Chairman's Statement

Against a background of extreme macro-economic uncertainty and increasing divisions across the European landscape, the strength of our franchise and quality of our people enabled the Group to deliver an element of improved performance.

It has been a tough and challenging year in financial markets. Numis has managed to come through it with our business showing some improvement in its underlying position. We have more corporate broking clients, have completed some significant corporate finance deals, have maintained our leading position in research, and broadened our execution services. Top-ranked sector specialist analysts, powerful internal distribution and sector aligned broking and advisory expertise continue to be the bedrock of our franchise, although we recognise that as the financial market place evolves so must we, as we investigate new revenue streams for the business. Sometimes adversity can spell opportunity, and our aim must always be to keep our franchise nimble, fleet of foot, and of course rewarding for our shareholders.

It is testament to the quality of the firm's research and secondary distribution capability that aggregate commission and trading revenues from this area rose by 11% year on year during a period of significant shrinkage in overall market volumes. This reflects the high regard in which the investment community holds our services together with the quality of our people. Primary activity was impacted by the difficult market conditions surrounding equity issuance, however the strength and quality of our corporate advisory roles in M&A transactions helped to generate a near doubling in deal fees. Overall, this has been a very creditable performance in extremely challenging and competitive market conditions.

At the same time, the UK's regulatory framework continues to evolve supported by guidance from various industry bodies. In particular the revised UK Corporate Governance Code 2010 (the Code), published by the Financial Reporting Council, places greater emphasis on leadership and effectiveness of Boards and on a Board's responsibility for the management of risk. It further acknowledges that the overall quality of governance is dependent on behaviour rather than process.

Although AIM listed companies are not required to comply with the Code, the Board fully supports the notion that appropriate behavioral traits are paramount in ensuring effective governance and is committed to this principle. It has been a specific goal of mine and my fellow non-executives to provide constructive challenge across the full range of the firm's activities including, but not limited to, the firm's strategic direction, the firm's risk appetite, the overall management of risk and the firm's remuneration policy. I believe we have made further progress this year, in particular by broadening the Board's interaction with senior management within the business, by the introduction of further enhancements to the firms risk reporting and through the development of an internal performance review of the Board's effectiveness across the full scope of its activities and remit. All of these, I believe, are of increasing importance given the environment in which we do business and the specific risks faced by the financial sector.

Despite the macro-economic and political challenges which lie ahead, I firmly believe that Numis remains well positioned to deliver outstanding quality of service to both corporate and institutional clients which will prove critical to its long term success. I would like to close by acknowledging the contribution made by all of our staff and the immense amount of hard work that my colleagues have put into maintaining the highest standards of governance, quality and client service during such difficult market conditions.

Sir David Arculus
Chairman
16 December 2011

“Adjusted profit before tax up 13% against a background of huge economic uncertainty, highly volatile markets and unrelenting competition.”

Chief Executive's Statement

The continuing strength of our corporate franchise will be critical to our success and we will continue to invest in building this whilst at the same time maintaining firm control of our costs overall.

Against a background of extremely volatile and challenging markets, we are pleased to report that the underlying business has delivered an improved performance for the year ended 30 September 2011 generating revenues of £54.2m (2010: £51.9m) and adjusted profit before tax of £8.9m (2010: £7.9m). In addition, there were £0.7m of net gains (2010: £0.1m) recognised on investments held outside of our market making business, £7.2m of charges (2010: £7.7m) relating to employee share scheme arrangements and an exceptional non-recurring charge of £2.2m (2010: £Nil) relating to the settlement of litigation during the year. The statutory profit before tax increased from £175,000 to £180,000. A reconciliation of the adjusted profit before tax to the statutory profit before tax is set out in Note 2 to the financial statements.

Macro economic uncertainties which prevailed throughout the year and their continuing impact on the financial markets resulted in turbulent equity markets. Equity index gains achieved in the first half were reversed in the second half resulting in overall falls of 7.6% (FTSE 100), 6.8% (FTSE 250) and 8.2% (AIM 50) for the year. Similarly the marked slowdown in equity fund raising on the London Stock Exchange has not abated with equity funds raised on AIM and the Main Market combined totalling £17.2bn during the first half but only £7.2bn during the second half resulting in a year on year decrease of 42%.

These market conditions were broadly reflected in our revenue performance whereby combined institutional commission & trading revenues had a record first quarter and ended the year up 11% at £29.3m (2010: £26.5m). Income from corporate and issuance transactions for the year was 6% down at £19.4m (2010: £20.6m) reflecting the subdued appetite for equity fund raising, albeit partially offset by increased M&A activity within our corporate client base.

Our balance sheet remains strong with cash and cash collateral balances totalling £47.5m (September 2010: £58.2m) while net assets have reduced to £99.6m (September 2010: £106.7m) and regulatory capital remains over 4 times the required minimum. Cash outflows during the year largely reflect the purchase of shares by the Group's Employee Benefit Trust, the payment of dividends and the settlement of litigation referred to below. These outflows were partially offset by the monetisation of two of our unquoted investments, the combined impact of these actions resulted in cash outflows of £13.6m.

Our investment portfolio is valued at £15.9m (September 2010: £20.3m) the majority of which comprises holdings in quoted companies. Overall, this portfolio experienced negligible fair value gains and dividend receipts of £0.7m resulting in a net gain of £0.7m reported through the other operating income line of the income statement.

Corporate Finance & Corporate Broking

Notable deals during the year include IPOs for Betfair, CatCo and Circle Holdings, equity issues for Fiberweb, IP Group and Accsys Technologies and advising Brit Insurance and NR Nordic in their recent takeovers. In total we completed 23 (2010: 25) equity issuance transactions during the year and since 30 September 2011 a further 3 have been completed or announced in aggregate raising over £90m of equity finance.

We continue to attract high quality corporate clients with 26 new clients added during the year bringing the total number for whom we act to 140 companies (September 2010: 133). Our efforts focus across a broad range of corporate clients which include 50 AIM companies, 51 FTSE Small Caps, 25 FTSE250 clients and one FTSE100 company. The offering to our corporate clients includes access to worldwide institutional investors, but also to a network of over 1,500 active private client fund managers who manage c. £400bn of discretionary funds providing alternative sources of liquidity and investor interaction.

The strength of our dedicated corporate broking team was instrumental in Numis being Voted #1 UK Small & Mid Cap Brokerage Firm by company votes in the 2011 Thomson Reuters Extel survey as well as #3 Leading UK Brokerage firm by fund manager votes. Numis has been voted in the top 3 Leading Brokerage Firms in the Thomson Reuters Extel survey (for UK companies of up to £1bn market capitalisation) in each of the last 4 years.

Research & Execution

Our research and execution services are recognised as being exceptional and have enabled us to maintain an increased market share throughout the year. In particular, in the 2011 Thomson Reuters Extel survey our research teams were ranked in the top 3 in 7 of the sectors that we cover (up from 5 sectors last year). Our highly rated analysts produce research on over 400 companies (including coverage of over 40 FTSE 100 stocks and over 130 FTSE 250 stocks) and we have a recognised capability in 15 sectors.

Continued

Strategy

Our overarching objective is to retain our position as one of the leading independent investment banking and stockbroking businesses in the UK.

High quality research is at the heart of Numis' business. It creates trust-based relationships with our institutional clients that are further strengthened by our execution service.

Unconflicted

Research is one of the most valuable tools in the decision making process. At Numis we understand the value of objectivity, the clarity of perspective it can bring and its role in the development of sound, long-term strategies.

Being unconflicted is the cornerstone of our research capability – clean and clear, unbiased facts generating telling insights in increasingly complex and complicated markets. Fundamental understanding you can trust.

High quality execution services across small and mid cap stocks leveraged off highly rated research. Numis is committed to providing liquidity in its corporate stocks and our focus remains on client facilitation.

“Largest and best known UK mid-cap sales team in London.”

Committed

Numis always aims to deliver the highest levels of technical ability married to superior client service. This is especially evident when you look at the continuing development of our sales and trading platform.

Client and regulator demand have driven the development of our platform ensuring robust systems that are readily customisable to meet our clients' requirements.

We have the ability to bring the right people together at the right time, to provide quality links between investors and companies on every level, with rewarding outcomes for all concerned.

Credibility

Our credibility comes through a combination of talented people working in an environment that openly encourages an entrepreneurial but collegial culture. We seek the building of knowledge and experience to best inform the advice we give our clients.

We continue to ensure that our integrity and credibility remain beyond question through the careful application of best practice at every level in the organisation.

The success of our Corporate Finance team springs from its ability to understand our clients' businesses, to know what they are looking for and how to deliver it.

"Long term relationships and a thorough understanding of our clients' businesses and sectors."

Expertise

The depth of our expertise is evident in our track record. Look closely and you will see that this record generates from a culture built on long-term relationships with our clients coupled with innovative thought and an ability to deliver.

Intelligent judgement driven by a deep understanding of our clients' businesses enables Numis to deliver original and telling solutions.

Case Studies
Our contribution to our clients' successes and the track record of our corporate client service teams continues to attract high quality corporate clients. Numis' involvement in our client success during 2011 includes:

CATCo Reinsurance Opportunities Fund Limited is a limited liability closed-ended fund, registered and incorporated in Bermuda.

CATCo targets an internal rate of return in excess of LIBOR plus 12 percent to 15 percent per annum including a distribution by way of dividend of an amount equal to LIBOR plus 5 per cent of the Net Asset Value at the end of each Fiscal Year. The Company seeks to deploy capital within the collateralised reinsurance space with a focus on the Property Catastrophe, Marine and Aviation risk categories as well as seeking opportunistic exposures to other diversifying classes. As at 7 October 2011, the funds market capitalisation was $225m.

Circle Holdings plc is the 50.1% owner of Circle, the healthcare enterprise co-owned by the largest partnership of doctors, nurses and healthcare professionals in the UK. Circle was established in 2004 with the aim of empowering doctors, nurses and healthcare professionals to redefine the healthcare delivery in the UK for the benefit of their patients. Within the Circle Partnership, which holds 49.9% of Circle, more than 2,500 consultants and Circle employees are empowered to achieve the greatest levels of patient care and efficiency through active participation in managing Circle's operations.

Numis, acting as Nominated Adviser and Bookrunner, played the lead role in completing the IPO of the UK's most innovative private hospitals group, and the first private company to be awarded an NHS hospital franchise. The youth of the business, coupled with tricky market conditions, meant appetite from traditional institutions was limited. However, the breadth of Numis' distribution capabilities was demonstrated by its ability to complete the fundraise amongst a group of specialist investors, as well as securing a cornerstone investment of £15m from a new institutional shareholder, Odey Asset Management.

Horizon Acquisition Company plc was admitted to the standard listing segment of the Official List, and to trading on the London Stock Exchange, in February 2010, raising £408m. The Company was formed by leading private equity investor Hugh Osmond with the purpose of acquiring a fundamentally sound business which had been constrained by its ownership or capital structure. In June 2011, the Company completed the acquisition of APR Energy, one of the leading global providers of temporary, fast track large scale power solutions to a variety of customers, including sovereign owned utilities, governmental institutions and industrial customers.

Numis co-led the listing of the Horizon acquisition vehicle in February 2010, using a highly unconventional deal structure that has since been used for numerous other acquisition vehicles. Numis then acted as sole financial adviser and broker in relation to the acquisition of APR Energy in June 2011 and the readmission to the Official List of the enlarged group in September 2011 with a market cap of c.£870m. Numis also helped stimulate huge investor interest, with over 80 investors seen as part of the marketing exercise ahead of readmission in September 2011.

OpSec provides solutions to combat counterfeiting and the related problems of diversion grey marketing, online brand abuse and fraud. Numis acted as a sole financial advisor to Investcorp Technology Partners in connection with its offer for OpSec. Investcorp already owned 29.8% of the voting shares of OpSec.

On 27 April 2011 Investcorp announced the terms of a recommended cash offer at 50p per share (a premium of 117% to the undisturbed share price of OpSec), which was subject, inter alia, to the approval by the independent shareholders of OpSec of the proposed roll-over of shares and options held by management and the EBT of OpSec into shares and options in the offeror company. The required ordinary resolution was not passed by independent shareholders, therefore the arrangements with management and the EBT were terminated and the offer lapsed with immediate effect on 2 June.

On the same day, Investcorp announced a new recommended offer at the same price as the initial offer conditional, inter alia, on receiving acceptances in respect of shares resulting in it holding more than 50% of the voting rights in OpSec. The offer was declared wholly unconditional on 15 July and closed on 31 August.

IP Group plc is a developer of intellectual property businesses through partnerships with research institutions, including the top universities in the United Kingdom. The Group's business model is to form spin-out companies based on innovation, to take a significant minority equity stake in those spun-out companies and then to grow the value of that equity over time. The Group aims to achieve strong equity returns over the medium to long term through growing its diversified portfolio of companies.

As at 31 December 2010 the group had a portfolio of 63 companies (10 incubation, 10 seed and 43 post-seed businesses, of which 15 were quoted) in the biotech, pharma, medtech, IT and communications, energy and renewable and chemicals sectors.

IP Group expects to utilise the proceeds from the capital raise to accelerate its growth by increasing the overall rate of investment in both its existing portfolio and new early stage opportunities.

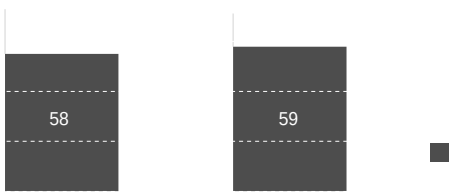
NR Nordic & Russia Properties Limited is a Jersey incorporated investment company which invests in real estate opportunities in the Nordic and Baltic regions.

In February 2011 the Company announced that it had entered into agreements to sell substantially all of its Swedish, Polish and German properties to Kungsleden AB (a leading listed Swedish property company) for SEK 3,368 million (€367 million) and its Russian properties to Mr Thomas Lindeborg for €93 million. Both these transactions were structured as asset sales for cash consideration.

As part of the transaction, Numis advised on the repayment of the Company's bank debt at a discount to par value and the repurchase of convertible loan notes on favourable terms.

Numis is continuing to advise the Company in relation to the return of capital to shareholders and the ultimate wind-up and liquidation of the Company.

During times of extreme economic uncertainty and volatile financial markets, a strong capital base coupled with prudent risk management are essential.



58
59

A number of appropriately constituted committees ensure the principals of good governance and challenge are in place.

A wide range of experience and expertise at both executive and non-executive level creates the drive for future success.

The Board is ultimately responsible for determining Numis' risk appetite and for ensuring that Numis' risk framework and management processes are appropriate and operating effectively.

The Board delegates to the Remuneration Committee the determination of the executive directors' remuneration.

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

The Company had no cash or cash equivalent balances as at 30 September 2009. 30 September 2010 or 30 September 2011. Similarly there were no movements in cash or cash equivalents during the year ended 30 September 2010 or the year ended 30 September 2011. Therefore no cash flow statement is presented for the Company.

Notes to the Financial Statements

1. Accounting policies

Numis Corporation Plc is a UK listed company incorporated and domiciled in the United Kingdom. The address of its registered office is 10 Paternoster Square, London, EC4M 7LT.

The principal accounting policies applied in the preparation of the annual report and financial statements of the Group and the Company are described below. These policies have been consistently applied to the years presented, unless otherwise stated.

(a) Basis of preparation

The Group and the Company financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU) and in accordance with International Financial Reporting Interpretations Committee (IFRIC) interpretations and the Companies Act 2006 applicable to companies reporting under IFRS. These financial statements have been prepared under the historical cost convention as modified by revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit and loss.

In publishing the Company financial statements together with those of the Group, the Company has taken advantage of the exemption in s408 of the Companies Act 2006 not to present its individual income statement and related notes.

The financial statements of the Group and the Company have been prepared on a going concern basis as the Directors have satisfied themselves that, at the time of approving the financial statements and having taken into consideration the strength of the Group and Company balance sheet and the Group's cash balances, the Group and Company have adequate resources to continue in operational existence for at least the next 12 months.

New standards and amendments to existing standards that have been adopted by the Group in the year ended 30 September 2011:

IFRS 2 (amendment) 'Group cash-settled share-based payment transactions' incorporates IFRIC 8 and IFRIC 11 and expands on the guidance given in IFRIC 11 to address the classification of group arrangements that were not covered by that interpretation. The Group's subsidiary and consolidated financial statements were already being prepared on a basis consistent with these amendments so there is no impact on the Group or Company's financial statements.

IAS 38 (amendment), 'Intangible assets', defines a prepayment as being recognised only if payment has been made in advance of receiving the right to goods or receipt of services. The Group's existing accounting policy for intangible assets was in-line with these amendments therefore there has been no impact to the Group' financial statements.

The following new standards, amendments and interpretations are mandatory for the first time for the Group's accounting period ended 30 September 2011 but are not currently relevant to the Group:

IFRS 1 (amendment) 'Additional Exemptions for First-time Adopters' provides various exemptions for certain first time adopters. As the Group and its subsidiaries adopted IFRS in its 2007 reporting period this is not relevant to the Group.

IFRS 5 (amendment), 'Non-current assets held for sale and discontinued operations', clarifies that all of a subsidiary's assets and liabilities as held for resale if a partial disposal will result in loss of control. This is not currently relevant to the Group as it does not have any non-current assets held for sale or discontinued operations.

IAS 1 (amendment), 'Presentation of financial statements' clarifies that the potential settlement of a liability by the issue of equity is not relevant to its classification as current or non-current. This is not currently applicable to the Group as there has been no settlement of a liability by an issue of equity.

Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group:

IAS 24 (revised), 'Related party disclosure' simplifies and expands the definition of a related party. This is not expected to have a material impact on the Group and the Company's financial statements.

IFRS 9 'Financial Instruments', introduces new requirements for classifying and measuring financial assets and is therefore likely to have some affect on the Group and Company's accounting for financial assets. However, the standard is not applicable until the Group's 2014 accounting year end and has not yet been endorsed by the EU. Consequently the Group has yet to fully assess the impact of IFRS 9 but initial indications are that the impact will not prove to be material.

IFRS 7 (amendment), 'Financial Instruments Disclosure' introduces new disclosure requirements about transfers

Notes to the Financial Statements

1. Accounting policies (continued)

of financial assets to help users of financial statements understand risk exposures (such as securitizations). This is not expected to have a material impact on the Group and the Company's financial statements.

(b) Basis of consolidation

The Group's financial statements consolidate the financial statements of the Company and all its subsidiary undertakings. Subsidiaries are all entities (including special purpose vehicles) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more the one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group control another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases

All intra Group transactions and balances are eliminated on consolidation and consistent accounting policies are used throughout the Group for the purposes of consolidation.

The purchase method of accounting is used to account for the acquisition of businesses and subsidiaries.

(c) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits associated with the transaction will flow into the Group. Revenue comprises institutional commissions, net trading gains or losses, corporate broking retainers, deal fees and placing commissions. Institutional commissions due are recognised on trade dates. Net trading gains or losses are the realised and unrealised profits and losses from market making long and short positions on a trade date basis and comprise all gains and losses from changes in the fair value of financial assets and liabilities held for trading, together with any related dividend on positions held. Net trading gains or losses also includes derivative contracts relating to equity options and warrants received in lieu of corporate finance fees. Corporate retainers are recognised on an accruals basis. Deal fees and placing commissions are only recognised once there is a contractual entitlement for Numis to receive them.

(d) Segment reporting

The Group is managed as an integrated investment banking business and although there are different revenue types the nature of Group's activities is considered to be subject to the same and/or similar economic characteristics. Consequently the Group is managed as a single business unit, namely investment banking. The chief operating decision-maker, who is responsible for allocating resources and assessing performance has been identified as the Chief Executive Officer.

(e) Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. Cost includes the original purchase price of the asset and the costs attributable to bring the asset to its working condition for its intended use. Depreciation is provided for on a straight line basis at the following rates:

Office and computer equipment	3 years
Motor vehicles	4 years
Furniture and fittings	5 years

Leasehold improvements are depreciated on a straight line basis over the term of the lease or estimated useful economic life whichever is the shorter.

(f) Intangible assets

Acquired computer software licences are capitalised where it is probable that future economic benefits that are attributable to the asset will flow to the Company or Group and the cost of the assets can be reliably measured. Software is stated at cost, including those costs incurred to bring to use the specific software, less amortisation and provisions for impairment, if any. Costs are amortised on a straight line basis over the estimated useful life of the software.

Costs associated with maintaining or developing the software are recognised as an expense when incurred.

(g) Impairment of assets

The carrying value of property, plant and equipment and intangibles is reviewed for impairment when events or changes in circumstance indicate the carrying value may be impaired. If such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss.

(h) Financial assets and liabilities

The Group classifies its financial assets and liabilities as trading investments, financial liabilities, derivative financial instruments, trade and other receivables, stock borrowing and lending collateral, cash and cash equivalents, trade and other payables and provisions. The classification depends on the purpose for which the assets and liabilities were acquired. Management determines the classification of its investments at initial

1. Accounting policies (continued)

recognition and re-evaluates this designation at each reporting date.

Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the Income Statement. Financial assets are derecognised when the right to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership. Financial liabilities are recognised on trade date and are derecognised when they are extinguished.

Trading investments and financial liabilities represent market making positions and other investments held for resale in the near term and are classified as held for trading. Purchases and sales of investments are recognised on trade date. Gains and losses arising from changes in fair value are taken to the income statement. Financial liabilities comprise short market making positions and include shares listed on the LSE Main and AIM markets as well as overseas exchanges.

For trading investments and financial liabilities which are quoted in active markets, fair values are determined by reference to the current quoted bid/offer price, with financial assets marked at the bid price and financial liabilities marked at the offer price. Where independent prices are not available, fair values are determined using valuation techniques with reference to observable market data. These may include comparison to similar instruments where observable prices exist, discounted cash flow analysis and other valuation techniques commonly used by market participants.

Financial assets included within trade and other receivables are classified as loans and receivables. Loans and receivables are non-derivative financial instruments which have a fixed or easily determinable value.

The Group makes an assessment at each balance sheet date as to whether there is any objective evidence of impairment, being any circumstance where an adverse impact on estimated future cash flows of the financial asset or group of assets can be reliably estimated.

(i) Derivative financial instruments

The Group utilises forward exchange contracts to manage the exchange risk on actual transactions related to amounts receivable, denominated in a currency other than the functional currency of the business. The Group has not sought to apply the hedging requirements of IAS 39.

The Group's forward exchange contracts do not subject the Group to risk from exchange rate movements because the gains and losses on such contracts offset losses and gains, respectively, on the underlying foreign currency transactions to which they relate. The forward contracts and related amounts receivable are recorded at fair value at each period end. Fair value is calculated using the settlement rates prevailing at the period end.

All gains and losses resulting from the settlement of the contracts are recorded within Finance Income/Costs in the income statement.

The Group does not enter into forward exchange contracts for the purpose of hedging future anticipated transactions.

Equity options and warrants are initially accounted for and measured at fair value on the date the Company or Group becomes a party to the contractual provisions of the derivative contract and subsequently measured at fair value. The gain or loss on re-measurement is taken to the income statement within revenue, as part of net trading gains or losses. Fair values are obtained from quoted prices prevailing in active markets, including recent market transactions and valuation techniques including discounted cash flow models and option pricing models as appropriate. All derivatives are included in assets when their fair value is positive and liabilities when their fair value is negative.

(j) Deferred tax

Deferred tax is provided in full, using the liability method, on all taxable and deductible temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilised.

(k) Stock borrowing / lending collateral

The Group enters stock borrowing and lending arrangements with certain institutions which are entered into on a collateralised basis with securities or cash advanced or received as collateral. Under such arrangements a security is purchased or sold with a commitment to return it at a future date at an agreed price. The securities purchased are not recognised on

Notes to the Financial Statements

1. Accounting policies (continued)

the balance sheet whereas the securities sold remain on the balance sheet with the transaction treated as a secured loan made for the purchase or sale price. Where cash has been used to effect the purchase or sale, an asset or liability is recorded on the balance sheet as stock borrowing or lending collateral at the amount of cash collateral advanced or received.

Where trading investments have been pledged as security these remain within trading investments and the value of security pledged disclosed separately except in the case of short-term highly liquid assets with an original maturity of 3 months or less, which are reported within cash and cash equivalents with the value of security pledged disclosed separately.

(l) Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due. Such evidence includes ageing of the debt, persistent lack of communication and internal awareness of third party trading difficulties.

The amount of any provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of provision is recognised in the income statement within administrative expenses.

Included within trade and other receivables are client, broker and other counterparty balances representing unsettled sold securities transactions which are recognised on a trade date basis.

(m) Trade and other payables

Trade and other payables are recognised initially at fair value, which is the agreed market price at the time goods or services are provided and are subsequently recorded at amortised cost using the effective interest method. The Group accrues for all goods and services consumed but as yet unbilled at amounts representing management's best estimate of fair value. Client, broker and other counterparty balances represent unsettled purchased securities transactions and are recognised on a trade date basis.

(n) Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(o) Provisions

Provisions are recognised for present obligations arising as consequences of past events where it is probable that a transfer of economic benefit will be necessary to settle the obligation and it can be reliably estimated. Provisions believed to relate to periods greater than 12 months are discounted to the net present value using an effective discount rate that reliably calculates the present value of the future obligation.

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is uncertain or cannot be reliably measured. Contingent liabilities are not recognised in the financial statements; however they are disclosed unless their likely occurrence is remote.

(p) Clients' deposits

All money held on behalf of clients has been excluded from the balances of cash and cash equivalents and amounts due to clients, brokers and other counterparties. Client money is not held directly, but is placed on deposit in segregated designated accounts with a bank. The amounts held on behalf of clients at the balance sheet date are included in Note 21.

(q) Pension costs

The Group has a Group Personal Pension Plan and death in service benefits that are available to full-time employees of the Group over the age of 18 who have served the Group for at least 3 months. The plan is a defined contribution scheme and costs of the scheme are charged to the income statement in the year in which they arise.

(r) Operating leases

Rentals under operating leases are charged to the income statement on a straight-line basis over the lease term even if the payments are not made on such a basis. Lease incentive received are recognised in the income statement as an integral part of the total lease expense.

(s) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements of the Group are presented in Sterling which is the Company's functional currency and the Group's presentation currency.

1. Accounting policies (continued)

In individual entities, transactions denominated in foreign currencies are translated into the functional currency at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at rates prevailing on the balance sheet date. Exchange differences are taken to the income statement, except for exchange differences arising on non-monetary assets and liabilities where the changes in fair value are taken directly to reserves. Non-monetary assets and liabilities carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined.

On consolidation, the results of overseas businesses are translated into the presentational currency of the Group at the average exchange rates for the period where these approximate to the rate at the date of transaction. If the average exchange rates for the period do not approximate to the rate at the date of transaction, income and expenses are translated at the rate on the dates of the transactions. Assets and liabilities of overseas businesses are translated into the presentational currency of the Group at the exchange rate prevailing at the balance sheet date. Exchange differences arising are classified as other reserves. Cumulative translation differences arising after the transition to IFRS are taken to the income statement on disposal of the net investment.

(t) Taxation

Taxation on the profit for the year comprises both current and deferred tax as well as adjustments in respect of prior years. Taxation is charged or credited to the income statement, except when it relates to items charged or credited directly to equity, in which case the tax is also included within equity. Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted, or substantially enacted by the balance sheet date.

(u) Employee share ownership plans

The Group has a number of Employee Share Ownership Plans (ESOP), as set out in Note 25, which provide a mechanism for the Board to award employees of the Group share-based payments on a discretionary basis. Employee Benefit Trusts established by the Company acquire ordinary shares in the Company to be held on trust for the benefit of, and ultimately distributed to, employees either on the exercise of share options or other remuneration arrangements.

In the case of equity settled awards, the cost of share awards made under employee share ownership plans, as measured by the fair value of awards at the date of granting, are taken to the income statement over the vesting period (if any), and disclosed under staff costs with a corresponding increase in equity. Fair value is based on the market value of the shares on the grant date. Where awards provide no entitlement to dividends over the vesting period the market value of the shares on grant date is discounted by the dividend yield over the expected life of the award.

In the case of cash settled awards, the cost of share awards made under employee share ownership plans, as measured by the fair value of awards at the date of granting, are taken to the income statement over the vesting period with a corresponding increase in provisions representing the cash obligation. Fair value is based on the market value of the shares on the grant date. At each subsequent accounting date the fair value of the obligation is re-assessed with reference to the underlying share price and the provision adjusted accordingly.

On consolidation, the cost of shares acquired by the Employee Benefit Trusts is deducted as an adjustment to equity. Gains and losses arising on Employee Benefit Trust related transactions are taken directly to equity. No expense is recognised in respect of option awards granted before 7 November 2002 or which have vested before 1 October 2005.

(v) Dividends

Dividend distribution is recognised in equity in the financial statements in the period in which dividends are paid. Final dividends are recognised at the date they are approved by shareholders at the Annual General Meeting.

(w) Critical accounting estimates and judgements

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those of estimates. The estimates and assumptions that have a significant effect on the carrying amounts of assets and liabilities are set out below:

Valuation of financial assets where there is no quoted price

Such assets principally comprise minority holdings in unquoted securities and are valued with reference to financial information available at the time of original

Notes to the Financial Statements

1. Accounting policies

investment updated to reflect all relevant changes to that information as at the reporting date. This determination requires significant judgement in determining changes in fair value since the last valuation date. In making this judgement the Group evaluates among other factors recent offerings or transaction prices, changes in the business outlook affecting a particular investment since purchase, performance of the underlying business against original projections, valuations of similar quoted companies and relevant industry valuation techniques, for example, discounted cashflow or market approach.

Valuation of quoted financial assets where there is no active market
Quoted investments held by the Group may not always be actively traded in financial markets. In such cases the Group applies appropriate valuation techniques to determine fair value.

Income taxes
The Group is subject to income taxes. Judgement is required in determining the extent to which it is probable that taxable profits will be available in the future against which deferred tax assets can be utilised. Based on forecasts the Group expects to recover its deferred tax assets within the next five years. If the Group forecasts were 10% higher or lower the Group would still expect to recover its deferred tax assets within the next five years.

Provisions
Estimate for provisions arising as a consequence of past events where it is probable that a transfer of economic benefit will be necessary to settle the obligation are based on management's best knowledge of the amount, event or actions. Provisions have been made in respect to litigation and obligations arising from cash elements of the Group's share scheme arrangements.

(x) Exceptional Items

Exceptional items are those significant items which are separately disclosed by virtue of their amount and incidence to enable a full understanding of the Company's and/or Group's financial performance.

In addition to the above accounting policies the following relate specifically to the Company:

(y) Investment in subsidiaries

Investments in subsidiaries are stated at cost less, where appropriate, provision for impairment. Where the Company makes equity settled awards for the benefit of its subsidiaries, the value of such awards is treated as an additional cost of investment in these subsidiaries.

2. Adjusted profit measures

The following table reconciles the statutory measures of profit/(loss) before tax, profit/(loss) after tax and earnings/(loss) per share to the adjusted measures used by management in their assessment of the underlying performance of the business:

	2010 £'000
Statutory group profit before tax	175
Items not included within adjusted profit before tax:	
Other operating income	(59)
Share scheme charge	7,313
National Insurance provisions related to share scheme awards	427
Exceptional non-recurring charge	–
Adjusted group profit before tax	7,856
Statutory group taxation	(276)
Tax impact of adjustments	(754)
Adjusted group taxation	(1,030)
Adjusted group profit after tax	6,826

	2010
Basic weighted average number of shares, number	102,770,978
Adjusted basic earnings per share, pence	6.6p
Adjusted diluted earnings per share, pence	6.2p

3. Profit of the parent company

As provided by Section 408 Companies Act 2006, the income statement of the parent company is not presented as part of these financial statements. The parent company's profit after tax for the financial year amounted to £6,691,000 (2010: £14,644,000).

4. Segmental information

Geographical information

The Group is managed as an integrated investment banking business and although there are different revenue types (which are separately disclosed in note 5) the nature of Group's activities is considered to be subject to the same and/or similar economic characteristics. Consequently the Group is managed as a single business unit, namely investment banking.

The Group earns its revenue in the following geographical locations:

	2010 £'000
United Kingdom	46,573
United States	5,367
	51,940

There are no customers which individually account for more than 10% of revenues.

Notes to the Financial Statements

4. Segmental information (continued)

The following is an analysis of the carrying amount of non-current assets (excluding financial instruments and deferred tax assets) by the geographical area in which the assets are located.

	2010 £'000
United Kingdom	1,814
United States	379
	2,193

Other information

In addition, the analysis below sets out the revenue performance and net asset split between our core investment banking & broking business and the small number of equity holdings which constitute our investment portfolio.

	2010 £'000
Net institutional income	26,478
Total corporate transaction revenues	20,640
Corporate retainers	4,822
Revenue from Investment Banking & Broking (see note 5)	51,940
Investment activity net gains	59
Contribution from Investing Activities	59
Total	51,999
Net assets	
Investment banking & broking	31,019
Investing activities	20,321
Cash and cash equivalents	55,370
Total net assets	106,710

5. Revenue

	2010 £'000
Net trading gains	3,418
Institutional commissions	23,060
Net institutional income	26,478
Corporate retainers	4,822
Deal fees	4,793
Placing commissions	15,847
	51,940

6. Other operating income

	2010 £'000
Investment income	68
Other	(9)
	59

Investment income represents gains made on trading investments which are held outside of the market making portfolio. These are referred to as the Group's investment portfolio.

7. Exceptional non-recurring charge

The exceptional non-recurring charge of £2,208,000 (2010: £Nil) comprises the net cost associated with the settlement of the Rock Well case, after taking into account associated external legal costs incurred in the year and amounts receivable. External legal costs incurred in the prior year were not material.

As noted in our market announcement on 6 July 2011, we reached an agreement to settle a legal claim brought against Numis in relation to a private placing of shares in Rock Well Petroleum Inc. in 2007 ("Rock Well"). In respect of the claim, which was valued at $95m, Numis has paid $8m without any admission of liability and the claimants have withdrawn their claim. The net cost associated with the Rock Well case has been presented as an exceptional non-recurring charge in the consolidated income statement by virtue of its size and incidence.

8. Operating loss

Operating loss is stated after charging:

	2010 £'000
Depreciation of property, plant and equipment	511
Amortisation of intangible assets	104
Operating lease costs	1,737
Staff costs (see note 9)	34,157
Auditors' remuneration	
Audit services	
Audit fee for Company's accounts and Annual Report	48
Year end audit services to the Subsidiaries of the Company	265
Other services	
Tax services	54
Regulatory services	35

Notes to the Financial Statements

9. Staff costs

Particulars of employees (including executive directors) are as shown below.

Employee costs during the year amounted to:

	2010 £'000
Wages and salaries	22,431
Social security costs	3,216
Compensation for loss of office	257
Other pension costs (see note 28d)	940
Share based payments	7,313
	34,157

The share based payment award costs shown above include an amount of £6,761,000 (2010: £6,679,000) in respect of share-based payment transactions which are accounted for as equity-settled awards. The share based payment charge arises from the combined impact of all historic unvested awards.

Number of staff employed:

	2010 Number
Average for the year	
Professional	136
Administration	53
	189
At the year end	191

Details of directors' emoluments are presented in the Remuneration Report on page 26.

10. Finance income

	2010 £'000
Interest income	614
Net foreign exchange gains	59
	673

Interest income comprises interest on surplus cash balances placed on call deposit and interest receivable on certain staff loans.

11. Finance costs

	2010 £'000
Interest expense	24
Net foreign exchange losses	–
	24

Interest expense comprises amounts paid on overdrawn balances with clearing institutions.

12. Taxation

The tax charge is based on the profit for the year and comprises:

	2010 £'000
Current tax	
Corporation tax at 27% (2010: 28%)	237
Corporation tax (over)/under provided in previous year	235
Total current tax	472
Deferred tax	
Origination and reversal of timing differences	(246)
Changes in tax rate	50
Total tax charge	276

Factors affecting the tax charge for the year:

	2010 £'000
Profit before tax	175
Profit before tax multiplied by the standard rate of UK corporation tax	49
Effects of:	
Expenses not deductible for tax purposes	183
Non taxable income	(639)
Losses available for utilisation but not recognised	258
Permanent differences in respect of share based payments	155
Corporation tax (over)/under provided in previous year	235
Changes in tax rate and other temporary differences	35
Total tax charge	276

13. Dividends

	2010 £'000
Final dividend for year ended 30 September 2009 (5.50p)	5,828
Interim dividend for year ended 30 September 2010 (4.00p)	4,276
Final dividend for year ended 30 September 2010 (4.00p)	
Interim dividend for year ended 30 September 2011 (4.00p)	
Distribution to equity holders of the parent	10,104

Dividends declared on shares held by the Employee Benefit Trusts that have not been purchased by or vested in employees are waived under the terms of the employee share ownership plan arrangements.

On 6 December 2011, the Board proposed a final dividend of 4.00p per share for the year ended 30 September 2011. This has not been recognised as a liability of the Group at the year end as it has not yet been approved by the shareholders. Based on the number of shares in issue at the year end the total amount payable would be £4,071,023.

Notes to the Financial Statements

14. Property, plant and equipment

Group

The movement during the year and the prior year was as follows:

	Furniture and fittings £'000	Leasehold improvements £'000	Office and computer equipment £'000	Motor vehicles £'000	Total £'000
Cost					
At 1 October 2010	960	2,275	2,771	164	6,170

15. Intangible assets

Group

The movement during the year and the prior year was as follows:

	2010 Purchased Software £'000
Cost	
At 1 October	1,149
Additions	26
Disposals	–
At 30 September	1,175
Accumulated amortisation	
At 1 October	1,003
Charge for the year	104
Disposals	–
At 30 September	1,107
Net book value	
At 1 October	146
At 30 September	68

16. Investment in subsidiary undertakings

a) Holding company investment in subsidiaries

	2010 £'000
As at 1 October	8,525
Additions (see below)	6,677
Disposals	–
As at 30 September	15,202

Additions reflect the accounting treatment required by IFRS 2 in relation to awards made under the Group's share plans which are accounted for as equity-settled share transactions and relate to employees in subsidiaries.

b) Subsidiaries

The holding company beneficially owns the issued share capital of the following companies:

Subsidiary	Country of incorporation	Principal activity	Group shareholding
Numis Securities Limited	United Kingdom	Financial services	100%
Numis Securities Inc*	United States of America	Financial services	100%
Numis Nominees (Client) Limited	United Kingdom	Dormant	100%
Numis Nominees (NSI) Limited*	United Kingdom	Dormant	100%
Numis Nominees Limited*	United Kingdom	Dormant	100%

* Held through a subsidiary of the Group

Notes to the Financial Statements

17. Derivative financial instruments

Group	£'000
At 1 October 2010	1,071
Additions	–
Exercise	(1,071)
Revaluation to fair value in the year recognised in the income statement	28
At 30 September 2011

Included in current assets – listed	–
Included in current assets – unlisted	809
Included in non-current assets – unlisted	262
	1,071

Holding company	£'000
At 1 October 2010	1,071
Exercise	(1,071)
Revaluation to fair value in the year recognised in the income statement	–
At 30 September 2011	

	2010 £'000
Included in current assets – unlisted	809
Included in non-current assets – unlisted	262
	1,071

The Group and the Company hold equity options and warrants over certain securities. Although the options and warrants themselves are not listed the underlying securities may be listed or otherwise. In the information presented above the listed and unlisted distinction relates to the underlying security. As at 30 September 2011 the fair value of outstanding foreign exchange contracts was £16,000 (2010: £nil).

18. Deferred tax

Group

The movement in the deferred tax balance is as follows:

	2010 £000
At 1 October	2,782
Amounts credited to the income statement	196
Amounts recognised on share based payments – equity	(179)
At 30 September	2,799

18. Deferred tax (continued)

	Capital allowances £'000	Share scheme arrangements £'000	Other £'000	Total £'000
1 October 2010	360	2,403	36	2,799
(Charged)/credited to income statement	(30)	(167)	(3)	(200)
Recognised in equity		(407)		(407)
30 September 2011				

As at 30 September 2011 deferred tax assets totalling £2,192,000 (2010: £2,799,000) have been recognised reflecting managements' confidence that there will be sufficient levels of future taxable gains against which the deferred tax asset can be utilised.

In addition to the changes in rates of corporation tax disclosed in note 12, a number of further changes to the UK corporation tax system were announced in the March 2011 UK Budget Statement. Legislation to reduce the main rate of corporation tax to 25% from 1 April 2012 was included in the Finance Act 2011 which was substantively enacted on 5 July 2011. Deferred tax has been calculated using 25%. Further reductions to the main rate are proposed to reduce the rate by 1% per annum to 23% by 1 April 2014. These further changes have not been substantively enacted at the balance sheet date and therefore are not included in these financial statements. The proposed reductions in the main rate are expected to be enacted separately each year. The overall effect of further changes from 25% to 23%, if applied to the deferred tax balance at the balance sheet date are not material.

Holding company
A deferred tax asset of £1,378,000 (2010: £1,533,000) relating to unrelieved trading losses incurred by the Company has not been recognised as there is insufficient supportable evidence that there will be taxable gains in the future against which the deferred tax asset could be utilised.

19. Trade and other receivables

The following amounts are included within trade and other receivables:

	2010 £'000
Group	
Due from clients, brokers and other counterparties (excluding corporate finance receivables)	208,217
VAT receivable	–
Loans to employees	18,043
Other debtors, including corporate finance receivables	6,575
Prepayments and accrued income	2,502
	235,337

Trade and other receivables are stated net of impairment adjustments totalling £186,000 (2010: £170,000). The movement in impairment provision during the year comprised £11,000 for utilisation of provisions and £27,000 charge to the income statement through administrative expenses. Loans to employees principally arise from arrangements under the Group's share schemes.

	2010 £'000
Holding company	
Amounts due from subsidiaries	18,589
Other debtors	2,327
	20,916

Notes to the Financial Statements

20. Trading investments

	2010 £'000
Group	
Listed on the LSE main market	6,984
Listed on AIM	23,683
Listed overseas	1,473
Unlisted UK investments	4,434
	36,574

As at 30 September 2011 £1,000,000 (2010: £5,069,000) of trading investments has been pledged to certain institutions under stock lending arrangements.

	2010 £'000
Holding company	
Listed on AIM	14,443
Unlisted UK investments	4,196
	18,639

21. Cash and cash equivalents

	2010 £000
Group	
Cash and cash equivalents included in current assets	55,370

Cash and cash equivalents comprise cash in hand and deposits held at call with banks and other institutions. .

The balances exclude interest-bearing deposits of clients' monies placed by the Group with banks on an agency basis. All such deposits are designated by the banks as clients' funds and are not available to the banks to satisfy any liability the Group may have with them at that time. The balance at 30 September 2011 held on deposit for legacy private clients was £92,505 (2010: £89,883). Similarly cash held in segregated bank accounts in respect of other client monies amounted to £1,146,000 (2010: £nil).

22. Trade and other payables

	2010 £'000
Group	
Amounts due to clients, brokers and other counterparties	205,041
VAT payable	89
Social security and PAYE	1,398
Sundry creditors	1,407
Accruals	11,258
	219,193
Holding company	
Amounts due to subsidiaries	2,473

23. Provisions

The movements in provisions during the year and during the prior year were as follows:

	Share scheme arrangements £'000
Group	
At 1 October 2010	612
Recognised in the income statement	(67)
Recognised in equity in respect of vested share awards	(247)
At 30 September 2011	

	LTIP £'000
At 1 October 2009	1,126
Recognised in the income statement	108
Recognised in equity in respect of vested share awards	(622)
At 30 September 2010	612

	2010 £'000
Included in current liabilities	263
Included in non-current liabilities	349
	612

The provision relates to the cash settled element of the Groups' share scheme arrangements, and is determined with reference to all the unvested awards that are expected to vest (taking into account management's estimates regarding fulfilment of vesting conditions) and the year end share price. Amounts recognised in equity relate to awards which vested in the year.

24. Share capital and Other reserves

Share capital
Group and holding company

	2010 £'000
Authorised	
140,000,000 (2010: 140,000,000) 5p ordinary shares	7,000
Allotted, issued and fully paid	
112,443,302 (2010: 111,869,340) 5p ordinary shares	5,593

During the year 573,962 ordinary shares were issued for a total consideration £689,677 of which £660,979 has been included as share premium. Shares issued during the year were in respect of scrip dividend elections. Share issuances made during the year in respect of the ESOP totalled nil (2010: nil).

Notes to the Financial Statements

24. Share capital and Other reserves (continued)

Movements in the number of outstanding share options during the year and their weighted average exercise prices are as follows:

	2011		2010	
	Average exercise price (pence per share)	Outstanding options	Average exercise price (pence per share)	Outstanding options
At 1 October	31.61	1,261,025	31.97	1,286,025
Exercised	–	–	50.50	(25,000)
At 30 September			31.61	1,261,025

The date range over which the above options may be exercised is set out in the table below. The overall weighted average life of the remaining options is 3.35 years (2010: 4.35 years).

At 30 September 2011 the following options granted to employees to acquire ordinary shares in the Company were outstanding:

Grant date	Number of options outstanding	Exercise price	Earliest exercise date	Latest exercise date
15 May 2001	1,136,025	30.0p	15 May 2005	15 May 2015
8 August 2002	125,000	46.2p	8 August 2005	8 August 2012

In accordance with IFRS 1 'First-time adoption of International Financial Reporting Standards', the Company and Group has chosen not to apply IFRS 2 'Share Based Payments' ("IFRS 2") to share options granted before 7 November 2002 that had not vested by 1 October 2005. Consequently there is no requirement to provide fair values for the outstanding options.

Other reserves

Group

	Foreign exchange translation £'000	Equity settled share plans £'000	Total other reserves £'000
Attributable to equity holders of the parent at 1 October 2010	231	9,746	9,977

Attributable to owners of the parent at 30 September 2010	231	9,746	9,977

24. Share capital and Other reserves (continued)

Other reserves

Holding company

	Equity settled share plans £'000
Attributable to equity holders of the parent at 1 October 2010	9,746
Employee share plans: value of employee service	6,761
Employee share plans: transfer to retained profit on vesting of awards	(3,953)
Attributable to owners of the parent at 30 September 2011	

Attributable to equity holders of the parent at 1 October 2009	6,523
Employee share plans: value of employee service	6,679
Employee share plans: transfer to retained profit on vesting of awards	(3,456)
Attributable to owners of the parent at 30 September 2010	9,746

25. Employee share schemes

The Company has established employee benefit trusts in respect of the Group share schemes which are funded by the Group and have the power to acquire shares from the Company or in the open market to meet the Group's future obligations under these schemes. As at 30 September 2011 the trusts owned 10,667,733 ordinary 5p shares in the Company (2010: 9,517,681) with a market value of £9.5m as at 30 September 2011 (2010: £12.6m).

	2010 Number of shares
At 1 October	7,592,503
Acquired during the year	9,285,088
Shares vested in employees	(3,687,698)
Shares used to satisfy issuances during the year	(3,647,212)
Shares used to satisfy option exercises	(25,000)
At 30 September	9,517,681

The figures in the above table are presented on a trade date basis.

At 30 September 2011 the number of shares held by the trusts in respect of awards made to, but not yet vested in, employees totalled 9,205,417 (2010: 9,342,863). During the year further awards of 4,044,698 shares (2010: 4,278,725 shares) were granted at a weighted average share price of 102.63p (2010: 140.5p). The weighted average market price on grant date for all awards made during the year was 115.5p (2010: 143.2p).

A description of the Groups' share schemes and their operation is set out below:

Long Term Incentive Plan (LTIP) 2003 Scheme

The Board approved this plan on 28 April 2003 and it was approved by shareholders on 5 June 2003.

Eligibility
Any Director of the Company, or a Group company, and any employee of the Company, or a Group company, may be invited to participate in the plan.

Nature of plan
The scheme provides a framework by which employees are awarded a free share in exchange for their purchasing a stake in the Company.

The free, or "matching", shares replicate the number of shares purchased by the participant. Both the purchased and matching shares are held in trust by the Trustee, EES Trustees International Limited, for five years, after which time the participant has full entitlement if they continue to be employed by the Group at that date.

Notes to the Financial Statements

25. Employee share schemes (continued)

On vesting, the matching shares are sold by the Trustee and the proceeds passed to the participant. The purchased shares are transferred into the personal ownership of the participant. Awards granted under this scheme are cash settled.

US Restrictive Stock Plan (USRSP) 2003 Scheme

The Board approved this plan on 28 April 2003 and it was approved by shareholders on 5 June 2003.

Eligibility
Any Director or employee of Numis Securities Incorporated (NSI), the wholly owned subsidiary of Numis Securities Limited (NSL), itself a wholly owned subsidiary of Numis Corporation Plc, may be invited to participate in the plan.

Nature of plan
The mechanics of the scheme are the same as the LTIP 2003 scheme. Differences arise in treatment of awards under differing tax jurisdictions.

Long Term Incentive Plan (LTIP) 2008 Scheme

The Board approved this plan on 4 December 2007 and it was approved by shareholders on 29 January 2008.

Eligibility
Any Director of the Company, or a Group company, and any employee of the Company, or a Group company, may be invited to participate in the plan.

Nature of plan
The scheme is similar to the 2003 LTIP scheme. The concept of the Company awarding free shares to match the shares purchased by the participant at the award date remains the same. However, this scheme is administered by a different Trustee, EES Nominees International Limited, and maintained within a separate Trust company. The vesting conditions too are different; under this scheme, shares vest in three equal tranches at the end of the third, fourth and fifth anniversaries of the award date if the participant continues to be employed by the Group at these dates.

On vesting, the matching and purchased shares are transferred into the personal ownership of the participant. Awards granted under this scheme are equity settled.

US Restrictive Stock Plan (USRSP) 2008 Scheme

The Board approved this plan on 4 December 2007 and it was approved by shareholders on 29 January 2008.

Eligibility
Any Director or employee of Numis Securities Incorporated (NSI), the wholly owned subsidiary of Numis Securities Limited (NSL), itself a wholly owned subsidiary of Numis Corporation Plc, may be invited to participate in the plan.

Nature of plan
The scheme operates in the same way of the LTIP 2008 scheme. Differences arise in treatment of awards under differing tax jurisdictions.

Restricted Stock Unit (RSU) 2008 Plan

The Board approved this plan on 4 December 2007 and it was approved by shareholders on 29 January 2008.

Eligibility
Any Director of the Company, or a Group company, and any employee of the Company, or a Group company, may be invited to participate in the plan.

Nature of plan
This scheme is open to both UK and US directors and employees and operates as a deferred bonus payment in the form of shares. Awards vest in the hands of the participant in three equal tranches at the end of the first, second and third anniversaries following the award date if they continue to be employed by the Group on those dates. Awards granted under this scheme are equity settled.

25. Employee share schemes (continued)

The movement in award shares for each share incentive award scheme is detailed in the tables below:

	LTIP 2003 Number of shares	USRSP 2003 Number of shares	LTIP 2008 Number of shares	USRSP 2008 Number of shares	RSU 2008 Number of shares	Total Number of shares
Award shares at 1 October 2009	1,030,701	181,465	3,778,039	1,112,918	9,916,324	16,019,447
New awards	–	11,912	3,522,212	198,073	546,528	4,278,725
Vesting of awards	(380,021)	–	–	–	(3,307,677)	(3,687,698)
Forfeiture of awards	(54,877)	–	(210,842)	–	(463,043)	(728,762)
Award shares at 30 September 2010	595,803	193,377	7,089,409	1,310,991	6,692,132	15,881,712

Option Schemes

A number of historic option schemes remain which were formulated between 1993 and 2001. The earliest date of exercise was generally three years after the date of grant. No awards have been made under such schemes since August 2002. As at 30 September 2011 there were 1,261,025 unexercised options outstanding (2010: 1,261,025) details of which are shown in Note 24.

26. Loss per share

Basic loss per share is calculated on a loss after tax of £671,000 (2010: loss £101,000) and 101,819,473 (2010: 102,770,978) ordinary shares being the weighted average number of ordinary shares in issue during the year. Diluted earnings per share takes account of contingently issuable shares arising from share scheme award arrangements where their impact would be dilutive. In accordance with IAS 33, potential ordinary shares are only considered dilutive when their conversion would decrease the profit per share or increase the loss per share from continuing operations attributable to the equity holders. Therefore shares that may be considered dilutive while positive earnings are being reported may not be dilutive while losses are incurred.

The calculations exclude shares held by the Employee Benefit Trust on behalf of the Group.

	2010 Number Thousands
Weighted average number of ordinary shares in issued during the year – basic	102,771
Dilutive effect of share awards	7,992
Diluted number of ordinary shares	110,763

There were no potential ordinary shares whose conversion would have resulted in an increase in the basic loss per share. The table above shows the diluted number of ordinary shares that would have been appropriate if the Group had reported a profit after tax in both 2011 and 2010.

Notes to the Financial Statements

27. Consolidated cash flow statement

Group

Reconciliation of operating loss to net cash from operating activities:

	2010 £000
Operating loss	(474)
Depreciation charges on property, plant and equipment	511
Amortisation charges on intangible assets	104
Share scheme charge	7,313
Decrease/(increase) in current asset trading investments	(3,580)
Decrease/(increase) in trade and other receivables	(62,184)
Net movement in stock borrowing /lending collateral	(1,178)
(Decrease)/increase in trade and other payables	60,635
Decrease in derivatives	1,576
Net cash flows from operating activities	2,723

Holding company

The Company does not hold any cash balances, and cash based transactions are effected on its behalf by Numis Securities Limited, a wholly owned subsidiary. The operating profit of the Company includes losses on investments of £40,993 (2010: losses of £185,000) and investing activity related dividend income of £720,689 (2010: £772,000) that passed through intercompany accounts. The issuance of shares during the year did not involve any cash flows.

28. Guarantees and other financial commitments

a) Capital commitments

Amounts contracted for but not provided in the accounts amounted to £nil for the Group (2010: £nil).

b) Contingent liabilities

In the ordinary course of business, the Group has given letters of indemnity in respect of lost certified stock transfers and share certificates. No claims have been received in relation to the year ended 30 September 2011 (2010: nil). The contingent liability arising thereon cannot be quantified, although the directors do not believe that any material liability will arise under these indemnities.

The Company currently has in place an unlimited guarantee to the Company's bankers, Barclays Bank plc for the debts of Numis Securities Limited. As at 30 September 2011 Numis Securities Limited did not have any indebtedness to Barclays Bank plc (2010: nil).

The Company has given a guarantee to Pershing LLC for any indebtedness of Numis Securities Inc., an indirect wholly owned subsidiary of the Company. Pershing LLC provides securities clearing and settlement services to Numis Securities Inc. for some of its broker activities. As at 30 September 2011 Numis Securities Inc. did not have any indebtedness to Pershing LLC (2010: nil).

c) Operating leases

At 30 September 2011 the Group had annual commitments under non-cancellable operating leases in respect of land and buildings of £1,717,000 (2010: £1,737,000). The total future aggregate minimum lease payments are as follows:

	Property 2010 £'000
Within one year	–
In two to five years	–
After five years	20,332
	20,332

28. Guarantees and other financial commitments (continued)

The annual property rental on the principal property leased by the Group was subject to review in September 2011 and remains unchanged. The next review date is September 2016 with the end of the lease period being September 2021 .

d) Pension arrangements
The pension cost charge for the year was £953,000 (2010: £940,000).

A defined contribution Group Personal Pension Plan has been in operation since 6 April 1997 for all full-time employees of the Group over the age of 18 who have served the Group for at least 3 months. The Group Personal Pension Plan is funded through monthly contributions. The Group contributes 7% of members' salaries with members contributing at least 2.5% of their salary. Employees who join the Group Personal Pension Plan are eligible for death-in-service benefits.

29. Financial risk management

Group

Risk Management
The Group places great weight on the effective management of exposures to market, credit, liquidity and operational risk and our risk management policies and framework are designed to identify, monitor and manage such exposures to ensure that the operating activities of the Group are managed within the risk parameters set out by the Plc Board (the Board).

The Group's risk management framework is designed to incorporate all material risks to which the Group is or may be exposed. The Board is responsible for supervision of the risk management framework, approval of risk management policies and setting the overall risk appetite of the Group. All risk management functions ultimately report to the Board. The Board receives regular risk management reporting which provides an assessment of the exposures across the Group together with more detailed reports on market, credit and liquidity risk amongst others.

Risk exposures are monitored, controlled and overseen by separate but complementary committees which consist of senior management from revenue generating areas, compliance and finance. Management oversight and segregation of duties are fundamental to the risk management framework.

The Audit & Risk Committee is responsible for the evaluation and maintenance of the Group's control framework and ensuring that policies are in place and operating effectively to identify, assess, monitor and control risk throughout the Group. The Audit & Risk Committee receives risk updates which detail the Group's exposure to market, credit, liquidity, and operational risks. Controls and polices are reviewed and challenged to ensure their effectiveness and to reflect changes in requirements and best practice.

The Risk Oversight Committee is responsible for exercising senior level oversight of all risk-related issues (both financial and non-financial). It has specific responsibility for the in-depth assessment and reporting of all material risks faced by the Group including the selection and scoring of the risks, the implementation of appropriate key risk indicators and controls designed to provide risk mitigation.

The Financial Risk Committee is responsible for ensuring that the day-to-day operating activities are managed within the financial risk appetite and controls framework approved by the Board and the Audit & Risk Committee and has delegated responsibility for preparing the risk management policies for review and approval by the Board and the Audit & Risk Committee. The Financial Risk Committee reviews the detailed components of market, credit and liquidity risk exposures of the business to ensure that such risks are monitored and assessed appropriately. The Committee met 30 times during the year. As a minimum, the Financial Risk Committee reviews:

- market risk exposures associated with our equity and derivative positions
- trading book and individual stock Value-at-Risk (VaR) with comparison to limits resulting excesses
- performance of the trading book overall and at individual stock level
- credit risk exposures to trading counterparties and deposit-taking counterparties
- liquidity and concentration risk of the cash and cash equivalent assets

Notes to the Financial Statements

29. Financial risk management (continued)

- currency risk exposures of foreign currency denominated deposits
- capital resources of the Group compared to the Capital Requirements Directive Pillar I capital requirement and additional internal economic capital measures
- client asset requirements and resources

The Finance department has day-to-day responsibility for monitoring and reporting risk exposures within the Group and escalation of issues to senior management. In addition to daily reporting of market, credit and liquidity risk key indicators to senior management, automated intraday reporting is in place for credit exposures and associated credit limit breaches (hourly) and individual stock VaR limit breaches (continuously). Our trading system has real-time trading book, stock and VaR limit alerts to flag individual stock holdings and trading book positions which are approaching their predefined limit.

Independent assurance of the suitability and effectiveness of the Group's risk management framework and controls is provided to the Audit & Risk Committee by the utilisation of an outsourced, independent Internal Audit function.

Market Risk-Equity Risk
The Group is affected by conditions in the financial markets and the wider economy through its holdings of equity investments arising through the normal course of its market making, trading and investing activities. Equity risk arises from the exposures of these holdings to changes in prices and volatilities of equity prices. An adverse movement in the fair value of our holdings has consequences for the capital resources of the Group and therefore it is important for management to understand the potential impact of such movements.

The Group utilises a VaR model to measure market risk. The model uses a "Historical Simulation" approach which shocks market risk positions by the actual daily market moves observed during a rolling 256 business day window. The sum of the simulated returns for each of the 256 days is calculated and the VaR is defined as being the 3rd worst loss during this period. This approach is an accepted industry standard and gives the Group an understanding of the market risks being taken.

VaR limits are set at both individual stock level and portfolio level and are approved by the Board. Such limits are incorporated into the Group's front office trading system so that real time monitoring of VaR exposures is available to both front office staff and relevant risk management staff. On a daily basis the Finance department computes the Historical Simulation VaR risk measure based on the end of day portfolio of holdings. The results are reported to senior management at the end of each day against limits with all resulting excesses highlighted. Similarly the risk measures are also compared to the daily revenue performance and our capital resources.

Alongside the use of VaR limits, there are absolute monetary position limits managed through the use of individual stock position and trading book limits, such limits being established for at gross and net position level.

The table below shows the highest, lowest, and average total long, short, gross, and net position in listed securities during the year, together with positions at year end.

				2010
	Long	Short	Gross	Net
	£'000	£'000	£'000	£'000
Highest position	40,235	(14,764)	51,063	31,663
Lowest position	29,725	(4,625)	34,773	21,536
Average position	34,614	(7,778)	42,392	26,836
As at 30 September 2010	32,140	(6,692)	38,832	25,448

29. Financial risk management (continued)

The table below shows the highest, lowest, average and year end equity VaR.

	2010 £'000
Highest VaR	1,182
Lowest VaR	267
Average VaR	423
As at 30 September	427

In addition the Group holds positions totalling £777,000 (2010: £5,505,000) in unlisted securities. These are reported to senior management together with positions in listed securities on a daily basis.

Trading investments

Equity risk on the trading investments held within the market making book is the day to day responsibility of the Head of Trading, whose decision making is independently monitored. Trading investments held outside the market making activities are monitored by the CEO, Finance Director and senior management.

Equity risk is managed through a combination of cash investment limits applied to the entire trading book coupled with VaR limits set at individual stock level and portfolio level. These limits are approved by the Board, the Audit & Risk Committee, and the Financial Risk Committee, and monitored and reported by the Finance department daily. Breaches of the stock and portfolio limits are initially flagged in real time on the trading platform and monitored by the traders and the Finance department. Breaches are either addressed by the traders or, if they are unable to take corrective action, will be discussed with the Finance department and reported to senior management as part of the routine end of day reporting mechanism. Breaches are also summarised weekly and presented to the Financial Risk Committee along with reasons for the breaches and corrective action required to bring them within limits.

An annual sensitivity analysis based on a 10% increase/decrease in underlying equity prices on the trading investments held at the year end indicates that the impact of such a movement would be to increase/decrease respectively profit in the income statement by £3,073,000 (2010: £3,657,000).

Financial liabilities

Financial liabilities comprise short positions in quoted stocks arising through the normal course of business in facilitating client order flow. Equity risk on financial liabilities is the day to day responsibility of the Head of Trading. Exposures of this nature are monitored in exactly the same way as trading investments above as these positions form part of the trading book.

A sensitivity analysis based on a 10% increase/decrease in underlying equity prices on the financial liabilities held at the year end indicates that the impact of such a movement would be to decrease/increase respectively profit in the income statement by £198,000 (2010: £669,000).

Derivative financial instruments

Derivative financial instruments comprise equity options and warrants over listed and unlisted securities and are predominantly received by the Group as non-cash consideration for advisory and other services. This category may also include foreign exchange contracts used to hedge known transactional exposures arising from normal operational activities.

Equity risk arising on derivatives is the day to day responsibility of the Head of Trading. Exposures are measured using the Group's VaR methodology and reported to senior management daily along with a detailed inventory of options and warrant holdings which are either in-the-money or close to being in-the-money.

A 10% increase/decrease in underlying equity prices of the derivative financial instruments held at the year end indicates that the impact of such a movement on the profit in the income statement would be an increase of £27,000 (2010: £107,000) and decrease of £12,000 (2010: £107,000) respectively.

Notes to the Financial Statements

29. Financial risk management (continued)

Market Risk-Currency Risk

Currency risk arises from the exposure to changes in foreign exchange spot and forward prices and volatilities of foreign exchange rates. The Group is exposed to the risk that the Sterling value of the assets, liabilities or profit and loss could change as a result of foreign exchange rate movements.

There are three sources of currency risk to which the Group may be exposed. Firstly, foreign currency denominated financial assets and liabilities arising as a result of trading in foreign securities, secondly, foreign currency financial assets and liabilities as a result of foreign currency denominated corporate finance fees, supplier payments or Treasury activities and finally foreign currency denominated investments in subsidiaries of the Group. The Finance Department is responsible for monitoring the Group's currency exposures which are reported to senior management daily.

Currency risk is measured using a similar VaR methodology as that used for the Group's measurement of equity risk. The table below shows the highest, lowest and average foreign currency VaR for 2011 compared against 2010 figures.

	2010 £'000
Highest VaR	247
Lowest VaR	51
Average VaR	108
As at 30 September	83

The Group's net assets by currency as at 30 September 2011 were as follows:

2010						
Sterling equivalent	94,263	2,967	451	8,516	513	106,710

The Group hedges all significant transactional currency exposures arising from trading activities using spot or forward foreign exchange contracts. Derivative financial instruments held to manage such currency exposure as at 30 September 2011 had a fair value of £16,000 (2010 £nil). The Group does not hedge future anticipated transactions. Currency exposure to foreign currency denominated corporate finance receivables and supplier payables is not considered material.

The table below shows the impact on the Group's results of a 10 cent movement in the US$ and Euro in terms of transactional and translational exposures.

10 cent increase (strengthening £):

	US $ £'000	Euro £'000	Total £'000
Profit before tax			
Equity			

10 cent decrease (weakening £):

	US $ £'000	Euro £'000	Total £'000
Profit before tax			
Equity			

29. Financial risk management (continued)

Market Risk-Interest Rate Risk
Interest rate risk arises as a result of changes to the yield curve and the volatilities of interest rates.

The Group's interest bearing assets are predominantly held in cash or cash equivalents. Excess cash funds may be invested in Gilts, held on short term floating rate terms or placed on overnight or short-term deposit. Investment of excess funds into cash equivalent instruments may occur from time-to-time depending on the management's view of yields on offer, liquidity requirements, and credit risk considerations. As the Group has limited exposure to interest rate risk and has no external debt (2010: £nil) it does not use derivative instruments to hedge interest rate risk.

The table below shows the interest rate profile of the Group's cash and cash equivalent investments and, while not interest bearing, also shows the Group's exposure to listed equity investments as these have an indirect sensitivity to significant changes and volatility of interest rates.

			2010
	Cash and cash equivalents	Listed equity investments	Total
Currency	£'000	£'000	£'000
Sterling	47,443	22,853	70,296
US Dollars	5,907	2,224	8,131
Euro	1,176	354	1,530
Canadian Dollars	424	17	441
Other	420	–	420
At 30 September	55,370	25,448	80,818
Fixed Rate	–		
Floating Rate	55,370		

In addition to the above, cash collateral balances of £5,758,000 (2010: £2,811,000) and net stock borrowing/(lending) balances of £1,330,000 (2010: £37,000) are subject to daily floating rate interest.

A sensitivity analysis based on a 100 basis point increase/decrease to prevailing market rates of interest as at 30 September 2011 indicates that the impact of such a movement on the profit in the income statement and equity would be a decrease of £nil (2010: £nil) and increase of £nil (2010: £nil) respectively. This reflects the fact that the Group has no material exposures to fair value movements arising from changes in the market rate of interest as at 30 September 2011 or 2010.

Fair value estimation
Disclosure of financial instruments that are measured on the balance sheet at fair value is based on the following fair value measurement hierarchy:

- Level 1: Quoted prices unadjusted in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly as prices or indirectly derived from prices; and
- Level 3: Inputs for the asset or liability which are not based on observable market data.

Notes to the Financial Statements

29. Financial risk management (continued)

There were no transfers between Level 1 and Level 2 during the year.

Movements in financial assets categorised as Level 3 during the year were:

	2011 £'000
At 1 October 2010	5,505
Total losses included in other operating income in the income statement	(237)
Transfer out to Level 1	(129)
Additions	312
Disposals	(4,690)
At 30 September 2011	

Transfers out to Level 1 relate to an equity holding in a company that listed on the London Stock Exchange part way through the year. Previously it was a private company for which there was no observable market data to determine its fair value.

The carrying value of assets and liabilities not held at fair value (cash and cash equivalents, trade and other receivables, trade and other payables, provisions and stock borrowing and lending collateral) are not significantly different from fair value.

Movements in financial assets categorised as Level 3 during the year were:

	2011 £'000
At 1 October 2010	5,267
Total losses included in other operating income in the income statement	(237)
Transfer out to Level 1	(129)
Additions	–
Disposals	(4,690)
At 30 September 2011	

Transfers out to Level 1 are as described above for the movement at Group.

The carrying value of assets and liabilities not held at fair value (trade and other receivables and trade and other payables are not significantly different from fair value.

29. Financial risk management (continued)

Credit Risk-Counterparty Risk

Credit risk is the potential loss that the Group would incur if a counterparty fails to settle its contractual obligations or there is a failure of a deposit taking institution. Credit risk exposure therefore arises as a result of trading, investing, and financing activities. The primary source of credit risk faced by the Group is that arising from the settlement of equity trades carried out in the normal course of business.

The credit risk on a particular equity trade receivable is measured by reference to the original amount owed to the Group less any partial payments less any collateral to which the Group is entitled. For example, in accordance with the delivery versus payment principle, the potential exposure at default sustained by the Group would not be the amount of the outstanding receivable balance, but rather the amount representing commission due to the Group and any residual exposure from market risk on the underlying equity after a sell-out (or buy-in) has been carried out.

An internal stress test is employed in order to measure the credit risk exposure faced by the Group. This is a historical 20-day VaR methodology based on both the severe stock market movements during 2008-09 and a conservative judgement of the likelihood of counterparty default. This assessment is applied to the end of day equity trade receivable and payable balances and the results are reported to senior management on a daily basis.

Credit risk exposures are also managed by the use of individual counterparty limits applied initially on the categorisation of the counterparty (for example, hedge fund, long only fund, broker, etc.) and assessed further according to the results of an external credit rating and/or relevant financial indicators and/or news flow. From time to time certain counterparties may be placed on an internal watch list in reaction to adverse news flow or market sentiment. The Finance department prepares a summary daily report for senior management which indentifies the top 40 individual counterparty exposures measured against their limits, the major stock positions which make up the exposure and a list of the largest failing trades. This reporting incorporates the Sterling equivalent gross inward, outward and net cash flow exposure. Finally, automated hourly intra-day reporting of all gross inward, outward and net cash flow exposures by individual counterparty against assigned limits is monitored by the Finance department to ensure appropriate escalation and mitigation action is taken.

Trade receivables relating to fees due on the Group's corporate finance and advisory activities are monitored on a weekly basis.

The current framework for the reporting and monitoring of credit risk has proved to be a robust control during recent periods of market volatility and credit related issues impacting the market in general. The Group has not sustained any credit risk default losses and has achieved a substantial reduction in its stress test measurement through active management and reduction of credit exposures when appropriate. Where possible, the Group seeks to enter into netting arrangements with counterparties that permit the offset of receivables and payables.

Cash and cash equivalents are held in Gilts or with large UK based commercial clearing banks all of whom have had credit ratings at or above AA- Fitch investment grade throughout the year. Credit exposures may be further reduced by diversification of deposits across a number of institutions.

The Group's financial assets are analysed by their ageing in the table below and represent the maximum exposure to credit risk as at 30 September 2011 of balance sheet financial instruments before taking account of any collateral held or other credit enhancements. As at 30 September 2011 there were no collateral amounts held by the Group as security against amounts receivable (2010: £nil).

Notes to the Financial Statements

29. Financial risk management (continued)

As at 30 September 2010 (£'000)	Not Overdue	Overdue not impaired: 0 to 3 months	3 to 6 months	6 to 9 months	9 to 12 months	Over 1 year	Impaired	Total
Derivative financial instruments	1,071	–	–	–	–	–	–	1,071
Trade and other receivables	224,387	8,764	17	12	–	30	170	233,380
Trading investments	36,574	–	–	–	–	–	–	36,574
Stock borrowing collateral	5,106	–	–	–	–	–	–	5,106
Cash and cash equivalents	55,370	–	–	–	–	–	–	55,370
	322,508	8,764	17	12	–	30	170	331,501

Credit Risk-Concentration Risk
Concentration risk is the risk arising from exposures to groups of connected parties, counterparties in the same sector, or counterparties undertaking the same activity. Concentration risk arises, in particular, with respect to the Group's exposures to unsettled securities trades. These exposures are monitored intra day on an hourly basis using the credit risk exposure reports and process outlined above. In addition, as orders are taken, system-generated warnings are given of any counterparties whose order is above £5m in size.

As at 30 September 2011 the exposure to the following categories of counterparty was as follows: brokers £106m (2010: £120m), long only funds £51m (2010: £78m), hedge funds £17m (2010: £3m) and other £14m (2010: £8m).

Concentration of credit risk to a particular counterparty or issuer may also arise from deposits placed with commercial banks, investments in cash equivalents and as a result of normal trading activity through Central Counterparties, such as the London Clearing House. The credit quality of these counterparties is kept under review by management. Concentration of trading investments by market is disclosed in note 20. There are no significant concentration risks arising in any other class of financial asset as at 30 September 2011 (2010: £nil).

Liquidity Risk
Liquidity risk is the risk that funds are either not available to service day-to-day funding requirements or are only available at a high cost or need to be arranged at a time when market conditions are unfavourable and consequently the terms are onerous. Liquidity is of vital importance to the Group to enable it to continue operating in even the most adverse circumstances.

29. Financial risk management (continued)

The Group assesses its liquidity position on a daily basis and computes the impact of various stress tests to determine how liquidity could be impacted under a range of different scenarios. The Group currently maintains substantial excess liquidity so that it can be confident of being able to settle transactions and continue operations even in the most difficult foreseeable circumstances.

The Group's financial liabilities are expected to mature in the following periods:

As at 30 September 2011 (£'000):

	Less than 3 months	3 months to 1 year	1 to 5 years	Over 5 years	Total
Trade and other payables	215,326	645	514	–	216,485
Financial liabilities	6,692	–	–	–	6,692
Stock lending collateral	5,069	–	–	–	5,069
Provisions	263	–	349	–	612
	227,350	645	863	–	228,858

As at 30 September 2010 (£'000):

	Less than 3 months	3 months to 1 year	1 to 5 years	Over 5 years	Total
Trade and other payables	215,326	645	514	–	216,485
Financial liabilities	6,692	–	–	–	6,692
Stock lending collateral	5,069	–	–	–	5,069
Provisions	263	–	349	–	612
	227,350	645	863	–	228,858

Capital Risk

The Group manages its capital resources on the basis of regulatory capital requirements under Pillar 1 and its own assessment of capital required to support all material risks throughout the business (Pillar 2). The Group manages its regulatory capital through an Internal Capital Adequacy Assessment Process (known as the ICAAP) in accordance with guidelines and rules implemented by the Financial Services Authority (FSA). Under this process the Group is satisfied that there is either sufficient capital to absorb potential losses or that there are mitigating controls in place which make the likelihood of the risk occurring remote.

Both the minimum regulatory capital requirement and the Pillar 2 assessment are compared with total available regulatory capital on a daily basis and monitored by the Finance department. The excess capital resources, under both measurements, are reported to the Financial Risk Committee daily and to the Audit & Risk Committee and the Board at each time they meet.

On 30 September 2011, the UK regulated entity had £76m (2010: £76m) of regulatory capital resources, which is comfortably in excess of both its regulatory capital requirement (Pillar 1) and the internally measured capital requirement (Pillar 2).

For Pillar 1 capital, the Group has adopted the standardised approach to credit risk and market risk and the basic indicator approach for operational risk. Compliance with FSA capital related regulatory requirements was maintained throughout the year.

Operational Risk

Operational risk is the risk of loss arising from short-comings or failures in internal processes, people or systems, or from external events. Operational risk can also be impacted by factors such as the loss of key staff, the quality of execution of client business, the maintenance of performance management controls, and a major infrastructural failure and/or terrorist event.

Notes to the Financial Statements

29. Financial risk management (continued)

The Group takes steps to identify and avoid or mitigate operational risk wherever possible. Continuously evolving control standards are applied by suitably trained and supervised individuals and senior management is actively involved in identifying and analysing operational risks to find the most effective and efficient means to mitigate and manage them. Enhancements to staff training programmes and Internal Audits occur throughout the year.

Valuation techniques
The fair value of certain financial assets has been determined using valuation techniques as described in accounting policy note 1(w). The combined fair value of such financial assets as at 30 September 2011 was £761,000 (2010: £5,505,000) and the movement in fair value recognised in the income statement during the year amounted to a £237,000 loss (2010: £1,206,000 loss).

Fair value of financial instruments
There is no material difference between the book values and the fair values of the Group's financial assets and liabilities.

Holding Company

The risk management processes for the Company are aligned with those of the Group as a whole and fully integrated into the risk management framework, processes and reporting outlined in 'Risk Management' within the Governance section on page 22 and in the Group section of this note starting on page 61. The Company's specific risk exposures are explained below:

Equity risk
The Company is exposed to equity risk on its trading investments, derivative financial instruments and investments in subsidiaries. Trading investments comprise holdings in quoted and unquoted securities whereas derivative financial instruments have historically comprised warrants over unquoted securities.

In addition to risk measures reported on the Group's equity-based holdings as a whole, a sensitivity analysis based on a 10% increase/decrease in the underlying equity prices on the aggregate trading investments and derivative financial instruments held at the year end has been performed and indicates that the impact of such a movement would be to increase/decrease respectively profit in the income statement by £1,498,000 (2010: £1,197,000).

Currency risk
The Company has no material exposure to transactional or translational foreign currency risk as it rarely undertakes transactions in currencies other than Sterling and consequently rarely has financial assets or liabilities denominated in currencies other than Sterling.

Interest rate risk
The Company has no material exposure to interest rate risk as it has limited interest bearing assets and liabilities.

Credit risk
The Company has exposure to credit risk from its normal activities where there is a risk that a counterparty will be unable to pay in full amounts when due. The Company's counterparties are primarily its subsidiaries or employees of the Group and therefore there has limited external credit risk exposure.

Liquidity risk
The Company has no cash and cash equivalent balances. The management of the Group's ability to meet its obligations as they fall due is set out in the Group section of this note. The Company manages its liquidity risk by utilising surplus liquidity within the Group through transactions which pass through intercompany accounts when it is required to meet current liabilities.

Fair value of financial instruments
There is no material difference between the book values and fair values of the Company's financial assets and liabilities.

30. Post balance sheet events

Final dividend
A final dividend of 4.00p per share (2010: 4.00p) was proposed by the directors at their meeting on 6 December 2011. These financial statements do not reflect this dividend payable.

31. Related party transactions

Group

a) Intra-group trading

Transactions or balances between Group entities have been eliminated on consolidation and, in accordance with IAS 24, are not disclosed in this note.

b) Key management compensation

The compensation paid to key management is set out below. Key management has been determined as the executive management teams of the Group and its operating subsidiaries, who are also directors of those subsidiaries:

	2010 £'000
Salaries and short term employment benefits	2,309
Post-employment benefits	53
Share based payments	1,801
	4,163

The above amounts include those paid to directors of the holding company.

c) Share scheme loans

Under the terms of the Group's share scheme arrangements, participants may be offered a loan in order to fund their purchased shares. The loans outstanding to key management as at 30 September 2011 amounted to £1,642,000 (2010: £1,806,000). Such loans are made at market rates and the amounts outstanding are secured by shares held within the Employee Benefit Trusts and will be settled in cash. No guarantees have been given or received and no expense for bad or doubtful debts has been recognised in the year in respect of amounts owed.

d) Dealings with Directors

During the year, Urless Farm, a company controlled by Mr and Mrs O Hemsley charge the Group £23,500 (2010: £nil) in respect of services provided.

Holding Company

a) Transactions between related parties

Details of transactions between the Company and its subsidiaries, which are related parties of the Company, are set out as follows: amounts owed to the Company from subsidiaries are disclosed in note 19 and amounts owed by the Company to subsidiaries are disclosed in note 22.

b) Key management compensation

The compensation paid to key management is set out below.

	2010 £'000
Salaries and short term employment benefits	720
Post-employment benefits	14
Share based payments	23
	757

Details of the remuneration of each director, including the highest paid director, can be found within the Remuneration report on page 26. The compensation in the above table has been paid and recognised by a subsidiary of the holding company.

Notice of Annual General Meeting

Please see the explanatory notes attached to this notice.

NOTICE is hereby given that the Annual General Meeting of Numis Corporation Plc (the "Company") will be held at The London Stock Exchange Building, 10 Paternoster Square, London EC4M 7LT on Thursday 2 February 2012, at 11.00 a.m. to consider and, if thought fit, pass the following resolutions, of which resolutions 1 to 6 will be proposed as ordinary resolutions and resolutions 7 and 8 will be proposed as special resolutions:

1. To receive and adopt the Company's annual accounts for the financial year ended 30 September 2011, together with the directors' report and auditors' report for such year.

2. To declare a final dividend for the year ended 30 September 2011 of 4p per ordinary share payable on 17 February 2012 to shareholders on the register at the close of business on 16 December 2011.

3. To reappoint as a director Ms Lorna Tilbian, who is retiring by rotation in accordance with the Company's Articles of Association and, being eligible, offers herself for election.

4. To reappoint as a director Mr Geoffrey Vero, who is retiring by rotation in accordance with the Company's Articles of Association and, being eligible, offers himself for election.

5. To reappoint PricewaterhouseCoopers LLP as auditors, to hold office from the conclusion of this meeting until the conclusion of the next Annual General Meeting of the Company at which accounts are laid and to authorise the directors to fix their remuneration.

Ordinary resolution – authority to allot relevant securities

6. That:

(i) The directors be generally and unconditionally authorised pursuant to section 551 of the Companies Act 2006 ("the Act") to exercise all the powers of the Company to allot shares in the Company and to grant rights to subscribe for, or to convert any security into, shares in the Company ("Relevant Securities"), up to a maximum aggregate nominal amount equal to £1,872,180.95 (equivalent to 37,443,619 shares), provided that:

a) this authority shall expire at the conclusion of the next Annual General Meeting of the Company or (if earlier) unless previously revoked, varied or renewed by the Company in a general meeting;

b) the Company shall be entitled to make, prior to the expiry of such authority, any offer or agreement which would or might require Relevant Securities to be allotted after the expiry of this authority and the directors may allot Relevant Securities pursuant to such offer or agreement as if this authority had not expired; and

c) all prior authorities to allot Relevant Securities be revoked but without prejudice to any allotment of Relevant Securities already made thereunder.

Special resolution – disapplication of statutory pre-emption rights

7. That, subject to and conditional upon the passing of resolution 6 set out in the notice of this meeting, the directors be generally empowered pursuant to sections 570 and 573 of the Act to allot equity securities (as defined in section 560 of the Act) for cash pursuant to the authority conferred by the said resolution 6, as if section 561(1) of the Act did not apply to any such allotment, provided that this power shall be limited to:

a) the allotment of equity securities in connection with an issue by way of rights (including, without limitation, under a rights issue, open offer or similar arrangement) in favour of ordinary shareholders on the register on a date fixed by the directors in proportion (as nearly as may be practicable) to the respective numbers of ordinary shares held by them on that date, but subject to such exclusions and/or other arrangements as the directors may deem necessary or expedient to deal with fractional entitlements or any legal, regulatory or practical difficulties under the laws of any territory, or the requirements of any regulatory body or stock exchange, or as regards shares in uncertificated form; and,

b) the allotment (otherwise than pursuant to sub-paragraph a) above) of equity securities having an aggregate nominal amount not exceeding £281,108.25 (equivalent to 5,622,165 shares), and this power shall expire at the conclusion of the next Annual General Meeting of the Company or (if earlier), unless previously revoked, varied or renewed, save that the Company may before such expiry make an offer or agreement which would or might require equity securities to be allotted after such expiry and the directors may allot equity securities in pursuance of such offer or agreement as if the power conferred hereby had not expired.

Special resolution – authority to purchase Company's own shares

8. That the Company be generally authorised pursuant to section 701 of the Act to make market purchases (within the meaning of section 693(4) of the Act) of ordinary shares of 5p each in the capital of the Company on such terms and in such manner as the directors shall determine, provided that:

a) the maximum number of ordinary shares hereby authorised to be purchased is limited to an aggregate of 11,244,330 shares (equivalent to £562,216.50);

b) the minimum price, exclusive of any expenses, which may be paid for each ordinary share is 5p;

c) the maximum price, exclusive of any expenses, which may be paid for each ordinary share is an amount equal to 105 per cent. of the average of the middle market quotations for an ordinary share of the Company as derived from the London Stock Exchange Daily Official List for the five business days immediately preceding the date on which such share is contracted to be purchased;

d) this authority shall expire at the conclusion of the next Annual General Meeting of the Company or (if earlier), unless previously revoked, varied or renewed; and,

e) the Company may make a contract to purchase ordinary shares under this authority prior to the expiry of this authority which will or may be executed wholly or partly after the expiry of such authority, and may make a purchase of ordinary shares pursuant to any such contract as if such authority had not expired.

By order of the Board

Simon Denyer
Group Finance Director & Company Secretary
16 December 2011

Registered Office
10 Paternoster Square
London EC4M 7LT

Notice of Annual General Meeting

Notes:

Right to appoint a proxy
Members of the Company are entitled to appoint a proxy to exercise all or any of their rights to attend and to speak and vote at a meeting of the Company. A proxy does not need to be a member of the Company. A member may appoint more than one proxy in relation to a meeting provided that each proxy is appointed to exercise the rights attached to a different share or shares held by that member.

A proxy form which may be used to make such appointment and give proxy directions accompanies this notice. If you do not receive a proxy form and believe that you should have one, or if you require additional proxy forms in order to appoint more than one proxy, please contact the Company's Registrar, Computershare Investor Services PLC, on 0870 707 1203.

Procedure for appointing a proxy
To be valid, the proxy form must be received by post or (during normal business hours only) by hand at the office of the Company's Registrar, Computershare Investor Services PLC, The Pavilions, Bridgwater Road, Bristol BS99 6ZY, no later than 31 January 2012 at 11.00 a.m. (or, in the case of any adjournment, not later than 48 hours before the time fixed for the adjourned meeting). It should be accompanied by the power of attorney or other authority (if any) under which it is signed or a notarially certified copy of such power or authority.

The return of a completed proxy form will not preclude a member from attending the Annual General Meeting and voting in person if he or she wishes to do so.

Record date
To be entitled to attend and vote at the Annual General Meeting (and for the purpose of the determination by the Company of the votes they may cast), members must be registered in the register of members of the Company as at 11.00 a.m. on 31 January 2012 or, in the event of any adjournment, 48 hours before the time of the adjourned meeting). Changes to the register of members after the relevant deadline will be disregarded in determining the right of any person to attend and vote at the meeting.

Corporate representatives
Any corporation which is a member can appoint one or more corporate representatives who may exercise on its behalf all of its powers as a member provided that they do not do so in relation to the same shares.

Communications
Members who have general enquiries about the meeting should use the following means of communication. No other means of communication will be accepted. You may:

- call our members' helpline on 0870 707 1203 or
- write to Computershare Investor Services PLC, The Pavilions, Bridgwater Road, Bristol, BS99 6ZZ.

Explanatory Notes to the Notice of Annual General Meeting

In the following notes, references to the "current" issued share capital of the Company are to the 112,443,302 issued ordinary shares of 5p each in the capital of the Company in issue as at the close of business on 3 January 2012 (being the latest practicable date before the publication of this document).

Resolution 1 – Report and accounts
The directors are required to present the accounts for the year ended 30 September 2011 to the meeting.

Resolution 2 – Declaration of final dividend
A final dividend can only be paid if it is recommended by the directors and approved by the shareholders at a general meeting. The directors propose that a final dividend of 4p per ordinary share be paid on 17 February 2012 to ordinary shareholders who are on the register at the close of business on 16 December 2011. Shareholders are being offered the option to receive new ordinary shares as an alternative to cash in respect of this dividend.

Resolutions 3 and 4 – Reappointment of directors
The Articles of Association of the Company require the nearest number to one third of the directors to retire at each Annual General Meeting. In addition, any director who has been appointed since the last Annual General Meeting must retire and may offer him or herself for re-election and such directors are not counted in calculating the number of directors to retire by rotation.

Resolution 5 – Reappointment of auditors
The Company is required to appoint auditors at each Annual General Meeting to hold office until the next such meeting at which accounts are presented. The resolution proposes the reappointment of the Company's existing auditors, PricewaterhouseCoopers LLP, and authorises the directors to agree their remuneration.

Resolution 6 – Authority to allot relevant securities
The Company requires the flexibility to allot shares from time to time and with effect from 1 October 2009, the Companies Act 2006 (the "Act") abolished the requirement for a company to have an authorised share capital. The directors will still be limited as to the number of shares they can at any time allot because allotment authority continues to be required under the Companies Act 2006, save in respect of employee share schemes.

The directors' existing authority to allot "relevant securities" (including ordinary shares and/or rights to subscribe for or convert into ordinary shares), which was granted (pursuant to section 551 of the Companies Act 2006) at the Annual General Meeting held on 1 February 2011, will expire at the end of this year's Annual General Meeting. Accordingly, paragraph (i) of resolution 6 would renew and increase this authority (until the next Annual General Meeting or unless such authority is revoked or renewed prior to such time) by authorising the directors (pursuant to section 551 of the Act) to allot relevant securities up to an aggregate nominal amount equal to approximately one third of the current issued share capital of the Company. Save in respect of the issue of new ordinary shares pursuant to the Company's share incentive schemes or as a result of scrip dividends, the directors currently have no plans to allot relevant securities, but the directors believe it to be in the interests of the Company for the Board to be granted this authority, to enable the Board to take advantage of appropriate opportunities which may arise in the future.

Resolution 7 – Disapplication of statutory pre-emption rights
This resolution seeks to disapply the pre-emption rights provisions of section 561 of the Act in respect of the allotment of equity securities for cash pursuant to rights issues and other pre-emptive issues, and in respect of other issues of equity securities for cash up to an aggregate nominal value of £281,108.25 (5,622,165 shares), being an amount equal to approximately 5 per cent. of the current issued share capital of the Company. If given, this power will expire at the same time as the authority referred to in resolution 6. The directors consider this power desirable due to the flexibility afforded by it. Save in respect of the issue of new ordinary shares pursuant to the Company's share incentive schemes, the directors have no present intention of issuing any equity securities for cash pursuant to this disapplication.

Explanatory Notes to the Notice of Annual General Meeting

Resolution 8 – Authority to purchase Company's own shares

The Articles of Association of the Company provide that the Company may from time to time purchase its own shares subject to statutory requirements. Such purchases must be authorised by the shareholders at a general meeting. This resolution seeks to grant the directors authority (until the next Annual General Meeting or (if earlier), unless such authority is revoked or renewed prior to such time) to make market purchases of the Company's own ordinary shares, up to a maximum of 11,244,330 shares, being an amount equal to approximately 10 per cent. of the current issued share capital of the Company. The maximum price payable would be an amount equal to 105 per cent. of the average of the middle market quotations for an ordinary share of the Company for the five business days immediately preceding the date of purchase and the minimum price would be the nominal value of 5p per share. Although the directors have no current intention to make such purchases, they consider that it is in the best interests of the Company and its shareholders to keep the ability to make market purchases of the Company's own shares in appropriate circumstances, without the cost and delay of a general meeting. The authority would only be exercised if the directors believe the purchase would enhance earnings per share and be in the best interests of shareholders generally. The Company may hold in treasury any of its own shares that it purchases in accordance with the authority conferred by this resolution. This would give the Company the ability to re-issue treasury shares quickly and cost-effectively and would provide the Company with greater flexibility in the management of its capital base.

Documents available for inspection

There will be available for inspection at the registered office of the Company during normal business hours on any weekday (excluding Saturdays, Sundays and public holidays), and for at least 15 minutes prior to and during the Annual General Meeting, copies of:

(1) the service contract of each executive director and the letter of appointment of each non-executive director; and,

(2) the Articles of Association of the Company.

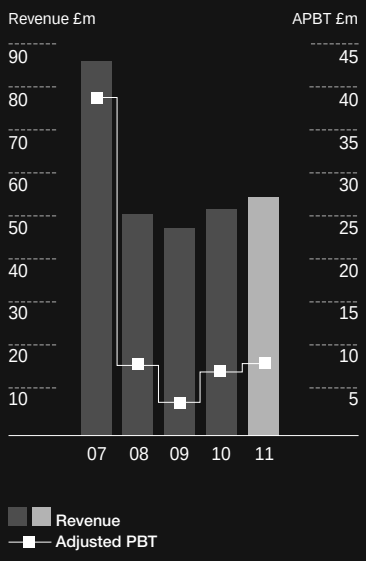
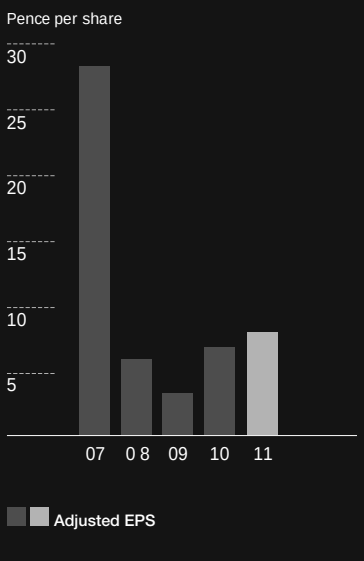
Five Year Summary

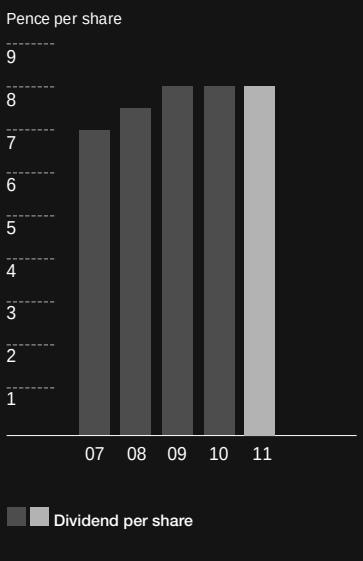
Revenue and Adjusted PBT



Adjusted EPS Performance



Dividend Performance



-30.9%

Annual compound fall in adjusted profit before tax over 5 years reflecting the decline in primary revenues as UK equity fund raising activity across the market have curtailed due to economic uncertainties.

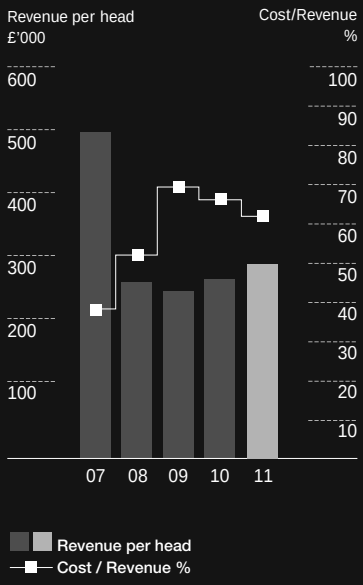
-28.4%

Annual compound fall in adjusted EPS over 5 years reflecting the challenging markets but also an improving trend against a backdrop of extremely uncertain market conditions.

3.4%

Annual compound growth in total dividend per share over 5 years reflecting our strong balance sheet and capital position which has enabled us to maintain the dividend over the broad economic cycle.

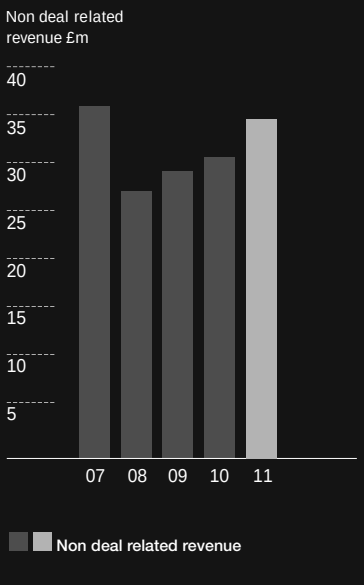
Cost Ratio and Revenue per Head



-12.8%

Annual compound decline in revenue per head over 5 years reflecting challenging market conditions but our willingness to invest in high calibre staff whilst keeping staff costs under control.

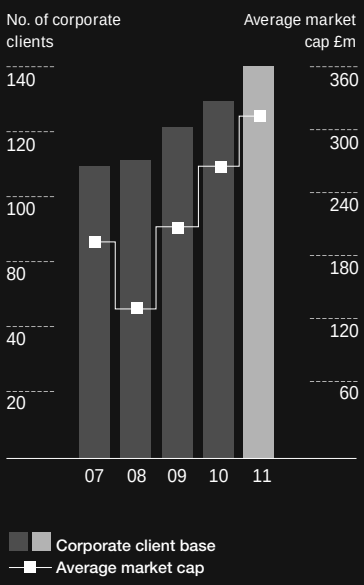
Non Deal Related Revenue



-1.3%

Annual compound trend in non deal revenue over 5 years reflecting the resilient performance of institutional commission, increased market share and growth in corporate clients.

Corporate Client Base and Average Market Cap



13.0%

Annual compound growth in average market capitalisation of our corporate client base over 5 years reflecting the growing quality of our client base and our success in winning FTSE 250 brokerships which now total 25.
