from 181 days past due to 121 days past due, which resulted in the Company charging-off approximately \$6.4 million of finance receivables during the fourth quarter of fiscal 2019. This one-time charge-off, of approximately \$6.4 million, was excluded from the March 31, 2019 allowance for credit losses calculation.

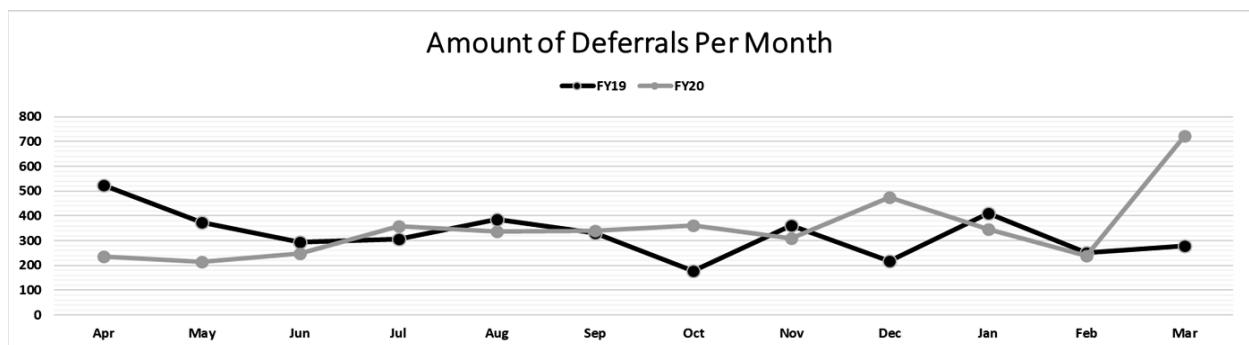

In addition, the Company takes into consideration the composition of the portfolio, current economic conditions, estimated net realizable value of the underlying collateral, historical loan loss experience, delinquency, non-performing assets, and bankrupt accounts when determining management's estimate of probable credit losses and adequacy of the allowance for credit losses. If the allowance for credit losses is determined to be inadequate, then an additional charge to the provision is recorded to maintain adequate reserves based on management's evaluation of the risk inherent in the loan portfolio. Conversely, the Company could identify abnormalities in the composition of the portfolio, which would indicate the calculation is overstated and management judgement may be required to determine the allowance of credit losses for both Contracts and Direct Loans.

The provision for credit losses decreased to \$16.9 million for the fiscal year ended March 31, 2020 from \$32.8 million for the fiscal year ended March 31, 2019, largely due to the 16.1% decrease in the average finance receivables.

Net charge-offs decreased to 10.0% for the fiscal year ended March 31, 2020 from 13.4% for the fiscal year ended March 31, 2019, primarily resulting from the Company changing its charge-off policy from 181 days past due to 121 days past due, which resulted in the Company charging-off approximately \$6.4 million of finance receivables during the fourth quarter of fiscal 2019, in a one-time charge-off.

The delinquency percentage for Contracts more than thirty days past due, excluding Chapter 13 bankruptcy accounts, as of March 31, 2020 was 10.2%, a slight increase from 10.1% as of March 31, 2019. The delinquency percentage for Direct Loans more than thirty days past due, excluding Chapter 13 bankruptcy accounts, as of March 31, 2020 was 4.6%, an increase from 3.8% as of March 31, 2019.

In accordance with Company policies and procedures, certain borrowers qualify for, and the Company offers, one-month principal payment deferrals on Contracts and Direct Loans. For the fiscal years ended March 31, 2020 and March 31, 2019 the Company granted deferrals to approximately 13.8% and 13.2%, respectively, of total Contracts and Direct Loans. The increase in the total number of deferrals in fiscal 2020 compared to fiscal 2019 was primarily the result of a spike on March 31, 2020. However, the Company experienced increased collections on finance receivables on gross charge-off balances in April 2020 and May 2020.

Income Taxes

The Company recorded a tax benefit of approximately \$1.2 million during fiscal 2020 compared to a \$0.9 million income tax benefit during fiscal 2019. The Company's effective tax rate in fiscal 2020 was (54.3)% compared to 20.5% in fiscal 2019. For further discussion regarding income taxes see "Note 7 – Income Taxes".

Liquidity and Capital Resources

The Company's cash flows are summarized as follows:

| | Fiscal Year ended March 31, (In thousands) | |
|---------------------------------|---|------------------|
| | 2020 | 2019 |
| Cash provided by (used in): | | |
| Operating activities | \$ 10,485 | \$ 14,044 |
| Investing activities | (3,676) | 44,159 |
| Financing activities | (19,767) | (23,187) |
| Net increase (decrease) in cash | <u>\$ (12,958)</u> | <u>\$ 35,016</u> |

The Company's primary use of working capital for the fiscal year ended March 31, 2020 was funding the purchase of Contracts, which are financed substantially through cash from principal and interest payments received, and the Company's line of credit.

On March 29, 2019, NF Funding I, a special purpose financing subsidiary of Nicholas Financial, entered into a senior secured credit facility (the "Credit Facility") pursuant to a credit agreement with Ares Agent Services, L.P., as administrative agent and collateral agent, and the lenders that are party thereto (the "Credit Agreement"). The Company's prior line of credit was paid off in connection with this Credit Facility. As of March 31, 2020, the total amount outstanding under the Credit Facility was \$126.8 million. The Company decreased the total amount outstanding to \$119.0 million on May 31, 2020.

Pursuant to the Credit Agreement, the lenders agreed to extend to the Company a line of credit of up to \$175,000,000, which will be used to purchase Contracts from Nicholas Financial on a revolving basis pursuant to a related receivables purchase agreement between NF Funding I and Nicholas Financial (the "Receivables Purchase Agreement"). Under the terms of the Receivables Purchase Agreement, Nicholas Financial sells to NF Funding I the receivables under Contracts. Nicholas Financial continues to service the Contracts transferred to NF Funding I pursuant to a related servicing agreement (the "Servicing Agreement").

The availability of funds under the Credit Facility is generally limited to 82.5% of the value of non-delinquent receivables, and outstanding advances under the Credit Facility will accrue interest at a rate of LIBOR plus a credit spread, which is currently 3.75%. The commitment period for advances under the Credit Facility is three years. At the end of the commitment period, the outstanding balance would be paid off over a four-year amortization period.

The Company will continue to depend on the availability the Credit Facility, together with cash from operations, to finance future operations. The Credit Agreement and the other loan documents contain customary events of default and negative covenants, including but not limited to those governing indebtedness, liens, fundamental changes, investments, and sales of receivables. See *"Risk Factors—Our Credit Facility is subject to certain defaults and negative covenants."* If an event of default occurs under the Credit Facility, the Company's lenders could increase the Company's borrowing costs, restrict the Company's ability to obtain additional borrowings under the facility, accelerate all amounts outstanding under the facility, or enforce their interest against collateral pledged under the facility, or enforce their rights under guarantees.

On May 27, 2020, the Company obtained a loan in the amount of \$3,243,900 from Fifth Third Bank in connection with the U.S. Small Business Administration's Paycheck Protection Program (the "PPP Loan") pursuant to a Note by the Company in favor of Fifth Third Bank in such principal amount. Pursuant to the Paycheck Protection Program, all or a portion of the PPP Loan may be forgiven if the Company uses the proceeds of the PPP Loan for its payroll costs and other expenses in accordance with the requirements of the Paycheck Protection Program. While, the Company intends to use the proceeds of the PPP Loan for payroll costs and other covered expenses and intends to seek full forgiveness of the PPP Loan as soon as permitted under the Paycheck Protection Program, there can be no assurance that the Company will obtain any forgiveness of the PPP Loan.

If the PPP Loan is not fully forgiven, the Company will remain liable for the full and punctual payment of the outstanding principal balance plus accrued and unpaid interest. The PPP Loan accrues interest at a rate per annum equal to 1.00% and an initial payment of accrued and unpaid interest is due on December 27, 2020. The outstanding principal balance plus accrued and unpaid interest is due on May 27, 2022. The PPP Loan is unsecured and is a non-resource obligation. The PPP Loan may be prepaid at any time prior to maturity with no prepayment penalties. The note contains events of default and other provisions customary for a loan of this type.

Impact of Inflation

The Company is affected by inflation primarily through increased operating costs and expenses including increases in interest rates. Inflationary pressures on operating costs and expenses historically have been largely offset by the Company's continued emphasis on stringent operating and cost controls, although no assurances can be given regarding the Company's ability to offset the effects of inflation in the future.

Contractual Obligations

The following table summarizes the Company's material obligations as of March 31, 2020.

| | Payments Due by Period | | | | |
|-----------------------------|-------------------------------|-----------------------------|-------------------------|-------------------------|------------------------------|
| | (In thousands) | | | | |
| | Total | Less than 1 year | 1 to 3 years | 3 to 5 years | More than 5 years |
| Operating leases | \$ 3,036 | \$ 1,355 | \$ 1,360 | \$ 136 | \$ 185 |
| Credit facility | 126,830 | — | 31,707 | 63,415 | 31,708 |
| Interest on credit facility | 32,570 | 8,142 | 15,267 | 8,143 | 1,018 |
| Total | \$ 162,436 | \$ 9,497 | \$ 48,334 | \$ 71,694 | \$ 32,911 |

The Company's \$175.0 million commitment period for advances under the Credit Facility terminates March 31, 2022. At the end of the commitment period, the outstanding balance would be paid off over a four-year amortization period. The pricing of the Credit Facility is 375 basis points above 30-day LIBOR. The unused line fee on the Credit Facility is 0.50%. Interest on outstanding borrowings under the Credit Facility as of March 31, 2020, is based on an effective interest rate of 6.42%. The effective interest rate used in the above table does not contemplate the possibility of entering into interest rate swap agreements in the future.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risks relating to the Company's operations result primarily from changes in interest rates. The Company does not engage in speculative or leveraged transactions, nor does it hold or issue financial instruments for trading purposes.

Interest Rate Risk

We are subject to interest rate risk. As of March 31, 2020, \$126.8 million, or 100% of our total debt, was subject to floating interest rates. A hypothetical increase in the variable interest rates of 1% or 100 basis points would result in an annual pre-tax increase of interest expense of approximately \$1.3 million.

Item 8. Financial Statements and Supplementary Data

The following financial statements are filed as part of this Report:

| | |
|---|----|
| Report of Independent Registered Public Accounting Firm | 37 |
| Audited Consolidated Financial Statements | |
| Consolidated Balance Sheets | 38 |
| Consolidated Statements of Income (Loss) | 39 |
| Consolidated Statements of Shareholders' Equity | 40 |
| Consolidated Statements of Cash Flows | 41 |
| Notes to the Consolidated Financial Statements | 43 |

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Nicholas Financial, Inc. and Subsidiaries

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Nicholas Financial, Inc. and Subsidiaries (the Company) as of March 31, 2020 and 2019, the related consolidated statements of income (loss), shareholders' equity and cash flows, for the years then ended, and the related notes to the consolidated financial statements (collectively, the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2020 and 2019, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ RSM US LLP

We have served as the Company's auditor since 2018.

Consolidated Statements of Cash Flows
(In thousands)

| | Fiscal Year ended March 31, | |
|--|-----------------------------|------------------|
| | 2020 | 2019 |
| Cash flows from operating activities: | | |
| Net income (loss) | \$ 3,466 | \$ (3,648) |
| Adjustments to reconcile net income (loss) to net cash provided by operating activities: | | |
| Depreciation | 337 | 380 |
| Amortization of intangibles | 55 | - |
| Amortization of debt issuance costs | 429 | - |
| Amortization of operating of lease right-of-use assets | 1,913 | - |
| Gain on sale of property and equipment | (23) | (62) |
| Goodwill impairment charge | 295 | - |
| Repossessed assets | 677 | 193 |
| Provision for credit losses | 16,901 | 32,836 |
| Amortization of dealer discounts | (8,031) | (10,641) |
| Amortization of insurance and fee commissions | (2,615) | (1,797) |
| Accretion of purchase price discount | (746) | - |
| Deferred income taxes | 3,215 | (835) |
| Principal reduction on operating lease liabilities | (1,841) | - |
| Share-based compensation | 202 | 80 |
| Changes in operating assets and liabilities: | | |
| Accrued interest receivable | (275) | (157) |
| Prepaid expenses and other assets | 304 | (110) |
| Accounts payable and accrued expenses | (744) | (2,046) |
| Income taxes receivable | (3,244) | (149) |
| Unearned insurance and fee commissions | 210 | - |
| Net cash provided by operating activities | <u>10,485</u> | <u>14,044</u> |
| Cash flows from investing activities: | | |
| Purchase and origination of finance receivables | (89,334) | (85,240) |
| Principal payments received | 106,248 | 129,530 |
| Net assets acquired from branch acquisitions, primarily loans | (20,483) | - |
| Purchase of property and equipment | (130) | (228) |
| Proceeds from sale of property and equipment | 23 | 97 |
| Net cash (used in) provided by investing activities | <u>(3,676)</u> | <u>44,159</u> |
| Cash flows from financing activities: | | |
| Repayments on credit facility | (38,950) | (165,750) |
| Proceeds from the credit facility | 20,780 | 145,000 |
| Payment of loan originations fees | (623) | (2,453) |
| Proceeds from exercise of stock options | 5 | 16 |
| Repurchases of treasury stock | (979) | - |
| Net cash used in financing activities | <u>(19,767)</u> | <u>(23,187)</u> |
| Net (decrease) increase in cash | <u>(12,958)</u> | <u>35,016</u> |
| Cash and restricted cash, beginning of year | <u>37,642</u> | <u>2,626</u> |
| Cash and restricted cash, end of year | <u>\$ 24,684</u> | <u>\$ 37,642</u> |
| Supplemental Disclosures: | | |
| Interest paid, including debt originations cost, during the year | \$ 8,187 | \$ 11,600 |
| Income taxes paid during the year | 6 | 44 |
| Leased assets obtained in exchange for new operating lease liabilities | 4,058 | - |

The following table reconciles cash and restricted cash from the Consolidated Balance Sheets to the statements above:

| | Fiscal Year ended March 31, | |
|--------------------------------|------------------------------------|------------------|
| | 2020 | 2019 |
| Cash | \$ 16,802 | \$ 35,595 |
| Restricted cash | 7,882 | 2,047 |
| Total cash and restricted cash | \$ 24,684 | \$ 37,642 |

See accompanying notes to the Consolidated Financial Statements.

Nicholas Financial, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

1. Organization and Basis of Presentation

Nicholas Financial, Inc. (“Nicholas Financial – Canada”) is a Canadian holding company incorporated under the laws of British Columbia with two wholly owned United States subsidiaries, Nicholas Data Services, Inc. (“NDS”) and Nicholas Financial, Inc. (“NFI”). NDS historically was engaged in supporting and updating industry-specific computer application software for small businesses located primarily in the Southeastern United States. NDS has ceased its operations; however, it continues as the interim holding company for Nicholas Financial. NFI is a specialized consumer finance company engaged primarily in acquiring and servicing automobile finance installment contracts (“Contracts”) for purchases of used and new automobiles and light trucks. NFI also offers direct consumer loans (“Direct Loans”) and sells consumer-finance related products. In addition, NF Funding I, LLC (“NF Funding I”), is a wholly-owned, special purpose financing subsidiary of NFI. All three companies are based in Florida, U.S.A. The accompanying consolidated financial statements are stated in U.S. dollars and are presented in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”).

2. Summary of Significant Accounting Policies

Consolidation

The consolidated financial statements include the accounts of Nicholas Financial – Canada and its wholly owned subsidiaries, NDS, NFI, and NF Funding I, collectively referred to as the “Company”. All intercompany transactions and balances have been eliminated.

Segment Reporting

The Company reports operating segments in accordance with FASB Accounting Standards Codification (“ASC”) Topic 280, Segment Reporting. Operating segments are components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and assesses performance. FASB ASC Topic 280 requires that a public enterprise report a measure of segment profit or loss, certain specific revenue and expense items, segment assets, information about the way the operating segments were determined and other items.

The Company has one reportable segment, which is the consumer finance company.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for credit losses on finance receivables.

Restricted Cash

Restricted cash includes cash and cash equivalents for which the Company’s ability to withdraw funds is contractually limited. The Company’s restricted cash consist of cash restricted for debt serving of the Company’s variable interest entity.

Finance Receivables

Finance receivables are recorded at cost, net of unearned dealer discounts, unearned insurance and commissions (see “Revenue Recognition”), and the allowance for credit losses (See Note 3). Beginning in the fiscal year ended March 31, 2019, the Company ceased capitalizing compensation to the dealers. This change resulted in an increase in marketing expenses of approximately \$1.0 million for the fiscal year ended March 31, 2019.

Allowance for Credit Losses

During the first quarter of the fiscal year ended March 31, 2019, the Company began using the trailing six-month net charge-off percentage, annualized, and applied to ending finance receivables to calculate the allowance for credit losses. This change was made to reflect changes in the Company's lending policies and underwriting standards, which resulted from the Company changing its business strategies. The Company re-focused on financing primary transportation to and from work for the subprime borrower. This change resulted in purchasing higher yielding loans, with smaller amounts financed and shorter monthly terms. A trailing six-month, annualized, is also more in line with the industry practice, which uses a trailing twelve-month. Management believes a trailing six-month will more accurately reflect changes in the portfolio. Using the prior method (discussed below), the allowance and provision expense for the first quarter of fiscal 2019 would have been approximately \$151,000 lower.

As of March 2019, the Company changed its charge-off policy from 181 days past due to 121 days past due, which resulted in the Company charging-off approximately \$6.4 million of finance receivables during the fourth quarter of fiscal 2019. This one-time charge-off, of approximately \$6.4 million, was excluded from the March 31, 2019 allowance for credit losses calculation.

In addition, the Company takes into consideration the composition of the portfolio, current economic conditions, estimated net realizable value of the underlying collateral, historical loan loss experience, delinquency, non-performing assets, and bankrupt accounts when determining management's estimate of probable credit losses and adequacy of the allowance for credit losses. If the allowance for credit losses is determined to be inadequate, then an additional charge to the provision is recorded to maintain adequate reserves based on management's evaluation of the risk inherent in the loan portfolio. Conversely, the Company could identify abnormalities in the composition of the portfolio, which would indicate the calculation is overstated and management judgement may be required to determine the allowance of credit losses for both Contracts and Direct Loans.

Reposessed Assets

Reposessed assets are stated at net realizable value and consist primarily of automobiles that have been reposessed by the Company and are awaiting final disposition. Most costs associated with repossession, transport, and auction preparation expenses are reported under operating expenses in the period in which they are incurred.

Property and Equipment

Property and equipment is recorded at cost, net of accumulated depreciation. Expenditures for repairs and maintenance are charged to expense as incurred. Depreciation of property and equipment is computed using the straight-line method over the estimated useful lives of the assets as follows:

| | |
|------------------------|---|
| Automobiles | 3 years |
| Equipment | 5 years |
| Furniture and fixtures | 7 years |
| Software | 7 years |
| Leasehold improvements | Lesser of lease term or useful life (generally 6 - 7 years) |

Goodwill

Goodwill represents the excess of the cost of net assets acquired in business combinations over the fair value of identifiable tangible and intangible assets acquired and liabilities assumed in a business combination. Goodwill impairment exists when the fair value of a reporting unit is less than the carrying value. Goodwill is tested for impairment annually, as of the last day of the fiscal year, or more frequently whenever events or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount. Goodwill is tested for impairment at the reporting unit level. The Company has one reporting unit, which is the same level as the Company's one operating segment, the consumer finance company. The Company has the option of either assessing qualitative factors to determine whether it is more likely than not that the carrying value of our reporting unit exceeds its fair value or proceeding directly to a quantitative test. The Company elected to perform the quantitative impairment test at March 31, 2020.

The quantitative impairment test compares the fair value of the reporting unit to its carrying value, including goodwill. The fair value of a reporting unit refers to the price that would be received to sell the reporting unit in an orderly transaction between market participants at the measurement date. Quoted market prices in active markets are the best evidence of fair value and shall be used as the basis for the measurement, if available. If the fair value exceeds its carrying value, the goodwill of the reporting unit is not considered impaired. However, if the carrying value of the reporting unit exceeds its fair value, the Company recognizes an impairment loss equal to that excess.

As the Company only has one reporting unit, the Company estimated the fair value of the reporting unit using a market based approach, with the primary input being the Company's market capitalization at the measurement date, adjusted for a control premium. Based upon the impairment test at March 31, 2020, the Company concluded that its recorded balance of goodwill was impaired and recorded an impairment charge of \$0.3 million, which resulted in a full write-off of the Company's goodwill balance (See Note 5).

Impairment of Long-Lived Assets

The Company assesses impairment of long-lived assets, including property and equipment and intangible assets, whenever changes or events indicate that the carry amount may not be recoverable. The Company assesses impairment of these assets generally at the branch level based on profitability of the branch and the Company's plans for branch closings. The Company will write down such assets to fair value, based on operational results, if impairment has occurred. The Company did not record any impairment charges for the long-lived assets for the fiscal year ended 2020 or 2019.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the consolidated financial statement carrying amounts of existing assets and liabilities and their respective tax bases along with operating loss and tax credit carryforwards, if any. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date.

The Company recognizes tax benefits from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities, based on the technical merits of the position. The tax benefits recognized in the consolidated financial statements from any such position would be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. It is the Company's policy to recognize interest and penalties accrued on any uncertain tax benefits as a component of income tax expense. There were no unrecognized tax positions as of March 31, 2020 or 2019.

The Company files income tax returns in the U.S. federal jurisdiction and various state jurisdictions. With few exceptions the Company is no longer subject to U.S. federal and state tax examinations for fiscal years prior to 2016.

We are subject to taxation at the federal, state, and local levels in the United States. On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act ("TCJA"). The changes included in TCJA are broad and complex. The final transition impacts of TCJA may differ from the estimates provided elsewhere in this Annual Report, possibly materially, due to, among other things, changes in interpretations of TCJA, any legislative action to address questions that arise because of TCJA, any changes in accounting standards for income taxes or related interpretations in response to TCJA, or any updates or changes to estimates the Company has utilized to calculate the transition impacts, including impacts from changes to current year earnings estimates. The estimated impact of the new law is based on management's current knowledge and assumptions and recognized impacts could be materially different from current estimates.

The effect on deferred taxes of a change in tax rates is recognized in income tax expense in the period that includes the enactment date. See Note 7 for details regarding the impact of Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”) by the U.S. government on March 27, 2020.

Revenue Recognition

Interest income on finance receivables is recognized using the interest method. Accrual of interest income on finance receivables is suspended when a loan is contractually delinquent for 61 days or more, or the collateral is repossessed, whichever is earlier. The Company reverses the accrual of interest income when the loan is contractually delinquent 61 days or more.

As of March 2019, non-performing assets, defined as 61 or more days past due, a Chapter 7 bankruptcy account, or a Chapter 13 bankruptcy that has not been confirmed by the courts, for which the accrual of interest income is suspended. Upon confirmation of a bankruptcy chapter 13 (BK13), the account is charged-off. Upon notification of a bankruptcy chapter 7, an account is monitored for collection. In the event the debtors’ balance is reduced by the bankruptcy court, the Company will record a loss equal to the amount of principal balance reduction. The remaining balance will be reduced as payments are received. In the event an account is dismissed from bankruptcy, the Company will decide, based on several factors, to begin repossession proceedings or to allow the customer to begin making regularly scheduled payments (see Note 3).

A dealer discount represents the difference between the finance receivable of a Contract, and the amount of money the Company actually pays for the Contract. The discount negotiated by the Company is a function of the lender, the wholesale value of the vehicle, and competition in any given market. In making decisions regarding the purchase of a particular Contract, the Company considers the following factors related to the borrower: place and length of residence; current and prior job status; history in making installment payments for automobiles; current income; and credit history. In addition, the Company examines its prior experience with Contracts purchased from the dealer from which the Company is purchasing the Contract, and the value of the automobile in relation to the purchase price and the term of the Contract. The dealer discount is amortized as an adjustment to yield using the interest method over the life of the loan. The average dealer discount, as a percent of the amount financed, associated with new volume for the fiscal years ended March 31, 2020 and 2019, were 7.9% and 8.2%, respectively.

Unearned insurance and fee commissions consist primarily of commissions received from the sale of ancillary products. These products include automobile warranties, roadside assistance programs, accident and health insurance, credit life insurance, involuntary unemployment insurance, and forced placed automobile insurance. These commissions are amortized over the life of the Contract using the interest method.

Income (Loss) Per Share

The Company has granted stock compensation awards with nonforfeitable dividend rights which are considered participating securities. Earnings (loss) per share is calculated using the two-class method, as such awards are more dilutive under this method than the treasury stock method. Ordinarily, basic earnings per share is calculated by dividing net income allocated to common shareholders by the weighted average number of common shares outstanding during the period, which excludes the participating securities. Ordinarily, diluted loss per share includes the dilutive effect of additional potential common shares from stock compensation awards. For the year ended March 31, 2020, Company experienced net income. For the year ended March 31, 2019, the Company experienced net loss, which is not allocated to participating securities as their effect is antidilutive. Income (loss) per share has been computed based on the following weighted average number of common shares outstanding:

| | Fiscal Year ended March 31, (In thousands, except earnings per share numbers) | |
|--|--|-------------------|
| | 2020 | 2019 |
| Numerator: | | |
| Net income (loss) per consolidated statements of income (loss) | \$ 3,466 | \$ (3,648) |
| Less: Allocation of income (loss) to participating securities | <u>(32)</u> | <u>—</u> |
| Net income (loss) allocated to common stock | <u>\$ 3,434</u> | <u>\$ (3,648)</u> |
| Basic income (loss) per share computation: | | |
| Net income (loss) allocated to common stock | <u>\$ 3,434</u> | <u>\$ (3,648)</u> |
| Weighted average common shares outstanding, including shares considered participating securities | 7,774 | 7,861 |
| Less: Weighted average participating securities outstanding | <u>(72)</u> | <u>—</u> |
| Weighted average shares of common stock | <u>7,702</u> | <u>7,861</u> |
| Basic income (loss) per share | <u>\$.45</u> | <u>\$ (0.46)</u> |
| Diluted income (loss) per share computation: | | |
| Income (loss) allocated to common stock | \$ 3,434 | \$ (3,648) |
| Undistributed earnings re-allocated to participating securities | <u>32</u> | <u>—</u> |
| Numerator for diluted income (loss) per share | \$ 3,466 | \$ (3,648) |
| Weighted average common shares outstanding for basic income (loss) per share | 7,702 | 7,861 |
| Incremental shares from stock options | <u>1</u> | <u>—</u> |
| Weighted average shares and dilutive potential common shares | <u>7,703</u> | <u>7,861</u> |
| Diluted income (loss) per share | <u>\$.45</u> | <u>\$ (0.46)</u> |

Diluted income (loss) per share does not include the effect of certain stock options as their impact would be anti-dilutive. Approximately 68,600 stock options were not included in the computation of diluted loss per share for the year ended March 31, 2019, because their effect would have been anti-dilutive.

Share-Based Payments

The grant date fair value of share awards is recognized in earnings over the requisite service period (presumptively, the vesting period), net of estimated forfeitures. The Company estimates the fair value of option awards using the Black-Scholes option pricing model. The risk-free interest rate is based upon a U.S. Treasury instrument with a life that is similar to the expected term of the options. Expected volatility is based upon the historical volatility for the previous period equal to the expected term of the options. The expected term is based upon the average life of previously issued options. The expected dividend yield is based upon the yield expected on date of grant to occur over the term of the option.

The fair value of non-vested restricted shares and performance units are measured at the market price of a share on a grant date. Restricted shares have a three-year service period. Performance units include a performance period (generally ending at the end of the fiscal year in which the units were granted) followed by a two-year service period. At the end of the performance period, these units effectively become restricted shares for the remaining two-year service period at which time they become vested.

Fair Value Measurements

The Company measures specific assets and liabilities at fair value, which is an exit price, representing the price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date. When applicable, the Company utilizes market data or assumptions that market participants would use in pricing the asset or liability under a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs about which little or no market data exists, therefore requiring an entity to develop its own assumptions (see Note 7).

Financial Instruments and Concentrations

The Company's financial instruments consist of cash, finance receivables (accrued interest receivable is a part of finance receivables), and a Credit Facility. Financial instruments that are exposed to concentrations of credit risk are primarily finance receivables and cash.

For the year ended, March 31, 2020, the Company operated in 16 states through 43 branch locations. Of the finance receivables total as of March 31, 2020, Florida represented 29%, North Carolina represented 13%, Ohio represented 12%, and Georgia represented 10%. Of the remaining states, no one state represented more than 5% of the total finance receivables. The Company provides credit during the normal course of business and performs ongoing credit evaluations of its customers.

The Company maintains reserves for potential credit losses which, when realized, have been within the range of management's expectations. The Company perfects a primary security interest in all vehicles financed as a form of collateral.

The combined account balances the Company maintains at financial institutions typically exceed federally insured limits, and there is a concentration of credit risk related to accounts on deposit in excess of federally insured limits. The Company has not experienced any losses in such accounts and believes this risk of loss is not significant.

Variable Interest Entity

In March 2019, the Company entered into a new senior secured credit facility collateralized by customer financed receivables by transferring the receivables into a bankruptcy-remote variable interest entity (VIE). Under the terms of the transaction, all cash collections and other cash proceeds of the customer receivables go first to the servicer and the holders of the asset-backed notes, and then to the residual equity holder. The Company retained the servicing of the portfolio and receives a monthly fee of 2.5% (annualized) based on the outstanding balance of the financed receivables, and the Company currently holds all of the residual equity, monthly fees are eliminated in the consolidated financial statements. In addition, the Company, rather than the VIE, will retain certain credit insurance income together with certain recoveries related to credit insurance and on charge-offs of the financed receivables, which will continue to be reflected as a reduction of net charge-offs on a consolidated basis for as long as the Company consolidates the VIE.

The Company consolidated the VIE's when the Company determines that it is the primary beneficiary, the Company has the power to direct the activities that most significantly impact the performance of the VIE and it has the obligation to absorb losses and has the right to receive residual returns is significant.

Statements of Cash Flows

Cash paid for income taxes for the years ended March 31, 2020 and 2019 was approximately \$6 thousand and \$44 thousand, respectively. Cash paid for interest, including debt origination costs for the years ended March 31, 2020 and 2019 was approximately \$8.2 million and \$11.6 million, respectively.

Reclassifications

Certain prior-period amounts have been reclassified to conform to the current presentation. Such reclassifications had no impact on previously reported net loss or shareholders' equity.

Recently Adopted Accounting Pronouncements

In January 2017, the FASB issued ASU 2017-04, Simplifying the Test for Goodwill Impairment. ASU 2017-04 eliminates Step 2 from the goodwill impairment test. Instead, under the amendments in this Update, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. Additionally, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss, if applicable. ASU 2017-04 also eliminates the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. Therefore, the same impairment assessment applies to all reporting units. The amendments in this update are effective for public entities who are SEC filers for fiscal years beginning after December 15, 2019. Early adoption is permitted. The Company adopted the guidance on March 31, 2020 and applied it to the Company's goodwill impairment test at March 31, 2020 (See Note 5).

In February 2016, the FASB issued ASU No. 2016-02, "Leases", intended to improve financial reporting about leasing transactions. The ASU affects all companies and other organizations that lease assets such as real estate, airplanes, and manufacturing equipment. "The ASU will require organizations that lease assets—referred to as "lessees"—to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. The accounting by organizations that own the assets leased by the lessee—also known as lessor accounting—will remain largely unchanged from current U.S. GAAP. ASU 2016-02 is effective for annual periods beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. Upon adoption, the Company added the impact of the full operating lease terms, using the present value of future minimum lease payments to the balance sheet. The Company adopted the guidance on April 1, 2019 and the adoption of this guidance did not have a material impact on its Consolidated Financial Statements.

Recent Accounting Pronouncements

In June 2016, the FASB issued the ASU 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. Among other things, the amendments in this ASU require the measurement of all expected credit losses for financial instruments held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. Many of the loss

estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. The ASU also requires additional disclosures related to estimates and judgments used to measure all expected credit losses. The new guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. Recently, the FASB voted to delay the implementation date for this accounting standard, for smaller reporting companies, the new effective date is beginning after December 15, 2022, and early adoption is permitted. The Company is currently evaluating the impact of the adoption of this ASU on the consolidated financial statements and is collecting and analyzing data that will be needed to produce historical inputs into any models created as a result of adopting this ASU. At this time, the Company believes the adoption of this ASU will likely have a material effect and is expected to increase the overall allowance for credit losses.

The Company does not believe there are any other recently issued accounting standards that have not yet been adopted that will have a material impact on the Company's consolidated financial statements.

3. Finance Receivables

Finance receivables consist of Contracts and Direct Loans, each of which comprise a portfolio segment. Each portfolio segment consists of smaller balance homogeneous loans which are collectively evaluated for impairment.

The Company purchases individual Contracts from used and new automobile dealers in its markets. There is no relationship between the Company and the dealer with respect to a given Contract once the assignment of that Contract is complete. The dealer has no vested interest in the performance of any Contract the Company purchases. In March 2019, the Company changed its charge off policy from 181 days past due to 121 days past due. In addition, Chapter 13 Bankruptcies, once confirmed by the courts, are also charged off. This policy change resulted in a one-time charge of approximately \$6.4 million during the 4th quarter of fiscal 2019. This policy change was made because current management believes it is more in line with industry standards, considering the sub-prime nature of our customers. In the event of repossession, the charge-off will occur after standard collection practices by the Company, as determined by the residency state of a customer. This practice is consistent with the sub-prime industry.

Contracts and Direct Loans included in finance receivables are detailed as follows as of fiscal years ended March 31:

| | (In thousands) | |
|--|-------------------|-------------------|
| | 2020 | 2019 |
| Finance receivables | \$ 219,366 | \$ 228,994 |
| Accrued interest receivable | 3,164 | 2,889 |
| Unearned dealer discounts | (8,056) | (10,083) |
| Unearned insurance and fee commissions | (2,616) | (2,826) |
| Purchase price discount | (915) | - |
| Finance receivables, net of unearned | 210,943 | 218,974 |
| Allowance for credit losses | (11,162) | (16,932) |
| Finance receivables, net | <u>\$ 199,781</u> | <u>\$ 202,042</u> |

Contracts

The Company purchases Contracts from automobile dealers at a negotiated price that is less than the original principal amount being financed by the purchaser of the automobile. The Contracts are predominantly for used vehicles. As of March 31, 2020, the average model year of vehicles collateralizing the portfolio was a 2011 vehicle. The terms of the Contracts range from 12 to 60 months and bear an average contractual interest rate of 22.6% and 22.7% as of March 31, 2020 and 2019, respectively.

Direct Loans

Direct Loans are typically for amounts ranging from \$1,000 to \$15,000 and are generally secured by a lien on an automobile, watercraft or other permissible tangible personal property. The majority of Direct Loans are originated with current or former customers under the Company's automobile financing program. The typical Direct Loan

represents a better credit risk than Contracts due to the customer’s historical payment history with the Company; however, the underlying collateral is less valuable. In deciding whether or not to make a loan, the Company considers the individual’s credit history, job stability, income, and impressions created during a personal interview with a Company loan officer. Additionally, because most of the Direct Loans made by the Company to date have been made to borrowers under Contracts previously purchased by the Company, the payment history of the borrower under the Contract is a significant factor in making the loan decision. As of March 31, 2020, loans made by the Company pursuant to its Direct Loan program constituted approximately 5% of the aggregate principal amount of the Company’s loan portfolio. The terms of the Direct Loans range from 12 to 72 months and bear an average contractual interest rate of 27.3% and 26.0% as of March 31, 2020 and 2019, respectively.

Allowance for Credit Losses

During the first quarter of the fiscal year ended March 31, 2019, the Company began using the trailing six-month net charge-off percentage, annualized, and applied to ending finance receivables to calculate the allowance for credit losses. This change was made to reflect changes in the Company’s lending policies and underwriting standards, which resulted from the Company changing its business strategies. The Company re-focused on financing primary transportation to and from work for the subprime borrower. This change resulted in purchasing higher yielding loans, with smaller amounts financed and shorter monthly terms. A trailing six-month, annualized, is also more in line with the industry practice, which uses a trailing twelve-month. Management believes a trailing six-month will more accurately reflect changes in the portfolio.

As of March 2019, the Company changed its charge-off policy from 181 days past due to 121 days past due, which resulted in the Company charging-off approximately \$6.4 million of finance receivables during the fourth quarter of fiscal 2019. This one-time charge-off, of approximately \$6.4 million, was excluded from the March 31, 2019 allowance for credit losses calculation.

In addition, the Company takes into consideration the composition of the portfolio, current economic conditions, estimated net realizable value of the underlying collateral, historical loan loss experience, delinquency, non-performing assets, and bankrupt accounts when determining management’s estimate of probable credit losses and adequacy of the allowance for credit losses. If the allowance for credit losses is determined to be inadequate, then an additional charge to the provision is recorded to maintain adequate reserves based on management’s evaluation of the risk inherent in the loan portfolio. Conversely, the Company could identify abnormalities in the composition of the portfolio, which would indicate the calculation is overstated and management judgement may be required to determine the allowance of credit losses for both Contracts and Direct Loans.

The following presents the activity in our allowance for credit losses, shown below and on the next page:

| | For the year ended March 31, 2020 | | |
|------------------------------|--|---------------|------------------|
| | (In thousands) | | |
| | Indirect | Direct | Total |
| Balance at beginning of year | \$ 16,575 | \$ 357 | \$ 16,932 |
| Provision for credit losses | 16,096 | 805 | 16,901 |
| Charge-offs | (29,174) | (663) | (29,837) |
| Recoveries* | 6,936 | 230 | 7,166 |
| Balance at end of year | <u>\$ 10,433</u> | <u>\$ 729</u> | <u>\$ 11,162</u> |

*For the year ended March 31, 2020, the Company completed bulk sales of charge-off accounts, which included \$1.6 million of bankruptcy accounts and \$0.1 million of non-performing accounts.

| | For the year ended March 31, 2019 | | |
|------------------------------|-----------------------------------|---------------|------------------|
| | (In thousands) | | |
| | Indirect | Direct | Total |
| Balance at beginning of year | \$ 19,433 | \$ 833 | \$ 20,266 |
| Provision for credit losses | 32,715 | 121 | 32,836 |
| Charge-offs | (37,514) | (638) | (38,152) |
| Recoveries | 1,941 | 41 | 1,982 |
| Balance at end of year | <u>\$ 16,575</u> | <u>\$ 357</u> | <u>\$ 16,932</u> |

A performing account is defined as an account that is less than 61 days past due. The Company defines an automobile contract as delinquent when more than 25% of a payment contractually due by a certain date has not been paid by the immediately following due date, which date may have been extended within limits specified in the servicing agreements or as a result of a deferral. The period of delinquency is based on the number of days payments are contractually past due, as extended where applicable.

In certain circumstances, the Company will grant obligors one-month payment extensions. The only modification of terms in those circumstances is to advance the obligor's next due date by one month and extend the maturity date of the receivable. There are no other concessions, such as a reduction in interest rate, forgiveness of principal or of accrued interest. Accordingly, the Company considers such extensions to be insignificant delays in payments rather than troubled debt restructurings.

A non-performing account is defined as an account that is contractually delinquent for 61 days or more or is a Chapter 13 bankruptcy account, and the accrual of interest income is suspended. As of February 2019, the Company changed the charge-off policy from 181 days contractually delinquent to 121 days contractually delinquent. This change aligned the Company's charge-off policy with practices within the subprime auto financing segment. See "Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations" for more details.

In the event an account is dismissed from bankruptcy, the Company will decide, based on several factors, to begin repossession proceedings or to allow the customer to begin making regularly scheduled payments.

The following table is an assessment of the credit quality by creditworthiness as of March 31:

| | (In thousands) | | | | | |
|-------------------------|-------------------|------------------|-------------------|-------------------|-----------------|-------------------|
| | 2020 | | | 2019 | | |
| | Contracts | Direct Loans | Total | Contracts | Direct Loans | Total |
| Performing accounts | \$ 201,045 | \$ 11,649 | \$ 212,694 | \$ 213,542 | \$ 7,889 | \$ 221,431 |
| Non-performing accounts | 6,202 | 195 | 6,397 | 7,453 | 110 | 7,563 |
| Total | 207,247 | 11,844 | 219,091 | 220,995 | 7,999 | 228,994 |

4. Property and Equipment

Property and equipment as of March 31, 2020 and 2019 is summarized as follows:

| | (In thousands) | | |
|------------------------|-----------------|--------------------------|----------------|
| | Cost | Accumulated Depreciation | Net Book Value |
| 2020 | | | |
| Automobiles | \$ 451 | \$ 396 | \$ 55 |
| Software | 160 | 23 | 137 |
| Equipment | 1,571 | 1,439 | 132 |
| Furniture and fixtures | 575 | 519 | 56 |
| Leasehold improvements | 1,207 | 1,105 | 102 |
| | <u>\$ 3,964</u> | <u>\$ 3,482</u> | <u>\$ 482</u> |
| 2019 | | | |
| Automobiles | \$ 488 | \$ 415 | \$ 73 |
| Software | 127 | 3 | 124 |
| Equipment | 1,535 | 1,263 | 272 |
| Furniture and fixtures | 535 | 465 | 70 |
| Leasehold improvements | 1,187 | 1,070 | 117 |
| | <u>\$ 3,872</u> | <u>\$ 3,216</u> | <u>\$ 656</u> |

5. Goodwill and Intangibles

On April 30, 2019, the Company completed an acquisition of three branches, representing substantially all of the assets, of ML Credit Group, LLC (d/b/a Metrolina Credit Company) (“Metrolina”). Two acquired branches are located in the state of North Carolina and one branch is located in South Carolina. Based on its evaluation of the agreement, the Company accounted for the acquisition as a business combination. The Company allocated the purchase price to the acquired assets and liabilities based on their fair values. As of March 31, 2020, the accounting related to this acquisition was completed by the Company. The final determination of the fair value of the customer lists and goodwill were completed within the twelve-month measurement period from the date of the acquisition as required by FASB ASC Topic 805-10-25. The Company recorded the following assets and liabilities in its accounting for this acquisition and the changes in the carrying amount of goodwill, are as shown on the next page.

| | As of |
|--|-----------------------|
| | March 31, 2020 |
| Acquisitions: | |
| Number of branches acquired through business combinations | 3 |
| Purchase price | <u>\$ 20,483</u> |
| Tangible assets: | |
| Finance receivable, net | 20,097 |
| Other assets | 144 |
| Assumed liabilities | <u>(160)</u> |
| Total net tangible assets | <u>20,081</u> |
| Excess of purchase prices over carrying value of net tangible assets | <u>\$ 402</u> |
| Indirect dealer network relationships | \$ 64 |
| Direct customer relationships | 43 |
| Goodwill | 295 |
| Total goodwill and intangible assets | <u>\$ 402</u> |
| | For year ended |
| | March 31, 2020 |
| Balance as of April 1, 2019 | \$ - |
| Goodwill acquired during the year | 295 |
| Goodwill impairment charge | <u>(295)</u> |
| Balance as of March 31, 2020 | <u>\$ -</u> |

The Company completed the annual impairment test for goodwill at the reporting unit level pursuant to Accounting Standards Codification (“ASC”) 350 – Intangibles – Goodwill and Other (ASC 350), as amended by ASU 2017-04, which the Company adopted during the current year. A reporting unit is defined under GAAP as the operating segment, or one level below that operating segment (the component level) if discrete financial information is prepared and regularly reviewed by segment management. Our single operating segment comprises a single reporting unit, based on the level at which segment management regularly reviews and measures the business operating results. The Company has one operating segment, which is the consumer finance company.

ASC 350 requires the Company to test goodwill for impairment annually and more frequently if indicators of impairment exist. Testing goodwill for impairment requires management to compare the fair value of a reporting unit with its carrying amount, including goodwill. While the qualitative assessment may change how goodwill impairment testing is performed, it does not affect the timing or measurement of goodwill impairment.

ASC 350 also provides for an optional qualitative assessment for testing goodwill for impairment (qualitative assessment) that may allow the Company to skip the annual quantitative impairment test. The qualitative assessment permits companies to assess whether it is more likely than not (i.e., a likelihood of greater than 50%) that the fair value of a reporting unit is less than its carrying amount.

The fair value of a reporting unit refers to the price that would be received to sell the unit as a whole in an orderly transaction between market participants at the measurement date, which is March 31, 2020. Quoted market prices in active markets are the best evidence of fair value and shall be used as the basis for the measurement, if available.

The fair value of a reporting unit is the amount at which the unit as a whole could be sold in a current transaction between willing parties (i.e., other than in a forced or liquidation sale). If a public company has only one reporting unit (or a company owns a publicly traded subsidiary that represents a reporting unit), then the market capitalization of the public company (or its public subsidiary) provides certain evidence about the fair value of that reporting unit.

During the year ended March 31, 2020, the Company experienced a significant decrease in stock prices, which was significant driver of the goodwill impairment charge. As of March 31, 2020, the closing stock price was \$5.84, and the fiscal year monthly average share price was \$8.51. The total number of common shares outstanding was approximately 7.8 million for the period ending, March 31, 2020. Based upon the impairment test at March 31, 2020, the Company concluded that the reporting unit fair value, adjusted for a control premium, was less than the carrying amount of the reporting unit of \$107.6 million. The goodwill impairment loss recognized was \$0.3 million, which is limited to the total amount of goodwill allocated to the reporting unit.

Definite-lived intangible assets principally consist of customer-related assets including contract indirect dealer network relationships and direct customer relationships. These assets are amortized over their estimated useful lives and evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. The evaluation compares the cash inflows expected to be generated from each intangible asset to its carrying value. If cash flows attributable to the intangible asset are less than the carrying value, the asset is considered impaired and written down to its estimated fair value. No material impairments of definite-lived intangible assets have been recognized in the periods presented in the consolidated financial statements.

For the twelve months ended as of March 31, 2020, the Company incurred approximately \$278,000 in expenses related to the purchase of the Metrolina assets.

6. Credit Facility

Senior Secured Credit Facility

On March 29, 2019, NF Funding I, a wholly-owned, special purpose financing subsidiary of NFI entered into a senior secured credit facility (the "Credit Facility") pursuant to a credit agreement with Ares Agent Services, L.P., as administrative agent and collateral agent, and the lenders that are party thereto (the "Credit Agreement"). The Company's prior credit facility was paid off in connection with this Credit Facility.

Pursuant to the Credit Agreement, the lenders have agreed to extend to the NF Funding I a line of credit of up to \$175,000,000, which will be used to purchase motor vehicle retail installment sale contracts from NFI on a revolving basis pursuant to a related receivables purchase agreement between NF Funding I and NFI (the "Receivables Purchase Agreement"). Under the terms of the Receivables Purchase Agreement, NFI will sell to NF Funding I the receivables under the installment sale contracts. NFI will continue to service the motor vehicle retail installment sale contracts transferred to NF Funding I pursuant to a related servicing agreement (the "Servicing Agreement").

The availability of funds under the Credit Facility is generally limited to 82.5% of the value of non-delinquent receivables, and outstanding advances under the Credit Facility will accrue interest at a rate of LIBOR plus 3.75%. The commitment period for advances under the Credit Facility is three years. At the end of the commitment period, the outstanding balance will convert to a term loan and require monthly principal and interest payments over a four-year amortization period.

In connection with the Credit Facility, NFI has guaranteed the NF Funding I's obligations under the Credit Agreement up to 10% of the highest aggregate principal amount outstanding under the Credit Agreement at any time pursuant to the Limited Guaranty. The Company is also obligated to cover any losses of the lender parties resulting from certain "bad acts" of the Company or its subsidiaries, such as fraud, misappropriation of funds or unpermitted disposition of the assets.

Pursuant to a related security agreement (the "Security Agreement"), NF Funding I granted a security interest in substantially all of its assets as collateral for its obligations under the Credit Facility. In addition, NFI pledged the equity interests of NF Funding I as additional collateral.

The Credit Agreement and the other loan documents contain customary events of default and negative covenants, including but not limited to those governing indebtedness, liens, fundamental changes, investments, and sales of receivables. If an event of default occurs, the lenders could increase borrowing costs, restrict the NF Funding I's ability to obtain additional advances under the Credit Facility, accelerate all amounts outstanding under the Credit Facility, enforce their interest against collateral pledged under the Credit Facility or enforce their rights under the Company's guarantees.

Once sold to the NF Funding I, the assets described above will be separate and distinct from the Company's own assets and will not be available to its creditors should the Company become insolvent, although they will be presented on a consolidated basis on the Company's balance sheet.

Future maturities of debt as of March 31, 2020 are as follows:

| (in thousands) | |
|----------------------|------------|
| Year Ended March 31, | |
| 2021 | \$ — |
| 2022 | — |
| 2023 | 31,707 |
| 2024 | 31,707 |
| 2025 | 31,708 |
| Thereafter | 31,708 |
| | \$ 126,830 |

7. Fair Value Disclosures

Financial Instruments Not Measured at Fair Value

The Company's financial instruments consist of cash and restricted cash, finance receivables, repossessed assets, and the Credit Facility. For the cash and the credit facility, the carrying value approximates fair value.

Finance receivables, net, approximates fair value based on the price paid to acquire Contracts. The price reflects competitive market interest rates and purchase discounts for the Company's chosen credit grade in the economic environment. This market is highly liquid as the Company acquires individual loans on a daily basis from dealers.

The initial terms of the Contracts generally range from 12 to 72 months. Beginning in December 2017, the maximum initial term of a Contract was reduced to 60 months. The initial terms of the Direct Loans generally range from 12 to 60 months. If liquidated outside of the normal course of business, the amount received may not be the carrying value.

Repossessed assets are valued at the lower of the finance receivable balance prior to repossession or the estimated net realizable value of the repossessed asset. The Company estimates the net realizable value using the projected cash value upon liquidation plus insurance claims outstanding, if any.

Based on current market conditions, any new or renewed credit facility would contain pricing that approximates the Company's current Credit Facility. Based on these market conditions, the fair value of the Credit Facility as of March 31, 2019 was estimated to be equal to the book value. The interest rate for the Credit Facility is a variable rate based on LIBOR pricing options.

| Description | Fair Value Measurement Using (In thousands) | | | Fair Value | Carrying Value |
|---------------------------|--|------------|------------|------------|----------------|
| | Level 1 | Level 2 | Level 3 | | |
| Cash and restricted cash: | | | | | |
| March 31, 2020 | \$ 24,684 | \$ — | \$ — | \$ 24,684 | \$ 24,684 |
| March 31, 2019 | \$ 37,642 | \$ — | \$ — | \$ 37,642 | \$ 37,642 |
| Finance receivables: | | | | | |
| March 31, 2020 | \$ — | \$ — | \$ 199,781 | \$ 199,781 | \$ 199,781 |
| March 31, 2019 | \$ — | \$ — | \$ 202,042 | \$ 202,042 | \$ 202,042 |
| Repossessed assets: | | | | | |
| March 31, 2020 | \$ — | \$ — | \$ 1,340 | \$ 1,340 | \$ 1,340 |
| March 31, 2019 | \$ — | \$ — | \$ 1,924 | \$ 1,924 | \$ 1,924 |
| Credit facility: | | | | | |
| March 31, 2020 | \$ — | \$ 126,830 | \$ — | \$ 126,830 | \$ 126,830 |
| March 31, 2019 | \$ — | \$ 145,000 | \$ — | \$ 145,000 | \$ 145,000 |

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets and liabilities at fair value on a nonrecurring basis. At each reporting period, all assets and liabilities for which the fair value measurement is based on significant unobservable inputs are classified as a Level 3.

8. Income Taxes

The provision for income taxes (income tax benefits) consists of the following for the years ended March 31:

| | (In thousands) | |
|--------------------|-------------------|-----------------|
| | 2020 | 2019 |
| Current: | | |
| Federal | \$ (4,440) | \$ (39) |
| State | 6 | (66) |
| Total current | <u>(4,434)</u> | <u>(105)</u> |
| Deferred: | | |
| Federal | 3,008 | (844) |
| State | 207 | 9 |
| Total deferred | <u>3,215</u> | <u>(835)</u> |
| Income tax benefit | <u>\$ (1,219)</u> | <u>\$ (940)</u> |

The net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes are reflected in deferred income taxes. Significant components of the Company's deferred tax assets consist of the following as of March 31:

| <u>Deferred Tax Assets</u> | <u>(In thousands)</u> | |
|---|-----------------------|-----------------|
| | <u>2020</u> | <u>2019</u> |
| Allowance for credit losses not currently deductible for tax purposes | \$ 2,948 | \$ 4,431 |
| Share-based compensation | 320 | 276 |
| Federal and state net operating loss carryforwards | 458 | 2,293 |
| Right of use liability | 462 | - |
| Other items | 249 | 201 |
| Total deferred tax assets | <u>4,437</u> | <u>7,201</u> |
| Deferred tax liabilities | | |
| Right of use asset | 457 | - |
| Other items | 71 | 77 |
| Total deferred tax liabilities | <u>528</u> | <u>77</u> |
| Deferred income taxes | <u>\$ 3,909</u> | <u>\$ 7,124</u> |

The provision (benefit) for income taxes reflects an effective U.S tax rate, which differs from the corporate tax rate for the following reasons:

| | <u>(In thousands)</u> | |
|--|-----------------------|-----------------|
| | <u>2020</u> | <u>2019</u> |
| Provision (benefit) for income taxes at Federal statutory rate | \$ 479 | \$ (845) |
| Increase (decrease) resulting from: | | |
| Federal Fiscal Year 2020 NOL rate differential | (414) | - |
| Federal Fiscal Year 2019 NOL rate differential | (1,362) | - |
| State income taxes, net of Federal benefit | 91 | (206) |
| Tax Reform – Rate Change | - | 160 |
| Other | (13) | (49) |
| Income tax expense (benefit) | <u>\$ (1,219)</u> | <u>\$ (940)</u> |

The Company's effective tax rate decreased to (54.3)% in fiscal 2020 from 20.5% in fiscal 2019, resulting from the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act").

In response to the global impacts of COVID-19 on U.S. companies and citizens, the government enacted the CARES Act on March 27, 2020. The CARES Act included several tax relief options for companies, which resulted in the following provisions available to the Company.

- In May 2020, the Company elected to carryback its fiscal year 2019 net operating losses of \$9.7 million to 2013, thus generating a refund of \$3.5 million and an income tax benefit of \$1.4 million. The tax benefit is the result of the federal income tax rate differential between the current statutory rate of 21% and the 35% rate applicable to 2013.
- The Company plans to carryback its fiscal year 2020 net operating losses of \$3.0 million to 2014, thus generating an anticipated refund of \$1.0 million and an income tax benefit of \$0.4 million. The tax benefit is the result of the federal income tax rate differential between the current statutory rate of 21% and the 35% rate applicable to 2014.

Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit use of the existing deferred tax assets. A significant piece of objective positive evidence evaluated was the cumulative pre-tax income over the three-year period ended March 31, 2020, cumulative pre-tax income for the next three years, and substantial federal NOL rate differentials, previously noted. As of

March 31, 2020, a valuation allowance was not required. The amount of the deferred tax asset considered realizable, however, could be adjusted if estimates of future taxable income are reduced.

The Company considers the earnings of the Company's U.S. subsidiaries to be indefinitely invested outside Canada on the basis of estimates that future domestic cash generation will be sufficient to meet future domestic cash needs and the Company's specific plans for reinvestment of those subsidiary earnings. The Company has not recorded a deferred tax liability related to the Canadian income taxes and U.S. withholding taxes on approximately \$144.2 million of undistributed earnings of the U.S. subsidiaries indefinitely invested outside Canada. If the Company decided to repatriate the U.S. earnings, it would need to adjust its income tax provision in the period the Company determined that the earnings will no longer be indefinitely invested outside of Canada.

9. Leases

The Company adopted a new lease accounting standard in April 2019. See Note 2, "Summary of Significant Accounting Policies," for an overview of the transition to this standard.

The Company maintains lease agreements related to its branch network and for its corporate headquarters. The branch lease agreements range from one to five years and generally contain options to extend from one to three years. The corporate headquarters lease agreement expires in April 2020 and the Company is in the process of negotiating a new lease agreement. All of the Company's lease agreements are considered operating leases. None of the Company's lease payments are dependent on a rate or index that may change after the commencement date, other than the passage of time.

The Company's lease liability was \$2.7 million as of March 31, 2020. This liability is based on the present value of the remaining minimum rental payments using a discount rate that is determined based on the Company's incremental borrowing rate on its senior revolving credit facility. The lease asset was \$2.6 million as of March 31, 2020.

The Company has made several policy elections related to lease assets and liabilities. The Company elected to utilize the package of transition practical expedients, which includes not reassessing the following at adoption: (i) whether existing contracts contained leases, (ii) the existing classification of leases as operating or financing, or (iii) the initial direct costs of leases. In addition, the Company did not use hindsight to determine the lease term or include options to extend for leases existing at the transition date.

The Company had elected the practical expedient of combining lease and non-lease components for its real estate leases in calculating the present value of the fixed payments without having to perform an allocation between the types of lease components. Future minimum lease payments under non-cancellable operating leases in effect as of March 31, 2020, are as follows:

| | |
|-------------------------------------|------------------------|
| <i>in thousands</i> | |
| 2021 | \$ 1,355 |
| 2022 | 865 |
| 2023 | 495 |
| 2024 | 88 |
| 2025 | 48 |
| Thereafter | 185 |
| Total future minimum lease payments | <u>3,036</u> |
| Present value adjustment | (384) |
| Operating lease liability | <u><u>\$ 2,652</u></u> |

The following table reports information about the Company's lease cost for the twelve months ended March 31, 2020 (in thousands):

| | |
|----------------------|------------------------|
| Lease cost: | |
| Operating lease cost | \$ 1,777 |
| Variable lease cost | 435 |
| Total lease cost | <u><u>\$ 2,212</u></u> |

The following table reports other information about the Company's leases for the twelve months ended March 31, 2020 (dollar amounts in thousands):

Other Lease Information

| | | |
|--|----|-----------|
| Operating Lease - Operating Cash Flows (Fixed Payments) | \$ | 1,913 |
| Operating Lease - Operating Cash Flows (Liability Reduction) | \$ | 1,841 |
| Weighted Average Lease Term - Operating Leases | | 2.5 years |
| Weighted Average Discount Rate - Operating Leases | | 6.5% |

Rent expense for the fiscal years ended March 31, 2020 and 2019 was approximately \$2.2 million and \$2.6 million, respectively. The Company recognizes rent expense on a straight-line basis over the term of the lease, taking into account, when applicable, lessor incentives for tenant improvements, periods where no rent payment is required and escalations in rent payments over the term of the lease.

10. Share-Based Payments

The Company has share awards outstanding under two share-based compensation plans (the "Equity Plans"). The Company believes that such awards generally align the interests of its employees with those of its shareholders. Under the shareholder-approved 2006 Equity Incentive Plan (the "2006 Plan") the Board of Directors was authorized to grant option awards for up to approximately 1.1 million common shares. On August 13, 2015, the Company's shareholders approved the Nicholas Financial, Inc. Omnibus Incentive Plan (the "2015 Plan") for employees and non-employee directors. Under the 2015 Plan, the Board of Directors is authorized to grant total share awards for up to 750,000 common shares. Awards under the 2006 Plan will continue to be governed by the terms of that plan. The 2015 Plan replaced the 2006 Plan; accordingly, no additional option awards may be granted under the 2006 Plan. In addition to option awards, the 2015 Plan provides for restricted stock, restricted stock units, performance shares, performance units, and other equity-based compensation.

Option awards previously granted to employees and directors under the 2006 Plan generally vest ratably based on service over a five- and three-year period, respectively, and generally have a contractual term of ten years. Vesting and contractual terms for option awards under the 2015 Plan are essentially the same as those of the 2006 Plan. Restricted stock awards generally cliff vest over a three-year period based on service conditions. Vesting of performance units generally does not commence until the attainment of Company-wide performance goals including annual revenue growth and operating income targets. There are no post-vesting restrictions for share awards.

The Company funds share awards from authorized but unissued shares and does not purchase shares to fulfill its obligations under the Equity Plans. Cash dividends, if any, are not paid on unvested performance units or unexercised options but are paid on unvested restricted stock awards.

The Company did not grant any options during the years ended March 31, 2020 or 2019.

A summary of option activity under the Equity Plans as of March 31, 2020, and changes during the year are presented below.

| <u>Options</u> | <u>(Shares and Aggregate Intrinsic Value in thousands)</u> | | | |
|-------------------------------|--|--|--|--|
| | <u>Shares</u> | <u>Weighted Average Exercise Price</u> | <u>Weighted Average Remaining Contractual Term</u> | <u>Aggregate Intrinsic Value</u> |
| Outstanding at March 31, 2019 | 72 | \$ 10.71 | 4.10 | \$ 51 |
| Granted | — | — | | |
| Exercised | (2) | 3.49 | | |
| Forfeited | (8) | 12.02 | | |
| Outstanding at March 31, 2020 | <u>62</u> | <u>\$ 11.67</u> | <u>3.13</u> | <u>\$ -</u> |
| Exercisable at March 31, 2020 | <u>57</u> | <u>\$ 10.63</u> | <u>2.70</u> | <u>\$ -</u> |

The total intrinsic value of options exercised during the years ended March 31, 2020 and 2019 was approximately \$7,000 and \$98,000, respectively.

During the fiscal year ended March 31, 2020, approximately 2,000 options were exercised at exercise prices ranging from \$1.20 to \$4.18 per share. During the same period, approximately 8,000 options were forfeited at exercise prices ranging from \$10.87 to \$12.68 per share.

During the fiscal year ended March 31, 2019, approximately 12,000 options were exercised at exercise prices ranging from \$0.77 to \$4.18 per share. During the same period, approximately 67,000 options were forfeited at exercise prices ranging from \$10.87 to \$14.36 per share.

Cash received from options exercised during the fiscal years ended March 31, 2020 and 2019 totaled approximately \$5,000 and \$16,000, respectively. As of March 31, 2020, the Company had no unrecognized compensation related to options grants. For the year ended, March 31, 2020 and March 31, 2019, respectively, the Company had approximately \$0 and \$10,000 of total unrecognized compensation cost related to options granted.

A summary of the status of the Company's non-vested restricted shares under the Equity Plan as of March 31, 2020, and changes during the year then ended is presented below.

| (Shares and Aggregate Intrinsic Value in thousands) | | | | |
|---|-----------|---|---|---------------------------------|
| Restricted Share Awards | Shares | Weighted Average Grant Date Fair Value | Weighted Average Remaining Contractual Term | Aggregate Intrinsic Value |
| Non-vested at March 31, 2019 | 45 | \$ 10.51 | 1.96 | 404 |
| Granted | 39 | 9.47 | | |
| Vested | (8) | 9.49 | | |
| Forfeited | (26) | 10.57 | | |
| Non-vested at March 31, 2020 | <u>50</u> | <u>\$ 9.65</u> | <u>1.40</u> | <u>\$ 341</u> |

The Company awarded approximately 39,000 restricted shares during the fiscal year ended March 31, 2020. There are no performance shares included within the 39,000 restricted shares granted that resulted from the Company meeting a performance threshold. During the same period there were approximately 26,000 restricted shares forfeited. With the adoption of ASU 2016-09 on January 1, 2017, the Company no longer reduces stock-based compensation by estimated forfeitures. Instead the Company accounts for forfeitures when they occur. For any vesting tranche of an award, the cumulative amount of compensation cost recognized is at least equal to the portion of the grant-date value of the award tranche that is actually vested at that date.

As of March 31, 2020, there was approximately \$208,000 of total unrecognized compensation cost related to non-vested restricted share awards granted under the Equity Plans. That cost is expected to be recognized over a weighted-average period of approximately 1.4 years.

11. Employee Benefit Plan

The Company has a 401(k)-retirement plan under which all employees are eligible to participate. Employee contributions are voluntary and subject to Internal Revenue Service limitations. The Company did not make a discretionary matching employee contribution. The Board will re-evaluate the Company's matching policy for plan year 2020 later in the year.

12. Commitments and Contingencies

The Company currently is not a party to any pending legal proceedings other than ordinary routine litigation incidental to its business, none of which, if decided adversely to the Company, would, in the opinion of management, have a material adverse effect on the Company's financial condition or results of operations.

13. Variable Interest Entity

In March 2019, the Company entered into a new senior secured credit facility collateralized by customer financed receivables by transferring the receivables into a bankruptcy-remote variable interest entity (VIE). Under the terms of the transaction, all cash collections and other cash proceeds of the customer receivables go first to the servicer and the holders of the asset-backed notes, and then to the residual equity holder. The Company retained the servicing of the portfolio and receives a monthly fee of 2.5% (annualized) based on the outstanding balance of the

financed receivables, and the Company currently holds all of the residual equity. In addition, the Company, rather than the VIE, will retain certain credit insurance income together with certain recoveries related to credit insurance and on charge-offs of the financed receivables, which will continue to be reflected as a reduction of net charge-offs on a consolidated basis for as long as the Company consolidates the VIE.

The Company consolidated the VIE's when the Company determines that it is the primary beneficiary, the Company has the power to direct the activities that most significantly impact the performance of the VIE and it has the obligation to absorb losses and has the right to receive residual returns is significant. The Company determined it is the primary beneficiary of the VIE.

The assets of the VIE serve as collateral for the obligations of the VIE. The lender has no recourse to assets outside of the VIE.

The following table presents the assets and liabilities held by the VIE (for legal purposes, the assets and the liabilities of the VIE will remain distinct from the Company):

| | <u>2020</u> | <u>2019</u> |
|---------------------------------------|-------------------|-------------------|
| Assets | | |
| Restricted cash | \$ 7,882 | \$ 2,047 |
| Finance receivables, net | 165,966 | 187,584 |
| Repossessed assets | 1,277 | - |
| Total assets | <u>\$ 175,125</u> | <u>\$ 189,631</u> |
| Liabilities | | |
| Credit facility | \$ 124,255 | \$ 142,619 |
| Accounts payable and accrued expenses | 597 | - |
| Total liabilities | <u>\$ 124,852</u> | <u>\$ 142,619</u> |

14. Stock Plans

In May 2019, the Company's Board of Directors ("Board") authorized a new stock repurchase program allowing for the repurchase of up to \$8.0 million of the Company's outstanding shares of common stock in open market purchases, privately negotiated transactions, or through other structures in accordance with applicable federal securities laws. The authorization was effective immediately.

The timing and actual number of shares will depend on a variety of factors, including stock price, corporate and regulatory requirements and other market and economic conditions. The Company's stock repurchase program may be suspended or discontinued at any time.

In August 2019, the Company's Board authorized additional repurchase of up to \$1.0 million of the Company's outstanding shares.

The table below summarizes treasury share transactions under the Company's stock repurchase program.

| | Twelve months ended March 31, (In thousands) | | | |
|--|---|--------------------|-----------------------------|--------------------|
| | <u>2020</u> | | <u>2019</u> | |
| | <u>Number of Shares</u> | <u>Amount</u> | <u>Number of Shares</u> | <u>Amount</u> |
| Treasury shares at the beginning of period | 4,714 | \$ (70,459) | 4,714 | \$ (70,459) |
| Treasury shares purchased | 119 | (979) | - | - |
| Treasury shares at the end of period | <u>4,833</u> | <u>\$ (71,438)</u> | <u>4,714</u> | <u>\$ (70,459)</u> |

15. Subsequent Events

Paycheck Protection Program: On May 27, 2020, the Company obtained a loan in the amount of \$3,243,900 from Fifth Third Bank in connection with the U.S. Small Business Administration's Paycheck Protection Program (the "PPP Loan"). Pursuant to the Paycheck Protection Program, all or a portion of the PPP Loan may be forgiven if the Company uses the proceeds of the PPP Loan for its payroll costs and other expenses in accordance with the requirements of the Paycheck Protection Program. The Company intends to use the proceeds of the PPP Loan for payroll costs and other covered expenses and intends to seek full forgiveness of the PPP Loan as soon as permitted under the Paycheck Protection Program.

If the PPP Loan is not fully forgiven, the Company will remain liable for the full and punctual payment of the outstanding principal balance plus accrued and unpaid interest. The PPP Loan accrues interest at a rate per annum equal to 1.00% and an initial payment of accrued and unpaid interest is due on December 27, 2020. The outstanding principal balance plus accrued and unpaid interest is due on May 27, 2022. The PPP Loan is unsecured. The PPP Loan may be prepaid at any time prior to maturity with no prepayment penalties. The Promissory Note contains events of default and other provisions customary for a loan of this type.

Point Predictive, Inc.: On June 10th 2020 Point Predictive Inc., the San Diego-based company that provides machine learning solutions to lenders, announced today that Nicholas Financial has selected the company's risk scoring solutions to help them better segment high and low risk applications to improve the customer and dealer experience during the financing process.

Share Repurchases: For the period April 1, 2020 through June 21, 2020, the Company repurchased an additional 4,712 shares of our common stock for \$27 thousand at an average price of \$5.82 per share. The total shares repurchased through June 21, 2020 under the plan in aggregate is 123,751 shares of common stock for \$1.0 million at average price of \$8.05.

COVID-19: The Company has discussed COVID-19 throughout the 10-K, including but not limited, to forward-looking information, Item 1. Business, Item 1A. Risk Factors, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and Notes to the Consolidated Financial Statements

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure information required to be disclosed in its reports filed pursuant to the Securities Exchange Act of 1934, as amended (the “Exchange Act”), is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure. The Company’s management, including its Chief Executive Officer and Chief Financial Officer, does not expect that the Company’s disclosure controls and procedures or internal controls will prevent all possible error and fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

The Company’s management, including its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company’s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of March 31, 2020. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company’s disclosure controls and procedures were not effective as of March 31, 2020. Notwithstanding the material weaknesses described in Management’s Report on Internal Control over Financial Reporting below, the Company’s management, including its Chief Executive Officer and Chief Financial Officer, has concluded that the consolidated financial statements included in this Annual Report present fairly, in all material respects, our financial position, results of operations and cash flows as of the dates, and for the periods presented, in conformity with accounting principles generally accepted in the United States.

Management’s Report on Internal Control over Financial Reporting

The Company’s management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of financial statements in accordance with generally accepted accounting principles. The Company’s management, including its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company’s internal control over financial reporting as of March 31, 2020, the end of the fiscal year covered by this Report, based on the criteria set forth in *Internal Control-Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management has concluded that the Company’s internal control over financial reporting was not effective as of March 31, 2020 as a result of material weaknesses. A material weakness is a deficiency or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the registrant’s annual or interim financial statements will not be prevented or detected on a timely basis.

The Company has considered the material weaknesses from the prior year, which has been incorporated into the current year material weaknesses. Management turnover was one of many contributing factors to the lack of Comprehensive SOX Compliance Program. Similarly, the lack of segregation of duties was one of several design gaps and design control deficiencies across multiple business processes. The Company is reporting two material weaknesses for the year ended, March 31, 2020, which are further discussed on the next page.

The Company completed a review of all activities performed or scheduled under the SOX Compliance program. Management started reperformance of key activities, including testing of design effectiveness of identified key controls. As result of these actions, the Company has noted two material weaknesses for:

1) Lack of Comprehensive SOX Compliance Program

Deficiencies were identified in key activities which prevented the Company from achieving full compliance with Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

2) Test of Design Effectiveness

Starting in the fourth quarter of Fiscal 2020, the Company identified several design gaps and design control deficiencies across multiple business processes and information technology general controls, which impacted the testing of operating effectiveness.

Notwithstanding the material weaknesses, the Company's management, including its Chief Executive Officer and Chief Financial Officer, has concluded that the consolidated financial statements included in this Annual Report present fairly, in all material respects, our financial position, results of operations and cash flows as of the dates, and for the periods presented, in conformity with accounting principles generally accepted in the United States.

Remedial Actions

The Company plans to take the remedial actions to address the current material weaknesses:

- The Company has identified key activities to establish a comprehensive SOX Compliance Program, including the proper sequencing of them. Management will complete risk assessments, as part of the planning and scoping activities. The activities are scheduled to be completed during the first half of Fiscal 2021.
- The Company will start the test of design effectiveness in the second quarter of Fiscal 2021, which will provide adequate time for remediation activities before testing of operating effectiveness.
- The Company will start the test of operating effectiveness during the second half of Fiscal 2021, including reporting and aggregation of all control deficiencies, including evaluation of them individually and in the aggregate.

Management believes the foregoing efforts will effectively remediate the material weaknesses. As management continues to evaluate and work to improve internal control over financial reporting, management may determine to take additional measures to address control deficiencies or determine to modify or supplement the remediation plan described above. Management cannot assure you, however, when the Company will remediate such weaknesses, nor can management be certain of whether additional actions will be required or the costs of any such actions.

Attestation report of the registered public accounting firm

This Annual Report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to the rules of the Securities and Exchange Commission.

Changes in Internal Control Over Financial Reporting

No change in the Company's internal control over financial reporting occurred during the Company's fiscal quarter ended March 31, 2020 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting, except as identified in Management's Report on Internal Control over Financial Reporting above.

Item 9B. Other Information

None

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The relevant information to be set forth in the definitive Proxy Statement and Information Circular for the 2020 Annual General Meeting of Shareholders of the Company (the “Proxy Statement”), is incorporated herein by reference.

The Company has adopted a written code of ethics applicable to its chief executive officer, chief financial officer, principal accounting officer and persons performing similar functions. A copy of the code of ethics is posted on the Company’s web site at www.nicholasfinancial.com. The Company intends to satisfy the disclosure requirements under Item 5.05 of Form 8-K regarding amendments to, or waivers from, the code of ethics by posting such information on the Company’s web site at www.nicholasfinancial.com. The Company is not including the information contained on or available through its web site as a part of, or incorporating such information by reference into, this Report.

Item 11. Executive Compensation, Compensation Interlocks and Insider Participation

The relevant information to be set forth in the Proxy Statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Securities Authorized for Issuance under Equity Compensation Plans

The following table sets forth certain information, as of March 31, 2020, with respect to compensation plans under which equity securities of the Company were authorized for issuance:

EQUITY COMPENSATION PLAN INFORMATION (In thousands, except exercise price)

| <u>Plan Category</u> | <u>Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights</u> | <u>Weighted – Average Exercise Price of Outstanding Options, Warrants and Rights</u> | <u>Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))</u> |
