

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

Form 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the fiscal year ended July 31, 2011 or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

for the transition period from _____ to _____

Commission File Number: 1-7891

DONALDSON COMPANY, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

41-0222640

(I.R.S. Employer Identification No.)

1400 West 94th Street, Minneapolis, Minnesota

(Address of principal executive offices)

55431

(Zip Code)

Registrant's telephone number, including area code: (952) 887-3131

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, \$5 Par Value	New York Stock Exchange
Preferred Stock Purchase Rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such short period that the registrant was required to submit and post such files) Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of January 28, 2011, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of voting and non-voting common stock held by non-affiliates of the registrant was \$4,424,036,897 (based on the closing price of \$58.04 as reported on the New York Stock Exchange as of that date).

As of August 31, 2011, there were approximately 74,522,228 shares of the registrant's common stock outstanding.

Documents Incorporated by Reference

Portions of the registrant's Proxy Statement for its 2011 annual meeting of stockholders (the "2011 Proxy Statement") are incorporated by reference in Part III, as specifically set forth in Part III.

PART I

Item 1. Business

General

Donaldson Company, Inc. (“Donaldson” or the “Company”) was founded in 1915 and organized in its present corporate form under the laws of the State of Delaware in 1936.

The Company is a worldwide manufacturer of filtration systems and replacement parts. The Company’s product mix includes air and liquid filtration systems and exhaust and emission control products. Products are manufactured at 39 plants around the world and through three joint ventures. The Company has two reporting segments: Engine Products and Industrial Products. Products in the Engine Products segment consist of air filtration systems, exhaust and emissions systems, liquid filtration systems, and replacement filters. The Engine Products segment sells to original equipment manufacturers (“OEMs”) in the construction, mining, agriculture, aerospace, defense, and truck markets and to OEM dealer networks, independent distributors, private label accounts, and large equipment fleets. Products in the Industrial Products segment consist of dust, fume, and mist collectors, compressed air purification systems, air filtration systems for gas turbines, PTFE membrane-based products, and specialized air filtration systems for applications including computer hard disk drives. The Industrial Products segment sells to various industrial end-users, OEMs of gas-fired turbines and OEMs and end-users requiring clean air.

The table below shows the percentage of total net sales contributed by the principal classes of similar products for each of the last three fiscal years:

	Year Ended July 31		
	2011	2010	2009
Engine Products segment			
Off-Road Products	14%	12%	13%
Aerospace and Defense Products	5%	6%	6%
On-Road Products	5%	4%	4%
Aftermarket Products*	38%	37%	30%
Retrofit Emissions Products	1%	1%	2%
*includes replacement part sales to the Company’s OEMs customers			
Industrial Products segment			
Industrial Filtration Solutions Products	22%	22%	26%
Gas Turbine Products	7%	8%	11%
Special Applications Products	8%	10%	8%

Financial information about segment operations appears in Note K in the Notes to Consolidated Financial Statements on page 49.

The Company makes its annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and amendments to those reports, available free of charge through its website, at www.donaldson.com, as soon as reasonably practicable after it electronically files such material with (or furnishes such material to) the Securities and Exchange Commission. Also available on the Company’s website are corporate governance documents, including the Company’s code of business conduct and ethics, corporate governance guidelines, Audit Committee charter, Human Resources Committee charter, and Corporate Governance Committee charter. These documents are available in print, free of charge to any shareholder who requests them. The information contained on the Company’s website is not incorporated by reference into this Annual Report on Form 10-K and should not be considered to be part of this Form 10-K.

Seasonality

A number of the Company’s end markets are dependent on the construction, agricultural, and power generation industries, which are generally stronger in the second half of the Company’s fiscal year. The first two quarters of the fiscal year also contain the traditional summer and winter holiday periods, which are characterized by more Customer plant closures.

Competition

Principal methods of competition in both the Engine and Industrial Products segments are technology, price, geographic coverage, service, and product performance. The Company competes in a number of highly competitive filtration markets in both segments. The Company believes it is a market leader with many of its product lines. The Company believes within the Engine Products segment it is a market leader in its Off-Road Equipment and On-Road Products lines for OEMs and is a significant participant in the aftermarket for replacement filters. The Engine Products segment's principal competitors include several large global competitors and many regional competitors, especially in the Engine Aftermarket Products business. The Industrial Products segment's principal competitors vary from country to country and include several large regional and global competitors and a significant number of smaller competitors who compete in a specific geographical region or in a limited number of product applications.

Raw Materials

The principal raw materials that the Company uses are steel, filter media, and plastics. Commodity prices generally increased throughout the year, but the impact was moderated by certain long term supply contracts. The Company anticipates a further impact from rising commodity prices in Fiscal 2012, as compared to Fiscal 2011, specifically for steel and media, as these supply contracts expired during the latter half of Fiscal 2011. The Company experienced no significant supply problems in the purchase of its major raw materials. The Company typically has multiple sources of supply for the raw materials essential to its business, and is not required to carry significant amounts of raw material inventory to secure supplier allotments. However, the Company does stock finished goods inventory at its regional distribution centers in order to meet anticipated Customer demand.

Patents and Trademarks

The Company owns various patents and trademarks, which it considers in the aggregate to constitute a valuable asset, including patents and trademarks for products sold under the Ultra-Web[®], PowerCore[®], and Donaldson[®] trademarks. However, it does not regard the validity of any one patent or trademark as being of material importance.

Major Customers

There were no Customers that accounted for over 10 percent of net sales in Fiscal 2011, 2010 or 2009. There were no Customers over 10 percent of gross accounts receivable in Fiscal 2011 or 2010.

Backlog

At August 31, 2011, the backlog of orders expected to be delivered within 90 days was \$423.8 million. All of this backlog is expected to be shipped during Fiscal 2012. The 90-day backlog at August 31, 2010, was \$361.1 million. Backlog is one of many indicators of business conditions in the Company's markets. However, it is not always indicative of future results for a number of reasons, including short lead times in the Company's replacement parts businesses and the timing of orders in many of the Company's Engine OEM and Industrial markets.

Research and Development

During Fiscal 2011, the Company spent \$55.3 million on research and development activities. Research and development expenses include basic scientific research and the application of scientific advances to the development of new and improved products and their uses. The Company spent \$44.5 million and \$40.6 million in Fiscal 2010 and Fiscal 2009, respectively, on research and development activities. Substantially all commercial research and development is performed in-house.

Environmental Matters

The Company does not anticipate any material effect on its capital expenditures, earnings, or competitive position during Fiscal 2012 due to compliance with government regulations regulating the discharge of materials into the environment or otherwise relating to the protection of the environment.

Employees

The Company employed over 13,000 persons in worldwide operations as of August 31, 2011.

Geographic Areas

Financial information about geographic areas appears in Note K of the Notes to Consolidated Financial Statements on page 49.

Item 1A. Risk Factors

There are inherent risks and uncertainties associated with our global operations that involve the manufacturing and sale of products for highly demanding Customer applications throughout the world. These risks and uncertainties could adversely affect our operating performance and financial condition. The following discussion, along with discussions elsewhere in this report, outlines the risks and uncertainties that we believe are the most material to our business. In light of the global economic slowdown in recent years and the continued uncertainty, we want to further highlight the risks and uncertainties associated with: world economic factors and the ongoing economic uncertainty that is impacting many regions of the world, the financial condition of our suppliers and Customers, the potential for some Customers to increase their reliance on their own filtration capabilities, currency fluctuations, commodity prices, political factors, the Company's international operations, the possible reduced demand for hard disk drive products with the increased use of flash memory, highly competitive markets, governmental laws and regulations, including the impact of the various economic stimulus and financial reform measures being implemented by governments around the world, the implementation of our new information systems, potential global events resulting in instability and unpredictability in the world's markets, including financial bailouts of sovereign nations, political changes, military and terrorist activities, health outbreaks, and other factors discussed below. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Operating internationally carries risks which could negatively affect our financial performance.

We have sales and manufacturing operations throughout the world, with the heaviest concentrations in North America, Europe and Asia. Our stability, growth, and profitability are subject to a number of risks of doing business internationally that could harm our business, including:

- political and military events,
- legal and regulatory requirements, including import, export, defense regulations, and foreign exchange controls,
- tariffs and trade barriers,
- potential difficulties in staffing and managing local operations,
- credit risk of local Customers and distributors,
- difficulties in protecting intellectual property,
- local economic, political and social conditions, specifically in China and Thailand where we have significant investments and
- potential global health outbreaks.

Maintaining a competitive advantage requires continuing investment with uncertain returns.

We operate in highly competitive markets and have numerous competitors who may already be well-established in those markets. We expect our competitors to continue improving the design and performance of their products and to introduce new products that could be competitive in both price and performance. We believe that we have certain technological advantages over our competitors, but maintaining these advantages requires us to continually invest in research and development, sales and marketing, and Customer service and support. There is no guarantee that we will be successful in maintaining these advantages. We make investments in new technologies that address increased performance and regulatory requirements around the globe. There is no guarantee that we will be successful in completing development

or achieving sales of these products or that the margins on such products will be acceptable. Our financial performance may be negatively impacted if a competitor's successful product innovation reaches the market before ours or gains broader market acceptance.

A few of our major OEM Customers also manufacture filtration systems. Although these OEM Customers rely on us and other suppliers for some of their filtration systems, they sometimes choose to manufacture additional filtration systems for their own use. There is also a risk that a Customer could acquire one or more of our competitors.

We may be adversely impacted by changes in technology that could reduce or eliminate the demand for our products. These risks include:

- breakthroughs in technology which provide a viable alternative to diesel engines and
- reduced demand for disk drive products by flash memory or a similar technology, which would eliminate the need for our filtration solutions in disk drives.

We participate in highly competitive markets with pricing pressure. If we are not able to compete effectively our margins and results of operations could be adversely affected.

The businesses and product lines in which we participate are very competitive and we risk losing business based on a wide range of factors including technology, price, geographic coverage, product performance, and Customer service. Large Customers continue to seek productivity gains and lower prices from their suppliers. We may lose business or negatively impact our margins if we are unable to deliver the best value to our Customers.

Demand for our products relies on economic and industrial conditions worldwide.

Demand for our products tends to respond to varying levels of economic, construction, agricultural, mining, and industrial activity in the United States and in other industrialized nations.

Sales to Caterpillar accounted for slightly less than 10 percent of our net sales in Fiscal 2011, 2010 and 2009. An adverse change in Caterpillar's financial performance or a material reduction in our sales to Caterpillar could negatively impact our operating results.

Changes in our product mix impacts our financial performance.

We sell products that have varying profit margins. Our financial performance can be impacted depending on the mix of products we sell during a given period.

Unavailable or higher cost materials could impact our financial performance.

We obtain raw materials including steel, filter media, plastics, and other components from third-party suppliers and tend to carry limited raw material inventories. An unanticipated delay in delivery by our suppliers could result in the inability to deliver on-time and meet the expectations of our Customers. This could negatively affect our financial performance. An increase in commodity prices could also result in lower operating margins.

Difficulties with the Company's information technology systems could adversely affect our results.

The Company has many information technology systems that are important to the operation of its businesses. The Company could encounter difficulties in developing new systems or maintaining and upgrading existing systems. Such difficulties could lead to significant expenses due to disruption in business operations and could adversely affect the Company's results.

Unfavorable fluctuations in foreign currency exchange rates could negatively impact our results and financial position.

We have operations in many countries. Each of our subsidiaries reports its results of operations and financial position in its relevant foreign currency, which is then translated into U.S. dollars. This translated financial information is included in our consolidated financial statements. The strengthening of the U.S.

dollar in comparison to the foreign currencies of our subsidiaries could have a negative impact on our results and financial position.

Acquisitions may have an impact on our results.

We have made and continue to pursue acquisitions. We cannot guarantee that these acquisitions will have a positive impact on our results. These acquisitions could negatively impact our profitability due to operating and integration inefficiencies, the incurrence of debt, contingent liabilities, and amortization expenses related to intangible assets. There are also a number of other risks involved in acquisitions. We could lose key existing Customers, have difficulties in assimilating the acquired operations, assume unanticipated legal liabilities, or lose key employees.

Compliance with environmental and product laws and regulations can be costly.

We are subject to many environmental laws and regulations in the jurisdictions in which we operate. We routinely incur costs in order to comply with these laws and regulations. We may be adversely impacted by new or changing laws and regulations that affect both our operations and our ability to develop and sell products that meet our Customers' requirements.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company's principal administrative office and research facilities are located in Bloomington, a suburb of Minneapolis, Minnesota. The principal European administrative and engineering offices are located in Leuven, Belgium. The Company also has extensive operations in the Asia-Pacific region.

The Company's principal manufacturing and distribution activities are located throughout the world. The following is a summary of the principal plants and other materially important physical properties owned or leased by the Company.

Americas

Auburn, Alabama (E)
Riverbank, California (I)*
Valencia, California (E)*
Dixon, Illinois
Frankfort, Indiana
Cresco, Iowa
Grinnell, Iowa (E)
Nicholasville, Kentucky

Rayong, Thailand (I)

Third-Party Logistics Providers

Santiago, Chile
Wuxi, China
Mumbai, India
Plainfield, Indiana (I)
Gunma, Japan
Singapore
Greeneville, Tennessee (I)

The Company's properties are utilized for both the Engine and Industrial Products segments except as indicated with an (E) for Engine or (I) for Industrial. The Company leases certain of its facilities, primarily under long-term leases. The facilities denoted with an asterisk (*) are leased facilities. In Wuxi, China and Bloomington, Minnesota a portion of the activities are conducted in leased facilities. The Company uses third-party logistics providers for some of its product distribution and neither leases nor owns the facilities. The Company considers its properties to be suitable for their present purposes, well-maintained, and in good operating condition.

Item 3. Legal Proceedings

The Company records provisions with respect to identified claims or lawsuits when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Claims and lawsuits are reviewed quarterly and provisions are taken or adjusted to reflect the status of a particular matter. The Company believes the recorded reserves in its consolidated financial statements are adequate in light of the probable and estimable outcomes. Any recorded liabilities were not material to the Company's financial position, results of operation or liquidity, and the Company does not believe that any of the currently identified claims or litigation will materially affect its financial position, results of operation or liquidity.

The Company has reached a preliminary agreement to settle the class action lawsuits that were previously disclosed in its SEC filings, including most recently the Form 10-Q for the quarter ending April 30, 2011. On March 31, 2008, S&E Quick Lube, a filter distributor, filed a lawsuit alleging that 12 filter manufacturers, including the Company, engaged in a conspiracy to fix prices, rig bids, and allocate U.S. Customers for aftermarket automotive filters. The U.S. cases have been consolidated into a single multi-district litigation in the Northern District of Illinois. The Company denies any liability and has vigorously defended the claims raised in these lawsuits. The settlement will fully resolve all claims brought against the Company in the lawsuits and the Company does not admit any liability or wrongdoing. The settlement is still subject to Court approval and will not have a material impact on the Company's financial position, results of operations or liquidity.

The Company has reached a preliminary agreement with the Air Resources Board for the State of California ("ARB") to settle regulatory claims brought by ARB in connection with the sales of our Diesel Multi-Stage Filter System ("DMF") for an immaterial amount. On May 19, 2010, ARB revoked its verification of the Company's DMF for use with on-road diesel engines, for which verification was originally issued on December 16, 2005. The Company denies that any sales were made in California without ARB verification. The Company is not currently selling any DMF product and is working with the Environmental Protection Agency to verify the product for any future sales.

Item 4. (Removed and Reserved)

Executive Officers of the Registrant

Current information regarding executive officers is presented below. All terms of office are for one year. There are no arrangements or understandings between individual officers and any other person pursuant to which the officer was selected as an executive officer.

<u>Name</u>	<u>Age</u>	<u>Positions and Offices Held</u>	<u>First Year Elected or Appointed as an Executive Officer</u>
Tod E. Carpenter	52	Vice President, Europe and Middle East	2008
William M. Cook	58	Chairman, President and Chief Executive Officer	1994
Sandra N. Joppa	46	Vice President, Human Resources	2005
Norman C. Linnell	52	Vice President, General Counsel and Secretary	1996
Charles J. McMurray	57	Senior Vice President, Industrial Products	2003
Mary Lynne Perushek	53	Vice President and Chief Information Officer	2006
David W. Timm	58	Vice President, Asia-Pacific	2007
Thomas R. VerHage	58	Vice President and Chief Financial Officer	2004
Jay L. Ward	47	Senior Vice President, Engine Products	2006
Debra L. Wilfong	56	Vice President and Chief Technology Officer	2007

Mr. Carpenter joined the Company in 1996 and has held various positions, including Gas Turbine Systems General Manager from 2002 to 2004; General Manager, Industrial Filtration Systems ("IFS") Sales from 2004 to 2006; General Manager, IFS Americas in 2006; and Vice President, Global IFS from 2006 to 2008. Mr. Carpenter was appointed Vice President, Europe and Middle East in August 2008. Mr. Carpenter has been appointed Senior Vice President, Engine Products, effective October 1, 2011.

Mr. Cook joined the Company in 1980 and has held various positions, including CFO and Senior Vice President, International from 2001 to 2004 and President and CEO from 2004 to 2005. Mr. Cook was appointed Chairman, President and CEO in July 2005.

Ms. Joppa was appointed Vice President, Human Resources and Communications in November 2005. Prior to that time, Ms. Joppa held various positions at General Mills, a consumer food products company, from 1989 to 2005, including service as Director of Human Resources for several different operating divisions from 1999 to 2005.

Mr. Linnell joined the Company in 1996 as General Counsel and Secretary and was appointed Vice President, General Counsel and Secretary in 2000.

Mr. McMurray joined the Company in 1980 and has held various positions, including Director, Global Information Technology from 2001 to 2003; Vice President, Human Resources from 2004 to 2005; and Vice President, Information Technology, Europe, South Africa, and Mexico from 2005 to 2006. Mr. McMurray became Senior Vice President, Industrial Products in September 2006. Mr. McMurray has been appointed Senior Vice President and Chief Administrative Officer, effective October 1, 2011.

Ms. Perushek was appointed Vice President and Chief Information Officer in November 2006. Prior to that time, Ms. Perushek was Vice President of Global Information Technology at H.B. Fuller Company, a worldwide manufacturer of adhesive products, from 2005 to 2006 and Chief Information Officer for Young America Corporation, a marketing company, from 1999 to 2004.

Mr. Timm joined the Company in 1983 and has held various positions, including General Manager, Disk Drive from 1995 to 2005 and General Manager, Gas Turbine Systems Products from 2005 to 2006. Mr. Timm was appointed Vice President, Asia-Pacific in December 2006. The Company has announced that Mr. Timm will retire from the Company at the end of 2011, with his replacement to be announced at a later date.

Mr. VerHage was appointed Vice President and Chief Financial Officer in March 2004. Prior to that time, Mr. VerHage was a partner for Deloitte & Touche, LLP, an international accounting firm, from 2002 to 2004. The Company has announced that Mr. VerHage is leaving the Company on October 31, 2011 and that James F. Shaw, age 42, currently Controller and Principal Accounting Officer for the Company, has been appointed Vice President and Chief Financial Officer, effective November 1, 2011.

Mr. Ward joined the Company in 1998 and has held various positions, including Director, Operations from 2001 to 2003; Director, Product and Business Development, IFS Group from 2003 to 2004; Managing Director, Europe from 2004 to 2006; and Vice President, Europe, and Middle East from 2006 to 2008. Mr. Ward was appointed Senior Vice President, Engine Products in August 2008. Mr. Ward has been appointed Senior Vice President, Industrial Products, effective October 1, 2011.

Ms. Wilfong was appointed Vice President and Chief Technology Officer in May 2007. Prior to that time, Ms. Wilfong was Director, Research and Development at 3M Company, an international consumer products company, from 2000 to 2007, most recently as Director, Research and Development for the 3M Automotive Division from 2006 to 2007.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The common shares of the Company are traded on the New York Stock Exchange under the symbol DCI. The amount and frequency of all cash dividends declared on the Company's common stock for Fiscal 2011 and 2010 appear in Note P of the Notes to Consolidated Financial Statements on page 54. The Company's dividend payout ratio target is 20 percent to 30 percent of the average earnings per share of the last three years. This guidance is expected to be used for future dividend payouts. As of September 22, 2011, there were 1,950 shareholders of record of common stock.

The low and high sales prices for the Company's common stock for each full quarterly period during Fiscal 2011 and 2010 were as follows:

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
Fiscal 2011	\$40.86 – 50.19	\$48.51 – 60.28	\$54.59 – 62.90	\$54.62 – 63.04
Fiscal 2010	\$32.60 – 39.82	\$35.24 – 45.19	\$37.24 – 47.38	\$40.51 – 48.21

The following table sets forth information in connection with purchases made by, or on behalf of, the Company or any affiliated purchaser of the Company, of shares of the Company's common stock during the quarterly period ended July 31, 2011.

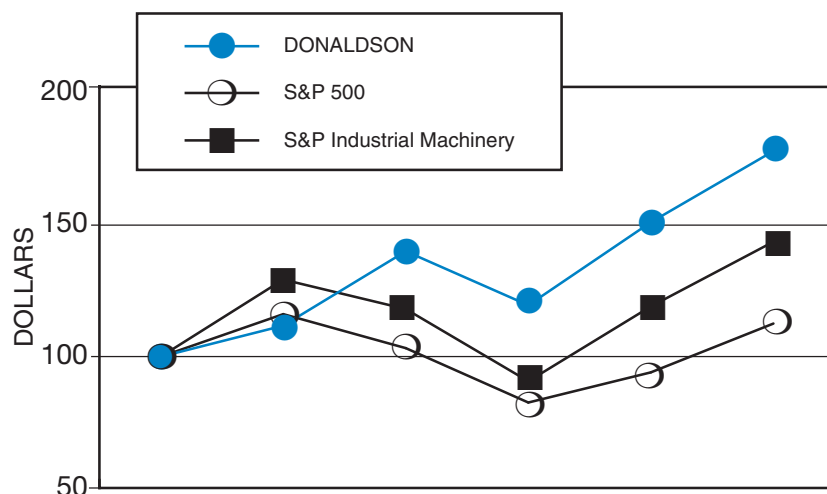

<u>Period</u>	<u>Total Number of Shares Purchased (1)</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs</u>
May 1 – May 31, 2011 ..	—	\$ —	—	6,187,240
June 1 – June 30, 2011 ..	900,000	\$56.35	900,000	5,287,240
July 1 – July 31, 2011 ...	291,558	\$59.23	256,648	5,030,592
Total.....	<u>1,191,558</u>	<u>\$57.06</u>	<u>1,156,648</u>	<u>5,030,592</u>

The Company initiated the purchase of an additional 162,900 shares for \$9.2 million in July 2011 that are not included in Fiscal 2011 repurchases as the transactions did not settle until after fiscal year end. These repurchases will be included in Fiscal 2012 activity.

- (1) On March 26, 2010, the Company announced that the Board of Directors authorized the repurchase of up to 8.0 million shares of common stock. This repurchase authorization, which is effective until terminated by the Board of Directors, replaced the existing authority that was authorized on March 31, 2006. There were no repurchases of common stock made outside of the Company's current repurchase authorization during the quarter ended July 31, 2011. However, the "Total Number of Shares Purchased" column of the table above includes 34,910 previously owned shares tendered by option holders in payment of the exercise price of options during the quarter. While not considered repurchases of shares, the Company does at times withhold shares that would otherwise be issued under equity-based awards to cover the withholding taxes due as a result of exercising stock options or payment of equity-based awards.

The graph below compares the cumulative total stockholder return on the Company's common stock for the last five fiscal years with the cumulative total return of the Standard & Poor's 500 Stock Index and the Standard & Poor's Industrial Machinery Index. The graph and table assume the investment of \$100 in each of the Company's common stock and the specified indexes at the beginning of the applicable period, and assume the reinvestment of all dividends.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN
Among Donaldson Company, Inc., the S&P 500 Index
and the S&P Industrial Machinery Index

	<u>Year ended July 31,</u>					
	<u>2011</u>	<u>2010</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Donaldson Company, Inc.	\$177.91	\$150.95	\$119.50	\$139.95	\$111.77	\$100.00
S&P 500	112.56	94.07	82.64	103.25	116.13	100.00
S&P Industrial Machinery	143.55	119.05	90.70	118.06	129.23	100.00

Item 6. Selected Financial Data

The following table sets forth selected financial data for each of the fiscal years in the five-year period ended July 31, 2011 (in millions, except per share data):

	Year ended July 31,				
	2011	2010	2009	2008	2007
Net sales	\$2,294.0	\$1,877.1	\$1,868.6	\$2,232.5	\$1,918.8
Income from continuing operations ..	225.3	166.2	131.9	172.0	150.7
Diluted earnings per share	2.87	2.10	1.67	2.12	1.83
Total assets	1,726.1	1,499.5	1,334.0	1,548.6	1,319.0
Long-term obligations.....	205.7	256.2	253.7	176.5	129.0
Cash dividends declared per share ...	0.560	0.480	0.460	0.430	0.370
Cash dividends paid per share	0.535	0.470	0.455	0.420	0.360

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

Results of Operation

The following discussion of the Company's financial condition and results of operations should be read in conjunction with the Consolidated Financial Statements and Notes thereto and other financial information included elsewhere in this report.

Overview

The Company is a worldwide manufacturer of filtration systems and replacement parts. The Company's core strengths are leading filtration technology, strong Customer relationships, and its global presence. The Company operates through two reporting segments, Engine Products and Industrial Products, and has a product mix including air and liquid filtration systems and exhaust and emission control products. As a worldwide business, the Company's results of operations are affected by conditions in the global economic environment. Under normal economic conditions, the Company's market diversification between its OEM and replacement parts Customers, its diesel engine and industrial end markets, and its North American and international end markets has helped to limit the impact of weakness in any one product line, market or geography on the consolidated results of the Company.

The Company reported record sales in Fiscal 2011 of \$2,294.0 million, up 22.2 percent from \$1,877.1 million in the prior year. The Company's results were positively impacted by foreign currency translation, which increased sales by \$49.8 million. Excluding the current year impact of foreign currency translation, worldwide sales increased 19.6 percent.

Although net sales excluding foreign currency translation is not a measure of financial performance under GAAP, the Company believes it is useful in understanding its financial results and provides a comparable measure for understanding the operating results of the Company between different fiscal periods excluding the impact of foreign currency translation. The following is reconciliation to the most comparable GAAP financial measure of this non-GAAP financial measure (in millions):

	<u>July 31, 2011</u>	<u>July 31, 2010</u>
Net sales, excluding foreign currency translation	\$2,244.2	\$1,833.9
Foreign currency translation impact	49.8	43.2
Net sales	<u>\$2,294.0</u>	<u>\$1,877.1</u>

The Company also reported record net earnings in Fiscal 2011 of \$225.3 million, an increase of 35.6 percent from \$166.2 million in the prior year. The Company's net earnings were also positively impacted by foreign currency translation, which increased net earnings by \$6.1 million. Excluding the current year impact of foreign currency translation, net earnings increased 31.9 percent.

Although net earnings excluding foreign currency translation is not a measure of financial performance under GAAP, the Company believes it is useful in understanding its financial results and provides a comparable measure for understanding the operating results of the Company between different fiscal periods excluding the impact of foreign currency translation. The following is a reconciliation to the most comparable GAAP financial measure of this non-GAAP financial measure (in millions):

	<u>July 31, 2011</u>	<u>July 31, 2010</u>
Net earnings, excluding foreign currency translation	\$219.2	\$162.6
Foreign currency translation impact, net of tax	<u>6.1</u>	<u>3.6</u>
Net earnings	<u>\$225.3</u>	<u>\$166.2</u>

The Company reported diluted earnings per share of \$2.87, a 36.7 percent increase from \$2.10 in the prior year.

As discussed above, the Company recorded full year records for net sales and net earnings. In addition, operating margin was a record of 13.7 percent for the year. The Company's manufacturing plants and distribution centers executed very well and continued to make both capital and operating investments which, along with the Company's Continuous Improvement initiatives, resulted in a record year and puts the Company in a position to profitably support its Customers' global growth plans. These improvements were slightly offset by increases in purchased raw material and freight costs.

Following is financial information for the Company's Engine and Industrial Products segments. Corporate and Unallocated includes corporate expenses determined to be non-allocable to the segments and interest income and expense. See further discussion of segment information in Note K of the Company's Notes to Consolidated Financial Statements.

	<u>Engine Products</u>	<u>Industrial Products</u>	<u>Corporate & Unallocated</u>	<u>Total Company</u>
	(thousands of dollars)			
2011				
Net sales	\$1,440,495	\$853,534	\$ —	\$2,294,029
Earnings before income taxes	211,255	123,871	(22,863)	312,263
2010				
Net sales	\$1,126,007	\$751,057	\$ —	\$1,877,064
Earnings before income taxes	155,833	91,084	(16,741)	230,176
2009				
Net sales	\$1,027,685	\$840,944	\$ —	\$1,868,629
Earnings before income taxes	85,896	87,427	(11,898)	161,425

For the twelve months ended July 31, 2010 and 2009, net sales reflect the reclassification of \$31,636 and \$25,724, respectively, earnings before income taxes reflect a reclassification of \$5,360 and \$2,099, respectively, as a result of an internal reorganization of Industrial Hydraulics from Industrial Products to Engine Products, which became effective August 1, 2010.

Many factors contributed to the Company's results for each of the Company's reporting segments for Fiscal 2011, including an improvement in global economic conditions, the Company's program of Continuous Improvement initiatives, new product introductions, emerging market growth, and the expansion of the Company's distribution capabilities.

In the Engine Products segment, the Company experienced increased sales in all end-markets and regions with the exception of Aerospace and Defense Products. The earnings improvement for the current fiscal year was primarily driven by better absorption of fixed costs due to improved volumes at our manufacturing plants, and Continuous Improvement initiatives. The Aftermarket Products sales increases were driven by continued improvement in equipment utilization rates in the mining, construction, and transportation industries globally. The Off-Road Product sales increase is driven by higher demand for agriculture and mining equipment, due to continued strong commodity prices and improved sales of heavy construction equipment, which was due to increased global infrastructure spending, especially in developing economies. On-Road Products sales improved as North America and Europe heavy truck build rates continued rebounding.

In the Industrial Products segment, where many product lines are later economic cycle businesses, sales increased due to improving global economies leading to greater Customer demand. In Industrial Filtration Solutions Products, sales of new dust collection equipment and replacement filters continued to grow. Gas Turbine Products sales remained slow due to static Customer demand for large gas turbine power generation projects as a result of unchanged global power generation requirements. The increase in sales in Special Applications Products is due to strong sales in certain product lines serving the membrane, semiconductor, imaging, and venting end markets.

Following are net sales by product within both the Engine and Industrial Products segments:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
	(thousands of dollars)		
Engine Products segment:			
Off-Road Products	\$ 327,557	\$ 222,329	\$ 243,691
Aerospace and Defense Products	104,883	111,977	119,094
On-Road Products	127,107	81,874	71,958
Aftermarket Products*	861,393	691,899	561,846
Retrofit Emissions Products	19,555	17,928	31,096
Total Engine Products segment	<u>1,440,495</u>	<u>1,126,007</u>	<u>1,027,685</u>
Industrial Products segment:			
Industrial Filtration Solutions Products	507,646	423,050	477,908
Gas Turbine Products	154,726	150,131	206,760
Special Applications Products	191,162	177,876	156,276
Total Industrial Products segment	<u>853,534</u>	<u>751,057</u>	<u>840,944</u>
Total Company	<u>\$2,294,029</u>	<u>\$1,877,064</u>	<u>\$1,868,629</u>

* Includes replacement part sales to the Company's OEM Customers.

Outlook

The Company forecasts continued expansion in many of its end markets, with higher growth in emerging economies. The Company forecasts its full year Fiscal 2012 EPS to be between \$3.15 and \$3.45.

- The Company is planning its total Fiscal 2012 sales to be between \$2.45 and \$2.60 billion, or up about 7 to 15 percent from Fiscal 2011. Foreign currency translation is based on the Company's planned rates for the Euro at US\$1.42 and 81 Yen to the US\$.
- The Company's full year Fiscal 2012 operating margin is forecasted to be 13.7 to 14.5 percent.
- The Company's full year Fiscal 2012 tax rate is projected to be between 28 and 30 percent.
- The Company projects that cash generated by operating activities will be between \$275 and \$305 million in Fiscal 2012. Capital spending in Fiscal 2012 is estimated to be approximately \$100 million.

Engine Products – The Company forecasts full year sales to increase 8 to 15 percent, including the impact of foreign currency translation.

- The Company anticipates sales to its agricultural, mining, and construction equipment OEM Customers to grow at a more moderate pace in Fiscal 2012 compared to Fiscal 2011's growth rate. The Company also expects to continue to benefit from increased market share on their Customers' new Tier IV equipment platforms.
- In the On-Road Products' business, the Company believes build rates for heavy and medium duty trucks at their OEM Customers will be higher than Fiscal 2011, but are expected to grow at a more normal rate.
- Sales of the Company's Aftermarket Products are expected to remain strong based on current utilization rates for both off-road equipment and on-road heavy trucks. The Company should also benefit as its distribution networks continue to expand in the emerging economies and from the increasing number of systems installed in the field with their proprietary filtration systems.

- The Company forecasts modest sales gains in Aerospace and Defense Products for Fiscal 2012 as the continued slowdown in military spending is anticipated to be offset by increased commercial aerospace sales.

Industrial Products – The Company forecasts full year FY12 sales to increase 7 to 15 percent, including the impact of foreign currency translation.

- The Company's Industrial Filtration Solutions Products' sales are projected to increase 7 to 14 percent, assuming demand for new filtration equipment and replacement filters both continue to improve as general industrial capital activity and spending increase globally.
- The Company anticipates its Gas Turbine Products' sales to increase 14 to 22 percent due to improvement in the power generation market and ongoing strength in the oil and gas market segment.
- Special Applications Products' sales are projected to increase 2 to 9 percent primarily due to growing sales of their membranes products.

Fiscal 2011 Compared to Fiscal 2010

Engine Products Segment The Engine Products segment sells to OEMs in the construction, mining, agriculture, aerospace, defense, and truck markets and to independent distributors, OEM dealer networks, private label accounts, and large equipment fleets. Products include air filtration systems, exhaust and emissions systems, liquid filtration systems, and replacement filters.

Sales for the Engine Products segment were \$1,440.5 million, an increase of 27.9 percent from \$1,126.0 million in the prior year. Engine Products sales in the United States increased by 25.9 percent in Fiscal 2011 compared to Fiscal 2010. International Engine Products sales increased 29.8 percent from the prior year. The impact of foreign currency increased total sales by \$31.5 million, or 2.8 percent. Earnings before income taxes as a percentage of Engine Products segment sales of 14.7 percent increased from 13.8 percent in the prior year. The earnings improvement for the current fiscal year was driven by better absorption of fixed costs due to improved volumes and the Company's ongoing Continuous Improvement initiatives, partially offset by increased commodity costs compared to the prior year. There were \$1.9 million in restructuring expenses for the Engine Products segment in the prior year.

Worldwide sales of Off-Road Products were \$327.6 million, an increase of 47.3 percent from \$222.3 million in the prior year. Sales in the United States increased 35.8 percent over the prior fiscal year. Internationally, sales of Off-Road Products were up 56.0 percent from the prior year, with sales increasing in Asia and Europe by 58.2 percent and 55.6 percent, respectively. The Company's overall increase was driven by higher demand for agriculture, construction, and mining equipment due to continued strong commodity prices and improved sales of heavy construction equipment, which was due to increased global infrastructure spending, especially in developing economies. Off-Road Products sales in the U.S. also benefited from market share gains on new platforms that began production during calendar year 2011. These increases were slightly offset by U.S. residential and non-residential construction markets, which showed continued weakness, resulting in lower sales of the Company's products into those markets.

Worldwide sales of Aerospace and Defense Products were \$104.9 million, a 6.3 percent decrease from \$112.0 million in the prior year. Sales in the United States decreased 8.7 percent over the prior year as a result of slowdowns in U.S. military activity, which is causing an associated slowdown in government procurement spending for major programs. Internationally, sales of Aerospace and Defense Products increased 3.0 percent over the prior year. The international sales increased primarily due to market share gains resulting from improving the Company's Aerospace distribution capabilities in Europe.

Worldwide sales of On-Road Products were \$127.1 million, an increase of 55.2 percent from \$81.9 million in the prior year. On-Road Products sales in the United States increased 86.0 percent from the prior year. Class 8 build rates increased 47.8 percent and medium duty truck build rates increased 37.1 percent over the prior year. International On-Road Products sales increased 27.4 percent from the prior year, driven by increased sales in Europe of 45.6 percent. This increase is consistent with the increase in European build rates. The overall sales increase was a result of an increase in Customer truck build rates, higher content per truck, and a slightly higher market share.

Worldwide Engine Aftermarket Products sales of \$861.4 million increased 24.5 percent from \$691.9 million in the prior year. Sales in the United States increased 26.3 percent over the prior year. International sales increased 23.1 percent from the prior year, primarily driven by sales increases in Asia, Latin America and Europe of 37.8 percent, 25.7 percent, and 13.5 percent, respectively. The sales increases in the U.S. and internationally were attributable to improved On-Road and Off-Road equipment utilization rates from a year ago, the Company's increased distribution and market share growth, and the continued increase in the percentage of equipment in the field that uses the Company's proprietary filtration systems.

Worldwide sales of Retrofit Emissions Products were \$19.6 million, an increase of 9.1 percent from \$17.9 million in the prior year. The Company's Retrofit Emissions Products sales are solely in the United States. Sales of Retrofit Emissions Products increased overall, but challenges still remain in the supply chain for certain components and delays in regulatory approval for certain of the Company's products have impacted the Company's sales.

Industrial Products Segment The Industrial Products segment sells to various industrial end-users, OEMs of gas-fired turbines, and OEMs and end-users requiring clean air. Products include dust, fume, and mist collectors, compressed air purification systems, air filtration systems for gas turbines, PTFE membrane based products, and specialized air filtration systems for applications, including computer hard disk drives.

Sales for the Industrial Products segment were \$853.5 million, an increase of 13.6 percent from \$751.1 million in the prior year. International Industrial Products sales increased 8.5 percent and sales in the United States increased 27.2 percent from the prior year. The impact of foreign currency increased sales by \$18.3 million, or 2.4 percent. Earnings before income taxes as a percentage of Industrial Products segment sales of 14.5 percent increased from 12.1 percent in the prior year. The improvement in earnings as a percent of sales over the prior year was driven by better leverage of fixed operating costs and better plant utilization. Restructuring expenses in Fiscal 2011 were \$0.7 million, a decrease from \$8.3 million in Fiscal 2010.

Worldwide sales of Industrial Filtration Solutions Products of \$507.6 million increased 20.0 percent from \$423.1 million in the prior year. Sales in the United States, Europe and Asia increased 25.3 percent, 12.9 percent, and 26.2 percent, respectively. The increased sales were due to increased manufacturing activity, higher investment in capital equipment by manufacturers, and the continued strengthening of replacement filter sales due to utilization of existing equipment. North American general industrial activity remained strong as evidenced by a 110 percent increase in machine tool consumption in the United States during Fiscal 2011 as compared to Fiscal 2010.

Worldwide sales of Gas Turbine Products were \$154.7 million, an increase of 3.1 percent from \$150.1 million in the prior year. Gas Turbine Products sales are typically large systems and, as a result, the Company's shipments and revenues fluctuate from period to period. Sales slightly improved due to additional demand for smaller systems used in the oil and gas industry as a result of higher average oil prices and an increase in Aftermarket sales for replacement filters. These increases were slightly offset by a decline in the sales of air filtration systems for large turbines used for power generation.

Worldwide sales of Special Applications Products were \$191.2 million, a 7.5 percent increase from \$177.9 million in the prior year. International sales of Special Application Products increased 6.1 percent over the prior year, primarily in Europe, which increased 47.0 percent. Domestic Special Application Products sales increased 17.1 percent. The global sales increases were driven by strong sales in some of the Company's product lines serving the membrane, semiconductor, imaging, and venting end markets, partially offset by a slight decline in the Company's disk drive filter sales due to soft demand in the global end market for hard disk drives. Overall, the decline in disk drive sales is comparable with published disk drive build rates.

Consolidated Results The Company reported net earnings for Fiscal 2011 of \$225.3 million compared to \$166.2 million in Fiscal 2010, an increase of 35.6 percent. Diluted net earnings per share were \$2.87, up 36.7 percent from \$2.10 in the prior year. The Company's operating income of \$315.3 million increased from prior year operating income of \$238.2 million by 32.3 percent.

The table below shows the percentage of total operating income contributed by each segment for each of the last three fiscal years. Corporate and Unallocated includes corporate expenses determined to be non-allocable to the segments, interest income, and interest expense:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
Engine Products	64.1%	63.1%	45.7%
Industrial Products	38.7%	37.8%	50.6%
Corporate and Unallocated	<u>(2.8)%</u>	<u>(0.9)%</u>	<u>3.7%</u>
Total Company	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

International operating income, prior to corporate expense allocations, totaled 80.2 percent of consolidated operating income in Fiscal 2011 as compared to 80.3 percent in Fiscal 2010. Total international operating income increased 32.1 percent from the prior year. This increase is attributable to increased Customer sales and the leverage of fixed costs with the higher volume of sales. The table below shows the percentage of total operating income contributed by each major geographic region for each of the last three fiscal years:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
United States	19.8%	19.7%	22.1%
Europe	31.0%	24.6%	23.3%
Asia - Pacific	39.6%	45.3%	43.5%
Other	<u>9.6%</u>	<u>10.4%</u>	<u>11.1%</u>
Total Company	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

Gross margin for Fiscal 2011 was 35.5 percent, an increase from 35.1 percent in the prior year. The improved gross margin was the result of better fixed cost absorption and the Company's ongoing Continuous Improvement initiatives of approximately \$27 million, which were partially offset by increases in purchased raw material (steel and petrochemical based raw materials) of approximately \$19 million, net of selective price increases to Customers. Within gross margin, the Company incurred minimal restructuring and asset impairment charges during the fiscal year, compared to \$7.5 million last year. The fiscal 2010 charges were primarily related to a downsizing at a plant in Germany and included severance and asset impairments for the building and inventory.

Operating expenses for Fiscal 2011 were \$498.5 million or 21.7 percent of sales, as compared to \$420.5 million or 22.4 percent in the prior year. The decrease in operating expenses as a percentage of sales is driven by the higher volume of sales and benefits from the Company's Continuous Improvement initiatives. In addition, the current year included a \$1.9 million reduction in restructuring expenses compared to Fiscal 2010. These benefits were partially offset by costs for our strategic operating investments totaling \$13.9 million for the fiscal year and higher compensation related expenses such as incentive compensation of \$9.2 million and pension expense of \$5.1 million over the prior year.

Interest expense of \$12.5 million increased \$0.5 million from \$12.0 million in the prior year. Net other income totaled \$9.5 million in Fiscal 2011 up from \$3.9 million in the prior year. The increase of \$5.6 million over the prior year is primarily attributable to increased interest income of \$2.0 million, increased earnings from non-consolidated joint ventures of \$2.1 million, and increased royalty income of \$1.4 million. Components of other income for Fiscal 2011 were as follows: interest income of \$3.3 million, earnings from non-consolidated joint ventures of \$4.1 million, royalty income of \$8.7 million, partially offset by charitable donations of \$1.1 million, foreign exchange losses of \$4.5 million, and other miscellaneous income and expense items resulting in expenses of \$1.0 million.

The effective tax rate for Fiscal 2011 was 27.9 percent compared to 27.8 percent in Fiscal 2010. The average underlying tax rate remained at 29.7 percent, while discrete items were also a consistent percentage of pre-tax profits. Fiscal 2010 contained \$4.3 million of discrete tax benefits from the expiration of the statute of limitations at foreign subsidiaries. Fiscal 2011 contained \$5.8 million of discrete tax benefits primarily from the release of reserves after the favorable conclusions of foreign tax audits, the expiration of statutes in various jurisdictions, and the positive impact of dividends from some foreign subsidiaries.

Total backlog at July 31, 2011, was \$816.4 million, up 29.9 percent from the same period in the prior year. Backlog is one of many indicators of business conditions in the Company's markets. However, it is not always indicative of future results for a number of reasons, including short lead times in the Company's replacement parts businesses and the timing of the receipt of orders in many of the Company's Engine OEM and Industrial markets. In the Engine Products segment, total open order backlog increased 36.6 percent from the prior year. In the Industrial Products segment, total open order backlog increased 14.9 percent from the prior year. Because some of the change in backlog can be attributed to a change in the ordering patterns of the Company's Customers and/or the impact of foreign exchange translation rates, it may not necessarily correspond to future sales.

Fiscal 2010 Compared to Fiscal 2009

Engine Products Segment The Engine Products segment sells to OEMs in the construction, mining, agriculture, aerospace, defense, and truck markets and to independent distributors, OEM dealer networks, private label accounts, and large equipment fleets. Products include air filtration systems, exhaust and emissions systems, liquid filtration systems, and replacement filters.

Sales for the Engine Products segment were \$1,126.0 million, an increase of 9.6 percent from \$1,027.7 million in the prior year. Engine Products sales in the United States remained relatively flat in Fiscal 2010 compared to Fiscal 2009, increasing only 0.5 percent in the current fiscal year. International Engine Products sales increased 19.6 percent from the prior year. The impact of foreign currency increased sales by \$24.9 million, or 2.4 percent. Earnings before income taxes as a percentage of Engine Products segment sales of 13.8 percent increased from 8.4 percent in the prior year. The earnings improvement for the current fiscal year was driven by a greater mix of higher-margin Aftermarket sales versus lower-margin first-fit product sales, better absorption of fixed manufacturing costs due to the increase in production volumes and benefits related to completed restructuring efforts and other Continuous Improvement initiatives. In addition, restructuring expenses for the Engine Products segment were down \$5.3 million over the prior year, but this was more than offset by \$6.2 million of increased warranty expenses related to Retrofit Emissions Products.

Worldwide sales of Off-Road Products were \$222.3 million, a decrease of 8.8 percent from \$243.7 million in the prior year. Sales in the United States decreased 15.0 percent to \$95.1 million for the fiscal year. Internationally, sales of Off-Road Products were down 3.4 percent from the prior year, with sales decreasing in Europe by 10.7 percent, which were slightly offset by an increase in Off-Road sales in Asia of 7.4 percent. The Company's overall decrease was driven by a weakness in the early portion of the fiscal year with a gradual strengthening in end-markets in the last half of the fiscal year. This was evident in the gradual improvement of sales to OEMs during the last months of the fiscal year. The first half of the year was down primarily due to declines in spending in the residential and non-residential construction markets. The latter half of the year saw increases in the mining industry as a result of higher commodity prices and improvements in worldwide construction activity.

Worldwide sales of On-Road Products were \$81.9 million, an increase of 13.8 percent from \$72.0 million in the prior year. On-Road Products sales in the United States increased 3.4 percent from the prior year, primarily as a result of a slight market share improvement and higher content per truck. The Company performed better than the impact due to the change in truck build rates for the year in Class 8 truck builds, which decreased by 3.7 percent and medium duty truck build rates which increased 0.3 percent. International On-Road Products sales increased 25.2 percent from the prior year, driven by increased sales in Asia of 45.2 percent, as a result of increased truck exports by the Company's Japanese OEM Customers to higher growth emerging markets, and rebounding sales in Europe during the second half of the fiscal year.

Worldwide Engine Aftermarket Products sales of \$691.9 million increased 23.1 percent from \$561.8 million in the prior year. Sales in the United States increased 14.7 percent over the prior year. International sales increased 29.7 percent from the prior year, primarily driven by sales increases in Asia, Latin America and Europe of 36.9 percent, 28.9 percent, and 24.7 percent, respectively. The sales increases in the United States and internationally were driven by rebounds in equipment utilization rates in the mining, construction, and transportation industries. The Company also improved its distribution capabilities to be closer to and better serve its Customers and increased sales due to the Company's recent market share "wins."

Worldwide sales of Retrofit Emissions Products were \$179 million, a decrease of 42.3 percent from \$31.1 million in the prior year. The Company's Retrofit Emissions Products sales are solely in the United States. Sales of Retrofit Emissions Products decreased as a result of continuing postponements in the availability of government grant money and delays and losses of regulatory approval for certain of the Company's products, including the DMF product.

Worldwide sales of Aerospace and Defense Products were \$112.0 million, a 6.0 percent decrease from \$119.1 million in the prior year. Sales in the United States decreased 9.0 percent over the prior year as a result of slowdowns in government procurement for major defense programs. Internationally, sales of Aerospace and Defense Products increased 8.0 percent over the prior year. The international sales increased primarily as a result of the startup of recent defense program wins.

Industrial Products Segment The Industrial Products segment sells to various industrial end-users, OEMs of gas-fired turbines, and OEMs and end-users requiring clean air. Products include dust, fume, and mist collectors, compressed air purification systems, air filtration systems for gas turbines, PTFE membrane based products, and specialized air filtration systems for applications including computer hard disk drives.

Sales for the Industrial Products segment were \$751.1 million, a decrease of 10.7 percent from \$840.9 million in the prior year. International Industrial Products sales decreased 9.0 percent, and sales in the United States decreased 15.0 percent from the prior year. The impact of foreign currency increased sales by \$172 million, or 2.0 percent. Despite the 10.7 percent decrease in sales, earnings before income taxes as a percentage of Industrial Products segment sales were 12.1 percent, increasing from 10.4 percent in the prior year. The improvement in earnings as a percent of sales over the prior year was driven by better execution on large project shipments, increased plant utilization, improved product mix, and Continuous Improvement initiatives. Restructuring expenses in Fiscal 2010 were \$8.3 million, a decrease from \$10.1 million in Fiscal 2009.

Worldwide sales of Industrial Filtration Solutions Products of \$423.1 million decreased 11.5 percent from \$478.0 million in the prior year. Sales in the United States, Europe and Asia decreased 11.9 percent, 12.0 percent, and 8.0 percent, respectively. Sales in Mexico decreased 20.9 percent in Fiscal 2010 as compared to Fiscal 2009. Overall, the Company experienced weak sales conditions for its Industrial Filtration Solutions Products during the beginning of the fiscal year, with conditions improving towards the end of the fiscal year. The decreased sales in Europe and Asia were due to reduced demand for industrial dust collectors and compressed air purification systems due to the downturn in general manufacturing activity. Domestic sales decreased due to a decline in general industrial activity that did not stabilize until late in the fiscal year, as evidenced by a 19 percent drop in machine tool consumption in the United States during fiscal year 2010 as compared to fiscal year 2009.

Worldwide sales of Gas Turbine Products were \$150.1 million, a decrease of 27.4 percent from \$206.8 million in the prior year. Gas Turbine Products sales are typically large systems and, as a result, the Company's shipments and revenues fluctuate from period to period. Incoming orders declined 9 percent in Fiscal 2010 versus Fiscal 2009, a reflection of the reduced demand for power generation projects globally. Sales remained slow due to a deceleration in Customer demand for large gas turbine power generation projects as a result of the decrease in global electrical power requirements and also as a result of one Customer's increased utilization of its own internal filtration businesses.

Worldwide sales of Special Applications Products were \$177.9 million, a 13.8 percent increase from \$156.3 million in the prior year. Domestic Special Application Products sales increased 5.8 percent, driven by an increase in sales to industrial Customers of PTFE membranes. International sales of Special Application Products increased 15.1 percent over the prior year, primarily in Asia, which increased 18.6 percent. These international sales increases were driven by improved demand for the Company's Customers' hard disk drives as the end-markets for computers, data storage devices, and other electronic products rebounded. Overall, the Company's market growth is comparable with published disk drive build rates.

Consolidated Results The Company reported net earnings for Fiscal 2010 of \$166.2 million compared to \$131.9 million in Fiscal 2009, an increase of 26.0 percent. Diluted net earnings per share were \$2.10, up 25.7 percent from \$1.67 in the prior year. The Company's operating income of \$238.2 million increased from prior year operating income of \$170.0 million by 40.2 percent.

The table below shows the percentage of total operating income contributed by each segment for each of the last three fiscal years. Corporate and Unallocated includes corporate expenses determined to be non-allocable to the segments, interest income, and interest expense:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Engine Products	63.1%	45.7%	61.1%
Industrial Products	37.8%	50.6%	42.1%
Corporate and Unallocated	<u>(0.9)%</u>	<u>3.7%</u>	<u>(3.2)%</u>
Total Company	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

International operating income, prior to corporate expense allocations, totaled 80.3 percent of consolidated operating income in Fiscal 2010 as compared to 77.9 percent in Fiscal 2009. Total international operating income increased 44.6 percent from the prior year. This increase is attributable to increased Customer sales and stronger foreign currencies. The table below shows the percentage of total operating income contributed by each major geographic region for each of the last three fiscal years:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
United States	19.7%	22.1%	10.6%
Europe	24.6%	23.3%	43.3%
Asia - Pacific	45.3%	43.5%	37.9%
Other	<u>10.4%</u>	<u>11.1%</u>	<u>8.2%</u>
Total Company	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

Gross margin for Fiscal 2010 was 35.1 percent, an increase from 31.6 percent in the prior year. The improved gross margin was the result of improved fixed cost absorption, a higher mix of replacement filter sales, savings from restructuring actions and ongoing Continuous Improvement initiatives. Within gross margin, the Company incurred \$7.5 million in restructuring and asset impairment charges during the fiscal year, compared to \$10.1 million last year. This year's charges were primarily related to a downsizing at a plant in Germany and included severance and asset impairments for the building and inventory.

Operating expenses for Fiscal 2010 were \$420.5 million or 22.4 percent of sales, as compared to \$419.8 million or 22.5 percent in the prior year. Operating expenses as a percent of sales was relatively flat and included \$15.1 million of higher incentive compensation expense partially offset by a \$5.0 million decrease in restructuring costs as compared to the prior year. During the fiscal year the Company increased warranty accruals due to specific warranty matters in our Retrofit Emissions Products group, recording an expense of \$6.2 million for this matter during the year.

Interest expense of \$12.0 million decreased \$5.0 million from \$17.0 million in the prior year as a result of reduced debt levels and lower interest rates throughout the year. Net other income totaled \$3.9 million in Fiscal 2010 down from \$8.5 million in the prior year. Components of other income for Fiscal 2010 were as follows: interest income of \$1.3 million, earnings from non-consolidated joint ventures of \$2.0 million, royalty income of \$7.2 million, charitable donations of \$1.6 million, foreign exchange losses of \$4.6 million, and other miscellaneous income and expense items resulting in expenses of \$0.4 million.

The effective tax rate for Fiscal 2010 was 27.8 percent compared to 18.3 percent in Fiscal 2009. The increase in effective tax rate is primarily due to a decrease in discrete tax benefits. Fiscal 2009 contained \$19.6 million of discrete tax benefits, which predominantly occurred in the second quarter, and primarily related to changes to uncertain tax position reserves in connection with the effective settlements of court cases and examinations in various jurisdictions covering various years. Fiscal 2010 contained \$4.3 million of discrete tax benefits, primarily recorded in the second quarter, from the expiration of the statute of limitations at foreign subsidiaries and other discrete items. Without consideration of discrete items, the average underlying tax rate improved over the prior year to 29.7 percent from 30.4 percent mainly due to the mix of earnings between tax jurisdictions.

Total backlog at July 31, 2010, was \$628.3 million, up 19.0 percent from the same period in the prior year. Backlog is one of many indicators of business conditions in the Company's markets. However, it is not always indicative of future results for a number of reasons, including short lead times in the Company's replacement parts businesses and the timing of receipt of orders in many of the Company's Engine OEM and Industrial markets. In the Engine Products segment, total open order backlog increased 31.5 percent

from the prior year. In the Industrial Products segment, total open order backlog decreased 1.8 percent from the prior year. Because some of the change in backlog can be attributed to a change in the ordering patterns of the Company's Customers and/or the impact of foreign exchange translation rates, it may not necessarily correspond to future sales.

Liquidity and Capital Resources

Financial Condition At July 31, 2011, the Company's capital structure was comprised of \$61.0 million of current debt, \$205.7 million of long-term debt and \$934.7 million of shareholders' equity. The Company had cash and cash equivalents of \$273.5 million at July 31, 2011. The ratio of long-term debt to total capital was 18.0 percent and 25.5 percent at July 31, 2011 and 2010, respectively.

Total debt outstanding decreased \$45.0 million during the year to \$266.7 million outstanding at July 31, 2011. Short-term borrowings outstanding at the end of the year were \$36.9 million less than the prior year, and long-term debt decreased \$8.1 million (including current maturities) from the prior year.

The following table summarizes the Company's cash obligations as of July 31, 2011, for the years indicated (thousands of dollars):

<u>Contractual Obligations</u>	<u>Payments Due by Period</u>				
	<u>Total</u>	<u>Less than 1 year</u>	<u>1 – 3 years</u>	<u>3 – 5 years</u>	<u>More than 5 years</u>
Long-term debt obligations	\$247,037	\$45,595	\$101,442	\$—	\$100,000
Capital lease obligations	796	428	360	8	—
Interest on long-term debt obligations	49,508	11,946	19,752	10,960	6,850
Operating lease obligations	26,579	10,546	12,196	3,006	831
Purchase obligations (1)	246,872	236,709	9,339	824	—
Pension and deferred compensation (2)	78,324	5,070	10,533	10,372	52,349
<u>Total (3)</u>	<u>\$649,116</u>	<u>\$310,294</u>	<u>\$153,622</u>	<u>\$25,170</u>	<u>\$160,030</u>

- (1) Purchase obligations consist primarily of inventory, tooling, contract employment services and capital expenditures. The Company's purchase orders for inventory are based on expected Customer demand, and quantities and dollar volumes are subject to change.
- (2) Pension and deferred compensation consists of long-term pension liabilities and salary and bonus deferrals elected by certain executives under the Company's deferred compensation plan. Deferred compensation balances earn interest based on a Treasury bond rate as defined by the plan and are payable at the election of the participants.
- (3) In addition to the above contractual obligations, the Company may be obligated for additional cash outflows of \$21.5 million of potential tax obligations, including accrued interest and penalties. The payment and timing of any such payments is affected by the ultimate resolution of the tax years that are under audit or remain subject to examination by the relevant taxing authorities, and are therefore not currently capable of estimation by period.

The Company's general funding policy for its pension plans is to make at least the minimum contributions as required by applicable regulations. Additionally, the Company may elect to make additional contributions up to the maximum tax deductible contribution. As such, the Company made contributions of \$20.6 million to its U.S. pension plans in Fiscal 2011. There is no minimum funding requirement for the Company's U.S. pension plans for Fiscal 2012. The Company is currently evaluating whether or not a U.S. pension contribution will be made in Fiscal 2012. The Company made contributions of \$7.1 million to its non-U.S. pension plans in Fiscal 2011 and estimates that it will contribute approximately \$4.7 million in Fiscal 2012 based upon the local government prescribed funding requirements. Future estimates of the Company's pension plan contributions may change significantly depending on the actual rate of return on plan assets, discount rates, and regulatory requirements.

The Company has a five-year, multi-currency revolving facility with a group of banks under which the Company may borrow up to \$250 million. This facility matures on April 2, 2013. The agreement provides that loans may be made under a selection of currencies and rate formulas including Base Rate Advances or Off Shore Rate Advances. The interest rate on each advance is based on certain market interest rates and leverage ratios. Facility fees and other fees on the entire loan commitment are payable over the duration of this facility. There was nothing outstanding at July 31, 2011 and \$50.0 million outstanding at July 31, 2010.

At July 31, 2011 and 2010, \$238.6 million and \$180.0 million, respectively, was available for further borrowing under such facilities. The amount available for further borrowing reflects a reduction for issued standby letters of credit, as discussed below. The weighted average interest rate on short-term borrowings outstanding at July 31, 2010 was 0.6 percent. Our multi-currency revolving facility contains debt covenants specifically related to maintaining a certain interest coverage ratio and a certain leverage ratio as well as other covenants that under certain circumstances can restrict our ability to incur additional indebtedness, make investments and other restricted payments, create liens, and sell assets. As of July 31, 2011, the Company was in compliance with all such covenants.

The Company has three uncommitted credit facilities in the United States, which provide unsecured borrowings for general corporate purposes. At July 31, 2011 and 2010, there was \$56.9 million and \$70.0 million available for use, respectively. There was \$13.1 million outstanding at July 31, 2011 and nothing outstanding at July 31, 2010.

The Company has a €100 million program for issuing treasury notes for raising short, medium, and long-term financing for its European operations. There was nothing outstanding on this program at July 31, 2011 or 2010. Additionally, the Company's European operations have lines of credit with an available limit of €45.6 million. There was nothing outstanding on these lines of credit as of July 31, 2011 or 2010.

Other international subsidiaries may borrow under various credit facilities. There was nothing outstanding under these credit facilities as of July 31, 2011 or 2010.

Also, at July 31, 2011 and 2010, the Company had outstanding standby letters of credit totaling \$11.4 million, upon which no amounts had been drawn. The letters of credit guarantee payment to third parties in the event the Company is in breach of a specified bond financing agreement and insurance contract terms as detailed in each letter of credit.

During Fiscal 2011, credit in the global credit markets became more accessible than in recent years and market interest rates remained low. The Company believes that its current financial resources are sufficient to continue financing its operations for the next twelve months. There can be no assurance, however, that the cost or availability of future borrowings will not be impacted by future capital market disruptions.

Certain note agreements contain debt covenants related to working capital levels and limitations on indebtedness. As of July 31, 2011, the Company was in compliance with all such covenants. The Company currently expects to remain in compliance with these covenants.

Shareholders' equity increased \$188.1 million in Fiscal 2011 to \$934.7 million at July 31, 2011. The increase was primarily due to the current year earnings of \$225.3 million, changes to foreign currency translation of \$72.5 million, \$13.8 million of stock options exercised, \$12.2 million in tax reductions related to employee plans, \$7.2 million (net of tax) of adjustments related to the pension liability, and \$6.5 million of stock option expense. These increases were partially offset by \$108.9 million of treasury stock repurchases and \$42.8 million of dividend declarations.

Cash Flows During Fiscal 2011, \$246.1 million of cash was generated from operating activities, compared with \$203.0 million in Fiscal 2010. The increase in cash generated from operating activities of \$43.1 million was primarily attributable to the Company's net earnings increase of \$59.1 million over the prior year, partially offset by changes in working capital needs resulting from increased inventory to support increased demand and a larger discretionary pension contribution than the prior year. Cash flow generated by operations and cash on hand was used primarily to support \$59.9 million of net capital expenditures, \$108.9 million for stock repurchases, \$41.0 million for dividend payments and to reduce total debt by \$50.0 million. Cash and cash equivalents increased \$41.5 million during Fiscal 2011.

Net capital expenditures for property, plant and equipment totaled \$59.9 million in Fiscal 2011 and \$42.7 million in Fiscal 2010. Net capital expenditures is comprised of purchases of property, plant, and equipment of \$60.6 million and \$43.1 million in Fiscal 2011 and 2010, respectively, partially offset by proceeds from the sale of property, plant and equipment of \$0.8 million in Fiscal 2011 and \$0.5 million in Fiscal 2010. Fiscal 2011 capital expenditures primarily related to new plant capacity additions, productivity enhancing investments at various plants worldwide, and tooling to manufacture new products.

Capital spending in Fiscal 2012 is planned to be approximately \$100.0 million. It is anticipated that Fiscal 2012 capital expenditures will be financed primarily by cash on hand, cash generated from operations, and existing lines of credit as needed.

The Company expects that cash generated by operating activities will be between \$275 and \$305 million in Fiscal 2012. At July 31, 2011, the Company had cash of \$273.5 million, which exists at subsidiaries outside of the United States. The Company also had \$295.5 million available under existing credit facilities in the United States, €145.6 million or \$209.7 million, available under existing credit facilities in Europe and \$67.5 million available under various credit facilities and currencies in Asia and the rest of the world. The Company believes that the combination of existing cash, available credit under existing credit facilities, and the expected cash generated by operating activities will be adequate to meet cash requirements for Fiscal 2012, including debt repayment, issuance of anticipated dividends, possible share repurchase activity, and capital expenditures.

Dividends The Company's dividend policy is to maintain a payout ratio, which allows dividends to increase with the long-term growth of earnings per share. The Company's dividend payout ratio target is 20 percent to 30 percent of the average earnings per share of the last three years. Including the Company's declaration on July 29, 2011 of a \$0.15 per share dividend to be paid, the dividend payout ratio was 28.1 percent on July 31, 2011.

Share Repurchase Plan The Board of Directors authorized the repurchase of 8.0 million shares of common stock under the stock repurchase plan dated March 26, 2010. In Fiscal 2011, the Company repurchased 2.0 million shares of common stock for \$108.9 million, or 2.5 percent of its diluted outstanding shares, at an average price of \$55.67 per share. The Company repurchased 1.7 million shares for \$66.7 million in Fiscal 2010. The Company repurchased 0.8 million shares for \$32.8 million in Fiscal 2009. As of July 31, 2011, the Company had remaining authorization to repurchase 5.0 million shares pursuant to the current authorization. The Company initiated the purchase of an additional 162,900 shares in July 2011 for \$9.2 million that are not included in Fiscal 2011 repurchases as the transactions did not settle until after fiscal year end. These repurchases will be included in Fiscal 2012 activity.

Off-Balance Sheet Arrangements The Company does not have any off-balance sheet arrangements, with the exception of the guarantee of 50 percent of certain debt of its joint venture, AFSI as further discussed in Note L of the Company's Notes to Consolidated Financial Statements. As of July 31, 2011, the joint venture had \$24.6 million of outstanding debt. The Company does not believe that this guarantee will have a current or future effect on its financial condition, results of operation, liquidity or capital resources.

New Accounting Standards In December 2010, the FASB updated the accounting guidance relating to the annual goodwill impairment test. The updated guidance requires companies to perform the second step of the impairment test to measure the amount of impairment loss, if any, when it is more likely than not that goodwill impairment exists when the carrying amount of a reporting unit is zero or negative. In considering whether it is more likely than not that goodwill impairment exists, an entity shall evaluate whether there are adverse qualitative factors. The updated guidance is effective for the Company beginning in the first quarter of fiscal year 2012. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

In May 2011, the FASB updated the accounting guidance related to fair value measurements. The updated guidance results in a consistent definition of fair value and common requirements for measurement of and disclosure about fair value between U.S. GAAP and International Financial Reporting Standards (IFRS). The updated guidance is effective for the Company beginning in the third quarter of fiscal year 2012. The Company is currently evaluating the impact of adoption of this accounting guidance on its consolidated financial statements.

In June 2011, the FASB updated the disclosure requirements for comprehensive income. The updated guidance requires companies to disclose the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The updated guidance does not affect how earnings per share is calculated or presented. The updated guidance is effective for the Company beginning in the third quarter of fiscal year 2012. The Company is currently evaluating the impact of adoption of this accounting guidance on its consolidated financial statements.

Market Risk

The Company's market risk includes the potential loss arising from adverse changes in foreign currency exchange rates and interest rates. The Company manages foreign currency market risk from time to time through the use of a variety of financial and derivative instruments. The Company does not enter into any of these instruments for trading purposes to generate revenue. Rather, the Company's objective in managing these risks is to reduce fluctuations in earnings and cash flows associated with changes in foreign currency exchange rates. The Company uses forward exchange contracts and other hedging activities to hedge the U.S. dollar value resulting from existing recognized foreign currency denominated asset and liability balances and also for anticipated foreign currency transactions. The Company also naturally hedges foreign currency through its production in the countries in which it sells its products. The Company's market risk on interest rates is the potential decrease in fair value of long-term debt resulting from a potential increase in interest rates. See further discussion of these market risks below and in Note E of the Notes to Consolidated Financial Statements.

Foreign Currency During Fiscal 2011, the U.S. dollar was generally weaker than Fiscal 2010 compared to many of the currencies of the foreign countries in which the Company operates. The overall weakness of the dollar had a positive impact on the Company's international net sales results because the foreign denominated revenues translated into more U.S. dollars.

It is not possible to determine the true impact of foreign currency translation changes. However, the direct effect on reported net sales and net earnings can be estimated. For the year ended July 31, 2011, the impact of foreign currency translation resulted in an overall increase in reported net sales of \$49.8 million, operating expenses of \$9.7 million and reported net earnings of \$6.1 million. Foreign currency translation had a positive impact in most regions around the world. In Europe, the weaker U.S. dollar relative to the euro and British pound resulted in a total increase of \$8.1 million in reported net sales. The weaker U.S. dollar relative to the Japanese yen, Australian dollar, Mexican peso, Chinese renminbi, South African rand, and Thai baht also had a positive impact on foreign currency translation, with an increase in reported net sales of \$15.6 million, \$8.8 million, \$5.0 million, \$4.8 million, \$4.4 million, and \$4.1 million, respectively, and an increase in reported net earnings of \$1.1 million, \$1.2 million, \$0.6 million, \$0.9 million, \$0.4 million, and \$1.0 million, respectively.

The Company maintains significant assets and operations in Europe, Asia-Pacific, South Africa, and Mexico, resulting in exposure to foreign currency gains and losses. A portion of the Company's foreign currency exposure is naturally hedged by incurring liabilities, including bank debt, denominated in the local currency in which the Company's foreign subsidiaries are located.

The foreign subsidiaries of the Company generally purchase the majority of their input costs and then sell to many of their Customers in the same local currency.

The Company may be exposed to cost increases relative to local currencies in the markets to which it sells. To mitigate such adverse trends, the Company, from time to time, enters into forward exchange contracts and other hedging activities. Additionally, foreign currency positions are partially offsetting and are netted against one another to reduce exposure.

Some products made in the United States are sold abroad. As a result, sales of such products are affected by the value of the U.S. dollar relative to other currencies. Any long-term strengthening of the U.S. dollar could depress these sales. Also, competitive conditions in the Company's markets may limit its ability to increase product pricing in the face of adverse currency movements.

Interest The Company's exposure to market risks for changes in interest rates relates primarily to its short-term investments, short-term borrowings, and interest rate swap agreements as well as the potential increase in fair value of long-term debt resulting from a potential decrease in interest rates. The Company has no earnings or cash flow exposure due to market risks on its long-term debt obligations as a result of the fixed-rate nature of the debt. However, interest rate changes would affect the fair market value of the debt. As of July 31, 2011, the estimated fair value of long-term debt with fixed interest rates was \$268.3 million compared to its carrying value of \$247.0 million. The fair value is estimated by discounting the projected cash flows using the rate that similar amounts of debt could currently be borrowed. As of July 31, 2011, the Company's financial liabilities with exposure to changes in interest rates consisted mainly

of \$13.1 million of short-term debt outstanding. Assuming a hypothetical increase of one-half percent in short-term interest rates, with all other variables remaining constant, interest expense would have increased \$0.4 million in Fiscal 2011.

Pensions The Company is exposed to market return fluctuations on its qualified defined benefit pension plans. Although the market value of these assets increased in Fiscal 2011, we adjusted our long-term rate of return from 8.0 percent to 7.75 percent on our U.S. plans and from a weighted average of 6.17 percent to 6.03 percent on our non-U.S. plans to reflect our future expectation for returns. In addition, we adjusted our discount rate used to value our pension obligation for our U.S. plans from 5.25 percent to 4.91 percent and from 5.17 percent to 5.36 percent for the non-U.S. plans. Our plans were underfunded by \$30.5 million at July 31, 2011, since the projected benefit obligation exceeded the fair value of the plan assets.

Critical Accounting Policies

The Company's consolidated financial statements are prepared in conformity with generally accepted accounting principles in the United States of America (U.S. GAAP). The preparation of these financial statements requires the use of estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented. Management bases these estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the recorded values of certain assets and liabilities. The Company believes its use of estimates and underlying accounting assumptions adheres to U.S. GAAP and is consistently applied. Valuations based on estimates and underlying accounting assumptions are reviewed for reasonableness on a consistent basis throughout the Company. Management believes the Company's critical accounting policies that require more significant judgments and estimates used in the preparation of its consolidated financial statements and that are the most important to aid in fully understanding its financial results are the following:

Revenue recognition, warranty and allowance for doubtful accounts Revenue is recognized when both product ownership and the risk of loss have transferred to the Customer and the Company has no remaining obligations. The Company records estimated discounts and rebates as a reduction of sales in the same period revenue is recognized. Accruals for warranties on products sold are recorded based on historical return percentages and specific product recall campaigns. Allowances for doubtful accounts are estimated by management based on evaluation of potential losses related to Customer receivable balances. The Company determines the allowance based on historical write-off experience in the industry, regional economic data, and evaluation of specific Customer accounts for risk of loss. The Company reviews its allowance for doubtful accounts monthly. Account balances are charged off against the allowance when the Company feels it is probable the receivable will not be recovered. The Company does not have any off-balance sheet credit exposure related to its Customers. The establishment of this reserve requires the use of judgment and assumptions regarding the potential for losses on receivable balances. Though management considers these balances adequate and proper, changes in economic conditions in specific markets in which the Company operates could have an effect on reserve balances required.

Goodwill and other intangible assets Goodwill is assessed for impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired. The Company performs impairment assessments for its reporting units and uses a discounted cash flow model based on management's judgments and assumptions to determine the estimated fair value. An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The Company performed an impairment assessment during the third quarter of Fiscal 2011 to satisfy its annual impairment requirement. The impairment assessment in the third quarter indicated that the estimated fair value of each reporting unit exceeded its corresponding carrying amount, including recorded goodwill and, as such, no impairment existed at that time. Other intangible assets with definite lives continue to be amortized over their estimated useful lives. Definite lived intangible assets are also subject to impairment assessments. A considerable amount of management judgment and assumptions are required in performing the impairment assessments, principally in determining the fair value of each reporting unit. While the Company believes its judgments and assumptions are reasonable, different assumptions could change the estimated fair values and, therefore, impairment charges could be required.

Income taxes As part of the process of preparing the Company's Consolidated Financial Statements, management is required to estimate income taxes in each of the jurisdictions in which the Company operates. This process involves estimating actual current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and book accounting purposes. These differences result in deferred tax assets and liabilities, which are included within the Company's Consolidated Balance Sheet. These assets and liabilities are evaluated by using estimates of future taxable income streams and the impact of tax planning strategies. Management assesses the likelihood that deferred tax assets will be recovered from future taxable income and to the extent management believes that recovery is not likely, a valuation allowance is established. To the extent that a valuation allowance is established or increased, an expense within the tax provision is included in the statement of operations. Reserves are also estimated for uncertain tax positions that are currently unresolved. The Company routinely monitors the potential impact of such situations and believes that it is properly reserved. Valuations related to tax accruals and assets can be impacted by changes to tax codes, changes in statutory tax rates and the Company's future taxable income levels. As of July 31, 2011, the liability for unrecognized tax benefits, accrued interest and penalties was \$21.5 million.

Employee Benefit Plans The Company incurs expenses relating to employee benefits such as non-contributory defined benefit pension plans, and postretirement health care benefits. In accounting for these employment costs, management must make a variety of assumptions and estimates including mortality rates, discount rates, overall Company compensation increases, expected return on plan assets, and health care cost trend rates. The Company considers historical data as well as current facts and circumstances and uses a third-party specialist to assist management in determining these estimates.

To develop the assumption regarding the expected long-term rate of return on assets for its U.S. pension plans, the Company considered the historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the pension portfolio. This resulted in the selection of the 7.75 percent long-term rate of return on assets assumption as of July 31, 2011 for developing the Fiscal 2012 expense for the Company's U.S. pension plans. In addition, we lowered our discount rate used to value our pension obligation for our U.S. plans from 5.25 percent to 4.91 percent. The expected long-term rate of return on assets assumption for the plans outside the U.S. reflects the investment allocation and expected total portfolio returns specific to each plan and country.

Reflecting the relatively long-term nature of the plans' obligations, approximately 45 percent of the plans assets are invested in equity securities, 30 percent in alternative investments (funds of hedge funds), 10 percent in real assets (investments into funds containing commodities and real estate), 10 percent in fixed income, and 5 percent in private equity. Within equity securities, the Company targets an allocation of 15 percent international, 15 percent equity long / short, 10 percent small cap, and 5 percent large cap.

A one percent change in the expected long-term rate of return on U.S. plan assets, from 8.0 percent, would have changed the Fiscal 2011 annual pension expense by approximately \$2.7 million. The expected long-term rate of return on assets assumption for the plans outside the U.S. follows the same methodology as described above but reflects the investment allocation and expected total portfolio returns specific to each plan and country.

The Company's objective in selecting a discount rate for its pension plans is to select the best estimate of the rate at which the benefit obligations could be effectively settled on the measurement date, taking into account the nature and duration of the benefit obligations of the plan. In making this best estimate, the Company looks at rates of return on high-quality fixed-income investments currently available and expected to be available during the period to maturity of the benefits. This process includes assessing the universe of bonds available on the measurement date with a quality rating of Aa or better. Similar appropriate benchmarks are used to determine the discount rate for the non-U.S. plans. As of the measurement date of July 31, 2011, the Company decreased its discount rate for the U.S. pension plans to 4.91 percent from 5.25 percent as of July 31, 2010. The decrease of 34 basis points is consistent with published bond indices. The change increased the Company's U.S. projected benefit obligation as of July 31, 2011 by approximately \$7.2 million and is expected to increase pension expense in fiscal year 2012 by approximately \$0.5 million. The rates discussed above are weighted average rates as we have multiple plans both in the U.S. and internationally.

Safe Harbor Statement under the Securities Reform Act of 1995

The Company, through its management, may make forward-looking statements reflecting the Company's current views with respect to future events and financial performance. These forward-looking statements, which may be included in reports filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), in press releases and in other documents and materials as well as in written or oral statements made by or on behalf of the Company, are subject to certain risks and uncertainties, including those discussed in Item 1A of this Form 10-K, which could cause actual results to differ materially from historical results or those anticipated. The words or phrases "will likely result," "are expected to," "will continue," "estimate," "project," "believe," "expect," "anticipate," "forecast," and similar expressions are intended to identify forward-looking statements within the meaning of Section 21e of the Exchange Act and Section 27A of the Securities Act of 1933, as amended, as enacted by the Private Securities Litigation Reform Act of 1995 ("PSLRA"). In particular the Company desires to take advantage of the protections of the PSLRA in connection with the forward-looking statements made in this Annual Report on Form 10-K, including those contained in the "Outlook" section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date such statements are made. In addition, the Company wishes to advise readers that the factors listed in Item 1A of this Form 10-K, as well as other factors, could affect the Company's performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed. These factors include, but are not limited to risks associated with: world economic factors and the ongoing economic uncertainty, the reduced demand for hard disk drive products with the increased use of flash memory, the potential for some Customers to increase their reliance on their own filtration capabilities, currency fluctuations, commodity prices, political factors, the Company's international operations, highly competitive markets, environmental laws and regulations, including regulatory approvals for Retrofit Emission Products, governmental laws and regulations, including the impact of the various economic stimulus and financial reform measures being implemented, the implementation of our new information technology systems, potential global events resulting in market instability including financial bailouts of sovereign nations, political changes, military and terrorist activities, health outbreaks, and other factors included in Item 1A of this Report on Form 10-K. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risk disclosure appears in Management's Discussion and Analysis on page 21 under "Market Risk."

Item 8. Financial Statements and Supplementary Data

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on this evaluation, management concluded that the Company’s internal control over financial reporting was effective as of July 31, 2011. The Company’s independent registered public accounting firm, PricewaterhouseCoopers LLP, has audited the effectiveness of the Company’s internal control over financial reporting as of July 31, 2011, as stated in this report which follows in Item 8 of this Form 10-K.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of Donaldson Company, Inc.

In our opinion, the accompanying consolidated balance sheets and the related statements of earnings, shareholders' equity and cash flows present fairly, in all material respects, the financial position of Donaldson Company, Inc. and its subsidiaries at July 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended July 31, 2011, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion the financial statement schedule appearing under item 15(II) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of July 31, 2011, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Donaldson Company, Inc. and Subsidiaries

NOTE A

Summary of Significant Accounting Policies

Description of Business Donaldson Company, Inc. (“Donaldson” or the “Company”), is a worldwide manufacturer of filtration systems and replacement parts. The Company’s product mix includes air and liquid filtration systems and exhaust and emission control products. Products are manufactured at 39 plants around the world and through three joint ventures. Products are sold to original equipment manufacturers (“OEMs”), distributors, dealers, and directly to end-users.

Principles of Consolidation The Consolidated Financial Statements include the accounts of Donaldson Company, Inc. and all majority-owned subsidiaries. All intercompany accounts and transactions have been eliminated. The Company’s three joint ventures that are not majority-owned are accounted for under the equity method. The Company does not have any variable interests in variable interest entities as of July 31, 2011. The Company uses a fiscal period which ends on a calendar basis for international affiliates and on the Friday nearest to July 31 for U.S. purposes.

Use of Estimates The preparation of Financial Statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Foreign Currency Translation For foreign operations, local currencies are considered the functional currency. Assets and liabilities are translated to U.S. dollars at year-end exchange rates and the resulting gains and losses arising from the translation of net assets located outside the United States are recorded as a cumulative translation adjustment, a component of Accumulated other comprehensive income (loss) in the Consolidated Balance Sheets. Elements of the Consolidated Statements of Earnings are translated at average exchange rates in effect during the year. Realized and unrealized foreign currency transaction gains and losses are included in Other income, net in the Consolidated Statements of Earnings. Foreign currency transaction losses of \$4.5 million, \$4.6 million, and \$0.2 million are included in Other income, net in the Consolidated Statements of Earnings in Fiscal 2011, 2010, and 2009, respectively.

Cash Equivalents The Company considers all highly liquid temporary investments with a maturity of three months or less when purchased to be cash equivalents. Cash equivalents are carried at cost that approximates market value.

Short-Term Investments Classification of the Company’s investments as current or non-current is dependent upon management’s intended holding period, the investment’s maturity date and liquidity considerations based on market conditions. If management intends to hold the investments for longer than one year as of the balance sheet date, they are classified as non-current. The Company does not have any short-term investments as of July 31, 2011.

Accounts Receivable and Allowance for Doubtful Accounts Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company’s best estimate of the amount of probable credit losses in its existing accounts receivable. The Company determines the allowance based on historical write-off experience in the industry, regional economic data, and evaluation of specific Customer accounts for risk of loss. The Company reviews its allowance for doubtful accounts monthly. Past due balances over 90 days and over a specified amount are reviewed individually for collectability. All other balances are reviewed on a pooled basis by type of receivable. Account balances are charged off against the allowance when the Company feels it is probable the receivable will not be recovered. The Company does not have any off-balance-sheet credit exposure related to its Customers.

Inventories Inventories are stated at the lower of cost or market. U.S. inventories are valued using the last-in, first-out (“LIFO”) method, while the international subsidiaries use the first-in, first-out (“FIFO”) method. Inventories valued at LIFO were approximately 33 percent and 31 percent of total inventories at July 31, 2011 and 2010, respectively. For inventories valued under the LIFO method, the FIFO cost exceeded the LIFO carrying values by \$37.1 million and \$32.7 million at July 31, 2011 and 2010, respectively. Results of operations for all periods presented were not materially

affected by the liquidation of LIFO inventory. As of July 31, 2011 and 2010, the Company had obsolete inventory reserves of \$14.5 million and \$14.9 million, respectively. The components of inventory are as follows (thousands of dollars):

	<u>July 31, 2011</u>	<u>July 31, 2010</u>
Materials	\$110,466	\$79,371
Work in process	33,917	23,163
Finished products	127,093	101,097
Total inventories	<u>\$271,476</u>	<u>\$203,631</u>

Property, Plant and Equipment Property, plant and equipment are stated at cost. Additions, improvements, or major renewals are capitalized, while expenditures that do not enhance or extend the asset's useful life are charged to operating expense as incurred. Depreciation is computed under the straight-line method. Depreciation expense was \$54.5 million in Fiscal 2011, \$53.2 million in Fiscal 2010, and \$52.9 million in Fiscal 2009. The estimated useful lives of property, plant, and equipment are 10 to 40 years for buildings, including building improvements, and 3 to 10 years for machinery and equipment. The components of property, plant, and equipment are as follows (thousands of dollars):

	<u>July 31, 2011</u>	<u>July 31, 2010</u>
Land	\$ 22,578	\$ 21,771
Buildings	266,482	240,787
Machinery and equipment	625,439	587,977
Construction in progress	31,375	26,223
Less accumulated depreciation	<u>(554,372)</u>	<u>(510,866)</u>
Total property, plant and equipment, net	<u>\$ 391,502</u>	<u>\$ 365,892</u>

Internal-Use Software The Company capitalizes direct costs of materials and services used in the development and purchase of internal-use software. Amounts capitalized are amortized on a straight-line basis over a period of five years and are reported as a component of machinery and equipment within property, plant, and equipment.

Goodwill and Other Intangible Assets Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations under the purchase method of accounting. Other intangible assets, consisting primarily of patents, trademarks, Customer relationships and lists, are recorded at cost and are amortized on a straight-line basis over their estimated useful lives of 3 to 20 years. Goodwill is assessed for impairment annually or if an event occurs or circumstances change that would indicate the carrying amount may be impaired. The impairment assessment for goodwill is done at a reporting unit level. Reporting units are one level below the business segment level, but can be combined when reporting units within the same segment have similar economic characteristics. An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The Company completed its annual impairment assessment in the third quarters of Fiscal 2011 and 2010, which indicated no impairment.

Recoverability of Long-Lived Assets The Company reviews its long-lived assets, including identifiable intangibles, for impairment when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the assets, the carrying value is reduced.

Income Taxes The provision for income taxes is computed based on the pretax income included in the Consolidated Statements of Earnings. Deferred tax assets and liabilities are recognized for the expected future tax consequences attributed to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse.

Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized.

Comprehensive Income (Loss) Comprehensive income (loss) consists of net income, foreign currency translation adjustments, net changes in the funded status of pension retirement obligations, and net gain or loss on cash flow hedging derivatives, and is presented in the Consolidated Statements of Changes in Shareholders' Equity. The components of the ending balances of Accumulated other comprehensive income (loss) are as follows (thousands of dollars):

	<u>July 31, 2011</u>	<u>July 31, 2010</u>	<u>July 31, 2009</u>
Foreign currency translation adjustment	\$131,699	\$59,194	\$75,155
Net gain (loss) on cash flow hedging derivatives, net of deferred taxes	380	(462)	(394)
Pension liability adjustment, net of deferred taxes	<u>(92,052)</u>	<u>(99,218)</u>	<u>(84,438)</u>
Total accumulated other comprehensive income (loss).	<u>\$40,027</u>	<u>\$(40,486)</u>	<u>\$(9,677)</u>

Cumulative foreign translation is not adjusted for income taxes.

Earnings Per Share The Company's basic net earnings per share are computed by dividing net earnings by the weighted average number of outstanding common shares. The Company's diluted net earnings per share is computed by dividing net earnings by the weighted average number of outstanding common shares and common equivalent shares relating to stock options and stock incentive plans. Certain outstanding options were excluded from the diluted net earnings per share calculations because their exercise prices were greater than the average market price of the Company's common stock during those periods. There were 494,349 options, 845,827 options, and 1,158,451 options excluded from the diluted net earnings per share calculation for the fiscal year ended July 31, 2011, 2010, and 2009, respectively.

The following table presents information necessary to calculate basic and diluted earnings per share:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
	(thousands of dollars, except per share amounts)		
Weighted average shares — basic	77,196	77,849	77,967
Diluted share equivalents	<u>1,402</u>	<u>1,329</u>	<u>1,233</u>
Weighted average shares — diluted	<u>78,598</u>	<u>79,178</u>	<u>79,200</u>
Net earnings for basic and diluted earnings per share computation	\$225,291	\$166,163	\$131,907
Net earnings per share — basic	\$ 2.92	\$ 2.13	\$ 1.69
Net earnings per share — diluted	\$ 2.87	\$ 2.10	\$ 1.67

Treasury Stock Repurchased common stock is stated at cost and is presented as a separate reduction of shareholders' equity.

Research and Development Research and development costs are charged against earnings in the year incurred. Research and development expenses include basic scientific research and the application of scientific advances to the development of new and improved products and their uses.

Stock-Based Compensation The Company offers stock-based employee compensation plans, which are more fully described in Note I. Stock-based employee compensation cost is recognized using the fair-value based method.

Revenue Recognition Revenue is recognized when both product ownership and the risk of loss have transferred to the Customer and the Company has no remaining obligations. The Company records estimated discounts and rebates as a reduction of sales in the same period revenue is recognized. Shipping and handling costs for Fiscal 2011, 2010, and 2009 totaling \$61.9 million, \$49.8 million, and \$50.4 million, respectively, are classified as a component of operating expenses.

Product Warranties The Company provides for estimated warranty costs at the time of sale and accrues for specific items at the time their existence is known and the amounts are determinable. The Company estimates warranty costs using standard quantitative measures based on historical warranty claim experience and evaluation of specific Customer warranty issues. For a warranty reserve reconciliation see Note M.

Derivative Instruments and Hedging Activities The Company recognizes all derivatives on the balance sheet at fair value. Derivatives that are not hedges are adjusted to fair value through income. If the derivative is a hedge, depending on the nature of the hedge, changes in the fair value of derivatives are either offset against the change in fair value of the hedged assets, liabilities or firm commitments through earnings or recognized in shareholders' equity through other comprehensive income until the hedged item is recognized. Gains or losses related to the ineffective portion of any hedge are recognized through earnings in the current period.

Exit or Disposal Activities The Company accounts for costs relating to exit or disposal activities based on FASB guidance related to exit or disposal cost obligations. This guidance addresses recognition, measurement, and reporting of costs associated with exit and disposal activities including restructuring. See Note O for disclosures related to restructuring.

Guarantees Upon issuance of a guarantee, the Company recognizes a liability for the fair value of an obligation assumed under a guarantee. See Note L for disclosures related to guarantees.

New Accounting Standards In December 2010, the FASB updated the accounting guidance relating to the annual goodwill impairment test. The updated guidance requires companies to perform the second step of the impairment test to measure the amount of impairment loss, if any, when it is more likely than not that goodwill impairment exists when the carrying amount of a reporting unit is zero or negative. In considering whether it is more likely than not that goodwill impairment exists, an entity shall evaluate whether there are adverse qualitative factors. The updated guidance is effective for the Company beginning in the first quarter of fiscal year 2012. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

In May 2011, the FASB updated the accounting guidance related to fair value measurements. The updated guidance results in a consistent definition of fair value and common requirements for measurement of and disclosure about fair value between U.S. GAAP and International Financial Reporting Standards (IFRS). The updated guidance is effective for the Company beginning in the third quarter of fiscal year 2012. The Company is currently evaluating the impact of adoption of this accounting guidance on its consolidated financial statements.

In June 2011, the FASB updated the disclosure requirements for comprehensive income. The updated guidance requires companies to disclose the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The updated guidance does not affect how earnings per share is calculated or presented. The updated guidance is effective for the Company beginning in the third quarter of fiscal year 2012. The Company is currently evaluating the impact of adoption of this accounting guidance on its consolidated financial statements.

NOTE B

Goodwill and Other Intangible Assets

The Company has allocated goodwill to its Industrial Products and Engine Products segments. As of August 1, 2010, as a result of an internal reorganization, the Company transferred Industrial Hydraulics, a component of its Industrial Filtration Solutions Products within the Industrial Products segment to Aftermarket Products within the Engine Products segment, along with the goodwill associated with this component. Disposition of goodwill during Fiscal 2011 relates to the sale of the Company's Ultracool chiller business, based in Terrassa, Spain, for \$3.6 million, which resulted in a gain on sale of \$0.4 million in the second quarter. The Ultracool chiller business manufactured industrial circulation chillers and was part of the Company's Industrial Products segment. There was no acquisition or disposition activity during Fiscal 2010. The Company completed its annual impairment assessments in the third quarters of Fiscal 2011 and 2010. The results of this assessment showed that the fair values of the reporting units to which goodwill is assigned continue to exceed the book values of the respective reporting units, resulting in no goodwill impairment.

Following is a reconciliation of goodwill for the years ended July 31, 2011 and 2010:

	Engine Products	Industrial Products	Total Goodwill
(thousands of dollars)			
Balance as of July 31, 2009.	\$61,582	\$107,445	\$169,027
Foreign exchange translation	(668)	(3,044)	(3,712)
Balance as of July 31, 2010.	<u>\$60,914</u>	<u>\$104,401</u>	<u>\$165,315</u>
Goodwill transferred	11,258	(11,258)	—
Disposition activity.	—	(325)	(325)
Foreign exchange translation	794	5,957	6,751
Balance as of July 31, 2011.	<u>\$72,966</u>	<u>\$98,775</u>	<u>\$171,741</u>

Intangible assets are comprised of patents, trademarks, and Customer relationships and lists. Following is a reconciliation of intangible assets for the years ended July 31, 2011 and 2010:

	Gross Carrying Amount	Accumulated Amortization	Net Intangible Assets
(thousands of dollars)			
Balance as of July 31, 2009.	\$85,809	\$(20,423)	\$65,386
Amortization expense	—	(6,007)	(6,007)
Foreign exchange translation	(2,322)	1,235	(1,087)
Balance as of July 31, 2010.	<u>\$83,487</u>	<u>\$(25,195)</u>	<u>\$58,292</u>
Amortization expense	—	(5,917)	(5,917)
Foreign exchange translation	1,952	(831)	1,121
Balance as of July 31, 2011.	<u>\$85,439</u>	<u>\$(31,943)</u>	<u>\$53,496</u>

Net intangible assets consist of patents, trademarks and trade names of \$20.0 million and \$20.5 million as of July 31, 2011 and 2010, respectively, and Customer related intangibles of \$33.5 million and \$37.8 million as of July 31, 2011 and 2010, respectively. Expected amortization expense relating to existing intangible assets is as follows (in thousands):

<u>Fiscal Year</u>	
2012	\$5,863
2013	\$5,700
2014	\$5,327
2015	\$5,221
2016	\$5,206

NOTE C
Credit Facilities

The Company has a five-year, multi-currency revolving facility with a group of banks under which the Company may borrow up to \$250 million. This facility matures on April 2, 2013. The agreement provides that loans may be made under a selection of currencies and rate formulas including Base Rate Advances or Off Shore Rate Advances. The interest rate on each advance is based on certain market interest rates and leverage ratios. Facility fees and other fees on the entire loan commitment are payable over the duration of this facility. There was nothing outstanding at July 31, 2011, and \$50.0 million outstanding at July 31, 2010. At July 31, 2011 and 2010, \$238.6 million and \$180.0 million, respectively, were available for further borrowing under such facilities. The amount available for further borrowing reflects a reduction for issued standby letters of credit, as discussed below. The weighted average interest rate on these short-term borrowings outstanding at July 31, 2010 was 0.6 percent. Our multi-currency revolving facility contains debt covenants specifically related to maintaining a certain interest coverage ratio and a certain leverage ratio as well as other covenants that under certain circumstances can restrict our ability to incur additional indebtedness, make investments and other restricted payments, create liens, and sell assets. As of July 31, 2011, the Company was in compliance with all such covenants.

Certain note agreements contain debt covenants related to working capital levels and limitations on indebtedness. As of July 31, 2011, the Company was in compliance with all such covenants. The Company currently expects to remain in compliance with these covenants.

The Company has three uncommitted credit facilities in the United States, which provide unsecured borrowings for general corporate purposes. At July 31, 2011 and 2010, there was \$56.9 million and \$70.0 million available for use. There was \$13.1 million outstanding at July 31, 2011 and nothing outstanding at July 31, 2010. The weighted average interest rate on these short-term borrowings outstanding at July 31, 2011 was 0.9 percent.

The Company has a €100 million program for issuing treasury notes for raising short, medium, and long-term financing for its European operations. There was nothing outstanding on this program at July 31, 2011 or 2010. Additionally, the Company's European operations have lines of credit with an available limit of €45.6 million. There was nothing outstanding on these lines of credit as of July 31, 2011 or 2010.

Other international subsidiaries may borrow under various credit facilities. There was nothing outstanding under these credit facilities as of July 31, 2011 or 2010.

As discussed further in Note L, at July 31, 2011 and 2010, the Company had outstanding standby letters of credit totaling \$11.4 million, upon which no amounts had been drawn. The letters of credit guarantee payment to third parties in the event the Company is in breach of specified bond financing agreement and insurance contract terms as detailed in each letter of credit.

NOTE D
Long-Term Debt

Long-term debt consists of the following:

	<u>2011</u>	<u>2010</u>
	<u>(thousands of dollars)</u>	
6.39% Unsecured senior notes due August 15, 2010, interest payable semi-annually. This note was repaid on August 16, 2010.	\$ —	\$ 4,999
4.85% Unsecured senior notes, interest payable semi-annually, principal payment of \$30.0 million due December 17, 2011	30,000	30,000
6.59% Unsecured senior notes, interest payable semi-annually, principal payment of \$80.0 million due November 14, 2013	80,000	80,000
5.48% Unsecured senior notes, interest payable semi-annually, principal payment of \$50.0 million due June 1, 2017.	50,000	50,000
5.48% Unsecured senior notes, interest payable semi-annually, principal payment of \$25.0 million due September 28, 2017	25,000	25,000
5.48% Unsecured senior notes, interest payable semi-annually, principal payment of \$25.0 million due November 30, 2017	25,000	25,000
1.418% Guaranteed senior notes, interest payable semi-annually, principal payment of ¥1.2 billion due January 31, 2012.	15,595	13,884
2.019% Guaranteed senior note, interest payable semi-annually, principal payment of ¥1.65 billion due May 18, 2014.	21,442	19,091
Variable Rate Industrial Development Revenue Bonds ("Low Floaters") interest payable monthly, principal payment of \$7.755 million due September 1, 2024, interest rate of 0.40% as of April 25, 2011. These bonds were repaid on April 25, 2011.	—	7,755
Capitalized lease obligations and other, with various maturity dates and interest rates	796	890
Terminated interest rate swap contracts	5,786	5,109
Total.	<u>253,619</u>	<u>261,728</u>
Less current maturities	<u>47,871</u>	<u>5,536</u>
Total long-term debt	<u>\$205,748</u>	<u>\$256,192</u>

Annual maturities of long-term debt are \$46.0 million in 2012, \$0.3 million in 2013, \$101.5 million in 2014, and \$100.0 million thereafter. There are no maturities in 2015 or 2016. As of July 31, 2011, the estimated fair value of long-term debt with fixed interest rates was \$268.3 million compared to its carrying value of \$247.0 million. On April 25, 2011, the Company paid off its Variable Rate Industrial Development Revenue Bond for \$7.8 million.

Certain note agreements contain debt covenants related to working capital levels and limitations on indebtedness. As of July 31, 2011, the Company was in compliance with all such covenants. The Company currently expects to remain in compliance with these covenants.

NOTE E
Financial Instruments

Derivatives The Company uses forward exchange contracts to manage its exposure to fluctuations in foreign exchange rates. The Company also uses interest rate swaps to manage its exposure to changes in the fair value of its fixed-rate debt resulting from interest rate fluctuations. It is the Company's policy to enter into derivative transactions only to the extent true exposures exist; the Company does not enter into derivative transactions for speculative or trading purposes. The Company enters into derivative transactions only with counterparties with high credit ratings. These transactions may expose the Company to credit risk to the extent that the instruments have a positive fair value, but the Company has not experienced any material losses, nor does the Company anticipate any material losses.

The Company enters into forward exchange contracts of generally less than one year to hedge forecasted transactions between its subsidiaries and to reduce potential exposure related to fluctuations in foreign exchange rates for existing recognized assets and liabilities. It also utilizes forward exchange contracts for anticipated intercompany and third-party transactions such as purchases, sales, and dividend payments denominated in local currencies. Forward exchange contracts are designated as cash flow hedges as they are designed to hedge the variability of cash flows associated with the underlying existing recognized or anticipated transactions. Changes in the value of derivatives designated as cash flow hedges are recorded in other comprehensive income (loss) in shareholders' equity until earnings are affected by the variability of the underlying cash flows. At that time, the applicable amount of gain or loss from the derivative instrument that is deferred in shareholders' equity is reclassified to earnings. The Company expects to record \$0.2 million of net deferred gains from these forward exchange contracts during the next twelve months. Effectiveness is measured using spot rates to value both the hedge contract and the hedged item. The excluded forward points, as well as any ineffective portions of hedges, are recorded in earnings through the same line as the underlying transaction. During Fiscal 2011, 2010, and 2009, \$1.1 million, \$0.2 million, and \$0.4 million of losses were recorded due to the exclusion of forward points from the assessment of hedge effectiveness.

The impact on Accumulated other comprehensive income (loss) (OCI) and earnings from foreign exchange contracts that qualified as cash flow hedges for the twelve months ended July 31, 2011 and 2010, was as follows (thousands of dollars):

	<u>July 31, 2011</u>	<u>July 31, 2010</u>
Net carrying amount at beginning of year	\$ (660)	\$ (650)
Cash flow hedges deferred in OCI	(782)	(3,789)
Cash flow hedges reclassified to income (effective portion)	1,963	3,788
Change in deferred taxes	(280)	(9)
Net carrying amount at July 31	<u>\$ 241</u>	<u>\$ (660)</u>

Fair Value of Financial Instruments At July 31, 2011 and 2010, the Company's financial instruments included cash and cash equivalents, accounts receivable, accounts payable, short-term borrowings, long-term debt, and derivative contracts. The fair values of cash and cash equivalents, accounts receivable, accounts payable, and short-term borrowings approximated carrying values because of the short-term nature of these instruments. Derivative contracts are reported at their fair values based on third-party quotes. As of July 31, 2011, the estimated fair value of long-term debt with fixed interest rates was \$268.3 million compared to its carrying value of \$247.0 million. The fair value is estimated by discounting the projected cash flows using the rate that similar amounts of debt could currently be borrowed.

Credit Risk The Company is exposed to credit loss in the event of nonperformance by counterparties in interest rate swaps and foreign exchange forward contracts. Collateral is generally not required of the counterparties or of the Company. In the unlikely event a counterparty fails to meet the contractual terms of an interest rate swap or foreign exchange forward contract, the Company's risk is limited to the fair value of the instrument. The Company had no interest rate swaps outstanding at July 31, 2011. There was one interest rate swap outstanding at July 31, 2010, which was subsequently terminated August 17, 2010. The Company actively monitors its exposure to credit risk through the use of credit approvals and credit limits, and by selecting major international banks and financial institutions as counterparties. The Company has not had any historical instances of non-performance by any counterparties, nor does it anticipate any future instances of non-performance.

NOTE F
Fair Value

The following summarizes the Company's fair value of outstanding derivatives at July 31, 2011, and 2010, on the Consolidated Balance Sheets (thousands of dollars):

	<u>July 31,</u> <u>2011</u>	<u>July 31,</u> <u>2010</u>
Asset derivatives recorded under the caption Prepaids and other current assets Foreign exchange contracts	\$ 945	\$ 807
Asset derivatives recorded under the caption Other assets Interest rate swap asset	\$ —	\$4,590
Liability derivatives recorded under the caption Other current liabilities Foreign exchange contracts	\$1,470	\$2,127

The Company's derivative financial instruments present certain market and counterparty risks; however, concentration of counterparty risk is mitigated as the Company deals with a variety of major banks worldwide. In addition, only conventional derivative financial instruments are utilized. The Company would not be materially impacted if any of the counterparties to the derivative financial instruments outstanding at July 31, 2011, failed to perform according to the terms of its agreement. At this time, the Company does not require collateral or any other form of securitization to be furnished by the counterparties to its derivative instruments.

The fair values of the Company's financial assets and financial liabilities listed below reflect the amounts that would be received to sell the assets or paid to transfer the liabilities in an orderly transaction between market participants at the measurement date (exit price). The fair values are based on inputs other than quoted prices that are observable for the asset or liability. These inputs include foreign currency exchange rates and interest rates. The financial assets and financial liabilities are primarily valued using standard calculations and models that use as their basis readily observable market parameters. Industry standard data providers are the primary source for forward and spot rate information for both interest rates and currency rates.

	<u>Significant Other Observable Inputs</u> <u>(Level 2)*</u>	
	<u>At July 31,</u>	
	<u>2011</u>	<u>2010</u>
Forward exchange contracts – net liability position	\$(525)	\$(1,320)
Interest rate swaps – net asset position	—	4,590

* Inputs to the valuation methodology of level 2 assets include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

NOTE G
Employee Benefit Plans

Pension Plans The Company and certain of its international subsidiaries have defined benefit pension plans for many of their hourly and salaried employees. There are two types of U.S. plans. The first type of U.S. plan is a traditional defined benefit pension plan primarily for production employees. The second is a plan for salaried workers that provides defined benefits pursuant to a cash balance feature whereby a participant accumulates a benefit comprised of a percentage of current salary that varies with years of service, interest credits and transition credits. The international plans generally provide pension benefits based on years of service and compensation level.

Net periodic pension costs for the Company's pension plans include the following components:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
	(thousands of dollars)		
Net periodic cost:			
Service cost	\$ 16,148	\$ 13,184	\$ 15,385
Interest cost	19,440	19,445	18,481
Expected return on assets	(27,538)	(28,390)	(29,143)
Transition amount amortization	225	226	193
Prior service cost amortization	449	293	438
Actuarial loss amortization	3,962	2,864	1,088
Curtailement loss	—	—	910
Net periodic benefit cost	<u>\$ 12,686</u>	<u>\$ 7,622</u>	<u>\$ 7,352</u>

During Fiscal 2009, negotiations with one of our unions resulted in a freeze in pension benefits at one of our U.S. plants. In exchange for the freezing of the plan, participants were made eligible for a Company match in a defined contribution plan. The freeze in the plan resulted in a curtailment loss of \$0.9 million during Fiscal 2009.

The obligations and funded status of the Company's pension plans as of 2011 and 2010, is as follows:

	<u>2011</u>	<u>2010</u>
	(thousands of dollars)	
Change in benefit obligation:		
Benefit obligation, beginning of year	\$ 377,903	\$338,154
Service cost	16,148	13,183
Interest cost	19,440	19,445
Plan amendments	1,639	—
Participant contributions	1,058	1,043
Actuarial loss	1,034	31,918
Currency exchange rates	6,936	(6,531)
Benefits paid	(20,146)	(19,309)
Benefit obligation, end of year	<u>\$404,012</u>	<u>\$ 377,903</u>
Change in plan assets:		
Fair value of plan assets, beginning of year	\$319,734	\$ 297,479
Actual return on plan assets	38,758	31,013
Company contributions	27,655	15,064
Participant contributions	1,058	1,043
Currency exchange rates	6,496	(5,556)
Benefits paid	(20,146)	(19,309)
Fair value of plan assets, end of year	<u>\$373,555</u>	<u>\$319,734</u>
Funded status:		
Underfunded status at July 31, 2011 and 2010	<u>\$ (30,457)</u>	<u>\$ (58,169)</u>

The net underfunded status of \$30.5 million at July 31, 2011 is recognized in the accompanying Consolidated Balance Sheet as \$6.4 million within Other assets for the Company's over-funded plans and \$36.9 million within Other long-term liabilities for the Company's underfunded plans. Included in Accumulated other comprehensive loss at July 31, 2011 are the following amounts that have not yet been recognized in net periodic pension expense: unrecognized actuarial losses of \$134.7 million, unrecognized prior service cost of \$5.1 million, and unrecognized transition obligations of \$3.0 million. The actuarial loss, prior service cost and unrecognized transition obligation are included in Accumulated other comprehensive loss, net of tax. The amounts expected to be recognized in net periodic pension expense during Fiscal 2012 are \$5.8 million, \$0.5 million, and \$0.2 million, respectively. The accumulated benefit obligation for all defined benefit pension plans was \$365.2 million and \$332.4 million at July 31, 2011 and 2010, respectively.

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for pension plans with accumulated benefit obligations in excess of plan assets were \$294.2 million, \$282.3 million, and \$262.4 million, respectively, as of July 31, 2011, and \$282.7 million, \$266.0 million, and \$230.3 million, respectively, as of July 31, 2010.

For the years ended July 31, 2011 and 2010 the U.S. pension plans represented approximately 71 percent and 73 percent, respectively, of the Company's total plan assets, and approximately 72 percent and 74 percent, respectively, of the Company's total projected benefit obligation.

The weighted-average discount rates and rates of increase in future compensation levels used in determining the actuarial present value of the projected benefit obligation are as follows:

<u>Weighted average actuarial assumptions</u>	<u>2011</u>	<u>2010</u>
All U.S. plans:		
Discount rate	4.91%	5.25%
Rate of compensation increase	4.50%	5.00%
Non - U.S. plans:		
Discount rate	5.36%	5.17%
Rate of compensation increase	3.57%	3.69%

The weighted-average discount rates, expected returns on plan assets and rates of increase in future compensation levels used to determine the net periodic benefit cost are as follows:

<u>Weighted average actuarial assumptions</u>	<u>2011</u>	<u>2010</u>	<u>2009</u>
All U.S. plans:			
Discount rate	5.25%	6.00%	6.00%
Expected return on plan assets	8.00%	8.50%	8.50%
Rate of compensation increase	5.00%	5.00%	5.00%
Non - U.S. plans:			
Discount rate	5.17%	5.90%	6.30%
Expected return on plan assets	6.17%	6.64%	7.14%
Rate of compensation increase	3.69%	3.87%	4.48%

Expected Long-Term Rate of Return To develop the expected long-term rate of return on assets assumption, the Company considered the historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the pension portfolio. As of our measurement date of July 31, 2011, the Company decreased its long-term rate of return for the U.S. pension plans to 7.75 percent from 8.0 percent as of July 31, 2010. The Company believes that based on the asset mix and the target asset allocation, the 7.75 percent rate is an appropriate rate. This is slightly below the Company's twenty year average but above the five and ten year averages. Thus, the Company will use the 7.75 percent rate for the calculation of its Fiscal 2012 net periodic cost. The expected long-term rate of return on assets assumption for the plans outside the U.S. reflects the investment allocation and expected total portfolio returns specific to each plan and country. The expected long-term rate of return on assets shown in the pension benefit disclosure for non-U.S. plans is an asset-based weighted average of all non-U.S. plans.

Discount Rate The Company's objective in selecting a discount rate is to select the best estimate of the rate at which the benefit obligations could be effectively settled on the measurement date, taking into account the nature and duration of the benefit obligations of the plan. In making this best estimate, the Company looks at rates of return on high-quality fixed-income investments currently available, and expected

to be available, during the period to maturity of the benefits. This process includes looking at the universe of bonds available on the measurement date with a quality rating of Aa or better. Similar appropriate benchmarks are used to determine the discount rate for the non-U.S. plans. The discount rate disclosed in the assumptions used to determine net periodic benefit cost and to determine benefit obligations is based upon a weighted average, using year-end projected benefit obligations.

Plan Assets The fair values of the assets held by the U.S. pension plans by asset category are as follows (in millions):

<u>Asset Category</u>	<u>Quoted Prices in Active Markets for Identical Assets (Level 1)</u>	<u>Significant Observable Inputs (Level 2)</u>	<u>Significant Unobservable Inputs (Level 3)</u>	<u>Total</u>
2011				
Cash	\$ 0.3	\$ —	\$ —	\$ 0.3
Global Equity Securities	64.8	56.2	0.3	121.3
Fixed Income Securities	36.6	—	—	36.6
Private Equity	—	—	17.6	17.6
Absolute Return	—	20.1	31.4	51.5
Real Assets	—	—	38.0	38.0
Total U.S. Assets at July 31, 2011	<u>\$101.7</u>	<u>\$76.3</u>	<u>\$ 87.3</u>	<u>\$265.3</u>
2010				
Cash	\$ 0.9	\$ —	\$ —	\$ 0.9
Global Equity Securities	48.7	50.2	2.4	101.3
Fixed Income Securities	17.1	—	—	17.1
Private Equity	—	—	14.8	14.8
Absolute Return	—	39.4	33.1	72.5
Real Assets	—	9.6	16.3	25.9
Total U.S. Assets at July 31, 2010	<u>\$ 66.7</u>	<u>\$99.2</u>	<u>\$66.6</u>	<u>\$232.5</u>

The 2010 information in the above table contains adjustments to the classifications within the fair value hierarchy from that reported in the prior year.

Global equity consists of publicly traded U.S. and non-U.S. equities, Australasia, Far East (EAFE) index funds, equity private placement funds, and some cash and cash equivalents. Publicly traded equities are valued at the closing price reported in the active market in which the individual securities are traded. Index funds are valued at the net asset value (NAV) as determined by the custodian of the fund. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities then divided by the number of units outstanding.

Fixed income consists primarily of investment grade debt securities, but may include up to 10% in high yield securities rated B or higher by Moody's or S&P. It may also include up to 20% in securities denominated in foreign currencies. Corporate and other bonds and notes are valued at either the yields currently available on comparable securities of issuers with similar credit ratings or valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable such as credit and liquidity risks.

Private equity consists of interests in partnerships that invest in U.S. and non-U.S. debt and equity securities. The portfolio is a diversified mix of partnership interests including buyouts, distressed debt, growth equity, mezzanine, real estate, and venture capital investments. Partnership interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flow.

Absolute return consists primarily of private partnership interests in hedge funds of funds. Partnership interests are valued using the NAV as determined by the administrator or custodian of the fund.

Real Assets consist of commodity funds, Real Estate Investment Trusts (REITS), and interests in partnerships that invest in private real estate, commodity, and timber investments. Private investments are valued using the most recent partnership statement of fair value, updated for any subsequent partnership interests' cash flows. Commodity funds and REITS are valued at the closing price reported in the active market in which they are traded.

The following table sets forth a summary of changes in the fair values of the U.S. pension plans' Level 3 assets for the years ended July 31, 2011 and 2010 (in millions):

	<u>Global Equity</u>	<u>Private Equity</u>	<u>Absolute Return</u>	<u>Real Assets</u>	<u>Total</u>
Beginning balance at August 1, 2009	\$2.7	\$11.4	\$41.4	\$15.5	\$71.0

Total International Assets at July 31, 2010	<u>\$39.3</u>	<u>\$26.2</u>	<u>\$21.7</u>	<u>\$ 87.2</u>

Global equity consists of a fixed weights index fund, used to maintain a fixed 50/50 distribution between UK and overseas assets. Publicly traded equities are valued at the closing price reported in the active market in which the individual securities are traded.

Fixed income consists of corporate bond funds with the investment objective to achieve active corporate bond returns which are inflation linked and paid as a single payment in 2055. Corporate bonds and notes are valued at either the closing price reported if traded on an active market or at yields currently available on comparable securities of issuers with similar credit ratings or valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable such as credit and liquidity risks.

Equity/Fixed Income consists of Level 1 assets that are part of a unit linked fund with a strategic asset allocation of 40% fixed income products and 60% equity type products. Assets are valued at either the closing price reported if traded on an active market or at yields currently available on comparable securities of issuers with similar credit ratings. Index funds are valued at the net asset value as determined by the

custodian of the fund. The Level 3 assets are composed of mathematical reserves on individual contracts and the Company does not have any influence on the investment decisions as made by the insurer due to the specific minimum guaranteed return characteristics of this type of contract. European insurers in general, broadly have a strategic asset allocation with 80%-90% fixed income products and 20%-10% equity type products (including real estate).

Real Assets consists of property funds. Property funds are valued using the most recent partnership statement of fair value, updated for any subsequent partnership interests' cash flows.

The following table sets forth a summary of changes in the fair values of the International pension plans' Level 3 assets for the year ended July 31, 2011 and 2010 (in millions):

	Equity/Fixed Income
Beginning balance at August 1, 2009	\$23.1

Unrealized gains	0.9
Foreign currency exchange	2.5
Purchases, sales, issuances and settlements, net	<u>1.2</u>
Ending balance at July 31, 2011	<u>\$26.3</u>

Investment Policies and Strategies For the Company's U.S. plans, the Company uses a total return investment approach to achieve a long-term return on plan assets, with a prudent level of risk for the purpose of meeting its retirement income commitments to employees. The plan's investments are diversified to assist in managing risk. The Company's asset allocation guidelines target an allocation of 45 percent equity securities, 30 percent alternative investments (funds of hedge funds), 10 percent real assets (investments into funds containing commodities and real estate), 10 percent fixed income, and 5 percent private equity. Within equity securities, the Company will target an allocation of 15 percent international, 15 percent equity long/short, 10 percent small cap and 5 percent large cap. These target allocation guidelines are determined in consultation with the Company's investment consultant, and through the use of modeling the risk/return trade-offs among asset classes utilizing assumptions about expected annual return, expected volatility/standard deviation of returns, and expected correlations with other asset classes.

For the Company's non-U.S. plans, the general investment objectives are to maintain a suitably diversified portfolio of secure assets of appropriate liquidity which will generate income and capital growth to meet, together with any new contributions from members and the Company, the cost of current and future benefits. Investment policy and performance is measured and monitored on an ongoing basis by the Company's investment committee through its use of an investment consultant and through quarterly investment portfolio reviews.

Estimated Contributions and Future Payments The Company's general funding policy for its pension plans is to make at least the minimum contributions as required by applicable regulations. Additionally, the Company may elect to make additional contributions up to the maximum tax deductible contribution. As such, the Company made contributions of \$20.6 million to its U.S. pension plans in Fiscal 2011. There is no minimum funding request for the Company's U.S. plans for Fiscal 2012. The Company is currently evaluating whether or not a U.S. pension contribution will be made in Fiscal 2012. The Company made contributions of \$7.1 million to its non-U.S. pension plans in Fiscal 2011 and estimates that it will contribute approximately \$4.7 million in Fiscal 2012 based upon the local government prescribed funding requirements. Future estimates of the Company's pension plan contributions may change significantly depending on the actual rate of return on plan assets, discount rates and regulatory requirements.

Estimated future benefit payments for the Company's U.S. and non-U.S. plans are as follows (thousands of dollars):

<u>Fiscal Year</u>	
2012	\$ 25,769
2013	\$ 23,314
2014	\$ 25,648
2015	\$ 26,242
2016	\$ 25,323
2017-2021	\$148,290

Postemployment and Postretirement Benefit Plans The Company provides certain postemployment and postretirement health care benefits for certain U.S. employees for a limited time after termination of employment. The Company has recorded a liability for its postretirement benefit plan in the amount of \$1.5 million and \$1.6 million as of July 31, 2011 and July 31, 2010, respectively. The annual cost resulting from these benefits is not material. For measurement purposes, a 7.4 percent annual rate of increase in the per capita cost of covered health care benefits was assumed for Fiscal 2011. The Company has assumed that the long-term rate of increase will decrease gradually to an ultimate annual rate of 4.5 percent. A one-percentage point increase in the health care cost trend rate would increase the Fiscal 2011 and 2010 liability by \$0.1 million.

Retirement Savings and Employee Stock Ownership Plan The Company provides a contributory employee savings plan to U.S. employees that permits participants to make contributions by salary reduction pursuant to section 401(k) of the Internal Revenue Code. Employee contributions of up to 25 percent of compensation are matched at a rate equaling 100 percent of the first 3 percent contributed and 50 percent of the next 2 percent contributed. The Company's contributions under this plan are based on the level of employee contributions as well as a discretionary contribution based on performance of the Company. Total contribution expense for these plans was \$9.1 million, \$4.5 million, and \$5.1 million for the years ended July 31, 2011, 2010, and 2009, respectively. This plan also includes shares from an Employee Stock Ownership Plan ("ESOP"). As of July 31, 2011, all shares of the ESOP have been allocated to participants. Total ESOP shares are considered to be shares outstanding for earnings per share calculations.

Deferred Compensation and Other Benefit Plans The Company provides various deferred compensation and other benefit plans to certain executives. The deferred compensation plan allows these employees to defer the receipt of all of their bonus and other stock related compensation and up to 75 percent of their salary to future periods. Other benefit plans are provided to supplement the benefits for a select group of highly compensated individuals which are reduced because of compensation limitations set by the Internal Revenue Code. The Company has recorded a liability in the amount of \$9.2 million and \$8.8 million as of the year ended July 31, 2011 and July 31, 2010, respectively, related primarily to its deferred compensation plans.

NOTE H
Shareholders' Equity

Stock Rights On January 27, 2006, the Board of Directors of the Company approved the extension of the benefits afforded by the Company's existing rights plan by adopting a new shareholder rights plan. Pursuant to the Rights Agreement, dated as of January 27, 2006 by and between the Company and Wells Fargo Bank, N.A., as Rights Agent, one right was issued on March 3, 2006 for each outstanding share of common stock of the Company upon the expiration of the Company's existing rights. Each of the new rights entitles the registered holder to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock, without par value, at a price of \$143.00 per one one-thousandth of a share. The rights, however, will not become exercisable unless and until, among other things, any person acquires 15 percent or more of the outstanding common stock of the Company. If a person acquires 15 percent or more of the outstanding common stock of the Company (subject to certain conditions and exceptions more fully described in the Rights Agreement), each right will entitle the holder (other than the person who acquired 15 percent or more of the outstanding common stock) to purchase common stock of the Company having a market value equal to twice the exercise price of a right. The rights are redeemable under certain circumstances at \$.001 per right and will expire, unless earlier redeemed, on March 2, 2016.

Stock Compensation Plans The Stock Compensation Plans in the Consolidated Statements of Changes in Shareholders' Equity consist of the balance of amounts payable to eligible participants for stock compensation that was deferred to a Rabbi Trust pursuant to the provisions of the 2010 Master Stock Incentive Plan, as well as performance awards payable in common stock discussed further in Note I.

Treasury Stock The Company believes that the share repurchase program is a way of providing return to its shareholders. The Board of Directors authorized the repurchase, at the Company's discretion, of up to 8.0 million shares of common stock under the stock repurchase plan dated March 26, 2010. As of July 31, 2011, the Company had remaining authorization to repurchase 5.0 million shares under this plan. Following is a summary of treasury stock share activity for Fiscal 2011 and 2010:

	<u>2011</u>	<u>2010</u>
Balance at beginning of year	12,222,381	11,295,409
Stock repurchases	1,956,648	1,651,600
Net issuance upon exercise of stock options	(862,981)	(667,991)
Issuance under compensation plans	(62,304)	(46,197)
Other activity	(7,880)	(10,440)
Balance at end of year	<u>13,245,864</u>	<u>12,222,381</u>

The Company initiated the purchase of an additional 162,900 shares for \$9.2 million in July 2011 that are not included in Fiscal 2011 repurchases as the transactions did not settle until after fiscal year end. These repurchases will be included in Fiscal 2012 activity.

NOTE I
Stock Option Plans

Employee Incentive Plans In November 2010 shareholders approved the 2010 Master Stock Incentive Plan (the "Plan") that replaced the 2001 Plan that was scheduled to expire on December 31, 2010 and provided for similar awards. The Plan extends through September 2020 and allows for the granting of nonqualified stock options, incentive stock options, restricted stock, restricted stock units, stock appreciation rights ("SAR"), dividend equivalents, and other stock-based awards. Options under the Plan are granted to key employees at market price at the date of grant. Options are exercisable for up to 10 years from the date of grant. The Plan also allows for the granting of performance awards to a limited number of key executives. As administered by the Human Resources Committee of the Company's Board of Directors, these performance awards are payable in common stock and are based on a formula which measures performance of the Company over a three-year period. Performance award expense under these plans totaled \$1.8 million in Fiscal 2011 and \$0.5 million in Fiscal 2010. The Company recorded a net reversal of performance award expense in Fiscal 2009 of \$3.1 million due to the reversal of \$3.6 million of Long-Term Compensation Plan expense recognized in prior periods based upon actual and forecasted results.

Stock options issued from Fiscal 2001 to Fiscal 2011 become exercisable for non-executives in equal increments over three years. Stock options issued in Fiscal 2011 become exercisable for executives in equal increments over three years. Stock options issued from Fiscal 2001 to Fiscal 2010 became exercisable for most executives immediately upon the date of grant. Certain other stock options issued to executives during Fiscal 2004, 2006, and 2007 became exercisable in equal increments over three years. For Fiscal 2011, the Company recorded pretax compensation expense associated with stock options of \$6.5 million and recorded \$2.4 million of related tax benefit. For Fiscal 2010 and 2009, the Company recorded pretax compensation expense associated with stock options of \$6.9 million and \$4.1 million, respectively, and \$2.5 million and \$1.5 million, respectively, of related tax benefit.

Stock-based employee compensation cost is recognized using the fair-value based method. The Company determined the fair value of these awards using the Black-Scholes option pricing model, with the following weighted average assumptions:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
Risk - free interest rate	<0.12 - 3.1%	< 0.01 - 3.9%	1.4 - 4.0%
Expected volatility	25.5 - 34.7%	24.4 - 32.3%	21.6 - 25.5%
Expected dividend yield	1.0%	1.0%	1.0%
Expected life			
Director original grants without reloads	8 years	8 years	8 years
Non - officer original grants	8 years	7 - 8 years	7 years
Officer original grants with reloads	—	4 years	4 years
Reload grants	<8 years	<8 years	<5 years
Officer original grants without reloads	8 years	8 years	7 years

Reload grants are grants made to officers or directors who exercised a reloadable option during the fiscal year and made payment of the purchase price using shares of previously owned Company stock. The reload grant is for the number of shares equal to the shares used in payment of the purchase price and/or withheld for minimum tax withholding. Beginning in Fiscal 2011 options no longer have a reload provision for officers and directors.

Black-Scholes is a widely accepted stock option pricing model; however, the ultimate value of stock options granted will be determined by the actual lives of options granted and the actual future price levels of the Company's common stock. The weighted average fair value for options granted during Fiscal 2011, 2010, and 2009 is \$17.26, \$13.23, and \$8.56 per share, respectively, using the Black-Scholes pricing model.

The following table summarizes stock option activity:

	<u>Options Outstanding</u>	<u>Weighted Average Exercise Price</u>
Outstanding at July 31, 2008	5,181,778	\$25.62
Granted	366,588	34.23
Exercised	(505,363)	17.64
Canceled	(44,878)	39.04
Outstanding at July 31, 2009	4,998,125	26.94
Granted	643,974	42.41
Exercised	(848,990)	20.84
Canceled	(21,297)	41.94
Outstanding at July 31, 2010	4,771,812	30.04
Granted	551,601	57.22
Exercised	(1,121,751)	23.10
Canceled	(7,665)	47.20
Outstanding at July 31, 2011	<u>4,193,997</u>	35.44

The total intrinsic value of options exercised during Fiscal 2011, 2010, and 2009 was \$34.2 million, \$19.5 million, and \$9.1 million, respectively.

Shares reserved at July 31, 2011 for outstanding options and future grants were 8,307,431. Shares reserved consist of shares available for grant plus all outstanding options. Upon shareholder approval of the 2010 Master Stock Incentive Plan, 4,600,000 shares were added to shares reserved. Remaining shares available for grant under the 2001 plan were removed from the shares reserved calculation.

The following table summarizes information concerning outstanding and exercisable options as of July 31, 2011:

<u>Range of Exercise Prices</u>	<u>Number Outstanding</u>	<u>Weighted Average Remaining Contractual Life (Years)</u>	<u>Weighted Average Exercise Price</u>	<u>Number Exercisable</u>	<u>Weighted Average Exercise Price</u>
\$12 to \$22	658,066	1.19	\$17.89	658,066	\$17.89
\$22 to \$32	1,102,423	2.94	30.12	1,086,511	30.09
\$32 to \$42	1,121,686	5.67	34.95	1,101,164	34.96
\$42 and above.....	<u>1,311,822</u>	8.23	49.15	<u>655,381</u>	44.34
	<u>4,193,997</u>	5.05	35.44	<u>3,501,122</u>	32.00

At July 31, 2011, the aggregate intrinsic value of shares outstanding and exercisable was \$85.0 million and \$81.9 million, respectively.

The following table summarizes the status of options which contain vesting provisions:

	<u>Options</u>	<u>Weighted Average Grant Date Fair Value</u>
Non - vested at July 31, 2010	407,453	\$12.89
Granted.....	482,250	18.45
Vested	(189,913)	12.27
Canceled	<u>(6,915)</u>	15.42
Non - vested at July 31, 2011	<u>692,875</u>	16.90

The total fair value of shares vested during Fiscal 2011, 2010, and 2009 was \$10.5 million, \$8.0 million, and \$7.9 million, respectively.

As of July 31, 2011, there was \$6.1 million of total unrecognized compensation cost related to non-vested stock options granted under the Plan. This unvested cost is expected to be recognized during Fiscal 2012, Fiscal 2013, and Fiscal 2014.

NOTE J

Income Taxes

The components of earnings before income taxes are as follows:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
	(thousands of dollars)		
Earnings before income taxes:			
United States.....	\$117,562	\$ 85,987	\$ 69,863
Foreign	<u>194,701</u>	<u>144,189</u>	<u>91,562</u>
Total	<u>\$312,263</u>	<u>\$230,176</u>	<u>\$161,425</u>

The components of the provision for income taxes are as follows:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
	(thousands of dollars)		
Income taxes:			
Current			
Federal	\$26,675	\$25,455	\$18,624

Foreign	<u>54,785</u>	<u>33,327</u>	<u>13,176</u>
	<u>85,015</u>	<u>60,988</u>	<u>34,244</u>
Deferred			
Federal	8,556	3,860	(3,888)
State	191	20	90
Foreign	<u>(6,790)</u>	<u>(855)</u>	<u>(928)</u>
	<u>1,957</u>	<u>3,025</u>	<u>(4,726)</u>
Total	<u>\$86,972</u>	<u>\$64,013</u>	<u>\$29,518</u>

The following table reconciles the U.S. statutory income tax rate with the effective income tax rate:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
Statutory U.S. federal rate	35.0%	35.0%	35.0%
State income taxes	1.0	0.8	1.3
Foreign taxes at lower rates	(6.6)	(8.2)	(7.5)
Export, manufacturing and research credits	(1.6)	(0.9)	(0.5)
U.S. tax impact on repatriation of earnings	(0.3)	0.1	0.7
Change in unrecognized tax benefits	0.1	1.2	(10.6)
Other	<u>0.3</u>	<u>(0.2)</u>	<u>(0.1)</u>
	<u>27.9%</u>	<u>27.8%</u>	<u>18.3%</u>

The tax effects of temporary differences that give rise to deferred tax assets and liabilities are as follows:

	<u>2011</u>	<u>2010</u>
	<u>(thousands of dollars)</u>	
Deferred tax assets:		
Accrued expenses	\$12,243	\$9,130
Compensation and retirement plans	33,298	39,438
Tax credit and NOL carryforwards	1,173	954
Inventory reserves	9,545	8,324
Other	<u>3,311</u>	<u>1,846</u>
Deferred tax assets:	59,570	59,692
Valuation allowance	<u>(692)</u>	<u>(604)</u>
Net deferred tax assets	<u>58,878</u>	<u>59,088</u>
Deferred tax liabilities:		
Depreciation and amortization	(37,112)	(30,248)
Other	<u>(1,119)</u>	<u>(1,420)</u>
Deferred tax liabilities	<u>(38,231)</u>	<u>(31,668)</u>
Net deferred tax asset	<u>\$20,647</u>	<u>\$27,420</u>

The effective tax rate for Fiscal 2011 was 27.9 percent compared to 27.8 percent in Fiscal 2010. The average underlying tax rate remained at 29.7 percent, while discrete items were also a consistent percentage of pre-tax profits. Fiscal 2010 contained \$4.3 million of discrete tax benefits from the expiration of the statute of limitations at foreign subsidiaries and other discrete items. Fiscal 2011 contained \$5.8 million of discrete tax benefits primarily from the release of reserves after the favorable conclusions of foreign tax audits, the expiration of statutes in various jurisdictions, and the favorable impact of dividends from some foreign subsidiaries.

The Company has not provided for U.S. income taxes on additional undistributed earnings of non-U.S. subsidiaries of approximately \$623.0 million. The Company currently intends to permanently reinvest these undistributed earnings overseas as there are significant investment opportunities there, and the Company does not intend to incur a tax cost to repatriate these funds. If any portion were to be distributed, the related U.S. tax liability may be reduced by foreign income taxes paid on those earnings plus any available foreign tax credit carryovers. Determination of the unrecognized deferred tax liability related to these undistributed earnings is not practicable.

The Company has cumulative pre-tax loss carryforwards of \$4.8 million, which exist in various international subsidiaries. If fully realized, the unexpired net operating losses may be carried forward to offset future local income tax payments of \$1.2 million, at current rates of tax. Approximately 12 percent of these net operating losses expire within the next three years, while the majority of the remaining net operating loss carryforwards expire more than 5 years out or have no statutory expiration under current local laws. However, as it is more-likely-than-not that certain of these losses will not be realized, a valuation allowance of \$0.7 million exists as of July 31, 2011.

The Company maintains a reserve for uncertain tax benefits. The accounting standard defines the threshold for recognizing the benefits of tax return positions in the financial statements as “more-likely-than-not” to be sustained by the taxing authorities based solely on the technical merits of the position. If the recognition threshold is met, the tax benefit is measured and recognized as the largest amount of tax benefit

that in the Company's judgment is greater than 50 percent likely to be realized. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

	<u>2011</u>	<u>2010</u>	<u>2009</u>
	(thousands of dollars)		
Gross unrecognized tax benefits at beginning of fiscal year	\$18,994	\$16,928	\$32,002
Additions for tax positions of the current year	7,406	3,122	3,527
Additions for tax positions of prior years	668	470	772
Reductions for tax positions of prior years	(164)	(179)	(8,258)
Settlements	(3,895)	—	(10,092)
Reductions due to lapse of applicable statute of limitations	(3,004)	(1,347)	(1,023)
Gross unrecognized tax benefits at end of fiscal year	<u>\$20,005</u>	<u>\$18,994</u>	<u>\$16,928</u>

The Company recognizes interest and penalties accrued related to unrecognized tax benefits in income tax expense. During the fiscal year ended July 31, 2011, the Company recognized interest expense, net of tax benefit, of approximately \$0.3 million. At July 31, 2011 and July 31, 2010, accrued interest and penalties on a gross basis were \$1.5 million and \$2.5 million, respectively.

The Company's uncertain tax positions are affected by the tax years that are under audit or remain subject to examination by the relevant taxing authorities. The following tax years, in addition to the current year, remain subject to examination, at least for certain issues, by the major tax jurisdictions indicated:

<u>Major Jurisdictions</u>	<u>Open Tax Years</u>
Belgium	2010
China	2001 through 2010
France	2008 through 2010
Germany	2009 through 2010
Italy	2003 through 2010
Japan	2009 through 2010
Mexico	2006 through 2010
Thailand	2005 through 2010
United Kingdom	2010
United States	2008 through 2010

If the Company were to prevail on all unrecognized tax benefits recorded, substantially all of the unrecognized tax benefits would benefit the effective tax rate. With an average statute of limitations of about 5 years, up to \$3.0 million of the unrecognized tax benefits could potentially expire in the next 12 month period, unless extended by audit. It is possible that quicker than expected settlement of either current or future audits and disputes would cause additional reversals of previously recorded reserves in the next 12 month period. Currently, the Company has approximately \$0.2 million of unrecognized tax benefits that are in dispute with various taxing authorities related to transfer pricing and deductibility of expenses. Quantification of an estimated range and timing of future audit settlements cannot be made at this time.

NOTE K

Segment Reporting

Consistent with FASB guidance related to segment reporting, the Company identified two reportable segments: Engine Products and Industrial Products. Segment selection was based on the internal organizational structure, management of operations, and performance evaluation by management and the Company's Board of Directors.

The Engine Products segment sells to OEMs in the construction, mining, agriculture, aerospace, defense, and truck markets and to independent distributors, OEM dealer networks, private label accounts, and large equipment fleets. Products include air filtration systems, exhaust and emissions systems, liquid filtration systems, and replacement filters.

The Industrial Products segment sells to various industrial end-users, OEMs of gas-fired turbines, and OEMs and end-users requiring clean air. Products include dust, fume, and mist collectors, compressed air purification systems, air filtration systems for gas turbines, PTFE membrane based products, and specialized air filtration systems for applications including computer hard disk drives.

Corporate and Unallocated includes corporate expenses determined to be non-allocable to the segments, interest income, and interest expense. Assets included in Corporate and Unallocated principally are cash and cash equivalents, inventory reserves, certain prepaids, certain investments, other assets, and assets allocated to general corporate purposes.

The Company has an internal measurement system to evaluate performance and allocate resources based on profit or loss from operations before income taxes. The Company's manufacturing facilities serve both reporting segments. Therefore, the Company uses an allocation methodology to assign costs and assets to the segments. A certain amount of costs and assets relate to general corporate purposes and are not assigned to either segment. Certain accounting policies applied to the reportable segments differ from those described in the summary of significant accounting policies. The reportable segments account for receivables on a gross basis and account for inventory on a standard cost basis.

Segment allocated assets are primarily accounts receivable, inventories, property, plant and equipment, and goodwill. Reconciling items included in Corporate and Unallocated are created based on accounting differences between segment reporting and the consolidated, external reporting as well as internal allocation methodologies.

The Company is an integrated enterprise, characterized by substantial intersegment cooperation, cost allocations, and sharing of assets. Therefore, we do not represent that these segments, if operated independently, would report the operating profit and other financial information shown below. In the following table, reclassifications have been made in prior periods as a result of an internal reorganization of Industrial Hydraulics from Industrial Products to Engine Products, which became effective August 1, 2010.

Segment detail is summarized as follows:

	<u>Engine Products</u>	<u>Industrial Products</u>	<u>Corporate & Unallocated</u>	<u>Total Company</u>
	(thousands of dollars)			
2011				
Net sales	\$1,440,495	\$853,534	\$ —	\$2,294,029

Other	103,110	29,980
Total	<u>\$1,868,629</u>	<u>\$381,068</u>

Concentrations There were no Customers over 10 percent of net sales during Fiscal 2011, 2010, and 2009. There were no Customers over 10 percent of gross accounts receivable in Fiscal 2011 and 2010.

NOTE L
Guarantees

The Company and Caterpillar Inc. equally own the shares of Advanced Filtration Systems Inc. (AFSI), an unconsolidated joint venture, and guarantee certain debt of the joint venture. As of July 31, 2011, the joint venture had \$24.6 million of outstanding debt, of which the Company guarantees half. In addition, during Fiscal 2011, 2010, and 2009, the Company recorded its equity in earnings of this equity method investment of \$1.6 million, \$0.4 million, and \$1.0 million and royalty income of \$6.2 million, \$5.4 million, and \$5.1 million, respectively, related to AFSI.

At July 31, 2011 and 2010, the Company had a contingent liability for standby letters of credit totaling \$11.4 million and \$20.0 million, respectively, which have been issued and are outstanding. The letters of credit guarantee payment to third parties in the event the Company is in breach of a specified bond financing agreement and insurance contract terms as detailed in each letter of credit. At July 31, 2011 and 2010, there were no amounts drawn upon these letters of credit.

NOTE M

Warranty

The Company provides for warranties on certain products. In addition, the Company may incur specific Customer warranty issues. Following is a reconciliation of warranty reserves (in thousands of dollars):

Balance at July 31, 2009	\$ 9,215
Accruals for warranties issued during the reporting period	12,389
Accruals related to pre-existing warranties (including changes in estimates)	(1,244)
Less settlements made during the period	<u>(4,653)</u>
Balance at July 31, 2010	\$15,707
Accruals for warranties issued during the reporting period	8,406
Accruals related to pre-existing warranties (including changes in estimates)	7,735
Less settlements made during the period	<u>(12,128)</u>
Balance at July 31, 2011	<u>\$19,720</u>

During Fiscal 2011, the increase in warranty accruals was primarily due to three specific warranty matters: one in the Company’s Retrofit Emissions Product group for \$3.6 million, one in the Company’s Off-Road Products group for \$1.8 million, and one in the On-Road Product group for \$4.1 million. These warranty accruals were partially offset by supplier and insurance recoveries of \$4.2 million. During Fiscal 2010, the Company increased warranty accruals due to a specific warranty matter in our Retrofit Emissions Products group and recorded an expense of \$6.2 million for this matter.

NOTE N

Commitments and Contingencies

The Company records provisions with respect to identified claims or lawsuits when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Claims and lawsuits are reviewed quarterly and provisions are taken or adjusted to reflect the status of a particular matter. The Company believes the recorded reserves in its consolidated financial statements are adequate in light of the probable and estimable outcomes. The recorded liabilities were not material to the Company’s financial position, results of operation or liquidity and the Company does not believe that any of the currently identified claims or litigation will materially affect its financial position, results of operation or liquidity.

The Company has reached a preliminary agreement to settle the class action lawsuits that were previously disclosed in its SEC filings, including most recently the Form 10-Q for the quarter ending April 30, 2011. On March 31, 2008, S&E Quick Lube, a filter distributor, filed a lawsuit alleging that 12 filter manufacturers, including the Company, engaged in a conspiracy to fix prices, rig bids, and allocate U.S. Customers for aftermarket automotive filters. The U.S. cases have been consolidated into a single multi-district litigation in the Northern District of Illinois. The Company denies any liability and has vigorously defended the claims raised in these lawsuits. The settlement will fully resolve all claims brought against the Company in the lawsuits and the Company does not admit any liability or wrongdoing. The settlement is still subject to Court approval and will not have a material impact on the Company’s financial position, results of operations or liquidity.

The Company has reached a preliminary agreement with the Air Resources Board for the State of California (“ARB”) to settle regulatory claims brought by ARB in connection with the sales of our Diesel Multi-Stage Filter System (“DMF”) for an immaterial amount. On May 19, 2010, ARB revoked its verification of the Company’s DMF for use with on-road diesel engines, for which verification was originally issued on December 16, 2005. The Company denies that any sales were made in California without ARB verification. The Company is not currently selling any DMF product and is working with the Environmental Protection Agency to verify the product for any future sales.

NOTE O
Restructuring

The following is a reconciliation of restructuring reserves (in thousands of dollars):

Balance at July 31, 2008	\$ —
Accruals for restructuring during the reporting period	17,755
Less settlements made during the period	<u>(13,915)</u>
Balance at July 31, 2009	\$ 3,840
Accruals for restructuring during the reporting period	8,023
Less settlements made during the period	<u>(7,724)</u>
Balance at July 31, 2010	\$ 4,139
Accruals for restructuring during the reporting period	759
Less settlements made during the period	<u>(4,898)</u>
Balance at July 31, 2011	<u>\$ —</u>

Certain restructuring actions commenced in Fiscal 2009 in response to the dramatic downturn in the worldwide economy and these actions and related costs carried over into Fiscal 2010 and Fiscal 2011. In Fiscal 2011, the Engine Products segment incurred minimal restructuring expenses and Industrial Products segment incurred \$0.7 million in restructuring expenses. The restructuring expenses in Fiscal 2011 include employee severance costs for approximately five employees related to the completion of the Company's planned restructuring activities. The Company did not previously anticipate these additional charges in Fiscal 2011.

The fiscal 2010 costs were employee severance costs related to the reduction in workforce of approximately 550 employees. In addition to these restructuring costs, the Company recorded \$2.1 million in asset impairment costs related to the downsizing of a plant in Germany. Fiscal 2009 included \$173 million in employee severance costs related to the reduction in workforce of approximately 2,800 employees. In addition, \$0.5 million was incurred primarily for distribution center consolidation and production line transfers.

Restructuring and asset impairment expense detail is summarized as follows (in thousands):

	Fiscal Year		
	2011	2010	2009
Gross Margin	\$ 20	\$ 7,488	\$10,109
Operating expenses	739	2,677	7,646
Total restructuring and asset impairment expenses	<u>\$759</u>	<u>\$10,165</u>	<u>\$17,755</u>

NOTE P

Dividends paid per share	0.115	0.115	0.120	0.120

The quarter ended October 31, 2010 included restructuring charges after-tax of \$0.6 million or \$0.01 per share. The quarters ended October 31, 2009, January 31, 2010, April 30, 2010, and July 31, 2010, include restructuring charges after-tax of \$0.9 million or \$0.01 per share, \$3.6 million or \$0.05 per share, \$2.7 million or \$0.03 per share, and less than \$0.1 million, respectively.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report (the “Evaluation Date”), the Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company’s disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, the Company’s disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in applicable rules and forms, and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

No change in the Company’s internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) identified in connection with such evaluation during the fiscal quarter ended July 31, 2011, has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

Management’s Report on Internal Control over Financial Reporting

See Management’s Report on Internal Control over Financial Reporting under Item 8 on page 25.

Report of Independent Registered Public Accounting Firm

See Report of Independent Registered Public Accounting Firm under Item 8 on page 26.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information under the captions “Item 1: Election of Directors”; “Director Selection Process,” “Audit Committee,” “Audit Committee Expertise; Complaint-Handling Procedures,” and “Section 16(a) Beneficial Ownership Reporting Compliance” of the 2011 Proxy Statement is incorporated herein by reference. Information on the Executive Officers of the Company is found under the caption “Executive Officers of the Registrant” on page 6 of this Annual Report on Form 10-K.

The Company has adopted a code of business conduct and ethics in compliance with applicable rules of the Securities and Exchange Commission that applies to its principal executive officer, its principal financial officer and its principal accounting officer or controller, or persons performing similar functions. A copy of the code of business conduct and ethics is posted on the Company’s website at www.donaldson.com. The code of business conduct and ethics is available in print, free of charge to any shareholder who requests it. The Company will disclose any amendments to, or waivers of, the code of business conduct and ethics for the Company’s principal executive officer, principal financial officer, and principal accounting officer on the Company’s website.

Item 11. Executive Compensation

The information under the captions “Executive Compensation” and “Director Compensation” of the 2011 Proxy Statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information under the caption “Security Ownership” of the 2011 Proxy Statement is incorporated herein by reference.

The following table sets forth information as of July 31, 2011 regarding the Company’s equity compensation plans:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plans approved by security holders:			
1980 Master Stock Compensation Plan:			
Stock Options	—	—	—
Deferred Stock Gain Plan	42,057	\$13.9878	—
1991 Master Stock Compensation Plan:			
Stock Options	114,744	\$19.3523	—
Deferred Stock Option Gain Plan	342,685	\$34.4576	—
Deferred LTC/Restricted Stock	134,158	\$22.7091	—
2001 Master Stock Incentive Plan:			
Stock Options	3,164,380	\$32.6285	—
Deferred Stock Option Gain Plan 21,600	\$59.9872	—	—
Deferred LTC/Restricted Stock	152,118	\$30.3986	—
Long-Term Compensation	71,059	\$40.8296	—
2010 Master Stock Incentive Plan:			
Stock Options	407,500	\$58.1400	See Note 1
Deferred LTC/Restricted Stock	—	\$ —	—
Long-Term Compensation	—	\$ —	—
Subtotal for plans approved by security holders	4,450,301	\$34.4754	
Equity compensation plans not approved by security holders:			
Non-qualified Stock Option Program for Non - Employee Directors			
ESOP Restoration	507,373	\$38.4163	See Note 2
	25,016	\$13.0282	See Note 3
Subtotal for plans not approved by security holders	532,389	\$ 37.2234	
Total	4,982,690	\$ 34.769	

Note 1: The 2010 Master Stock Incentive Plan limits the number of shares authorized for issuance to 4,600,000 during the 10-year term of the plan. There are currently 4,112,369 shares of the authorization remaining.

Note 2: The stock option program for non-employee directors (filed as exhibit 10-H to Form 10-Q report filed for the first quarter ended October 31, 2008) provides for each non-employee director to receive annual option grants of 7,200 shares. The 2010 Master Stock Incentive Plan, which was approved by the Company's stockholders on November 19, 2010 provides for the issuance of stock options to non-employee directors, and the stock option program for non-employee directors has been adopted as a sub-plan under the 2010 Master Stock Incentive Plan and shares issued to directors after December 10, 2010 will be issued under the 2010 Master Stock Incentive Plan.

Note 3: The Company has a non-qualified ESOP Restoration Plan established on August 1, 1990 (filed as exhibit 10-D to the Company's 2009 Form 10-K report), to supplement the benefits for executive employees under the Company's Employee Stock Ownership Plan that would otherwise be reduced because of the compensation limitations under the Internal Revenue Code. The ESOP's 10-year term was completed on July 31, 1997 and the only ongoing benefits under the ESOP Restoration Plan are the accrual of dividend equivalent rights to the participants in the Plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information under the captions "Policy and Procedures Regarding Transactions with Related Persons" and "Board Oversight and Director Independence" of the 2011 Proxy Statement is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

The information under the captions "Independent Auditor Fees" and "Audit committee Pre-Approval Policies and Procedures" of the 2011 Proxy Statement is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules

Documents filed with this report:

(1) Financial Statements

Consolidated Statements of Earnings — years ended July 31, 2011, 2010 and 2009

Consolidated Balance Sheets — July 31, 2011 and 2010

Consolidated Statements of Cash Flows — years ended July 31, 2011, 2010 and 2009

Consolidated Statements of Changes in Shareholders' Equity — years ended July 31, 2011, 2010 and 2009

Notes to Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm

(2) Financial Statement Schedules —

Schedule II Valuation and qualifying accounts

All other schedules (Schedules I, III, IV and V) for which provision is made in the applicable accounting regulations of the Securities and Exchange Commission are not required under the related instruction, or are inapplicable, and therefore have been omitted.

(3) Exhibits

The exhibits listed in the accompanying index are filed as part of this report or incorporated by reference as indicated therein.

SIGNATURES

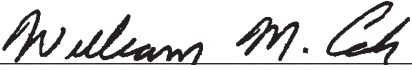

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

DONALDSON COMPANY, INC.

Date: September 23, 2011

By: _____
William M. Cook
Chief Executive Officer

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the registrant and in the capacities indicated on September 23, 2011.

 _____ William M. Cook	President, Chief Executive Officer and Chairman (principal executive officer)
 _____ Thomas R. VerHage	Vice President and Chief Financial Officer (principal financial officer)
 _____ James F. Shaw	Controller (principal accounting officer)
* _____ F. Guillaume Bastiaens	Director
* _____ Janet M. Dolan	Director
* _____ Jack W. Eugster	Director
* _____ John F. Grundhofer	Director
* _____ Michael J. Hoffman	Director
* _____ Paul David Miller	Director
* _____ Jeffrey Noddle	Director
* _____ Willard D. Oberton	Director
* _____ Ajita G. Rajendra	Director
* _____ John P. Wiehoff	Director

**Certification of Chief Executive Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, William M. Cook, certify that:

1. I have reviewed this annual report on Form 10-K of Donaldson Company, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
