## PART I

### ITEM 1. BUSINESS

We prepare our financial statements in accordance with U.S. generally accepted accounting principles (GAAP). This report includes certain forward-looking information that is based on current expectations and is subject to a number of risks and uncertainties. For details on forward-looking information, see Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), Part II, Item 7, of this report.

Aflac Incorporated qualifies as a large accelerated filer within the meaning of Exchange Act Rule 12b-2. Our Internet address is aflac.com. The information on the Company's Web site is not incorporated by reference in this annual report on Form 10-K. We make available, free of charge on our Web site, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments thereto as soon as reasonably practicable after those forms have been electronically filed with or furnished to the Securities and Exchange Commission (SEC).

#### General Description

Aflac Incorporated (the Parent Company) was incorporated in 1973 under the laws of the state of Georgia. Aflac Incorporated is a general business holding company and acts as a management company, overseeing the operations of its subsidiaries by providing management services and making capital available. Its principal business is supplemental health and life insurance, which is marketed and administered through its subsidiary, American Family Life Assurance Company of Columbus (Aflac), which operates in the United States (Aflac U.S.) and as a branch in Japan (Aflac Japan). Most of Aflac's policies are individually underwritten and marketed through independent agents. Aflac U.S. markets and administers group products through Continental American Insurance Company (CAIC), branded as Aflac Group Insurance. Our insurance operations in the United States and our branch in Japan service the two markets for our insurance business.

Aflac offers voluntary insurance policies in Japan and the United States that provide a layer of financial protection against income and asset loss. We continue to diversify our product offerings in both Japan and the United States. Aflac Japan sells voluntary supplemental insurance products, including cancer plans, general medical indemnity plans, medical/sickness riders, care plans, living benefit life plans, ordinary life insurance plans and annuities. Aflac U.S. sells voluntary supplemental insurance products including products designed to protect individuals from depletion of assets (accident, cancer, critical illness/ care, hospital intensive care, hospital indemnity, fixed-benefit dental, and vision care plans) and loss-of-income products (life and short-term disability plans).

We are authorized to conduct insurance business in all 50 states, the District of Columbia, several U.S. territories and Japan. Aflac Japan's revenues, including realized gains and losses on its investment portfolio, accounted for 72% of the Company's total revenues in 2014, compared with 74% in 2013 and 77% in 2012. The percentage of the Company's total assets attributable to Aflac Japan was 82% at December 31, 2014, compared with 85% at December 31, 2013.

#### Results of Operations

For information on our results of operations and financial information by segment, see MD&A and Note 2 of the Notes to the Consolidated Financial Statements in this report.

#### Foreign Currency Translation

For information regarding the effect of currency fluctuations on our business, see the Foreign Currency Translation and Market Risks of Financial Instruments - Currency Risk subsections of MD&A and Notes 1 and 2 of the Notes to the Consolidated Financial Statements in this report.

## Insurance Premiums

The growth of earned premiums is directly affected by the change in premiums in force and by the change in weighted-average yen/dollar exchange rates. Consolidated earned premiums were \$19.1 billion in 2014, \$20.1 billion in 2013, and \$22.1 billion in 2012. For additional information on the composition of earned premiums by segment, see Note 2 of the Notes to the Consolidated Financial Statements in this report. The following table presents the changes in annualized premiums in force for Aflac's insurance business for the years ended December 31.

(In millions)	2014	2013	2012
Annualized premiums in force, beginning of year	\$ 20,440	\$ 22,689	\$ 22,472
New sales, including conversions	2,513	2,963	4,129
Change in unprocessed new sales	13	66	183
Premiums lapsed and surrendered	(2,146)	(2,154)	(2,173)
Other	(29)	17	(9)
Foreign currency translation adjustment	(1,897)	(3,141)	(1,913)
Annualized premiums in force, end of year	\$ 18,894	\$ 20,440	\$ 22,689

### Insurance - Japan

We translate Aflac Japan's annualized premiums in force into dollars at the respective end-of-period exchange rates. Changes in annualized premiums in force are translated at weighted-average exchange rates. The following table presents the changes in annualized premiums in force for Aflac Japan for the years ended December 31.

(In millions of dollars and billions of yen)	In Dollars			In Yen		
	2014	2013	2012	2014	2013	2012
Annualized premiums in force, beginning of year	\$ 14,870	\$ 17,238	\$ 17,284	1,567	1,492	1,344
New sales, including conversions	1,080	1,539	2,641	115	149	211
Change in unprocessed new sales	13	66	183	1	6	14
Premiums lapsed and surrendered	(695)	(717)	(845)	(74)	(70)	(68)
Other	(145)	(115)	(112)	(15)	(10)	(9)
Foreign currency translation adjustment	(1,897)	(3,141)	(1,913)	0	0	0
Annualized premiums in force, end of year	\$ 13,226	\$ 14,870	\$ 17,238	1,594	1,567	1,492

For further information regarding Aflac Japan's financial results, sales and the Japanese economy, see the Aflac Japan Segment subsection of MD&A in this report.

### Insurance - U.S.

The following table presents the changes in annualized premiums in force for Aflac U.S. for the years ended December 31.

(In millions)	2014	2013	2012
Annualized premiums in force, beginning of year	\$ 5,570	\$ 5,451	\$ 5,188
New sales, including conversions	1,433	1,424	1,488
Premiums lapsed	(1,451)	(1,437)	(1,328)
Other	116	132	103
Annualized premiums in force, end of year	\$ 5,668	\$ 5,570	\$ 5,451

For further information regarding Aflac's U.S. financial results, sales and the U.S. economy, see the Aflac U.S. Segment subsection of MD&A in this report.

### Insurance Products - Japan

Aflac Japan's insurance products are designed to help consumers pay for medical and nonmedical costs that are not reimbursed under Japan's national health insurance system. Changes in Japan's economy and an aging population have put increasing pressure on Japan's national health care system. As a result, more costs are being shifted to Japanese

consumers, who in turn have become increasingly interested in insurance products that help them manage those costs. Aflac Japan has responded to this consumer need by enhancing existing products and developing new products.

Aflac Japan's product portfolio has expanded beyond traditional health-related products to include more life products. Some of the life products that we offer in Japan provide death benefits and cash surrender values. These products are available as stand-alone policies and riders. Some plans, such as our WAYS product, have features that allow policyholders to convert a portion of their life insurance to medical, nursing care, or fixed annuity benefits at a predetermined age. Our child endowment product offers a death benefit until a child reaches age 18. It also pays a lump-sum benefit at the time of the child's entry into high school, as well as an educational annuity for each of the four years during his or her college education. We believe that life insurance (first sector product) provides further opportunities for us to sell our cancer and medical insurance (third sector products) through cross-selling opportunities.

In early 2002, we introduced EVER, a stand-alone, whole-life medical product which offers a basic level of hospitalization coverage with an affordable premium. Since its initial introduction, we have expanded our suite of EVER product offerings to appeal to specific types of Japanese consumers and achieve greater market penetration. New EVER, introduced in 2009, offered enhanced surgical benefits and gender-specific premium rates. An upgrade to our New EVER product, released in January 2012, included more advanced medical treatment options than its predecessor. The most recent upgrade to our New EVER product, released in August 2013, introduced outpatient coverage prior to hospitalization and enhanced coverage for short-term hospitalization with premium levels to attract a younger generation of consumers, an area in which we are currently underpenetrated. Gentle EVER, our non-standard medical product, is designed to meet the needs of certain consumers who cannot qualify for our base EVER plan. The most recent upgrade to our Gentle EVER product, released in July 2012, includes expanded benefits and a newly attached advanced medical care rider. We continue to believe that the entire medical category will remain an important part of our product portfolio in Japan.

Aflac pioneered the cancer insurance market in Japan in 1974, and we remain the number one provider of cancer insurance today. Over the years, we've customized our cancer product to respond to, and anticipate, the needs of our consumers and the advances in medical treatments. The cancer insurance plans we offer in Japan provide a lump-sum benefit upon initial diagnosis of internal cancer and benefits for treatment received due to internal cancer such as fixed daily benefits for hospitalization, outpatient services and convalescent care, and surgical and terminal care benefits. In September 2014, Aflac Japan introduced New Cancer DAYS, a new cancer product which provides enhanced coverage, including outpatient treatments and multiple cancer occurrence benefits. At the same time, premiums for this product have been lowered for most ages compared to prior plans. As the number one provider of cancer insurance in Japan, we believe this product further strengthens our brand, and most importantly, provides valuable benefits to consumers who are looking for solutions to manage cancer-related costs. We are convinced that the affordable cancer products Aflac Japan provides will continue to be an important part of our product portfolio.

We also offer traditional fixed-income annuities and care policies. For additional information on Aflac Japan's products and composition of sales, see the Aflac Japan Segment subsection of MD&A in this report.

## **Insurance Products - U.S.**

We design our U.S. insurance products to provide supplemental coverage for people who already have major medical or primary insurance coverage. Most of our U.S. policies are individually underwritten and marketed through independent agents. Additionally, we started to market and administer group insurance products in 2009.

Our individually issued policies are portable and pay benefits regardless of other insurance. Most products' benefits are paid in cash directly to policyholders; therefore, our customers have the opportunity to use this cash to help with expenses of their choosing. Our individually issued health insurance plans are typically guaranteed-renewable for the lifetime of the policyholder (to age 75 for short-term disability policies). Our group insurance policies are underwritten on a group basis and often have some element of guaranteed issue.

Aflac U.S. offers accident coverage on both an individual and group basis. These policies are designed to protect against losses resulting from accidents. The accident portion of the policy includes lump-sum benefits for accidental death, dismemberment and specific injuries as well as fixed benefits for hospital confinement. In addition, other benefits such as short-term disability are available as riders.

Aflac U.S. offers short-term disability benefits on both an individual and group basis. In 2013, we introduced a completely redesigned group short-term disability product with enhanced benefit options and higher income replacement amounts. In 2014, this group short-term disability product was introduced in additional states, formally completing the active launch of the product to the U.S. market.

Aflac U.S. offers coverage for critical illnesses on both an individual and group basis. These policies are designed to protect against losses resulting from critical illnesses such as heart attack, stroke, or cancer. On an individually underwritten basis we offer cancer plans, critical illness/critical care plans, critical care and recovery plans (formerly called specified health event) and hospital intensive care plans. On a group basis we offer critical illness/critical care plans. In 2014, we updated our individual critical care plan to increase initial diagnosis benefits and expand coverage for additional heart conditions.

Aflac U.S. offers hospital indemnity coverage on both an individual and group basis. Our hospital indemnity products provide policyholders fixed dollar benefits triggered by hospitalization due to accident or sickness, or just sickness alone. Indemnity benefits for inpatient and outpatient surgeries, as well as various other diagnostic events, are also available. In 2014, we introduced a new lump sum rider that can be added to our individual accident, short-term disability and hospital indemnity products. The rider may not be available on all these products in all states. This rider provides a lump sum payment for a wide range of critical illness events including traumatic brain injury, Type 1 diabetes, advanced Alzheimer's disease, advanced Parkinson's disease and many more. In 2013, we introduced a new individual hospital plan, designed to provide flexible options for consumers as they deal with out of pocket expenses associated with new medical plans that have emerged with the implementation of the Affordable Care Act of 2010 (ACA). This product focuses on providing benefits triggered by a wide variety of hospital services, including emergency visits, surgeries, and diagnostics, as well as benefits relating to traditional hospital stays. In 2013, we also updated our group hospital plan which provides multiple hospital admission amounts for an employer to choose, giving the flexibility to more closely match the out of pocket expenses associated with the employer's level of major medical coverage. In addition, we added a wellness benefit to specified levels of coverage, supporting healthier habits with employees and promoting lower health plan utilization for employers.

Aflac U.S. offers fixed-benefit dental coverage on both an individual and group basis. Aflac U.S. also offers Vision Now<sup>SM</sup>, an individually issued policy which provides benefits for serious eye health conditions and loss of sight. Vision Now also includes coverage for corrective eye materials and exam benefits. Aflac U.S. offers term and whole-life policies on both an individual and group basis. In 2014, Aflac introduced a new individual life portfolio which includes a guarantee-issue individual term life policy if participation requirements are met.

For additional information on Aflac's U.S. products and composition of sales, see the Aflac U.S. Segment subsection of MD&A in this report.

## **Distribution - Japan**

The traditional channels through which we have sold our products are independent corporate agencies, individual agencies and affiliated corporate agencies. The independent corporate agencies and individual agencies that sell our products give us better access to workers at a vast number of small businesses in Japan. Agents' activities are primarily focused on insurance sales, with customer service support provided by the Aflac Contact Center. Independent corporate agencies and individual agencies contributed 46.1% of new annualized premium sales in 2014, compared with 43.8% in 2013 and 34.7% in 2012. Affiliated corporate agencies are formed when companies establish subsidiary businesses to sell our insurance products to their employees as part of a benefit package, and then expand to sell our products to suppliers and customers. These agencies help us reach employees at large worksites, and some of them are also successful in approaching customers outside their business groups. Affiliated corporate agencies, which include Japan Post, contributed 30.0% of new annualized premium sales in 2014, compared with 23.1% in 2013 and 18.5% in 2012. During 2014, we recruited more than 900 new sales agencies. As of December 31, 2014, Aflac Japan was represented by approximately 14,500 sales agencies, with more than 121,100 licensed sales associates employed by those agencies. We believe that new agencies will continue to be attracted to Aflac Japan's high commissions, attractive products, superior customer service and strong brand image.

We have sold our products to employees of banks since our entry into Japan in 1974. However, December 2007 marked the first time it was permissible for banks to sell our type of insurance products to their customers. By the end of 2014, we had agreements with 371 banks, approximately 90% of the total number of banks in Japan, to sell our products. We believe we have significantly more banks selling our supplemental health insurance products than any of our competitors. Japanese consumers rely on banks to provide traditional bank services, and also to provide insurance

solutions and other services. We believe our long-standing and strong relationships within the Japanese banking sector, along with our strategic preparations, have proven to be an advantage, particularly starting when this channel opened up for our products. Our partnerships throughout the banking sector provide us with a wider demographic of potential customers than we would otherwise have been able to reach, and it also allows banks to expand their product and service offerings to consumers. Banks contributed 21.5% of Aflac Japan new annualized premium sales in 2014, compared with 31.3% in 2013 and 45.6% in 2012.

Aflac Japan and Japan Post Holdings entered into a new agreement in July 2013, further expanding their partnership that was initially established in 2008 (see Regulation-Japan). At the end of June 2014, Japan Post Insurance (Kampo) received Financial Services Agency (FSA) regulatory approval to enter into an agency contract with Aflac Japan to begin distributing Aflac Japan's cancer insurance products at all of Kampo's 79 directly managed sales offices. Aflac Japan has developed a unique Aflac-branded cancer product for Japan Post and Kampo that was introduced on October 1, 2014. In the fourth quarter of 2014, the number of postal outlets selling our cancer products expanded to approximately 10,000, and Japan Post intends to further expand the number of post offices that offer Aflac's cancer products to 20,000 postal outlets by the end of first quarter 2016. We believe this alliance with Japan Post will further benefit our cancer insurance sales.

For additional information on Aflac Japan's distribution, see the Aflac Japan Segment subsection of MD&A in this report.

## **Distribution - U.S.**

As of December 31, 2014, our U.S. sales force comprised more than 70,800 sales associates and brokers who are licensed to sell accident and health insurance. Many are also licensed to sell life insurance.

Sales associates and brokers are independent contractors and are paid commissions based on first-year and renewal premiums from their sales of insurance products. In addition to receiving commissions on personal production, district, regional, and, until September 30, 2014, state sales coordinators may also receive override commissions and incentive bonuses.

Beginning in the third quarter and continuing into the fourth quarter of 2014, Aflac U.S. implemented tactical initiatives centered around pay for performance providing competitive compensation to our sales hierarchy and positioning us to more effectively and consistently execute on the U.S. sales strategy across all states. These measures are designed to more effectively link sales management's success to Aflac's success. We enhanced compensation through an incentive bonus for the first level of our sales associate management, district sales coordinators, who are primarily responsible for selling Aflac products and training new sales associates. Additionally, to better manage our state operations, we eliminated the commission-based position of state sales coordinator and introduced the new position of market director. Effective October 1, 2014, market directors are salaried employees with the opportunity to earn sales-related bonuses. We believe this position change will enhance our performance management and better align compensation with new business results.

We concentrate on marketing our insurance products at the worksite. This method offers policies to individuals through employment, trade and other associations. Historically, our policies have been individually underwritten with premiums generally paid by the employee. Additionally, Aflac's individual policies are portable, meaning that individuals may retain their full insurance coverage upon separation from employment or such affiliation, generally at the same premium. We collect a major portion of premiums on such sales through payroll deduction or other forms of centralized billing. With our brokerage sales expansion and the acquisition of CAIC, branded as Aflac Group Insurance, we offer group voluntary insurance products desired by many large employers. These products are sold on a group basis and often have some element of guaranteed issue. Worksite marketing enables sales associates and brokers to reach a greater number of prospective policyholders and lowers distribution costs, compared with individually marketed business.

Aflac U.S. utilizes dual-channel distribution to market our insurance products to businesses of all sizes. Our career agent channel focuses on marketing Aflac to the small business market, which consists of employers with less than 100 employees. As such, we have aligned our recruiting, training, compensation, marketing and incentives for our career agents to encourage specific activity and sales of individual policies in this market. Our newest channel is the broker channel, which is a sales division of Aflac Group. The broker channel focuses on selling to the mid- and large-case market, which is comprised of employers with more than 100 employees and typically an average size of 1,000 employees or more. Since regional and national brokers have traditionally served the mid- and large-case market, the highly trained and experienced sales professionals of the broker channel are assigned a geographic market to strengthen

relationships with the top brokers and sell Aflac products to their clients. As a result, we are represented on more than 80 benefit administration platforms, sometimes referred to as exchanges, of various brokers.

For additional information on Aflac's U.S. distribution, see the Aflac U.S. Segment subsection of MD&A in this report.

## **Competition - Japan**

In 1974, Aflac was granted an operating license to sell life insurance in Japan, making Aflac the second non-Japanese life insurance company to gain direct access to the Japanese insurance market. Through 1981, we faced limited competition for cancer insurance policy sales. However, Japan has experienced two periods of deregulation since we entered the market. The first came in the early 1980s, when nine mid-sized insurers, including domestic and foreign companies, were allowed to sell cancer insurance products for the first time. The second period began in 2001 when all life and non-life insurers were allowed to sell stand-alone cancer and medical insurance products as well as other stand-alone health insurance products. As a result, the number of insurance companies offering stand-alone cancer and medical insurance has more than doubled since the market was deregulated in 2001. However, based on our growth of annualized premiums in force and agencies, we do not believe that our market-leading position has been significantly impacted by increased competition. Furthermore, we believe the continued development and maintenance of operating efficiencies will allow us to offer affordable products that appeal to consumers. Aflac is the largest life insurer in Japan in terms of cancer and medical policies in force. As of December 31, 2014, we exceeded 23 million individual policies in force in Japan.

Aflac has had substantial success selling cancer policies in Japan, with more than 14 million cancer policies in force as of December 31, 2014. Aflac continued to be the number one seller of cancer insurance policies in Japan throughout 2014. We believe we will remain a leading provider of cancer insurance coverage in Japan, principally due to our experience in the market, low-cost operations, expansive marketing system (see Distribution - Japan above) and product expertise.

We have also experienced substantial success selling medical insurance in Japan. While other companies have recognized the opportunities that we have seen in the medical insurance market and offered new products, we believe our products stand out for their value to consumers.

In addition to third sector products, Aflac Japan sells life insurance products such as WAYS (described in the Products section of this report). These sales are generated largely through the bank channel. The market for ordinary life products of this kind is highly competitive. We will continue to pursue the development and marketing of specialty products that meet specific needs within the general life insurance market.

## **Competition - U.S.**

Aflac competes against several voluntary supplemental insurance carriers on a national and regional basis. We believe our policies, premium rates, and sales commissions are competitive by product type. Moreover, we believe that Aflac products are distinct from competitive offerings given our product focus (including features, benefits, and our claims service model), distribution capabilities, and brand awareness. For many companies with which we compete, voluntary supplemental insurance products are sold as a secondary business. A growing number of major medical and life insurance carriers are also entering into the voluntary supplemental insurance market. For Aflac, supplemental insurance products are our primary business and are sold via a large distribution network of independent sales associates and brokers (see Distribution - U.S. above). Aflac's advertising campaigns have increased our name awareness and understanding by consumers and businesses of the value our products provide.

Both private and publicly-traded insurers offer major medical insurance for hospitalization and medical expenses. Much of this insurance is sold on a group basis to accounts that are both fully and self-insured. The federal and state governments also pay substantial costs of medical treatment through various programs. Major medical insurance generally covers a substantial portion of the medical expenses incurred by an insured. Aflac policies are designed to provide coverage that supplements major medical insurance by paying cash directly to the policyholder to use for expenses their major medical insurance is not designed to cover. Thus, we do not compete directly with major medical insurers except those who sell supplemental insurance products as a secondary business. Any reduction of coverage, increase in employee participation costs, or increased deductibles and copayments by major medical commercial or government insurance carriers could favorably affect our business opportunities. With the implementation of the ACA, we anticipate a larger burden of the cost of care will be borne by some consumers, potentially creating a favorable impact on key markets for Aflac products. We also expect the ACA potentially will result in a more competitive landscape for Aflac, as

major medical carriers face profitability erosion in some of their core lines of business and seek competitive entry into Aflac's supplemental product segments to offset this impact.

## **Investments and Investment Results**

Net investment income was \$3.3 billion in 2014 and 2013 and \$3.5 billion in 2012 . Although Aflac Japan benefited from some U.S. dollar exposure in the investment portfolio, the net impact from the weakening yen was a reduction in the reported net investment income in U.S. dollar terms for 2014 and 2013 . In addition, the growth rate of net investment income has been negatively impacted by the low level of investment yields for new money in both Japan and the United States. In particular, Japan's life insurance industry has contended with low investment yields for a number of years. For information on our investments and investment results, see the Insurance Operations and Analysis of Financial Condition sections of MD&A and Notes 3, 4 and 5 of the Notes to the Consolidated Financial Statements in this report.

## **Regulation - Japan**

The financial and business affairs of Aflac Japan are subject to examination by Japan's FSA. Aflac Japan files annual reports and financial statements for the Japanese insurance operations based on a March 31 fiscal year end, prepared in accordance with Japanese regulatory accounting practices prescribed or permitted by the FSA. Japanese regulatory basis earnings are determined using accounting principles that differ materially from U.S. GAAP. For example, under Japanese regulatory accounting practices, policy acquisition costs are expensed immediately; deferred income tax liabilities are recognized on a different basis; policy benefit and claim reserving methods and assumptions are different; the carrying value of securities transferred to held-to-maturity is different; premium income is recognized on a cash basis; different consolidation criteria apply to variable interest entities; and different accounting for reinsurance. Capital and surplus of Aflac Japan, based on Japanese regulatory accounting practices, was \$5.6 billion at December 31, 2014 , compared with \$4.2 billion at December 31, 2013 .

The FSA maintains a solvency standard, which is used by Japanese regulators to monitor the financial strength of insurance companies. As of December 31, 2014 , Aflac Japan's solvency margin ratio (SMR) was 857% , compared with 777% at December 31, 2013 . See the Capital Resources and Liquidity Section of MD&A for a discussion of measures we have taken to mitigate the sensitivity of Aflac Japan's SMR.

We typically repatriate a portion of Aflac Japan's accumulated earnings, as determined on a Japanese regulatory accounting basis, to Aflac U.S. provided that Aflac Japan has adequately protected policyholders' interests as measured by its SMR. The FSA may not allow profit repatriations to Aflac U.S. if the transfers would cause Aflac Japan to lack sufficient financial strength for the protection of Japanese policyholders. In the near term, we do not expect these requirements to adversely affect the funds available for profit repatriations, nor do we expect these requirements to adversely affect the funds available for payments of allocated expenses to Aflac U.S. and management fees to the Parent Company.

In 2005, legislation aimed at privatizing Japan's postal system (Japan Post) was enacted into law. The privatization laws split Japan Post into four operating entities that began operating in October 2007. In 2007, one of these entities selected Aflac Japan as its provider of cancer insurance to be sold through its post offices, and, in 2008, we began selling cancer insurance through these post offices. Japan Post has historically been a popular place for consumers to purchase insurance products. Legislation to reform the postal system passed the Diet in April 2012 and resulted in the merger of two of the postal operating entities (the one that delivers the mail and the one that runs the post offices) on October 1, 2012. In July 2013, Aflac Japan entered into a new agreement with Japan Post Holdings to further expand the partnership that was initially established in 2008. See the Distribution-Japan section for further developments in 2014.

The Japanese insurance industry has a policyholder protection corporation that provides funds for the policyholders of insolvent insurers. For additional information regarding the policyholder protection fund, see the Policyholder Protection subsection of MD&A in this report.

In June 2013, a revision to the Financial Instruments and Exchange Act established a post-funded Orderly Resolution Regime for financial institutions to prevent a financial crisis in the event of a financial institution's failure. This regime came into effect in March 2014 and has not had, and is not expected to have, a material impact on the Company's operations in Japan.

On January 16, 2014, Japan's FSA issued a reporting order pursuant to the Insurance Business Law to all insurance companies, including Aflac Japan, entitled "Regarding the Rectification, etc. of Insurance Agency Employees." Companies have been ordered to ascertain conditions on the ground regarding sales agents, facilitate the discontinuation of the

practice of subcontracting (i.e., the use of non-employee contractors to sell insurance on behalf of insurance agencies), and report to the FSA no later than April 30, 2015. In light of the Company's current mix of distribution channels, the use of non-employee contractors is not a major channel for the Company in Japan.

As a branch of our principal insurance subsidiary, Aflac Japan is also subject to regulation and supervision in the United States (see Regulation - U.S.). For additional information regarding Aflac Japan's operations and regulations, see the Aflac Japan Segment subsection of MD&A and Notes 2 and 13 of the Notes to the Consolidated Financial Statements in this report.

## **Regulation - U.S.**

The Parent Company and its insurance subsidiaries, Aflac (a Nebraska-domiciled insurance company), American Family Life Assurance Company of New York (Aflac New York, a New York-domiciled insurance company) and CAIC (a South Carolina-domiciled insurance company) are subject to state regulations in the United States as an insurance holding company system. Such regulations generally provide that transactions between companies within the holding company system must be fair and equitable. In addition, transfers of assets among such affiliated companies, certain dividend payments from insurance subsidiaries, and material transactions between companies within the system, including management fees, loans and advances are subject to prior notice to, or approval by, state regulatory authorities. These laws generally require, among other things, the insurance holding company and each insurance company directly owned by the holding company to register with the insurance departments of their respective domiciliary states and to furnish annually financial and other information about the operations of companies within the holding company system.

Like all U.S. insurance companies, Aflac is subject to regulation and supervision in the jurisdictions in which it does business. In general, the insurance laws of the various jurisdictions establish supervisory agencies with broad administrative powers relating to, among other things:

- granting and revoking licenses to transact business
- regulating trade and claims practices
- licensing of insurance agents and brokers
- approval of policy forms and premium rates
- standards of solvency and maintenance of specified policy benefit reserves and minimum loss ratio requirements
- capital requirements
- limitations on dividends to shareholders
- the nature of and limitations on investments
- deposits of securities for the benefit of policyholders
- filing of financial statements prepared in accordance with statutory insurance accounting practices prescribed or permitted by regulatory authorities
- periodic examinations of the market conduct, financial, and other affairs of insurance companies

The insurance laws of Nebraska that govern Aflac's activities provide that the acquisition or change of "control" of a domestic insurer or of any person that controls a domestic insurer cannot be consummated without the prior approval of the Nebraska Department of Insurance. A person seeking to acquire control, directly or indirectly, of a domestic insurance company or of any person controlling a domestic insurance company (in the case of Aflac, the Parent Company) must generally file with the Nebraska Department of Insurance an application for change of control containing certain information required by statute and published regulations and provide a copy to Aflac. In Nebraska, control is generally presumed to exist if any person, directly or indirectly, acquires 10% or more of an insurance company or of any other person or entity controlling the insurance company. The 10% presumption is not conclusive and control may be found to exist at less than 10%. Similar laws apply in New York and South Carolina, the domiciliary jurisdictions of the Parent Company's other insurance subsidiaries, Aflac New York and CAIC.

State insurance departments conduct periodic examinations of the books and records, financial reporting, policy filings and market conduct of insurance companies domiciled in their states, generally once every three to five years. Examinations are generally carried out in cooperation with the insurance departments of other states under guidelines promulgated by the National Association of Insurance Commissioners (NAIC). In 2013, the Nebraska insurance regulator, along with the New York insurance regulator, completed a coordinated risk-focused full scope financial examination for the four-year period and three-year period, respectively, ended December 31, 2011 for Aflac and Aflac New York as part of the normal examination process. These examinations found no material deficiencies. Also, in 2011 the South Carolina

insurance regulator completed a risk-focused full scope financial examination for the three-year period ended December 31, 2010 for CAIC as part of the normal examination process and found no material deficiencies.

The NAIC continually reviews regulatory matters and recommends changes and revisions for adoption by state legislators and insurance departments. The NAIC uses a risk-based capital formula relating to insurance risk, business risk, asset risk and interest rate risk to facilitate identification by insurance regulators of inadequately capitalized insurance companies based upon the types and mix of risk inherent in the insurer's operations. The formulas for determining the amount of risk-based capital specify various weighting factors that are applied to financial balances or various levels of activity based on the perceived degree of risk. Regulatory compliance is determined by a ratio of a company's regulatory total adjusted capital to its authorized control level risk-based capital as defined by the NAIC. Companies below specific trigger points or ratios are classified within certain levels, each of which requires specified corrective action. The levels are company action, regulatory action, authorized control, and mandatory control. Aflac's NAIC risk-based capital ratio remains high and reflects a very strong capital and surplus position. As of December 31, 2014, based on year-end statutory accounting results, Aflac's company action level risk-based capital (RBC) ratio was 945%.

Federal legislation and administrative policies in several areas, including health care reform legislation, financial services reform legislation, securities regulation, pension regulation, privacy, tort reform legislation and taxation, can significantly and adversely affect insurance companies. Various forms of federal oversight and regulation of insurance have been passed by the U.S. Congress and signed into law by the President. For example, the ACA, federal health care reform legislation, gives the U.S. federal government direct regulatory authority over the business of health insurance. The reform includes major changes to the U.S. health care insurance marketplace. Among other changes, the reform legislation includes an individual medical insurance coverage mandate, provides for penalties on certain employers for failing to provide adequate coverage, creates health insurance exchanges, and addresses coverage and exclusions as well as medical loss ratios. The legislation also includes changes in government reimbursements and tax credits for individuals and employers and alters federal and state regulation of health insurers. These changes, directed toward major medical health insurance coverage which Aflac does not offer, have already begun and will continue to be phased in over the next several years. The major elements of the bill became effective on January 1, 2014. We believe that the ACA, as enacted, does not materially affect the design of our insurance products. However, indirect consequences of the legislation and regulations, including uncertainty related to implementation, could present challenges and/or opportunities that could potentially have an impact on our sales model, financial condition and results of operations.

In 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act, commonly known as the Dodd-Frank Act, which, among other things, created a Financial Stability Oversight Council (the Council). In April 2012, the Council released a final rule describing the general process it will follow in determining whether to designate a nonbank financial company for supervision by the Board of Governors of the U.S. Federal Reserve System (the Board). The Council may designate by a two-thirds vote whether certain nonbank financial companies, including certain insurance companies and insurance holding companies, could pose a threat to the financial stability of the United States, in which case such nonbank financial companies would become subject to prudential regulation by the Board. On April 3, 2013, the Board published a final rule that establishes the requirements for determining when a nonbank financial company is "predominantly engaged in financial activities" - a prerequisite for designation by the Council. Prudential regulation by the Board includes supervision of capital requirements, leverage limits, liquidity requirements and examinations. The Board may limit such company's ability to enter into mergers, acquisitions and other business combination transactions, restrict its ability to offer financial products, require it to terminate one or more activities, or impose conditions on the manner in which it conducts activities. The Council designated two insurers in 2013 and an additional insurer in 2014 as a Systematically Important Financial Institution (SIFI) in 2014. On December 18, 2014, President Obama signed the Insurance Capital Standards Clarification Act into law. This legislation will clarify the Board's authority to apply insurance-based capital standards for insurance companies subject to federal supervision. Although Aflac is a nonbank financial company predominantly engaged in financial activities as defined in the Dodd-Frank Act, we do not believe Aflac will be considered a company that poses a threat to the financial stability of the United States.

Title VII of the Dodd-Frank Act and regulations issued thereunder may have an impact on Aflac's derivative activity, including activity on behalf of Aflac Japan, in particular rules and rule proposals to require central clearing and collateral for certain types of derivatives. The five U.S. banking regulators and the U.S. Commodity Futures Trading Commission (CFTC) recently re-proposed for comment their rules regarding collateral for uncleared swaps. If adopted as proposed, such rules may result in increased collateral requirements for Aflac or impose limits on the types of collateral we are permitted to post.

The Dodd-Frank Act also established a Federal Insurance Office (FIO) under the U.S. Treasury Department to monitor all aspects of the insurance industry and of lines of business other than certain health insurance, certain long-term care

insurance and crop insurance. Traditionally, U.S. insurance companies have been regulated primarily by state insurance departments. In December 2013, the FIO released a report entitled "How To Modernize And Improve The System Of Insurance Regulation In The United States." The report was required by the Dodd-Frank Act, and included 18 recommended areas of near-term reform for the states, including addressing capital adequacy and safety/soundness issues, reform of insurer resolution practices, and reform of marketplace regulation. The report also listed nine recommended areas for direct federal involvement in insurance regulation. Some of the recommendations outlined in the FIO report released in December 2013 have been implemented. Of the nine recommended areas for direct federal involvement in insurance regulation that are applicable to Aflac, President Obama has signed the National Association of Registered Agents and Brokers Reform Act into law in January 2015, which simplifies the agent and broker licensing process across state lines. The FIO has also engaged with the supervisory colleges to monitor financial stability and identify regulatory gaps for large national and internationally active insurers.

On December 10, 2013, five U.S. financial regulators adopted a final rule implementing the "Volcker Rule," which was created by Section 619 of the Dodd-Frank Act. The Volcker Rule generally prohibits "banking entities" from engaging in "proprietary trading" and making investments and conducting certain other activities with "private equity funds and hedge funds." The final rule became effective April 1, 2014; however, at the time the agencies released the final Volcker Rule, the Federal Reserve announced an extension of the conformance period for all banking entities until July 21, 2015. In response to industry questions regarding the final Volcker Rule, the five U.S. financial regulators, which included the Office of the Comptroller of the Currency (OCC); the Federal Reserve; the Federal Deposit Insurance Corporation (FDIC); the SEC and the U.S. CFTC, issued a clarifying interim final rule on January 14, 2014 that permits banking entities to retain interests in certain collateralized debt obligations (CDOs) backed by trust preferred securities if the CDO meets certain requirements.

On December 18, 2014, the Federal Reserve announced a second extension to the Volcker Rule conformance period, to give banking entities until July 21, 2016, to conform investments in and relationships with covered funds and foreign funds that were in place prior to December 31, 2013 (legacy covered funds). The Federal Reserve also announced its intention to act in the future to grant banking entities an additional one-year extension of the conformance period until July 21, 2017, to conform ownership interests in and relationships with these legacy covered funds. The Federal Reserve did not act to extend the conformance period for proprietary trading activities.

Nonbank financial companies such as Aflac that are not affiliated with an insured depository institution or otherwise brought within the definition of "banking entity" generally will not be subject to the Volcker Rule's prohibitions. However, the prohibitions of the Volcker Rule could impact financial markets generally, for example, through reduced liquidity in certain markets or the exiting of positions by banking entities as the end of the conformance period approaches.

The Dodd-Frank Act requires extensive rule-making and other future regulatory action, which in some cases will take a period of years to implement. However, at the current time, it is not possible to predict with any degree of certainty what impact, if any, the Dodd-Frank Act will have on our U.S. business, financial condition, or results of operations.

In September 2014, the Nebraska Department of Insurance chaired the second meeting of the Aflac Supervisory College, which included the attendance of Japan's Financial Services Agency. Consistent with international regulatory standards and supervisory best practices, the Supervisory College was established in 2013 as a forum for cooperation and communication between the Company's primary supervisors. At the second meeting, the supervisors agreed to continue to meet annually with the next meeting in 2015.

For further information concerning Aflac U.S. operations, regulation, change of control and dividend restrictions, see the Aflac U.S. Segment subsection of MD&A and Notes 2 and 13 of the Notes to the Consolidated Financial Statements in this report.

## **Other Operations**

Our other operations include the Parent Company and a printing subsidiary. For additional information on our other operations, see the Other Operations subsection of MD&A.

## **Employees**

As of December 31, 2014, Aflac Japan had 4,526 employees, Aflac U.S. had 4,709 employees, and our other operations, the Parent Company and printing subsidiary, had 290 employees.

**Executive Officers of the Registrant**

NAME	PRINCIPAL OCCUPATION <sup>(1)</sup>	AGE
Daniel P. Amos	Chairman, Aflac Incorporated and Aflac, since 2001; Chief Executive Officer, Aflac Incorporated and Aflac, since 1990	63
Paul S. Amos II	President, Aflac, since 2007; Chief Operating Officer, U.S. Operations, Aflac, from 2006 until 2013	39
Koji Ariyoshi	Executive Vice President, Director of Marketing and Sales, Aflac Japan, since 2012; First Senior Vice President, Director of Marketing and Sales, Aflac Japan, from 2010 until 2011	61
Susan R. Blanck	Executive Vice President, Aflac Japan, since 2012; Executive Vice President, Corporate Actuary, Aflac, since 2011; First Senior Vice President, Aflac Japan, from 2008 until 2012; Senior Vice President, Corporate Actuary, Aflac, from 2004 until 2011	48
Kriss Cloninger III	President, Aflac Incorporated, since 2001; Chief Financial Officer, Aflac Incorporated and Aflac, since 1992; Treasurer, Aflac Incorporated, since 2001; Executive Vice President, Aflac, since 1993	67
June Howard	Chief Accounting Officer, Aflac Incorporated and Aflac, since 2010; Treasurer, Aflac, since 2011; Senior Vice President, Financial Services, Aflac Incorporated and Aflac, since 2010; Vice President, Financial Services, Aflac, from 2009 until 2010	48
Kenneth S. Janke	Executive Vice President, Deputy Chief Financial Officer, Aflac Incorporated, since 2010; President, Aflac U.S., from 2013 until 2014; Senior Vice President, Investor Relations, Aflac Incorporated, from 1993 until 2010	56
Eric M. Kirsch	Executive Vice President, Global Chief Investment Officer, Aflac, since 2012; First Senior Vice President, Global Chief Investment Officer, Aflac, from 2011 until 2012; Managing Director, Global Head of Insurance Asset Management, Goldman Sachs Asset Management, from 2007 until 2011	54
Charles D. Lake II	President, Aflac International, since 2014; Chairman, Aflac Japan, since 2008	53
Audrey B. Tillman	Executive Vice President, General Counsel, Aflac Incorporated and Aflac, since 2014; Executive Vice President, Corporate Services, Aflac Incorporated, from 2008 until 2014	50
Teresa L. White	President, Aflac U.S., since 2014; Executive Vice President, Chief Operating Officer, Aflac, from 2013 until 2014; Executive Vice President, Chief Service Officer, Aflac, from 2012 until 2013; Executive Vice President, Chief Administrative Officer, Aflac, from 2008 until 2013	48
Robin Y. Wilkey	Senior Vice President, Investor and Rating Agency Relations, Aflac Incorporated, since 2010; Vice President, Investor Relations, Aflac Incorporated, from 2003 until 2010	56
Hiroshi Yamauchi	President, Chief Operating Officer, Aflac Japan, effective 2015; Executive Vice President, Aflac Japan, from 2012 until 2014; First Senior Vice President, Aflac Japan, from 2002 until 2011	63

<sup>(1)</sup> Unless specifically noted, the respective executive officer has held the occupation(s) set forth in the table for at least the last five years. Each executive officer is appointed annually by the board of directors and serves until his or her successor is chosen and qualified, or until his or her death, resignation or removal.

## ITEM 1A. RISK FACTORS

We face a wide range of risks, and our continued success depends on our ability to identify, prioritize and appropriately manage our enterprise risk exposures. Readers should carefully consider each of the following risks and all of the other information set forth in this Form 10-K. These risks and other factors may affect forward-looking statements, including those in this document or made by the Company elsewhere, such as in earnings release webcasts, investor conference presentations or press releases. The risks and uncertainties described herein may not be the only ones facing the Company. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business. If any of the following risks and uncertainties develop into actual events, there could be a material impact on the Company.

### **Difficult conditions in global capital markets and the economy could have a material adverse effect on our investments, capital position, revenue, profitability, and liquidity and harm our business.**

Our results of operations are materially affected by conditions in the global capital markets and the global economy generally, including in our two primary operating markets of the United States and Japan. Weak global financial markets impact the value of our existing investment portfolio, influence opportunities for new investments, and may contribute to generally weak economic fundamentals, which can have a negative impact on our operating activities.

For the last few years, global capital markets have been severely impacted by several major events. The financial crisis that began in the latter part of 2008 saw dramatic declines in investment values and weak economic conditions as the global financial system came under extreme pressure. Although U.S. markets began recovering as early as late 2009 and 2010, Europe continued to struggle under a severely weakened banking system and investor concerns with sovereign debt levels. Following a period of unprecedented intervention by governments and central banks, including the U.S. Federal Reserve and European Central Bank (ECB), financial conditions improved from the dire conditions of the global financial crisis, global recession, and European debt crisis. Recently, global markets have experienced increased volatility due to concerns including changes in the market's perception of global growth, additional ECB intervention, uncertainty surrounding Japan's continued recovery amidst assorted policy changes, and sizable declines in global commodity prices including oil.

As we hold a significant amount of fixed maturity and perpetual securities issued by borrowers located in many different parts of the world, including a large portion issued by banks and financial institutions, sovereigns, and other corporate borrowers in the U.S. and Europe, our financial results are directly influenced by global financial markets. A retrenchment of the recent improvements in overall capital market health could adversely affect our financial condition, including our capital position and our overall profitability. Market volatility and recessionary pressures could result in significant realized or unrealized losses due to severe price declines driven by increases in interest rates or credit spreads, defaults in payment of principal or interest, and credit rating downgrades.

Following the election of Shinzo Abe as Prime Minister of Japan in December 2012, the new administration adopted a new set of financial measures to stimulate the Japanese economy. In a December 2014 snap-election, the ruling Liberal Democratic Party (LDP) won a landslide victory, further strengthening Mr. Abe's ability to implement economic reform and address key policy challenges. The Japanese financial markets have reacted with even lower rates on Japanese Government bonds, large increases in Japanese equity market values, and a weakening of the yen relative to the U.S. dollar, a situation that remains largely intact today.

Japan is the largest market for our products and we own substantial holdings in Japanese Government Bonds (JGBs). Government actions to stimulate the economy affect the value of our existing holdings, our reinvestment rate on new investments in JGBs or other yen denominated assets, and consumer behavior relative to our suite of products. The additional government debt from fiscal stimulus actions could contribute to a weakening of the Japan sovereign credit profile and result in further rating downgrades at the credit rating agencies. This could lead to additional volatility in Japanese capital and currency markets.

Our investment portfolio owns sizeable credit positions in many other geographic areas of the world including the Middle East, Latin America, Asia, and other emerging markets. Deterioration in their underlying economies, sovereign credit worthiness, or financial market conditions could negatively impact our financial position. We also own credit investments that result in exposure to commodity valuations, including oil, natural gas, gold, and other metals. The recent significant declines in the prices of these commodities could result in credit deterioration of our holdings and

significant credit losses due to depressed bond valuations, defaults in payment of principal or interest, or credit rating downgrades.

Most of our investment portfolio holdings are income-producing bonds that provide a fixed level of income. Many of our investments were made at the relatively low level of interest rates prevailing the last several years. Any increase in the market yields of our holdings due to an increase in interest rates could create substantial unrealized losses in our portfolio, as discussed further in a separate risk factor in this section of the Form 10-K.

We need liquidity to pay our operating expenses, dividends on our common stock, interest on our debt and liabilities. For a further description of our liquidity needs, including maturing indebtedness, see Item 7 of this Form 10-K - Management's Discussion and Analysis of Financial Condition and Results of Operations - Capital Resources and Liquidity. In the event our current resources do not meet our needs, we may need to seek additional financing. Our access to additional funding will depend on a variety of factors such as market conditions, the general availability of credit to the financial services industry and our credit rating. We have a credit facility agreement as a capital contingency plan with a syndicate of financial institutions that provides for borrowings in the amount of 50 billion yen. This agreement provides for borrowings in Japanese yen or the equivalent of Japanese yen in U.S. dollars on a revolving basis and will expire on the earlier of March 29, 2018, or the date of termination of the commitments upon an event of default as defined in the agreement. Should investors become concerned with any of our investment holdings, including a concentration of JGBs, our access to market sources of funding could be negatively impacted. There is a possibility that lenders or debt investors may develop a negative perception of us if we incur large investment losses or if the level of our business activity decreases due to a market downturn or there are further adverse economic trends in the United States or Japan, specifically, or generally in developed markets. Similarly, our access to funds may be impaired if regulatory authorities or rating agencies take negative actions against us.

Broad economic factors such as consumer spending, business investment, government spending, the volatility and strength of the capital markets, and inflation all affect the business and economic environment and, indirectly, the amount and profitability of our business. In an economic downturn characterized by higher unemployment, lower family income, lower corporate earnings, lower business investment and lower consumer spending, the demand for financial and insurance products could be adversely affected. This adverse effect could be particularly significant for companies such as ours that distribute supplemental, discretionary insurance products primarily through the worksite in the event that economic conditions result in a decrease in the number of new hires and total employees. Adverse changes in the economy could potentially lead our customers to be less inclined to purchase supplemental insurance coverage or to decide to cancel or modify existing insurance coverage, which could adversely affect our premium revenue, results of operations and financial condition. We are unable to predict the course of the current recoveries in global financial markets or the recurrence, duration or severity of disruptions in such markets.

**The effect that governmental actions for the purpose of stabilizing the financial markets will have on such markets generally, or on us specifically, is difficult to determine at this time.**

In response to the severity of the global financial crisis, numerous regulatory and governmental actions were taken to address weakness in the banking system, volatility in capital market conditions, and to stimulate the global economy. In the United States, this included aggressive expansionary monetary policy actions by the Federal Reserve, including conventional measures such as reducing the Federal Funds rate to near zero, and less conventional measures such as multiple rounds of quantitative easing. The result of the actions of the Federal Reserve was to keep interest rates, as measured by the U.S. Treasury curve and other relevant market rates, at very low levels for an extended period of time in an attempt to stimulate the economy.

As the U.S. economy has continued to improve, the Federal Reserve has reduced the amount of monetary stimulus. The stimulative actions previously taken by the Federal Reserve, and the amounts involved, are unprecedented. As such, there exist considerable risks associated with the amount of monetary stimulus provided and its withdrawal. These risks could include heightened inflation, increased volatility of interest rates, significantly higher interest rates, and overall increased volatility in the fair value of investment securities. These factors could negatively impact our business by reducing the value of our existing portfolio, negatively impacting our opportunities for new investments as market volatility increases, increasing the risk of depressed bond valuations or defaults in our credit portfolio, and reducing the demand for our products should the broader economy be negatively impacted by withdrawal of monetary stimulus.

The financial crisis also created new government regulation, including the Dodd-Frank Financial Regulatory Reform Bill for U.S. institutions. This significant legislation, intended to reduce risk of another crisis, contains multiple provisions that could impact our business as rules are finalized and implemented. This legislation could impact the value of our significant holdings in banks and other financial institutions and our ability to conduct financial and capital market transactions, and affect the general competitiveness of the U.S. financial services industry.

As the effects of the financial crisis continue to linger, other central banks around the world have followed the actions of the Federal Reserve and taken unprecedented actions. In the case of the ECB, multiple actions were taken to mitigate the European sovereign and banking crisis, and to stimulate the economies throughout the Eurozone. The Bank of Japan has undertaken monetary policy actions designed to stimulate the Japanese economy. These governmental interventions have helped create an environment of extremely low interest rates for an extended period of time. There can be no assurance as to the effect that these governmental actions, other governmental actions taken in the future, or the ceasing of these governmental actions will have on the financial markets generally, the economies in which we operate, our competitive position, or our business and financial condition.

**Defaults, downgrades, widening credit spreads or other events impairing the value of the fixed maturity securities and perpetual securities in our investment portfolio may reduce our earnings.**

We are subject to the risk that the issuers, guarantors, and/or counterparties of fixed maturity securities and perpetual securities we own may default on principal, interest and other payments they owe us. A significant portion of our portfolio represents an unsecured obligation of the issuer, including some that are subordinated to other debt in the issuer's capital structure. In these cases, many factors can influence the overall creditworthiness of the issuer and ultimately its ability to service and repay our holdings. This can include changes in the global economy, the company's assets, strategy, or management, shifts in the dynamics of the industries in which they compete, their access to additional funding, and the overall health of the credit markets. Factors unique to our securities including contractual protections such as financial covenants or relative position in the issuer's capital structure also influence the value of our holdings.

Most of our holdings carry a rating by one or more of the Nationally Recognized Statistical Rating Organizations (NRSROs, or "rating agencies"). Any change in the rating agencies' approach to evaluating credit and assigning an opinion could negatively impact the fair value of our portfolio. We employ a team of credit analysts to monitor the creditworthiness of the issuers in our portfolio. Any credit-related declines in the fair value of positions held in our portfolio we believe are not temporary in nature will negatively impact our net income through impairment and other credit related losses.

We are also subject to the risk that any collateral providing credit enhancement to our positions could deteriorate. These instruments may include senior secured first lien loans and loan-backed securities such as CDOs and mortgage-backed securities (MBS), where the underlying collateral notes may default on principal, interest, or other payments, causing an adverse change in cash flows to the positions held in our investment portfolio.

Our portfolio includes holdings of perpetual securities. Most of these are issued by global banks and financial institutions. Following the financial crisis, rating agencies reviewed and, in most cases, modified the rating criteria for financial institutions. This has caused multiple downgrades of many bank and financial issuers, but perpetual securities have been more negatively impacted as their lower position in the capital structure represents relatively more risk than other more senior obligations of the issuer. Further downgrades or default of issuers of securities we own will have a negative impact on our portfolio and could reduce our earnings.

We are exposed to sovereign credit risk through instruments issued directly by governments and government entities as well as banks and other institutions that rely in part on the strength of the underlying government for their credit quality. In addition to the United States and Japan, many governments, especially in Europe, have been subject to rating downgrades due to the need for fiscal and budgetary remediation and structural reforms, reduced economic activity, and investment needed to support banks or other systematically important entities. Additional downgrades or default of our sovereign issuers will have a negative impact on our portfolio and could reduce our earnings.

In addition to our exposure to the underlying credit strength of various issuers of fixed maturity and perpetual securities, we are also exposed to credit spreads, primarily related to market pricing and variability of future cash flows associated with credit spreads. A widening of credit spreads could reduce the value of our existing portfolio and create unrealized losses on our investment portfolio. This could, however, increase the net investment income on new credit investments. Conversely, a tightening of credit spreads could increase the value of our existing portfolio and create

unrealized gains on our investment portfolio. This could reduce the net investment income available to us on new credit investments. Increased market volatility also makes it difficult to value certain of our investment holdings (see the Critical Accounting Estimates section in Item 7, Management's Discussion and Analysis, of this Form 10-K).

For more information regarding credit risk, see the Market Risks of Financial Instruments - Credit Risk subsection of Item 7, Management's Discussion and Analysis, of this Form 10-K.

**We are exposed to significant interest rate risk, which may adversely affect our results of operations, financial condition and liquidity.**

We have substantial investment portfolios that support our policy liabilities. Low levels of interest rates on investments, such as those experienced specifically in Japan, the United States, and generally globally during recent years, have reduced the level of investment income earned by the Company. Our overall level of investment income will be negatively impacted if a low-interest-rate environment persists. While we generally seek to maintain a diversified portfolio of fixed-income investments that reflects the cash flow and duration characteristics of the liabilities it supports, we may not be able to fully mitigate the interest rate risk of our assets relative to our liabilities. Our exposure to interest rate risk relates primarily to the ability to invest future cash flows to support the interest rate assumption made at the time our products were priced and the related reserving assumptions were established. A rise in interest rates could improve our ability to earn higher rates of return on funds that we reinvest. Conversely, a decline in interest rates could impair our ability to earn the returns assumed in the pricing and the reserving for our products at the time they were sold and issued. Our ability to earn the returns we expect due to low interest rates may also influence our ability to develop and price attractive new products and impact our overall sales levels.

We also have exposure to interest rates related to the value of the substantial investment portfolios that support our policy liabilities. Changes in interest rates have a direct impact on the fair values of fixed securities in our investment portfolio; however, they do not have a direct impact on the related valuation of the corresponding liabilities. Prolonged periods of low interest rates, as have been experienced in recent years, heighten the risk of future increases in interest rates because of an increasing proportion of our investment portfolio includes investments that bear lower rates of return than the embedded book yield of the investment portfolio. A rise in interest rates could increase the net unrealized loss position of our debt and perpetual securities. Aflac sells insurance products in the US and Japan that provide cash surrender values. A rise in interest rates could trigger significant policy lapsation which might require the Company to sell investment assets and recognize unrealized losses. This situation is commonly referred to as disintermediation risk. Conversely, a decline in interest rates could decrease the net unrealized loss position of our debt and perpetual securities. While we generally invest our assets to match the duration and cash flow characteristics of our policy liabilities, and therefore would not expect to realize most of these gains or losses, our risk is that unforeseen events or economic conditions, such as changes in interest rates resulting from governmental monetary policies, domestic and international economic and political conditions, and other factors beyond our control, reduce the effectiveness of this strategy and either cause us to dispose of some or all of these investments prior to their maturity, or increases the risk that the issuers of these securities may default or may require impairment, which could result in our having to recognize such gains or losses.

Rising interest rates also negatively impact the solvency margin ratio since unrealized losses on the available-for-sale investment portfolio are included in the calculation. While we closely monitor the solvency margin ratio and have taken steps to reduce the sensitivity of Aflac Japan's available-for-sale portfolio to increases in interest rates, there is no assurance that these measures will be fully effective, particularly for sharp increases in interest rates.

Significant changes in interest rates could have a material adverse effect on our consolidated results of operations, financial condition or cash flows through realized losses, impairments, changes in unrealized positions, and liquidity.

For more information regarding interest rate risk, see the Interest Rate Risk subsection within the Market Risks of Financial Instruments section of MD&A in this report.

**We are subject to certain risks as a result of our investments in perpetual securities.**

As of December 31, 2014, we held \$2.4 billion of perpetual securities, at amortized cost, which represented 2.6% of our total portfolio of debt and perpetual securities. Perpetual securities have characteristics of both debt and equity instruments. These securities do not have a stated maturity date, but generally have a stated interest coupon that was fixed at the time of issuance but then changes to a floating rate security at some predetermined date. Most perpetual securities have call features including the ability of the issuer to retire the debt at par upon the change to a floating rate

security. Generally, the mechanics of the floating rate change were intended at the time of issuance to incent the borrower to call the instrument, having the effect of creating an expected economic maturity date. We believe many of the issuers of our perpetual securities will call the instruments upon a change in payment structure but there are no assurances the issuers will do so. While we have recently experienced calls for certain perpetual securities upon their economic maturity dates, there can be no assurance the remaining issuers will have the ability to repay the outstanding principal amount.

Perpetual securities may contain provisions allowing the borrower to defer paying interest for a time. In some cases, we have contractual provisions that stipulate any deferred interest payment accumulates for our benefit and must be paid in the future. There is no assurance such issuers will not choose to defer making payments or will be able to honor a cumulative deferral feature.

There is also a risk that the accounting for these perpetual securities could change in a manner that would have an adverse impact on the reporting for these securities. At the date of filing this Form 10-K, the SEC does not object to the use of a debt impairment model for impairment recognition of these securities as long as there is no significant deterioration in the credit condition of the perpetual securities. The debt impairment model allows the holder to consider whether or not interest and principal payments will be received in accordance with contractual terms and the holder's intent and ability to hold the perpetual security until there is a recovery in value. The equity impairment model, by contrast, looks at the length of time a security's fair value has been below its cost basis and the percentage decline to determine whether an impairment should be recorded, without consideration to the holder's intent and ability to hold the security until recovery in value. The Financial Accounting Standards Board (FASB) and the International Accounting Standards Board (IASB) are also working on the financial instruments project which addresses classification and measurement, impairment and hedging. The outcome and timing of the FASB project is uncertain but could result in changes to the current accounting model for perpetual securities.

**The valuation of our investments and derivatives includes methodologies, estimations and assumptions which are subject to differing interpretations and could result in changes to investment valuations that may adversely affect our results of operations or financial condition.**

The vast majority of our financial instruments are subject to the fair value classification provisions under GAAP, which specifies a hierarchy of valuation techniques based on observable or unobservable inputs to valuations, and relates to our investment securities classified as available for sale in our investment portfolio, which comprised \$68.3 billion ( 64% ) of our total cash and invested assets, and our entire derivatives portfolio, comprising \$802 million of derivative assets and \$2.4 billion of derivative liabilities, as of December 31, 2014 . In accordance with GAAP, we have categorized these securities and derivatives into a three-level hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1). It gives the next priority to quoted prices in markets that are not active or inputs that are observable either directly or indirectly, including quoted prices for similar assets or liabilities and other inputs that can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities (Level 2). The lowest priority represents unobservable inputs supported by little or no market activity and that reflect the reporting entity's understanding about the assumptions that market participants would use in pricing the asset or liability (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation.

At December 31, 2014 , approximately 27% , 72% and 1% of our total available-for-sale securities represented Level 1, Level 2 and Level 3 securities, respectively, and approximately 87% and 13% of our total derivatives exposure were classified as Level 2 and Level 3, respectively. Financial instruments may be transferred to Level 3 from Levels 1 and 2 during periods of market disruption or illiquidity.

As such, valuations may include inputs and assumptions that are less observable or require greater estimation as well as valuation methods which are more sophisticated, thereby resulting in values which may be greater or less than the value at which the investments may be ultimately sold. Rapidly changing and unprecedented credit and equity market conditions could materially impact the valuation of securities as reported within our consolidated financial statements and the period-to-period changes in value could vary significantly.

Valuations of our derivatives fluctuate with changes in underlying market variables, such as interest rates and foreign currency exchange rates. During periods of market turbulence created by political instability, economic uncertainty, government interventions or other factors, we may experience significant changes in the volatility of our derivative valuations. Extreme market conditions can also affect the liquidity of such instruments creating marked

differences in transaction levels and counterparty valuations. Depending on the severity and direction of the movements in its derivative valuations, the Company will face increases in the amount of collateral required to be posted with its counterparties. Liquidity stresses to the Company may also occur if the required collateral amounts increase significantly over a very short period of time. Conversely, the Company may be exposed to an increase in counterparty credit risk for short periods of time while calling collateral from its counterparties.

For further discussion on investment and derivative valuations, see Notes 1, 3, 4, and 5 of the Notes to the Consolidated Financial Statements in this report.

**The determination of the amount of impairments taken on our investments is based on significant valuation judgments and could materially impact our results of operations or financial position.**

The majority of our investments are evaluated for other-than-temporary impairment using our debt impairment model. Our debt impairment model focuses on the ultimate collection of the cash flows from our investments. The determination of the amount of impairments under this model is based upon our periodic evaluation and assessment of known and inherent risks associated with the respective securities. Such evaluations and assessments are revised as conditions change and new information becomes available.

An investment in a fixed maturity or perpetual security is impaired if the fair value falls below book value. We regularly review our entire investment portfolio for declines in value. For our fixed maturity and perpetual securities reported in the available-for-sale portfolio, we report the investments at fair value in the statement of financial condition and record any unrealized gain or loss in the value of the asset in accumulated other comprehensive income. For our held-to-maturity portfolio, we report the investments at amortized cost. The determination of whether an impairment in value is other than temporary is based largely on our evaluation of the issuer's creditworthiness. Our team of experienced credit professionals must apply considerable judgment in determining the likelihood of the security recovering in value while we own it. Factors that may influence this include our assessment of the issuer's ability to continue making timely payments of interest and principal, the overall level of interest rates and credit spreads, and other factors. If we determine it is unlikely we will recover our book value of the instrument prior to our disposal of the security, we will reduce the carrying value of the security to its fair value and recognize any associated impairment loss in our consolidated statement of earnings.

Our investments in perpetual securities that are rated below investment grade are evaluated for other-than-temporary impairment under our equity impairment model. Our equity impairment model focuses on the severity of a security's decline in fair value coupled with the length of time the fair value of the security has been below amortized cost and the financial condition and near-term prospects of the issuer.

Our management updates its evaluations regularly as conditions change and as new information becomes available and reflects impairment losses in the Company's income statement when considered necessary. Furthermore, additional impairments may need to be taken in the future. Historical trends may not be indicative of future impairments.

**Lack of availability of acceptable yen-denominated investments could adversely affect our results of operations, financial position or liquidity.**

We attempt to match both the duration and currency of our assets with our liabilities. This is very difficult for Aflac Japan due to the lack of long-dated yen-denominated fixed income instruments.

Prior to the financial crisis of 2008, the Company was focused on investing cash flows in JGBs, which had relatively low yields, and utilizing private placement and perpetual securities to gain additional yield, extend the duration of the investment portfolio, and maintain yen exposure. The investment in private placements and perpetual securities has led to increased risks associated with illiquidity.

Starting in 2012, Aflac Japan augmented its investment strategy to include U.S. dollar-denominated securities which could then be hedged back to yen. In October 2014 and December 2014, Aflac Japan sold approximately \$1.4 billion of U.S. Treasury securities and \$1.0 billion of U.S. dollar-denominated investment grade corporate securities with the intention of utilizing the proceeds from the sales to fund purchases of other asset classes. Despite those sales, as of December 31, 2014, Aflac Japan held approximately \$20.2 billion in U.S. dollar-denominated fixed income securities, at amortized cost, and approximately \$13.1 billion of notional in foreign currency forwards and options to hedge principal currency risk. These strategies are intended to improve diversification, income yields and liquidity.

However, these strategies have increased our exposure to U.S. interest rates and credit spreads and risks associated with derivatives. The tenors of the forwards being used are shorter than the corresponding U.S. corporate securities, which have created the economic risk associated with roll-over of the currency forwards (risk of increasing hedge costs). These risks can significantly impact the Company's consolidated results of operations, financial position or liquidity.

**The concentration of our investment portfolios in any particular single-issuer or sector of the economy may have an adverse effect on our financial position or results of operations.**

Negative events or developments affecting any particular single issuer, industry, group of related industries or geographic sector may have an adverse impact on a particular holding or set of holdings. We seek to minimize this risk by maintaining an appropriate level of diversification. To the extent we have concentrated positions in our investment portfolios, it could have an adverse effect on our investment portfolios and, consequently, on our results of operations and financial position. Our global investment guidelines establish concentration limits for our investment portfolios.

At December 31, 2014, approximately 39.4% of our total portfolio of debt and perpetual securities of \$95.1 billion, on an amortized cost basis, was invested in the government and agencies sector, with \$37.0 billion, or 38.9% of the total, consisting of investments in JGBs. In the fourth quarter of 2014, an additional rating agency downgraded JGBs from AA to A. Also at December 31, 2014, 14% of our total portfolio of debt and perpetual securities was in the bank and financial institution sector. For further details on the concentrations within our investment portfolios see the Analysis of Financial Condition section of MD&A in this report.

**Our concentration of business in Japan poses risks to our operations.**

Our operations in Japan, including realized gains and losses on Aflac Japan's investment portfolio, accounted for 72% of our total revenues for 2014, compared with 74% in 2013 and 77% in 2012. The Japanese operations accounted for 82% of our total assets at December 31, 2014, compared with 85% at December 31, 2013. The Bank of Japan's January 2015 *Monthly Report of Recent Economic and Financial Developments* stated the following about the Japanese economy. Japan's economy continues to recover moderately. Public investment has plateaued at a high level while housing investment, which continued to decline following the consumption tax hike, has recently started to bottom out. Private consumption has remained resilient due to steady improvement in employment and income. The report projected that Japan's economy is expected to recover moderately, and the effects such as those of the decline in demand following the consumption tax hike are expected to dissipate. Exports are expected to increase moderately due to the improving overseas economies. As for domestic demand, public investment is expected to flatten at a high level and subsequently begin to decline moderately. Private consumption is expected to remain resilient due to steady improvement in employment and income, and the effects of the decline in demand following the consumption tax hike are expected to dissipate gradually. Housing investment is projected to gradually regain its resilience as well.

Further, because of the concentration of our business in Japan and our need for long-dated yen-denominated assets, we have a substantial concentration of JGBs in our investment portfolio. As such we have material exposure to the Japanese economy, geo-political climate, political regime, and other elements that generally determine a country's creditworthiness. Specifically, the NRSROs have placed increased scrutiny on JGBs, which are a significant component of the Company's overall investment portfolio. The NAIC is also considering changes to investment risk factors. Any negative developments by the NRSROs or NAIC in these areas could result in increased capital requirements for the Company.

We seek to match the investment currency and interest rate risk to our yen liabilities. The low level of interest rates available on yen securities has a negative effect on our overall net investment income. A large portion of the cash available for reinvestment each year is deployed in yen-denominated instruments and subject to the low level of yen interest rates.

Any potential deterioration in Japan's credit quality, market access, the overall economy of Japan, or Japanese market volatility could adversely impact the business of Aflac in general and specifically Aflac Japan and our related results of operations and financial condition.

Due to the size of Aflac Japan, where our functional currency is the Japanese yen, fluctuations in the yen/dollar exchange rate can have a significant effect on our reported financial position and results of operations. Aflac Japan's premiums and most of its investment income are received in yen. Claims and expenses are paid in yen, and we

primarily purchase yen-denominated assets and dollar-denominated assets hedged to yen to support yen-denominated policy liabilities. These and other yen-denominated financial statement items are, however, translated into dollars for financial reporting purposes. Accordingly, fluctuations in the yen/dollar exchange rate can have a significant effect on our reported financial position and results of operations. In periods when the yen weakens, translating yen into dollars causes fewer dollars to be reported. When the yen strengthens, translating yen into dollars causes more dollars to be reported. Any unrealized foreign currency translation adjustments are reported in accumulated other comprehensive income. As a result, yen weakening has the effect of suppressing current year results in relation to the prior year, while yen strengthening has the effect of magnifying current year results in relation to the prior year. In addition, the weakening of the yen relative to the dollar will generally adversely affect the value of our yen-denominated investments in dollar terms. Foreign currency translation also impacts the computation of our risk-based capital ratio because Aflac Japan is consolidated in our U.S. statutory filings due to its status as a branch. Our required capital, as determined by the application of risk factors to our assets and liabilities, is proportionately more sensitive to changes in the exchange rate than our total adjusted capital. As a result, when the yen strengthens relative to the dollar, our risk-based capital ratio is suppressed. We engage in certain foreign currency hedging activities for the purpose of hedging the yen exposure to our net investment in our branch operations in Japan. These hedging activities are limited in scope and we cannot provide assurance that these activities will be effective.

Additionally, we are exposed to economic currency risk when yen cash flows are converted into dollars, resulting in an increase or decrease in our earnings when exchange gains or losses are realized. This primarily occurs when we repatriate funds from Aflac Japan to Aflac U.S., but it also has an impact when yen cash is converted to U.S. dollars for investment into U.S. dollar-denominated assets (as described above). The exchange rates prevailing at the time of repatriation may differ from the exchange rates prevailing at the time the yen profits were earned. We engage in foreign currency hedging activities to mitigate the exposure to this foreign exchange risk.

For more information regarding foreign currency risk, see the Currency Risk subsection within the Market Risks of Financial Instruments section of MD&A in this report.

#### **A decline in the creditworthiness of other financial institutions could adversely affect us.**

We have exposure to and routinely execute transactions with counterparties in the financial services industry, including broker dealers, derivative counterparties, commercial banks and other institutions.

We use derivative instruments to mitigate various risks associated with our investment portfolio, notes payable, and profit repatriation. We enter into a variety of agreements involving assorted instruments including foreign currency forward contracts, foreign currency options, foreign currency and interest rate swaps, and options on interest rate swaps (or interest rate swaptions). To provide additional alternatives to increase our overall portfolio yield while managing our overall currency risk, starting in 2012, we have invested a significant portion of the investable cash flow generated by Aflac Japan into U.S. dollar-denominated investment grade public bonds and hedged these bonds to yen through the use of currency forward and option contracts. The derivative forward and option contracts are of a shorter maturity than the hedged bonds which creates roll-over risks within the hedging program. Due to changes in market environments, there is a risk the hedges become ineffective and lose the corresponding hedge accounting treatment. At December 31, 2014, we held foreign currency forwards and options of approximately \$13.1 billion notional associated with Aflac Japan's U.S. dollar-denominated investments referenced above, and we also had interest rate swaptions of approximately \$2.5 billion notional associated with certain investments, foreign currency swaps of \$2.7 billion notional associated with our notes payable, and foreign currency forwards of approximately \$1.3 billion notional associated with profit repatriation hedges. The Company's increased use of derivatives in the past couple years has increased our financial exposure to derivative counterparties. If our counterparties fail or refuse to honor their obligations under these derivative instruments our hedges of the risks will be ineffective.

We engage in derivative transactions directly with unaffiliated third parties under International Swaps and Derivatives Association, Inc. (ISDA) agreements and other documentation. Most of the ISDA agreements we enter into also include Credit Support Annexes (CSA), which generally provide for two-way collateral postings, in certain cases at the first dollar of exposure and in other cases once various rating and exposure threshold levels are triggered. We attempt to mitigate the risk that counterparties to transactions might be unable to fulfill their contractual obligations by monitoring counterparty credit exposure and collateral value while generally requiring that collateral be posted at the outset of a transaction or that collateral be posted upon the occurrence of certain events or circumstances. In addition, a significant portion of the derivative transactions have provisions that require collateral to be posted upon a downgrade of our long-term debt ratings or give the counterparty the right to terminate the transaction upon a downgrade of Aflac's financial strength ratings. The actual amount of collateral required to be posted to counterparties

in the event of such downgrades, or the aggregate amount of payments that we could be required to make, depends on market conditions, the fair value of outstanding affected transactions, and other factors prevailing at and after the time of any such downgrade. If the Company is required to post collateral to support derivative contracts and/or pay cash to settle the contracts at maturity, the Company's liquidity could be strained.

Further, we have agreements with various financial institutions for the distribution of our insurance products. For example, at December 31, 2014, we had agreements with 371 banks to market Aflac's products in Japan. Sales through these banks represented 21.5% of Aflac Japan's new annualized premium sales in 2014. Any material adverse effect on these or other financial institutions could also have an adverse effect on our sales.

All of these risks could adversely impact our consolidated results of operations and financial condition.

**If future policy benefits, claims or expenses exceed those anticipated in establishing premiums and reserves, our financial results would be adversely affected.**

We establish and carry, as a liability, reserves based on estimates of how much will be required to pay for future benefits and claims. We calculate these reserves using various assumptions and estimates, including premiums we will receive over the assumed life of the policy; the timing, frequency and severity of the events covered by the insurance policy; and the investment returns on the assets we purchase with a portion of our net cash flow from operations. These assumptions and estimates are inherently uncertain. Accordingly, we cannot determine with precision the ultimate amounts that we will pay for, or the timing of payment of, actual benefits and claims or whether the assets supporting the policy liabilities will grow to the level we assume prior to payment of benefits or claims. If our actual experience is different from our assumptions or estimates, our reserves may prove inadequate. As a result, we would incur a charge to earnings in the period in which we determine such a shortfall exists, which could have a material adverse effect on our business, results of operations and financial condition.

**As a holding company, the Parent Company depends on the ability of its subsidiaries to transfer funds to it to meet its debt service and other obligations and to pay dividends on its common stock.**

The Parent Company is a holding company and has no direct operations or significant assets other than the stock of its subsidiaries. Because we conduct our operations through our operating subsidiaries, we depend on those entities for dividends and other payments to generate the funds necessary to meet our debt service and other obligations and to pay dividends on our common stock. Aflac is domiciled in Nebraska and is subject to insurance regulations that impose certain limitations and restrictions on payments of dividends, management fees, loans and advances by Aflac to the Parent Company. The Nebraska insurance statutes require prior approval for dividend distributions that exceed the greater of the net income from operations, which excludes net realized investment gains, for the previous year determined under statutory accounting principles, or 10% of statutory capital and surplus as of the previous year-end. In addition, the Nebraska insurance department must approve service arrangements and other transactions within the affiliated group of companies. In addition, the FSA may not allow profit repatriations or other transfers from Aflac Japan if they would cause Aflac Japan to lack sufficient financial strength for the protection of policyholders.

The ability of Aflac to pay dividends or make other payments to the Parent Company could also be constrained by our dependence on financial strength ratings from independent rating agencies. Our ratings from these agencies depend to a large extent on Aflac's capitalization level. Any inability of Aflac to pay dividends or make other payments to the Parent Company could have a material adverse effect on our financial condition and results of operations. There is no assurance that the earnings from, or other available assets of, our operating subsidiaries will be sufficient to make distributions to us to enable us to operate.

**Our risk management policies and procedures may prove to be ineffective and leave us exposed to unidentified or unanticipated risk, which could adversely affect our businesses or result in losses.**

We have developed an enterprise-wide risk management framework to mitigate risk and loss to the Company. We maintain policies, procedures and controls intended to identify, measure, monitor, report and analyze the risks to which the Company is exposed.

However, there are inherent limitations to risk management strategies because there may exist, or develop in the future, risks that we have not appropriately anticipated or identified. If our risk management framework proves ineffective, the Company may suffer unexpected losses and could be materially adversely affected. As our businesses change and the markets in which we operate evolve, our risk management framework may not evolve at the same pace as those changes. As a result, there is a risk that new products or new business strategies may present risks that are not appropriately identified, monitored or managed. In times of market stress, unanticipated market movements or unanticipated claims experience resulting from greater than expected morbidity, mortality, longevity, or persistency, the effectiveness of our risk management strategies may be limited, resulting in losses to the Company. In addition, under difficult or less liquid market conditions, our risk management strategies may not be effective because other market participants may be using the same or similar strategies to manage risk under the same challenging market conditions. In such circumstances, it may be difficult or more expensive for the Company to mitigate risk due to the activity of such other market participants.

Many of our risk management strategies or techniques are based upon historical customer and market behavior and all such strategies and techniques are based to some degree on management's subjective judgment. We cannot provide assurance that our risk management framework, including the underlying assumptions or strategies, will be accurate and effective.

Management of operational, legal and regulatory risks requires, among other things, policies, procedures and controls to record properly and verify a large number of transactions and events, and these policies, procedures and controls may not be fully effective. Models are utilized by our businesses and corporate areas primarily to project future cash flows associated with pricing products, calculating reserves and valuing assets, as well as in evaluating risk and determining capital requirements, among other uses. These models may not operate properly and rely on assumptions and projections that are inherently uncertain. As our businesses continue to grow and evolve, the number and complexity of models we utilize expands, increasing our exposure to error in the design, implementation or use of models, including the associated input data and assumptions.

Past or future misconduct by our employees or employees of our vendors could result in violations of law by us, regulatory sanctions and/or serious reputational or financial harm and the precautions we take to prevent and detect this activity may not be effective in all cases. There can be no assurance that controls and procedures that we employ, which are designed to monitor associates' business decisions and prevent us from taking excessive or inappropriate risks, will be effective. We review our compensation policies and practices as part of our overall risk management program, but it is possible that our compensation policies and practices could inadvertently incentivize excessive or inappropriate risk taking. If our associates take excessive or inappropriate risks, those risks could harm our reputation and have a material adverse effect on our results of operations or financial condition.

### **Extensive regulation and changes in legislation can impact profitability and growth.**

Aflac's insurance subsidiaries are subject to complex laws and regulations that are administered and enforced by a number of governmental authorities, including state insurance regulators, the SEC, the NAIC, the FIO, the FSA and Ministry of Finance (MOF) in Japan, the U.S. Department of Justice, state attorneys general, the U.S. Commodity Futures Trading Commission, the FIO, and the U.S. Treasury, including the Internal Revenue Service, each of which exercises a degree of interpretive latitude. In addition, proposals regarding the global regulation of insurance are under discussion. Consequently, we are subject to the risk that compliance with any particular regulator's or enforcement authority's interpretation of a legal or regulatory issue may not result in compliance with another regulator's or enforcement authority's interpretation of the same issue, particularly when compliance is judged in hindsight. There is also a risk that any particular regulator's or enforcement authority's interpretation of a legal or regulatory issue may change over time to our detriment. In addition, changes in the overall legal or regulatory environment may, even absent any particular regulator's or enforcement authority's interpretation of an issue changing, cause us to change our views regarding the actions we need to take from a legal or regulatory risk management perspective, thus necessitating changes to our practices that may, in some cases, limit our ability to grow or otherwise negatively impact the profitability of our business.

The primary purpose of insurance company regulatory supervision is the protection of insurance policyholders, rather than investors. The extent of regulation varies, but generally is governed by state statutes in the United States and by the FSA and the MOF in Japan. These systems of supervision and regulation cover, among other things:

- standards of establishing and setting premium rates and the approval thereof
- standards of minimum capital requirements and solvency margins, including risk-based capital measures
- restrictions on, limitations on and required approval of certain transactions between our insurance subsidiaries and their affiliates, including management fee arrangements
- restrictions on the nature, quality and concentration of investments
- restrictions on the types of terms and conditions that we can include in the insurance policies offered by our primary insurance operations
- limitations on the amount of dividends that insurance subsidiaries can pay or foreign profits that can be repatriated
- the existence and licensing status of a company under circumstances where it is not writing new or renewal business
- certain required methods of accounting
- reserves for unearned premiums, losses and other purposes
- assignment of residual market business and potential assessments for the provision of funds necessary for the settlement of covered claims under certain policies provided by impaired, insolvent or failed insurance companies
- administrative practices requirements
- imposition of fines and other sanctions

Regulatory authorities periodically re-examine existing laws and regulations applicable to insurance companies and their products. Changes in these laws and regulations, or in interpretations thereof, could have a material adverse effect on our financial condition and results of operations.

Federal legislation and administrative policies in several areas, including health care reform legislation, financial services reform legislation, securities regulation, pension regulation, privacy, tort reform legislation and taxation, can significantly and adversely affect insurance companies. Various forms of federal oversight and regulation of insurance have been passed by the U.S. Congress and signed into law by the President. For example, the ACA, federal health care reform legislation, gives the U.S. federal government direct regulatory authority over the business of health insurance. The reform includes major changes to the U.S. health care insurance marketplace. Among other changes, the reform legislation includes an individual medical insurance coverage mandate, provides for penalties on certain employers for failing to provide adequate coverage, creates health insurance exchanges, and addresses coverage and exclusions as well as medical loss ratios. The legislation also includes changes in government reimbursements and tax credits for individuals and employers and alters federal and state regulation of health insurers. These changes, directed toward major medical health insurance coverage which Aflac does not offer, have already begun and will continue to be phased in over the next several years. The major elements of the bill became effective on January 1, 2014. We believe that the ACA, as enacted, does not materially affect the design of our insurance products. However, indirect consequences of the legislation and regulations could present challenges and/or opportunities that could potentially have an impact on our sales model, financial condition and results of operations.

In 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act, commonly known as the Dodd-Frank Act, which, among other things, created a Financial Stability Oversight Council. In April 2012, the Council released a final rule describing the general process it will follow in determining whether to designate a nonbank financial company for supervision by the Board of Governors of the U.S. Federal Reserve System (the Board). The Council may designate by a two-thirds vote whether certain nonbank financial companies, including certain insurance companies and insurance holding companies, could pose a threat to the financial stability of the United States, in which case such nonbank financial companies would become subject to prudential regulation by the Board. On April 3, 2013, the Board published a final rule that establishes the requirements for determining when a nonbank financial company is "predominantly engaged in financial activities" - a prerequisite for designation by the Council. Prudential regulation by the Board includes supervision of capital requirements, leverage limits, liquidity requirements and examinations. The Board may limit such company's ability to enter into mergers, acquisitions and other business combination transactions, restrict its ability to offer financial products, require it to terminate one or more activities, or impose conditions on the manner in which it conducts activities. The Council designated two insurers in 2013 and an additional insurer in 2014 for supervision by the Board. On December 18, 2014, President Obama signed

the Insurance Capital Standards Clarification Act into law. This legislation will clarify the Board's authority to apply insurance-based capital standards for insurance companies subject to federal supervision. Although Aflac is a nonbank financial company predominantly engaged in financial activities as defined in the Dodd-Frank Act, we do not believe Aflac will be considered a company that poses a threat to the financial stability of the United States.

Title VII of the Dodd-Frank Act and regulations issued thereunder may have an impact on Aflac's derivative activity, including activity on behalf of Aflac Japan, in particular rules and rule proposals to require central clearing and collateral for certain types of derivatives. The five U.S. banking regulators and the U.S. Commodity Futures Trading Commission (CFTC) recently re-proposed for comment their rules regarding collateral for uncleared swaps. If adopted as proposed, such rules may result in increased collateral requirements for Aflac or impose limits on the types of collateral we are permitted to post.

The Dodd-Frank Act also established an FIO under the U.S. Treasury Department to monitor all aspects of the insurance industry and of lines of business other than certain health insurance, certain long-term care insurance and crop insurance. Traditionally, U.S. insurance companies have been regulated primarily by state insurance departments. In December 2013, the FIO released a report entitled "How To Modernize And Improve The System Of Insurance Regulation In The United States." The report was required by the Dodd-Frank Act, and included 18 recommended areas of near-term reform for the states, including addressing capital adequacy and safety/soundness issues, reform of insurer resolution practices, and reform of marketplace regulation. The report also listed nine recommended areas for direct federal involvement in insurance regulation. Some of the recommendations outlined in the FIO report released in December 2013 have been implemented. Of the nine recommended areas for direct federal involvement in insurance regulation that are applicable to Aflac, President Obama has signed the National Association of Registered Agents and Brokers Reform Act into law in January 2015, which simplifies the agent and broker licensing process across state lines. The FIO has also engaged with the supervisory colleges to monitor financial stability and identify regulatory gaps for large national and internationally active insurers.

On December 10, 2013, five U.S. financial regulators adopted a final rule implementing the "Volcker Rule," which was created by Section 619 of the Dodd-Frank Act. The Volcker Rule generally prohibits "banking entities" from engaging in "proprietary trading" and making investments and conducting certain other activities with "private equity funds and hedge funds." The final rule became effective April 1, 2014; however, at the time the agencies released the final Volcker Rule, the Federal Reserve announced an extension of the conformance period for all banking entities until July 21, 2015. In response to industry questions regarding the final Volcker Rule, the five U.S. financial regulators, which included the Office of the Comptroller of the Currency (OCC); the Federal Reserve; the Federal Deposit Insurance Corporation (FDIC); the SEC and the U.S. CFTC, issued a clarifying interim final rule on January 14, 2014 that permits banking entities to retain interests in certain CDOs backed by trust preferred securities if the CDO meets certain requirements.

On December 18, 2014, the Federal Reserve announced a second extension to the Volcker Rule conformance period, to give banking entities until July 21, 2016, to conform investments in and relationships with covered funds and foreign funds that were in place prior to December 31, 2013 (legacy covered funds). The Federal Reserve also announced its intention to act in the future to grant banking entities an additional one-year extension of the conformance period until July 21, 2017, to conform ownership interests in and relationships with these legacy covered funds. The Federal Reserve did not act to extend the conformance period for proprietary trading activities.

Nonbank financial companies such as Aflac that are not affiliated with an insured depository institution or otherwise brought within the definition of "banking entity" generally will not be subject to the Volcker Rule's prohibitions. However, the prohibitions of the Volcker Rule could impact financial markets generally, for example, through reduced liquidity in certain markets or the exiting of positions by banking entities as the end of the conformance period approaches.

The Dodd-Frank Act requires extensive rule-making and other future regulatory action, which in some cases will take a period of years to implement. However, at the current time, it is not possible to predict with any degree of certainty what impact, if any, the Dodd-Frank Act will have on our U.S. business, financial condition, or results of operations.

Changes in domestic or foreign tax laws or interpretations of such laws could increase our corporate taxes and reduce our earnings. Additionally, global budget deficits make it likely that governments' need for additional revenue will result in future tax proposals that will increase our effective tax rate. However, it remains difficult to predict the timing and effect that future tax law changes could have on our earnings both in the United States and in foreign jurisdictions.

Compliance with applicable laws and regulations is time consuming and personnel-intensive, and changes in these laws and regulations may materially increase our direct and indirect compliance and other expenses of doing business, thus having a material adverse effect on our financial condition and results of operations.

**Sales of our products and services are dependent on our ability to attract, retain and support a network of qualified sales associates.**

Our sales could be adversely affected if our sales networks deteriorate or if we do not adequately provide support, training and education for our existing network. Competition exists for sales associates with demonstrated ability. We compete with other insurers and financial institutions primarily on the basis of our products, compensation, support services and financial rating. An inability to attract and retain qualified sales associates could have a material adverse effect on sales and our results of operations and financial condition. Our sales associates are independent contractors and may sell products of our competitors. If our competitors offer products that are more attractive than ours, or pay higher commissions than we do, these sales associates may concentrate their efforts on selling our competitors' products instead of ours.

**Any decrease in our financial strength or debt ratings may have an adverse effect on our competitive position.**

Financial strength ratings are important factors in establishing the competitive position of insurance companies and generally have an effect on the business of insurance companies. On an ongoing basis NRSROs review the financial performance and condition of insurers and may downgrade or change the outlook on an insurer's ratings due to, for example, a change in an insurer's statutory capital; a change in a rating agency's determination of the amount of risk-adjusted capital required to maintain a particular rating; an increase in the perceived risk of an insurer's investment portfolio; a reduced confidence in management; or other considerations that may or may not be under the insurer's control. In addition to financial strength ratings, various NRSROs also publish ratings on our debt. These ratings are indicators of a debt issuer's ability to meet the terms of debt obligations in a timely manner and are important factors in our ability to access liquidity in the debt markets and other available sources. Downgrades in our credit ratings could give our derivative counterparties the right to require early termination of derivatives transactions or delivery of additional collateral, thereby adversely affecting our liquidity.

In view of the difficulties experienced in the last several years by many financial institutions, including in the insurance industry, the NRSROs have heightened the level of scrutiny that they apply to such institutions, increased the frequency and scope of their reviews, requested additional information from the companies that they rate, including additional information regarding the valuation of investment securities held, and, in certain cases, have increased the capital and other requirements employed in their models for maintenance of certain rating levels.

A downgrade in any of these ratings could have a material adverse effect on agent recruiting and retention, sales, competitiveness and the marketability of our products which could negatively impact our liquidity, operating results and financial condition. Additionally, sales through the bank channel in Japan could be adversely affected as a result of their reliance and sensitivity to ratings levels.

We cannot predict what actions rating agencies may take, or what actions we may take in response to the actions of rating agencies, which could adversely affect our business. As with other companies in the financial services industry, our ratings could be downgraded at any time and without any notice by any NRSRO.

**The success of our business depends in part on effective information technology systems and on continuing to develop and implement improvements in technology.**

Our business depends in large part on our technology systems for interacting with employers, policyholders, sales associates, and brokers, and our business strategy involves providing customers with easy-to-use products to meet their needs and ensuring employees have the technology in place to support those needs. Some of our information technology systems and software are older, legacy-type systems that are less efficient and require an ongoing commitment of significant resources to maintain or upgrade to current standards (including adequate business continuity procedures). We are in a continual state of upgrading and enhancing our business systems; however, these changes are always challenging in our complex integrated environment. Our success is dependent in large part on maintaining or improving the effectiveness of existing systems and continuing to develop and enhance information systems that support our business processes in a cost-efficient manner.

**Interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality or privacy of sensitive data residing on such systems, could harm our business.**

We depend heavily on our telecommunication, information technology and other operational systems and on the integrity and timeliness of data we use to run our businesses and service our customers. These systems may fail to operate properly or become disabled as a result of events or circumstances wholly or partly beyond our control. Despite our implementation of a variety of security measures, our information technology and other systems could be subject to physical or electronic break-ins, unauthorized tampering, security breaches or other cyber-attacks, resulting in a failure to maintain the security, confidentiality or privacy of sensitive data, including personal information relating to customers, or in the misappropriation of our intellectual property or proprietary information. Although the security breaches we have experienced to date have not had a material effect on our business, interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality or privacy of sensitive data residing on such systems, whether due to actions by us or others, could delay or disrupt our ability to do business and service our customers, harm our reputation, subject us to regulatory sanctions and other claims, lead to a loss of customers and revenues and otherwise adversely affect our business.

**Changes in accounting standards issued by the FASB or other standard-setting bodies may adversely affect our financial statements.**

Our financial statements are subject to the application of generally accepted accounting principles in both the United States and Japan, which are periodically revised and/or expanded. Accordingly, from time to time we are required to adopt new or revised accounting standards issued by recognized authoritative bodies, including the FASB. It is possible that future accounting standards we are required to adopt could change the current accounting treatment that we apply to our consolidated financial statements and that such changes could have a material adverse effect on our results of operations and financial condition.

The FASB and IASB have announced their commitment to achieving a single set of high-quality global accounting standards. In 2010, the SEC announced a work plan, the results of which would aid the Commission in its evaluation of the impact that the use of IFRS by U.S. companies would have on the U.S. securities market. Included in this work plan is consideration of IFRS, as it exists today and after the completion of various convergence projects currently underway between U.S. and international accounting standards-setters. In 2012, the SEC issued the final report which stated that adopting IFRS would present challenges and that the majority of the U.S. capital market participants did not support adopting IFRS. However, the report also stated there was significant support for other methods of incorporating IFRS through endorsement into U.S. GAAP. The FASB and IASB are re-deliberating previously exposed proposals for the insurance contracts project that will change the way insurance liabilities are determined and reported. The FASB decided in February 2014 to focus on making targeted improvements to existing U.S. GAAP. Therefore, it appears unlikely that the FASB and IASB will achieve a converged standard relating to insurance contracts. In July 2014, the IASB issued amended guidance to International Financial Reporting Standards (IFRS) 9, Financial Instruments, including amendments to classification and measurement and the impairment model. The FASB exposed, in December 2012, similar changes to classification and measurement and the impairment model. Based upon recent deliberations, it now seems unlikely that the FASB and IASB will achieve a converged standard related to classification and measurement and impairment of financial instruments. The ultimate outcome and timing of these events including the adoption of IFRS are uncertain at this time. The adoption of IFRS and/or the effects of accounting standards changes could significantly alter the presentation of our financial position and results of operations in our financial statements.

See Note 1 of the Notes to the Consolidated Financial Statements in this report for a discussion of recent changes in accounting standards and those that are pending adoption.

**If we fail to comply with restrictions on patient privacy and information security, including taking steps to ensure that our business associates who obtain access to sensitive patient information maintain its confidentiality, our reputation and business operations could be materially adversely affected.**

The collection, maintenance, use, disclosure and disposal of individually identifiable data by our businesses are regulated at the international, federal and state levels. These laws and rules are subject to change by legislation or administrative or judicial interpretation. Various state laws address the use and disclosure of individually identifiable health data to the extent they are more restrictive than those contained in the privacy and security provisions in the federal Gramm-Leach-Bliley Act of 1999 (GLBA) and in the Health Insurance Portability and Accountability Act of 1996

(HIPAA). HIPAA also requires that we impose privacy and security requirements on our business associates (as such term is defined in the HIPAA regulations). With regard to personal information obtained from policyholders, the insured, or others, Aflac Japan is regulated in Japan by the Act on the Protection of Personal Information (APPI) and guidelines issued by FSA and other governmental authorities.

Even though we provide for appropriate protections through our contracts with business associates, we still have limited control over their actions and practices. In addition, despite the security measures we have in place to ensure compliance with applicable laws and rules, our facilities and systems, and those of our third-party providers may be vulnerable to security breaches, acts of vandalism or theft, computer viruses, misplaced or lost data, programming and/or human errors or other similar events. The U.S. Congress and many states are considering new privacy and security requirements that would apply to our business. Compliance with new privacy and security laws, requirements, and new regulations may result in cost increases due to necessary systems changes, new limitations or constraints on our business models, the development of new administrative processes, and the effects of potential noncompliance by our business associates. They also may impose further restrictions on our collection, disclosure and use of patient identifiable data that are housed in one or more of our administrative databases. Noncompliance with any privacy laws or any security breach involving the misappropriation, loss or other unauthorized disclosure of sensitive or confidential member information, whether by us or by one of our vendors, could have a material adverse effect on our business, reputation and results of operations, including: material fines and penalties; compensatory, special, punitive and statutory damages; consent orders regarding our privacy and security practices; adverse actions against our licenses to do business; and injunctive relief.

In addition, under Japanese laws and regulations, including the APPI, if a leak or loss of personal information by Aflac Japan or its business associates should occur, depending on factors such as the volume of personal data involved and the likelihood of other secondary damage, Aflac Japan may be required to file reports to the FSA; issue public releases explaining such incident to the public; or become subject to an FSA business improvement order, which could pose a risk to our reputation.

#### **We face risks related to litigation.**

We are a defendant in various lawsuits considered to be in the normal course of business. Members of our senior legal and financial management teams review litigation on a quarterly and annual basis. The final results of any litigation cannot be predicted with certainty. Although some of this litigation is pending in states where large punitive damages, bearing little relation to the actual damages sustained by plaintiffs, have been awarded in recent years, we believe the outcome of pending litigation will not have a material adverse effect on our financial position, results of operations, or cash flows. However, litigation could adversely affect us because of the costs of defending these cases, costs of settlement or judgments against us or because of changes in our operations that could result from litigation.

#### **Managing key executive succession is critical to our success.**

We would be adversely affected if we fail to adequately plan for succession of our senior management and other key executives. While we have succession plans and employment arrangements with certain key executives, these plans cannot guarantee that the services of these executives will be available to us, and our operations could be adversely affected if they are not.

#### **Catastrophic events could adversely affect our financial condition and results of operations.**

Our insurance operations are exposed to the risk of catastrophic events including, but not necessarily limited to, epidemics, pandemics, tornadoes, hurricanes, earthquakes, tsunamis, and acts of terrorism. The extent of losses from a catastrophe is a function of both the total amount of insured exposure in the area affected by the event and the severity of the event. Certain events such as earthquakes, tsunamis, hurricanes and man-made catastrophes could cause substantial damage or loss of life in larger areas, especially those that are heavily populated. Claims resulting from natural or man-made catastrophic events could cause substantial volatility in our financial results for any fiscal quarter or year and could materially reduce our profitability or harm our financial condition, as well as affect our ability to write new business.

## **We operate in an industry that is subject to ongoing changes.**

We operate in a competitive environment and in an industry that is subject to ongoing changes from market pressures brought about by customer demands, legislative reform, marketing practices and changes to health care and health insurance delivery. These factors require us to anticipate market trends and make changes to differentiate our products and services from those of our competitors. We also face the potential of competition from existing or new companies in the United States and Japan that have not historically been active in the supplemental health insurance industry. Failure to anticipate market trends and/or to differentiate our products and services can affect our ability to retain or grow profitable lines of business.

## **Events, including those external to our operations, could damage our reputation.**

Because insurance products are intangible, we rely to a large extent on consumer trust in our business. The perception of financial weakness could create doubt regarding our ability to honor the commitments we have made to our policyholders. Maintaining our stature as a responsible corporate citizen, which helps support the strength of our unique brand, is critical to our reputation and the failure or perceived failure to do so could adversely affect us.

## **Changes in our discount rate, expected rate of return, life expectancy, health care cost and expected compensation increase assumptions for our pension and other postretirement benefit plans may result in increased expenses and reduce our profitability.**

We determine our pension and other postretirement benefit plan costs based on assumed discount rates, expected rates of return on plan assets, life expectancy of plan participants and expected increases in compensation levels and trends in health care costs. Changes in these assumptions, including from the impact of a sustained low interest rate environment, may result in increased expenses and reduce our profitability.

## **We also face other risks that could adversely affect our business, results of operations or financial condition, which include:**

- any requirement to restate financial results in the event of inappropriate application of accounting principle
- failure to appropriately maintain controls over models used to generate significant inputs to the Company's financial statements
- a significant failure of internal controls over financial reporting
- failure of our prevention and control systems related to employee compliance with internal policies and regulatory requirements
- failure of corporate governance policies and procedures

## **ITEM 1B. UNRESOLVED STAFF COMMENTS**

Not applicable.

## **ITEM 2. PROPERTIES**

In the United States, Aflac owns land and buildings that comprise two primary campuses located in Columbus, Georgia. These campuses include buildings that serve as our worldwide headquarters and house administrative support and information technology functions for our U.S. operations. Aflac also owns land and office buildings in Columbia, South Carolina, which house our CAIC subsidiary. Aflac leases office space in New York that houses our Global Investment division. Aflac leases administrative office space in Georgia, South Carolina, New York, Nebraska, and in 36 additional states throughout the United States, as well as Washington, D.C. and Puerto Rico.

In Tokyo, Japan, Aflac has two primary campuses. The first campus includes a building, owned by Aflac, for the customer call center, information technology departments, and training facility. It also includes a leased property, which houses our policy administration and customer service departments. The second campus comprises leased space, which serves as our Japan branch headquarters and houses administrative and investment support functions for the Japan branch. Aflac also leases additional office space in Tokyo, along with regional offices located throughout the country.

**ITEM 3. LEGAL PROCEEDINGS**

We are a defendant in various lawsuits considered to be in the normal course of business. Members of our senior legal and financial management teams review litigation on a quarterly and annual basis. The final results of any litigation cannot be predicted with certainty. Although some of this litigation is pending in states where large punitive damages, bearing little relation to the actual damages sustained by plaintiffs, have been awarded in recent years, we believe the outcome of pending litigation will not have a material adverse effect on our financial position, results of operations, or cash flows.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

## PART II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

#### Market Information

Aflac Incorporated's common stock is principally traded on the New York Stock Exchange under the symbol AFL. Our stock is also listed on the Tokyo Stock Exchange. The quarterly high and low market prices for the Company's common stock, as reported on the New York Stock Exchange for the two years ended December 31 were as follows:

#### Quarterly Common Stock Prices

2014	High	Low
4th Quarter	\$ 62.46	\$ 54.99
3rd Quarter	64.20	57.70
2nd Quarter	64.47	60.60
1st Quarter	66.69	60.45

2013	High	Low
4th Quarter	\$ 67.62	\$ 61.96
3rd Quarter	63.63	56.08
2nd Quarter	58.75	48.54
1st Quarter	54.44	48.17

#### Holders

As of February 17, 2015 , there were 87,431 holders of record of the Company's common stock.

#### Dividends

	2014	2013
4th Quarter	\$ .39	\$ .37
3rd Quarter	.37	.35
2nd Quarter	.37	.35
1st Quarter	.37	.35

In February 2015, the board of directors declared the first quarter 2015 cash dividend of \$.39 per share. The dividend is payable on March 2, 2015 to shareholders of record at the close of business on February 17, 2015 . The declaration and payment of future dividends to holders of our common stock will be at the discretion of our board of directors and will depend upon many factors, including our financial condition, earnings, capital requirements of our operating subsidiaries, legal requirements, regulatory constraints and other factors as the board of directors deems relevant. There can be no assurance that we will declare and pay any additional or future dividends. For information concerning dividend restrictions, see Regulatory Restrictions in the Capital Resources and Liquidity section of MD&A and Note 13 of the Notes to the Consolidated Financial Statements presented in this report.

## Stock Performance Graph

The following graph compares the five-year performance of the Company's common stock to the Standard & Poor's 500 Index (S&P 500) and the Standard & Poor's Life and Health Insurance Index (S&P Life and Health). The Standard & Poor's Life and Health Insurance Index includes: Aflac Incorporated, Lincoln National Corporation, MetLife Inc., Principal Financial Group Inc., Prudential Financial Inc., Torchmark Corporation and Unum Group.

## Issuer Purchases of Equity Securities

During the year ended December 31, 2014, we repurchased shares of Aflac common stock as follows:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 - January 31	3,218,667	\$ 64.24	3,217,000	45,993,020
February 1 - February 28	3,113,966	62.45	3,008,016	42,985,004
March 1 - March 31	311,944	64.60	310,000	42,675,004
April 1 - April 30	20,000	62.73	20,000	42,655,004
May 1 - May 31	865,548	62.12	865,000	41,790,004
June 1 - June 30	723,697	62.37	722,480	41,067,524
July 1 - July 31	135,969	60.71	135,000	40,932,524
August 1 - August 31	683,577	60.04	682,700	40,249,824
September 1 - September 30	2,112,414	59.66	2,110,700	38,139,124
October 1 - October 31	700,000	59.81	700,000	37,439,124
November 1 - November 30	3,570,000	59.32	3,570,000	33,869,124
December 1 - December 31	4,320,676	59.46	4,319,000	29,550,124
<b>Total</b>	<b>19,776,458</b> <sup>(2)</sup>	<b>\$ 61.05</b>	<b>19,659,896</b>	<b>29,550,124</b> <sup>(1)</sup>

<sup>(1)</sup> The total remaining shares available for purchase at December 31, 2014, consisted of 29,550,124 shares related to a 40,000,000 share repurchase authorization by the board of directors in 2013.

<sup>(2)</sup> During the year ended December 31, 2014, 116,562 shares were purchased in connection with income tax withholding obligations related to the vesting of restricted-share-based awards during the period.

Policy liabilities	<b>\$ 83,933</b>	\$ 89,402	\$ 97,720	\$ 94,239	\$ 82,310
Income taxes	<b>5,293</b>	3,718	3,858	2,308	1,689
Notes payable	<b>5,282</b>	4,897	4,352	3,285	3,038
Other liabilities	<b>6,912</b>	8,670	9,186	3,459	2,666
Shareholders' equity	<b>18,347</b>	14,620	15,978	12,946	10,540
Total liabilities and shareholders' equity	<b>\$ 119,767</b>	\$ 121,307	\$ 131,094	\$ 116,237	\$ 100,243

*Amounts prior to 2012 have been adjusted for the adoption of accounting guidance on January 1, 2012 related to deferred policy acquisition costs.*

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### FORWARD-LOOKING INFORMATION

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" to encourage companies to provide prospective information, so long as those informational statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. We desire to take advantage of these provisions. This report contains cautionary statements identifying important factors that could cause actual results to differ materially from those projected herein, and in any other statements made by Company officials in communications with the financial community and contained in documents filed with the Securities and Exchange Commission (SEC). Forward-looking statements are not based on historical information and relate to future operations, strategies, financial results or other developments. Furthermore, forward-looking information is subject to numerous assumptions, risks and uncertainties. In particular, statements containing words such as "expect," "anticipate," "believe," "goal," "objective," "may," "should," "estimate," "intends," "projects," "will," "assumes," "potential," "target" or similar words as well as specific projections of future results, generally qualify as forward-looking. Aflac undertakes no obligation to update such forward-looking statements.

We caution readers that the following factors, in addition to other factors mentioned from time to time, could cause actual results to differ materially from those contemplated by the forward-looking statements:

- difficult conditions in global capital markets and the economy
- governmental actions for the purpose of stabilizing the financial markets
- defaults and credit downgrades of securities in our investment portfolio
- exposure to significant financial and capital markets risk
- fluctuations in foreign currency exchange rates
- significant changes in investment yield rates
- credit and other risks associated with Aflac's investment in perpetual securities
- differing judgments applied to investment valuations
- significant valuation judgments in determination of amount of impairments taken on our investments
- limited availability of acceptable yen-denominated investments
- concentration of our investments in any particular single-issuer or sector
- concentration of business in Japan
- decline in creditworthiness of other financial institutions
- deviations in actual experience from pricing and reserving assumptions
- subsidiaries' ability to pay dividends to Aflac Incorporated
- ineffective risk management policies and procedures
- changes in law or regulation by governmental authorities
- ability to attract and retain qualified sales associates and employees
- decreases in our financial strength or debt ratings
- ability to continue to develop and implement improvements in information technology systems
- interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality or privacy of sensitive data residing on such systems
- changes in U.S. and/or Japanese accounting standards
- failure to comply with restrictions on patient privacy and information security
- level and outcome of litigation
- ability to effectively manage key executive succession
- catastrophic events including, but not necessarily limited to, epidemics, pandemics, tornadoes, hurricanes, earthquakes, tsunamis, acts of terrorism and damage incidental to such events
- ongoing changes in our industry
- events that damage our reputation
- increased expenses for pension and other postretirement plans
- failure of internal controls or corporate governance policies and procedures

## MD&A OVERVIEW

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to inform the reader about matters affecting the financial condition and results of operations of Aflac Incorporated and its subsidiaries for the three-year period ended December 31, 2014 . As a result, the following discussion should be read in conjunction with the related consolidated financial statements and notes. This MD&A is divided into the following sections:

- Our Business
- Performance Highlights
- Critical Accounting Estimates
- Results of Operations, consolidated and by segment
- Analysis of Financial Condition, including discussion of market risks of financial instruments
- Capital Resources and Liquidity, including discussion of availability of capital and the sources and uses of cash

## OUR BUSINESS

Aflac Incorporated (the Parent Company) and its subsidiaries (collectively, the Company) primarily sell supplemental health and life insurance in the United States and Japan. The Company's insurance business is marketed and administered through American Family Life Assurance Company of Columbus (Aflac), which operates in the United States (Aflac U.S.) and as a branch in Japan (Aflac Japan). Most of Aflac's policies are individually underwritten and marketed through independent agents. Aflac U.S. also markets and administers group products through Continental American Insurance Company (CAIC), branded as Aflac Group Insurance. Our insurance operations in the United States and our branch in Japan service the two markets for our insurance business.

## PERFORMANCE HIGHLIGHTS

Yen-denominated income statement accounts are translated to U.S. dollars using a weighted-average Japanese yen/U.S. dollar foreign exchange rate, while yen-denominated balance sheet accounts are translated to U.S. dollars using a spot Japanese yen/U.S. dollar foreign exchange rate. The spot yen/dollar exchange rate at December 31, 2014 was 120.55 , or 12.6% weaker than the December 31, 2013 spot yen/dollar exchange rate of 105.39 . The weighted-average yen/dollar exchange rate for the year ended December 31, 2014 was 105.46 , or 7.5% weaker than the weighted-average yen/dollar exchange rate of 97.54 for the same period in 2013 .

Reflecting the weaker yen/dollar exchange rate, total revenues were down 5.1% to \$22.7 billion in 2014 , compared with \$23.9 billion in 2013 . Net earnings in 2014 were \$3.0 billion , or \$6.50 per diluted share, compared with \$3.2 billion , or \$6.76 per diluted share, in 2013 .

Results for 2014 included pretax net realized investment gains of \$215 million ( \$140 million after-tax), compared with net realized investment gains of \$399 million ( \$259 million after-tax) in 2013 . Net investment gains in 2014 consisted of \$31 million ( \$20 million after-tax) of other-than-temporary impairment losses ; \$215 million of net gains ( \$140 million after-tax) from the sale or redemption of securities; and \$31 million of net gains ( \$20 million after-tax) from valuing derivatives. Shareholders' equity included a net unrealized gain on investment securities and derivatives of \$4.7 billion at December 31, 2014 , compared with a net unrealized gain of \$1.0 billion at December 31, 2013 .

In November 2014, the Parent Company issued \$750 million of senior notes through a U.S. public debt offering. We entered into cross-currency interest rate swaps to economically convert the dollar-denominated principal and interest on the senior notes we issued into yen-denominated obligations. In October 2014, the Parent Company and Aflac entered into a 364-day uncommitted bilateral line of credit that provides for borrowings in the amount of \$100 million. For further information regarding these transactions, see Note 9 of the Notes to the Consolidated Financial Statements and the Capital Resources and Liquidity section of this MD&A.

We repurchased 19.7 million shares of our common stock in the open market for \$1.2 billion under our share repurchase program in 2014, compared with 13.2 million shares repurchased in 2013.

## CRITICAL ACCOUNTING ESTIMATES

We prepare our financial statements in accordance with U.S. generally accepted accounting principles (GAAP). These principles are established primarily by the Financial Accounting Standards Board (FASB). In this MD&A, references to GAAP issued by the FASB are derived from the FASB Accounting Standards Codification™ (ASC). The preparation of financial statements in conformity with GAAP requires us to make estimates based on currently available information when recording transactions resulting from business operations. The estimates that we deem to be most critical to an understanding of Aflac's results of operations and financial condition are those related to the valuation of investments and derivatives, deferred policy acquisition costs (DAC), liabilities for future policy benefits and unpaid policy claims, and income taxes. The preparation and evaluation of these critical accounting estimates involve the use of various assumptions developed from management's analyses and judgments. The application of these critical accounting estimates determines the values at which 93% of our assets and 73% of our liabilities are reported as of December 31, 2014, and thus has a direct effect on net earnings and shareholders' equity. Subsequent experience or use of other assumptions could produce significantly different results.

### Investments and Derivatives

Aflac's investments in debt, perpetual and equity securities include both publicly issued and privately issued securities. For publicly issued securities, we determine the fair values from quoted market prices readily available from public exchange markets and price quotes and valuations from third party pricing vendors. For the majority of privately issued securities within our investment portfolio, a third party pricing vendor has developed valuation models to determine fair values. For the remaining privately issued securities, we use non-binding price quotes from outside brokers. We also routinely review our investments that have experienced declines in fair value to determine if the decline is other than temporary. The identification of distressed investments, the determination of fair value if not publicly traded and the assessment of whether a decline is other than temporary involve significant management judgment.

Our team of experienced credit professionals must apply considerable judgment in determining the likelihood of the security recovering in value while we own it. Factors that may influence this include our assessment of the issuer's ability to continue making timely payments of interest and principal, the overall level of interest rates and credit spreads, and other factors. This process requires consideration of risks which can be controlled to a certain extent, such as credit risk, and risks which cannot be controlled, such as interest rate risk. Management updates its evaluations regularly and reflects impairment losses in the Company's income statement as such evaluations are revised.

Our derivative activities include foreign currency, interest rate and credit default swaps in variable interest entities (VIEs) that are consolidated; foreign currency swaps associated with certain senior notes and our subordinated debentures; foreign currency forwards and options used in hedging foreign exchange risk and options on interest rate swaps (or interest rate swaptions) used in hedging interest rate risk on U.S. dollar-denominated securities in Aflac Japan's portfolio; and foreign currency forwards and options used to hedge certain portions of forecasted cash flows denominated in yen. Inputs used to value derivatives include, but are not limited to, interest rates, credit spreads, foreign currency forward and spot rates, and interest volatility. With the exception of the derivatives associated with our VIE investments, the fair values of the derivatives referenced above are based on the amounts we would expect to receive or pay to terminate the derivatives. For derivatives associated with VIEs where we are the primary beneficiary, we receive valuations from a third party pricing vendor.

See Notes 1, 3, 4 and 5 of the Notes to the Consolidated Financial Statements for additional information.

### Deferred Policy Acquisition Costs and Policy Liabilities

Aflac's products are generally long-duration fixed-benefit indemnity contracts. We make estimates of certain factors that affect the profitability of our business to match expected policy benefits and deferrable acquisition costs with expected policy premiums. These factors include persistency, morbidity, mortality, investment yields and expenses. If actual results match the assumptions used in establishing policy liabilities and the deferral and amortization of acquisition costs, profits are expected to emerge ratably over the life of the policy. However, because actual results will vary from the assumptions, profits as a percentage of earned premiums will vary from year to year.

We measure the adequacy of our policy reserves and recoverability of DAC annually by performing gross premium valuations on our business. Our testing indicates that our insurance liabilities are adequate and that our DAC is recoverable.

## Deferred Policy Acquisition Costs

Certain costs of acquiring new business are deferred and amortized over the policy's premium payment period in proportion to anticipated premium income. Future amortization of DAC is based upon our estimates of persistency, interest and future premium revenue generally established at the time of policy issuance. However, the unamortized balance of DAC reflects actual persistency. See Note 6 of the Notes to the Consolidated Financial Statements for a detail of the DAC activity for the past two years.

## Policy Liabilities

The following table provides details of policy liabilities by segment and in total as of December 31.

<b>Policy Liabilities</b>		
(In millions)	2014	2013
<b>Japan segment:</b>		
Future policy benefits	\$ 57,916	\$ 61,780
Unpaid policy claims	2,120	2,342
Other policy liabilities	14,539	16,180
Total Japan policy liabilities	\$ 74,575	\$ 80,302
<b>U.S. segment:</b>		
Future policy benefits	\$ 7,728	\$ 7,354
Unpaid policy claims	1,511	1,421
Other policy liabilities	117	323
Total U.S. policy liabilities	\$ 9,356	\$ 9,098
<b>Consolidated:</b>		
Future policy benefits	\$ 65,646	\$ 69,136
Unpaid policy claims	3,630	3,763
Other policy liabilities	14,657	16,503
Total consolidated policy liabilities	\$ 83,933	\$ 89,402

Our policy liabilities, which are determined in accordance with applicable guidelines as defined under GAAP and Actuarial Standards of Practice, include two components that involve analysis and judgment: future policy benefits and unpaid policy claims, which accounted for 78% and 4% of total policy liabilities as of December 31, 2014, respectively.

Future policy benefits provide for claims that will occur in the future and are generally calculated as the present value of future expected benefits to be incurred less the present value of future expected net benefit premiums. We calculate future policy benefits based on assumptions of morbidity, mortality, persistency and interest. These assumptions are generally established at the time a policy is issued. The assumptions used in the calculations are closely related to those used in developing the gross premiums for a policy. As required by GAAP, we also include a provision for adverse deviation, which is intended to accommodate adverse fluctuations in actual experience.

Unpaid policy claims include those claims that have been incurred and are in the process of payment as well as an estimate of those claims that have been incurred but have not yet been reported to us. We compute unpaid policy claims on a non-discounted basis using statistical analyses of historical claims payments, adjusted for current trends and changed conditions. We update the assumptions underlying the estimate of unpaid policy claims regularly and incorporate our historical experience as well as other data that provides information regarding our outstanding liability.

Our insurance products provide fixed-benefit amounts per occurrence that are not subject to medical-cost inflation. Furthermore, our business is widely dispersed in both the United States and Japan. This geographic dispersion and the nature of our benefit structure mitigate the risk of a significant unexpected increase in claims payments due to epidemics and events of a catastrophic nature. Claims incurred under Aflac's policies are generally reported and paid in a relatively short time frame. The unpaid claims liability is sensitive to morbidity assumptions, in particular, severity and frequency of claims. Severity is the ultimate size of a claim, and frequency is the number of claims incurred. Our claims experience is primarily related to the demographics of our policyholders.

As a part of our established financial reporting and accounting practices and controls, we perform actuarial reviews of our policyholder liabilities on an ongoing basis and reflect the results of those reviews in our results of operations and financial condition as required by GAAP.

For Aflac Japan, our review in 2014 and 2013 indicated no need to strengthen liabilities associated with policies in Japan. Our review in 2012 indicated that we needed to strengthen the liability associated primarily with a block of care policies and closed block of dementia policies in Japan, primarily due to low investment yields. We strengthened our future policy benefits liability by \$81 million in 2012 as a result of this review .

For Aflac U.S., our review in 2014 indicated no need to strengthen liabilities associated with policies in the United States. Our review in 2013 and 2012 indicated that we needed to strengthen the liability associated primarily with long-term care in the United States. We strengthened our future policy benefits liability by \$ 20 million in both 2013 and 2012 as a result of this review .

The table below reflects the growth of the future policy benefits liability for the years ended December 31.

### Future Policy Benefits

(In millions of dollars and billions of yen)	2014	2013	2012
Aflac U.S.	\$ 7,728	\$ 7,354	\$ 6,931
Growth rate	5.1 %	6.1 %	6.9 %
Aflac Japan	\$ 57,916	\$ 61,780	\$ 69,530
Growth rate	(6.3)%	(11.1)%	(4.5)%
Consolidated	\$ 65,646	\$ 69,136	\$ 76,463
Growth rate	(5.0)%	(9.6)%	(3.6)%
Yen/dollar exchange rate (end of period)	120.55	105.39	86.58
Aflac Japan (in yen)	6,982	6,511	6,020
Growth rate	7.2 %	8.2 %	6.4 %

As of December 31, 2014, the decrease in total consolidated future policy benefits liability in dollars was primarily driven by the weakening of the yen against the U.S. dollar, compared with December 31, 2013. The growth of the future policy benefits liability in yen for Aflac Japan and in dollars for Aflac U.S. has been due to the aging of our in-force block of business and the addition of new business .

In computing the estimate of unpaid policy claims, we consider many factors, including the benefits and amounts available under the policy; the volume and demographics of the policies exposed to claims; and internal business practices, such as incurred date assignment and current claim administrative practices. We monitor these conditions closely and make adjustments to the liability as actual experience emerges. Claim levels are generally stable from period to period; however, fluctuations in claim levels may occur. In calculating the unpaid policy claim liability, we do not calculate a range of estimates. The following table shows the expected sensitivity of the unpaid policy claims liability as of December 31, 2014 , to changes in severity and frequency of claims.

### Sensitivity of Unpaid Policy Claims Liability

(In millions)	Total Severity				
	Decrease by 2%	Decrease by 1%	Unchanged	Increase by 1%	Increase by 2%
<b>Total Frequency</b>					
Increase by 2%	\$ 0	\$ 23	\$ 47	\$ 70	\$ 94
Increase by 1%	(23)	0	23	47	70
Unchanged	(46)	(23)	0	23	47
Decrease by 1%	(68)	(46)	(23)	0	23
Decrease by 2%	(91)	(68)	(46)	(23)	0

Other policy liabilities, which accounted for 18% of total policy liabilities as of December 31, 2014, consisted primarily of discounted advance premiums on deposit from policyholders in conjunction with their purchase of certain Aflac Japan insurance products. These advanced premiums are deferred upon collection and recognized as premium revenue over the contractual premium payment period. Advanced premiums represented 47% and 53% of the December 31, 2014 and

2013 other policy liabilities balances, respectively. See the Aflac Japan segment subsection of this MD&A for further information.

## **Income Taxes**

Income tax provisions are generally based on pretax earnings reported for financial statement purposes, which differ from those amounts used in preparing our income tax returns. Deferred income taxes are recognized for temporary differences between the financial reporting basis and income tax basis of assets and liabilities, based on enacted tax laws and statutory tax rates applicable to the periods in which we expect the temporary differences to reverse. The evaluation of a tax position in accordance with GAAP is a two-step process. Under the first step, the enterprise determines whether it is more likely than not that a tax position will be sustained upon examination by taxing authorities. The second step is measurement, whereby a tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. A valuation allowance is established for deferred tax assets when it is more likely than not that an amount will not be realized. The determination of a valuation allowance for deferred tax assets requires management to make certain judgments and assumptions.

In evaluating the ability to recover deferred tax assets, our management considers all available evidence, including taxable income in open carry back years, the existence of cumulative losses in the most recent years, forecasted earnings, future taxable income exclusive of reversing temporary differences and carryforwards, future taxable temporary difference reversals, and prudent and feasible tax planning strategies. In the event we determine it is not more likely than not that we will be able to realize all or part of our deferred tax assets in the future, a valuation allowance would be charged to earnings in the period such determination is made. Likewise, if it is later determined that it is more likely than not that those deferred tax assets would be realized, the previously provided valuation allowance would be reversed. Future economic conditions and market volatility, including increases in interest rates or widening credit spreads, can adversely impact the Company's tax planning strategies and in particular the Company's ability to utilize tax benefits on previously recognized capital losses. Our judgments and assumptions are subject to change given the inherent uncertainty in predicting future performance and specific industry and investment market conditions.

Interest rates and credit spreads in both the United States and Japan are not the only factors that impact the Company's unrealized gain/loss position and the evaluation of a need for a valuation allowance on the Company's deferred tax asset, but they do have a direct and significant effect on both. Based on our methodology described above for evaluating the need for a valuation allowance, we have determined that it is more likely than not that our deferred tax assets will be realized in the future, therefore we have not recorded a valuation allowance as of December 31, 2014.

See Note 10 of the Notes to the Consolidated Financial Statements for additional information.

## **New Accounting Pronouncements**

During the last three years, various accounting standard-setting bodies have been active in soliciting comments and issuing statements, interpretations and exposure drafts. For information on new accounting pronouncements and the impact, if any, on our financial position or results of operations, see Note 1 of the Notes to the Consolidated Financial Statements.

## **RESULTS OF OPERATIONS**

The following discussion includes references to our performance measures, operating earnings and operating earnings per diluted share, that are not based on accounting principles generally accepted in the United States of America ("GAAP"). Operating earnings is the measure of segment profit or loss we use to evaluate segment performance and allocate resources. Consistent with GAAP accounting guidance for segment reporting, operating earnings is our measure of segment performance. Aflac believes that an analysis of operating earnings is vitally important to an understanding of our underlying profitability drivers and trends of our insurance business. Furthermore, because a significant portion of our business is conducted in Japan, we believe it is equally important to understand the impact of translating Japanese yen into U.S. dollars.

Aflac defines operating earnings (a non-GAAP financial measure) as the profits derived from operations. Operating earnings includes interest cash flows associated with notes payable but excludes items that cannot be predicted or that are outside of management's control, such as realized investment gains and losses from securities transactions, impairments, and derivative and hedging activities; nonrecurring items; and other non-operating income (loss) from net earnings. Aflac's derivative activities are primarily used to hedge foreign exchange and interest rate risk in our investment portfolio as well as manage foreign exchange risk for certain notes payable and forecasted cash

flows denominated in yen. Our management uses operating earnings to evaluate the financial performance of Aflac's insurance operations because realized gains and losses from securities transactions, impairments, and derivative and hedging activities, as well as other and nonrecurring items, tend to be driven by general economic conditions and events or related to infrequent activities not directly associated with the Company's insurance operations, and therefore may obscure the underlying fundamentals and trends in Aflac's insurance operations.

The following table is a reconciliation of items impacting operating and net earnings and operating and net earnings per diluted share for the years ended December 31.

### Reconciliation of Operating Earnings to Net Earnings

	In Millions			Per Diluted Share		
	2014	2013	2012	2014	2013	2012
Operating earnings	\$ 2,797	\$ 2,887	\$ 3,097	\$ 6.16	\$ 6.18	\$ 6.60
Items impacting net earnings, net of tax:						
Realized investment gains (losses):						
Securities transactions and impairments	119	41	(326)	.26	.09	(.69)
Impact of derivative and hedging activities:						
Hedge costs related to foreign currency investments	(24)	(17)	(5)	(.05)	(.04)	(.01)
Other derivative and hedging activities	16 <sup>(1)</sup>	229 <sup>(1)</sup>	105	.03	.49	.22
Other and non-recurring income (loss)	43	18	(5)	.10	.04	(.01)
Net earnings	\$ 2,951	\$ 3,158	\$ 2,866	\$ 6.50	\$ 6.76	\$ 6.11

<sup>(1)</sup> Excludes a gain of \$28 and \$6, after tax, in 2014 and 2013, respectively, related to the interest rate component of the change in fair value of foreign currency swaps on notes payable which is classified as an operating gain when analyzing segment operations

### Realized Investment Gains and Losses

Our investment strategy is to invest in fixed-income securities to provide a reliable stream of investment income, which is one of the drivers of the Company's growth and profitability. This investment strategy incorporates asset-liability matching (ALM) to align the expected cash flows of the portfolio to the needs of the Company's liability structure. We do not purchase securities with the intent of generating capital gains or losses. However, investment gains and losses may be realized as a result of changes in the financial markets and the creditworthiness of specific issuers, tax planning strategies, and/or general portfolio management and rebalancing. The realization of investment gains and losses is independent of the underwriting and administration of our insurance products, which are the principal drivers of our profitability.

#### Securities Transactions and Impairments

During 2014, we realized pretax investment gains, net of losses, of \$215 million (\$140 million after-tax) from sales and redemptions of securities. These net gains primarily resulted from gains on sales of JGBs and our U.S. Treasury holdings, currency gains from transactions by our externally managed portfolio of U.S. dollar-denominated bank loans, and assorted other bond sales and calls. We realized pretax investment losses of \$31 million (\$20 million after-tax) as a result of the recognition of other-than-temporary impairment losses on certain securities.

During 2013, we realized pretax investment gains, net of losses, of \$262 million (\$170 million after-tax) from sales and redemptions of securities. These net gains primarily resulted from sales of Japanese Government Bonds (JGBs) as part of a portfolio repositioning exercise. We also realized modest gains from bond tender offers of several of our holdings. We realized pretax investment losses of \$199 million (\$129 million after-tax) as a result of the recognition of other-than-temporary impairment losses on certain securities.

During 2012, we realized pretax investment gains, net of losses, of \$474 million (\$309 million after-tax) from sales and redemptions of securities. These net gains primarily resulted from sales of JGBs in a bond-swap program in the third quarter of 2012 and sales resulting from our efforts to reduce risk exposure in our investment portfolio. We realized pretax investment losses of \$977 million (\$635 million after-tax) as a result of the recognition of other-than-temporary impairment losses on certain securities.

See Note 3 of the Notes to the Consolidated Financial Statements for more details on these investment activities.

The following table details our pretax impairment losses by investment category for the years ended December 31.

(In millions)	2014	2013	2012
Perpetual securities	\$ 0	\$ 70	\$ 243
Corporate bonds	31	102	345
Mortgage- and asset-backed securities	0	0	3
Sovereign and supranational	0	26	386
Equity securities	0	1	0
Total other-than-temporary impairment losses realized <sup>(1)</sup>	\$ 31	\$ 199	\$ 977

<sup>(1)</sup> Includes \$45 and \$597 for the years ended December 31, 2013 and 2012, respectively, for credit-related impairments; \$26 and \$27 for the years ended December 31, 2013 and 2012, respectively, for impairments due to severity and duration of decline in fair value; and \$31, \$128 and \$353 for the years ended December 31, 2014, 2013 and 2012, respectively, from change in intent to sell securities

### Impact of Derivative and Hedging Activities

Our derivative activities include foreign currency swaps, credit default swaps and interest rate swaps in VIEs that are consolidated; foreign currency forwards and options, interest rate swaptions and futures on certain fixed-maturity securities; foreign currency forwards and options that hedge certain portions of forecasted cash flows denominated in yen; and foreign currency swaps associated with certain senior notes and our subordinated debentures. During 2014, we realized pretax investment gains, net of losses, of \$31 million (\$20 million after-tax), compared with pretax investment gains, net of losses, of \$336 million (\$218 million after-tax) in 2013 and pretax investment gains, net of losses, of \$154 million (\$100 million after-tax) in 2012 as a result of valuing these derivatives, net of the effects of hedge accounting. For a description of other items that could be included in the Impact of Derivative and Hedging Activities, see the Hedging Activities subsection of MD&A and Note 4 of the accompanying Notes to the Consolidated Financial Statements.

For additional information regarding realized investment gains and losses, see Notes 3 and 4 of the Notes to the Consolidated Financial Statements.

### **Foreign Currency Translation**

Aflac Japan's premiums and most of its investment income are received in yen. Claims and expenses are paid in yen, and we have yen-denominated assets that support yen-denominated policy liabilities. These and other yen-denominated financial statement items are translated into dollars for financial reporting purposes. We translate Aflac Japan's yen-denominated income statement into dollars using an average exchange rate for the reporting period, and we translate its yen-denominated balance sheet using the exchange rate at the end of the period.

Due to the size of Aflac Japan, where our functional currency is the Japanese yen, fluctuations in the yen/dollar exchange rate can have a significant effect on our reported results. In periods when the yen weakens, translating yen into dollars results in fewer dollars being reported. When the yen strengthens, translating yen into dollars results in more dollars being reported. Consequently, yen weakening has the effect of suppressing current period results in relation to the comparable prior period, while yen strengthening has the effect of magnifying current period results in relation to the comparable prior period. As a result, we view foreign currency translation as a financial reporting issue for Aflac and not an economic event to our Company or shareholders. Because changes in exchange rates distort the growth rates of our operations, management evaluates Aflac's financial performance excluding the impact of foreign currency translation.

### **Income Taxes**

Our combined U.S. and Japanese effective income tax rate on pretax earnings was 34.3% in 2014, 34.4% in 2013 and 33.4% in 2012. The lower effective income tax rate for 2012 reflected the favorable outcome of a routine tax exam for the years 2008 and 2009, which reduced income tax expense by \$29.5 million. Total income taxes were \$1.5 billion in 2014, compared with \$1.7 billion in 2013 and \$1.4 billion in 2012. Japanese income taxes on Aflac Japan's results account for most of our consolidated income tax expense. See Note 10 of the Notes to the Consolidated Financial Statements for additional information.

## Earnings Guidance

Our original objective for 2014 was to increase operating earnings per diluted share by 2% to 5% over 2013, and we revised the objective during the year to a 3% to 4% increase, excluding the effect of foreign currency translation. We reported 2014 net earnings per diluted share of \$6.50. Adjusting that number for after-tax realized investment gains (\$.24 per diluted share), other non-operating income (\$.10 per diluted share), and foreign currency translation (an expense of \$.26 per diluted share), we finished the year at the high end of our revised objective with a 3.9% increase in operating earnings per diluted share.

Earnings growth from 2014 will create tough comparisons in 2015. Our objective for 2015 is to increase operating earnings per diluted share by 2% to 7% over 2014, excluding the effect of foreign currency translation. Interest rates in both Japan and the United States are at historic lows, with cash flows to investments being lower in 2015 than in prior years. The progression of the benefit ratios in Japan and the United States, which have seen favorable trends in 2014, could also have a significant impact on our results. If we achieve our objective for 2015, the following table shows the likely results for operating earnings per diluted share, including the impact of foreign currency translation using various yen/dollar exchange rate scenarios.

### 2015 Operating Earnings Per Diluted Share Scenarios <sup>(1)</sup>

Weighted-Average Yen/Dollar Exchange Rate	Operating Earnings Per Diluted Share	% Growth Over 2014	Yen Impact
100	\$6.47 - 6.77	5.0 - 9.9%	\$ .18
105.46 <sup>(2)</sup>	6.29 - 6.59	2.1 - 7.0	.00
115	6.01 - 6.31	(2.4) - 2.4	(.28)
125	5.77 - 6.07	(6.3) - (1.5)	(.52)
135	5.56 - 5.86	(9.7) - (4.9)	(.73)

<sup>(1)</sup> Excludes realized investment gains/losses (securities transactions, impairments, and the impact of derivative and hedging activities), nonrecurring items, and other non-operating income (loss) in 2015 and 2014

<sup>(2)</sup> Actual 2014 weighted-average exchange rate

## INSURANCE OPERATIONS

Aflac's insurance business consists of two segments: Aflac Japan and Aflac U.S. Aflac Japan, which operates as a branch of Aflac, is the principal contributor to consolidated earnings. GAAP financial reporting requires that a company report financial and descriptive information about operating segments in its annual and interim period financial statements. Furthermore, we are required to report a measure of segment profit or loss, certain revenue and expense items, and segment assets.

We evaluate our sales efforts using new annualized premium sales, an industry operating measure. New annualized premium sales, which include both new sales and the incremental increase in premiums due to conversions, represent the premiums that we would collect over a 12-month period, assuming the policies remain in force. For Aflac Japan, new annualized premium sales are determined by applications submitted during the reporting period. For Aflac U.S., new annualized premium sales are determined by applications that are issued during the reporting period. Premium income, or earned premiums, is a financial performance measure that reflects collected or due premiums that have been earned ratably on policies in force during the reporting period.

### AFLAC JAPAN SEGMENT

#### Aflac Japan Pretax Operating Earnings

Changes in Aflac Japan's pretax operating earnings and profit margins are primarily affected by morbidity, mortality, expenses, persistency and investment yields. The following table presents a summary of operating results for Aflac Japan for the years ended December 31.

## Aflac Japan Summary of Operating Results

(In millions)	2014	2013	2012
Net premium income	\$ 13,861	\$ 14,982	\$ 17,151
Net investment income:			
Yen-denominated investment income	1,429	1,497	1,902
Dollar-denominated investment income	1,233	1,154	943
Net investment income	2,662	2,651	2,845
Other income (loss)	32	55	57
Total operating revenues	16,555	17,688	20,053
Benefits and claims, net	10,084	10,924	12,496
Operating expenses:			
Amortization of deferred policy acquisition costs	649	641	716
Insurance commissions	845	944	1,174
Insurance and other expenses	1,519	1,551	1,763
Total operating expenses	3,013	3,136	3,653
Total benefits and expenses	13,097	14,060	16,149
Pretax operating earnings <sup>(1)</sup>	\$ 3,458	\$ 3,628	\$ 3,904
Weighted-average yen/dollar exchange rate	105.46	97.54	79.81

	In Dollars			In Yen		
Percentage change over previous period:	2014	2013	2012	2014	2013	2012
Net premium income	(7.5)%	(12.7)%	9.8%	.1%	6.8%	9.9%
Net investment income	.4	(6.8)	5.8	8.8	13.9	6.1
Total operating revenues	(6.4)	(11.8)	9.3	1.3	7.8	9.4
Pretax operating earnings <sup>(1)</sup>	(4.7)	(7.1)	2.0	3.1	13.6	2.0

<sup>(1)</sup> See the Insurance Operations section of this MD&A for our definition of segment operating earnings.

The relatively small change in premium income in yen for 2014 was influenced by the impact of weak first sector sales in 2014 and 2013 in addition to premiums ceded in the 2014 and 2013 reinsurance transactions. Annualized premiums in force at December 31, 2014, were 1.59 trillion yen, compared with 1.57 trillion yen in 2013 and 1.49 trillion yen in 2012. The increases in annualized premiums in force in yen of 1.7% in 2014, 5.0% in 2013 and 11.1% in 2012 reflect the sales of new policies combined with the high persistency of Aflac Japan's business. Annualized premiums in force, translated into dollars at respective year-end exchange rates, were \$ 13.2 billion in 2014, \$14.9 billion in 2013, and \$17.2 billion in 2012.

Aflac Japan's investment portfolios include dollar-denominated securities and reverse-dual currency securities (yen-denominated debt securities with dollar coupon payments). Dollar-denominated investment income from these assets accounted for approximately 46% of Aflac Japan's investment income in 2014, compared with 44% in 2013 and 33% in 2012. This percentage increase in 2014 and 2013 is due to our higher allocation to U.S. dollar-denominated investments. In years when the yen strengthens in relation to the dollar, translating Aflac Japan's dollar-denominated investment income into yen lowers growth rates for net investment income, total operating revenues, and pretax operating earnings in yen terms. In years when the yen weakens, translating dollar-denominated investment income into yen magnifies growth rates for net investment income, total operating revenues, and pretax operating earnings in yen terms. Excluding foreign currency changes from the respective prior year, dollar-denominated investment income accounted for approximately 44% of Aflac Japan's investment income during 2014, compared with 39% in 2013 and 33% in 2012.

The following table illustrates the effect of translating Aflac Japan's dollar-denominated investment income and related items into yen by comparing certain segment results with those that would have been reported had yen/dollar exchange rates remained unchanged from the prior year.

**Aflac Japan Percentage Changes Over Prior Year**  
(Yen Operating Results)

	Including Foreign Currency Changes			Excluding Foreign Currency Changes <sup>(2)</sup>		
	2014	2013	2012	2014	2013	2012
Net investment income	<b>8.8%</b>	13.9%	6.1%	<b>4.8%</b>	4.7 %	5.9%
Total operating revenues	<b>1.3</b>	7.8	9.4	<b>.7</b>	6.4	9.3
Pretax operating earnings <sup>(1)</sup>	<b>3.1</b>	13.6	2.0	<b>.3</b>	7.0	1.7

<sup>(1)</sup> See the Insurance Operations section of this MD&A for our definition of segment operating earnings.

<sup>(2)</sup> Amounts excluding foreign currency changes on dollar-denominated items were determined using the same yen/dollar exchange rate for the current year as each respective prior year.

The following table presents a summary of operating ratios in yen terms for Aflac Japan for the years ended December 31.

<b>Ratios to total revenues:</b>	2014	2013	2012
Benefits and claims, net	<b>60.9%</b>	61.7%	62.3%
Operating expenses:			
Amortization of deferred policy acquisition costs	<b>3.9</b>	3.6	3.6
Insurance commissions	<b>5.1</b>	5.3	5.9
Insurance and other expenses	<b>9.2</b>	8.9	8.7
Total operating expenses	<b>18.2</b>	17.8	18.2
Pretax operating earnings <sup>(1)</sup>	<b>20.9</b>	20.5	19.5

<sup>(1)</sup> See the Insurance Operations section of this MD&A for our definition of segment operating earnings.

In 2014, the benefit ratio decreased compared with 2013, reflecting lower incurred claims which are offsetting the mix of in-force shift to first sector products. In addition, the reinsurance agreements that we entered into at the end of third quarter 2013 and the beginning of fourth quarter 2014 reduced the benefit ratio by approximately 50 basis points in 2014. The benefit ratio has also been influenced by the effect of low investment yields, which impacts our profit margin by reducing the spread between investment yields and required interest on policy reserves (see table and discussion in the Interest Rate Risk subsection of this MD&A). In 2014, the operating expense ratio increased primarily due to the change in the mix of business for new sales. In total, the pretax operating profit margin improved in 2014, compared with 2013. For 2015, we anticipate the pretax operating profit margin to be comparable with the 2013 and 2014 levels.

### Aflac Japan Sales

The following table presents Aflac Japan's new annualized premium sales for the years ended December 31.

(In millions of dollars and billions of yen)	In Dollars			In Yen		
	2014	2013	2012	2014	2013	2012
New annualized premium sales	<b>\$ 1,080</b>	\$ 1,539	\$ 2,641	<b>114.5</b>	149.3	210.6
Increase (decrease) over prior period	<b>(29.8)%</b>	(41.7)%	30.3%	<b>(23.3)%</b>	(29.1)%	30.8%

The following table details the contributions to new annualized premium sales by major insurance product for the years ended December 31.

	2014	2013	2012
Medical	31.8%	27.9%	17.5%
Cancer	30.3	17.0	13.1
Ordinary life:			
Child endowment	10.2	11.7	11.6
WAYS	14.0	27.5	44.9
Other ordinary life	8.3	10.3	8.5
Other	5.4	5.6	4.4
Total	100.0%	100.0%	100.0%

The foundation of Aflac Japan's product portfolio has been, and continues to be, our third sector cancer and medical products. Sales of third sector products increased 6.1% in 2014, compared with the same period in 2013, achieving the high end of our 2% to 7% sales target. We have been focusing more on promotion of our cancer and medical products following the repricing of our first sector life products in April 2013. In September 2014, Aflac Japan introduced a new product called New Cancer DAYS which provides enhanced coverage, including outpatient treatments and multiple cancer occurrence benefits. At the same time, premiums for this product have been lowered for most ages compared to prior plans. Cancer insurance sales were up 176% for the fourth quarter of 2014, compared with 2013, reflecting a favorable response to the new cancer product and the advertising to promote it. With continued cost pressure on Japan's health care system, we expect the need for third sector products will continue to rise in the future, and we remain convinced that the medical and cancer products Aflac Japan provides will continue to be an important part of our product portfolio.

Aflac Japan's first sector product sales were down 47.3% in 2014, compared with 2013. We expect that for 2015, the sale of first sector products will continue to be down in comparison to 2014, as our focus remains on less interest-sensitive third sector products.

At December 31, 2014, we had agreements to sell our products at 371 banks, or more than 90% of the total number of banks in Japan. We believe we have significantly more banks selling our supplemental health insurance products than any other insurer operating in Japan. As expected, sales of the first sector WAYS product declined sharply in 2014, leading to a 47.3% decline in bank channel sales, compared with 2013. Bank channel sales accounted for 21.5% of new annualized premium sales in 2014 for Aflac Japan, compared with 31.3% in 2013.

We remain committed to selling through our traditional channels. These channels, consisting of affiliated corporate agencies, independent corporate agencies and individual agencies, accounted for 76.1% of total new annualized premium sales for Aflac Japan in 2014. In 2014, we recruited more than 900 new sales agencies. At December 31, 2014, Aflac Japan was represented by approximately 14,500 sales agencies and more than 121,100 licensed sales associates employed by those agencies.

Aflac Japan and Japan Post Holdings entered into a new agreement in July 2013, further expanding a partnership that was established in 2008 (see Japanese Regulatory Environment). At the end of June 2014, Japan Post Insurance (Kampo) received FSA regulatory approval to enter into an agency contract with Aflac Japan to begin distributing Aflac Japan's cancer insurance products at all of Kampo's 79 directly managed sales offices. Aflac Japan has developed a unique Aflac-branded cancer product for Japan Post and Kampo that was introduced on October 1, 2014. In the fourth quarter of 2014, the number of postal outlets selling our cancer products expanded to approximately 10,000, and Japan Post intends to further expand the number of post offices that offer Aflac's cancer products to 20,000 postal outlets by the end of first quarter 2016. We believe this alliance with Japan Post will further benefit our cancer insurance sales.

We believe that there is still a continued need for our products in Japan. Our sales target and focus in 2015 will continue to be centered around the sale of Aflac Japan's third sector products, including cancer and medical. Although we have experienced a decline in sales from our traditional channels, we believe they have been, and remain, key to our success. We have developed partnerships with new channels to help offset this decline and increase our overall sales growth. These channels include Japan Post, and we are making steady progress with our sales through postal outlets. In 2015, we believe that third sector sales will average a 15% increase for the first nine months of the year. However, we believe sales of third sector products in the fourth quarter of 2015 could be down in comparative percentage terms, given the difficult prior year comparisons.

## Japanese Economy

The Bank of Japan's January 2015 *Monthly Report of Recent Economic and Financial Developments* stated the following about the Japanese economy. Japan's economy continues to recover moderately. Public investment has plateaued at a high level while housing investment, which continued to decline following the consumption tax hike, has recently started to bottom out. Private consumption has remained resilient due to steady improvement in employment and income. The report projected that Japan's economy is expected to recover moderately, and the effects such as those of the decline in demand following the consumption tax hike are expected to dissipate. Exports are expected to increase moderately due to the improving overseas economies. As for domestic demand, public investment is expected to flatten at a high level and subsequently begin to decline moderately. Private consumption is expected to remain resilient due to steady improvement in employment and income, and the effects of the decline in demand following the consumption tax hike are expected to dissipate gradually. Housing investment is projected to gradually regain its resilience as well.

## Japanese Regulatory Environment

In 2005, legislation aimed at privatizing Japan's postal system (Japan Post) was enacted into law. The privatization laws split Japan Post into four operating entities that began operations in October 2007. In 2007, one of these entities selected Aflac Japan as its provider of cancer insurance to be sold through its post offices, and, in 2008, we began selling cancer insurance through these post offices. Japan Post has historically been a popular place for consumers to purchase insurance products. Legislation to reform the postal system passed the Diet in April 2012 and resulted in the merger of two of the postal operating entities (the one that delivers the mail and the one that runs the post offices) on October 1, 2012. In July 2013, Aflac Japan entered into a new agreement with Japan Post Holdings to further expand a partnership that was established in 2008 (see Aflac Japan Sales).

On January 16, 2014, Japan's FSA issued a reporting order pursuant to the Insurance Business Law to all insurance companies, including Aflac Japan, entitled "Regarding the Rectification, etc. of Insurance Agency Employees." Companies have been ordered to ascertain conditions on the ground regarding sales agents, facilitate the discontinuation of the practice of subcontracting (i.e., the use of non-employee contractors to sell insurance on behalf of insurance agencies), and report to the FSA no later than April 30, 2015. In light of the Company's current mix of distribution channels, the use of non-employee contractors is not a major channel for the Company in Japan.

In June 2013, a revision to the Financial Instruments and Exchange Act established a post-funded Orderly Resolution Regime for financial institutions to prevent a financial crisis in the event of a financial institution's failure. This regime came into effect in March 2014, but is not expected to have a material impact on the Company's operations in Japan.

## Aflac Japan Investments

The level of investment income in yen is affected by available cash flow from operations, the timing of investing the cash flow, yields on new investments, the effect of yen/dollar exchange rates on dollar-denominated investment income, and other factors. Aflac Japan has historically invested primarily in Japan Government Bonds (JGBs) and privately issued securities. Privately issued securities generally have higher yields than those available on JGBs and other publicly traded debt instruments. All of the privately issued securities we have purchased were rated investment grade at the time of purchase. These securities were generally either privately negotiated arrangements or were issued with documentation consistent with standard medium-term note programs. Many of these investments have protective covenants appropriate to the specific investment. These may include a prohibition of certain activities by the borrower, maintenance of certain financial measures, and specific conditions impacting the payment of our notes.

In order to address our challenge of investing in Japan's low-interest-rate environment and reduce the proportion of privately issued securities in our overall portfolio, we have invested in higher-yielding U.S. dollar-denominated publicly-traded investment grade corporate fixed-maturity securities, and have entered into foreign currency forwards and options to hedge the currency risk on the fair value of the U.S. dollar securities. We started this program as part of our strategic review of portfolio allocation, maintain it as part of our on-going portfolio allocation, and will allocate new money into the program based on multiple factors including market conditions, overall portfolio make-up, investment alternatives, needs of the business, and other factors.

Funds available for investment include cash flows from operations, investment income, and funds generated from maturities, redemptions, securities lending, and other securities transactions. Securities lending is also used from time to time to accelerate the availability of funds for investment. Aflac Japan purchased debt security investments at an aggregate acquisition cost of approximately 1.0 trillion yen in 2014 (approximately \$10.0 billion), 2.5 trillion yen in 2013 (approximately \$25.4 billion) and 2.7 trillion yen in 2012 (approximately \$34.4 billion).

The following table presents the composition of debt security purchases for Aflac Japan by sector, as a percentage of acquisition cost, for the years ended December 31.

### Composition of Purchases by Sector

	2014	2013	2012
<b>Debt security purchases, at cost:</b>			
Banks/financial institutions	.4%	.4%	2.3%
Government and agencies	74.1	76.2	73.8
Municipalities	1.0	.0	.0
Public utilities	2.6	3.3	3.4
Sovereign and supranational	.0	.0	.1
Other corporate	21.9	20.1	20.4
Total	100.0%	100.0%	100.0%

Given the volatility in the U.S. interest rate environment, Aflac Japan did not purchase any additional U.S. dollar-denominated fixed maturities as part of the program discussed above during the last six months of 2013. However, we did resume purchasing investment-grade U.S. dollar-denominated securities during 2014. Despite resuming the purchase of U.S. dollar-denominated investments, which generally yield more than JGBs, we experienced an overall decrease in the new money yield in 2014, compared to 2013. Although we allocated some cash to U.S. dollar-denominated investments, a significant portion of our investable cash flow during this period was allocated to the purchase of JGBs and, within our U.S. dollar securities allocation, a sizable purchase of U.S. Treasury securities, which were sold in the fourth quarter of 2014.

We use specific criteria to judge the credit quality of both existing and prospective investments. Furthermore, we use several methods to monitor these criteria, including credit rating services and internal credit analysis. The ratings referenced in the two tables below are based on the ratings designations provided by the major credit rating agencies (Moody's Investors Service (Moody's), Standard & Poor's Ratings Services (S&P), and Fitch Ratings (Fitch)) or, if not rated, are determined based on our internal credit analysis of such securities. For investment-grade securities where the ratings assigned by the major credit agencies are not equivalent, we use the second lowest rating that is assigned. For a description of the ratings methodology that we use when a security is split-rated (one rating agency rates the security as investment grade while another rating agency rates the same security as below investment grade), see "Market Risks of Financial Instruments - Below-Investment-Grade and Split-Rated Securities" in the Analysis of Financial Condition section of this MD&A.

The distributions by credit rating of Aflac Japan's purchases of debt securities for the years ended December 31, based on acquisition cost, were as follows:

### Composition of Purchases by Credit Rating

	2014	2013	2012
AAA	7.7%	.3%	.3%
AA	78.6	77.7	74.9
A	5.4	10.9	8.5
BBB	6.6	9.4	15.1
BB or Lower	1.7	1.7	1.2
Total	100.0%	100.0%	100.0%

Purchases of securities are determined through an evaluation of multiple factors including credit risk, relative pricing and return potential of the security, liquidity of the instrument, broad business and portfolio considerations, and other market based and company specific factors. The large increase in AAA rated purchases in 2014 resulted from our decision to allocate part of our U.S. dollar securities allocation to U.S. Treasuries, in addition to our purchases of investment-grade corporate bonds. Higher purchases of AA rated securities in 2014 and 2013 compared with 2012 were primarily due to additional purchases of JGBs. The increase in purchases of A rated securities in 2013 and BBB rated securities in 2012 was related primarily to the purchase of U.S. dollar-denominated corporate fixed-income publicly traded securities for the Aflac Japan portfolio as discussed above. The purchases of BB or lower rated securities during 2014, 2013 and 2012 were related to a program that we initiated in 2011 to invest in senior secured bank loans to U.S. and

Canadian corporate borrowers, most of which have below-investment-grade ratings. For more information on this program, see the Credit Risk subsection of this MD&A.

The following table presents the results of Aflac Japan's investment yields for the years ended and as of December 31.

	2014 <sup>(1)</sup>	2013 <sup>(1)</sup>	2012 <sup>(1)</sup>
New money yield	2.16%	2.48%	2.40%
Return on average invested assets, net of investment expenses	2.80	2.86	2.89
Portfolio book yield, including dollar-denominated investments, end of period	2.83	2.80	2.87

<sup>(1)</sup> Yields are reported before the cost of the foreign currency forwards that hedge foreign exchange risk of U.S. dollar-denominated publicly-traded corporate bonds.

The decline in the Aflac Japan new money yield is primarily due to the allocation to lower yielding JGBs and the allocation from U.S. Corporate bonds to U.S. Treasuries for a period in 2014, given Aflac's view on the relative value of credit investments at that time.

The following table presents the composition of total investments by sector, at amortized cost, and cash for Aflac Japan (\$ 85.1 billion in 2014 and \$93.6 billion in 2013 ) as of December 31.

#### Composition of Portfolio by Sector

	2014	2013
<b>Debt and perpetual securities, at amortized cost:</b>		
Banks/financial institutions <sup>(1)</sup>	13.2%	14.3%
Government and agencies	43.9	45.3
Municipalities	.8	.7
Public utilities	9.3	9.7
Sovereign and supranational	4.1	4.4
Mortgage- and asset-backed securities	.5	.7
Other corporate <sup>(2)</sup>	26.0	24.1
Total debt and perpetual securities	97.8	99.2
Equity securities and other	.2	.2
Cash and cash equivalents	2.0	.6
Total investments and cash	100.0%	100.0%

<sup>(1)</sup> Includes 2.6% and 2.9% of perpetual securities at December 31, 2014 and 2013 , respectively

<sup>(2)</sup> Includes .2% of perpetual securities at December 31, 2014 and 2013

Our highest sector concentration is in government and agencies, with investments consisting primarily of JGBs. See Note 3 of the Notes to the Consolidated Financial Statements and the Market Risks of Financial Instruments - Credit Risk subsection of MD&A for more information regarding the sector concentrations of our investments.

Yen-denominated debt and perpetual securities accounted for 75.7% of Aflac Japan's total debt and perpetual securities at December 31, 2014 , compared with 78.3% at December 31, 2013 , at amortized cost.

The distributions of debt and perpetual securities owned by Aflac Japan, by credit rating, as of December 31 were as follows:

## Composition of Portfolio by Credit Rating

	2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AAA	1.3%	1.2%	1.4%	1.4%
AA	5.3	5.4	51.3	52.2
A	66.4	67.4	20.7	20.9
BBB	23.0	22.0	22.5	21.6
BB or lower	4.0	4.0	4.1	3.9
Total	100.0%	100.0%	100.0%	100.0%

The significant shift of investments rated AA to A is due to the downgrade of our investment in JGBs from AA to A during the fourth quarter of 2014.

The overall credit quality of Aflac Japan's investments remained high. At the end of 2014, 96.0% of Aflac Japan's debt and perpetual securities were rated investment grade, on an amortized cost basis.

See Notes 3 and 5 of the Notes to the Consolidated Financial Statements and the Analysis of Financial Condition section of this MD&A for additional information on our investments and hedging strategies.

### AFLAC U.S. SEGMENT

#### Aflac U.S. Pretax Operating Earnings

Changes in Aflac U.S. pretax operating earnings and profit margins are primarily affected by morbidity, mortality, expenses, persistency and investment yields. The following table presents a summary of operating results for Aflac U.S. for the years ended December 31.

#### Aflac U.S. Summary of Operating Results

(In millions)	2014	2013	2012
Premium income	\$ 5,211	\$ 5,153	\$ 4,996
Net investment income	645	632	613
Other income	3	6	19
Total operating revenues	5,859	5,791	5,628
Benefits and claims	2,853	2,889	2,834
Operating expenses:			
Amortization of deferred policy acquisition costs	459	433	400
Insurance commissions	590	583	570
Insurance and other expenses	884	848	827
Total operating expenses	1,933	1,864	1,797
Total benefits and expenses	4,786	4,753	4,631
Pretax operating earnings <sup>(1)</sup>	\$ 1,073	\$ 1,038	\$ 997
<b>Percentage change over previous period:</b>			
Premium income	1.1%	3.1%	5.4%
Net investment income	2.1	3.2	4.2
Total operating revenues	1.2	2.9	5.4
Pretax operating earnings <sup>(1)</sup>	3.3	4.1	10.3

<sup>(1)</sup> See the Insurance Operations section of this MD&A for our definition of segment operating earnings.

Annualized premiums in force increased 1.8% in 2014, 2.2% in 2013 and 5.1% in 2012. Annualized premiums in force at December 31 were \$5.7 billion in 2014, compared with \$5.6 billion in 2013 and \$5.5 billion in 2012.

The following table presents a summary of operating ratios for Aflac U.S. for the years ended December 31.

<b>Ratios to total revenues:</b>	<b>2014</b>	2013	2012
Benefits and claims	<b>48.7%</b>	49.9%	50.3%
Operating expenses:			
Amortization of deferred policy acquisition costs	<b>7.8</b>	7.5	7.1
Insurance commissions	<b>10.1</b>	10.1	10.1
Insurance and other expenses	<b>15.1</b>	14.6	14.8
Total operating expenses	<b>33.0</b>	32.2	32.0
Pretax operating earnings <sup>(1)</sup>	<b>18.3</b>	17.9	17.7

<sup>(1)</sup> See the Insurance Operations section of this MD&A for our definition of segment operating earnings.

The benefit ratio decreased in 2014, compared with 2013, reflecting lower benefit reserve growth from new product designs. The expense ratio increased in 2014, compared with 2013, largely due to increased spending associated with changes in the Aflac U.S. sales structure and increases in amortization of deferred acquisition costs related to changes in business mix. These fluctuations resulted in an overall improvement in the pretax operating profit margin in 2014, compared with 2013. In 2015, we expect the benefit and expense ratios to be relatively stable compared with 2014.

### Aflac U.S. Sales

The following table presents Aflac's U.S. new annualized premium sales for the years ended December 31.

(In millions)	<b>2014</b>	2013	2012
New annualized premium sales	<b>\$ 1,433</b>	\$ 1,424	\$ 1,488
Increase (decrease) over prior period	<b>.7%</b>	(4.3)%	.8%

The following table details the contributions to new annualized premium sales by major insurance product category for the years ended December 31.

	<b>2014</b>	2013	2012
Income-loss protection:			
Short-term disability	<b>22.4%</b>	21.2%	20.3%
Life	<b>5.8</b>	5.3	5.4
Asset-loss protection:			
Accident	<b>28.1</b>	27.3	29.5
Critical care <sup>(1)</sup>	<b>21.4</b>	20.8	23.1
Supplemental medical:			
Hospital indemnity	<b>16.4</b>	16.9	15.3
Dental/vision	<b>5.9</b>	6.2	6.1
Other	<b>.0</b>	2.3	.3
Total	<b>100.0%</b>	100.0%	100.0%

<sup>(1)</sup> Includes cancer, critical illness and hospital intensive care products

New annualized premium sales for accident insurance, our leading product category, increased 3.7% , short-term disability sales increased 6.0% , critical care insurance sales (including cancer insurance) increased 3.9% , and hospital indemnity insurance sales decreased 2.0% in 2014 , compared with 2013 .

In 2014 , our traditional U.S. sales forces included more than 9,300 U.S. associates who were actively producing business on a weekly basis. We believe that the average weekly producing sales associates metric allows our sales management to actively monitor progress and needs on a real-time basis. Beyond expanding the size and capabilities of our traditional sales force, we remain encouraged about establishing and developing relationships with insurance brokers that typically handle the larger-case market.

The addition of group products has expanded our reach and enabled us to generate more sales opportunities with larger employers, brokers, and our traditional sales agents. We anticipate that the appeal of our group products will continue to enhance our opportunities to connect with larger businesses and their employees. Our portfolio of group and individual products offers businesses the opportunity to give their employees a more valuable and comprehensive selection of benefit options.

Beginning in the third quarter and continuing into the fourth quarter of 2014, Aflac U.S. implemented tactical initiatives centered around providing competitive compensation to our sales hierarchy and positioning us to more effectively and consistently execute on the U.S. sales strategy across all states. These measures are designed to more effectively link sales management's success to Aflac's success. For example, we enhanced compensation through an incentive bonus for the first level of our sales management, district sales coordinators, who are primarily responsible for selling Aflac products and training new sales associates. Additionally, we eliminated the commission-based position of state sales coordinator. To better manage our state operations, we introduced the new position of market director, effective October 1, 2014. Market directors are salaried with the opportunity to earn sales-related bonuses. We expect this position change will enhance performance management and better align compensation with new business results. We believe these changes made to the U.S. sales organization were instrumental in achieving a 14.1% sales increase during the fourth quarter of 2014, driving full-year 2014 Aflac U.S. sales up .7% which exceeded our most recent sales expectation for the year.

With the evolving business market and the coverage standardization that will result from health care reform in the United States, we believe Aflac's voluntary products will become more relevant than ever. Our products provide cash benefits that can be used to help with increasing out-of-pocket medical expenses, help cover household costs, or protect against income and asset loss. Our group products and relationships with insurance brokers that handle the larger-case market are helping us as we expand our reach selling to larger businesses. We are regularly evaluating the marketplace to identify opportunities to bring the most relevant, cost-effective products to our customers. We believe the need for our products remains very strong, and we continue to work on enhancing our distribution capabilities to access employers of all sizes, including initiatives that benefit our field force and the broker community. At the same time, we are seeking opportunities to leverage our brand strength and attractive product portfolio in the evolving health care environment. For 2015, our objective is for Aflac U.S. new annualized premium sales to increase 3% to 7%, with a target of 5%.

## **U.S. Economy**

Operating in the U.S. economy continues to be challenging. While ongoing uncertainty around health care reform implementation has prompted many businesses and consumers to postpone decisions related to health care coverage, we believe that the need for our products remains strong, and that the United States remains a sizeable and attractive market for our products.

## **U.S. Regulatory Environment**

The Affordable Care Act (ACA) is intended to give Americans of all ages and income levels access to comprehensive major medical health insurance. The major elements of the bill became effective on January 1, 2014. The primary subject of the legislation is major medical insurance; as enacted, the ACA does not materially affect the design of our insurance products. However, indirect consequences of the legislation and regulations, including short-term uncertainty related to implementation, could present challenges and/or opportunities that could potentially have an impact on our sales model, financial condition and results of operations. Our experience with Japan's national health care environment leads us to believe that the need for our products will only increase over the coming years.

The Dodd-Frank Act created, among other things, a Financial Stability Oversight Council (the Council). In April 2012, the Council released a final rule describing the general process it will follow in determining whether to designate a nonbank financial company for supervision by the Board of Governors of the U.S. Federal Reserve System (the Board). The Council may designate by a two-thirds vote whether certain nonbank financial companies, including certain insurance companies and insurance holding companies, could pose a threat to the financial stability of the United States, in which case such nonbank financial companies would become subject to prudential regulation by the Board. On April 3, 2013, the Board published a final rule that establishes the requirements for determining when a nonbank financial company is "predominantly engaged in financial activities" - a prerequisite for designation by the Council. Prudential regulation by the Board includes supervision of capital requirements, leverage limits, liquidity requirements and examinations. The Board may limit such company's ability to enter into mergers, acquisitions and other business combination transactions, restrict its ability to offer financial products, require it to terminate one or more activities, or impose conditions on the manner in which it conducts activities. The Council designated two insurers in 2013 and an additional insurer in 2014 as a Systematically Important Financial Institution (SIFI) in 2014. On December 18, 2014, President Obama signed the

Insurance Capital Standards Clarification Act into law. This legislation will clarify the Board's authority to apply insurance-based capital standards for insurance companies subject to federal supervision. Although Aflac is a nonbank financial company predominantly engaged in financial activities as defined in the Dodd-Frank Act, we do not believe Aflac will be considered a company that poses a threat to the financial stability of the United States.

Title VII of the Dodd-Frank Act and regulations issued thereunder may have an impact on Aflac's derivative activity, including activity on behalf of Aflac Japan, in particular rules and rule proposals to require central clearing and collateral for certain types of derivatives. The five U.S. banking regulators and the U.S. Commodity Futures Trading Commission (CFTC) recently re-proposed for comment their rules regarding collateral for uncleared swaps. If adopted as proposed, such rules may result in increased collateral requirements for Aflac or impose limits on the types of collateral we are permitted to post.

The Dodd-Frank Act also established a Federal Insurance Office (FIO) under the U.S. Treasury Department to monitor all aspects of the insurance industry and of lines of business other than certain health insurance, certain long-term care insurance and crop insurance. Traditionally, U.S. insurance companies have been regulated primarily by state insurance departments. In December 2013, the FIO released a report entitled "How To Modernize And Improve The System Of Insurance Regulation In The United States." The report was required by the Dodd-Frank Act, and included 18 recommended areas of near-term reform for the states, including addressing capital adequacy and safety/soundness issues, reform of insurer resolution practices, and reform of marketplace regulation. The report also listed nine recommended areas for direct federal involvement in insurance regulation. Some of the recommendations outlined in the FIO report released in December 2013 have been implemented. Of the nine recommended areas for direct federal involvement in insurance regulation that are applicable to Aflac, President Obama has signed the National Association of Registered Agents and Brokers Reform Act into law in January 2015, which simplifies the agent and broker licensing process across state lines. The FIO has also engaged with the supervisory colleges to monitor financial stability and identify regulatory gaps for large national and internationally active insurers.

On December 10, 2013, five U.S. financial regulators adopted a final rule implementing the "Volcker Rule," which was created by Section 619 of the Dodd-Frank Act. The Volcker Rule generally prohibits "banking entities" from engaging in "proprietary trading" and making investments and conducting certain other activities with "private equity funds and hedge funds." The final rule becomes effective April 1, 2014; however, at the time the agencies released the final Volcker Rule, the Federal Reserve announced an extension of the conformance period for all banking entities until July 21, 2015. In response to industry questions regarding the final Volcker Rule, the five U.S. financial regulators, which included the Office of the Comptroller of the Currency (OCC); the Federal Reserve; the Federal Deposit Insurance Corporation (FDIC); the SEC and the U.S. CFTC, issued a clarifying interim final rule on January 14, 2014 that permits banking entities to retain interests in certain collateralized debt obligations (CDOs) backed by trust preferred securities if the CDO meets certain requirements.

On December 18, 2014, the Federal Reserve announced a second extension to the Volcker Rule conformance period, to give banking entities until July 21, 2016, to conform investments in and relationships with covered funds and foreign funds that were in place prior to December 31, 2013 (legacy covered funds). The Federal Reserve also announced its intention to act in the future to grant banking entities an additional one-year extension of the conformance period until July 21, 2017, to conform ownership interests in and relationships with these legacy covered funds. The Federal Reserve did not act to extend the conformance period for proprietary trading activities.

Nonbank financial companies such as Aflac that are not affiliated with an insured depository institution or otherwise brought within the definition of "banking entity" generally will not be subject to the Volcker Rule's prohibitions. However, the prohibitions of the Volcker Rule could impact financial markets generally, for example, through reduced liquidity in certain markets or the exiting of positions by banking entities as the end of the conformance period approaches.

The Dodd-Frank Act requires extensive rule-making and other future regulatory action, which in some cases will take a period of years to implement. At the current time, it is not possible to predict with any degree of certainty what impact, if any, the Dodd-Frank Act will have on our U.S. business, financial condition, or results of operations.

## **Aflac U.S. Investments**

The level of investment income is affected by available cash flow from operations, the timing of investing the cash flow, yields on new investments, and other factors. Aflac U.S. has invested primarily in investment grade corporate bonds.

Funds available for investment include cash flows from operations, investment income, and funds generated from maturities, redemptions, and other securities transactions. Aflac U.S. purchased debt security investments at an aggregate acquisition cost of approximately \$1.1 billion in 2014, compared with \$1.4 billion in 2013 and \$1.5 billion in 2012. The following table presents the composition of debt security purchases for Aflac U.S. by sector, as a percentage of acquisition cost, for the years ended December 31.

#### Composition of Purchases by Sector

	2014	2013	2012
<b>Debt security purchases, at cost:</b>			
Banks/financial institutions	3.3%	4.8%	8.5%
Government and agencies	1.0	.1	4.7
Municipalities	.1	.0	.8
Public utilities	14.8	11.9	23.5
Sovereign and supranational	.2	.0	.9
Mortgage- and asset-backed securities	5.0	4.5	.0
Other corporate	75.6	78.7	61.6
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>

We use specific criteria to judge the credit quality of both existing and prospective investments. Furthermore, we use several methods to monitor these criteria, including credit rating services and internal credit analysis. The ratings referenced in the two tables below are based on the ratings designations provided by the major credit rating agencies (Moody's, S&P, and Fitch) or, if not rated, are determined based on our internal credit analysis of such securities. For investment-grade securities where the ratings assigned by the major credit agencies are not equivalent, we use the second lowest rating that is assigned. For a description of the ratings methodology that we use when a security is split-rated (one rating agency rates the security as investment grade while another rating agency rates the same security as below investment grade), see "Market Risks of Financial Instruments - Below-Investment-Grade and Split-Rated Securities" in the Analysis of Financial Condition section of this MD&A.

The distributions by credit rating of Aflac's U.S. purchases of debt securities for the years ended December 31, based on acquisition cost, were as follows:

#### Composition of Purchases by Credit Rating

	2014	2013	2012
AAA	.0%	.6%	4.3%
AA	8.0	5.1	9.1
A	50.8	46.2	51.4
BBB	41.2	48.1	35.2
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>

Purchases of securities are determined through an evaluation of multiple factors including credit risk, relative pricing and return potential of the security, liquidity of the instrument, broad business and portfolio considerations, and other market based and company specific factors.

The following table presents the results of Aflac's U.S. investment yields for the years ended and as of December 31.

	2014	2013	2012
New money yield	4.32%	4.06%	3.96%
Return on average invested assets, net of investment expenses	5.46	5.70	6.25
Portfolio book yield, end of period	5.89	6.01	6.28

The increase in the Aflac U.S. new money yield in 2014 is primarily due to the differential in interest rates between intermediate and longer duration bonds during much of the year, and wider credit spreads later in the year.

The following table presents the composition of total investments by sector, at amortized cost, and cash for Aflac U.S. ( \$12.7 billion in 2014 and \$12.0 billion in 2013 ) as of December 31.

### Composition of Portfolio by Sector

	2014	2013
<b>Debt and perpetual securities, at amortized cost:</b>		
Banks/financial institutions <sup>(1)</sup>	12.0%	14.2%
Government and agencies	.7	.7
Municipalities	5.6	5.9
Public utilities	17.0	16.7
Sovereign and supranational	1.6	1.8
Mortgage- and asset-backed securities	.3	.3
Other corporate	52.5	53.6
Total debt and perpetual securities	89.7	93.2
Equity securities and other	.1	.0
Cash and cash equivalents	10.2	6.8
Total investments and cash	100.0%	100.0%

<sup>(1)</sup> Includes .4% and .9% of perpetual securities at December 31, 2014 and 2013 , respectively.

See Note 3 of the Notes to the Consolidated Financial Statements and the Market Risks of Financial Instruments - Credit Risk subsection of MD&A for more information regarding the sector concentrations of our investments.

The distributions of debt and perpetual securities owned by Aflac U.S., by credit rating, as of December 31 were as follows:

### Composition of Portfolio by Credit Rating

	2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AAA	1.0%	.9%	1.0%	1.0%
AA	8.1	8.4	8.4	8.9
A	47.8	48.8	45.9	46.4
BBB	39.8	38.7	40.7	39.9
BB or lower	3.3	3.2	4.0	3.8
Total	100.0%	100.0%	100.0%	100.0%

The overall credit quality of Aflac U.S. investments remained high. At the end of 2014 , 96.7% of Aflac U.S. debt and perpetual securities were rated investment grade, on an amortized cost basis. See Notes 3 and 5 of the Notes to the Consolidated Financial Statements and the Analysis of Financial Condition section of this MD&A for additional information on our investments.

### OTHER OPERATIONS

Corporate operating expenses consist primarily of personnel compensation, benefits, and facilities expenses. Corporate expenses, excluding investment income, were \$91 million in 2014 , \$79 million in 2013 and \$76 million in 2012 . Investment income included in reported corporate expenses was \$13 million in 2014 , \$11 million in 2013 and \$20 million in 2012 .

## ANALYSIS OF FINANCIAL CONDITION

Our financial condition has remained strong in the functional currencies of our operations. The yen/dollar exchange rate at the end of each period is used to translate yen-denominated balance sheet items to U.S. dollars for reporting purposes.

The following table demonstrates the effect of the change in the yen/dollar exchange rate by comparing select balance sheet items as reported at December 31, 2014, with the amounts that would have been reported had the exchange rate remained unchanged from December 31, 2013.

### Impact of Foreign Exchange on Balance Sheet Items

(In millions)	As Reported	Exchange Effect	Net of Exchange Effect
Yen/dollar exchange rate <sup>(1)</sup>	120.55		105.39
Investments and cash	\$ 107,341	\$ (9,567)	\$ 116,908
Deferred policy acquisition costs	8,273	(750)	9,023
Total assets	119,767	(10,706)	130,473
Policy liabilities	83,933	(10,727)	94,660
Total liabilities	101,420	(12,024)	113,444

<sup>(1)</sup> The exchange rate at December 31, 2014, was 120.55 yen to one dollar, or 12.6% weaker than the December 31, 2013, exchange rate of 105.39.

### Market Risks of Financial Instruments

Our investment philosophy is to fulfill our fiduciary responsibility to invest assets in a prudent manner to meet the present and future needs of our policyholders' contractual obligations while maximizing the long-term financial return on assets consistent with the company goal of maximizing long-term shareholder value with defined risk appetites, limits, and maintaining adequate liquidity.

The following table details investment securities by segment as of December 31.

### Investment Securities by Segment

(In millions)	Aflac Japan		Aflac U.S.	
	2014	2013	2014	2013
<b>Securities available for sale, at fair value:</b>				
Fixed maturities	\$ 52,196	\$ 46,448	\$ 12,940 <sup>(1)</sup>	\$ 11,290 <sup>(1)</sup>
Perpetual securities	2,609	2,839	60	108
Equity securities	23	21	5	0
Total available for sale	54,828	49,308	13,005	11,398
<b>Securities held to maturity, at amortized cost:</b>				
Fixed maturities	34,242	44,415	0	0
Total held to maturity	34,242	44,415	0	0
Total investment securities	\$ 89,070	\$ 93,723	\$ 13,005	\$ 11,398

<sup>(1)</sup> Excludes investment-grade, available-for-sale fixed-maturity securities held by the Parent Company of \$437 in 2014 and \$332 in 2013.

Because we invest in fixed-income securities, our financial instruments are exposed primarily to three types of market risks: currency risk, interest rate risk, and credit risk.

#### Currency Risk

The functional currency of Aflac Japan's insurance operations is the Japanese yen. All of Aflac Japan's premiums, claims and commissions are received or paid in yen, as are most of its other expenses. Most of Aflac Japan's cash and liabilities are yen-denominated. Aflac Japan's investments consisted primarily of yen-denominated securities of \$63.1 billion, at amortized cost, at December 31, 2014. However, Aflac Japan also owns dollar-denominated securities of \$13.2

billion , at amortized cost, whose fair value is hedged against currency risk as well as \$7.0 billion of securities, at amortized cost, that are not hedged as of December 31, 2014 . Due to this investment allocation, yen-denominated investment income accounted for 54% of Aflac Japan's investment income in 2014 , with the remainder denominated in U.S. dollars. In addition, Aflac Incorporated has yen-denominated debt obligations.

We are exposed to currency risk as an economic event only when yen funds are actually converted into dollars. This occurs when we repatriate yen-denominated funds from Aflac Japan to Aflac U.S. The exchange rates prevailing at the time of repatriation will differ from the exchange rates prevailing at the time the yen profits were earned. A portion of the yen repatriation may be used to service Aflac Incorporated's yen-denominated notes payable with the remainder converted into dollars. In order to hedge foreign exchange risk for a portion of the profit repatriation received in yen from Aflac Japan in July 2014 and December 2014, we had foreign exchange forwards and options as part of a hedging strategy on 52.5 billion yen and 50.0 billion yen, respectively. As of December 31, 2014, we had foreign exchange forwards to hedge foreign exchange risk on 157.5 billion yen of future profit repatriation from Aflac Japan.

In addition to profit repatriation, certain investment activities for Aflac Japan expose us to economic currency risk when yen are converted into dollars. As noted above, we invest a portion of our yen cash flows in dollar-denominated assets. This requires that we convert the yen cash flows to U.S. dollars before investing. As previously discussed, for certain of our U.S. dollar-denominated securities, we enter into foreign currency forward and option contracts to hedge the currency risk on the fair value of the securities. The dollar coupon payments received on these investments are not hedged and are subject to foreign exchange fluctuations, which are realized in earnings. Also, Aflac Japan has invested in reverse-dual currency securities (RDCs, or yen-denominated debt securities with dollar coupon payments), which exposes Aflac to changes in foreign exchange rates. The foreign currency effect on the yen-denominated securities is accounted for as a component of unrealized gains or losses on available-for-sale securities in accumulated other comprehensive income, while the foreign currency effect on the dollar coupons is realized in earnings. The RDCs provided a higher yield at the time of purchase than those available on Japanese government or other public corporate bonds, while still adhering to our investment standards at the time of the transaction. The yen/dollar exchange rate would have to strengthen to approximately 28 before the yield on these instruments would equal that of a comparable JGB instrument.

Aside from the activities discussed above, we generally do not convert yen into dollars; however, we do translate financial statement amounts from yen into dollars for financial reporting purposes. Therefore, reported amounts are affected by foreign currency fluctuations. We report unrealized foreign currency translation gains and losses in accumulated other comprehensive income. In periods when the yen weakens against the dollar, translating yen into dollars causes fewer dollars to be reported. When the yen strengthens, translating yen into dollars causes more dollars to be reported. The weakening of the yen relative to the dollar will generally adversely affect the value of our yen-denominated investments in dollar terms. We attempt to minimize the exposure of shareholders' equity to foreign currency. We accomplish this by investing a portion of Aflac Japan's investment portfolio in dollar-denominated securities and by the Parent Company's issuance of yen-denominated debt (for additional information, see the discussion under the Hedging Activities subsection of MD&A). As a result, the effect of currency fluctuations on our net assets is reduced.

The following table demonstrates the effect of foreign currency fluctuations by presenting the dollar values of our yen-denominated assets and liabilities, and our consolidated yen-denominated net asset exposure at selected exchange rates as of December 31.

**Dollar Value of Yen-Denominated Assets and Liabilities  
at Selected Exchange Rates**

(In millions)	2014			2013		
<b>Yen/dollar exchange rates</b>	<b>105.55</b>	<b>120.55 <sup>(1)</sup></b>	<b>135.55</b>	90.39	105.39 <sup>(1)</sup>	120.39

Other financial instruments	159	139	124	166	143	125
Subtotal	76,551	67,306	60,412	87,407	74,197	65,262
<b>Liabilities:</b>						
Notes payable	372	325	290	814	699	611
Derivatives	992	2,423	3,881	489	837	2,504
Subtotal	1,364	2,748	4,171	1,303	1,536	3,115
Net yen-denominated financial instruments	75,187	64,558	56,241	86,104	72,661	62,147
Other yen-denominated assets	8,212	7,190	6,394	9,327	8,000	7,003
Other yen-denominated liabilities	92,902	81,342	72,341	104,704	89,801	78,613
Consolidated yen-denominated net assets (liabilities) subject to foreign currency fluctuation <sup>(2)</sup>	\$ (9,503)	\$ (9,594)	\$ (9,706)	\$ (9,273)	\$ (9,140)	\$ (9,463)

<sup>(1)</sup> Actual period-end exchange rate

<sup>(2)</sup> Does not include the U.S. dollar-denominated corporate bonds for which we have entered into foreign currency forwards as discussed in the Aflac Japan Investment subsection of MD&A

<sup>(3)</sup> Does not include U.S. dollar-denominated bonds that have corresponding cross-currency swaps in consolidated VIEs

We are required to consolidate certain VIEs. Some of the consolidated VIEs in Aflac Japan's portfolio use foreign currency swaps to convert foreign denominated cash flows to yen, the functional currency of Aflac Japan, in order to minimize cash flow fluctuations. Foreign currency swaps exchange an initial principal amount in two currencies, agreeing to re-exchange the currencies at a future date, at an agreed upon exchange rate. There may also be periodic exchanges of payments at specified intervals based on the agreed upon rates and notional amounts. Prior to consolidation, our beneficial interest in these VIEs was a yen-denominated available-for-sale fixed maturity security. Upon consolidation, the original yen-denominated investment was derecognized and the underlying fixed-maturity or perpetual securities and cross-currency swaps were recognized. The combination of a U.S. dollar-denominated investment and cross-currency swap economically creates a yen-denominated investment and has no impact on our net investment hedge position.

Similarly, the combination of the U.S. corporate bonds and the foreign currency forwards and options that we have entered into, as discussed in the Aflac Japan Investment subsection of MD&A, economically creates a yen-denominated investment that qualifies for inclusion as a component of our investment in Aflac Japan for net investment hedge purposes.

For additional information regarding our Aflac Japan net investment hedge, see the Hedging Activities subsection of MD&A.

## Interest Rate Risk

Our primary interest rate exposure is to the impact of changes in interest rates on the fair value of our investments in debt and perpetual securities. We monitor our investment portfolio on a quarterly basis utilizing a full valuation methodology, measuring price volatility, and sensitivity of the fair values of our investments to interest rate changes on the debt and perpetual securities we own. For example, if the current duration of a debt security or perpetual security is 10, then the fair value of that security will increase by approximately 10% if market interest rates decrease by 100 basis points, assuming all other factors remain constant. Likewise, the fair value of the debt security or perpetual security will decrease by approximately 10% if market interest rates increase by 100 basis points, assuming all other factors remain constant.

The estimated effect of potential increases in interest rates on the fair values of debt and perpetual securities we own; derivatives, excluding credit default swaps, and notes payable as of December 31 follows:

### Sensitivity of Fair Values of Financial Instruments to Interest Rate Changes

(In millions)	2014		2013	
	Fair Value	+100 Basis Points	Fair Value	+100 Basis Points
<b>Assets:</b>				
Debt and perpetual securities:				
Fixed-maturity securities:				
Yen-denominated	\$ 67,785	\$ 58,596	\$ 71,844	\$ 62,708
Dollar-denominated	36,285	32,865	32,072	29,061
Perpetual securities:				
Yen-denominated	2,494	2,304	2,725	2,524
Dollar-denominated	175	168	222	212
Total debt and perpetual securities	\$ 106,739	\$ 93,933	\$ 106,863	\$ 94,505
Derivatives	\$ 802	\$ 692	\$ 487	\$ 809
<b>Liabilities:</b>				
Notes payable <sup>(1)</sup>	\$ 5,835	\$ 5,450	\$ 5,241	\$ 4,908
Derivatives	2,423	2,101	833	800

<sup>(1)</sup> Excludes capitalized lease obligations

There are various factors that affect the fair value of our investment in debt and perpetual securities. Included in those factors are changes in the prevailing interest rate environment, which directly affect the balance of unrealized gains or losses for a given period in relation to a prior period. Decreases in market yields generally improve the fair value of debt and perpetual securities, while increases in market yields generally have a negative impact on the fair value of our debt and perpetual securities. However, we do not expect to realize a majority of any unrealized gains or losses because we generally have the intent and ability to hold such securities until a recovery of value, which may be maturity. For additional information on unrealized losses on debt and perpetual securities, see Note 3 of the Notes to the Consolidated Financial Statements.

We attempt to match the duration of our assets with the duration of our liabilities. The following table presents the approximate duration of Aflac Japan's yen-denominated assets and liabilities, along with premiums, as of December 31.

(In years)	2014	2013
Yen-denominated debt and perpetual securities	13	13
Policy benefits and related expenses to be paid in future years	14	14
Premiums to be received in future years on policies in force	10	10

The following table presents the approximate duration of Aflac U.S. dollar-denominated assets and liabilities, along with premiums, as of December 31.

(In years)	2014	2013
Dollar-denominated debt and perpetual securities	11	10
Policy benefits and related expenses to be paid in future years	8	8
Premiums to be received in future years on policies in force	6	6

The following table shows a comparison of average required interest rates for future policy benefits and investment yields, based on amortized cost, for the years ended December 31.

**Comparison of Interest Rates for Future Policy Benefits  
and Investment Yields**  
(Net of Investment Expenses)

	2014		2013		2012	
	U.S.	Japan	U.S.	Japan	U.S.	Japan <sup>(1)</sup>
<b>Policies issued during year:</b>						
Required interest on policy reserves	3.65%	1.87% <sup>(1)</sup>	3.65%	2.00% <sup>(1)</sup>	3.75%	2.00%
New money yield on investments	4.16	2.09	3.93	2.40	3.90	2.24
<b>Policies in force at year-end:</b>						
Required interest on policy reserves	5.69	3.76 <sup>(1)</sup>	5.84	3.91 <sup>(1)</sup>	5.95	4.00
Portfolio book yield, end of period	5.73	2.76	5.88	2.72	6.22	2.83

<sup>(1)</sup> Represents investments for Aflac Japan that support policy obligations and therefore excludes Aflac Japan's annuity products and investment income from the dollar-denominated investment portfolio

We continue to monitor the spread between our new money yield and the required interest assumption for newly issued products in both the United States and Japan and will re-evaluate those assumptions as necessary. Over the next two years, we have yen-denominated securities that will mature with yields in excess of Aflac Japan's current net investment yield of 2.09% . These securities total \$1.2 billion at amortized cost and have an average yield of 4.16% . Currently, when debt and perpetual securities we own mature, the proceeds may be reinvested at a yield below that of the interest required for the accretion of policy benefit liabilities on policies issued in earlier years. However, adding riders to our older policies has helped offset negative investment spreads on these policies. Overall, adequate profit margins exist in Aflac Japan's aggregate block of business because of changes in the mix of business and favorable experience from mortality, morbidity and expenses.

We had an interest rate swap agreement related to the 5.5 billion yen variable interest rate Samurai notes that we issued in July 2011 and redeemed in July 2014. This agreement effectively converted the variable interest rate notes to fixed rate notes to eliminate the volatility in our interest expense. We have interest rate swaps related to some of our consolidated VIEs. These interest rate swaps are primarily used to convert interest receipts on floating-rate fixed-maturity securities contracts to fixed rates.

Interest rate swaptions are options on interest rate swaps. We have entered into interest rate collars, combinations of two swaption positions, in order to hedge certain dollar-denominated available-for-sale securities that are held in the Aflac Japan segment. We have used collars to protect against significant changes in the fair value associated with interest rate changes of our dollar-denominated available-for-sale securities. In order to minimize cost, we set the strike price on each collar so that the premium paid for the 'payer leg' is offset by the premium received for having sold the 'receiver leg'.

Periodically, depending on general economic conditions, we may enter into other derivative transactions to hedge interest rate risk.

For further information on our interest rate derivatives, see Note 4 of the accompanying Notes to the Consolidated Financial Statements.

### Credit Risk

A significant portion of our investment portfolio consists of fixed income or perpetual securities that expose us to the credit risk of the underlying issuer. We carefully evaluate this risk on every new investment and closely monitor the credit risk of our existing investment portfolio. We incorporate the needs of our products and liabilities, the overall requirements of the business, and other factors in addition to our underwriting of the credit risk for each investment in the portfolio.

Evaluating the underlying risks in our credit portfolio involves a multitude of factors including but not limited to our assessment of the issuers business activities, assets, products, market position, financial condition, and future prospects. We also must incorporate the assessment of the Nationally Recognized Statistical Rating Organizations (NRSROs) in assigning credit ratings to our specific portfolio holdings. We employ a team of experienced credit investment professionals to perform extensive internal assessments of the credit risks for all our portfolio holdings and potential new investments.

The ratings of our securities referenced in the two tables below are based on the ratings designations provided by major NRSROs (Moody's, S&P and Fitch) or, if not rated, are determined based on our internal analysis of such securities. For investment-grade securities where the ratings assigned by the major credit agencies are not equivalent, we use the second lowest rating that is assigned. For a description of the ratings methodology that we use when a security is split-rated, see "Market Risks of Financial Instruments - Below-Investment-Grade and Split-Rated Securities" in the Analysis of Financial Condition section of this MD&A.

The distributions by credit rating of our purchases of debt securities for the years ended December 31, based on acquisition cost, were as follows:

#### Composition of Purchases by Credit Rating

	2014	2013	2012
AAA	7.6%	.6%	.5%
AA	74.5	74.2	72.1
A	8.0	12.6	10.3
BBB	8.3	11.0	15.9
BB or lower	1.6	1.6	1.2
Total	100.0%	100.0%	100.0%

Purchases of securities from period to period are determined based on multiple objectives including appropriate portfolio diversification, the relative value of a potential investment and availability of investment opportunities, liquidity, credit and other risk factors while adhering to our investment policy guidelines. We did not purchase any perpetual securities during the periods presented in the table above. The increase in purchases of AAA rated securities during 2014 was due to the purchase of U.S. Treasury securities in the Aflac Japan portfolio. The increase in purchases of AA rated securities in 2014 and 2013 was primarily due to the purchase of JGBs. The relatively higher purchases of A rated securities in 2013 and BBB rated securities in 2012 were related primarily to the purchase of U.S. dollar-denominated corporate fixed-income publicly traded securities for the Aflac Japan portfolio as discussed further in the Results of Operations - Aflac Japan Segment section of this MD&A. The purchases of BB or lower rated securities in 2014, 2013 and 2012 were for a program to invest in senior secured bank loans to U.S. and Canadian corporate borrowers, most of which have below-investment-grade ratings. The program is managed externally by third party firms specializing in this asset class. This mandate requires a minimum average credit quality of BB-/Ba3, prohibits loans rated below B/B2, and restricts exposure to any individual credit to less than 3% of the program's assets. The objectives of this program include enhancing the yield on invested assets, achieving further diversification of credit risk, and mitigating the risk of rising interest rates through the acquisition of floating rate assets.

The distributions of debt and perpetual securities we own, by credit rating, as of December 31 were as follows:

#### Composition of Portfolio by Credit Rating

	2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AAA	1.3%	1.3%	1.4%	1.4%
AA	5.7	5.8	46.7	47.5
A	64.1	65.1	23.4	23.7
BBB	25.0	23.9	24.4	23.6
BB or lower	3.9	3.9	4.1	3.8
Total	100.0%	100.0%	100.0%	100.0%

The significant shift of investments rated AA to A is due to the downgrade of Aflac Japan's investment in JGBs from AA to A during the fourth quarter of 2014. As of December 31, 2014, our direct and indirect exposure to securities in our investment portfolio that were guaranteed by third parties was immaterial both individually and in the aggregate.

### Subordination Distribution

The majority of our total investments in debt and perpetual securities was senior debt at December 31, 2014 and 2013. We also maintained investments in subordinated financial instruments that primarily consisted of Lower Tier II, Upper Tier II, and Tier I securities, listed in order of seniority. The Lower Tier II securities are debt instruments with fixed maturities. Our Upper Tier II and Tier I investments consisted of debt instruments with fixed maturities and perpetual securities, which have an economic maturity as opposed to a stated maturity.

The following table shows the subordination distribution of our debt and perpetual securities as of December 31.

#### Subordination Distribution of Debt and Perpetual Securities

(In millions)	2014		2013	
	Amortized Cost	Percentage of Total	Amortized Cost	Percentage of Total
Senior notes	\$ 89,308	93.9%	\$ 97,165	93.5%
Subordinated securities:				
Fixed maturities (stated maturity date):				
Lower Tier II	2,751	2.9	3,156	3.1
Tier I <sup>(1)</sup>	131	.1	139	.1
Surplus notes	301	.3	330	.3
Trust preferred - non-banks	85	.1	85	.1
Other subordinated - non-banks	51	.1	51	.0
Total fixed maturities	3,319	3.5	3,761	3.6
Perpetual securities (economic maturity date):				
Upper Tier II	1,554	1.6	1,920	1.9
Tier I	703	.8	858	.8
Other subordinated - non-banks	183	.2	209	.2
Total perpetual securities	2,440	2.6	2,987	2.9
<b>Total debt and perpetual securities</b>	<b>\$ 95,067</b>	<b>100.0%</b>	<b>\$ 103,913</b>	<b>100.0%</b>

<sup>(1)</sup> Includes trust preferred securities

### Portfolio Composition

For information regarding the amortized cost for our investments in debt and perpetual securities, the cost for equity securities and the fair values of these investments, refer to Note 3 of the Notes to the Consolidated Financial Statements.

### Investment Concentrations

One of our largest sector concentrations as of December 31, 2014, was banks and financial institutions. Approximately 14% and 15% of our total portfolio of debt and perpetual securities, on an amortized cost basis, was in the bank and financial institution sector at December 31, 2014 and 2013, respectively. Within the countries we approve for investment opportunities, we primarily invest in financial institutions that are strategically crucial to each approved country's economy. The bank and financial institution sector is a highly regulated industry and plays a strategic role in the global economy. Within this sector, our credit risk by geographic region or country of issuer at December 31, 2014, based on amortized cost, was: Europe, excluding the United Kingdom ( 29% ); United States ( 27% ); Australia ( 8% ); Japan ( 8% ); United Kingdom ( 9% ); and other ( 19% ).

Our 20 largest global investment exposures as of December 31, 2014, were as follows:

## Largest Global Investment Positions

<sup>(1)</sup> JGBs or JGB-backed securities

\* If aggregated, our total exposure under the Berkshire Hathaway family of companies would have placed it among our top 20 exposures. However, we consider Berkshire Hathaway Energy Company and Burlington Northern Santa Fe, LLC holdings distinct from those of the parent company and believe it appropriate to report them separately.

As previously disclosed, we own long-dated debt instruments in support of our long-dated policyholder obligations. Some of our largest global investment holdings are positions that were purchased many years ago and increased in size due to merger and consolidation activity among the issuing entities. In addition, many of our largest holdings are yen-denominated, therefore strengthening of the yen can increase our position in dollars, and weakening of the yen can

decrease our position in dollars. Our global investment guidelines establish concentration limits for our investment portfolios.

### Geographical Exposure

The following table indicates the geographic exposure of our investment portfolio as of December 31.

## *Investments in European Countries*

Since 2008, many countries in Europe, and specifically Greece, Ireland, Italy, Portugal, and Spain (collectively the "peripheral Eurozone" countries), have been experiencing a debt crisis. Collective action by multiple parties including the European Central Bank (ECB), International Monetary Fund (IMF), European Council, and individual member states' governments has improved market perception of the situation. Although risks ranging from individual country downgrades to dissolution of the entire union have been greatly reduced and recent economic indicators suggest some improvement, overall economic activity remains subdued throughout the region. As many Eurozone economies struggle with sustainable economic growth following the region's recent sovereign debt and banking crisis, the ECB has launched a quantitative easing (QE) stimulus program. Throughout the crisis we have taken steps to improve the risk profile of our portfolio by selling certain holdings throughout Europe, including the periphery countries.

The primary factor considered when determining the domicile of investment exposure is the legal domicile of the issuer. However, other factors such as the location of the parent guarantor, the location of the company's headquarters or major business operations (including location of major assets), location of primary market (including location of revenue generation) and specific country risk publicly recognized by rating agencies can influence the assignment of the country (or geographic) risk location. When the issuer is a special financing vehicle or a branch or subsidiary of a global company, then we consider any guarantees and/or legal, regulatory and corporate relationships of the issuer relative to its ultimate parent in determining the proper assignment of country risk.

### *European sovereign debt crisis - monitoring and mitigating exposure*

During most of 2011, we saw the European sovereign crisis persist and escalate. During the crisis in 2011 and 2012, we undertook a derisking program to reduce significant concentrations within our investment portfolio, most notably perpetual securities issued by financial institutions and instruments issued by other peripheral Eurozone issuers. We remain diligent in monitoring our portfolio and continually evaluate opportunities to manage risk within our portfolio.

Our internal team of experienced credit professionals has continued to monitor the impact of the crisis on our individual investment holdings' overall credit quality. Our analysis includes factors beyond a baseline assessment of a company's assets, operations, financial statements, and credit metrics that may provide support for the instruments we own. Specifically, for our investments in European banks and financial institutions, we monitor the importance of the issuer to its local financial system, the likelihood of government support, and our investment's position in the capital structure of the issuer. For our investments in European utilities, we monitor the role of the issuer in its local economy as a provider of necessary infrastructure, and we monitor the value of the underlying assets owned by the issuer. For our investment in European corporates, industrials, and other commercial entities, we monitor the general credit quality of the issuer, the geographical mix of the issuer's customers (i.e. domestic vs. foreign), the geographical breakdown of the issuer's assets (i.e. domestic versus foreign), the value of the underlying assets owned by the issuer, capitalization of the issuer, and overall profitability and cash generation ability of the issuer. We monitor NRSRO actions and the likely actions for our investment exposures, as well as overall market conditions. By performing these analyses, we make a determination on the probability of timely payment of principal and interest of the issuers of our investments.

Some of our peripheral Eurozone fixed income investments contain covenants that we believe mitigate our risk to the issuer. These covenants could include put options that allow us to return our holdings to the issuer at a predetermined price, usually par, should the issuer be downgraded to below investment grade by a rating agency, plus restrictions on the ability to incur additional debt, sell assets, or provide collateral for indebtedness. As of December 31, 2014, all of the issuers of our holdings from peripheral Eurozone countries were current on their obligations to us, and we believe they have the ability to meet their obligations to us.

Apart from our direct investments in peripheral Eurozone sovereign debt totaling \$262 million, our other exposures as of December 31, 2014 to the European sovereign debt crisis were investments in peripheral Eurozone banks and financial institutions of \$491 million, peripheral Eurozone non-banks (excluding sovereigns) of \$2.2 billion, core Eurozone<sup>1</sup> banks and financial institutions of \$2.0 billion, core Eurozone non-banks (excluding sovereigns) of \$4.2 billion, core Eurozone sovereigns of \$486 million, and non-Eurozone<sup>2</sup> holdings throughout the balance of Europe of \$5.7 billion, all at amortized cost. Other investment risks stemming from the European sovereign debt crisis that are not possible to measure include the impact of slower economic activity throughout Europe and its impact on global economic growth and market disruption including illiquidity and impaired valuations due to heightened concerns and lack of investor confidence.

<sup>1</sup> Core Eurozone includes Germany, France, Netherlands, Austria, Belgium and Finland.

<sup>2</sup> Non-Eurozone Europe includes the United Kingdom, Switzerland, Sweden, Norway, Denmark, Czech Republic and Poland.

Although by most measures the crisis in Europe has stabilized and is showing signs of improvement, we continue to monitor the situation closely. Among the areas that we believe warrant continued attention include the heightened interrelationship between political, monetary, fiscal, and economic forces; the pace of underlying structural reforms; the possibility of continued contagion to additional sovereigns and other entities; further stress on the banking systems throughout the region; and the impact on the underlying economic fundamentals throughout the Eurozone.

#### Securities by Type of Issuance

We have investments in both publicly and privately issued securities. Our ability to sell either type of security is a function of overall market liquidity which is impacted by, among other things, the amount of outstanding securities of a particular issuer or issuance, trading history of the issue or issuer, overall market conditions, and idiosyncratic events affecting the specific issue or issuer.

The following table details investment securities by type of issuance as of December 31.

#### Investment Securities by Type of Issuance

(In millions)	2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value

Perpetual securities	107	154	117	150
Equity securities	12	19	9	14
Total publicly issued	65,949	74,363	70,060	72,343
<b>Privately issued securities:</b>				
Fixed maturities	26,797	29,880	30,992	31,737
Perpetual securities	2,333	2,515	2,870	2,797
Equity securities	7	9	8	7
Total privately issued	29,137	32,404	33,870	34,541
Total investment securities	\$ 95,086	\$ 106,767	\$ 103,930	\$ 106,884

The following table details our privately issued investment securities as of December 31.

#### Privately Issued Securities

(Amortized cost, in millions)	2014	2013
Privately issued securities as a percentage of total debt and perpetual securities	30.6%	32.6%
Privately issued securities held by Aflac Japan	\$ 26,468	\$ 31,040
Privately issued securities held by Aflac Japan as a percentage of total debt and perpetual securities	27.8%	29.9%

#### Reverse-Dual Currency Securities <sup>(1)</sup>

(Amortized cost, in millions)	2014	2013
Privately issued reverse-dual currency securities	\$ 6,196	\$ 7,087
Publicly issued collateral structured as reverse-dual currency securities	1,470	2,348
Total reverse-dual currency securities	\$ 7,666	\$ 9,435
Reverse-dual currency securities as a percentage of total debt and perpetual securities	8.1%	9.1%

<sup>(1)</sup> Principal payments in yen and interest payments in dollars

Aflac Japan has invested in privately issued securities to better match liability characteristics and secure higher yields than those available on Japanese government or other public corporate bonds. Aflac Japan's investments in yen-denominated privately issued securities consist primarily of non-Japanese issuers and have longer maturities, thereby allowing us to improve our asset/liability matching and our overall investment returns. Most of our privately issued

securities were issued under medium-term note programs and have standard documentation commensurate with credit ratings of the issuer, except when internal credit analysis indicates that additional protective and/or event-risk covenants were required.

#### *Below-Investment-Grade and Split-Rated Securities*

We use specific criteria to judge the credit quality of both existing and prospective investments. The ratings referenced in the tables below are based on the ratings designations provided by the major credit rating agencies (Moody's, S&P, and Fitch) or, if not rated, are determined based on our internal credit analysis of such securities. When the ratings issued by the rating agencies differ, we utilize the second lowest rating, regardless of how many of the three rating agencies actually rated the instrument. Split-rated securities are those where the ratings are not equivalent and one or more of the ratings is investment grade and one or more is below investment grade. For these split-rated securities, if there are only two ratings assigned by the credit rating agencies, we take the lower below-investment-grade rating. If there are three ratings assigned, and two of the three are below investment grade, we consider it a below-investment-grade security. If there are three ratings and two are investment grade, we consider it an investment grade security unless our evaluation and assessment shows a below-investment-grade rating is warranted despite two of the three rating agencies rating it investment grade.

The below-investment-grade securities shown in the following table at December 31 were investment grade at the time of purchase and were subsequently downgraded using the above described methodology.

#### **Below-Investment-Grade Securities <sup>(1)</sup>**

\* Investment grade at respective reporting date

<sup>(1)</sup> Does not include senior secured bank loans in an externally managed portfolio that were below investment grade when initially purchased

<sup>(2)</sup> Includes perpetual security

<sup>(3)</sup> Includes 17 issuers in 2014 and 15 issuers in 2013

The following table shows the 10 largest holdings with a split rating, and includes the determination between investment grade and below investment grade based on the above methodology.

### Split-Rated

(In millions)	Amortized Cost	Investment-Grade Status
Deutsche Bank AG <sup>(1)</sup>	\$ 332	Below Investment Grade
Telecom Italia SpA	332	Below Investment Grade
Commerzbank AG (includes Dresdner Bank)	213	Below Investment Grade
Santander UK PLC (Abbey National) <sup>(1)</sup>	207	Investment Grade
Bank of Ireland	166	Below Investment Grade
Energias de Portugal SA (EDP)	116	Below Investment Grade
Goldman Sachs Capital I	105	Investment Grade
Barclays Bank PLC <sup>(1)</sup>	102	Below Investment Grade
Kommunalkredit Austria	84	Below Investment Grade
BNP Paribas Fortis Funding <sup>(1)</sup>	83	Investment Grade

<sup>(1)</sup> Includes perpetual security

We invest in senior secured bank loans to U.S. and Canadian corporate borrowers, most of which have below-investment-grade ratings. The program is managed externally by third party firms specializing in this asset class. This mandate requires a minimum average credit quality of BB-/Ba3, prohibits loans rated below B/B2, and prohibits exposure to any individual credit greater than 3% of the program's assets. The objectives of this program include enhancing the yield on invested assets, achieving further diversification of credit risk, and mitigating the risk of rising interest rates through the acquisition of floating rate assets. Our investments in this program totaled \$501 million at December 31, 2014, compared with \$451 million at December 31, 2013, on an amortized cost basis.

Excluding the senior secured bank loans discussed above that were rated below investment grade when initially purchased, below-investment-grade debt and perpetual securities represented 3.4% of total debt and perpetual securities at December 31, 2014, compared with 3.7% at December 31, 2013, on an amortized cost basis. Debt and perpetual securities classified as below investment grade at December 31, 2014 and 2013 were generally reported as available for sale and carried at fair value.

Split-rated securities, excluding the senior secured bank loan investments discussed above, totaled \$2.2 billion as of December 31, 2014, compared with \$2.7 billion as of December 31, 2013, and represented 2.3% of total debt and perpetual securities, at amortized cost, at December 31, 2014, compared with 2.6% at December 31, 2013.

For the interest rate, foreign currency, and credit default swaps associated with our VIE investments for which we are the primary beneficiary, we bear the risk of foreign exchange, interest rate, and/or credit loss due to counterparty default even though we are not a direct counterparty to those contracts. We are a direct counterparty to the foreign currency swaps that we have on certain of our senior notes and subordinated debentures; foreign currency forwards; foreign currency options; and interest rate swaptions, therefore we are exposed to credit risk in the event of nonperformance by the counterparties in those contracts. The risk of counterparty default for our VIE swaps, senior note and subordinated debenture swaps, foreign currency forwards and options, and swaptions is mitigated by collateral posting requirements the counterparty must meet. If collateral posting agreements are not in place, the counterparty risk associated with foreign currency forwards and foreign currency options is the risk that at expiry of the contract, the counterparty is unable to deliver the agreed upon amount of yen at the agreed upon price or delivery date, thus exposing the Company to additional unhedged exposure to U.S. dollars in the Aflac Japan investment portfolio. See Note 4 of the Notes to the Consolidated Financial Statements for more information.

### Other-than-temporary Impairment

See Note 3 of the Notes to the Consolidated Financial Statements for a discussion of our impairment policy.

## Unrealized Investment Gains and Losses

The following table provides details on amortized cost, fair value and unrealized gains and losses for our investments in debt and perpetual securities by investment-grade status as of December 31, 2014 .

(In millions)	Total Amortized Cost	Total Fair Value	Percentage of Total Fair Value	Gross Unrealized Gains	Gross Unrealized Losses
Available-for-sale securities:					
Investment-grade securities	\$ 57,080	\$ 64,125	60.0%	\$ 7,517	\$ 472
Below-investment-grade securities	3,745	4,117	3.9	610	238
Held-to-maturity securities:					
Investment-grade securities	34,242	38,497	36.1	4,379	124
Total	\$ 95,067	\$ 106,739	100.0%	\$ 12,506	\$ 834

The following table presents an aging of debt and perpetual securities in an unrealized loss position as of December 31, 2014 .

### Aging of Unrealized Losses

(In millions)	Total Amortized Cost	Total Unrealized Loss	Less than Six Months		Six Months to Less than 12 Months		12 Months or Longer	
			Amortized Cost	Unrealized Loss	Amortized Cost	Unrealized Loss	Amortized Cost	Unrealized Loss
Available-for-sale securities:								
Investment-grade securities	\$ 11,136	\$ 472	\$ 2,356	\$ 73	\$ 26	\$ 0	\$ 8,754	\$ 399

Diamond Offshore Drilling Inc.	A	144	122	(22)
AXA <sup>(1)</sup>	BBB	275	253	(22)
Kommunal Lanspensjonskasse (KLP) <sup>(1)</sup>	BBB	203	183	(20)
Bank of America Corp	A	377	359	(18)
Republic of Italy	BBB	207	194	(13)
Baker Hughes Inc.	A	118	108	(10)

<sup>(1)</sup> Includes perpetual security

The declines in the fair values noted above were a result of changes in interest rates, movement in the yen/dollar exchange rate, and/or changes in credit spreads driven by the issuer's underlying credit quality. As we believe these issuers have the ability to continue making timely payments of principal and interest, we view these changes in fair value to be temporary and do not believe it is necessary to impair the carrying value of these securities. See the Unrealized Investment Gains and Losses section in Note 3 of the Notes to the Consolidated Financial Statements for further discussions of unrealized losses related to financial institutions, including perpetual securities, and other corporate investments.

### Investment Valuation and Cash

We estimate the fair values of our securities on a monthly basis. We monitor the estimated fair values obtained from our custodian, pricing vendors and brokers for consistency from month to month, while considering current market conditions. We also periodically discuss with our custodian and pricing brokers and vendors the pricing techniques they use to monitor the consistency of their approach and periodically assess the appropriateness of the valuation level assigned to the values obtained from them. If a fair value appears unreasonable, we will re-examine the inputs and assess the reasonableness of the pricing data with the vendor. Additionally, we may compare the inputs to relevant market indices and other performance measurements. The output of this analysis is presented to the Company's Valuation and Classifications Subcommittee, or VCS. Based on the analysis provided to the VCS, the valuation is confirmed or may be revised if there is evidence of a more appropriate estimate of fair value based on available market data. We have performed verification of the inputs and calculations in any valuation models to confirm that the valuations represent reasonable estimates of fair value.

Cash and cash equivalents totaled \$4.7 billion , or 4.3% of total investments and cash, as of December 31, 2014 , compared with \$2.5 billion , or 2.3% , at December 31, 2013 . For a discussion of the factors affecting our cash balance, see the Operating Activities, Investing Activities and Financing Activities subsections of this MD&A.

For additional information concerning our investments, see Notes 3, 4, and 5 of the Notes to the Consolidated Financial Statements.

### Deferred Policy Acquisition Costs

The following table presents deferred policy acquisition costs by segment for the years ended December 31.

(In millions)	2014	2013	% Change
Aflac Japan	\$ 5,211	\$ 5,819	(10.4)% <sup>(1)</sup>
Aflac U.S.	3,062	2,979	2.8
Total	\$ 8,273	\$ 8,798	(6.0)%

<sup>(1)</sup> Aflac Japan's deferred policy acquisition costs increased 2.4% in yen during the year ended December 31, 2014 .

See Note 1 of the Notes to the Consolidated Financial Statements for a discussion of changes to the accounting policy for DAC effective January 1, 2012.

## Policy Liabilities

The following table presents policy liabilities by segment for the years ended December 31.

(In millions)	2014	2013	% Change
Aflac Japan	\$ 74,575	\$ 80,302	(7.1)% <sup>(1)</sup>
Aflac U.S.	9,356	9,098	2.8
Other	2	2	.0
Total	\$ 83,933	\$ 89,402	(6.1)%

<sup>(1)</sup> Aflac Japan's policy liabilities increased 6.2% in yen during the year ended December 31, 2014.

See Note 7 of the Notes to the Consolidated Financial Statements for additional information on our policy liabilities.

## Notes Payable

Notes payable totaled \$5.3 billion at December 31, 2014, compared with \$4.9 billion at December 31, 2013. In November 2014, the Parent Company issued senior notes totaling \$750 million through a U.S. public debt offering. We entered into cross-currency interest rate swaps to economically convert the dollar-denominated principal and interest on the senior notes into yen-denominated obligations. We intend to use the net proceeds of the issuance for general corporate purposes, including capital contributions to subsidiaries, if needed. In July 2014, we redeemed 28.7 billion yen of our fixed rate Samurai notes and 5.5 billion yen of our variable rate Samurai notes upon their maturity (a total of approximately \$335 million using the exchange rate on the date of redemption). See Note 9 of the accompanying Notes to the Consolidated Financial Statements for additional information on our notes payable.

## Benefit Plans

Aflac Japan and Aflac U.S. have various benefit plans. For additional information on our Japanese and U.S. plans, see Note 14 of the Notes to the Consolidated Financial Statements.

## Policyholder Protection

The Japanese insurance industry has a policyholder protection system that provides funds for the policyholders of insolvent insurers. Legislation enacted regarding the framework of the Life Insurance Policyholder Protection Corporation (LIPPC) included government fiscal measures supporting the LIPPC. On December 27, 2011, Japan's FSA announced the plans to enhance the stability of the LIPPC by extending the government's fiscal support of the LIPPC through March 2017. Accordingly, the FSA submitted legislation to the Diet on January 27, 2012 to extend the government's fiscal support framework, and the legislation was approved on March 30, 2012. Effective April 2014, the annual LIPPC contribution amount for the total life industry was lowered from 40 billion yen to 33 billion yen.

## Hedging Activities

### Net Investment Hedge

Our primary exposure to be hedged is our investment in Aflac Japan, which is affected by changes in the yen/dollar exchange rate. To mitigate this exposure, we have taken the following courses of action. First, Aflac Japan maintains certain unhedged dollar-denominated securities, which serve as an economic currency hedge of a portion of our investment in Aflac Japan. Second, we have designated the majority of the Parent Company's yen-denominated liabilities (Samurai and Uridashi notes and yen-denominated loans) as non-derivative hedging instruments and certain foreign currency forwards and options as derivative hedges of our net investment in Aflac Japan. We make our net investment hedge designation at the beginning of each quarter. If the total of the designated Parent Company non-derivative and derivatives notional is equal to or less than our net investment in Aflac Japan, the hedge is deemed to be effective, and the exchange effect on the yen-denominated liabilities and the change in estimated fair value of the derivatives are reported in the unrealized foreign currency component of other comprehensive income. We estimate that if the designated net investment hedge positions exceeded our net investment in Aflac Japan by 10 billion yen, we would report a foreign exchange gain/loss of approximately \$1 million for every 1% yen weakening/strengthening in the end-of-period yen/dollar exchange rate. Our net investment hedge was effective during the years ended December 31, 2014, 2013 and 2012.

The yen net asset figure calculated for hedging purposes differs from the yen-denominated net asset position as discussed in the Currency Risk subsection of MD&A. As disclosed in that subsection, the consolidation of the underlying assets in certain VIEs requires that we derecognize our yen-denominated investment in the VIE and recognize the underlying fixed-maturity or perpetual securities and cross-currency swaps. While these U.S. dollar investments will create foreign currency fluctuations, the combination of the U.S. dollar-denominated investment and the cross-currency swap economically creates a yen-denominated investment that qualifies for inclusion as a component of our investment in Aflac Japan. Similarly, the combination of the U.S. corporate bonds and the foreign currency forwards that we have entered into, as discussed in the Aflac Japan Investment subsection of MD&A, economically creates a yen-denominated investment that qualifies for inclusion as a component of our net investment in Aflac Japan.

The dollar values of our yen-denominated net assets, including economic yen-denominated investments for net investment hedging purposes as discussed above, are summarized as follows (translated at end-of-period exchange rates) for the years ended December 31:

(In millions)	2014	2013
Aflac Japan net assets	\$ 14,665	\$ 12,315
Aflac Japan unhedged dollar-denominated net assets	(8,672)	(7,621)
Consolidated yen-denominated net assets (liabilities)	\$ 5,993	\$ 4,694

For the hedge of our net investment in Aflac Japan, we have designated certain of the Parent Company's yen-denominated liabilities, certain unhedged U.S. dollar investments and foreign currency forwards and options as a hedge of our net investment in Aflac Japan. Our consolidated yen-denominated net asset position was partially hedged at \$1.6 billion as of December 31, 2014 and partially hedged at \$1.1 billion as of December 31, 2013 .

#### Cash Flow Hedges

We had freestanding derivative instruments related to our consolidated VIE investments that are reported in the consolidated balance sheet at fair value within other assets and other liabilities. As of December 31, 2014 , two of the freestanding swaps that are used within VIEs to hedge the risk arising from changes in foreign currency exchange rates qualified for hedge accounting.

We had an interest rate swap agreement related to the 5.5 billion yen variable interest rate Samurai notes that we issued in July 2011 and redeemed in July 2014. By entering into this contract, we swapped the variable interest rate to a fixed interest rate of 1.475%. We had designated this interest rate swap as a hedge of the variability in our interest cash flows associated with the variable interest rate Samurai notes. This hedge was effective during the years ended December 31, 2014 , 2013 and 2012 , respectively.

#### Fair Value Hedges

We have entered into foreign currency forwards and options to mitigate the foreign exchange risk associated with new investments in U.S. dollar-denominated fixed-maturities that support yen-denominated liabilities within our Aflac Japan segment.

We have entered into interest rate swaptions to mitigate the interest rate risk associated with our U.S. dollar-denominated fixed-maturities that support yen-denominated liabilities within our Aflac Japan segment.

See Note 4 of the Notes to the Consolidated Financial Statements for additional information on our hedging activities.

#### **Off-Balance Sheet Arrangements**

As of December 31, 2014 , we had no material letters of credit, standby letters of credit, guarantees or standby repurchase obligations. See Note 15 of the Notes to the Consolidated Financial Statements for information on material unconditional purchase obligations that are not recorded on our balance sheet.

## CAPITAL RESOURCES AND LIQUIDITY

Aflac provides the primary sources of liquidity to the Parent Company through dividends and management fees. The following table presents the amounts provided for the years ended December 31.

### Liquidity Provided by Aflac to Parent Company

(In millions)	2014	2013	2012
Dividends declared or paid by Aflac	\$ 1,473	\$ 962	\$ 0
Management fees paid by Aflac	267	292	249

The primary uses of cash by the Parent Company are shareholder dividends, the repurchase of its common stock and interest on its outstanding indebtedness. The Parent Company's sources and uses of cash are reasonably predictable and are not expected to change materially in the future. For additional information, see the Financing Activities subsection of this MD&A.

The Parent Company also accesses debt security markets to provide additional sources of capital. We filed a shelf registration statement with the SEC in May 2012 that allows us to issue an indefinite amount of senior and subordinated debt, in one or more series, from time to time until May 2015. In March 2014, we filed a shelf registration statement with Japanese regulatory authorities that allows us to issue up to 100 billion yen of yen-denominated Samurai notes in Japan through March 2016. If issued, these yen-denominated Samurai notes would not be available to U.S. persons. We believe outside sources for additional debt and equity capital, if needed, will continue to be available. For additional information, see Note 9 of the Notes to the Consolidated Financial Statements.

The principal sources of cash for our insurance operations are premiums and investment income. The primary uses of cash by our insurance operations are investments, policy claims, commissions, operating expenses, income taxes and payments to the Parent Company for management fees and dividends. Both the sources and uses of cash are reasonably predictable.

When making an investment decision, our first consideration is based on product needs. Our investment objectives provide for liquidity through the purchase of investment-grade debt securities. These objectives also take into account duration matching, and because of the long-term nature of our business, we have adequate time to react to changing cash flow needs.

As a result of policyholder aging, claims payments are expected to gradually increase over the life of a policy. Therefore, future policy benefit reserves are accumulated in the early years of a policy and are designed to help fund future claims payments. We expect our future cash flows from premiums and our investment portfolio to be sufficient to meet our cash needs for benefits and expenses.

In October 2014, the Parent Company and Aflac entered into a 364-day uncommitted bilateral line of credit that provides for borrowings in the amount of \$100 million. Borrowings will bear interest at the rate quoted by the bank and agreed upon at the time of making such loan and will have a three-month maturity period. There are no related facility fees, upfront expenses or financial covenant requirements. Borrowings under this credit agreement may be used for general corporate purposes. As of December 31, 2014, we did not have any borrowings outstanding under our \$100 million credit agreement. Borrowings under the financing agreement will mature no later than three months after the last drawdown date of October 15, 2015.

The Parent Company and Aflac have a senior unsecured revolving credit facility agreement with a syndicate of financial institutions in the amount of 50 billion yen. This credit agreement provides for borrowings in Japanese yen or the equivalent of Japanese yen in U.S. dollars on a revolving basis. Borrowings will bear interest at LIBOR plus the applicable margin of 1.125%. In addition, the Parent Company and Aflac are required to pay a facility fee of .125% on the commitments. Borrowings under the credit agreement may be used for general corporate purposes, including a capital contingency plan for our Japanese operations. Borrowings under the financing agreement mature at the termination date of the credit agreement. The agreement requires compliance with certain financial covenants on a quarterly basis. This credit agreement will expire on the earlier of March 29, 2018, or the date of termination of the commitments upon an event of default as defined in the agreement. As of December 31, 2014, we did not have any borrowings outstanding under our 50 billion yen revolving credit agreement.

Our financial statements convey our financing arrangements during the periods presented. We have not engaged in material intra-period short-term financings during the periods presented that are not otherwise reported in our balance sheet. We were in compliance with all of the covenants of our notes payable and lines of credit at December 31, 2014 . We have not entered into transactions involving the transfer of financial assets with an obligation to repurchase financial assets that have been accounted for as a sale under applicable accounting standards, including securities lending transactions. See Notes 1, 3, and 4 of the Notes to the Consolidated Financial Statements for more information on our securities lending and derivative activities. With the exception of disclosed activities in those referenced footnotes, we do not have a known trend, demand, commitment, event or uncertainty that would reasonably result in our liquidity increasing or decreasing by a material amount. Our cash and cash equivalents include unrestricted cash on hand, money market instruments, and other debt instruments with a maturity of 90 days or less when purchased, all of which has minimal market, settlement or other risk exposure.

The following table presents the estimated payments by period of our major contractual obligations as of December 31, 2014 . We translated our yen-denominated obligations using the December 31, 2014 , exchange rate. Actual future payments as reported in dollars will fluctuate with changes in the yen/dollar exchange rate.

#### Distribution of Payments by Period

(In millions)	Total Liability <sup>(1)</sup>	Total Payments	Less Than One Year	One to Three Years	Four to Five Years	After Five Years
Future policy benefits liability (Note 7) <sup>(2)</sup>	\$ 65,646	\$ 237,568	\$ 7,765	\$ 15,202	\$ 15,204	\$ 199,397
Unpaid policy claims liability (Note 7) <sup>(3)</sup>	3,630	3,630	2,685	583	214	148

<b>Total contractual obligations</b>	<b>\$ 82,829</b>	<b>\$ 261,972</b>	<b>\$ 13,832</b>	<b>\$ 17,541</b>	<b>\$ 17,068</b>	<b>\$ 213,531</b>

*Liabilities for unrecognized tax benefits in the amount of \$15 have been excluded from the tabular disclosure above because the timing of cash payment is not reasonably estimable.*

<sup>(1)</sup> Liability amounts are those reported on the consolidated balance sheet as of December 31, 2014 .

<sup>(2)</sup> The estimated payments due by period reflect future estimated cash payments to be made to policyholders and others for future policy benefits. These projected cash outflows are based on assumptions for future policy persistency, mortality, morbidity, and other assumptions comparable with our experience, consider future premium receipts on current policies in force, and assume market growth and interest crediting consistent with assumptions used in amortizing deferred acquisition costs. These cash outflows are undiscounted with respect to interest and, as a result, the sum of the cash outflows shown for all years in the table of \$237,568 exceeds the corresponding liability amount of \$65,646 . We have made significant assumptions to determine the future estimated cash outflows related to the underlying policies and contracts. Due to the significance of the assumptions used, actual cash outflow amounts and timing will differ, possibly materially, from these estimates.

<sup>(3)</sup> Includes assumptions as to the timing of policyholders reporting claims for prior periods and the amount of those claims. Actual amounts and timing of unpaid policy claims payments may differ significantly from the estimates above.

<sup>(4)</sup> Not applicable

For more information on our major contractual obligations, see the applicable Note in the Notes to the Consolidated Financial Statements as indicated in the line items in the table above.

#### Consolidated Cash Flows

We translate cash flows for Aflac Japan's yen-denominated items into U.S. dollars using weighted-average exchange rates. In years when the yen weakens, translating yen into dollars causes fewer dollars to be reported. When the yen strengthens, translating yen into dollars causes more dollars to be reported.

The following table summarizes consolidated cash flows by activity for the years ended December 31.

(In millions)	2014	2013	2012
Operating activities	\$ 6,550	\$ 10,547	\$ 14,952
Investing activities	(4,241)	(11,091)	(16,952)
Financing activities	(147)	1,136	1,945
Exchange effect on cash and cash equivalents	(47)	(90)	(153)
Net change in cash and cash equivalents	\$ 2,115	\$ 502	\$ (208)

### Operating Activities

Consolidated cash flow from operations decreased 37.9% in 2014, compared with 2013. The following table summarizes operating cash flows by source for the years ended December 31.

(In millions)	2014	2013	2012
Aflac Japan	\$ 5,711	\$ 9,410	\$ 13,949
Aflac U.S. and other operations	839	1,137	1,003
Total	\$ 6,550	\$ 10,547	\$ 14,952

The decrease in Aflac Japan operating cash flows during 2014 and 2013 was largely due to a decline in the sales of the WAYS product which resulted in a reduced amount of cash received from discounted advance premiums.

### Investing Activities

Operating cash flow is primarily used to purchase debt securities to meet future policy obligations. The following table summarizes investing cash flows by source for the years ended December 31.

(In millions)	2014	2013	2012
Aflac Japan	\$ (4,129)	\$ (10,293)	\$ (15,823)
Aflac U.S. and other operations	(112)	(798)	(1,129)
Total	\$ (4,241)	\$ (11,091)	\$ (16,952)

Prudent portfolio management dictates that we attempt to match the duration of our assets with the duration of our liabilities. Currently, when our fixed-maturity securities and perpetual securities mature, the proceeds may be reinvested at a yield below that required for the accretion of policy benefit liabilities on policies issued in earlier years. However, the long-term nature of our business and our strong cash flows provide us with the ability to minimize the effect of mismatched durations and/or yields identified by various asset adequacy analyses. When needed or when market opportunities arise, we dispose of selected fixed-maturity and perpetual securities that are available for sale to improve the duration matching of our assets and liabilities, improve future investment yields, and/or re-balance our portfolio. As a result, dispositions before maturity can vary significantly from year to year. Dispositions before maturity were approximately 6% of the annual average investment portfolio of fixed maturities and perpetual securities available for sale during the year ended December 31, 2014, compared with 16% in 2013 and 15% in 2012. In October 2014, we sold a total of \$1.4 billion of U.S. Treasuries, which we had purchased earlier that year for Aflac Japan. In December 2014, we sold \$1.0 billion of additional U.S. dollar-denominated assets held by Aflac Japan. The proceeds of these sales will be reinvested in other assets, consistent with our normal portfolio management and asset allocation process.

### Financing Activities

Consolidated cash used by financing activities was \$147 million in 2014, compared with cash provided by financing activities of \$1.1 billion in 2013 and \$1.9 billion in 2012.

In November 2014, the Parent Company issued \$750 million of senior notes through a U.S. public debt offering. The Company intends to use the net proceeds of the issuance for general corporate purposes, including capital contributions to subsidiaries, if needed. In July 2014, we redeemed 28.7 billion yen of our fixed rate Samauri notes and 5.5 billion yen of our variable rate Samurai notes upon their maturity (a total of approximately \$335 million using the exchange rate on the date of redemption).

In June 2013, the Parent Company issued \$700 million of senior notes through a U.S. public debt offering. We used part of these net proceeds for the debt redemptions in 2014. The balance of the net proceeds will be used to repay, redeem or repurchase, in whole or in part, the Parent Company's \$300 million senior notes due August 2015 and general corporate purposes, including capital contributions to subsidiaries, if needed.

In February 2012, the Parent Company issued \$750 million of senior notes through a U.S. public debt offering. In June 2012, we paid \$337 million to redeem 26.6 billion yen of Samurai notes using proceeds from the February debt offering. In July 2012, the Parent Company issued \$250 million of senior notes through a U.S. public debt offering. In September 2012, the Parent Company issued \$450 million of subordinated debentures through a U.S. public debt offering, and in October 2012, the underwriters exercised their option, pursuant to the underwriting agreement, to purchase an additional \$50 million principal amount of these subordinated debentures.

See Note 9 of the Notes to the Consolidated Financial Statements for further information on the debt issuances discussed above.

Cash returned to shareholders through dividends and treasury stock purchases was \$1.9 billion in 2014, compared with \$1.4 billion in 2013 and \$721 million in 2012.

See our preceding discussion in this Capital Resources and Liquidity section of MD&A regarding the five-year senior unsecured revolving credit facility agreement entered into by the Parent Company and Aflac in March 2013 in the amount of 50 billion yen and the 364-day uncommitted bilateral line of credit entered into by the Parent Company and Aflac in October 2014 in the amount of \$100 million. As of December 31, 2014, no borrowings were outstanding under our 50 billion yen revolving credit agreement or our \$100 million 364-day uncommitted bilateral line of credit.

We were in compliance with all of the covenants of our notes payable and lines of credit at December 31, 2014.

The following tables present a summary of treasury stock activity during the years ended December 31.

#### Treasury Stock Purchased

(In millions of dollars and thousands of shares)	2014	2013	2012
Treasury stock purchases	\$ 1,210	\$ 813	\$ 118
Number of shares purchased:			
Open market	19,660	13,212	1,948
Other	157	222	360
Total shares purchased	19,817	13,434	2,308

#### Treasury Stock Issued

(In millions of dollars and thousands of shares)	2014	2013	2012
Stock issued from treasury:			
Cash financing	\$ 33	\$ 88	\$ 32
Noncash financing	65	65	63
Total stock issued from treasury	\$ 98	\$ 153	\$ 95
Number of shares issued	1,763	3,254	2,184

Under share repurchase authorizations from our board of directors, we purchased 19.7 million shares of our common stock in the open market in 2014, compared with 13.2 million shares in 2013 and 1.9 million shares in 2012. As of December 31, 2014, a remaining balance of 29.6 million shares of our common stock was available for purchase under share repurchase authorizations by our board of directors. We currently plan to purchase \$1.3 billion of our common stock in 2015. See Note 11 of the Notes to the Consolidated Financial Statements for additional information.

Cash dividends paid to shareholders in 2014 of \$1.50 per share increased 5.6% over 2013. The 2013 dividend paid of \$1.42 per share increased 6.0% over 2012. The following table presents the dividend activity for the years ended December 31.

(In millions)	2014	2013	2012
Dividends paid in cash	\$ 654	\$ 635	\$ 603
Dividends through issuance of treasury shares	26	25	24
Total dividends to shareholders	\$ 680	\$ 660	\$ 627

In February 2015, the board of directors declared the first quarter 2015 cash dividend of \$.39 per share. The dividend is payable on March 2, 2015, to shareholders of record at the close of business on February 17, 2015.

### Regulatory Restrictions

Aflac is domiciled in Nebraska and is subject to its regulations. The Nebraska Department of Insurance imposes certain limitations and restrictions on payments of dividends, management fees, loans and advances by Aflac to the Parent Company. The Nebraska Department of Insurance statutes require prior approval for dividend distributions that exceed the greater of the net income from operations, which excludes net realized investment gains, for the previous year determined under statutory accounting principles, or 10% of statutory capital and surplus as of the previous year-end. In addition, the Nebraska insurance department must approve service arrangements and other transactions within the affiliated group of companies. These regulatory limitations are not expected to affect the level of management fees or dividends paid by Aflac to the Parent Company. A life insurance company's statutory capital and surplus is determined according to rules prescribed by the NAIC, as modified by the insurance department in the insurance company's state of domicile. Statutory accounting rules are different from GAAP and are intended to emphasize policyholder protection and company solvency. Similar laws apply in New York and South Carolina, the domiciliary jurisdictions of the Parent Company's other insurance subsidiaries, Aflac New York and CAIC.

The continued long-term growth of our business may require increases in the statutory capital and surplus of our insurance operations. Aflac's insurance operations may secure additional statutory capital through various sources, such as internally generated statutory earnings or equity contributions by the Parent Company from funds generated through debt or equity offerings. The NAIC's risk-based capital (RBC) formula is used by insurance regulators to help identify inadequately capitalized insurance companies. The RBC formula quantifies insurance risk, business risk, asset risk and interest rate risk by weighing the types and mixtures of risks inherent in the insurer's operations. Aflac's company action level RBC ratio was 945% as of December 31, 2014 . Aflac's RBC ratio remains high and reflects a strong capital and surplus position. As of December 31, 2014 , Aflac's total adjusted capital of \$11.2 billion exceeded the company action level required capital and surplus of \$1.2 billion by \$10.0 billion . The maximum amount of dividends that can be paid to the Parent Company by Aflac without prior approval of Nebraska's director of insurance is the greater of the net income from operations, which excludes net realized investment gains, for the previous year determined under statutory accounting principles, or 10% of statutory capital and surplus as of the previous year-end. Dividends declared by Aflac during 2015 in excess of \$2.4 billion would require such approval. See Note 13 of the Notes to the Consolidated Financial Statements for information regarding the impact of permitted practices by the Nebraska Department of Insurance on our statutory capital and surplus. The NAIC considers its Solvency Modernization Initiative (SMI) process relating to updating the U.S. insurance solvency regulation framework to be ongoing. The SMI has focused on key issues such as capital requirements, governance and risk management, group supervision, reinsurance, statutory accounting and financial reporting matters. Many of these key issues have been finalized and/or are near completion; however, the NAIC still has some ongoing initiatives related to SMI, such as monitoring the international efforts on group capital requirements and group supervision.

In addition to limitations and restrictions imposed by U.S. insurance regulators, Japan's FSA may not allow profit repatriations from Aflac Japan if the transfers would cause Aflac Japan to lack sufficient financial strength for the protection of policyholders. The FSA maintains its own solvency standard which is quantified through the solvency margin ratio (SMR). Aflac Japan's SMR is sensitive to interest rate and foreign exchange rate changes, therefore we continue to evaluate alternatives for reducing this sensitivity. In the event of a rapid change in interest rates, we have a senior unsecured revolving credit facility in the amount of 50 billion yen as a capital contingency plan. We have already undertaken various measures to mitigate the sensitivity of Aflac Japan's SMR. For example, we employ policy reserve matching (PRM) investment strategies, which is a Japan-specific accounting treatment that reduces SMR interest rate sensitivity since PRM-designated investments are carried at amortized cost consistent with corresponding liabilities. For U.S. GAAP, PRM investments are categorized as available-for-sale. We also have interest rate swaptions to mitigate increases in U.S. interest rates and the related impact to the available-for-sale investment portfolio in Japan. In the fourth quarter of 2014, Aflac Japan entered into an additional quota share arrangement to cede a portion of hospital benefits of one of our closed products. Under this coinsurance indemnity type of reinsurance, Aflac Japan released approximately 55 billion yen of FSA reserves. (See Notes 3, 4 and 8 of the Notes to the Consolidated Financial Statements for additional

information on our investment strategies, hedging activities, and reinsurance, respectively.) As of December 31, 2014, Aflac Japan's SMR had increased to 857%, compared with 777% at December 31, 2013.

Aflac is subject to the NAIC's Own Risk and Solvency Assessment (ORSA), effective January 1, 2015. Through the ORSA requirements, Aflac is expected to regularly, no less than annually, conduct an ORSA to assess the adequacy of its risk management framework, and its current and estimated projected future solvency position; internally document the process and results of the assessment; and provide a confidential high-level ORSA Summary Report annually to the lead state commissioner if the insurer is a member of an insurance group. Aflac has developed a roadmap of key decisions, activities, and enhancements that will allow us to deliver an ORSA Summary Report ready for regulatory submission by the end of 2015.

Payments are made from Aflac Japan to the Parent Company for management fees and to Aflac U.S. for allocated expenses and remittances of earnings. The following table details Aflac Japan remittances for the years ended December 31.

#### Aflac Japan Remittances

(In millions of dollars and billions of yen)	2014	2013	2012
Aflac Japan management fees paid to Parent Company	\$ 39	\$ 37	\$ 30
Expenses allocated to Aflac Japan	71	74	58
Aflac Japan profit remittances to Aflac U.S. in dollars	1,704	771	442 <sup>(1)</sup>
Aflac Japan profit remittances to Aflac U.S. in yen	181.4	76.8	33.1 <sup>(1)</sup>

<sup>(1)</sup> Includes U.S. dollar-denominated securities which were \$209 million at amortized cost and had accrued interest of \$4 million (totaling approximately 16.8 billion yen) as of the remittance date

In the fourth quarter of 2014, we began to increase the frequency of capital transfers from Japan to the United States to better manage cash flow. This capital repatriation is reflected in Aflac Japan's SMR as of December 31, 2014.

We had entered into foreign exchange forwards and options as part of an economic hedge on foreign exchange risk on 52.5 billion yen of profit repatriation received in July 2014 and 50.0 billion yen of repatriation received in December 2014, resulting in \$7 million and \$45 million of additional funds received, respectively, when the yen was exchanged into dollars.

For additional information on regulatory restrictions on dividends, profit repatriations and other transfers, see Note 13 of the Notes to the Consolidated Financial Statements.

#### Other

For information regarding commitments and contingent liabilities, see Note 15 of the Notes to the Consolidated Financial Statements.

#### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by Item 7A is incorporated by reference from the Market Risks of Financial Instruments section of MD&A in Part II, Item 7, of this report.

## **ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

### **Management's Annual Report on Internal Control Over Financial Reporting**

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 2013. Based on our evaluation under this framework, management has concluded that our internal control over financial reporting was effective as of December 31, 2014 .

KPMG LLP, an independent registered public accounting firm, has issued an attestation report on the effectiveness of internal control over financial reporting as of December 31, 2014 , which is included herein.

## Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders  
Aflac Incorporated:

We have audited Aflac Incorporated's (the Company) internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Aflac Incorporated's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Aflac Incorporated maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Aflac Incorporated and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014, and our report dated February 26, 2015 expressed an unqualified opinion on those consolidated financial statements.

**KPMG LLP**

Atlanta, Georgia  
February 26, 2015

## Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders  
Aflac Incorporated:

We have audited the accompanying consolidated balance sheets of Aflac Incorporated and subsidiaries (the Company) as of December 31, 2014 and 2013 , and the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014 . These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Aflac Incorporated and subsidiaries as of December 31, 2014 and 2013 , and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014 , in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Aflac Incorporated's internal control over financial reporting as of December 31, 2014 , based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2015 , expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**Notes to the Consolidated Financial Statements**

## **1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

### **Description of Business**

Aflac Incorporated (the Parent Company) and its subsidiaries (collectively, the Company) primarily sell supplemental health and life insurance in the United States and Japan. The Company's insurance business is marketed and administered through American Family Life Assurance Company of Columbus (Aflac), which operates in the United States (Aflac U.S.) and as a branch in Japan (Aflac Japan). American Family Life Assurance Company of New York (Aflac New York) is a wholly owned subsidiary of Aflac. Most of Aflac's policies are individually underwritten and marketed through independent agents. Additionally, Aflac U.S. markets and administers group products through Continental American Insurance Company (CAIC), branded as Aflac Group Insurance. Our insurance operations in the United States and our branch in Japan service the two markets for our insurance business. Aflac Japan's revenues, including realized gains and losses on its investment portfolio, accounted for 72% of the Company's total revenues in 2014, compared with 74% in 2013 and 77% in 2012. The percentage of the Company's total assets attributable to Aflac Japan was 82% at December 31, 2014, compared with 85% at December 31, 2013.

### **Basis of Presentation**

We prepare our financial statements in accordance with U.S. generally accepted accounting principles (GAAP). These principles are established primarily by the Financial Accounting Standards Board (FASB). In these Notes to the Consolidated Financial Statements, references to GAAP issued by the FASB are derived from the FASB Accounting Standards Codification™ (ASC). The preparation of financial statements in conformity with GAAP requires us to make estimates when recording transactions resulting from business operations based on currently available information. The most significant items on our balance sheet that involve a greater degree of accounting estimates and actuarial determinations subject to changes in the future are the valuation of investments, deferred policy acquisition costs, liabilities for future policy benefits and unpaid policy claims, and income taxes. These accounting estimates and actuarial determinations are sensitive to market conditions, investment yields, mortality, morbidity, commission and other acquisition expenses, and terminations by policyholders. As additional information becomes available, or actual amounts are determinable, the recorded estimates will be revised and reflected in operating results. Although some variability is inherent in these estimates, we believe the amounts provided are adequate.

The consolidated financial statements include the accounts of the Parent Company, its subsidiaries and those entities required to be consolidated under applicable accounting standards. All material intercompany accounts and transactions have been eliminated.

### **Significant Accounting Policies**

**Translation of Foreign Currencies:** The functional currency of Aflac Japan's insurance operations is the Japanese yen. We translate our yen-denominated financial statement accounts into U.S. dollars as follows. Assets and liabilities are translated at end-of-period exchange rates. Realized gains and losses on security transactions are translated at the exchange rate on the trade date of each transaction. Other revenues, expenses and cash flows are translated using average exchange rates for the period. The resulting currency translation adjustments are reported in accumulated other comprehensive income. We include in earnings the realized currency exchange gains and losses resulting from foreign currency transactions.

Prior to October 1, 2013, Aflac Japan maintained an investment portfolio of dollar-denominated securities on behalf of Aflac U.S., which served as an economic currency hedge of a portion of our investment in Aflac Japan. The functional currency for these investments was the U.S. dollar. The related investment income and realized/unrealized investment gains and losses were denominated in U.S. dollars. Since the functional currency of this portfolio was the U.S. dollar, there was no translation adjustment to record in other comprehensive income for these investments when the yen/dollar exchange rate changed. The foreign exchange gains and losses related to this portfolio continue to be taxable in Japan and the U.S. when the securities matured or were sold. Until maturity or sale, deferred tax expense or benefit associated with the foreign exchange gains or losses is recognized in income tax expense on other comprehensive income. As of October 1, 2013, these investments were transferred into the Aflac Japan investment portfolio. These investments began to have remeasurement and translation effects recorded in other comprehensive income in the fourth quarter of 2013.

We have designated a majority of the Parent Company's yen-denominated liabilities (Samurai and Uridashi notes and yen-denominated loans) as non-derivative hedges and designated foreign currency forwards and options as derivative hedges of the foreign currency exposure of our investment in Aflac Japan. Outstanding principal and related accrued interest on these Parent Company liabilities and the fair value of these derivatives are translated into U.S. dollars at end-of-period exchange rates. Currency translation adjustments and changes in the fair value of these derivatives are recorded as unrealized foreign currency translation gains (losses) in other comprehensive income and are included in accumulated other comprehensive income.

**Insurance Revenue and Expense Recognition:** The supplemental health and life insurance policies we issue are classified as long-duration contracts. The contract provisions generally cannot be changed or canceled during the contract period; however, we may adjust premiums for supplemental health policies issued in the United States within prescribed guidelines and with the approval of state insurance regulatory authorities.

Insurance premiums for most of the Company's health and life policies are recognized ratably as earned income over the premium payment periods of the policies. When revenues are reported, the related amounts of benefits and expenses are charged against such revenues, so that profits are recognized in proportion to premium revenues during the period the policies are expected to remain in force. This association is accomplished by means of annual additions to the liability for future policy benefits and the deferral and subsequent amortization of policy acquisition costs.

Premiums from the Company's products with limited-pay features are collected over a significantly shorter period than the period over which benefits are provided. Premiums for these products are recognized ratably over the scheduled premium payment period. At the policyholder's option, customers can also pay discounted advanced premiums for certain of these products. Advanced premiums are deferred and recognized ratably over the regularly scheduled premium payment period. For the Company's limited-pay products, any gross premium in excess of the net premium is deferred during the scheduled premium payment period and recognized into benefits in a constant relationship with insurance in force. Benefits are recorded as an expense when they are incurred. A liability for future policy benefits is recorded when premiums are recognized using the net premium method.

The calculation of deferred policy acquisition costs (DAC) and the liability for future policy benefits requires the use of estimates based on sound actuarial valuation techniques. For new policy issues, we review our actuarial assumptions and deferrable acquisition costs each year and revise them when necessary to more closely reflect recent experience and studies of actual acquisition costs. For policies in force, we evaluate DAC by major product groupings to determine that they are recoverable from future revenues, and any amounts determined not to be recoverable are charged against net earnings. We have not had any material charges to earnings for DAC that was determined not to be recoverable in any of the years presented in this Form 10-K.

Advertising expense is reported as incurred in insurance expenses in the consolidated statements of earnings.

**Cash and Cash Equivalents:** Cash and cash equivalents include cash on hand, money market instruments and other debt instruments with a maturity of 90 days or less when purchased.

**Investments:** Our debt securities consist of fixed-maturity securities, which are classified as either held to maturity or available for sale. Securities classified as held to maturity are securities that we have the ability and intent to hold to maturity or redemption and are carried at amortized cost. All other fixed-maturity debt securities, our perpetual securities and our equity securities are classified as available for sale and are carried at fair value. If the fair value is higher than the amortized cost for debt and perpetual securities, or the purchase cost for equity securities, the excess is an unrealized gain, and if lower than cost, the difference is an unrealized loss. The net unrealized gains and losses on securities available for sale, plus the unamortized unrealized gains and losses on debt securities transferred to the held-to-maturity portfolio, less related deferred income taxes, are recorded through other comprehensive income and included in accumulated other comprehensive income.

Amortized cost of debt and perpetual securities is based on our purchase price adjusted for accrual of discount, or amortization of premium, and recognition of impairment charges, if any. The amortized cost of debt and perpetual securities we purchase at a discount or premium will equal the face or par value at maturity or the call date, if applicable. Interest is reported as income when earned and is adjusted for amortization of any premium or discount.

We have investments in variable interest entities (VIEs). Criteria for evaluating VIEs for consolidation focuses on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and (1) the obligation to absorb losses of the entity or (2) the right to receive benefits from the entity. We are the primary beneficiary of certain VIEs. While the VIEs generally operate within a defined set of

documents, there are certain powers that are retained by us that are considered significant in our conclusion that we are the primary beneficiary. These powers vary by structure but generally include the initial selection of the underlying collateral or, for collateralized debt obligations (CDOs), the reference credits to include in the structure; the ability to obtain the underlying collateral in the event of default; and the ability to appoint or dismiss key parties in the structure. In particular, our powers surrounding the underlying collateral were the most significant powers since those most significantly impact the economics of the VIE. We have no obligation to provide any continuing financial support to any of the entities in which we are the primary beneficiary. Our maximum loss is limited to our original investment. Neither we nor any of our creditors have the ability to obtain the underlying collateral, nor do we have control over the instruments in the VIEs, unless there is an event of default. For those entities where we are the primary beneficiary, the assets consolidated are fixed-maturity securities, perpetual securities and derivative instruments; collateral is reported separately under the captions fixed maturities- and perpetual securities- consolidated variable interest entities on our balance sheet.

For the collateralized mortgage obligations (CMOs) held in our fixed-maturity securities portfolio, we recognize income using a constant effective yield, which is based on anticipated prepayments and the estimated economic life of the securities. When estimates of prepayments change, the effective yield is recalculated to reflect actual payments to date and anticipated future payments. The net investment in CMO securities is adjusted to the amount that would have existed had the new effective yield been applied at the time of acquisition. This adjustment is reflected in net investment income.

We use the specific identification method to determine the gain or loss from securities transactions and report the realized gain or loss in the consolidated statements of earnings. Securities transactions are accounted for based on values as of the trade date of the transaction.

An investment in a fixed maturity or perpetual security is impaired if the fair value falls below book value. We regularly review our entire investment portfolio for declines in value. The majority of our investments are evaluated for other-than-temporary impairment using our debt impairment model. Our debt impairment model focuses on the ultimate collection of the cash flows from our investments. The determination of the amount of impairments under this model is based upon our periodic evaluation and assessment of known and inherent risks associated with the respective securities. Such evaluations and assessments are revised as conditions change and new information becomes available.

The determination of whether an impairment in value is other than temporary is based largely on our evaluation of the issuer's creditworthiness. Our team of experienced credit professionals must apply considerable judgment in determining the likelihood of the security recovering in value while we own it. Factors that may influence this include the overall level of interest rates, credit spreads, the credit quality of the underlying issuer, and other factors. This process requires consideration of risks which can be controlled to a certain extent, such as credit risk, and risks which cannot be controlled, such as interest rate risk.

If, after monitoring and analyses, management believes that fair value will not recover to amortized cost prior to the disposal of the security, we recognize an other-than-temporary impairment of the security. Once a security is considered to be other-than-temporarily impaired, the impairment loss is separated into two separate components: the portion of the impairment related to credit and the portion of the impairment related to factors other than credit. We automatically recognize a charge to earnings for the credit-related portion of other-than-temporary impairments. Impairments related to factors other than credit are charged to earnings in the event we intend to sell the security prior to the recovery of its amortized cost or if it is more likely than not that we would be required to dispose of the security prior to recovery of its amortized cost; otherwise, non-credit-related other-than-temporary impairments are charged to other comprehensive income.

Our investments in perpetual securities that are rated below investment grade are evaluated for other-than-temporary impairment under our equity impairment model. Our equity impairment model focuses on the severity of a security's decline in fair value coupled with the length of time the fair value of the security has been below amortized cost and the financial condition and near-term prospects of the issuer.

We lend fixed-maturity securities to financial institutions in short-term security lending transactions. These securities continue to be carried as investment assets on our balance sheet during the terms of the loans and are not reported as sales. We receive cash or other securities as collateral for such loans. For loans involving unrestricted cash or securities as collateral, the collateral is reported as an asset with a corresponding liability for the return of the collateral.

Other investments include policy loans and other short-term investments with maturities of one year or less, but greater than 90 days, at the time of purchase and are stated at amortized cost, which approximates estimated fair value.

**Derivatives and Hedging:** Freestanding derivative instruments are reported in the consolidated balance sheet at fair value and are reported in other assets and other liabilities, with changes in value reported in earnings and/or other comprehensive income. These freestanding derivatives are interest rate swaps, foreign currency swaps, credit default swaps (CDSs), foreign currency forwards, foreign currency options, and options on interest rate swaps (or interest rate swaptions). Interest rate and foreign currency swaps are used within VIEs to hedge the risk arising from interest rate and currency exchange risk, while the CDSs are used to increase the yield and improve the diversification of the portfolio. Foreign currency forwards and options are used in hedging foreign exchange risk on U.S. dollar-denominated securities in Aflac Japan's portfolio. Foreign currency forwards and options are used to hedge certain portions of forecasted cash flows denominated in yen. Interest rate swaps are used to hedge the variability of interest cash flows associated with our variable interest rate notes, and cross-currency interest rate swaps, also referred to as foreign currency swaps, are used to economically convert certain dollar-denominated note obligations into yen-denominated principal and interest obligations. Interest rate swaptions are used to hedge interest rate risk for certain U.S. dollar-denominated available-for-sale securities. We do not use derivatives for trading purposes, nor do we engage in leveraged derivative transactions.

From time to time, we purchase certain investments that contain an embedded derivative. We assess whether this embedded derivative is clearly and closely related to the asset that serves as its host contract. If we deem that the embedded derivative's terms are not clearly and closely related to the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the derivative is separated from that contract, held at fair value and reported with the host instrument in the consolidated balance sheet, with changes in fair value reported in earnings. If we have elected the fair value option, the embedded derivative is not bifurcated, and the entire investment is held at fair value with changes in fair value reported in earnings.

For those relationships where we seek hedge accounting, we formally document all relationships between hedging instruments and hedged items, as well as our risk-management objectives and strategies for undertaking various hedge transactions. This process includes linking derivatives and nonderivatives that are designated as hedges to specific assets or liabilities on the balance sheet. We also assess, both at inception and on an ongoing basis, whether the derivatives and nonderivatives used in hedging activities are highly effective in offsetting changes in fair values or cash flows of the hedged items. The assessment of hedge effectiveness determines the accounting treatment of noncash changes in fair value.

Changes in the fair value of any of our derivatives that are designated and qualify as cash flow hedges are recorded in other comprehensive income as long as they are deemed effective. Any hedge ineffectiveness is recorded immediately in current period earnings within derivative and other gains (losses). Periodic derivative net coupon settlements are recorded in the line item of the consolidated statements of earnings in which the cash flows of the hedged item are recorded.

Changes in the estimated fair value of derivative instruments that are designated and qualify as fair value hedges, including amounts measured as ineffectiveness, and changes in the estimated fair value of the hedged item related to the designated risk being hedged, are reported in current earnings within derivative and other gains (losses).

We have designated the majority of the Parent Company's yen-denominated liabilities (Samurai and Uridashi notes and yen-denominated loans) as nonderivative hedges and designated derivatives as hedges of the foreign currency exposure to our investment in Aflac Japan. At the beginning of each quarter, we make our net investment hedge designation. If the total of the designated Parent Company non-derivative and derivatives notional is equal to or less than our net investment in Aflac Japan, the hedge is deemed to be effective, and the exchange effect on the yen-denominated liabilities and the change in estimated fair value of the derivatives are reported in the unrealized foreign currency component of other comprehensive income. Should these designated net investment hedge positions exceed our net investment in Aflac Japan, the foreign exchange effect on the portion that exceeds our investment in Aflac Japan would be recognized in current earnings within derivative and other gains (losses).

Derivatives that are not designated as hedges are carried at fair value with all changes in fair value recorded in current period earnings within derivative and other gains (losses). We include the fair value of all freestanding derivatives in either other assets or other liabilities on the balance sheet.

We receive and pledge cash or other securities as collateral on open derivative positions. Cash received as collateral is reported as an asset with a corresponding liability for the return of the collateral. Cash pledged as collateral is recorded as a reduction to cash, and a corresponding receivable is recognized for the return of the cash collateral. We generally can repledge or resell collateral obtained by us, although we do not typically exercise such rights. Securities received as collateral are not recognized unless we were to exercise our right to sell that collateral or exercise remedies on that

collateral upon a counterparty default. Securities that we have pledged as collateral continue to be carried as investment assets on our balance sheet.

**Deferred Policy Acquisition Costs:** Certain direct and incremental costs of acquiring new business are deferred and amortized with interest over the premium payment periods in proportion to the ratio of annual premium income to total anticipated premium income. Anticipated premium income is estimated by using the same mortality, persistency and interest assumptions used in computing liabilities for future policy benefits. In this manner, the related acquisition expenses are matched with revenues. Deferred costs include the excess of current-year commissions over ultimate renewal-year commissions and certain incremental direct policy issue, underwriting and sales expenses. All of these incremental costs are directly related to successful policy acquisition.

For some products, policyholders can elect to modify product benefits, features, rights or coverages by exchanging a contract for a new contract or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. These transactions are known as internal replacements. For internal replacement transactions where the resulting contract is substantially unchanged, the policy is accounted for as a continuation of the replaced contract. Unamortized deferred acquisition costs from the original policy continue to be amortized over the expected life of the new policy, and the costs of replacing the policy are accounted for as policy maintenance costs and expensed as incurred. Internal replacement transactions that result in a policy that is not substantially unchanged are accounted for as an extinguishment of the original policy and the issuance of a new policy. Unamortized deferred acquisition costs on the original policy that was replaced are immediately expensed, and the costs of acquiring the new policy are capitalized and amortized in accordance with our accounting policies for deferred acquisition costs.

We measure the recoverability of DAC and the adequacy of our policy reserves annually by performing gross premium valuations on our business. Our testing indicates that our DAC is recoverable and our policy liabilities are adequate. (See the following discussion for further information regarding policy liabilities.)

**Policy Liabilities:** Future policy benefits represent claims that are expected to occur in the future and are computed by a net level premium method using estimated future investment yields, persistency and recognized morbidity and mortality tables modified to reflect our experience, including a provision for adverse deviation. These assumptions are generally established at the time a policy is issued.

Unpaid policy claims are estimates computed on an undiscounted basis using statistical analyses of historical claims experience adjusted for current trends and changed conditions. The ultimate liability may vary significantly from such estimates. We regularly adjust these estimates as new claims experience emerges and reflect the changes in operating results in the year such adjustments are made.

Other policy liabilities consist primarily of discounted advance premiums on deposit from policyholders in conjunction with their purchase of certain Aflac Japan limited-pay insurance products. These advanced premiums are deferred upon collection and recognized as premium revenue over the contractual premium payment period.

For internal replacements that are determined to not be substantially unchanged, policy liabilities related to the original policy that was replaced are immediately released, and policy liabilities are established for the new insurance contract.

**Reinsurance:** We enter into reinsurance agreements with other companies in the normal course of business. For each of our reinsurance agreements, we determine if the agreement provides indemnification against loss or liability relating to insurance risk in accordance with applicable accounting standards. Reinsurance premiums and benefits paid or provided are accounted for on bases consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Premiums, benefits and DAC are reported net of insurance ceded. See Note 8 of the Notes to the Consolidated Financial Statements for additional information.

**Income Taxes:** Income tax provisions are generally based on pretax earnings reported for financial statement purposes, which differ from those amounts used in preparing our income tax returns. Deferred income taxes are recognized for temporary differences between the financial reporting basis and income tax basis of assets and liabilities, based on enacted tax laws and statutory tax rates applicable to the periods in which we expect the temporary differences to reverse. We record deferred tax assets for tax positions taken based on our assessment of whether the tax position is more likely than not to be sustained upon examination by taxing authorities. A valuation allowance is established for deferred tax assets when it is more likely than not that an amount will not be realized.

As discussed in the Translation of Foreign Currencies section above, Aflac Japan maintains certain dollar-denominated investments that, prior to October 1, 2013, did not have any foreign currency translation adjustments recognized in other comprehensive income. However, the deferred tax expense or benefit associated with foreign exchange gains or losses on these investments is recognized in other comprehensive income (loss) until the securities mature or are sold. Total income tax expense (benefit) related to items of other comprehensive income (loss) included a deferred tax expense of \$614 million in 2013 and \$492 million in 2012 for these dollar-denominated investments. Excluding these amounts from total taxes on other comprehensive income would result in an effective income tax rate on pretax other comprehensive income (loss) of 31% in 2013 and 32% in 2012.

**Policyholder Protection Corporation and State Guaranty Association Assessments:** In Japan, the government has required the insurance industry to contribute to a policyholder protection corporation. We recognize a charge for our estimated share of the industry's obligation once it is determinable. We review the estimated liability for policyholder protection corporation contributions on an annual basis and report any adjustments in Aflac Japan's expenses.

In the United States, each state has a guaranty association that supports insolvent insurers operating in those states. To date, our state guaranty association assessments have not been material.

**Treasury Stock:** Treasury stock is reflected as a reduction of shareholders' equity at cost. We use the weighted-average purchase cost to determine the cost of treasury stock that is reissued. We include any gains and losses in additional paid-in capital when treasury stock is reissued.

**Share-Based Compensation:** We measure compensation cost related to our share-based payment transactions at fair value on the grant date, and we recognize those costs in the financial statements over the vesting period during which the employee provides service in exchange for the award.

**Earnings Per Share:** We compute basic earnings per share (EPS) by dividing net earnings by the weighted-average number of unrestricted shares outstanding for the period. Diluted EPS is computed by dividing net earnings by the weighted-average number of shares outstanding for the period plus the shares representing the dilutive effect of share-based awards.

**Reclassifications:** Certain reclassifications have been made to prior-year amounts to conform to current-year reporting classifications. Components of our deferred inventory were reclassified to separately reflect deferred foreign currency gains and losses which were previously apportioned to each component of the deferred inventory, see Note 10 of the Notes to the Consolidated Financial Statements. These reclassifications had no impact on net earnings or total shareholders' equity.

## **New Accounting Pronouncements**

### *Recently Adopted Accounting Pronouncements*

**Presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists:** In July 2013, the FASB issued guidance to amend the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The new guidance essentially states that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. However, to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This accounting standard applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. This guidance is effective for annual reporting periods beginning on or after December 15, 2013, and interim periods within those annual periods and requires prospective presentation for all comparative periods presented. We adopted this guidance as of January 1, 2014. The adoption of this guidance did not have a significant impact on our financial statements.

**Derivatives and hedging:** In July 2013, the FASB issued an update which allows entities to use the Federal Funds Effective Swap Rate, also referred to as the Overnight Index Swap Rate (OIS), as a benchmark interest rate for hedge accounting purposes. Previously the only acceptable benchmark rates for hedge accounting purposes under GAAP were

U.S. Treasury rates and the London Interbank Offered Rate (LIBOR) swap rate. This update reflects the evolution of market hedging practices and is intended to provide more flexibility for hedge accounting purposes. We adopted this guidance in the third quarter of 2013 on a prospective basis for qualifying new or redesignated hedging relationships entered into on or after the effective date of July 17, 2013. The adoption of the guidance had no impact on our financial position or results of operations.

**Reporting of amounts reclassified out of accumulated other comprehensive income:** In February 2013, the FASB issued guidance that requires reclassification adjustments for items that are reclassified out of accumulated other comprehensive income to net income to be presented in statements where the components of net income and the components of other comprehensive income are presented or in the footnotes to the financial statements. Additionally, the amendment requires cross-referencing to other disclosures currently required for other reclassification items. We adopted this guidance as of January 1, 2013. The adoption of this guidance impacted our financial statement disclosures, but it did not have an impact on our financial position or results of operations.

**Disclosures about offsetting assets and liabilities:** In December 2011, the FASB issued guidance to amend the disclosure requirements about offsetting assets and liabilities. The new guidance essentially clarifies the FASB's intent concerning the application of existing offsetting disclosure requirements. Entities are required to disclose gross and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions when those activities are subject to an agreement similar to a master netting arrangement. The scope of this guidance was clarified and revised in January 2013 to apply to derivatives, repurchase agreements, reverse repurchase agreements, securities borrowing and securities lending arrangements. The objective of this disclosure is to move toward consistency between U.S. GAAP and International Financial Reporting Standards (IFRS). We adopted this guidance as of January 1, 2013. The adoption of this guidance impacted our financial statement disclosures, but it did not have an impact on our financial position or results of operations.

**Fees paid to the federal government by health insurers:** In July 2011, the FASB issued guidance on the accounting for fees owed by health insurers as mandated by the Patient Protection and Affordable Care Act as amended by the Health Care and Education Reconciliation Act (the Acts). The Acts impose an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. A health insurer's portion of the annual fee is payable by September 30 of the applicable calendar year once the entity provides health insurance for any U.S. health risk in that year. The annual fee for the health insurance industry will be allocated to individual health insurers based on the ratio of the amount of an entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. The accounting guidance specifies that the liability for the fee should be estimated and recorded in full in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. This guidance is effective for calendar years beginning after December 31, 2013. We adopted this guidance as of January 1, 2014. The adoption of this guidance did not have a significant impact on our financial position or results of operations.

**Presentation of comprehensive income:** In June 2011, the FASB issued guidance to amend the presentation of comprehensive income. The amendment requires that all non-owner changes in shareholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We adopted this guidance as of January 1, 2012 and elected the option to report comprehensive income in two separate but consecutive statements. The adoption of this guidance did not have an impact on our financial position or results of operations.

**Fair value measurements and disclosures:** In May 2011, the FASB issued guidance to amend the fair value measurement and disclosure requirements. Most of the amendments are clarifications of the FASB's intent about the application of existing fair value measurement and disclosure requirements. Other amendments change a particular principle or requirement for measuring fair value or disclosing information about fair value measurements. The new fair value measurement disclosures include additional quantitative and qualitative disclosures for Level 3 measurements, including a qualitative sensitivity analysis of fair value to changes in unobservable inputs, and categorization by fair value hierarchy level for items for which the fair value is only disclosed. We adopted this guidance as of January 1, 2012. The adoption of this guidance impacted our financial statement disclosures, but it did not affect our financial position or results of operations.

**Accounting for costs associated with acquiring or renewing insurance contracts:** In October 2010, the FASB issued amended accounting guidance on accounting for costs associated with acquiring or renewing insurance contracts. Under the previous guidance, costs that varied with and were primarily related to the acquisition of a policy were deferrable. Under the amended guidance, only incremental direct costs associated with the successful acquisition of a

new or renewal contract may be capitalized, and direct-response advertising costs may be capitalized only if they meet certain criteria. This guidance is effective on a prospective or retrospective basis for interim and annual periods beginning after December 15, 2011. We retrospectively adopted this guidance as of January 1, 2012. The retrospective adoption of this accounting standard resulted in an after-tax cumulative reduction to retained earnings of \$391 million and an after-tax cumulative reduction to unrealized foreign currency translation gains in accumulated other comprehensive income of \$67 million, resulting in a total reduction to shareholders' equity of \$458 million as of December 31, 2009, the opening balance sheet date in the period of adoption. The adoption of this accounting standard had an immaterial impact on net income in 2011 and all preceding years.

#### Accounting Pronouncements Pending Adoption

**Derivatives and Hedging - Determining whether the host contract in a hybrid financial instrument issued in the form of a share is more akin to debt or equity:** In November 2014, the FASB issued guidance to clarify how to evaluate the economic characteristics and risks of a host contract in a hybrid financial instrument that is issued in the form of a share. The guidance also clarifies that an entity should assess the substance of the relevant terms and features when considering how to weight those terms and features. The guidance is effective for annual periods and interim periods beginning after December 15, 2015. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

**Presentation of Financial Statements - Going Concern - Disclosure of uncertainties about an entity's ability to continue as a going concern:** In August 2014, the FASB issued this amendment that provides U.S. GAAP guidance on management's responsibility in evaluating whether there is substantial doubt about a company's ability to continue as a going concern and about related footnote disclosures. For each reporting period, management will be required to evaluate whether there are conditions or events that raise substantial doubt about a company's ability to continue as a going concern within one year from the date the financial statements are issued. The amendment is effective for annual periods ending after December 15, 2016, and interim periods within annual periods beginning after December 15, 2016. Early application is permitted for annual or interim reporting periods for which the financial statements have not previously been issued. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

**Receivables - Troubled debt restructurings by creditors - classification of certain government-guaranteed mortgage loans upon foreclosure:** In August 2014, the FASB issued updated guidance for troubled debt restructurings affecting creditors that hold government-guaranteed mortgage loans, including those guaranteed by the FHA and the VA. The guidance requires that a mortgage loan be derecognized and a separate other receivable be recognized upon foreclosure if certain conditions are met. The new guidance is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2014. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

**Compensation - Stock Compensation - Accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period:** In June 2014, the FASB issued this amendment that provides guidance on certain share-based payment awards that require a specific performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance to awards with performance conditions that affect vesting to account for such awards. The performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to vest and should be adjusted to reflect those awards that ultimately vest. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. The guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Early adoption is permitted. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

**Transfers and Servicing, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures:** In June 2014, the FASB issued updated guidance for repurchase agreement and security lending transactions to change the accounting for repurchase-to-maturity transactions and linked repurchase financings to be accounted for as secured borrowings, consistent with the accounting for other repurchase agreements. The amendments also require new disclosures to increase transparency about the types of collateral pledged in repurchase agreements and similar transactions accounted for as secured borrowings. The new guidance is effective for annual periods and interim periods

within those annual periods, beginning after December 15, 2014. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

**Revenue from contracts with customers:** In May 2014, the FASB issued updated guidance that affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (e.g., insurance contracts or lease contracts). The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendments are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

**Receivables - Troubled debt restructurings by creditors - Reclassification of residential real estate collateralized consumer mortgage loans upon foreclosure:** In January 2014, the FASB issued updated guidance for troubled debt restructurings clarifying when an in substance repossession or foreclosure occurs, and when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. The new guidance is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2014. The adoption of this guidance will not have a significant impact on our financial position or results of operations.

Recent accounting guidance not discussed above is not applicable, did not have, or is not expected to have a material impact to our business.

## 2. BUSINESS SEGMENT AND FOREIGN INFORMATION

The Company consists of two reportable insurance business segments: Aflac Japan and Aflac U.S., both of which sell supplemental health and life insurance. Operating business segments that are not individually reportable and business activities not included in Aflac Japan or Aflac U.S. are included in the "Other business segments" category.

We do not allocate corporate overhead expenses to business segments. We evaluate and manage our business segments using a financial performance measure called pretax operating earnings. Our definition of operating earnings includes interest cash flows associated with notes payable and excludes the following items from net earnings on an after-tax basis: realized investment gains/losses (securities transactions, impairments, and the impact of derivative and hedging activities), nonrecurring items and other non-operating income (loss). We then exclude income taxes related to operations to arrive at pretax operating earnings. Information regarding operations by segment for the years ended December 31 follows:

(In millions)	2014	2013	2012
<b>Revenues:</b>			
Aflac Japan:			
Net earned premiums:

Assets as of December 31 were as follows:

(In millions)	2014	2013	2012
<b>Assets:</b>			
Aflac Japan	\$ 98,525	\$ 102,973	\$ 113,678
Aflac U.S.	18,383	16,112	16,122
Other business segments	128	155	154
Total business segment assets	117,036	119,240	129,954
Corporate	24,636	19,909	20,318
Intercompany eliminations	(21,905)	(17,842)	(19,178)
Total assets	\$ 119,767	\$ 121,307	\$ 131,094

**Yen-Translation Effects:** The following table shows the yen/dollar exchange rates used for or during the periods ended December 31. Exchange effects were calculated using the same yen/dollar exchange rate for the current year as for each respective prior year.

	2014	2013	2012
<b>Statements of Earnings:</b>			
Weighted-average yen/dollar exchange rate	105.46	97.54	79.81
Yen percent strengthening (weakening)	(7.5)%	(18.2)%	(.1)%
Exchange effect on pretax operating earnings (in millions)	\$ (180)	\$ (534)	\$ 11

	2014	2013
<b>Balance Sheets:</b>		
Yen/dollar exchange rate at December 31	120.55	105.39
Yen percent strengthening (weakening)	(12.6)%	(17.8)%
Exchange effect on total assets (in millions)	\$ (10,706)	\$ (17,836)
Exchange effect on total liabilities (in millions)	(12,025)	(19,806)

**Transfers of funds from Aflac Japan:** Aflac Japan makes payments to the Parent Company for management fees and to Aflac U.S. for allocated expenses and profit repatriations. Information on transfers for each of the years ended December 31 is shown below. See Note 13 for information concerning restrictions on transfers from Aflac Japan.

(In millions)	2014	2013	2012
Management fees	\$ 39	\$ 37	\$ 30
Allocated expenses	71	74	58
Profit repatriation	1,704	771	422
Total transfers from Aflac Japan	\$ 1,814	\$ 882	\$ 510

**Property and Equipment:** The costs of buildings, furniture and equipment are depreciated principally on a straight-line basis over their estimated useful lives (maximum of 50 years for buildings and 20 years for furniture and equipment). Expenditures for maintenance and repairs are expensed as incurred; expenditures for betterments are capitalized and depreciated. Classes of property and equipment as of December 31 were as follows:

(In millions)	2014	2013
<b>Property and equipment:</b>		
Land	\$ 168	\$ 168
Buildings	393	444
Equipment and furniture	305	329
Total property and equipment	866	941
Less accumulated depreciation	437	460
Net property and equipment	\$ 429	\$ 481

**Receivables:** Receivables consist primarily of monthly insurance premiums due from individual policyholders or their employers for payroll deduction of premiums, net of an allowance for doubtful accounts. At December 31, 2014, \$386 million, or 45.8% of total receivables, were related to Aflac Japan's operations, compared with \$731 million, or 82.9%, at December 31, 2013.

### 3. INVESTMENTS

#### Net Investment Income

The components of net investment income for the years ended December 31 were as follows:

(In millions)	2014	2013	2012
Fixed-maturity securities	\$ 3,249	\$ 3,210	\$ 3,248
Perpetual securities	141	153	253
Equity securities and other	7	7	17
Short-term investments and cash equivalents	2	1	2
Gross investment income	3,399	3,371	3,520
Less investment expenses	80	78	47
Net investment income	\$ 3,319	\$ 3,293	\$ 3,473

## Investment Holdings

The amortized cost for our investments in debt and perpetual securities, the cost for equity securities and the fair values of these investments at December 31 are shown in the following tables.

(In millions)	2014			
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

The methods of determining the fair values of our investments in fixed-maturity securities, perpetual securities and equity securities are described in Note 5.

During 2014 , we reclassified three investments from the held-to-maturity portfolio to the available-for-sale portfolio as a result of the issuers being downgraded to below investment grade. At the time of the transfer, the securities had an aggregate amortized cost of \$424 million and an aggregate unrealized loss of \$54 million . During 2013 , we reclassified two investments from the held-to-maturity portfolio to the available-for-sale portfolio as a result of the issuer being downgraded to below investment grade. At the time of the transfer, the securities had an aggregate amortized cost of \$492 million and an aggregate unrealized loss of \$153 million . During 2012 , we reclassified seven investments from the held-to-maturity portfolio to the available-for-sale portfolio as a result of the issuers being downgraded to below investment grade. At the time of the transfer, the securities had an aggregate amortized cost of \$1.2 billion and an aggregate unrealized loss of \$290 million .

### Contractual and Economic Maturities

The contractual maturities of our investments in fixed maturities at December 31, 2014 , were as follows:

(In millions)	Aflac Japan		Aflac U.S.	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
<b>Available for sale:</b>				
Due in one year or less	\$ 369	\$ 390	\$ 65	\$ 69
Due after one year through five years	1,519	1,771	628	724
Due after five years through 10 years	10,351	10,979	1,472	1,561

Total fixed maturities held to maturity	\$ 34,242	\$ 38,497	\$ 0	\$ 0

At December 31, 2014 , the Parent Company had a portfolio of available-for-sale fixed-maturity securities totaling \$419 million at amortized cost and \$437 million at fair value, which is not included in the table above.

Expected maturities may differ from contractual maturities because some issuers have the right to call or prepay obligations with or without call or prepayment penalties.

The majority of our perpetual securities are subordinated to other debt obligations of the issuer, but rank higher than the issuer's equity securities. Perpetual securities have characteristics of both debt and equity investments, along with unique features that create economic maturity dates for the securities. Although perpetual securities have no contractual maturity date, they have stated interest coupons that were fixed at their issuance and subsequently change to a floating short-term interest rate after some period of time. The instruments are generally callable by the issuer at the time of changing from a fixed coupon rate to a new variable rate of interest, which is determined by the combination of some market index plus a fixed amount of basis points. The net effect is to create an expected economic maturity date for the instrument. The economic maturities of our investments in perpetual securities, which were all reported as available for sale at December 31, 2014, were as follows:

(In millions)	Aflac Japan		Aflac U.S.	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 306	\$ 300	\$ 5	\$ 5
Due after one year through five years	624	674	0	0
Due after 10 years	1,466	1,635	39	55
Total perpetual securities available for sale	\$ 2,396	\$ 2,609	\$ 44	\$ 60

### Investment Concentrations

Our investment process begins with an independent approach to underwriting each issuer's fundamental credit quality. We evaluate independently those factors which we believe could influence an issuer's ability to make payments under the contractual terms of our instruments. This includes a thorough analysis of a variety of items including the issuer's country of domicile (including political, legal, and financial considerations); the industry in which the issuer competes (with an analysis of industry structure, end-market dynamics, and regulation); company specific issues (such as management, assets, earnings, cash generation, and capital needs); and contractual provisions of the instrument (such as financial covenants and position in the capital structure). We further evaluate the investment considering broad business and portfolio management objectives, including asset/liability needs, portfolio diversification, and expected income.

Investment exposures that individually exceeded 10% of shareholders' equity as of December 31 were as follows:

(In millions)	Credit Rating	2014		Credit Rating	2013	
		Amortized Cost	Fair Value		Amortized Cost	Fair Value
Japan National Government <sup>(1)</sup>	A	\$37,021	\$41,878	AA	\$41,924	\$43,619

<sup>(1)</sup> JGBs or JGB-backed securities

### Banks and Financial Institutions

One of our largest investment sector concentrations as of December 31, 2014, was banks and financial institutions. Within the countries we approve for investment opportunities, we primarily invest in financial institutions that are strategically crucial to each approved country's economy. The bank and financial institution sector is a highly regulated industry and plays a strategic role in the global economy.

Our total investments in the bank and financial institution sector as of December 31 , including those classified as perpetual securities, were as follows:

	2014		2013	
	Total Investments in Banks and Financial Institutions Sector (in millions)	Percentage of Total Investment Portfolio	Total Investments in Banks and Financial Institutions Sector (in millions)	Percentage of Total Investment Portfolio
Fixed maturities:

#### Other-than-temporary Impairment

The fair values of our debt and perpetual security investments fluctuate based on changes in interest rates, foreign exchange, and credit spreads in the global financial markets. Fair values can also be heavily influenced by the values of the assets of the issuer and expected ultimate recovery values upon a default, bankruptcy or other financial restructuring. Credit spreads are most impacted by the general credit environment and global market liquidity. Interest rates are driven by numerous factors including, but not limited to, supply and demand, governmental monetary actions, expectations of inflation and economic growth. We believe that fluctuations in the fair values of our investment securities related to general changes in the level of credit spreads or interest rates have little bearing on underlying credit quality of the issuer, and whether our investment is ultimately recoverable. Generally, we consider such declines in fair values to be temporary even in situations where an investment remains in an unrealized loss position for a year or more.

However, in the course of our credit review process, we may determine that it is unlikely that we will recover our investment in an issuer due to factors specific to an individual issuer, as opposed to general changes in global credit spreads or interest rates. In this event, we consider such a decline in the investment's fair value, to the extent it is below the investment's cost or amortized cost, to be an other-than-temporary impairment of the investment and reduce the book value of the investment to its fair value.

In addition to the usual investment risk associated with a debt instrument, our perpetual security holdings are largely issued by banks that are integral to the financial markets of the sovereign country of the issuer. As a result of the issuer's position within the economy of the sovereign country, our perpetual securities may be subject to a higher risk of nationalization of their issuers in connection with capital injections from an issuer's sovereign government. We cannot be assured that such capital support will extend to all levels of an issuer's capital structure. In addition, certain governments or regulators may consider imposing interest and principal payment restrictions on issuers of hybrid securities to preserve cash and preserve the issuer's capital. Beyond the cash flow impact that additional deferrals would have on our portfolio, such deferrals could result in ratings downgrades of the affected securities, which in turn could result in a reduction of fair

value of the securities and increase our regulatory capital requirements. We consider these factors in our credit review process.

When determining our intention to sell a security prior to recovery of its fair value to amortized cost, we evaluate facts and circumstances such as, but not limited to, future cash flow needs, decisions to reposition our security portfolio, and risk profile of individual investment holdings. We perform ongoing analyses of our liquidity needs, which includes cash flow testing of our policy liabilities, debt maturities, projected dividend payments and other cash flow and liquidity needs. Our cash flow testing includes extensive duration analysis of our investment portfolio and policy liabilities. Based on our analyses, we have concluded that we have sufficient excess cash flows to meet our liquidity needs without selling any of our investments prior to their maturity.

The following table details our pretax other-than-temporary impairment losses by investment category that resulted from our impairment evaluation process for the years ended December 31 .

(In millions)	2014	2013	2012
Perpetual securities	\$ 0	\$ 70	\$ 243
Corporate bonds	31	102	345
Mortgage- and asset-backed securities	0	0	3
Sovereign and supranational	0	26	386
Equity securities	0	1	0
Total other-than-temporary impairment losses realized <sup>(1)</sup>	\$ 31	\$ 199	\$ 977

<sup>(1)</sup> Includes \$45 and \$597 for the years ended December 31, 2013 and 2012 , respectively, for credit-related impairments; \$26 and \$27 for the years ended December 31, 2013 and 2012 , respectively, for impairments due to severity and duration of decline in fair value; and \$31 , \$128 and \$353 for the years ended December 31, 2014 , 2013 and 2012 , respectively, from change in intent to sell securities

## Unrealized Investment Gains and Losses

Information regarding changes in unrealized gains and losses from investments for the years ended December 31 follows:

(In millions)	2014	2013	2012
Changes in unrealized gains (losses):			
Fixed maturities:			
Available for sale	\$ 5,629	\$ (2,281)	\$ 1,624
Transferred to held to maturity	(10)	(9)	(14)

#### Analysis of Securities in Unrealized Loss Positions

The unrealized losses on our investments have been primarily related to general market changes in interest rates, foreign exchange rates, and/or the levels of credit spreads rather than specific concerns with the issuer's ability to pay interest and repay principal.

For any significant declines in fair value, we perform a more focused review of the related issuers' credit profile. For corporate issuers, we evaluate their assets, business profile including industry dynamics and competitive positioning, financial statements and other available financial data. For non-corporate issuers, we analyze all sources of credit support, including issuer-specific factors. We utilize information available in the public domain and, for certain private placement issuers, from consultations with the issuers directly. We also consider ratings from Nationally Recognized Statistical Rating Organizations (NRSROs), as well as the specific characteristics of the security we own including seniority in the issuer's capital structure, covenant predictions, or other relevant features. From these reviews, we evaluate the issuers' continued ability to service our investment through payment of interest and principal.

The following table provides more information on our unrealized loss position as of December 31.

(In millions)	2014			2013		
	Investments in an Unrealized Loss Position	Gross Unrealized Losses	Gross Unrealized Losses that are Investment Grade	Investments in an Unrealized Loss Position	Gross Unrealized Losses	Gross Unrealized Losses that are Investment Grade
<b>Fixed Maturities:</b>						
Japan government and agencies	0%	0%	0%	25%	1%	100%
Public utilities	13	7	100	13	12	98
Sovereign and supranational	3	2	100	3	4	100
Banks/financial institutions	14	33	31	14	22	64
Other corporate	65	47	88	41	53	91
Total fixed maturities	95%	89%		96%	92%	
<b>Perpetual securities</b>	5	11	100	4	8	90
Total	100%	100%		100%	100%	

Assuming no credit-related factors, as investments near maturity, unrealized gains and losses are expected to diminish. Based on our credit analysis, we believe that the issuers of our investments in the sectors shown in the table above have the ability to service their obligations to us.

#### Perpetual Securities

The majority of our investments in Upper Tier II and Tier I perpetual securities are in highly-rated global financial institutions. Upper Tier II securities have more debt-like characteristics than Tier I securities and are senior to Tier I securities, preferred stock, and common equity of the issuer. Conversely, Tier I securities have more equity-like characteristics, but are senior to the common equity of the issuer, and they may also be senior to certain preferred shares; depending on the individual security; the issuer's capital structure and the regulatory jurisdiction of the issuer.

Details of our holdings of perpetual securities as of December 31 were as follows:

(In millions)	Perpetual Securities						
	Credit Rating	2014			2013		
Amortized Cost		Fair Value	Unrealized Gain (Loss)	Amortized Cost	Fair Value	Unrealized Gain (Loss)	
<b>Upper Tier II:</b>							
A	\$ 61	\$ 87	\$ 26	\$ 145	\$ 183	\$ 38	
BBB	1,330	1,333	3	1,563	1,532	(31)	
BB or lower	163	225	62	212	198	(14)	
Total Upper Tier II	1,554	1,645	91	1,920	1,913	(7)	
<b>Tier I:</b>							
BBB	519	556	37	746	706	(40)	
BB or lower	184	237	53	112	119	7	
Total Tier I	703	793	90	858	825	(33)	
<b>Other subordinated - non-banks:</b>							
BB or lower	183	231	48	209	209	0	
Total	\$ 2,440	\$ 2,669	\$ 229	\$ 2,987	\$ 2,947	\$ (40)	

Assuming no credit-related factors develop, as investments near maturity, the unrealized gains or losses are expected to diminish. Based on our credit analysis, we believe that the issuers of our investments in these sectors have the ability to service

their obligations to us.

## Variable Interest Entities (VIEs)

As a condition to our involvement or investment in a VIE, we enter into certain protective rights and covenants that preclude changes in the structure of the VIE that would alter the creditworthiness of our investment or our beneficial interest in the VIE.

Our involvement with all of the VIEs in which we have an interest is passive in nature, and we are not the arranger of these entities. We have not been involved in establishing these entities, except as it relates to our review and evaluation of the structure of these VIEs in the normal course of our investment decision-making process. Further, we are not, nor have we been, required to purchase any securities issued in the future by these VIEs.

Our ownership interest in the VIEs is limited to holding the obligations issued by them. All of the VIEs in which we invest are static with respect to funding and have no ongoing forms of funding after the initial funding date. We have no direct or contingent obligations to fund the limited activities of these VIEs, nor do we have any direct or indirect financial guarantees related to the limited activities of these VIEs. We have not provided any assistance or any other type of financing support to any of the VIEs we invest in, nor do we have any intention to do so in the future. The weighted-average lives of our notes are very similar to the underlying collateral held by these VIEs where applicable.

Our risk of loss related to our interests in any of our VIEs is limited to our investment in the debt securities issued by them.

### VIEs - Consolidated

The following table presents the amortized cost, fair value and balance sheet caption in which the assets and liabilities of consolidated VIEs are reported as of December 31.

#### Investments in Consolidated Variable Interest Entities

(In millions)	2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
<b>Assets:</b>				
Fixed maturities, available for sale	\$ 3,020	\$ 4,166	\$ 4,109	\$ 4,843
Perpetual securities, available for sale	405	429	463	468
Fixed maturities, held to maturity	83	84	237	236
Other assets	106	106	106	106
Total assets of consolidated VIEs	\$ 3,614	\$ 4,785	\$ 4,915	\$ 5,653
<b>Liabilities:</b>				
Other liabilities	\$ 318	\$ 318	\$ 207	\$ 207
Total liabilities of consolidated VIEs	\$ 318	\$ 318	\$ 207	\$ 207

We are substantively the only investor in the consolidated VIEs listed in the table above. As the sole investor in these VIEs, we have the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and are therefore considered to be the primary beneficiary of the VIEs that we consolidate. We also participate in substantially all of the variability created by these VIEs. The activities of these VIEs are limited to holding debt and perpetual securities and interest rate, foreign currency, and/or CDSs, as appropriate, and utilizing the cash flows from these securities to service our investment. Neither we nor any of our creditors are able to obtain the underlying collateral of the VIEs unless there is an event of default or other specified event. For those VIEs that contain a swap, we are not a direct counterparty to the swap contracts and have no control over them. Our loss exposure to these VIEs is limited to our original investment. Our consolidated VIEs do not rely on outside or ongoing sources of funding to support their activities beyond the underlying collateral and swap contracts, if applicable. With the exception of our investment in senior secured bank loans through unit trust structures, the underlying collateral assets and funding of our consolidated VIEs are generally static in nature and the underlying collateral and the reference corporate entities covered by any CDS contracts were all investment grade at the time of issuance.

We are exposed to credit losses within any consolidated CDOs that could result in principal losses to our investments. We have mitigated our risk of credit loss through the structure of the VIE, which contractually requires the subordinated

tranches within these VIEs to absorb the majority of the expected losses from the underlying credit default swaps. We currently own only senior mezzanine CDO tranches. Based on our statistical analysis models and the current subordination levels in our CDOs, each of these VIEs can sustain a reasonable number of defaults in the underlying reference entities in the CDSs with no loss to our investment.

### VIEs - Not Consolidated

The table below reflects the amortized cost, fair value and balance sheet caption in which our investment in VIEs not consolidated are reported as of December 31.

#### Investments in Variable Interest Entities Not Consolidated

(In millions)	2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
<b>Assets:</b>				
Fixed maturities, available for sale	\$ 6,104	\$ 6,937	\$ 6,724	\$ 6,916
Perpetual securities, available for sale	324	330	370	378
Fixed maturities, held to maturity	2,564	2,829	2,949	3,039
Total investments in VIEs not consolidated	\$ 8,992	\$ 10,096	\$ 10,043	\$ 10,333

The VIEs that we are not required to consolidate are investments that are in the form of debt obligations from the VIEs that are irrevocably and unconditionally guaranteed by their corporate parents or sponsors. These VIEs are the primary financing vehicles used by their corporate sponsors to raise financing in the international capital markets. The variable interests created by these VIEs are principally or solely a result of the debt instruments issued by them. We do not have the power to direct the activities that most significantly impact the entity's economic performance, nor do we have (1) the obligation to absorb losses of the entity or (2) the right to receive benefits from the entity. As such, we are not the primary beneficiary of these VIEs and are therefore not required to consolidate them. These VIE investments comprise securities from 191 separate issuers with an average credit rating of BBB .

### Securities Lending and Pledged Securities

We lend fixed-maturity securities to financial institutions in short-term security-lending transactions. These short-term security-lending arrangements increase investment income with minimal risk. Our security lending policy requires that the fair value of the securities and/or unrestricted cash received as collateral be 102% or more of the fair value of the loaned securities. The following table presents our security loans outstanding and the corresponding collateral held as of December 31:

(In millions)	2014	2013
Security loans outstanding, fair value	\$ 2,149	\$ 5,656
Cash collateral on loaned securities	2,193	5,820

Certain fixed-maturity securities have been pledged as collateral as part of derivative transactions. For additional information regarding pledged securities related to derivative transactions, see Note 4.

At December 31, 2014 , debt securities with a fair value of \$13 million were on deposit with regulatory authorities in the United States (including U.S. territories) and Japan. We retain ownership of all securities on deposit and receive the related investment income.

For general information regarding our investment accounting policies, see Note 1.

## 4. DERIVATIVE INSTRUMENTS

Our freestanding derivative financial instruments consist of: (1) foreign currency swaps, credit default swaps, and interest rate swaps that are associated with investments in special-purpose entities, including VIEs where we are the primary beneficiary; (2) foreign currency forwards and options used in hedging foreign exchange risk on U.S. dollar-denominated securities in Aflac Japan's portfolio; (3) foreign currency forwards and options used to hedge certain portions of forecasted cash flows denominated in yen; (4) swaps associated with our notes payable, consisting of an interest rate swap for our variable interest rate yen-denominated debt and cross-currency interest rate swaps, also referred to as foreign currency swaps, associated with certain senior notes and our subordinated debentures; and (5) options on interest rate swaps (or interest rate swaptions) and futures used to hedge interest rate risk for certain available-for-sale securities. We do not use derivative financial instruments for trading purposes, nor do we engage in leveraged derivative transactions. Some of our derivatives are designated as cash flow hedges, fair value hedges or net investment hedges; however, other derivatives do not qualify for hedge accounting. We utilize a net investment hedge to mitigate foreign exchange exposure resulting from our net investment in Aflac Japan. In addition to designating derivatives as hedging instruments, we have designated the majority of our yen-denominated Samurai and Uridashi notes and yen-denominated loans as nonderivative hedging instruments for this net investment hedge.

### Derivative Types

We enter into foreign currency swaps pursuant to which we exchange an initial principal amount in one currency for an initial principal amount of another currency, with an agreement to re-exchange the currencies at a future date at an agreed upon exchange rate. There may also be periodic exchanges of payments at specified intervals based on the agreed upon rates and notional amounts. Foreign currency swaps are used primarily in the consolidated VIEs in our Aflac Japan portfolio to convert foreign-denominated cash flows to yen, the functional currency of Aflac Japan, in order to minimize cash flow fluctuations. We also use foreign currency swaps to economically convert certain of our dollar-denominated senior note and subordinated debenture principal and interest obligations into yen-denominated obligations.

Foreign currency forwards and options with short-term maturities are executed for the Aflac Japan segment in order to hedge the currency risk on the fair value of certain fixed-maturity dollar-denominated securities. In forward transactions, Aflac Japan agrees with another party to buy a fixed amount of yen and sell a corresponding amount of U.S. dollars at a specified future date. Aflac Japan also executes foreign currency option transactions in a collar strategy, where Aflac Japan agrees with another party to simultaneously purchase a fixed amount of U.S. dollar put options and sell U.S. dollar call options. The combination of these two actions results in no net premium being paid (i.e. a costless or zero-cost collar). The foreign currency forwards and options are used in fair value hedging relationships to mitigate the foreign exchange risk associated with dollar-denominated investments supporting yen-denominated liabilities.

Foreign currency forwards and options are also used to hedge the currency risk associated with the net investment in Aflac Japan. In these forward transactions, Aflac agrees with another party to buy a fixed amount of U.S. dollars and sell a corresponding amount of yen at a specified future date. In the option transactions, we use a combination of foreign currency options to protect expected future cash flows by simultaneously purchasing yen put options (options that protect against a weakening yen) and selling yen call options (options that limit participation in a strengthening yen). The combination of these two actions results in no net premium being paid (i.e. a costless or zero-cost collar). Aflac also enters into foreign currency options that give it the right, but not the obligation, to sell yen and buy U.S. dollars at specified future dates at contracted prices.

Our CDSs are used to assume credit risk related to an individual security or an index. The only CDS derivatives that we have entered into relate to components of certain of our investments in VIEs. These CDS contracts entitle the consolidated VIE to receive periodic fees in exchange for an obligation to compensate the derivative counterparties should the reference security issuers experience a credit event, as defined in the contract.

Interest rate swaps involve the periodic exchange of cash flows with other parties, at specified intervals, calculated using agreed upon rates or other financial variables and notional principal amounts. Typically, at the time a swap is entered into, the cash flow streams exchanged by the counterparties are equal in value. No cash or principal payments are exchanged at the inception of the contract. Interest rate swaps are primarily used to convert interest receipts on floating-rate fixed-maturity securities contracts to fixed rates. These derivatives are predominantly used to better match cash receipts from assets with cash disbursements required to fund liabilities.

Interest rate swaptions are options on interest rate swaps. Interest rate collars are combinations of two swaption positions and are executed in order to hedge certain dollar-denominated available-for-sale securities that are held in the Aflac Japan segment. We use collars to protect against significant changes in the fair value associated with interest rate

changes of our dollar-denominated available-for-sale securities. In order to maximize the efficiency of the collars while minimizing cost, we set the strike price on each collar so that the premium paid for the 'payer leg' is offset by the premium received for having sold the 'receiver leg'.

Periodically, depending on general economic conditions, we may enter into other derivative transactions.

### Credit Risk Assumed through Derivatives

For the interest rate, foreign currency, and credit default swaps associated with our VIE investments for which we are the primary beneficiary, we bear the risk of foreign exchange or interest rate loss due to counterparty default even though we are not a direct counterparty to those contracts. We are a direct counterparty to the interest rate and foreign currency swaps that we have entered into in connection with certain of our senior notes, subordinated debentures, and Samurai notes; foreign currency forwards; foreign currency options; and interest rate swaptions, and therefore we are exposed to credit risk in the event of nonperformance by the counterparties in those contracts. The risk of counterparty default for our VIE swaps, foreign currency swaps, certain foreign currency forwards, foreign currency options and interest rate swaptions is mitigated by collateral posting requirements the counterparties to those transactions must meet. As of December 31, 2014, there were 16 counterparties to our derivative agreements, with five comprising 80% of the aggregate notional amount. The counterparties to these derivatives are financial institutions with the following credit ratings as of December 31:

(In millions)	2014			2013		
	Notional Amount of Derivatives	Asset Derivatives Fair Value	Liability Derivatives Fair Value	Notional Amount of Derivatives	Asset Derivatives Fair Value	Liability Derivatives Fair Value
Counterparties' credit rating:						
AA	\$ 1,098	\$ 39	\$ (36)	\$ 161	\$ 1	\$ (7)
A	22,564	763	(2,387)	22,314	487	(830)
Total	\$ 23,662	\$ 802	\$ (2,423)	\$ 22,475	\$ 488	\$ (837)

We engage in derivative transactions directly with unaffiliated third parties under International Swaps and Derivative Association, Inc. (ISDA) agreements and other documentation. Most of the ISDA agreements also include Credit Support Annex (CSA) provisions, which generally provide for two-way collateral postings, in certain cases at the first dollar of exposure and in other cases once various rating and exposure threshold levels are triggered. We mitigate the risk that counterparties to transactions might be unable to fulfill their contractual obligations by monitoring counterparty credit exposure and collateral value while generally requiring that collateral be posted at the outset of the transaction or that additional collateral be posted upon the occurrence of certain events or circumstances. In addition, a significant portion of the derivative transactions have provisions that require collateral to be posted upon a downgrade of our long-term debt ratings or give the counterparty the right to terminate the transaction upon a downgrade of Aflac's financial strength rating. The actual amount of collateral required to be posted to counterparties in the event of such downgrades, or the aggregate amount of payments that we could be required to make, depends on market conditions, the fair value of outstanding affected transactions, and other factors prevailing at and after the time of the downgrade.

Collateral posted by us to third parties for derivative transactions was \$1.6 billion at December 31, 2014, which consisted entirely of pledged securities, compared with \$8 million at December 31, 2013, which consisted of \$7 million of pledged securities and \$1 million of cash. This collateral can generally be repledged or resold by the counterparties. The aggregate fair value of all derivative instruments with credit-risk related contingent features that were in a net liability position by counterparty was \$2.1 billion and \$18 million as of December 31, 2014 and 2013, respectively. If the credit-risk-related contingent features underlying these agreements had been triggered on December 31, 2014, we estimate that we would be required to post a maximum of \$482 million of additional collateral to these derivative counterparties. Collateral obtained by us from third parties for derivative transactions was \$619 million and \$295 million at December 31, 2014 and 2013, respectively. We generally can repledge or resell collateral obtained by us, although we do not typically exercise such rights.

Certain of our consolidated VIEs have credit default swap contracts that require them to assume credit risk from an asset pool. Those consolidated VIEs will receive periodic payments based on an agreed upon rate and notional amount and will only make a payment by delivery of associated collateral, which consists of highly rated asset-backed securities, if there is a credit event. A credit event payment will typically be equal to the notional value of the swap contract less the value of the referenced obligations. A credit event is generally defined as a default on contractually obligated interest or

principal payments or bankruptcy of the referenced entity. The diversified portfolios of corporate issuers are established within sector concentration limits.

The following tables present the maximum potential risk, fair value, weighted-average years to maturity, and underlying referenced credit obligation type for credit default swaps within consolidated VIE structures as of December 31.

2014

## Accounting for Derivative Financial Instruments

Freestanding derivatives are carried in our consolidated balance sheets either as assets within other assets or as liabilities within other liabilities at estimated fair value. See Note 5 for a discussion on how we determine the fair value of our derivatives. Accruals on derivatives are recorded in accrued investment income or within other liabilities in the consolidated balance sheets.

If a derivative is not designated as an accounting hedge or its use in managing risk does not qualify for hedge accounting, changes in the estimated fair value of the derivative are generally reported within derivative and other gains(losses), which is a component of realized investment gains (losses). The fluctuations in estimated fair value of derivatives that have not been designated for hedge accounting can result in volatility in net earnings.

### *Hedge Documentation and Effectiveness Testing*

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. At the inception of the hedging relationship, we formally document all relationships between hedging instruments and hedged items, as well as our risk-management objective and strategy for undertaking each hedge transaction. We document the designation of each hedge as either (i) a hedge of the variability of cash flows to be received or paid related to a recognized asset or liability or the hedge of a forecasted transaction ("cash flow hedge"); (ii) a hedge of the estimated fair value of a recognized asset or liability ("fair value hedge"); or (iii) a hedge of a net investment in a foreign operation. The documentation process includes linking derivatives and nonderivatives that are designated as hedges to specific assets or groups of assets or liabilities on the statement of financial position or to specific forecasted transactions and defining the effectiveness and ineffectiveness testing methods to be used. At the hedge's inception and on an ongoing quarterly basis, we also formally assess whether the derivatives that are used in hedging transactions have been, and are expected to continue to be, highly effective in offsetting their designated risk. Hedge effectiveness is assessed using qualitative and quantitative methods.

For assessing hedge effectiveness of cash flow hedges, qualitative methods may include the comparison of critical terms of the derivative to the hedged item, and quantitative methods include regression or other statistical analysis of changes in cash flows associated with the hedge relationship. Hedge ineffectiveness of the hedge relationships is measured each reporting period using the "Hypothetical Derivative Method." For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a

component of other comprehensive income (loss) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing hedge ineffectiveness are recognized in current earnings within derivative and other gains (losses). All components of each derivative's gain or loss are included in the assessment of hedge effectiveness.

For assessing hedge effectiveness of fair value hedges, qualitative methods may include the comparison of critical terms of the derivative to the hedged item, and quantitative methods include regression or other statistical analysis of changes in cash flows associated with the hedge relationship. Hedge ineffectiveness of the hedge relationships is measured each reporting period using the dollar offset method. For derivative instruments that are designated and qualify as fair value hedges, changes in the estimated fair value of the derivative, including amounts measured as ineffectiveness, and changes in the estimated fair value of the hedged item related to the designated risk being hedged, are reported in current earnings within derivative and other gains (losses).

For the hedge of our net investment in Aflac Japan, we have designated Parent Company yen-denominated liabilities as non-derivative hedging instruments and have designated certain foreign currency forwards and options as derivative hedging instruments. We make our net investment hedge designation at the beginning of each quarter. For assessing hedge effectiveness of net investment hedges, if the total of the designated Parent Company non-derivative and derivatives notional is equal to or less than our net investment in Aflac Japan, the hedge is deemed to be effective. If the hedge is effective, the related exchange effect on the yen-denominated liabilities is reported in the unrealized foreign currency component of other comprehensive income. For derivatives designated as net investment hedges, Aflac follows the forward-rate method. According to that method, all changes in fair value, including changes related to the forward-rate component of foreign currency forward contracts and the time value of foreign currency options, are reported in the unrealized foreign currency component of other comprehensive income. Should these designated net investment hedge positions exceed our net investment in Aflac Japan, the foreign exchange effect on the portion that exceeds our investment in Aflac Japan would be recognized in current earnings within derivative and other gains (losses).

#### *Discontinuance of Hedge Accounting*

We discontinue hedge accounting prospectively when (1) it is determined that the derivative is no longer highly effective in offsetting changes in the estimated cash flows or fair value of a hedged item; (2) the derivative is de-designated as a hedging instrument; or (3) the derivative expires or is sold, terminated or exercised.

When hedge accounting is discontinued on a cash flow hedge or fair value hedge, the derivative is carried in the consolidated balance sheets at its estimated fair value, with changes in estimated fair value recognized in current period earnings. For discontinued cash flow hedges, including those where the derivative is sold, terminated or exercised, amounts previously deferred in other comprehensive income (loss) are reclassified into earnings when earnings are impacted by the cash flow of the hedged item.

#### **Derivative Balance Sheet Classification**

The tables below summarize the balance sheet classification of our derivative fair value amounts, as well as the gross asset and liability fair value amounts, at December 31. The fair value amounts presented do not include income accruals. The notional amount of derivative contracts represents the basis upon which pay or receive amounts are calculated. Notional amounts are not reflective of credit risk.

2014

### Cash Flow Hedges

Certain of our consolidated VIEs have foreign currency swaps that qualify for hedge accounting treatment. For those that have qualified, we have designated the derivative as a hedge of the variability in cash flows of a forecasted transaction or of amounts to be received or paid related to a recognized asset ("cash flow" hedge). We expect to continue this hedging activity for a weighted-average period of approximately 11 years. The remaining derivatives in our consolidated VIEs that have not qualified for hedge accounting have been designated as held for other investment purposes ("non-qualifying strategies").

We had an interest rate swap agreement related to 5.5 billion yen variable interest rate Samurai notes that we issued in July 2011 and redeemed in July 2014 (see Note 9). By entering into this contract, we swapped the variable interest rate to a fixed interest rate of 1.475%. We had designated this interest rate swap as a hedge of the variability in our interest cash flows associated with the variable interest rate Samurai notes.

### Fair Value Hedges

We designate and account for certain foreign currency forwards and options as fair value hedges when they meet the requirements for hedge accounting. These foreign currency forwards and options hedge the foreign currency exposure of certain dollar-denominated fixed maturity securities within the investment portfolio of our Aflac Japan segment. We recognize gains and losses on these derivatives and the related hedged items in current earnings within derivative and other gains (losses). The change in the fair value of the foreign currency forwards related to the changes in the difference between the spot rate and the forward price is excluded from the assessment of hedge effectiveness. The change in fair value of the foreign currency option related to the time value of the option is excluded from the assessment of hedge effectiveness.

We designate and account for interest rate swaptions as fair value hedges when they meet the requirements for hedge accounting. These interest rate swaptions hedge the interest rate exposure of certain dollar-denominated fixed maturity

securities within the investment portfolio of our Aflac Japan segment. We recognize gains and losses on these derivatives and the related hedged items in current earnings within derivative and other gains (losses). The change in the fair value of the interest rate swaptions related to the time value of the option is excluded from the assessment of hedge effectiveness.

The following table presents the gains and losses on derivatives and the related hedged items in fair value hedges for the years ended December 31.

#### Fair Value Hedging Relationships

(In millions)		Hedging Derivatives			Hedged Items	
Hedging Derivatives	Hedged Items	Gains (Losses)		Gains (Losses)		
		Total Gains (Losses)	Excluded from Effectiveness Testing	Included in Effectiveness Testing	Gains (Losses)	Ineffectiveness Recognized for Fair Value Hedge
<b>2014:</b>						
Foreign currency forwards	Fixed-maturity securities	\$ (1,835)	\$ (38)	\$ (1,797)	\$ 1,819	\$ 22
Foreign currency options	Fixed-maturity securities	(41)	(4)	(37)	38	1
Interest rate swaptions	Fixed-maturity securities	(318)	(36)	(282)	316	34
<b>2013:</b>						
Foreign currency forwards	Fixed-maturity securities	\$ (1,735)	\$ (25)	\$ (1,710)	\$ 1,700	\$ (10)
Interest rate swaptions	Fixed-maturity securities	17	17	0	0	0
<b>2012:</b>						
Foreign currency forwards	Fixed-maturity securities	\$ (535)	\$ (8)	\$ (527)	\$ 528	\$ 1

#### Net Investment Hedge

Our primary exposure to be hedged is our net investment in Aflac Japan, which is affected by changes in the yen/dollar exchange rate. To mitigate this exposure, we have designated a majority of the Parent Company's yen-denominated liabilities (Samurai and Uridashi notes and yen-denominated loans - see Note 9) as nonderivative hedges and designated foreign currency forwards and options as derivative hedges of the foreign currency exposure of our net investment in Aflac Japan.

We used foreign exchange forwards and options to economically hedge foreign exchange risk on 52.5 billion yen and 50.0 billion yen of repatriation received from Aflac Japan in July 2014 and December 2014, respectively. As of December 31, 2014, we had entered into foreign exchange forwards as part of an economic hedge on 157.5 billion yen of future profit repatriation.

Our net investment hedge was effective for the years ended December 31, 2014, 2013 and 2012.

#### Non-qualifying Strategies

For our derivative instruments in consolidated VIEs that do not qualify for hedge accounting treatment, all changes in their fair value are reported in current period earnings within derivative and other gains (losses). The amount of gain or loss recognized in earnings for our VIEs is attributable to the derivatives in those investment structures. While the change in value of the swaps is recorded through current period earnings, the change in value of the available-for-sale fixed income or perpetual securities associated with these swaps is recorded through other comprehensive income.

We have cross-currency interest rate swap agreements related to our \$750 million senior notes due November 2024, \$700 million senior notes due June 2023, \$400 million senior notes due February 2017, \$350 million senior notes due February 2022, and \$500 million subordinated debentures due September 2052. Changes in the values of these swaps are recorded through current period earnings. For additional information regarding these swaps, see Note 9.

## Impact of Derivatives and Hedging Instruments

The following table summarizes the impact to realized investment gains (losses) and other comprehensive income (loss) from all derivatives and hedging instruments for the years ended December 31.

(In millions)	2014		2013		2012	
	Realized Investment Gains (Losses)	Other Comprehensive Income (Loss) <sup>(1)</sup>	Realized Investment Gains (Losses)	Other Comprehensive Income (Loss) <sup>(1)</sup>	Realized Investment Gains (Losses)	Other Comprehensive Income (Loss) <sup>(1)</sup>

Foreign currency options	0	0	11	0	0	0
Credit default swaps	3	0	31	0	64	0
Interest rate swaps	(1)	0	(8)	0	(14)	0
Interest rate swaptions	1	0	(29)	0	0	0
Futures	(89)	0	(5)	0	0	0
<b>Total non-qualifying strategies</b>	<b>54</b>	<b>0</b>	<b>346</b>	<b>0</b>	<b>161</b>	<b>0</b>
<b>Total</b>	<b>\$ 31</b>	<b>\$ 108</b>	<b>\$ 326</b>	<b>\$ 69</b>	<b>\$ 151</b>	<b>\$ 74</b>

<sup>(1)</sup> Cash flow hedge items are recorded as unrealized gains (losses) on derivatives and net investment hedge items are recorded in the unrealized foreign currency translation gains (losses) line in the consolidated statement of comprehensive income (loss).

<sup>(2)</sup> Impact shown net of effect of hedged items (see Fair Value Hedges section of this Note 4 for further detail)

There was no gain or loss reclassified from accumulated other comprehensive income (loss) into earnings related to our designated cash flow hedges and net investment hedge for the years ended December 31, 2014, 2013 and 2012. As of December 31, 2014, deferred gains and losses on derivative instruments recorded in accumulated other comprehensive income that are expected to be reclassified to earnings during the next twelve months are immaterial.

## Offsetting of Financial Instruments and Derivatives

Certain of the Company's derivative instruments are subject to enforceable master netting arrangements that provide for the net settlement of all derivative contracts between the Company and a counterparty in the event of default or upon the occurrence of certain termination events. Collateral support agreements with certain of the master netting arrangements provide that the Company will receive or pledge financial collateral in the event either minimum thresholds, or in certain cases ratings levels, have been reached.

We have securities lending agreements with unaffiliated financial institutions that post collateral to us in return for the use of our fixed maturity securities (see Note 3). When we have entered into securities lending agreements with the same counterparty, the agreements generally provide for net settlement in the event of default by the counterparty. This right of set-off would allow us to keep and apply collateral received if the counterparty failed to return the securities borrowed from us as contractually agreed. For additional information on the Company's accounting policy for securities lending, see

The tables below summarize our derivatives and securities lending transactions as of December 31, and as reflected in the tables, in accordance with GAAP, our policy is to not offset these financial instruments in the Consolidated Balance Sheets.

### Offsetting of Financial Assets and Derivative Assets

## 5. FAIR VALUE MEASUREMENTS

### Fair Value Hierarchy

GAAP specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. These two types of inputs create three valuation hierarchy levels. Level 1 valuations reflect quoted market prices for identical assets or liabilities in active markets. Level 2 valuations reflect quoted market prices for similar assets or liabilities in an active market, quoted market prices for identical or similar assets or liabilities in non-active

markets or model-derived valuations in which all significant valuation inputs are observable in active markets. Level 3 valuations reflect valuations in which one or more of the significant inputs are not observable in an active market.

The following tables present the fair value hierarchy levels of the Company's assets and liabilities that are measured and carried at fair value on a recurring basis as of December 31.

	2014

### Fair Value of Financial Instruments

U.S. GAAP requires disclosure of the fair value of certain financial instruments including those that are not carried at fair value. The carrying amounts for cash and cash equivalents, other investments, receivables, accrued investment income, accounts payable, cash collateral and payables for security transactions approximated their fair values due to the short-term nature of these instruments. Liabilities for future policy benefits and unpaid policy claims are not financial instruments as defined by GAAP.

#### *Fixed maturities, perpetual securities, and equity securities*

We determine the fair values of our fixed maturity securities, perpetual securities, and privately issued equity securities using the following approaches or techniques: price quotes and valuations from third party pricing vendors (including quoted market prices readily available from public exchange markets) and non-binding price quotes we obtain from outside brokers.

A third party pricing vendor has developed valuation models to determine fair values of privately issued securities to reflect the impact of the persistent economic environment and the changing regulatory framework. These models are discounted cash flow (DCF) valuation models, but also use information from related markets, specifically the CDS market to estimate expected cash flows. These models take into consideration any unique characteristics of the securities and make various adjustments to arrive at an appropriate issuer-specific loss adjusted credit curve. This credit curve is then used with the relevant recovery rates to estimate expected cash flows and modeling of additional features, including illiquidity adjustments, if necessary, to price the security by discounting those loss adjusted cash flows. In cases where a credit curve cannot be developed from the specific security features, the valuation methodology takes into consideration other market observable inputs, including: 1) the most appropriate comparable security(ies) of the issuer; 2) issuer-specific CDS spreads; 3) bonds or CDS spreads of comparable issuers with similar characteristics such as rating, geography, or sector; or 4) bond indices that are comparative in rating, industry, maturity and region.

The pricing data and market quotes we obtain from outside sources, including third party pricing services, are reviewed internally for reasonableness. If a fair value appears unreasonable, we will re-examine the inputs and assess the reasonableness of the pricing data with the vendor. Additionally, we may compare the inputs to relevant market indices

and other performance measurements. The output of this analysis is presented to the Company's Valuation and Classifications Subcommittee, or VCS. Based on the analysis provided to the VCS, the valuation is confirmed or may be revised if there is evidence of a more appropriate estimate of fair value based on available market data. We have performed verification of the inputs and calculations in any valuation models to confirm that the valuations represent reasonable estimates of fair value.

The fixed maturities classified as Level 3 consist of securities for which there are limited or no observable valuation inputs. For Level 3 securities that are investment grade, we estimate the fair value of these securities by obtaining non-binding broker quotes from a limited number of brokers. These brokers base their quotes on a combination of their knowledge of the current pricing environment and market conditions. We consider these inputs to be unobservable. For Level 3 investments that are below-investment-grade securities, we consider a variety of significant valuation inputs in the valuation process, including forward exchange rates, yen swap rates, dollar swap rates, interest rate volatilities, credit spread data on specific issuers, assumed default and default recovery rates, and certain probability assumptions. In obtaining these valuation inputs, we have determined that certain pricing assumptions and data used by our pricing sources are difficult to validate or corroborate by the market and/or appear to be internally developed rather than observed in or corroborated by the market. The use of these unobservable valuation inputs causes more subjectivity in the valuation process for these securities.

Historically, we have not adjusted the quotes or prices we obtain from the pricing services and brokers we use.

The following tables present the pricing sources for the fair values of our fixed maturities, perpetual securities, and equity securities as of December 31.

The following is a discussion of the determination of fair value of our remaining financial instruments.

### *Derivatives*

We use derivative instruments to manage the risk associated with certain assets. However, the derivative instrument may not be classified in the same fair value hierarchy level as the associated asset. Inputs used to value derivatives include, but are not limited to, interest rates, credit spreads, foreign currency forward and spot rates, and interest volatility.

The fair values of the foreign currency forwards, options, and interest rate swaptions associated with certain fixed-maturity securities; the foreign currency forwards and options used to hedge certain portions of forecasted yen cash flows; the foreign currency swaps associated with certain senior notes and our subordinated debentures; and the interest rate swap associated with our yen-denominated notes are based on the amounts we would expect to receive or pay. The determination of the fair value of these derivatives is based on observable market inputs, therefore they are classified as Level 2.

For derivatives associated with VIEs where we are the primary beneficiary, we are not the direct counterparty to the swap contracts. As a result, the fair value measurements incorporate the credit risk of the collateral associated with the VIE. We receive valuations from a third party pricing vendor for these derivatives. Based on an analysis of these derivatives and a review of the methodology employed by the pricing vendor, we determined that due to the long duration of these swaps and the need to extrapolate from short-term observable data to derive and measure long-term inputs, certain inputs, assumptions and judgments are required to value future cash flows that cannot be corroborated by current inputs or current observable market data. As a result, the derivatives associated with our consolidated VIEs are classified as Level 3 of the fair value hierarchy.

### *Other policyholders' funds*

The largest component of the other policyholders' funds liability is our annuity line of business in Aflac Japan. Our annuities have fixed benefits and premiums. For this product, we estimated the fair value to be equal to the cash surrender value. This is analogous to the value paid to policyholders on the valuation date if they were to surrender their policy. We periodically check the cash value against discounted cash flow projections for reasonableness. We consider our inputs for this valuation to be unobservable and have accordingly classified this valuation as Level 3.

### *Notes payable*

The fair values of our publicly issued notes payable classified as Level 3 were obtained from a limited number of independent brokers. These brokers base their quotes on a combination of their knowledge of the current pricing environment and market conditions. We consider these inputs to be unobservable. The fair values of our yen-denominated loans approximate their carrying values.

### Level 3 Rollforward and Transfers between Hierarchy Levels

The following tables present the changes in fair value of our available-for-sale investments and derivatives classified as Level 3 as of December 31.

<sup>(2)</sup> Due to a lack of visibility to observe significant inputs to price

<sup>(3)</sup> A result of changing our pricing methodology to a valuation method that uses observable market data as significant inputs to estimate fair value

Transfers into and/or out of Level 3 are attributable to a change in the observability of inputs. The most significant transfer out of Level 3 into Level 2 during 2013 related to our callable reverse dual-currency bonds (RDCs). RDCs are securities that have principal denominated in yen while paying U.S. dollar (USD) coupons. The market standard approach is to use implied volatility to value options or instruments with optionality because historical volatility may not represent current market participants' expectations about future volatility. Under our previous valuation approach, we used historical foreign exchange volatility as an input for valuing these investments. Given the importance of this input to the overall valuation of these RDCs and the determination of this input to be unobservable, we made the decision at December 31, 2011 to move these holdings to Level 3 of the fair value hierarchy. During the first quarter of 2013, we implemented a new valuation methodology for these securities that relies on comparable securities in the market, the observable forward foreign exchange curve and other market inputs. Given that the significant inputs to the valuation of these items are now based on observable data, in the first quarter of 2013, we transferred these bonds from Level 3 to Level 2 of the fair value hierarchy.

In addition to the callable RDCs, we transferred certain other corporate securities from Level 3 to Level 2 in the first quarter of 2013. Prices for these securities were previously obtained from brokers and/or arrangers with minimal transparency around how the valuation was determined. Similar to the RDCs, these securities are now valued using the same methodology described above for our other privately issued securities.

There were no transfers between Level 1 and 2 for the years ended December 31, 2014 and 2013 .

## Fair Value Sensitivity

### Level 3 Significant Unobservable Input Sensitivity

The following tables summarize the significant unobservable inputs used in the valuation of our Level 3 available-for-sale investments and derivatives as of December 31. Included in the tables are the inputs or range of possible inputs that have an effect on the overall valuation of the financial instruments.

2014				
(In millions)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average)
<b>Assets:</b>				
<b>Securities available for sale, carried at fair value:</b>				
<b>Fixed maturities:</b>				
Mortgage- and asset-backed securities	\$ 223	Consensus pricing	Offered quotes	N/A <sup>(d)</sup>
Banks/financial institutions	26	Consensus pricing	Offered quotes	N/A <sup>(d)</sup>
<b>Perpetual securities:</b>				
Banks/financial institutions	149	Consensus pricing	Offered quotes	N/A <sup>(d)</sup>
<b>Equity securities</b>	<b>3</b>	Net asset value	Offered quotes	\$1 - \$677 (\$6)
<b>Other assets:</b>				
Foreign currency swaps	8	Discounted cash flow	Interest rates (USD)	2.28% - 2.70% <sup>(a)</sup>
			Interest rates (JPY)	.53% - 1.34% <sup>(b)</sup>
			CDS spreads	16 - 105 bps
			Foreign exchange rates	20.50% <sup>(c)</sup>
			Interest rates (USD)	2.28% - 2.70% <sup>(a)</sup>
			Interest rates (JPY)	.53% - 1.34% <sup>(b)</sup>
Total assets	\$ 507		Foreign exchange rates	20.50% <sup>(c)</sup>

(a) Inputs derived from U.S. long-term rates to accommodate long maturity nature of our swaps

(b) Inputs derived from Japan long-term rates to accommodate long maturity nature of our swaps

(c) Based on 10 year volatility of JPY/USD exchange rate

(d) N/A represents securities where we receive unadjusted broker quotes and for which there is no transparency into the providers' valuation techniques or unobservable inputs.

## 2014

(In millions)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average)
<b>Liabilities:</b>				
Foreign currency swaps	\$ 176	Discounted cash flow	Interest rates (USD)	2.28% - 2.70% <sup>(a)</sup>
			Interest rates (JPY)	.53% - 1.34% <sup>(b)</sup>

		Interest rates (JPY)	.93% - 2.02% <sup>(c)</sup>	
		Foreign exchange rates	21.16% <sup>(d)</sup>	
		Base correlations	65% - 76% (72%) <sup>(a)</sup>	
Credit default swaps	4	Discounted cash flow	CDS spreads	65 - 106 (92) bps
			Recovery rate	37.00%
<b>Total liabilities</b>	<b>\$ 207</b>			

(a) Weighted-average range of base correlations for our bespoke tranches for attachment and detachment points corresponding to market indices

(b) Inputs derived from U.S. long-term rates to accommodate long maturity nature of our swaps

(c) Inputs derived from Japan long-term rates to accommodate long maturity nature of our swaps

(d) Based on 10 year volatility of JPY/USD exchange rate

The following is a discussion of the significant unobservable inputs or valuation technique used in determining the fair value of securities and derivatives classified as Level 3.

#### *Net Asset Value*

We hold certain unlisted equity securities whose fair value is derived based on the financial statements published by the investee. These securities do not trade on an active market and the valuations derived are dependent on the availability of timely financial reporting of the investee. Net asset value is an unobservable input in the determination of fair value of equity securities.

#### *Offered Quotes*

In circumstances where our valuation model price is overridden because it implies a value that is not consistent with current market conditions, we will solicit bids from a limited number of brokers. We also receive unadjusted prices from brokers for our mortgage and asset-backed securities. These quotes are non-binding but are reflective of valuation best estimates at that particular point in time. Offered quotes are an unobservable input in the determination of fair value of mortgage- and asset-backed securities, certain banks/financial institutions, certain other corporate, and equity securities investments.

#### *Interest Rates, CDS Spreads, Foreign Exchange Rates*

The significant drivers of the valuation of the interest and foreign exchange swaps are interest rates, foreign exchange rates and CDS spreads. Our swaps have long maturities that increase the sensitivity of the swaps to interest rate fluctuations. Since most of our yen-denominated cross currency swaps are in a net liability position, an increase in interest rates will decrease the liabilities and increase the value of the swap.

Foreign exchange swaps also have a lump-sum final settlement of foreign exchange principal receivables at the termination of the swap. An increase in yen interest rates will decrease the value of the final settlement foreign exchange receivables and decrease the value of the swap, and an increase in USD interest rates increase the swap value.

A similar sensitivity pattern is observed for the foreign exchange rates. When the spot U.S. dollar/Japanese yen (USD/JPY) foreign exchange rate decreases and the swap is receiving a final exchange payment in JPY, the swap value will increase due to the appreciation of the JPY. Most of our swaps are designed to receive payments in JPY at the termination and will thus be impacted by the USD/JPY foreign exchange rate in this way. In cases where there is no final foreign exchange receivable in JPY and we are paying JPY as interest payments and receiving USD, a decrease in the foreign exchange rate will lead to a decrease in the swap value.

The extinguisher feature in most of our swaps results in a cessation of cash flows and no further payments between the parties to the swap in the event of a default on the referenced or underlying collateral. To price this feature, we apply the survival probability of the referenced entity to the projected cash flows. The survival probability uses the CDS spreads and recovery rates to adjust the present value of the cash flows. For extinguisher swaps with positive values, an increase in CDS spreads decreases the likelihood of receiving the final exchange payments and reduces the value of the swap.

Due to the long duration of these swaps and the need to extrapolate from short-term observable data to derive and measure long-term inputs, certain inputs, assumptions and judgments are required to value future cash flows that cannot be corroborated by current inputs or current observable market data.

Interest rates, CDS spreads, and foreign exchange rates are unobservable inputs in the determination of fair value of foreign currency swaps.

## Base Correlations, CDS Spreads, Recovery Rates

Our CDOs are tranches on baskets of single-name credit default swaps. The risks in these types of synthetic CDOs come from the single-name CDS risk and the correlations between the single names. The valuation of synthetic CDOs is dependent on the calibration of market prices for interest rates, single name CDS default probabilities and base correlation using financial modeling tools. Since there is limited or no observable data available for these tranches, these base correlations must be obtained from commonly traded market tranches such as the CDX and iTraxx indices. From the historical prices of these indices, base correlations can be obtained to develop a pricing curve of CDOs with different seniorities. Since the reference entities of the market indices do not match those in our portfolio underlying the synthetic CDO to be valued, several processing steps are taken to map the securities in our portfolio to the indices. With the base correlation determined and the appropriate spreads selected, a valuation is calculated. An increase in the CDS spreads in the underlying portfolio leads to a decrease in the value due to higher probability of defaults and losses. The impact on the valuation due to base correlation depends on a number of factors, including the riskiness between market tranches and the modeled tranche based on our portfolio and the equivalence between detachment points in these tranches. Generally speaking, an increase in base correlation will decrease the value of the senior tranches while increasing the value of junior tranches. This may result in a positive or negative value change.

The CDO tranches in our portfolio are junior tranches and, due to the low level of credit support for these tranches, exhibit equity-like behavior. As a result, an increase in recovery rates tends to cause their values to decrease.

Our interest rate swaps are linked to the underlying synthetic CDOs. The valuation of these swaps is performed using a similar approach to that of the synthetic CDOs themselves; that is, the base correlation model is used to ensure consistency between the synthetic CDOs and the swaps.

Base correlations, CDS spreads, and recovery rates are unobservable inputs in the determination of fair value of credit default swaps and interest rate swaps.

For additional information on our investments and financial instruments, see the accompanying Notes 1, 3 and 4.

## 6. DEFERRED POLICY ACQUISITION COSTS AND INSURANCE EXPENSES

Consolidated policy acquisition costs deferred were \$1.3 billion in 2014, compared with \$1.4 billion in 2013 and \$1.7 billion in 2012. The following table presents a rollforward of deferred policy acquisition costs by segment for the years ended December 31.

(In millions)	2014		2013	
	Japan	U.S.	Japan	U.S.
<b>Deferred policy acquisition costs:</b>				
Balance, beginning of year	\$ 5,819	\$ 2,979	\$ 6,801	\$ 2,857
Capitalization	790	548	893	555
Amortization	(649)	(459)	(641)	(433)
Foreign currency translation and other	(749)	(6)	(1,234)	0
Balance, end of year	\$ 5,211	\$ 3,062	\$ 5,819	\$ 2,979

Commissions deferred as a percentage of total acquisition costs deferred were 77% in 2014, compared with 81% in 2013 and 84% in 2012.

Personnel, compensation and benefit expenses as a percentage of insurance expenses were 52% in 2014, compared with 51% in 2013 and 2012. Advertising expense, which is included in insurance expenses in the consolidated statements of earnings, was as follows for the years ended December 31:

(In millions)	2014	2013	2012
<b>Advertising expense:</b>			
Aflac Japan	\$ 103	\$ 112	\$ 127
Aflac U.S.	126	128	127
Total advertising expense	\$ 229	\$ 240	\$ 254

Depreciation and other amortization expenses, which are included in insurance expenses in the consolidated statements of earnings, were as follows for the years ended December 31:

(In millions)	2014	2013	2012
Depreciation expense	\$ 47	\$ 56	\$ 60
Other amortization expense	8	13	7
Total depreciation and other amortization expense	\$ 55	\$ 69	\$ 67

Lease and rental expense, which are included in insurance expenses in the consolidated statements of earnings, were as follows for the years ended December 31:

(In millions)	2014	2013	2012
<b>Lease and rental expense:</b>			
Aflac Japan	\$ 52	\$ 55	\$ 71
Aflac U.S.	15	10	9
Other	1	1	1
Total lease and rental expense	\$ 68	\$ 66	\$ 81

Advertising, lease and rental expense decreased for Aflac Japan in 2014 and 2013 compared with 2012 due to the weakening of the yen relative to the U.S. dollar.

## 7. POLICY LIABILITIES

Policy liabilities consist of future policy benefits, unpaid policy claims, unearned premiums, and other policyholders' funds, which accounted for 78% , 4% , 11% and 7% of total policy liabilities at December 31, 2014 , respectively. We regularly review the adequacy of our policy liabilities in total and by component.

The liability for future policy benefits as of December 31 consisted of the following:

(In millions)	Policy Issue Year	Liability Amounts		Interest Rates	
		2014	2013	Year of Issue	In 20 Years
<b>Health insurance:</b>					
Japan:	2002 - 2014	<b>\$ 3,900</b>	\$ 3,370	1.25 - 2.5 %	1.25 - 2.5 %
	1974 - 2013	<b>3,449</b>	3,889	2.7 - 2.75	2.25 - 2.75
	1998 - 2014	<b>10,641</b>	11,763	3.0	3.0
	1997 - 1999	<b>2,461</b>	2,842	3.5	3.5
	1994 - 1996	<b>3,023</b>	3,483	4.0 - 4.5	4.0 - 4.5
	1987 - 1994	<b>14,394</b>	16,727	5.5	5.5
	1985 - 1991	<b>1,923</b>	2,262	5.25 - 6.75	5.25 - 5.5
	1978 - 1984	<b>2,260</b>	2,699	6.5	5.5
U.S.:	2012 - 2014	<b>588</b>	345	3.0 - 3.75	3.0 - 3.75
	2011	<b>276</b>	243	4.75	4.75
	2005 - 2010	<b>2,951</b>	2,897	5.5	5.5
	1988 - 2004	<b>706</b>	725	8.0	6.0
	1986 - 2004	<b>1,293</b>	1,301	6.0	6.0
	1981 - 1986	<b>183</b>	190	6.5 - 7.0	5.5 - 6.5
	1998 - 2004	<b>1,260</b>	1,237	7.0	7.0
	Other	<b>21</b>	22		
<b>Life insurance:</b>					
Japan:	2013 - 2014	<b>312</b>	59	1.5 - 1.75	1.5 - 1.75
	2001 - 2013	<b>3,674</b>	3,009	1.65 - 1.85	1.65 - 1.85
	2011 - 2014	<b>2,298</b>	1,584	2.0	2.0
	2009 - 2011	<b>1,890</b>	1,648	2.25	2.25
	2005 - 2011	<b>1,214</b>	1,211	2.5	2.5
	1985 - 2006	<b>2,006</b>	2,303	2.7	2.25
	2007 - 2011	<b>1,010</b>	1,025	2.75	2.75
	1999 - 2011	<b>1,944</b>	2,164	3.0	3.0
	1996 - 2009	<b>633</b>	721	3.5	3.5
	1994 - 1996	<b>884</b>	1,021	4.0 - 4.5	4.0 - 4.5
U.S.:	1956 - 2014	<b>452</b>	396	3.5 - 6.0	3.5 - 6.0
<b>Total</b>		<b>\$ 65,646</b>	\$ 69,136		

The weighted-average interest rates reflected in the consolidated statements of earnings for future policy benefits for Japanese policies were 3.8% in 2014 , compared with 3.9% in 2013 and 4.0% in 2012 ; and for U.S. policies, 5.7% in 2014 , compared with 5.8% in 2013 and 6.0% in 2012 .

Changes in the liability for unpaid policy claims were as follows for the years ended December 31:

(In millions)	2014	2013	2012
Unpaid supplemental health claims, beginning of year	\$ 3,537	\$ 3,781	\$ 3,749
Less reinsurance recoverables	9	10	0
Net balance, beginning of year	3,528	3,771	3,749
Add claims incurred during the year related to:			
Current year	6,866	7,215	8,013
Prior years	(301)	(236)	(173)
Total incurred	6,565	6,979	7,840
Less claims paid during the year on claims incurred during:			
Current year	4,532	4,834	5,453
Prior years	1,873	1,931	2,082
Total paid	6,405	6,765	7,535
Effect of foreign exchange rate changes on unpaid claims	(283)	(457)	(283)
Net balance, end of year	3,405	3,528	3,771
Add reinsurance recoverables	7	9	10
Unpaid supplemental health claims, end of year	3,412	3,537	3,781
Unpaid life claims, end of year	218	226	253
Total liability for unpaid policy claims	\$ 3,630	\$ 3,763	\$ 4,034

The incurred claims development related to prior years reflects favorable development in the unpaid policy claims liability. This favorable development is primarily in our lines of business in Japan.

As of December 31, 2014 and 2013, unearned premiums consisted primarily of discounted advance premiums on deposit. Discounted advance premiums are premiums on deposit from policyholders in conjunction with their purchase of certain Aflac Japan limited-pay insurance products. These advanced premiums are deferred upon collection and recognized as premium revenue over the contractual premium payment period. These advanced premiums represented 80% of the December 31, 2014 and 82% of the December 31, 2013 unearned premiums balances.

As of December 31, 2014 and 2013, the largest component of the other policyholders' funds liability is our annuity line of business in Aflac Japan. Our annuities have fixed benefits and premiums. These annuities represented 98% of the December 31, 2014 and 93% of the December 31, 2013 other policyholders' funds liability.

## 8. REINSURANCE

Effective October 1, 2014 and September 30, 2013, we entered into coinsurance reinsurance transactions whereby we ceded 16.7% and 33.3% , respectively, of the hospital benefit of one of Aflac Japan's closed medical in-force blocks of business. We recorded the gain related to these transactions as a deferred profit liability on business sold through reinsurance on our consolidated balance sheets. The deferred profit liability of \$820 million , as of December 31, 2014 , included in future policy benefits in the consolidated balance sheet, is being amortized into income over the expected lives of the policies. The corresponding reinsurance recoverable is included in other assets in the consolidated balance sheet and totaled \$838 million as of December 31, 2014 .

Effective December 31, 2014, we entered into a retrocession coinsurance reinsurance transaction whereby we assumed 8.35% of the reinsured hospital benefit of one of Aflac Japan's closed medical in-force blocks of business through our subsidiary CAIC. The agreement had no impact on the consolidated balance sheet and statement of operations as of December 31, 2014.

The following table reconciles direct premium income and direct benefits and claims to net amounts after the effect of reinsurance for the years ended December 31.

(In millions)	2014	2013
Direct premium income	\$ 19,412	\$ 20,233
Ceded to other companies:		
Ceded Aflac Japan closed medical block	(311)	(76)
Other	(39)	(34)
Assumed from other companies	10	12
Net premium income	\$ 19,072	\$ 20,135
Direct benefits and claims	\$ 13,235	\$ 13,903
Ceded benefits and change in reserves for future benefits:		
Ceded Aflac Japan closed medical block	(276)	(67)
Other	(27)	(31)
Assumed from other companies	5	8
Benefits and claims, net	\$ 12,937	\$ 13,813

Reinsurance does not relieve us from our obligations to policyholders. In the event that the reinsurer is unable to meet their obligations, we remain liable for the reinsured claims.

## 9. NOTES PAYABLE

A summary of notes payable as of December 31 follows:

(In millions)	2014	2013
3.45% senior notes due August 2015	\$ 300	\$ 300
2.65% senior notes due February 2017	653 <sup>(1)</sup>	655 <sup>(1)</sup>
8.50% senior notes due May 2019	850	850
4.00% senior notes due February 2022	350 <sup>(2)</sup>	349 <sup>(2)</sup>
3.625% senior notes due June 2023	700	700
3.625% senior notes due November 2024	749 <sup>(2)</sup>	0
6.90% senior notes due December 2039	397 <sup>(2)</sup>	396 <sup>(2)</sup>
6.45% senior notes due August 2040	448 <sup>(2)</sup>	448 <sup>(2)</sup>
5.50% subordinated debentures due September 2052	500	500
Yen-denominated Uridashi notes:		
2.26% notes due September 2016 (principal amount 8 billion yen)	66	76
Yen-denominated Samurai notes:		
1.47% notes paid July 2014 (principal amount 28.7 billion yen)	0	272
1.84% notes due July 2016 (principal amount 15.8 billion yen)	131	150
Variable interest rate notes paid July 2014 (1.30% in 2013, principal amount 5.5 billion yen)	0	52
Yen-denominated loans:		
3.60% loan due July 2015 (principal amount 10 billion yen)	83	95
3.00% loan due August 2015 (principal amount 5 billion yen)	41	48
Capitalized lease obligations payable through 2019	14	6
<b>Total notes payable</b>	<b>\$ 5,282</b>	<b>\$ 4,897</b>

<sup>(1)</sup> Principal amount plus an issuance premium that is being amortized over the life of the notes

<sup>(2)</sup> Principal amount net of an issuance discount that is being amortized over the life of the notes

In November 2014, the Parent Company issued \$750 million of senior notes through a U.S. public debt offering. The notes bear interest at a fixed rate of 3.625% per annum, payable semi-annually, and have a ten -year maturity. These notes are redeemable at our option in whole at any time or in part from time to time at a redemption price equal to the greater of: (i) the aggregate principal amount of the notes to be redeemed or (ii) the amount equal to the sum of the present values of the remaining scheduled payments for principal of and interest on the notes to be redeemed, not including any portion of the payments of interest accrued as of such redemption date, discounted to such redemption date on a semiannual basis at the treasury rate plus 20 basis points, plus in each case, accrued and unpaid interest on the principal amount of the notes to be redeemed to, but excluding, such redemption date. We entered into cross-currency interest rate swaps to reduce interest expense by converting the dollar-denominated principal and interest on the senior notes we issued into yen-denominated obligations. By entering into the swaps, we economically converted our \$750 million liability into an 85.3 billion yen liability and reduced the interest rate on this debt from 3.625% in dollars to 1.00% in yen.

In June 2013, the Parent Company issued \$700 million of senior notes through a U.S. public debt offering. The notes bear interest at a fixed rate of 3.625% per annum, payable semi-annually, and have a ten -year maturity. These notes are redeemable at our option in whole at any time or in part from time to time at a redemption price equal to the greater of: (i) the aggregate principal amount of the notes to be redeemed or (ii) the amount equal to the sum of the present values of the remaining scheduled payments for principal of and interest on the notes to be redeemed, not including any portion of the payments of interest accrued as of such redemption date, discounted to such redemption date on a semiannual basis at the treasury rate plus 20 basis points, plus in each case, accrued and unpaid interest on the principal amount of the notes to be redeemed to, but excluding, such redemption date. We entered into cross-currency interest rate swaps to reduce interest expense by converting the dollar-denominated principal and interest on the senior notes we issued into yen-denominated obligations. By entering into these swaps, we economically converted our \$700 million liability into a 69.8 billion yen liability and reduced the interest rate on this debt from 3.625% in dollars to 1.50% in yen.

In September 2012, the Parent Company issued \$450 million of subordinated debentures through a U.S. public debt offering. The debentures bear interest at a fixed rate of 5.50% per annum, payable quarterly, and have a 40-year maturity. In five years, on or after September 26, 2017, we may redeem the debentures, in whole or in part, at their principal amount plus accrued and unpaid interest to, but excluding, the date of redemption; provided that if the debentures are not redeemed in whole, at least \$25 million aggregate principal amount of the debentures must remain outstanding after giving effect to such redemption. The debentures may only be redeemed prior to September 26, 2017, in whole but not in part, upon the occurrence of certain tax events or certain rating agency events, as specified in the indenture governing the terms of the debentures. We entered into cross-currency interest rate swaps to convert the dollar-denominated principal and interest on the subordinated debentures we issued into yen-denominated obligations. By entering into these swaps, we economically converted our \$450 million liability into a 35.3 billion yen liability and reduced the interest rate on this debt from 5.50% in dollars to 4.41% in yen. The swaps will expire after the initial five-year non-callable period for the debentures. In October 2012, the underwriters exercised their option, pursuant to the underwriting agreement, to purchase an additional \$50 million principal amount of the debentures discussed above. We entered into a cross-currency interest rate swap to economically convert this \$50 million liability into a 3.9 billion yen liability and reduce the interest rate from 5.50% in dollars to 4.42% in yen. The swap will expire after the initial five-year non-callable period for the debentures.

In February 2012, the Parent Company issued two series of senior notes totaling \$750 million through a U.S. public debt offering. The first series, which totaled \$400 million, bears interest at a fixed rate of 2.65% per annum, payable semiannually, and has a five-year maturity. The second series, which totaled \$350 million, bears interest at a fixed rate of 4.00% per annum, payable semiannually, and has a 10-year maturity. These notes are redeemable at our option in whole at any time or in part from time to time at a redemption price equal to the greater of: (i) the principal amount of the notes or (ii) the present value of the remaining scheduled payments of principal and interest to be redeemed, discounted to the redemption date, plus accrued and unpaid interest. We entered into cross-currency interest rate swaps to reduce interest expense by converting the dollar-denominated principal and interest on the senior notes we issued into yen-denominated obligations. By entering into these swaps, we economically converted our \$400 million liability into a 30.9 billion yen liability and reduced the interest rate on this debt from 2.65% in dollars to 1.22% in yen. We also economically converted our \$350 million liability into a 27.0 billion yen liability and reduced the interest rate on this debt from 4.00% in dollars to 2.07% in yen. In July 2012, the Parent Company issued \$250 million of senior notes that are an addition to the original first series of senior notes issued in February 2012. These notes have a five-year maturity and a fixed rate of 2.65% per annum, payable semiannually.

In July 2011, the Parent Company issued three series of Samurai notes totaling 50 billion yen through a public debt offering. The first series, which totaled 28.7 billion yen, and the third series, which totaled 5.5 billion yen, were redeemed in July 2014. The second series, which totaled 15.8 billion yen, bears interest at a fixed rate of 1.84% per annum, payable semiannually, and has a five-year maturity. These Samurai notes are not available to U.S. persons.

In 2010 and 2009, we issued senior notes through U.S. public debt offerings; the details of these notes are as follows. In August 2010, we issued \$450 million and \$300 million of senior notes that have 30-year and five-year maturities, respectively. In December 2009, we issued \$400 million of senior notes that have a 30-year maturity. In May 2009, we issued \$850 million of senior notes that have a 10-year maturity. These senior notes pay interest semiannually and are redeemable at our option in whole at any time or in part from time to time at a redemption price equal to the greater of: (i) the principal amount of the notes or (ii) the present value of the remaining scheduled payments of principal and interest to be redeemed, discounted to the redemption date, plus accrued and unpaid interest.

In September 2006, the Parent Company issued a tranche of Uridashi notes totaling 10 billion yen with a 10-year maturity. These Uridashi notes pay interest semiannually, may only be redeemed prior to maturity upon the occurrence of a tax event as specified in the respective bond agreement and are not available to U.S. persons. During 2009, we extinguished 2.0 billion yen (par value) of these Uridashi notes by buying the notes on the open market at a cost of 1.4 billion yen, yielding a gain of .6 billion yen.

For our yen-denominated notes and loans, the principal amount as stated in dollar terms will fluctuate from period to period due to changes in the yen/dollar exchange rate. We have designated the majority of our yen-denominated notes payable as a nonderivative hedge of the foreign currency exposure of our investment in Aflac Japan.

The aggregate contractual maturities of notes payable during each of the years after December 31, 2014 , are as follows:

(In millions)	Long-term Debt	Capitalized Lease Obligations	Total Notes Payable
2015	\$ 424	\$ 4	\$ 428
2016	197	4	201
2017	650	3	653
2018	0	2	2
2019	850	1	851
Thereafter	3,150	0	3,150
<b>Total</b>	<b>\$ 5,271</b>	<b>\$14</b>	<b>\$ 5,285</b>

In October 2014, the Parent Company and Aflac entered into a 364-day uncommitted bilateral line of credit that provides for borrowings in the amount of \$100 million . Borrowings will bear interest at the rate quoted by the bank and agreed upon at the time of making such loan and will have a three-month maturity period. There are no related facility fees, upfront expense or financial covenant requirements. Borrowings under this credit agreement may be used for general corporate purposes. As of December 31, 2014, we did not have any borrowings outstanding under our \$100 million credit agreement. Borrowings under the financing agreement will mature no later than three months after the last drawdown date of October 15, 2015.

The Parent Company and Aflac have a senior unsecured revolving credit facility agreement with a syndicate of financial institutions that provides for borrowings in the amount of 50 billion yen. This credit agreement provides for borrowings in Japanese yen or the equivalent of Japanese yen in U.S. dollars on a revolving basis. Borrowings will bear interest at LIBOR plus the applicable margin of 1.125% . In addition, the Parent Company and Aflac are required to pay a facility fee of .125% on the commitments. As of December 31, 2014 , we did not have any borrowings outstanding under our 50 billion yen revolving credit agreement. Borrowings under the credit agreement may be used for general corporate purposes, including a capital contingency plan for our Japanese operations. Borrowings under the financing agreement mature at the termination date of the credit agreement. The agreement requires compliance with certain financial covenants on a quarterly basis. This credit agreement will expire on the earlier of March 29, 2018, or the date of termination of the commitments upon an event of default as defined in the agreement.

We were in compliance with all of the covenants of our notes payable and lines of credit at December 31, 2014 . No events of default or defaults occurred during 2014 and 2013 .

## 10. INCOME TAXES

The components of income tax expense (benefit) applicable to pretax earnings for the years ended December 31 were as follows:

(In millions)	Foreign	U.S.	Total
<b>2014:</b>			
<b>Current</b>	<b>\$ 995</b>	<b>\$ 84</b>	<b>\$ 1,079</b>
<b>Deferred</b>	<b>125</b>	<b>336</b>	<b>461</b>
<b>Total income tax expense</b>	<b>\$ 1,120</b>	<b>\$ 420</b>	<b>\$ 1,540</b>
<b>2013:</b>			
Current	\$ 934	\$ 302	\$ 1,236
Deferred	299	123	422
Total income tax expense	\$ 1,233	\$ 425	\$ 1,658
<b>2012:</b>			
Current	\$ 513	\$ 303	\$ 816
Deferred	950	(330)	620
Total income tax expense	\$ 1,463	\$ (27)	\$ 1,436

Japan enacted an income tax rate reduction effective for fiscal years beginning after March 31, 2012 . The rate was reduced to 33.3% effective April 1, 2012 , and an additional reduction to 30.8% became effective January 1, 2015 . The estimated reversal of the temporary differences resulted in a decrease to deferred taxes in Japan of \$744 million and a corresponding increase in U.S. deferred taxes, due to the loss of foreign tax credits, of \$744 million as of December 31, 2011 . Based on the actual reversal pattern of these temporary differences, we revised our estimate of the impact of the tax rate reduction, resulting in an increase to deferred taxes in Japan of \$374 million and a corresponding decrease in U.S. deferred taxes of \$374 million as of December 31, 2012 .

Income tax expense in the accompanying statements of earnings varies from the amount computed by applying the expected U.S. tax rate of 35% to pretax earnings. The principal reasons for the differences and the related tax effects for the years ended December 31 were as follows:

(In millions)	2014	2013	2012
Income taxes based on U.S. statutory rates	\$ 1,572	\$ 1,685	\$ 1,506
Utilization of foreign tax credit	(32)	(37)	(53)
Nondeductible expenses	5	6	8
Other, net	(5)	4	(25)
<b>Income tax expense</b>	<b>\$ 1,540</b>	<b>\$ 1,658</b>	<b>\$ 1,436</b>

Total income tax expense for the years ended December 31 was allocated as follows:

(In millions)	2014	2013	2012
Statements of earnings	\$ 1,540	\$ 1,658	\$ 1,436
Other comprehensive income (loss):			
Unrealized foreign currency translation gains (losses) during period	(419)	253	363
Unrealized gains (losses) on investment securities:			
Unrealized holding gains (losses) on investment securities during period	2,237	(904)	904
Reclassification adjustment for realized (gains) losses on investment securities included in net earnings	19	19	(174)
Unrealized gains (losses) on derivatives during period	(3)	(4)	(8)
Pension liability adjustment during period	(31)	55	(7)
Total income tax expense (benefit) related to items of other comprehensive income (loss)	1,803	(581)	1,078
Additional paid-in capital (exercise of stock options)	(7)	(8)	(12)
<b>Total income taxes</b>	<b>\$ 3,336</b>	<b>\$ 1,069</b>	<b>\$ 2,502</b>

The tax effect on other comprehensive income (loss) shown in the table above included a deferred income tax expense of \$614 million in 2013 and \$492 million in 2012 , related to certain dollar-denominated investments that Aflac Japan maintained on behalf of Aflac U.S. As discussed in Note 1, prior to October 1, 2013, there was no translation adjustment to record in pretax other comprehensive income for the portfolio when the yen/dollar exchange rate changed, however deferred tax expense or benefit associated with the foreign exchange translation gains or losses on these dollar-denominated investments is recognized in total income tax expense on other comprehensive income until the securities mature or are sold. Excluding the tax amounts for these dollar-denominated investments from total taxes on other comprehensive income would result in an effective income tax rate on pretax other comprehensive income (loss) of 31% in 2013 and 32% in 2012 .

The income tax effects of the temporary differences that gave rise to deferred income tax assets and liabilities as of December 31 were as follows:

(In millions)	2014	2013
<b>Deferred income tax liabilities:</b>		
Deferred policy acquisition costs	\$ 2,209	\$ 2,406
Unrealized gains on investment securities	2,584	533
Premiums receivable	139	134
Policy benefit reserves	1,376	1,451
Depreciation	51	54
Other	20	22
Total deferred income tax liabilities	6,379	4,600
<b>Deferred income tax assets:</b>		
Other basis differences in investment securities	1,331	1,129
Unfunded retirement benefits	16	16
Other accrued expenses	4	23
Policy and contract claims	99	111
Foreign currency loss on Japan branch	327	189
Deferred compensation	226	182
Capital loss carryforwards	26	514
Total deferred income tax assets	2,029	2,164
Net deferred income tax liability	4,350	2,436
<b>Current income tax liability</b>	<b>943</b>	<b>1,282</b>
Total income tax liability	\$ 5,293	\$ 3,718

Under U.S. income tax rules, only 35% of non-life operating losses can be offset against life insurance taxable income each year. For current U.S. income tax purposes, there were non-life operating loss carryforwards of \$18 million, \$17 million, \$2 million and \$1 million expiring in 2031, 2032, 2033 and 2034, respectively, and no tax credit carryforwards available at December 31, 2014. The Company has capital loss carryforwards of \$73 million available to offset capital gains, which expire in 2016.

We file federal income tax returns in the United States and Japan as well as state or prefecture income tax returns in various jurisdictions in the two countries. U.S. federal income tax returns for years before 2010 are no longer subject to examination. In Japan, the National Tax Agency (NTA) has completed exams through tax year 2011.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows for the years ended December 31:

(In millions)	2014	2013
Balance, beginning of year	\$ 328	\$ 401
Additions for tax positions of prior years	2	1
Reductions for tax positions of prior years	(21)	(74)
Balance, end of year	\$ 309	\$ 328

Included in the balance of the liability for unrecognized tax benefits at December 31, 2014, are \$307 million of tax positions for which the ultimate deductibility is highly certain, but for which there is uncertainty about the timing of such deductibility, compared with \$327 million at December 31, 2013. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate, but would accelerate the payment of cash to the taxing authority to an earlier period. The Company has accrued approximately \$2 million as of December 31, 2014, for permanent uncertainties, which if reversed would not have a material effect on the annual effective rate.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. We recognized approximately \$11 million in interest and penalties in 2014 and 2013, and \$7 million in 2012. The Company has accrued approximately \$30 million for the payment of interest and penalties as of December 31, 2014, compared with \$26 million a year ago.

As of December 31, 2014, there were no material uncertain tax positions for which the total amounts of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

## 11. SHAREHOLDERS' EQUITY

The following table is a reconciliation of the number of shares of the Company's common stock for the years ended December 31.

(In thousands of shares)	2014	2013	2012
<b>Common stock - issued:</b>			
Balance, beginning of period	667,046	665,239	663,639
Exercise of stock options and issuance of restricted shares	1,086	1,807	1,600
Balance, end of period	668,132	667,046	665,239
<b>Treasury stock:</b>			
Balance, beginning of period	207,633	197,453	197,329
Purchases of treasury stock:			
Open market	19,660	13,212	1,948
Other	157	222	360
Dispositions of treasury stock:			
Shares issued to AFL Stock Plan	(1,251)	(1,365)	(1,670)
Exercise of stock options	(391)	(1,734)	(387)
Other	(121)	(155)	(127)
Balance, end of period	225,687	207,633	197,453
Shares outstanding, end of period	442,445	459,413	467,786

Outstanding share-based awards are excluded from the calculation of weighted-average shares used in the computation of basic EPS. The following table presents the approximate number of share-based awards to purchase shares, on a weighted-average basis, that were considered to be anti-dilutive and were excluded from the calculation of diluted earnings per share at December 31:

(In thousands)	2014	2013	2012
Anti-dilutive share-based awards	1,215	2,198	5,880

The weighted-average shares used in calculating earnings per share for the years ended December 31 were as follows:

(In thousands of shares)	2014	2013	2012
Weighted-average outstanding shares used for calculating basic EPS	451,204	464,502	466,868
Dilutive effect of share-based awards	2,796	2,906	2,419
Weighted-average outstanding shares used for calculating diluted EPS	454,000	467,408	469,287

**Share Repurchase Program:** During 2014, we purchased 19.7 million shares of our common stock in the open market, compared with 13.2 million shares in 2013 and 1.9 million shares in 2012. As of December 31, 2014, a remaining balance of 29.6 million shares of our common stock was available for purchase under share repurchase authorizations by our board of directors.

**Voting Rights:** In accordance with the Parent Company's articles of incorporation, shares of common stock are generally entitled to one vote per share until they have been held by the same beneficial owner for a continuous period of 48 months, at which time they become entitled to 10 votes per share.

### Reclassifications from Accumulated Other Comprehensive Income

The table below is a reconciliation of accumulated other comprehensive income by component for the years ended December 31.

## Changes in Accumulated Other Comprehensive Income

2014					
(In millions)	Unrealized Foreign Currency Translation Gains (Losses)	Unrealized Gains (Losses) on Investment Securities	Unrealized Gains (Losses) on Derivatives	Pension Liability Adjustment	Total
<b>Balance, beginning of period</b>	\$ (1,505)	\$ 1,035	\$ (12)	\$ (81)	\$ (563)
Other comprehensive income before reclassification	(1,036)	3,672	(14)	(44)	2,578
Amounts reclassified from accumulated other comprehensive income	0	(35)	0	(1)	(36)
Net current-period other comprehensive income	(1,036)	3,637	(14)	(45)	2,542
<b>Balance, end of period</b>	<b>\$ (2,541)</b>	<b>\$ 4,672</b>	<b>\$ (26)</b>	<b>\$ (126)</b>	<b>\$ 1,979</b>

*All amounts in the table above are net of tax.*

2013					
(In millions)	Unrealized Foreign Currency Translation Gains (Losses)	Unrealized Gains (Losses) on Investment Securities	Unrealized Gains (Losses) on Derivatives	Pension Liability Adjustment	Total
<b>Balance, beginning of period</b>	\$ 333	\$ 2,570	\$ (5)	\$ (183)	\$ 2,715
Other comprehensive income before reclassification	(1,833)	(1,499)	(7)	92	(3,247)
Amounts reclassified from accumulated other comprehensive income	(5)	(36)	0	10	(31)
Net current-period other comprehensive income	(1,838)	(1,535)	(7)	102	(3,278)
<b>Balance, end of period</b>	<b>\$ (1,505)</b>	<b>\$ 1,035</b>	<b>\$ (12)</b>	<b>\$ (81)</b>	<b>\$ (563)</b>

*All amounts in the table above are net of tax.*

The table below summarizes the amounts reclassified from each component of accumulated other comprehensive income based on source for the years ended December 31.

## Reclassifications Out of Accumulated Other Comprehensive Income

(In millions)	2014	
Details about Accumulated Other Comprehensive Income Components	Amount Reclassified from Accumulated Other Comprehensive Income	Affected Line Item in the Statements of Earnings
Unrealized gains (losses) on available-for-sale securities	\$ 57	Sales and redemptions
	(3)	Other-than-temporary impairment losses realized
	54	Total before tax
	(19)	Tax (expense) or benefit <sup>(1)</sup>
	\$ 35	Net of tax
Amortization of defined benefit pension items:		
Actuarial gains (losses)	\$ (15)	Acquisition and operating expenses <sup>(2)</sup>
Prior service (cost) credit	17	Acquisition and operating expenses <sup>(2)</sup>
	(1)	Tax (expense) or benefit <sup>(1)</sup>
	\$ 1	Net of tax
<b>Total reclassifications for the period</b>	<b>\$ 36</b>	Net of tax

<sup>(1)</sup> Based on 35% tax rate

<sup>(2)</sup> These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see Note 14 for additional details).

(In millions)	2013	
Details about Accumulated Other Comprehensive Income Components	Amount Reclassified from Accumulated Other Comprehensive Income	Affected Line Item in the Statements of Earnings
Unrealized foreign currency translation gains (losses)	\$ 7	Sales and redemptions
	(2)	Tax (expense) or benefit <sup>(1)</sup>
	\$ 5	Net of tax
Unrealized gains (losses) on available-for-sale securities	\$ 255	Sales and redemptions
	(199)	Other-than-temporary impairment losses realized
	56	Total before tax
	(20)	Tax (expense) or benefit <sup>(1)</sup>
	\$ 36	Net of tax

Actuarial gains (losses)	\$ (19)	Acquisition and operating expenses <sup>(2)</sup>
Prior service (cost) credit	4	Acquisition and operating expenses <sup>(2)</sup>
	5	Tax (expense) or benefit <sup>(1)</sup>
	\$ (10)	Net of tax
<b>Total reclassifications for the period</b>	<b>\$ 31</b>	Net of tax

<sup>(1)</sup> Based on 35% tax rate

<sup>(2)</sup> These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see Note 14 for additional details).

## 12. SHARE-BASED COMPENSATION

As of December 31, 2014, the Company has outstanding share-based awards under two long-term incentive compensation plans.

The first plan, which expired in February 2007, is a stock option plan which allowed grants for incentive stock options (ISOs) to employees and non-qualifying stock options (NQSOs) to employees and non-employee directors. The options have a term of 10 years. The exercise price of options granted under this plan is equal to the fair market value of a share of the Company's common stock at the date of grant. Options granted before the plan's expiration date remain outstanding in accordance with their terms.

The second long-term incentive compensation plan allows awards to Company employees for ISOs, NQSOs, restricted stock, restricted stock units, and stock appreciation rights. Non-employee directors are eligible for grants of NQSOs, restricted stock, and stock appreciation rights. The ISOs and NQSOs have a term of 10 years, and the share-based awards generally vest upon time-based conditions or time- and performance-based conditions. Time-based vesting generally occurs after three years. Performance-based vesting conditions generally include the attainment of goals related to Company financial performance. As of December 31, 2014, approximately 11.2 million shares were available for future grants under this plan, and the only performance-based awards issued and outstanding were restricted stock awards.

Share-based awards granted to U.S.-based grantees are settled with authorized but unissued Company stock, while those issued to Japan-based grantees are settled with treasury shares.

The following table presents the impact of the expense recognized in connection with share-based awards for the periods ended December 31.

(In millions, except for per-share amounts)	2014	2013	2012
Impact on earnings from continuing operations	\$ 41	\$ 37	\$ 37
Impact on earnings before income taxes	41	37	37
Impact on net earnings	28	25	26
<b>Impact on net earnings per share:</b>			
Basic	\$ .06	\$ .05	\$ .06
Diluted	.06	.05	.06

We estimate the fair value of each stock option granted using the Black-Scholes-Merton multiple option approach. Expected volatility is based on historical periods generally commensurate with the estimated terms of the options. We use historical data to estimate option exercise and termination patterns within the model. Separate groups of employees that have similar historical exercise patterns are stratified and considered separately for valuation purposes. The expected term of options granted is derived from the output of our option model and represents the weighted-average period of time that options granted are expected to be outstanding. We base the risk-free interest rate on the Treasury note rate with a term comparable to that of the estimated term of the options. The weighted-average fair value of options at their grant date was \$16.24 per share for 2014, compared with \$14.25 for 2013 and \$16.84 in 2012. The following table presents the assumptions used in valuing options granted during the years ended December 31.

	2014	2013	2012
Expected term (years)	6.3	6.6	6.5
Expected volatility	30.0 %	34.0 %	38.0 %
Annual forfeiture rate	2.7	1.6	1.6
Risk-free interest rate	2.8	1.8	2.1
Dividend yield	2.3	2.6	1.3

The following table summarizes stock option activity.

(In thousands of shares)	Stock Option Shares	Weighted-Average Exercise Price Per Share
Outstanding at December 31, 2011	14,563	\$ 42.76
Granted in 2012	784	47.25
Canceled in 2012	(134)	48.59
Exercised in 2012	(2,476)	32.27
Outstanding at December 31, 2012	12,737	45.00
Granted in 2013	703	52.86
Canceled in 2013	(179)	44.79
Exercised in 2013	(3,281)	40.52
<b>Outstanding at December 31, 2013</b>	<b>9,980</b>	<b>47.03</b>

<b>Outstanding at December 31, 2014</b>	<b>9,307</b>	<b>\$ 48.84</b>

(In thousands of shares)	2014	2013	2012
Shares exercisable, end of year	7,497	8,042	10,635

The following table summarizes information about stock options outstanding and exercisable at December 31, 2014 .

(In thousands of shares)	Options Outstanding			Options Exercisable	
Range of Exercise Prices Per Share	Stock Option Shares Outstanding	Wgtd.-Avg. Remaining Contractual Life (Yrs.)	Wgtd.-Avg. Exercise Price Per Share	Stock Option Shares Exercisable	Wgtd.-Avg. Exercise Price Per Share
\$ 14.99 - \$ 43.07	2,028	3.8	\$ 34.46	1,945	\$ 34.20
43.28 - 47.25	2,144	3.1	45.93	2,046	45.93
47.33 - 51.91	1,883	5.4	48.97	1,109	48.86
52.14 - 61.81	2,479	4.5	58.65	2,296	58.79
61.84 - 67.67	773	8.5	62.85	101	64.63
\$ 14.99 - \$ 67.67	9,307	4.5	\$ 48.84	7,497	\$ 47.51

The aggregate intrinsic value represents the difference between the exercise price of the stock options and the quoted closing common stock price of \$61.09 as of December 31, 2014 , for those awards that have an exercise price currently below the closing price. As of December 31, 2014 , the aggregate intrinsic value of stock options outstanding was \$116 million , with a weighted-average remaining term of 4.5 years. The aggregate intrinsic value of stock options exercisable at that same date was \$103 million , with a weighted-average remaining term of 3.6 years.

The following table summarizes stock option activity during the years ended December 31.

(In millions)	2014	2013	2012
Total intrinsic value of options exercised	\$ 25	\$ 66	\$ 41
Cash received from options exercised	39	113	35
Tax benefit realized as a result of options exercised and restricted stock releases	17	30	24

The value of restricted stock awards is based on the fair market value of our common stock at the date of grant. The following table summarizes restricted stock activity during the years ended December 31.

(In thousands of shares)	Shares	Weighted-Average Grant-Date Fair Value Per Share
Restricted stock at December 31, 2011	1,350	\$ 40.92
Granted in 2012	637	48.18
Canceled in 2012	(56)	48.22
Vested in 2012	(568)	26.13
Restricted stock at December 31, 2012	1,363	50.19
Granted in 2013	782	52.77
Canceled in 2013	(56)	48.63
Vested in 2013	(418)	47.49
<b>Restricted stock at December 31, 2013</b>	<b>1,671</b>	<b>52.12</b>
<b>Granted in 2014</b>	<b>584</b>	<b>62.12</b>
<b>Canceled in 2014</b>	<b>(27)</b>	<b>52.66</b>
<b>Vested in 2014</b>	<b>(348)</b>	<b>56.95</b>
<b>Restricted stock at December 31, 2014</b>	<b>1,880</b>	<b>\$ 54.33</b>

As of December 31, 2014, total compensation cost not yet recognized in our financial statements related to restricted stock awards was \$45 million, of which \$20 million (849 thousand shares) was related to restricted stock awards with a performance-based vesting condition. We expect to recognize these amounts over a weighted-average period of approximately 1.2 years. There are no other contractual terms covering restricted stock awards once vested.

### 13. STATUTORY ACCOUNTING AND DIVIDEND RESTRICTIONS

Our insurance subsidiaries are required to report their results of operations and financial position to state insurance regulatory authorities on the basis of statutory accounting practices prescribed or permitted by such authorities. Statutory accounting practices primarily differ from U.S. GAAP by charging policy acquisition costs to expense as incurred, establishing future policy benefit liabilities using different actuarial assumptions as well as valuing investments and certain assets and accounting for deferred taxes on a different basis.

Aflac, the Company's most significant insurance subsidiary, reports statutory financial statements that are prepared on the basis of accounting practices prescribed or permitted by the Nebraska Department of Insurance (NEDOI). The NEDOI recognizes statutory accounting principles and practices prescribed or permitted by the state of Nebraska for determining and reporting the financial condition and results of operations of an insurance company, and for determining a company's solvency under Nebraska insurance law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (SAP) has been adopted by the state of Nebraska as a component of those prescribed or permitted practices. Additionally, the Director of the NEDOI has the right to permit other specific practices which deviate from prescribed practices. Aflac has been given explicit permission by the Director of the NEDOI for two such permitted practices. These permitted practices, which do not impact the calculation of net income on a statutory basis or prevent the triggering of a regulatory event in the Company's risk-based capital calculation, are as follows:

- Aflac has reported as admitted assets the refundable lease deposits on the leases of commercial office space which house Aflac Japan's sales operations. These lease deposits are unique and part of the ordinary course of doing business in the country of Japan; these assets would be non-admitted under SAP.
- Aflac utilized book value accounting for certain guaranteed separate account funding agreements instead of fair value accounting as required by SAP. The underlying separate account assets had an unrealized gain of \$35 million as of December 31, 2013. In June 2014, the guaranteed separate account funding agreements were settled and at that time, Aflac's separate account assets were transferred to the general account.

A reconciliation of Aflac's capital and surplus between SAP and practices permitted by the state of Nebraska is shown below:

(In millions)	2014	2013
Capital and surplus, Nebraska state basis	<b>\$ 10,839</b>	\$ 9,630
<b>State Permitted Practice:</b>		
Refundable lease deposits – Japan	<b>(36)</b>	(41)
Separate Account Funding Agreements	<b>0</b>	35
Capital and surplus, NAIC basis	<b>\$ 10,803</b>	\$ 9,624

As of December 31, 2014, Aflac's capital and surplus significantly exceeded the required company action level capital and surplus of \$1.2 billion. As determined on a U.S. statutory accounting basis, Aflac's net income was \$2.4 billion in 2014 and 2013 and \$2.3 billion in 2012.

Aflac Japan must report its results of operations and financial position to the Japanese Financial Services Agency (FSA) on a Japanese regulatory accounting basis as prescribed by the FSA. Capital and surplus of the Japan branch, based on Japanese regulatory accounting practices, was \$5.6 billion at December 31, 2014, compared with \$4.2 billion at December 31, 2013. Japanese regulatory accounting practices differ in many respects from U.S. GAAP. Under Japanese regulatory accounting practices, policy acquisition costs are expensed immediately; deferred income tax liabilities are recognized on a different basis; policy benefit and claim reserving methods and assumptions are different; premium income is recognized on a cash basis; reinsurance is recognized on a different basis; and investments can have a separate accounting classification and treatment referred to as "policy reserve matching bonds," or "PRM."

The Parent Company depends on its subsidiaries for cash flow, primarily in the form of dividends and management fees. Consolidated retained earnings in the accompanying financial statements largely represent the undistributed earnings of our insurance subsidiary. Amounts available for dividends, management fees and other payments to the Parent Company by its insurance subsidiary may fluctuate due to different accounting methods required by regulatory authorities. These payments are also subject to various regulatory restrictions and approvals related to safeguarding the interests of insurance policyholders. Our insurance subsidiary must maintain adequate risk-based capital for U.S. regulatory authorities and our Japan branch must maintain adequate solvency margins for Japanese regulatory authorities. Additionally, the maximum amount of dividends that can be paid to the Parent Company by Aflac without prior approval of Nebraska's director of insurance is the greater of the net income from operations, which excludes net realized investment gains, for the previous year determined under statutory accounting principles, or 10% of statutory capital and surplus as of the previous year-end. Dividends declared by Aflac during 2015 in excess of \$2.4 billion would require such approval. Aflac declared dividends of \$1.5 billion during 2014.

A portion of Aflac Japan earnings, as determined on a Japanese regulatory accounting basis, can be repatriated each year to Aflac U.S. after complying with solvency margin provisions and satisfying various conditions imposed by Japanese regulatory authorities for protecting policyholders. Profit repatriations to the United States can fluctuate due to changes in the amounts of Japanese regulatory earnings. Among other items, factors affecting regulatory earnings include Japanese regulatory accounting practices and fluctuations in currency translation of Aflac Japan's dollar-denominated investments and related investment income into yen. Profits repatriated by Aflac Japan to Aflac U.S. were as follows for the years ended December 31:

(In millions of dollars and billions of yen)	In Dollars			In Yen		
	2014	2013	2012	2014	2013	2012
Profit repatriation	<b>\$ 1,704</b>	\$ 771	\$ 422	<b>181.4</b>	76.8	33.1

We had entered into foreign exchange forwards and options as part of an economic hedge on 52.5 billion yen of profit repatriation received in July 2014 and 50.0 billion yen of repatriation received in December 2014, resulting in \$7 million and \$45 million of additional funds received, respectively, when the yen was exchanged into dollars. As of December 31, 2014, we had foreign exchange forwards as part of a hedging strategy on 157.5 billion yen of future profit repatriation.

## 14. BENEFIT PLANS

### Pension and Other Postretirement Plans

We have funded defined benefit plans in Japan and the United States, which cover substantially all of our full-time employees. Additionally, we maintain non-qualified, unfunded supplemental retirement plans that provide defined pension benefits in excess of limits imposed by federal tax law for certain Japanese, U.S. and former employees. Effective October 1, 2013, the U.S. tax-qualified defined benefit plan was frozen to new employees hired on or after October 1, 2013 and to employees rehired on or after October 1, 2013. During the fourth quarter of 2013, active participants in this plan were given the option to exit the benefit plan and receive a nonelective 401(k) employer contribution. Additionally, effective January 1, 2015, the U.S. non-qualified supplemental retirement plan was frozen to new participants.

We provide certain health care benefits for eligible U.S. retired employees, their beneficiaries and covered dependents ("other postretirement benefits"). The health care plan is contributory and unfunded. On October 1, 2013, a change was made to postretirement medical benefits to limit the eligibility for the benefits beginning January 1, 2014 to include the following: (1) active employees whose age plus service, in years, equals or exceeds 80 (rule of 80); (2) active employees who are age 55 or older and have met the 15 years of service requirement; (3) active employees who will meet the rule of 80 in the next five years; (4) active employees who are age 55 or older and who will meet the 15 years of service requirement within the next five years; and (5) current retirees. Effective October 1, 2013, this change was accounted for as a negative plan amendment and resulted in a reduction to the postretirement benefit obligation of approximately \$51 million, with an offset to accumulated other comprehensive income (AOCI). Starting in the fourth quarter of 2013, this reduction is being amortized as a reduction to net periodic benefit cost over three years. The postretirement plan obligation was remeasured using a discount rate of 4.75% as of October 1, 2013. For certain employees and former employees, additional coverage is provided for all medical expenses for life.

Information with respect to our benefit plans' assets and obligations as of December 31 was as follows:

(In millions)	Pension Benefits				Other

Health care cost trend rates	N/A <sup>(1)</sup>	N/A <sup>(1)</sup>	N/A <sup>(1)</sup>	N/A <sup>(1)</sup>	N/A <sup>(1)</sup>	N/A <sup>(1)</sup>	5.70 <sup>(2)</sup>	6.40 <sup>(2)</sup>	5.70 <sup>(2)</sup>

<sup>(1)</sup> Not applicable

<sup>(2)</sup> For the years 2014, 2013 and 2012, the health care cost trend rates are expected to trend down to 4.6% in 78 years, 4.6% in 78 years, and 4.7% in 79 years, respectively.

We determine our discount rate assumption for our pension retirement obligations based on indices for AA corporate bonds with an average duration of approximately 20 years for the Japan pension plans and 17 years for the U.S. pension plans, and determination of the U.S. pension plans discount rate utilizes the 85 -year extrapolated yield curve. In Japan, participant salary and future salary increases are not factors in determining pension benefit cost or the related pension benefit obligation.

We base our assumption for the long-term rate of return on assets on historical trends ( 10 -year or longer historical rates of return for the Japanese plan assets and 15 -year historical rates of return for the U.S. plan assets), expected future market movement, as well as the portfolio mix of securities in the asset portfolio including, but not limited to, style, class and equity and fixed income allocations. In addition, our consulting actuaries evaluate our assumptions for long-term rates of return under Actuarial Standards of Practice (ASOP). Under the ASOP, the actual portfolio type, mix and class is modeled to determine a best estimate of the long-term rate of return. We in turn use those results to further validate our own assumptions.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plan. A one-percentage point increase and decrease in assumed health care cost trend rates would have the following effects as of December 31, 2014 :

(In millions)

**One percentage point increase:**

Increase in total service and interest costs	\$ 0
Increase in postretirement benefit obligation	3

**One percentage point decrease:**

Decrease in total service and interest costs	\$ 0
Decrease in postretirement benefit obligation	2

*Components of Net Periodic Benefit Cost*

Pension and other postretirement benefit expenses, included in acquisition and operating expenses in the consolidated statements of earnings for the years ended December 31, included the following components:

(In millions)	Pension Benefits						Other		
	Japan			U.S.			Postretirement Benefits		
	2014	2013	2012	2014	2013	2012	2014	2013	2012
Service cost	\$15	\$16	\$18	\$20	\$22	\$18	\$ 1	\$ 5	\$ 6
Interest cost	9	10	7	38	23	24	2	3	4
Expected return on plan assets	(4)	(3)	(4)	(20)	(17)	(16)	0	0	0
Amortization of net actuarial loss	1	2	3	11	15	11	3	2	1
Amortization of prior service cost (credit)	0	0	0	0	0	0	(17)	(4)	0
Net periodic (benefit) cost	\$21	\$25	\$24	\$49	\$43	\$37	\$ (11)	\$ 6	\$11

*Changes in Accumulated Other Comprehensive Income*

The following table summarizes the amounts recognized in other comprehensive loss (income) for the years ended December 31:

	Pension Benefits						Other		
	Japan			U.S.			Postretirement Benefits		
(In millions)	2014	2013	2012	2014	2013	2012	2014	2013	2012
Net actuarial loss (gain)	\$ 12	\$ (14)	\$ (10)	\$ 67	\$ (59)	\$ 45	\$ (3)	\$ (7)	\$ 5
Amortization of net actuarial loss	(1)	(2)	(3)	(11)	(15)	(11)	(3)	(2)	(1)
Prior service cost (credit)	0	0	0	0	(4)	(1)	0	(51)	2
Amortization of prior service cost	0	0	0	0	0	0	17	4	0
<b>Total</b>	<b>\$ 11</b>	<b>\$ (16)</b>	<b>\$ (13)</b>	<b>\$ 56</b>	<b>\$ (78)</b>	<b>\$ 33</b>	<b>\$ 11</b>	<b>\$ (56)</b>	<b>\$ 6</b>

Prior service credits of \$51 million were incurred in 2013 for the plan amendment related to the change in eligibility for postretirement medical benefits mentioned above. No transition obligations arose during 2014, and the transition obligations amortized to expense were immaterial for the years ended December 31, 2014, 2013 and 2012. Amortization of actuarial losses to expense in 2015 is estimated to be \$1 million for the Japanese plans, \$15 million for the U.S. plans and \$2 million for the other postretirement benefits plan. Amortization of prior service credits in 2015 is estimated to be \$17 million for the other postretirement benefits plan due to the negative plan amendment in 2013. The amortization of prior service costs and credits for other plans and transition obligations for all plans is expected to be negligible in 2015.

#### Benefit Payments

The following table provides expected benefit payments, which reflect expected future service, as appropriate.

	Pension Benefits		Other
	Japan	U.S.	Postretirement Benefits
(In millions)			
2015	\$ 7	\$ 20	\$ 2
2016	11	21	2
2017	8	28	3
2018	7	26	3
2019	9	27	4
2020-2024	63	159	22

#### Funding

We plan to make contributions of \$19 million to the Japanese funded defined benefit plan and \$10 million to the U.S. funded defined benefit plan in 2015. The funding policy for our non-qualified supplemental defined benefit pension plans and other postretirement benefits plan is to contribute the amount of the benefit payments made during the year.

#### Plan Assets

The investment objective of our Japanese and U.S. funded defined benefit plans is to preserve the purchasing power of the plan's assets and earn a reasonable inflation-adjusted rate of return over the long term. Furthermore, we seek to accomplish these objectives in a manner that allows for the adequate funding of plan benefits and expenses. In order to achieve these objectives, our goal is to maintain a conservative, well-diversified and balanced portfolio of high-quality equity, fixed-income and money market securities. As a part of our strategy, we have established strict policies covering quality, type and concentration of investment securities. For our Japanese plan, these policies include limitations on investments in derivatives including futures, options and swaps, and low-liquidity investments such as real estate, venture capital investments, and privately issued securities. For our U.S. plan, these policies prohibit investments in precious metals, limited partnerships, venture capital, and direct investments in real estate. We are also prohibited from trading on margin.

The plan fiduciaries for our funded defined benefit plans have developed guidelines for asset allocations reflecting a percentage of total assets by asset class, which are reviewed on an annual basis. Asset allocation targets as of December 31, 2014 were as follows:

	Japan Pension	U.S. Pension
Domestic equities	0%	40%
International equities	15	20
Fixed income securities	70	40
Other	15	0
<b>Total</b>	<b>100%</b>	<b>100%</b>

The following table presents the fair value of Aflac Japan's pension plan assets that are measured at fair value on a recurring basis as of December 31. All of these assets are classified as Level 2 in the fair value hierarchy, except cash and cash equivalents which are classified as Level 1.

(In millions)	2014	2013
<b>Japan pension plan assets:</b>		
International equity securities	\$ 34	\$ 34
Fixed income securities:		
Japanese bonds	72	60
International bonds	44	43
Mutual funds	0	21
Insurance contracts	22	24
Cash and cash equivalents	11	0
<b>Total</b>	<b>\$ 183</b>	<b>\$ 182</b>

The following table presents the fair value of Aflac U.S.'s pension plan assets that are measured at fair value on a recurring basis as of December 31. All of these assets are classified as Level 1 in the fair value hierarchy.

(In millions)	2014	2013
<b>U.S. pension plan assets:</b>		
Mutual funds:		
Large cap equity funds	\$ 116	\$ 110
Mid cap equity funds	14	19
Real estate equity funds	10	9
International equity funds	61	68
Fixed income bond funds	136	103
Aflac Incorporated common stock	4	4
<b>Total</b>	<b>\$ 341</b>	<b>\$ 313</b>

The fair values of our pension plan investments categorized as Level 1, consisting of mutual funds and common stock, are based on quoted market prices for identical securities traded in active markets that are readily and regularly available to us. The fair values of our pension plan investments classified as Level 2 are based on quoted prices for similar assets in markets that are not active, other inputs that are observable, such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates, or other market-corroborated inputs.

#### **401(k) Plan**

The Company sponsors a 401(k) plan in which we match a portion of U.S. employees' contributions. The plan provides for salary reduction contributions by employees and, in 2014, 2013, and 2012, provided matching contributions by the Company of 50% of each employee's contributions which were not in excess of 6% of the employee's annual cash compensation.

On January 1, 2014, the Company began providing a nonelective contribution to the 401(k) plan of 2% of annual cash compensation for employees who elected to opt out of the future benefits of the U.S. defined benefit plan during the

election period provided during the fourth quarter of 2013 and for new U.S. employees who started working for the Company after September 30, 2013.

The 401(k) contributions by the Company, included in acquisition and operating expenses in the consolidated statements of earnings, were \$7 million in 2014 and \$5 million in both 2013 and 2012 . The plan trustee held approximately two million shares of our common stock for plan participants at December 31, 2014 .

### **Stock Bonus Plan**

Aflac U.S. maintains a stock bonus plan for eligible U.S. sales associates. Plan participants receive shares of Aflac Incorporated common stock based on their new annualized premium sales and their first-year persistency of substantially all new insurance policies. The cost of this plan, which was capitalized as deferred policy acquisition costs, amounted to \$36 million in 2014 , compared with \$38 million in 2013 and 2012 .

## **15. COMMITMENTS AND CONTINGENT LIABILITIES**

We have three outsourcing agreements with a technology and consulting corporation. The first agreement provides mainframe computer operations and support for Aflac Japan. It has a remaining term of one year and an aggregate remaining cost of 4.8 billion yen ( \$40 million using the December 31, 2014 , exchange rate). The second agreement provides distributed mid-range server computer operations and support for Aflac Japan. It has a remaining term of one year and an aggregate remaining cost of 3.9 billion yen ( \$32 million using the December 31, 2014 , exchange rate). The third agreement provides application maintenance and development services for Aflac Japan. It has a remaining term of three years and an aggregate remaining cost of 4.4 billion yen ( \$36 million using the December 31, 2014 , exchange rate).

We have an outsourcing agreement with a management consulting and technology services company to provide application maintenance and development services for our Japanese operation. The agreement has a remaining term of three years with an aggregate remaining cost of 3.8 billion yen ( \$31 million using the December 31, 2014 , exchange rate).

We have two outsourcing agreement with information technology and data services companies to provide application maintenance and development services for our Japanese operation. The first agreement has a remaining term of two years with an aggregate remaining cost of 2.3 billion yen ( \$19 million using the December 31, 2014 , exchange rate). The second agreement has a remaining term of three years with an aggregate remaining cost of 2.3 billion yen ( \$19 million using the December 31, 2014 , exchange rate).

We lease office space and equipment under agreements that expire in various years through 2022 . Future minimum lease payments due under non-cancelable operating leases at December 31, 2014 , were as follows:

(In millions)	
2015	\$ 55
2016	29
2017	19
2018	11
2019	7
Thereafter	8
<b>Total future minimum lease payments</b>	<b>\$129</b>

We are a defendant in various lawsuits considered to be in the normal course of business. Members of our senior legal and financial management teams review litigation on a quarterly and annual basis. The final results of any litigation cannot be predicted with certainty. Although some of this litigation is pending in states where large punitive damages, bearing little relation to the actual damages sustained by plaintiffs, have been awarded in recent years, we believe the outcome of pending litigation will not have a material adverse effect on our financial position, results of operations, or cash flows.

## 16. UNAUDITED CONSOLIDATED QUARTERLY FINANCIAL DATA

In management's opinion, the following quarterly financial information fairly presents the results of operations for such periods and is prepared on a basis consistent with our annual audited financial statements.

(In millions, except for per-share amounts)	March 31, 2014	June 30, 2014	September 30, 2014	December 31, 2014
<b>Net premium income</b>	\$ 4,854	\$ 4,888	\$ 4,841	\$ 4,489
<b>Net investment income</b>	827	843	841	808
<b>Realized investment gains (losses)</b>	(46)	102	16	143
<b>Other income</b>	5	5	38	74
<b>Total revenues</b>	<b>5,640</b>	<b>5,838</b>	<b>5,736</b>	<b>5,514</b>
<b>Total benefits and expenses</b>	<b>4,536</b>	<b>4,600</b>	<b>4,662</b>	<b>4,439</b>
<b>Earnings before income taxes</b>	<b>1,104</b>	<b>1,238</b>	<b>1,074</b>	<b>1,075</b>
<b>Total income tax</b>	<b>372</b>	<b>428</b>	<b>368</b>	<b>372</b>
<b>Net earnings</b>	<b>\$ 732</b>	<b>\$ 810</b>	<b>\$ 706</b>	<b>\$ 703</b>
<b>Net earnings per basic share</b>	<b>\$ 1.61</b>	<b>\$ 1.79</b>	<b>\$ 1.56</b>	<b>\$ 1.57</b>
<b>Net earnings per diluted share</b>	<b>1.60</b>	<b>1.78</b>	<b>1.56</b>	<b>1.57</b>

Quarterly amounts may not agree in total to the corresponding annual amounts due to rounding.

(In millions, except for per-share amounts)	March 31, 2013	June 30, 2013	September 30, 2013	December 31, 2013
Net premium income	\$ 5,184	\$ 5,013	\$ 5,028	\$ 4,910
Net investment income	833	813	821	826

Earnings before income taxes	1,361	1,358	1,069	1,028
Total income tax	469	469	367	353
Net earnings	\$ 892	\$ 889	\$ 702	\$ 675
Net earnings per basic share	\$ 1.91	\$ 1.91	\$ 1.51	\$ 1.46
Net earnings per diluted share	1.90	1.90	1.50	1.45

Quarterly amounts may not agree in total to the corresponding annual amounts due to rounding.

## 17. SUBSEQUENT EVENTS

Subsequent to December 31, 2014, in the execution of planned investment portfolio diversification, we expanded our investments in bank loans, high yield corporate bonds and middle market loans. We increased the allocation to our bank loan investment program by approximately \$750 million, of which approximately \$700 million has been funded; our high yield corporate bonds program by approximately \$500 million, of which approximately \$135 million has been funded; and our middle market loan program by approximately \$300 million, of which approximately \$5 million has been funded. The Company is beginning to invest in high yield corporate bonds and middle market loans as new as set classes that help diversify the investment portfolio within the guidelines of our strategic asset allocation model.

## **ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

There have been no changes in, or disagreements with, accountants on accounting and financial disclosure matters during the years ended December 31, 2014 and 2013 .

## **ITEM 9A. CONTROLS AND PROCEDURES**

### **Disclosure Controls and Procedures**

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this annual report (the "Evaluation Date"). Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures are effective.

### **Internal Control Over Financial Reporting**

#### **(a) Management's Annual Report on Internal Control Over Financial Reporting**

Management's Annual Report on Internal Control Over Financial Reporting is incorporated herein by reference from Part II, Item 8 of this report.

#### **(b) Attestation Report of the Registered Public Accounting Firm**

The Attestation Report of the Registered Public Accounting Firm on the Company's internal control over financial reporting is incorporated herein by reference from Part II, Item 8 of this report.

#### **(c) Changes in Internal Control Over Financial Reporting**

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the last fiscal quarter of 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## **ITEM 9B. OTHER INFORMATION**

Not applicable.

### PART III

Pursuant to General Instruction G to Form 10-K, Items 10 through 14 are incorporated by reference from the Company's definitive Notice and Proxy Statement relating to the Company's 2015 Annual Meeting of Shareholders, which will be filed with the Securities and Exchange Commission on or about March 19, 2015, pursuant to Regulation 14A under the Exchange Act. The Audit Committee Report and Compensation Committee Report to be included in such proxy statement shall be deemed to be furnished in this report and shall not be incorporated by reference into any filing under the Securities Act of 1933 as a result of such furnishing in Items 10 and 11, respectively.

Refer to the Information Contained in the Proxy  
Statement under Captions (filed electronically)

Schedule IV- Reinsurance for each of the years in the three-year period ended December 31, 2014	179

#### 3. EXHIBIT INDEX

An "Exhibit Index" has been filed as part of this Report beginning on the following page and is incorporated herein by this reference.

Schedules other than those listed above are omitted because they are not required, are not material, are not applicable, or the required information is shown in the financial statements or notes thereto.

In reviewing the agreements included as exhibits to this annual report, please remember they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about the Company or the other parties to the agreements. The agreements contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

- should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;
- have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and
- were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or

at any other time.

(b) EXHIBIT INDEX <sup>(1)</sup>

- 3.0 - Articles of Incorporation, as amended – incorporated by reference from Form 10-Q for June 30, 2008, Exhibit 3.0 (File No. 001-07434).

(c) FINANCIAL STATEMENT SCHEDULES

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Shareholders  
Aflac Incorporated:

Under date of February 26, 2015 , we reported on the consolidated balance sheets of Aflac Incorporated and subsidiaries (the Company) as of December 31, 2014 and 2013 , and the related consolidated statements of earnings, comprehensive income (loss), shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014 , which are included herein. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related consolidated financial statement schedules as listed in Item 15. These financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statement schedules based on our audits.

In our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

The accompanying condensed financial statements should be read in conjunction with the consolidated financial statements and notes thereto of Aflac Incorporated and Subsidiaries included in Part II, Item 8 of this report.

**(A) Notes Payable**

A summary of notes payable as of December 31 follows:

(In millions)	2014	2013
3.45% senior notes due August 2015	\$ 300	\$ 300
2.65% senior notes due February 2017	653 <sup>(1)</sup>	655 <sup>(1)</sup>
8.50% senior notes due May 2019	850	850
4.00% senior notes due February 2022	350 <sup>(2)</sup>	349 <sup>(2)</sup>
3.625% senior notes due June 2023	700	700
3.625% senior notes due November 2024	749	0
6.90% senior notes due December 2039	397 <sup>(2)</sup>	396 <sup>(2)</sup>
6.45% senior notes due August 2040	448 <sup>(2)</sup>	448 <sup>(2)</sup>
5.50% subordinated debentures due September 2052	500	500
Yen-denominated Uridashi notes:		
2.26% notes due September 2016 (principal amount 10 billion yen)	83	95
Yen-denominated Samurai notes:		
1.47% notes paid July 2014 (principal amount 28.7 billion yen)	0	272
1.84% notes due July 2016 (principal amount 15.8 billion yen)	131	150
Variable interest rate notes paid July 2014 (1.30% in 2013, principal amount 5.5 billion yen)	0	52
Yen-denominated loans:		
3.60% loan due July 2015 (principal amount 10 billion yen)	83	95
3.00% loan due August 2015 (principal amount 5 billion yen)	41	48
<b>Total notes payable</b>	<b>\$ 5,285</b>	<b>\$ 4,910</b>

<sup>(1)</sup> Principal amount plus an issuance premium that is being amortized over the life of the notes

<sup>(2)</sup> Principal amount net of an issuance discount that is being amortized over the life of the notes

During 2009 , Aflac Japan bought on the open market 2.0 billion yen of yen-denominated Uridashi notes issued by the Parent Company which are outstanding as of December 31, 2014 . In consolidation, those notes have been extinguished; however, they remain an outstanding liability for the Parent Company until their maturity date.

The aggregate contractual maturities of notes payable during each of the years after December 31, 2014 , are as follows:

(In millions)	
2015	\$ 424
2016	214
2017	650
2018	0
2019	850
Thereafter	3,150
<b>Total</b>	<b>\$ 5,288</b>

For further information regarding notes payable, see Note 9 of the Notes to the Consolidated Financial Statements.

## (B) Derivatives

At December 31, 2014, the Parent Company's outstanding freestanding derivative contracts were swaps associated with our notes payable, consisting of cross-currency interest rate swaps, also referred to as foreign currency swaps, associated with our senior notes due in February 2017, February 2022, June 2023 and November 2024, and subordinated debentures due in September 2052. We do not use derivative financial instruments for trading purposes, nor do we engage in leveraged derivative transactions. For further information regarding these derivatives, see Notes 1, 4 and 9 of the Notes to the Consolidated Financial Statements.

## (C) Income Taxes

The Parent Company and its eligible U.S. subsidiaries file a consolidated U.S. federal income tax return. Income tax liabilities or benefits are recorded by each principal subsidiary based upon separate return calculations, and any difference between the consolidated provision and the aggregate amounts recorded by the subsidiaries is reflected in the Parent Company financial statements. For further information on income taxes, see Note 10 of the Notes to the Consolidated Financial Statements.

## (D) Dividend Restrictions

See Note 13 of the Notes to the Consolidated Financial Statements for information regarding dividend restrictions.

## (E) Supplemental Disclosures of Cash Flow Information

## **Amended and Restated Bylaws**

of

### **AFLAC Incorporated**

(As of February 10, 2004)

#### **ARTICLE I** **OFFICES**

**Section 1. Registered Office.** The registered office shall be in the State of Georgia, County of Muscogee.

**Section 2. Other Offices.** The Corporation may also have offices at such other places both within and without the State of Georgia as the Board of Directors may from time to time determine and the business of the Corporation may require or make desirable.

#### **ARTICLE II** **SHAREHOLDERS' MEETINGS**

**Section 1. Annual Meetings.**

(a) The annual meeting of the shareholders of the Corporation shall be held at the principal office of the Corporation or at such other place in the United States as may be determined by the Board of Directors, on the first Monday in May of each calendar year (or on the next succeeding business day if said first Monday in May is a legal holiday in any year) or at such other time and date as shall be determined by the Board of Directors, for the purpose of electing directors and transacting such other business as may properly be brought before the meeting.

(b) No business may be transacted at an annual meeting of shareholders, other than business that is either (i) specified in the notice of meeting (or any supplement thereto) given by or at the direction of the Board of Directors (or any duly authorized committee thereof), (ii) otherwise properly brought before the annual meeting by or at the direction of the Board of Directors (or any duly authorized committee thereof) or (iii) otherwise properly brought before the annual meeting by any shareholder of the Corporation (A) who is a shareholder of record on the date of the giving of the notice provided for in this Section 1 and on the record date for the determination of shareholders entitled to vote at such annual meeting and (B) who complies with the notice procedures set forth in this Section 1.

(c) In addition to any other applicable requirements, for business to be properly brought before an annual meeting by a shareholder, such shareholder must have given timely notice thereof in proper written form to the Secretary of the Corporation, which notice is not withdrawn by such shareholder at or prior to such annual meeting.

(d) To be timely, a shareholder's notice to the Secretary must be delivered to or mailed and received at the principal executive offices of the Corporation not less than ninety (90) days nor more than one hundred-twenty (120) days prior to the anniversary date of the immediately preceding annual meeting of shareholders; provided, however, that in the event that the annual meeting is called for a date that is not within twenty-five (25) days before or after such anniversary date, notice by the shareholder in order to be timely must be so received not later than the close of business on the tenth (10<sup>th</sup>) day following the day on

---

which such notice of the date of the annual meeting was mailed or such public disclosure of the date of the annual meeting was made, whichever first occurs.

(e) To be in proper written form, a shareholder's notice to the Secretary must set forth as to each matter such shareholder proposes to bring before the annual meeting (i) a brief description of the business desired to be brought before the annual meeting and the reasons for conducting such business at the annual meeting, (ii) the name and record address of such shareholder, (iii) the class and number of shares of capital stock of the Corporation which are owned beneficially or of record by such shareholder, (iv) a description of all arrangements or understandings between such shareholder and any other person or persons (including their names) in connection with the proposal of such business by such shareholder and any material interest of such shareholder in such business and (v) a representation that such shareholder intends to appear in person or by proxy at the annual meeting to bring such business before the meeting.

(f) No business shall be conducted at the annual meeting of shareholders except business brought before the annual meeting in accordance with the procedures set forth in this Section 1, provided, however, that, once business has been properly brought before the annual meeting in accordance with such procedures, nothing in this Section 1 shall be deemed to preclude discussion by any shareholder of any such business. If the Chairman of an annual meeting determines that business was not properly brought before the annual meeting in accordance with the foregoing procedures, the Chairman shall declare to the meeting that the business was not properly brought before the meeting and such business shall not be transacted.

**Section 2. Special Meetings.** Special meetings of the shareholders shall be held at the principal office of the Corporation or at such other place in the United States as may be designated in the notice of said meetings, upon call of the Chairman of the Board of Directors or the Chief Executive Officer and shall be called by the President or the Secretary when so directed by the Board of Directors or at the request in writing of the holders of shares representing all of the votes entitled to be cast by the holders of all the issued and outstanding capital stock of the Corporation entitled to vote thereat. Any such request shall state the purpose for which the meeting is to be called.

**Section 3. Notice of Meetings.** Notice of every meeting of shareholders, stating the place, date and hour of the meeting, shall be given to each shareholder of record entitled to vote at such meeting not less than 10 nor more than 60 days before the date of the meeting. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail with postage thereon prepaid addressed to the shareholder at his address as it appears on the Corporation's record of shareholders. Attendance of a shareholder at a meeting of shareholders shall constitute a waiver of objection to: (a) lack of notice or defective notice of such meeting unless the shareholder at the beginning of the meeting, objects to holding the meeting or transacting business at the meeting, and (b) consideration of a particular matter at the meeting which is not within the purpose or purposes described in the meeting notice, unless the shareholder objects to considering the matter when it is presented. Notice need not be given to any shareholder who signs a waiver of notice, in person or by proxy, either before or after the meeting.

**Section 4. Quorum.** The holders of shares representing a majority of the votes entitled to be cast by the holders of all the issued and outstanding stock of the Corporation entitled to vote thereat, present in person or represented by proxy, shall constitute a quorum for the transaction of business at all meetings of the shareholders except as otherwise provided by statute, by the Articles of Incorporation, or by these Bylaws. If a quorum is not present or represented at any meeting of the shareholders, the holders of shares representing a majority of the votes entitled to be cast by those present in person or represented by proxy may adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum shall be present or represented. At such adjourned meeting at which a quorum shall be present or represented, any business may be transacted which might have been transacted at the meeting as originally notified. If after the adjournment a new record date is fixed for the adjourned meeting, a notice of the adjourned meeting shall be given to each shareholder of record entitled to vote at the meeting.

**Section 5. Voting.** When a quorum is present at any meeting, the vote of the holders of stock representing a majority of the voting power, as defined in the Articles of Incorporation, present in person or represented by proxy

---

shall decide any question brought before such meeting, unless the question is one upon which by express provision of law or of the Articles of Incorporation, a different vote is required, in which case such express provision shall govern and control the decision of the question. Each shareholder shall at every meeting of the shareholders be entitled to vote, as defined, in person or by proxy for each share of the capital stock having voting power registered in his name on the books of the Corporation, but no proxy shall be voted or acted upon after 11 months from its date, unless otherwise provided in the proxy.

**Section 6. Consent of Shareholders.** Any action required or permitted to be taken at any meeting of the shareholders may be taken without a meeting if all of the shareholders entitled to vote on the action consent thereto in writing, setting forth the action so taken, and signing and delivering such consent to the Secretary of the Corporation. Such consent shall have the same force and effect as a unanimous vote of shareholders.

**Section 7. List of Shareholders.** The Corporation shall keep at its registered office or principal place of business, or at the office of its transfer agent or registrar, a record of its shareholders, giving their names and addresses and the number, class and series, if any, of the shares held by each. The officer who has charge of the stock transfer books of the Corporation shall prepare and make, before every meeting of shareholders or any adjournment thereof, a complete list of the shareholders entitled to vote at the meeting or any adjournment thereof, arranged in alphabetical order, with the address of and the number and class and series, if any, of shares held by each. The list shall be produced and kept open at the time and place of the meeting and shall be subject to inspection by any shareholder during the whole time of the meeting for the purposes thereof. The said list may be the Corporation's regular record of shareholders if it is arranged in alphabetical order or contains an alphabetical index and otherwise conforms with the requirements specified by law.

### **ARTICLE III** **DIRECTORS**

**Section 1. Powers.** The property, affairs and business of the Corporation shall be managed and directed by its Board of Directors, which may exercise all powers of the Corporation and do all lawful acts and things which are not by law, by the Articles of Incorporation or by these Bylaws directed or required to be exercised or done by the shareholders.

#### **Section 2. Number, Election and Term**

(a) The number of Directors which shall constitute the whole Board shall be not less than three (3) or more than twenty-five (25). The specific number of Directors within such range shall be fixed or changed from time to time by a majority of the Board of Directors then in office. A decrease in the number of Directors shall not have the effect of shortening the term of any incumbent director. Except as otherwise provided in these Bylaws shareholders shall elect Directors by a vote of not less than a plurality of the votes present in person or represented by proxy at the meeting. Each Director elected shall hold office until his successor is elected and qualified or until his earlier resignation, removal from office or death. Directors shall be natural persons between the ages of 21 and 70 years, inclusive; provided, however, that any Directors who were elected to the Board for the first time before April 27, 1992, and who are subsequently re-elected shall be natural persons between the ages of 21 and 75 years, inclusive. Directors need not be residents of the State of Georgia or shareholders of the Corporation.

(b) Only persons who are nominated in accordance with the following procedures shall be eligible for election as directors of the Corporation. Nominations of persons for election to the Board of Directors may be made at any annual meeting of shareholders (i) by or at the direction of the Board of Directors (or any duly authorized committee thereof) or (ii) by any shareholder of the Corporation (A) who is a shareholder of record on the date of the giving of the notice provided for in this Section 2 and on the record date for the determination of shareholders entitled to vote at such annual meeting and (B) who complies with the notice procedures set forth in this Section 2.

---

(c) In addition to any other applicable requirements, for a nomination to be made by a shareholder, such shareholder must have given timely notice thereof in proper written form to the Secretary of the Corporation.

(d) To be timely, a shareholder's notice to the Secretary must be delivered to or mailed and received at the principal executive offices of the Corporation not less than ninety (90) days nor more than one hundred-twenty (120) days prior to the anniversary date of the immediately preceding annual meeting of shareholders; provided, however, that in the event that the annual meeting is called for a date that is not within twenty-five (25) days before or after such anniversary date, notice by the shareholder in order to be timely must be so received not later than the close of business on the tenth (10<sup>th</sup>) day following the day on which such notice of the date of the annual meeting was mailed or such public disclosure of the date of the annual meeting was made, whichever first occurs.

(e) To be in proper written form, a shareholder's notice to the Secretary must set forth (i) as to each person whom the shareholder proposes to nominate for election as a director (A) the name, age, business address and residence address of the person, (B) the principal occupation or employment of the person, (C) the number of shares of capital stock of the Corporation which are owned beneficially or of record by the person and (D) any other information relating to the person that would be required to be disclosed in a proxy statement or other filings required to be made in connection with solicitations of proxies for election of directors pursuant to Section 14 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the rules and regulations promulgated thereunder; and (ii) as to the shareholder giving the notice (A) the name and record address of such shareholder, (B) the number of shares of capital stock of the Corporation which are owned beneficially or of record by such shareholder, (C) a description of all arrangements or understandings between such shareholder and each proposed nominee and any other person or persons (including their names) pursuant to which the nomination(s) are to be made by such shareholder, (D) a representation that such shareholder intends to appear in person or by proxy at the meeting to nominate the persons named in its notice and (E) any other information relating to such shareholder that would be required to be disclosed in a proxy statement or other filings required to be made in connection with solicitations of proxies for election of directors pursuant to Section 14 of the Exchange Act and the rules and regulations promulgated thereunder. Such notice must be accompanied by a written consent of each proposed nominee to being named as a nominee and to serve as a director if elected.

(f) No person shall be eligible for election as a director of the Corporation unless nominated in accordance with the procedures set forth in this Section 2. If the Chairman of the annual meeting determines that a nomination was not made in accordance with the foregoing procedures, the Chairman shall declare to the meeting that the nomination was defective and such defective nomination shall be disregarded.

**Section 3. Resignation.** Any director who shall miss three or more regular meetings of the Board of Directors within any twelve month period, whether or not the meetings missed are consecutive, shall be deemed to have automatically resigned as a director, provided that the automatic resignation may be waived by resolution adopted by a majority vote of the remaining directors with the written consent of the resigned director, in which event said director shall remain on the Board.

**Section 4. Vacancies.** Vacancies on the Board of Directors, including vacancies resulting from any increase in the number of directors constituting the Board of Directors, but not including vacancies resulting from removal from office by the shareholders (except as provided in Section 9 of this Article III), may be filled by the shareholders, by the Board of Directors, or by the affirmative vote of a majority of the directors remaining in office, though less than a quorum, or by a sole remaining director, and a director so chosen shall hold office until the next annual election and until his successor is duly elected and qualified unless sooner displaced. If there are no directors in office, then vacancies shall be filled through election by the shareholders. Vacancies on any committee of the Board of Directors, including vacancies resulting from any increase in the number of directors constituting such committee, may be filled by the Board of Directors, or by the affirmative vote of a majority of the directors

---

remaining in office, though less than a quorum, or by a sole remaining director, and a director so chosen shall hold office until the his successor is duly appointed by the Board of Directors unless sooner displaced.

**Section 5. Meetings and Notice**. The Board of Directors of the Corporation and any committee thereof may hold meetings, both regular and special, either within or without the State of Georgia. Regular meetings of the Board of Directors or any committee thereof may be held without notice at such time and place as shall from time to time be determined by resolution of the Board or such committee, respectively. Special meetings of the Board may be called by the Chairman of the Board or Chief Executive Officer or by any two directors on one day's oral, telegraphic or written notice duly given or served on each director personally, or three days' notice deposited, first class postage prepaid, in the United States mail. Special meetings of any committee of the Board may be called by the chairman of such committee, if there be one, the Chief Executive Officer, or by any director serving on such committee, on one day's oral, telegraphic or written notice duly given or served on each member of such committee personally, or three days' notice deposited, first class postage prepaid, in the United States mail. Such notice shall state a reasonable time, date and place of meeting of the Board or the committee, but the purpose need not be stated therein. Notice need not be given to any director who signs a waiver of notice either before or after the meeting. Attendance of a director at a meeting shall constitute a waiver of notice of such meeting except when the director states, at the beginning of the meeting (or promptly upon his arrival), any such objection or objections to holding the meeting or the transaction of business at the meeting and does not subsequently vote for or assent to action taken at the meeting.

**Section 6. Quorum**. At all meetings of the Board or any committee thereof, a majority of directors in office or a majority of the directors constituting such committee, as the case may be, immediately before the meeting begins shall constitute a quorum for the transaction of business, and the act of a majority of the directors or committee members present at any meeting at which there is a quorum shall be the act of the Board or such committee, as applicable, except as may be otherwise specifically provided by law, by the Articles of Incorporation, by the rules and regulations of any securities exchange or quotation system on which the Corporation's securities are listed or quoted for trading, or by these Bylaws. If a quorum shall not be present at any meeting of the Board or any committee thereof, the directors present thereat may adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum shall be present.

**Section 7. Consent of Directors**. Unless otherwise restricted by the Articles of Incorporation or these Bylaws, any action required or permitted to be taken at any meeting of the Board of Directors or of any committee thereof may be taken without a meeting, if all members of the Board or committee, as the case may be, consent thereto in writing, setting forth the action so taken, and the writing or writings are filed with the minutes of the proceedings of the Board or committee. Such consent shall have the same force and effect as a unanimous vote of the Board or committee.

**Section 8. Committees**. The Board of Directors may by resolution passed by a majority of the whole Board, designate from among its members one or more committees, each committee to consist of one or more directors. The Board may designate one or more directors as alternate members of any committee, who may replace any absent member at any meeting of such committee. Each member of a committee must meet the requirements for membership, if any, imposed by applicable law and the rules and regulations of any securities exchange or quotation system on which the securities of the Corporation are listed or quoted for trading. Any such committee, to the extent allowed by law and provided in the resolution establishing such committee, shall have and may exercise all of the authority of the Board of Directors in the management of the business and affairs of the Corporation, except that it shall have no authority with respect to (1) amending the Articles of Incorporation or these Bylaws; (2) adopting a plan of merger or consolidation; (3) the sale, lease, exchange or the disposition of all or substantially all the property and assets of the Corporation; and (4) a voluntary dissolution of the Corporation or a revocation thereof. Such committee or committees shall have such name or names as may be determined from time to time by resolution adopted by the Board of Directors. A majority of each committee may determine its action and may fix the time and places of its meetings, unless otherwise provided by the Board of Directors. Each committee shall keep regular minutes of its meetings and report the same to the Board of Directors when required.

---

Notwithstanding anything to the contrary contained in this Article III, the resolution of the Board of Directors establishing any committee of the Board and/or the charter of any such committee may establish requirements or procedures relating to the governance and/or operation of such committee that are different from, or in addition to, those set forth in these Bylaws and, to the extent that there is any inconsistency between these Bylaws and any such resolution or charter, the terms of such resolution or charter shall be controlling.

**Section 9. Removal of Directors.** At any shareholders' meeting with respect to which notice of such purpose has been given, any director may be removed from office, with or without cause, by the vote of the holders of a majority of the stock having voting power and entitled to vote for the election of directors, and his successor may be elected at the same or any subsequent meeting of shareholders, or by the Board as permitted by law. Any director serving on a committee of the Board of Directors may be removed from such committee at any time by the Board of Directors.

**Section 10. Compensation of Directors.** Directors shall be entitled to such reasonable compensation for their services as directors or members of any committee of the Board as shall be fixed from time to time by resolution adopted by the Board, and shall also be entitled to reimbursement for any reasonable expenses incurred in attending any meeting of the Board or any such committee.

**Section 11. Executive Committee.** The Executive Committee will consist of at least five directors, including the Chief Executive Officer, the Deputy Chief Executive Officer, the Chairman of the Board of Directors, the Vice Chairman of the Board of Directors, the President, and such number of other directors as the Board of Directors may from time to time determine. The Executive Committee shall have and may exercise, during the intervals between meetings of the Board of Directors, all of the powers of the Board of Directors which may be lawfully delegated. Meetings of the Executive Committee shall be held at such times and places to be determined by the Chairman of the Executive Committee. At all meetings of the Executive Committee, a majority of the members thereof shall constitute a quorum. The Executive Committee may make rules for the conduct of its business and may appoint such committees and assistants as it may deem necessary. The Chief Executive Officer (or another member of the Executive Committee chosen by him) shall be the Chairman of the Executive Committee. During the intervals between meetings of the Executive Committee, the Chief Executive Officer shall possess and may exercise such of the powers vested in the Executive Committee as from time to time may be lawfully conferred upon him by resolution of the Board of Directors or the Executive Committee.

#### **ARTICLE IV OFFICERS**

**Section 1. Name and Number.** The officers of the Corporation, who shall be chosen by the Board of Directors are as follows: Chief Executive Officer, Deputy Chief Executive Officer, Chairman of the Board of Directors, Vice Chairman of the Board of Directors, President, Executive Vice President, Secretary, Assistant Secretary, Treasurer, and Assistant Treasurer. The Board of Directors may appoint additional specially designated vice presidents, assistant secretaries and assistant treasurers. Any number of offices, except the offices of President and Secretary, may be held by the same person. The Board of Directors may appoint such other officers and agents as it shall deem necessary who shall hold their offices for such terms and shall exercise such powers and perform such duties as shall be determined from time to time by the Board. The Board may, in its discretion, leave any of the above offices vacant for any length of time.

**Section 2. Compensation.** The salaries of all officers set forth in Section 1 of this Article IV shall be fixed by the Board of Directors or a committee or officer appointed by the Board. Salary payments made to an officer of the Corporation that shall be disallowed in whole or in part as a deductible expense by the Corporation for Federal Income Tax purposes shall be reimbursed by such officer to the Corporation to the full extent of the disallowance. It shall be the duty of the Board of Directors to enforce payments of each such amount disallowed.

**Section 3. Term of Office.** Unless otherwise provided by resolution of the Board of Directors, the principal officers shall serve until their successors shall have been chosen and qualified, or until their death, resignation or

---

removal as provided by these Bylaws.

**Section 4. Removal**. Any officer may be removed from office at any time, with or without cause, by the Board of Directors.

**Section 5. Vacancies**. Any vacancy in an office resulting from any cause may be filled by the Board of Directors.

**Section 6. Powers and Duties**. Except as hereinafter provided, the officers of the Corporation shall each have such powers and duties as generally pertain to their respective offices, as well as such powers and duties as from time to time may be conferred by the Board of Directors to the extent consistent with these Bylaws.

(a) **Chief Executive Officer**. The Chief Executive Officer shall keep the Board of Directors fully informed, and shall make a statement of the affairs of the Corporation at the annual meeting of the shareholders. He shall have the general superintendence and direction of all the other officers of the Corporation and of the agents, independent contractors and employees thereof and to see that their respective duties are properly performed. He shall, for and on behalf of the Corporation, exercise the voting powers of all stock of other companies owned by the Corporation. He may sign and execute all authorized bonds, notes, drafts, checks, acceptances or other obligations, reinsurance contracts and other contracts in the name of the Corporation. He shall operate and conduct the business and affairs of the corporation according to the orders and resolutions of the Board of Directors, and according to his own discretion whenever and wherever such discretion is not expressly limited by such orders and resolutions. He shall have the power to sue and be sued, complain and defend, in all courts, and to participate and bind the Corporation in any judicial, administrative, arbitral, settlement or other action, litigation or proceeding. All officers may be removed with or without cause at any time by the Chief Executive Officer whenever the Chief Executive Officer, in his absolute discretion, shall consider that the best interests of the Corporation will be served thereby.

(b) **Deputy Chief Executive Officer**. In the absence of the Chief Executive Officer, or in the event of his temporary disability or inability to act, or in the event the Chief Executive Officer expressly so directs, the Deputy Chief Executive Officer shall perform the duties of Chief Executive Officer, and when so acting shall have all the powers of and be subject to all the restrictions upon the Chief Executive Officer. Upon the death, permanent disability, or resignation of the Chief Executive Officer, the Deputy Chief Executive Officer shall become Chief Executive Officer and shall succeed to such duties and powers subject to such restrictions. In the event the office of Vice Chairman shall become vacant for any reason, the Deputy Chief Executive Officer shall, in addition to his then current duties, become Vice Chairman and shall succeed to the duties and powers of such office. The Deputy Chief Executive Officer shall do and perform such other duties as may from time to time be assigned to him by the Board of Directors or by the Chief Executive Officer.

(c) **Chairman of the Board of Directors**. The Chairman of the Board of Directors shall preside at all meetings of the Directors and shareholders and shall perform such other duties as may be assigned by the Board of Directors.

(d) **Vice Chairman of the Board of Directors**. In the absence of the Chairman of the Board of Directors, or in the event of his inability to act, the Vice Chairman of the Board of Directors shall perform the duties of the Chairman of the Board of Directors, and when so acting, shall have all the powers of and be subject to all the restrictions upon the Chairman of the Board of Directors. Upon the death, permanent disability, or resignation of the Chairman of the Board of Directors, the Vice Chairman shall become the Chairman of the Board and shall succeed to such duties and powers subject to such restrictions. The Vice Chairman of the Board of Directors shall do and perform such other duties as may from time to time be assigned to him by the Board of Directors or by the Chairman of the Board.

---

(e) President. The President shall keep the Board of Directors fully informed. He may sign and execute all authorized bonds, contracts, notes, drafts, checks, acceptances or other obligations in the name of the Corporation, and with the Secretary he may sign all certificates of shares in the capital stock of the Corporation. The President shall do and perform such other duties as may from time to time be assigned to him by the Board of Directors or by the Chief Executive Officer.

(f) Executive Vice-President. In the absence of the President or in the event of his inability or refusal to act, the Executive Vice-President (or in the event there be more than one Executive Vice-President, the Executive Vice-Presidents in the order designated, or in the absence of any designation, then in the order of their election) shall perform the duties of the President, and when so acting, shall have all the powers of and be subject to all the restrictions upon the President. The Executive Vice-Presidents shall perform such other duties and have such other powers as the Board of Directors may from time to time prescribe.

(g) Secretary. The Secretary shall attend all meetings of the Board of Directors and all meetings of the Shareholders and record all the proceedings of the meetings of the Corporation and of the Board of Directors in a book to be kept for that purpose and shall perform like duties for the standing committees when required. He shall give, or cause to be given, notice of all meetings of the shareholders and special meetings of the Board of Directors, and shall perform such other duties as may be prescribed by the Board of Directors or Chief Executive Officer, under whose supervision he shall be. He shall have custody of the corporate seal of the Corporation and he, or an assistant secretary, shall have authority to affix the same to any instrument requiring it and when so affixed, it may be attested by his signature or by the signature of such assistant secretary. The Board of Directors may give general authority to any other officer to affix the seal of the Corporation and to attest the affixing by his signature.

(h) Assistant Secretary. The Assistant Secretary, or if there be more than one, the assistant secretaries in the order determined by the Board of Directors (or if there be no such determination, then in the order of their election), shall, in the absence of the Secretary or in the event of his inability or refusal to act, perform the duties and exercise the powers of the Secretary and shall perform such other duties and have such other powers as the Board of Directors may from time to time prescribe.

(i) Treasurer. The Treasurer shall have the custody of the corporate funds and securities and shall keep full and accurate accounts of receipts and disbursements in books belonging to the Corporation and shall deposit all monies and other valuable effects in the name and to the credit of the Corporation in such depositories as may be designated by the Board of Directors. He shall disburse the funds of the Corporation as may be ordered by the Board of Directors, taking proper vouchers for such disbursements, and shall render regular meetings, or when the Board of Directors so requires, an account of all his transactions as Treasurer and of the financial condition of the Corporation. If required by the Board of Directors, he shall give the Corporation a bond (which shall be renewed every six years) in such sum and with such surety or sureties as shall be satisfactory to the Board of Directors for the faithful performance of the duties of his office and for the restoration to the Corporation, in case of his death, resignation, retirement or removal from office, of all books, papers, vouchers, money and other property of whatever kind in his possession or under his control belonging to the Corporation.

(j) Assistant Treasurer. The Assistant Treasurer, or if there shall be more than one, the assistant treasurers in the order determined by the Board of Directors (or if there be no such determination, then in the order of their election), shall, in the absence of the Treasurer or in the event of his inability or refusal to act, perform the duties and exercise the powers of the Treasurer and shall perform such other duties and have such other powers as the Board of Directors may from time to time prescribe.

(k) For purposes of this Section 6, "disability" shall mean the significant impairment, resulting from any

---

physical or mental condition, of the Chief Executive Officer's ability to perform his duties, for a period of six or more consecutive months.

**Section 7. Voting Securities of Corporation** . Unless otherwise ordered by the Board of Directors, the Chief Executive Officer shall have full power and authority on behalf of the Corporation to attend and to act and vote at any meetings of security holders of corporations in which the Corporation may hold securities, and at such meetings shall possess and may exercise any and all rights and powers incident to the ownership of such securities which the Corporation might have possessed and exercised if it had been present. The Board of Directors by resolution from time to time may confer like powers upon any other person or persons.

## **ARTICLE V** **CERTIFICATES OF STOCK**

### **Section 1. Certificated or Uncertificated Shares** .

(a) The shares of the Corporation's stock shall be evidenced by certificates for shares of stock in such form as the Board of Directors may from time to time prescribe, provided that the Board of Directors may authorize the issue of some or all of the shares of any or all of the Corporation's classes or series of stock without certificates. Any such authorization shall not affect shares already represented by a certificate until the certificate is surrendered to the Corporation. Except as expressly provided by law, there shall be no differences in the rights and obligations of shareholders based on whether or not their shares are represented by certificates.

(b) In the case of uncertificated shares, within a reasonable time after the issuance or transfer thereof, the Corporation shall send the shareholder a written information statement containing: (i) the name of the Corporation and a statement that the Corporation is organized under the laws of the State of Georgia; (ii) the name of the person to whom the uncertificated shares have been issued or transferred; (iii) the number and class of shares, and the designation of the series, if any, to which the information statement relates; and (iv) if applicable, a statement as to the existence of any restrictions on transfer or registration of transfer of the shares. The information statement shall also contain the following statement: "This information statement is merely a record of the rights of the addressee as of the time of its issuance. Delivery of this information statement, by itself, confers no right on the recipient. This information statement is neither a negotiable instrument nor a security."

**Section 2. Lost Certificates** . The Board of Directors may direct that a new certificate or, in the event that the Board of Directors has authorized the issuance of shares of the relevant class or series of stock without certificates, an information statement described in Section 1(b) of this Article be issued in place of any certificate theretofore issued by the Corporation and alleged to have been lost, stolen or destroyed, upon the making of an affidavit of that fact by the person claiming the certificate of stock to be lost, stolen or destroyed. When authorizing such issue of a new certificate or, in the case of uncertificated shares, an information statement, the Board of Directors may, in its discretion and as a condition precedent to the issuance thereof, require the owner of such lost, stolen or destroyed certificate, or his legal representative, to advertise the same in such manner as it shall require and/or to give the Corporation a bond in such sum as it may direct as indemnity against any claim that may be made against the Corporation with respect to the certificate alleged to have been lost, stolen or destroyed.

### **Section 3. Transfers of Stock** .

(a) Transfers of shares of the capital stock of the Corporation shall be made only on the books of the Corporation by the record holder thereof, or by his duly authorized attorney, or with a transfer clerk or transfer agent appointed as in Section 5 of this Article, and in the case of certificated shares, only on surrender of the certificate or certificates representing such shares, properly endorsed or accompanied by a duly executed stock transfer power and the payment of all taxes thereon. Upon receipt of proper transfer instructions from the record holder of uncertificated shares of stock, which may be in the form of

---

a properly endorsed information statement described in Section 1(b), and the payment of all taxes thereon, such uncertificated shares shall be cancelled and issuance of new equivalent shares shall be made to the person entitled thereto and the transaction shall be recorded in the books of the Corporation.

(b) The Corporation shall be entitled to recognize the exclusive right of a person registered on its books as the owner of shares to receive dividends, and to vote as such owner, and for all other purposes, and shall not be bound to recognize any equitable or other claim to or interest in such share or shares on the part of any other person, whether or not it shall have express or other notice thereof, except as otherwise provided by law.

(c) Certificated shares of capital stock may be transferred by delivery of the certificates thereof, accompanied either by an assignment in writing on the back of the certificates or by separate stock power to sell, assign and transfer the same, signed by the record holder thereof, or by his duly authorized attorney in fact. Uncertificated shares of capital stock may be transferred by delivery of written instructions, which may be in the form of a properly endorsed information statement described in Section 1(b), or by separate stock power to sell, assign and transfer the same, signed by the record holder thereof, or by his duly authorized attorney in fact, or by electronic transfer instructions from the broker authorized by the record holder or by his duly authorized attorney in fact. No transfer of certificated or uncertificated shares shall affect the right of the Corporation to pay any dividend upon the stock to the holder of record as the holder in fact thereof for all purposes, and no transfer shall be valid, except between the parties thereto, until such transfer shall have been made upon the books of the Corporation as herein provided.

(d) The Board may, from time to time, make such additional rules and regulations as it may deem expedient, not inconsistent with these Bylaws or the Articles of Incorporation, concerning the issue, transfer, and registration of certificates for shares or uncertificated shares of the capital stock of the Corporation.

**Section 4. Record Date** . In order that the Corporation may determine the shareholders entitled to notice of or to vote at any meeting of shareholders or any adjournment thereof, or to demand a special meeting, or to express consent to corporate action in writing without a meeting, or entitled to receive payment of any dividend or other distribution or allotment of any rights, or entitled to exercise any rights in respect of any change, conversion or exchange of stock or for the proposal of any other lawful action, the Board of Directors may fix, in advance, a record date, which shall not be more than 70 days and, in case of a meeting of shareholders, not less than 10 days prior to the date on which the particular action requiring such determination of shareholders is to be taken. If no record date is fixed by the Board for the determination of shareholders entitled to notice of and to vote at any meeting of shareholders, the record date shall be at the close of business on the day next receding the day on which the notice is given, or, if notice is waived, at the close of business on the day next preceding the day on which the meeting is held. If no record date is fixed for other purposes, the record date shall be at the close of business on the day next preceding the day on which the Board of Directors adopts the resolution relating thereto. A determination of Shareholders of record entitled to notice of or to vote at a meeting of shareholders shall apply to any adjournment of the meeting unless the Board of Directors shall fix a new record date for the adjourned meeting, which it shall do if the meeting is adjourned to a date more than 120 days after the date fixed for the original meeting.

**Section 5. Transfer Agent and Registrar** . The Board of Directors may appoint one or more transfer agents or one or more transfer clerks and one or more registrars, and may require all certificates of stock to bear the signature or signatures of any of them.

## **ARTICLE VI** **GENERAL PROVISIONS**

**Section 1. Dividends** . Dividends upon the capital stock of the Corporation, subject to the provisions of the Articles of Incorporation, if any, may be declared by the Board of Directors at any regular or special meeting, pursuant to law. Dividends may be paid in cash, in property, or in shares of the Corporation's capital stock, subject

---

to the provisions of the Articles of Incorporation and applicable law. Before payment of any dividend, there may be set aside out of any funds of the Corporation available for dividends such sum or sums as the directors from time to time, in their absolute discretion, think proper as a reserve or reserves to meet contingencies, or for equalizing dividends, or for repairing or maintaining any property of the Corporation, or for such other purpose as the directors shall think conducive to the interest of the Corporation, and the directors may modify or abolish any such reserve in the manner in which it was created.

**Section 2. Fiscal Year**. The fiscal year of the Corporation shall be fixed by resolution of the Board of Directors.

**Section 3. Seal**. The corporate seal shall have inscribed thereon the name of the Corporation, the year of its organization and the words "Corporate Seal" and "Georgia." The seal may be used by causing it or a facsimile thereof to be impressed or affixed or reproduced or otherwise. In the event it is inconvenient to use such a seal at any time, the signature of the Corporation followed by the word "Seal" enclosed in parentheses shall be deemed the seal of the Corporation.

**Section 4. Annual Statements**. Not later than four months after the close of each fiscal year, and in any case prior to the next annual meeting of shareholders, the Corporation shall prepare:

- (a) A balance sheet showing in reasonable detail the financial condition of the Corporation as of the close of its fiscal year, and
- (b) A profit and loss statement showing the result of its operations during its fiscal year.

Upon written request, the Corporation promptly shall mail to any shareholder of record a copy of the most recent such balance sheet and profit and loss statement.

**Section 5. Business Combinations With Interested Shareholders**. All of the requirements and provisions of Article II A, Chapter 2, Title 14 of the Georgia Business Corporation Code of the Official Code of Georgia Annotated, or as the same may be amended or re-codified from time to time, shall apply to the Corporation.

**Section 6. Shareholders' Right to Inspect Records**. To the extent such limitation is permitted by law, a shareholder owning two percent or less of the outstanding shares of the Corporation shall have no right to inspect or copy excerpts from minutes of any meeting of the Board of Directors, records of any action of a committee of the Board of Directors while acting in place of the Board of Directors on behalf of the Corporation, minutes of any meeting of the shareholders, records of action taken by the shareholders or the Board of Directors without a meeting, the accounting records of the Corporation, and the record of shareholders.

## **ARTICLE VII**

### **INDEMNIFICATION OF DIRECTORS & OFFICERS**

**Section 1. Indemnification**. The Corporation shall indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding (including, but not limited to, any action, suit or proceeding by or in the right of the Corporation), whether civil, criminal, administrative or investigative, by reason of the fact that he is or was a director, advisory director, officer, employee or agent of the Corporation or is or was acting at the request of the Corporation, or who was serving as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, and shall advance expenses to such person reasonably incurred in connection therewith, to the fullest extent permitted by the relevant provisions of the Georgia Business Corporation Code, as such law presently exists or hereafter may be amended.

**Section 2. Purchase of Insurance**. The Board of Directors may authorize the Corporation to purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the Corporation, or is or was serving at the request of the Corporation as a director, officer, partner, trustee, employee or agent of

---

another corporation, partnership, joint venture, trust, employee benefit plan, or other enterprise against liability asserted against him or incurred by him in any such capacity or arising out of his status as such whether or not the Corporation would have the power to indemnify him against such liability under the provisions of this Article VII or the Georgia Business Corporation Code.

### **ARTICLE VIII** **ADVISORY DIRECTORS**

The Board of Directors of the Corporation may at its annual meeting, or from time to time thereafter, appoint any individual to serve as a member of an Advisory Board of Directors of the Corporation. Any individual appointed to serve as a member of an Advisory Board of Directors of the Corporation shall be permitted to attend all meetings of the Board of Directors and may participate in any discussion thereat, but such individual may not vote at any meeting of the Board of Directors or be counted in determining a quorum for such meeting. It shall be the duty of members of the Advisory Board of Directors of the Corporation to advise and provide general policy advice to the Board of Directors of the Corporation at such times and places and in such groups and committees as may be determined from time to time by the Board of Directors, but such individual shall not have any responsibility or be subject to any liability imposed upon a director or in any manner otherwise deemed a director. The compensation paid to members of the Advisory Board of Directors shall be determined from time to time by the Board of Directors of the Corporation. Each member of the Advisory Board of Directors, except in the case of his earlier death, resignation, retirement, disqualification or removal, shall serve until the next succeeding annual meeting of the Board of Directors and thereafter until his successor shall have been appointed.

### **ARTICLE IX** **EMERITUS DIRECTORS**

Any director of the Corporation who is not an officer or employee of the Corporation and who has served as a director in such capacity for five or more years and has attained fifty-five (55) years of age shall be eligible to be appointed as a director emeritus upon his retirement or resignation. A director emeritus shall be entitled to serve for a term equal to said director's length of service as a member of the Board of Directors. The director emeritus shall have the right to attend and participate in discussions of the business of the Corporation at regular and special meetings of the Board of Directors but shall not be entitled to vote on any matter. The director emeritus shall be a goodwill ambassador on behalf of the Corporation and shall hold himself or herself available at mutually convenient times for consultation with members of the Board and senior management of the Corporation concerning the business and affairs of the Corporation.

### **ARTICLE X** **AMENDMENTS**

The Board of Directors shall have power to amend or repeal the Bylaws or adopt new Bylaws, but any Bylaws adopted by the Board of Directors may be altered, amended or repealed, and new Bylaws adopted, by the shareholders. The shareholders may prescribe that any Bylaw or Bylaws adopted by them shall not be altered, amended or repealed by the Board of Directors. Action by the shareholders with respect to Bylaws shall be taken by an affirmative vote of a majority of the voting power of all shares entitled to elect directors, and action by the directors with respect to Bylaws shall be taken by an affirmative vote of a majority of all directors then holding office.

---

**RESOLUTION OF THE BOARD OF DIRECTORS  
OF  
AFLAC INCORPORATED**

**RESOLVED** , that the Board finds it advisable and in the best interests of the Corporation and its shareholders that Article III, Section 2(a) of the Bylaws of the Corporation be, and it hereby is, amended to read as follows:

Section 2. Number, Election and Term.

(a) The number of Directors which shall constitute the whole Board shall be not less than three (3) or more than twenty-five (25). The specific number of Directors within such range shall be fixed or changed from time to time by a majority of the Board of Directors then in office. A decrease in the number of Directors shall not have the effect of shortening the term of any incumbent director.

Except as otherwise provided in these Bylaws shareholders shall elect Directors by a vote of not less than a plurality of the votes present in person or represented by proxy at the meeting. Each Director elected shall hold office until his successor is elected and qualified or until his earlier resignation, removal from office or death. No person 20 years of age or younger or 75 years of age or older shall be eligible for election, reelection, appointment, or reappointment as a member of the Board of Directors. Directors need not be residents of the State of Georgia or shareholders of the Corporation.

**Adopted 10/21/06**

---

AMENDED AND RESTATED ARTICLE III, SECTION 2(a)  
OF THE BYLAWS

**Section 2. Number, Election and Term .**

(a) The number of Directors which shall constitute the whole Board shall be not less than three (3) or more than twenty-five (25). The specific number of Directors within such range shall be fixed or changed from time to time by a majority of the Board of Directors then in office. A decrease in the number of Directors shall not have the effect of shortening the term of any incumbent Director.

Except as otherwise provided in these Bylaws, a nominee for Director shall be elected if the votes cast for such nominee's election exceed the votes cast against such nominee's election; provided, however, that the Directors shall be elected by a plurality of the votes cast at any meeting of shareholders for which (i) the Secretary of the Corporation receives a notice that a shareholder has nominated a person for election to the Board of Directors in compliance with the advance notice requirements for shareholder nominees for Director set forth in this Section 2; and (ii) such nomination has not been withdrawn by such shareholder on or prior to the fourteenth day preceding the date the Corporation first mails its notice of meeting for such meeting to the shareholders.

Each Director elected shall hold office until his successor is elected and qualified or until his earlier resignation, removal from office or death. No person 20 years of age or younger or 75 years of age or older shall be eligible for election, reelection, appointment, or reappointment as a member of the Board of Directors. Directors need not be residents of the State of Georgia or shareholders of the Corporation.

AMENDED AND RESTATED ARTICLE II, SECTION 5  
OF THE BYLAWS

**Section 5. Voting .**

When a quorum is present at any meeting, the vote of the holders of stock representing a majority of the voting power, as defined in the Articles of Incorporation, present in person or represented by proxy shall decide any question brought before such meeting, unless the question is one upon which by express provision of law, the Articles of Incorporation or these Bylaws, a different vote is required, in which case such express provision shall govern and control the decision of the question. Each shareholder shall at every meeting of the shareholders be entitled to vote, as defined, in person or by proxy for each share of the capital stock having voting power registered in his name on the books of the Corporation, but no proxy shall be voted or acted upon after 11 months from its date, unless otherwise provided in the proxy.

**Adopted 02/10/2009**

---

AMENDED AND RESTATED ARTICLE II, SECTION 5  
OF THE BYLAWS

**Section 5. Voting.** When a quorum is present at any meeting, any question brought before such meeting shall be determined by a majority of the votes cast at the meeting of the holders of shares entitled to vote thereon, unless the question is one upon which by express provision of law, the Articles of Incorporation or these Bylaws, a different vote is required, in which case such express provision shall govern and control the decision of the question. For purposes of this Section, a majority of the votes cast means that the number of “for” votes cast exceeds the number of “against” votes cast. Each shareholder shall at every meeting of the shareholders be entitled to vote, as defined, in person or by proxy for each share of the capital stock having voting power registered in his name on the books of the Corporation, but no proxy shall be voted or acted upon after 11 months from its date, unless otherwise provided in the proxy.

**Adopted 05/03/2010**

---

AMENDED AND RESTATED ARTICLE II, SECTION 2  
OF THE BYLAWS

**Section 2. Special Meetings.**

(a) General. Special meetings of the shareholders for any purpose or purposes may be called by, and only by, (i) the Board of Directors, (ii) the Chairman of the Board of Directors, (iii) the Chief Executive Officer or (iv) solely to the extent required by Section 2(b), the Secretary of the Corporation. Each special meeting shall be held on such date, and at such time and place either within or without the State of Georgia as may be stated in the notice of the meeting.

(b) Shareholder Requested Special Meetings

(i) Special meetings of the shareholders (each a "Shareholder Requested Special Meeting") shall be called by the Secretary upon the written request of a shareholder (or a group of shareholders formed for the purpose of making such request) who or which has beneficial ownership of an aggregate of 25 percent or more of all the votes entitled to be cast on each issue to be considered at the Shareholder Requested Special Meeting by the holders of issued and outstanding capital stock of the Corporation (the "Requisite Percent") as of the date of submission of the request. Compliance by the requesting shareholder or group of shareholders with the requirements of this section and related provisions of these Bylaws shall be determined in good faith by the Board of Directors, which determination shall be conclusive and binding on the Corporation and the shareholders.

(ii) A request for a Shareholder Requested Special Meeting must contain the information set forth below and be signed by the beneficial owners of the Requisite Percent of the Corporation's capital stock (or their duly authorized agents) and be delivered to the Secretary at the principal office of the Corporation by registered mail, return receipt requested, or by electronic transmission.

Such request shall (A) set forth a statement of the specific purpose or purposes of the meeting and the matters proposed to be acted on at such special meeting, (B) bear the date of signature of each shareholder (or duly authorized agent) signing the request, (C) set forth (1) the name and address, as they appear in the Corporation's books, of each shareholder signing such request (or on whose behalf the request is signed), (2) the number of shares of capital stock of the Corporation as to which such shareholder has beneficial ownership, and (3) include evidence of the fact and duration of such shareholder's beneficial ownership of such stock consistent with that which is required under Regulation 14A under the Securities Exchange Act of 1934, as amended (the "1934 Act"), (D) set forth all information relating to each such shareholder that must be disclosed in solicitations of proxies for election of directors in an election contest (even if an election contest is not involved), or is otherwise required, in each case, pursuant to Regulation 14A under the 1934 Act, (E) describe any material interest of each such shareholder in the specific purpose or purposes of the meeting, and (F) include an acknowledgment by each shareholder and any duly authorized agent that any disposition of shares of capital stock of the Corporation as to which such shareholder has beneficial ownership as of the date of delivery of the special meeting request and prior to the record date for the proposed meeting requested by such shareholder shall constitute a revocation of such request with respect to such shares. In addition, the shareholder and any duly authorized agent shall promptly provide any other information reasonably requested by the Corporation to allow it to satisfy its obligations under applicable law.

Any requesting shareholder may revoke a request for a special meeting at any time by a written or electronic revocation delivered to the Secretary at the principal executive offices of the Corporation. If, following such revocation at any time before the date of the Shareholder Requested

---

Special Meeting, the remaining requests are from shareholders holding in the aggregate less than the Requisite Percent, the Board of Directors, in its discretion, may cancel the Shareholder Requested Special Meeting.

(iii) Notwithstanding the foregoing, the Secretary shall not be required to call a special meeting of shareholders if (A) the request for such special meeting does not comply with this Section 2(b), (B) the request relates to an item of business that is not a proper subject for action by the shareholders of the Corporation under applicable law, or (C) the request was made in a manner that involved a violation of Regulation 14A under the 1934 Act or other applicable law.

(iv) Any Shareholder Requested Special Meeting shall be held at such date, time and place within or without the state of Georgia as may be fixed by the Board of Directors; provided, however, that the date of any Shareholder Requested Special Meeting shall be not more than seventy (70) days after the record date for such meeting (the "Meeting Record Date"). In fixing a date and time for any Shareholder Requested Special Meeting, the Board of Directors may consider such factors as it deems relevant within the good faith exercise of business judgment, including, without limitation, the nature of the matters to be considered, the facts and circumstances surrounding any request for the special meeting and any plan of the Board of Directors to call an annual meeting or a special meeting.

(v) Business transacted at any Shareholder Requested Special Meeting shall be limited to the purpose(s) stated in the request; provided, however, that nothing herein shall prohibit the Corporation from submitting additional matters to a vote of the shareholders at any Shareholder Requested Special Meeting; provided such additional matters are set forth in the meeting notice delivered to shareholders in connection with such Shareholder Requested Special Meeting.

**Adopted 08/12/2014**

EXHIBIT 10.4

**SECOND AMENDMENT TO THE AFLAC INCORPORATED SUPPLEMENTAL EXECUTIVE  
RETIREMENT PLAN  
(as amended and restated effective January 1, 2009)**

This Amendment to the Aflac Incorporated Supplemental Executive Retirement Plan, as amended and restated effective January 1, 2009 (the "Plan"), is made by Aflac Incorporated (the "Company").

**WITNESSETH:**

**WHEREAS** , the Company maintains the Plan for the benefit of certain key management and highly compensated employees; and

**WHEREAS** , pursuant to Section 8.1 of the Plan, the Compensation Committee of the Board of Directors of the Company (the "Compensation Committee") has the right to amend the Plan at any time; and

**WHEREAS**, the Compensation Committee wishes to amend the Plan to provide that the Plan will be frozen such that there will be no new participants added to the Plan after December 31, 2014.

**NOW, THEREFORE, BE IT RESOLVED** , that effective as of January 1, 2015, the Plan is hereby amended as follows:

1. Section 2.1 of the Plan is amended by deleting said section in its entirety and substituting in lieu thereof the following:

**2.1 Selection of Participants.**

Effective as of January 1, 2015, no further Eligible Employees will become Participants in the Plan. Prior to such date, the Compensation Committee, in its sole discretion, shall designate which Eligible Employees shall become Participants in the Plan and, for each such Eligible Employee, his Participation Date. The Administrative Committee shall maintain a list of the names and Participation Dates of each Participant in its records. Notwithstanding anything herein to the contrary, all aspects of the selection of Participants before January 1, 2015, shall be in the sole discretion of the Compensation Committee and regardless of title, duties or any other factors, there shall be no requirement whatsoever that any individual or group of individuals be allowed to participate herein.

2. Except as amended herein, the Plan shall continue in full force and effect.

**IN WITNESS WHEREOF** , Aflac Incorporated has caused this Amendment to the Plan to be executed on the date shown below.

EXHIBIT 10.49

**AMENDMENT TO EMPLOYMENT AGREEMENT  
BETWEEN ERIC KIRSCH AND  
AMERICAN FAMILY LIFE ASSURANCE COMPANY OF COLUMBUS**

THIS AMENDMENT ("Amendment") is entered into as of the 31<sup>st</sup> day of December 2014, by and between American Family Life Assurance Company of Columbus, a Nebraska corporation (hereinafter referred to as "Corporation") and Eric Kirsch (hereinafter referred to as "Employee").

W I T N E S S E T H T H A T

WHEREAS, Corporation and Employee entered into an Employment Agreement dated November 1, 2011 which was amended by amendments dated December 10, 2012 and January 1, 2014 (such agreement as so amended being referred to as the "Employment Agreement"); and

WHEREAS, Corporation and Employee wish to amend the Employment Agreement, by increasing Employee's base salary effective as of January 1, 2015.

NOW, THEREFORE, in consideration of the mutual promises and covenants set forth and contained herein, Corporation and Employee agree that the Employment Agreement shall be modified as follows:

1. Exhibit A of this Agreement shall be fully amended, restated, superseded and replaced in its entirety with the form of Exhibit A attached hereto and made a part hereof.
2. This Amendment may be executed in counterparts and exchanged by facsimile or electronically scanned copy. Each such counterpart shall be deemed to be an original and all such counterparts together shall constitute one and the same instrument.
3. Except as expressly amended by this Amendment, the Employment Agreement shall remain in full force and effect in accordance with its terms and continue to bind the parties.
4. The Amendment as it relates to Base Salary shall be effective as of January 1, 2015.

**[The remainder of this page is intentionally left blank.]**

---

IN WITNESS WHEREOF, Corporation has hereunto caused its duly authorized executive to execute this Amendment on behalf of Corporation, and Employee has hereunto set his hand, all being done in duplicate originals, with one original being delivered to each party, as of the 31<sup>st</sup> day of December, 2014.

I, Daniel P. Amos, certify that:

1. I have reviewed this annual report on Form 10-K of Aflac Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

I, Kriss Cloninger III, certify that:

1. I have reviewed this annual report on Form 10-K of Aflac Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Kriss Cloninger III

President, Chief Financial Officer and Treasurer

**EXHIBIT 32**

**Certification of CEO and CFO Pursuant to  
18 U.S.C. Section 1350,  
as Adopted Pursuant to  
Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the Annual Report on Form 10-K of Aflac Incorporated (the "Company") for the annual period ended December 31, 2014, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Daniel P. Amos, as Chief Executive Officer of the Company, and Kriss Cloninger III, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
