

Triumph Group, Inc.

Leveraging the **Power**  
of **Scale**

Now larger and stronger than ever, Triumph delivers fully integrated design, engineering, manufacturing and maintenance solutions to the global aerospace industry.

## Solid performance yields new opportunities

Fiscal 2010 was a pivotal year for Triumph as the company delivered superior financial results in a difficult economic environment and took important steps to strengthen Triumph for the future.

### Financial Achievements

- Net sales in fiscal 2010 totaled more than \$1.29 billion, a 4% increase over fiscal 2009.
- Financial performance improved steadily as the year progressed. Fourth quarter revenues in fiscal 2010 exceeded last year's results by 13%, while income from continuing operations increased 11%.
- During the fiscal year, Triumph generated \$169.6 million of cash flow from operations – a 26% increase over fiscal 2009's record performance.
- Triumph's balance sheet remained exceptionally strong, with a debt-to-capitalization ratio of 29.4% in fiscal 2010.
- Backlog, the value of firm orders under contract over the next two years, totaled \$1.3 billion at year end.

### Cultivating Future Growth

- Triumph's management team was strengthened with the appointment of a new President and Chief Operating Officer, Jeffrey D. Frisby.
- Triumph continued to expand internationally as construction began on new manufacturing facilities in Mexico.
- Near the fiscal year end, Triumph announced the acquisition of Vought Aircraft, nearly tripling annual revenues and adding important new capabilities as a Tier One Capable aerospace supplier.

### About Triumph

Triumph Group, Inc., headquartered in Wayne, Pennsylvania, is comprised of 44 highly specialized aerospace manufacturing and maintenance companies at 64 locations worldwide, providing integrated solutions for the global aerospace market.

Triumph companies design, engineer, manufacture, repair and overhaul a broad portfolio of aerostructures, aircraft components, accessories, subassemblies and systems. All companies share the Triumph name and a common commitment to integrity, innovation, quality and service.

Triumph's mission is to be the premier aerospace and defense company recognized by customers as their supplier of choice for the aerospace structures, components and assemblies Triumph provides. To achieve our goals, Triumph protects the integrity of the individual companies while offering each company the advantages of being part of a larger entity. This operating philosophy provides flexibility to capitalize on the changing market environment and deliver superior customer satisfaction.

## Fellow Stockholders:

**RICHARD C. ILL**

Chairman and Chief Executive Officer

Fiscal 2010 was a most successful year for the Triumph Group. We achieved excellent financial results despite strong economic headwinds, strengthened our management team with the appointment of a new President and Chief Operating Officer, and announced a major acquisition that will nearly triple our annual revenues and launch Triumph into the ranks of the aerospace industry's Tier One suppliers.

The acquisition of Vought Aircraft from The Carlyle Group, a global private equity investment firm, heralds a new chapter in Triumph's relatively short history. The addition of Vought, a major global supplier of aerostructures for the commercial, military and business aviation industries, provides the size and scale to allow all Triumph companies to compete successfully at any level of the aerospace supply chain.

I want to emphasize that this latest move, while bold in magnitude and impact, is a logical extension of our long-standing acquisitions strategy, and does not portend any significant change in our company strategy or business philosophy. We remain committed to the bedrock principles responsible for Triumph's growth in terms of both financial performance and reputation since our founding in 1993.

### **A Year of Performance**

Even though the aerospace industry is cyclical, Triumph expects to profit in all phases of the business cycle, and fiscal 2010 was no exception. While retrenchment throughout the aerospace industry

made it impossible to match our record performance in fiscal 2009, we redoubled our efforts to manage our companies more effectively and efficiently through aggressive cost control and continued emphasis on cash generation. Likewise, our conservative financial management practices have allowed us to avoid excessive debt and to remain strong even during perilous economic times.

As we refined and enhanced our operations, we continued to make progress toward our strategic goals. Work began on our new manufacturing facilities in Zacatecas, Mexico – which ultimately will allow us to better manage production costs and to expand the capacity of our domestic U.S. manufacturing plants. Together with our new Bangkok maintenance facility and our operations in Europe and Asia, the Mexican expansion reflects Triumph's growing global footprint.

In March we acquired Fabritech, a leading component manufacturer and repair station for critical military helicopter platforms. Fabritech brings us extensive experience in the military rotary-wing market, which we can leverage across our entire organization. The company will operate as Triumph Fabrications-St. Louis, joining our Aftermarket Services Group.

Our presence in the rotary-wing aircraft market continues to grow. In July 2009 Triumph was awarded a multi-year supply agreement by Bell Helicopter to provide the main transmission assembly for the 429 light twin IFR helicopter. In October 2009 Triumph was selected to develop systems and critical components for the Sikorsky CH-53K helicopter being developed to provide heavy lift capability for the U.S. Marine Corps. Both of these awards involve collaboration among multiple Triumph companies.

Despite uncertainties in the economy, our backlog for both fixed-wing aircraft and rotorcraft increased as aerospace manufacturers moved steadily toward consistent production schedules for the next generation of aircraft needed to replace aging fleets. Likewise, the business jet market showed signs of recovery as corporate profits and general economic conditions improve.

In late July, we strengthened our management team with the appointment of Jeffrey D. Frisby, former President of Triumph's Aerospace Systems Group, as President and Chief Operating Officer. David Kornblatt, our Chief Financial Officer, was promoted from Senior Vice President to Executive Vice President. Both have played key roles in making Triumph what it is today – a premier supplier to the global aerospace industry known for its commitment to integrity, innovation, quality and performance.

## An Opportunity Emerges

The solid financial results we achieved in fiscal 2010 positioned Triumph to take advantage of unanticipated opportunities, even in a challenging economy. Such an opportunity emerged when we were approached by The Carlyle Group about acquiring their ownership investment in Vought Aircraft Industries, Inc. Triumph has had a long and profitable relationship with Vought as a key supplier. We were familiar with the company and its management, and were intrigued by its emergence as a potential acquisition candidate.

Vought met all of Triumph's strategic requirements – the same standards we apply to all acquisitions – only on a much larger scale. Its assets included a strong management team, a profitable product portfolio that expands Triumph's franchise, and the ability to make an immediate contribution to earnings. Moreover, the Vought acquisition offered a rare opportunity to increase Triumph's size and scale significantly in a single transaction – emerging as a key Tier One supplier in the aerospace marketplace.

Following due diligence, the acquisition was announced on March 23, 2010. The acquisition was subsequently approved by regulatory officials and the stockholders of both companies, and the transaction closed on June 16, 2010.

With this latest acquisition Triumph has grown from a company with \$1.3 billion in revenues in fiscal 2010 to one with \$3.2 billion in pro forma revenues in the same period. Triumph now supplies large aerostructures such as wing, fuselage and nacelle components for a cross section of aviation platforms, including fixed wing and rotary wing, in the commercial, military and business jet markets. Most important, our existing Triumph companies provide complementary skills and capabilities to add value to those aerostructures – with a range of state-of-the-art products, technologies and services.

## Transition with Stability

Admittedly, it's unusual for any company to acquire an entity larger than itself, and many have asked how such a major change will affect Triumph's strategy and management philosophy. Throughout our history, we've employed a unique, decentralized management philosophy that places both discretion and accountability with our individual companies, while maintaining a small corporate staff. We've taken pride in our ability to act as a big company and as a small company simultaneously.

Will this change, now that Triumph is a "big company?"

No. Our work culture will not change, because it's the foundation for all the success Triumph has achieved. It is part of our DNA.

Likewise our business strategy will remain constant, comprising five key principles:

- Continually add products and services.
- Expand operating capacity.
- Acquire aggressively.
- Market our complete portfolio of capabilities.
- Expand internationally.

Our values – integrity, innovation, quality and service – are reflected in our Code of Business Conduct and guide our every action.

The former Vought organization is being reorganized into three profit centers, each led by its own management team accountable for achieving specific sales and profit objectives. Each will adopt the Triumph name, and each will operate on the same basis as other Triumph companies. Triumph management will establish the overall direction and performance standards for the entire organization. Each individual company will be accountable for attaining corporate goals, but will have broad latitude and discretion to apply our strategies in ways that make sense for their own customers and markets.

While the Vought acquisition represents a major transition for Triumph, our strategy and business philosophy remain stable and constant in the ways they affect our customers, our employees, our suppliers and our stockholders.

## Our Partnership with Customers

Triumph will continue to go to market under the banner "One name. Many solutions." Even as we expect each Triumph operating company to achieve its own goals, we recognize that a primary source of growth comes from our companies working together, crossing disciplines and areas of expertise to meet a broader range of our customers' needs. Ultimately, the way our companies work together is customer driven, as project teams and alliances emerge to address specific needs.

These growth opportunities are greater than ever with our new aerostructures capabilities. As a Tier One Capable supplier, we are now able to design, engineer, manufacture and service not only entire aircraft structures but also their contents – drawing on the combined expertise of all 44 Triumph companies. We're able to leverage our size and scale to meet multiple, highly complex needs, offering our customers the convenience of working with a single source.

However, we're careful to emphasize our intention to be a Tier One "Capable" supplier. We believe we have a distinct competitive advantage in our ability to participate at any level of the aerospace supply chain – from the production of individual parts and components to the design, manufacture and maintenance of large aircraft structures.

As companies experiment with different kinds of partnerships at all levels of the supply chain, we will be careful to ensure that all relationships are profitable and do not expose Triumph to excessive risk. In situations where we are unable to participate as a risk-sharing partner, we will seek opportunities to contribute our expertise in other ways. We're eager to deploy our full range of capabilities in the service of all our customers, confident that we can be profitable in all our relationships.

#### **Our Partnership with Employees**

Integrating the Triumph and Vought organizations is a major undertaking, given the challenge of installing our distinctive management philosophy in the highly centralized Vought organization. Likewise, there are redundancies that must be eliminated as we build a single, highly efficient company.

We will proceed cautiously after careful analysis of Vought's capabilities to determine which of Vought's systems and procedures may benefit all our companies. We're particularly impressed with Vought's management depth, and believe that, by organizing the company into independent profit centers, we'll be able to retain that talent to provide the managerial discipline required in each operating unit.

Triumph has an obligation to our customers and to our stockholders to build a lean and efficient company. Some may be surprised by the frugality of our day-to-day decision-making, the small size of our corporate staff, and amenities common at many companies that we do without. It's our conviction that every dollar we save by avoiding unnecessary expenditures makes us more competitive and profitable – and that ultimately competitive, profitable companies offer the greatest opportunity for career growth.

There's no question whatsoever that Triumph's future depends on the talent, skills and creativity of our people. In a global marketplace showing little respect for boundaries of any nature, our people are Triumph's decisive, differentiating competitive advantage.

#### **Our Partnership with Suppliers**

The aerospace supply chain is a complex, interconnected web, with competing relationships at many different levels. As a new,

larger organization, we will explore opportunities to rationalize supply lines and to encourage collaboration among all Triumph companies. This consolidation is a natural consequence of any acquisition.

At the same time, we recognize that our success depends on fair dealing with all our suppliers, and we value our reputation as a trusted business partner. Sourcing decisions will be based on customer needs and grounded on what makes the best economic sense. Triumph's success as a supplier depends in large measure on the outstanding support we receive from our own supply chain, and we will continue to value and cultivate these important relationships.

#### **Our Partnership with Stockholders**

Triumph's mission has always been to build shareholder value, and that's especially true today. The fact that we've become a much larger company does not change this central duty in any way.

The unusual opportunity to significantly increase our revenues and capabilities in a single transaction has allowed us to leapfrog the many incremental steps that would have been required to build a Tier One Capable company. Immediately we will have the ability to leverage our size and scale to involve more of our companies in meeting a broader range and a greater volume of our customers' needs.

What made the Vought acquisition so attractive was the excellent strategic fit between our two companies and the possibility of adding significant new technical capabilities – at a very attractive valuation. The seller, The Carlyle Group, will continue to participate in our growth and profitability through a 31% minority ownership interest in Triumph. Even though the potential synergies are many, this is not an acquisition whose success depends on optimistic speculation and wishful thinking. The transaction has immediately increased our projected earnings per share for fiscal 2011 and beyond.

#### **Looking Ahead**

Our 2011 fiscal year will be full of challenge as we introduce the Triumph culture to the Vought organization and begin to integrate our capabilities as one company offering many solutions to our customers.

We expect that the business environment in the aerospace industry will remain volatile. Economic uncertainty appears to be the "new normal," and we will continue to employ conservative financial management principles that provide the flexibility required to address any contingency.

**RICHARD C. ILL**

Chairman and Chief Executive Officer

**M. DAVID KORNBLATT**

Executive Vice President,  
Chief Financial Officer and Treasurer

**JEFFRY D. FRISBY**

President and Chief Operating Officer

Jeffry D. Frisby, our new President and Chief Operating Officer, joined Triumph in 1998 as President of Frisby Aerospace, Inc., when Triumph acquired the company. In 2000 he was named Group President of Triumph Control Systems Group, and in 2003 was appointed President of Triumph Aerospace Systems Group.

Richard C. Ill has been appointed Chairman and will continue to serve as Chief Executive Officer.

M. David Kornblatt was promoted to Executive Vice President and will continue to serve as Chief Financial Officer.

Despite the inevitable ups and downs in the global and regional economies, we believe the overall outlook is quite favorable based on a number of key factors:

- As a new generation of aviation platforms complete testing and move into full production, demand for new aircraft will build as existing fleets continue to age.
- Unrest in hotspots throughout the world will continue to fuel demand for military aircraft – particularly transports, rotorcraft and unmanned vehicles.
- The economic power of Asia and its rising standard of living will increase demand for aircraft of all types. This trend is powerful and irreversible.
- Greater demand will increase competition among manufacturers, and OEMs will rely on their primary suppliers to a greater extent than ever before.
- As corporate profits rebound and airlines cut back schedules to the most profitable routes, demand for business jets will rebound.

Together, these forces point toward a future of growth and profit for Triumph Group companies. We are a key contributor to a broad array of aviation platforms, and are well positioned to provide integrated design, engineering, manufacturing and maintenance support to a growing customer base.

**In Closing**

The past year has been decisive for Triumph, and has reaffirmed the wisdom of our strategy, philosophy and values.

At a time when many companies were cutting back and regrouping, we took advantage of our strong financial position to take control of our destiny. As the result of a single transaction, we increased Triumph’s potential by a factor we can only imagine.

We remain a young company with an exciting vision for the future. Now over 12,000 strong, we are ready to take on the challenges of a changing world – confident of our ability to compete and win in the marketplace.

**RICHARD C. ILL**

Chairman and Chief Executive Officer

## The power of scale.

Triumph is now Tier One Capable, with strong positions in a broad array of commercial, military and business jet platforms. Customers include the world's leading aircraft and rotorcraft manufacturers, defense contractors, commercial airlines, and air cargo fleets. Triumph has 12,000 employees and a growing multinational footprint, with 64 locations worldwide.

Triumph's breadth of expertise makes the company unique among Tier One suppliers. With capabilities ranging from the fabrication of individual parts to the integration of large aircraft structures and their contents, Triumph has the flexibility to participate at any level of the aerospace supply chain. Customers may utilize the services of a single Triumph company, or work with project teams comprising multiple companies to address complex needs and requirements – all through a single contact.

## One name. Many solutions.

Triumph Group's 44 companies and 64 locations offer the ability to design, fabricate or overhaul virtually any type of part, component or assembly. All Triumph companies meet the exacting standards and quality requirements of the global aerospace industry – providing fully-integrated systems solutions. Triumph offers a full complement of services, and customers can access as few or as many as they require:

- Design and Engineering
- Research and Development
- Testing Laboratories
- Integration and Assembly
- Manufacturing
- Advanced Control Systems
- Maintenance, Repair and Overhaul

All Triumph companies share the Triumph name and a common commitment to the values of integrity, innovation, quality and service.

Triumph's recent acquisition of Vought Aircraft Industries creates a Tier One Capable supplier with the flexibility to serve any level of the aerospace supply chain – from a single part to a fully integrated aerostructure – all through a single point of contact.

As a major subcontractor for a broad range of commercial and military aircraft programs, Triumph serves as an important link between aircraft manufacturers and the aerospace supply chain – producing not only large aerostructures such as wings, fuselages, nacelles and helicopter cabins, but also the control systems which complete those structures and integrate them with other major aircraft components.

Triumph has the capability to form and machine both large and small components – adding value with expertise in exotic materials, composites, metals finishing, and thermal and acoustic technologies. Drawing on the skills of its Advanced Control Systems companies, Triumph has the ability to produce fully integrated aircraft structures with complete control and power systems, ready to attach to adjacent airframe structures.

Triumph offers a full complement of Design and Engineering, R&D, Testing, Manufacturing, Integration and Assembly, and MRO capabilities. Customers are able to access as few or as many services as they require.

## Design and Engineering

Triumph's design and engineering teams have the skills and experience required to transform ideas and concepts into finished product solutions for customers. No job is too small or too large – from simple brackets to major structural assemblies with complete control systems.

Proficiency in product data definition translation allows Triumph to support customers using virtually all computer-aided design software packages. Triumph's primary focus is on functionality and "producibility". Digital mockups are rigorously tested to assure maximum efficiency, productivity, safety and production stability.

## Research and Development

Extensive experience with new and emerging technologies allows Triumph to design products that establish new standards of excellence – increasing performance, reducing weight and maintenance requirements, and improving cost efficiency.

Triumph collaborates with customers to solve complex aerospace engineering problems through the use of new and advanced materials and production methods. Recent examples include fully integrated wing assemblies, advanced material empennages, damage-resistant leading edges, improved aircraft doors, and more efficient insulation and sound-dampening materials.

## Testing Laboratories

Triumph maintains test facilities comparable to prime aerospace OEMs offering full life-cycle testing capabilities – with U.S. Air Force, U.S. Navy, and Federal Aviation Administration certification, as well as U.S. Department of Defense security clearances.

Located in Dallas, Texas, the laboratory provides comprehensive capabilities for test design and fabrication, coupon and component testing, structures testing, full-scale structure testing, and advanced development and certification testing.

## Integration and Assembly

Because of its diversity and scale, Triumph is able to participate at any level of the manufacturing process, contributing solutions required to produce a fully integrated structure or assembly. With support from its Advanced Control Systems companies, Triumph is able to produce and assemble fully integrated aerostructures such as wings – complete with electrical harnesses, flight surface and controls, hydraulic lines and power supplies – ready to attach to the fuselage.

Triumph's ability to provide this diverse range of services through a single point of contact makes the company unique among Tier One suppliers. By meeting a broader range of customer needs, Triumph delivers added value while reducing total procurement costs.

## Manufacturing

Triumph has the capability to fabricate any part, component, assembly or structure in limited or extended production runs. World-class, state-of-the-art manufacturing capabilities allow Triumph to meet virtually any customer need – limiting outsourcing risk by providing maximum value and scheduling flexibility.

### Precision Machining

Triumph's precision machining capability is unmatched in the aerospace world. Triumph has the capability to machine and fabricate nearly any material used in the aerospace industry – including exotic materials such as molybdenum, tungsten and tantalum.

Triumph produces components of all sizes – ranging from small parts to large structures such as wings, bulkheads, fuselages and landing gear components. In addition to a very large part turning capacity, Triumph's multi-axis machining centers are capable of producing components in excess of 100 feet in length.

### Metal Fabrication

Triumph's capabilities for metal fabrication and assembly range from monolithic one-piece structures to complex multi-part assemblies. Triumph companies offer the capability to fabricate nearly any type of metal, including aluminum, titanium, all classifications of steel, and inconel. We also offer chemical milling capabilities for optimization of part strength and weight.

A partial list of products includes: wings, fuselages, empennages, nacelles, doors, helicopter cabins, nose and main landing gear assemblies, drag brace assemblies, rib cords, spars, stringers, window frames, longerons, bulkheads, seat/cargo tracks, floor beams, thrust reverser sliders, hinges and latches, trunnions, crown frames, and bell cranks.

### Metal Finishing

In addition to fabrication, Triumph offers metal processing capabilities including all types of anodizes, primers and top coatings, with facilities able to accommodate part sizes in excess of 100 feet in length. Triumph supports Tier One and Tier Two suppliers with finishing capabilities for a broad array of aviation platforms, while also serving the finishing needs of Triumph companies.

### Composite Systems

Triumph recognizes the need for composite materials in applications where traditional metal structures and assemblies are not the optimal material choice. Triumph engineers and scientists apply their technical expertise in the areas of chemistry, composites, polymers, metals, paints and coatings in conjunction with a wide variety of materials and surfaces.

Composite products are utilized in environmental control system ducting, feeder and mixer bays, floor panels, cockpit floors, crown panel assemblies, exterior surfaces and flight deck systems. Triumph also produces transparencies for rotary- and fixed-wing window applications.

### Tool Design and Fabrication

Because every customer's needs are unique, Triumph designs a complete, customized manufacturing system tailored to each product's individual requirements. This includes fabrication of specialized tooling and test equipment to assure quality while maximizing production efficiency.

## Advanced Control Systems

Complementing its ability to manufacture large aerostructures, Triumph designs, engineers and manufactures the mechanisms and control systems which allow those structures to function within an aircraft. These systems include geared products, electromechanical and hydraulic actuation systems, thermal controls and instrumentation.

### Geared Products

Triumph has two Centers of Excellence for the design and manufacture of gears and gear boxes. Capabilities range from simple gear cutting and grinding to complex gear trains and gear boxes and aircraft-mounted accessory drives. Triumph specializes in close-tolerance aerospace gear and gear train applications, supporting all major manufacturers of commercial and military fixed-wing aircraft and rotorcraft.

### Electromechanical Systems

Triumph specializes in electromechanical actuation, software and control, and is expert in the latest fly-by-wire technologies in use today. Triumph can provide complete system architecture studies and can manufacture virtually any type of motion control system using electrical power – from simple actuations to complex flight control and braking systems. A leader in the emerging electromechanical braking actuation technologies for fixed wing aircraft, Triumph also provides electromechanical control systems to replace and upgrade traditional hydraulic and pneumatic control systems.

### Hydraulic Systems

Triumph has the ability and experience to conduct architectural system studies for the design and manufacture of all components which typically comprise a hydraulic system – for both commercial and military applications. Utilizing the capabilities of multiple Triumph companies, the goal is to create a system that best meets the customer's requirements and needs, encompassing high pressure hydraulic pumps, reservoirs, heat exchangers, transport elements and control valving.

### Controls and Cables

Four Triumph sites are dedicated to the mechanical connections between controls and actuators. Components include push-pull, ball bearing low resistance, and backlash mechanical control system cables. Both cable control and ball bearing control systems provide higher reliability and lighter weight than comparable rod/crank and cable pulley systems. In addition, these controls are easier to install and maintain and offer a greater selection of control boxes and output devices. The precision ball bearing controls are used in applications with longer routing and higher loads.

### Thermal Controls

Triumph specializes in the design, development, manufacture, sales and service of thermal control products for the aerospace industry, ranging from insulation systems and blankets to acoustic noise reduction for airframes. Triumph also provides plate fin, tubular surface heat exchangers, liquid cooling systems, electronic cooling systems, oil reservoirs, high temperature bleed air environmental control systems, heat exchangers, hydraulic and fuel coolers, and heaters for aerospace systems.

### Cockpit Controls

Triumph designs and produces the control systems that connect critical flight control systems through mechanical means or software. Triumph offers a range of aircraft cockpit controls and instruments – including pilot/copilot control wheels, landing gear and park brake levers, flap and spoiler selection controls, and steering tillers.

## Maintenance, Repair, and Overhaul (MRO)

Triumph's MRO companies provide full life cycle service for all the structures and components Triumph produces as original equipment, as well as for products produced by others. Triumph's MRO support for the world's commercial and air cargo carriers, private aviation and the military ensure that aircraft are maintained in a constant state of readiness. Services include assisting customers in managing their inventory – reducing carrying costs while ensuring that parts and components are available when and where they are needed.

**APUs** Triumph is a leading provider of Auxiliary Power Unit repair and overhaul services, with certified state-of-the-art test facilities with full diagnostic capabilities. Services include flexible and customized exchange, lease and sales programs to support short-term and long-term spares needs. Additionally, Triumph provides repair and test capabilities for starters, fuel controls, load control valves and many other accessories to OEM manual specifications. Competencies also include gas turbine part manufacturing and repair, electron beam welding, CNC turning and milling, curvic grinding, low-pressure plasma spray, vacuum diffusion brazing and vacuum heat treating.

**Aerostructures** Triumph specializes in the maintenance, repair and overhaul of fan reversers, nacelle structures, flight control surfaces and refurbishment services for aircraft interiors. Triumph companies offer extensive expertise in metal and composite bonding, and have developed a number of leading-edge technologies and processes that yield increased reliability and durability for interior structures. Core competencies include fan reversers, inlet cowls, fan cowls, engine liners and ducts, flight control surfaces, sidewall panels, overhead bin doors, lavatories, galleys, light lenses and passenger service units.

**Accessories/Components** As a leading designer and manufacturer of hydraulic, hydromechanical, electromechanical and power drive systems, Triumph provides maintenance solutions tailored to each customer's individual needs. Triumph's support includes hydraulic pumps and motors, power transfer units, linear actuators, hydraulic valves, landing gear actuation, accumulators, reservoirs, accessory driven transmissions, flight trim actuation, push/pull cable control systems, cockpit controls, heat exchangers, liquid cooling systems, floor panels and environmental control ducting.

**Instruments** Triumph provides repair and overhaul services as well as component exchange programs, and serves as an authorized stocking distributor for a number of aircraft instrument and component OEMs. Triumph's core competencies include high-power systems, electromechanical analog/digital instrumentation, electrical accessories, pneumatic instrumentation, gyroscopic instrumentation, fuel system instrumentation and TCAS antennas.

**Rotables/Spares** With facilities located throughout North America, Europe and Asia, Triumph is able to position rotatable inventory at the point of use. Services include lease, exchange and sale of major components including APUs, fan reversers, instruments and accessories, and structural components. Triumph's network of facilities provides maintenance support solutions to customers throughout the world.

### Equal Opportunity at Triumph

Triumph Group, Inc. is committed to providing equal opportunities in the workplace.

### Forward-Looking Statements

In accordance with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company notes that certain statements contained in this report are forward-looking in nature. These forward-looking statements include matters such as our expectations for our industry, our markets, our Company's business strategy and potential and other future-oriented matters. Such matters inherently involve many risks and uncertainties that may cause actual results to differ materially from expected results. For additional information, please refer to the Company's Securities and Exchange Commission filings including its Form 10-K for the year ended March 31, 2010.

### Certifications

The certifications by the Chief Executive Officer and Chief Financial Officer of Triumph Group, Inc. required under Section 302 of the Sarbanes-Oxley Act of 2002 have been filed as exhibits to Triumph Group, Inc.'s 2010 Annual Report on Form 10-K. In addition, on July 24, 2009, the Chief Executive Officer of Triumph Group, Inc. certified to the New York Stock Exchange (NYSE) that he is not aware of any violation by the Company of NYSE corporate governance listing standards, as required by Section 303A.12(a) of the NYSE Corporate Governance Rules.

**Triumph Group, Inc.**

(Exact name of registrant as specified in its charter)

**Delaware**  
(State or other jurisdiction of  
incorporation or organization)

**51-0347963**  
(I.R.S. Employer Identification Number)

**1550 Liberty Ridge Drive, Suite 100, Wayne, Pennsylvania 19087**  
(Address of principal executive offices, including zip code)

Registrant's telephone number, including area code: **(610) 251-1000**

Securities registered pursuant to Section 12(b) of the Act:

**Common Stock, par value \$.001 per share**  
(Title of each class)

**New York Stock Exchange**  
(Name of each exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934. Yes  No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934. (Check one)

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes  No

As of September 30, 2009, the aggregate market value of the shares of Common Stock held by non-affiliates of the Registrant was approximately \$778 million. Such aggregate market value was computed by reference to the closing price of the Common Stock as reported on the New York Stock Exchange on September 30, 2009. For purposes of making this calculation only, the Registrant has defined affiliates as including all directors and executive officers.

The number of outstanding shares of the Registrant's Common Stock, par value \$.001 per share, on April 30, 2010 was 16,686,373.

**Documents Incorporated by Reference**

Portions of the following document are incorporated herein by reference:

The Proxy Statement of Triumph Group, Inc. to be filed in connection with our 2010 Annual Meeting of Stockholders is incorporated in part in Part III hereof, as specified herein.

## PART I

### Item 1. Business

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 relating to our future operations and prospects, including statements that are based on current projections and expectations about the markets in which we operate, and management's beliefs concerning future performance and capital requirements based upon current available information. Actual results could differ materially from management's current expectations. Additional capital may be required and, if so, may not be available on reasonable terms, if at all, at the times and in the amounts we need. In addition to these factors and others described elsewhere in this report, other factors that could cause actual results to differ materially include competitive and cyclical factors relating to the aerospace industry, dependence of some of our businesses on key customers, requirements of capital, product liabilities in excess of insurance, uncertainties relating to the integration of acquired businesses, general economic conditions affecting our business segment, technological developments, limited availability of raw materials or skilled personnel, changes in governmental regulation and oversight and international hostilities and terrorism. For a more detailed discussion of these and other factors affecting us, see the Risk Factors described in Item 1A of this Annual Report on Form 10-K. We do not undertake any obligation to revise these forward-looking statements to reflect future events.

#### General

Triumph Group, Inc. ("Triumph" or the "Company") was incorporated in 1993 in Delaware. Our companies design, engineer, manufacture, repair, overhaul and distribute aircraft components, such as hydraulic, mechanical and electromechanical control systems, aircraft and engine accessories, structural components and assemblies, non-structural composite components, thermal acoustic insulation systems, auxiliary power units, or APUs, avionics and aircraft instruments. We serve a broad spectrum of the aerospace industry, including original equipment manufacturers, or OEMs, of commercial, regional, business and military aircraft and components, as well as commercial airlines and air cargo carriers.

In March 2010, we acquired Fabritech, Inc. (now Triumph Fabrications—St. Louis). Through the addition of Triumph Fabrications—St. Louis, we have added high-end maintenance and manufactured solutions focused on aviation drive train, mechanical, hydraulic and electrical hardware items including gearboxes, cargo hooks and vibration absorbers. Triumph Fabrications—St. Louis also produces fabricated textile items such as seat cushions and sound insulation blankets for military rotary-wing platforms. The results of Triumph Fabrications—St. Louis are included in the Company's Aftermarket Services Segment from the date of acquisition.

In March 2010, we entered into definitive agreement to purchase Vought Aircraft Industries, Inc. ("Vought") from TC Group, L.L.C. ("Carlyle") for cash and stock consideration. Vought is a leading global manufacturer of aerostructures for commercial, military and business jet aircraft. Products include fuselages, wings, empennages, nacelles and helicopter cabins. Vought's customer base is comprised of the leading global aerospace OEMs and over 80% of their revenue is from sole source, long-term contracts. Vought's revenues for the year ended December 31, 2009 were \$1.9 billion and they employed approximately 5,900 people. Following the closing of this acquisition, Carlyle will own approximately 31% of the outstanding common stock of Triumph and will be subject to certain lock-up provisions. The transaction is subject to customary closing conditions, including regulatory approvals and approval of Triumph shareholders, and is expected to be completed in July 2010. The acquired business will operate as Triumph Aerostructures—Vought Aircraft Division, LLC.

## Products and Services

We offer a variety of products and services to the aerospace industry through two groups of operating businesses: (i) Triumph Aerospace Systems Group, whose companies design, engineer and manufacture a wide range of proprietary and build-to-print components, assemblies and systems for the global aerospace OEM market; and (ii) Triumph Aftermarket Services Group, whose companies serve aircraft fleets, notably commercial airlines, the U.S. military and cargo carriers, through the maintenance, repair and overhaul of aircraft components and accessories manufactured by third parties.

Our *Aerospace Systems Group* utilizes its capabilities to design, engineer and build complete metallic structural assemblies, as well as mechanical, electromechanical, hydraulic and hydromechanical control systems, while continuing to broaden the scope of detailed parts and assemblies that we supply to the aerospace market. Customers typically return such systems to us for repairs and overhauls and spare parts. This group also includes companies performing complex manufacturing, machining and forming processes for a full range of structural components, as well as complete assemblies and subassemblies. This group services the full spectrum of aerospace customers, which include aerospace OEMs and the top-tier manufacturers who supply them and airlines, air cargo carriers, and domestic and foreign militaries.

The products that companies within this group design, engineer, build and repair include:

- Acoustic insulation systems
- Aircraft and engine mounted accessory drives
- Cockpit control levers
- Composite and metal bonding
- Composite ducts and floor panels
- Control system valve bodies
- Exhaust nozzles and ducting
- Floor beams
- Heat exchangers
- High lift actuation
- Landing gear actuation systems
- Landing gear components and assemblies
- Main engine gear box assemblies
- Primary and secondary flight control systems
- Stretch-formed leading edges and fuselage skins
- Windows and window assemblies
- Wing spars and stringers

Our *Aftermarket Services Group* performs maintenance, repair and overhaul services (“MRO”) and supplies spare parts of various types of cockpit instruments, and gauges for the commercial and military aviation industry and primarily services the world’s airline and air cargo carrier customers. This group also designs, engineers, manufactures, repairs and overhauls aftermarket aerospace gas turbines engine components, offers comprehensive MRO solutions, leasing packages, exchange programs and parts and services to airline, air cargo and third party overhaul facilities. We also continue to develop Federal

Aviation Administration, or FAA, approved Designated Engineering Representative, or DER, proprietary repair procedures for the components we repair and overhaul, which range from detailed components to complex subsystems including APUs, thrust reversers, flight controls, engine accessories and avionics. Some specialties include navigation, flight, and engine monitoring instruments as well as autopilots, voice and data recorders, smoke detection systems and aircraft lighting. Companies in our aftermarket services group repair and overhaul various components for the aviation industry including:

- Air cycle machines
- APUs
- Cockpit instrumentation
- Constant speed drives
- Engine and airframe accessories
- Flight control surfaces
- Integrated drive generators
- Mechanical, hydraulic and electrical hardware items including gearboxes, cargo hooks and vibration absorbers
- Nacelles
- Remote sensors
- Thrust reversers
- Blades and vanes
- Cabin interior panes, shades, light lenses and other plastic components
- Combustors
- Stators
- Transition ducts
- Sidewalls
- Light assemblies
- Overhead bins

Certain financial information about our two segments can be found in Note 21 of “Notes to Consolidated Financial Statements.”

### **Proprietary Rights**

We benefit from our proprietary rights relating to designs, engineering and manufacturing processes and repair and overhaul procedures. For some products, our unique manufacturing capabilities are required by the customer’s specifications or designs, thereby necessitating reliance on us for the production of such specially designed products.

We view our name and mark as significant to our business as a whole. Our products are protected by a portfolio of patents, trademarks, licenses or other forms of intellectual property that expire at various dates in the future. We develop and acquire new intellectual property on an ongoing basis and consider all of our intellectual property to be valuable. However, based on the broad scope of our product lines, management believes that the loss or expiration of any single intellectual property right would not have a material effect on our results of operations, our financial position or our business

segments. Our policy is to file applications and obtain patents for our new products as appropriate, including product modifications and improvements. While patents generally expire 20 years after the patent application filing date, new patents are issued to us on a regular basis.

In our overhaul and repair businesses, OEMs of equipment that we maintain for our customers increasingly include language in repair manuals that relate to their equipment asserting broad claims of proprietary rights to the contents of the manuals used in our operations. There can be no assurance that OEMs will not try to enforce such claims including the possible use of legal proceedings. In the event of such legal proceedings, there can be no assurance that such actions against the Company will be unsuccessful. However, we believe that our use of manufacture and repair manuals is lawful.

#### **Raw Materials and Replacement Parts**

We purchase raw materials, primarily consisting of extrusions, forgings, castings, aluminum and titanium sheets and shapes, from various vendors. We also purchase replacement parts which are utilized in our various repair and overhaul operations. We believe that the availability of raw materials to us is adequate to support our operations.

## Operating Locations

We conduct our business through operating companies and divisions. The following chart describes the operations, customer base and certain other information with respect to our principal operating locations at March 31, 2010:

Operation	Subsidiary	Operating Location	Business	Type of Customers	Number of Employees
<b>TRIUMPH AEROSPACE SYSTEMS GROUP</b>					
Construction Brevetees d'Alfortville	Construction Brevetees d'Alfortville SAS	Alfortville, France	Manufactures mechanical ball bearing control assemblies for the aerospace, ground transportation, defense and marine industries.	Commercial and Military OEMs, Ground Transportation and Marine OEMs.	67
Triumph Actuation & Motion Control Systems	Triumph Actuation & Motion Control Systems—UK, Ltd.	Buckley, UK	Designs and builds proprietary advanced control products for flight actuation and motor control applications in all electrical aircraft and Unmanned Aerial Vehicles (“UAVs”).	Commercial, General Aviation, and Military OEMs.	47
Triumph Actuation Systems—Clemmons(1)  Triumph Actuation Systems—Freeport	Triumph Actuation Systems, LLC	Clemmons, NC  Freeport, NY	Designs, manufactures and repairs complex hydraulic and hydromechanical aircraft components and systems, such as variable displacement pumps and motors, linear actuators and valves, and cargo door actuation systems.	Commercial, General Aviation, and Military OEMs; Commercial Airlines, General Aviation and Military Aftermarket.	243
Triumph Actuation Systems—Connecticut	Triumph Actuation Systems—Connecticut, LLC	Bloomfield, CT East Lyme, CT Bethel, CT	Designs, manufactures and repairs complex hydraulic, hydromechanical and mechanical components and systems, such as nose wheel steering motors, helicopter blade lag dampers, mechanical hold open rods, coupling and latching devices, as well as mechanical and electromechanical actuation products.	Commercial, General Aviation, and Military OEMs; Military Aftermarket.	152

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
Triumph Actuation Systems—Valencia(1)	Triumph Actuation Systems—Valencia, Inc.	Valencia, CA	Designs, manufactures and repairs complex hydraulic and hydromechanical aircraft components and systems, such as accumulators, actuators, complex valve packages, and landing gear retract actuators.	Commercial, General Aviation, and Military OEMs.	202
Triumph Aerospace Systems—Newport News	Triumph Aerospace Systems—Newport News, Inc.	Newport News, VA San Diego, CA Huntsville, AL New Haven, CT	Offers a fully integrated range of capabilities, including systems engineering, conceptual engineering, mechanical design and analysis, prototype and limited-rate production, and instrumentation assembly and testing services and complex structural composite design and manufacturing.	Commercial and Military OEMs; Commercial and Military Aftermarket.	133
Triumph Aerospace Systems—Seattle	Triumph Actuation Systems—Connecticut, LLC	Redmond, WA Rochester, NY	System engineering and integration for landing gear, hydraulic, deployment, cargo door and electro-mechanical type systems. Capabilities include design, analysis and testing to support these types of systems and components.	Commercial, General Aviation and Military OEMs.	72
Triumph Aerospace Systems—Wichita(1)	Triumph Aerospace Systems—Wichita, Inc.	Wichita, KS	Designs and manufactures aircraft windows, sheet metal assemblies (wing spars and leading edges), pilot/co-pilot control wheels, cockpit sun visors, and structural composite parts for the aerospace industry.	Commercial and General Aviation OEMs; General Aviation Aftermarket.	160
Triumph Composite Systems	Triumph Composite Systems, Inc.	Spokane, WA	Manufactures interior non-structural composites for the aviation industry, including environmental control system ducting, floor panels, aisle stands and glare shields.	Commercial, General Aviation, and Military OEMs; Commercial Aftermarket.	458

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
Triumph Controls(1)	Triumph Controls, LLC	North Wales, PA Shelbyville, IN	Designs and manufactures mechanical and electromechanical control systems.	Commercial, General Aviation and Military OEMs and Aftermarket.	127
Triumph Controls—Germany	Triumph Controls—Germany, GmbH	Heiligenhaus, Germany	Produces and repairs cable control systems for ground, flight, engine management and cabin comfort features in aircraft.	Commercial and Military OEMs.	36
Triumph Controls—UK	Triumph Controls—UK, Ltd.	Basildon, UK			
Triumph Fabrications—Fort Worth(1)	Triumph Fabrication—Fort Worth, Inc.	Fort Worth, TX	Manufactures metallic/composite bonded components and assemblies.	Commercial, General Aviation and Military OEMs and Aftermarket.	111
Triumph Fabrications—Hot Springs	Triumph Fabrications—Hot Springs, Inc.	Hot Springs, AR	Produces complex sheet metal parts and assemblies, titanium hot forming, and performs chem-milling and other metal finishing processes.	Commercial, General Aviation and Military OEMs and Aftermarket.	348
Triumph Fabrications—Shelbyville	The Triumph Group Operations, Inc.	Shelbyville, IN	Produces aircraft fuselage skins, leading edges and web assemblies through the stretch forming of sheet, extrusion, rolled shape and light plate metals.	Commercial, General Aviation and Military OEMs.	99
Triumph Fabrications—San Diego(1)	Triumph Fabrications—San Diego, Inc.	El Cajon, CA	Produces complex welded and riveted sheet metal assemblies for aerospace applications. Components include exhaust systems, ducting, doors, panels, control surfaces and engine components.	Commercial, General Aviation and Military OEMs.	200
Triumph Fabrications—Phoenix	Triumph Engineered Solutions, Inc.	Chandler, AZ			
Triumph Gear Systems—Park City(1)	Triumph Gear Systems, Inc.	Park City, UT	Specializes in the design, development, manufacture, sale and repair of gearboxes, high-lift flight control actuators, gear-driven actuators and gears for the aerospace industry.	Commercial and Military OEMs and Aftermarket.	316
Triumph Gear Systems—Macomb(1)	Triumph Gear Systems—Macomb, Inc.	Macomb, MI			

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
Triumph Insulation Systems	Triumph Insulation Systems, LLC	Santa Ana, CA Mexicali, Mexico Beijing, China (2)	Designs, manufactures and repairs thermal-acoustic insulation systems for commercial aerospace applications.	Commercial and Military OEMs.	935
Triumph Group—Mexico	Triumph Group—Mexico, S de R.L de C.V.	Zacatecas, Mexico	Provides rough machining of gears, actuators and structure components, as well as assembly, fabrications, engineering and composites to Triumph companies and certain customers. Facility scheduled to open Summer of 2010.	Commercial and General Aviation OEMs	8
Triumph Northwest	The Triumph Group Operations, Inc.	Albany, OR	Machines and fabricates refractory, reactive, heat and corrosion-resistant precision products.	Military, Medical and Electronic OEMs.	25
Triumph Processing	Triumph Processing, Inc.	Lynwood, CA	Provides high-quality finishing services to the aerospace, military and commercial industries.	Commercial, General Aviation, and Military OEMs.	87
Triumph Structures—East Texas	Triumph Structures—East Texas, Inc.	Kilgore, TX	Manufactures structural components specializing in complex precision machining primarily for commercial and military aerospace programs.	Commercial and Military OEMs.	80
Triumph Structures—Kansas City	Triumph Structures—Kansas City, Inc.	Grandview, MO	Manufactures precision machined parts and mechanical assemblies for the aviation, aerospace and defense industries.	Commercial and Military OEMs.	125
Triumph Structures—Long Island	Triumph Structures—Long Island, LLC	Westbury, NY	Manufactures high-quality structural and dynamic parts and assemblies for commercial and military aerospace programs.	Commercial and Military OEMs.	118
Triumph Structures—Los Angeles	Triumph Structures—Los Angeles, Inc.	Chatsworth, CA City of Industry, CA Walnut, CA	Manufactures long structural components, such as stringers, cords, floor beams and spars for the aviation industry. Machines, welds and assembles large complex precision structural components.	Commercial, General Aviation and Military OEMs.	318

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
Triumph Structures—Wichita	Triumph Structures—Wichita, Inc.	Wichita, KS	Specializes in complex, high-speed monolithic precision machining, turning, subassemblies, and sheet metal fabrication, serving domestic and international aerospace customers.	Commercial and Military OEMs.	123
Triumph Thermal Systems(1)	Triumph Thermal Systems, Inc.	Forest, OH	Designs, manufactures and repairs aircraft thermal transfer components and systems.	Commercial, General Aviation and Military OEMs.	179

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
<b>TRIUMPH AFTERMARKET SERVICES GROUP</b>					
Triumph Accessory Services—Wellington(1)	The Triumph Group Operations, Inc.	Wellington, KS Milwaukee, WI	Provides maintenance services for aircraft heavy accessories and airborne electrical power generation devices, including constant speed drives, integrated drive generators, air cycle machines and electrical generators.	Commercial, General Aviation and Military Aftermarket.	120
Triumph Accessory Services—Grand Prairie(1)	Triumph Accessory Services—Grand Prairie, Inc.	Grand Prairie, TX	Provides maintenance services for engine and air frame accessories including a variety of engine gearboxes, pneumatic starters, valves and drive units, hydraulic actuators, lube system pumps, fuel nozzles, fuel pumps and fuel controls.	Commercial and Military Aftermarket.	114
Triumph Air Repair(1)	The Triumph Group Operations, Inc.	Phoenix, AZ	Repairs and overhauls auxiliary power units (APUs) and related accessories; sells, leases and exchanges APUs, related components and other aircraft material.	Commercial, General Aviation and Military Aftermarket.	104
Triumph Airborne Structures(1)	Triumph Airborne Structures, Inc.	Hot Springs, AR	Repairs and overhauls fan reversers, nacelle components, flight control surfaces and other aerostructures.	Commercial Aftermarket.	122
Triumph Aviation Services—Asia(1)	Triumph Aviation Services Asia Ltd.	Chonburi, Thailand	Repairs and overhauls complex aircraft operational components, such as auxiliary power units (APUs), nacelles, constant speed drives, fan reversers and related accessories.	Commercial Aftermarket.	109
Triumph Engines—Tempe(1)	Triumph Engineered Solutions, Inc.	Tempe, AZ	Designs, engineers, manufactures, repairs and overhauls aftermarket aerospace gas turbine engine components and provides repair services and aftermarket parts and services to aircraft operators, maintenance providers, and third-party overhaul facilities.	Commercial, General Aviation and Military Aftermarket.	113

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
Triumph Fabrications— St. Louis	Triumph Fabrications— St. Louis, Inc. (formerly Fabritech, Inc.)  Triumph Fabrications— Orangeburg, Inc.	East Alton, IL  Orangeburg, SC	Provides maintenance and manufactured solutions for aviation drive train, mechanical, hydraulic and electrical hardware items including gearboxes, cargo hooks and vibration absorbers. Also, produces fabricated textile items such as seat cushions and sound insulation blankets for military rotary-wing platforms.	Commercial, General Aviation and Military Aftermarket	63
Triumph Instruments— Burbank(1)	Triumph Instruments— Burbank, Inc.	Burbank, CA Van Nuys, CA	Repairs and overhauls aircraft instrumentation, power systems and avionics. Distributes and repairs aircraft smoke detectors and industrial instrumentation.	Commercial, General Aviation and Military Aftermarket.	62

Triumph Interiors	Triumph Interiors, LLC	Oakdale, PA(1) Grand Prairie, TX(1)	Refurbishes and repairs aircraft interiors such as sidewalls, ceiling panels, galleys and overhead storage bins and manufactures a full line of PMA interior lighting and plastic components.	Commercial Aftermarket.	108
Triumph San Antonio Support Center	The Triumph Group Operations, Inc.	San Antonio, TX	Provides maintenance services for aircraft ground support equipment.	Military Aftermarket.	31

<b>Operation</b>	<b>Subsidiary</b>	<b>Operating Location</b>	<b>Business</b>	<b>Type of Customers</b>	<b>Number of Employees</b>
<b>DISCONTINUED OPERATIONS</b>					
Triumph Precision Castings	Triumph Precision Castings Co.	Chandler, AZ	Applies advanced directionally solidified (polycrystal or single crystal) and Equiax investment casting processes to produce products for the commercial and defense gas turbine market.	Commercial and Military Aftermarket.	30

(1) Designates FAA-certified repair station.

(2) Through an affiliate, Triumph Insulation Systems, LLC manages a 50% interest in a joint venture operating in Beijing China, with Beijing Kailan Aviation Technology Co., Ltd., an unrelated party based in China. Our interest in the joint venture is accounted for in our consolidated financial statements on the equity method.

## **Sales, Marketing and Engineering**

While each of our operating companies maintains responsibility for selling and marketing its specific products, we have developed two group marketing teams focused on cross-selling our broad capabilities. The focus of these two marketing organizations, one for the Aerospace Systems Group and one for the Aftermarket Services Group, is to sell systems, integrated assemblies and repair and overhaul services, reaching across our operating companies, to our OEM, military, airline and air cargo customers. We also conduct sales activities in the Wichita, Kansas area through Triumph Wichita Support Center, a third-party sales organization dedicated solely to a sales effort on behalf of Triumph Group companies, which is staffed by sales professionals focused on Boeing IDS, Spirit AeroSystems, Cessna, Bombardier/Learjet and Raytheon. In certain limited cases, we use independent, commission-based representatives to facilitate responsiveness to each customer's changing needs and current trends in each market/geographic region in which we operate.

All three of these marketing organizations operate as the front-end of the selling process, establishing or maintaining relationships, identifying opportunities to leverage our brand, and providing service for our customers. Each individual operating company is responsible for its own engineering and technical support, pricing, manufacturing and product support. Also, within the Aerospace Systems Group, we have created a group engineering function to provide integrated solutions to meet our customer needs by designing systems that integrate the capabilities of our companies.

A significant portion of our government and defense contracts are awarded on a competitive bidding basis. We generally do not bid or act as the primary contractor, but will typically bid and act as a subcontractor on contracts on a fixed-fee basis. We generally sell to our other customers on a fixed-fee, negotiated contract or purchase order basis.

## **Backlog**

We have a number of long-term agreements with several of our customers. These agreements generally describe the terms under which the customer may issue purchase orders to buy our products and services during the term of the agreement. These terms typically include a list of the products or repair services customers may purchase, initial pricing, anticipated quantities and, to the extent known, delivery dates. In tracking and reporting our backlog, however, we only include amounts for which we have actual purchase orders with firm delivery dates or contract requirements generally within the next 24 months, which primarily relates to sales to our OEM customer base. Purchase orders issued by our aftermarket customers are usually completed within a short period of time. As a result, our backlog data relates primarily to the OEM customers. The backlog information set forth below does not include the sales that we expect to generate from long-term agreements for which we do not have actual purchase orders with firm delivery dates.

As of March 31, 2010, our continuing operations had outstanding purchase orders representing an aggregate invoice price of approximately \$1,309 million, of which \$1,260 million and \$49 million relate to the Aerospace Systems Group and the Aftermarket Services Group, respectively. As of March 31, 2009, our continuing operations had outstanding purchase orders representing an aggregate invoice price of approximately \$1,323 million, of which \$1,282 million and \$41 million relate to the Aerospace Systems Group and the Aftermarket Services Group, respectively. Of the existing backlog of \$1,309 million, approximately \$478 million will not be shipped by March 31, 2011.

## **Dependence on Significant Customer**

For the year ended March 31, 2010, the Boeing Company, or Boeing, represented approximately 30% of our net sales, covering virtually every Boeing plant and product. A significant reduction in sales to Boeing could have a material adverse impact on our financial position, results of operations, and cash flows.

## **United States and International Operations**

Our revenues from continuing operations to customers in the United States for fiscal years 2010, 2009 and 2008 were approximately \$1,039 million, \$974 million, and \$914 million, respectively. Our revenues from our continuing operations to customers in all other countries for fiscal years 2010, 2009 and 2008 were approximately \$256 million, \$267 million, and \$237 million, respectively.

As of March 31, 2010 and 2009, our long-lived assets for continuing operations located in the United States were approximately \$855 million and \$851 million, respectively. As of March 31, 2010 and 2009, our long-lived assets for continuing operations located in all other countries were approximately \$74 million and \$63 million, respectively.

## **Competition**

We compete primarily with the top-tier systems integrators and manufacturers that supply them, some of which are divisions or subsidiaries of other large companies, in the manufacture of aircraft systems components and subassemblies. OEMs are increasingly focusing on assembly activities while outsourcing more manufacturing and repair to third parties, and therefore are less of a competitive force than in previous years.

Competition for the repair and overhaul of aviation components comes from three primary sources, some with greater financial and other resources than we have: OEMs, major commercial airlines and other independent repair and overhaul companies. Some major commercial airlines continue to own and operate their own service centers, while others have begun to sell or outsource their repair and overhaul services to other aircraft operators or third parties. Large domestic and foreign airlines that provide repair and overhaul services typically provide these services not only for their own aircraft but for other airlines as well. OEMs also maintain service centers which provide repair and overhaul services for the components they manufacture. Other independent service organizations also compete for the repair and overhaul business of other users of aircraft components.

Participants in the aerospace industry compete primarily on the basis of breadth of technical capabilities, quality, turnaround time, capacity and price.

## **Government Regulation and Industry Oversight**

The aerospace industry is highly regulated in the United States by the FAA and in other countries by similar agencies. We must be certified by the FAA and, in some cases, by individual OEMs, in order to engineer and service parts and components used in specific aircraft models. If material authorizations or approvals were revoked or suspended, our operations would be adversely affected. New and more stringent government regulations may be adopted, or industry oversight heightened, in the future and these new regulations, if enacted, or any industry oversight, if heightened, may have an adverse impact on us.

We must also satisfy the requirements of our customers, including OEMs, that are subject to FAA regulations, and provide these customers with products and repair services that comply with the government regulations applicable to aircraft components used in commercial flight operations. The FAA regulates commercial flight operations and requires that aircraft components meet its stringent standards. In addition, the FAA requires that various maintenance routines be performed on aircraft components, and we currently satisfy these maintenance standards in our repair and overhaul services. Several of our operating locations are FAA-approved repair stations.

Generally, the FAA only grants licenses for the manufacture or repair of a specific aircraft component, rather than the broader licenses that have been granted in the past. The FAA licensing process may be costly and time-consuming. In order to obtain an FAA license, an applicant must satisfy all applicable regulations of the FAA governing repair stations. These regulations require that an

applicant have experienced personnel, inspection systems, suitable facilities and equipment. In addition, the applicant must demonstrate a need for the license. Because an applicant must procure manufacturing and repair manuals from third parties relating to each particular aircraft component in order to obtain a license with respect to that component, the application process may involve substantial cost.

The license approval processes for the European Aviation Safety Agency (EASA was formed in 2002 and is handling most of the responsibilities of the national aviation authorities in Europe, such as the United Kingdom Civil Aviation Authority), which regulates this industry in the European Union, the Civil Aviation Administration of China, and other comparable foreign regulatory authorities are similarly stringent, involving potentially lengthy audits.

Our operations are also subject to a variety of worker and community safety laws. For example, the Occupational Safety and Health Act of 1970, or OSHA, mandates general requirements for safe workplaces for all employees. In addition, OSHA provides special procedures and measures for the handling of hazardous and toxic substances. Specific safety standards have been promulgated for workplaces engaged in the treatment, disposal or storage of hazardous waste. We believe that our operations are in material compliance with OSHA's health and safety requirements.

### **Environmental Matters**

Our business, operations and facilities are subject to numerous stringent federal, state, local and foreign environmental laws and regulation by government agencies, including the Environmental Protection Agency, or the EPA. Among other matters, these regulatory authorities impose requirements that regulate the emission, discharge, generation, management, transportation and disposal of hazardous materials, pollutants and contaminants, govern public and private response actions to hazardous or regulated substances which may be or have been released to the environment, and require us to obtain and maintain licenses and permits in connection with our operations. This extensive regulatory framework imposes significant compliance burdens and risks on us. Although management believes that our operations and our facilities are in material compliance with such laws and regulations, future changes in these laws, regulations or interpretations thereof or the nature of our operations or regulatory enforcement actions which may arise, may require us to make significant additional capital expenditures to ensure compliance in the future.

Certain of our facilities, including facilities acquired and operated by us or one of our subsidiaries have at one time or another been under active investigation for environmental contamination by federal or state agencies when acquired, and at least in some cases, continue to be under investigation or subject to remediation for potential environmental contamination. We are frequently indemnified by prior owners or operators and/or present owners of the facilities for liabilities which we incur as a result of these investigations and the environmental contamination found which pre-dates our acquisition of these facilities, subject to certain limitations. We also maintain a pollution liability policy that provides coverage for material liabilities associated with the clean-up of on-site pollution conditions, as well as defense and indemnity for certain third party suits (including Superfund liabilities at third party sites), in each case, to the extent not otherwise indemnified. This policy applies to all of our manufacturing and assembly operations worldwide. However, if we were required to pay the expenses related to environmental liabilities for which neither indemnification nor insurance coverage is available, these expenses could have a material adverse effect on us.

### **Employees**

As of March 31, 2010, for our continuing operations we employed 5,991 persons, of whom 647 were management employees, 90 were sales and marketing personnel, 697 were technical personnel, 789 were administrative personnel and 3,768 were production workers. As of March 31, 2010, for our

discontinued operations, we employed 30 persons, of whom 1 was a management employee, 1 was a sales and marketing employee, 4 were technical personnel, 3 were administrative personnel and 21 were production workers.

Several of our subsidiaries are parties to collective bargaining agreements with labor unions. Under those agreements, we currently employ approximately 590 full-time employees. Currently, approximately 9.8% of our permanent employees are represented by labor unions and approximately 20.0% of net sales are derived from the facilities at which at least some employees are unionized. Our inability to negotiate an acceptable contract with any of these labor unions could result in strikes by the affected workers and increased operating costs as a result of higher wages or benefits paid to union members. If the unionized workers were to engage in a strike or other work stoppage, or other employees were to become unionized, we could experience a significant disruption of our operations and higher ongoing labor costs, which could have an adverse effect on our business and results of operations.

We have not experienced any material labor-related work stoppage and consider our relations with our employees to be good.

### Research and Development Expenses

Certain information about our research and development expenses for the fiscal years ended March 31, 2010, 2009 and 2008 is available in Note 2 of “Notes to Consolidated Financial Statements.”

### Executive Officers

<u>Name</u>	<u>Age</u>	<u>Position</u>
Richard C. Ill . . . . .	66	Chairman and Chief Executive Officer
Jeffry D. Frisby . . . . .	55	President and Chief Operating Officer
M. David Kornblatt . . . . .	50	Executive Vice President, Chief Financial Officer and Treasurer
John B. Wright, II . . . . .	56	Vice President, General Counsel and Secretary
Kevin E. Kindig . . . . .	53	Vice President and Controller

*Richard C. Ill* was elected Chairman in July 2009, and had been our President and Chief Executive Officer and a director since 1993. Mr. Ill continues to serve as Chief Executive Officer. Mr. Ill is a director of P.H. Glatfelter Company, Airgas Inc. and Baker Industries and a trustee of the Eisenhower Fellowships.

*Jeffry D. Frisby* has been our President and Chief Operating Officer since July 2009. Before that, for a period in excess of five years, Mr. Frisby served as Group President of our Aerospace Systems Group. Mr. Frisby serves on the Board of Directors of Quaker Chemical Corporation.

*M. David Kornblatt* became Executive Vice President in July 2009 and had been Senior Vice President and Chief Financial Officer since June 2007. Mr. Kornblatt continues to serve as Chief Financial Officer. From 2006 until joining us, Mr. Kornblatt served as Senior Vice President—Finance and Chief Financial Officer at Carpenter Technology Corporation, a manufacturer and distributor of specialty alloys and various engineered products. From 2003 to 2005, he was Vice President and Chief Financial Officer at York International, prior to its acquisition by Johnson Controls in December 2005. Before that, Mr. Kornblatt was the Director of Taxes-Europe for The Gillette Company in London, England for three years. Mr. Kornblatt is a director of Universal Stainless & Alloy Products, Inc.

*John B. Wright, II* has been a Vice President and our General Counsel and Secretary since 2004. From 2001 until he joined us, Mr. Wright was a partner with the law firm of Ballard Spahr Andrews & Ingersoll, LLP, where he practiced corporate and securities law.

*Kevin E. Kindig* has been our Controller since 1993 and a Vice President since April 1999.

## Available Information

For more information about us, visit our website at [www.triumphgroup.com](http://www.triumphgroup.com). The contents of the website are not part of this Annual Report on Form 10-K. Our electronic filings with the Securities and Exchange Commission, or SEC (including all Forms 10-K, 10-Q and 8-K, and any amendments to these reports) are available free of charge through our website immediately after we electronically file with or furnish them to the SEC. These filings may also be read and copied at the SEC's Public Reference Room which is located at 100 F Street, N.E., Washington, D.C. 20549. Information about the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers who file electronically with the SEC at [www.sec.gov](http://www.sec.gov).

## Item 1A. Risk Factors

*Factors that have an adverse impact on the aerospace industry may adversely affect our results of operations and liquidity.* A substantial percentage of our gross profit and operating income was derived from commercial aviation for fiscal year 2010. Our operations are focused on designing, engineering and manufacturing aircraft components for new aircraft, selling spare parts and performing repair and overhaul services on existing aircraft and aircraft components. Therefore, our business is directly affected by economic factors and other trends that affect our customers in the aerospace industry, including a possible decrease in outsourcing by OEMs and aircraft operators or projected market growth that may not materialize or be sustainable. We are also significantly dependent on sales to the commercial aerospace market, which has been cyclical in nature with significant downturns in the past. When these economic and other factors adversely affect the aerospace industry, they tend to reduce the overall customer demand for our products and services, which decreases our operating income. Economic and other factors that might affect the aerospace industry may have an adverse impact on our results of operations and liquidity. We have credit exposure to a number of commercial airlines, some of which have encountered financial difficulties. In addition, an increase in energy costs and the price of fuel to the airlines, similar to that which occurred in 2008, could result in additional pressure on the operating costs of airlines. The market for jet fuel is inherently volatile and is subject to, among other things, change in government policy on jet fuel production, fluctuations in the global supply of crude oil and disruptions in oil production or delivery caused by sudden hostility in oil producing areas. Often airlines are unable to pass on increases in fuel prices to customers by increasing fares due to the competitive nature of the airline industry, and this compounds the pressure on operating costs. Other events of general impact such as terrorist attacks against the industry or pandemic health crises may lead to declines in the worldwide aerospace industry that could adversely affect our business and financial condition.

In addition, demand for our MRO services is correlated with worldwide flying activity. A significant portion of the MRO activity required on commercial aircraft is mandated by government regulations that limit the total time or number of flights that may elapse between scheduled MRO events. As a result, although short-term deferrals are possible, MRO activity is ultimately required to continue to operate the aircraft in revenue-producing service. Therefore, over the intermediate and long term, trends in the MRO market are closely related to the size and utilization level of the worldwide aircraft fleet, as reflected by the number of available seat miles, commonly referred to as ASMs, flown and cargo miles flown. Consequently, conditions or events which contribute to declines in worldwide ASMs and cargo miles flown, such as those mentioned above, could negatively impact our MRO business.

*Cancellations, reductions or delays in customer orders may adversely affect our results of operations.* Our overall operating results are affected by many factors, including the timing of orders from large customers and the timing of expenditures to manufacture parts and purchase inventory in anticipation of future sales of products and services. A large portion of our operating expenses are relatively fixed. Because several of our operating locations typically do not obtain long-term purchase orders or

commitments from our customers, they must anticipate the future volume of orders based upon the historic purchasing patterns of customers and upon our discussions with customers as to their anticipated future requirements. These historic patterns may be disrupted by many factors, including changing economic conditions, inventory adjustments, or work stoppages or labor disruptions at our customers. Cancellations, reductions or delays in orders by a customer or group of customers could have a material adverse effect on our business, financial condition and results of operations.

*Our acquisition strategy exposes us to risks, including the risk that we may not be able to successfully integrate acquired businesses.* We have a consistent strategy to grow, in part, by the acquisition of additional businesses in the aerospace industry and are continuously evaluating various acquisition opportunities, including those outside the United States and those that are larger than the acquisitions we have made previously. Our ability to grow by acquisition is dependent upon, among other factors, the availability of suitable acquisition candidates. Growth by acquisition involves risks that could adversely affect our operating results, including difficulties in integrating the operations and personnel of acquired companies, the potential amortization of acquired intangible assets, the potential impairment of goodwill and the potential loss of key employees of acquired companies. We may not be able to consummate acquisitions on satisfactory terms or, if any acquisitions are consummated, satisfactorily integrate these acquired businesses.

*We may fail to realize all of the expected benefits of the proposed Vought Acquisition.* The success of the Vought Acquisition, assuming it is consummated, will depend, in part, on our ability to realize the anticipated benefits from combining the businesses of Triumph and Vought. However, to realize these anticipated benefits, we must successfully combine the businesses. If we are not able to achieve these objectives, the anticipated benefits of the Vought Acquisition may not be realized fully or at all or may take longer to realize than expected.

In addition, it is possible that the integration process could result in the loss of key employees, the disruption of each company's ongoing businesses or inconsistencies in standards, controls, procedures and policies that adversely affect our ability to maintain relationships with customers, suppliers and employees or to achieve the anticipated benefits of the Vought Acquisition. Integration efforts between the two companies will also divert management attention and resources and could have an adverse effect on each of Triumph and Vought during the transition period.

*A significant decline in business with a key customer could have a material adverse effect on us.* For the year ended March 31, 2010, The Boeing Company, or Boeing Commercial, Military & Space, represented approximately 30% of net sales. Accordingly, a significant reduction in purchases by this customer could have a material adverse impact on our financial position, results of operations, and cash flows. In addition, some of our operating locations have significant customers, the loss of whom could have an adverse effect on those businesses.

*Demand for our military and defense products is dependent upon government spending.* Approximately 37% of our sales for fiscal year 2010 were derived from the military and defense market, which includes primarily indirect sales to the U.S. Government. The military and defense market is largely dependent upon government budgets, particularly the U.S. defense budget, and even an increase in defense spending may not be allocated to programs that would benefit our business. Moreover, the new military aircraft programs in which we participate may not enter full-scale production as expected. A change in the levels of defense spending or levels of military flight operations could curtail or enhance our prospects in the military and defense market depending upon the programs affected.

*Our international sales and operations are subject to applicable laws relating to trade, export controls and foreign corrupt practices, the violation of which could adversely affect our operations.* We must comply with all applicable export control laws and regulations of the United States and other countries. United States laws and regulations applicable to us include the Arms Export Control Act, the

International Traffic in Arms Regulations (“ITAR”), the Export Administration Regulations (“EAR”) and the trade sanctions laws and regulations administered by the United States Department of Treasury’s Office of Foreign Assets Control (“OFAC”). EAR restricts the export of dual-use products and technical data to certain countries, while ITAR restricts the export of defense products, technical data and defense services. The U.S. government agencies responsible for administering EAR and ITAR have significant discretion in the interpretation and enforcement of these regulations. We also cannot provide services to certain countries subject to United States trade sanctions unless we first obtain the necessary authorizations from OFAC. In addition, we are subject to the Foreign Corrupt Practices Act which, generally, bars bribes or unreasonable gifts to foreign governments or officials.

Violations of these laws or regulations could result in significant additional sanctions including fines, more onerous compliance requirements, more extensive debarments from export privileges, loss of authorizations needed to conduct aspects of our international business and criminal penalties and may harm our ability to enter into contracts with the U.S. government. A future violation of ITAR or the other regulations enumerated above could materially adversely affect our business, financial condition and results of operations.

*Our expansion into international markets may increase credit, currency and other risks, and our current operations in international markets expose us to such risks.* As we pursue customers in Asia, South America and other less developed aerospace markets throughout the world, our inability to ensure the creditworthiness of our customers in these areas could adversely impact our overall profitability. In addition, with our operations in the United Kingdom, Germany, Mexico, and Thailand and as we seek customers in other parts of the world, we will be subject to the legal, political, social and regulatory requirements and economic conditions of other jurisdictions. In the future, we may also make additional international capital investments, including further acquisitions of companies outside the United States or companies having operations outside the United States. Risks inherent to international operations include, but are not limited to, the following:

- difficulty in enforcing agreements in some legal systems outside the United States;
- countries may impose additional withholding taxes or otherwise tax our foreign income, impose tariffs or adopt other restrictions on foreign trade and investment, including currency exchange controls;
- fluctuations in exchange rates may affect demand for our products and services and may adversely affect our profitability in U.S. dollars;
- inability to obtain, maintain or enforce intellectual property rights;
- changes in general economic and political conditions in the countries in which we operate;
- unexpected adverse changes in the laws or regulatory requirements outside the U.S., including those with respect to environmental protection, export duties and quotas;
- failure by our employees or agents to comply with U.S. laws affecting the activities of U.S. companies abroad;
- difficulty with staffing and managing widespread operations; and
- difficulty of and costs relating to compliance with the different commercial and legal requirements of the countries in which we operate.

*We may need additional financing for acquisitions and capital expenditures and additional financing may not be available on terms acceptable to us.* A key element of our strategy has been, and continues to be, internal growth supplemented by growth through the acquisition of additional aerospace companies and product lines. In order to grow internally, we may need to make significant capital expenditures, such as investing in facilities in low cost countries, and may need additional capital to do so. Our ability to grow is dependent upon, and may be limited by, among other things, access to markets and conditions of markets, availability under our credit facility and by particular restrictions

contained in our credit facility and our other financing arrangements. In that case, additional funding sources may be needed, and we may not be able to obtain the additional capital necessary to pursue our internal growth and acquisition strategy or, if we can obtain additional financing, the additional financing may not be on financial terms that are satisfactory to us, particularly in light of the current instability in the credit markets.

*Competitive pressures may adversely affect us.* We have numerous competitors in the aerospace industry. We compete primarily with the top-tier systems integrators and the manufacturers that supply them, some of which are divisions or subsidiaries of OEMs and other large companies that manufacture aircraft components and subassemblies. Our OEM competitors, which include Boeing, Airbus, Bell Helicopter, Cessna, Gulfstream, Sikorsky, Lockheed Martin, Northrop Grumman, Raytheon and Honeywell may choose not to outsource production of aerostructures or other components due to, among other things, their own direct labor and overhead considerations, capacity utilization at their own facilities and desire to retain critical or core skills. Consequently, traditional factors affecting competition, such as price and quality of service, may not be significant determinants when OEMs decide whether to produce a part in-house or to outsource. We also face competition from non-OEM component manufacturers including, Alenia Aeronautica, Fuji Heavy Industries, GKN Westland Aerospace (U.K.), Goodrich Corp., Kawasaki Heavy Industries, Mitsubishi Heavy Industries, Spirit AeroSystems and Stork Aerospace. Competition for the repair and overhaul of aviation components comes from three primary sources: OEMs, major commercial airlines and other independent repair and overhaul companies. Some of our competitors have substantially greater financial and other resources than we have. Competitive pressures may materially adversely affect our operating revenues and margins, and, in turn, our business and financial condition.

*We may need to expend significant capital to keep pace with technological developments in our industry.* The aerospace industry is constantly undergoing development and change and it is likely that new products, equipment and methods of repair and overhaul service will be introduced in the future. In order to keep pace with any new developments, we may need to expend significant capital to purchase new equipment and machines or to train our employees in the new methods of production and service.

*The construction of aircraft is heavily regulated, and we may incur significant expenses to comply with new or more stringent governmental regulation.* The aerospace industry is highly regulated in the United States by the FAA and in other countries by similar agencies. We must be certified by the FAA and, in some cases, by individual OEMs in order to engineer and service parts and components used in specific aircraft models. If any of our material authorizations or approvals were revoked or suspended, our operations would be adversely affected. New or more stringent governmental regulations may be adopted, or industry oversight heightened in the future, and we may incur significant expenses to comply with any new regulations or any heightened industry oversight.

*Some contractual arrangements with our customers may cause us to bear significant up-front costs that we may not be able to recover.* Many new aircraft programs require that major suppliers bear the cost of design, development and engineering work associated with the development of the aircraft usually in exchange for a long-term agreement to supply critical parts once the aircraft is in production. If the aircraft fails to reach the full production stage or we fail to win the long-term contract, the outlays we have made in research and development and other start-up costs may not generate our anticipated return on investment.

*We may not realize our anticipated return on capital commitments made to expand our capabilities.* We continually make significant capital expenditures to implement new processes and to increase both efficiency and capacity. Some of these projects require additional training for our employees and not all projects may be implemented as anticipated. If any of these projects do not achieve the anticipated increase in efficiency or capacity, our returns on these capital expenditures may be lower than expected.

*Any product liability claims in excess of insurance may adversely affect our financial condition.* Our operations expose us to potential liability for personal injury or death as a result of the failure of an aircraft component that has been serviced by us or the failure of an aircraft component designed or manufactured by us. While we believe that our liability insurance is adequate to protect us from these liabilities, our insurance may not cover all liabilities. Additionally, as the number of insurance companies providing general aviation product liability coverage has decreased in recent years, insurance coverage may not be available in the future at a cost acceptable to us. Any material liability not covered by insurance or for which third party indemnification is not available could have a material adverse effect on our financial condition.

*The lack of available skilled personnel may have an adverse effect on our operations.* From time to time, some of our operating locations have experienced difficulties in attracting and retaining skilled personnel to design, engineer, manufacture, repair and overhaul sophisticated aircraft components. Our ability to operate successfully could be jeopardized if we are unable to attract and retain a sufficient number of skilled personnel to conduct our business.

*Any exposure to environmental liabilities may adversely affect us.* Our business, operations and facilities are subject to numerous stringent federal, state, local and foreign environmental laws and regulations and we are subject to potentially significant fines and penalties, including criminal sanctions if we fail to comply with these requirements. Although management believes that our operations and facilities are in material compliance with such laws and regulations, future changes in such laws, regulations or interpretations thereof or the nature of our operations or regulatory enforcement actions which may arise, may require us to make significant additional capital expenditures to ensure compliance in the future. Certain of our facilities, including facilities acquired and operated by us or one of our subsidiaries have at one time or another been under active investigation for environmental contamination by federal or state agencies when acquired and, at least in some cases, continue to be under investigation or subject to remediation for potential environmental contamination. Individual facilities of ours have also been subject to investigation on occasion for possible past waste disposal practices which might have contributed to contamination at or from remote waste disposal sites. We are frequently indemnified by prior owners or operators and/or present owners of the facilities for liabilities which we incur as a result of these investigations and the environmental contamination found which pre-dates our acquisition of these facilities, subject to certain limitations, including but not limited to limitations on the survival period of the indemnity. We also maintain a pollution liability policy that provides coverage for material liabilities associated with the clean-up of on-site pollution conditions, as well as defense and indemnity for certain third party suits (including Superfund liabilities at third party sites), in each case, to the extent not otherwise indemnified. This policy applies to all of our manufacturing and assembly operations worldwide. However, if we were required to pay the expenses related to environmental liabilities for which neither indemnification nor insurance coverage is available, these expenses could have a material adverse effect on our financial position, results of operations, and cash flows.

*We are currently involved in intellectual property litigation, which could have a material and adverse impact on our profitability, and we could become so involved again in the future.* We and other companies in our industry possess certain proprietary rights relating to designs, engineering, manufacturing processes and repair and overhaul procedures. In the event that we believe that a third party is infringing upon our proprietary rights, we may bring an action to enforce such rights. In addition, third parties may claim infringement by us with respect to their proprietary rights and may initiate legal proceedings against us in the future. The expense and time of bringing an action to enforce such rights or defending against infringement claims can be significant, as in the case of the litigation arising out of the claims of Eaton Corporation discussed in "Item 3. Legal Proceedings." The expense and time associated with such litigation may have a material and adverse impact on our profitability. In addition, in our overhaul and repair businesses, OEMs of equipment that we maintain for our customers increasingly include language in repair manuals relating to their equipment asserting

broad claims of proprietary rights to the contents of the manuals used in our operations. There can be no assurance that OEMs will not try to enforce such claims, including through the possible use of legal proceedings, or that any such actions will be unsuccessful.

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

Our executive offices are located in Wayne, Pennsylvania, where we lease 11,700 square feet of space. In addition, as of April 30, 2010, we owned or leased the following operating facilities.

Location	Description	Square Footage	Owned/Leased
<b>TRIUMPH AEROSPACE SYSTEMS GROUP</b>			
Hot Springs, AR	Manufacturing facility/office	217,300	Owned
Chandler, AZ	Manufacturing facility/office	34,300	Leased
Chatsworth, CA	Manufacturing facility/office	101,900	Owned

### **Item 3. Legal Proceedings**

On July 9, 2004, Eaton Corporation and several Eaton subsidiaries filed a complaint against us, our subsidiary, Frisby Aerospace, LLC (now named Triumph Actuation Systems, LLC), certain related subsidiaries and certain employees of ours and our subsidiaries. The complaint was filed in the Circuit Court of the First Judicial District of Hinds County, Mississippi and alleged nineteen causes of action under Mississippi law. In particular, the complaint alleged the misappropriation of trade secrets and intellectual property allegedly belonging to Eaton relating to hydraulic pumps and motors used in military and commercial aviation. Triumph Actuation Systems and the individual defendants filed separate responses to Eaton's claims. Triumph Actuation Systems filed counterclaims against Eaton alleging common law unfair competition, interference with existing and prospective contracts, abuse of process, defamation, violation of North Carolina's Unfair and Deceptive Trade Practices Act, and violation of the false advertising provisions of the Lanham Act. We and defendant Jeff Frisby, President of Triumph Actuation Systems at the time the engineer defendants were hired, moved to dismiss the complaint for lack of personal jurisdiction.

The above allegations also relate to alleged conduct that has been the subject of an investigation by the office of the U.S. Attorney in Jackson, Mississippi. On January 22, 2004, a search warrant was executed on the offices of Triumph Actuation Systems in connection with this investigation. Triumph Actuation Systems cooperated with the investigation. On December 20, 2006, five engineers of Triumph Actuation Systems who are former employees of Eaton Aerospace, LLC, were indicted by a grand jury sitting in the Southern District of Mississippi on five counts of trade secret misappropriation, conspiracy to misappropriate trade secrets, and mail and wire fraud. On June 15, 2007, all counts other than part of one count were dismissed by the court, leaving a charge of conspiracy to misappropriate trade secrets.

On October 11, 2007, the government obtained a new indictment against the same five engineer defendants raising new charges arising out of the same investigation, which were essentially reiterated in a second superseding indictment obtained on November 7, 2007. The defendant engineers subsequently filed pretrial motions, including motions to dismiss. On April 25, 2008, the court granted

some of those motions and dismissed seven of the twelve counts of the second superseding indictment. The government appealed the dismissal with respect to three of the seven counts dismissed. On January 21, 2009, while the appeal was still pending, the government obtained a new indictment against the five engineers containing three counts stating essentially the same charges as those covered by the government's appeal. On February 9, 2009, the United States Court of Appeals for the Fifth Circuit unanimously affirmed the dismissal of one of the counts covered by the government's appeal and reversed as to the other two counts. (The government thereafter dismissed the two counts of the most recent indictment similar to the two counts restored by the appellate court.) On September 10, 2009, upon agreement of the government and the defendant engineers, the trial court entered an order continuing the case until after the trial in the civil case filed by Eaton and staying all proceedings except the issuance of orders related to previously filed motions and the parties' compliance with ongoing discovery obligations. The trial court has since disposed of all pending motions.

No charges have been brought against Triumph Actuation Systems or us, and we understand that neither Triumph Actuation Systems nor the Company is currently the subject of the criminal investigation.

In the civil case, following stays of most discovery while the parties litigated a motion to dismiss and a motion to protect the defendant engineers' Fifth Amendment rights, discovery recommenced in late August 2007. However, on January 4, 2008, the judge in the civil case, Judge Bobby DeLaughter, recused himself on his own motion. The case was reassigned to Chief Judge W. Swan Yerger.

On January 24, 2008, Triumph Actuation Systems filed a motion to stay all discovery in order to review and reconsider Judge DeLaughter's prior orders based on the ongoing federal investigation of an alleged ex parte and inappropriate relationship between Judge DeLaughter and Ed Peters, a lawyer representing Eaton for whom Judge DeLaughter had worked prior to his appointment to the bench. Judge DeLaughter was thereafter suspended from the bench and indicted by a federal grand jury sitting in the Northern District of Mississippi. On July 30, 2009, Judge DeLaughter pled guilty to a count of obstruction of justice contained in the indictment and, on November 13, 2009, was sentenced to 18 months in federal prison.

Triumph Actuation Systems filed other motions relating to this alleged inappropriate relationship with Mr. Peters, including a motion for sanctions. Judge Yerger ordered that this conduct be examined and has undertaken, along with a newly appointed Special Master, to review Judge DeLaughter's rulings in the case from the time Mr. Peters became involved. That review is ongoing. The court has stayed all other proceedings while conducting its review of the conduct of Mr. Peters, with the exception of the period between October 30, 2008 and March 4, 2009 when discovery on the merits was briefly reopened. The case has been removed from the court's trial calendar for the date previously set, and no alternative date has been assigned.

It is too early to determine what, if any, exposure to liability Triumph Actuation Systems or the Company might face as a result of the civil suit. We intend to continue to vigorously defend the allegations contained in Eaton's complaint and to vigorously prosecute the counterclaims brought by Triumph Actuation Systems.

In the ordinary course of our business, we are also involved in disputes, claims, lawsuits, and governmental and regulatory inquiries that we deem to be immaterial. Some may involve claims or potential claims of substantial damages, fines or penalties. While we cannot predict the outcome of any pending or future litigation or proceeding, we do not believe that any pending matter will have a material effect, individually or in the aggregate, on our financial position or results of operations, although no assurances can be given to that effect.

#### **Item 4. Submission of Matters to a Vote of Security Holders**

None.

## PART II

### Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

#### Range of Market Price

Our Common Stock is traded on the New York Stock Exchange under the symbol "TGI." The following table sets forth the range of high and low prices for our Common Stock for the periods indicated:

	<u>High</u>	<u>Low</u>
<b>Fiscal 2009</b>		
1st Quarter . . . . .	\$73.76	\$46.16
2nd Quarter . . . . .	58.87	39.20
3rd Quarter . . . . .	46.45	26.89
4th Quarter . . . . .	47.00	31.12
<b>Fiscal 2010</b>		
1st Quarter . . . . .	\$45.11	\$34.36
2nd Quarter . . . . .	49.85	34.96
3rd Quarter . . . . .	50.92	45.93
4th Quarter . . . . .	74.73	47.50

On May 10, 2010, the reported closing price for our Common Stock was \$72.80. As of May 10, 2010, there were approximately 87 holders of record of our Common Stock and we believe that our Common Stock was beneficially owned by approximately 4,000 persons.

#### Dividend Policy

During fiscal 2010 and 2009, we paid cash dividends of \$0.16 per share and \$0.16 per share, respectively. However, our declaration and payment of cash dividends in the future and the amount thereof will depend upon our results of operations, financial condition, cash requirements, future prospects, limitations imposed by credit agreements or indentures governing debt securities and other factors deemed relevant by our Board of Directors. No assurance can be given that cash dividends will continue to be declared and paid at historical levels or at all. Certain of our debt arrangements, including our credit facility, restrict our paying dividends and making distributions on our capital stock, except for the payment of stock dividends and redemptions of an employee's shares of capital stock upon termination of employment. On April 26, 2010, the Company announced that its Board of Directors declared a regular quarterly dividend of \$0.04 per share on its outstanding common stock. The dividend is payable June 15, 2010 to shareholders of record as of May 28, 2010.

#### Repurchases of Stock

The following summarizes repurchases made pursuant to the Company's share repurchase plan during three years ended March 31, 2010. In December 1998, we announced a program to repurchase up to 500,000 shares of our common stock. In February 2008, the Company's Board of Directors authorized an increase in the Company's existing stock repurchase program by up to an additional 500,000 shares of its common stock. From the inception of the program through March 31, 2010, we have repurchased a total of 499,200 shares for a total purchase price of \$19.2 million. As a result, as of May 10, 2010, the Company remains able to purchase an additional 500,800 shares. Repurchases may be made from time to time in open market transactions, block purchases, privately negotiated

transactions or otherwise at prevailing prices. No time limit has been set for completion of the program.

<u>Period</u>	<u>Total number of shares purchased</u>	<u>Average price paid per share</u>	<u>Total number of shares purchased as part of publicly announced plans</u>	<u>Maximum number of shares that may yet be purchased under the plans</u>
February 1-28, 2008 . . . . .	220,000	\$56.10	499,200	500,800

**Equity Compensation Plan Information**

The information required regarding equity compensation plan information is included in our Proxy Statement in connection with our 2010 Annual Meeting of Stockholders to be held on September 28, 2010, under the heading “Equity Compensation Plan Information” and is incorporated herein by reference.

The following graph compares the cumulative 5-year total return provided shareholders on Triumph Group, Inc.’s common stock relative to the cumulative total returns of the Russell 2000 index and the S&P Aerospace & Defense index. An investment of \$100 (with reinvestment of all dividends) is assumed to have been made in our common stock and in each of the indexes on March 31, 2005 and its relative performance is tracked through March 31, 2010.

**COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN\***

Total stockholders’ equity . . . . .	\$ 860,686	\$ 788,563	\$ 706,436	\$ 645,177	\$563,703

- (1) Fiscal years 2010, 2009, 2008 and 2007 include noncash interest expenses of \$6.2 million, \$5.8 million, \$6.5 million and \$3.1 million, respectively, related to the adoption and retroactive application of the convertible debt accounting standard as of April 1, 2009.
- (2) Fiscal years 2010, 2009, 2008 and 2007 include stock-based compensation pre-tax charges of \$3.2 million, \$3.2 million, \$2.8 million and \$2.5 million, respectively, related to the adoption of provisions of the *Compensation—Stock Compensation* topic of the Accounting Standards Codification (“ASC”) as of April 1, 2006.
- (3) Includes the acquisition of DCL Avionics, Inc. (January 2010) and Fabritech, Inc. (March 2010) from the date of each respective acquisition. See Note 3 to the Consolidated Financial Statements.
- (4) Includes the acquisition of Merritt Tool Company, Inc., Saygrove Defence and Aerospace Group Limited., The Mexmil Company, LLC and acquisition of the aviation segment of Kongsberg Automotive Holdings ASA from the date of each respective acquisition (March 2009). See Note 3 to the Consolidated Financial Statements.
- (5) Includes the acquisition of the assets and business of B. & R. Machine & Tool Corp. from the date of acquisition (February 2008). See Note 3 to the Consolidated Financial Statements.
- (6) During 2008, the Company sold the assets of Triumph Precision, Inc. and also decided to sell Triumph Precision Castings Co. These businesses have been classified as discontinued operations in 2009 and 2008 and, accordingly, the results for fiscal years prior to 2008 have also been reclassified to conform to the 2008 presentation. See Note 4 to the Consolidated Financial Statements.
- (7) Includes the acquisition of the assets and businesses of Excel Manufacturing, Inc. (April 2006), Air Excellence International, Inc. (April 2006), Grand Prairie Accessory Services, LLC (January 2007) and the acquisition through merger of Allied Aerospace Industries, Inc. (November 2006), from the date of each respective acquisition. See Note 3 to the Consolidated Financial Statements.

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

(The following discussion should be read in conjunction with the Consolidated Financial Statements and notes thereto contained elsewhere herein.)

### OVERVIEW

We are a major supplier to the aerospace industry and have two operating segments: (i) Triumph Aerospace Systems Group, whose companies design, engineer, manufacture and sell a wide range of proprietary and build-to-print components, assemblies and systems for the global aerospace OEM market; and (ii) Triumph Aftermarket Services Group, whose companies serve aircraft fleets, notably commercial airlines, the U.S. military and cargo carriers, through the maintenance, repair and overhaul of aircraft components and accessories manufactured by third parties.

In March 2010, we entered into definitive agreement to purchase Vought. Vought is a leading global manufacturer of aerostructures for commercial, military and business jet aircraft. Products include fuselages, wings, empennages, nacelles and helicopter cabins. Vought's customer base is comprised of the leading global aerospace OEMs and over 80% of their revenue is from sole source, long-term contracts. Vought's revenues for the year ended December 31, 2009 were \$1.9 billion and they employed approximately 5,900 people.

Financial highlights for the fiscal year ended March 31, 2010 include:

- Net sales for fiscal 2010 increased 4.4% to \$1.29 billion.
- Operating income in fiscal 2010 increased 2.2% to \$155.3 million.
- Net income for fiscal 2010 decreased 23.0% to \$67.8 million.
- Backlog decreased 1.0% over the prior year to \$1.3 billion.

For the fiscal year ended March 31, 2010, net sales totaled \$1.29 billion, a 4.4% increase from fiscal year 2009 net sales of \$1.24 billion. Net income for fiscal year 2010 decreased 23.0% to \$67.8 million, or \$4.07 per diluted common share, versus \$88.0 million, or \$5.30 per diluted common share, for fiscal year 2009. As discussed in further detail below under "Results of Operations," the decrease in net income is attributable to the write-down of the carrying value of our discontinued operation to estimated fair value less cost to sell, as well as the additional interest expense associated with the issuance of Senior Notes due 2017 in November 2009, offset by the contribution from recent acquisitions.

Our working capital needs are generally funded through cash flows from operations and borrowings under our credit arrangements. For the fiscal year ended March 31, 2010, we generated approximately \$169.6 million of cash flows from operating activities, used approximately \$62.5 million in investing activities and generated approximately \$35.3 million in financing activities.

We continue to remain focused on growing our core businesses as well as growing through strategic acquisitions. Our organic sales declined in fiscal 2010 due to major program delays, the dramatic decline in the regional and business jet markets due to the overall economy, lower passenger and freight traffic and airline inventory de-stocking. Our Company has an aggressive but selective acquisition approach that adds capabilities and increases our capacity for strong and consistent internal growth.

In the fourth quarter of fiscal 2010, we acquired Fabritech, Inc. (now Triumph Fabrications—St. Louis) and DCL Avionics, Inc. (now part of Triumph Instruments—Burbank), collectively, the "fiscal 2010 acquisitions." The results of Triumph Fabrications—St. Louis are included in the Company's Aftermarket Services Segment from the date of acquisition.

In March 2009, we acquired Merritt Tool Company, Inc. (now Triumph Structures—East Texas), Saygrove Defence & Aerospace Group Limited (now Triumph Actuation & Motion Control Systems—UK), the aviation segment of Kongsberg Automotive Holdings ASA (now Triumph Controls—U.K and Triumph Controls—Germany) and The Mexmil Company, LLC (now Triumph Insulation Systems), collectively, the “fiscal 2009 acquisitions.” The results for the fiscal 2009 acquisitions are included in the Company’s Aerospace Systems Segment.

## **RESULTS OF OPERATIONS**

The following includes a discussion of our consolidated and business segment results of operations. The Company’s diverse structure and customer base do not provide for precise comparisons of the impact of price and volume changes to our results. However, we have disclosed the significant variances between the respective periods.

### **Non-GAAP Financial Measures**

We prepare and publicly release quarterly unaudited financial statements prepared in accordance with GAAP. In accordance with recent Securities and Exchange Commission (the “SEC”) guidance on Compliance and Disclosure Interpretations, we also disclose and discuss certain non-GAAP financial measures in our public releases. Currently, the non-GAAP financial measure that we disclose is EBITDA, which is our income from continuing operations before interest, income taxes, depreciation and amortization. We disclose EBITDA on a consolidated and an operating segment basis in our earnings releases, investor conference calls and filings with the SEC. The non-GAAP financial measures that we use may not be comparable to similarly titled measures reported by other companies. Also, in the future, we may disclose different non-GAAP financial measures in order to help our investors more meaningfully evaluate and compare our future results of operations to our previously reported results of operations.

We view EBITDA as an operating performance measure and as such we believe that the GAAP financial measure most directly comparable to it is income from continuing operations. In calculating EBITDA, we exclude from income from continuing operations the financial items that we believe should be separately identified to provide additional analysis of the financial components of the day-to-day operation of our business. We have outlined below the type and scope of these exclusions and the material limitations on the use of these non-GAAP financial measures as a result of these exclusions. EBITDA is not a measurement of financial performance under GAAP and should not be considered as a measure of liquidity, as an alternative to net income (loss), income from continuing operations, or as an indicator of any other measure of performance derived in accordance with GAAP. Investors and potential investors in our securities should not rely on EBITDA as a substitute for any GAAP financial measure, including net income (loss) or income from continuing operations. In addition, we urge investors and potential investors in our securities to carefully review the reconciliation of EBITDA to income from continuing operations set forth below, in our earnings releases and in other filings with the SEC and to carefully review the GAAP financial information included as part of our Quarterly Reports on Form 10-Q and our Annual Reports on Form 10-K that are filed with the SEC, as well as our quarterly earnings releases, and compare the GAAP financial information with our EBITDA.

EBITDA is used by management to internally measure our operating and management performance and by investors as a supplemental financial measure to evaluate the performance of our business that, when viewed with our GAAP results and the accompanying reconciliation, we believe provides additional information that is useful to gain an understanding of the factors and trends affecting our business. We have spent more than 15 years expanding our product and service capabilities partially through acquisitions of complementary businesses. Due to the expansion of our operations, which included acquisitions, our income from continuing operations has included significant

charges for depreciation and amortization. EBITDA excludes these charges and provides meaningful information about the operating performance of our business, apart from charges for depreciation and amortization. We believe the disclosure of EBITDA helps investors meaningfully evaluate and compare our performance from quarter to quarter and from year to year. We also believe EBITDA is a measure of our ongoing operating performance because the isolation of non-cash charges, such as depreciation and amortization, and non-operating items, such as interest and income taxes, provides additional information about our cost structure, and, over time, helps track our operating progress. In addition, investors, securities analysts and others have regularly relied on EBITDA to provide a financial measure by which to compare our operating performance against that of other companies in our industry.

Set forth below are descriptions of the financial items that have been excluded from our income from continuing operations to calculate EBITDA and the material limitations associated with using this non-GAAP financial measure as compared to income from continuing operations:

- Amortization expense may be useful for investors to consider because it represents the estimated attrition of our acquired customer base and the diminishing value of product rights and licenses. We do not believe these charges necessarily reflect the current and ongoing cash charges related to our operating cost structure.
- Depreciation may be useful for investors to consider because it generally represents the wear and tear on our property and equipment used in our operations. We do not believe these charges necessarily reflect the current and ongoing cash charges related to our operating cost structure.
- The amount of interest expense and other we incur may be useful for investors to consider and may result in current cash inflows or outflows. However, we do not consider the amount of interest expense and other to be a representative component of the day-to-day operating performance of our business.
- Income tax expense may be useful for investors to consider because it generally represents the taxes which may be payable for the period and the change in deferred income taxes during the period and may reduce the amount of funds otherwise available for use in our business. However, we do not consider the amount of income tax expense to be a representative component of the day-to-day operating performance of our business.

Management compensates for the above-described limitations of using non-GAAP measures by using a non-GAAP measure only to supplement our GAAP results and to provide additional information that is useful to gain an understanding of the factors and trends affecting our business.

The following table shows our EBITDA reconciled to our income from continuing operations for the indicated periods (in thousands):

	<b>Fiscal year ended March 31,</b>		
	<b>2010</b>	<b>2009</b>	<b>2008</b>
Income from continuing operations . . . . .	\$ 85,288	\$ 92,741	\$ 71,635
Depreciation and amortization . . . . .	54,418	48,611	43,215
Interest expense and other . . . . .	28,865	16,929	19,942
Gain on early extinguishment of debt . . . . .	(39)	(880)	—
Income tax expense . . . . .	41,167	43,124	34,748
EBITDA . . . . .	<u>\$209,699</u>	<u>\$200,525</u>	<u>\$169,540</u>

The fluctuations from period to period within the amounts of the components of the reconciliations above are discussed further below within Results of Operations.

**Fiscal year ended March 31, 2010 compared to fiscal year ended March 31, 2009**

	Year Ended March 31,	
	2010	2009
(in thousands)		
Net sales . . . . .	\$1,294,780	\$1,240,378
Segment operating income . . . . .	181,566	178,882
Corporate general and administrative expenses . . . . .	(26,285)	(26,968)
Total operating income . . . . .	155,281	151,914
Interest expense and other . . . . .	28,865	16,929
Gain on early extinguishment of debt . . . . .	(39)	(880)
Income tax expense . . . . .	41,167	43,124
Income from continuing operations . . . . .	85,288	92,741
Loss from discontinued operations, net . . . . .	(17,526)	(4,745)
Net income . . . . .	<u>\$ 67,762</u>	<u>\$ 87,996</u>

Net sales increased by \$54.4 million, or 4.4%, to \$1.29 billion for the fiscal year ended March 31, 2010 from \$1.24 billion for the fiscal year ended March 31, 2009. The fiscal 2010 acquisitions and fiscal 2009 acquisitions contributed \$123.3 million in net sales. Organic sales declined \$68.9 million, or 5.6%, which was negatively impacted by major program delays, the decline in the regional jet market due to the overall economy, lower passenger and freight traffic and airline inventory de-stocking. Prior year sales were negatively impacted by the Boeing strike.

Cost of sales increased by \$49.5 million, or 5.6%, to \$927.2 million for the fiscal year ended March 31, 2010 from \$877.7 million for the fiscal year ended March 31, 2009. This increase includes the acquisitions noted above, which contributed \$92.0 million. Excluding the effects of these acquisitions, gross margin was 28.7% for the fiscal year ended March 31, 2010, compared with 29.2% for the fiscal year ended March 31, 2009.

Segment operating income increased by \$2.7 million, or 1.5%, to \$181.6 million for the fiscal year ended March 31, 2010 from \$178.9 million for the fiscal year ended March 31, 2009. Operating income growth was a direct result of margins attained on increased sales as described above, and decreases in litigation costs (\$0.9 million) and bad debt expense (\$1.6 million), partially offset by increases in depreciation and amortization (\$5.8 million) primarily from the fiscal 2009 acquisitions.

Corporate expenses decreased by \$0.7 million, or 2.5%, to \$26.3 million for the fiscal year ended March 31, 2010 from \$27.0 million for the fiscal year ended March 31, 2009, primarily due to decreased healthcare and workers' compensation costs (\$0.8 million), consulting expenses (\$1.6 million) and computer services costs (\$1.0 million), partially offset by increases in acquisition-related costs (\$1.6 million). In addition, we have recognized expenses of approximately \$4.1 million start-up costs related to the Mexican facility, predominately recorded within corporate expenses.

Interest expense and other increased by \$11.9 million, or 70.5%, to \$28.9 million for the fiscal year ended March 31, 2010 compared to \$16.9 million for the prior year. During fiscal 2010, the Company issued \$175.0 million in principal amount of 8% Senior Notes due 2017, resulting in additional interest expense of approximately \$5.3 million. The initial interest payment on this debt is due May 15, 2010. Fiscal 2010 also included full-year interest expense on our equipment leasing facility representing an additional \$4.0 million from fiscal 2009. During fiscal 2009, the Company entered into certain foreign currency derivative instruments that did not meet hedge accounting criteria and primarily were intended to protect against exposure related to fiscal 2009 acquisitions. These instruments resulted in a gain of \$1.4 million in fiscal 2009, which is included in interest expense and other. Also during fiscal 2009, the Company paid \$15.4 million to purchase \$18.0 million of principal on the convertible senior

subordinated notes, resulting in a gain on early extinguishment of \$0.9 million. Included in interest expense and other is noncash interest expense of \$8.1 million and \$7.9 million for the fiscal years ended March 31, 2010 and 2009, respectively, of which \$6.1 million and \$5.8 million, respectively, reflect accretion of interest recognized in accordance with the convertible debt accounting standard.

The effective tax rate was 32.6% for the fiscal year ended March 31, 2010 and 31.8% for the fiscal year ended March 31, 2009. The increase in the tax rate was primarily due to the lapse of the research and experimentation tax credit as of January 1, 2010.

Loss from discontinued operations before income taxes was \$26.9 million for the fiscal year ended March 31, 2010, which included impairment charges of \$19.9 million, compared with a loss from discontinued operations before income taxes of \$7.3 million for the fiscal year ended March 31, 2009. Due to failed negotiations with certain potential buyers of the business occurring during the quarter ended December 31, 2009, the Company reassessed its estimated fair value of the business based on current viable offers to purchase the business, recent performance results and overall market conditions, resulting in a write-down, which was applied to accounts receivable, inventory and property, plant and equipment. The Company recognized a pre-tax loss of \$17.4 million in the third quarter of fiscal 2010, based on the write-down of the carrying value of the business to estimated fair value less cost to sell. Included in the loss from discontinued operations for the fiscal year ended March 31, 2010 is an additional impairment charge of \$2.5 million recorded during the first quarter of fiscal 2010. The income tax benefit for discontinued operations was \$9.4 million for the fiscal year ended March 31, 2010 compared to a benefit of \$2.6 million for the prior year.

**Fiscal year ended March 31, 2009 compared to fiscal year ended March 31, 2008**

	<u>Year Ended March 31,</u>	
	<u>2009</u>	<u>2008</u>
	(in thousands)	
Net sales . . . . .	<u>\$1,240,378</u>	<u>\$1,151,090</u>

Gain on early extinguishment of debt . . . . .	(880)	—
Income tax expense . . . . .	<u>43,124</u>	<u>34,748</u>
Income from continuing operations . . . . .	92,741	71,635
Loss from discontinued operations, net . . . . .	<u>(4,745)</u>	<u>(8,468)</u>
Net income . . . . .	<u>\$ 87,996</u>	<u>\$ 63,167</u>

Net sales increased by \$89.3 million, or 7.8%, to \$1.24 billion for the fiscal year ended March 31, 2009 from \$1.15 billion for the fiscal year ended March 31, 2008. The fiscal 2009 acquisitions and the fiscal 2008 acquisition of B. & R. Machine & Tool Corp. (now Triumph Structures—Long Island) together contributed \$37.0 million. Excluding the effects of this acquisition, organic sales growth was \$52.3 million, or 4.5%, which was negatively impacted by the Boeing strike and major program delays (particularly in the 787 and 747-8 programs), partially offset by a favorable settlement of a retroactive pricing agreement.

The Aerospace Systems segment benefited primarily from increased sales to our OEM customers driven by increased military aircraft build rates, while the increase in sales for our Aftermarket Services segment was the result of increased demand for our services due to growth in global air traffic.

Cost of sales increased by \$55.4 million, or 6.7%, to \$877.7 million for the fiscal year ended March 31, 2009 from \$822.3 million for the fiscal year ended March 31, 2008. This increase includes the acquisitions noted above, which contributed \$17.9 million. Excluding the effects of these acquisitions, gross margin was 28.6% for the fiscal year ended March 31, 2009, compared with 28.4% for the fiscal year ended March 31, 2008. Despite having consistent consolidated gross margin, the gross margin for our Aerospace Systems segment was favorably impacted by contribution from the acquisition of B. & R. Machine & Tool Company and the favorable settlement of a retroactive pricing agreement, whereas the gross margin for our Aftermarket Services segment was negatively impacted by charges due to contract terminations (\$1.3 million) and changes in estimate under power-by-the-hour contracts (\$1.1 million) as well as losses at our Phoenix APU facility due to cost overruns and excess overhead (\$4.8 million) and higher than expected warranty expenses (\$0.6 million).

Segment operating income increased by \$30.5 million, or 20.6%, to \$178.9 million for the fiscal year ended March 31, 2009 from \$148.3 million for the fiscal year ended March 31, 2008. Operating income growth was a direct result of margins attained on increased sales as described above, the contribution of \$13.8 million from the above-mentioned acquisitions, and decreases in litigation costs (\$3.7 million) and incentive compensation (\$1.3 million), partially offset by increases in payroll (\$2.4 million) and depreciation and amortization expenses (\$1.1 million) associated with our acquisitions.

Corporate expenses increased by \$5.0 million, or 22.8%, to \$27.0 million for the fiscal year ended March 31, 2009 from \$22.0 million for the fiscal year ended March 31, 2008, primarily due to increased healthcare (\$3.0 million), stock compensation costs (\$0.6 million) and the write-off of acquisition costs on a potential acquisition that was not consummated (\$0.5 million), partially offset by decreases in litigation costs (\$1.8 million).

Interest expense and other decreased by \$3.0 million, or 15.1%, to \$16.9 million for the fiscal year ended March 31, 2009 compared to \$19.9 million for the prior year. During fiscal 2009, the Company entered into certain foreign currency derivative instruments that did not meet hedge accounting criteria and primarily were intended to protect against exposure related to fiscal 2009 acquisitions. These instruments resulted in a gain of \$1.4 million in fiscal 2009, which is included in interest expense and other. In addition to this gain, the decrease in interest expense was impacted by declining interest rates. Also during fiscal 2009, the Company paid \$15.4 million to purchase \$18.0 million of principal on the convertible senior subordinated notes, resulting in a gain on early extinguishment of \$0.9 million. Included in interest expense and other is non-cash interest expense of \$7.9 million and \$8.1 million for the fiscal years ended March 31, 2009 and 2008, respectively, of which \$5.8 million and \$6.5 million, respectively, reflect accretion of interest recognized in accordance with the convertible debt accounting standard.

The effective tax rate was 31.8% for the fiscal year ended March 31, 2009 and 32.9% for the fiscal year ended March 31, 2008. The decrease in the tax rate was primarily due to the retroactive reinstatement of the research and experimentation tax credit back to January 1, 2008.

Loss from discontinued operations before income taxes was \$7.3 million for the fiscal year ended March 31, 2009, compared with a loss from discontinued operations before income taxes of \$13.0 million for the fiscal year ended March 31, 2008, which included an impairment charge of \$4.0 million. The income tax benefit for discontinued operations was \$2.6 million for the fiscal year ended March 31, 2009 compared to a benefit of \$4.6 million for the prior year.

### **Business Segment Performance**

We are a major supplier to the aerospace industry and have two operating segments: (i) Triumph Aerospace Systems Group and (ii) Triumph Aftermarket Services Group. Our Aerospace Systems segment includes 39 operating locations, and the Aftermarket Services segment includes 15 operating

locations at March 31, 2010. The results of operations between our operating segments vary due to differences in competitors, customers, extent of proprietary deliverables and performance. For example, our Aerospace Systems segment generally includes proprietary products and/or arrangements where we become the primary source or one of a few primary sources to our customers, where our unique manufacturing capabilities command a higher margin. Also, OEMs are increasingly focusing on assembly activities while outsourcing more manufacturing and repair to third parties, and as a result, are less of a competitive force than in previous years. In contrast, our Aftermarket Services segment provides MRO services on components and accessories manufactured by third parties, with more diverse competition, including airlines, OEMs and other third-party service providers. In addition, variability in the timing and extent of customer requests performed in the Aftermarket Services segment can provide for greater volatility and less predictability in revenue and earnings than that experienced in the Aerospace Systems segment.

The Aerospace Systems segment consists of the Company's operations which manufacture products primarily for the aerospace OEM market. The Aerospace Systems segment's operations design and engineer mechanical and electromechanical controls, such as hydraulic systems and components, main engine gearbox assemblies, accumulators and mechanical control cables. The Aerospace Systems segment's revenues are also derived from stretch forming, die forming, milling, bonding, machining, welding and assembly and fabrication of various structural components used in aircraft wings, fuselages and other significant assemblies. Further, the segment's operations also design and manufacture composite assemblies for floor panels, environmental control system ducts, non-structural cockpit components and thermal acoustic insulation systems. These products are sold to various aerospace OEMs on a global basis.

The Aftermarket Services segment consists of the Company's operations that provide maintenance, repair and overhaul services to both commercial and military markets on components and accessories manufactured by third parties. Maintenance, repair and overhaul revenues are derived from services on auxiliary power units, airframe and engine accessories, including constant-speed drives, cabin compressors, starters and generators, and pneumatic drive units. In addition, the Aftermarket Services segment's operations repair and overhaul thrust reversers, nacelle components and flight control surfaces. The Aftermarket Services segment's operations also perform repair and overhaul services and supply spare parts for various types of cockpit instruments and gauges for a broad range of commercial airlines on a worldwide basis.

We currently generate a majority of our revenue from clients in the commercial aerospace industry, the military, the business jet and the regional airline industry. Our growth and financial results are largely dependent on continued demand for our products and services from clients in these industries. If any of these industries experiences a downturn, our clients in these sectors may conduct less business with us. The following table summarizes our net sales by end market by business segment.

The loss of one or more of our major customers or an economic downturn in the commercial airline or the military and defense markets could have a material adverse effect on our business.

	<u>Year Ended March 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
<b>Aerospace Systems</b>			
Commercial aerospace . . . . .	35.4%	28.3%	30.7%
Military . . . . .	34.8%	33.0%	29.5%
Regional . . . . .	3.1%	5.3%	4.2%
Business Jets . . . . .	4.6%	7.9%	8.1%
Non-aviation . . . . .	4.7%	5.1%	6.2%
Total Aerospace Systems net sales . . . . .	<u>82.6%</u>	<u>79.6%</u>	<u>78.7%</u>
<b>Aftermarket Systems</b>			
Commercial aerospace . . . . .	13.0%	14.4%	13.7%
Military . . . . .	2.5%	3.3%	3.3%
Regional . . . . .	0.5%	0.6%	0.9%
Business Jets . . . . .	0.7%	0.9%	0.7%
Non-aviation . . . . .	0.7%	1.2%	2.7%
Total Aftermarket Services net sales . . . . .	<u>17.4%</u>	<u>20.4%</u>	<u>21.3%</u>
Total Consolidated net sales . . . . .	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

The decline in our percentage of net sales to the Business jet and Regional jet markets is due to the overall economic conditions and the Commercial aerospace end market was impacted by major program delays in fiscal 2010, as well as continued growth in the Military end market. Sales to the Commercial aerospace end market were negatively impacted in fiscal 2009 by the Boeing strike.

**Business Segment Performance—Fiscal year ended March 31, 2010 compared to fiscal year ended March 31, 2009**

	<u>Year Ended March 31,</u>		<u>% Change</u>	<u>% of Total Sales</u>	
	<u>2010</u>	<u>2009</u>		<u>2010</u>	<u>2009</u>

Elimination of inter-segment sales . . . . .	(3,705)	(2,619)	41.5%	(0.3)%	(0.2)%
Total net sales . . . . .	<u>\$1,294,780</u>	<u>\$1,240,378</u>	4.4%	<u>100.0%</u>	<u>100.0%</u>
				<u>% of Segment Sales</u>	
				<u>2010</u>	<u>2009</u>
	(in thousands)				
<b>SEGMENT OPERATING INCOME</b>					
Aerospace Systems . . . . .	\$170,457	\$168,006	1.5%	15.9%	17.0%
Aftermarket Services . . . . .	11,109	10,876	2.1%	4.9%	4.3%
Corporate . . . . .	(26,285)	(26,968)	(2.5)%	N/A	N/A
Total segment operating income . . . . .	<u>\$155,281</u>	<u>\$151,914</u>	2.2%	12.0%	12.2%

**Aerospace Systems:** The Aerospace Systems segment net sales increased by \$85.1 million, or 8.6%, to \$1.07 billion for the fiscal year ended March 31, 2010 from \$988.4 million for the fiscal year ended March 31, 2009. The fiscal 2009 acquisitions contributed \$123.0 million of increased net sales. Organic sales decreased by \$37.8 million due to declines in the business jet and regional jet markets due to the overall economic conditions and major program delays, however, the prior year period sales were negatively impacted by the Boeing strike.

Aerospace Systems segment operating income increased by \$2.5 million, or 1.5%, to \$170.5 million for the fiscal year ended March 31, 2010 from \$168.0 million for the fiscal year ended March 31, 2009. Operating income increased primarily due to margins attained on increased sales, including the contribution from the above-mentioned acquisitions, as well as decreases in litigation expenses (\$0.9 million) and bad debt expenses (\$2.3 million), partially offset by increases in depreciation and amortization (\$6.0 million) primarily associated with the fiscal 2009 acquisitions.

Aerospace Systems segment operating income as a percentage of segment sales decreased to 15.9% for the fiscal year ended March 31, 2010 as compared with 17.0% for the fiscal year ended March 31, 2009, due to the decrease in gross margin.

**Aftermarket Services:** The Aftermarket Services segment net sales decreased by \$29.6 million, or 11.6%, to \$225.0 million for the fiscal year ended March 31, 2010 from \$254.6 million for the fiscal year ended March 31, 2009. This decrease was due to a decline in global commercial air traffic and airline inventory de-stocking resulting in lower demand for the repair and overhaul of auxiliary power units and the brokering of similar units.

Aftermarket Services segment operating income increased by \$0.2 million, or 2.1%, to \$11.1 million for the fiscal year ended March 31, 2010 from \$10.9 million for the fiscal year ended March 31, 2009. Despite decreased sales volume as described above, operating income increased primarily due to charges recorded in the fiscal year ended March 31, 2009 for cost overruns and excess overhead at our Phoenix APU operations, contract terminations and changes in estimate under power-by-the hour (“PBH”) contracts, offset by \$0.3 million in expenses incurred to shut down a service facility in Austin, Texas in fiscal 2010. While the results of our Phoenix APU operations continue to improve, operating margins continued to be dilutive to the segment’s results.

Aftermarket Services segment operating income as a percentage of segment sales increased to 4.9% for the fiscal year ended March 31, 2010 as compared with 4.3% for the fiscal year ended March 31, 2009, due to a decline in sales volume offset by improved results at the Phoenix APU operations.

**Business Segment Performance—Fiscal year ended March 31, 2009 compared to fiscal year ended March 31, 2008**

	Year Ended March 31,		% Change	% of Total Sales

	Year Ended March 31,		% Change	% of Segment Sales	
	2009	2008		2009	2008
	(in thousands)				
<b>SEGMENT OPERATING INCOME</b>					
Aerospace Systems . . . . .	\$168,006	\$124,812	34.6%	17.0%	13.8%
Aftermarket Services . . . . .	10,876	23,480	(53.7)%	4.3%	9.5%
Corporate . . . . .	(26,968)	(21,967)	22.8%	n/a	n/a
Total segment operating income . . . . .	<u>\$151,914</u>	<u>\$126,325</u>	20.3%	12.2%	11.0%

**Aerospace Systems:** The Aerospace Systems segment net sales increased by \$81.0 million, or 8.9%, to \$988.4 million for the fiscal year ended March 31, 2009 from \$907.4 million for the fiscal year ended March 31, 2008. The increase was primarily due to organic sales growth to our OEM customers of \$44.0 million driven by increased aircraft build rates and by a favorable settlement of a retroactive pricing agreement, negatively impacted by the Boeing strike and major program delays (particularly in the 787 and 747-8 programs). The net sales contributed from the fiscal 2009 acquisitions and the fiscal 2008 acquisition of B. & R. Machine & Tool Corp. (now Triumph Structures—Long Island) of \$37.0 million accounted for the remaining increase.

Aerospace Systems segment operating income increased by \$43.2 million, or 34.6%, to \$168.0 million for the fiscal year ended March 31, 2009 from \$124.8 million for the fiscal year ended March 31, 2008. Operating income increased primarily due to margins attained on increased sales, including the contribution of \$13.8 million from the above-mentioned acquisitions, as well as decreases in litigation expenses (\$3.8 million) and incentive compensation (\$1.1 million), partially offset by increases in payroll (\$2.9 million) and healthcare costs (\$2.0 million).

Aerospace Systems segment operating income as a percentage of segment sales increased to 17.0% for the fiscal year ended March 31, 2009 as compared with 13.8% for the fiscal year ended March 31, 2008, due to the contribution of the acquisition of B. & R. Machine & Tool Corp, the reduction in expenses discussed above, and the favorable settlement of a retroactive pricing agreement.

**Aftermarket Services:** The Aftermarket Services segment net sales increased by \$8.0 million, or 3.3%, to \$254.6 million for the fiscal year ended March 31, 2009 from \$246.6 million for the fiscal year ended March 31, 2008. This increase was due to increased market penetration in the repair and overhaul of auxiliary power units and thrust reversers primarily at our Thailand repair and maintenance facility. These increases were offset by decreased fleet utilization by customers under PBH contracts impacting revenue by approximately \$3.1 million.

Aftermarket Services segment operating income decreased by \$12.6 million, or 53.7%, to \$10.9 million for the fiscal year ended March 31, 2009 from \$23.5 million for the fiscal year ended March 31, 2008. Operating income decreased primarily due to losses at the Phoenix APU operations due to cost overruns and excess overhead (\$4.8 million), higher than expected warranty expenses (\$0.6 million), lower than expected PBH revenue (\$3.1 million), PBH contract charges (\$1.1 million) and additional charges for the early termination of a maintenance contract (\$1.3 million), partially offset by higher margins attained on increased sales as described above, as well as decreases in payroll (\$0.8 million) and incentive compensation expenses (\$1.1 million).

Aftermarket Services segment operating income as a percentage of segment sales decreased to 4.3% for the fiscal year ended March 31, 2009 as compared with 9.5% for the fiscal year ended March 31, 2008, due to the \$5.5 million in charges due to contract terminations and changes in estimate under PBH contracts as well as the production and operation losses at the Phoenix APU operations.

## Liquidity and Capital Resources

Our working capital needs are generally funded through cash flow from operations and borrowings under our credit arrangements. During the year ended March 31, 2010, we generated approximately \$169.6 million of cash flow from operating activities, used approximately \$62.5 million in investing activities and generated approximately \$35.3 million in financing activities.

Cash flows from operations for the fiscal year ended March 31, 2010 increased \$34.7 million, or 25.7%, from the fiscal year ended March 31, 2009. Our cash flows from operations increased despite a decrease of \$20.2 million in net income, which included \$5.8 million in additional non-cash charges for depreciation and amortization due to the fiscal 2009 acquisitions and \$19.9 million in impairment charges within discontinued operations during the fiscal year ended March 31, 2010. The increase in cash flows resulted from continued improvements in our inventory management resulting in a source of cash of \$30.2 million as compared to the use of cash of \$7.7 million in the prior year period.

On August 17, 2009, we amended the existing amended and restated credit agreement (the "Credit Facility") with our lenders to (i) increase the availability under the Credit Facility to \$485.0 million from \$370.0 million, (ii) extend the maturity date to January 31, 2013 and (iii) amend certain other terms and covenants. As of March 31, 2010, \$478.9 million was available under our Credit Facility. On March 31, 2010, no borrowings and \$6.1 million in letters of credit were outstanding under the Credit Facility. Amounts repaid under the Credit Facility may be reborrowed.

In November 2009, the Company issued \$175.0 million principal amount of 8% Senior Subordinated Notes due 2017 (the "2017 Notes"). The 2017 Notes were sold at 98.558% of principal amount for net proceeds of \$172.5 million, and have an effective interest rate of 8.25%. Interest on the 2017 Notes is payable semi-annually in cash in arrears on May 15 and November 15 of each year. In connection with the issuance of the 2017 Notes, the Company incurred approximately \$4.4 million of costs, which were deferred and are being amortized on the effective interest method over the term of the notes.

In the fourth quarter of fiscal 2010, we acquired Fabritech, Inc. (now Triumph Fabrications—St. Louis) and DCL Avionics, Inc. (now part of Triumph Instruments—Burbank), collectively the "fiscal 2010 acquisitions." The total cash paid at closing for the fiscal 2010 acquisitions of \$23.2 million was funded by cash from operations. The fiscal 2010 acquisitions provide for deferred and contingent payments of \$0.1 million and \$16.0 million, respectively. The fair value of the contingent payments is \$10.6 million as of March 31, 2010.

During the year ended March 31, 2009, we generated approximately \$135.0 million of cash flow from operating activities, used approximately \$185.6 million in investing activities and generated approximately \$52.1 million in financing activities. During the fiscal year ended March 31, 2009, our increased cash flow from operations was attributable to higher net income and an improved performance on working capital due to increased cash collections efforts, offset by timing of cash disbursements and utilization of inventory.

In August 2008, we entered into a receivable securitization facility (the "Securitization Facility"). Under the Securitization Facility, the Company sells on a revolving basis certain accounts receivable to Triumph Receivables, LLC, a wholly-owned special purpose entity, which in turn sells a percentage ownership interest in the receivables to commercial paper conduits sponsored by financial institutions. The Company is the servicer of the accounts receivable under the Securitization Facility. As of March 31, 2010, the maximum amount available under the Securitization Facility was \$123.5 million. The Securitization Facility is due to expire in August 2010 and is subject to annual renewal through August 2013. Interest rates are based on prevailing market rates for short-term commercial paper plus a program fee and a commitment fee. The program fee is 0.85% on the amount outstanding under the Securitization Facility. Additionally, the commitment fee is 0.65% on 102% of the maximum amount

available under the Securitization Facility. At March 31, 2010, there was \$75.0 million outstanding under the Securitization Facility included in the current portion of long-term debt on the consolidated balance sheet, representing the minimum borrowing requirement. We use this facility because it offers an attractive interest rate relative to other financing sources. The Company securitizes its accounts receivable, which are generally non-interest bearing, in transactions that are accounted for as borrowings under the *Transfers and Servicing* topic of the ASC. The agreement governing the Securitization Facility contains restrictions and covenants which include limitations on the making of certain restricted payments, creation of certain liens, and certain corporate acts such as mergers, consolidations and the sale of substantially all assets.

In March 2009, we acquired Merritt Tool Company, Inc. (now Triumph Structures—East Texas), Saygrove Defence & Aerospace Group Limited (now Triumph Actuation & Motion Control Systems—UK), the aviation segment of Kongsberg Automotive Holdings ASA (now Triumph Controls—UK and Triumph Controls—Germany) and The Mexmil Company, LLC (now Triumph Insulation Systems), collectively the “fiscal 2009 acquisitions”. No in-process research and development was attributed to the fiscal 2009 acquisitions. The total cash paid at closing for the fiscal 2009 acquisitions of \$143.6 million was funded by borrowings under our Credit Facility. The fiscal 2009 acquisitions further provide for deferred payments of \$3.5 million, of which \$2.1 million and \$1.4 million are payable in March 2010 and September 2010, respectively. The fiscal 2009 acquisitions also provide for contingent payments of \$24.9 million, certain of which are contingent upon the achievement of specified earnings levels during the earnout period and another \$10.0 million that is contingent upon entering into a specific customer contract. The maximum earnout amounts payable in respect of fiscal 2010, 2011, 2012 and 2013 are \$2.3 million, \$4.6 million, \$5.4 million and \$2.6 million, respectively. The contingent amounts have not been recorded as the contingencies have not been resolved and the consideration has not been paid.

Also in March 2009, we entered into a 7-year Master Lease Agreement (the “Leasing Facility”) creating a capital lease of certain existing property and equipment, resulting in net proceeds of \$58,546 after deducting debt issuance costs of approximately \$188. The net proceeds from the Leasing Facility were used to repay a portion of the outstanding indebtedness under our Credit Facility. The debt issuance costs have been recorded as other assets in the accompanying consolidated balance sheets and are being amortized over the term of the Leasing Facility. The Leasing Facility bears interest at a weighted average fixed rate of 6.1% per annum.

Cash provided by operations for the fiscal year ended March 31, 2008 was \$45.7 million, compared to cash provided by operations of \$41.3 million for the fiscal year ended March 31, 2007. During the fiscal year ended March 31, 2008, our increased cash flow from operations was attributable to higher net income offset by a decline in performance on working capital, due to timing of cash collections and utilization of inventory offset by timing of cash disbursements.

In February 2008, we acquired the assets and business of B. & R. Machine & Tool Corp. (now Triumph Structures—Long Island), located in Westbury, New York. The total cash paid at closing for the acquisition of \$67.0 million was funded by borrowings under our Credit Facility. The purchase agreement provides for an earnout note for \$13.0 million. Payments under the earnout note are contingent upon the achievement of certain earnings levels during the earnout period. The maximum amounts payable in respect of fiscal 2009, 2010 and 2011, are \$3.5 million, \$4.5 million and \$5.0 million, respectively.

During February 2008, we exercised existing authority to make stock repurchases and repurchased 220,000 shares of our outstanding shares under the program for an aggregate consideration of \$12.3 million, funded by borrowings under our Credit Facility. In February 2008, the Company’s Board of Directors then authorized an increase in our existing stock repurchase program by up to an additional 500,000 shares of our common stock. As a result, as of May 15, 2009, we remain able to purchase an additional 500,800 shares. Repurchases may be made from time to time in open market

transactions, block purchases, privately negotiated transactions or otherwise at prevailing prices. No time limit has been set for completion of the program.

On September 18, 2006, we issued \$201.3 million in convertible senior subordinated notes (the “Notes”). The Notes are direct, unsecured, senior subordinated obligations of the Company, and rank (i) junior in right of payment to all of our existing and future senior indebtedness, (ii) equal in right of payment with any other future senior subordinated indebtedness, and (iii) senior in right of payment to all subordinated indebtedness.

The Company received net proceeds from the sale of the Notes of approximately \$195.0 million after deducting offering expenses of approximately \$6.3 million. The use of the net proceeds from the sale was for prepayment of our outstanding Senior Notes, including a “make whole” premium, fees and expenses in connection with the prepayment, and to repay a portion of the outstanding indebtedness under our Credit Facility. Approximately \$6.3 million in debt issuance costs have been recorded as other assets in the accompanying consolidated balance sheets. Debt issuance costs are being amortized over a period of five years.

Effective April 1, 2009, we adopted the convertible debt accounting standard, which requires retrospective application. The convertible debt accounting standard requires separately accounting for the liability and equity components of the Notes in a manner that reflects our nonconvertible debt borrowing rate when interest and amortization expense is recognized in subsequent periods. The excess of the principal amount of the liability component over its carrying amount has been recognized as debt discount and amortized using the effective interest method. This change in accounting for the Notes has been applied to our consolidated financial statements on a retrospective basis, as required by the standard. For more details on the impact of this change on our consolidated financial statements, see Note 2 to the consolidated financial statements. As of March 31, 2009, the remaining discount of \$15.9 million will be amortized on the effective interest method through October 1, 2011.

The Notes bear interest at a fixed rate of 2.625% per annum, payable in cash semi-annually in arrears on each April 1 and October 1 beginning April 1, 2007. During the period commencing on October 6, 2011 and ending on, but excluding, April 1, 2012 and each six-month period from October 1 to March 31 or from April 1 to September 30 thereafter, the Company will pay contingent interest during the applicable interest period if the average trading price of a Note for the five consecutive trading days ending on the third trading day immediately preceding the first day of the relevant six-month period equals or exceeds 120% of the principal amount of the Notes. The contingent interest payable per Note in respect of any six-month period will equal 0.25% per annum calculated on the average trading price of a Note for the relevant five trading day period. This contingent interest feature represents an embedded derivative. Since it is in the control of the Company to call the Notes at any time after October 6, 2011, the value of the derivative was determined to be de minimis. Accordingly, no value has been assigned at issuance or at March 31, 2009.

The Notes mature on October 1, 2026 unless earlier redeemed, repurchased or converted. The Company may redeem the Notes for cash, either in whole or in part, anytime on or after October 6, 2011 at a redemption price equal to 100% of the principal amount of the Notes to be redeemed plus accrued and unpaid interest, including contingent interest and additional amounts, if any, up to but not including the date of redemption. In addition, holders of the Notes will have the right to require the Company to repurchase for cash all or a portion of their Notes on October 1, 2011, 2016 and 2021, at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased plus accrued and unpaid interest, including contingent interest and additional amounts, if any, up to, but not including, the date of repurchase. The Notes are convertible into the Company’s common stock at a rate equal to 18.3655 shares per \$1,000 principal amount of the Notes (equal to an initial conversion price of approximately \$54.45 per share), subject to adjustment as described in the Indenture. Upon conversion, the Company will deliver to the holder surrendering the Notes for conversion, for each

\$1,000 principal amount of Notes, an amount consisting of cash equal to the lesser of \$1,000 and the Company's total conversion obligation and, to the extent that the Company's total conversion obligation exceeds \$1,000, at the Company's election, cash or shares of the Company's common stock in respect of the remainder.

The Notes are eligible for conversion upon meeting certain conditions as provided in the indenture agreement. For the periods from October 1, 2007 through December 31, 2007 and January 1, 2008 through March 31, 2008, the Notes were eligible for conversion; however, during this period, none of the Notes were converted.

To be included in the calculation of diluted earnings per share, the average price of the Company's common stock for the fiscal year must exceed the conversion price per share of \$54.45. The average price of the Company's stock for the fiscal years ended March 31, 2010 and March 31, 2009 was \$46.68 and \$46.49, respectively. Therefore, no additional shares were included in the diluted earnings per share calculations for those fiscal years. The average price of the Company's stock for the fiscal year ended March 31, 2008 was \$68.95. Accordingly, 777,059 additional shares were included in the diluted earnings per share calculation.

If the Company undergoes a fundamental change, holders of the Notes will have the right, subject to certain conditions, to require the Company to repurchase for cash all or a portion of their Notes at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased plus accrued and unpaid interest, including contingent interest and additional amounts, if any.

During fiscal 2010, the Company paid \$4.0 million to purchase \$4.2 million in principal on the Notes, resulting in a reduction in the carrying amount of the Notes of \$3.8 million and a gain on extinguishment of less than \$0.1 million. During fiscal 2009, we paid \$15.4 million to purchase \$18.0 million of principal on the convertible senior subordinated notes, resulting in a reduction in the carrying amount of the Notes of \$16.3 million and a gain on early extinguishment of \$0.9 million.

The indentures under the Company's debt agreements and the Credit Facility contain restrictions and covenants which include limitations on the Company's ability to incur additional indebtedness, issue stock options or warrants, make certain restricted payments and acquisitions, create liens, enter into transactions with affiliates, sell substantial portions of its assets and pay cash dividends. Additional covenants require compliance with financial tests, including leverage and interest coverage ratio.

At March 31, 2010, there were no borrowings and \$6.1 million in letters of credit outstanding under the Credit Facility. At March 31, 2009, there were \$127.7 million in borrowings and \$5.6 million in letters of credit outstanding under the Credit Facility. The level of unused borrowing capacity under the Company's revolving Credit Facility varies from time to time depending in part upon its compliance with financial and other covenants set forth in the related agreement. The Credit Facility contains certain affirmative and negative covenants including limitations on specified levels of indebtedness to earnings before interest, taxes, depreciation and amortization, and interest coverage requirements, and includes limitations on, among other things, liens, mergers, consolidations, sales of assets, and incurrence of debt. The Company is currently in compliance with all such covenants. As of March 31, 2010, the Company had borrowing capacity under the Credit Facility of \$478.9 million, after reductions for borrowings and letters of credit outstanding.

Capital expenditures were approximately \$31.7 million for the fiscal year ended March 31, 2010 primarily for manufacturing machinery and equipment. We funded these expenditures through borrowings under our Credit Facility. We expect capital expenditures to be approximately \$50.0 million for our fiscal year ending March 31, 2011. The expenditures are expected to be used mainly to expand capacity or replace old equipment at several facilities. During the same period, we anticipate approximately \$2.5 million of start-up costs related to the Mexican facility which is in addition to our investment in capital and infrastructure.

Our expected future cash flows for the next five years for long term debt, leases and other obligations are as follows:

<u>Contractual Obligations</u>	<u>Payments Due by Period</u>				
	<u>Total</u>	<u>Less than 1 Year</u>	<u>1-3 Years</u>	<u>4-5 Years</u>	<u>After 5 Years</u>
		(in thousands)			
Debt principal(1) . . . . .	\$ 517,685	\$ 91,929	\$206,549	\$22,750	\$196,457
Debt-interest(2) . . . . .	137,504	23,137	41,435	31,555	41,377
Operating leases . . . . .	51,710	12,308	16,060	10,855	12,487
Contingent payments(3) . . . . .	41,242	10,000	24,013	7,229	—
Purchase obligations . . . . .	301,738	258,179	42,873	569	117
<b>Total . . . . .</b>	<b>\$1,049,879</b>	<b>\$395,553</b>	<b>\$330,930</b>	<b>\$72,958</b>	<b>\$250,438</b>

- (1) Included in the Company's consolidated balance sheet at March 31, 2010, plus discounts on Convertible Senior Subordinated Notes and the 2017 Notes of \$9.5 million and \$2.4 million, respectively, being amortized to expense through September 2011 and November 2017, respectively.
- (2) Includes fixed-rate interest only.
- (3) Includes unrecorded contingent payments in connection with the fiscal 2009 acquisitions.

The above table excludes unrecognized tax benefits of \$4.4 million as of March 31, 2010 since we cannot predict with reasonable certainty the timing of cash settlements with the respective taxing authorities.

The table also excludes our pension benefit obligations. We made contributions to our union pension plans of \$1.5 million and \$0.3 million in fiscal 2010 and 2009, respectively. We expect to make contributions of \$3.2 million to our employee benefit plans during fiscal 2011. As of March 31, 2010, our defined benefit pension plans are frozen. See Note 14, "Employee Benefit Plans" of our Consolidated Financial Statements for a further discussion of our pension and other employee benefit plans.

In March 2010, we entered into definitive agreement to purchase Vought from TC Group ("Carlyle") for cash and stock consideration. The purchase consideration to Vought shareholders includes \$525.0 million of cash and, subject to certain adjustments, approximately 7.9 million shares of our common stock. The cash portion of the merger consideration is fixed. The stock portion of the merger consideration will not be adjusted to reflect changes to Triumph's stock price prior to closing of the merger. The stock portion of the merger consideration will be decreased by approximately 3,360 shares for each day prior to July 1, 2010 that the merger is completed and increased by approximately 3,360 shares for each day after July 1, 2010 that the merger is completed. The stock portion of the merger consideration will also be reduced for expenses of Vought that Triumph pays in connection with completing the merger. We will also assume Vought's debt, which was \$592.2 million as of March 31, 2010. The cash portion of the acquisition, as well as the repayment of Vought's assumed debt is expected to be funded through a combination of cash-on-hand, borrowing under our existing amended and restated credit agreement (the "Credit Facility") and the issuance of senior notes in the capital markets. In anticipation of the merger, we have obtained a commitment letter, which provides us up to \$1.1 billion in debt financing necessary to consummate the merger that may be used for funding in the event the transaction closes prior to obtaining permanent financing in the capital markets.

We believe that cash generated by operations and borrowings under the Credit Facility will be sufficient to meet anticipated cash requirements for our current operations for the foreseeable future. However, we have a stated policy to grow through acquisitions and are continuously evaluating various

acquisition opportunities. As a result, we currently are pursuing the potential purchase of a number of candidates. In the event that more than one of these transactions is successfully consummated, the availability under the Credit Facility might be fully utilized and additional funding sources may be needed. There can be no assurance that such funding sources will be available to us on terms favorable to us, if at all.

On May 10, 2010, the Company entered into a \$535.0 million revolving credit facility, subject to the closing of the Vought acquisition. This revolving credit facility will be available to partially fund the Vought acquisition and refinance any existing obligations under our existing Credit Facility, with a maturity date four years from the closing of the Vought acquisition.

## **CRITICAL ACCOUNTING POLICIES**

Critical accounting policies are those accounting policies that can have a significant impact on the presentation of our financial condition and results of operations, and that require the use of complex and subjective estimates based upon past experience and management's judgment. Because of the uncertainty inherent in such estimates, actual results may differ from these estimates. Below are those policies applied in preparing our financial statements that management believes are the most dependent on the application of estimates and assumptions. For additional accounting policies, see Note 2 of "Notes to Consolidated Financial Statements."

### **Allowance for Doubtful Accounts**

Trade receivables are presented net of an allowance for doubtful accounts. In determining the appropriate allowance, we consider a combination of factors, such as industry trends, our customers' financial strength and credit standing, and payment and default history. The calculation of the required allowance requires a judgment as to the impact of these and other factors on the ultimate realization of our trade receivables. We believe that these estimates are reasonable and historically have not resulted in material adjustments in subsequent periods when the estimates are adjusted to actual amounts.

### **Inventories**

Inventories are stated at the lower of cost or market using the average cost or specific identification methods. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those anticipated, inventory adjustments may be required. We believe that these estimates are reasonable and historically have not resulted in material adjustments in subsequent periods when the estimates are adjusted to actual amounts.

### **Revenue Recognition**

Revenues are recognized in accordance with the contract terms when products are shipped, delivery has occurred or services have been rendered, pricing is fixed or determinable, and collection is reasonably assured. The Aftermarket Services Segment provides repair and overhaul services, certain of which services are provided under long term power-by-the-hour contracts. The Company applies the proportional performance method to recognize revenue under these contracts. Revenue is recognized over the contract period as units are delivered based on the relative fair value in proportion to the total estimated contract consideration. In estimating the total contract consideration, we evaluate the projected utilization of our customer's fleet over the term of the contract, in connection with the related estimated repair and overhaul servicing requirements to the fleet based on such utilization. Changes in utilization of the fleet by our customers, among other factors, may have an impact on these estimates and require adjustments to our estimates of revenue to be realized.

Reserves for contract losses are accrued when estimated costs to complete exceed expected future revenues. The Company's policy with respect to sales returns and allowances generally provides that the customer may not return products or be given allowances, except at the Company's option. Accruals for sales returns, other allowances, and estimated warranty costs are provided at the time of shipment based upon past experience.

### **Goodwill and Intangible Assets**

Goodwill and intangible assets with indefinite lives are not amortized; rather, they are tested for impairment on at least an annual basis. Additionally, intangible assets with finite lives continue to be amortized over their useful lives.

The Company's operating segments of Aerospace Systems and Aftermarket Services are also the reporting units under ASC 350, *Intangibles—Goodwill and Other*. The Chief Executive Officer, President and Chief Operating Officer and the Chief Financial Officer comprise the Company's Chief Operating Decision Maker ("CODM"). The Company's CODM evaluates performance and allocates resources based upon review of segment information. Each of the operating segments is comprised of a number of operating units which are considered to be components under ASC 350. The operating units, for which discrete financial information exists, are aggregated for purposes of goodwill impairment testing. The Company's acquisition strategy is to acquire companies that complement and enhance the capabilities of the operating segments of the Company. Each acquisition is assigned to either the Aerospace Systems reporting unit or the Aftermarket Services reporting unit. The goodwill that results from each acquisition is also assigned to the reporting unit to which the acquisition is allocated, because it is that reporting unit which is intended to benefit from the synergies of the acquisition.

ASC 350 requires a two-step impairment test for goodwill and intangible assets with indefinite lives. The first step is to compare the carrying amount of the reporting unit's assets to the fair value of the reporting unit. If the fair value exceeds the carrying value, no further work is required and no impairment loss is recognized. If the carrying amount exceeds the fair value, then the second step is required to be completed, which involves allocating the fair value of the reporting unit to each asset and liability, with the excess being implied goodwill. An impairment loss occurs if the amount of the recorded goodwill exceeds the implied goodwill. The determination of the fair value of our reporting units is based, among other things, on estimates of future operating performance of the reporting unit being valued. We are required to complete an impairment test for goodwill and intangible assets with indefinite lives and record any resulting impairment losses at least annually. Changes in market conditions, among other factors, may have an impact on these estimates and require interim impairment assessments.

We completed our required annual impairment test in the fourth quarter of fiscal 2010 and determined that there was no impairment. Our methodology for determining the fair value of a reporting unit includes the use of an income approach which discounts future net cash flows to their present value at a rate that reflects the Company's cost of capital, otherwise known as the discounted cash flow method ("DCF"). These estimated fair values are based on estimates of future cash flows of the businesses. Factors affecting these future cash flows include the continued market acceptance of the products and services offered by the businesses, the development of new products and services by the businesses and the underlying cost of development, the future cost structure of the businesses, and future technological changes. The Company also incorporated market multiples for comparable companies in determining the fair value of our reporting units. Any such impairment would be recognized in full in the reporting period in which it has been identified.

In fiscal 2010, we conducted additional sensitivity analysis to assess the risk for potential impairment based upon changes in the key assumptions in our goodwill valuation test. We reviewed the Aftermarket Services reporting unit since it had significant changes in its economic indicators and

adjusted for select changes in the risk adjusted discount rate to consider both the current return requirements of the market and the risks inherent in the reporting unit, expected long-term growth rate and cash flow projections to determine if any decline in the estimated fair value of a reporting unit could result in a goodwill impairment. Based upon our additional analysis, it was determined that there was no impairment to be recognized, however, the fair value of our Aftermarket Services reporting unit was not substantially in excess of its carrying amount, as the fair value exceeded the carrying value by approximately 5%. The amount of goodwill for our Aftermarket Services reporting unit amounted to \$74.1 million at March 31, 2010. Going forward, we will continue to monitor the performance of this reporting unit in relation to the key assumptions in our analysis. If management determines that impairment exists, the impairment will be recognized in the period in which it is identified.

In the event that market multiples for stock price to EBITDA in the aerospace and defense markets decrease, or the expected EBITDA for our reporting units decreases, a goodwill impairment charge may be required, which would adversely affect our operating results and financial condition. No impairment charges have been incurred during the fiscal years ended March 31, 2010, 2009 or 2008.

Finite-lived intangible assets are amortized over their useful lives ranging from 5 to 30 years. We continually evaluate whether events or circumstances have occurred that would indicate that the remaining estimated useful lives of our long-lived assets, including intangible assets, may warrant revision or that the remaining balance may not be recoverable. Intangible assets are evaluated for indicators of impairment. When factors indicate that long-lived assets, including intangible assets, should be evaluated for possible impairment, an estimate of the related undiscounted cash flows over the remaining life of the long-lived assets, including intangible assets, is used to measure recoverability. Some of the more important factors we consider include our financial performance relative to our expected and historical performance, significant changes in the way we manage our operations, negative events that have occurred, and negative industry and economic trends. If any impairment is indicated, measurement of the impairment will be based on the difference between the carrying value and fair value of the asset, generally determined based on the present value of expected future cash flows associated with the use of the asset. For the fiscal years ended March 31, 2010, 2009 and 2008, there were no reductions to the remaining useful lives and no write-downs of long-lived assets, including intangible assets, were required.

### **Recently Issued Accounting Pronouncements**

In February 2008, the Financial Accounting Standards Board (“FASB”) issued FASB Staff Position (“FSP”) No. 157-1, which amends Statement of Financial Accounting Standards (“SFAS”) No. 157, *Fair Value Measurements* (“SFAS 157”) to exclude SFAS No. 13, *Accounting for Leases*, and other accounting pronouncements that address fair value measurements for lease transactions, and FSP No. 157-2, which primarily were codified into ASC 820, *Fair Value Measurements and Disclosures* (“ASC 820”) and delayed the effective date of SFAS 157 as it relates to nonfinancial assets and nonfinancial liabilities until April 1, 2009 for the Company, except for items that are recognized or disclosed at fair value in the Company’s financial statements on a recurring basis. The nonfinancial assets and nonfinancial liabilities for which the Company had previously not applied the fair value provisions of SFAS 157 include: goodwill; intangible and other long-lived asset impairment testing; asset retirement obligations; liabilities for exit or disposal activities; and business combinations. The adoption had no impact on the Company’s financial position, results of operations and cash flows as the Company did not have any non-financial assets and non-financial liabilities that were recognized or disclosed at fair value on a recurring basis at March 31, 2009.

In April 2009, the FASB issued FSP No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, which primarily was codified into ASC 820. The FSP requires entities to evaluate the significance and relevance of market factors for fair value inputs to determine if, due to reduced

volume and market activity, the factors are still relevant and substantive measures of fair value. The FSP is effective for interim and annual reporting periods ending after June 15, 2009, and the adoption did not have any effect on our financial position or results of operations.

In December 2008, the FASB issued FSP FAS 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*, which primarily was codified into ASC 715, *Compensation and Benefits*. This FSP amends SFAS No. 132 (revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits*, to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan on investment policies and strategies, major categories of plan assets, inputs and valuation techniques used to measure the fair value of plan assets and significant concentrations of risk within plan assets. This FSP was effective for fiscal years ending after December 15, 2009, with earlier application permitted. Upon initial application, the provisions of this FSP are not required for earlier periods that are presented for comparative purposes. The required disclosures under the FSP have been included in Note 14 of "Notes to Consolidated Financial Statements."

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, which was primarily codified into ASC 825, *Financial Instruments*. This FSP amends SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*, to require disclosures about fair value of financial instruments not measured on the balance sheet at fair value in interim financial statements as well as in annual financial statements. Prior to this FSP, fair values for these assets and liabilities were only disclosed annually. This FSP applies to all financial instruments within the scope of SFAS 107 and requires all entities to disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments. This FSP was effective for interim periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company adopted this FSP in the quarter ended December 31, 2009 and the adoption of this FSP did not have a material effect on its disclosures.

Effective April 1, 2009, the Company adopted SFAS No. 141(R), *Business Combinations* ("SFAS 141(R)") which was primarily codified into ASC 805, *Business Combinations*, and SFAS No. 160, *Accounting and Reporting of Noncontrolling Interests in Consolidated Financial Statements*, an amendment of ARB No. 51 ("SFAS 160"), which was primarily codified into ASC 810, *Consolidations*. SFAS 141(R) and SFAS 160 significantly change the accounting for and reporting of business combination transactions and noncontrolling (minority) interests. The adoption of SFAS 141(R) and SFAS 160 did not have a material impact on the Company's consolidated financial statements.

### **Forward-Looking Statements**

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 relating to our future operations and prospects, including statements that are based on current projections and expectations about the markets in which we operate, and management's beliefs concerning future performance and capital requirements based upon current available information. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used in this document, words like "may," "might," "will," "expect," "anticipate," "believe," "potential," and similar expressions are intended to identify forward-looking statements. Actual results could differ materially from management's current expectations. For example, there can be no assurance that additional capital will not be required or that additional capital, if required, will be available on reasonable terms, if at all, at such times and in such amounts as may be needed by us. In addition to these factors, among other factors that could cause actual results to differ materially, are uncertainties relating to the integration of acquired businesses, including without limitation Vought, general economic conditions affecting our business segments, dependence of certain of our businesses on certain key customers, the risk that we will not realize all of the anticipated benefits from the acquisition of Vought as well as competitive factors relating to the

aerospace industry. For a more detailed discussion of these and other factors affecting us, see the risk factors described in “Item 1A. Risk Factors.”

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

*Market Risk*

Our primary exposure to market risk consists of changes in interest rates on borrowings. An increase in interest rates would adversely affect our operating results and the cash flow available after debt service to fund operations and expansion. In addition, an increase in interest rates would adversely affect our ability to pay dividends on our common stock, if permitted to do so under certain of our debt arrangements, including the Credit Facility. We manage exposure to interest rate fluctuations by optimizing the use of fixed and variable rate debt. As of March 31, 2010, approximately 85% of our debt is fixed rate debt. Our financing policy states that we generally maintain between 50% and 75% of our debt as fixed rate debt. We anticipate that our fixed rate debt may continue exceed 75% of our total debt during fiscal 2011. In March 2008, the Company entered into a thirty-nine month interest rate swap to exchange floating rate for fixed rate interest payments to hedge against interest rate changes on \$85.0 million of the Company’s variable rate debt. The Company utilizes the swap to provide protection to meet actual exposures and does not speculate in derivatives. The net effect of the spread between the floating rate (30-day LIBOR) and the fixed rate (2.925%) will be reflected as an adjustment to interest expense in the period incurred. In December 2009, the Company elected to de-designate the interest rate swap as a hedge. For the fiscal year ended March 31, 2010, \$2.3 million of losses were reclassified into earnings from accumulated other comprehensive income. The Company estimates that \$2.1 million of losses presently in accumulated other comprehensive income will be reclassified into earnings during fiscal year 2011. The information below summarizes our market risks associated with debt obligations and should be read in conjunction with Note 10 of “Notes to Consolidated Financial Statements.”

The following table presents principal cash flows and the related interest rates. Fixed interest rates disclosed represent the weighted average rate as of March 31, 2010. Variable interest rates disclosed fluctuate with the LIBOR, federal funds rates and other weekly rates and represent the weighted average rate at March 31, 2010.

**Item 8. Financial Statements and Supplementary Data**

## **Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Stockholders of Triumph Group, Inc.

We have audited the accompanying consolidated balance sheets of Triumph Group, Inc. as of March 31, 2010 and 2009, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended March 31, 2010. Our audits also included the financial statement schedule listed in the index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Triumph Group, Inc. at March 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended March 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 14 to the consolidated financial statements, the Company changed its method of accounting for collateral assignment split-dollar life insurance agreements as of April 1, 2008.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Triumph Group, Inc.'s internal control over financial reporting as of March 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated May 14, 2010 expressed an unqualified opinion thereon.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(Dollars in thousands, except per share data)**

**1. BACKGROUND AND BASIS OF PRESENTATION**

Triumph Group, Inc. (“Triumph”) is a Delaware corporation which, through its operating subsidiaries, designs, engineers, manufactures and sells products for the global aerospace original equipment manufacturers (“OEMs”) of aircraft and aircraft components and repairs and overhauls aircraft components and accessories for commercial airline, air cargo carrier and military customers on a worldwide basis. Triumph and its subsidiaries (collectively, the “Company”) is organized based on the products and services that it provides. Under this organizational structure, the Company has two reportable segments: the Aerospace Systems Group and the Aftermarket Services Group.

The Aerospace Systems segment consists of the Company’s operations which manufacture products primarily for the aerospace OEM market. The segment’s operations design and engineer mechanical and electromechanical controls, such as hydraulic systems and components, main engine gearbox assemblies, accumulators and mechanical control cables. The segment’s revenues are also derived from stretch forming, die forming, milling, bonding, machining, welding and assembly and fabrication of various structural components used in aircraft wings, fuselages and other significant assemblies. Further, the segment’s operations also design and manufacture composite assemblies for floor panels, environmental control system ducts, non-structural cockpit components and thermal acoustic insulation systems. These products are sold to various aerospace OEMs on a global basis.

The Aftermarket Services segment consists of the Company’s operations that provide maintenance, repair and overhaul services to both commercial and military markets on components and accessories manufactured by third parties. Maintenance, repair and overhaul revenues are derived from services on auxiliary power units, air frame and engine accessories, including constant-speed drives, cabin compressors, starters and generators, and pneumatic drive units. In addition, the segment’s operations repair and overhaul thrust reversers, nacelle components and flight control surfaces. The segment’s operations also perform repair and overhaul services, and supply spare parts, for various types of cockpit instruments and gauges for a broad range of commercial airlines on a worldwide basis.

Repair services generally involve the replacement of parts and/or the remanufacture of parts, which is similar to the original manufacture of the part. The processes that the Company performs related to repair and overhaul services are essentially the repair of wear parts or replacement of parts that are beyond economic repair. The repair service generally involves remanufacturing a complete part or a component of a part.

The accompanying consolidated financial statements include the accounts of Triumph and its subsidiaries. Intercompany accounts and transactions have been eliminated from the consolidated financial statements.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

*Cash Equivalents*

Cash equivalents consist of highly liquid investments with a maturity of three months or less at the time of purchase. Fair value of cash equivalents approximates carrying value.

*Concentration of Credit Risk*

Accounts receivable are recorded net of an allowance for doubtful accounts. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. The Company records the allowance for doubtful accounts based on prior experience and for specific collectibility matters when they arise. The Company writes off balances against the reserve when collectibility is deemed remote. The Company's trade accounts receivable are exposed to credit risk; however, the risk is limited due to the diversity of the customer base.

*Inventories*

Inventories are stated at the lower of cost or market using the average-cost or specific-identification methods. The Company writes down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those anticipated, inventory adjustments may be required. The Company believes that these estimates are reasonable and historically have not resulted in material adjustments in subsequent periods when the estimates are adjusted to actual amounts.

*Property and Equipment*

Property and equipment, which includes equipment under capital lease and leasehold improvements, are recorded at cost and depreciated over the estimated useful lives of the related assets, or the lease term if shorter in the case of leasehold improvements, by the straight-line method. Buildings and improvements are depreciated over a period of 15 to 39½ years, and machinery and equipment are depreciated over a period of 7 to 15 years (except for furniture, fixtures and computer equipment which are depreciated over a period of 3 to 10 years).

*Goodwill and Intangible Assets*

The Company accounts for purchased goodwill and intangible assets in accordance with Accounting Standards Codification ("ASC") 350, *Intangibles—Goodwill and Other*. Under ASC 350, purchased goodwill and intangible assets with indefinite lives are not amortized; rather, they are tested for impairment on at least an annual basis. Intangible assets with finite lives are amortized over their useful lives.

The Company's operating segments of Aerospace Systems and Aftermarket Services are also the reporting units. The Chief Executive Officer, President and Chief Operating Officer and the Chief Financial Officer comprise the Company's Chief Operating Decision Maker ("CODM"). The Company's CODM evaluates performance and allocates resources based upon review of segment information. Each of the operating segments is comprised of a number of operating units which are considered to be components. The operating units, for which discrete financial information exists, are

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

aggregated for purposes of goodwill impairment testing. The Company's acquisition strategy is to acquire companies that complement and enhance the capabilities of the operating segments of the Company. Each acquisition is assigned to either the Aerospace Systems reporting unit or the Aftermarket Services reporting unit. The goodwill that results from each acquisition is also assigned to the reporting unit to which the acquisition is allocated, because it is that reporting unit which is intended to benefit from the synergies of the acquisition.

In order to test goodwill and intangible assets with indefinite lives, a determination of the fair value of the Company's reporting units and intangible assets with indefinite lives is required and is based, among other things, on estimates of future operating performance of the reporting unit and/or the component of the entity being valued. The Company is required to complete an impairment test for goodwill and intangible assets with indefinite lives and record any resulting impairment losses at least on an annual basis. Changes in market conditions, among other factors, may have an impact on these estimates and require interim impairment assessments. We completed our required annual impairment test in the fourth quarter of fiscal 2010 and determined that there was no impairment. Our methodology for determining the fair value of a reporting unit includes the use of an income approach which discounts future net cash flows to their present value at a rate that reflects the Company's cost of capital, otherwise known as the discounted cash flow method ("DCF"). These estimated fair values are based on estimates of future cash flows of the businesses. Factors affecting these future cash flows include the continued market acceptance of the products and services offered by the businesses, the development of new products and services by the businesses and the underlying cost of development, the future cost structure of the businesses, and future technological changes. The Company also incorporated market multiples for comparable companies in determining the fair value of our reporting units. In the event that valuations in the aerospace and defense markets decrease, or the expected EBITDA for our reporting units decreases, a goodwill impairment charge may be required, which would adversely affect our operating results and financial condition. Any such impairment would be recognized in full in the reporting period in which it has been identified. The Company completed its required annual impairment tests in the fourth quarters of fiscal 2010, 2009 and 2008 and determined that there was no impairment.

Finite-lived intangible assets are amortized over their useful lives ranging from 5 to 30 years. The Company continually evaluates whether events or circumstances have occurred that would indicate that the remaining estimated useful lives of long-lived assets, including intangible assets, may warrant revision or that the remaining balance may not be recoverable. Intangible assets are evaluated for indicators of impairment. When factors indicate that long-lived assets, including intangible assets, should be evaluated for possible impairment, an estimate of the related undiscounted cash flows over the remaining life of the long-lived assets, including intangible assets, is used to measure recoverability. Some of the more important factors management considers include the Company's financial performance relative to expected and historical performance, significant changes in the way the Company manages its operations, negative events that have occurred, and negative industry and economic trends. If any impairment is indicated, measurement of the impairment will be based on the difference between the carrying value and fair value of the asset, generally determined based on the present value of expected future cash flows associated with the use of the asset. For the fiscal years ended March 31, 2010, 2009 and 2008, exclusive of the charges recorded in connection with

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

discontinued operations, there were no reductions to the remaining useful lives and no write-downs of long-lived assets, including intangible assets, were required.

*Revenue Recognition*

Revenues are recognized in accordance with the contract terms when products are shipped, delivery has occurred or services have been rendered, pricing is fixed or determinable, and collection is reasonably assured. The Aftermarket Services Group provides repair and overhaul services, certain of which services are provided under long term power-by-the-hour contracts. The Company applies the proportional performance method to recognize revenue under these contracts. Revenue is recognized over the contract period as units are delivered based on the relative fair value in proportion to the total estimated contract consideration. In estimating the total contract consideration, management evaluates the projected utilization of its customer's fleet over the term of the contract, in connection with the related estimated repair and overhaul servicing requirements to the fleet based on such utilization. Changes in utilization of the fleet by customers, among other factors, may have an impact on these estimates and require adjustments to estimates of revenue to be realized.

Reserves for contract losses are accrued when estimated costs to complete exceed expected future revenues. The Company's policy with respect to sales returns and allowances generally provides that the customer may not return products or be given allowances, except at the Company's option. Accruals for sales returns, other allowances, and estimated warranty costs are provided at the time of shipment based upon past experience.

*Shipping and Handling Costs*

The cost of shipping and handling products is included in cost of products sold.

*Research and Development Expense*

Research and development expense was approximately \$25,670, \$21,001 and \$9,883 for the fiscal years ended March 31, 2010, 2009 and 2008, respectively.

*Foreign Currency Translation*

The determination of the functional currency for Triumph's foreign subsidiaries is made based on appropriate economic factors. The functional currency of the Company's subsidiaries, Triumph Logistics (UK) Ltd. and Triumph Aviation Services-Asia, is the U.S. dollar since that is the currency in which those entities primarily generate and expend cash. The functional currency of the Company's remaining subsidiaries is the local currency, since that is the currency in which those entities primarily generate and expend cash. Assets and liabilities of these subsidiaries are translated at the rates of exchange at the balance sheet date. Income and expense items are translated at average monthly rates of exchange. The resultant translation adjustments are included in accumulated other comprehensive income. At March 31, 2010 and 2009, accumulated comprehensive income resulting from foreign currency translation was \$4,399 and \$2,184, respectively. Gains and losses arising from foreign currency transactions of these subsidiaries are included in net income.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

*Income Taxes*

The Company accounts for income taxes using the asset and liability method. The asset and liability method requires recognition of deferred tax assets and liabilities for expected future tax consequences of temporary differences that currently exist between tax bases and financial reporting bases of the Company's assets and liabilities.

*Adjustments to Consolidated Financial Statements*

The accompanying consolidated financial statements have been adjusted for the retrospective application of the convertible debt accounting standard, which became effective for the Company on April 1, 2009. The financial information contained in the consolidated financial statements and accompanying notes to the consolidated financial statements reflect only the adjustments described below related to the retrospective application of the convertible debt accounting standard.

Effective April 1, 2009, the Company adopted the convertible debt accounting standard. Early adoption was not permitted; however, once adopted the convertible debt accounting standard requires retrospective application. The convertible debt accounting standard changes the balance sheet classification of a component of the Convertible Senior Subordinated Notes between equity and debt, and results in additional non-cash interest expense recognized in the statement of income. Capital in excess of par has been increased by \$19.8 million as of September 30, 2007, to reflect the cumulative effect of the change in accounting principle to all prior periods.

The following tables set forth the effect of the retrospective application of the convertible debt accounting standard on certain reported line items:

	Years ended March 31,

*Recently Issued Accounting Pronouncements*

In February 2008, the FASB issued FSP No. 157-1, which amends SFAS No. 157, *Fair Value Measurements* ("SFAS 157") to exclude SFAS No. 13, *Accounting for Leases*, and other accounting pronouncements that address fair value measurements for lease transactions, and FSP No. 157-2, which primarily were codified into ASC 820, *Fair Value Measurements and Disclosures* and delayed the

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

effective date of SFAS 157 as it relates to nonfinancial assets and nonfinancial liabilities until April 1, 2009 for the Company, except for items that are recognized or disclosed at fair value in the Company's financial statements on a recurring basis. The nonfinancial assets and nonfinancial liabilities for which the Company had previously not applied the fair value provisions of SFAS 157 include: goodwill; intangible and other long-lived asset impairment testing; asset retirement obligations; liabilities for exit or disposal activities; and business combinations. The adoption had no impact on the Company's financial position, results of operations and cash flows as the Company did not have any non-financial assets and non-financial liabilities that were recognized or disclosed at fair value on a recurring basis at March 31, 2009.

In April 2009, the FASB issued FSP No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, which primarily was codified into ASC 820. The FSP requires entities to evaluate the significance and relevance of market factors for fair value inputs to determine if, due to reduced volume and market activity, the factors are still relevant and substantive measures of fair value. The FSP is effective for interim and annual reporting periods ending after June 15, 2009, and the adoption did not have any effect on our financial position or results of operations.

In December 2008, the FASB issued FSP FAS 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*, which primarily was codified into ASC 715, *Compensation and Benefits*. This FSP amends SFAS No. 132 (revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits*, to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan on investment policies and strategies, major categories of plan assets, inputs and valuation techniques used to measure the fair value of plan assets and significant concentrations of risk within plan assets. This FSP shall be effective for fiscal years ending after December 15, 2009, with earlier application permitted. Upon initial application, the provisions of this FSP are not required for earlier periods that are presented for comparative purposes. The required disclosures under the FSP have been included in Note 14.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, which was primarily codified into ASC 825, *Financial Instruments*. This FSP amends SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*, to require disclosures about fair value of financial instruments not measured on the balance sheet at fair value in interim financial statements as well as in annual financial statements. Prior to this FSP, fair values for these assets and liabilities were only disclosed annually. This FSP applies to all financial instruments within the scope of SFAS 107 and requires all entities to disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments. This FSP was effective for interim periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company adopted this FSP in the quarter ended December 31, 2009 and the adoption of this FSP did not have a material effect on its disclosures.

Effective April 1, 2009, the Company adopted SFAS No. 141(R), *Business Combinations* ("SFAS 141(R)") which was primarily codified into ASC 805, *Business Combinations*, and SFAS No. 160, *Accounting and Reporting of Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51* ("SFAS 160"), which was primarily codified into ASC 810, *Consolidations*. SFAS 141(R) and SFAS 160 significantly change the accounting for and reporting of business combination transactions and noncontrolling (minority) interests. The adoption of SFAS 141(R) and SFAS 160 did not have a material impact on the Company's consolidated financial statements.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

*Stock-Based Compensation*

The Company utilizes recognizes compensation expense for share-based awards based on the fair value of those awards at the date of grant. Stock-based compensation expense for fiscal years 2010, 2009, and 2008 was \$3,220, \$3,180 and \$2,809, respectively. The benefits of tax deductions in excess of recognized compensation expense were \$206, \$245 and \$1,737 for fiscal years ended March 31, 2010, 2009 and 2008, respectively. The Company has classified share-based compensation within selling, general and administrative expenses to correspond with the same line item as the majority of the cash compensation paid to employees. Upon the exercise of stock options or vesting of restricted stock, the Company first transfers treasury stock, then will issue new shares. (See Note 15 for further details.)

*Subsequent Events*

The Company has evaluated all subsequent events through the filing date of this Form 10-K with the Securities and Exchange Commission, to ensure that this Form 10-K includes appropriate disclosure of events both recognized in the consolidated financial statements as of March 31, 2010, and events which occurred subsequent to March 31, 2010 but were not recognized in the consolidated financial statements. There were no subsequent events which required recognition or disclosure.

**3. ACQUISITIONS**

In March 2010, we entered into a definitive agreement to purchase Vought Aircraft Industries, Inc. (“Vought”) from TC Group, L.L.C. (“Carlyle”) for cash and stock consideration. The purchase consideration to Vought shareholders includes \$525,000 of cash and, subject to certain adjustments, approximately 7.9 million shares of our common stock. The cash portion of the merger consideration is fixed. The stock portion of the merger consideration will not be adjusted to reflect changes to Triumph’s stock price prior to closing of the merger. The stock portion of the merger consideration will be decreased by approximately 3,360 shares for each day prior to July 1, 2010 that the merger is completed and increased by approximately 3,360 shares for each day after July 1, 2010 that the merger is completed. The stock portion of the merger consideration will also be reduced for expenses of Vought that Triumph pays in connection with completing the merger. We will also assume Vought’s debt, which was \$592,200 as of March 31, 2010. The cash portion of the acquisition, as well as the repayment of Vought’s assumed debt is expected to be funded through a combination of cash-on-hand, borrowing under our existing amended and restated credit agreement (the “Credit Facility”) and the issuance of senior notes in the capital markets. In anticipation of the merger, we have obtained a commitment letter, which provides us up to \$1,085,000 in debt financing necessary to consummate the merger that may be used for funding in the event the transaction closes prior to obtaining permanent financing in the capital markets. During fiscal 2010, the Company incurred \$1,114 in acquisition-related costs recorded in selling, general and administrative expenses in the accompanying statement of income.

Vought is a leading global manufacturer of aerostructures for commercial, military and business jet aircraft. Products include fuselages, wings, empennages, nacelles and helicopter cabins. Vought’s customer base is comprised of the leading global aerospace OEMs and over 80% of its revenue is from sole source, long-term contracts. Vought’s revenues for the year ended December 31, 2009 were \$1.9 billion and they employed approximately 5,900 people.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**3. ACQUISITIONS (Continued)**

Following the closing of the Vought acquisition, Carlyle will own approximately 31% of the outstanding stock of Triumph and will be subject to certain lock up provisions. The transaction is subject to customary closing conditions including regulatory approvals and approval of Triumph shareholders and is expected to be completed in July 2010. The acquired business will operate as Triumph Aerostructures—Vought Aircraft Division, LLC.

**FISCAL 2010 ACQUISITIONS**

*Acquisition of DCL Avionics, Inc.*

Effective January 29, 2010, our wholly-owned subsidiary Triumph Instruments—Burbank, Inc. acquired the assets and business of DCL Avionics, Inc. (“DCL”). DCL operated a Federal Aviation Administration (“FAA”) approved avionics repair station and components dealership. DCL provides Triumph Instruments—Burbank, Inc. with additional capacity as well as a strategic location on the Van Nuys, California, airport. The results for Triumph Instruments—Burbank, Inc. continue to be included in the Company’s Aftermarket Services segment.

*Acquisition of Fabritech, Inc.*

Effective March 1, 2010, the Company acquired all of the outstanding shares of Fabritech, Inc. (“Fabritech”), renamed Triumph Fabrications—St. Louis, Inc. Triumph Fabrications—St. Louis, Inc. is a component manufacturer and repair station for critical military rotary-wing platforms. Fabritech provides the Company with high-end maintenance and manufactured solutions focused on aviation drive train, mechanical, hydraulic and electrical hardware items including gearboxes, cargo hooks and vibration absorbers. The results for Triumph Fabrications—St. Louis, Inc. are included in the Company’s Aftermarket Services segment.

The acquisitions of DCL and Fabritech are herein referred to as the “fiscal 2010 acquisitions.” The combined purchase price for the fiscal 2010 acquisitions of \$33,802 includes cash paid at closing, deferred payments and estimated contingent payments. The estimated contingent payments represent an earnout note contingent upon the achievement of certain earnings levels during the earnout period. The maximum amounts payable in respect of fiscal 2011, 2012 and 2013 are \$6,400, \$5,000 and \$4,600, respectively. The estimated fair value of the earnout note is \$10,500, classified as a Level 3 liability in the fair value hierarchy. The excess of the purchase price over the estimated fair value of the net assets acquired of \$22,279 was recorded as goodwill, which is not deductible for tax purposes. The Company has also identified intangible assets valued at approximately \$4,100 with a weighted-average life of 10.0 years. The Company is awaiting final appraisal of tangible and intangible assets related to the fiscal 2010 acquisitions. Accordingly, the Company has recorded its best estimate of the value of intangible assets, property and equipment and contingent consideration. Therefore, the allocation of purchase price for the fiscal 2010 acquisitions is not complete.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**3. ACQUISITIONS (Continued)**

The following condensed balance sheet represents the amounts assigned to each major asset and liability caption in the aggregate for the fiscal 2010 acquisitions:

Cash . . . . .	\$ 532
Accounts receivable . . . . .	640
Inventory . . . . .	6,738
Prepaid expenses and other . . . . .	68
Property and equipment . . . . .	1,560
Goodwill . . . . .	22,279
Intangible assets . . . . .	4,100
Total assets . . . . .	<u>\$35,917</u>
Accounts payable . . . . .	\$ 304
Accrued expenses . . . . .	1,811
Total liabilities . . . . .	<u>\$ 2,115</u>

The fiscal 2010 acquisitions have been accounted for under the acquisition method and, accordingly, are included in the consolidated financial statements from the effective date of acquisition. The fiscal 2010 acquisitions were funded by the Company's cash and cash equivalents at the date of acquisition. The Company incurred \$406 in acquisition-related costs in connection with the fiscal 2010 acquisitions recorded in selling, general and administrative expenses in the accompanying consolidated statement of income.

**FISCAL 2009 ACQUISITIONS**

*Acquisition of Merritt Tool Company, Inc.*

Effective March 13, 2009, the Company acquired all of the outstanding shares of Merritt Tool Company, Inc. ("Merritt"), renamed Triumph Structures—East Texas, Inc. Triumph Structures—East Texas, Inc. is a manufacturer of aircraft structural components specializing in complex precision machining primarily for commercial and military aerospace programs. Merritt provides the Company with expanded capacity and increased market share in structural components. The results for Triumph Structures—East Texas, Inc. are included in the Company's Aerospace Systems segment.

*Acquisition of Saygrove Defence & Aerospace Group Limited*

Effective March 13, 2009, the Company acquired all of the outstanding shares of Saygrove Defence & Aerospace Group Limited ("Saygrove"), renamed Triumph Actuation & Motion Control Systems—UK, Ltd. Triumph Actuation & Motion Control Systems—UK, Ltd. is a provider of motion control and actuation products for the aerospace and defense industry. Saygrove provides the Company with added advanced control products for flight actuation and motor control applications in all-electric aircraft and Unmanned Aerial Vehicles. The results for Triumph Actuation & Motion Control Systems—UK, Ltd. are included in the Company's Aerospace Systems segment.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**3. ACQUISITIONS (Continued)**

*Acquisition of Aviation Segment of Kongsberg Automotive Holdings ASA*

Effective March 31, 2009, the Company acquired the assets of the aviation segment of Kongsberg Automotive Holdings ASA (“KA”) through two newly organized wholly-owned subsidiaries, Triumph Controls—UK, Ltd. and Triumph Controls—Germany, GmbH. The acquired business, which is located in Basildon, U.K. and Heiligenhaus, Germany, provides cable control systems for commercial and military aircraft to Europe’s leading aerospace manufacturers. KA provides the Company with expanded capacity and increased market share in cable control systems. The results for Triumph Controls—UK, Ltd. and Triumph Controls—Germany, GmbH will be included in the Company’s Aerospace Systems segment.

*Acquisition of The Mexmil Company, LLC*

Effective March 31, 2009, the Company acquired all of the equity interests of The Mexmil Company, LLC, and all of the equity interests of several affiliates (“Mexmil”), renamed Triumph Insulation Systems, LLC. Triumph Insulation Systems, LLC and its affiliates primarily provide insulation systems to OEMs, airlines, maintenance, repair and overhaul organizations and air cargo carriers. Mexmil provides the Company with an enhanced ability to provide a more comprehensive interiors solution to current and future customers. The results for Triumph Insulation Systems, LLC and its affiliates will be included in the Company’s Aerospace Systems segment.

The acquisitions of Merritt, Saygrove, KA and Mexmil are herein referred to as the “fiscal 2009 acquisitions.” The combined purchase price of the fiscal 2009 acquisitions of \$152,741 includes cash paid at closing, estimated deferred payments and direct costs of the transactions. Included in the deferred payments are delayed payments of \$2,270 paid in March 2010 and \$1,507 payable in September 2010, respectively. The fiscal 2009 acquisitions also provide for contingent payments, certain of which are contingent upon the achievement of specified earnings levels during the earnout period and another \$10,000 that is contingent upon entering into a specific customer contract. The maximum amounts payable in respect of fiscal 2010, 2011, 2012 and 2013, respectively, are \$2,322, \$4,598, \$5,426 and \$2,629. The contingent amounts have not been recorded as the contingencies have not been resolved and the consideration has not been paid. The excess of the combined purchase price over the preliminary estimated fair value of the net assets acquired of \$95,072 was recorded as goodwill, \$65,388 of which is tax-deductible. The Company has also identified intangible assets valued at approximately \$27,113 comprised of noncompete agreements, customer relationships, and product rights and licenses with a weighted-average life of 9.8 years. During fiscal 2010, the Company finalized the purchase price allocation for the fiscal 2009 acquisitions as a result of receiving the final appraisals of tangible and intangible assets. Based on the revised allocations, an additional \$2,295 and \$21,812 was allocated to property and equipment and goodwill, respectively; and intangible assets were reduced by \$18,353.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**3. ACQUISITIONS (Continued)**

The following condensed balance sheet represents the amounts assigned to each major asset and liability caption in the aggregate for fiscal 2009 acquisitions:

Cash . . . . .	\$ 5,182
Accounts receivable . . . . .	13,907
Inventory . . . . .	26,037
Prepaid expenses and other . . . . .	1,952
Deferred tax asset . . . . .	2,592
Property and equipment . . . . .	18,389
Goodwill . . . . .	95,072
Intangible assets . . . . .	27,113
Total assets . . . . .	<u>\$190,244</u>
Accounts payable . . . . .	\$ 9,707

Other current liabilities . . . . .	108
Other long-term liabilities . . . . .	2,704
Total liabilities . . . . .	<u>\$ 37,503</u>

The fiscal 2009 acquisitions have been accounted for under the purchase method of accounting and, accordingly, are included in the consolidated financial statements from the effective dates of acquisition. The fiscal 2009 acquisitions were funded by the Company's long-term borrowings in place at the dates of acquisition.

**FISCAL 2008 ACQUISITIONS**

*Acquisition of B. & R. Machine & Tool Corp.*

Effective February 27, 2008, the Company acquired the assets and business of B. & R. Machine & Tool Corp. ("B & R") through a newly organized, wholly-owned subsidiary of the Company, Triumph Structures—Long Island, LLC. Triumph Structures—Long Island, LLC provides aircraft structural components and dynamic parts and assemblies for commercial and military aerospace programs. The results for Triumph Structures—Long Island, LLC are included in the Company's Aerospace Systems segment.

The purchase price for B & R of \$84,044 included cash paid at closing, estimated deferred payments and direct costs of the transaction. Included in the estimated deferred payments is an earnout note for \$13,000. Payments under the earnout note are contingent upon the achievement of certain earnings levels during the earnout period. The maximum amounts payable in respect of fiscal 2009, 2010 and 2011 are \$3,500, \$4,500 and \$5,000, respectively, the first installment was paid in fiscal 2010 and the second installment was earned and will be paid in fiscal 2011. The excess of the purchase price over the estimated fair value of the net assets acquired of \$47,885 was recorded as goodwill, all of which is tax-deductible. The Company has also identified intangible assets valued at approximately \$16,300 with a weighted-average life of 10 years.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**3. ACQUISITIONS (Continued)**

The B & R acquisition has been accounted for under the purchase method and, accordingly, is included in the consolidated financial statements from the effective date of acquisition. The acquisition was funded by the Company's long-term borrowings in place at the date of acquisition.

The following unaudited pro forma information for the fiscal years ended March 31, 2010 and 2009 have been prepared assuming the fiscal 2010 acquisitions and fiscal 2009 acquisitions had occurred on April 1, 2008. The pro forma information for the fiscal year ended March 31, 2010 is as follows: Net sales: \$1,306,867; Income from continuing operations: \$83,538; Income per share from continuing operations—basic: \$5.08; Income per share from continuing operations—diluted: \$5.01. The pro forma information for the fiscal year ended March 31, 2009 is as follows: Net sales: \$1,357,828; Income from continuing operations: \$94,046; Income per share from continuing operations—basic: \$5.74; Income per share from continuing operations—diluted: \$5.67.

The unaudited pro forma information includes adjustments for interest expense that would have been incurred to finance the purchase, additional depreciation based on the estimated fair market value of the property and equipment acquired, and the amortization of the intangible assets arising from the transactions. The unaudited pro forma financial information is not necessarily indicative of the results of operations as it would have been had the transaction been effected on the assumed date.

**4. DISCONTINUED OPERATIONS AND ASSETS HELD FOR SALE**

In September 2007, the Company sold the assets of Triumph Precision, Inc., a build-to-specification manufacturer and supplier of ultra-precision machined components and assemblies in its Aerospace Systems segment. The effective date of the sale was July 1, 2007. The Company recognized a pretax loss of \$650 on the sale of the business, which included costs to sell of \$150. The Company has also decided to sell Triumph Precision Castings Co., a casting facility in its Aftermarket Services segment that specializes in producing high-quality hot gas path components for aero and land-based gas turbines. The Company recognized a pretax loss of \$3,500 in the first quarter of fiscal 2008 based upon a write-down of the carrying value of the business to estimated fair value less costs to sell. The write-down was applied to inventory and long-lived assets, consisting primarily of property, plant and equipment. In October 2008, the Company exercised the buy out provision in the operating lease on its casting facility. Accordingly, the property, plant and equipment related to the assets held for sale increased by \$3,535.

Due to failed negotiations with certain potential buyers of the business occurring during fiscal 2010, the Company reassessed its estimated fair value of the business based on current viable offers to purchase the business, recent performance results and overall market conditions, resulting in a write-down, which was applied to accounts receivable, inventory and property, plant and equipment. The Company recognized a pretax loss of \$17,383 in the third quarter of fiscal 2010. Included in the loss from discontinued operations for the fiscal year ended March 31, 2010 is an impairment charge of \$2,512 recorded during the first quarter of fiscal 2010.

Revenues of discontinued operations were \$2,128, \$10,433 and \$10,913 for the fiscal years ended March 31, 2010, 2009 and 2008, respectively. The loss from discontinued operations was \$17,526, \$4,745 and \$8,468, net of income tax benefit of \$9,376, \$2,556 and \$4,560 for the fiscal years ended March 31, 2010, 2009 and 2008, respectively. Interest expense of \$2,342, \$2,913 and \$2,835 was allocated to

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**4. DISCONTINUED OPERATIONS AND ASSETS HELD FOR SALE (Continued)**

discontinued operations for the fiscal years ended March 31, 2010, March 31, 2009 and March 31, 2008, respectively, based upon the actual borrowings of the operations, and such interest expense is included in the loss from discontinued operations.

For financial statement purposes, the assets, liabilities and results of operations of these businesses have been segregated from those of the continuing operations and are presented in the Company's consolidated financial statements as discontinued operations and assets and liabilities held for sale.

Assets and liabilities held for sale are comprised of the following:

	<u>March 31,</u>	
	<u>2010</u>	<u>2009</u>
Assets held for sale:		
Accounts receivable, net . . . . .	\$1,656	\$ 6,838

Total assets held for sale . . . . .	<u>\$5,051</u>	<u>\$27,695</u>
Liabilities held for sale:		
Accounts payable . . . . .	\$ 227	\$ 1,630
Accrued expenses . . . . .	324	475
Other noncurrent liabilities . . . . .	348	2,178
Total liabilities held for sale . . . . .	<u>\$ 899</u>	<u>\$ 4,283</u>

**5. INVENTORIES**

Inventories are stated at the lower of cost (average-cost or specific-identification methods) or market. The components of inventories are as follows:

	<u>March 31,</u>	
	<u>2010</u>	<u>2009</u>
Raw materials . . . . .	\$ 51,028	\$ 51,856
Manufactured and purchased components . . . . .	162,281	142,833
Work-in-process . . . . .	111,975	113,641
Finished goods . . . . .	38,641	81,018
Total inventories . . . . .	<u>\$363,925</u>	<u>\$389,348</u>

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**6. PROPERTY AND EQUIPMENT**

Net property and equipment at March 31, 2010 and 2009 is:

	March 31,	
	2010	2009
Land . . . . .	\$ 18,258	\$ 18,052
Construction in process . . . . .	17,438	12,151
Buildings and improvements . . . . .	139,936	133,055
Machinery and equipment . . . . .	408,996	390,334
	<u>584,628</u>	<u>553,592</u>
Less accumulated depreciation . . . . .	256,994	221,125
	<u>\$327,634</u>	<u>\$332,467</u>

Depreciation expense for the fiscal years ended March 31, 2010, 2009 and 2008 was \$39,715, \$36,836 and \$32,779, respectively, which includes depreciation of assets under capital lease.

**7. GOODWILL AND OTHER INTANGIBLE ASSETS**

The following is a summary of the changes in the carrying value of goodwill by reportable segment, for the fiscal years ended March 31, 2010 and 2009:

	Aerospace Systems	Aftermarket Services	Total
<b><i>Fiscal 2010</i></b>			
Balance at beginning of year . . . . .	\$405,982	\$53,559	\$459,541
Goodwill recognized in connection with acquisitions . . . . .	—	22,279	22,279
Purchase price allocation adjustments . . . . .	22,749	—	22,749
Effect of exchange rate changes and other . . . . .	(784)	(1,711)	(2,495)
Balance at end of year . . . . .	<u>\$427,947</u>	<u>\$74,127</u>	<u>\$502,074</u>
<b><i>Fiscal 2009</i></b>			
Balance at beginning of year . . . . .	\$330,175	\$53,565	\$383,740
Goodwill recognized in connection with acquisitions . . . . .	73,260	—	73,260
Purchase price allocation adjustments . . . . .	3,518	—	3,518
Effect of exchange rate changes and other . . . . .	(971)	(6)	(977)
Balance at end of year . . . . .	<u>\$405,982</u>	<u>\$53,559</u>	<u>\$459,541</u>

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**7. GOODWILL AND OTHER INTANGIBLE ASSETS (Continued)**

*Intangible Assets*

The components of intangible assets, net are as follows:

	March 31, 2010			
	Weighted-Average Life	Gross Carrying Amount	Accumulated Amortization	Net
Product rights and licenses . . . . .	11.3 years	\$ 74,082	\$(51,762)	\$22,320
Noncompete agreements, customer relationships and other . . . . .	9.6 years	83,606	(26,082)	57,524
Total intangibles, net . . . . .		<u>\$157,688</u>	<u>\$(77,844)</u>	<u>\$79,844</u>
	March 31, 2009			
	Weighted-Average Life	Gross Carrying Amount	Accumulated Amortization	Net
Product rights and licenses . . . . .	11.3 years	\$ 74,082	\$(45,079)	\$ 29,003
Noncompete agreements, customer relationships and other . . . . .	10.1 years	97,476	(18,129)	79,347
Total intangibles, net . . . . .		<u>\$171,558</u>	<u>\$(63,208)</u>	<u>\$108,350</u>

Amortization expense for the fiscal years ended March 31, 2010, 2009 and 2008 was \$14,703, \$11,775 and \$10,436, respectively. Amortization expense for the five fiscal years succeeding March 31, 2010 by year is expected to be as follows: 2011: \$13,504; 2012: \$12,075; 2013: \$11,758; 2014: \$10,290; 2015: \$9,800 and thereafter: \$22,416.

Effective February 9, 2007, the Company, through its Triumph Air Repair subsidiary, included in the Aftermarket Services segment, entered into a software licensing agreement with Honeywell Intellectual Properties, Inc. (“Honeywell”). The agreement grants Triumph a non-exclusive, limited license to access Honeywell proprietary commercial service manuals identified for use on the Boeing 331-250[G] APU installed on the United States Air Force C-17 aircraft. The license expires on September 30, 2013. As consideration, the Company agreed to pay \$5,000 inclusive of imputed interest of \$529, of which \$700, \$700 and \$700 was paid during fiscal years 2010, 2009 and 2008, respectively. At March 31, 2010, the remaining payable to Honeywell of \$1,079 is included in the consolidated balance sheet in accrued expenses and other noncurrent liabilities in the amounts of \$556 and \$523, respectively. As a result of the agreement, the Company recorded an intangible asset in the amount of \$4,471, which is included in product rights and licenses intangible assets, with a life of 6.7 years. The Company amortized to expense \$838, \$502 and \$671 of this intangible during fiscal years 2010, 2009 and 2008, respectively.

Effective January 1, 2005, the Company, through its Triumph Gear Systems—Macomb subsidiary, included in the Aerospace Systems segment, entered into an exclusive agreement with General Electric (“GE”) to provide the inlet gearbox as well as specific related spare parts for the CFM56 engine program for the life of the program. The Boeing 737 and the Airbus A318, A319, A320, A321 and A340-200/-300 aircraft are the primary platforms for the CFM56 engine. As consideration, the Company agreed to pay an amount of \$32,158 for the exclusive right to use certain propriety

**TRIUMPH GROUP, INC.**

(Dollars in thousands, except per share data)

**7. GOODWILL AND OTHER INTANGIBLE ASSETS (Continued)**

technology owned by GE, of which \$2,572, \$10,200, \$14,232 and \$5,154 was paid during fiscal 2008, 2007, 2006 and fiscal 2005, respectively. As a result of the agreement, the Company recorded an intangible asset in the amount of \$32,158, which is included in product rights and licenses intangible assets, with a weighted-average life of 12.1 years. The Company amortized to expense \$2,812, \$2,810 and \$2,814 of this intangible asset during fiscal 2010, 2009 and 2008, respectively.

**8. ACCRUED EXPENSES**

Accrued expenses are composed of the following items:

	March 31,	
	2010	2009
Accrued compensation . . . . .	\$ 39,516	\$ 38,592
Deferred revenue . . . . .	26,222	23,317
Accrued interest . . . . .	9,371	3,482
Warranty reserve . . . . .	5,184	5,956
All other . . . . .	30,973	38,233
Total accrued expenses . . . . .	\$111,266	\$109,580

**9. LEASES**

At March 31, 2010, future minimum payments under noncancelable operating leases with initial or remaining terms of more than one year were as follows: 2011—\$12,307; 2012—\$9,250; 2013—\$6,810; 2014—\$6,147; 2015: \$4,708 and thereafter—\$12,487 through 2022. In the normal course of business, operating leases are generally renewed or replaced by other leases.

At March 31, 2010, future minimum sublease rentals are as follows: 2011—\$669; 2012—\$685; 2013—\$618; 2014—\$547; 2015: \$557 and thereafter—\$1,435 through 2018.

Total rental expense was \$14,954, \$14,441 and \$14,725 for the fiscal years ended March 31, 2010, 2009 and 2008, respectively.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**10. LONG-TERM DEBT**

Long-term debt consists of the following:

	March 31,	
	2010	2009
Convertible senior subordinated notes . . . . .	\$169,584	\$167,342
Senior subordinated notes due 2017 . . . . .	172,561	—
Revolving credit facility . . . . .	—	127,730
Receivable securitization facility . . . . .	75,000	75,000
Equipment leasing facility . . . . .	69,560	65,232
Subordinated promissory notes . . . . .	11,107	16,575
Other debt . . . . .	7,968	7,517
	505,780	459,396
Less current portion . . . . .	91,929	89,085
	\$413,851	\$370,311

**Credit Facility**

On August 17, 2009, the Company amended its existing amended and restated credit agreement (the “Credit Facility”) with its lenders to (i) increase the availability under the Credit Facility to \$485,000 from \$370,000, (ii) extend the maturity date to January 31, 2013 and (iii) amend certain other terms and covenants. The Credit Facility bears interest at either: (i) LIBOR plus between 2.25% and 3.50%; (ii) the prime rate; or (iii) an overnight rate at the option of the Company. The applicable interest rate is based upon the Company’s ratio of total indebtedness to earnings before interest, taxes, depreciation and amortization, as defined in the Credit Facility. In addition, the Company is required to pay a commitment fee of between 0.30% and 0.50% on the unused portion of the Credit Facility. The commitment fee applicable for any fiscal quarter shall be increased over the amounts set forth above by 15 basis points to the extent the average amounts outstanding in such fiscal quarter is less than or equal to 40% of the availability. The Company’s obligations under the Credit Facility are guaranteed by the Company’s domestic subsidiaries. In connection with the amendment, the Company incurred \$3,946 of bank-related fees. These fees, along with \$934 of unamortized debt issuance costs prior to the amendment, are being amortized into expense over the remaining term of the agreement.

On July 10, 2008, the Company amended the Credit Facility with its lenders, primarily to allow for a receivable securitization facility of up to \$125,000 and to amend certain other terms and covenants. Coincident with the amendment, the Company exercised a provision of the Credit Facility to increase the amount available under the Credit Facility to \$370,000 from \$350,000. On December 22, 2006, the Company amended the Credit Facility with its lenders primarily to eliminate a financial covenant restricting aggregate capital expenditures to 200% of consolidated depreciation expense in any fiscal year. The Company’s obligations under the Credit Facility are guaranteed by the Company’s subsidiaries. On October 20, 2006, the Company amended the Credit Facility with its lenders to increase the Credit Facility to \$350,000 from \$250,000, extend the maturity date to June 30, 2011 and amend certain other terms and covenants.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**10. LONG-TERM DEBT (Continued)**

At March 31, 2010, there were no borrowings and \$6,123 in letters of credit outstanding under the Credit Facility. At March 31, 2009, there were \$127,730 in borrowings and \$5,600 in letters of credit outstanding under the Credit Facility. The level of unused borrowing capacity under the Credit Facility varies from time to time depending in part upon the Company's compliance with financial and other covenants set forth in the related agreement. The Credit Facility contains certain affirmative and negative covenants including limitations on specified levels of indebtedness to earnings before interest, taxes, depreciation and amortization, and interest coverage requirements, and includes limitations on, among other things, liens, mergers, consolidations, sales of assets, and incurrence of debt. The Company is currently in compliance with all such covenants. As of March 31, 2010, the Company had borrowing capacity under the Credit Facility of \$478,877 after reductions for borrowings and letters of credit outstanding under the Credit Facility.

**Senior Subordinated Notes Due 2017**

On November 16, 2009, the Company issued \$175,000 principal amount of 8% Senior Subordinated Notes due 2017 (the "2017 Notes"). The 2017 Notes were sold at 98.558% of principal amount and have an effective interest yield of 8.25%. Interest on the 2017 Notes is payable semiannually in cash in arrears on May 15 and November 15 of each year. In connection with the issuance of the 2017 Notes, the Company incurred approximately \$4,390 of costs, which were deferred and are being amortized on the effective interest method over the term of the 2017 Notes.

The 2017 Notes are senior subordinated unsecured obligations of the Company and rank subordinated to all of the existing and future senior indebtedness of the Company and the Guarantor Subsidiaries (defined below), including borrowings under the Company's existing Credit Facility, and pari passu with the Company's and the Guarantor Subsidiaries' existing and future senior subordinated indebtedness. The 2017 Notes are guaranteed, on a full, joint and several basis, by each of our domestic restricted subsidiaries that guarantees any of our debt or that of any of our restricted subsidiaries under our Credit Facility, and in the future by any domestic restricted subsidiaries that guarantee any of our debt or that of any of our domestic restricted subsidiaries incurred under any credit facility (collectively, the "Guarantor Subsidiaries"), in each case on a senior subordinated basis. If the Company is unable to make payments on the 2017 Notes when they are due, each of the Guarantor Subsidiaries would be obligated to make them instead.

The Company has the option to redeem all or a portion of the 2017 Notes at any time prior to November 15, 2013 at a redemption price equal to 100% of the principal amount of the 2017 Notes redeemed plus an applicable premium set forth in the Indenture and accrued and unpaid interest, if any. The 2017 Notes are also subject to redemption, in whole or in part, at any time on or after November 15, 2013, at redemption prices equal to (i) 104% of the principal amount of the 2017 Notes redeemed, if redeemed prior to November 15, 2014, (ii) 102% of the principal amount of the 2017 Notes redeemed, if redeemed prior to November 15, 2015 and (iii) 100% of the principal amount of the Notes redeemed, if redeemed thereafter, plus accrued and unpaid interest. In addition, at any time prior to November 15, 2012, the Company may redeem up to 35% of the principal amount of the 2017 Notes with the net cash proceeds of qualified equity offerings at a redemption price equal to 108% of the aggregate principal amount plus accrued and unpaid interest, if any, subject to certain limitations set forth in the indenture governing the 2017 Notes (the "Indenture").

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**10. LONG-TERM DEBT (Continued)**

Upon the occurrence of a change of control, the Company must offer to purchase the 2017 Notes from holders at 101% of their principal amount plus accrued and unpaid interest, if any, to the date of purchase. This change of control feature represents an embedded derivative. Since it is in the control of the Company to call the Notes at any time after November 15, 2013, the value of the derivative was determined to be de minimis. Accordingly, no value has been assigned at issuance or at March 31, 2010.

The Indenture contains covenants that, among other things, limit the Company's ability and the ability of any of the Guarantor Subsidiaries to (i) grant liens on its assets, (ii) make dividend payments, other distributions or other restricted payments, (iii) incur restrictions on the ability of the Guarantor Subsidiaries to pay dividends or make other payments, (iv) enter into sale and leaseback transactions, (v) merge, consolidate, transfer or dispose of substantially all of their assets, (vi) incur additional indebtedness, (vii) use the proceeds from sales of assets, including capital stock of restricted subsidiaries, and (viii) enter into transactions with affiliates.

**Convertible Senior Subordinated Notes**

On September 18, 2006, the Company issued \$201,250 in convertible senior subordinated notes (the "Notes"). The Notes are direct, unsecured, senior subordinated obligations of the Company, and rank (i) junior in right of payment to all of the Company's existing and future senior indebtedness, (ii) equal in right of payment with any other future senior subordinated indebtedness, and (iii) senior in right of payment to all subordinated indebtedness.

Effective April 1, 2009, the Company changed its method of accounting for its convertible debt instruments in order to separately account for the liability and equity components of the Notes in a manner that reflects the Company's nonconvertible debt borrowing rate when interest and amortization cost is recognized in subsequent periods. The excess of the principal amount of the liability component over its carrying amount has been recognized as debt discount and amortized using the effective interest method. This change in accounting for the Notes has been applied to the consolidated financial statements on a retrospective basis. For more details on the impact of this change on the consolidated financial statements, see Note 2. As of March 31, 2010, the remaining discount of \$9,466 will be amortized on the effective interest method through October 1, 2011.

The Company received net proceeds from the sale of the Notes of approximately \$194,998 after deducting debt issuance costs of approximately \$6,252. The use of the net proceeds from the sale was for prepayment of the Company's outstanding Senior Notes, including a "make whole" premium, fees and expenses in connection with the prepayment, and to repay a portion of the outstanding indebtedness under the Company's Credit Facility. The issuance costs have been allocated to the respective liability and equity components, with the liability component recorded as other assets and the equity component recorded as a reduction of equity in the accompanying consolidated balance sheets. Debt issuance costs are being amortized over a period of five years.

The Notes bear interest at a fixed rate of 2.625% per annum, payable in cash semiannually in arrears on each April 1 and October 1 beginning April 1, 2007. During the period commencing on October 6, 2011 and ending on, but excluding, April 1, 2012 and each six-month period from October 1 to March 31 or from April 1 to September 30 thereafter, the Company will pay contingent interest

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**10. LONG-TERM DEBT (Continued)**

during the applicable interest period if the average trading price of a Note for the five consecutive trading days ending on the third trading day immediately preceding the first day of the relevant six-month period equals or exceeds 120% of the principal amount of the Notes. The contingent interest payable per Note in respect of any six-month period will equal 0.25% per annum calculated on the average trading price of a Note for the relevant five trading day period. This contingent interest feature represents an embedded derivative. Since it is in the control of the Company to call the Notes at any time after October 6, 2011, the value of the derivative was determined to be de minimis. Accordingly, no value has been assigned at issuance or at March 31, 2010.

During fiscal 2010, the Company paid \$3,994 to purchase \$4,200 in principal amount of the Notes, resulting in a reduction in the carrying amount of the Notes of \$3,830 and a gain on early extinguishment of \$39. During fiscal 2009, the Company paid \$15,420 to purchase \$18,000 of principal on the Notes, resulting in a gain on early extinguishment of \$880.

The Notes mature on October 1, 2026 unless earlier redeemed, repurchased or converted. The Company may redeem the Notes for cash, either in whole or in part, anytime on or after October 6, 2011 at a redemption price equal to 100% of the principal amount of the Notes to be redeemed plus accrued and unpaid interest, including contingent interest and additional amounts, if any, up to but not including the date of redemption. In addition, holders of the Notes will have the right to require the Company to repurchase for cash all or a portion of their Notes on October 1, 2011, 2016 and 2021, at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased plus accrued and unpaid interest, including contingent interest and additional amounts, if any, up to, but not including, the date of repurchase. The Notes are convertible into the Company's common stock at a rate equal to 18.3655 shares per \$1,000 principal amount of the Notes (equal to an initial conversion price of approximately \$54.45 per share), subject to adjustment as described in the Indenture. Upon conversion, the Company will deliver to the holder surrendering the Notes for conversion, for each \$1,000 principal amount of Notes, an amount consisting of cash equal to the lesser of \$1,000 and the Company's total conversion obligation and, to the extent that the Company's total conversion obligation exceeds \$1,000, at the Company's election, cash or shares of the Company's common stock in respect of the remainder.

A holder may surrender its Notes for conversion: (i) during any fiscal quarter if the last reported sale price of the Company's common stock for at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the previous fiscal quarter is more than 130% of the applicable conversion price per share of the Company's common stock on such trading day; (ii) during the five business days immediately following any five consecutive trading-day period in which the trading price per \$1,000 principal amount of a Note for each day of that period was less than 98% of the product of the closing price of the Company's common stock and the conversion rate of the Notes on each such day; (iii) if the Company has called the Notes for redemption; (iv) on the occurrence of a specified corporate transaction as provided in the indenture governing the Notes (i.e., change in control, distribution of rights or warrants to purchase common stock below market value, distribution of assets (including cash) with a per share value exceeding 10% of the market value of common stock); or (v) during the two-month period prior to maturity (starting August 1, 2026). The last reported sale price of the Company's common stock on any date means the closing sales price per share on such date as reported by the New York Stock Exchange.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**10. LONG-TERM DEBT (Continued)**

For the periods from October 1, 2007 through December 31, 2007 and January 1, 2008 through March 31, 2008, the Notes were eligible for conversion; however, during this period, none of the Notes were converted. The Company has classified the Notes as long-term as of March 31, 2010.

To be included in the calculation of diluted earnings per share, the average price of the Company's common stock for the fiscal year must exceed the conversion price per share of \$54.45. The average price of the Company's common stock for the fiscal years ended March 31, 2010 and March 31, 2009 was \$46.68 and \$46.49, respectively. Therefore, no additional shares were included in the diluted earnings per share calculations for those fiscal years. The average price of the Company's common stock for the fiscal year ended March 31, 2008 was \$68.95. Therefore, 777,059 additional shares were included in the diluted earnings per share calculation.

If the Company undergoes a fundamental change, holders of the Notes will have the right, subject to certain conditions, to require the Company to repurchase for cash all or a portion of its Notes at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased plus accrued and unpaid interest, including contingent interest and additional amounts, if any.

**Receivable Securitization Program**

In August 2008, the Company entered into a receivable securitization facility (the "Securitization Facility"). In connection with the Securitization Facility, the Company sells on a revolving basis certain accounts receivable to Triumph Receivables, LLC, a wholly-owned special-purpose entity, which in turn sells a percentage ownership interest in the receivables to commercial paper conduits sponsored by financial institutions. The Company is the servicer of the accounts receivable under the Securitization Facility. As of March 31, 2010, the maximum amount available under the Securitization Facility was \$123,467, secured by \$164,075 in accounts receivable. The Securitization Facility is due to expire in August 2010 and is subject to annual renewal through August 2013. Interest rates are based on prevailing market rates for short-term commercial paper plus a program fee and a commitment fee. The program fee is 0.85% on the amount outstanding under the Securitization Facility. Additionally, the commitment fee is 0.65% on 102% of the maximum amount available under the Securitization Facility. At March 31, 2010, there was \$75,000 outstanding under the Securitization Facility, representing the minimum borrowing requirement. In connection with entering into the Securitization Facility, the Company incurred approximately \$823 of costs, which were deferred and are being amortized over the life of the Securitization Facility. The Company securitizes its accounts receivable, which are generally non-interest bearing, in transactions that are accounted for as borrowings pursuant to the *Transfers and Servicing* topic of the ASC.

The agreement governing the Securitization Facility contains restrictions and covenants which include limitations on the making of certain restricted payments, creation of certain liens, and certain corporate acts such as mergers, consolidations and the sale of substantially all assets.

**Equipment Leasing Facility and Other Capital Leases**

During March 2009, the Company entered into a 7-year Master Lease Agreement ("Leasing Facility") creating a capital lease of certain existing property and equipment, resulting in net proceeds of \$58,546 after deducting debt issuance costs of approximately \$188. During fiscal 2010, the Company

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**10. LONG-TERM DEBT (Continued)**

originated additional capital lease financing resulting in proceeds of \$13,942. The net proceeds from the Leasing Facility were used to repay a portion of the outstanding indebtedness under the Company's Credit Facility. The debt issuance costs have been recorded as other assets in the accompanying consolidated balance sheets and are being amortized over the term of the Leasing Facility. The Leasing Facility bears interest at a weighted-average fixed rate of 6.1% per annum.

Interest paid on indebtedness during the years ended March 31, 2010, 2009 and 2008 amounted to \$16,284, \$13,352 and \$14,512, respectively.

As of March 31, 2010, the maturities of long-term debt are as follows: 2011—\$91,929; 2012—\$195,395; 2013—\$11,154; 2014—\$11,473; 2015—\$11,277; and thereafter—\$196,457 through 2020.

**11. INCOME TAXES**

The components of income tax expense are as follows:

	Year ended March 31,		
	2010	2009	2008
Current:			
Federal .....	\$30,095	\$26,447	\$25,015
State .....	2,819	2,791	1,530
Foreign .....	729	1,100	855

**11. INCOME TAXES (Continued)**

The components of deferred tax assets and liabilities are as follows:

	March 31,	
	2010	2009
Deferred tax assets:		
Net operating loss carryforwards . . . . .	\$ 4,217	\$ 4,157
Accounts receivable . . . . .	1,884	2,263
Accruals and reserves . . . . .	11,277	9,515
Other . . . . .	4,709	4,898
	22,087	20,833
Valuation allowance . . . . .	(351)	(351)
Net deferred tax assets . . . . .	21,736	20,482
Deferred tax liabilities:		
Property and equipment . . . . .	53,074	50,982
Goodwill and other intangible assets . . . . .	54,887	53,100
Inventory . . . . .	3,519	8,396
Prepaid expenses and other . . . . .	17,440	14,691
	128,920	127,169
Net deferred tax liabilities . . . . .	\$107,184	\$106,687

As of March 31, 2010, the Company has federal and state net operating loss carryforwards of \$65,032 expiring in various years through 2030.

Net income taxes paid during the fiscal years ended March 31, 2010, 2009 and 2008 were \$27,990, \$28,713 and \$21,740, respectively. The Company also has a foreign net operating loss carryforward of \$351 for which a valuation allowance has been established. There was no change in total valuation allowance for fiscal 2010.

The Company has classified uncertain tax positions as noncurrent income tax liabilities unless expected to be paid in one year. Penalties and tax-related interest expense are reported as a component of income tax expense. As of March 31, 2010 and 2009, the total amount of accrued income tax-related interest and penalties was \$403 and \$357, respectively.

As of March 31, 2010 and 2009, the total amount of unrecognized tax benefits was \$4,434 and \$3,211, respectively, of which \$3,331 and \$3,188, respectively, would impact the effective rate, if recognized. The Company anticipates that total unrecognized tax benefits may be reduced by \$620 due to the expiration of statutes of limitation for various federal tax issues in the next 12 months.

As of March 31, 2010, the Company was subject to examination in state jurisdictions for the fiscal years ended March 31, 2005 through March 31, 2008, none of which the Company believes is individually material. The Company has filed appeals in a state jurisdiction related to fiscal years ended March 31, 1999 through March 31, 2005. The Company believes appropriate provisions for all outstanding issues have been made for all jurisdictions and all open years.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**11. INCOME TAXES (Continued)**

With few exceptions, the Company is no longer subject to U.S. federal income tax examinations for fiscal years ended before March 31, 2007, state or local examinations for fiscal years ended before March 31, 2006, or foreign income tax examinations by tax authorities for fiscal years ended before March 31, 2007.

During the fiscal years ended March 31, 2010, 2009 and 2008, the Company added \$143, \$490 and \$517 of tax, interest and penalties related to activity for identified uncertain tax positions, respectively.

A reconciliation of the liability for uncertain tax positions for the fiscal years ended March 31, 2009 and 2010 follows:

Ending Balance—March 31, 2008 . . . . .	\$ 2,517
Additions for tax positions related to the current year . . . . .	497
Additions for tax positions of prior years . . . . .	940
Reductions for tax positions of prior years . . . . .	(4)
Reductions as a result of a lapse of statute of limitations . . . . .	(1,014)
Settlements . . . . .	<u>—</u>
Ending Balance—March 31, 2009 . . . . .	2,936
Additions for tax positions related to the current year . . . . .	1,655
Additions for tax positions of prior years . . . . .	153
Reductions for tax positions of prior years . . . . .	(4)
Reductions as a result of a lapse of statute of limitations . . . . .	(571)
Settlements . . . . .	<u>—</u>
Ending Balance—March 31, 2010 . . . . .	<u>\$ 4,169</u>

**12. STOCKHOLDERS' EQUITY**

During February 2008, the Company exercised existing authority to make stock repurchases and repurchased 220,000 shares of its outstanding shares under the program for an aggregate consideration of \$12,342, funded by borrowings under the Company's Credit Facility. In February 2008, the Company's Board of Directors then authorized an increase in the Company's existing stock repurchase program by up to an additional 500,000 shares of its common stock. As a result, as of May 10, 2010, the Company remains able to purchase an additional 500,800 shares. Repurchases may be made from time to time in open market transactions, block purchases, privately negotiated transactions or otherwise at prevailing prices. No time limit has been set for completion of the program.

The holders of the common stock are entitled to one vote per share on all matters to be voted upon by the stockholders of Triumph.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**12. STOCKHOLDERS' EQUITY (Continued)**

The Company has preferred stock of \$.01 par value, 250,000 shares authorized. At March 31, 2010 and 2009, no shares of preferred stock were outstanding.

Prior to August 2008, the Company had Class D common stock of \$.001 par value, 6,000,000 shares authorized. At March 31, 2008, no shares of Class D common stock were outstanding. The Class D common stock was eliminated upon the amendment and restatement of the Company's Certificate of Incorporation effective August 12, 2008.

**13. EARNINGS PER SHARE**

The following is a reconciliation between the weighted-average common shares outstanding used in the calculation of basic and diluted earnings per share:

	Year ended March 31,		
	2010	2009	2008
	(thousands)		
Weighted-average common shares outstanding—basic . . . .	16,459	16,384	16,497
Net effect of dilutive stock options and nonvested stock	207	200	266
Net effect of convertible debt . . . . .	—	—	777
Weighted-average common shares outstanding—diluted . .	<u>16,666</u>	<u>16,584</u>	<u>17,540</u>

**14. EMPLOYEE BENEFIT PLANS**

The Company adopted Emerging Issues Task Force Issue No. 06-10, *Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements*, (codified in Subtopic 715-60) on April 1, 2008, and recognized a cumulative effect of a change in accounting of \$2,991, net of an income tax benefit of \$1,756. The projected benefit obligation of the Company's postretirement benefit for this plan was \$5,144 and \$4,519 as of March 31, 2010 and 2009 respectively. The Company recognized interest cost of \$306 and \$289 for the years ended March 31, 2010 and 2009, respectively, and paid benefits of \$151 and \$128 for the years ended March 31, 2010 and 2009, respectively.

*Defined Contribution Pension Plan*

The Company sponsors a defined contribution 401(k) plan, under which salaried and certain hourly employees may defer a portion of their compensation. Eligible participants may contribute to the plan up to the allowable amount as determined by the plan of their regular compensation before taxes. The Company generally matches contributions at 50% of the first 6% of compensation contributed by the participant. All contributions and Company matches are invested at the direction of the employee in one or more mutual funds. Company matching contributions vest immediately and aggregated \$5,568, \$5,648 and \$5,309 for the fiscal years ended March 31, 2010, 2009 and 2008, respectively.

*Defined Benefit Pension Plans*

The Company has several defined benefit pension plans covering eligible employees. U.S. plans covering union employees generally provide benefit payments of stated amounts for each year of

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**14. EMPLOYEE BENEFIT PLANS (Continued)**

service. The Company also sponsors an unfunded supplemental executive retirement plan (“SERP”) that provides retirement benefits to certain key employees.

The Company is required to measure plan assets and benefit obligations as of the date of the Company’s fiscal year-end. The requirement was effective for fiscal years ending after December 15, 2008, and was not to be applied retrospectively. The Company adopted the measurement provisions on March 31, 2009. Only the Company’s union plans were affected by these measurement provisions, since the union plans had a December 31 measurement date. The net periodic benefit cost for the period between December 31, 2008 and March 31, 2009 of approximately \$27 was recognized, net of tax, during the fiscal year ended March 31, 2009.

The following table sets forth the Company’s consolidated defined benefit pension plans for its union employees and its SERP as of March 31, 2010 and 2009, and the amounts recorded in the consolidated balance sheets at March 31, 2010 and 2009. Company contributions include amounts contributed directly to plan assets and indirectly as benefits are paid from the Company’s assets.

(Dollars in thousands, except per share data)

**14. EMPLOYEE BENEFIT PLANS (Continued)**

The components of net periodic pension cost for fiscal years 2010, 2009 and 2008 are as follows:

	<u>Year Ended March 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
<b>Components of net periodic pension cost</b>			
Service cost . . . . .	\$ 81	\$ 82	\$ 171
Interest cost . . . . .	753	670	608
Expected return on plan assets . . . . .	(439)	(512)	(489)
Amortization of prior service cost . . . . .	165	519	518
Amortization of net loss . . . . .	151	84	104
Total net periodic pension cost . . . . .	<u>\$ 711</u>	<u>\$ 843</u>	<u>\$ 912</u>
<b>Weighted-average assumptions used to determine net periodic pension cost</b>			
Discount rate . . . . .	7.25%	6.25%	6.00%
Expected long-term rate on assets . . . . .	8.00%	8.00%	8.00%
Rate of compensation increase . . . . .	N/A	N/A	N/A

The discount rate is generally based on the yield on high-quality corporate fixed-income investments. At the end of each year, the discount rate is primarily determined using the results of bond yield curve models based on a portfolio of high-quality bonds matching notional cash inflows with the expected benefit payments for each significant benefit plan.

The following table shows those amounts expected to be recognized in net period benefit costs during the fiscal year ending March 31, 2011:

	<u>Amount</u>
<b>Amounts expected to be recognized in FY 2011 net periodic benefit costs</b>	
Prior service cost (\$45 net of tax) . . . . .	\$ 72
Actuarial loss (\$115 net of tax) . . . . .	183

The accumulated benefit obligation for all defined benefit pension plans was \$11,582 and \$10,148 at March 31, 2010 and 2009, respectively.

	<u>March 31,</u>	
	<u>2010</u>	<u>2009</u>
<b>Amounts recorded in Accumulated Other Comprehensive Income (Loss)</b>		
Prior service costs . . . . .	\$ 399	\$ 564
Actuarial losses . . . . .	3,211	3,020
Income tax benefits related to above items . . . . .	(1,336)	(1,326)
Unamortized benefit plan costs . . . . .	<u>\$ 2,274</u>	<u>\$ 2,258</u>

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**14. EMPLOYEE BENEFIT PLANS (Continued)**

**Expected Pension Benefit Payments**

Benefit payments for pensions (including the SERP), which reflect expected future service, as appropriate, are expected to be as follows:

<u>Year</u>	<u>Amount</u>
2011 . . . . .	\$3,228
2012 . . . . .	380
2013 . . . . .	400
2014 . . . . .	441
2015 . . . . .	456
2016-2019 . . . . .	2,722

**Plan Assets, Investment Policy and Strategy**

The table below sets forth the Company's target asset allocation for fiscal 2011 and the actual asset allocations at March 31, 2010 and 2009.

<u>Asset Category</u>	<u>Target Allocation</u> <u>Fiscal 2011</u>	<u>Actual Allocation</u>	
		<u>March 31,</u> <u>2010</u>	<u>2009</u>
Equity securities . . . . .	40-65%	55%	57%
Fixed income securities . . . . .	25-40%	45	42
Other . . . . .	0-10%	—	1
Total . . . . .		<u>100%</u>	<u>100%</u>

The policy, as established by the benefits committee ("Committee"), is to provide for growth of capital with a moderate level of volatility by investing assets per the target allocations stated above. The assets will be reallocated periodically, but in no event less than every six months, to meet the above target allocations. The investment policy will be reviewed on a regular basis, in conjunction with an investment advisor, to determine if the policy should be changed.

The table below provides the fair values of the Company's plan assets at March 31, 2010, by asset category. The table also identifies the level of inputs used to determine the fair value of assets in each category (see Note 18 below for definition of levels).

<u>Asset Category</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Equity securities . . . . .	\$3,693	\$—	\$—	\$3,693
Fixed income securities . . . . .	3,574	—	—	3,574
Other . . . . .	37	—	—	37
Fair value of plan assets at end of year . . . . .	<u>\$7,304</u>	<u>\$—</u>	<u>\$—</u>	<u>\$7,304</u>

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**14. EMPLOYEE BENEFIT PLANS (Continued)**

**Determination of Expected Long-Term Rate of Return**

The expected long-term rate of return for the plans' total assets is based on the expected return of each of the above categories, weighted based on the median of the target allocation for each class. Equity securities are expected to return 10% to 11% over the long-term, while cash and fixed income is expected to return between 4% to 6%. Based on historical experience, the Committee expects that the plans' asset managers will provide a modest (0.5% to 1.0% per annum) premium to their respective market benchmark indices.

**Anticipated Contributions to Defined Benefit Plans**

Assuming a normal retirement age of 65, the Company expects to contribute approximately \$2,881 to its pension plans during fiscal 2011.

**15. STOCK COMPENSATION PLANS**

The Company has stock incentive plans under which employees and non-employee directors may be granted options to purchase shares of the Company's common stock at the fair value at the time of the grant. Employee options and non-employee director options generally vest over three to four years and expire ten years from the date of the grant. Compensation expense recognized for all option grants is net of estimated forfeitures and is recognized over the awards' respective requisite service periods. There were no employee or non-employee director options granted during fiscal 2010, 2009 or 2008. The fair values relating to prior option grants were estimated using a Black-Scholes option pricing model. Expected volatilities were based on historical volatility of the Company's stock and other factors, such as implied market volatility. We used historical exercise data based on the age at grant of the option holder to estimate the options' expected term, which represents the period of time that the options granted are expected to be outstanding. The Company anticipated the future option holding periods to be similar to the historical option holding periods. The risk-free rate for periods within the contractual life of the option was based on the U.S. Treasury yield curve in effect at the time of grant. The Company recognizes compensation expense for the fair values of these awards on a straight-line basis over the requisite service period of these awards.

In fiscal 2006, the Company approved the granting of restricted stock as its primary form of share-based incentive. The restricted shares are subject to forfeiture should the grantee's employment be terminated prior to the fourth anniversary of the date of grant, and are included in capital in excess of par value. Restricted shares generally vest in full after four years. The fair value of restricted shares under the Company's restricted stock plans is determined by the product of the number of shares granted and the grant date market price of the Company's common stock. The fair value of restricted shares is expensed on a straight-line basis over the requisite service period of four years.

The Company recognized \$3,220, \$3,180 and \$2,809 of share-based compensation expense during the fiscal years ended March 31, 2010, 2009 and 2008, respectively. The total income tax benefit recognized for share-based compensation arrangements for fiscal years ended March 31, 2010, 2009 and 2008 was \$1,107, \$1,048 and \$937, respectively. Total share-based compensation expense was comprised of stock option expense of \$0, \$32 and \$453 and restricted stock expense of \$3,220, \$3,148 and \$2,356 for the fiscal years ended March 31, 2010, 2009 and 2008, respectively. The Company estimates it will

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**15. STOCK COMPENSATION PLANS (Continued)**

record share-based compensation expense of approximately \$3,400 in fiscal 2011. This estimate may be impacted by potential changes to the structure of the Company's share-based compensation plans which could impact the number of stock options granted in fiscal 2011, changes in valuation assumptions, and changes in the market price of the Company's common stock, among other things and, as a result, the actual share-based compensation expense in fiscal 2011 may differ from the Company's current estimate.

A summary of the Company's stock option activity and related information for its option plans for the fiscal year ended March 31, 2010 was as follows:

	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at March 31, 2009 . . . . .	292,049	\$35.05		
Granted . . . . .	—	—		
Exercised . . . . .	(41,611)			
Forfeited . . . . .	—	—		
Outstanding at March 31, 2010 . . . . .	<u>250,438</u>	\$36.24	3.1 Years	\$2,614
Exercisable at March 31, 2010 . . . . .	<u>250,438</u>	\$36.24	3.1 Years	\$2,614

As of March 31, 2010 and 2009, all stock options are fully vested with no expected future compensation expense related to them. The intrinsic value of stock options exercised during fiscal 2010, 2009 and 2008 was \$737, \$927 and \$5,812, respectively.

At March 31, 2010 and 2009, 1,322,011 and 1,380,958 shares of common stock, respectively, were available for issuance under the plans. A summary of the status of the Company's nonvested shares as of March 31, 2010 and changes during the fiscal year ended March 31, 2010, is presented below:

	Shares	Weighted-Average Grant Date Fair Value
Nonvested at March 31, 2009 . . . . .	204,823	\$51.49
Granted . . . . .	67,989	40.56
Vested . . . . .	(48,475)	48.09
Forfeited . . . . .	(9,042)	48.27
Nonvested at March 31, 2010 . . . . .	<u>215,295</u>	\$48.94

The fair value of restricted stock vested during fiscal 2010 was \$3,222. The tax benefit from vested restricted stock was \$470 during fiscal 2010. The weighted-average grant date fair value of share-based grants in fiscal 2010, 2009 and 2008 was \$40.56, \$57.19 and \$67.57, respectively. Expected future compensation expense on restricted stock net of expected forfeitures, is approximately \$2,195, which is expected to be recognized over the remaining weighted-average vesting period of 2.0 years.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**15. STOCK COMPENSATION PLANS (Continued)**

In April 2010, 34,061 restricted shares were granted following the determination of net earnings per share for fiscal 2010. Expected future compensation expenses on this April 2010 grant, net of expected forfeitures, is approximately \$1,862, which is expected to vest over the remaining vesting period of 3.0 years.

During the fiscal years ended March 31, 2010, 2009 and 2008, 5,000, 7,800 and 2,500 deferred stock units were granted to the non-employee members of the Board of Directors, respectively, under the Directors' Plan. Each deferred stock unit represents the contingent right to receive one share of the Company's common stock. The deferred stock units vest over a four-year period and the shares of common stock underlying vested deferred stock units will be delivered on January 1 of the year following the year in which the non-employee director terminates service as a Director of the Company.

**16. COMMITMENTS AND CONTINGENCIES**

Certain of the Company's business operations and facilities are subject to a number of federal, state, local and foreign environmental laws and regulations. Former owners generally indemnify the Company for environmental liabilities related to the assets and businesses acquired which existed prior to the acquisition dates. In the opinion of management, there are no significant environmental concerns which would have a material effect on the financial condition or operating results of the Company which are not covered by such indemnification.

In the ordinary course of our business, we are also involved in disputes, claims, lawsuits, and governmental and regulatory inquiries that we deem to be immaterial. Some may involve claims or potential claims of substantial damages, fines or penalties. While we cannot predict the outcome of any pending or future litigation or proceeding and no assurances can be given, we do not believe that any pending matter will have a material effect, individually or in the aggregate, on our financial position or results of operations.

**17. DERIVATIVES**

**Interest Rate Swap**

The Company uses interest rate swaps, a derivative financial instrument, to manage interest costs and minimize the effects of interest rate fluctuations on cash flows associated with its Credit Facility. The Company does not use derivative financial instruments for trading or speculative purposes. While interest rate swaps are subject to fluctuations in value, these fluctuations are generally offset by the estimated fair value of the underlying exposures being hedged. The Company follows the *Derivatives and Hedging* topic of ASC to account for its interest rate swaps, which requires that all derivatives be recorded on the consolidated balance sheet at fair value. This topic also requires that changes in the fair value be recorded each period in current earnings or other comprehensive income, depending on the effectiveness of hedge transaction. Interest rate swaps are designated as cash flow hedges. Changes in the fair value of a cash flow hedge, to the extent the hedge is effective, are recorded, net of tax, in other comprehensive income (loss), a component of stockholders' equity, until earnings are affected by the variability of the hedged cash flows. Cash flow hedge ineffectiveness, defined as the extent that the

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**17. DERIVATIVES (Continued)**

changes in the fair value of the derivative exceed the variability of cash flows of the forecasted transaction, is recorded currently in earnings.

In March 2008, the Company entered into an interest rate swap agreement (the “Swap”), maturing June 2011 involving the receipt of floating rate amounts in exchange for fixed rate interest payments over the life of the agreement, without exchange of the underlying principal amount. Under the Swap, the Company receives interest equivalent to the one-month LIBOR and pays a fixed rate of interest of 2.925 percent with settlements occurring monthly. The objective of the hedge is to eliminate the variability of cash flows in interest payments for \$85,000 of floating rate debt.

In December 2009, the Company elected to de-designate the Swap as a hedge prospectively. As a result, changes in fair value from the date of de-designation are recognized through interest expense and other in the consolidated statement of income. For the year ended March 31, 2010, \$298 was recognized as a reduction to interest expense and other for the change in fair value of the Swap from the date of de-designation through March 31, 2010.

As of March 31, 2010, the total notional amount of the Company’s receive-variable/pay-fixed interest rate swap was \$85,000. For the year ended March 31, 2010, \$2,252 of losses were reclassified into earnings from accumulated other comprehensive income.

The fair value of the interest rate swap of \$2,527 and \$3,429 for the fiscal years ended March 31, 2010 and 2009, respectively, were included in other noncurrent liabilities.

The effect of derivative instruments in the consolidated statements of income is as follows:

Cash Flow Hedges	Reclassification Adjustment Gain (Loss) Location (Effective Portion)	Amount of Gain (Loss) in OCI (Effective Portion) Year ended March 31,		Reclassification Adjustment Gain (Loss) Amount Year ended March 31,	
		2010	2009	2010	2009
Interest rate					
swap . . . . .	Interest expense and other	\$740	\$(1,825)	\$(2,252)	\$(566)

The amount of ineffectiveness on the interest rate swap is not significant. The Company estimates that approximately \$2,128 of losses presently in accumulated other comprehensive income (loss) will be reclassified into earnings during fiscal 2011.

During fiscal 2009, the Company entered into certain foreign currency derivative instruments that did not meet hedge accounting criteria and primarily were intended to protect against exposure related to fiscal 2009 acquisitions. The Company recognized a gain of \$1,411 in fiscal 2009, which is included in interest expense and other related to these instruments. No such instruments were outstanding in fiscal 2010.

**18. FAIR VALUE MEASUREMENTS**

The Company follows the *Fair Value Measurement and Disclosures* topic of the ASC, which requires additional disclosures about the Company’s assets and liabilities that are measured at fair value and establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
(Dollars in thousands, except per share data)

**18. FAIR VALUE MEASUREMENTS (Continued)**

minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities

Level 2 Unadjusted quoted prices in active markets for similar assets or liabilities, or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability

Level 3 Unobservable inputs for the asset or liability

The following table provides the liabilities reported at fair value in Other noncurrent liabilities and measured on a recurring basis as of March 31, 2010:

Description	Total	Fair Value Measurements Using:		
		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
		(Level 1)	(Level 2)	(Level 3)
Interest rate swap, net of tax of \$(935) . . . . .	\$ (1,592)	\$—	\$(1,592)	\$ —
Contingent earnout . . . . .	\$(10,500)	\$—	\$ —	\$(10,500)

The fair value of the interest rate swap contract is determined using observable current market information as of the reporting date such as the prevailing LIBOR-based interest rate. The fair value of the contingent earnout at the date of acquisition was \$10,500 which was estimated using the income approach based on significant inputs that are not observable in the market. Key assumptions included a discount rate and probability assessments of each milestone payment being made. The assumptions used to develop the estimate have not changed since the date of acquisition.

The *Financial Instruments* topic of the ASC requires disclosure of the estimated fair value of certain financial instruments. These estimated fair values as of March 31, 2010 and 2009 have been determined using available market information and appropriate valuation methodologies. Considerable judgment is required to interpret market data to develop estimates of fair value. The estimates presented are not necessarily indicative of amounts the Company could realize in a current market exchange. The use of alternative market assumptions and estimation methodologies could have had a material effect on these estimates of fair value.

Carrying amounts and the related estimated fair values of the Company's financial instruments not recorded at fair value in the financial statements are as follows:

	March 31, 2010		March 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt . . . . .	\$505,780	\$582,199	\$459,396	\$469,221

The fair value of the long-term debt was calculated based on interest rates available for debt with terms and maturities similar to the Company's existing debt arrangements.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**19. CUSTOMER CONCENTRATION**

Trade accounts receivable from The Boeing Company (“Boeing”) represented approximately 26% and 16% of total accounts receivable as of March 31, 2010 and 2009, respectively. The Company had no other significant concentrations of credit risk. Sales to Boeing for fiscal 2010 were \$388,975, or 30% of net sales, of which \$352,203 and \$36,772 were from the Aerospace Systems segment and the Aftermarket Services segment, respectively. Sales to Boeing for fiscal 2009 were \$284,687, or 23% of net sales, of which \$240,494 and \$44,193 were from the Aerospace Systems segment and the Aftermarket Services segment, respectively. Sales to Boeing for fiscal 2008 were \$259,516 or 23% of net sales, of which \$215,018 and \$44,498 were from the Aerospace Systems segment and the Aftermarket Services segment, respectively. No other single customer accounted for more than 10% of the Company’s net sales; however, the loss of any significant customer, including Boeing, could have a material adverse effect on the Company and its operating subsidiaries.

The Company currently generates a majority of its revenue from clients in the commercial aerospace industry, the military, and the regional airline industry. The Company’s growth and financial results are largely dependent on continued demand for its products and services from clients in these industries. If any of these industries experiences a downturn, clients in these sectors may conduct less business with the Company.

**20. COLLECTIVE BARGAINING AGREEMENTS**

Approximately 9.8% of the Company’s labor force is covered under collective bargaining agreements.

**21. SEGMENTS**

The Company is organized based on the products and services that it provides. Under this organizational structure, the Company has two reportable segments: the Aerospace Systems Group and the Aftermarket Services Group. The Company evaluates performance and allocates resources based on operating income of each reportable segment. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies (see Note 2). The Company’s CODM evaluates performance and allocates resources based upon review of segment information. The CODM utilizes operating income as a primary measure of profitability.

The Aerospace Systems segment consists of 39 operating locations, and the Aftermarket Services segment consists of 15 operating locations at March 31, 2010.

The Aerospace Systems segment consists of the Company’s operations that manufacture products primarily for the aerospace OEM market. The segment’s operations design and engineer mechanical and electromechanical controls, such as hydraulic systems, main engine gearbox assemblies, accumulators and mechanical control cables. The segment’s revenues are also derived from stretch forming, die forming, milling, bonding, machining, welding and assembly and fabrication of various structural components used in aircraft wings, fuselages and other significant assemblies. Further, the segment’s operations also design and manufacture composite assemblies for floor panels, environmental control system ducts, non-structural cockpit components and thermal acoustic insulation systems. These products are sold to various aerospace OEMs on a global basis.

**TRIUMPH GROUP, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**  
**(Dollars in thousands, except per share data)**

**21. SEGMENTS (Continued)**

The Aftermarket Services segment consists of the Company's operations that provide maintenance, repair and overhaul services to both commercial and military markets on components and accessories manufactured by third parties. Maintenance, repair and overhaul revenues are derived from services on auxiliary power units, airframe and engine accessories, including constant-speed drives, cabin compressors, starters and generators, and pneumatic drive units. In addition, the segment's operations repair and overhaul thrust reversers, nacelle components and flight control surfaces. The segment's operations also perform repair and overhaul services and supply spare parts for various types of cockpit instruments and gauges for a broad range of commercial airlines on a worldwide basis.

Segment operating income is total segment revenue reduced by operating expenses identifiable with that segment. Corporate includes general corporate administrative costs and any other costs not identifiable with one of the Company's segments.

The Company does not accumulate net sales information by product or service or groups of similar products and services, and therefore the Company does not disclose net sales by product or service because to do so would be impracticable.

**21. SEGMENTS (Continued)**

During fiscal years 2010, 2009 and 2008, the Company had foreign sales of \$255,975, \$266,646 and \$237,043, respectively. The Company reports as foreign sales those sales with delivery points outside of the United States.

**22. SELECTED CONSOLIDATING FINANCIAL STATEMENTS OF PARENT, GUARANTORS AND NON-GUARANTORS**

The Company's 2017 Notes are fully and unconditionally guaranteed on a joint and several basis by Guarantor Subsidiaries. The total assets, stockholder's equity, revenue, earnings and cash flows from operating activities of the Guarantor Subsidiaries exceeded a majority of the consolidated total of such items as of and for the periods reported. The only consolidated subsidiaries of the Company that are not guarantors of the 2017 Notes (the "Non-Guarantor Subsidiaries") are: (a) the receivables securitization special purpose entity, and (b) the foreign operating subsidiaries. The following tables present condensed consolidating financial statements including Triumph Group, Inc. (the "Parent"), the Guarantor Subsidiaries, and the Non-Guarantor Subsidiaries. Such financial statements include balance sheets as of March 31, 2010 and March 31, 2009, statements of operations for the fiscal years ended March 31, 2010, 2009 and 2008, and statements of cash flows for the fiscal years ended March 31, 2010, 2009 and 2008.

\* Difference due to rounding.

- (1) Gross profit includes depreciation.
- (2) The sum of the earnings for Continuing Operations and Discontinued Operations does not necessarily equal the earnings for the quarter due to rounding.
- (3) The sum of the diluted earnings per share for the four quarters does not necessarily equal the total year diluted earnings per share due to the dilutive effect of the potential common shares related to the convertible debt.

**24. SUBSEQUENT EVENTS**

On May 10, 2010, the Company entered into a \$535,000 revolving credit facility, subject to the closing of the Vought acquisition. This revolving credit facility will be available to partially fund the Vought acquisition and refinance any existing obligations under our existing Credit Facility, with a maturity date four years from the closing of the Vought acquisition.

(2) Deductions represent write-offs of related account balances.

**Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures**

**Evaluation of Disclosure Controls and Procedures**

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of March 31, 2010, we completed an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of March 31, 2010.

## MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Triumph Group, Inc. ("Triumph") is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Triumph's internal control system over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. The company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in condition, or that the degree of compliance with the policies or procedures may deteriorate.

Triumph's management assessed the effectiveness of Triumph's internal control over financial reporting as of March 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on management's assessment and those criteria, management believes that Triumph maintained effective internal control over financial reporting as of March 31, 2010.

Triumph's independent registered public accounting firm, Ernst & Young LLP, has audited the Company's effectiveness of Triumph's internal control over financial reporting. This report appears on page 100.

## **Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting**

To the Board of Directors and Stockholders of Triumph Group, Inc.

We have audited Triumph Group, Inc.'s internal control over financial reporting as of March 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Triumph Group Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Triumph Group, Inc. maintained, in all material respects, effective internal control over financial reporting as of March 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Triumph Group, Inc., as of March 31, 2010 and 2009, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended March 31, 2010 and our report dated May 14, 2010 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Philadelphia, Pennsylvania  
May 14, 2010

### **Changes in Internal Control Over Financial Reporting**

In addition to management's evaluation of disclosure controls and procedures as discussed above, we continue to review and enhance our policies and procedures for internal control over financial reporting.

We have developed and implemented a formal set of internal controls and procedures for financial reporting in accordance with the SEC's rules regarding management's report on internal controls. As a result of continued review and testing by management and by our internal and independent auditors, additional changes may be made to our internal controls and procedures. However, we did not make any changes to our internal control over financial reporting in our fourth quarter of fiscal 2010 that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

#### **Item 9B. Other Information**

None.

### **PART III**

#### **Item 10. Directors, Executive Officers and Corporate Governance**

The information required for directors is incorporated herein by reference to our definitive Proxy Statement for our 2010 Annual Meeting of Stockholders, which shall be filed within 120 days after the end of our fiscal year (the "2010 Proxy Statement"). Information required by this item concerning executive officers is included in Part I of this Annual Report on Form 10-K.

#### **Section 16(a) Beneficial Ownership Reporting Compliance**

The information required regarding Section 16(a) beneficial ownership reporting compliance is incorporated herein by reference to the 2010 Proxy Statement.

#### **Code of Business Conduct**

The information required regarding our Code of Business Conduct is incorporated herein by reference to the 2010 Proxy Statement.

#### **Stockholder Nominations**

The information required with respect to any material changes to the procedures by which stockholders may recommend nominees to the Company's board of directors is incorporated herein by reference to the 2010 Proxy Statement.

#### **Audit Committee and Audit Committee Financial Expert**

The information required with respect to the Audit Committee and Audit Committee financial experts is incorporated herein by reference to the 2010 Proxy Statement.

#### **Item 11. Executive Compensation**

The information required regarding executive compensation is incorporated herein by reference to the 2010 Proxy Statement.

**CERTIFICATION PURSUANT TO RULE 13a-14(a) OR 15d-14(a) OF  
THE SECURITIES AND EXCHANGE ACT OF 1934**

I, Richard C. Ill, certify that:

1. I have reviewed this annual report on Form 10-K of Triumph Group, Inc.;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's fourth fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
